Select one of the following series: 9-15

Series A

CHINLANG 101 Third-Year Modern Chinese, First Quarter 5

CHINLANG 102 Third-Year Modern Chinese, Second Quarter 5

CHINLANG 103 Third-Year Modern Chinese, Third Quarter 5

Series B

CHINLANG 101B Third-Year Modern Chinese for Bilingual Students, First Quarter

CHINLANG 102B Third-Year Modern Chinese for Bilingual Students, Second Quarter

CHINLANG 103B Third-Year Modern Chinese for Bilingual Students, Third Quarter

CHINLIT 125 Beginning Classical Chinese, First Quarter 2-5

V. Additional Courses (13-21)

CHINGEN 118	Constructing National History in East Asian Archaeology	
CHINGEN 119	Popular Culture and Casino Capitalism in China	
CHINGEN 121	Classical Chinese Rituals	
CHINGEN 131	Chinese Poetry in Translation	
CHINGEN 133	Literature in 20th-Century China (satisfies WIM requirement)	
CHINGEN 135	Chinese Bodies, Chinese Selves	
CHINGEN 140	Chinese Justice: Law, Morality, and Literature	
CHINGEN 141	Emergence of Chinese Civilization from Caves to Palaces	
CHINGEN 143	Images of Women in Ancient China and Greece	
CHINGEN 160	New Directions in the Study of Poetry and Literary Culture	
CHINGEN 169	A History of Chinese Drama	
CHINGEN 173	Chinese Language, Culture, and Society	
CHINGEN 194	The History and Culture of Peking Opera	
Four other content courses dealing with China, primarily at the 100 level, as approved by the undergraduate adviser		12-20
CHINGEN 198	Senior Colloquium in Chinese Studies	1
Total Units		65-96

- Students must also complete of a capstone essay of approximately 7,500 words, written either in a directed reading course or for one of the courses above.

Honors Program

Majors with an overall grade point average (GPA) of 3.5 may apply for the honors program by submitting a senior thesis proposal to the honors committee during Winter or Spring Quarter of the junior year. The proposal must include:

- a thesis outline
- a list of all relevant courses the student has taken or plans to take
- a preliminary reading list including a work or works in Chinese,
- the name of a faculty member who has agreed to act as honors supervisor.

If the proposal is approved:

1. Research begins in Spring Quarter of the junior year, or by Autumn Quarter of the senior year at the latest, when the student enrolls in CHINLIT 189A Honors Research.
2. In Winter Quarter of the senior year, students enroll for 5 units in independent study, CHINLIT 199 Individual Reading in Chinese, with the thesis supervisor while writing the thesis, and the finished essay (normally about 15,000 words) is submitted to the committee no later than April 15 of the senior year.
3. Students enroll in CHINGEN 198 Senior Colloquium in Chinese Studies in the senior year to polish and present their theses (instead of writing a capstone essay).
4. 8-11 units of credit are granted for honors course work and the finished thesis.

Bachelor of Arts in Japanese

These requirements are in addition to the University's basic requirements for the bachelor's degree. Letter grades are mandatory for required courses. The following courses as well as their prerequisites must be completed with a grade point average (GPA) of 2.0 or better:

		Units
I. Required Courses (10)		
CHINGEN 91	Traditional East Asian Culture: China	5
JAPANGEN 92	Traditional East Asian Culture: Japan	5
II. First-year Modern Japanese (0)		
JAPANLNG 1	First-Year Japanese Language, Culture, and Communication, First Quarter	
JAPANLNG 2	First-Year Japanese Language, Culture, and Communication, Second Quarter	
JAPANLNG 3	First-Year Japanese Language, Culture, and Communication, Third Quarter	
JAPANLNG 5	Intensive First-Year Japanese Language	
III. Second-year Modern Japanese (0)		
JAPANLNG 21	Second-Year Japanese Language, Culture, and Communication, First Quarter	
JAPANLNG 22	Second-Year Japanese Language, Culture, and Communication, Second Quarter	
JAPANLNG 23	Second-Year Japanese Language, Culture, and Communication, Third Quarter	
JAPANLNG 20	Intensive Second-Year Japanese	
IV. Third-year Modern Japanese (15)		
JAPANLNG 101	Third-Year Japanese Language, Culture, and Communication, First Quarter	5
JAPANLNG 102	Third-Year Japanese Language, Culture, and Communication, Second Quarter	5
JAPANLNG 103	Third-Year Japanese Language, Culture, and Communication, Third Quarter	5
V. Additional Courses (43-61)		
Three JAPANGEN or JAPANLIT courses at the 100 level with one in each of the following areas: pre-modern Japan, modern Japan, and Japanese linguistics. The following courses are offered this year:		9-15
JAPANGEN 121	Translating Japan, Translating the West	
JAPANGEN 125	Emotions of Japanese Cinema (Postindustrial Version)	4
JAPANGEN 137	Classical Japanese Literature in Translation	
JAPANGEN 138	Introduction to Modern Japanese Literature and Culture (required course; satisfies WIM requirement)	3-4
JAPANGEN 141	Japanese Performance Traditions	3-4
JAPANLIT 157	Points in Japanese Grammar	2-4
JAPANLIT 170	The Tale of Genji and Its Historical Reception	
JAPANGEN 184	Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting	4
JAPANGEN 187	Romance, Desire, and Sexuality in Modern Japanese Literature	

JAPANLIT 287	Pictures of the Floating World: Images from Japanese Popular Culture	5
Four other content courses dealing with Japan primarily at the 100 level, as approved by the undergraduate adviser		12-20
JAPANGEN 198	Senior Colloquium in Japanese Studies	1
Total Units		68-86

- Students must also complete of a capstone essay of approximately 7,500 words, written either in a directed reading course or for one of the courses above.
- JAPANGEN 198 Senior Colloquium in Japanese Studies may be used to satisfy the Japanese linguistics requirement.
- JAPANGEN 51 Japanese Business Systems/ JAPANGEN 251 Japanese Business Systems can not counted toward the major.
- Students who complete third-year Japanese at KCJS satisfy the language requirement but are required to take a placement test if they wish to enroll in:
 - JAPANLNG 211 Fourth-Year Japanese, First Quarter
 - JAPANLNG 212 Fourth-Year Japanese, Second Quarter
 - JAPANLNG 213 Fourth-Year Japanese, Third Quarter

Students who want to concentrate in Chinese or Japanese linguistics can substitute the four other content courses primarily at the 100 level with LINGUIST 1 Introduction to Linguistics and three other linguistics courses at the 100 level, as approved by the undergraduate adviser in consultation with the student's academic adviser.

These requirements are in addition to the University's basic requirements for the bachelor's degree. Letter grades are mandatory for required courses.

Honors Program

Majors with an overall grade point average (GPA) of 3.5 may apply for the honors program by submitting a senior thesis proposal to the honors committee during Winter or Spring Quarter of the junior year. The proposal must include a thesis outline, a list of all relevant courses the student has taken or plans to take, a preliminary reading list including a work or works in Chinese or Japanese, and the name of a faculty member who has agreed to act as honors supervisor.

If the proposal is approved:

- research begins in spring quarter of the junior year, or by autumn quarter of the senior year at the latest, when the student enrolls in JAPANLIT 189A Honors Research
- In winter quarter of the senior year, students enroll for five units in independent study with the thesis supervisor while writing the thesis, and the finished essay (normally about 15,000 words) is submitted to the committee no later than April 15 of the senior year. JAPANLIT 189B Honors Research
- Students enroll in the Senior Colloquium in the senior year to polish and present their theses (instead of writing a capstone essay). JAPANGEN 198 Senior Colloquium in Japanese Studies
- Eight to eleven units of credit are granted for honors course work and the finished thesis.

Bachelor of Arts in East Asian Studies

Majors in East Asian Studies begin or continue the mastery of Chinese, Japanese, or Korean. Within the humanities or social sciences, they may focus on a particular sub-region, for example, Japan; South China, Hong Kong, and Taiwan; or western China and Central Asia; or a substantive issue involving the region as a whole, such as environmental protection, public health, rural development, historiography, cultural expression, or

religious beliefs. The major seeks to reduce the complexity of a region to intellectually manageable proportions and illuminate the interrelationships among the various facets of a society.

Potential majors must submit a Student Proposal for a Major in East Asian Studies form not later than the end of the first quarter of the junior year. Majors must complete at least 75 units of course work on China, Japan, and/or Korea in addition to a one unit Senior Colloquium. Courses to be credited toward major requirements must be completed with a grade of 'C' or better. Requirements are:

1. Language: proficiency in Chinese, Japanese, or Korean language at the second-year level or above, to be met either by course work or examination. Students who meet the requirement through examination are still expected to take an additional 15 units of language at a higher level, or literature courses taught in the language, or the first year in an additional Asian language. No more than 30 units of language courses are counted toward the major.
2. Area Courses: a minimum of three area courses, one in each category below (courses listed are examples and by no means exhaustive; if uncertain whether a particular course fits into one of these categories, contact the department to check.

		Units
A.		
Art, Literature, and Religion		
ARTHIST 2	Asian Art and Culture	5
ARTHIST 187	Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868	4
ARTHIST 287A	The Japanese Tea Ceremony: The History, Aesthetics, and Politics Behind a National Pastime	5
CHINGEN 91	Traditional East Asian Culture: China	5
JAPANGEN 92	Traditional East Asian Culture: Japan	5
KORGEN 101	Korean Culture in the New Millennium	4
KORGEN 120	Modern and Contemporary Korean literature in translation	4
KORGEN 140	Children's Literature and Childhood in East Asia	3-5
RELIGST 18	Zen Buddhism	4
RELIGST 104	The Daoist Body	4
RELIGST 114B	Religions of Korea	1-4
RELIGST 150	The Lotus Sutra: Story of a Buddhist Book	4
B.		
History		
HISTORY 93	Late Imperial China	3
HISTORY 94B	Japan in the Age of the Samurai	5
HISTORY 98	The History of Modern China	3
HISTORY 106A	Global Human Geography: Asia and Africa	5
HISTORY 191C	Early Imperial China	5
HISTORY 191D	China: The Northern and Southern Dynasties	5
HISTORY 192	China: The Early Empires	3-5
HISTORY 193	Late Imperial China	5
HISTORY 194B	Japan in the Age of the Samurai	5

HISTORY 194D	Japan and the World, 1543-1868	4-5
HISTORY 195	Modern Korean History	5
HISTORY 195C	Modern Japanese History: From Samurai to Pokemon	5
HISTORY 198	The History of Modern China	5
HISTORY 198G	Beijing, Shanghai, and the Structure of China	3-5

C. Units

Contemporary Social Sciences		
ANTHRO 25N	Contemporary Japanese Popular Culture	1-3
ANTHRO 77	Japanese Society and Culture	5
ANTHRO 152A	Urban Poverty and Inequality in Contemporary China	5
POLISCI 140L	China in World Politics	5
POLISCI 148	Chinese Politics: The Transformation and the Era of Reform	5
OSPKYOTO 215X	The Political Economy of Japan	4-5
SOC 107	China After Mao	5
SOC 167A	Asia-Pacific Transformation	5

3. Substantive Concentration: additional courses on East Asia, one of which must be a seminar above the 100 level. Majors are encouraged to distribute their course work among at least three disciplines and two subregions in Asia. The subregions need not be traditionally defined. Examples include China, Japan, or Korea; or, in recognition of the new subregions which are emerging, South China and Taiwan, or Central Asia. At least four courses must have a thematic coherence built around a topic. Examples include:

- East Asian religions and philosophies
- Culture and society of modern Japan
- Ethnic identities in East Asia
- Arts and literature in late imperial China
- Foreign policy in East Asia
- Social transformation of modern Korea
- China's political economy

term-Spring=on&filter-term=Summer=on&filter-coursestatus=Active=on&collapse=&filter-catalognumber-JAPANLIT=on&filter-catalognumber-JAPANLIT=on), and KOREGEN (<https://explorecourses.stanford.edu/search?q=KOREGEN&view=catalog&page=0&catalog=71&filter-term=Autumn=on&filter-term=Winter=on&filter-term=Spring=on&filter-term=Summer=on&filter-coursestatus=Active=on&collapse=&filter-catalognumber-KOREGEN=on&filter-catalognumber-KOREGEN=on>).

4. Capstone Essay: completion of a paper of approximately 7,500 words, written either in a directed reading course or for one of the courses in item 3 above, which should be built upon the student's thematic interest. CHINGEN 198 Senior Colloquium in Chinese Studies or JAPANGEN 198 Senior Colloquium in Japanese Studies, Senior Colloquium (1 unit), is required of majors during their senior year to develop and present the capstone essay or honors paper.
5. At least one quarter overseas in the country of focus.
6. An East Asian Studies course that satisfies the University Writing in the Major requirement (WIM) should be completed before beginning the senior essay. This year, CHINGEN 133 Literature in 20th-Century China and JAPANGEN 138 Introduction to Modern Japanese Literature and Culture satisfy the WIM requirement.
7. The courses for the major must add up to at least 76 units, comprised of the one-unit Senior Colloquium and at least 75 additional units, all taken for a letter grade. Courses must be at least three units to be counted towards the degree.

These requirements are in addition to the University's basic requirements for the bachelor's degree. Letter grades are mandatory for required courses.

Honors Program

Majors with an overall grade point average (GPA) of 3.5 may apply for the honors program by submitting a senior thesis proposal to the honors committee during Winter or Spring Quarter of the junior year. The proposal must include a thesis outline, a list of all relevant courses the student has taken or plans to take, a preliminary reading list including a work or works in Chinese or Japanese, and the name of a faculty member who has agreed to act as honors supervisor.

If the proposal is approved, research begins in Spring Quarter of the junior year, or by Autumn Quarter at the latest, when the student enrolls in 2-5 units of credit for independent study. In Winter Quarter, students enroll for five units in independent study with the thesis supervisor while writing the thesis, and the finished essay (normally about 15,000 words) is submitted to the committee no later than April 15 of the senior year. Students enroll in the Senior Colloquium, CHINGEN 198 Senior Colloquium in Chinese Studies or JAPANGEN 198 Senior Colloquium in Japanese Studies, in the senior year to polish and present their theses (instead of writing a capstone essay). Eight to eleven units of credit are granted for honors course work and the finished thesis. One advanced level colloquium or seminar dealing with China, Japan, or Korea is required as well.

Overseas Studies

Courses approved for the East Asian Languages and Cultures majors which are taught overseas can be found in the "Overseas Studies (<http://www.stanford.edu/dept/registrar/bulletin/5090.htm>)" section of this Bulletin, or in the Overseas Studies office, Sweet Hall. To find course offerings in ExploreCourses, click on OSPKYOTO (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=OSPKYOTO&filter-catalognumber-OSPKYOTO=on>) or OSPBEIJ (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=OSPBELJ&filter-catalognumber-OSPBELJ=on>).

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/>)

schoolofhumanitiesandsciences/eastasianlanguagesandcultures/http://explorecourses.stanford.edu) web site or the Bing Overseas Studies (http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/eastasianlanguagesandcultures/http://bosp.stanford.edu) web site. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

Minor in Chinese or Japanese

The undergraduate minors in Chinese and Japanese have been designed to give students majoring in other departments an opportunity to gain a substantial introduction to Chinese or Japanese language, as well as an introduction to the culture and civilization of East Asia. The minors consist of a minimum of 20 units from the following requirements:

1. A. Completion of language study through the second-year level for students with no previous training in Chinese or Japanese.
- B. **Units**
 Select one of the following Series: 9-15

Series A	
CHINLANGSecond-Year Modern Chinese, First 21 Quarter	
CHINLANC Second-Year Modern Chinese, Second 22 Quarter	
CHINLANGSecond-Year Modern Chinese, Third 23 Quarter	
Series B	
CHINLANGSecond-Year Modern Chinese for 21B Bilingual Students, First Quarter	
CHINLANC Second-Year Chinese for Bilingual 22B Students, Second Quarter	
CHINLANGSecond-Year Chinese for Bilingual 23B Students, Third Quarter	
CHINLANC Intensive Second-Year Modern Chinese 25	
Series C	
JAPANLNC Second-Year Japanese Language, Culture, 21 and Communication, First Quarter	
JAPANLNGSecond-Year Japanese Language, Culture, 22 and Communication, Second Quarter	
JAPANLNC Second-Year Japanese Language, Culture, 23 and Communication, Third Quarter	
JAPANLNGIntensive Second-Year Japanese 20	
- C. Students who already have first-year competence in Chinese or Japanese must complete the third-year course.
- D. **Units**
 Select one of the following Series: 9-15

Series A	
CHINLANGThird-Year Modern Chinese, First Quarter 101	
CHINLANC Third-Year Modern Chinese, Second 102 Quarter	
CHINLANGThird-Year Modern Chinese, Third Quarter 103	
Series B	
CHINLANGThird-Year Modern Chinese for Bilingual 101B Students, First Quarter	

CHINLANC Third-Year Modern Chinese for Bilingual 102B Students, Second Quarter	
CHINLANGThird-Year Modern Chinese for Bilingual 103B Students, Third Quarter	
Series C	
JAPANLNGThird-Year Japanese Language, Culture, 101 and Communication, First Quarter	
JAPANLNC Third-Year Japanese Language, Culture, 102 and Communication, Second Quarter	
JAPANLNGThird-Year Japanese Language, Culture, 103 and Communication, Third Quarter	

- E. Students who already have a competence at the second-year level may fulfill the language component of the minor by taking three courses in the department using materials in either Chinese or Japanese. These courses may be language courses such as the third-year sequence mentioned above, the fourth-year language sequence, or they may be advanced literature and linguistics courses, depending on the capabilities and interests of the student.

2. The core courses:
3. **Units**

CHINGEN 91 Traditional East Asian Culture: China	5
JAPANGEN 92 Traditional East Asian Culture: Japan	5
4. Two courses selected from among the department's other offerings in the literature, linguistics, and civilization of a given minor area (CHINGEN, CHINLIT, JAPANGEN, JAPANLIT). All courses for the minor must be taken for a letter grade and completed with a GPA of 2.0 or better.
5. **Units**

CHINGEN 118 Constructing National History in East Asian Archaeology	3-5
CHINGEN 119 Popular Culture and Casino Capitalism in China	3-4
CHINGEN 121 Classical Chinese Rituals	3-5
CHINGEN 131 Chinese Poetry in Translation	4
CHINGEN 132 Chinese Fiction and Drama in Translation	4
CHINGEN 133 Literature in 20th-Century China	4-5
CHINGEN 140 Chinese Justice: Law, Morality, and Literature	3-5
CHINGEN 141 Emergence of Chinese Civilization from Caves to Palaces	3-4
CHINGEN 150 Sex, Gender, and Power in Modern China	3-5
CHINGEN 173 Chinese Language, Culture, and Society	4
JAPANGEN 121 Translating Japan, Translating the West	3-4
JAPANGEN 125 Emotions of Japanese Cinema (Postindustrial Version)	4
JAPANGEN 137 Classical Japanese Literature in Translation	4
JAPANGEN 138 Introduction to Modern Japanese Literature and Culture	3-4
JAPANGEN 141 Japanese Performance Traditions	4
JAPANGEN 160 Early Modern Japan: The Floating World of Chikamatsu	4
JAPANGEN 184 Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting	4
JAPANGEN 187 Romance, Desire, and Sexuality in Modern Japanese Literature	3-4

Minor in East Asian Studies

The goal of the minor in East Asian Studies is to provide the student with a broad background in East Asian culture as a whole, while allowing the student to focus on a geographical or temporal aspect of East Asia. The minor may be designed from the following, for a total of six courses and a minimum of 20 units. All courses should be taken for a letter grade.

1. Three area courses, one in each category (see East Asian Studies major for listing of area courses).
2. One undergraduate seminar above the 100 level and two other courses from among those listed as approved for East Asian Studies majors, including literature courses but excluding language courses. These courses are listed under East Asian Studies (EASTASN) in this bulletin, and under CHINGEN (<https://explorecourses.stanford.edu/search?q=CHINGEN&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-CHINGEN=on&filter-catalognumber-CHINGEN=on>), CHINLIT (<https://explorecourses.stanford.edu/search?q=CHINLIT&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-CHINLIT=on&filter-catalognumber-CHINLIT=on>), JAPANGEN (<https://explorecourses.stanford.edu/search?q=JAPANGEN&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-JAPANGEN=on&filter-catalognumber-JAPANGEN=on>), JAPANLIT (<https://explorecourses.stanford.edu/search?q=JAPANLIT&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-JAPANLIT=on&filter-catalognumber-JAPANLIT=on>), and KORGEN (<https://explorecourses.stanford.edu/search?q=KORGEN&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-KORGEN=on&filter-catalognumber-KORGEN=on>).

Applications for the minor should be submitted online through Axess and are due no later than the second quarter of the junior year.

Master of Arts Programs in East Asian Languages and Cultures

1. The M.A. is granted in Chinese and in Japanese. The normal length of study for the degree is two years.
2. No financial aid is available for those applicants who wish to obtain the M.A. only.
3. Students who wish to spend the first year of graduate study at the Beijing or Yokohama centers must obtain department approval first.
4. Candidates for the degree must be in residence at Stanford in California during the final quarter of registration.
5. A thesis or an annotated translation of a text of suitable literary or historical worth is required for the M.A. degree. Under special circumstances, a paper approved by the graduate adviser may be substituted.

6. The University's basic requirements for the master's degree, including a 45-unit minimum requirement, are given in the "Graduate Degrees (p. 38)" section of this Bulletin. Department requirements are set forth below.

Master of Arts in Chinese

The M.A. program in Chinese is designed for students with strong academic records and an interest in pursuing postgraduate research in Chinese literature, philosophy, or linguistics, but who have not yet acquired the language skills or disciplinary foundation necessary to enter a Ph.D. program. (Note: Students who wish to pursue advanced language training in preparation for post-graduate research in other fields of Chinese studies are referred to the interdisciplinary M.A. program in the Center for East Asian Studies.)

The candidate must:

1. Demonstrate proficiency in both modern and classical Chinese through completion of one of the tracks of third-year Chinese with a letter grade of 'B' or higher :

		Units
CHINLANG 103	Third-Year Modern Chinese, Third Quarter	5
CHINLANG 103B	Third-Year Modern Chinese for Bilingual Students, Third Quarter	3

3. One of three advanced classical Chinese courses:

		Units
CHINLIT 221	Advanced Classical Chinese: Philosophical Texts	3-5
CHINLIT 222	Advanced Classical Chinese: Historical Narration	2-5
CHINLIT 223	Advanced Classical Chinese: Literary Essays	3-5

Qualified students may, upon consultation with the graduate adviser, be permitted to certify that they have attained the equivalent level of proficiency by passing examinations.completion with a letter grade of 'B' or higher of third-year Chinese through one of these and Classical Chinese.

5. Complete the following for a letter grade of 'B' or higher:

		Units
CHINGEN 201	Teaching Chinese Humanities	1

6. Four courses in Chinese literature or linguistics numbered between CHINLIT 230 and 292:

		Units
CHINLIT 261	Sources of Chinese Poetry	4
CHINLIT 263	Lyric (Shih) I	2-4
CHINLIT 265	Major Figures in Classical Chinese Shi Poetry	2-4
CHINLIT 266	Chinese Ci Poetry (Song Lyrics)	4
CHINLIT 272	Traditional Chinese Fiction: Novels	2-4
CHINLIT 273	Chinese Drama	2-4
CHINLIT 274	Modern Chinese Novel: Theory, Aesthetics, History	4
CHINLIT 279	For Love of Country: National Narratives in Chinese Literature and Film	3-5
CHINLIT 289	The Poetics and Politics of Affect in Modern China	3-5
CHINLIT 290	Chinese Cultural Revolution: Performance, Politics, and Aesthetics	4
CHINLIT 291	The Structure of Modern Chinese	2-4
CHINLIT 292	The History of Chinese	4

- 8. Two upper-division or graduate-level courses in fields such as Chinese anthropology, art history, history, philosophy, politics, and religion, as approved by the graduate adviser in consultation with the student's individual adviser
- 9. A master's thesis, enroll in:
- 10. CHINLIT 299 Master's Thesis or Translation

Units
1-5

Master of Arts in Chinese, Archaeology Track

The M.A. in Chinese, Archeology track, is designed for students an interest in pursuing postgraduate research in Chinese archaeology who have not yet acquired the language skills or disciplinary foundation necessary to enter a Ph.D. program. The track is declared on Axxess; it appears on the transcript but not on the diploma.

Degree Requirements

A candidate must

1. Demonstrate proficiency in both modern and classical Chinese by completing:
 - A. third-year Chinese through CHINLANG 103 Third-Year Modern Chinese, Third Quarter with a minimum grade of 'B+'.
 - B. one of three advanced classical Chinese courses:

CHINLIT 221	Advanced Classical Chinese: Philosophical Texts	3-5
CHINLIT 222	Advanced Classical Chinese: Historical Narration	2-5
CHINLIT 223	Advanced Classical Chinese: Literary Essays	3-5
 - C. Qualified students may, upon consultation with the graduate adviser, be permitted to certify that they have attained the equivalent level of proficiency by passing examinations or presenting documentary evidence of attendance at a bachelor's institution in which Chinese is the language of instruction. Exemptions may also be granted to students who study prehistoric archaeology. Instead, these students should take required course work relating to archaeology which is offered in the Stanford Archaeology Center. For details students should consult with the supervisor or the graduate adviser.

Units

2. Complete 45 units, including the following four graduate level CHINGEN or ANTHRO subject code courses appropriate to the Chinese Archaeology track. All courses must be passed with a minimum grade of 'B+'.
3.

CHINGEN 241	Emergence of Chinese Civilization from Caves to Palaces	3-4
CHINGEN 218	Constructing National History in East Asian Archaeology	3-5
ANTHRO 303	Introduction to Archaeological Theory	5
ANTHRO 307	Archaeological Methods and Research Design	5
4. Two upper-division or graduate-level courses in fields such as Chinese anthropology, archaeology, art history, history, philosophy, political science and religious studies, as approved by the graduate adviser in consultation with the student's individual adviser.
5. Master's Thesis: CHINLIT 299 Master's Thesis or Translation

Master of Arts in Japanese

The M.A. program in Japanese is designed for students with strong academic records and an interest in pursuing postgraduate research in Japanese literature, cultural history, or linguistics, but who have not yet acquired the language skills or disciplinary foundation necessary to enter a Ph.D. program. *Note:* Students who wish to pursue advanced language training in preparation for postgraduate research in other fields of Japanese studies are referred to the interdisciplinary M.A. program in the Center for East Asian Studies.

The candidate must:

1. Complete third-year Japanese:

JAPANLNG 101	Third-Year Japanese Language, Culture, and Communication, First Quarter	5
JAPANLNG 102	Third-Year Japanese Language, Culture, and Communication, Second Quarter	5
JAPANLNG 103	Third-Year Japanese Language, Culture, and Communication, Third Quarter	5

Units

2. Complete one of the following for a letter grade of 'B' or higher:
3.

Fourth-year Japanese		9-15
JAPANLNG 211	Fourth-Year Japanese, First Quarter	
JAPANLNG 212	Fourth-Year Japanese, Second Quarter	
JAPANLNG 213	Fourth-Year Japanese, Third Quarter	
Classical Japanese		5-10
JAPANLIT 246	Introduction to Premodern Japanese	
JAPANLIT 247	Readings in Premodern Japanese	

Units

Note: qualified students may, upon consultation with the graduate adviser, be permitted to certify that they have attained the equivalent level of proficiency by passing examinations.

4. Complete the following with a letter grade of 'B' or higher:
 - A. four adviser-approved courses in Japanese literature, culture, or linguistics from among the offerings of the Department of East Asian Languages and Cultures, not including courses taken to fulfill the language requirement
 - B.

JAPANLIT 235	Academic Readings in Japanese I	2-4
JAPANLIT 236	Academic Readings in Japanese II	2-4
JAPANLIT 246	Introduction to Premodern Japanese	3-5
JAPANLIT 257	Points in Japanese Grammar	2-4
JAPANLIT 270	The Tale of Genji and Its Historical Reception	4
JAPANLIT 276	Modern Japanese Short Stories	2-4
JAPANLIT 279	Research in Japanese Linguistics	2-4
JAPANLIT 281	Japanese Pragmatics	2-4
JAPANLIT 287	Pictures of the Floating World: Images from Japanese Popular Culture	5

Units

JAPANLIT 296	Modern Japanese Literature	2-5
JAPANLIT 298	The Theory and Practice of Japanese Literary Translation	2-5
JAPANLIT 396	Seminar: Modern Japanese Literature	2-5

C. **Units**

JAPANLIT 201	Proseminar: Introduction to Graduate Study in Japanese	2-5
-----------------	---	-----

D. two upper-division or graduate-level courses in fields such as Japanese anthropology, art history, history, philosophy, politics, and religion, as approved by the graduate adviser in consultation with the student's individual adviser

E. a master's thesis; enroll in:

F. **Units**

JAPANLIT 299	Master's Thesis or Translation	1-5
-----------------	--------------------------------	-----

Coterminal B.A. and M.A. Programs in East Asian Languages and Cultures

With department approval, students may be able to combine programs for the B.A. and M.A. degrees in Chinese or Japanese. Prospective applicants must consult with the graduate adviser. For details, see the "Graduate Degrees (p. 38)" section of this bulletin or at the Registrar's (<http://registrar.stanford.edu/shared/publications.htm#Coterm>) web site.

For those interested in a coterminal program with an M.A. in East Asian Studies, please contact the Center for East Asian Studies for application procedures and deadlines, or visit the CEAS (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/eastasianlanguagesandcultures/http://ceas.stanford.edu>) web site and the "East Asian Studies (p. 370)" section of this bulletin.

Doctor of Philosophy Programs in East Asian Languages and Cultures

The Ph.D. degree is granted in Chinese and Japanese. Candidates for the degree are expected to acquire a thorough familiarity with Chinese or Japanese literature and linguistics, an adequate command of relevant languages, and a comprehensive knowledge of East Asian history, social institutions, and thought. The University's basic requirements for the Ph.D. are given in the "Graduate Degrees (p. 38)" section of this bulletin. Department requirements are set forth below.

Admission to Candidacy

Students admitted with a B.A. only are evaluated by the graduate faculty during the Autumn Quarter of their second year at Stanford. The evaluation is based on written work and at least a portion of the M.A. thesis or translation. If the faculty have serious doubts about a student's ability to work for the Ph.D., they convey this to the student. During the subsequent Spring Quarter, the faculty formally decide whether a student should be admitted to candidacy for the Ph.D. or be terminated. In the case of a student who already has an M.A. in Chinese or Japanese when admitted to the department, the evaluation takes place in the Spring Quarter of the student's first year. If a student goes to the Inter-University Program

for Chinese Language Studies (IUP) at Tsinghua University or the Inter-University Center (IUC) for Japanese Language Studies in Yokohama during the first two years of study, the department may consider an extension for admission to candidacy. The timing of the evaluation of a student admitted with an M.A. in East Asian Studies is decided on an individual basis.

Admission to candidacy does not mean that the student has fulfilled all requirements for the degree except the dissertation, but that the department faculty consider the student qualified to pursue a program of study leading to the Ph.D. and that, subject to continued satisfactory progress, the student's status in this department is secure.

Doctor of Philosophy in Chinese

The Ph.D. program in Chinese is designed to prepare students for a doctoral degree in Chinese literature, philosophy, or linguistics. Applicants must have a minimum of three years of Chinese language study at Stanford or the equivalent to be considered for admission. Ph.D. students will complete the M.A. as described above on the way to advancing to Ph.D. candidacy (see department guidelines for admission to candidacy above). The majority of required course work for Ph.D. students demands the ability to read primary and secondary materials in Chinese. Advanced standing may be considered for students entering the Ph.D. program who have already completed an M.A. in Chinese literature or linguistics elsewhere only in cases when the level of prior course work and research is deemed equivalent to departmental requirements for the Ph.D. All courses must be taken for a letter grade.

A candidate must fulfill the following requirements:

- Complete advanced classical Chinese through CHINLIT 223 Advanced Classical Chinese: Literary Essays and the department's requirements for the M.A. in Chinese.
- Demonstrate proficiency in at least one supporting language, to be chosen in consultation with the primary adviser according to the candidate's specific research goals. Reading proficiency must be certified through a written examination or an appropriate amount of course work, to be determined on a case-by-case basis. When deemed necessary by the student's adviser(s), working knowledge of a third language may also be required.
- | | | |
|--|---|--------------|
| | | Units |
| | CHINGEN 201 Teaching Chinese Humanities | 1 |
- Complete two relevant seminars at the 300 level. These seminars must be in different subjects.
- CHINLIT 371 Aesthetics, Politics, and Literary Criticism: East and West 2-5
- Pass a set of three comprehensive written examinations, one of which tests the candidate's methodological competence in the relevant discipline. The remaining two fields are chosen, with the approval of the graduate adviser in consultation with the student's individual adviser, from the following: archaeology, anthropology, art, Chinese literature, history, Japanese literature, linguistics, philosophy, and religion. With the adviser's approval, a Ph.D. minor in a supporting field may be deemed equivalent to the completion of one of these three examinations.
- Demonstrate pedagogical proficiency by serving as a teaching assistant for a minimum of one quarter, and taking DLCL 301 The Learning and Teaching of Second Languages.
- Pass the University Oral Examination—General regulations governing the oral examination are found in the "Graduate Degrees (p. 38)" section of this Bulletin. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.

- Submit a dissertation demonstrating ability to undertake original research based on primary and secondary materials in Chinese.

Doctor of Philosophy in Chinese, Archaeology track

1. Complete one of three advanced classical Chinese courses and the requirements for the M.A. Qualified students may, upon consultation with the graduate adviser, be permitted to certify that they have attained the equivalent level of proficiency by passing examinations or presenting documentary evidence. Exemptions may be granted to students who study prehistoric archaeology. Instead, these students should take coursework offered in the Stanford Archaeology Center. Consult with graduate adviser.

		Units
CHINLIT 221	Advanced Classical Chinese: Philosophical Texts	3-5
CHINLIT 222	Advanced Classical Chinese: Historical Narration	2-5
CHINLIT 223	Advanced Classical Chinese: Literary Essays	2-5

2. Demonstrate proficiency in at least one supporting foreign language (in addition to Chinese and English), to be chosen in consultation with the primary adviser according to the candidate's specific research goals. Reading proficiency must be certified through a written examination or an appropriate amount of coursework, to be determined on a case-by-case basis.

3. Six graduate level CHINGEN or ANTHRO courses appropriate to the Chinese Archaeology track, as approved by the adviser:

		Units
CHINGEN 118	Constructing National History in East Asian Archaeology	3-5
CHINGEN 141	Emergence of Chinese Civilization from Caves to Palaces	3-4
ANTHRO 303	Introduction to Archaeological Theory	5
ANTHRO 308	Proposal Writing Seminar	5
ANTHRO 307	Archaeological Methods and Research Design	5
ANTHRO 310G	Introduction to Graduate Studies	2
ANTHRO 444	Anthropology Colloquium: Graduate Seminar	1

4. Serve as a teaching assistant for two quarters and research assistant in an archaeology laboratory for two quarters.

5. Pass qualifying examinations in Chinese archaeology.

6. Carry out fieldwork related to dissertation research.

7. Pass University oral examination. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.

8. Submit a dissertation demonstrating ability to undertake original research based on primary materials in Chinese or data related to China.

Doctor of Philosophy in Japanese

The Ph.D. program in Japanese is designed to prepare students for a doctoral degree in Japanese literature, cultural history, or linguistics. Applicants must have a minimum of three years of Japanese language study at Stanford or the equivalent to be considered for admission. Ph.D. students will complete an M.A. on the way to advancing to Ph.D. candidacy (see department guidelines for admission to candidacy above). The majority of required course work for Ph.D. students demands the ability to read primary and secondary materials in Japanese. Advanced standing may be considered for students entering the Ph.D. program who have already completed an M.A. in Japanese literature or linguistics elsewhere only in cases when the level of prior course work and research is deemed

equivalent to departmental requirements for the Ph.D. All courses must be taken for a letter grade.

A candidate must fulfill the following requirements:

- Demonstrate proficiency in both modern and classical Japanese language by completing the following courses, or by demonstrating an equivalent level of linguistic attainment by passing the appropriate certifying examinations. fourth-year Japanese through:

		Units
A.		
JAPANLNG 213	Fourth-Year Japanese, Third Quarter	3-5

classical Japanese through:

		Units
B.		
JAPANLIT 246	Introduction to Premodern Japanese	3-5
JAPANLIT 247	Readings in Premodern Japanese	2-5

- Demonstrate proficiency in at least one supporting language, to be chosen in consultation with the primary adviser according to the candidate's specific research goals. Reading proficiency must be certified through a written examination or an appropriate amount of course work, to be determined on a case-by-case basis. When deemed necessary by the student's adviser(s), working knowledge of a third language may also be required.

Students concentrating in classical Japanese literature are normally expected to fulfill this requirement by completing kanbun:

		Units
A.		
	first-year classical Chinese:	

		Units
B.		
CHINLIT 205	Beginning Classical Chinese, First Quarter	2-5
CHINLIT 206	Beginning Classical Chinese, Second Quarter	2-5
CHINLIT 207	Beginning Classical Chinese, Third Quarter	2-5

- Complete eight adviser-approved courses numbered above 200 from among the offerings of the Department of East Asian Languages and Cultures. At least four of these eight courses must be advanced seminars numbered above 300. At least one of these eight courses must deal with Japanese linguistics. For students focusing on modern literature, at least two of these eight courses must deal with premodern material, and for students focusing on premodern literature, at least two of the eight courses must deal with modern material.

		Units
JAPANLIT 257	Points in Japanese Grammar	2-4
JAPANLIT 270	The Tale of Genji and Its Historical Reception	4
JAPANLIT 276	Modern Japanese Short Stories	2-4
JAPANLIT 279	Research in Japanese Linguistics	2-4
JAPANLIT 281	Japanese Pragmatics	2-4
JAPANLIT 287	Pictures of the Floating World: Images from Japanese Popular Culture	5
JAPANLIT 296	Modern Japanese Literature	2-5
JAPANLIT 298	The Theory and Practice of Japanese Literary Translation	2-5
JAPANLIT 350	Japanese Historical Fiction	3-5
JAPANLIT 377	Seminar: Structure of Japanese	2-4
JAPANLIT 381	Topics in Pragmatics and Discourse Analysis	2-4

- Complete two upper-division or graduate-level courses in two supporting fields, for a total of four courses outside of Japanese literature or linguistics. Supporting fields, to be determined in consultation with the student's primary adviser, may include Japanese anthropology, art, history, philosophy, politics, and religion, Chinese literature, comparative literature, etc.

6.		Units
	JAPANLIT 201 Proseminar: Introduction to Graduate Study in Japanese	2-5

- Pass a comprehensive qualifying examination that tests the candidate's breadth and depth in the primary field of research and methodological competence in the relevant discipline.

- Demonstrate pedagogical proficiency by serving as a teaching assistant for a minimum of one quarter and taking:

9.		Units
	DLCL 301 The Learning and Teaching of Second Languages	3

- Pass the University Oral Examination. General regulations governing the oral examination are found in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this Bulletin. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.

- Submit a dissertation demonstrating ability to undertake original research based on primary and secondary materials in Japanese.

Doctor of Philosophy in Japanese, Linguistics Track

- Demonstrate proficiency in both modern and classical Japanese language by completing the following courses, or by demonstrating an equivalent level of linguistic attainment by passing the appropriate certifying examinations:

		Units
JAPANLNG 213	Fourth-Year Japanese, Third Quarter	3-5
JAPANLIT 246	Introduction to Premodern Japanese	3-5
JAPANLIT 247	Readings in Premodern Japanese	2-5

- Demonstrate proficiency in at least one supporting language, to be chosen in consultation with the primary adviser according to the candidate's specific research goals. Reading proficiency must be certified through a written examination or an appropriate amount of course work, to be determined on a case-by-case basis. When deemed necessary by the student's adviser(s), working knowledge of a third language may also be required.

- Complete six adviser-approved courses numbered above 200 from among the offerings of the Department of East Asian Languages and Cultures. At least one of these six courses must be an advanced seminar numbered above 300. At least one of these six courses must deal with Japanese literature.

- Complete five upper-division or graduate-level courses in linguistics and other supporting fields. To be determined in consultation with the student's primary adviser, these may include applied linguistics, Chinese linguistics, psychology, education, anthropology, sociology, etc.

- Complete JAPANLIT 279 Research in Japanese Linguistics

- Submit two qualifying papers presenting substantial research in two different subfields of Japanese linguistics.

- Submit an annotated bibliography pertaining to the topic of dissertation.

- Demonstrate pedagogical proficiency by serving as a teaching assistant for a minimum of one quarter and taking DLCL 301 The Learning and Teaching of Second Languages

- Pass the University Oral Examination. The candidate is examined on questions related to the dissertation after acceptable parts of it have been completed in draft form.

- Submit a dissertation demonstrating ability to undertake original research based on primary and secondary materials in Japanese.

Ph.D. Minor in East Asian Languages and Cultures

A student taking a Ph.D. minor in Chinese or Japanese must complete at least 30 units of work within the department at the 200 and 300 level, chosen in consultation with a department adviser. The student must take either CHINGEN 201 Teaching Chinese Humanities or JAPANLIT 201 Proseminar: Introduction to Graduate Study in Japanese unless the department is satisfied that work done elsewhere has provided similar training. The student must also pass a written examination in the Chinese or Japanese language.

Emeriti: (Professors) Albert E. Dien, David S. Nivison, Makoto Ueda, John Wang¹; (Associate Professor) Susan Matisoff; (Senior Lecturer) Yin Chuang

Chair: Ban Wang

Directors of Graduate Studies: James Reichert (Japanese), Li Liu (Chinese)

Directors of Undergraduate Studies: Yoshiko Matsumoto (Japanese), Haiyan Lee (Chinese)

Professors: Steven D. Carter (on leave autumn), Ronald Egan, Li Liu, Yoshiko Matsumoto, Chao Fen Sun, Melinda Takeuchi (East Asian Languages and Cultures, Art and Art History), Ban Wang (East Asian Languages and Cultures, Comparative Literature)

Associate Professors: Haiyan Lee, Indra Levy, James Reichert

Assistant Professors: Yiqun Zhou, Dafna Zur

Consulting Professor: Richard Dasher

Lecturers: Paul Festa, Regina Llamas

Postdoctoral Fellows: Paul Roquet, Armin Selbitschka

Chinese-Japanese Area Studies Faculty:

Professors: Carl W. Bielefeldt (Religious Studies), Gordon Chang (History), Richard Dasher (Center for Integrated Systems), John Kieschnick (Religious Studies), Mark E. Lewis (History), Paul Harrison (Religious Studies), Jean Oi (Political Science), David Palumbo-Liu (Comparative Literature), Gi-Wook Shin (Sociology), Richard Vinograd (Art and Art History), Andrew Walder (Sociology), Kären Wigen (History), Arthur P. Wolf (Anthropology), Lee H. Yearley (Religious Studies), Xueguang Zhou (Sociology)

Associate Professors: Jindong Cai (Music), Matthew Sommer (History), Miyako Inoue (Anthropology), Matthew Kohrman (Anthropology), Thomas Mullaney (History)

Assistant Professors: Jennifer Adams (Education), Phillip Lipsky (Political Science), Jean Ma (Art and Art History), Yumi Moon (History), Jun Uchida (History)

¹ Recalled to active duty.

East Asian Studies

Mission

The Center for East Asian Studies (CEAS) coordinates University instructional, research, and special activities related to China, Japan, and Korea. Faculty and students who share a common interest in the study of

East Asia are brought together by the center from a broad range of academic concerns covering nearly every discipline and historical period. CEAS is part of the Division of International Comparative and Area Studies (<http://ica.stanford.edu>) in the School of Humanities and Sciences. As an East Asia National Resource Center (NRC), supported by the U.S. Department of Education, CEAS serves to strengthen access to and training in the major languages of East Asia, and to broaden East-Asia area studies training across all disciplines.

Courses offered by the Center for East Asian Studies are listed under the subject code EASTASN on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=EASTASN&filter-catalognumber-EASTASN=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=EASTASN&filter-catalognumber-EASTASN=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=EASTASN&filter-catalognumber-EASTASN=on>).

The EASTASN courses listed on ExploreCourses deal primarily with China, Japan, and/or Korea. Literature courses are listed with the subject codes of CHINGEN (<https://explorecourses.stanford.edu/search?filter-term-Autumn=on&filter-term-Summer=on&filter-catalognumber-CHINGEN=on&page=0&catalog=71&q=CHINGEN&filter-coursestatus-Active=on&view=catalog&filter-term-Spring=on&filter-term-Winter=on&collapse=>), CHINLIT (<https://explorecourses.stanford.edu/search?q=CHINLIT&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-CHINLIT=on&filter-catalognumber-CHINLIT=on>), JAPANGEN (<https://explorecourses.stanford.edu/search?q=JAPANGEN&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-JAPANGEN=on&filter-catalognumber-JAPANGEN=on>), and JAPANLIT (<https://explorecourses.stanford.edu/search?q=JAPANLIT&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-JAPANLIT=on&filter-catalognumber-JAPANLIT=on>) on ExploreCourses (<http://explorecourses.stanford.edu>). Many other theoretical and methodological courses within departments at Stanford are taught by faculty who are East Asian specialists; these courses often have a substantial East Asian component and a list of current applicable courses from outside departments may be found in the "Master of Arts in East Asian Studies (<http://www.stanford.edu/dept/registrar/bulletin/5824.htm>)" section of this bulletin. For courses in Chinese, Japanese, and Korean language instruction use the subject codes CHINLANG (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=CHINLANG&filter-catalognumber-CHINLANG=on>), JAPANLNG (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=JAPANLNG&filter-catalognumber-JAPANLNG=on>), and KORLANG (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=KORLANG&filter-catalognumber-KORLANG=on>). For courses in Classical Chinese, search under the subject code CHINLIT (<https://explorecourses.stanford.edu/search?q=CHINLIT&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-CHINLIT=on&filter-catalognumber-CHINLIT=on>).

Undergraduate Programs in East Asian Studies

Undergraduates interested in East Asia can become involved by attending CEAS events, taking courses in the subject codes listed above, or earning a Minor or Bachelor of Arts degree in East Asian Studies. These undergraduate degrees in East Asian Studies are now administered by the Department of East Asian Cultures and Languages (p. 357). The Bing Overseas Study Program (<http://bosp.stanford.edu>) also offers study abroad opportunities and internships in East Asia.

For language study, CEAS provides undergraduate fellowships for language study in China, Japan, or Korea; students must simultaneously apply to a pre-approved language program abroad. Applications are due in February each year. Deadlines and application information can be found on the CEAS web site (<http://ceas.stanford.edu/students/fellowships.php>). In addition, undergraduates can obtain a coterminal M.A. degree in East Asian Studies while concurrently working on their undergraduate major by applying during the regular admissions cycle no later than their senior year.

Graduate Programs in East Asian Studies

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in East Asian Studies and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

Master's Programs

The M.A. program in East Asian Studies is designed both for students who plan to complete a Ph.D. but who have not yet decided on the particular discipline in which they prefer to work, and for students who wish to gain a background in East Asian Studies in connection with a career in nonacademic fields such as business, law, education, journalism, or government service. Students interested in pursuing professional careers are encouraged to plan for additional training through internships or graduate professional programs, in conjunction with obtaining an M.A. in East Asian Studies.

Doctoral Programs

Stanford does not offer a Ph.D. in East Asian Studies. However, there are more than 100 doctoral students with a specialization on China, Korea, or Japan within various departments and schools of the University. The departments that offer an East Asian concentration are Anthropology, Art and Art History, Comparative Literature, East Asian Languages and Cultures, Economics, Education, History, Linguistics, Music, Political Science, Religious Studies, and Sociology. It is also possible to specialize in East Asia within some of the doctoral programs of the professional schools of Business, Education, and Law. Inquiries should be directed to the individual department or school concerned.

Postdoctoral Programs

The Center for East Asian Studies offers postdoctoral fellowships in Chinese Studies (<http://ceas.stanford.edu/resources/chinesePostdoctoral.php>) each year. Postdoctoral fellowships in other areas are also available from the Freeman-Spogli Institute of International Studies and the Walter H. Shorenstein Asia-Pacific Research Center.

Financial Aid

Students in graduate programs who plan to do work in Chinese, Japanese, or Korean language and area studies courses, may be eligible for Foreign Language and Area Studies (FLAS) fellowships and are encouraged to apply for them at the time of application to Stanford. Recipients of FLAS fellowships must be American citizens or permanent residents.

Master of Arts in East Asian Studies

University requirements for the master's degree are described in the "Graduate Degrees (p. 38)" section of this bulletin.

The master's degree program allows a great deal of flexibility in combining language training, interdisciplinary area studies, and a disciplinary concentration. The director of the center assigns preliminary faculty advisers to all students. Members of the staff and faculty are available for academic and career planning. The M.A. program is normally completed in two academic years, but students can shorten this time by receiving credit for prior language work or by attending summer sessions. Students are urged to complete the degree requirements within one year if their background makes it possible.

Applicants must submit scores for the General Test of the Graduate Record Examination, official transcripts and a writing sample along with their online application. Foreign applicants are also required to take the Test of English as a Foreign Language (TOEFL). Applications for admission and financial aid should be made online; see the Graduate Admissions (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/eastasianstudies/http://gradadmissions.stanford.edu>) web site. The deadline for submitting applications for the 2013-2014 academic year is December 11, 2012.

Coterminal Bachelor's and Master's Program in East Asian Studies

The center admits a limited number of Stanford undergraduates to work for a coterminal M.A. degree in East Asian Studies. Applications are accepted once a year during the regular CEAS M.A. application cycle. The deadline for the 2013-14 academic year is December 11, 2012. Students may apply after completing 120 units, but no later than the quarter prior to the expected completion of the undergraduate degree. Applicants are expected to meet the same standards as those seeking admission to the M.A. program, and they must submit the following directly to the Center's office:

- a completed coterminal application form (<http://registrar.stanford.edu/pdf/CotermApplic.pdf>)
- a written statement of purpose (<http://studentaffairs.stanford.edu/gradadmissions/applying/statement>)
- an unofficial Stanford transcript
- three letters of recommendation, at least two of which should be from members of the department of concentration
- first 15 pages of a representative writing sample (seminar paper, term paper, honors thesis, journal article, etc.). Do not submit more than 15 pages.
- copy of scores from the General Test of the Graduate Record Exam (official score should be sent to Stanford's school code 4704)
- a list of courses the applicant intends to take to fulfill degree requirements.

Coterm applications are reviewed along with peer applications by the M.A. Admissions Committee of the Center for East Asian Studies (CEAS) (<http://ceas.stanford.edu/admissions/apply.php>).

Students must meet all requirements for both B.A. and M.A. degrees. They must complete a total of 15 full-time quarters or the equivalent, or three full quarters after completing 180 units for a total of 225 units. Coterminals are not eligible for University financial aid, but are eligible to apply for Foreign Language and Area Studies (FLAS) Fellowships (<http://ceas.stanford.edu/students/fellowships.php>) administered by CEAS.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4874.htm>)" section of this bulletin. For University coterminal degree program rules and University application forms, see the Registrar's (<http://studentaffairs.stanford.edu/registrar/publications/#Coterm>) web site.

Degree Requirements

Language Requirement

Students must complete the equivalent of Stanford's first three full years of language training in Chinese, Japanese, or Korean. Students entering the program without any language preparation should complete first- and second-year Chinese, Japanese, or Korean within the first year of residence at Stanford if they intend to graduate within two years (this would necessitate completing a summer language program). All language courses taken at Stanford used towards fulfilling the language requirement must be for letter grades. Conversation classes cannot be used for meeting this requirement, and units from the language courses numbered 1-99 do not count toward the 46 units required for the degree. Language courses numbered 100 and above can be used towards meeting the 46 units minimum for the degree, but cannot be used towards fulfilling the content courses requirement unless the language course is at the fourth-year level or above, and the student is specializing in literature.

The language requirement may be satisfied in part or in full by placing into an appropriate Stanford language class through the language proficiency exam given by the Language Center. Students who fulfill this minimum three-year language requirement before completing other requirements are encouraged to continue language study, or take courses in which Chinese, Japanese, or Korean are used, for as long as they are in the program. Please note that the language used to meet the three year language proficiency requirement should match the student's country/region of focus. Students in the M.A. program are also eligible to apply for the Inter-University language programs in Beijing and Yokohama. Work completed in one of these programs may be counted toward the M.A. degree's language requirement. Language courses are listed in the bulletin under the following subject codes on the Stanford Bulletin's ExploreCourses web site: CHINLANG (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=CHINLANG&filter-catalognumber-CHINLANG=on>), JAPANLNG (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=JAPANLNG&filter-catalognumber-JAPANLNG=on>), and KORLANG (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=KORLANG&filter-catalognumber-KORLANG=on>).

M.A. Thesis Requirement

A master's thesis, representing a substantial piece of original research, should be filed with the center's program office as part of the graduation requirements. With the adviser's approval, the master's thesis requirement may be satisfied by expanding a research paper written for an advanced course, and should have a minimum of 10,000 words in the main body of the thesis (excluding references, citations, appendices, etc.). The M.A. thesis is due at noon on the last day of classes, of the quarter in

which the student applies to graduate. Please see the Academic Calendar (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/eastasianstudies/studentaffairs.stanford.edu/registrar/academic-calendar>) for specific dates.

Area Studies and Unit Requirements

Students must complete a minimum total of 46 units for the degree at Stanford, comprised of:

- 1-unit core course, EASTASN 330 Core Seminar: Issues and Approaches in East Asian Studies
- At least 9 additional approved content courses (listed below) related to East Asia meeting the following criteria:
 - Taken for a letter grade
 - Taken for 3 units or more
 - Do not count as part of the language requirement (language courses beyond third-year level are accepted for students specializing in literature)
 - At least 23 units at 200 level or above (above 300 level for HISTORY courses), remaining units at 100 level or above (above 200 for HISTORY courses). In general, M.A. students should register for classes with the higher course number (for example, graduate students should register for EASTASN 217 Health and Healthcare Systems in East Asia and undergraduates should register for EASTASN 117 Health and Healthcare Systems in East Asia if the class is open to both graduate students and undergraduates).
 - At least 3 of the 9 course must be either in the same department or within the same thematic focus across several departments (see sample themes below). 1 of these 3 courses must be an advanced seminar (200 level or above) that requires a research paper related to East Asia. Students must submit the syllabus of the seminar they take to the student services coordinator at CEAS to be kept with the department student file in order to show fulfillment of the requirement.
- Additional courses as necessary to reach the minimum 46 units for the degree meeting the following criteria:
 - Taken for a letter grade
 - At least level 100 or above (above 200 for HISTORY courses)
 - Must be an academic content course - such as a lecture, seminar, or colloquium (no activity courses, EFS language classes, etc.). Language classes are okay if the course number is above level 100 and it is taken for a letter grade.
- The cumulative grade point average (GPA) for all courses must be 3.0 or higher; grades for the 9 content courses plus the 1-unit core course must be a 'B' or higher.

Sample Theme 1

	Units
ANTHRO 253A Population and social trends in Japan	3-5
HISTORY 392D Japan in Asia, Asia in Japan	4-5
HISTORY 396D Modern Japan	4-5

Sample Theme 2

	Units
HISTORY 392 The Two Koreas	5
KORGEN 201 Korean Culture in the New Millennium	4
EASTASN 290K Law and Society in South Korea	3

Sample Theme 3

		Units
IPS 246	China on the World Stage	3-5
POLISCI 340L	China in World Politics	5
POLISCI 348	Chinese Politics: The Transformation and the Era of Reform	5

Course Petitions and Directed Reading

Some theory-oriented or methodological courses may be used to meet part of the 9 courses requirements, provided that they are demonstrably useful for understanding East Asian problems. A course petition (<http://ceas.stanford.edu/students/forms.php>) and syllabus must be submitted no later than the end of the second week of the quarter in which the course is offered. Students are limited to 3 petitions total. Credit toward the area studies requirement is not given for courses taken before entering the M.A. program, however students may take courses for exchange credit at the University of California, Berkeley, with the approval of their adviser and the Office of the University Registrar.

Students may choose to do a directed reading course with a faculty member if the current course offerings do not meet a particular research or study need. Directed reading courses are independent study projects a student may undertake with a relevant Stanford faculty member. Once the student has found a faculty member to support his or her studies, the student must inform the Student Services Coordinator immediately so that the appropriate section can be added for EASTASN 300. The limitations for directed reading units are:

- A maximum of 10 units may apply towards the general degree requirements
- A maximum of 5 units may apply toward the 23 units of graduate-level work
- If applying the units to the 9 courses requirement, the student must submit a detailed syllabus.
- Taken for a letter grade

Approved Content Courses

Because East Asian Studies is an interdisciplinary major, the majority of the courses that apply towards the degree are listed under other departments. In addition to courses listed under the EASTASN subject code, students should check the list below, as well as on the Stanford Bulletin's ExploreCourses site (<http://explorecourses.stanford.edu>) for courses in other departments that will meet the degree requirements for East Asian Studies; such departments include (but are not limited to) Anthropology, East Asian Languages and Cultures, History, Political Science, Religious Studies, and Sociology. Not all courses offered by other departments that have East Asia content may be listed below or on the CEAS web site. If there is a course not listed here that has East Asia content, check with the Center for East Asian Studies to verify whether or not it can be used to fulfill the degree requirements.

The following course list represents courses that may, with the adviser's approval, be used to fulfill degree requirements (please see the Law School (<http://www.law.stanford.edu/organizations/offices/office-of-the-registrar/stanford-non-law-student-course-registration>) or GSB (<https://gsbapps.stanford.edu/nongsbreg>) web sites for instructions on how to enroll in their courses):

Joint and Dual Degree Programs in East Asian Studies

East Asian Studies and Law

This joint degree program grants an M.A. degree in East Asian Studies and a Doctor of Jurisprudence (J.D.) degree. It is designed to train students interested in a career in teaching, research, or the practice of law related to East Asian legal affairs. Students must apply separately to the East Asian Studies M.A. program and to the Stanford School of Law and be accepted by both. Completing this combined course of study requires approximately four academic years, depending on the student's background and level of training in Chinese, Japanese, or Korean. Up to 45 units of approved courses may be counted towards both degrees. For more information, see the "Joint Degree Programs (<http://www.stanford.edu/dept/registrar/bulletin/7376.htm>)" section of this bulletin and the Stanford Law School's web site (<http://www.law.stanford.edu/degrees/joint>). Students who have been accepted by both programs should consult with the departments to determine which courses can be double-counted.

East Asian Studies and Education

This dual degree program grants an M.A. degree in East Asian Studies and a secondary school teaching credential in social studies. To be eligible for this program, students should apply to the M.A. program in East Asian

Studies and then apply to the Stanford Teacher Education Program during the first year at Stanford. Completing the dual program requires at least two years, including one summer session when beginning the education component of the program. Admissions processes for both programs are completely independent of each other and units from courses can only be applied to one degree or the other, not both.

East Asian Studies and Business

This dual degree program grants an M.A. degree in East Asian Studies and a Master of Business Administration degree. Students must apply separately to the East Asian Studies M.A. program and the Graduate School of Business and be accepted by both. Completing this combined course of study requires approximately three academic years (perhaps including summer sessions), depending on the student's background and level of training in Chinese, Japanese, or Korean language. Admissions processes for both programs are completely independent of each other and units from courses can only be applied to one degree or the other, not both.

Director: Gordon Chang

Affiliated Faculty and Staff:

Anthropology: Harumi Befu (emeritus), Lisa M. Curran, Miyako Inoue, Matthew Kohrman (on leave), Sylvia Yanagisako

Art and Art History: Jean Ma, Melinda Takeuchi, Richard Vinograd (on leave), Xiaozhe Xie

Biology: Marcus W. Feldman

Business: Hau Lee, William F. Miller (emeritus), John Roberts (emeritus), Kenneth Singleton

Center for International Security and Cooperation: Undraa Agvaanlvsan, Chaim Braun

Civil and Environmental Engineering: David Freyberg, Renate Fruchter, Leonard Ortolano (on leave Autumn)

Communications: James Fishkin

Comparative Literature: David Palumbo-Liu

Earth Sciences: Stephan Graham, Rosamond L. Naylor

East Asian Languages and Cultures: Steven Carter (on leave Autumn), Richard Dasher, Albert E. Dien (emeritus), Ronald Egan, Paul Festa, Haiyan Lee, Indra Levy, Mark E. Lewis, Li Liu, Regina Llamas, Yoshiko Matsumoto, David S. Nivison (emeritus), James Reichert, Paul Roquet (postdoctoral fellow), Armin Selbitschka (postdoctoral fellow), Chao Fen Sun, Melinda Takeuchi, Makoto Ueda (emeritus), Ban Wang, John C. Y. Wang (emeritus), Yiqun Zhou, Dafna Zur

East Asian Studies: Karen Eggleston, LeRon J. Harrison (postdoctoral fellow), Scott Rozelle (on leave), Yulian Wu (postdoctoral fellow)

Economics: Masahiko Aoki (emeritus), Ronald McKinnon (emeritus)

Education: Jennifer Adams, Anthony L. Antonio, Martin Carnoy, Francisco Ramirez, Christine M. Wotipka

Electrical Engineering: Richard Dasher

Freeman Spogli Institute for International Studies: Thomas Fingar

History: Gordon Chang, Peter Duus (emeritus), Mark E. Lewis, Mark Mancall (emeritus), Yumi Moon, Thomas Mullaney, Matthew Sommer, Jun Uchida, Lyman P. Van Slyke (emeritus), Kären Wigen

Ho Center for Buddhist Studies: Irene Lin, Tenzin Tethong

Hoover Institution: Richard Allen, Scott W. Atlas, Larry Diamond, Thomas Henriksen, Alex Inkeles, Tai-Chun Kuo, Hsiao-ting Lin, Alice L. Miller, Robert Myers, Toshio Nishi, Mark Peattie, William Perry, Alvin Rabushka, William Ratliff, Henry Rowen, Charles Wolf Jr.

Human Biology: Arthur P. Wolf

Law: Eric Feldman, Thomas Heller (emeritus), Erik Jensen

Linguistics: Daniel Jurafsky (on leave)

Management Science and Engineering: Siegfried S. Hecker, Pamela Hinds, Edison Tse, Yinyu Ye

Materials Science and Engineering: Robert Sinclair

Medicine: David Katzenstein, Samuel LeBaron (emeritus)

Music: Jingdong Cai, Jaroslaw Kapuscinski (on leave), Stephen Sano, Linda Uyechi, Hui Daisy You

Political Science: Masahiko Aoki (emeritus), Phillip Lipsy, Jean C. Oi

Religious Studies: Carl Bielefeldt, Paul Harrison, Irene Lin, David S. Nivison (emeritus)

Shorenstein APARC: Michael Armacost, Rafiq Dossani, Karen N. Eggleston, Donald K. Emmerson, Scott Rozelle (on leave)

Sociology: Gi-Wook Shin, Andrew Walder (on leave Autumn 2012), Xueguang Zhou (on leave Autumn 2012)

Stanford Language Center: Marina Chung, Robert Clark, Sik Lee Dennig, Michelle DiBello, Hee-sun Kim, Nina Lin, Hisayo O. Lipton, Momoyo Kubo Lowdermilk, Emiko Yasumoto Magnani, Kiyomi Nakamura, Michelle Rogoyski, Yu-hwa Liao Rozelle, Momoe Saito-Fu (Winter and Spring only), Su Kyung Seo, Le Tang, Yoshiko Tomiyama, Huazhi Wang, Hong Zeng, Youping Zhang, Xiaofang Zhou, Xiaiya Zhu

Economics

Courses offered by the Department of Economics are listed under the subject code ECON on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=ECON&filter-catalognumber-ECON=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=ECON&filter-catalognumber-ECON=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=ECON&filter-catalognumber-ECON=on>).

The department's purpose is to acquaint students with the economic aspects of modern society, to familiarize them with techniques for the analysis of contemporary economic problems, and to develop in them an ability to exercise judgment in evaluating public policy. There is training for the general student as well as for those who plan careers as economists in civil service, private enterprise, teaching, or research.

The department's curriculum is an integral part of Stanford's programs in International Relations, Public Policy, and Urban Studies.

The faculty interests and research cover a wide spectrum of topics in most fields of economics, including behavioral economics, comparative institutional analysis, econometrics, economic development, economic history, experimental economics, industrial organization, international trade, labor, macro- and microeconomic theory, mathematical economics, environmental economics, and public finance.

Mission of the Undergraduate Program in Economics

The mission of the undergraduate program in Economics is to acquaint students with the economic aspects of modern society, to familiarize them with techniques for the analysis of contemporary economic problems, and to develop in them an ability to exercise judgment in evaluating public policy. The program introduces students to macro- and microeconomic theory, teaches them to think and write clearly about economic problems and policy issues and to apply the basic tools of economic analysis. The undergraduate major provides an excellent background for those who plan

careers in government and private enterprise as well as those pursuing graduate degrees in professional schools or in the field of economics.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. understanding of core knowledge within Economics.
2. ability to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
3. ability to write clearly and persuasively and communicate ideas clearly.
4. ability to evaluate theory and critique research within the discipline.

Graduate Programs in Economics

The primary objective of the graduate program is to educate students as research economists. In the process, students also acquire the background and skills necessary for careers as university teachers and as practitioners of economics. The curriculum includes a comprehensive treatment of modern theory and empirical techniques. Currently, 20 to 25 students are admitted each year.

Graduate programs in economics are designed to ensure that students receive a thorough grounding in the methodology of theoretical and empirical economics, while at the same time providing specialized training in a wide variety of subfields and a broad understanding of associated institutional structures. Toward these ends, the program is arranged so that the student has little choice in the curriculum at the outset but considerable latitude later on.

Students admitted to graduate standing in the department are expected to have a strong background in college-level economics, mathematics, and statistics. Preparation ordinarily consists of a college major in economics, a year-long calculus sequence that includes multivariate analysis, a course in linear algebra, and a rigorous course in probability and statistics.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Economics and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Economics. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Economics and to interpret and present the results of such research.

Graduate Fields

A. Economic Development

To receive credit for this field, students must complete two courses from:

		Units
ECON 215	Economic Development	2-5
ECON 216	Development Economics III	2-5
ECON 217	Topics in International Macroeconomics: Theory and Evidence for Latin America:	2-5

and submit a paper from one of these courses

Students wishing to do research in the field are advised to take courses in international economics, such as ECON 266 International Economics II, and in comparative institutional analysis.

B. Economic History/Institutions

The requirement for the field is one research paper on a subject approved by one of the faculty teaching any of the following courses:

		Units
ECON 225	Economics of Technology and Innovation	2-5
ECON 226	U.S. Economic History	2-5
ECON 227	European Economic History	2-5
ECON 228	Institutions and Organizations in Historical Perspective	2-5

C. Monetary Theory and Advanced Macroeconomics

Requirements for this field are completion of two courses from:

		Units
ECON 233	Advanced Macroeconomics I	2-5
ECON 235	Advanced Macroeconomics III	2-5
ECON 236	Financial Economics I	2-5
ECON 237	Financial Economics II	2-5

D. Public Finance

To receive credit for the field, students must complete ECON 241 Public Finance and Taxation I and ECON 242 Public Finance and Taxation II by passing the final examinations, and submit an acceptable research paper on a topic approved by the instructor for either course.

E. Economics of Labor

To receive credit for this field, students must complete two courses from:

		Units
ECON 246	Labor Economics I	2-5
ECON 247	Labor Economics II	2-5
ECON 248	Labor Economics III	2-5

F. Economics of Industry

To receive credit for the field, students must complete ECON 257 Industrial Organization 1 and ECON 258 Industrial Organization 2A and submit one research paper, the subject of which has been approved in advance by one of the faculty teaching:

		Units
ECON 257	Industrial Organization 1	2-5
ECON 258	Industrial Organization 2A	2-5
ECON 259	Industrial Organization II B	2-5
ECON 260	Industrial Organization III	2-5

G. International Economics

To receive credit for this field, students must complete two courses from:

		Units
ECON 265	International Economics I	2-5

ECON 266	International Economics II	2-5
ECON 267	Topics in International Trade (recommended)	2-5

A research paper from any of these courses must also be submitted.

H. Econometrics

A student may satisfy the requirements for the econometrics field by completing two courses from the following:

		Units
ECON 273	Advanced Econometrics I	2-5
ECON 275	Time Series Econometrics	2-5
ECON 276	Limited Dependent Variables	2-5

I. Microeconomic Theory

To receive credit for this field, students must complete two courses from the following:

		Units
ECON 282	Contracts, Information, and Incentives	2-5
ECON 283	Theory and Practice of Auction Market Design	2-5
ECON 289	Advanced Topics in Game Theory and Information Economics	2-5
ECON 291	Social and Economic Networks	2-5

J. Environmental Economics

To receive credit for this field, students must complete:

		Units
ECON 250	Environmental Economics	2-5
ECON 251	Natural Resource and Energy Economics	2-5

Students can petition to substitute another environment/natural resource course for either of these.

Other Programs

Other programs leading to dual degrees may be arranged. For example, the Ph.D. in Economics combines with one or two years of study in the School of Law, leading to the nonprofessional Master of Legal Studies (M.L.S.) degree. A dual degree program does not permit counting any courses toward both the Economics and the Law degrees. For more information, see the Degrees & Joint Degrees (<http://www.law.stanford.edu/program/degrees>) web site.

Fellowships and Assistantships

The department awards a number of fellowships for graduate study. Many first-year and a few second- or third-year students are typically awarded full fellowships, including a stipend and tuition. All students whose records justify continuation in the program may be assured support for the second through fourth years in the form of employment as a teaching or research assistant. These half-time appointments provide a stipend and tuition allowance. Entering students are not normally eligible for research or teaching assistantships.

Joint Degree Programs in Economics with the School of Law

J.D./M.A. AND J.D./PH.D.

The Department of Economics and the School of Law offer a joint program leading to either a J.D. degree combined with an M.A. degree in Economics, or to a J.D. degree combined with a Ph.D. in Economics.

The J.D./M.A. and J.D./Ph.D. degree programs are designed for students who wish to prepare themselves for careers in areas relating to both law and economics. Students interested in either joint degree program must apply and gain entrance separately to the School of Law and the Department of Economics and, as an additional step, must secure permission from both academic units to pursue degrees in those units as part of a joint degree program. Interest in either joint degree program should be noted on the student's admission applications and may be considered by the admission committee of each program. Alternatively, an enrolled student in either the Law School or the Economics department may apply for admission to the other program and for joint degree status in both academic units after commencing study in either program.

Joint degree students may elect to begin their course of study in either the School of Law or the Department of Economics. Faculty advisers from each academic unit participate in the planning and supervising of the student's joint program. Students must be enrolled full time in the Law School for the first year of law school, and, at some point during the joint program, may be required to devote one or more quarters largely or exclusively to studies in the Economics program regardless of whether enrollment at that time is in the Law School or in the Department of Economics. At all other times, enrollment may be in the graduate school or the Law School, and students may choose courses from either program regardless of where enrolled. Students must satisfy the requirements for both the J.D. and the M.A. or Ph.D. degrees as specified in this bulletin or by the School of Law.

The Law School approves courses from the Economics Department that may count toward the J.D. degree, and the Economics department approves courses from the Law School that may count toward the M.A. or Ph.D. degree in Economics. In either case, approval may consist of a list applicable to all joint degree students or may be tailored to each individual student's program. The list may differ depending on whether the student is pursuing an M.A. or a Ph.D. in Economics.

In the case of a J.D./M.A. program, no more than 45 quarter hours of approved courses may be counted toward both degrees. In the case of a J.D./Ph.D. program, no more than 54 quarter hours of approved courses may be counted toward both degrees. In either case, no more than 36 quarter hours of courses that originate outside the Law School may count toward the Law degree. To the extent that courses under this joint degree program originate outside the Law School but count toward the Law degree, the Law School credits permitted under Section 17(1) of the Law School Regulations shall be reduced on a unit-per-unit basis, but not below zero. The maximum number of Law School credits that may be counted toward the M.A. or the Ph.D. in Economics is the greater of: (a) 5 quarter hours in the case of the M.A. and 10 quarter hours in the case of the Ph.D.; or (b) the maximum number of hours from courses outside of the department that M.A. or Ph.D. candidates in Economics are permitted to count toward the applicable degree under general departmental guidelines or in the case of a particular student's individual program.

Tuition and financial aid arrangements are normally made through the school in which the student is then enrolled.

For more information, see the Degrees & Joint Degrees (<http://www.law.stanford.edu/program/degrees>) web site.

Bachelor of Arts in Economics

The total number of units required for the major is 80. Students are encouraged to complete the core courses 1-7 below, as early as possible. Ideally, students should complete the core during the sophomore year, before taking upper division courses. Courses may not be taken before the prerequisites are completed. The required number of field courses is four. There is great flexibility in the choice of electives, including upper-division math and statistics.

Of the 80 units required for the major, at least 55 must be taken at Stanford in California. Students cannot declare Economics as their major or minor until they have completed ECON 50 Economic Analysis I with a grade of 'B' or better. All courses required for the economics major must be taken for a letter grade.

Requirements for the Economics Major (80 Units)

		Units
ECON 1A	Introductory Economics A	5
ECON 1B	Introductory Economics B (Prerequisite: ECON 1A)	5
ECON 50	Economic Analysis I (Prerequisites: ECON 1A and MATH 51 (letter grade required))	5
ECON 51	Economic Analysis II (Prerequisite: ECON 50)	5
ECON 52	Economic Analysis III (Prerequisites: ECON 50 and 1B)	5
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists (Prerequisite: MATH 41 or equivalent) ¹	5
ECON 102B	Introduction to Econometrics (Prerequisites: ECON 50 and 102A) ²	5

¹ It is recommended that students satisfy this basic statistics requirement before proceeding with the rest of the program.

² Material in ECON 102B Introduction to Econometrics is used in a number of field courses. Students are advised to design their program of study so that ECON 102B Introduction to Econometrics is not taken in their senior year but early in their program.

Field Courses

Must be taken at Stanford in California; 20 units.

	Units
Select four of the following:	20
ECON 102C Advanced Topics in Econometrics (waiting for this course to load from PS)	
ECON 111 Money and Banking	
ECON 113 Economics of Innovation (not offered this year)	
ECON 118 Development Economics	
ECON 126 Economics of Health and Medical Care	
ECON 128 Economic Development: A Historical Perspective	
ECON 136 Market Design ¹	
ECON 137 Decision Modeling and Information ²	
ECON 140 Introduction to Financial Economics ³	
ECON 141 Public Finance and Fiscal Policy	
ECON 145 Labor Economics	
ECON 146 Economics of Education	

ECON 147	Economics of Human Resources
ECON 149	The Modern Firm in Theory and Practice
ECON 153	Economics of the Internet
ECON 155	Environmental Economics and Policy
ECON 157	Imperfect Competition
ECON 158	Regulatory Economics
ECON 160	Game Theory and Economic Applications ⁴
ECON 164	Law, Economics and Politics of International Trade
ECON 165	International Finance (not offered this year)
ECON 166	International Trade
ECON 179	Experimental Economics
ECON 180	Honors Game Theory ⁴
ECON 181	Honors Information and Incentives ²
ECON 182	Honors Market Design ¹

- ¹ Students may not count units from both ECON 136 Market Design and ECON 182 Honors Market Design towards their field course requirements as the courses cover similar subject matter.
- ² Students may not count units from both ECON 137 Decision Modeling and Information and ECON 181 Honors Information and Incentives towards their field course requirements as the courses cover similar material.
- ³ Students may not count units from both ECON 135 Finance for Non-MBAs and ECON 140 Introduction to Financial Economics towards their major as the courses are too similar in content.
- ⁴ Students may not count units from both ECON 160 Game Theory and Economic Applications and ECON 180 Honors Game Theory towards their field course requirements as the courses cover similar subject matter.

Writing in the Major Course

Must be taken at Stanford in California; 5 units. This course should be taken only after completing ECON 51 Economic Analysis II and ECON 52 Economic Analysis III, ECON 102B Introduction to Econometrics, and at least two field courses.

		Units
ECON 101	Economic Policy Analysis	5

Electives

20 units; choose from ECON courses numbered from 100 through 198, excluding ECON 190 Introduction to Financial Accounting and ECON 191 Introduction to Cost Accounting.

Up to 10 units may be satisfied by:

		Units
MATH 113	Linear Algebra and Matrix Theory	3
MATH 115	Functions of a Real Variable	3
MATH 136	Stochastic Processes	3
MATH 151	Introduction to Probability Theory	3
MATH 171	Fundamental Concepts of Analysis	3
MATH 175	Elementary Functional Analysis	3
STATS 200	Introduction to Statistical Inference	3
STATS 206	Applied Multivariate Analysis	3
STATS 207	Introduction to Time Series Analysis	3
STATS 217	Introduction to Stochastic Processes	3
STATS 218	Introduction to Stochastic Processes	3
STATS 237	Theory of Investment Portfolios and Derivative Securities	3

A maximum of 10 units of transfer credit OR of ECON 139D Directed Reading, Directed Reading, may be taken under this section. Suitable transfer credit must be approved in writing by the Associate Director of Undergraduate Studies. Advanced undergraduate majors with strong quantitative preparation may enroll in graduate (200-level) courses with permission of the Director of Undergraduate Studies and the course instructor. Some courses offered by Overseas Studies may be counted towards this requirement. The department does not give credit for internships.

Other Requirements

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit, and 55 of the 80 units required for the major must be taken at Stanford in California.

Students scoring a 5 on both the advanced placement microeconomics and advanced placement macroeconomics exam may petition the Director of Undergraduate Studies to have the ECON 1A Introductory Economics A (but not ECON 1B Introductory Economics B) course requirement waived. Students do not receive units credit for placing out of ECON 1A Introductory Economics A.

A grade point average (GPA) of 2.0 (C) or better must be received for all units applied toward the preceding requirements.

To use transfer credit in partial satisfaction of the requirements, the student must obtain written consent from the department's Associate Director of Undergraduate Study, who establishes the amount of credit to be granted toward the department requirements (see the Information Book for Economics Majors). Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics major.

Course prerequisites are enforced. Students taking courses to satisfy prerequisites in another department or institution must petition for Stanford course substitution or transfer credit approval in order to satisfy course prerequisites.

The time limit for satisfactory completion of a course is one year from the date an incomplete is given, although instructors may set a shorter time limit. Students are responsible for seeing that all grades of 'incomplete' are cleared within the time limit.

Sample Programs

Sample listings of upper-division economics electives may be examined in the department's Information Book for Economics Majors (<http://economics.stanford.edu/undergraduate>). Sample programs are provided for the following areas of emphasis:

- Liberal arts
- Pre-business
- Quantitative
- International
- Political economy and regulation
- Preparation for graduate school in economics

Honors Program

The honors program offers an opportunity for independent research, creativity, and achievement. It is designed to encourage a more intensive study of economics than is required for the normal major, with course and research work of exceptional quality. Honors students may participate in an Honors Research Symposium during Spring Quarter, with those nominated for prizes making oral presentations. The honors program requires:

1. Completing all requirements for the major; plus five additional units, bringing the total to 85 units.

2. Achieving a grade point average (GPA) of at least 3.5 for the required courses of the Economics major (excluding ECON 139D Directed Reading and ECON 199D Honors Thesis Research). See details in the Information Book for Economics Majors.
3. Complete ECON 102B Introduction to Econometrics and at least two lecture courses most relevant for the proposed topic of the honors thesis by the end of the junior year. (These can be included in the basic 80 units.)
4. Candidates must write an honors thesis in their senior year for at least one unit and up to 10 units of credit (ECON 199D Honors Thesis Research). The thesis must be of very high quality and written under the direction of a member of the department or its affiliated faculty. Units of ECON 199D Honors Thesis Research do not count toward the course work requirements for the basic economics major, or in the computation of the GPA requirement for honors. Students may apply 5 units of ECON 199D Honors Thesis Research to the Writing in the Major requirement (WIM). The WIM requirement (ECON 101 Economic Policy Analysis or ECON 199D Honors Thesis Research) must be completed in order for the degree to be conferred.

Juniors interested in the honors program should attend an informational meeting scheduled by the honors program director during the first week of each quarter. At this meeting, students receive information on organizing an honors project and are given details on honors programs. Prospective candidates for the honors program should submit an application to the director no later than the end of the first month of the third quarter before graduation (typically Autumn Quarter of the senior year). Also required, later in the same quarter, is a three-page thesis proposal that must be approved by the thesis adviser.

Minor in Economics

The minor in Economics has two main goals: to acquaint students with the rudiments of micro- and macroeconomic theory that are required of all majors; and to allow students to build competence in the application of this theory to two fields of economics of their choosing, and the opportunity to specialize further in any one of these fields by taking one additional advanced course in the Department of Economics.

Course Work

		Units
ECON 1A	Introductory Economics A	5
ECON 1B	Introductory Economics B (Prerequisite: ECON 1A)	5
ECON 50	Economic Analysis I (Prerequisites: ECON 1A and MATH 51 (letter grade required))	5
ECON 51	Economic Analysis II (Prerequisite: ECON 50)	5
ECON 52	Economic Analysis III (Prerequisites: ECON 50 and 1B)	5
Select two of the following: ¹		10
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	
ECON 102B	Introduction to Econometrics	
ECON 102C	Advanced Topics in Econometrics	
ECON 111	Money and Banking	
ECON 118	Development Economics	
ECON 126	Economics of Health and Medical Care	
ECON 128	Economic Development: A Historical Perspective	
ECON 136	Market Design ²	
ECON 137	Decision Modeling and Information ³	
ECON 140	Introduction to Financial Economics ⁴	

ECON 141	Public Finance and Fiscal Policy
ECON 145	Labor Economics
ECON 146	Economics of Education
ECON 147	Economics of Human Resources
ECON 149	The Modern Firm in Theory and Practice
ECON 153	Economics of the Internet
ECON 155	Environmental Economics and Policy
ECON 157	Imperfect Competition
ECON 158	Regulatory Economics
ECON 160	Game Theory and Economic Applications ⁵
ECON 164	Law, Economics and Politics of International Trade
ECON 165	International Finance (not offered this year)
ECON 166	International Trade
ECON 179	Experimental Economics
ECON 180	Honors Game Theory ⁵
ECON 181	Honors Information and Incentives ³
ECON 182	Honors Market Design ²

- ¹ Must be taken at Stanford in California
- ² Students may not count units from both ECON 136 Market Design and ECON 182 Honors Market Design towards their major as the courses cover similar subject matter.
- ³ Students may not count units from both ECON 137 Decision Modeling and Information and ECON 181 Honors Information and Incentives towards their major as the courses cover similar subject matter.
- ⁴ Students may not count units from both ECON 135 Finance for Non-MBAs and ECON 140 Introduction to Financial Economics towards their minor as the courses are too similar in content.
- ⁵ Student may not count units from both ECON 160 Game Theory and Economic Applications and ECON 180 Honors Game Theory towards their major as the courses cover similar subject matter.

Other Requirements

At least 20 out of the 35 units for the minor must be taken at Stanford. Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics minor.

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit. A grade point average (GPA) of 2.0 or better must be received for all units applied toward the minor.

Students must complete their declaration of the minor no later than the last day of the preceding quarter before their degree conferral.

Master of Arts in Economics

University requirements for the master's degree are described in the "Graduate Degrees" (p. 38) section of this bulletin.

The department does not admit students who plan to terminate their graduate study with the M.A. degree. Economics students may, but need not, elect to add this degree in addition to their current Ph.D. degree. A master's option is also available to currently enrolled Ph.D. candidates from other departments.

Admission

Prospective students must have completed the Stanford requirements for a B.A. in Economics or approximately equivalent training. Since students are required to take some of the same courses as Ph.D. candidates, similar preparation in mathematics and statistics generally is expected. Prospective

applicants should submit their credentials together with a plan of study to the Director of Graduate Study for approval.

Degree Requirements

A master's program must satisfy these criteria:

1. Completing, at Stanford, at least 45 units of credit beyond those required for the bachelor's degree, of which at least 40 units must be in the Department of Economics. Students must complete ECON 202 Core Economics: Modules 1 and 2 and at least three other 200-level courses. They must receive a grade of 'B-' or better in ECON 202 Core Economics: Modules 1 and 2. Undergraduate courses must be numbered 105 or higher (with the exception of the ECON 102A Introduction to Statistical Methods (Postcalculus) for Social Scientists, ECON 102B Introduction to Econometrics, ECON 102C Advanced Topics in Econometrics sequence listed below). No seminar courses numbered 300 or above can be counted.
2. Demonstrating competence in empirical methodology by receiving a grade of 'B-' or better in both ECON 270 Intermediate Econometrics I and ECON 271 Intermediate Econometrics II, or by receiving a grade of 'B-' or above in each of ECON 102A Introduction to Statistical Methods (Postcalculus) for Social Scientists, ECON 102B Introduction to Econometrics, and ECON 102C Advanced Topics in Econometrics.
3. Submitting two term papers (or a thesis of sufficient quality). At least one of these papers must be deemed to represent graduate-level work. Normally, this means that it is written in connection with a 200-level course. A maximum of 10 units of credit can be earned for a thesis toward the 45-unit degree requirement. In lieu of this paper requirement, students may elect to take two additional 200+ level Economics courses.
4. A grade point average (GPA) of 3.0 must be maintained for all master's level work. All courses must be taken for a letter grade.

Doctor of Philosophy in Economics

University requirements for the Ph.D. are described in the "Graduate Degrees (p. 38)" section of this bulletin.

Admitted students must be adequately prepared in calculus, linear algebra, and statistics (see above). When deemed appropriate, a student may be required to complete the necessary background preparation at Stanford. All students take a common core curriculum at the outset and later branch out into the desired fields of specialization. Well-prepared students should anticipate spending, with some overlap, approximately two years in course work and another two years in seminars, independent study, and dissertation research. The goal is to complete the program in four years, although some types of research programs may require at least five years to complete. The department has a strong commitment to guiding students through the program expeditiously.

Questions and petitions concerning the program and the admissions process should be addressed to the Director of Graduate Study, who has responsibility for administering the graduate program.

Specific requirements are best discussed in two stages, the first consisting of requirements for admission to candidacy and the second involving further requirements for earning the degree.

Admission to Candidacy for Ph.D.

A student may apply for admission to candidacy when the following minimal requirements are met:

1. Successful results on comprehensive examinations in both of:
 - A. Core Economics. The examination is based on material from:

		Units
ECON 202	Core Economics: Modules 1 and 2	2-5
ECON 203	Core Economics: Modules 5 and 6	2-5
ECON 204	Core Economics: Modules 9 and 10	2-5
ECON 210	Core Economics: Modules 3 and 7	2-5
ECON 211	Core Economics: Modules 11 and 12	2-5
ECON 212	Core Economics: Modules 4 and 8	2-5

C. Econometrics. The examination is based on material from:

		Units
ECON 270	Intermediate Econometrics I	2-5
ECON 271	Intermediate Econometrics II	2-5
ECON 272	Intermediate Econometrics III	2-5

2. Completing the requirements in two additional fields of specialization from the list below or, if approved in advance by the Director of Graduate Study, in one such field together with a substantial amount of work toward a second field taught in a related department (e.g. GSB Finance). Advanced fields include econometrics, economic development, economic history, industrial organization, international economics, labor economics, microeconomic theory, monetary theory and advanced macroeconomics, environmental economics, and public finance. Students may request permission from the Director of Graduate Study to create a field not listed as an advanced field above (e.g. Behavioral/Experimental). Each field listed below can be satisfied by completing two courses, although students in some fields may be advised to add a third course, which can then be counted toward the distribution requirement discussed later. All courses (or comprehensive exams, when offered) must be passed with a grade of 'B' or better.

		Units
Development		
ECON 215	Economic Development	
ECON 216	Development Economics III (not offered this year)	
ECON 217	Topics in International Macroeconomics: Theory and Evidence for Latin America:	
History		
ECON 225	Economics of Technology and Innovation (not offered this year)	
ECON 226	U.S. Economic History	
ECON 227	European Economic History	
ECON 228	Institutions and Organizations in Historical Perspective	
Macroeconomics		
ECON 233	Advanced Macroeconomics I	
ECON 235	Advanced Macroeconomics III	
ECON 236	Financial Economics I	
ECON 237	Financial Economics II	
Finance		
FINANCE 622	Dynamic Asset Pricing Theory	
FINANCE 624	Corporate Finance Theory	
FINANCE 625	Empirical Asset Pricing	
Public Economics		
ECON 241	Public Finance and Taxation I	
ECON 242	Public Finance and Taxation II	
Labor		

ECON 246	Labor Economics I
ECON 247	Labor Economics II
ECON 248	Labor Economics III
Environmental	
ECON 250	Environmental Economics
ECON 251	Natural Resource and Energy Economics
Industrial Organization	
ECON 257	Industrial Organization I
ECON 258	Industrial Organization 2A
ECON 259	Industrial Organization II B
ECON 260	Industrial Organization III
International	
ECON 265	International Economics I
ECON 266	International Economics II
ECON 267	Topics in International Trade (not offered this year)
Econometrics	
ECON 273	Advanced Econometrics I
ECON 275	Time Series Econometrics (not offered this year)
ECON 276	Limited Dependent Variables
Behavioral/Experimental	
ECON 277	Behavioral and Experimental Economics III
ECON 278	Behavioral and Experimental Economics I
ECON 279	Behavioral and Experimental Economics II
Microtheory	
ECON 282	Contracts, Information, and Incentives
ECON 283	Theory and Practice of Auction Market Design
ECON 285	Market Design
ECON 289	Advanced Topics in Game Theory and Information Economics
ECON 291	Social and Economic Networks

4. Completing a candidacy paper, normally written in conjunction with one of the special fields selected above. Satisfactory presentation of this paper or another research paper is required in Autumn Quarter of the third year, along with an additional presentation of an expanded research paper in Spring Quarter is also required for admission to candidacy.

It is expected that the student meet, and indeed exceed, the above standards by the end of the third year of residency. When this is not possible for any reason, the Director of Graduate Study should be consulted as early as possible during the third year. Once it is deemed that the above standards have been met, the student should complete the Application for Candidacy for Degree of Doctor of Philosophy. After approval, candidacy remains valid for five years (although it can be terminated earlier by the department if progress is deficient); it can be renewed or extended beyond this period only under unusual circumstances.

Further Requirements for the Ph.D. Degree

1. *Distribution Requirement:* Students must complete four other graduate-level courses meeting the following requirements:
 - A. at least one course from the area of economic history, unless history is one of the two fields of specialization.
 - B. courses in at least two fields other than the two fields of specialization. Distribution courses cannot be crosslisted in those fields.

C. with advance approval of the Director of Graduate Study, some of these distribution courses may be drawn from related fields taught in other departments. However, including courses taken to meet either the specialization or distribution requirements, no more than two courses in total may be taken outside the Economics department.

2. *Teaching Experience:* Each student must serve as a teaching assistant for at least one quarter. It is strongly recommended that this requirement be satisfied before the final year of residence.
3. *Seminar Participation:* Each student is expected to participate in at least two all-year research seminars by the end of the fourth year of residence. Normally, participation in a seminar requires one or more oral presentations and the submission of a research paper (which, however, need not be completely separate from dissertation research).
4. *Ph.D. Dissertation:* The process involves selecting a topic, choosing an appropriate adviser, submitting a prospectus (signed by the adviser) outlining the proposed research, selecting a three-member reading committee (usually all from the Department of Economics, although exceptions can be made under certain circumstances), passing the University oral examination at which these three faculty (and two other members of the Academic Council) ask questions about the completed research, and submitting a final draft of the work signed by all members of the reading committee. The student is advised to initiate this process as early as possible.

Ph.D. Minor in Economics

To be recommended for the Ph.D. degree with Economics as a minor subject, a student must qualify in three fields of economics, at least one of which must be in the core economics sequence. The standard of achievement in these fields is the same for minor as for major candidates, including the department's comprehensive examinations where appropriate.

Joint Degree Program in Ph.D. in Economics and Master of Public Policy

The Ph.D./M.P.P. joint degree is designed for students who wish to prepare themselves for careers in areas relating to both policy and economics. Students interested in this degree first apply to the Economics Department, indicating an interest in the joint program. There is one admissions application and one fee. If the decision is made by the department to admit the applicant, the file is then forwarded to the M.P.P. program. An admission decision, based on the information in the Ph.D. application, is made promptly, and the department informs the student of the decision. Students may also apply to the M.P.P. after having commenced study in the Economics Department at Stanford, by first receiving the consent of the Director of Graduate Studies in Economics and then applying to the Public Policy program.

Students must have a faculty adviser from the Economics Department to assist with the planning and supervising of the joint program. The adviser is usually chosen from among the department's Public Policy-affiliated faculty.

Tuition and financial aid arrangements are made through the Economics Department.

Requirements for the M.P.P./Ph.D. in Economics

Core M.P.P. curriculum of 45 units

		Units
PUBLPOL 301B	Cost-Benefit Analysis and Evaluation	4-5
PUBLPOL 302A	Introduction to American Law	3-5
PUBLPOL 302B	Economic Analysis of Law	4
PUBLPOL 304A	Collective Action: Ethics and Policy	3-5
PUBLPOL 305A	Judgment and Decision Making	4
PUBLPOL 305B	Public Policy and Social Psychology: Implications and Applications	4
PUBLPOL 306	Writing and Rhetoric for Policy Audiences	4
PUBLPOL 307	Justice	4-5
PUBLPOL 309	Practicum	1-10
PUBLPOL 311	Public Policy Colloquium	1
Total Units		32-47

Emeriti: (Professors) Takeshi Amemiya, Theodore Anderson, Masahiko Aoki, Kenneth J. Arrow, Paul A. David, Victor R. Fuchs, John G. Gurley, Peter J. Hammond, Donald Harris, Bert G. Hickman, Mordecai Kurz, Lawrence J. Lau, Ronald I. McKinnon, Roger G. Noll, Nathan Rosenberg, Thomas Sargent, David A. Starrett, Joseph E. Stiglitz

Honorary Emerita: (Professor) Anne O. Krueger

Chair: Jonathan Levin

Professors: Kyle Bagwell, B. Douglas Bernheim, Nicholas A. Bloom, Michael J. Boskin, Timothy F. Bresnahan, Liran Einav, Lawrence Goulder, Avner Greif, Robert E. Hall, Han Hong, Caroline Hoxby, Matthew O. Jackson, Peter Klenow, Jonathan Levin, Thomas E. MaCurdy, Paul R. Milgrom, Muriel Niederle, John H. Pencavel, Luigi Pistaferri, Monika Piazzesi, Joseph Romano, Alvin Roth, K. Martin Schneider, Ilya Segal, John B. Shoven, John B. Taylor, Frank Wolak, Gavin Wright

Assistant Professors: Ran Abramitzky, Manuel Amador, Giacomo DeGiorgi, Michael Dickstein, Pascaline Dupas, Doireann Fitzgerald, Kyna Fong, Matthew Harding, Jakub Kastl, Fuhito Kojima, Pablo Kurlat, Aprajit Mahajan, Kalina Manova, Petra Moser, Florian Scheuer, Charles Sprenger, Alexander Wolitzky

Senior Lecturer: Geoffrey Rothwell

Lecturers: Marcelo Clerici-Arias, Gopi Shah Goda, Alexander Gould, Marc Hafstead, Ward Hansen, Hamilton Helmer, Koichiro Ito, Ro Khanna, Scott M. McKeon, David Molitar, Greg Rosston, Cristian Santesteban, Thomas Shanahan, F. Victor Stanton, Mark Tendall, Marshall Yan, Shuang Zhang

Courtesy Professors: Anat Admati, Lawrence Baker, David Baron, Jay Bhattacharya, Jeremy Bulow, Walter Falcon, Stephen Haber, David Kreps, N. Grant Miller, Rosamond Naylor, Bruce Owen, A. Mitchell Polinsky, Peter C. Reiss, D. John Roberts, Barry Weingast, Robert Wilson

Courtesy Assistant Professor: Peter Koudijs, Nicolas Lambert, Mar Reguant

Visiting Professors: Alexander Galetovic, Pablo Andres Newmeyer, Serguei Maliar, Paolo Pin

Visiting Assistant Professor: John Lynham

Visiting Associate Professor: Ghazala Azmat

Overseas Studies Courses in Economics

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/economics/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/economics/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/economics/http://bosp.stanford.edu>).

		Units
OSPBEIJ 55	Chinese Economy in Transition	5

English

Courses offered by the Department of English are listed under the subject code ENGLISH on the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=ENGLISH&filter-catalognumber-ENGLISH=on>) web site.

Mission of the Department of English

To study English at Stanford is to explore -- deeply and rewardingly -- the rich legacy of literature written in English, past and present. We offer a wealth of courses on individual authors, the history of literary genres, literary theory, new media, and creative writing. Given the emphasis on critical thinking and interpretation, the English major is in turn an excellent preparation for many professional fields, including teaching, journalism, law, publishing, medicine, and business. The graduate program features rigorous training in the research and analysis of British, American, and Anglophone literary histories and texts, preparing students to produce

scholarship of originality and importance, and to teach literature at the highest levels.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of major theories, methods, and concepts of literary study and critical analysis.
2. an awareness of how authors and texts develop in relation to their historical contexts.
3. a comprehension of the formal qualities of key literary genres, forms, and styles.
4. an effective style of writing and a powerful use of language.

Bachelor of Arts in English

In the undergraduate program, students explore the traditions of literature in English. Courses emphasize interpretive thinking and creative writing, examining the dynamics of literary and cultural history, the structures of literary form and genre, and the practices of reading, writing, and critical analysis.

Graduate Program in English

The graduate program features rigorous training in the research and analysis of British, American and Anglophone literary histories and texts, preparing students to produce scholarship of originality and importance, and to teach literature at advanced levels.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in English and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in English. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of English and to interpret and present the results of such research.

Other Programs in English

Ph.D. in Modern Thought and Literature

Stanford also offers a Ph.D. degree in Modern Thought and Literature. Under this program, students devote approximately half of their time to a modern literature from the Enlightenment to the present, and the other half to interdisciplinary studies. Interested students should see the "Modern Thought and Literature" section of this bulletin and consult the director of the program.

Creative Writing Fellowships

The Creative Writing Program each year offers five two-year fellowships in poetry and five two-year fellowships in fiction. These are not degree-granting fellowships. Information is available in the Creative Writing office, (650) 725-1208.

Bachelor of Arts in English

The English major is designed to provide students with both an understanding of the development of literatures in English and an appreciation of the variety and richness of literary texts. It offers a rigorous training in interpretive thinking and precise expression.

Suggested Preparation for the Major

Prospective English majors are advised to consider Thinking Matters courses that relate to literature to satisfy this requirement. Also recommended is any introductory seminar taught by English department faculty through Stanford Introductory Studies.

		Units
Thinking Matters Courses (23)		
THINK 7	Journeys	4
THINK 17	The Poet Re-Making the World	4
THINK 30	Race Matters	4
THINK 31	Reimagining America: Cultural Memory and Identity Since the Civil War	4
THINK 38	Education as Self-Fashioning: The Active, Inquiring, Beautiful Life	7
Introductory Seminars (23)		
ENGLISH 14Q	"Tis All In Pieces, All Coherence Gone": John Donne, the Neurosciences, and the Early Modern World	4
ENGLISH 46N	The Hemingway Era	3
ENGLISH 47N	Sports and Culture	3
ENGLISH 50N	The Literature of Inequality: Have and Have-Nots from the Gilded Age to the Occupy Era	3
ENGLISH 68N	Mark Twain and American Culture	4
ENGLISH 71N	American Daughters: Hawthorne to Robinson	3
ENGLISH 88N	Graphic Novels Asian American Style	3

Fields of Study or Degree Options

Because the Department of English recognizes that the needs and interests of literature students vary, it has approved several major programs of study. Each of these has different objectives and requirements; students should consider carefully which program of study corresponds most closely to their personal and intellectual objectives. The department offers the following fields of study for degrees in English:

- Literature
- Literature with Creative Writing Emphasis
- Literature with Interdisciplinary Emphasis
- Literature and Foreign Language Literature
- Literature and Philosophy

See below for further information on these fields of study.

Degree Requirements

Students interested in majoring in English are encouraged to declare during their sophomore year, but no later than the beginning of their junior year. They are urged to discuss their plans with the undergraduate student services specialist as early as possible, and to take recommended preparatory courses for the major in their freshman and sophomore years. To declare the major, a student must fill out the Declaration of Major in Axess; choose a faculty adviser (<http://english.stanford.edu/faculty.php>); and submit a completed program proposal (http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/english/1213_Program_Proposal.pdf) form approved by the adviser. It is recommended that a student meet with the adviser at least once per quarter to discuss progress towards degree completion. Students who declared prior to September 2012 should refer to previous guidelines and requirements for the major.

With the exception of the required courses listed below, which must be taken for a letter grade, any two of the elective courses may be taken on a credit/no credit basis at the discretion of the instructor. Students may apply as many as four literature courses taken at approved universities towards the English major electives. Approval of such courses towards the major is at the discretion of the Director of Undergraduate Studies. Requests for transfer credit, including course syllabi and official transcript, should be submitted to the undergraduate student services specialist, and to the Office of the University Registrar's external credit evaluation section.

The total number of units required to graduate for each degree option is specified in the relevant section following. All courses should be taken for 5 units. Irrespective of field of study or degree option, all English majors must complete the following requirements:

Required Courses (40 units)

	Units
Historical courses (15)	
ENGLISH 100A Literary History I	5
ENGLISH 100B Literary History II	5
ENGLISH 100C Literary History III	5
Methodology courses (15)	
ENGLISH 160 Poetry and Poetics	5
ENGLISH 161 Narrative and Narrative Theory	5
ENGLISH 162 Critical Methods	5
Also Required (10)	
ENGLISH 164 Senior Seminar (WIM) ¹	5
One additional history of literature course ^{2 3}	5
Total Units	40

¹ For those students accepted into the Honors program this can be fulfilled with ENGLISH 196A Honors Seminar: Critical Approaches to Literature.

² In 2012-13 the following courses satisfy the history of literature requirement:

- ENGLISH 115 The Literature of Crisis: From Chaucer to Graham Greene,
- ENGLISH 119F British Women Novelists from Aphra Behn to Charlotte Bronte
- ENGLISH 140H The Idea of the Theater
- ENGLISH 173H Passions, Emotions, Moods
- ENGLISH 184H Text Technologies: A History

- ³ This requirement may also be fulfilled with the following Thinking Matters or SLE courses:
- THINK 7 Journeys
 - THINK 17 The Poet Re-Making the World
 - THINK 30 Race Matters
 - THINK 31 Reimagining America: Cultural Memory and Identity Since the Civil War
 - THINK 38 Education as Self-Fashioning: The Active, Inquiring, Beautiful Life
 - SLE 91 Structured Liberal Education, SLE 92 Structured Liberal Education, and SLE 93 Structured Liberal Education.

Rules that apply to all English majors irrespective of field of study or degree option

1. Courses can only be counted once, i.e. can only satisfy one requirement.
2. Two of the elective courses may be taken on a credit/no credit basis at the discretion of the instructor.

Field of Study I. Literature

This field of study is declared in Axess. It does not appear on either the official transcript or the diploma. This program provides for the interests of students who wish to understand the range and historical development of British, American and Anglophone literatures and a variety of critical methods by which their texts can be interpreted. The major emphasizes the study of literary forms and genres and theories of textual analysis. In addition to the degree requirements required of all majors and listed above, students must complete at least 30 additional units of courses consisting of:

1. Six to eight additional approved elective courses, only one of which may be a creative writing course, chosen from among those offered by the Department of English. In place of one of these six to eight elective courses, students may choose one upper-division course in a foreign literature read in the original language.

Field of Study II. Literature with Creative Writing Emphasis

This field of study is declared in Axess. It appears on the official transcript, but not on the diploma. This program is designed for students who want a sound basic knowledge of the English literary tradition as a whole and at the same time want to develop skills in writing poetry or prose. In addition to the degree requirements required of all majors and listed above, students must complete at least 35 additional units of approved courses, in either the prose or poetry concentration:

Prose Concentration-

	Units
ENGLISH 90 Fiction Writing or ENGLISH 91 Creative Nonfiction	5
ENGLISH 92 Reading and Writing Poetry (Can be fulfilled with a poetry literature seminar)	5
ENGLISH 146 Development of the Short Story: Continuity and Innovation	5
ENGLISH 190 Intermediate Fiction Writing (or any 190 series or 191 series) or ENGLISH 191 Intermediate Creative Nonfiction	5
3 elective literature courses (One of the courses may be fulfilled with a creative writing workshop).	
Total Units	35

Poetry Concentration-

		Units
ENGLISH 90	Fiction Writing (Can be fulfilled with a prose literature seminar)	5
or ENGLISH 91	Creative Nonfiction	
ENGLISH 92	Reading and Writing Poetry	5
ENGLISH 192	Intermediate Poetry Writing (or any 192 series)	5
One literature course in poetry approved by a Creative Writing Professor		5
Three elective literature courses (One of the courses may be fulfilled with a creative writing workshop)		15
Total Units		35

Field of Study III. Literature with Interdisciplinary Emphasis

This field of study is declared in Axess. It appears on the official transcript, but not on the diploma. This program is intended for students who wish to combine the study of one broadly defined literary topic, period, genre, theme or problem with an interdisciplinary program of courses (generally chosen from one other discipline) relevant to that inquiry. In addition to the degree requirements required of all majors and listed above, students must complete at least 35 additional units of approved courses including:

1. Four elective literature courses chosen from among those offered by the Department of English. Students must select two of these courses in relation to their interdisciplinary focus.
2. Three courses related to the area of inquiry. These courses may be chosen from another department or interdisciplinary program within the School of Humanities and Sciences including (but not limited to) such as African American Studies (<http://www.stanford.edu/dept/AAAS>), Anthropology (<https://www.stanford.edu/dept/anthropology/cgi-bin/web>), Art and Art History (<http://art.stanford.edu>), Classics (<http://www.stanford.edu/dept/classics/cgi-bin/web>), Comparative Literature (<http://www.stanford.edu/dept/DLCL/cgi-bin/web/dept/complit>), Comparative Studies in Race and Ethnicity (<http://ccsre.stanford.edu>), Feminist Studies (<http://www.stanford.edu/dept/femstudies>), Human Biology (<https://humbio.stanford.edu>), Music (<http://music.stanford.edu/Home>), Philosophy (<http://philosophy.stanford.edu>), Political Science (<http://politicalscience.stanford.edu>), Psychology (<http://psychology.stanford.edu>), Religious Studies (<http://www.stanford.edu/dept/relstud>), Science, Technology, and Society (<http://sts.stanford.edu>), and Sociology (<http://sociology.stanford.edu>). These courses should form a coherent program and must be relevant to the focus of the courses chosen by the student to meet the requirement. Each of these courses must be approved in advance by the interdisciplinary program director. In addition, students in this program must write at least one interdisciplinary paper.

This may be:

A.

Select one of the following:

ENGLISH Individual Research
194

ENGLISH Seniors Honors Essay
197

ENGLISH Individual Work
198

ENGLISH Senior Independent Essay
199

Units

1-10

- B. or a paper integrating the material in two courses the student is taking in two different disciplines.

Field of Study IV. Literature and Foreign Language Literature

This field of study is declared in Axess. It appears on the official transcript, but not on the diploma. This track provides a focus in British and American literature with additional work in French literature; German literature; Italian literature; or Spanish literature. In addition to the degree requirements required of all majors and listed above, students must complete at least 35 additional units of approved courses including:

1. Three elective courses chosen from among those offered by the Department of English, one of which may be a creative writing course.
2. A coherent program of four courses in the foreign language literature, read in the original language, approved by the Director of Undergraduate Studies in English and by the relevant foreign language department.

Field of Study V. Literature and Philosophy

This field of study is declared in Axess. It appears on the official transcript, but not on the diploma. Students should meet with the undergraduate director concerning the Literature and Philosophy focus. This track is for students who wish to explore interdisciplinary studies at the intersection of literature and philosophy while acquiring knowledge of the English language literary tradition as a whole. In addition to the degree requirements required of all majors and listed above, students must complete at least 35-45 additional units of approved courses including:

1. PHIL 80 Mind, Matter, and Meaning (WIM): Prerequisite: introductory philosophy course.
2. Gateway course: ENGLISH 81 Philosophy and Literature. This course should be taken as early as possible in the student's career, normally in the sophomore year.
3. Aesthetics, Ethics, Political Philosophy: one course from PHIL 170 Ethical Theory series.
4. Language, Mind, Metaphysics, and Epistemology: one course from PHIL 180 Metaphysics series.
5. History of Philosophy: one course in the history of Philosophy, numbered above PHIL 100 Greek Philosophy.
6. Two upper division courses of special relevance to the study of Philosophy and Literature. Both of these courses must be in the English department. A list of approved courses (<http://philit.stanford.edu/programs/relevance.html>) is available on the Philosophy and Literature web site.
7. One additional elective course in the English department.
8. One capstone seminar (<http://philit.stanford.edu/programs/capstone.html>) of relevance to the study of Philosophy and Literature.

Honors Program

Students wishing to undertake a formal program of advanced literary criticism and scholarship, including the honors seminar and independent research, are invited to apply for the honors program in the Winter Quarter of the junior year. Any outstanding student is encouraged to engage in an honors thesis project.

Admission is selective. Provisional admission is announced in March. Permission to continue in the program is contingent upon submission, by May 15 of the junior year, of a senior honors essay proposal with a bibliography. Honors students are encouraged to complete before the start

of their senior year the three methodology courses that are English major requirements:

		Units
ENGLISH 160	Poetry and Poetics	5
ENGLISH 161	Narrative and Narrative Theory	5
ENGLISH 162	Critical Methods	5

In September before the senior year, students are encouraged to participate in the Bing Honors College. In Autumn Quarter of the senior year, students take a 3-unit honors seminar on critical approaches to literature. The senior-year seminar is designed to introduce students to the analysis and production of advanced literary scholarship. In addition, in Autumn Quarter of the senior year, honors students take a 2-unit essay workshop focused on the process of researching and writing the essay. Students who are studying at Oxford or at other institutions may be exempted from these requirements on request and with the approval of the director of the honors program.

In Winter and Spring quarters of the senior year, honors students complete the senior honors essay for 10 units under supervision of a faculty adviser.

The deadline for submitting the honors essay is May 15. Essays that receive a grade of 'A-' or above are awarded honors.

Students in the honors program complete the requirements of the major and the following:

		Units
ENGLISH 196A	Honors Seminar: Critical Approaches to Literature	3
ENGLISH 196B	Honors Essay Workshop	2
ENGLISH 197	Seniors Honors Essay	1-10

Advanced Research Options

Individual Research

Students taking 100- or 200-level courses may, with the consent of the instructor, write a follow-up 5-unit paper based on the course material and due no later than the end of the succeeding quarter (register for ENGLISH 194 Individual Research). The research paper is written under the direct supervision of the professor; it must be submitted first in a preliminary draft and subsequently in a final version.

Senior Independent Essay

The senior independent essay gives senior English majors the opportunity to work throughout the year on a sustained piece of critical or scholarly work of around 10,000 words on a topic of their choice, with the close guidance of a faculty adviser. Each student is responsible for finding an adviser, who must approve the proposed topic before the end of the third quarter prior to expected graduation. The senior essay is read and graded by the adviser and one other member of the English faculty. Senior independent essay students register for ENGLISH 199 Senior Independent Essay.

Overseas Studies or Study Abroad

The flexibility of the English major permits students to attend an overseas campus in any quarter, but it is advisable, and in some cases essential, that students spend their senior year at Stanford if they wish to participate in the Honors Program or in a special in-depth reading course. For more information on Stanford overseas programs, see the "Overseas Studies (<http://stanford.edu/dept/registrar/bulletin/5090.htm>)" section of this bulletin.

Students should consult their advisers and the undergraduate program officer to make sure that they can fulfill the requirements before graduation. The Stanford Program in Oxford usually offers courses which apply toward both University requirements and area requirements for the English major.

In either case, students should save the syllabi from their courses if they wish to apply to use them to fulfill an English major requirement.

Overseas Studies Courses in English

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/english/http://explorecourses.stanford.edu>) web site or the Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/english/http://bosp.stanford.edu>) web site. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

		Units
OSPOXFRD 17	Novels of Sensation: Gothic, Detective Story, Prohibition, and Transgression in Victorian Fiction	5
OSPOXFRD 57	The Rise of the Woman Writer 1660-1860	5
OSPOXFRD 60	Shakespeare and his Contemporaries	5
OSPOXFRD 163X	Shakespeare: Critical Commentary	5

Minor in English or in Creative Writing

Both the Department of English and the Creative Writing program offer a distinct minor.

Minor in English Literature

The minor in English Literature offers some flexibility for those students who want to pursue specific interests within British and American literature, while still requiring certain courses that ensure coverage of a variety of periods, genres, and methods of studying literature.

Degree Requirements

In order to graduate with a minor in English, students must complete the following program of seven 5-unit courses, at least one of which must be a seminar, for a total of 35 units:

Required Courses for the Minor

		Units
Historical courses (10)		
Select two of the following:		10
ENGLISH 100A	Literary History I	
ENGLISH 100B	Literary History II	
ENGLISH 100C	Literary History III	
Methodology courses (10)		
Select two of the following:		10
ENGLISH 160	Poetry and Poetics	
ENGLISH 161	Narrative and Narrative Theory	
ENGLISH 162	Critical Methods	
Elective courses (15)		

Three elective courses from those offered in the English department (only one of which may be a course in Creative Writing). 15

Total Units 35

Minor in Creative Writing

The minor in Creative Writing offers a structured environment in which students interested in writing prose or poetry develop their skills while receiving an introduction to literary forms. Students choose a concentration in either prose or poetry.

Degree Requirements

In order to graduate with a minor in Creative Writing, students must complete the following program of six 5-unit courses for a total of 30 units. All courses must be taken for a letter grade. Courses taken abroad or at other institutions may not be counted towards the minor.

Required Courses for the Minor

Students must complete at least 30 units of approved courses, in either the prose or poetry concentration:

Prose concentration-

	Units
ENGLISH 90 Fiction Writing	5
or ENGLISH 91 Creative Nonfiction	
ENGLISH 92 Reading and Writing Poetry	5
ENGLISH 94 Writing Across Genres	5
ENGLISH 146 Development of the Short Story: Continuity and Innovation	5
Select two of the following intermediate or advanced prose classes:	10
any ENGLISH 190 series	
any ENGLISH 191 series	
ENGLISH 198L Individual Work: Levinthal Tutorial	
ENGLISH 290 Advanced Fiction Writing	
ENGLISH 291 Advanced Creative Nonfiction	
Total Units	30

Poetry concentration-

	Units
ENGLISH 90 Fiction Writing	5
or ENGLISH 91 Creative Nonfiction	
ENGLISH 92 Reading and Writing Poetry	5
ENGLISH 94 Writing Across Genres	5
ENGLISH 160 Poetry and Poetics	5
Select two of the following intermediate or advanced poetry classes:	10
any ENGLISH 192 series	
ENGLISH 198L Individual Work: Levinthal Tutorial	
ENGLISH 292 Advanced Poetry Writing	
Total Units	30

Master of Arts in English

University requirements for the M.A. are described in the "Graduate Degrees" section of this bulletin.

Coterminal Bachelor's and Master's Degrees in English Literature

Students in the major who are interested in further postgraduate work in English may apply for Stanford's coterminal master's program. Candidates for a coterminal master's degree must fulfill all requirements for the M.A. in English (including the graduate language requirement), as well as general and major requirements for the B.A. in English.

A minimum GPA of 3.7 in the major is required of those applying for the coterminal master's degree. Students must also take the general GRE exam in the year in which they apply.

No courses used to satisfy the B.A. requirements (either as General Education Requirements or department requirements) may be applied toward the M.A. No courses taken more than two quarters prior to admission to the coterminal master's program may be used to meet the 45-unit University minimum requirement for the master's degree.

For University coterminal degree program rules and University application forms, see http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_uual/NBY_Coterm.html. University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin.

Degree Requirements

M.A. candidates must complete with a 3.0 (B) grade point average (GPA) at least nine courses (a minimum of 45 units), at least two of which must be 300-level courses.

Ordinarily, graduate students enroll in courses numbered 200 and above. They may take no more than two courses numbered 101-199 without the consent of the Director of Graduate Studies, and no more than two courses outside the department.

The master's student may take no more than 10 units of directed reading and research (ENGLISH 398 Research Course).

No creative writing courses may be used to fulfill the requirements.

M.A. candidates must also demonstrate a reading knowledge of one foreign language. (For ways of fulfilling this requirement, see the section below on language requirements for the Ph.D.)

Interested students should consult their faculty adviser or the graduate program adviser for further details.

Required Courses

1. Two courses in literature before 1800 (5 units each)
2. Two courses in literature after 1800 (5 units each)

Elective Courses

Five courses (5 units each) which should represent a mixture of survey and specialized courses chosen to guarantee familiarity with a majority of the works on the qualifying exam reading list for doctoral candidates. Candidates who can demonstrate unusually strong preparation in the history of English literature may undertake a 40 to 60 page master's thesis. Each student is responsible for finding an adviser, who must approve the proposed topic before the end of Winter Quarter prior to anticipated graduation. Candidates register for up to 10 units of ENGLISH 399 Thesis

with the faculty member who supervises the thesis work. The thesis is read and graded by the adviser and one other member of the English faculty.

Candidates who write a master's thesis may petition to be excused from up to 10 units of the electives described above. The additional 35 units normally consist of the four required courses and three elective courses. These courses are chosen by the student and approved by the adviser and the Director of Graduate Studies.

Coterminal Program with School of Education

Students interested in becoming middle school and high school teachers of English may apply for admission to the coterminal teaching program (CTP) of the Stanford Teacher Education Program (STEP) in the School of Education.

CTP students complete a special curriculum in English language, composition, and literature that combines a full English major with supplemental course work in subjects commonly taught in California public schools and a core program of foundational courses in educational theory and practice. They are then admitted to STEP for a fifth year of pedagogical study and practice teaching. Students who complete the curriculum requirements are able to enter STEP without the necessity of taking either the GRE or the usual subject matter assessment tests.

At the end of five years, CTP students receive a B.A. in English, an M.A. in Education, and a California Secondary Teaching Credential.

Students normally apply to the coterminal teaching program at the end of their sophomore year or at the beginning of their junior year. For complete program details and for information on how to apply, consult the Director of Undergraduate Studies in English or the CTP coordinator in the School of Education.

Doctor of Philosophy in English

Admission

Students with a bachelor's degree in English or a closely related field may apply to pursue graduate work toward an advanced degree in English at Stanford. Applicants for admission to graduate work must take the General Test of the Graduate Record Examination and the Subject Test in Literature. International students whose first language is not English are also required to take the TOEFL examination (with certain exceptions: see the Office of Graduate Admissions (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/english/http://gradadmissions.stanford.edu>) web site).

University Degree Requirements

University requirements for the Ph.D. are described in the "Graduate Degrees (<http://stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

Department Degree Requirements

The following department requirements, dealing with such matters as residence, dissertation, and examinations, are in addition to the University's basic requirements for the doctorate. Students should consult the most

recent edition of The Ph.D. Handbook; copies are available in the English graduate studies office.

A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the bachelor's degree. Candidates are required to complete at least 135 units of graduate work in addition to the doctoral dissertation. At least three consecutive quarters of graduate work, and the final course work in the doctoral program, must be taken at Stanford.

A student may count no more than 65 units of non-graded courses toward the 135 course units required for the Ph.D., without the written consent of the Director of Graduate Studies. A student takes at least 70 graded units (normally fourteen courses) of the 135 required total units. 5 of these 70 units may be fulfilled with ENGLISH 398 Research Course or ENGLISH 398R Revision and Development of a Paper. ENGLISH 396L Pedagogy Seminar I, ENGLISH 397A Pedagogy Seminar II, and ENGLISH 399 Thesis do not count toward the 70 graded units. No more than 10 units (normally two courses) may come from 100-level courses.

This program is designed to be completed in five years. Five quarters of supervised teaching, two as a teaching assistant in a literature course, one as a teaching apprentice, and two as the instructor of a Program in Writing and Rhetoric (PWR) course, are a requirement of the Ph.D. program.

In the first quarter of their first year, students take a 2-unit seminar in pedagogy as preparation for their initial teaching assistantship. In the first quarter of their second year, students take a pedagogy seminar and an apprentice teaching program. The seminar and apprentice teaching constitute a 50-percent teaching appointment. Apprentice teachers attend the classes and conferences of a senior mentor/instructor for two to three weeks. While teaching during the second and third quarters of the second year, students continue to participate in a series of PWR pedagogy workshops and visit one another's classrooms.

I. English and American Literature

Students are expected to do course work across the full range of English and American literature. Students are required to fulfill the following requirements. Note: fulfillment of requirements 1, 2, and 3 must be through Stanford courses; students will not be excused from these three requirements or granted credit for course work done elsewhere.

- | | Units |
|--|-------|
| 1. ENGLISH 396 Introduction to Graduate Study for Ph.D. Students | 5 |
| ENGLISH 396L Pedagogy Seminar I | 2 |
- Graduate-level (at least 200-level) course work in English literature before 1700, and English and American literature after 1700 (at least 5 units of each).
 - Graduate-level (at least 200-level) course work in some aspect of literary theory such as courses in literary theory itself, narrative theory, poetics, rhetoric, cultural studies, gender studies (at least 5 units).
 - Students concentrating in British literature are expected to take at least one course (5 units) in American literature; students concentrating in American literature are expected to take at least one course (5 units) in British literature.
 - Of all courses taken, a minimum of six courses for a letter grade must be graduate colloquia and seminars, of which at least three must be graduate seminars. The colloquia and seminars should be from different genres and periods, as approved by the adviser.
 - Completion, in Autumn Quarter of the second year, of a pedagogy seminar which includes the apprentice teaching program described above, and a series of pedagogy workshops during Winter and Spring Quarters. There are no units associated with this work.

7. The remaining units of graded, graduate-level courses and seminars should be distributed according to the adviser's judgment and the candidate's needs. A student may receive graduate credit for no more than two 100-level courses in the Department of English.
8. Consent of the adviser if courses taken outside the Department of English are to count toward the requirement of 70 graded units of course work.
9. An oral qualifying examination based on a reading guide, to be taken at the end of the summer after the first year of graduate work. The final decision as to qualification is made by the graduate studies committee in consideration of the student's overall record for the first year's work in conjunction with performance on the examination. Note: A student coming to the doctoral program who has done graduate work at another university must petition in the first year at Stanford for transfer credit for course work completed elsewhere. The petition should list the courses and grades, and describe the nature and scope of course work, as well as the content, contact hours, and writing requirements. A syllabus must be included. The Director of Graduate Studies considers the petition in conjunction with the student's overall performance.
10. University Oral Examinations—A University oral examination covering the field of concentration (as defined by the student and the student's adviser). This examination, based on a reading list established by the candidate in consultation with his or her adviser, is normally taken no later than the Spring Quarter of the third year of graduate study.
11. Dissertation—As early as possible during graduate study, a Ph.D. candidate is expected to find a topic requiring extensive original research and to seek out a member of the department as his or her adviser. The adviser works with the student to select a committee to supervise the dissertation. candidates should take this crucial step as early in their graduate careers as possible. The committee may well advise extra preparation within or outside the department, and time should be allowed for such work. After the dissertation topic has been approved, the candidate should file a formal reading committee form as prescribed by the University. The dissertation must be submitted to the adviser as a rough draft, but in substantially final form, at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree.
12. Committee—The doctoral dissertation reading committee consists of the principal dissertation adviser and two other readers. At least one of these three must be from the English department. Normally, all members are on the Stanford Academic Council.

II. English and Comparative Literature

The Ph.D. program in English and Comparative Literature is designed for students wishing an extensive knowledge of the literature, thought, and history of England and of at least one foreign country, for one period. Approximately half of the student's course work and reading is devoted to this period, with the remainder of the time given to other periods of English and American literature since 1350.

This degree, administered by the Department of English, is to be distinguished from the Ph.D. in Comparative Literature. The latter program is intended for students unusually well prepared in foreign languages and involves advanced work in three literatures, one of which may be English. Interested students should consult a Department of English adviser, but faculty from Comparative Literature may also provide useful supplementary information.

The requirements are as follows:

1. Knowledge of the basic structure of the English language and of Chaucer. This requirement may be met by examination, or by taking 10 units of courses chosen from among those offered in linguistics, English philology, and early and middle English literature including Chaucer. No particular courses are required of all students.
2.

		Units
ENGLISH 396	Introduction to Graduate Study for Ph.D. Students	5
ENGLISH 396L	Pedagogy Seminar I	2
3. Completion, in Autumn Quarter of the second year, of a pedagogy seminar, which includes the Apprentice Teaching Program described above, and a series of pedagogy workshops during winter and spring quarter. There are no units associated with this work.
4. A knowledge of one foreign language sufficient to take graduate-level literature courses in a foreign-language department and an advanced reading knowledge of a second language.
5. A minimum of 45 units in the history, thought, and literature of one period, in two or more languages, one of which must be English and one foreign. Students normally include at least two courses in a foreign literature read in the original language and two courses listed under Comparative Literature or Modern Thought and Literature. As many as 20 units of this requirement may be satisfied through courses in reading and research. A student may receive graduate credit for no more than two 100-level courses in the Department of English.
6. A minimum of six courses for a letter grade from graduate colloquia and graduate seminars, of which three must be graduate seminars and of which at least four must be in the Department of English. Among these courses, students should take one in literary theory or criticism. These colloquia and seminars should be in different genres and periods as approved by the adviser.
7. An oral qualifying examination: see item 9 under requirements of the Ph.D. program in English Literature. For qualifications in the doctoral program in English and Comparative Literature, candidates are not held responsible for literature before 1350, but instead include on their reading list a selection of works from a foreign literature read in the original language.
8. University Oral Examinations—A University oral examination covering the field of concentration (as defined by the student and the student's adviser). This examination, based on a reading list established by the candidate in consultation with his or her adviser, is normally taken no later than the Spring Quarter of the third year of graduate study.
9. Dissertation—As early as possible during graduate study, a Ph.D. candidate is expected to find a topic requiring extensive original research and to seek out a member of the department as his or her adviser. The adviser works with the student to select a committee to supervise the dissertation. Candidates should take this crucial step as early in their graduate careers as possible. The committee may well advise extra preparation within or outside the department, and time should be allowed for such work. After the dissertation topic has been approved, the candidate should file a formal reading committee form as prescribed by the University. The dissertation must be submitted to the adviser as a rough draft, but in substantially final form, at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree.
10. Committee—The doctoral dissertation reading committee consists of the principal dissertation adviser and two other readers. At least one of these three must be from the English department. Normally, all members are on the Stanford Academic Council.

Language Requirements

Candidates for the Ph.D. degree (except those in English and Comparative Literature, for whom special language requirements prevail) must demonstrate a reading knowledge of two foreign languages. Candidates in the earlier periods must offer Latin and one of the following languages: French, German, Greek, Italian, or Spanish. In some instances, they may be required to offer a third language. Candidates in the later period (that is, after the Renaissance) must offer either French, German, or Latin as one language and may choose the second language from the following: Greek, Latin, French, German, Italian, Spanish, Russian, or another language relevant to the student's field of study. In all cases, the choice of languages offered must have the approval of the candidate's adviser. Any substitution of another language must be approved by the Director of Graduate Studies.

The graduate studies committee does not accept courses taken as an undergraduate in satisfaction of the language requirement for doctoral candidates. For students coming to doctoral work at Stanford from graduate work done elsewhere, satisfaction of a foreign language requirement is determined by the Director of Graduate Studies based on the contact hours, syllabus, reading list, etc. Transfer is not automatic.

The candidate must satisfy one language requirement by the end of the first year (that is, before the qualifying examination), and the other by the end of the third year.

Foreign language requirements for the Ph.D. may be fulfilled in any of the following ways:

1. A reading examination given each quarter by the various language departments, except for Latin and Greek.
2. For Latin and Greek, an examination given by one of the Department of English faculty.
3. Passage with a grade of 'B' or higher of a course in literature numbered 100 or higher in a foreign language department at Stanford. As an alternative for Latin, French, Italian, German, and Spanish, passage of the following, respectively, with a grade of 'B' or higher:

		Units
CLASSLAT 10	Intensive Beginning Latin	9-15
FRENLANG 250	Reading French	4
FRENLANG 250S	Reading French	2-4
GERLANG 250	Reading German	4
ITALLANG 250	Reading Italian	4
SPANLANG 250	Reading Spanish	3

Emeriti: (Professors) George H. Brown, W. B. Carnochan, W. S. Di Piero, John Felstiner, Albert J. Gelpi, Barbara C. Gelpi, David Halliburton, Shirley Heath, John L'Heureux, Herbert Lindenberger, Andrea A. Lunsford, Thomas C. Moser, Nancy H. Packer, Marjorie G. Perloff, Robert M. Polhemus, Arnold Rampersad, Ronald A. Rebholz, David R. Riggs, Lawrence V. Ryan, Wilfred H. Stone, Elizabeth C. Traugott, Wesley Trimpi; *(Associate Professor)* Sandra Drake; *(Professor, Teaching)* Larry Friedlander; *(Senior Lecturer)* Helen B. Brooks; *(Lecturer)* David MacDonald

Chair: Gavin Jones

Director of Creative Writing Program: Eavan Boland

Director of Program in Writing and Rhetoric: Nicholas Jenkins

Professors: John B. Bender (English, Comparative Literature), Eavan Boland, Terry Castle, Michele Elam, J. Martin Evans, Kenneth W. Fields, Shelley Fisher Fishkin, Denise Gigante (on leave), Roland Greene (English, Comparative Literature), Gavin Jones, Mark McGurl, Franco Moretti (English, Comparative Literature, on leave), Sianne Ngai, Stephen Orgel, Patricia A. Parker (English, Comparative Literature), Peggy Phelan (English, Drama), Nancy Rutenburg, Ramón Saldívar (English,

Comparative Literature), Jennifer Summit (on leave), Elizabeth Tallent (on leave Winter), Elaine Treharne, Blakey Vermeule, Tobias Wolff

Associate Professors: Blair Hoxby, Nicholas Jenkins, Adam Johnson, Paula Moya, Alex Woloch

Assistant Professors: Claire Jarvis, Michelle Karnes (on leave), Saikat Majumdar, G. Vaughn Rasberry, Stephen Sohn

Senior Lecturer: Judith Richardson, Christopher Rovee (Autumn only)

Courtesy Professors: David Palumbo-Liu, Bryan Wolf

Courtesy Associate Professor: Joshua Landy

Lecturers: Mark Algee-Hewitt, Molly Antopol-Johnson, Harriet Clark, Marvin Diogenes, Steffi Dippold, Keith Ekiss, John Evans, Sarah Frisch, Jillian Hess, Maria Hummel, Scott Hutchins, Tom Kealey, Dana Kletter, Peter Kline, Hilton Obenzinger, Brittany Perham, Phoebe Putnam, Kirstin Quade, Nina Schloesser, Bruce Snider, Stephanie Soileau, Adena Spingarn, Alice Staveley, Shimon Tanaka, Greg Wrenn

Consulting Professor: Valerie Miner

Visiting Professors: Anne Carson, Richard Powers

Overseas Studies Courses in English

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/english/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/english/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/english/http://bosp.stanford.edu>).

		Units
OSPOXFRD 17	Novels of Sensation: Gothic, Detective Story, Prohibition, and Transgression in Victorian Fiction	5
OSPOXFRD 57	The Rise of the Woman Writer 1660-1860	5
OSPOXFRD 60	Shakespeare and his Contemporaries	5
OSPOXFRD 163X	Shakespeare: Critical Commentary	5

Ethics in Society Program

Courses offered by the Program in Ethics in Society are listed under the subject code ETHICSOC on the Stanford Bulletin's ExploreCourses (<https://explorecourses.stanford.edu/search?q=ETHICSOC&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-ETHICSOC=on&filter-catalognumber-ETHICSOC=on>) web site. There are many course offerings at Stanford that address moral and political questions only some of which are crosslisted by the Program in Ethics in Society.

The Program in Ethics in Society, which operates under the umbrella of the Bowen H. McCoy Family Center for Ethics in Society, is designed to foster scholarship, teaching, and moral reflection on fundamental issues in personal and public life. The program is grounded in moral and political philosophy, but it extends its concerns across a broad range of traditional disciplinary domains. The program is guided by the idea that ethical thought has application to current social questions and conflicts, and it seeks to encourage moral reflection and practice in areas such as business, international relations, law, medicine, politics, science, and public service.

The Program in Ethics in Society offers an interdisciplinary honors program that is open to undergraduate students in all majors and a minor.

Honors in Ethics in Society

The Program in Ethics in Society offers undergraduates the opportunity to write a senior honors thesis within a community of interdisciplinary scholars. The course of study combines the analytical rigor of moral and political philosophy with the subject matter of each student's self-chosen major to develop a sophisticated understanding of problems of social concern. Such problems include: the nature and implications of treating people with equal dignity and respect; the scope of liberty; the legitimacy of government; and the meaning of responsibility. The program poses these issues and others in the context of debates which arise in our common public life. It thus extends moral concern and reflection across disciplines such as medicine, law, economics, political science, sociology, international relations, and public policy.

Students in the program write honors theses on topics which use moral and political philosophy to address practical problems. Previous theses have considered questions such as the just distribution of health care, obligations to future generations, the role of moral values in education, the moral implications of genetic engineering, and the relationship between gender inequality and the structures of work and family. Students in the program have won scholarships to graduate study including Marshall, Rhodes, and Fulbright fellowships. Others have taken the step from moral analysis to moral commitment, pursuing careers of public service.

The honors program in Ethics in Society is open to majors in every field and must be taken in addition to a department major. Applicants should have a cumulative grade point average (GPA) of 3.3 (B+) or higher. They should also maintain this minimum average in the courses taken to satisfy the requirements. Required courses must be taken for a letter grade.

Students interested in pursuing honors in Ethics in Society can apply for early acceptance in June of their sophomore year or the regular deadline in mid November of their junior year. Students should contact the program coordinator for more information and to begin the application process.

Requirements

	Units
ETHICSOC 20 Introduction to Moral Philosophy or ETHICSOC Ethical Theory 170	4-5
ETHICSOC 171 Justice	4-5
ETHICSOC 190 Ethics in Society Honors Seminar	3
Two 4- or 5-unit undergraduate courses on a subject approved by the faculty director, designed to support research conducted for or connected to the honors thesis.	8-10
ETHICSOC Ethics in Society Honors Thesis 200A	5
ETHICSOC Ethics in Society Honors Thesis 200B	5

Thesis subject must be approved by the honors adviser and students must receive a grade of 'B+' or higher on their thesis to receive honors in Ethics in Society.

Typically, ETHICSOC 20 or ETHICSOC 170 and ETHICSOC 171 are completed before the Winter Quarter of the junior year. ETHICSOC 190 is offered only in Winter Quarter and should be taken in the junior year. Specialization courses can be completed at any time and courses taken prior to acceptance in the Program can be used to fulfill this requirement.

The honors thesis is written during Autumn and Winter quarters of the senior year and is generally due the first Monday in May. Students also complete preliminary and final thesis presentations in the senior year and an oral examination after submission of the thesis. To receive honors in Ethics in Society, students must fulfill all requirements and receive a grade of 'B+' or higher on their thesis. Courses taken to fulfill the Ethics in Society honors requirements may be double-counted for any major. Exceptions to this must be approved by the faculty director.

Minor in Ethics in Society

The Ethics in Society minor is open to students in any department who wish to explore moral issues in personal and public life.

Students must declare the minor in Access no later than the last day of Autumn Quarter of their senior year, although they are advised to declare sooner. The student should discuss the minor with an adviser and prepare a proposal that includes a list of courses planned to fulfill the requirements, theme of minor study, and the name of the faculty adviser. The faculty director approves this proposal. Students interested in pursuing a minor in Ethics in Society should contact the program coordinator for more information and to begin the planning process.

A minor in Ethics in Society requires six courses for a minimum of 25 and a maximum of 30 units and courses must be taken for a letter grade.

Requirements

	Units
ETHICSOC 20 Introduction to Moral Philosophy or ETHICSOC Ethical Theory 170	4-5
ETHICSOC 171 Justice	4-5
Three courses at the 100-level or above that addresses some dimensions of moral or political problems, in either theory or practice, relating to theme of minor.	14-15
One course at the 200-level or above that addresses some dimensions of moral or political problems, in either theory or practice, relating to theme of minor.	3-5

The 100- and 200-level courses should be focused around a central theme such as biomedical ethics, ethics and economics, ethics and politics, or environmental ethics (or a theme approved by the faculty director). The courses at the 100 and 200 level are normally taken after completion of the core courses.

See the course list in the "Related Courses (p. 391)" section of this bulletin for approved 100- and 200-level courses taken by students in recent years. The faculty director may approve additional courses.

Courses credited to the Ethics in Society minor may not be double-counted toward major requirements.

Faculty Director: Rob Reich

Affiliated Faculty: Kenneth Arrow (Economics, emeritus), Donald Barr (Pediatrics), Barton Bernstein (History), Michael Bratman (Philosophy), Eamonn Callan (Education), Albert Camarillo (History), Joshua Cohen (Philosophy, Political Science, Law), Barbara Fried (Law), Leah Gordon (Education), Nadeem Hussain (Philosophy), Allyson Hobbs (History), Aishwary Kumar (History), Scotty McLennan (Dean of Religious Life), Benoit Monin (Psychology, Graduate School of Business), Josiah Ober (Classics, Political Science), Eric Roberts (Computer Science), Debra Satz (Philosophy), Tamar Schapiro (Philosophy, on leave), Mitchell Stevens

(Education), David K. Stevenson (Pediatrics), Allen Wood (Philosophy, emeritus), Sylvia Yanagisako (Anthropology), Lee Yearley (Religious Studies)

Related Courses

This is a partial list of courses that have been counted as specialization courses (honors requirement) or 100- and 200-level courses (minor requirement) in recent years. Courses not on this list may be submitted to the faculty director for approval.

Feminist Studies

Courses offered by the Program in Feminist Studies are listed under the subject code FEMST on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=FEMST&filter-catalognumber-FEMST=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=FEMST&filter-catalognumber-FEMST=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=FEMST&filter-catalognumber-FEMST=on>).

The Program in Feminist Studies offers an undergraduate major and minor, and an interdisciplinary honors program that is open to students in all majors. Each Feminist Studies student builds an individual program of study around a self-defined thematic focus, integrating courses from multiple departments. The program encourages work in the arts and supports creative honors theses. Feminist Studies majors may declare LGBT/Queer Studies as a subplan. The LGBT/Queer Studies subplan is appropriate for fields of study focusing on history and theories of lesbian, gay, bisexual, transgender, and queer identities, communities, cultural practices, politics, and legal and medical issues.

Curriculum guidelines and forms for the undergraduate major, minor, and honors programs are available on the program web site (<https://feminist.stanford.edu/undergraduates>). See the program web site for additional contact information (<https://feminist.stanford.edu/about>).

Feminist Studies awards the annual Michelle Z. Rosaldo Prizes (<https://feminist.stanford.edu/undergraduates/prizes>) and Francisco Lopes Prize (<https://feminist.stanford.edu/undergraduates/prizes>) for the best undergraduate scholarship on women, feminism, gender, or sexuality. The Rosaldo Prizes are awarded for the best essay and honors thesis or master's paper in the social sciences, and the Lopes Prize for the best essay and honors thesis or master's paper in the humanities. The Diane Middlebrook Graduate Teaching Prize (<https://feminist.stanford.edu/graduate-students/prizes>) is awarded each year to an outstanding graduate student teaching assistant or teaching fellow for their feminist pedagogy in classes on feminism, gender, and sexuality studies.

Mission of the Undergraduate Program in Feminist Studies

The interdepartmental Program in Feminist Studies provides students with knowledge and skills to investigate the significance of gender and sexuality in all areas of human life. Feminist Studies examines how societies structure gender roles, relations, and identities, and how these intersect with other hierarchies of power, such as class, race, nationality, ethnicity, sexuality, ability, and age. The program coordinates courses offered across the University in feminist and lesbian, gay, bisexual, transgender, and queer studies. Students learn to employ critical gender and sexuality studies methodologies to analyze the assumptions about gender and sexuality that inform the study of individuals, cultures, social institutions, policy, and areas of scholarly inquiry. The program prepares majors for graduate study in humanities and social sciences, and for professional schools.

Learning Outcomes (Undergraduate)

The program expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the undergraduate program. Students are expected to demonstrate:

1. knowledge of the histories of feminist and/or LGBT/queer social movements and their intersections with other social justice movements.
2. understanding of how social hierarchies related to gender, sexuality, race and ethnicity have developed historically, cross-culturally, and transnationally.
3. knowledge and comprehension of feminist and/or LGBT/queer theories and methods for social, historical, literary, and cultural analysis.
4. skill in making and communicating feminist and/or LGBT/queer analyses of data, texts, and arguments.

Bachelor of Arts in Feminist Studies

The major in Feminist Studies requires 63 units and may be taken as a single major, as one of multiple majors, or as a secondary major. If taken as one of multiple majors, none of the 63 units counted toward the major in Feminist Studies may overlap with units counted toward the major in another department or program. If taken as a secondary major, up to 30 of the units counted toward the Feminist Studies major may also be counted as fulfilling the major requirements in another department or program if that department or program consents. A maximum of 10 of the 63 units for the major may be taken on a credit/no credit or satisfactory/no credit basis; a maximum of 10 units may be taken as independent study or directed reading. FEMST core courses must be taken for a letter grade.

The major should be declared before the beginning of the junior year. Students declare the major by developing a proposal with the help of the Program Coordinator and a faculty adviser from the list of resource faculty. The proposal describes the student's thematic focus and outlines a course of study. The proposal must be approved by the faculty adviser and the Program Director.

Curriculum

The major in Feminist Studies includes a total of at least 12 courses at the 100 level or above for 63 units. The courses are divided among the core, the focus, and electives to reach the total course requirement.

The Core

		Units
1. Introductory Course (4-5)		
FEMST 101	Introduction to Feminist Studies	4-5
2. Feminist Theories and Method (2-5)		
FEMST 103	Feminist Theories and Methods Across the Disciplines (Offered again 2013-14; FEMST 101 is a prerequisite)	2-5
3. Junior and Senior Seminars and Practica (3)		
FEMST 104A	Junior Seminar and Practicum	1
FEMST 104B	Senior Seminar and Practicum	2
4. One feminist theory course from approved course list below. (3-5)		
Consult the program mentor for past approved theory courses.		
FEMST 120	Introduction to Queer Studies	
AMSTUD 210	Critical Theory and The Environment	
AMSTUD 261F	Gender and Sexuality in Asian American Literature	
ANTHRO 90A	History of Archaeological Thought	
COMPLIT 133	Gender and Modernism	
COMPLIT 250	Literature, History and Memory	
ENGLISH 261F	Gender and Sexuality in Asian American Literature	
ENGLISH 362S	Trauma Theory, Psychoanalysis and Asian American Literature	
FEMST 110	Introduction to Comparative Queer Literary Studies	
FEMST 140E	Black (W)holes: Queering Afro-Futurism	
FEMST 140P	Queer Art and Performance	

5. One Feminist Studies or a related course in the social sciences (3-5) 3-5

Subjects include Anthropology, Communication, Education, History, Human Biology, Law, Medicine, Political Science, Psychology, or Sociology

6. One Feminist Studies or a related course in the humanities (3-5) 3-5

Subjects include English, Linguistics, Philosophy, Religious Studies, the arts, and languages

Total Units 18-28

Practicum

The practicum courses (FEMST 104A Junior Seminar and Practicum, FEMST 104B Senior Seminar and Practicum) bring together theory and practical experience. The practicum involves field research, community service, or other relevant experience such as a public service internship. Students plan their practicum during Winter Quarter of the junior year in FEMST 104A Junior Seminar and Practicum (1 unit). The practicum is normally done over the summer between junior and senior year, and may be taken for additional units. It is followed by FEMST 104B Senior Seminar and Practicum (2 units), in Autumn Quarter of the senior year. During 2012-13 both 104A and 104B are scheduled in Winter Quarter.

The Focus

Every student designs a thematic focus consisting of at least five courses in addition to the core. The thematic focus is not declared in Axess. It does not appear on the transcript or diploma. Note: Majors focusing on LGBT/Queer Studies may declare the LGBT/Queer Studies subplan. See section below.

1. The student designs his/her thematic focus in consultation with a faculty adviser. The following are examples, and students are encouraged to develop new ones:
 - Chicana Feminisms
 - Crosscultural Perspectives on Gender
 - Feminist Perspectives on Science and Technologies
 - Gender and Education
 - Gender, Race, and Nation/Transnational Feminisms
 - Gender Justice and Human Rights
 - Race, Class and Gender
 - Women, Creativity, and the Arts
 - Gender, Health and Medicine
 - Gender, Spirituality and Religion

2. At least three of the focus courses should be Feminist Studies or related courses.

3. At least one course should be a major survey, methodology, or theory course offered by a department or interdepartmental program as an initiation into the practice of study in the field.

4. At least one course within the thematic focus should address race/ethnicity and/or global perspectives.

Electives

Students are encouraged to take electives that provide intellectual breadth and contribute to the 63-unit requirement.

Writing in the Major (WIM)

Majors in Feminist Studies may satisfy the Writing in the Major (WIM) requirement by taking FEMST 153 Women and the Creative Imagination, or one of the approved WIM courses in the list below. Honors students satisfy the WIM requirement through their honors work.

WIM Courses for Majors (4-5) 4-5

AMSTUD 160	Perspectives on American Identity	
ANTHRO 90A	History of Archaeological Thought	
ANTHRO 90B	Theory of Cultural and Social Anthropology	
FEMST 153	Women and the Creative Imagination	
LINGUIST 150	Language in Society	

Total Units 4-5

LGBT/Queer Studies Subplan

Feminist Studies majors may declare LGBT/Queer Studies as a subplan. The LGBT/Queer Studies subplan is appropriate for fields of study focusing on history and theories of lesbian, gay, bisexual, transgender, and queer identities, communities, cultural practices, politics, and legal and medical issues. Transnational and comparative perspectives on LGBT/Queer identities and politics are particularly encouraged. The subplan is declared in AXESS and subplan designations appear on the official transcript, but are not printed on the diploma.

Students declaring the LGBT/Queer Studies subplan must meet all the Feminist Studies major requirements. In addition to all Feminist Studies core courses required for the major, the LGBT/Queer Studies subplan requires that students complete FEMST 120 Introduction to Queer Studies. At least 3 of the focus courses should be in the area of LGBT/Queer studies, chosen in consultation with and approved by the student's faculty adviser.

Curriculum

A total of at least 12 courses at the 100 level or above for 63 units are required for the LGBT/Queer Studies subplan. The courses are divided among the core, the focus, and electives to reach the total course requirement.

The Core

		Units
1. Introductory Courses (8-10)		
FEMST 101	Introduction to Feminist Studies	4-5
FEMST 120	Introduction to Queer Studies	4-5
2. Theory and Methods (FEMST 101 is a prerequisite of FEMST 103) (2-5)		
FEMST 103	Feminist Theories and Methods Across the Disciplines (Taught in 13-14; FEMST 101 is a prerequisite of FEMST 103)	2-5
3. Junior and Senior Seminars and Practica (3)		
FEMST 104A	Junior Seminar and Practicum	1
FEMST 104B	Senior Seminar and Practicum	2
4. One feminist theory course from approved course list below. (3-5)		
Consult the program mentor for current and past approved theory courses.		
AMSTUD 210	Critical Theory and The Environment	
AMSTUD 261F	Gender and Sexuality in Asian American Literature	
ANTHRO 90A	History of Archaeological Thought	

COMPLIT 133	Gender and Modernism	
COMPLIT 250	Literature, History and Memory	
ENGLISH 261F	Gender and Sexuality in Asian American Literature	
ENGLISH 362S	Trauma Theory, Psychoanalysis and Asian American Literature	
FEMST 110	Introduction to Comparative Queer Literary Studies	
FEMST 140E	Black (W)holes: Queering Afro-Futurism	
FEMST 140P	Queer Art and Performance	
5. One Feminist Studies or a related course in the social science (3-5)		3-5
Subjects include Anthropology, Communication, Education, History, Human Biology, Law, Medicine, Political Science, Psychology, or Sociology		
6. One Feminist Studies or a related course in the humanities (3-5)		3-5
Subjects include English, Linguistics, Philosophy, Religious Studies, the arts, and languages		
Total Units		22-33

At least one course should be a major survey, methodology, or theory course offered by a department or IDP as an initiation into the practice of study in the field.

Practicum

The practicum courses (FEMST 104A Junior Seminar and Practicum, FEMST 104B Senior Seminar and Practicum) bring together theory and practical experience. The practicum involves field research, community service, or other relevant experience such as a public service internship. Students plan their practicum during Winter Quarter of the junior year in FEMST 104A Junior Seminar and Practicum (1 unit). The practicum is normally done over the summer between junior and senior year, and may be taken for additional units. It is followed by FEMST 104B Senior Seminar and Practicum (2 units), in Autumn Quarter of the senior year. During 2012-13 both 104A and 104B are scheduled in Winter Quarter.

The Focus

Students in the LGBT/Queer Studies subplan design their thematic focus in LGBT/Queer Studies. The focus consists of at least five courses in addition to the core. At least three of the five focus courses should be FEMST or related courses with significant LGBT/Queer Studies content and at least one course should address race/ethnicity and/or global perspectives on LGBT/Queer issues. The focus is designed in consultation with the student's adviser.

Electives

Students are encouraged to take electives that provide intellectual breadth and contribute to the 63-unit requirement.

Overseas Studies Courses in Feminist Studies

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/feministstudies/http://explorecourses.stanford.edu>) web site or the Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/feministstudies/http://bosp.stanford.edu>) web site. Students should consult the Program Coordinator for applicability of Overseas Studies courses to a major or minor program.

Honors Program in Feminist Studies

For Majors in Feminist Studies

Admission—The honors program offers an opportunity to do independent research for a senior thesis. It is open to students with a grade point average (GPA) of 3.3 or better in course work in Feminist Studies. Students must begin the application process for honors certification by consulting with the Program Director by May 1 of their junior year, but are encouraged to apply earlier. During the application process, students will design a project in consultation with their proposed thesis adviser and the Feminist Studies staff. A proposal describing the project and the number of units to be taken toward the honors directed project must be submitted to the Program Director for final approval. All projects must have a primary focus on gender or sexuality. See the Honors section of our web site for details.

Requirements

1. In addition to the normal requirements for the major, students enroll with their honors thesis adviser for 10-15 units of FEMST 105 Honors Work towards the preparation of the honors thesis. These units may be distributed throughout the academic year.
2. Throughout the senior year, students work with faculty advisers and meet quarterly as a group. A semifinal draft of the thesis will be due during the 5th week of spring quarter of their senior year. The final thesis must be submitted by the Monday of the last week of classes in the Spring. The completed thesis must be submitted with the Thesis Completion Form, which requires the adviser's signature of approval. Creative projects must include a section of critical analysis. For guidelines, see the Honors section of our web site.

For Majors in Other Departments

Interdisciplinary Honors in Feminist Studies for majors in other departments or programs, as distinguished from honors for students pursuing a major in Feminist Studies, is intended to complement study in any major. Feminist Studies minors who wish to pursue honors in Feminist Studies should apply through the process for non-majors.

Admission

The Feminist Studies honors program is open to students majoring in any field with a GPA of 3.3 or better.

As a prerequisite, students must complete the following with a grade of 'B+' or better:

1. Either FEMST 101 Introduction to Feminist Studies *or* FEMST 120 Introduction to Queer Studies, *and* one designated feminist theory course, *or*
2. Three Feminist Studies courses and/or related courses relevant to the topic of their proposed honors research.

Students must begin the application process for honors by consulting with the Program Director by May 1st of their junior year, but are encouraged to begin earlier. During the application process, students outline a plan for course work and design an honors project in consultation with their proposed thesis adviser. The final proposal describing the project and the number of units to be taken toward the honors directed project must be submitted to the Program Director for final approval. See the Honors section of our web site for more details.

Requirements

1. Students enroll with their honors thesis adviser for 10-15 units of FEMST 105 Honors Work towards the preparation of the honors thesis. These units may be distributed throughout the academic year.
2. Throughout the senior year, students work with faculty advisers and meet quarterly as a group. The final thesis must be submitted by the Monday of the last week of classes in the Spring of their senior year. The completed thesis must be submitted with the Thesis Completion Form, which requires the adviser's signature of approval. Creative projects must include a section of critical analysis. For additional guidelines, see the honors section of the program web site (<https://feminist.stanford.edu/undergraduates/honors-program>).

Minor in Feminist Studies

Students interested in minoring in Feminist Studies should consult the Program Coordinator. The minor proposal should be drafted in discussion with a faculty adviser selected from the Feminist Studies resource faculty list.

The minor in Feminist Studies consists of at least six courses at the 100 level or above for a minimum of 30 and a maximum of 36 units. None of the units for the minor may count towards the student's major. The minor in Feminist Studies should be declared by Winter Quarter of a student's junior year.

Requirements

	Units
1. Introductory Course (4-5)	
FEMST 101 Introduction to Feminist Studies	4-5
2. One of the feminist theory courses from the approved course list below (3-5)	
FEMST 103 (FEMST 101 is a prerequisite of FEMST 103)	
FEMST 120 Introduction to Queer Studies	
AMSTUD 210 Critical Theory and The Environment	
AMSTUD 261F Gender and Sexuality in Asian American Literature	
ANTHRO 90A History of Archaeological Thought	
COMPLIT 133 Gender and Modernism	
COMPLIT 250 Literature, History and Memory	
ENGLISH 261F Gender and Sexuality in Asian American Literature	
ENGLISH 362S Trauma Theory, Psychoanalysis and Asian American Literature	
FEMST 110 Introduction to Comparative Queer Literary Studies	
FEMST 140E Black (W)holes: Queering Afro-Futurism	
FEMST 140P Queer Art and Performance	
Total Units	7-10

The Focus

At least 4 of the courses for the minor should relate to a thematic focus defined by the student and faculty adviser. See the suggested clusters listed in the "Bachelor of Arts in Feminist Studies (p. 392)" section of this bulletin. At least one course within the thematic focus should address race/ethnicity and/or global perspectives on feminist, gender, and sexuality.

Interim Program Director 2012-13

Christine Min Wotipka (Education)

Program Committee

The Interim Program Director, whose term begins September 1, will announce the membership of the 2012-13 Program Committee here on September 1, 2012.

Resource Faculty

American Studies: Shelley Fisher Fishkin

Anthropology: Kathleen Coll, Paulla Ebron, Miyako Inoue, S. Lochlann Jain, Matthew Kohrman, Barbara Voss, Sylvia Yanagisako

Art and Art History: Terry Berlier, Pamela Lee, Jean Ma, Richard Meyer

Comparative Literature: Petra Dierkes-Thrun, Patricia Parker

Developmental Biology: Ellen Porzig

East Asian Languages and Cultures: Haiyan Lee, Yoshiko Matsumoto, James Reichert, Melinda Takeuchi

Education: Susanna Loeb, Myra Strober (emerita), Christine Min Wotipka

English: Eavan Boland, Helen Brooks, Terry Castle, Michele Elam, Shelly Fisher Fishkin, Barbara Gelpi (emerita), Claire Jarvis, Andrea Lunsford, Paula Moya, Stephen Orgel, Ramón Saldívar, Stephen Hong Sohn, Jennifer Summit, Elizabeth Tallent

Feminist Studies: Nicole Baran, Kathleen Coll, Andrea Rees Davies, Shana Goldin-Perschbacher, Susan Krieger, Valerie Miner, Rabbi Patricia Karlin-Neumann

French and Italian: Cecile Alduy, Marisa Galvez, Carolyn Springer

German Studies: Russell Berman, Adrian Daub, Kathryn Strachota

History: Philippe Buc, Carolyn Lougee Chappell, Paula Findlen, Estelle Freedman, Allyson Hobbs, Katherine Jolluck, Nancy Kollmann, Ana Minian, Paul Robinson (emeritus), Londa Schiebinger, Matthew Sommer, Laura Stokes, Kären Wigen

Human Biology: Anne Firth Murray

Iberian and Latin American Cultures: Yvonne Yarbro-Bejarano

Law: Deborah Rhode, Jane Schachter

Linguistics: Penelope Eckert, Rob Podesva

Medical School: Ann Arvin, Helen Blau, Gabriel Garcia, Roy King, Cheryl Koopman, Iris Litt (emerita), Leah Millheiser

Music: Heather Hadlock

Philosophy: Helen Longino, Debra Satz

Political Science: Lisa Blaydes, Terry Karl

Psychology: Laura Carstensen, Hazel Markus

Religious Studies: Charlotte Fonrobert, Hester Gelber, Linda Hess

Slavic Languages and Literatures: Monika Greenleaf

Sociology: Shelley Correll, Cecilia Ridgeway

Theatre and Performance Studies: Jennifer Brody, Harry J. Elam, Leslie Hill, Jisha Menon, Cherríe Moraga, Helen Paris, Peggy Phelan

Overseas Studies Courses in Feminist Studies

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/feministstudies/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program. Students may count one course from the following list toward a Feminist Studies major or minor.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/feministstudies/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/feministstudies/http://bosp.stanford.edu>).

		Units
OSPBER 174	Sports, Culture, and Gender in Comparative Perspective	5
OSPFLOR 34	The Woman in Florentine Art	4
OSPFLOR 67	Women in Italian Cinema: Maternity, Sexuality, and the Image	4
OSPMADRD 45	Women in Art: Case Study in the Madrid Museums	4
OSPOXFRD 57	The Rise of the Woman Writer 1660-1860	5
OSPOXFRD 117W	Gender and Social Change in Modern Britain	4-5
OSPPARIS 60	Representations of Women in Christian Art: Boldness and Virtue	4
OSPSANTG 14	Women Writers of Latin America in the 20th Century	4-5

Related Courses

The following is a partial list of related courses for Feminist Studies scheduled for 2012-13. See ExploreCourses for course descriptions and General Education Requirements (GER) information. See degree requirements above or check with the program mentor for applicability of these courses toward specific major or minor program requirements.

		Units
AFRICAAM 54N	African American Women's Lives	3-4
AFRICAAM 255	Racial Identity in the American Imagination	4-5
AMSTUD 114N	Visions of the 1960s	5
AMSTUD 150C	The United States in the Twentieth Century	5
AMSTUD 156H	Women and Medicine in US History: Women as Patients, Healers and Doctors	5
AMSTUD 161	Women in Modern America	4-5
AMSTUD 183	Border Crossings and American Identities	5
AMSTUD 201	History of Education in the United States	3-5
AMSTUD 210	Critical Theory and The Environment	3-5
AMSTUD 214	The American 1960s: Thought, Protest, and Culture	5
AMSTUD 255D	Racial Identity in the American Imagination	4-5
AMSTUD 258	Topics in the History of Sexuality: Sexual Violence	4-5
AMSTUD 261F	Gender and Sexuality in Asian American Literature	5
AMSTUD 265	Writing Asian American History	5

AMSTUD 267	Religion in Twentieth Century American Life	5
ANTHRO 132	Religion and Politics in the Muslim World	5
ANTHRO 201	Introduction to Cultural and Social Anthropology	5
ANTHRO 282	Medical Anthropology	3-5
ANTHRO 349	Anthropology of Capitalism	5
ARTHIST 176	Feminism and Contemporary Art	4
ASNAMST 100C	EAST House Seminar: Current Issues and Debates in Education	1
CHILATST 176S	Religion and the Politics of Culture in Chicana/o & Latina/o America	5
CHINGEN 135	Chinese Bodies, Chinese Selves	3-5
CHINGEN 150	Sex, Gender, and Power in Modern China	3-5
CLASSGEN 134	Early Christianity, Early Judaism, and Gender	4
COMPLIT 133	Gender and Modernism	3-5
COMPLIT 250	Literature, History and Memory	3-5
CSRE 127B	The Pleasure Principle: A Post-Hip Hop Search for a Black Feminist Politics of Pleasure	3
CSRE 162	Women in Modern America	4-5
CSRE 177	Writing for Performance: The Fundamentals	5
CSRE 179G	Indigenous Identity in Diaspora: People of Color Art Practice in North America	3-5
CSRE 183	Border Crossings and American Identities	5
CSRE 192E	Topics in the History of Sexuality: Sexual Violence	4-5
CSRE 200	Latin@ Literature	3-5
CSRE 255D	Racial Identity in the American Imagination	4-5
EDUC 100A	EAST House Seminar: Current Issues and Debates in Education	1
EDUC 100B	EAST House Seminar: Current Issues and Debates in Education	1

Financial Mathematics

The departments of Mathematics and Statistics (<http://www-stat.stanford.edu>), in close cooperation with the departments of Economics and Management, Science, and Engineering, and the Graduate School of Business, offer an interdisciplinary Master of Science degree in Financial Mathematics. The Financial Mathematics program provides a master's-level education in applied and computational mathematics, statistics, and financial applications.

Graduate Program in Financial Mathematics

The department offers a Master of Science in Financial Mathematics. University requirements for the M.S. are described in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Financial Mathematics and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

Master of Science in Financial Mathematics

Admission

Graduate applicants applying from outside Stanford must visit Graduate Admissions (<http://studentaffairs.stanford.edu/gradadmissions>) before beginning the application process for complete application information and instructions. The department only offers a master's degree in Financial Mathematics. It is the applicant's responsibility to ensure he or she meets all eligibility requirements before applying. Students applying from within Stanford (coterminal undergraduates and Ph.D. students who have passed their qualifying exams) should pay special attention to the "Graduate Degrees (<https://exploreddegrees-nextyear.stanford.edu/graduatedegrees/#text>)" section of this bulletin regarding residency and unit requirements. To be eligible for admission, students are expected to have excelled in the following courses or their equivalent:

Linear algebra at the level of: (3)

MATH 104	Applied Matrix Theory	3
----------	-----------------------	---

Real analysis (Advanced Calculus) at the level of: (3)

MATH 115	Functions of a Real Variable	3
----------	------------------------------	---

Probability at the level of: (3-5)

STATS 116	Theory of Probability	3-5
-----------	-----------------------	-----

Theory of statistics at the level of: (3)

STATS 200	Introduction to Statistical Inference	3
-----------	---------------------------------------	---

Stochastic processes at the level of: (3)

STATS 217	Introduction to Stochastic Processes	3
or MATH 136	Stochastic Processes	

Computer programming at the level of: (6-10)

CS 106A	Programming Methodology	3-5
CS 106B	Programming Abstractions	3-5

Some of these courses (e.g., STATS 116 Theory of Probability, STATS 217 Introduction to Stochastic Processes) are usually offered during the Summer Quarter so candidates lacking the required background may consider taking them then. We strongly recommend that current Stanford students apply after mastering the majority of material covered in the prerequisites, and after completing two of the required or elective courses.

For further information on application requirements and instructions, see Admissions (<http://finmath.stanford.edu/admissions/requirements.html>) on the department web site.

Degree Requirements

The program requires completion of 45 units of course work. With the advice of the faculty adviser and of peer students, each student selects his or her own set of electives and pace of study. All requirements for the Financial Mathematics master's degree must be completed within three years after the student's first term of enrollment in the master's program. Units for a given course may not be counted to meet the requirements of more than one degree, that is, no units may be double-counted. Students pursuing a coterminal master's degree must complete their requirements within three years of their first quarter of graduate standing. No courses taken more than two quarters prior to admission to the coterminal master's program may be used to meet the 45-unit university minimum requirement for the master's degree. Students who do not complete all requirements within three years of admission will have their program terminated. Ordinarily, four or five quarters are needed to complete all requirements.

Students must fulfill the following requirements for the M.S. degree:

1. Six courses must be taken from the list of required courses (<http://finmath.stanford.edu/academics/required.html>) and six must be taken from the list of elective courses (<http://finmath.stanford.edu/academics/electives.html>), available below. These courses must be taken for a letter grade, but students may elect to take one of the 12 courses for credit/no credit. An overall grade point average (GPA) of 2.75 is required. There is no thesis requirement.

2. Any remaining units required to complete the 45 total must be taken from the following options, and may be taken for a letter grade or CR/NC:

- a. Choose from the approved list of electives (<http://finmath.stanford.edu/academics/electives.html>) with emphasis on computation, information technology or finance.

- b. Choose from the following courses:

		Units
STATS 200	Introduction to Statistical Inference	3
STATS 217	Introduction to Stochastic Processes	3
STATS 218	Introduction to Stochastic Processes	3
MATH 131P	Partial Differential Equations I	3

MATH 132	Partial Differential Equations II	3
ECON 140	Introduction to Financial Economics	5

c. Choose from CS (practical) courses; must be approved by the Program Director.

d. In the form of an industrial internship in the Bay Area or elsewhere, with the approval and supervision of a faculty member. A written report must be submitted upon completion of the internship. Students who choose to take credit for practical training must sign up for STATS 297 Practical Training (1-3 units).

3. Submission of approved Masters Program Proposal (http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/financialmathematics/FM-MS_Program_Proposal_Form_2012.pdf) by the Program Director to the Student Services Officer by the end of the first quarter of the master's degree program.

Required Courses

In partial fulfillment of the M.S. degree in Financial Mathematics, students must fulfill six required courses, with two from each of the following three core areas:

1. Statistical Methods and Models
2. Modeling, Simulation and Computing
3. Finance

The selection of these courses is to be done in consultation with the Program Director. The following courses can be counted toward the six required courses:

Mathematics:

		Units
MATH 236	Introduction to Stochastic Differential Equations	3
MATH 238	Mathematical Finance	3
MATH 239	Computation and Simulation in Finance	3

Statistics:

		Units
STATS 240	Statistical Methods in Finance	3-4
STATS 241	Financial Modeling Methodology and Applications	3-4
STATS 242	Algorithmic Trading and Quantitative Strategies	3
STATS 243	Statistical Models and Methods for Risk Management and Surveillance	3-4
STATS 315B	Modern Applied Statistics: Data Mining	2-3
STATS 362	Monte Carlo	2-3

Management Science & Engineering:

		Units
MS&E 347	Credit Risk: Modeling and Management	3

Graduate School of Business:

		Units
FINANCE 622	Dynamic Asset Pricing Theory	4

At the Program Director's discretion, courses taken previously that are equivalent to the above may be waived; in which case they must be replaced by elective courses in the same subject area.

Elective Courses

Each candidate must take at least six approved elective courses from the list below, with two from each of the three core areas:

1. Statistical Methods and Models
2. Modeling, Simulation and Computing
3. Finance

Other elective courses may be authorized by the Program Director if they provide skills relevant to financial mathematics and do not overlap with courses in the candidate's program.

Mathematics:*

		Units
MATH 136	Stochastic Processes	3
MATH 180	Introduction to Financial Mathematics	3
MATH 205A/205B	Real Analysis	3
MATH 227	Partial Differential Equations and Diffusion Processes	3
MATH 256A/265B	Partial Differential Equations	3
MATH 261A/261B	Functional Analysis	3
MATH 266	Computational Signal Processing and Wavelets	3

* MATH 237 is not offered this year, but the department may offer it next year. If so, this course may be used in fulfillment of this requirement.

Statistics:

		Units
STATS 202	Data Mining and Analysis	3
STATS 206	Applied Multivariate Analysis	3
STATS 207	Introduction to Time Series Analysis	3
STATS 212	Applied Statistics with SAS	3
STATS 219	Stochastic Processes	3
STATS 237	Theory of Investment Portfolios and Derivative Securities	3
STATS 238	Policy & Strategy Issues in Financial Engineering	3
STATS 240	Statistical Methods in Finance	3-4
STATS 305	Introduction to Statistical Modeling	2-4
STATS 306A	Methods for Applied Statistics	2-4
STATS 310A/310B/310C	Theory of Probability	2-4
STATS 315A/315B/315C	Modern Applied Statistics: Learning	2-3
STATS 317	Stochastic Processes	3
STATS 318	Modern Markov Chains	3
STATS 322	Function Estimation in White Noise	3

Computer Science:*

		Units
CS 106B	Programming Abstractions	3-5
CS 106X	Programming Abstractions (Accelerated)	3-5
CS 224M	Multi-Agent Systems	3
CS 295	Software Engineering	2-3
CS 229	Machine Learning	3-4
CS 249A	Object-Oriented Programming from a Modeling and Simulation Perspective	3
CS 261	Optimization and Algorithmic Paradigms	3
CS 365	Randomized Algorithms	3

* CS 339 may be used to fulfill this requirement; this course is offered occasionally.

Economics:"

		Units
ECON 190	Introduction to Financial Accounting	5
ECON 202N/203N	202 For Non-Economics Ph.D. Students	2-5
ECON 210	Core Economics: Modules 3 and 7	2-5
ECON 211	Core Economics: Modules 11 and 12	2-5
ECON 275	Time Series Econometrics	2-5

* ECON 268, ECON 281 are not offered this year, but the department may offer them next year. If so, these courses may be used in fulfillment of this requirement.

Management Science & Engineering:*

		Units
MS&E 242H	Investment Science Honors	3
MS&E 247G	International Financial Management	4
MS&E 247S	International Investments	3
MS&E 310	Linear Programming	3
MS&E 311	Optimization	3
MS&E 312	Advanced Methods in Numerical Optimization	3
MS&E 313	Vector Space Optimization	3
MS&E 322	Stochastic Calculus and Control	3
MS&E 323	Stochastic Simulation	3
MS&E 342	Advanced Investment Science	3
MS&E 348	Optimization of Uncertainty and Applications in Finance	3
MS&E 349	Capital Deployment	3
MS&E 351	Dynamic Programming and Stochastic Control	3
MS&E 444	Investment Practice	3-4
MS&E 445	Projects in Wealth Management	3-4

* MS&E 339, MS&E 345 are not offered this year, but the department may offer them next year. If so, these courses may be used in fulfillment of this requirement.

Graduate School of Business (GSB), Finance:

		Units
FINANCE 320	Debt Markets ¹	4
FINANCE 326	Derivative Securities ¹	4
FINANCE 327	Financial Markets	4
FINANCE 620	Financial Markets I ¹	3
FINANCE 621	Financial Markets II ¹	4
FINANCE 622	Dynamic Asset Pricing Theory ¹	4
FINANCE 625	Empirical Asset Pricing	3

Graduate School of Business (GSB), Economic Analysis and Policy:

		Units
MGTECON 600	Microeconomic Analysis I ¹	4

MGTECON 604	Econometric Methods II ¹	4
MGTECON 609	Applied Econometrics and Economic Research ¹	4

¹ Indicates courses of limited enrollment and/or that instructor consent is required for registration.

For further information about the Financial Mathematics master's degree program requirements, see the department web site (<http://finmath.stanford.edu/academics/requirements.html>).

Director: Tze Leung Lai

Steering Committee

Amir Dembo, Kay Giesecke, Tze Leung Lai, Art Owen, George Papanicolaou, Bala Rajaratnam, Kenneth Singleton

Core Faculty

Business: Darrell Duffie, J. Michael Harrison, Kenneth Singleton

Economics: Monika Piazzesi, Martin Schneider, John Shoven

Electrical Engineering: Stephen Boy, Benjamin Van Roy

Management Science and Engineering: Kay Giesecke, Peter Glynn, David Luenberger, Benjamin Van Roy

Mathematics: Simon Brendle, Isabelle Camilier, Amir Dembo, Persi Diaconis, George Papanicolaou

Statistics: Amir Dembo, Persi Diaconis, David Donoho, Tze Leung Lai, Art Owen, Bala Rajaratnam

French and Italian

Courses offered by the Department of French and Italian are listed on the Stanford Bulletin's ExploreCourses web site under the subject codes FRENCH (French General and Literature) and ITALIAN (Italian General and Literature). For courses in French or Italian language instruction with the subject code FRENLANG or ITALLANG, see the "Language Center (<http://www.stanford.edu/dept/registrar/bulletin/5966.htm>)" section of this bulletin.

French Section

The French section provides students with the opportunity to pursue course work at all levels in French language, literature, cultural and intellectual history, theory, film, and Francophone studies. It understands the domain of French Studies as encompassing the complex of cultural, political, social, scientific, commercial, and intellectual phenomena associated with French-speaking parts of the world, from France and Belgium to Canada, Africa, and the Caribbean.

Three degree programs are available in French: a B.A., a terminal M.A., and a Ph.D. A Ph.D. in French and Italian is also available.

Visiting faculty and instructors contribute regularly to the life of the French section. The section maintains contacts with the Ecole Normale Supérieure, the Institut d'Etudes Politiques, and the Ecole Polytechnique.

A curator for Romance languages oversees the extensive French collection at Green Library. The Hoover Institute on War, Revolution, and Peace also includes materials on 20th-century France and French social and political movements.

France

Stanford Center for Interdisciplinary Studies

The center, founded in partnership with the French Ministry of Foreign Affairs, aims to bridge the disciplines of the humanities, social sciences, sciences, engineering, business, and law, to address historical and contemporary issues. Its programs bring faculty and students from across Stanford's departments and schools in contact with colleagues in France to explore issues of common intellectual concern. The center invites French-speaking scholars to offer courses or give lectures or seminars on campus. It facilitates internships for Stanford students in computer science and engineering in Sophia-Antipolis, France's new high-tech center near Nice.

Stanford in Paris

The Bing Overseas Studies Program in Paris offers undergraduates the opportunity to study in France during Autumn, Winter, and Spring quarters. It provides a wide range of academic options, including course work at the Stanford center and at the University of Paris, independent study projects, and internships. In addition, the program promotes interaction with the local community through volunteer employment, homestays, and internships. The minimum language requirement for admission into Stanford in Paris is one year of French at the college level.

Courses offered in Paris may count toward fulfillment of the requirements of the French major or minor. Students should consult with the Chair of Undergraduate Studies before and after attending the program, in order to ensure that course work and skills acquired abroad can be coordinated appropriately with their degree program. Detailed information, including program requirements and curricular offerings, may be obtained from the "Overseas Studies" section of this bulletin, the Stanford in Paris (<http://osp.stanford.edu/program/paris>) web site, or the Overseas Studies Program Office in Sweet Hall.

La Maison Française

La Maison Française, 610 Mayfield, is an undergraduate residence that serves as a campus French cultural center, hosting in-house seminars as well as social events, film series, readings, and lectures by distinguished representatives of French and Francophone intellectual, artistic, and political life. Assignment is made through the regular housing draw.

Mission of the Undergraduate Program in French

The mission of the undergraduate program in French is to expose students to a variety of perspectives in French language, culture, and history by providing majors with training in writing and communication as well as cultural, textual, and historical analysis in order to develop students into critical and global thinkers prepared for careers in business, social service, and government, or for graduate study in French.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. the ability to develop effective and nuanced lines of interpretation.

2. improved critical thinking skills using French literary materials.
3. facility with the methodologies and presuppositions underlying interpretive positions in secondary literature and in their own work.
4. improvement in analytical writing skills and close reading skills.
5. skills in active listening and productive intellectual discussion in class.
6. proficiency in the French language.
7. familiarity with the French literary canon and its historical and cultural context.

Italian Section

The Italian section offers graduate and undergraduate programs in Italian language, literature, culture, and intellectual history. Course offerings range from small, specialized graduate seminars to general courses open to all students on authors such as Dante, Boccaccio, and Machiavelli.

Two degree programs are available in Italian: a B.A., and a Ph.D. A Ph.D. in French and Italian is also available.

Collections in Green Research Library are strong in the medieval, Renaissance, and contemporary periods; the Italian section is one of the larger constituents of the western European collection at the Hoover Institution for the Study of War, Revolution, and Peace; and the Music Library has excellent holdings in Italian opera.

La Casa Italiana

La Casa Italiana, 562 Mayfield, is an undergraduate residence devoted to developing an awareness of Italian language and culture. It works closely with the Italian Cultural Institute in San Francisco and with other local cultural organizations. It hosts visiting representatives of Italian intellectual, artistic, and political life. A number of departmental courses are taught at the Casa, which also offers in-house seminars. Assignment is made through the regular undergraduate housing draw.

Stanford in Florence

The Bing Overseas Studies Program in Florence affords undergraduates with at least three quarters of Italian language and the opportunity to take advantage of the unique intellectual and visual resources of the city and to focus on two areas: Renaissance history and art, and contemporary Italian and European studies. The program is structured to help integrate students into Italian culture through homestays, Florence University courses, the Language Partners Program, research, internship and public service opportunities, and by conducting some of the program's classes in Italian. Many courses offered in Florence may count toward the fulfillment of requirements for the Italian major or minor. Students are encouraged to consult with the Italian undergraduate adviser before and after a sojourn in Florence to ensure that their course selections meet Italian section requirements. Information on the Florence program is available in the "Overseas Studies" section of this bulletin, the Stanford in Florence (<http://osp.stanford.edu/program/florence>) web site, or at the Overseas Studies office in Sweet Hall.

Mission of the Undergraduate Program in Italian

The mission of the undergraduate program in Italian is to expose students to a variety of perspectives in Italian language, culture, and history by providing majors with training in writing and communication as well as cultural, textual, and historical analysis in order to develop students into critical and global thinkers prepared for careers in business, social service, and government, or for graduate study in Italian.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. the ability to develop effective and nuanced lines of interpretation.
2. improved critical thinking skills using Italian literary materials.
3. facility with the methodologies and presuppositions underlying interpretive positions in secondary literature and in their own work.
4. improvement in analytical writing skills and close reading skills.
5. skills in active listening and productive intellectual discussion in class.
6. proficiency in the Italian language.
7. familiarity with the Italian literary canon and its historical and cultural context.

Graduate Programs in French and Italian

The department offers a Ph.D. and terminal M.A. in French, a Ph.D. in Italian, and a Ph.D. in French and Italian.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in French or Italian and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in French, Italian, or French and Italian. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of French, Italian, or French and Italian and to interpret and present the results of such research.

Bachelor of Arts in French

The French section offers a major and a minor in French. Students are encouraged to pursue a course of study tailored to their individual needs and interests. A degree in French serves as a stepping stone to entering international business, law, translation, and teaching, or as preparation for graduate studies in French, history, or comparative literature.

The French major allows students to combine their work in French with work from another field such as African studies, linguistics, art history, music, economics, history, education, medicine, international relations, political science, or other foreign languages and literatures. The literature and philosophy specialization offers students the opportunity to pursue interdisciplinary studies at the intersection of literature and philosophy in a structured manner and alongside similarly interested students from a variety of humanistic disciplines.

French

To graduate with a major in French, students must complete a minimum of 56 units of course work in the major. These 56 units may not be used towards any other major or minor. Courses applied to the major must be taken for a letter grade, and a grade point average (GPA) of 2.0 or better must be achieved in each course. Relevant courses from other departments or programs may also earn credit toward the major with the prior consent of the Chair of Undergraduate Studies. To enroll in all French literature courses, students must have successfully completed FRENLANG 124 Mastering Advanced French Grammar: Grammar through Contemporary Literature and Culture, or successfully tested above this level through the Language Center.

1. Gateway Courses. Students are recommended to take two courses in the FRENCH 120 series.

		Units
FRENCH 65N/122	Nation in Motion: Film, Race and Immigration in Contemporary French Cinema	3
FRENCH 120	Coffee and Cigarettes: The Making of French Intellectual Culture	4-5
FRENCH 125	Religion, The Self, and Society in 20th-Century French Novels and Film	3-5

2. Introductory Culture and Literature Courses. Students must take a minimum of three of the following courses. Any one of these courses fulfills the Writing in the Major (WIM) requirement.

		Units
FRENCH 130	Introduction to Medieval and Renaissance French Literature	4
FRENCH 131	Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France	4
FRENCH 132	Literature, Revolutions, and Changes in 19th- and 20th-Century France	4
FRENCH 133	Literature and Society in Africa and the Caribbean	4

3. Medieval/Early Modern Courses. Students must take two courses that concern the period before 1800. Courses from the department must be at or above the 140 level. Courses chosen from outside the department must be pre-approved by the Chair of Undergraduate Studies.
4. Capstone Course. Students must take at least one 200 level FRENCH culture or literature course.

Students must complete a total of 56 units towards the major. A maximum of 28 units can be elective courses. Elective Courses can be taken within the following parameters.

- Coursework within the department. Additional French literature or general courses at the 100- or 200- level taught by French faculty.
- Language Coursework. Up to three language courses in French at or above FRENLANG 21C for a maximum of 15 units.
- Bing Overseas program. Courses taken at the Bing Overseas Studies in Paris program with prior approval of the Chair of Undergraduate Studies.
- IHUM or Thinking Matters courses taught at least partially by a faculty member of the French and Italian Department. Maximum of 10 units. (IHUM courses are no longer offered)
- Structured Liberal Education. Students may count 10 units of SLE towards the major electives. Maximum of 10 units.

French and Philosophy

The French and Philosophy option requires a total of 65 units as described below. This option is not declared in Axess and does not appear on the transcript nor the diploma. Substitutions and transfer credit are not normally permitted. Up to 10 units of courses taken in the Philosophy department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade. Students interested in this option should review the Philosophy and Literature web site (<http://philit.stanford.edu>).

Required French Coursework:

1. Advanced Language. FRENLANG 124 Mastering Advanced French Grammar: Grammar through Contemporary Literature and Culture
2. Introductory Culture and Literature courses. Students must take three of the following core courses.

		Units
FRENCH 130	Introduction to Medieval and Renaissance French Literature	4
FRENCH 131	Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France	4
FRENCH 132	Literature, Revolutions, and Changes in 19th- and 20th-Century France	4
FRENCH 133	Literature and Society in Africa and the Caribbean	4

3. Upper division French Courses. At least three courses numbered FRENCH 140 or higher.

Required Philosophy Coursework:

1. Philosophy Writing in the Major.

		Units
PHIL 80	Mind, Matter, and Meaning	5

2. Philosophy and Literature Gateway Course. This course should be taken as early as possible in the student's career, normally in the sophomore year.

		Units
FRENCH 181	Philosophy and Literature	5

3. Aesthetics, Ethics, Political Philosophy. One course from the PHIL 170 Ethical Theory series.
4. Language, Mind Metaphysics, and Epistemology. One course from the PHIL 180 series.
5. History of Philosophy. Two courses in the history of Philosophy, numbered above PHIL 100.
6. Two additional elective courses of special relevance to the study of philosophy and literature. Students must consult with their advisers, the Chair of Undergraduate Studies, and the undergraduate adviser of the program in philosophical and literary thought.
7. Capstone. One of the courses must be taken in the student's senior year.

		Units
ENGLISH 117A	Irony: From Socrates to David Foster Wallace	5
COMPLIT 199	Senior Seminar	3-5
GERMAN 282	Martin Heidegger	3-5

Honors Program

French majors with an overall grade point average (GPA) of 3.3 or above, and who maintain a 3.5 (GPA) in major courses, are eligible to participate in the DLCL's honors program. Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty, in their junior year, preferably by March 1, but no later than May 1.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40-90 pages not including bibliography and notes.

During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL Honors application and an outline of planned course work for their senior year. During this quarter, students may enroll for 2 units in DLCL 189C Honors Thesis Seminar for the drafting or revision of the thesis proposal. The proposal is reviewed by the Chair of Undergraduate Studies and the Director of the department and will be approved or returned for submission.

Honors students are encouraged to participate in the honors college hosted by Bing Honors College (http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/OO_honors_BingHonors.html) and coordinated by the Division of Literatures, Cultures, and Languages. The honors college is offered at the end of the summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted through the Bing program. For more information, view the Bing Honors (http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/OO_honors_BingHonors.html) website.

In Autumn Quarter of the senior year, the students must enroll in DLCL 189A Honors Thesis Seminar, a 5 unit seminar that focuses on researching and writing the honors thesis. During Winter Quarter students then enroll for 5 units in DLCL 189B Honors Thesis Seminar while composing their thesis. Students who did not enroll in DLCL 189C Honors Thesis Seminar during their Spring Quarter junior year may do so in the Spring Quarter of their senior year while revising the thesis, if approved by the thesis supervisor. A total of 10-12 units will be awarded for completion of honors course work, and the finished thesis. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15th of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

Bachelor of Arts in Italian Italian

To graduate with a major in Italian, students must complete a minimum of 60 units of course work in the major. These 60 units may not be used towards any other major or minor. Courses applied to the major must be taken for a letter grade, and a grade point average (GPA) of 2.0 or better must be achieved in each course. Relevant courses from other departments or programs may also earn credit toward the major with the prior consent of the Chair of Undergraduate Studies. To enroll in all Italian literature courses at or above 127, students must have successfully completed ITALLANG 113 or above, or successfully tested above this level through the Language Center.

1. Gateway Courses: Students are recommended to take two courses in the Italian gateway series (8 units maximum).

		Units
ITALIAN 120	Love Italian Style	4
ITALIAN 155	The Mafia in Society, Film, and Fiction	4

2. Advanced Language: Students must enroll in one of the following advanced language courses.

		Units
ITALLANG 113	Italian Cultural Studies	3-4
ITALLANG 114	Advanced Stylistics and Composition	3-4
ITALLANG 115	Academic and Creative Writing	3-4

3. Introductory Culture and Literature Courses: Students must take all three of the following core courses at Stanford (12 units). Any one of these courses fulfills the Writing in the Major (WIM) requirement.

		Units
ITALIAN 127	Inventing Italian Literature: Dante, Boccaccio, Petrarca	4
ITALIAN 128	The Italian Renaissance and the Path to Modernity	4
ITALIAN 129	Modern Italian History and Literature	4

4. Advanced Literature Courses: Students must complete one course on each of the following topics (12 units)
- Dante / The Middle Ages (14th - 16th century)
 - Early Modern (16th - 18th century)
 - Modern (18th to the present)

Electives—A maximum of 24 elective units dealing with Italy above the 100 level may be applied to the major. Prior approval from the Chair of Undergraduate Studies is required. The following courses have been pre-approved as electives:

- Coursework within the department. Additional ITALIAN literature or general courses at the 100- or 200- level taught by Italian faculty.
- Bing Overseas program. Courses taken at the Bing Overseas Studies in Paris program with prior approval of the Chair of Undergraduate Studies.
- IHUM or Thinking Matters courses taught at least partially by a faculty member of the French and Italian Department. Maximum of 10 units.
- Structured Liberal Education. Students may count 10 units of SLE towards the major electives. Maximum of 10 units.

Italian and Philosophy

The Italian and Philosophy option requires a total of 65 units as described below. This option is not declared in Axxess and does not appear on the transcript or diploma. Substitutions and transfer credit are not normally permitted. Up to 10 units of courses taken in the Philosophy department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade. Students interested in this option should review the Philosophy and Literature webpage (<http://philit.stanford.edu>).

1. Advanced Language. Students must complete one of the following advanced Italian language courses.

		Units
ITALLANG 113	Italian Cultural Studies	3-4
ITALLANG 114	Advanced Stylistics and Composition	3-4
ITALLANG 115	Academic and Creative Writing	3-4

2. Introductory Culture and Literature Courses. Students must complete all three courses.

		Units
ITALIAN 127	Inventing Italian Literature: Dante, Boccaccio, Petrarca	4
ITALIAN 128	The Italian Renaissance and the Path to Modernity	4
ITALIAN 129	Modern Italian History and Literature	4

3. Upper Division Italian Courses (ca. 12 units): at least three courses numbered ITALIAN 100 or higher.

Required Philosophy Coursework:

1. Philosophy Writing in the Major:

PHIL 80	Mind, Matter, and Meaning	5
---------	---------------------------	---

2. Philosophy and Literature Gateway Course: This course should be taken as early as possible in the student's career, normally in the sophomore year:

		Units
ITALIAN 181	Philosophy and Literature	5

3. Aesthetics, Ethics, Political Philosophy. One course from the PHIL 170 Ethical Theory series.
4. Language, Mind, Metaphysics, and Epistemology. One course from the PHIL 180 Metaphysics series.
5. History of Philosophy. Two courses in the history of philosophy, numbered above PHIL 100.
6. Two additional elective courses of special relevance to the study of philosophy and literature. Students must consult with their advisers, the Chair of Undergraduate Studies, and the undergraduate adviser of the program in philosophical and literary thought.
7. Capstone Seminar (ca. 4 units): One of these courses must be taken in the student's senior year.

		Units
ENGLISH 117A	Irony: From Socrates to David Foster Wallace	5
COMPLIT 199	Senior Seminar	3-5
COMPLIT 213A	Martin Heidegger	3-5

Honors Program

Italian majors with an overall grade point average (GPA) of 3.3 or above, and who maintain a 3.5 (GPA) in major courses, are eligible to participate in the DLCL's honors program. Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty, in their junior year, preferably by March 1, but no later than May 1.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40-90 pages not including bibliography and notes.

During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL Honors application and an outline of planned course work for their senior year. During this quarter, students may enroll for 2 units in DLCL 189C Honors Thesis Seminar for the drafting or revision of the thesis proposal. The proposal is reviewed by the Chair of Undergraduate Studies and the Director of the department and will be approved or returned for submission.

Honors students are encouraged to participate in the honors college hosted by Bing Honors College (http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/OO_honors_BingHonors.html) and coordinated by the Division of Literatures, Cultures, and Languages. The honors college is offered at the end of the summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted through the Bing program. For more information, view the Bing Honors (http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/OO_honors_BingHonors.html) website.

In Autumn Quarter of the senior year, the students must enroll in DLCL 189A Honors Thesis Seminar, a 5 unit seminar that focuses on researching and writing the honors thesis. During Winter Quarter students then enroll for 5 units in DLCL 189B Honors Thesis Seminar while composing their thesis. Students who did not enroll in DLCL 189C Honors Thesis Seminar during their Spring Quarter junior year may do so in the Spring Quarter of their senior year while revising the thesis, if approved by the thesis

supervisor. A total of 10-12 units will be awarded for completion of honors course work, and the finished thesis. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15th of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

Minor in French

To earn a minor in French, students must complete a minimum of 24 units of course work in the department. These 24 units may not be used towards any other major or minor. Courses applied to the minor must be taken for a letter grade, and a grade point average (GPA) of 2.0 or better must be achieved in each course. To enroll in all French literature courses, students must have successfully completed FRENLANG 124 Mastering Advanced French Grammar: Grammar through Contemporary Literature and Culture or successfully tested above this level through the Language Center.

1. Introductory Culture and Literature Courses: Students must take a minimum of three French General or French Literature courses. Two must be from the FRENCH 130 sequence (8 units):

		Units
FRENCH 130	Introduction to Medieval and Renaissance French Literature	4
FRENCH 131	Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France	4
FRENCH 132	Literature, Revolutions, and Changes in 19th- and 20th-Century France	4
FRENCH 133	Literature and Society in Africa and the Caribbean	4

2. Electives: A maximum of 12 elective units may be applied to the minor. Prior approval from the Chair of Undergraduate Studies is required. The following courses have been pre-approved as electives:

		Units
FRENLANG 21C	Second-Year French: Cultural Emphasis, First Quarter	4-5
FRENLANG 22C	Second-Year French: Cultural Emphasis, Second Quarter	4-5
FRENLANG 23C	Second-Year French: Cultural Emphasis, Third Quarter	4-5
FRENLANG 120	Advanced French Oral Communication	3
FRENLANG 124	Mastering Advanced French Grammar: Grammar through Contemporary Literature and Culture	4-5

OSPPARIS courses. Courses taken at the Bing Overseas Studies in Paris program with prior approval of the Chair of Undergraduate Studies (language of instruction must be French) IHUM, Thinking Matters, and SLE. A maximum of 5 units from select IHUM or Thinking Matters courses, or SLE. 5

Minor in Italian

To earn a minor in Italian, students must complete a minimum of 24 units of course work in the department. These 24 units may not be used towards any other major or minor. Courses applied to the minor must be taken for a letter grade, and a grade point average (GPA) of 2.0 or better must be achieved in each course. To enroll in all ITALIAN literature courses at or above 127, students must have successfully completed ITALLANG 113 Italian Cultural Studies or above, or successfully tested above this level through the Language Center.

1. Language: Students may earn 12 units in second-year and above language courses (maximum 12 units)

		Units
ITALLANG 21	Second Year Italian, First Quarter	3-4
ITALLANG 22	Second-Year Italian, Second Quarter	3-4
ITALLANG 23	Second-Year Italian, Third Quarter	3-4
ITALLANG 113	Italian Cultural Studies	3-4
ITALLANG 114	Advanced Stylistics and Composition	3-4
ITALLANG 115	Academic and Creative Writing	3-4

2. Introductory Culture and Literature Courses: Students must take two of the following core courses at Stanford (8 units)

		Units
ITALIAN 127	Inventing Italian Literature: Dante, Boccaccio, Petrarca	4
ITALIAN 128	The Italian Renaissance and the Path to Modernity	4
ITALIAN 129	Modern Italian History and Literature	4

3. Electives: A maximum of 8 elective units may be applied to the minor. Prior approval from the Chair of Undergraduate Studies is required. The following courses have been pre-approved as electives: OSPFLOR courses. Courses taken in Italian at the Bing Overseas Studies in Florence program with prior approval of the Chair of Undergraduate Studies (language of instruction must be Italian). IHUM, Thinking Matters, and SLE. A maximum of 5 units from select IHUM or Thinking Matters courses, or SLE.

Minor in Modern Languages

The Division of Literatures, Cultures, and Languages offers a minor in Modern Languages. This minor draws on literature and language courses offered through this and other literature departments. See the "Literatures, Cultures, and Languages (p.)" section of this bulletin for further details about the minor and its requirements.

Coterminal Bachelor's and Master's Program in French or Italian

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsocieties/frenchanditalian/cotermdegrees>)" section of this bulletin.

Each year the department admits a small number of undergraduates to the coterminal B.A. and M.A. degree in French or in Italian. Applications for Autumn quarter must be submitted by January 31 of the senior year to the Director of the Department and must include:

- a written statement of purpose
- two letters of recommendation from faculty at Stanford
- a transcript.

Students accepted into the coterminal program must have been undergraduate majors in the relevant language and must meet all requirements both for the B.A. and the M.A.

Master of Arts in French

University regulations pertaining to the M.A. are listed in the "Graduate Degrees (p. 38)" section of this bulletin.

The terminal M.A. in French provides a flexible combination of language, literature, cultural history, and methodology course work designed to enhance the preparation of secondary school, junior college, or college teachers.

Candidates must complete a minimum of 45 units of graduate work, all courses being taken for a letter grade, with a minimum grade point average (GPA) of 3.3, as well as pass the master's examination at the end of their studies. To fulfill the requirements in a single year, enrollment must be for an average of 15 units per quarter.

Candidates must take one cultural history course (to be taken either inside or outside the Department of French and Italian). All remaining units are to be taken in advanced French literature courses (200 level or above), three of which must be concerned with the pre-revolutionary period of French cultural history.

Applicants should consult Graduate Admissions (<http://gradadmissions.stanford.edu>) for information related to the application process. Candidates for this degree are not eligible for financial aid or for teaching assistantships.

Examination

The terminal M.A. examination is administered between the third and fifth week of Spring Quarter by a three-member committee, selected each year by the Chair of Graduate Studies. It consists of two parts:

1. Written Exam

The two-hour written exam tests the candidate's general knowledge of French literature and is based on the French Ph.D. reading list which may be obtained from the chair of Graduate Studies, Student Affairs Officer, or by referencing the French and Italian Graduate Student Handbook.

The exam requires that the candidate answer two questions (out of three) in a manner that demonstrates his/her ability to synthesize and draw parallels between periods, genres, and systems of representation on the basis of the standard reading list. One question must be answered in French. Use of a dictionary is allowed.

If the student's performance on the exam is deemed a 'pass' by two out of three of the members of the examining committee, the student is then permitted to go on to the oral examination (taken later the same week). Should the candidate fail the M.A. written exam, he/she is given a second chance at the end of Spring Quarter.

2. Oral Exam

The 90-minute oral exam is based upon the student's answers on the written exam. It examines the candidate's knowledge and understanding of French literary history on the basis of the standard reading list.

At the conclusion of the oral exam, the examination committee meets in closed session and discusses the student's performance on the written and the oral portions of the examination. If it is judged adequate, the M.A. degree is granted. In no event may the master's written and oral exams be taken more than twice.

Doctor of Philosophy in French

University regulations pertaining to the Ph.D. are listed in the "Graduate Degrees" section of this bulletin.

Degree Requirements

1. Course Work

A candidate for the Ph.D. degree must complete at least 135 units of graduate-level study. 72 of the 135 units must be taken within the department. All course work should be selected in consultation with the Chair of Graduate Studies.

Required Courses—

		Units
FRENCH 369	Introduction to Graduate Studies: Criticism as Profession (must be taken in first year of studies)	5
DLCL 301	The Learning and Teaching of Second Languages (must be taken in the first year of studies)	3

A minimum of five literature courses taught in French at the graduate level. Three of the required five courses must be taken within the first year.

Elective Courses— Apart from the required courses above, students are granted considerable freedom in structuring a course of study appropriate to their individual needs. During the first year, most course work is done within the French and Italian department, in order to ensure an adequate preparation for the qualifying examination. Students are encouraged to take a variety of courses in order to be exposed to different periods and issues. Students are not allowed to take Independent Study during their first year. In the second and third years, however, the program of study is tailored to the specific interests of the student.

2. Examinations

Successful completion of all department and University examinations. Students may not take any department or University exam while coursework is incomplete.

3. Dissertation

Submission and approval of a dissertation.

4. Teaching

Ph.D. students are required to teach a minimum of five courses within their five years of funding.

5. Language Requirements

Attaining a native or near-native fluency in French is a requirement to qualify for the Ph.D. degree. Upon entering the program, candidates must contact the Language Center and arrange to take the OPI (Oral Proficiency Interview) to determine their fluency in French. An advanced level or above must have been reached by the time candidates take their qualifying exam in Autumn Quarter of the second year of study. If a student fails to score in the advanced bracket of the OPI test upon entering, he/she is tested again at the beginning of the second year. It is the responsibility of the candidates to design a course of study to improve his or her proficiency in French. Candidates who do not meet the minimum language requirement must discuss their plans to meet this requirement with the Chair of Graduate Studies.

In addition, candidates are required to achieve a high level of proficiency in one additional foreign language, with the language in question to be determined by the student and adviser as a function of the student's area of specialization. Such proficiency may be demonstrated either by completing a graduate seminar in the language in question, or by passing an exam that establishes a third-year or above level of competence in writing, reading, and speaking. In the

case of ancient Greek and Latin, a high level of proficiency means a level superior to a second-year collegiate level of proficiency in reading and writing. The second foreign language requirement must be completed by the end of the third year.

6. Candidacy

At the end of the second year of residency, students who are performing well, as indicated by their advanced language proficiency, course work, performance on the Qualifying Exam, and teaching and research assistantship performance, are advanced to candidacy. This step implies that the student has demonstrated the relevant qualities required for successful completion of the Ph.D. Future evaluations are based on the satisfactory completion of specific remaining department and University requirements. Students who are not advanced to candidacy will normally be terminated from the program and awarded an M.A. degree. In some cases, the department may require that a student complete outstanding work or complete unmet requirements before admission to candidacy. The university requires that all students must be admitted to candidacy by the beginning of the third year in residence in order to continue in the Ph.D. program. Therefore all requirements stipulated by the department must be met before registration for Autumn Quarter of the student's third year. At any point during the degree program, evidence that a student is performing at a less than satisfactory level may be cause for a formal academic review of that student.

7. TGR Status

Doctoral students who have been admitted to candidacy, completed all required courses and degree requirements other than the dissertation, completed 135 units, and submitted a Doctoral Dissertation Reading Committee form, must request Terminal Graduate Registration status to complete their dissertations. Each quarter, all TGR students must enroll in FRENCH 802 TGR Dissertation for zero units, in the appropriate section for their adviser.

Grading

Doctoral students in the department must take required courses for a letter grade if available and are expected to earn a grade of 'B+' or better in each course. Any grade of 'B' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty: while the grade will stand, the student may be required to revise and resubmit the work associated with that course.

Examinations

There are three examinations: the Qualifying Examination, the Field Examination, and the University Oral Examination. Students may not take any department or University exam while coursework is incomplete.

Qualifying Examination

The first oral examination, which takes place in the first two weeks of October of the second year of study, tests the student's knowledge of language and literature and his/her aptitude for critical thinking. The examining committee, determined by the Director of French and Italian, schedules the precise exam date and time.

The exam is based on a standard reading list covering major works from all periods of literature in the language(s) of study, from the Middle Ages to present day. The list may be expanded to reflect a student's particular interests, but not abridged. The reading list may be obtained from the Chair of Graduate Studies, the Graduate Student Affairs Officer, or by referencing the French and Italian student handbook.

The exam is 90 minutes in length and consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given in English or in the language of study and should engage, in a succinct manner, an issue or set of issues of broad relevance to the literary history of the language(s) of study. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggesting and not exhaustive, so as to provoke further discussion.
2. A 70-minute question and answer period in which the examining committee follows up on the candidate's presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in the language(s) of study. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit and demonstrate the ability to formulate an original point of view on such texts and contexts.

Students who do not pass the Qualifying Exam their first time may be placed on probation with limited enrollment and be allowed to retake the exam at the end of Autumn Quarter. Should the student not pass the retake exam, his or her studies in the Ph.D. program will be concluded.

Students already holding an advanced degree in the relevant area may request to be excused from the Qualifying Exam. However, the student must present a formal request for a waiver to the Chair of Graduate Studies upon arrival at Stanford. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the Qualifying Exam would involve considerable repetition of already completed work is such a waiver likely to be granted.

Field Examination

The second oral examination takes place in the Autumn Quarter of the third year of study. The exam is 100 minutes in length and consists of two parts:

1. A 20-minute presentation by the student on a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his/her adviser and the Chair of Graduate Studies. The student should design this research project so that it has the focus of an article or a seminar he/she might teach. The student should discuss the proposed topic with the Chair of Graduate Studies before the end of the quarter preceding the quarter in which he/she plans to take the exam; together they choose a committee of two faculty members with interests close to the proposed topic. (In most cases, one of these committee members is the student's adviser.) In addition to these two members, the examination committee includes the Chair of Graduate Studies, who serves in an ex officio capacity as the third member of the examination committee. This presentation is followed by a 20-minute discussion.
2. A 60-minute discussion of a reading list, assembled by the student, which covers about a century of writing. The reading list should include works in all genres relevant to the period covered and should be around two single-spaced pages in length. The list may well include critical and scholarly works or texts from outside the traditional domain of literary studies in the chosen tradition (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student's field. Students are required to discuss the reading list for the examination with the Chair of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be submitted to the committee no later than two weeks preceding the examination. Each member of the committee is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications. The aim of these questions is to establish the student's credentials as a specialist in the period of his/her choosing, so the core of the reading list must be made up of texts that are essential to any specialist.

It follows that reading lists must not focus on the narrow area of the student's research interest. The tendency to bias reading lists towards the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work may prove relevant, but students should also remember that the examination is the central means of certifying their expertise in a literary period.

The University Oral Examination

This examination takes the form of a dissertation proposal defense. It is to be taken no later than Autumn Quarter of the student's fourth year. Students must have completed all course work and language requirements before the quarter in which they take the University Oral examination. One quarter prior to the University Oral examination, students must schedule the exam date and time as well as work with their primary adviser to obtain an outside chair for the examination.

Two weeks before the exam, the student must submit to the committee a 25-35 page proposal, which must contain the following parts:

1. a clear presentation of the student's central thesis
2. a synthetic overview of the dissertation
3. a description of the methodology that is used in the dissertation
4. an in-depth discussion of current secondary sources on the topic.

The student must also append a bibliography, but this does not take the place of number 4. The proposal must be prepared in close consultation with the dissertation director during the months preceding the exam.

The exam committee consists of four members, in addition to a committee chair from outside the Division of Literatures, Cultures, and Languages, whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list.

After a 20-minute presentation on the part of the candidate, each member of the committee (apart from the committee chair) questions the student for 20 minutes. At the end of the hour and forty minutes, the faculty readers vote on the outcome of the exam. If the outcome is favorable, (four out of five votes in favor of the student passing), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory, the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second exam. A student who fails a second time will be released from the Ph.D. program and awarded a terminal M.A. degree.

Advising

Given the interdisciplinary nature of the Ph.D. programs and the opportunity they afford each student to create an individualized program of study, regular consultation with an adviser is of the utmost importance. The adviser for all entering graduate students is the Chair of Graduate Studies, whose responsibility it is to assist students with their course planning and to keep a running check on progress in completing the course, teaching, and language requirements. By the end of the second year of study, each student should have chosen a faculty adviser whose expertise is appropriate to his/her own area of research and interests.

Yearly Review

The faculty provide students with timely and constructive feedback on their progress toward the Ph.D. In order to evaluate students' progress and to identify potential problem areas, the department's faculty reviews the academic progress of each student at the end of the academic year. The yearly reviews are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may

be placed on probation with specific guidelines for addressing the problems detected. Possible outcomes of the yearly review include (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period on probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; (2) continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program. Students leaving the program at the end of the first or second year are usually allowed to complete the requirements to receive an M.A. degree, if this does not involve additional residency or financial support.

Doctor of Philosophy in Italian

University regulations pertaining to the Ph.D. are listed in the "Graduate Degrees" section of this bulletin.

Degree Requirements

1. Course Work

A candidate for the Ph.D. degree must complete at least 135 units of graduate-level study. 72 of the 135 units must be taken within the department. All course work should be selected in consultation with the Chair of Graduate Studies.

Required Courses—

		Units
ITALIAN 369	Introduction to Graduate Studies: Criticism as Profession (must be taken in the first year of studies)	5
A minimum of five literature courses taught in Italian at the graduate level. Three of the required five courses must be taken within the first year.		15-25
DLCL 301	The Learning and Teaching of Second Languages (must be taken in the first year of studies)	3

Elective Courses— Apart from the required courses above, students are granted considerable freedom in structuring a course of study appropriate to their individual needs. During the first year, most course work is done within the French and Italian department, in order to ensure an adequate preparation for the qualifying examination. Students are encouraged to take a variety of courses in order to be exposed to different periods and issues. Students are not allowed to take Independent Study during their first year. In the second and third years, however, the program of study is tailored to the specific interests of the student.

2. Examinations

Successful completion of all department and University examinations. Students may not take any department or University exam while coursework is incomplete.

3. Dissertation

Submission and approval of a dissertation.

4. Teaching

Ph.D. students are required to teach a minimum of five courses within their five years of funding.

5. Language Requirements

Attaining a native or near-native fluency in Italian is a requirement to qualify for the Ph.D. degree. Upon entering the program, candidates must contact the Language Center and arrange to take the OPI (Oral Proficiency Interview) to determine their fluency in Italian.

An advanced level or above must have been reached by the time candidates take their qualifying exam in the Autumn Quarter of the second year of study. If a student fails to score in the advanced bracket of the OPI test upon entering, he/she is tested again at the beginning of the second year. It is the responsibility of the candidates to design a course of study to improve their proficiency in Italian. Candidates who do not meet the minimum language requirement must discuss their plans to meet this requirement with the Chair of Graduate Studies. By the end of the third year, students must have passed reading examinations in two additional foreign languages. If the candidate's period of concentration is earlier than the Romantic period, one of these must be Latin; if Romantic or later, French.

6. Candidacy

At the end of the second year of residency, students who are performing well, as indicated by their course work, performance on the Qualifying Exam, and teaching and research assistantship performance, are advanced to candidacy. This step implies that the student has demonstrated the relevant qualities required for successful completion of the Ph.D. Future evaluations are based on the satisfactory completion of specific remaining department and University requirements. Students who are not advanced to candidacy will normally be terminated from the program and awarded an M.A. degree. In some cases, the department may require that a student complete outstanding work or complete unmet requirements before admission to candidacy. The university requires that all students must be admitted to candidacy by the beginning of the third year in residence in order to continue in the Ph.D. program. Therefore all requirements stipulated by the department must be met before registration for the autumn quarter of the student's third year. At any point during the degree program, evidence that a student is performing at a less than satisfactory level may be cause for a formal academic review of that student.

7. TGR Status

Doctoral students who have been admitted to candidacy, completed all required courses and degree requirements other than the dissertation, completed 135 units, and submitted a Doctoral Dissertation Reading Committee form, must request Terminal Graduate Registration status to complete their dissertations. Each quarter, all TGR students must enroll in ITALIAN 802 TGR Dissertation for zero units, in the appropriate section for their adviser.

Grading

Doctoral students in the department must take required courses for a letter grade if available and are expected to earn a grade of 'B+' or better in each course. Any grade of 'B' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty: while the grade will stand, the student may be required to revise and resubmit the work associated with that course.

Examinations

There are three examinations: the Qualifying Examination, the Field Examination, and the University Oral Examination. Students may not take any department or University exam while coursework is incomplete.

Qualifying Examination

The first oral examination, which takes place in the first two weeks of October of the second year of study, tests the student's knowledge of language and literature and his/her aptitude for critical thinking. The examining committee, determined by the Director of French and Italian, schedules the precise exam date and time.

The exam is based on a standard reading list covering major works from all periods of literature in the language(s) of study, from the Middle Ages

to present day. The list may be expanded to reflect a student's particular interests, but not abridged. The reading list may be obtained from the Chair of Graduate Studies, the Graduate Student Affairs Officer, or by referencing the French and Italian student handbook.

The exam is 90 minutes in length and consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given in English or in the language of study and should engage, in a succinct manner, an issue or set of issues of broad relevance to the literary history of the language(s) of study. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggesting and not exhaustive, so as to provoke further discussion.
2. A 70-minute question and answer period in which the examining committee follows up on the candidate's presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in the language(s) of study. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit and demonstrate the ability to formulate an original point of view on such texts and contexts.

Students who do not pass the Qualifying Exam their first time may be placed on probation with limited enrollment and be allowed to retake the exam at the end of Autumn Quarter. Should the student not pass the retake exam, his/her studies in the Ph.D. program will be concluded.

Students already holding an advanced degree in the relevant area may request to be excused from the Qualifying Exam. However, the student must present a formal request for a waiver to the Chair of Graduate Studies upon arrival at Stanford. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the Qualifying Exam would involve considerable repetition of already completed work is such a waiver likely to be granted.

Field Examination

The second oral examination takes place in the Autumn Quarter of the third year of study. The exam is 100 minutes in length and consists of two parts:

1. A 20-minute presentation by the student on a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his/her adviser and the Chair of Graduate Studies. The student should design this research project so that it has the focus of an article or a seminar he/she might teach. The student should discuss the proposed topic with the Chair of Graduate Studies before the end of the quarter preceding the quarter in which he/she plans to take the exam; together they choose a committee of two faculty members with interests close to the proposed topic. (In most cases, one of these committee members is the student's adviser.) In addition to these two members, the examination committee includes the Chair of Graduate Studies, who serves in an ex officio capacity as the third member of the examination committee. This presentation is followed by a 20-minute discussion.
2. A 60-minute discussion of a reading list, assembled by the student, which covers about a century of writing. The reading list should include works in all genres relevant to the period covered and should be around two single-spaced pages in length. The list may well include critical and scholarly works or texts from outside the traditional domain of literary studies in the chosen tradition (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student's field. Students are required to discuss the reading list for the examination with the Chair of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be submitted to the committee no later

than two weeks preceding the examination. Each member of the committee is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications. The aim of these questions is to establish the student's credentials as a specialist in the period of his/her choosing, so the core of the reading list must be made up of texts that are essential to any specialist. It follows that reading lists must not focus on the narrow area of the student's research interest. The tendency to bias reading lists towards the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work may prove relevant, but students should also remember that the examination is the central means of certifying their expertise in a literary period.

The University Oral Examination

This examination takes the form of a dissertation proposal defense. It is to be taken no later than Autumn Quarter of the student's fourth year. Students must have completed all course work and language requirements before the quarter in which they take the University Oral examination. One quarter prior to the University Oral examination, students must schedule the exam date and time as well as work with their primary adviser to obtain an outside chair for the examination.

Two weeks before the exam, the student must submit to the committee a 25-35 page proposal, which must contain the following parts:

1. a clear presentation of the student's central thesis
2. a synthetic overview of the dissertation
3. a description of the methodology that is used in the dissertation
4. an in-depth discussion of current secondary sources on the topic.

The student must also append a bibliography, but this does not take the place of number 4. The proposal must be prepared in close consultation with the dissertation director during the months preceding the exam.

The exam committee consists of four members, in addition to a committee chair from outside the Division of Literatures, Cultures, and Languages, whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list.

After a 20-minute presentation on the part of the candidate, each member of the committee (apart from the committee chair) questions the student for 20 minutes. At the end of the hour and forty minutes, the faculty readers vote on the outcome of the exam. If the outcome is favorable, (four out of five votes in favor of the student passing), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory, the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second exam. A student who fails a second time will be released from the Ph.D. program and awarded a terminal M.A. degree.

Advising

Given the interdisciplinary nature of the Ph.D. programs and the opportunity they afford each student to create an individualized program of study, regular consultation with an adviser is of the utmost importance. The adviser for all entering graduate students is the Chair of Graduate Studies, whose responsibility it is to assist students with their course planning and to keep a running check on progress in completing the course, teaching, and language requirements. By the end of the second year of study, each student should have chosen a faculty adviser whose expertise is appropriate to his/her own area of research and interests.

Yearly Review

The faculty provide students with timely and constructive feedback on their progress toward the Ph.D. In order to evaluate students' progress and to identify potential problem areas, the department's faculty reviews the academic progress of each student at the end of the academic year. The yearly reviews are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. Possible outcomes of the yearly review include (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period on probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; or (2) continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program. Students leaving the program at the end of the first or second year are usually allowed to complete the requirements to receive an M.A. degree, if this does not involve additional residency or financial support.

Doctor of Philosophy in French and Italian

University regulations pertaining to the Ph.D. are listed in the "Graduate Degrees" section of this bulletin.

Degree Requirements

1. Course work—

A candidate for the Ph.D. degree must complete at least 135 units of graduate-level study. 72 of the 135 units must be taken within the department. All course work should be selected in consultation with the Chair of Graduate Studies. Required courses—

		Units
FRENCH/ ITALIAN 369	Introduction to Graduate Studies: Criticism as Profession (must be taken in first year of studies)	5
DLCL 301	The Learning and Teaching of Second Languages (must be taken in first year of studies)	3

A minimum of four advanced courses on French literature and culture, and four advanced courses on Italian literature and culture. Four of the required eight courses must be taken within the first year.

Elective Courses— Apart from the required courses above, students are granted considerable freedom in structuring a course of study appropriate to their individual needs. During the first year, most course work is done within the French and Italian department, in order to ensure an adequate preparation for the qualifying examination. Students are encouraged to take a variety of courses in order to be exposed to different historical periods and issues. Students are not allowed to take Independent Study during their first year. In the second and third years, however, the program of study is tailored to the specific interests of the student.

2. Examinations

Successful completion of all department and University examinations. Students may not take any department or University exam while coursework is incomplete.

3. Dissertation

Submission and approval of a dissertation. The dissertation topic must include a substantial quotient of material from both the French and Italian tradition, and the dissertation must include either (1) at least one chapter on French materials and one chapter on Italian materials, or (2) at least two chapters focusing on a comparison between French and Italian materials.

4. Teaching

Ph.D. students are required to teach a minimum of five courses within their five years of funding. Of these five courses the student is required to teach at least one French language course and one Italian language course.

5. Language Requirements

Attaining a native or near-native fluency in both French and Italian is the individual responsibility of all candidates in the Ph.D. program, and remedial course work needed to achieve such fluency cannot count towards the Ph.D. degree.

For students specializing in areas (a) medieval and renaissance and (b) renaissance and early modern, proficiency in Latin equivalent to a second year collegiate level of proficiency (the equivalent of CLASSLAT 101 Intermediate Latin: Introduction to Literature, CLASSLAT 102 Intermediate Latin: Catullus and Pliny, and CLASSLAT 103 Intermediate Latin: Cicero and Ovid) in reading is also required. Such proficiency may be demonstrated by successfully completing a course in the language in question (at least second-year level, but preferably a graduate seminar); or by passing an exam that establishes a second-year or above level of competence. In no case is passage of a standard reading competence exam considered sufficient.

For students specializing in area (c) modern and contemporary, proficiency in a third language (beyond French and Italian) is not required; students are, however, encouraged to acquire competency in a third language or area that is relevant to their research (e.g. German).

The language requirements should be completed as soon as possible, but in any case not later than the end of the third year.

6. Candidacy

At the end of the second year of residency, students who are performing well, as indicated by their course work, performance on the Qualifying Exam, and teaching and research assistantship performance, are advanced to candidacy. This step implies that the student has demonstrated the relevant qualities required for successful completion of the Ph.D. Future evaluations are based on the satisfactory completion of specific remaining department and University requirements. Students who are not advanced to candidacy will normally be terminated from the program and awarded an M.A. degree. In some cases, the department may require that a student complete outstanding work or complete unmet requirements before admission to candidacy. The university requires that all students must be admitted to candidacy by the beginning of the third year in residence in order to continue in the Ph.D. program. Therefore all requirements stipulated by the department must be met before registration for Autumn Quarter of the student's third year. At any point during the degree program, evidence that a student is performing at a less than satisfactory level may be cause for a formal academic review of that student.

7. TGR Status

Doctoral students who have been admitted to candidacy, completed all required courses and degree requirements other than the dissertation, completed 135 units, and submitted a Doctoral

Dissertation Reading Committee form, must request Terminal Graduate Registration status to complete their dissertations. Each quarter, all TGR students must enroll in FRENCH 802 TGR Dissertation or ITALIAN 802 TGR Dissertation for zero units, in the appropriate section for their adviser.

Grading

Doctoral students in the department must take required courses for a letter grade if available and are expected to earn a grade of 'B+' or better in each course. Any grade of 'B' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty: while the grade will stand, the student may be required to revise and resubmit the work associated with that course.

Examinations

There are three examinations: the Qualifying Examination, the Field Examination, and the University Oral Examination. Students may not take any department or University exam while coursework is incomplete.

Qualifying Examination

The first oral examination, which takes place in the first two weeks of October of the second year of study, tests the student's knowledge of language and literature and his/her aptitude for critical thinking. The examining committee, determined by the Director of French and Italian, schedules the precise exam date and time.

Students may take either two qualifying exams, one in French and one in Italian, or a single qualifying exam in French and Italian. The combined French and Italian qualifying exam covers one of three periods, (a) medieval and renaissance, (b) renaissance and early modern, or (c) modern and contemporary. For each period it is based on a standard reading list. The list may be expanded to reflect a student's particular interests, but not abridged. One third of the combined exam takes place in English, one third in French, and one third in Italian (with the student free to choose which portion transpires in which language). The reading lists may be obtained from the Chairs of Graduate Studies, the Graduate Student Affairs Officer, or by referencing the French and Italian student handbook.

The exam is 90 minutes in length and consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given in English or in the language of study and should engage, in a succinct manner, an issue or set of issues of broad relevance to the literary history of the language(s) of study. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggesting and not exhaustive, so as to provoke further discussion.
2. A 70-minute question and answer period in which the examining committee follows up on the candidate's presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in the languages of study. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit, and demonstrate the ability to formulate an original point of view on such texts and contexts.

Students who do not pass the Qualifying Exam their first time may be placed on probation with limited enrollment and be allowed to retake the exam at the end of Autumn Quarter. If the student does not pass the second exam, his/her studies in the Ph.D. program will be concluded.

If, at the qualifying exam stage, a student's work is judged insufficient for admission to candidacy for the Ph.D., the student may petition to continue in French only or Italian only. This petition is reviewed by the qualifying exam committee, the relevant Chair of Graduate Studies, and the Director of the Department of French and Italian.

Students already holding an advanced degree in the relevant area may request to be excused from the Qualifying Exam. However, the student must present a formal request for a waiver to the Chair of Graduate Studies upon arrival at Stanford. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the Qualifying Exam would involve considerable repetition of already completed work is such a waiver likely to be granted.

Field Examination

The second oral examination takes place in the Autumn quarter of the third year of study. The exam is 100 minutes in length and consists of two parts:

1. A 20-minute presentation by the student on a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his/her adviser and the Chair of Graduate Studies. The student should design this research project so that it has the focus of an article or a seminar he/she might teach. The student should discuss the proposed topic with the Chairs of Graduate Studies before the end of the quarter preceding the quarter in which he/she plans to take the exam; together they choose a committee of two faculty members with interests close to the proposed topic. (In most cases, one of these committee members is the student's adviser.) In addition to these two members, the examination committee includes the Chair of Graduate Studies, who serves in an ex officio capacity as the third member of the examination committee. This presentation is followed by a 20-minute discussion.
2. A 60-minute discussion of a reading list, assembled by the student, which covers about a century of writing. The reading list should include works in all genres relevant to the period covered and should be around two single-spaced pages in length. The list may well include critical and scholarly works or texts from outside the traditional domain of literary studies in the chosen tradition (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student's field. Students are required to discuss the reading list for the examination with the Chairs of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be submitted to the committee no later than two weeks preceding the examination. Each member of the committee is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications. The aim of these questions is to establish the student's credentials as a specialist in the period of his/her choosing, so the core of the reading list must be made up of texts that are essential to any specialist. It follows that reading lists must not focus on the narrow area of the student's research interest. The tendency to bias reading lists towards the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work may prove relevant, but students should also remember that the examination is the central means of certifying their expertise in a literary period.

The University Oral Examination

This examination takes the form of a dissertation proposal defense. It is to be taken no later than Autumn Quarter of the student's fourth year. Students must have completed all course work and language requirements before the quarter in which they take the University Oral examination. One quarter prior to the University Oral examination, students must schedule the exam date and time as well as work with their primary adviser to obtain an outside chair for the examination.

Two weeks before the exam, the student must submit to the committee a 25-35 page proposal. This proposal must contain the following parts:

1. a clear presentation of the student's central thesis
2. a synthetic overview of the dissertation
3. a description of the methodology that is used in the dissertation
4. an in-depth discussion of current secondary sources on the topic.

The student must also append a bibliography, but this does not take the place of number 4. The reading list should include works in both French and Italian in all genres relevant to the period covered. The proposal must be prepared in close consultation with the dissertation director during the months preceding the exam.

The exam committee consists of four members, in addition to a committee chair from outside the Division of Literatures, Cultures, and Languages, whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list.

After a 20-minute presentation on the part of the candidate, each member of the committee (apart from the committee chair) questions the student for 20 minutes. At the end of the hour and forty minutes, the faculty readers vote on the outcome of the exam. If the outcome is favorable (four out of five votes in favor of the student passing), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory, the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second exam. A student who fails a second time will be released from the Ph.D. program and awarded a terminal M.A. degree.

Advising

Given the interdisciplinary nature of the Ph.D. programs and the opportunity they afford each student to create an individualized program of study, regular consultation with an adviser is of the utmost importance. The adviser for all entering graduate students is the Chair of Graduate Studies, whose responsibility it is to assist students with their course planning and to keep a running check on progress in completing the course, teaching, and language requirements. By the end of the second year of study, each student should have chosen a faculty adviser whose expertise is appropriate to his/her own area of research and interests.

Yearly Review

The faculty provide students with timely and constructive feedback on their progress toward the Ph.D. In order to evaluate students' progress and to identify potential problem areas, the department's faculty reviews the academic progress of each student at the end of the academic year. The yearly reviews are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. Possible outcomes of the yearly review include (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period on probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; or (2) continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program. Students leaving the program at the end of the first or second year are usually allowed to complete the requirements to receive an M.A. degree, if this does not involve additional residency or financial support.

Ph.D. Minor in French or Italian

The Ph.D. may be combined with a minor in a related field, including Comparative Literature, Linguistics, Modern Thought and Literature, Art History, History, Music, Philosophy, and Spanish. Ph.D. candidates in

French may minor in Italian, and vice versa. Students interested in a minor should design their course of study with their adviser(s).

Ph.D. Minor in French Literature

The department offers a minor in French Literature. The requirement for a minor in French is completion of 24 units of graduate course work in the French section. Interested students should consult the graduate adviser.

Ph.D. Minor in Italian Literature

The department offers a minor in Italian Literature. The requirement for a minor in Italian is a minimum of 24 units of graduate course work in Italian literature. Interested students should consult the graduate adviser.

Emeriti: (Professors) John G. Barson, Marc Bertrand, Robert G. Cohn, John Freccero, René Girard, Ralph M. Hester, Elisabeth Mudimbe-Boyi, Roberto B. Sangiorgi

Director: Carolyn Springer

Chairs of Graduate Studies: Cécile Alduy (French), Carolyn Springer (Italian)

Chairs of Undergraduate Studies: Dan Edelstein (French), Laura Wittman (Italian)

Professors: Jean-Marie Apostolidès, Jean-Pierre Dupuy, Hans U. Gumbrecht, Robert Harrison (on leave, Autumn), Michel Serres, Carolyn Springer

Associate Professors: Cécile Alduy, Dan Edelstein, Joshua Landy, Laura Wittman

Assistant Professors: Marisa Galvez (on leave), David Lummus

Courtesy Professors: Keith Baker, Margaret Cohen, Paula Findlen, Michael Marrinan

Lecturers: Sarah Carey, Marie-Pierre Ulloa

Visiting Associate Professors: Ewa Domanska (Spring)

Overseas Studies Courses in French

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/frenchanditalian/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/frenchanditalian/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/frenchanditalian/http://bosp.stanford.edu>).

		Units
OSPPARIS 29	Colonization, Decolonization and Immigration in France	5
OSPPARIS 30	The Avant Garde in France through Literature, Art, and Theater	4
OSPPARIS 32	Understanding French Politics	4-5
OSPPARIS 54	The Artist's World: The Workshop, Patronage and Public in 19th and 20th Century France	4

OSPPARIS 60	Representations of Women in Christian Art: Boldness and Virtue	4
OSPPARIS 81	France During the Second World War: Between History and Memory	5
OSPPARIS 92	Building Paris: Its History, Architecture, and Urban Design	4
OSPPARIS 186F	Contemporary African Literature in French	4

Overseas Studies Courses in Italian

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/frenchanditalian/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

German Studies

Courses offered by the Department of German Studies are listed on the *Stanford Bulletin's* ExploreCourses web site under the subject code GERMAN. For courses in German language instruction with the subject code GERLANG, see the "Language Center" section of this bulletin.

The department's goal is to provide students with the linguistic and analytic ability to explore the significance of the cultural traditions and political

histories of the German-speaking countries of Central Europe. At the same time, the interdisciplinary study of German culture, which can include art, history, literature, media theory, philosophy, and political science, encourages students to evaluate broader and contradictory legacies of modernity, such as how the literary, artistic, and cultural responses to the belated and rapid modernization of Germany allow for reflection on the modern condition in general.

Similarly, the German experience of national identity and political unification sheds light on wider issues of cultural cohesion and difference, as well as on the causes and meaning of phenomena such as racial prejudice, anti-Semitism, and the Holocaust. In general, an education in German Studies not only encourages the student to consider the effects of German-speaking thinkers and artists on the modern world, but also provides a lens through which the contours of the present and past can be evaluated.

The department offers students the opportunity to pursue course work at all levels in the languages, cultures, literatures, and intellectual histories of the German-language traditions. Whether interested in German literature or the influence of German thought on other fields in the humanities, students find a broad range of courses covering language acquisition and refinement, literary history and criticism, cultural history and theory, history of thought, continental philosophy, and linguistics.

By carefully planning their programs, students may fulfill the B.A. requirements for a double major in German Studies and another subject. A coterminous program is offered for the B.A. and M.A. degrees in German Studies. Doctoral students may elect Ph.D. minors in Comparative Literature, Humanities, Linguistics, and Modern Thought and Literature.

Special collections and facilities at Stanford offer possibilities for extensive research in German Studies and related fields pertaining to Central Europe. Facilities include the Stanford University Libraries and the Hoover Institution on War, Revolution, and Peace. Special collections include the Hildebrand Collection (texts and early editions from the 16th to the 19th century), the Austrian Collection (with emphasis on source material to the time of Maria Theresa and Joseph II, the Napoleonic wars, and the Revolution of 1848), and the Stanford Collection of German, Austrian, and Swiss Culture. New collections emphasize culture and cultural politics in the former German Democratic Republic. The Hoover Institution has a unique collection of historical and political documents pertaining to Germany and Central Europe from 1870 to the present. The department also has its own reference library.

Haus Mitteleuropa, the German theme house at 620 Mayfield, is an undergraduate residence devoted to developing an awareness of the culture of Central Europe. A number of department courses are regularly taught at the house, and there are in-house seminars and conversation courses. Assignment is made through the regular undergraduate housing draw.

Mission of the Undergraduate Program in German Studies

The mission of the undergraduate program in German Studies is to provide students with the linguistic and analytic background necessary to explore the significance of cultural traditions and political histories of the German-speaking countries of Central Europe. In addition, its interdisciplinary component prepares students to evaluate how the literary, artistic, and cultural responses to the belated yet rapid modernization of Germany allow for reflection on the modern condition. Students pursue course work at all levels in the languages, literatures, and intellectual histories of the Germanic nations. The program prepares students for careers in business, social service, and government, and for graduate work in German Studies.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. oral proficiency beyond the interpersonal level with presentational language abilities.
2. writing proficiency beyond the interpersonal level with presentational language abilities.
3. close reading skills of authentic texts in German.
4. the ability to develop effective and nuanced lines of interpretation.

Graduate Programs in German Studies

The University requirements for the M.A. and Ph.D. degrees are described in the "Graduate Degrees" section of this bulletin.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in German Studies and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in German Studies. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of German Studies and to pursue career tracks in higher education and in other sectors.

German Studies and a Minor Field

Students may work toward a Ph.D. in German Studies with minors in such areas as Comparative Literature, History, Humanities, Linguistics, or Modern Thought and Literature. Students obtaining a Ph.D. in such combinations may require additional training.

Bachelor of Arts in German Studies

Majors must demonstrate basic language skills, either by completing GERLANG 1,2,3, First-Year German, or the equivalent such as an appropriate course of study at the Stanford in Berlin Center. Students then enroll in intermediate and advanced courses on literature, culture, thought, and language. Courses counted toward degree requirements must be taken for a letter grade unless that grading option is not available. Students can combine a major in German Studies with a major in any other field.

Degree Requirements

1. Completion of 60 units. All classes taken towards this major must be taken for a letter grade unless the only option is C/NC. Units earned towards the Bachelor of Arts in German Studies with Honors degree may be applied to the 60 unit total.

2. Completion of two GERMAN Literature courses at the 120-level:

		Units
GERMAN 120Q	Contemporary Politics in Germany	3
GERMAN 121N	Memory in the Modernist Novel	3
GERMAN 123	German Culture and Film	3-5
GERMAN 124	Introduction to German Poetry	4
GERMAN 128N	Medicine, Modernism, and Mysticism in Thomas Mann's the Magic Mountain	3

3. Completion of German Studies Core series:

		Units
GERMAN 131	Intro to 18th Century German Literature: The Age of Reason, Feeling and Revolution	3-5
GERMAN 132	Intro to Nineteenth-Century German Literature	3-5
GERMAN 133	Twentieth Century and Contemporary Literature and Culture	3-5
or GERMAN 134	Freud's Vienna	

4. Senior Capstone:

		Units
GERMAN 190	German Capstone: Reading Franz Kafka	3-5

5. Remaining units to be completed through elective courses approved in consultation with the Chair of Undergraduate Studies. A maximum of 27 units of GERLANG courses and/or 25 units from courses covering German material taught in other departments may be applied to these elective units. IHUM or Thinking Matters courses approved by the Chair of Undergraduate Studies for a maximum of 10 units. As well as Structured Liberal Education, students may count 10 units of SLE towards the major electives.

GERMAN 133	Twentieth Century and Contemporary Literature and Culture	3-5
or GERMAN 134	Freud's Vienna	

3. German Studies Senior Capstone:

		Units
GERMAN 190	German Capstone: Reading Franz Kafka	3-5

Philosophy:

1. PHIL 80 Mind, Matter, and Meaning
2. GERMAN 181 Philosophy and Literature
3. Aesthetics, Ethics, Political Philosophy: one course from PHIL 170 series.
4. Language, Mind Metaphysics, and Epistemology: one course from PHIL 180 series.
5. History of Philosophy: one course in the history of Philosophy, numbered above PHIL 100.
6. Two additional elective courses of special relevance to the study of philosophy and literature as identified by the committee in charge of the program. Students must consult with their advisers, the Chair of Undergraduate Studies, and the undergraduate adviser of the program in philosophical and literary thought.
7. Capstone: One of the courses must be taken in the student's senior year. When choosing courses, students must consult with their advisers, the Chair of Undergraduate Studies, and the undergraduate adviser of the program in philosophical and literary thought:

		Units
ENGLISH 117A	Irony: From Socrates to David Foster Wallace	5
COMPLIT 199	Senior Seminar	3-5
GERMAN 282	Martin Heidegger	3-5

Units devoted to meeting the department's language requirement are not counted toward the 65-unit requirement.

The capstone seminar and the two related courses must be approved by both the German Studies Chair of Undergraduate Studies and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. Substitutions, including transfer credit, are not normally permitted for items 3b, 3c, and 3d, and are not permitted under any circumstances for items 2, 3a, and 5. Up to 10 units taken in the Philosophy Department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade.

German and Philosophy

The German and Philosophy major option offers students the opportunity to combine studies in literature and philosophy. Students take most of their courses from departments specializing in the intersection of literature and philosophy. This option is not declared in Axess; it does not appear on the transcript or diploma. This option requires a minimum of 16 courses, for a minimum total of 65 units.

Degree Requirements

German Studies:

1. Completion of two GERMAN Literature courses at the 120-level:

		Units
GERMAN 120Q	Contemporary Politics in Germany	3
GERMAN 121N	Memory in the Modernist Novel	3
GERMAN 123	German Culture and Film	3-5
GERMAN 124	Introduction to German Poetry	4
GERMAN 128N	Medicine, Modernism, and Mysticism in Thomas Mann's the Magic Mountain	3

2. Completion of German Studies Core series:

		Units
GERMAN 131	Intro to 18th Century German Literature: The Age of Reason, Feeling and Revolution	3-5
GERMAN 132	Intro to Nineteenth-Century German Literature	3-5

Honors

German majors with an overall grade point average (GPA) of 3.3 or above, and who maintain a 3.5 (GPA) in major courses, are eligible to participate in the DLCL's honors program. Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty, in their junior year, preferably by March 1, but no later than May 1.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40-90 pages not including bibliography and notes.

During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL Honors application and an outline of planned course work for their senior year. During this quarter, students may enroll for 2 units in DLCL 189C Honors Thesis Seminar for the drafting or revision of the thesis proposal. The

proposal is reviewed by the Chair of Undergraduate Studies and the Director of the department and will be approved or returned for submission.

Honors students are encouraged to participate in the honors college hosted by Bing Honors College (http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/OO_honors_BingHonors.html) and coordinated by the Division of Literatures, Cultures, and Languages. The honors college is offered at the end of the summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted through the Bing program. For more information, view the Bing Honors website.

In Autumn Quarter of the senior year, the students must enroll in DLCL 189A Honors Thesis Seminar, a 5 unit seminar that focuses on researching and writing the honors thesis. During Winter Quarter students then enroll for 5 units in DLCL 189B Honors Thesis Seminar while composing their thesis. Students who did not enroll in DLCL 189C Honors Thesis Seminar during their Spring Quarter junior year may do so in the Spring Quarter of their senior year while revising the thesis, if approved by the thesis supervisor. A total of 10-12 units will be awarded for completion of honors course work, and the finished thesis. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15th of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

Overseas Studies and Internships in German Studies

All students who are planning to study at Stanford in Berlin or engage in an internship are encouraged to consult with the Chair of Undergraduate Studies and the Overseas Studies office about integrating work done abroad into their degree program. Through the Center, students with at least two years of college-level German can also take courses at the Freie Universität, Technische Universität, or Humboldt Universität. Most credits earned in Berlin can be applied to the undergraduate major in German Studies. For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/germanstudies/> <http://explorecourses.stanford.edu>) web site, or the Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/germanstudies/http://bosp.stanford.edu>) web site.

Internships in Germany are arranged through the Bing Overseas Studies Program. In addition, students may consult with the department to arrange local internships involving German language use or issues pertaining to Germany or Central Europe. Returning interns who wish to develop a paper based on their experience should enroll in GERMAN 298 Writing Workshop.

Minor in German Studies

The department offers two minor options; the DLCL offers one additional minor option.

Minor in German Language and Culture

Students may choose to minor in German Language and Culture if they are particularly interested in developing a strong ability in the German language, or in pursuing linguistic issues pertinent to German. Students satisfy the requirements for the minor in German Language and Culture by completing 35 units of course work, including at least three courses at

the GERMAN 100-139, with coursework taught in German. Study at the Stanford in Berlin Center for at least one quarter is highly recommended.

Minor in German Cultural Studies

Students who wish to study German literature, culture, or thought, without necessarily acquiring facility in the German language, may pursue a minor in German Cultural Studies. Students meet the requirements for the minor in German Cultural Studies by completing 35 units of course work in German literature, culture, and thought in translation, including at least three courses at the GERMAN 130- or 140- level.

Minor in Modern Languages

The Division of Literatures, Cultures, and Languages offers a minor in Modern Languages. This minor draws on literature and language courses offered through this and other literature departments. See the "Literatures, Cultures, and Languages" section of this bulletin for further details about this minor and its requirements.

Master of Arts in German Studies

This program is designed for those who do not intend to continue studies through the Ph.D. degree. Students desiring the M.A. degree must complete a minimum of 45 units of graduate work. If students enroll for three quarters for a minimum of 15 units per quarter, they can fulfill the M.A. requirements in one year. The program normally includes at least one course in each of the three areas of concentration: language and linguistics, literature, and thought.

In addition, students must take graduate-level courses in German and/or approved courses in related fields such as art history, comparative literature, linguistics, history, or philosophy.

M.A. candidates must take an oral examination toward the end of their last quarter.

Coterminal Programs

Students may elect to combine programs for the B.A. and M.A. degrees in German Studies. University requirements and forms for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (p. 36)" section of this bulletin.

Doctor of Philosophy in German Studies

The requirements for the Ph.D. in German Studies include:

1. Required Courses. A total of 135 units is required for the Ph.D.; doctoral candidates must complete at least one course with each member of the department. During each quarter in year one and year two, enrollment in and completion of at least two graduate courses taught by German Studies faculty are required.
 - A. First Year. Students must enroll in a minimum of 54 graduate units during their first year of graduate study as well as 10 units during the first summer. During the first year of work, the student should select courses that provide an introduction to the major areas of the discipline. First year required coursework:

		Units
GERMAN 320	German Literature Pre 1700: Medieval and Early Modern German Literature	3-5
GERMAN 321	German Literature 1700-1900: From Enlightenment to Realism	4
GERMAN 322	German Literature and Thought from 1900 to the Present: Wrestling with Modernity	3-5
GERMAN 298	Writing Workshop (summer quarter)	1-12
DLCL 301	The Learning and Teaching of Second Languages	3

B. Second Year. Students must enroll in a minimum of 30 units during their second year of graduate study as well as 10 units during their second summer. Second year required coursework:

		Units
GERMAN 298	Writing Workshop (autumn and summer quarters)	1-12

C. Third Year. Students that have not reached TGR status must complete a minimum of 30 units during their third year of graduate study. Third year required coursework:

		Units
GERMAN 398	Dissertation Prospectus Colloquium (autumn quarter)	1-12
GERMAN 399	Individual Work (winter and spring quarters)	1-12

2. Canon Exam. On June 7 of spring quarter, all first year Ph.D. students must take their first-year examination. During the one-hour oral examination, the student is questioned by three faculty members on work undertaken in specific graduate courses. Students who fail this examination may request to retake it once before October 15. A second fail of the Cannon Exam will result in dismissal from the Ph.D. program.
3. Language Requirement. A reading knowledge of one language other than English and German is required. Students in Medieval Studies must also have a reading knowledge of Latin.
4. Article Submission. Based upon summer independent study and progress in GERMAN 298 Writing Workshop, the Ph.D. student will submit and defend an article in Autumn quarter of their second year. Article must be submitted by October 15 and defended on December 7.
5. Dissertation Prospectus. Based upon work in Winter and Spring quarters of the students second year, a preliminary dissertation prospectus must be completed by the end of Spring quarter of the second year.
6. The University Oral examination. The University Oral examination in the Department of German Studies involves a presentation of a dissertation prospectus. The prospectus, normally 25 pages plus bibliography, elaborates on the topic, the proposed argument, and the organization of the dissertation. It must be distributed to the committee members and the outside chair at least two weeks before the formal University Oral examination. Students should plan this examination for winter quarter of the third year. The examination lasts approximately two hours, permitting each of the four examiners a 25-minute question period and reserving an optional ten minutes for questions from the chair of the examination. Should a student fail the University Oral exam, they will be allowed an opportunity to retake the exam. A second fail of the University Oral exam will result in dismissal from the Ph.D. program.
7. Submission and approval of a dissertation.
8. Teaching Assistant. The teaching requirement is four quarters during the second and third years of study and mandatory for continued enrollment or support in the program. Students must teach a fifth

course which may be a language course, but they may alternatively request to teach an additional literature course at a later time in the course of study, normally once their dissertation has reached an advanced stage, contingent upon department need and subject to approval of the director. Such teaching does not extend the length or scope of support.

9. Research Assistant. The department expects candidates to demonstrate research skills appropriate to their special areas of study. The requirement can be fulfilled in the capacity of either a University Fellow or a Research Assistant. Graduate students are also advised to start developing skills in the teaching of literature by participating in the teaching of undergraduate literature courses. Students may enroll in independent studies with faculty members to gain experience as apprentices in undergraduate literature teaching.
10. Department Colloquium. Regular attendance at the departmental colloquium is mandatory. Each student is expected to make a formal presentation at the colloquium for public discussion. The principal conditions for continued registration of a graduate student are the timely and satisfactory completion of University, department, and program requirements for the degree, and fulfillment of minimum progress requirements. Failure to meet these requirements results in corrective measures which may include a written warning, academic probation, and/or the possible release from the program.
11. Candidacy. At the end of the second year of residency, students who are performing well, as indicated by their adviser, performance on the Qualifying Exam, and teaching and research assistantship performance, are advanced to candidacy. This step implies that the student has demonstrated the relevant qualities required for successful completion of the Ph.D. Future evaluations are based on the satisfactory completion of specific remaining department and University requirements. Students who are not advanced to candidacy will normally be terminated from the program and awarded a terminal M.A. degree. In some cases, the department may require that a student complete outstanding work or complete unmet requirements before admission to candidacy. The university requires that all students must be admitted to candidacy by the beginning of the third year in residence in order to continue in the Ph.D. program. Therefore all requirements stipulated by the department must be met before registration for the fall quarter of the student's third year.
12. Yearly Review. In order to evaluate student progress and to identify potential problem areas, the department's faculty reviews the academic progress of each first-year student at the beginning of Winter and Spring quarters and again at the end of the academic year. The first two reviews are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. The review at the end of Spring Quarter is more thorough; each student's performance during the first year is reviewed and discussed. All students are given feedback from their advisers at the end of their first year of graduate work, helping them to identify areas of strength and potential weakness. At any point during the degree program, evidence that a student is performing at a less than satisfactory level may be cause for a formal academic review of that student. Possible outcomes of the spring review include: continuation of the student in good standing, or placing the student on probation, with specific guidelines for the period of probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: restoration to good standing; continued probation, again with guidelines for necessary remedial steps; or termination from the program.
13. Grading. Doctoral students in the department must take required courses for a letter grade if available and are expected to earn a grade of 'B+' or better in each course offered by the DLCL. Any grade of 'B' or below is considered to be less than satisfactory. Grades of

'B' or below are reviewed by faculty and the following actions may be taken: the grade stands and the student's academic performance is monitored to ensure that satisfactory progress is being made; the grade stands and the student is required to revise and resubmit the work associated with that course; or the student may be required to retake the course.

Emeriti: (Professors) Theodore M. Andersson, Gerald Gillespie, Katharina Mommsen, Kurt Müller-Vollmer, Orrin W. Robinson III

Director: Russell A. Berman

Chair of Graduate Studies: Amir Eshel

Chair of Undergraduate Studies: Márton Dornbach

Professors: Russell A. Berman, Elizabeth Bernhardt, Amir Eshel, Kathryn Starkey

Assistant Professors: Adrian Daub (on leave), Márton Dornbach, Charitini Douvaldzi

Courtesy Professor: Thomas Sheehan (on leave, Spring)

Senior Lecturers: William E. Petig, Kathryn Strachota

Visiting Professors: Karl Heinz Bohrer (Autumn)

Visiting Assistant Professor: Falk Cammin (Autumn)

Visiting Lecturers: Stefan Willer (Autumn)

Overseas Studies Courses in German Studies

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/germanstudies/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/germanstudies/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/germanstudies/http://bosp.stanford.edu>).

		Units
OSPBER 15	Shifting Alliances? The European Union and the U.S.	4-5
OSPBER 17	Split Images: A Century of Cinema	4
OSPBER 52	European Modernism in Art	4
OSPBER 53	The Brothers Grimm and their Fairy Tales	4
OSPBER 66	Theory from the Bleachers: Reading German Sports and Culture	3
OSPBER 70	The Long Way to the West: German History from the 18th Century to the Present	4-5
OSPBER 101A	Contemporary Theater	5
OSPBER 115X	The German Economy: Past and Present	4-5
OSPBER 126X	A People's Union? Money, Markets, and Identity in the EU	4-5
OSPBER 161X	The German Economy in the Age of Globalization	4-5

OSPBER 174	Sports, Culture, and Gender in Comparative Perspective	5
OSPBER 177A	Culture and Politics in Modern Germany	4-5

History and Philosophy of Science

Courses offered by the Program in History and Philosophy of Science and Technology are listed under the subject code HPS on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=HPS&filter-catalognumber-HPS=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=HPS&filter-catalognumber-HPS=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=HPS&filter-catalognumber-HPS=on>).

The Program in History and Philosophy of Science and Technology (HPS) teaches students to examine the sciences, medicine and technology from a number of perspectives, conceptual, historical and social. The community of scholars includes core faculty and students in History and Philosophy and affiliated members in Classics, Anthropology, English, Political Science, Communication, and other disciplines. Together, they draw upon the multiple methods of their disciplines to study the development, functioning, applications, and social and cultural engagements of the sciences.

Stanford's Program in History and Philosophy of Science and Technology is a collaborative enterprise of the departments of History and Philosophy. Each department has its own undergraduate and graduate degree programs in this area, but these overlap and interact through the structure of requirements, advising, team-taught courses, an active graduate student community and a shared colloquium series (<http://HPST.stanford.edu/colloquia.html>).

The program's courses span from antiquity to the late 20th century, with emphasis on:

- ancient science
- Renaissance science
- the Scientific Revolution
- Enlightenment and transatlantic science
- history of medicine and the body
- history and philosophy of biology
- history and philosophy of modern physics
- history of the philosophy of science from the early modern period to the present
- central issues in contemporary philosophy of science
- gender, science, and technology

Undergraduate Degrees

HPS offers undergraduates the opportunity to study science, medicine and technology by combining scientific and humanistic perspectives in a single program. Students can pursue HPS through the two departments (History and Philosophy) that coordinate this interdisciplinary program. The HPS Program offers students an in-depth understanding of the nature and evolution of scientific ideas, practices, and institutions; their contemporary significance to intellectual life; and their material transformation of the modern world.

The Department of History offers an interdisciplinary track in History of Science, and Medicine (<http://www.stanford.edu/dept/registrar/bulletin/7071.htm>). This track is especially well suited to students who wish to combine history and science, or who are interested in studying the history of science and medicine in combination with premed science requirements in preparation for a future career in medicine and public health.

The Department of Philosophy offers a special program in History and Philosophy of Science (<http://www.stanford.edu/dept/registrar/bulletin/6562.htm>). This program is especially well suited to students who want to combine their concentration in Philosophy with the study of science and its history.

Students interested in HPS should contact the faculty advisors (in 2012-13 Jessica Riskin for History and Michael Friedman for Philosophy) to discuss the undergraduate program.

Graduate Degrees

Graduate students in the Program in History and Philosophy of Science can pursue a Ph.D. either in History, through its Ph.D. concentration in History of Science, Medicine, and Technology, or in Philosophy, through its Ph.D. subplan in History and Philosophy of Science. Diplomas will be issued by the respective departments, but the HPS study will not be noted on the transcript nor on the diploma. Ph.D. students completing the requirements of the HPS program will receive a certificate issued by the Program.

Graduate students in the Program in History and Philosophy of Science that wish to pursue a Ph.D. in Philosophy must fulfill Departmental degree requirements (<http://www.stanford.edu/dept/registrar/bulletin/6568.htm>) and the following requirements:

1. HPS colloquium series attendance
2. One of the following graduate level Philosophy of Science courses: 263, 264, 264A, or 266
3. One elective seminar in the history of science
4. One elective seminar (in addition to the course satisfying requirement 2) in philosophy of science

Philosophy Ph.D. students declaring the HPS subplan in Access will have it appear on the official transcript but is not printed on the diploma.

The Program in History and Philosophy of Science degree requirements for the Ph.D. in History of Science, Medicine and Technology, in addition to the general History Department Ph.D. degree requirements (<http://www.stanford.edu/dept/registrar/bulletin/7084.htm>), are:

1. HPS colloquium series attendance
2. the History Department core seminar in History of Science, Medicine and Technology
3. Four other courses in the history of science, technology and/or medicine
4. One course in the philosophy of science
5. Four additional courses in a given geographical or national field of research, one of which must be a core course

The courses described above must include two research seminars, at least one of which must be in the history of science, technology and/or medicine. Students are expected to write papers on substantially different topics for each seminar. You should also aim to present your research at the annual meeting of a professional society associated with the history of science, technology and/or medicine sometime during your third or fourth year. For more information, see the program's (<http://HPST.stanford.edu/grad.html>) web site.

Bachelor of Arts Programs

HPS offers undergraduates the opportunity to study science, medicine and technology by combining scientific and humanistic perspectives in a single program. Students can pursue HPS through the two departments (History and Philosophy) that coordinate this interdisciplinary program. The HPS Program offers students an in-depth understanding of the nature and

evolution of scientific ideas, practices, and institutions; their contemporary significance to intellectual life; and their material transformation of the modern world.

The Department of History offers an interdisciplinary track in History of Science, and Medicine (<http://www.stanford.edu/dept/registrar/bulletin/7071.htm>). This track is especially well suited to students who wish to combine history and science, or who are interested in studying the history of science and medicine in combination with premed science requirements in preparation for a future career in medicine and public health.

The Department of Philosophy offers a special program in History and Philosophy of Science (<http://www.stanford.edu/dept/registrar/bulletin/6562.htm>). This program is especially well suited to students who want to combine their concentration in Philosophy with the study of science and its history.

Students interested in HPS should contact the faculty advisors (in 2012-13 Jessica Riskin for History and Michael Friedman for Philosophy) to discuss the undergraduate program.

Course Sequences

The following courses are offered in 2012-2013 in the area of History and Philosophy of Science.

Introductory

		Units
HPS/PHIL 60	Introduction to Philosophy of Science	5
PHIL 15N	Freedom, Community, and Morality	3
HPS 61	Science, Religion, and the Birth of Modern Philosophy	5

Science in History

This sequence is designed to introduce students to the history of Science from antiquity to the 20th century. Students are advised to take most or all of this sequence as a core foundation.

		Units
CLASSGEN 22N	Technologies of Civilization: Writing, Number, and Money	4-5
HISTORY 40/140	World History of Science	3
OSPFLOR 44	The Revolution in Science: Galileo and the Birth of Modern Scientific Thought	5
HISTORY 142	Darwin in the History of Life	5
HISTORY 144	History of Women and Gender in Science, Medicine and Engineering	5
HISTORY 244C	The History of the Body in Science, Medicine, and Culture	4-5
HISTORY 332G	When Worlds Collide: The Trial of Galileo	4-5
HISTORY 342	Darwin in the History of Life	4-5
HISTORY 44	History of Women and Gender in Science, Medicine, and Engineering	3
HISTORY 208A	Science and Law in History	4-5
HISTORY 308A	Science and Law in History	4-5

Medicine in History

This sequence is designed to introduce students to the history of medicine from antiquity to the 20th century.

		Units
HISTORY 243G/343G	Tobacco and Health in World History	4-5

HISTORY 130A	The Rise of Scientific Medicine in the United States, 1825-Present	5
HISTORY 40	World History of Science	3
AMSTUD 156H	Women and Medicine in US History: Women as Patients, Healers and Doctors	5
CLASSGEN 149	Ancient and Modern Medicine	3-4
HISTORY 244C	The History of the Body in Science, Medicine, and Culture	4-5
HISTORY 243C	Colonial Science and Medicine	4-5
HUMBIO 175	Health Care as Seen Through Medical History, Literature, and the Arts	3
HISTORY 264G	The Social History of Mental Illness in the United States	5

HPS 299	Graduate Individual Work	1-15
ANTHRO 180	Science, Technology, and Gender	3-5
HISTORY 44Q	Gendered Innovations in Science, Medicine, and Engineering	4-5
HISTORY 205A/305A	The History of Information	4-5
HISTORY 243S/443A	Human Origins: History, Evidence, and Controversy	4-5

Philosophical Perspectives on Science, Medicine, and Technology

This sequence is designed to introduce students to the philosophy of science. Students are advised to take HPS 60 Introduction to Philosophy of Science above as a starting point, and combine a number of the electives listed below in conjunction with courses in the other concentrations that address their specific interests.

		Units
FEMST 166/ PHIL 184F/284F	Feminist Theories of Knowledge	4
PHIL 107/207	Plato's Metaphysics and Epistemology	4
PHIL 163/263	Significant Figures in Philosophy of Science	4
PHIL 263	Significant Figures in Philosophy of Science	4
PHIL 324	Kant's System of Nature and Freedom	4
PHIL 164/264	Central Topics in the Philosophy of Science: Theory and Evidence	4
PHIL 167A/267A	Philosophy of Biology	2-4
PHIL 167B/267B	Philosophy, Biology, and Behavior	4
PHIL 224	Kant's Philosophy of Physical Science	2-4
PHIL 224A	Mathematics in Kant's Philosophy	4
PHIL 348	Evolution of Signals	2-4
PHIL 360	Core Seminar in Philosophy of Science	4
PHIL 365	Seminar in Philosophy of Science: Time	4
PHIL 165	Philosophy of Physics	4
PHIL 227B	Kant's Anthropology and Philosophy of History	4
PHIL 264	Central Topics in the Philosophy of Science: Theory and Evidence	4
PHIL 265	Philosophy of Physics	4
PHIL 265C	Philosophy of Physics: Probability and Relativity	4
PHIL 267A	Philosophy of Biology	2-4

Advanced Course Sequences

Contemporary Perspectives on Science, Medicine and Technology

The following courses focus on contemporary cultural and social science approaches to science, technology, and medicine.

		Units
HPS 199	Directed Reading	1-15

Graduate Degrees

Graduate students in the Program in History and Philosophy of Science can pursue a Ph.D. either in History, through its Ph.D. concentration in History of Science, Medicine, and Technology, or in Philosophy, through its Ph.D. subplan in History and Philosophy of Science. Diplomas will be issued by the respective departments, but the HPS study will not be noted on the transcript nor on the diploma. Ph.D. students completing the requirements of the HPS program will receive a certificate issued by the Program.

Graduate students in the Program in History and Philosophy of Science that wish to pursue a Ph.D. in Philosophy must fulfill Departmental degree requirements (<http://www.stanford.edu/dept/registrar/bulletin/6568.htm>) and the following requirements:

1. HPS colloquium series attendance
2. One of the following graduate level Philosophy of Science courses: 263, 264, 264A, or 266
3. One elective seminar in the history of science
4. One elective seminar (in addition to the course satisfying requirement 2) in philosophy of science

Philosophy Ph.D. students declaring the HPS subplan in Aclass will have it appear on the official transcript but is not printed on the diploma.

The Program in History and Philosophy of Science degree requirements for the Ph.D. in History of Science, Medicine and Technology, in addition to the general History Department Ph.D. degree requirements (<http://www.stanford.edu/dept/registrar/bulletin/7084.htm>), are:

1. HPS colloquium series attendance
2. the History Department core seminar in History of Science, Medicine and Technology
3. Four other courses in the history of science, technology and/or medicine
4. One course in the philosophy of science
5. Four additional courses in a given geographical or national field of research, one of which must be a core course

The courses described above must include two research seminars, at least one of which must be in the history of science, technology and/or medicine. Students are expected to write papers on substantially different topics for each seminar. You should also aim to present your research at the annual meeting of a professional society associated with the history of science, technology and/or medicine sometime during your third or fourth year. For more information, see the program's (<http://HPST.stanford.edu/grad.html>) web site.

Course Sequences

See the Bachelors tab for all History and Philosophy of Science courses offered in 2012-2013.

Co-chairs: Paula Findlen (History), Michael Friedman (Philosophy)

Committee-in-Charge: Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History), Jessica Riskin (History), Thomas Ryckman (Philosophy)

Program Committee: Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Tom Mullaney (History),

Reviel Netz (Classics), Robert Proctor (History), Jessica Riskin (History), Thomas Ryckman (Philosophy), Londa Schiebinger (History)

Professors: Keith Baker (History), Paula Findlen (History), Michael Friedman (Philosophy), David Holloway (History, Institute for International Studies, Political Science), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History), Londa Schiebinger (History), Richard White (History), Caroline Winterer (History)

Associate Professors: Thomas Mullaney (History), Jessica Riskin (History), Fred Turner (Communication), Sarah Jain (Anthropology), Priya Satia (History)

Professor (Teaching): Thomas Ryckman (Philosophy)

Professor (Research): Rega Wood (Philosophy, emerita)

Lecturer: Margo Horn

Other Affiliation: Henry Lowood (Stanford University Libraries), Larry Lagerstrom (UAR)

Visiting Scholar: Adrienne Mayor (Classics)

Overseas Studies Courses in History and Philosophy of Science

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/hps/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/hps/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/hps/http://bosp.stanford.edu>).

Units

OSPFLOR 44 The Revolution in Science: Galileo and the Birth of Modern Scientific Thought 5

History

Courses offered by the Department of History are listed under the subject code HISTORY on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=HISTORY&filter-catalognumber-HISTORY=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=HISTORY&filter-catalognumber-HISTORY=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=HISTORY&filter-catalognumber-HISTORY=on>).

Mission of the Department of History

History courses teach the analytical, interpretive, and writing knowledge and skills necessary for understanding the connections between past and present. History is a pragmatic discipline in which the analysis of change

over time involves sifting the influences and perspectives that affect the course of events, and evaluating the different forms of evidence historians exploit to make sense of them. Teaching students how to weigh these sources and convert the findings into persuasive analysis lies at the heart of the department's teaching. Graduates with a History major pursue careers and graduate study in law, public service, business, writing, education, and journalism.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of what it means to think historically: locating subjects in time and place and being sensitive to the contingencies of context and to change over time.
2. critical and interpretive thinking skills using course's primary source materials.
3. the ability to identify different types of sources of historical knowledge.
4. analytical writing skills and close reading skills.
5. effective oral communication skills

Degrees Offered

The Department of History offers the following degree programs: Bachelor of Arts, coterminal Bachelor of Arts and Master of Arts, Master of Arts, and Doctor of Philosophy.

Graduate Programs in History

The primary goal of the Stanford Department of History's graduate program is the training of scholars. Most students who receive doctorates in the program go on to teach at colleges or universities. Other students have obtained positions in university administration and research.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in History and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in History. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of History and to interpret and present the results of such research.

Bachelor of Arts in History

Prerequisites for the Major

Before declaring the History major, students must take one lecture course. They must take a second lecture course within one year of declaring. Fulfilling this requirement are courses numbered HISTORY 101-199.

The choices for 2012-13 are:

		Units
HISTORY 102	The History of the International System since 1914	5
HISTORY 103D	Human Society and Environmental Change	4
HISTORY 103E	History of Nuclear Weapons	5
HISTORY 103F	Introduction to Military History	5
HISTORY 105C	Human Trafficking: Historical, Legal, and Medical Perspectives	5
HISTORY 106A	Global Human Geography: Asia and Africa	5
HISTORY 107C	Social Democracy from Marx to Gross National Happiness	5
HISTORY 108B	The Great Divergence: Latin American and East Asian Historical Development	5
HISTORY 110A	Europe from Late Antiquity to 1500	5
HISTORY 110B	From Renaissance to Revolution: Early Modern Europe	5
HISTORY 110C	Introduction to Modern Europe	5
HISTORY 120A	The Russian Empire, 1450-1796	5
HISTORY 130A	The Rise of Scientific Medicine in the United States, 1825-Present	5
HISTORY 132A	Enlightenment and the Arts	5
HISTORY 133A	Blood and Roses: The Age of the Tudors	5
HISTORY 133B	Revolutionary England: The Stuart Age	5
HISTORY 139	Modern Britain and the British Empire	5
HISTORY 140	World History of Science	5
HISTORY 140A	The Scientific Revolution	5
HISTORY 142	Darwin in the History of Life	5
HISTORY 144	History of Women and Gender in Science, Medicine and Engineering	5
HISTORY 145B	Africa in the 20th Century	5
HISTORY 147	History of South Africa	5
HISTORY 150A	Colonial and Revolutionary America	5
HISTORY 150B	19th-Century America	5
HISTORY 150C	The United States in the Twentieth Century	5
HISTORY 161	Women in Modern America	4-5
HISTORY 166	Introduction to African American History: The Modern African American Freedom Struggle	3-5
HISTORY 166B	Immigration Debates in America, Past and Present	3-5
HISTORY 168	American History in Film: Since World War II	3-4
HISTORY 169	The Environmental History of North America	4-5
HISTORY 170B	Culture, Society and Politics in Latin America	5
HISTORY 175B	Transnational Latin American Migration to the United States	5
HISTORY 181B	Formation of the Contemporary Middle East	5
HISTORY 182C	The Making of the Islamic World, 600-1500	5
HISTORY 187	The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan	5
HISTORY 191C	Early Imperial China	5
HISTORY 193	Late Imperial China	5
HISTORY 194D	Japan and the World, 1543-1868	4-5
HISTORY 195	Modern Korean History	5
HISTORY 195C	Modern Japanese History: From Samurai to Pokemon	5
HISTORY 196	Worlds of Gandhi	5
HISTORY 198	The History of Modern China	5

Bachelor of Arts Requirements

Completion of the major requires planning. History majors should plan to meet with their faculty advisers twice yearly, once in the Autumn and once

in the Winter or Spring quarters. These meetings should take place within the first three weeks of the quarter, before the final study list deadline.

History majors are required to complete of a minimum of 63 units and at least 13 courses of at least 3 units each, to include:

		Units
1. One Sources and Methods Seminar (HISTORY 1S-99S) (5)	¹	5
Sources and Methods courses offered this year are:		
HISTORY 14S	Voices from Below: Commoners in Medieval and Early Modern Europe "In Their Own Words"	
HISTORY 16S	Inquisition: Faith and Identity in the Pre-Modern World	
HISTORY 23S	Onion Domes and Dirt Streets: Cities in Early Modern and Imperial Russia	
HISTORY 59S	The Digital Historian's Toolkit: Studying the West in an Age of Big Data	
HISTORY 63S	From Hysteria to Prozac: Diagnosing Bodies, Minds, and Cultures in 20th Century America	
HISTORY 79S	From Coffee to Cocaine: Commodities, Society, and Environment in Modern South America	
HISTORY 96S	City Between Empires: Nationalism, Colonialism, and Identity in Hong Kong 1841-1997	
HISTORY 97S	Urbicide: Air Raids and the Destruction of Urban Space during World War II	
HISTORY 98S	Forbidden Desires in China From Daoist Devotees to Dr. Sex	
2. Two 200-level undergraduate colloquia (HISTORY 200-298) (10)	²	10
3. At least one other small group course (5)		5
To be chosen among the department's undergraduate colloquia, research seminars, or Stanford Introductory Seminars		
4. Two lecture courses (10)	³	10
One of which must be either		
A Europe survey course such as:		
HISTORY 110A	Europe from Late Antiquity to 1500	
HISTORY 110B	From Renaissance to Revolution: Early Modern Europe	
HISTORY 110C	Introduction to Modern Europe	
Or, or a United States survey course such as:		
HISTORY 150A	Colonial and Revolutionary America	
HISTORY 150B	19th-Century America	
HISTORY 150C	The United States in the Twentieth Century	
The second must be a lecture course in African, Asian, Middle East, or Latin American History.		
5. Completion of the Writing in the Major (WIM) requirement (5)	⁴	5
HISTORY 209S	Research Seminar for Majors	5
6. At least 6 additional courses to total a minimum of 63 units. (28)		28
Total Units		63

- 1 Students must complete the Sources and Methods Seminar requirement prior to enrolling in the Research Seminar for Majors.
- 2 ExploreCourses lists all colloquia offered this year (<https://explorecourses.stanford.edu/search?q=HISTORY&view=catalog&page=0&catalog=72&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-component-COL=on&filter-academiclevel-UG=on&filter-coursestatus-Active=on&collapse=%2C6%2C7%2C&filter-catalognumber-HISTORY=on&filter-catalognumber-HISTORY=on>).
- 3 Students may count courses they took as prerequisites to the major for this requirement.
- 4 In completing this course, students must write a 20-25 page essay based on original research and including at least two drafts. HISTORY 209S Research Seminar for Majors may be taken in either the junior or the senior year. Students must complete the Sources and Methods seminar before enrolling in the Research Seminar.

Additional Requirements

1. Courses comprising the 63 units must be taken for a letter grade, and the student must maintain a grade point average (GPA) in History courses of 2.0 or higher.
2. At least nine courses must be taken from within the Stanford Department of History. Transfer students and those who study abroad may be granted exemptions from this requirement at the discretion of the Director of Undergraduate Studies.
3. At least six quarters of enrollment in the major. Each candidate for the B.A. in History should declare the major by the Autumn Quarter of the third year of study or earlier, if possible.
4. One HISTORY 299S Undergraduate Directed Research and Writing taken for 3-5 units and for a letter grade may be applied toward the thirteen courses required for the B.A. in History.
5. *Capstone*: The History department organizes a series of luncheon workshops in May, at which students present their research essays and honors theses.
6. The department encourages students to acquire proficiency in foreign languages and study at one of Stanford's overseas programs. Such studies are not only valuable in themselves; they can provide an opportunity for independent research and a foundation for honors essays and graduate study.
7. Advanced Placement credits do not fulfill any major requirements.

For further information on History courses' satisfaction of major requirements, see the Department of History (<http://history.stanford.edu/programs/undergraduate>) web site.

Writing in the Major (WIM) Requirement

History's Writing in the Major requirement is satisfied by completing HISTORY 209S Research Seminar for Majors.

This course may be taken in either the junior or senior year, but not before completing the sources and methods seminar requirement. Students write a 20-25 page research essay. Original research and revision are important parts of the research essay. Students must conduct substantial research in the libraries and must submit at least two drafts (a rough draft and a final draft) of the essay. Any student wishing to write an honors thesis should take HISTORY 209S Research Seminar for Majors in the junior year and use it to begin work on the thesis; this work can take the place of a research essay.

HISTORY 209S Research Seminar for Majors fulfills the WIM requirement only. It does not fulfill geographical requirements or small group course requirements.

Students select their research topics based on the general topics of each quarter's offerings.

- HISTORY 209S Research Seminar for Majors
 - Autumn: Early American History, 1500-1820; Europe Since 1500
 - Winter: Science, Politics and Revolution: America and France in the 18th Century; The Idea of Politics
 - Spring: American Identities; Gender, Sexuality and Race; Early Modern European Travel Accounts

Honors Program

For a limited number of majors, the department offers a special program leading to Departmental Honors in History. Students accepted for this program, in addition to fulfilling the general requirements stated above, begin work on an essay in Spring Quarter of the junior year and complete the essay by mid-May of the senior year. In addition to HISTORY 299H Junior Honors Colloquium, students must enroll in 11-15 units of Senior Research in the senior year, to be distributed as best fits their specific project. For students in the Honors program, Senior Research units (HISTORY 299A Senior Research I, HISTORY 299B Senior Research II, HISTORY 299C Senior Research III) are taken in addition to the thirteen required courses in History.

To enter this program, the student must be accepted by a member of the department who agrees to advise the research and writing of the essay, and must complete the Junior Honors Colloquium (299H) offered in Winter Quarter. An exception to the latter requirement may be made for those studying overseas Winter Quarter of the junior year, but such students should consult with the director of the honors program, if possible, prior to going overseas. Students who study abroad for the entire junior year and want to write an honors thesis should plan to take the Research Seminar for Majors in the first quarter following completion of the study abroad program. Under exceptional circumstances, students are admitted to the program in Autumn Quarter of the senior year. Such students must not enroll in any HISTORY 299A Senior Research I, HISTORY 299B Senior Research II, HISTORY 299C Senior Research III, units until HISTORY 209S Research Seminar for Majors, has been completed.

In considering an applicant for such a project, the adviser and director of the honors program take into account general preparation in the field of the project and expect a GPA of at least 3.5 in the student's previous work in History and a 3.3 in overall University work. Students completing the thesis with a grade of 'B+' or higher are eligible for Departmental Honors in History. To enter the Honors program, apply at the Department of History office.

Outstanding Honors essays may be considered for the University's Robert M. Golden Medals, as well as for departmental James Birdsall Weter prizes.

Honors Program Requirements—To graduate with departmental honors in History, students must:

1. complete HISTORY 299H Junior Honors Colloquium in the junior year
2. maintain a GPA of at least 3.3 in overall University work and a 3.5 in the History major during the final 5 quarters of enrollment/thesis preparation, or obtain the consent of the Director of the Honors Program.
3. select both a primary thesis adviser (who is a member of the Stanford History faculty) and a secondary adviser (who is a Stanford University faculty member) no later than Autumn Quarter of the senior year
4. submit on May 13, 2013 by noon a 65-120 page honors thesis including bibliography that receives a grade of 'B+' or better
5. enroll in the 11-15 units of Senior Research as specified below

- participate in mandatory Honors Program activities throughout senior year (including, but not limited to, writing workshops and the annual Honors Day oral presentations) as specified in the Honors Program Handbook.

HISTORY 299A Senior Research I, HISTORY 299B Senior Research II, HISTORY 299C Senior Research III do not fulfill any history major requirements other than honors, but the units do count towards the 180 required for B.A. degree conferral.

Required Course—To be taken in the junior year:

HISTORY 299H Junior Honors Colloquium	Units 1
---------------------------------------	-------------------

Required Course—Recommended to be taken in junior year:

HISTORY 209S Research Seminar for Majors	Units 5
--	-------------------

An exception (for HISTORY 299H Junior Honors Colloquium) may be made for those studying overseas Winter Quarter of the junior year, but such students should consult with the Director of the Honors Program prior to going overseas.

To be taken in the senior year:

HISTORY 299A Senior Research I	Units 1-5
HISTORY 299B Senior Research II	1-5
HISTORY 299C Senior Research III	1-5

Overseas Studies or Study Abroad

Courses offered by Stanford's Bing Overseas Studies Program and appearing on the History department's cognate course list automatically receive credit towards the major or minor in History. Course work completed in non-Stanford Study Abroad programs is evaluated for major/minor credit by designated History department faculty on a case-by-case basis. Students in non-Stanford Study Abroad programs are advised to take classes with reading and writing components comparable to History department course loads.

History Fields of Study or Degree Options

The Department of History offers the following tracks to the B.A. in History. These tracks are not declared on Axxess; they do not appear on the transcript or on the diploma. The tracks are:

- General History
- Global Affairs and World History
- History, Literature, and the Arts
- History of Science and Medicine
- History and the Law
- Public History/Public Service

The General History track emphasizes breadth of study among historical areas and periods as well as concentration in one selected field. The Global Affairs and World History track emphasizes an understanding of today's world through a historical examination of its evolution, from the early modern to the contemporary era. The four tracks with interdisciplinary emphasis (History, Literature and the Arts; History of Science and Medicine; History and the Law; and Public History/Public Service) combine the study of history with the methods and approaches of other disciplines, and involve substantial course work outside of History.

General History Track

In addition to completing the requirements for all History majors, the student in the General History track is required to satisfy breadth and concentration requirements.

- Breadth Requirements:** to ensure chronological and geographical breadth, at least two courses must be completed in a premodern chronological period and in each of three geographical fields:
 - Field I (Africa, Asia, and Middle East)
 - Field II (the Americas)
 - Field III (Europe, including Western Europe, Eastern Europe, and Russia).
 - Courses fulfilling the premodern chronological period (Field IV) may also count for Fields I-III.
- Courses for 2012-13 follow below.
- Concentration:** to develop some measure of expertise, students must complete four courses in a single area (including one undergraduate colloquium or research seminar). The proposed concentration must be approved by the major adviser; a proposal for a thematic concentration must be approved by both the adviser and the department's director of undergraduate studies. Areas of concentration are:
 - Africa
 - Asia
 - Eastern Europe and Russia
 - Europe before 1700
 - Europe since 1700
 - Jewish History
 - Latin America
 - Science and Medicine
 - The United States
 - The Middle East
 - International History
 - Comparative Empires and Cultures
 - or a thematic subject treated comparatively, such as war and revolution, work, gender, family history, popular culture, or high culture.
- Required course:** HISTORY 102 The History of the International System since 1914. The History of the International System is a required course for students who select the International History concentration. This course is offered in Spring Quarter.

Field I: Africa/Asia/Middle East

	Units
HISTORY 45B Africa in the Twentieth Century	3
HISTORY 47 History of South Africa	3
HISTORY 48N African History through Literature and Film	3-4
HISTORY 48Q South Africa: Contested Transitions	3

HISTORY 291G	Pre-Modern Chinese Warfare	3-5

Global Affairs and World History Track

The Global Affairs and World History track is designed to offer an empirically rich curriculum for Stanford students interested in international affairs. The goal is to impart an understanding of today's world through a historical examination of its evolution, from the early modern to the contemporary era. This track appeals to students who are aiming for a career in the international arena, and who seek to inform themselves about the complexities of cultural diversity and spatial differentiation on the ground. Deploying both connective and comparative modes of analysis, majors who choose this track will acquire a robust understanding of the relevance of the past to current events.

The Global Affairs and World History track features gateway courses in Global Human Geography, a recommended skills component, a geographical concentration, and a core cluster of global and comparative offerings. Students choosing this track also develop proficiency in a foreign language at the second-year level or above. Incorporating primary sources in a language other than English into the capstone seminar or honors thesis is encouraged.

Gateway Courses (two courses): All students in Global Affairs and World History complete the two quarter Global Human Geography sequence. HISTORY 106A Global Human Geography: Asia and Africa is offered in Spring Quarter 2012-13. HISTORY 106B is not offered in 2012-13.

Geographical Cluster (four courses): Students select four History courses in one geographic area, such as Europe, Latin America, Asia, Middle East, or Africa. The faculty coordinator must preapprove all courses in this cluster.

Global and Comparative Courses (Methodological Cluster) (six courses): Majors selecting this track take at least 6 thematic history courses of global scope. Courses offered in 2012-13 are:

		Units
HISTORY 4N	A World History of Genocide	3-5
HISTORY 5C	Human Trafficking: Historical, Legal, and Medical Perspectives	3
HISTORY 10N	Thinking About War	3
HISTORY 39	Modern Britain and the British Empire	3
HISTORY 40	World History of Science	3
HISTORY 40A	The Scientific Revolution	3
HISTORY 42	Darwin in the History of Life	3
HISTORY 44	History of Women and Gender in Science, Medicine, and Engineering	3
HISTORY 44Q	Gendered Innovations in Science, Medicine, and Engineering	4-5
HISTORY 79S	From Coffee to Cocaine: Commodities, Society, and Environment in Modern South America	5
HISTORY 81B	Formation of the Contemporary Middle East	3
HISTORY 82C	The Making of the Islamic World, 600-1500	3
HISTORY 82N	Modern Islamic Movements	3
HISTORY 84N	The American Empire in the Middle East since the Cold War: Afghanistan, Iraq, and Israel/Palestine	4-5

HISTORY 202C	Heretics to Headscarves	5
HISTORY 202E	The Great War	4-5
HISTORY 203E	Global Catholicism	5
HISTORY 204E	Totalitarianism	4-5
HISTORY 204F	The Modern Tradition of Non-Violent Resistance	5
HISTORY 204G	War and Society	5
HISTORY 205A	The History of Information	4-5
HISTORY 205C	Capitalism and Its Discontents: From Adam Smith to Adbusters	4-5
HISTORY 206	History and Geography of Contemporary Global Issues	5
HISTORY 207C	The Global Early Modern	4-5
HISTORY 208A	Science and Law in History	4-5
HISTORY 208D	Pre-Modern Warfare	3-5
HISTORY 209C	Liberalism and Violence	5
HISTORY 224C	Genocide and Humanitarian Intervention	3
HISTORY 230E	Republic of Letters: Knowledge and Community, 1300-1800	4
HISTORY 230K	Left, Right, and the Intellectual Life: Politics and Intellectuals in the Short Twentieth Century	5
HISTORY 239D	Capital and Empire	4-5
HISTORY 243C	Colonial Science and Medicine	4-5
HISTORY 243G	Tobacco and Health in World History	4-5
HISTORY 246C	Islam and Christianity in Africa	4-5
HISTORY 248S	African Societies and Colonial States, Part 1	4-5
HISTORY 252K	America as a World Power: U.S. Foreign Relations, 1914 to Present	5
HISTORY 256	U.S.-China Relations: From the Opium War to Tiananmen	4-5
HISTORY 266C	The Cold War: An International History	5
HISTORY 282E	Jews, Christians and Muslims in the Ottoman World	4-5
HISTORY 284	The Ottoman Empire, 1300-1923	4-5

HISTORY 289	The Indian Ocean World: Winds, Merchants & Empires	4-5
HISTORY 290E	Movies and Empire in East Asia	5
HISTORY 291D	Colonialism and Collaboration in East Asia	5
HISTORY 291E	Maps, Borders, and Conflict in East Asia	4-5
HISTORY 292D	Japan in Asia, Asia in Japan	4-5
HISTORY 293B	Homosexuality in Historical and Comparative Perspective	4-5
HISTORY 293D	Global Intellectual History	4-5

Proficiency in a foreign language: Students electing the Global Affairs and World History track must acquire proficiency in a foreign language through two years of college-level course work (second-year, third-quarter) or by passing a proficiency exam. Language courses do not count toward the 13 required courses in the major; students may, however, find it appealing to pair this track in the History major with a foreign language minor.

Skills Training: Students in the Global Affairs and World History track are encouraged to acquire technical proficiencies relevant for geo-historical analysis and fieldwork abroad. Please see the Undergraduate Student Services Officer for further information on these courses.

Those planning to pursue research overseas are also advised to enroll in the one-credit workshop, HISTORY 299X Preparing for International Field Work: Public Service or Research in Spring Quarter.

Overseas Study Experience: Students electing this track are encouraged to study abroad, with a Stanford BOSP program or another program approved by the directors of the track. Course work taken overseas may be accepted for credit in the track on a case by case basis, in consultation with a faculty coordinator.

Research Seminar for Majors: HISTORY 209S Research Seminar for Majors fulfills Writing in the Major requirement.

General Requirements:

As for all History majors, students in this track must complete two lecture courses (one Europe or U.S., and one Africa, Asia, Middle East, or Latin America), two 200-level courses, a Sources and Methods seminar, and HISTORY 209S Research Seminar for Majors.

History Tracks with Interdisciplinary Emphasis (HMIE)

There are four History Tracks with Interdisciplinary Emphasis:

- History, Literature and the Arts
- History of Science and Medicine
- History and the Law
- Public History/Public Service

These tracks are designed for students who are interested in other disciplines who want to focus on the historical aspects of the subject matter covered by that discipline, who want to understand how interdisciplinary approaches can deepen their understanding of history, or who are primarily interested in developing interdisciplinary approaches to historical scholarship by combining the careful attention to evidence and context that motivates historical research with the analytic and methodological tools of science and the humanities. In pursuing the above requirements for all History majors, students in HMIE are required to complete their thirteen courses for the major as follows:

Gateway Course (one course): Students are required to take the appropriate gateway course for their interdisciplinary track. This course introduces students to the application of particular interdisciplinary methods to the study of history. See the section on each HMIE for the gateway course appropriate to that major track. *Note:* The History and the Law track has no gateway course requirement.

Methodological Cluster (three courses): This cluster is designed to acquaint students with the ways in which interdisciplinary methods are

employed in historical scholarship, by practicing historians and scholars in other disciplines whose work is historical. This program of study must provide methodological coherence and must be approved in advanced by the student’s adviser. See the section on each HMIE for the appropriate historical methods courses. (Note: The History and the Law track requires four methodology courses.)

Geographic Cluster (four courses): History is embedded in time and place. This cluster is designed to emphasize that the purpose of studying methodology is to more fully understand the history of a particular region of the world. Students select a particular geographic region, as specified in the History major, and complete four courses in that area.

Interdisciplinary Cluster (four courses): These courses, taken outside the Department of History, acquaint students with the methods and approaches of another discipline appropriate for the interdisciplinary study of history. This program of study must provide methodological coherence and must be approved in advance by the student’s adviser. See the section on each HMIE for appropriate interdisciplinary courses.

Research Seminar for Majors: HISTORY 209S Research Seminar for Majors fulfills Writing in the Major Requirement.

HMIE tracks do not mandate the breadth or concentration requirements of the General History track. IHUM courses taught by History faculty may apply to HMIE tracks only insofar as their content is specifically appropriate to the particular methodological or geographic cluster; IHUM courses are no longer offered.

History, Literature, and the Arts

The History, Literature, and the Arts (HLA) track is designed for the student who wishes to complement his or her work in History with study in literature, particularly in a foreign language. For the purposes of this major, literature is defined broadly, including art, drama, films and poetry, memoirs and autobiography, novels, as well as canonical works of philosophy and political science. It appeals to students who are interested in studying literature primarily in its historical context, or who want to focus on both the literature and history of a specific geographical area while also learning the language of that area.

Gateway Course: HISTORY 132A Enlightenment and the Arts gives students a broad introduction to the study of literary texts in history.

Methodological Cluster: This three-course cluster teaches students how historians, in particular, analyze literary texts as documentary sources. Students choose three courses from among the pre-approved HLA methodology curriculum. These courses need not be in the student’s geographic concentration. For 2012-13, these courses are:

		Units
HISTORY 17N	Intimacy, Secrets and the Past: Biography in History and Fiction	3-4
HISTORY 30Q	English Society Through Fiction	4
HISTORY 32A	Enlightenment and the Arts	3
HISTORY 36N	Gay Autobiography	4
HISTORY 48N	African History through Literature and Film	3-4
HISTORY 50A	Colonial and Revolutionary America	3
HISTORY 54N	African American Women’s Lives	3-4
HISTORY 87	The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan	3
HISTORY 93	Late Imperial China	3
HISTORY 98S	Forbidden Desires in China From Daoist Devotees to Dr. Sex	5
HISTORY 132A	Enlightenment and the Arts	5
HISTORY 150A	Colonial and Revolutionary America	5
HISTORY 187	The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan	5
HISTORY 193	Late Imperial China	5

			Units
HISTORY 215K	The Crusades: A Cultural History	5	
HISTORY 230C	Paris: Capital of the Modern World	4-5	
HISTORY 230E	Republic of Letters: Knowledge and Community, 1300-1800	4	
HISTORY 230K	Left, Right, and the Intellectual Life: Politics and Intellectuals in the Short Twentieth Century	5	
HISTORY 232E	Machiavelli	4-5	
HISTORY 233A	Age of Light or Times of Crisis? Euro Intellectual History fr Sci Rev to Romanticism	4-5	
HISTORY 233E	European Intellectual History: The Age of Grand Ideologies	4-5	
HISTORY 234	Enlightenment Seminar	3-5	
HISTORY 251C	The American Enlightenment	5	
HISTORY 254	Popular Culture and American Nature	5	
HISTORY 255D	Racial Identity in the American Imagination	4-5	
HISTORY 263G	History Through a Life: The Allure of American Biography	4-5	
HISTORY 267	Religion in Twentieth Century American Life	5	
HISTORY 287D	Tel Aviv: Site, Symbol, City	4-5	
HISTORY 287E	Jewish Intellectuals and the Crisis of Modernity	4-5	
HISTORY 290E	Movies and Empire in East Asia	5	
HISTORY 291K	Speaking Through Objects: Material Culture in Late Imperial China, 1550-1820	5	
HISTORY 293D	Global Intellectual History	4-5	
HISTORY 5C	Human Trafficking: Historical, Legal, and Medical Perspectives	3	
HISTORY 40	World History of Science	3	
HISTORY 40A	The Scientific Revolution	3	
HISTORY 41Q	Mad Women: Women and Mental Illness in U.S. History	3	
HISTORY 42	Darwin in the History of Life	3	
HISTORY 44	History of Women and Gender in Science, Medicine, and Engineering	3	
HISTORY 44Q	Gendered Innovations in Science, Medicine, and Engineering	4-5	
HISTORY 63S	From Hysteria to Prozac: Diagnosing Bodies, Minds, and Cultures in 20th Century America	5	
HISTORY 105C	Human Trafficking: Historical, Legal, and Medical Perspectives	5	
HISTORY 130A	The Rise of Scientific Medicine in the United States, 1825-Present	5	
HISTORY 140	World History of Science	5	
HISTORY 140A	The Scientific Revolution	5	
HISTORY 142	Darwin in the History of Life	5	
HISTORY 144	History of Women and Gender in Science, Medicine and Engineering	5	
HISTORY 169	The Environmental History of North America	4-5	
HISTORY 205A	The History of Information	4-5	
HISTORY 208A	Science and Law in History	4-5	
HISTORY 242A	What is Life? The History of a Question	4-5	
HISTORY 243C	Colonial Science and Medicine	4-5	
HISTORY 243G	Tobacco and Health in World History	4-5	
HISTORY 245E	Health and Society in Africa	4-5	
HISTORY 260E	Environmental Policy and the City in U.S. History	5	
HISTORY 264G	The Social History of Mental Illness in the United States	5	

Note: HISTORY 187 The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan and HISTORY 193 Late Imperial China are non-Western lectures that students in the the History, Literature, and the Arts (HLA) track can use towards both an HLA methodology course and as the non-Western lecture requirement.

Geographical Cluster: Students select four History courses in one geographic area. These are: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East, or Africa. These four courses must be taken in addition to the three methodological courses required above.

Interdisciplinary Cluster: Four courses, taken outside the Department of History, must address the literature and arts, broadly defined, of the area chosen for the geographic concentration. The student's adviser must pre-approve all courses in this cluster; these courses may not be double-counted towards a minor or major other than History.

Research Seminar for Majors: HISTORY 209S Research Seminar for Majors fulfills Writing in the Major requirement.

General Requirements: Like all History majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or U.S., one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources and Methods seminar, and a Research Seminar for Majors.

History of Science and Medicine

The History of Science and Medicine (HS&M) track is a collaborative program of the Department of History and the Program in the History and Philosophy of Science. The major is designed for students interested in both sciences and humanities, and in the interactions between the two. It is also especially useful for students contemplating medical school, since it allows them to study the history of medicine, biology, and allied sciences in conjunction with fulfilling the premed science requirements.

Gateway Course (one course): HISTORY 140A The Scientific Revolution

Methodological Cluster (three courses): These History courses focus on the history of science and medicine. For 2012-13, these courses are:

Geographical Cluster (four courses): Students select four History courses in one geographic area. Examples include: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East, or Africa. These four courses must be taken in addition to the three methodological cluster courses. Courses in the history of science, technology, and medicine that have a geographic focus may be used to fulfill this requirement, but cannot be double-counted in the methodological cluster.

Interdisciplinary Cluster (four courses): Students select four courses in scientific disciplines and/or in philosophy of science, anthropology of science, or sociology of science. These courses require faculty adviser pre-approval.

Research Seminar for Majors: HISTORY 209S Research Seminar for Majors fulfills the Writing in the Major requirement.

General Requirements: As with all History majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or U.S., one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources and Methods seminar, and a Research Seminar for Majors.

History and Law

The History and Law (HL) interdisciplinary track is for students who want to explore the intersections between historical and legal studies. The HL curriculum focuses on the role of legal institutions, policies, and structures in various societies. HL track majors enroll in at least four History department courses that focus on issues of law in civil societies and four courses that provide a geographic concentration. In addition, students enroll in four courses outside History that provide disciplinary or

interdisciplinary perspectives on the role of law in shaping societies and a Research Seminar for Majors.

Gateway Course: There is no gateway course for this track. Instead, students take an extra course in the Methodological cluster.

Methodological Cluster (four courses): Students enroll in at least four History department courses, including courses outside History taught by faculty affiliated with the department, that focus on how law, policies, constitutions, and legal structures affect the development of various societies. *Note:* The Methodological Cluster for this HIP contains one extra course since there is no Gateway course.

For 2012-13, these courses are:

		Units
HISTORY 5C	Human Trafficking: Historical, Legal, and Medical Perspectives	3
HISTORY 16S	Inquisition: Faith and Identity in the Pre-Modern World	5
HISTORY 87	The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan	3
HISTORY 105C	Human Trafficking: Historical, Legal, and Medical Perspectives	5
HISTORY 166B	Immigration Debates in America, Past and Present	3-5
HISTORY 187	The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan	5
HISTORY 201A	The Global Drug Wars	4-5
HISTORY 202C	Heretics to Headscarves	5
HISTORY 208A	Science and Law in History	4-5
HISTORY 243G	Tobacco and Health in World History	4-5
HISTORY 245G	Law and Colonialism in Africa	3-5
HISTORY 258	Topics in the History of Sexuality: Sexual Violence	4-5
HISTORY 293B	Homosexuality in Historical and Comparative Perspective	4-5
HISTORY 307A	Legal History Workshop	4-5
HISTORY 352B	History of American Law	5

Note: HISTORY 187 The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan is a non-Western lecture that students in the History and Law track can use towards both a Law methodology course and as the non-Western lecture requirement.

Geographical Cluster: Students select four History courses in one geographic area. These are: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East, or Africa. These four courses must be taken in addition to the three methodological courses required above.

Interdisciplinary Cluster (four courses): Students may select from courses offered in the School of Law, School of Education, and others as appropriate. *Note:* Courses in the School of Law and School of Education require the permission of the instructor before undergraduate students can enroll, since these are graduate-level courses.

Research Seminar for Majors: HISTORY 209S Research Seminar for Majors fulfills the Writing in the Major requirement.

General Requirements: Like all history majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or U.S., one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources and Methods seminar, and a Research Seminar for Majors.

Public History/Public Service

The Public History/Public Service (PH/PS) interdisciplinary history track is designed for students who wish to include in their course of studies the application of historical study in (1) public settings such as museums and heritage sites, national and state parks, public agencies, and private

foundations, and (2) public service settings in non-profit organizations, public agencies, and educational institutions.

PH/PS majors enroll in a gateway course on public history and public service and in four History department courses that provide a geographic concentration as well as completing a two-course methodological requirement. In addition, students, in consultation with the PH/PS faculty coordinator, complete four courses from outside the History department drawn from the annual listing of service-learning courses provided by the Haas Center for Public Service; these courses provide interdisciplinary and methodological perspectives on public service. PH/PS majors must also complete an internship through a regularly offered service-learning course or through a summer internship or fellowship.

Gateway Course (one course): HISTORY 201 Introduction to Public History in the U.S., 19th Century to the Present, provides grounding in the theory and practice of public service and exposure to the types of public history practiced in venues such as museums, historical sites, parks, and non-profit organizations, including local historical societies.

Geographical Cluster (four courses): Students select four History courses in one geographic area, such as the United States, Europe, Latin America, Asia, Middle East, or Africa. The faculty coordinator must preapprove all courses in this cluster.

Interdisciplinary Cluster (four courses): Students select four courses from outside the History department drawn from the annual listing of service-learning and theory/practice courses provided by the Haas Center for Public Service. The faculty coordinator must preapprove all courses in this cluster.

Methodological Cluster (two courses): Students must enroll in one Sources and Methods seminar course and one additional 200-level History course. The Writing in the Major (WIM) requirement must be completed in a Research Seminar for Majors.

Public Service/Service Learning Internship (one course): Students must engage in at least a one quarter internship through a service learning course or through a full-time public service or public history summer internship or fellowship. This internship must be preapproved by the faculty coordinator.

Students who complete a paid summer internship in lieu of one for academic credit have two options: they can complete an additional history course, or they can enroll in 3 units of HISTORY 299S Undergraduate Directed Research and Writing with the faculty coordinator of the PH/PS track and write a 20-page research paper related to their internship work. This research paper is in addition to that required for the Research Seminar for Majors.)

The following History service-learning courses are offered in 2012-13:

		Units
HISTORY 5C	Human Trafficking: Historical, Legal, and Medical Perspectives	3
HISTORY 105C	Human Trafficking: Historical, Legal, and Medical Perspectives	5
HISTORY 166B	Immigration Debates in America, Past and Present	3-5
HISTORY 201	Introduction to Public History in the U.S., 19th Century to the Present	4-5
HISTORY 201A	The Global Drug Wars	4-5
HISTORY 260	California's Minority-Majority Cities	4-5

If students elect to fulfill the internship requirement through a History Department service-learning course, they must enroll in an additional course in either the geographical cluster or the Interdisciplinary cluster in order to complete the 13 courses required for the major.

Research Seminar for Majors: HISTORY 209S Research Seminar for Majors fulfills Writing in the Major requirement.

General Requirements: As with all history majors, students in History Interdisciplinary Programs must complete two lecture courses (one Europe or US, one Africa, Asia, Middle East or Latin America), two 200-level courses, a Sources and Methods seminar, and a Research Seminar for Majors.

History Secondary Teacher's Credential

Applicants for the Single Subject Teaching Credential (Secondary) in the social studies may obtain information regarding this program from the Credential Administrator, School of Education.

Minor in History

Students must declare the minor in History no later than Autumn Quarter of the senior year via Axess. Minor declarations are approved by the Department of History and confirmation is sent via email to the student.

Candidates for the minor in History must complete six courses, at least three of which must have a field or thematic focus. Students completing the minor may choose to concentrate in such fields as African, American, Asian, British, European (medieval, early modern, or modern), Russian and East European history, comparative empires and cultures, or such thematic topics as the history of gender, the family, religion, technology, or revolution. Students may also petition to have a concentration of their own design count toward the minor.

Degree Requirements

All six courses must be of at least 3 units each and must be taken for a letter grade. The student must maintain a grade point average (GPA) in History courses of 2.0 (C) or higher. Two of the six courses must be small-group in format (Stanford Introductory Seminars, Sources and Methods Seminars, departmental colloquia, and research seminars). History courses taken at Stanford overseas campuses may count toward the minor, but at least three of the six courses must be taken from Stanford History faculty.

Advanced Placement credits do not fulfill any minor requirements.

Optional Courses for the Minor

History courses taken at non-Stanford Study Abroad programs may count toward the minor (provided the History Department approves them), but at least three of the six courses must be taken from Stanford History faculty. One course from certain Introduction to the Humanities courses and Thinking Matters courses (those taught by History faculty) may count toward the six-course requirement, but not for the three-course field of concentration. One Undergraduate Directed Research and Writing (HISTORY 299S) course may count toward the minor, if taken for 3-5 units and for a letter grade. A maximum of three transfer courses may be used toward the minor.

Coterminal B.A. and M.A. Program in History

The department each year admits a limited number of undergraduates for coterminal B.A. and M.A. degrees in History. Coterminal applications are accepted during Autumn Quarter for admission in Spring Quarter; check with the History office for the application deadline. Applicants are responsible for checking their compliance with University coterminal requirements listed in the "Coterminal Bachelor's and Master's Degrees (p. 36)" section of this bulletin.

Admission

Applicants must meet the same general standards as those seeking admission to the M.A. program; they must submit a written statement of purpose, a transcript, GRE test scores, and three letters of recommendation, at least two of which should be from members of the Department of

History faculty. To be competitive, coterminal applicants should have a 3.75 GPA in their undergraduate history major (or equivalent if they are entering without a History major.) The decision on admission rests with the department faculty upon recommendation by the Graduate Admissions Committee. Students must meet all requirements for both degrees. They must complete 15 full-time quarters (or the equivalent), or three full-time quarters after completing 180 units, for a total of 225 units. During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three courses that fall within a single Ph.D. field.

The application filing deadline is December 4, 2012.

The coterminal B.A. and M.A. program is not declarable on Axess.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (p. 36)" section of this bulletin. For University coterminal degree program rules and University application forms, see the Publications and Online Guides (<http://studentaffairs.stanford.edu/registrar/publications/#Coterm>) web site.

Master of Arts in History

University requirements for the M.A. are described in the "Graduate Degrees (p. 38)" section of this bulletin.

The department requires the completion of nine courses (totaling not less than 45 units) of graduate work; seven courses of this work must be Department of History courses. Of the seven, one must be a seminar and four must be either graduate colloquia or graduate seminars. Directed reading may be counted for a maximum of 10 units. A candidate whose undergraduate training in history is deemed inadequate must complete nine courses of graduate work in the department. The department does not recognize for credit toward the M.A. degree any work that has not received the grade of 'A' or 'B.'

Terminal M.A. Program

Applicants who do not wish to continue beyond the M.A. degree are admitted to this program at the discretion of the faculty in individual fields (U.S., modern Europe, and so on). Students admitted may not apply to enter the Ph.D. program in History during the course of work for the M.A. degree.

M.A. in Teaching (History)

The department cooperates with the School of Education in offering the Master of Arts in Teaching degree. For the general requirements, see the "School of Education (p.)" section of this bulletin. For certain additional requirements made by the Department of History, contact the department office. Candidates must possess a teaching credential or relevant teaching experience.

Admission

Applicants for admission to graduate work must take the General Test of the Graduate Record Examination. It may be taken at most American colleges and in nearly all foreign countries. For details, see the Graduate Admissions (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/history/http://gradadmissions.stanford.edu>) web site.

Students admitted to graduate standing do not automatically become candidates for a graduate degree. With the exception of students in the terminal M.A. program, they are admitted with the expectation that they will be working toward the Ph.D. degree and may become candidates to receive the M.A. degree after completing three quarters of work.

The application filing deadline is December 4, 2012.

Doctor of Philosophy in History

University requirements for the Ph.D. are described in the "Graduate Degrees (p. 38)" section of this bulletin.

Students planning to work for the doctorate in history should be familiar with the general degree requirements of the University outlined in the "Graduate Degrees (p. 38)" section of this bulletin. Those interested in applying for admission to the M.A. and Ph.D. programs should contact the graduate program coordinator in the History department. Online applications are available in September of the year prior to intended enrollment. The application filing deadline is December 4, 2012. Applicants must file a report of their general scores on the Graduate Record Examination and submit a writing sample of 10-25 pages on a historical topic. Successful applicants for the M.A. and Ph.D. programs may enter only in Autumn Quarter.

Upon enrollment in the graduate program in History, the student has a member of the department designated as an adviser with whom to plan the Ph.D. program. Much of the first two years of graduate study is spent taking courses, and, from the outset, the student should be aware that the ultimate objective is not merely the completion of courses but preparation for general examinations and for writing a dissertation.

Admission to the Department of History in the graduate division does not establish any rights respecting candidacy for an advanced degree. At the end of the first year of graduate study, students are evaluated by the faculty and given a progress report. A decision as to whether the student is admitted to candidacy for the Ph.D. is normally made by the start of the student's third year.

After the completion of certain further requirements, students must apply for acceptance for candidacy for the doctorate in the graduate division of the University.

Admission

Applicants for admission to graduate work must take the General Test of the Graduate Record Examination. It may be taken at most American colleges and in nearly all foreign countries. For details, see the Office of Graduate Admissions (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/history/http://gradadmissions.stanford.edu>) web site.

Students admitted to graduate standing do not automatically become candidates for a graduate degree. With the exception of students in the terminal M.A. program, they are admitted with the expectation that they will be working toward the Ph.D. degree and may become candidates to receive the M.A. degree after completing three quarters of work.

The application filing deadline is December 4, 2012. The Medieval Field will not be accepting applications for autumn quarter, 2013-2014.

Degree Requirements

Required Courses

	Units
For all first-year Ph.D. students (5-6)	
HISTORY 304 Approaches to History	4-5
HISTORY 305 Graduate Workshop in Teaching	1
For first-year and second-year Ph.D students in American History (24-30)	
HISTORY 351A Core in American History, Part I	4-5
HISTORY 351B Core in American History, Part II	4-5
HISTORY 351C Core in American History, Part III	4-5
HISTORY 351D Core in American History, Part IV	4-5

HISTORY 351E Core in American History, Part V	4-5
HISTORY 351F Core in American History, Part VI	4-5

Other Graduate Core Colloquia required for Ph.D. students studying in fields other than the above are listed in the Department of History's Graduate Handbook.

University Oral Examinations

The student is expected to take the University oral examination in the major concentration in the third graduate year.

Dissertation

The student must complete and submit a dissertation which is the result of independent work and is a contribution to knowledge. It should evidence the command of approved techniques of research, ability to organize findings, and competence in expression. For details and procedural information, inquire in the department.

Dissertation Committee

The reading committee consists of the principal dissertation adviser (first reader), and two additional members of the Department (second and third readers) agreed upon by the adviser and the student.

Financial Support

Students who are admitted with financial support are provided multiple years of support through fellowships, teaching and research assistantships, and tuition grants. Applicants should indicate on the admissions application whether they wish to be considered for such support. No separate application for financial aid is required.

U.S. citizens and permanent resident aliens who are interested in area language studies in East Asia, Africa, and the republics of the former Soviet Union may request a Foreign Language and Area Studies (FLAS) fellowship application from the FLAS coordinator of the respective programs offering the FLAS (CEAS, CAS, CREEES). The FLAS application deadlines are in January and February (CAS).

Resources

The degree requirements section relates to formal requirements, but the success of a student's graduate program depends in large part on the quality of the guidance received from faculty and on the library resources available. Prospective graduate applicants are advised to study the list of History faculty and the courses this faculty offers. As to library resources, no detailed statement is possible in this bulletin, but areas in which library resources are unusually strong are described following.

The University Library maintains strong general collections in almost all fields of history. It has a very large microtext collection, including, for instance, all items listed in Charles Evans' American Bibliography, and in the Short-Title Catalogues of English publications, 1474-1700, and virtually complete microfilmed documents of the Department of State to 1906. It also has a number of valuable special collections including the Borel Collection on the History of California; many rare items on early American and early modern European history; the Brasch Collection on Sir Isaac Newton and scientific thought during his time; the Gimon Collection on French political economy, and other such materials.

The rich collection of the Hoover Institution on the causes, conduct, and results of WW I and WW II are being augmented for the post-1945 period. The materials include government documents, newspaper and serial files, and organization and party publications (especially the British and German Socialist parties). There are also important manuscript collections, including unpublished records of the Paris Peace Conference of 1919 and the Herbert Hoover archives, which contain the records of the Commission for Relief in Belgium, the American Relief Administration, the various technical commissions established at the close of WW I for reconstruction in Central and Eastern Europe, the personal papers of Herbert Hoover as United States

Food Administrator, and other important personal papers. Other materials for the period since 1914 relate to revolutions and political ideologies of international importance; colonial and minority problems; propaganda and public opinion; military occupation; peace plans and movements; international relations; international organizations and administration including the publications of the United Nations, as well as principal international conferences. The Hoover Institution also possesses some of the richest collections available anywhere on the British labor movement; Eastern Europe, including the Soviet Union; East Asia (runs of important newspapers and serials and extensive documentary collections, especially for the period of WW II); and Africa since 1860, especially French-speaking Africa, the former British colonies, and South Africa.

Requirements

1. In consultation with the adviser, students select an area of study from the list below in which to concentrate their study and later take the University oral examination. The major concentrations are:
 - Europe, 300-1500
 - Europe, 1400-1800
 - Europe since 1700
 - Jewish History
 - Russia
 - Eastern Europe
 - Middle East and Central Asia
 - South Asia
 - East Asia before 1600
 - China since 1600
 - Japan since 1600
 - Korea since 1800
 - Africa
 - Britain and the British Empire since 1460
 - Latin America
 - The United States (including colonial America)
 - The History of Science and Medicine
 - Transnational, International, and Global
 2. The department seeks to provide a core colloquium in every major concentration. Students normally enroll in this colloquium during the first year of graduate study.
 3. Students are required to take two research seminars, at least one in the major concentration. Normally, research seminars are taken in the first and second years.
 4. Each student, in consultation with the adviser, defines a secondary concentration. This concentration should represent a total of four graduate courses or their equivalents, and it may be fulfilled by working in a historical concentration or an interdisciplinary concentration. The historical concentrations include:
 - A. One of the concentrations listed above (other than the student's major concentration).
 - B. One of the concentrations listed below, which falls largely outside the student's major concentration:
 - The Ancient Greek World
 - The Roman World
 - Europe, 300-1000
 - Europe, 1000-1400
 - Europe, 1400-1600
 - Europe, 1600-1789
 - Europe, 1700-1871
- Europe since 1848
 - England, 450-1460
 - Britain and the British Empire, 1460-1714
 - Britain and the British Empire since 1714
 - Russia to 1800
 - Russia since 1800
 - Eastern Europe to 1800
 - Eastern Europe since 1800
 - Jewish History
 - Middle East and Central Asia to 1800
 - Middle East and Central Asia since 1800
 - Africa
 - South Asia
 - China before 1600
 - China since 1600
 - Japan before 1600
 - Japan since 1600
 - Latin America to 1825
 - Latin America since 1810
 - The United States (including Colonial America) to 1865
 - The United States since 1850
 - The History of Science and Medicine
 - Transnational, International, and Global
- C. Work in a national history of sufficiently long time to span chronologically two or more major concentrations. For example, a student with Europe since 1700 as a major concentration may take France from 1000 to the present as a secondary concentration.
 - D. A comparative study of a substantial subject across countries or periods. The secondary concentration requirement may also be satisfied in an interdisciplinary concentration. Students plan these concentrations in consultation with their advisers. Interconcentrations require course work outside the Department of History which is related to the student's training as a historian. Interdisciplinary course work can either add to a student's technical competence or broaden his or her approach to the problems of the research concentration.
5. Each student, before conferral of the Ph.D., is required to satisfy the department's teaching requirement.
 6. There is no University or department foreign language requirement for the Ph.D. degree. A reading knowledge of one or more foreign languages is required in concentrations where appropriate. The faculty in the major concentration prescribes the necessary languages. In no concentration is a student required to take examinations in more than two foreign languages. Certification of competence in commonly taught languages (that is, French, German, Italian, Portuguese, Russian, and Spanish) for candidates seeking to fulfill the language requirement in this fashion is done by the appropriate language department of the University. Certification of competence in other languages is determined in a manner decided on by faculty in the major concentration. In either case, certification of language competence must be accomplished before a student takes the University oral examination.
 7. The student is expected to take the University oral examination in the major concentration in the third graduate year.

- The student must complete and submit a dissertation which is the result of independent work and is a contribution to knowledge. It should evidence the command of approved techniques of research, ability to organize findings, and competence in expression. For details and procedural information, inquire in the department.

Ph.D. in History and Humanities

The department of History participated in the Graduate Program in Humanities leading to a Ph.D. degree in History and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities; no new students are being accepted. The University remains committed to a broad-based graduate education in the humanities; the courses, colloquium, and symposium continue to be offered, and the Division of Literatures, Cultures, and Languages provides advising for students already enrolled who may contact DLCL Student Affairs at 650-724-1333 or dlcl@stanford.edu for further information. Courses are listed under the subject code HUMNTIES (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=HUMNTIES&filter-catalognumber-HUMNTIES=on>) and may be viewed on the Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=HUMNTIES&filter-catalognumber-HUMNTIES=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=HUMNTIES&filter-catalognumber-HUMNTIES=on>).

Ph.D. Minor in History

Students pursuing a Ph.D. other than in History may apply for the Ph.D. Minor in History. Ph.D. students cannot pursue a minor in their own program. The minimum University requirement for a Ph.D. minor is 20 units of History course work at the graduate level (courses numbered 300 and above) at Stanford. All units should be in a single field. Units taken for the minor can be counted as part of the overall requirement for the Ph.D. of 135 units taken at Stanford. Courses used for a minor may not be used to meet the requirements for a master's degree.

Degree Requirements

20 units of History course work at the graduate level (HISTORY 300-399W and 400-499X) at Stanford. All units should be in a single field.

Optional Courses for the Minor

A Ph.D. minor form outlining the program of study must be approved by the major and minor departments.

Emeriti: (Professors) Barton J. Bernstein, Carl N. Degler, Peter Duus, Terence Emmons, Harold L. Kahn, David M. Kennedy, George H. Knoles, Mark Mancall, Peter Paret, Paul A. Robinson, Paul Seaver, James J. Sheehan, Peter Stansky, David B. Tyack, Lyman P. Van Slyke; (Senior Lecturer) Joseph J. Corn

Chair: Kären E. Wigen

Professors: Keith M. Baker, Joel Beinin, Albert Camarillo, James T. Campbell, Clayborne Carson, Gordon Chang, Paula Findlen, Estelle Freedman, Stephen Haber, Tamar Herzog, David Holloway, Nancy S. Kollmann, Mark E. Lewis, Carolyn Lougee Chappell, Ian Morris, Norman M. Naimark, Robert Proctor, Jack N. Rakove, Richard L. Roberts, Aron Rodrigue, Richard P. Saller, Walter Scheidel, Londa Schiebinger, Richard White, Kären E. Wigen, Caroline Winterer, Steven J. Zipperstein

Associate Professors: David R. Como, Robert Crews, James P. Daughton, Zephyr Frank, Sean Hanretta, Thomas S. Mullaney, Jessica Riskin, Priya Satia, Matthew H. Sommer, Amir Weiner

Assistant Professors: Jennifer Burns, Allyson V. Hobbs, Aishwary Kumar, Ana Raquel Minian, Yumi Moon, Edith Sheffer, Laura Stokes, Jun Uchida, Mikael D. Wolfe, Ali Yaycioglu

Courtesy Professors: Giovanna Ceserani, Daniel Edelstein, Lawrence Friedman, Leah Gordon, Avner Greif, Amalia Kessler, David F. Labaree, Reviel Netz, Sam Wineburg, Gavin Wright

Senior Lecturers: Katherine Jolluck, Martin W. Lewis

Acting Assistant Professor: Arie Dubnov

Lecturers: Robert Fredona, Patrick Iber, Carol McKibben, Leandra Zarnow

Overseas Studies Courses in History

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/history/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/history/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/history/http://bosp.stanford.edu>).

		Units
OSPBEJ 67	China-Africa and Middle East Relations	4
OSPBER 70	The Long Way to the West: German History from the 18th Century to the Present	4-5
OSPCPTWN 33	From Apartheid to Democracy: Namibia and South Africa	4
OSPCPTWN 38	Genocide: The African Experience	3-5
OSPFLOR 49	The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema	5
OSPFLOR 58	Space as History: Urban Change and Social Vision in Florence 1059 to the Present	4
OSPFLOR 75	Florence in the Renaissance	5
OSPKYOTO 15	Postwar Japanese Society	4-5
OSPMADRD 62	Spanish California: Historical Issues	5
OSPOXFRD 15	British Architecture and the Renaissance: 1500-1850	4-5
OSPOXFRD 92	Britain and the Second World War	5
OSPOXFRD 221Y	Art and Society in Britain	4-5
OSPPARIS 29	Colonization, Decolonization and Immigration in France	5
OSPPARIS 81	France During the Second World War: Between History and Memory	5
OSPSANTG 68	The Emergence of Nations in Latin America	4-5

Human Biology

Courses offered by the Program in Human Biology are listed under the subject code HUMBIO on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=HUMBIO&filter-catalognumber-HUMBIO=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=HUMBIO&filter-catalognumber-HUMBIO=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=HUMBIO&filter-catalognumber-HUMBIO=on>).

The program offers a Bachelor of Arts in Human Biology (<http://www.stanford.edu/dept/registrar/bulletin/5917.htm>), as well as a minor and an honors program.

Mission of the Undergraduate Program in Human Biology

The mission of the undergraduate program in Human Biology is to provide students with an interdisciplinary approach to understanding human beings from biological, behavioral, social, and cultural perspectives. Courses in the major allow students to see connections and parallels with other fields as they learn to formulate and evaluate health, environmental, and other public policy issues that influence human welfare. The program prepares majors to pursue advanced training in professional or graduate programs.

To achieve these goals, all students complete a 30-unit core sequence, normally in the sophomore year, which provides the foundation for the major. Also during the sophomore year, students consult with student advisers to choose a faculty adviser and complete the declaration process. Together they plan a road map of course work designed to help each student focus on an area of interest within Human Biology. Early planning and subsequent refining of an individualized course of study, in consultation with student and faculty advisers, is a strength and requirement of the program. The curriculum draws on faculty from across the University. To complete a B.A. in Human Biology, students must take courses from within the program and from other University departments. Most Human Biology majors go on to advanced training in professional schools, or graduate programs in the behavioral, natural, and social sciences, including coterminal master's degree programs in other University departments. Additional information about the major may be obtained from the program's offices or at the Program in Human Biology (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/humanbiology/> <http://humbio.stanford.edu>) web site.

Learning Outcomes (Undergraduate)

The program expects its undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Program in Human Biology. Students are expected to demonstrate:

1. ability to acquire and synthesize scientific information from a variety of sources.
2. ability to apply analytical tools to evaluate policy.

3. ability to interpret knowledge in meaningful and appropriate ways as they draw conclusions about the significance of their findings.
4. ability to communicate their scientific ideas clearly and persuasively.

Student Advisers

Human Biology has an advising program comprising faculty and student advisers. Before declaring Human Biology as the undergraduate major, each student must meet with one of six student advisers who assist in developing a coherent study plan based on an individualized area of concentration, and the selection of foundation, concentration, and upper-division courses. The student advisers also assist students in selecting an appropriate faculty adviser and a suitable internship for their area of concentration and career goals. Student advisers offer drop-in services during scheduled office hours every weekday and some evenings. The student advisers also sponsor events including the Internship Faire, Beyond HumBio, and declaration workshops. To maintain high standards of advising that respond to the needs of individual students, student advisers meet weekly with the program's faculty advising chairs and the student services coordinator to review the program's policies and specific student inquiries and petitions concerning the program.

Storey House

Storey House, 544 Lasuen Mall, is an undergraduate resident theme house for Human Biology, devoted to developing an intellectual community among Human Biology majors at Stanford, and allowing faculty and students to become acquainted and share their Human Biology interests and research. Its goals are to foster intellectual discussion in the residential lives of the students living in Storey House, mentoring relationships between upperclassmen and core students in the house, and stimulating events for all Human Biology majors facilitated by academic theme associates. Assignment is made through the regular undergraduate housing draw.

Bachelor of Arts in Human Biology

Declaring the Major

A prospective major must consult with the student and faculty advisers to obtain detailed information about the program and guidance in the development of an individual course of study.

At the time the major is declared, the student must submit a written statement (3-5 pages) of academic and long-term goals and the proposed list of courses satisfying the requirements for the major. The proposal is then reviewed by the student advisers who help identify an appropriate faculty adviser. Final approval of the proposed course of study rests with the faculty adviser.

It is important to declare early, preferably in early spring as soon as students have passed both Autumn and Winter Quarter core courses (HUMBIO 2A Genetics, Evolution, and Ecology, HUMBIO 2B Culture, Evolution, and Society, HUMBIO 3A Cell and Developmental Biology, HUMBIO 3B Behavior, Health, and Development). The University requires students to declare a major by the end of Spring Quarter of the sophomore year. Under special circumstances students may declare as late as Autumn Quarter of the junior year. Petitions to declare late require additional documentation and are less likely to be approved.

Students who plan to pursue graduate work should be aware of the admission requirements of the schools to which they intend to apply. Early planning is advisable to guarantee completion of major and graduate school requirements.

Degree Requirements

The B.A. in Human Biology (HUMBIO) requires a minimum of 87 units in the major divided among four levels of courses:

1. Fundamental Program: at least 38 units, to include
 - A. Human Biology Core (30 units); see "Human Biology Core" below for more information. The Human Biology Core refers to:

		Units
HUMBIO 2A	Genetics, Evolution, and Ecology	5
HUMBIO 2B	Culture, Evolution, and Society	5
HUMBIO 3A	Cell and Developmental Biology	5
HUMBIO 3B	Behavior, Health, and Development	5
HUMBIO 4A	The Human Organism	5
HUMBIO 4B	Environmental and Health Policy Analysis	5
 - B. Statistics (4-5 units). The core and statistics courses must be taken for a letter grade by majors. Statistics may be chosen from courses such as:

		Units
STATS 60	Introduction to Statistical Methods: Precalculus	3-5
or STATS 141 Biostatistics		
PSYCH 10	Introduction to Statistical Methods: Precalculus	5
SOC 181B	Sociological Methods: Statistics	5
BIO 141	Biostatistics	3-5
 - C. Internship: HUMBIO 197 Human Biology Internship, 4 units.
 - F. The internship requirement, a mentored non-classroom project, is graded satisfactory/no credit only.

2. Foundation Courses: 20-unit minimum. Total units vary, depending on the focus of study chosen by the student for the area of concentration. They may include introductory-level courses from across the University and lab courses. The minimum grade requirement for foundation courses is 'C-.'
3. Area of Concentration: a minimum of five courses totaling at least 20 units. This in-depth area of study enables the student to focus on educational and post-baccalaureate goals. Courses are non-introductory, theory-based, and are usually numbered over 100. Three or more departments must be represented in the concentration. Each course must be taken for a minimum of 3 units. Minimum grade requirement for Upper Division courses is C-. The area of concentration is individually designed by the student in consultation with the student advisers and faculty adviser. Final approval of the concentration rests with the student advisers and faculty adviser. All area of concentration courses must be taken for a letter grade. The minimum grade requirement for area of concentration courses is 'C-'. The area of concentration generally has an emphasis in one, and sometimes more than one, of the following eight areas:

Area 1: Environment and Environmental Policy

- Environment
- Environmental Policy
- Culture/Demography/Human Ecology

Area 2: Health and Health Policy

- Health Policy
- Public Health
- International Health

Area 3: Human Performance

Area 4: Human Development

- Biological Development
- Psychological Development
- Education

Area 5: Biomedical Science

- Genetics
- Molecular Biology
- Human Physiology
- Infectious Diseases

Area 6: Brain and Behavior

Area 7: Ethics and Medical Humanities

Area 8: Evolution

A non-exclusive list of possible courses for each emphasis is available at the student advisers' office or at the Area of Concentration Course List (<https://humbio.stanford.edu/courses/aoc>) web site.

4. Upper-Division Courses: students must take three Human Biology upper-division courses numbered 100 to 189. These courses should be used to explore subjects outside the area of concentration. One upper-division course may be taken satisfactory/no credit. Each course must be taken for a minimum of 3 units. Minimum grade requirement for Upper Division courses is "C-". All non-laboratory advanced HUMBIO courses (those numbered 100 to 189) fulfill the Human Biology upper-division requirement. A list of Human Biology related/cognate courses can be found at the Related Courses (<http://www.stanford.edu/dept/humbio/cgi-bin/?q=node/1382>) web site.

Human Biology Core

Required core sequences (HUMBIO 2A Genetics, Evolution, and Ecology, HUMBIO 2B Culture, Evolution, and Society, HUMBIO 3A Cell and Developmental Biology, HUMBIO 3B Behavior, Health, and Development, and HUMBIO 4A The Human Organism, HUMBIO 4B Environmental and Health Policy Analysis) introduce the biological and social sciences, and most importantly, relationships between the two. Classes meet throughout the academic year. Students must register concurrently for the A and B series. Students should initiate the core in Autumn Quarter of the sophomore year. Freshmen are not permitted to enroll. Majors must earn a minimum letter grade of 'C-' in core courses. The Human Biology core consists of the following courses:

		Units
HUMBIO 2A	Genetics, Evolution, and Ecology	5
HUMBIO 2B	Culture, Evolution, and Society	5
HUMBIO 3A	Cell and Developmental Biology	5
HUMBIO 3B	Behavior, Health, and Development	5
HUMBIO 4A	The Human Organism	5
HUMBIO 4B	Environmental and Health Policy Analysis	5

Honors Program

The honors program in Human Biology provides qualified majors the opportunity to work closely with faculty on an individual research project, culminating in an honors thesis. Students may begin honors research from a number of starting points including topics introduced in the core or upper-division courses; independent interests stemming from an internship experience; or collaborating with faculty from the natural, social, or behavioral sciences.

Students may apply to the honors program if they have completed the Human Biology core with a minimum GPA of 3.0, have an overall Stanford grade point average (GPA) of 3.2, and meet other requirements detailed in

the honors handbook. Interested students should consult the Human Biology Honors Handbook (<https://humbio.stanford.edu/node/152>) and meet with the Human Biology Associate Director or student services officer.

Most honors projects involve a total of 10-15 units of course work in:

		Units
HUMBIO 193	Research in Human Biology	1-5
HUMBIO 194	Honors	1-10

Admission to the honors program is by submission of an intention to undertake honors research in early February, followed by the application in early March of the junior year. Students planning to undertake honors begin research or preparation as early as completion of the sophomore year.

The honors thesis is normally completed by the middle of Spring Quarter of the senior year. Honors students then present summaries of their research at the Human Biology Honors Poster Symposium in May.

Human Biology also holds a Summer Honors College just prior to Autumn Quarter each year for students who have applied to the honors program. Students apply to Summer Honors College in April of the junior year. For applications, contact the program office.

Minor in Human Biology

A minor in Human Biology provides an introductory background to the relationship between the biological and social aspects of humanity's origin, development, and prospects. Many of the major problems facing human civilization today involve both biological and social aspects. Scientific approaches to these problems are essential, but they must be broadly conceived, integrating what is known of the biological with an understanding of the social and cultural setting in which they exist. Students with a minor in Human Biology are expected to develop a strong background in the integration between the biological and social aspects of human beings.

Students declaring a minor in Human Biology must do so no later than two quarters prior to their intended quarter of degree conferral (for example, a student must declare a minor before the end of Autumn Quarter to graduate the following Spring Quarter).

To minor in Human Biology, students must take the Human Biology Core (HUMBIO 2A Genetics, Evolution, and Ecology, HUMBIO 2B Culture, Evolution, and Society, HUMBIO 3A Cell and Developmental Biology, HUMBIO 3B Behavior, Health, and Development, HUMBIO 4A The Human Organism, and HUMBIO 4B Environmental and Health Policy Analysis) and one additional upper-division course (for example, any HUMBIO course numbered 100-189). The student must earn a minimum letter grade of 'C-'. Courses that count towards the fulfillment of major requirements may not be counted towards the minor.

Emeriti: (Professors) Clifford Barnett (Anthropological Sciences), Doug Brutlag (Biochemistry), Luigi Cavalli-Sforza (Genetics), Christos Constantinou (Urology), Carl Djerassi (Chemistry), Sanford Dornbusch (Sociology), Stanley Falkow (Microbiology/Immunology), Shirley Feldman (Associate Director), Ute Francke (Genetics), A. Dale Kaiser (Biochemistry), Herant Katchadourian (Human Biology), Donald Kennedy (Biology), Carol Winograd (Medicine)

Director: Carol Boggs (Biology; on leave)

Interim Director: Paul Fisher (Neurology)

Associate Director: Katherine Preston

Professors: Russ Altman (Bioengineering), Laurence Baker (Health Research and Policy), Ben Barres (Neurobiology), Donna Bouley (Comparative Medicine), Laura Carstensen (Psychology), Lisa Curran (Anthropology), Martha Cyert (Biology), William H. Durham (Anthropology), Heidi Feldman (Pediatrics: Neonatology), Russell D. Fernald (Biology), Paul Fisher (Neurology), Margaret Fuller (Developmental Biology), Rona Giffard (Anesthesia), Garry Gold

(Diagnostic Radiology), Lawrence H. Goulder (Economics), James J. Gross (Psychology), H. Craig Heller (Biology), Paula Hillard (Obstetrics and Gynecology), Patricia P. Jones (Biology), Terence Ketter (Psychiatry and Behavioral Sciences), Richard Klein (Anthropology), Amy Ladd (Orthopaedic Surgery), Joseph S. Lipsick (Pathology), Helen Longino (Philosophy), Tanya Luhmann (Anthropology), Yvonne Maldonado (Pediatrics: Infectious Diseases), Michael Marmor (Ophthalmology), Gordon Matheson (Orthopaedic Surgery), Clifford Nass (Communication), Rosamond Naylor (Environmental Earth System Science and Woods Institute), Robert Negrin (Medicine: Blood and Marrow Transplantation), Roeland Nusse (Developmental Biology), Amado Padilla (Education), Julie Parsonnet (Medicine: Infectious Diseases), Thomas Rando (Neurology), Thomas Robinson (Pediatrics), Lee Ross (Psychology), Robert Sapolsky (Biology), Walter Scheidel (Classics), Kenneth Schultz (Political Science), Matthew Scott (Developmental Biology), Randall Stafford (Stanford Prevention Research Center), William Talbot (Developmental Biology), Lucy Tompkins (Infectious Diseases), Shripad Tuljapurkar (Biology), Anthony Wagner (Psychology), Jeffrey Wine (Psychology), Paul Wise (Pediatrics), Arthur P. Wolf (Anthropological Sciences)

Associate Professors: Jayanta Bhattacharya (Medicine/PCOR), Rebecca Bird (Anthropology), Firdaus Dhabhar (Psychiatry and Behavioral Sciences), Dean Felsher (Medicine: Oncology), Anne Fernald (Psychology), James Fox (Anthropology), Brenda Golianu (Anesthesia), Joachim Hallmayer (Psychiatry and Behavioral Sciences - Child and Adolescent Psychiatry and Child Development), James Jones (Anthropology), Brian Knutson (Psychology), Sean Mackey (Anesthesia), Norman G. Miller (Medicine/PCOR), Jose Montoya (Infectious Diseases), John Rick (Anthropology), Nancy Wang (Surgery: Emergency Medicine)

Assistant Professors: Eran Bendavid (General Internal Medicine), Daniel Garza (Orthopaedic Surgery), Jeremy Goldhaber-Fiebert (Medicine/PCOR), Samuel McClure (Psychology), Denise Monack (Microbiology and Immunology), Michelle Monje-Deisseroth (Neurology), Jelena Obradovic (Education), Anna Penn (Pediatrics: Neonatology), Jamie Zeitzer (Psychiatry and Behavioral Sciences)

Professor (Research): David Lyons (Psychiatry and Behavioral Sciences), Marcia Stefanick (Stanford Prevention Research Center)

Associate Professors (Research): Christopher Gardner (Stanford Prevention Research Center), David Katzenstein (Medicine: Infectious Diseases),

Assistant Professor (Research): Scott Hall (Interdisciplinary Brain Science Research)

Professors (Teaching): Carol Boggs (Biology), David Magnus (Pediatrics/SCBE), Ellen Porzig (Developmental Biology)

Associate Professors (Teaching): Donald Barr (Pediatrics), Catherine Heaney (Psychology), Eunice Rodriguez (Pediatrics), Robert Siegel (Microbiology and Immunology)

Clinical Professors: Nancy Morioka-Douglas (General Internal Medicine)

Clinical Associate Professors: Mary Therese Jacobson (Obstetrics and Gynecology), Daryn Reicherter (Psychiatry and Behavioral Sciences), Katherine Williams (Psychiatry and Behavioral Sciences)

Clinical Assistant Professors: Christopher Gonzalez (Pathology/Blood Center), Cynthia Nguyen (Psychiatry and Behavioral Sciences), Rita Popat (Health Research and Policy, Epidemiology)

Senior Research Associates: Wesley F. Alles (Medicine: Stanford Prevention Research Center), Douglas Bird (Anthropology)

Other Teaching Faculty and Staff: William Abrams, Maya Adam-Seef, Judy Chu, Sophia Colamarino (Psychiatry and Behavioral Sciences), Anne Firth-Murray, Anne Friedlander, Ronald Garcia (Center for Excellence), Renu Heller (Biology), John Lynham, Michael Mastrandrea (Woods Institute), Lisa Medoff (School of Education), Stephen Murphy-Shigematsu (Anesthesia), Katherine Preston, Lisa Goldman Rosas (Medicine: Stanford Prevention Research Center), Matthew Rothe (Stanford Dining Services), Lynn Rothschild, Merritt Ruhlen, Michael James Salinger, Annette Salmeen, Darwin Scott Smith (Microbiology and

Immunology), Jennifer Wolf (School of Education), Nathan Wolfe, Larry Zaroff

Course Associates: Autumn Albers, Adrian Castillo, Steven Michael Crane, Molly Fausone, Rahael Gupta, Grace Huh, Sonja Swenson, Jill Watt

Honors Chair: Katherine Preston

Overseas Studies Courses in Human Biology

Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/humanbiology/> <http://explorecourses.stanford.edu>) web site or the Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/humanbiology/http://bosp.stanford.edu>) web site.

		Units
OSPAUSTL 10	Coral Reef Ecosystems	3
OSPAUSTL 30	Coastal Forest Ecosystems	3

OSPPARIS 153X	Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time	5

Iberian and Latin American Cultures

Courses offered by the Department of Iberian and Latin American Cultures, formerly the Department of Spanish and Portuguese, are listed under the subject code ILAC on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=ILAC&filter-catalognumber-ILAC=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=ILAC&filter-catalognumber-ILAC=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=ILAC&filter-catalognumber-ILAC=on>). For courses in Catalan, Portuguese, and Spanish language instruction with the subject codes CATLANG, PORTLANG and SPANLANG, see the "Language Center (<http://www.stanford.edu/dept/registrar/bulletin/5966.htm>)" section of this bulletin.

The Department of Iberian and Latin American Cultures offers courses focused on the languages, literatures, and cultures of the Iberian Peninsula, Latin America, and Latina/o populations in the United States. To achieve its goal of training students as experts in the cultures of the Iberian Peninsula and Latin America, the department balances an emphasis on literary studies with philosophical, historical, and social approaches to cultural issues.

The department's faculty includes scholars of modern and contemporary Spanish literature and cinema, contemporary Latin American literature and cinema, medieval and contemporary Catalan literature and culture, Aljamiado and medieval Spanish literature, early modern Portuguese literature, modern and contemporary Brazilian literature, and Chicana/o culture and literature. The department's courses are characterized by an intercultural and interdisciplinary focus that combines the study of literature with wide ranging intellectual concerns.

The department is committed to three main educational goals:

1. to provide students with a contextualized knowledge of the literatures and cultures of the Iberian Peninsula from the medieval period to the present, of the Spanish and Portuguese speaking countries of Latin America, and of the Spanish-speaking communities of the United States.
2. to prepare undergraduates for advanced study in those areas and/or in a range of professional fields.
3. to provide doctoral students with advanced training as research scholars and teachers in preparation for careers as university professors or in related roles.

In addition, the department regularly hosts visiting faculty including the Ginebre Serra Visiting Chair in Catalan Studies through the Iberian Studies Program.

The department awards B.A., M.A., and Ph.D. degrees in Iberian and Latin American Cultures, and a B.A. in degree in Spanish. It also offers undergraduate minors in Spanish and Portuguese, and a Ph.D. minor in Iberian and Latin American Cultures.

Courses for Heritage Language Speakers—The Language Center offers a series of second- and third-year courses designed for students who grew up in homes where Spanish is spoken and who wish to develop their existing linguistic strengths. See the "Language Center (<http://www.stanford.edu/dept/registrar/bulletin/5966.htm>)" section of this bulletin for these courses.

Mission of the Undergraduate Program in Iberian and Latin American Cultures

The mission of the undergraduate program in Iberian and Latin American Cultures is to expose students to a variety of perspectives in languages, literatures, and cultures of the Iberian Peninsula, Latin America, and Latina/o populations in the United States. The program balances an emphasis on literary studies with a diverse set of approaches to cultural and social issues. Courses in the program provide students with a contextualized knowledge of the literatures and cultures of the Iberian Peninsula from the medieval period to the present; the Spanish and Portuguese speaking countries of Latin America; and the Spanish-speaking communities of the United States. Students in the major are prepared for advanced study in these areas and for a range of professional fields.

Learning Outcomes (Undergraduate)

The department prepares undergraduate majors in the program to be able to demonstrate the following learning outcomes. These outcomes are used in

evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. the ability to develop effective and nuanced lines of interpretation.
2. critical thinking skills using their courses' primary source materials.
3. facility with the methodologies and presuppositions underlying interpretive positions in secondary literature and in their own work.
4. analytical writing skills and close reading skills.
5. expository oral skills.
6. proficiency in Catalan, Portuguese, or Spanish

Graduate Programs in Iberian and Latin American Cultures

University requirements for the M.A. and Ph.D. degrees are discussed in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Iberian and Latin American Cultures and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Iberian and Latin American Cultures. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Iberian and Latin American Cultures and to interpret and present the results of such research.

Coterminal B.A. and M.A.

The requirements for the coterminal M.A. are the same as those outlined for the M.A. No course can count for both the B.A. and M.A. degrees. University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4874.htm>)" section of this bulletin.

Study Abroad Programs in Iberian and Latin American Cultures

All majors are encouraged to study abroad. To transfer credits from non-Stanford programs abroad, consult the Bing Overseas Studies Office. Course work taken abroad may be applied toward the major in ILAC and Spanish as well as the minor in Spanish or Portuguese. Students planning to study abroad must consult with the Chair of Undergraduate Studies to coordinate the course work from abroad with their degree program. The maximum number of units is identified in the elective section for each major.

The department and Bechtel International Center (<http://icenter.stanford.edu>) maintain information on study abroad programs. Stanford supports the options listed below and credits course work taken in academically sound programs. Students considering different options are encouraged to speak with the Director of the department or the Chair of Undergraduate Studies.

Stanford in Santiago, Chile and Madrid or Barcelona, Spain

The Bing Overseas Studies Programs in Santiago, Chile and Madrid, Spain require a certain level of proficiency in Spanish. Students should consult the program summary of their interested campus. Course work is primarily in Spanish. Information is available in the "Overseas Studies (<http://www.stanford.edu/dept/registrar/bulletin/5090.htm>)" section of this bulletin or at the Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/iberianandlatinamericancultures/http://bosp.stanford.edu>) web site. Internships and research opportunities may be arranged for students staying for two quarters.

For ILAC majors with an interest in Iberian Studies, the department recommends study in Barcelona through CASB, a consortium of U.S. universities of which Stanford is a participating member. This program combines courses at the program's center with open access to courses at three Barcelona universities: Universitat Popeu Fabra, University of Barcelona, and Autonomous University of Barcelona. Visiting faculty from Brown, Chicago, Stanford, and Northwestern complement the offerings of these three major universities. Admission is highly competitive. Other programs are also recognized by the department, and students are encouraged to discuss their interests with the Director of the department or with the Chair of Undergraduate Studies.

Brazil and Portugal

The University maintains a relationship with the Universidade Estadual do Rio de Janeiro in Brazil at the graduate level. Students interested in study in Brazil should contact Professor Marflia Librandi Rocha. Students interested in study in Portugal should contact Professor Vincent Barletta.

Bachelor of Arts in Iberian and Latin American Cultures

The major in Iberian and Latin American Cultures (ILAC) requires 60 units of course work. Courses must be taken for a letter grade, and a maximum of 15 units of course work from abroad may be applied towards the major. At the discretion of the Chair of Undergraduate Studies, up to 5 units of course work from outside the department, clearly related to the study of literature and culture in the areas and traditions taught by the department, may be counted towards the degree. The core courses (requirements 1, 2, 3 and 4 below) may not be taken abroad. Exceptional cases for any of these requirements must be referred to the Chair of Undergraduate Studies who, in consultation with the department Director, makes a final decision.

Prerequisites

For all ILAC courses taught in Spanish, students must have successfully completed SPANLANG 102 or successfully tested above this level through the Language Center. One course above 100 and one core course, or consent of the instructor, are prerequisites for 200-level courses.

Declaring the Major

Students declare the major in Iberian and Latin American Cultures through Axxess. Students should meet with the Chair of Undergraduate Studies to discuss appropriate courses and options within the major, and to plan the course of study. Majors are also urged to attend department events such as public talks and conferences.

Double Majors

The major in ILAC is designed to combine with a second major in another field and with study abroad. Students may not count the same courses to fulfill requirements in both majors.

General Course Requirements

Core Courses. Students must complete a total of 60 units for the major. The following 4 requirements must be taken at Stanford University.

1. ILAC 120 Advanced Critical Reading in Spanish - Writing in the Major (WIM): 5 units are required, and this is a prerequisite for every course in the major; however, concurrent enrollment is allowed.
2. Core courses in literature. All three courses must be completed

		Units
ILAC 136	Modern Iberian Literatures	3-5
ILAC 157	Medieval and Early Modern Iberian Literatures	3-5
ILAC 161	Modern Latin American Literature	3-5

3. Core courses in culture, history, and civilization. Choose at least one.

		Units
ILAC 130	Introduction to Iberia: Cultural Perspectives	3-5
ILAC 131	Introduction to Latin America: Cultural Perspectives	3-5

4. Senior Seminar.

		Units
ILAC 278A	Senior Seminar: Latin American Fiction and Theory	3-5

Elective Courses. Students must complete a total of 60 units for the major. Elective courses can be taken within the following parameters:

- Up to 15 units of language courses (not including conversational courses) in Spanish, Portuguese, or Catalan.
- Additional 100- or 200- level ILAC literature courses.
- Bing Overseas Program. Up to 15 units of pre-approved coursework from Barcelona, Madrid, or Santiago.
- Coursework from outside ILAC. A maximum of 5 units of relevant coursework from outside ILAC may be counted towards the electives. Prior approval from the Chair of Undergraduate Studies is required.
- IHUM or Thinking Matters courses taught at least partially by a faculty member of the ILAC department. Maximum of 10 units. IHUM courses are no longer offered.
- Structured Liberal Education (SLE). Maximum of 10 units.

Bachelor of Arts in Spanish

The Spanish major is declared in Axess. "B.A. Spanish" appears on the official transcript and on the diploma. This program is designed for students who want to move towards fluency in reading, listening, speaking, and writing Spanish while developing a contextualized understanding of the language through linguistic and cultural study. This degree emphasizes critical use of the language in a global perspective. The major in Spanish requires 60 units of coursework. All coursework must be done in Spanish. If a class is taught in a language other than Spanish, then written work (e.g. final papers) must be completed in Spanish. Courses cannot be duplicated for two degrees. All courses must be taken for a letter grade.

Prerequisites

Students must be at or above the level of SPANLANG 13 or successfully tested above this level through the Language Center.

Declaring the Major

Students declare the major in Spanish through Axess. Students should meet with the Chair of Undergraduate Studies to discuss appropriate courses and options within the major, and to plan the course of study. Majors are also urged to attend department events such as public talks and conferences.

General Course Requirements

Core Courses. Students must complete a minimum of 60 units for the major. The following requirements must be taken at Stanford University.

1. SPANLANG 101 The Structure of Spanish.
2. ILAC 120 Advanced Critical Reading in Spanish, Writing in the Major (WIM). 5 units are required. This is a prerequisite for every course in the major; however, concurrent enrollment is allowed.
3. Core courses in culture, history, and civilization. Choose at least one.

		Units
ILAC 130	Introduction to Iberia: Cultural Perspectives	3-5
ILAC 131	Introduction to Latin America: Cultural Perspectives	3-5

4. Senior Seminar. ILAC 277 Spanish in Society
5. Two 200-level ILAC courses.
6. Spanish Proficiency Notation. All majors must test for Proficiency in Spanish through the Language Center by winter quarter of their Senior year. Students must receive a notation of at least "Advanced Mid" to be deemed proficient. Those needing outside tutoring will be advised to do so (resources are available through the CTL and ILAC). The proficiency examination will comprise an oral interview and a writing proficiency test.

Elective Courses. Students must complete a total of 60 units for the major. Elective courses can be taken within the following parameters:

- Course work within ILAC. Additional ILAC courses at the 100- or 200-level to meet the required 60 units.
- Bing Overseas program. A maximum of 15 units of related course work from Madrid or Santiago may count towards the electives. Prior approval from the Chair of Undergraduate Studies is required.
- Course work from outside ILAC. A maximum of 5 units of relevant coursework from outside ILAC may be counted towards the electives. Prior approval from the Chair of Undergraduate Studies is required.

Honors Program

ILAC majors and Spanish majors with an overall grade point average (GPA) of 3.3 or above, and who maintain a 3.5 (GPA) in major courses, are eligible to participate in the DLCL's honors program. Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty, in their junior year, preferably by March 1, but no later than May 1.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40-90 pages not including bibliography and notes.

During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL Honors application and an outline of planned course work for their senior year. During this quarter, students may enroll for 2 units in DLCL 189C Honors Thesis Seminar for the drafting or revision of the thesis proposal. The proposal is reviewed by the Chair of Undergraduate Studies and the Director of the department and will be approved or returned for submission.

Honors students are encouraged to participate in the honors college hosted by Bing Honors College (http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/OO_honors_BingHonors.html) and coordinated by the Division of Literatures, Cultures, and Languages. The honors college is offered at the end of the summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted through the Bing program. For more information, view the Bing Honors website.

In Autumn Quarter of the senior year, the students must enroll in DLCL 189A Honors Thesis Seminar, a 5 unit seminar that focuses on researching and writing the honors thesis. During Winter Quarter students then enroll for 5 units in DLCL 189B Honors Thesis Seminar while composing their thesis. Students who did not enroll in DLCL 189C Honors Thesis Seminar during their Spring Quarter junior year may do so in the Spring Quarter of their senior year while revising the thesis, if approved by the thesis supervisor. A total of 10-12 units will be awarded for completion of honors course work, and the finished thesis. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15th of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

Minors in Spanish and Portuguese

The minors in Spanish and Portuguese are for students who want to combine acquisition of linguistic competence with the study of the literature, thought, culture, or language systems of the Spanish- or Portuguese-speaking worlds. The minors in Spanish and Portuguese require 30 units of course work taken for a letter grade. Up to 5 units of course work outside the department, up to 10 units of relevant course work taken abroad, and up to 15 units of second-year and above Spanish or Portuguese language courses (not including conversational courses) may count toward these minors with the approval of the Chair of Undergraduate Studies.

Minor in Portuguese

Required Courses: (30)

1. A 100- or 200-level course in Iberian literature with a Lusophone component
2. A 100- or 200-level course in Latin American literature with a Lusophone component.
3. Any additional 100- or 200-level courses in literature and culture to complete the required 30 units. IHUM courses with a Lusophone component taught at least partially by ILAC faculty may count toward these electives as may 5 units of SLE.

Units

30

Minor in Spanish

Required Courses: (30)

1. A 100- or 200-level course in Iberian literature
2. A 100- or 200-level course in Latin American literature
3. Any additional 100- or 200-level courses in literature and culture to complete the required 30 units. IHUM courses with a Hispanophone component taught at least partially by ILAC faculty may count towards these electives, as may 5 units of SLE.

Units

30

Master of Arts in Iberian and Latin American Cultures

This terminal M.A. degree program is for students who do not intend to continue their studies through the Ph.D. degree. Students in this program may not apply concurrently for entrance to the Ph.D. program. Students must complete a minimum of 45 graduate-level units, 36 of which must be taken at Stanford. All 45 units must have a letter grade of 'B' or above. Students enrolled in the terminal M.A. program must file a Program Proposal for a Master's Degree during their first quarter of enrollment. Any changes to the proposal should be reviewed and approved by the Chair of Graduate Studies.

The requirements for the terminal M.A. and coterminial M.A. are:

1. A 200-level or above course in literary or cultural theory
2. Two 200-level or above courses in Latin American (including Brazilian) or Latino/Chicano literature and culture
3. Two 200-level or above courses in Iberian literature and culture
4. One 300-level course in Latin American (including Brazilian) or Latino/Chicano literature and culture
5. One 300-level course in Iberian literature and culture
6. Enrollment in at least one 300-level graduate seminar offered in the department each quarter
7. Intermediate-high proficiency in Portuguese or Catalan (equivalent to one year of university study).

Independent study courses (ILAC 299 Individual Work, ILAC 399 Individual Work) and crosslisted courses originating outside the department may not be used to fulfill requirements except by consent of the Chair of Graduate Studies.

In addition, students may take approved courses in related fields such as classics, comparative literature, education, history of art, linguistics, modern thought, and philosophy.

Doctor of Philosophy in Iberian and Latin American Cultures

University requirements for the Ph.D. are described in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin. The requirements of the Ph.D. in Iberian and Latin American Cultures (ILAC) are:

1. Course work

135 units of graduate-level course work with a grade point average (GPA) of 3.0 (B) or above. All candidates for the Ph.D. degree are expected to fulfill all requirements for the M.A. during their first year in the program. Units completed for the M.A. degree at another institution (up to 45 units) can be counted toward the Ph.D., pending university and department approval. Graduate students may not take independent study courses (ILAC 299, 399) during the regular academic year (Autumn, Winter, Spring), except during the Summer, until they are ready to write their dissertation (on achieving TGR status), with the understanding that students need more focused mentorship at this time. Any exception to this policy must be made in consultation with the Graduate Program Adviser and with the relevant faculty member and/or the student's faculty adviser. Students must be enrolled in at least one 200- or 300-level course offered by a core member of the ILAC faculty each quarter before advancing to TGR. This policy is

designed to ensure that all the graduate students and all the core faculty of ILAC have the opportunity of doing some significant coursework together. This principle is in the best interests of the student since the entire faculty is involved in the periodic review and evaluation of every graduate student. In consultation with their adviser, students choose one major field and two minor fields of study from the following:

- A1. Medieval and Early Modern Iberian Literature and Culture
- A2. Eighteenth- and Nineteenth-Century Iberian Literature and Culture
- A3. Twentieth- and Twenty-First-Century Iberian Literature and Culture
- B1. Colonial to Nineteenth-Century Latin American Literature and Culture
- B2. Twentieth- and Twenty-First-Century Latin American Literature and Culture
- B3. Luso-Brazilian Literature and Culture
- C. US Latin/Chicano Literature and Culture

Students must select one minor area from a group (A, B, C) other than that in which their major area falls. At least four graduate-level courses must be taken in the major area of study. At least two graduate-level courses must be taken in each minor area.

2. Language

All students are required to have advanced-high proficiency in English and Spanish by the time they take the comprehensive examination. In addition, students specializing in Iberian literature and culture must attain intermediate-mid proficiency in Catalan and Portuguese (equivalent to two quarters of university study for each language); for students specializing in Latin American and/or US Latino/Chicano literature and culture, the level of advanced-low proficiency in Portuguese (equivalent to four quarters of university study) must be attained. This requirement must be fulfilled before students take the comprehensive examination. Students wishing to satisfy the language requirements in Catalan and/or Portuguese may do so by passing a proficiency exam administered by the Language Center.

3. Examinations

All students must pass the following: a Qualifying Paper; a written and oral Comprehensive examination; and a University Oral examination.

3a. Qualifying Paper

The qualifying paper is a research paper, written in either English or Spanish, consisting of no more than 6,000 words. The student chooses as its source a term paper written for a course taught by a core member of the ILAC faculty. This instructor will serve as adviser to the student in preparing the qualifying paper for submission. The paper must be submitted to the Graduate Student Services Coordinator by the first day of instruction in Autumn Quarter of the student's second year of study. Students who do not pass the initial submission will have the opportunity to revise and resubmit it by November 15. Should the second qualifying paper not satisfy the minimum requirements, the student will be released from the Ph.D. program at the end of that same quarter. A terminal M.A. degree may be awarded if all requirements for that degree have been completed satisfactorily.

3b. Comprehensive examination

This exam consists of two parts, a written submission and an oral presentation, and is designed for students to demonstrate intellectual competence in multiple areas of study. This exam occurs during Winter Quarter of the third year of graduate study, and it must be completed prior to the last day of instruction in that same quarter. Students must select three examination areas from the following options:

- A1. Medieval and Early Modern Iberian Literature and Culture
- A2. Eighteenth- and Nineteenth-Century Iberian Literature and Culture

- A3. Twentieth- and Twenty-First-Century Iberian Literature and Culture
- B1. Colonial to Nineteenth-Century Latin American Literature and Culture
- B2. Twentieth- and Twenty-First-Century Latin American Literature and Culture
- B3. Luso-Brazilian Literature and Culture
- C. US Latin/Chicano Literature and Culture

Students may not select all three areas from the same group (A, B, C).

The committee for the Comprehensive Exam is formed by asking three ILAC professors to serve on the committee, one for each of the three examination areas chosen by the student. In consultation with each member of the committee, the student must develop a list of twenty-one themes (seven for each area of study) plus a reading list of 130-150 texts and critical works. In addition, the student will submit a 6,000-word research paper (different from the Qualifying Paper) on a topic preferably related to the dissertation. This paper must be written in English. This list and research paper must be presented to committee members and to the Graduate Student Services Coordinator at least two weeks prior to the Oral portion of the Comprehensive Exam. The Oral exam will be based upon the submitted list and research paper and will last no more than two hours. Students must demonstrate their proficiency in Spanish and English during the course of this exam.

3c. University Oral examination

All Ph.D. candidates in ILAC are required to take a University Oral examination no later than one quarter after successfully completing the Comprehensive Examination. This examination is a defense of the dissertation prospectus. During the examination, the candidate speaks for approximately 20 minutes on the proposed dissertation, the methods to be used in research and the conclusions the candidate expects to reach. Afterward, there will be questions by the members of the committee, in an order established by the Chair of the committee. The examination may be taken in English or Spanish, as mutually agreed by the student and the committee. The examination will last no more than two hours.

The University Oral examination committee must be finalized no later than the last week of the quarter during which the student successfully completes the comprehensive examination. The examination committee should include the dissertation adviser and three other members, usually from the Reading Committee, and a Chair from outside the department, for a total of five members. All members must belong to the Academic Council. The adviser and two other members must be ILAC faculty. Once a committee and date are finalized the student must submit the University Oral Examination form to the Graduate Student Services Coordinator. The members of the Oral Examination committee must receive copies of the dissertation prospectus no later than three weeks prior to the examination.

The dissertation prospectus should consist of 20-25 pages (approximately 7,500 words) and follow the most recent MLA Style guidelines. The student must prepare the dissertation prospectus with the help of the principal adviser, and other advisers. The dissertation prospectus must contain a title along with the following elements:

1. Statement of Thesis
2. Statement of Significance and Impact
3. Brief Literature Review
4. Outline of Theoretical Framework
5. Chapter Outline
6. Preliminary Biography
7. Timetable for Completion

4. Teaching

Each Ph.D candidate must teach a minimum of five quarters of undergraduate courses (three are taught during the second year and

the remaining two after advancing to TGR status). Language course assignments are arranged through the Language Center. In preparation for teaching, Ph.D. candidates are required to take DLCL 301 The Learning and Teaching of Second Languages in the first year.

5. Ph.D. Dissertation

The doctoral dissertation should demonstrate the student's ability to carry out original research and to organize and present the results in publishable form. The scope of the dissertation should be such that it is completed in twelve to eighteen months of full-time work. A copy of the completed dissertation must be submitted to each member of the reading committee at least eight weeks before the University filing deadline in the quarter during which the candidate expects to receive the Ph.D. degree. Committee members will have three weeks to read the dissertation before determining whether to approve or require changes. Ph.D. dissertations must be completed and approved within five years from the date of admission to candidacy. Students taking more than five years must apply for reinstatement of candidacy which is reviewed on a case by case basis.

Yearly review

In order to evaluate student progress and to identify potential problem areas, the department's faculty reviews the academic progress of each first-year student at the beginning of Winter and Spring quarters and again at the end of the academic year. The first two reviews are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. The review at the end of Spring Quarter is more thorough; each student's performance during the first year is reviewed and discussed. Possible outcomes of the spring review include: (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period of probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; (2) continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program. All students are given feedback from their advisers at the end of their first year of graduate work, helping them to identify areas of strength and potential weakness.

At the end of the second year of residency, students who are performing well, as indicated by their adviser, performance on the Comprehensive Exam, and teaching and research assistantship performance, are advanced to candidacy. This step implies that the student has demonstrated the relevant qualities required for successful completion of the Ph.D. Future evaluations are based on the satisfactory completion of specific remaining department and University requirements. Students who are not advanced to candidacy will normally be terminated from the program and awarded a terminal M.A. degree. In some cases, the department may require that a student complete outstanding work or complete unmet requirements before admission to candidacy. The university requires that all students must be admitted to candidacy by the beginning of the third year in residence in order to continue in the Ph.D. program. Therefore all requirements stipulated by the department must be met before registration for Autumn Quarter of the student's third year.

At any point during the degree program, evidence that a student is performing at a less than satisfactory level may be cause for a formal academic review of that student.

Grading

Doctoral students in the department must take required courses for a letter grade if available and are expected to earn a grade of 'B+' or better in each course instructed in the DLCL. Any grade of 'B' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty and the following actions may be taken: (1) the grade stands and the student's academic performance is monitored to ensure that satisfactory

progress is being made; (2) the grade stands and the student is required to revise and resubmit the work associated with that course; or (3) the student may be required to retake the course.

Ph.D. Minor in Iberian and Latin American Cultures

For a minor in Spanish, the student must complete 25 units, with a grade point average (GPA) of 3.0 or above, selected from courses numbered 200 or higher.

Students in the Ph.D. program in ILAC who choose a minor in another department should consult with advisers in that department.

Emeriti: (Professors) Bernard Gicovate, Mary Pratt, Sylvia Wynter; (Professor, Teaching) María-Paz Haro

Director: Jorge Ruffinelli

Chair of Graduate Studies: Michael P. Predmore

Chair of Undergraduate Studies: Lisa Surwillo

Professors: Michael P. Predmore, Joan Ramon Resina (Iberian and Latin American Cultures, Comparative Literature)(on leave, Autumn), Jorge Ruffinelli, Yvonne Yarbrow-Bejarano

Associate Professor: Vincent Barletta

Assistant Professors: Héctor M. Hoyos (on leave), Marília Librandi Rocha, Lisa Surwillo

Courtesy Professors: John Felstiner, Roland Greene, Hans U. Gumbrecht, Ramón Saldívar

Courtesy Associate Professors: James A. Fox, Paula Moya

Visiting Professor: Margalida Jammé Pons (Autumn)

Visiting Lecturers: Ximena Briceño, Caridad Kenna

Director of Iberian Studies Program: Joan Ramon Resina

Spanish Language Program Coordinator: Alice Miano

Portuguese Language Program Coordinator: Lyris Wiedemann

Catalan Language Program Coordinator: Joan Molitoris

Overseas Studies Courses in Iberian and Latin American Cultures

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/iberianandlatinamericancultures/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/iberianandlatinamericancultures/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/iberianandlatinamericancultures/http://bosp.stanford.edu>).

Units

OSPMADRD 40 Introduction to Literary and Cultural Analysis in the 4-5 Spanish World

OSPMADRD 41	Dissidence and Continuity: Spanish Theater, 1907 to the Present	4-5
OSPMADRD 43	The Jacobean Star Way and Europe: Society, Politics and Culture	5
OSPMADRD 45	Women in Art: Case Study in the Madrid Museums	4
OSPMADRD 46	Drawing with Four Spanish Masters: Goya, Velazquez, Picasso and Dali	3
OSPMADRD 50	Flirting with Spanish Metafiction: Cervantes, Velázquez, Fuentes, Almodóvar	4-5

OSPSANTG 118X	Artistic Expression in Latin America	5

Individually Designed Majors and Individually Designed Honors Program in Humanities

New students are not being accepted into the Individually Designed Major or the Individually Designed Honors Program in Humanities. Students who have already been accepted into these programs will be allowed to complete their course of study.

The Individually Designed Major (IDM) is overseen by the Office of Graduate and Undergraduate Studies in the School of Humanities and Sciences. (See the "Individually Designed Majors in Engineering (<http://www.stanford.edu/dept/registrar/bulletin/5152.htm>)" section of this bulletin for information about the IDM in Engineering.)

The IDM is intended for exceptional undergraduates interested in pursuing an area of study that, by virtue of its focus and intellectual content, cannot be accommodated by existing departmental or programmatic majors. Students must have a minimum GPA of 3.5 and the IDM cannot be a student's secondary major. IDM curricula are designed by students with the assistance of three faculty members of their choice; all advisers must be members of the Academic Council.

IDM programs must meet the following requirements:

1. A minimum of 75 units, with all courses at or above the 100 level.
2. A maximum of 5 units on a credit/no credit basis.
3. A maximum of 8 units in directed reading or independent study, prior approval required.
4. A core sequence in the department of one of the advisers.
5. A WIM course in the department of one of the advisers.

6. None of the units may count towards another major, minor, or other special program.

The proposed major must not be achievable through a major or combination of majors and/or minors already offered by degree-granting departments or programs. IDM students are required to complete a capstone requirement in the form of an honors thesis.

Any changes to a previously approved IDM must be endorsed by the primary adviser and approved by the Office of Graduate and Undergraduate Studies. A request by a student to make changes in his or her approved curriculum must be made sufficiently far in advance so that, should the request be denied, adequate time remains to complete the original, approved curriculum.

Individually Designed Honors Program in Humanities

The Individually Designed Honors Program (IDHP) in Humanities is overseen by the Office of Graduate and Undergraduate Studies in the School of Humanities and Sciences. This program is available to exceptional students who wish to complete an honors thesis in the Humanities and to have the notation "Honors in Humanities" recorded on their diplomas and transcripts in addition to their primary degree. This program is also available to students completing an Individually Designed Major. The requirements for the IDHP are as follows:

1. A minimum GPA of 3.5. Students must maintain a 3.5 GPA throughout the course of their Stanford undergraduate career.
2. Students must select two advisers for the honors thesis who are members of the Academic Council, at least one of whom is not from the student's major department. Both faculty members must be from humanities and arts departments.
3. Students majoring in a humanities or arts department must complete 25 additional units in the humanities and arts, chosen from areas outside of the major department. Areas of concentration include arts, literature, history, and philosophy. Courses must be chosen in consultation with the student's advisers, and a potential list of such courses submitted with the proposal.
4. Students majoring in a non-humanities and arts department must complete the equivalent of a minor in one humanities and arts department, and an additional 10 units in another. Winter-Spring IHUM courses may be used to satisfy part of this requirement. Courses must be chosen in consultation with the student's advisers, and a potential list of such courses submitted with the proposal.
5. Students must complete a capstone, majors seminar, or honors seminar in a humanities and arts department.
6. The honors thesis may be taken for a minimum of 5 units up to a maximum of 10 units. These units must be in addition to the requirements above. The student should determine the size and scope of the thesis in consultation with his or her advisers.
7. Students should consult with the Office of Graduate and Undergraduate Studies in the School of Humanities and Sciences before submitting a proposal.
8. All proposals must be submitted no later than the third week of Autumn Quarter in the student's junior year, and preferably by Spring Quarter of the sophomore year. The H&S Curriculum Committee in the Humanities and Arts reviews and approves all proposals.

International Policy Studies

Courses offered by the Ford Dorsey Program in International Policy Studies are listed under the subject code IPS on the Stanford Bulletin's ExploreCourses web site (<http://explorecourses.stanford.edu/search.jsessionid=CD85410D8306285785D60502AD7D575F?page=0&q=ips&filter-coursestatus-Active=on&view=timeschedule&collapse=&catalog=71>).

The Ford Dorsey Program in International Policy Studies (IPS) is an interdisciplinary program devoted to rigorous analysis of international policy issues. Its goal is to provide students with exposure to issues they will face in international business and public policy, and to develop the skills and knowledge to address those issues. The program allows students to specialize in democracy, development, and the rule of law; energy, environment, and natural resources; global health; international political economy; or international security and cooperation.

University requirements for the M.A. degree are described in the "Graduate Degrees (p. 38)" section of this bulletin.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in International Policy Studies and to prepare students for a professional career. This is achieved through completion of required courses in the global, quantitative, and skills core, as well as courses in an area of concentration and the capstone course. Students are also encouraged to gain experience through a summer internship and research skills through assistantships with Stanford faculty.

Admission

IPS is designed for students who have undergraduate backgrounds in economics, political science, and international relations. To enroll in the program, students must have completed prerequisite courses in microeconomics, macroeconomics, introductory statistics, international trade and international finance. Stanford courses satisfying these requirements are:

		Units
ECON 51	Economic Analysis II	5
ECON 52	Economic Analysis III	5
ECON 165	International Finance	5
ECON 166	International Trade	5

To apply or for information on graduate admission, see the Office of Graduate Admissions (<http://studentaffairs.stanford.edu/gradadmissions>) website.

Applicants from schools other than Stanford or applicants from Stanford who did not apply in their senior year should submit a graduate admission application including:

- a statement on relevant personal, academic, and career plans and goals
- official transcripts (two copies)
- three letters of recommendation
- Graduate Record Examination (GRE) scores
- a writing sample of at least eight double-spaced pages
- resume or curriculum vitae

- TOEFL scores (only required of applicants who are non-native English speakers or who did not attend undergraduate institutions where English is the language of instruction)

Applicants are expected to have a B.A. or B.S. degree from an accredited school.

Applications for admission in Autumn Quarter must be filed with supporting credentials by January 8, 2013.

Coterminal Program

Undergraduates at Stanford may apply for admission to the coterminal master's program in IPS when they have earned a minimum of 120 units toward graduation, including Advanced Placement and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. The co-terminal application requires the following supporting materials:

- two letters of recommendation from University faculty
- a writing sample of at least eight double-spaced pages
- a statement of relevant personal, academic, and career plans and goals.

Applications must be filed together with supporting materials by January 8, 2013.

University requirements for the coterminal M.A. are described in the "Coterminal (p. 36)" and "Master's (p. 39)" section of this bulletin. For University coterminal degree program rules and University application forms, see the Publications and Online Guides (<http://studentaffairs.stanford.edu/registrar/publications/#Coterm>) website.

Joint Degree Program

Students may also choose to pursue a joint J.D./M.A. in IPS degree. The joint degree program supplements the strengths of the Law School with training through IPS. Prospective students interested in the joint J.D./M.A. in IPS program may apply concurrently to both the Stanford Law School and the IPS program. Two separate application forms are required and applicants must submit LSAT scores to the Law School and GRE scores to the IPS program.

Students already enrolled at Stanford Law School may apply to the joint J.D./M.A. in IPS program no later than the end of the second year of Law School. The IPS program will make rolling admissions decisions based on the student's original application materials (GRE scores are not required in addition to LSAT scores in this case). Submission of the following is required for consideration:

- IPS Joint Degree Application Form (available from the IPS web site (http://ips.stanford.edu/joint_program))
- Law School Joint Degree Petition (available from the Law School Registrar's Office (<http://www.law.stanford.edu/program/degrees/joint>))
- Graduate Program Authorization Petition (submitted via Axxess (<http://axess.stanford.edu>))
- Enrollment Agreement for Students with Multiple Programs (available for download on the University Registrar's forms page (<http://studentaffairs.stanford.edu/registrar/forms/grad/#enrollment>))

For further information, see the "Joint Degree Programs (p. 43)" section of this bulletin and the University Registrar's site (<http://studentaffairs.stanford.edu/registrar/students/jdp-information>).

Language Requirement

Proficiency in a foreign language is required and may be demonstrated by completion of three years of university-level course work in a foreign language or by passing an oral and written proficiency examination prior to graduation. International students who speak English as a second language already meet this requirement.

Grade Requirement

All courses taken to fulfill degree requirements, except IPS 300 Issues in International Policy Studies or IPS 200 Global Affairs: Social Media and Blog Writing Workshop, must be taken for a letter grade. An overall GPA of 3.0 must be maintained.

Additional Academic Requirements

1. Students are not required to repeat a course that covers material they have already mastered. In such cases, students may petition to substitute a different course for a core required course. This flexibility does not reduce the unit requirements for the M.A. degree.
2. All graduate degree candidates must submit a Master's Degree Program Proposal to the International Policy Studies office by the end of Winter Quarter. This document must be on file in order for the student to apply to graduate.

Master of Arts in International Policy Studies (IPS)

University requirements for the master's degree are described in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

Degree Requirements

To receive the M.A. degree in International Policy Studies, students must complete the courses listed in the curriculum below. These requirements include:

- Two courses in the global core
- Four courses in the quantitative core
- Four courses in the skills core
- Six courses in the area of concentration, including the gateway course
- The practicum or master's thesis

The minimum number of units required to graduate is 73.

During the first year of the program, students must complete required coursework in statistics, econometrics, international economics, advanced economics, international relations theory, policy writing, and an introductory (gateway) course in the area of concentration. During the second year of the program, students are required to complete either the practicum or master's thesis during autumn and winter quarters. Only students with two or more years of relevant policy work may petition to write a master's thesis.

Language Requirement

In order to receive the M.A. degree in International Policy Studies, students must be proficient in a foreign language. Foreign language proficiency can be demonstrated by:

- Completion of three years of university-level coursework in a foreign language (verified by a transcript)
- Passing an oral and written proficiency exam at Stanford prior to graduation
- Status as a non-native English speaker

Prerequisite Course Work

The IPS program has five prerequisites courses that must be completed prior to matriculation. These are microeconomics, macroeconomics, introductory statistics, international trade and international finance. International trade and international finance are often covered in a single international economics course. Prerequisite courses may be taken at community colleges, at four-year institutions, or through online courses. Proof of completion, which is usually verified by a transcript, is required. The Stanford equivalents of our prerequisite courses are listed below:

	Units
ECON 51 Economic Analysis II	
ECON 52 Economic Analysis III	
ECON 165 International Finance	
ECON 166 International Trade	

Curriculum

	Units
Global Core (4)	
Colloquium (*):	1
IPS 300 Issues in International Policy Studies	
International Relations Theory (*):	3
IPS 201 Managing Global Complexity	
Quantitative Core (19-20)	
Statistics Course (*):	5
IPS 205 Introductory Statistics for Policy	
ECON 102A Introduction to Statistical Methods (Postcalculus) for Social Scientists	
Econometrics Course - Select one of the following (*):	5
IPS 206 Applied Statistics for Policy	
ECON 102B Introduction to Econometrics	
POLISCI 350B Political Methodology II	
International Economics Course - Select one of the following (*):	5
IPS 202 Topics in International Macroeconomics	
IPS 203 Issues in International Economics	
Advanced Economics Course - Select one of the following (*):	4-5
IPS 202 Topics in International Macroeconomics	
IPS 203 Issues in International Economics	
IPS 204A Microeconomics	
IPS 204B Cost-Benefit Analysis and Evaluation	
Skills Core (13-14)	
Policy Writing: Select one of the following (*):	5
IPS 210 The Politics of International Humanitarian Action	
IPS 211 The Transition from War to Peace: Peacebuilding Strategies	
IPS 213 International Mediation and Civil Wars	
IPS 235 From Innovation to Implementation: How Government Can Develop and Apply New Ideas	
IPS 244 U.S. Policy toward Northeast Asia	
IPS 264 Behind the Headlines: An Introduction to Contemporary South Asia	
IPS 314S Decision Making in U.S. Foreign Policy	
Justice: Select one of the following:	4-5
IPS 208 Justice	
POLISCI 336 Introduction to Global Justice	
Decisionmaking: Select one of the following:	4
IPS 207A Judgment and Decision Making	

IPS 207B	Public Policy and Social Psychology: Implications and Applications	
Skills Elective (3-5)		
Select one of the following six courses, or any IPS or approved area of concentration course		
CEE 251	Negotiation	
ENGR 103	Public Speaking	
FINANCE 221	Finance for Non-MBAs	
GSBGEN 315	Strategic Communication	
LAW 615	Negotiation	
ME 377	Design Thinking Bootcamp: Experiences in Innovation and Design	
Area of Concentration: Gateway and elective courses: (24)		24
Capstone (10)		
Select one to be completed during Autumn and Winter quarters of the second year		
IPS 209	Practicum	
IPS 209A	IPS Master's Thesis	
* indicates courses which must be completed during the first year of the program		
Total Units		73-77

Area of Concentration Curriculum

Students are required to choose one area of concentration from the list below and complete a total of six courses within the concentration for a minimum of 24 total units. Each area of concentration has a gateway course, which must be taken during the first year and prior to enrolling in subsequent courses. Additionally, each area of concentration has a list of approved elective courses, which can be found under the 'Related Courses' tab at the top of this page. Courses not listed under the 'Related Courses' tab have not been approved and will need to be petitioned. Petitions are reviewed by the IPS Faculty Director. The petition form (<http://ips.stanford.edu/resources>) can be found on the IPS website.

Area of Concentration Requirements:

1. Students must select an area of concentration during the first year of the program.
2. Students must complete a minimum of six courses within the area of concentration, including the gateway course, for a minimum total of 24 units.
3. Each course must be taken for a minimum of three units.
4. Students may petition to count two two-unit courses as one elective course within the area of concentration.
5. All coursework must be taken for a letter grade.
6. Students concentrating in International Political Economy are required to take IPS 202 Topics in International Macroeconomics for the international economics requirement and for the area of concentration gateway. They can select between IPS 204A Microeconomics and IPS 204B Cost-Benefit Analysis and Evaluation for the advanced economics requirement.
7. Students from any other area of concentration may fulfill the advanced economics requirement by taking IPS 204B Cost-Benefit Analysis and Evaluation only if they have a strong background in microeconomics.

Democracy, Development, and Rule of Law Gateway Course: (5)		5
IPS 230	Democracy, Development, and the Rule of Law	

Energy, Environment, and Natural Resources Gateway Course: (3-5)

CEE 207A	Energy Resources	
Global Health Gateway Course: (4)		
HUMBIO 129S	Global Public Health	
International Political Economy Gateway Course: (5)		
IPE concentrators take IPS 202 as the international economics requirements and IPS 203 as the area of concentration gateway		
IPS 202	Topics in International Macroeconomics	
IPS 203	Issues in International Economics	
International Security and Cooperation Gateway Course: (5)		
IPS 241	International Security in a Changing World	

Academic Policies

- All courses taken to fulfill requirements for the M.A. degree in International Policy Studies must be taken for a letter grade. The only exceptions are IPS 300 and IPS 200, which are only offered as "S/NC", or courses taken in the Law School, the School of Medicine, or the Graduate School of Business where a letter grade may not be offered. Pre-approval is required from the IPS student services officer in order to apply a non-letter grade course in Law, Medicine, or the Graduate School of Business toward the IPS degree.
- A maximum of 10 undergraduate units can be applied towards the IPS degree (not including ECON 102A Introduction to Statistical Methods (Postcalculus) for Social Scientists or ECON 102B Introduction to Econometrics). Courses listed at the 100-level or below are considered to be at the undergraduate level. The exceptions are History, Political Science, and Public Policy, which list undergraduate courses at the 200-level and below.
- Units from language courses do not count towards the IPS degree requirements, except in cases in which they are used to substitute for units that were made available through an exemption from a core course.
- Only students with two or more years of relevant policy work may petition to write a master's thesis (IPS 209A IPS Master's Thesis)
- Students are not required to repeat a course that covers material they have already mastered. In such cases, students may petition to substitute a different course for a core required course. This flexibility does not reduce the unit requirements for the M.A. degree.
- All graduate degree candidates must submit a Master's Degree Program Proposal to the International Policy Studies office by the end of Winter Quarter. This document must be on file in order for the student to apply to graduate.

Course Petitions

Students may petition for units from a course that is not currently listed in the Related Course (p. 449)s tab to fulfill area of concentration requirements. A course petition may also be used to apply for an exemption from a core course that covers coursework previously completed at the graduate level. The course petition (<http://ips.stanford.edu/resources>) must be submitted no later than the end of the second week of the quarter in which the course is offered. The IPS Faculty Director reviews the petition and renders a decision within one week of the petition submission.

Directed Readings

Students may arrange directed reading courses if the current course offerings do not meet particular research or study needs. Directed reading courses are independent study projects students may undertake with Stanford faculty members. Once the student has found a faculty member to support his or her studies, the student must submit the directed reading petition (<http://ips.stanford.edu/resources>) to the IPS office for review by the IPS Faculty Director. Directed reading petitions must be submitted no

later than the end of the second week of the quarter to allow sufficient time to for review. If approved, the IPS staff creates a section for the specific instructor so that the student can enroll in the course. The course is listed as IPS 299 Directed Reading and the section number is based on the particular instructor. The limitations for directed reading units are:

1. A maximum of five units per directed reading course
2. The course must be taken for a letter grade

Area of Concentration Curriculum

The Ford Dorsey Program in International Policy Studies (IPS) offers five areas of concentration:

- [Democracy, Development and Rule of Law](#) (DDRL)
- [Energy, Environment, and Natural Resources](#) (EENR)
- [Global Health](#) (GH)
- [International Political Economy](#) (IPE)
- [International Security and Cooperation](#) (ISC)

Each concentration is guided by one or more of the major international research centers at Stanford. This collaboration provides IPS students with unparalleled exposure to cutting edge research on some of the most pressing policy issues of our time. Students are required to choose one area of concentration and complete a total of six courses within the concentration at a minimum of 24 total units. Each area of concentration requires the the completion of a gateway course (indicated on the Master’s tab), which must be taken during the first year and prior to enrolling in subsequent courses. Additionally, each area of concentration has a list of approved elective courses, as shown below. See the Master’s tab for information on how to petition to apply a course toward the area of concentration that is not included in the lists below.

International Relations

Courses offered by the Program in International Relations are listed under the subject code INTNLREL on the Stanford Bulletin's ExploreCourses web site.

The Program in International Relations offers an undergraduate Bachelor of Arts program, an honors program, and a minor in International Relations.

Mission of the Undergraduate Program in International Relations

The undergraduate program in International Relations is an interdisciplinary undergraduate major allowing students to explore how global, regional and domestic factors influence relations between actors on the world stage. The program equips students with the skills and knowledge necessary to analyze choices and challenges that arise in this arena. IR majors pursue study in world politics, including courses in political science, economics, history, and language, focusing on issues such as international security, political economy, economic development, and democratization. Students must spend at least one quarter overseas. The major prepares students for careers in government and the corporate sector, and for admission into graduate programs in law, business, economics, and political science.

Learning Outcomes (Undergraduate)

The program expects its undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Program in International Relations. Students are expected to demonstrate:

1. understanding of core knowledge necessary to understand contemporary world politics.

2. ability to analyze international issues and draw correct inferences using qualitative and/or quantitative analysis.
3. ability to write clearly and persuasively, communicating ideas clearly.
4. ability to evaluate theory and critique research within the discipline.

Coterminal Programs in Related Fields

It is possible for students majoring in International Relations to work simultaneously for a coterminal master's degree in a number of related fields. Coterminal students should consult advisers in both departments or programs to ensure that they fulfill the degree requirements in both fields. For information on the M.A. program in International Policy Studies, see the "International Policy Studies (p. 446)" section in this bulletin. University requirements for the coterminal M.A. are described in the "Coterminal Degree (p. 36)s" section of this bulletin. For University coterminal degree program rules and University application forms, see the Publications and Online Guides (<http://studentaffairs.stanford.edu/registrar/publications/#Coterm>) web site.

Honors Program

The International Relations honors program offers qualified students the opportunity to conduct a major independent research project under faculty guidance. Such a project requires a high degree of initiative and dedication, significant amounts of time and energy, and demonstrated skills in research and writing.

In their junior year, students should consult with prospective honors advisers, choose the courses that provide academic background in their areas of inquiry, and demonstrate an ability to conduct independent research. Students can also select to complete an Interdisciplinary honors thesis with other programs on campus.

Prerequisites for participation include a 3.5 grade point average (GPA), a strong overall academic record, good academic standing, successful experience in writing a research paper, and submission of an acceptable thesis proposal. Students should submit their honors thesis proposal late in Winter Quarter of the junior year; please check with IR office for the exact deadline. Students are required to enroll in INTNLREL 200A International Relations Honors Field Research, in Spring Quarter of their junior year and should consider participating in Honors College (http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/OO_honors_BingHonors.html). In their senior year, honors students must enroll in INTNLREL 200B International Relations Honors Seminar in Autumn Quarter and in research units each quarter with their faculty adviser. Honors students present a formal defense of their theses in mid-May. Students must receive at least a grade of 'B+' in order to graduate with honors in International Relations.

Bachelor of Arts in International Relations

The International Relations major must be declared by the end of the sophomore year. Students must submit an acceptable major proposal to the Director of the Program in International Relations and declare IR on Axess. Students completing a double major, or fulfilling International Relations as a secondary major, are also required to file a proposal by the end of the second quarter of the junior year.

Students majoring in International Relations must complete a minimum of 70 units (35 units of Core Courses as well as 35 units of Specialization Courses). Students who declared the major prior to September 1, 2012 should consult the Stanford Bulletin for the year in which they submitted their declaration. Requirements for students declaring the major after September 1, 2012 are as follows:

Core Courses (35 units):

	Units
Required Courses: (35)	
International Politics:	5
POLISCI 1 Introduction to International Relations	
American Foreign Policy (Select one of the following):	5
POLISCI 110C America and the World Economy	
POLISCI 110D War and Peace in American Foreign Policy	
Introductory Economics (Select two of the following):	10
ECON 1A Introductory Economics A	
ECON 1B Introductory Economics B	
ECON 50 Economic Analysis I	
ECON 51 Economic Analysis II	
ECON 52 Economic Analysis III	
Comparative Governance (Select one of the following):	5
POLISCI 4 Introduction to Comparative Politics	
HISTORY 102 The History of the International System since 1914	
Skills Classes (Select one of the following):	5
ECON 102A Introduction to Statistical Methods (Postcalculus) for Social Scientists	
STATS 60 Introduction to Statistical Methods: Precalculus	
Applied Economics Courses (Select one of the following):	5
INTNLREL 149 The Economics and Political Economy of the Multilateral Trade System	
ECON 106 World Food Economy	
ECON 111 Money and Banking	
ECON 118 Development Economics	
ECON 123 Regulation and Competition in Less Developed Countries	
ECON 126 Economics of Health and Medical Care	
ECON 127 Economics of Health Improvement in Developing Countries	
ECON 150 Economic Policy Analysis	
ECON 164 Law, Economics and Politics of International Trade	
ECON 165 International Finance	
ECON 166 International Trade	
IPS 202 Topics in International Macroeconomics	
IPS 203 Issues in International Economics	
IPS 207 Governance, Corruption, and Development	
OSPBEIJ 75 China in the Global Economy	
OSPPARIS 124X Building the European Economy: Economic Policies and Challenges Ahead	
OSPSANTG 130X The Chilean Economy in Comparative Perspective	
POLISCI 110C America and the World Economy	
PUBLPOL 184 Poverty and Policies in Developing Economies	
POLISCI 218S Political Economy of International Trade and Investment	
SOC 114 Economic Sociology	
Total Units	35

Specialization Courses (35 units):

The nine specializations are:

1. Africa
2. East and South Asia
3. Europe
4. Latin America and Iberian Studies
5. MECA (Middle East and Central Asia)
6. Comparative International Governance
7. Economic Development/World Economy
8. International Security
9. Social Development/Human Well-Being

Students must complete a total of 35 units (usually seven courses) in their primary and secondary specializations. Twenty units must be from the student's primary specialization; fifteen units from the secondary specialization. Specializations are not declared on Axess nor are they printed on the diploma or transcript.

The following courses are approved for each functional specialization.

Africa

		Units
AFRICAST 112	AIDS, Literacy, and Land: Foreign Aid and Development in Africa	5
HISTORY 106A	Global Human Geography: Asia and Africa	5
HISTORY 145B	Africa in the 20th Century	5
HISTORY 248S	African Societies and Colonial States, Part 1	4-5
OSPCPTWN 31	Theory and Politics of Foreign Aid	3

Additional Policies/Requirements:

- At least one course must be an upper-division seminar or colloquium.
- At least one writing intensive course designated as Writing in the Major (WIM) for International Relations.
- No more than 25 units can be lower-division courses.
- All courses must be taken for a letter grade, and a minimum grade of 'C' is required for courses to count towards major requirements.
- Completion of one quarter study overseas either through the Stanford Overseas Studies Program or an approved non-Stanford program; non-Stanford programs must be pre-approved by the IR program before the student enrolls in the program.
- All IR majors must demonstrate proficiency in a foreign language by either completing two years of course work (second-year, third-quarter) or passing a proficiency exam. Foreign language units do not count towards the major.
- Upon approval, a maximum of 15 non-Stanford units may be applied to the major for credit.

Independent Study/Honors

		Units
INTNLREL 197	Directed Reading in International Relations	1-5
INTNLREL 198	Senior Thesis	2-10
INTNLREL 200A	International Relations Honors Field Research	3
INTNLREL 200B	International Relations Honors Seminar	3

Minor in International Relations

A minor in International Relations is intended to provide an interdisciplinary background allowing a deeper understanding of contemporary international issues. Declaration of the minor must take place no later than the end of the second quarter of the junior year. To declare, complete the application for a minor on Axess.

Students complete the minor by taking 35 units (that do not duplicate with your major) from the IR curriculum, including the following:

	Units
Required Courses: (35)	
International Politics	5
POLISCI 1 Introduction to International Relations	
American Foreign Policy (Select one of the following):	5
POLISCI 110C America and the World Economy	
POLISCI 110D War and Peace in American Foreign Policy	
Upper Division Specialization Courses (25 units)	25
Total Units	35

Complete at least 25 units in one of the following specializations:

- Africa
- East and South Asia
- Europe, Latin America, and Iberian Studies
- MECA (Middle East and Central Asia)
- Comparative International Governance
- Economic Development/World Economy

- International Security
- Social Development and Human Well-Being

Director: Michael Tomz (Political Science)

Faculty Committee: Kyle Bagwell (Economics), Judith L. Goldstein (Political Science), Norman Naimark (History), Kenneth Schultz (Political Science), Kenneth Scheve (Political Science), Kathryn Stoner (Freeman Spogli Institute)

Affiliated Faculty: Lisa Blaydes (Political Science), Gordon Chang (History), Joshua Cohen (Political Science), Larry J. Diamond (Hoover Institution), Amir Eshel (German Studies), James Fearon (Political Science), Zephyr Frank (History), Lawrence H. Goulder (Economics), Stephen H. Haber (Political Science), David J. Holloway (History, Political Science), Karen Jusko (Political Science), Terry L. Karl (Political Science), Stephen D. Krasner (Political Science), Philip Lipsky (Political Science), Beatriz Magaloni (Political Science), Robert McGinn (Management Science and Engineering), Norman Naimark (History), Rosamond Naylor (Freeman Spogli Institute for International Studies), Jean C. Oi (Political Science), William J. Perry (Freeman Spogli Institute for International Studies, Management Science and Engineering), Richard Roberts (History), Jonathan Rodden (Political Science), Scott Sagan (Political Science), Debra M. Satz (Philosophy), Andrew Walder (Sociology), Amir Weiner (History), Jeremy Weinstein (Political Science)

Other Affiliation: Jasmina Bojic (International Relations), Christophe Crombez (Freeman Spogli Institute for International Studies), John Dunlop (Hoover Institution), Erica Gould (International Relations), Katherine Jolluck (History), Anjini Kochar (Stanford Institute for Economic Policy Research), Martin W. Lewis (History), Pawel Lutomski (International Relations), Emad Mekay (International Relations), Alice Lyman Miller (Hoover Institution), Bertrand Patenaude (Hoover Institution), Robert Rakove (International Relations), Miriam Abu Sharkh (CIEPR), Stephen Stedman (Political Science), Richard Steinberg (International Comparative and Area Studies), Kathryn Stoner (Freeman Spogli Institute for International Studies)

Overseas Studies Courses in International Relations

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/internationalrelations/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/internationalrelations/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/internationalrelations/http://bosp.stanford.edu>).

Jewish Studies

The Taube Center for Jewish Studies investigates all aspects of Jewish culture, history, religion, literature, language and education from biblical times to the present. Courses are offered on the undergraduate and graduate levels in a program complemented by a full range of guest lectures, conferences, and symposia. The Center annually sponsors the Donald and Robin Kennedy Undergraduate Award for the best undergraduate essay on any theme in Jewish Studies, the Dr. Bernard Kaufman Undergraduate Research Award in Jewish Studies awarded to an undergraduate engaged in research on Jews in modernity, and the Koret Award for best essay written in Hebrew by an undergraduate.

Graduate students must apply and enroll in the program through the departments of English, History, Comparative Literature, Religious Studies, or the School of Education, and meet the requirements of those departments. All graduate students in the university with an academic interest in Jewish Studies are encouraged to participate in the Colloquium for Jews, Judaism and Jewish Culture, an ongoing opportunity to share work and meet with faculty and visiting scholars. For more information about graduate studies in Jewish Studies, please contact the Center manager or Director.

Undergraduate Program in Jewish Studies

An undergraduate program in Jewish Studies is offered through Comparative Studies in Race and Ethnicity (CSRE) (p. 340). It is interdisciplinary in that it draws together a wide range of disciplines including history, literary studies, religious studies, gender studies, education and other fields. Through its courses and extra-curricular programs, the Taube Center seeks to introduce students to the ideas and experience of the Jewish people over its entire history, from the biblical period to the Holocaust and contemporary Israeli culture.

Undergraduates interested in completing a major or minor in Jewish Studies should visit the Comparative Studies in Race and Ethnicity (CSRE) (p. 340) section of this bulletin for program descriptions and courses.

Director: Steven Weitzman (Religious Studies)

Affiliated Faculty and Teaching Staff: Zachary Baker (Stanford University Libraries), Joel Beinin (History), Jonathan Berger (Music), Arnold Eisen (Religious Studies, emeritus), Amir Eshel (German Studies), John Felstiner (English, emeritus), Shelley Fisher Fishkin (English), Charlotte Fonrobert

(Religious Studies), Avner Greif (Economics), Katherine Jolluck (History), Ari Kelman (Education), Jon Levitow (Language Center), Mark Mancall (History, emeritus), Norman Naimark (History), Reviel Netz (Classics), Jack Rakove (History), Aron Rodrigue (History), Gabriella Safran (Slavic Languages and Literatures), Vered KartiShemtov (Language Center, Comparative Literature), Lee Shulman (Education, emeritus), Peter Stansky (History, emeritus), Amir Weiner (History), Sam Wineburg (Education), Steven Zipperstein (History)

Hebrew Instructional Staff: Gallia Porat, Estee Greif

Visiting Faculty: Arie Dubnov (History)

Writer in Residence: Maya Arad

Language Center

The Stanford Language Center oversees all language instruction at Stanford. The center's charge is to guarantee that Stanford language programs are of the highest quality; to develop and administer achievement and proficiency tests needed to implement the language requirement; to provide technical assistance and support to the graduate students, lecturers, and faculty who deliver Stanford's language instruction; and to take leadership in research and development efforts in language learning. The Language Center is a unit within the Division of Literatures, Cultures, and Languages (p. 340).

Courses

Courses offered by the Language Center are listed under the following subject codes on the Stanford Bulletin's ExploreCourses web site:

- AMELANG (African and Middle Eastern Languages and Literatures) (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=AMELANG&filter-catalognumber-AMELANG=on>)
- ARABLANG (Arabic Language) (<https://explorecourses.stanford.edu/search?view=catalog&catalog=71&page=0&q=ARABLANG&filter-catalognumber-ARABLANG=on&filter-coursestatus-Active=on>)
- CATLANG (Catalan Language) (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=CATLANG&filter-catalognumber-CATLANG=on>)
- CHINLANG (Chinese Language) (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=CHINLANG&filter-catalognumber-CHINLANG=on>)
- EFSLANG (English for Foreign Students) (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=EFSLANG&filter-catalognumber-EFSLANG=on>)
- FRENLANG (French Language) (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=FRENLANG&filter-catalognumber-FRENLANG=on>)
- GERLANG (German Language) (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=GERLANG&filter-catalognumber-GERLANG=on>)
- IBERLANG (<http://explorecourses.stanford.edu/search?sessionid=9EE7576BA00BF8D0937CF47D0068C127?view=catalog&catalog=&page=0&q=IBERLANG&filter-catalognumber-IBERLANG=on&filter-coursestatus-Active=on>) (Iberian Languages)

- ITALLANG (Italian Language) (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=ITALLANG&filter-catalognumber-ITALLANG=on>)
- JAPANLNG (Japanese Language) (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=JAPANLNG&filter-catalognumber-JAPANLNG=on>)
- KORLANG (Korean Language) (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=KORLANG&filter-catalognumber-KORLANG=on>)
- PORTLANG (Portuguese Language) (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=PORTLANG&filter-catalognumber-PORTLANG=on>)
- SLAVLANG (Slavic Language) (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=SLAVLANG&filter-catalognumber-SLAVLANG=on>)
- SPANLANG (Spanish Language) (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=SPANLANG&filter-catalognumber-SPANLANG=on>)
- SPECLANG (Special Language) (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=SPECLANG&filter-catalognumber-SPECLANG=on>)
- TIBETLNG (Tibetan Language) (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=TIBETLNG&filter-catalognumber-TIBETLNG=on>)

Beginning-Level, First-Year Courses

Beginning-level, first-year language courses require no previous knowledge of the language. The beginning-level sequence emphasizes development of the full range of language skills, reading, listening comprehension, the use of grammatical structures, and oral and written communication, through a variety of learning themes. Individual, small group, interactive work and multimedia-based activities reinforce language skills and provide the platform for adapting the curriculum to specific student learning goals. Cultural awareness is a strong component of the curriculum.

Intermediate-Level, Second-Year Courses

Intermediate-level, second-year language courses require completion of the beginning sequence, or consent of instructor. The intermediate-level sequence focuses on continuous mastery and development of learning skills that help students to converse accurately and more fluently, incorporate more advanced grammatical structures in their oral and written work, use idiomatic expressions in the right context, and write simple compositions. Curricular objectives and enhanced understanding of the culture are built into the courses through a multimodal approach.

Advanced-Level, Third-Year Courses

Advanced-level, third-year language courses require completion of the intermediate-year sequence and consent of the program coordinator. The advanced-level sequence focuses on accurate understanding and use of structures through authentic texts and multimedia materials, and readings from various genres. Individual learning goals and student proficiency are

taken into account to provide a learning environment that helps students become more autonomous learners.

Proficiency in Foreign Language Notation

A student who demonstrates levels of achievement equivalent to those expected at the end of the third quarter of the third year of study in a language may be awarded the notation "proficiency in" that language on the official transcript. Successful candidates tend to have completed the third year or beyond of language study at Stanford and spent considerable time studying abroad in the foreign language.

In order to receive the proficiency notation and for it to appear on the official transcript, the student must complete the following oral and written requirements according to the timeline below. Successful completion of the oral component is required before proceeding with the written component.

Both oral and written components must be completed no later than the quarter preceding the graduating quarter.

For more information contact Patricia de Castries (patricia@stanford.edu).

Application and Oral Component: Two quarters prior to graduation

1. Notify the Language Center via email of the intent to pursue the notation and request an official Oral Proficiency Interview (OPI). Since this is a formal interview conducted according to national academic and professional standards, at least two quarters of lead time are essential for scheduling.
2. Complete the 30 minute Oral Proficiency Interview as scheduled through the Language Center and conducted by a certified OPI tester. The interview must take place no later than one quarter prior to graduation and be administered on campus
3. Receive an official rating of Advanced Low or higher on the Foreign Service Institute/American Council on the Teaching of Foreign Languages (FSI/ACTFL) scale of oral proficiency, except in the non-cognate languages which require a minimum rating of Intermediate High. Students who do not meet the minimum level for the notation will nonetheless receive an official OPI rating, which carries national recognition of their oral proficiency.

Writing Component: One quarter prior to graduation

1. Once approved to continue with the writing component, schedule a Writing Proficiency Test (WPT) through the Language Center. As an official writing assessment, the 90 minute exam must take place no later than one quarter prior to graduation and as soon as possible after the interview. The WPT is administered on campus and rated by a certified rater.
2. Receive an official rating of Advanced Low or higher on the Foreign Service Institute/American Council on the Teaching of Foreign Languages (FSI/ACTFL) scale of writing proficiency, except in the non-cognate languages which require a minimum rating of Intermediate High. Students who do not meet the minimum level for the notation will nonetheless receive an official WPT rating, which carries national recognition of their writing proficiency.

Proficiency Notation Timetable

1. Graduating Spring/Summer: Apply Autumn. Interview Autumn/Winter: writing Winter.
2. Graduating Autumn: Apply Winter, interview Winter/Spring: writing Spring.

3. Graduating Winter: Apply Spring, interview Spring/Autumn: writing Autumn.

Overseas Studies Courses in the Language Center

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/languagecenter/http://explorecourses.stanford.edu>) web site or the Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/languagecenter/http://bosp.stanford.edu>) web site. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

African and Middle Eastern Languages and Literatures Program

The African and Middle Eastern Languages and Literatures Program offers classes in Hebrew, Persian, Swahili, Turkish, and African languages not regularly taught at Stanford. Based on current funding and student requests, the courses planned for 2012-13 are listed in the "ExploreCourses" section of this Bulletin under the AMELANG (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=AMELANG&filter-catalognumber-AMELANG=on>) program. Additional languages may still be offered upon request, provided funding is available. Requests for the 2013-14 academic year should be made by Spring Quarter of this year to the AME program office by email to ebemhar@stanford.edu.

First, second, and third year each refer to the yearly sequence of language study. Letter suffixes refer to the quarter within the sequence: "A" courses are typically taught in Autumn; "B" courses, in Winter; and "C" courses in Spring. Courses are 3, 4 or 5 units as listed. In some circumstances, a beginning or intermediate course may be offered in alternate years. Language courses may not be repeated for credit, and must be taken in sequence.

Fulfilling the Language Requirement in AME

Students can fulfill the language requirement by taking an African or Middle Eastern Language. At least 12 units are needed to complete the requirement. Normally, the requirement is completed after the first quarter of intermediate-level language. In the case of African and Middle Eastern Languages taught only at the beginning level, students may petition the Language Center to fulfill the requirement by taking a directed reading course in the fourth quarter. Contact patricia@stanford.edu for more information.

Students who have taken courses in the relevant language at another institution, or have previous knowledge of the language, can request to be tested. Tests are comprised of two parts, written and oral. Students must display first-year level proficiency in the requested language to fulfill the requirement. Testing is guaranteed only for languages currently offered. Students planning to take a test must contact the AME Program no later than the Spring Quarter of their sophomore year. To submit a request for language testing, or to request that a language be taught, and for further information on the program, see <https://www.stanford.edu/dept/lc/language/courses/africanMidEastern/index.html>.

Special Language Program

The Special Language Program (SLP) offers foreign languages not otherwise taught at Stanford. Based on current funding and student requests, the courses planned for 2012-13 are listed in the "Explore Courses (<http://explorecourses.stanford.edu>)" section of this Bulletin under the Special Languages (SPECLANG) Program; however, not every course listed is taught. Additional languages may still be offered upon request, provided funding is available. Requests for the 2013-14 academic year should be made by Spring Quarter of this year at the Special Language Program office (epriomas@stanford.edu).

First-year courses are offered for 3, 4 or 5 units, as listed. The 3-unit first-year courses are offered on a satisfactory/no credit basis only. The 4 and 5-unit first-year courses are offered with a letter grade option. Second-year as well as third-year courses are offered with a grade option. Most 3-unit language courses are offered for a two-year, three quarter sequence.

First, second, and third year each refer to the sequence of language study. Letter suffixes refer to the quarter within the sequence:

'A' suffix courses are typically taught Autumn.

'B' suffix courses are typically taught Winter.

'C' suffix courses are typically taught Spring.

In some circumstances, a beginning or intermediate course may be offered in alternate years. For more information, see <http://www.stanford.edu/dept/SLP>. Language courses may not be repeated for credit, and must be taken in sequence.

Fulfilling the Language Requirement in Special Language Program

Students can fulfill the language requirement by taking courses offered by the Special Language Program. At least 12 units are needed to complete the requirement. Students who have already taken courses in the relevant language at another institution, or who have previous knowledge of the language, can request to be tested. Tests are comprised of written and oral parts. A student must display first-year level proficiency in the requested language in order to fulfill the requirement. Testing is guaranteed only for these languages currently offered. Students planning to take a test must contact the Special Language Program no later than the Spring Quarter of sophomore year. To submit a request for language testing, or to request a language, apply via the Special Language Program (<http://www.stanford.edu/dept/SLP>) web site.

Minor in Middle Eastern Languages, Literatures, and Cultures

The undergraduate minor in Middle Eastern Languages, Literatures, and Cultures has been designed to give students majoring in other departments an opportunity to gain a substantial introduction to Middle Eastern and African languages, and to the cultures and civilizations of the Middle East and Africa. Contact the minors adviser before declaring at kyobeid@stanford.edu.

Students declaring a minor must do so no later than the last day of the fourth quarter before degree conferral. For example, students graduating in June (Spring Quarter) must declare the minor no later than the last day of Spring Quarter of their junior year. If a student is not able to meet this deadline, he or she may petition the Language Center director and request a revised declaration date, which may be granted at the director's discretion.

The requirements for a minor in Middle Eastern Languages, Literatures, and Cultures are:

1. Courses for the minor must be taken for a letter grade unless only offered for faculty-elected satisfactory/no credit.
2. All courses must be completed with a letter grade of 'C' or better.
3. Courses may not overlap with those taken for a major course of study.
4. Relevant courses taken to fulfill a GER may count toward fulfilling both minor and GER requirements.

Cultural Studies Track

Requirements are:

1. Completion of the language prerequisite at the beginning level, or a demonstrated equivalent competence.
2. In the case of Arabic, completion of six non-language courses, including three from the AME program.
3. In the case of Hebrew and African languages, completion of six non-language related courses. Consult minor adviser for course options.

Language Track

- Option one:
 - A. Completion of prerequisite language study at the beginning level, or a demonstrated equivalent competence.
 - B. Completion of one year of language study at the intermediate level.
 - C. Completion of three related non-language courses, including, in the case of Arabic, one of the ARABLANG 10-16 (formerly AMELANG 30-36) series. ARABLANG 10 Arabic Calligraphy is offered this year. Consult the minor adviser (kyobeid@stanford.edu) for course options.
- Option two:
 - A. Completion of prerequisite language study at the advanced level in Arabic, Hebrew, or an African language, for the equivalent of three years of language study.
 - B. Completion of one African and Middle Eastern literature and culture course relevant to the language studied in the case of Arabic or Hebrew; or, in the case of African languages, completion of one non-language African Studies course relevant to the language studied. Consult the minor adviser (kyobeid@stanford.edu) for course options.
- Option three:

Completion of four years of language study, at least two of which must be concluded at Stanford.

Minor in Modern Languages

An undergraduate minor in Modern Languages is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Language Center. Students should consult the "Division of Literatures, Cultures, and Languages (p.)" section of this bulletin for further details about the minor and its requirements.

Director: Elizabeth Bernhardt

Associate Director: Joan Molitoris

Assistant Director: Patricia de Castris

African and Middle Eastern Languages

Coordinator: Elizabeth Bernhardt (Director, Language Center)

Senior Lecturer: Vered Shemtov (Jewish Language and Literature)

Lecturers: Ameneh Shervin Emami, Ebru Ergul, Shahla Fahimi, Estee Greif, Nursevinc Karakus (Fulbright Scholar) Jon Levitow, Gallia Porat, Samuel Mukoma

Arabic Language

Senior Lecturer: Khalil Barhoum (on professional development leave)

Lecturers: Samar Ahmed (Fulbright Scholar), Salem Aweiss, Touria Boumehdi, Eva Hashem, Khalid Obeid (Coordinator and Minor Adviser), Ramzi Salti

Catalan Language

Coordinator: Joan Molitoris (Associate Director, Language Center)

Lecturer: to be announced

Chinese Language

Coordinator: Chao Fen Sun (Professor, Asian Languages and Cultures)

Lecturers: Marina Chung, Michelle DiBello, Sik Lee Dennig, Nina Lin, Yu-hwa Liao Rozelle, Le Tang, Huazhi Wang, Hong Zeng, Youping Zhang, Xiaofang Zhou, Xiaiya Zhu

English for Foreign Students

Director and Senior Lecturer: Philip Hubbard

Lecturers: Robyn Brinks Lockwood, Carole Mawson, Andrea Kevech, Andrew Oman, Kenneth Romeo, Constance Rylance, Seth Streichler, Dominic Wang

French Language

Lecturers: Jane Dozer-Rabedeau, Heather Howard (Coordinator), Miranda Kershaw, Marie Lasnier, Guillaume Massas, Vera Shapirshsteyn

German Language

Senior Lecturers: William E. Petig, Kathryn Strachota

Lecturer: Paul Nissler (Coordinator)

Iberian Languages

Coordinator: Joan Molitoris (Associate Director, Language Center)

Lecturer: Joseba Iñaki Lopez de Luzuriaga

Italian Language

Lecturers: Marta Baldocchi, Anna Cellinese (Coordinator), Alessandra McCarty, Giovanni Tempesta

Japanese Language

Coordinator: Yoshiko Matsumoto (Professor, Asian Languages and Cultures)

Lecturers: Hisayo O. Lipton, Momoyo K. Lowdermilk, Emiko Yasumoto Magnani, Kiyomi Nakamura, Michelle Rogoyski, Momoe Saito Fu (Winter and Spring only), Yoshiko Tomiyama

Korean Language

Lecturers: Hee-Sun Kim (Coordinator), Su Kyung Seo (Fulbright Scholar)

Portuguese Language

Senior Lecturer: Lyris Wiedemann (Coordinator)

Lecturer: Fernanda Consoni, Agripino Silveira

Slavic Language

Senior Lecturer: Rima Greenhill

Lecturer: Eugenia Khassina (Coordinator)

Spanish Language

Lecturers: Vivian Brates, Loreto Catoira, Citlalli del Carpio, Irene Corso, Alice Miano (Coordinator), Joan Molitoris (Associate Director, Language Center), Paul Nissler, Carimer Ortiz Cuevas, Veronika Reinhold, Kara Sanchez, Ana Maria Sierra, María Cristina Urruela, Hae-Joon Won

Special Language Program

Lecturers: Pratibha Bhattacharya (Fulbright Scholar), Cathy Haas, Dzung Nguyen, Eva Prionas (Coordinator, Modern Greek Language and Literature), Brajesh Samarth

Tibetan Language Program

Lecturer and Coordinator: Robert W. Clark

Overseas Studies Courses in the Language Center

Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsocieties/languagecenter/http://explorecourses.stanford.edu>) web site or the Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsocieties/languagecenter/http://bosp.stanford.edu>) web site.

Overseas Studies Courses in Chinese

	Units	
OSPBEIJ 1C	First-Year Modern Chinese, First Quarter	5
OSPBEIJ 3C	First-Year Modern Chinese, Third Quarter	5
OSPBEIJ 6C	Beginning Conversational Chinese, First Quarter	2
OSPBEIJ 21C	Second-Year Modern Chinese	5
OSPBEIJ 23C	Second-Year Modern Chinese	5
OSPBEIJ 101C	Third-Year Modern Chinese	5
OSPBEIJ 103C	Third-Year Modern Chinese	5
OSPBEIJ 211C	Fourth-Year Modern Chinese	5

Overseas Studies Courses in French

	Units	
OSPPARIS 22P	Intermediate French I	5

OSPPARIS 23P	Intermediate French II	4-5
OSPPARIS 124P	Advanced French I	4-5
OSPPARIS 125P	Advanced French II	4-5

Overseas Studies Courses in German

	Units	
OSPBER 1Z	Accelerated German: First and Second Quarters	8
OSPBER 2Z	Accelerated German, Second and Third Quarters	8
OSPBER 3B	German Language and Culture	5
OSPBER 21B	Intermediate German	5
OSPBER 100B	Berlin Heute	2
OSPBER 101B	Advanced German	5

Overseas Studies Courses in Italian

	Units	
OSPFLOR 21F	Accelerated Second-Year Italian, Part A	5
OSPFLOR 22F	Accelerated Second-Year Italian Part B,	5
OSPFLOR 31F	Advanced Oral Communication: Italian	3

Overseas Studies Courses in Japanese

	Units	
OSPKYOTO 2K	First-Year Japanese Language, Culture, and Communication, Second Quarter	5
OSPKYOTO 3K	First-Year Japanese Language, Culture, and Communication, Third Quarter	5
OSPKYOTO 21K	Second-Year Japanese Language, Culture, and Communication, First Quarter	5
OSPKYOTO 22K	Second-Year Japanese Language, Culture, and Communication, Second Quarter	5
OSPKYOTO 23K	Second-Year Japanese Language, Culture, and Communication, Third Quarter	5
OSPKYOTO 102K	Third-Year Japanese Language, Culture, and Communication, Second Quarter	5
OSPKYOTO 103K	Third-Year Japanese Language, Culture, and Communication, Third Quarter	5
OSPKYOTO 210K	Advanced Japanese	5

Overseas Studies Courses in Russian

	Units	
OSPMOSC 10M	Intensive First-Year Russian	8
OSPMOSC 51M	Second-Year Russian	5
OSPMOSC 111M	Third-Year Russian	5
OSPMOSC 177M	Fourth-Year Russian	5

Overseas Studies Courses in Spanish

		Units
OSPMADRD 102M	Composition and Writing Workshop for Students in Madrid	3-5
OSPMADRD 120	The Sounds of Spanish	5
OSPSANTG 12S	Accelerated Second-Year Spanish, Part I: Chilean Emphasis	5
OSPSANTG 13S	Accelerated Second-Year Spanish, Part II: Chilean Emphasis	5
OSPSANTG 102S	Composition and Writing Workshop for Students in Santiago	3-5

Latin American Studies

Courses offered by the Interdisciplinary Program in Latin American Studies are listed under the subject code LATINAM on the Stanford Bulletin's ExploreCourses web site (<https://explorecourses.stanford.edu/search?filter-term-Autumn=on&filter-catalognumber-LATINAM=on&filter-term-Summer=on&page=0&q=LATINAM&filter-coursestatus-Active=on&view=catalog&filter-term-Spring=on&collapse=&filter-term-Winter=on&catalog=71>).

The Center for Latin American Studies (CLAS) supports research and teaching in all fields of study as they relate to Latin America. Academic programs encourage interdisciplinary approaches and draw on the expertise of nearly sixty active affiliated faculty members representing Stanford's various schools and departments. Stanford University Libraries' substantial Latin American collections are valuable resources for students, faculty, and visiting researchers alike. Each year CLAS hosts a number of Tinker Visiting Professors, highly distinguished Latin American and Iberian scholars who come to Stanford to teach a course in their field of specialization. The Center for Latin American Studies maintains a highly active public events calendar and provides funding to students and faculty for a variety of research, teaching, internship, and conference activities. Stanford offers three formal academic programs in Latin American Studies: an Undergraduate Minor, Interdisciplinary Honors, and a Master of Arts degree. The Center is a U.S. Department of Education Title VI National Resource Center for Latin America.

Undergraduate Programs in Latin American Studies

Stanford University offers an interdisciplinary honors and a minor in Latin American Studies. Although we currently do not offer an undergraduate major in Latin American Studies, students may concentrate on Latin America through other departmental and interdisciplinary degree programs, such as Anthropology (p. 261), History (p. 421), Political Science (p. 511), Iberian and Latin American Cultures (p. 439), or International Relations (p. 452). Interested students should consult the relevant departmental web sites and sections of this bulletin for further information.

Undergraduates can obtain a coterminal M.A. degree in Latin American Studies while concurrently working on their undergraduate major by applying during the regular admissions cycle no later than their senior year.

Financial Aid

Each summer, CLAS awards grants to a small number of undergraduates to complete internships in Latin America. Applications include a proposal, academic transcript, and letters of recommendation. Students from any department are eligible to apply. See the Center for Latin American Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/latinamericanstudies/http://las.stanford.edu>) website.

Students in undergraduate programs who plan to enroll in Portuguese or Quechua language and area or international studies courses may be eligible for Academic Year and Summer Foreign Language and Area Studies (FLAS) fellowships. Recipients of FLAS fellowships must be American citizens or permanent residents. For detailed program information and eligibility, see the Center for Latin American Studies (<http://las.stanford.edu>) website.

Graduate Programs in Latin American Studies

The one-year master's program in Latin American Studies is designed for students who have experience working, living, or studying in Latin America or Iberia and little prior course work on Latin America.

Stanford University does not offer a Ph.D. program in Latin American Studies; however, doctoral candidates may concentrate on Latin America through other departmental programs, such as Anthropology, History, Political Science, or Iberian and Latin American Cultures. Interested applicants should consult the relevant departmental web sites and sections of this bulletin for admissions information and further details.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Latin American Studies and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

Admission

The application deadline for the 2013-14 academic year is January 8, 2013. Applicants submit an online application, including a 500-word statement of purpose, resumé, 10-15 page double-spaced academic writing sample, and three letters of recommendation. In addition, all applicants must submit official transcripts and GRE general test scores. TOEFL scores are required of applicants whose first language is not English or who did not earn a degree from an undergraduate institution where English is the primary language of instruction. For information on university graduate admissions and to access the online application, visit the Office of Graduate Admissions (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/latinamericanstudies/http://gradadmissions.stanford.edu>) website.

Applicants must meet the University admission requirements, have a working knowledge of Spanish or Portuguese at the university third-year level or higher, and have experience working, living, or studying in Latin America or Iberia prior to admission.

CLAS takes a broad approach to evaluating applications for admission. As important as GRE scores and grades are the applicant's essay, letters of recommendation, academic writing sample, and the experiences and goals conveyed through the personal statement and resume.

Students interested in pursuing the joint degree program in Latin American Studies and Law (J.D.) or a dual degree in Latin American Studies and Business (M.B.A.) or Medicine (M.D.) must apply to each program

separately and be accepted by both. Details about the joint and dual degree programs can be found in the "Master's (p. 466)" tab in this section.

Financial Aid

The Center for Latin American Studies provides several graduate fellowships as well as limited course assistantships with the Tinker Visiting Professors each quarter.

Students in graduate programs who plan to enroll in Portuguese or Quechua language and area or international studies courses may be eligible for Academic Year and Summer Foreign Language and Area Studies (FLAS) fellowships. Recipients of FLAS fellowships must be American citizens or permanent residents. Applicants to the M.A. program have priority in the annual FLAS competition; in recent years CLAS has also awarded FLAS fellowships to students enrolled in the School of Engineering and the School of Law. For detailed program information and eligibility, see the Center for Latin American Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/latinamericanstudies/http://las.stanford.edu>) website.

CLAS awards Working Group grants to graduate students across the University who wish to organize events such as lectures, speaker series, symposia, exchange of working papers, and collaborative research efforts. For detailed program information and eligibility, see the Center for Latin American Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/latinamericanstudies/http://las.stanford.edu>) website.

Minor in Latin American Studies

The Minor in Latin American Studies is open to students in any major. Students who wish to complete the minor must declare online (through Axess (<http://axess.stanford.edu>)) and submit a proposal of course work no later than the second quarter of their junior year. The minor must be completed by the second quarter of the senior year. Units taken for a student's major cannot be double-counted towards the minor.

Requirements for the minor include:

1. Completion of 25 units as follows:
 - A. A 5-unit course surveying Latin America: either HISTORY 170B Culture, Society and Politics in Latin America or an approved substitute.
 - B. 20 additional units in a number of courses which together comprise a coherent focus on a theoretical problem or issue of the region, such as (but not limited to) culture and identity, political economy, or sustainable development. All courses, with the exception of Overseas Studies courses, must be at the 100-level or higher. For approved courses, see the "Related Courses (p. 467)" tab in this section.
 - C. At least 10 of the 25 units must be completed at Stanford. All courses to be counted toward the minor must be taken for a letter grade.
2. Fulfill the Foreign Language Requirement. The minimum requirement for completion of the minor in Latin American Studies is advanced proficiency in Spanish or Portuguese by any one of the following means:
 - A. Completion of seven quarters of college-level study of Spanish or Portuguese.
 - B. Completion of a course taught in Spanish or Portuguese at the 100-level or higher, with a letter grade of 'B' (3.0) or higher. This may be a course on Spanish or Portuguese language or literature, or some other subject, as long as it fulfills the above criteria.

C. Achievement of the advanced proficiency level on the ACTFL scale in a test administered by the Stanford Language Center. Contact the Language Center (p. 459) for test dates and procedures.

3. Recommended: experience in Latin America such as study abroad, field research, or an internship.

Upon completion of all requirements, the CLAS subcommittee on undergraduate programs authorizes the designation of the Minor in Latin American Studies on the student's transcript.

Honors in Latin American Studies

The Honors Program in Latin American Studies is open to undergraduate students in any major. The aim of the honors program is to prepare students to pursue individualized research on Latin America, culminating in an honors thesis completed under the supervision of a faculty adviser. The honors program is particularly suited to the student who wishes to go on to graduate school or pursue employment in an institution emphasizing research and independent work. Although not required, students are encouraged to undertake independent field research in Latin America for their thesis. It is strongly recommended that students enroll in (1 unit), during their sophomore or junior year for an overview of research design and methods for international field research.

Admission to the honors program is by application by the end of the junior year. Applications are reviewed and approved by the CLAS director and associate director. Applicants must have a cumulative grade point average (GPA) of 3.3 (B+) or higher and maintain this average in courses taken to satisfy the requirements. Courses must be taken for a letter grade where that option is available. Courses credited toward LAS honors may be double-counted toward the student's major requirements.

To graduate with interdisciplinary honors in Latin American Studies a student must:

1. Complete a total of 35 units in courses certified for honors by the Center for Latin American Studies, distributed as follows:
 - A. A 5-unit survey course, normally taken in the sophomore year: either or an approved substitute.
 - B. For breadth: two 4-5-unit courses at the 100-level or higher with a focus on Latin America. These courses are normally taken during the sophomore and junior years. For approved courses, see the "Related Courses (p. 467)" tab in this section.
 - C. For depth: one 4-5-unit course, approved by the honors adviser, at the 100-level or higher with a focus on Latin America that explores in depth an issue of particular interest to the student. See the "Related Courses (p. 467)" tab in this section.
 - D. (1-10 units), under the supervision of the honors adviser. Normally these units are spread over two or three quarters of the senior year and are devoted to the completion of the honors thesis.
 - E. Honors Seminar in Latin American social history, taken in the senior year. Please consult the Center for Latin American Studies website for the 2012-13 honors seminar.
 - F. Additional courses at the 100-level or higher focusing on Latin America to bring the total to 35 units. Up to 5 units may come from study of Spanish or Portuguese beyond the seventh quarter. For approved courses, see the "Related Courses (p. 467)" tab in this section.

- G. Of the courses applied to 'b' and 'c' above, up to 10 units may be completed in Overseas Studies, and up to 5 units may be taken as directed individual study. For approved Overseas Studies courses, see the "Related Courses (p. 467)" tab in this section.
 - H. All courses to be counted toward the honors program must be taken for a letter grade.
2. Fulfill the Foreign Language Requirement. The minimum requirement for completion of the honors program in Latin American Studies is advanced proficiency in Spanish or Portuguese by any one of the following means:
 - A. Completion of seven quarters of college-level study of Spanish or Portuguese.
 - B. Completion of a course taught in Spanish or Portuguese at the 100-level or higher, with a letter grade of 'B' (3.0) or higher. This may be a course on Spanish or Portuguese language or literature, or another subject, as long as it fulfills the above criteria.
 3. Achievement of the advanced proficiency level on the ACTFL scale in a test administered by the Stanford Language Center. Contact the Language Center (p. 459) for test dates and procedures.
 4. Submit an honors thesis that meets standards of scholarly excellence and is approved by the thesis adviser. If graduating in June, participate in the LAS honors symposium in late May or early June.

Master of Arts in Latin American Studies

The Master of Arts in Latin American Studies is an interdisciplinary program. The curriculum consists of a core set of courses surveying the history, politics, society, ecology, and culture of the Latin American region; advanced language training; and in-depth course work. In consultation with a faculty adviser, students select a course of study suited to their individual interests.

Coterminal Bachelor's and Master's Degrees in Latin American Studies

Undergraduates at Stanford may apply for admission to the coterminal master's program in Latin American Studies when they have earned a minimum of 120 units toward graduation, including advanced placement and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. The application deadline for the 2013-14 academic year is January 8, 2013.

Coterminal applicants must submit:

- an application form
- a 500-word statement of purpose
- a resumé
- a 10-15 page double-spaced academic writing sample
- three letters of recommendation
- a Stanford transcript
- GRE general test scores

Coterminal applicants must have a minimum cumulative GPA of 3.5 and a working knowledge of Spanish or Portuguese at a university third-year level or higher.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (p. 36)" section of this bulletin. For University coterminal degree program rules and University application forms, see the Publications and Online Guides (<http://studentaffairs.stanford.edu/registrar/publications/#Coterm>) web site.

Degree Requirements

University requirements for the master's degree are described in the "Graduate Degrees General Requirements (p. 38)" section of this bulletin.

The program requires completion of a minimum of 45 graduate units. Each student is assigned a faculty adviser who works with the student to develop a customized program of study. All courses for the M.A. degree must be at the 100-level or higher, with at least half being at the 200-level or higher.

Candidates to the M.A. in Latin American Studies must complete the following:

1. Core courses (15 units): one core 5-unit course in each of three fields of specialization:

	Units
a. Culture and Society HISTORY 371 Graduate Colloquium: Explorations in Latin American Social History	5
b. Environment and Ecology ANTHRO 262 Indigenous Peoples and Environmental Problems	5
c. Political Economy POLISCI 348S Latin American Politics	5
Total Units	15

3. *Related courses (15 units)*: three courses (5 units each), one from each of the three fields of specialization listed in '1' above. For approved courses, see the "Related Courses (p. 467)" tab in this section.
4. *Elective courses (10-15 units)*: three elective courses (3-5 units each) in one of the three fields of specialization (see '1' above) from across the University's offerings, selected with guidance and approval from the faculty adviser.
5. *Language requirement*: at least 3 units of course work on a second Latin American language. Students proficient in both Spanish and Portuguese must take an advanced third-year language course in either Spanish or Portuguese; students proficient in only Spanish or only Portuguese must take a basic course in the language in which they are not already proficient. Up to 6 units of foreign language coursework may be applied toward the M.A. degree. All foreign language coursework must be taken at the 100-level or higher.
6. *Seminar requirement*: 3 units (1 per quarter) of:

	Units
LATINAM 200 Seminar on Contemporary Issues in Latin American Studies	1
8. *Thesis option*: students may elect to write a master's thesis; they may register for LATINAM 398 Master's Thesis for up to 10 units of thesis research under the guidance of an Academic Council faculty member. Thesis units may be counted toward the elective field unit requirements (requirement number 3, above).
9. *Grade requirements*: All courses to be counted toward the MA (with the only exception being LATINAM 200 Seminar on Contemporary Issues in Latin American Studies) must be taken for a letter grade and earn a B- or better. M.A. candidates must maintain a cumulative GPA of 3.0 or higher.

Joint Degree Program in Latin American Studies and Law

The joint degree program in Latin American Studies and Law allows students to pursue the M.A. degree in Latin American Studies concurrently with the Doctor of Jurisprudence (J.D.) degree, with a significant number of courses that may apply to both degrees. It is designed to train students interested in a career in teaching, research, or the practice of law related to Latin American legal affairs. Students must apply separately to the Latin American Studies M.A. program and to the Stanford School of Law and be accepted by both. Completing this combined course of study requires approximately four academic years, depending on the student's background and level of language training. For more information, see the "Joint Degree Programs (p.)" section of this bulletin and consult with the program offices for the two programs.

Dual Master's Degree with Medicine or Business

Stanford offers dual degree programs that grant an M.A. degree in Latin American Studies and a Master of Business Administration degree or a Medical Doctor degree. Students must apply separately to and be accepted by both the Latin American Studies M.A. program and the Graduate School of Business or School of Medicine.

Director of the Center: Rodolfo Dirzo

Associate Director: Elizabeth Sáenz-Ackermann

Tinker Visiting Professors: Leonor Arfuch, Roberto J. Blancarte, Andres Laguens, Roberto Morales, Pablo Neumeyer, Vidal Romero, Liliana Suárez

Affiliated Faculty and Staff:

Anthropology: Clifford Barnett (emeritus), George Collier (emeritus), Lisa Curran, Carolyn Duffey, William Durham, James Fox, Angela Garcia, John Rick, Ian Robertson

Art and Art History: Enrique Chagoya

Biology: Gretchen Daily, Rodolfo Dirzo, Harold Mooney (emeritus), Peter Vitousek, Virginia Walbot

Carnegie Institution for Science: Gregory Asner

Comparative Literature: Roland Greene, Hans Ulrich Gumbrecht, José David Saldívar

Dance: Susan Cashion (emerita)

Earth Sciences, School of: Pamela Matson

Economics: Roger Noll (emeritus)

Education, School of: Martin Carnoy, Amado Padilla, Guadalupe Valdés

Engineering, School of: Jenna Davis, Bruce Lusignea (emeritus), Leonard Ortolano

English: Ramón Saldívar (also Comparative Literature)

Freeman Spogli Institute for International Studies: Rosamond Naylor

History: Zephyr Frank, Tamar Herzog

Hoover Institute: Herbert Klein

Human Biology: Anne Firth Murray

Iberian and Latin American Cultures: Héctor Hoyos, Marília Librandi Rocha, Michael Predmore, Joan Ramon Resina, Jorge Ruffinelli, Lisa Surwillo, Yvonne Yarbro-Bejarano

Language Center: José Carlos Fajardo, Alice Miano, Ana Sierra, Lyris Wiedemann, Agripino Silveira

Law, School of: James Cavallaro, Jonathan Greenberg, Thomas Heller (emeritus)

Linguistics: John Rickford

Medicine, School of: Michele Barry, Gabriel Garcia, Grant Miller, Paul Wise

Political Science: Stephen Haber, Terry Karl, Beatriz Magaloni, Robert Packenham (emeritus), Gary Segura, Michael Tomz

Religious Studies: Thomas Sheehan

Sociology: Tomás Jiménez, Michael Rosenfeld

Stanford University Libraries: Adán Griego, Sergio Stone, Robert Trujillo

Latin American Studies Related Courses

The following courses may be used to satisfy requirements for the M.A. degree, honors, or minor in Latin American Studies. Consult the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) web site for full course descriptions and class schedules.

When selecting courses from this list, please be aware of the following:

1. Overseas Studies courses, denoted by the subject code OSPSANTG, apply only to the undergraduate minor or honors programs and are not options for M.A. students.
2. Courses with numbers ending in the letter N or Q are Introductory Seminars for undergraduates and are not options for M.A. students. Courses ending in N give preference to freshmen; courses ending in Q give preference to sophomores.
3. All courses to be counted toward the M.A., minor, or honors in Latin American Studies must be taken at the 100-level or higher, with the exception of Overseas Studies courses included on this list (see also note 1, above).
4. All courses to be counted toward the M.A., minor, or honors in Latin American Studies must be taken for a letter grade.
5. For the M.A. degree, cognate courses must be taken for 5 units each. M.A. elective courses may be taken for 3-5 units each.
6. Some courses have prerequisites or special enrollment requirements. Students are responsible for making sure they have completed any prerequisites and/or secured an instructor's permission, as needed.

Culture and Society

Courses related to the Culture and Society field of specialization include:

		Units
ANTHRO 100C	Chavin de Huantar Research Seminar	2-5
ANTHRO 101	The Aztecs and Their Ancestors: Introduction to Mesoamerican Archaeology	3-5
ANTHRO 211A	Archaeology of the Andes of Argentina	3-5
COMPLIT 142	The Literature of the Americas	5
FILMSTUD 316	International Documentary	4
HISTORY 70	Culture, Politics, and Society in Latin America	3
HISTORY 108B	The Great Divergence: Latin American and East Asian Historical Development	5
HISTORY 170B	Culture, Society and Politics in Latin America	5
HISTORY 175B	Transnational Latin American Migration to the United States	5
HISTORY 203E	Global Catholicism	5

HISTORY 275B	Governance, Resistance, and Identity in Modern Mexico	5
HISTORY 371	Graduate Colloquium: Explorations in Latin American Social History	4-5
HISTORY 375B	Borders and Borderlands in Modern Mexico	4-5
ILAC 114N	Introduction to Lyric Poetry	3-5
ILAC 120	Advanced Critical Reading in Spanish	3-5
ILAC 131	Introduction to Latin America: Cultural Perspectives	3-5
ILAC 140	Migration in 21st Century Latin American Film	3-5
ILAC 143	The Latin American Women's Novel	3-5
ILAC 145	Poets, Journalists and Collectors: Latin American Modernismo	3-5
ILAC 161	Modern Latin American Literature	3-5
ILAC 193Q	Spaces and Voices of Brazil through Film	3-4
ILAC 243	The Millenium Novel in Latin America	3-5
ILAC 245	Brazilian Songs	3-5
ILAC 251	Latin American Literary Theory	3-5
ILAC 257	Dictatorships in Latin America through testimonies and film	3-5
ILAC 261	Voices in Brazilian Fiction	3-5
ILAC 278A	Senior Seminar: Latin American Fiction and Theory	3-5
ILAC 280	Latin@ Literature	3-5
ILAC 316	Realism and Surrealism in the Cinema of Luis Bunuel	3-5
ILAC 320	The Biographical Space in Contemporary Culture	3-5
ILAC 345	Biopolitics and Sovereignty in Andean Culture, 1920-1940	3-5
LAW 511	Legal Cultures and Legal Professionals in Latin America and Latin Europe	2
RELIGST 188A	Issues in Liberation: El Salvador	4
SOC 350W	Workshop: Migration, Race, Ethnicity and Nation	1-3
OSPSANTG 10	Borges and Argentina	4-5
OSPSANTG 14	Women Writers of Latin America in the 20th Century	4-5
OSPSANTG 24	A Cultural History of Soccer in South America	3-5
OSPSANTG 26	Typology of the "Intellectual" in South America	3-5
OSPSANTG 68	The Emergence of Nations in Latin America	4-5
OSPSANTG 62	Topics in Chilean History	5
OSPSANTG 73	An Approach to Cultural History in Latin America through Films	5
OSPSANTG 74	Independent Studies in Latin American Literature and Culture	2-4
OSPSANTG 118X	Artistic Expression in Latin America	5

Environment and Ecology

Courses related to the Environment and Ecology field of specialization include:

		Units
ANTHRO 247	Nature, Culture, Heritage	5
ANTHRO 262	Indigenous Peoples and Environmental Problems	3-5
HUMBIO 129	Critical Issues in International Women's Health	4
OSPSANTG 29	Sustainable Cities: Comparative Transportation Systems in Latin America	4-5
OSPSANTG 58	Living Chile: A Land of Extremes	5

OSPSANTG 71	Santiago: Urban Planning, Public Policy, and the Built Environment	4-5
OSPSANTG 76	Ecology and Biodiversity of Latin America	4
OSPSANTG 85	Marine Ecology of Chile and the South Pacific	5

Political Economy

Courses related to the Political Economy field of specialization include:

		Units
ANTHRO 361	Life and Death in Contemporary Latin America: An Anthropological Inquiry	5
ECON 127	Economics of Health Improvement in Developing Countries	5
ECON 217	Topics in International Macroeconomics: Theory and Evidence for Latin America:	2-5
EDUC 306A	Economics of Education in the Global Economy	5
HISTORY 277D	U.S. Intervention and Regime Change in Latin America	5
INTNLREL 141A	Camera as Witness: International Human Rights Documentaries	5
POLISCI 244P	Religion and Politics in Latin America	5
POLISCI 248L	Political-Economy of Crime and Violence in Latin America	5
POLISCI 348S	Latin American Politics	5
POLISCI 440B	Political Economy of Development	5
OSPSANTG 116X	Modernization and its Discontents: Chilean Politics at the Turn of the Century	5
OSPSANTG 119X	The Chilean Economy: History, International Relations, and Development Strategies	5
OSPSANTG 129X	Latin America in the International System	4-5
OSPSANTG 130X	The Chilean Economy in Comparative Perspective	5

Overseas Studies Courses in Latin American Studies

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/latinamericanstudies/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/latinamericanstudies/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/latinamericanstudies/http://bosp.stanford.edu>).

		Units
OSPMADRD 40	Introduction to Literary and Cultural Analysis in the Spanish World	4-5
OSPMADRD 50	Flirting with Spanish Metafiction: Cervantes, Velázquez, Fuentes, Almodóvar	4-5
OSPSANTG 10	Borges and Argentina	4-5

OSPSANTG 14	Women Writers of Latin America in the 20th Century	4-5
OSPSANTG 24	A Cultural History of Soccer in South America	3-5
OSPSANTG 26	Typology of the "Intellectual" in South America	3-5
OSPSANTG 29	Sustainable Cities: Comparative Transportation Systems in Latin America	4-5
OSPSANTG 58	Living Chile: A Land of Extremes	5
OSPSANTG 62	Topics in Chilean History	5
OSPSANTG 68	The Emergence of Nations in Latin America	4-5
OSPSANTG 71	Santiago: Urban Planning, Public Policy, and the Built Environment	4-5
OSPSANTG 73	An Approach to Cultural History in Latin America through Films	5
OSPSANTG 74	Independent Studies in Latin American Literature and Culture	2-4
OSPSANTG 76	Ecology and Biodiversity of Latin America	4
OSPSANTG 85	Marine Ecology of Chile and the South Pacific	5
OSPSANTG 116X	Modernization and its Discontents: Chilean Politics at the Turn of the Century	5
OSPSANTG 118X	Artistic Expression in Latin America	5
OSPSANTG 119X	The Chilean Economy: History, International Relations, and Development Strategies	5
OSPSANTG 129X	Latin America in the International System	4-5
OSPSANTG 130X	The Chilean Economy in Comparative Perspective	5

Linguistics

Courses offered by the Department of Linguistics are listed under the subject code LINGUIST on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=LINGUIST&filter-catalognumber-LINGUIST=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=LINGUIST&filter-catalognumber-LINGUIST=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=LINGUIST&filter-catalognumber-LINGUIST=on>).

Linguistics concerns itself with the fundamental questions of what language is and how it is related to the other human faculties. In answering these questions, linguists consider language as a cultural, social, and psychological phenomenon and seek to determine what is unique in languages, what is universal, how language is acquired, and how it changes. Linguistics is, therefore, one of the cognitive sciences; it provides a link between the humanities and the social and natural sciences, as well as education, and hearing and speech sciences.

The department offers courses at the undergraduate and graduate levels in the areas central to linguistic theory and analysis. Many of them deal with the analysis of structural patterns in the different components that make up language, including sounds (phonetics and phonology), meanings (semantics and pragmatics), words (morphology), sentences (syntax), and the ways they vary and change over time. Other courses integrate the analysis of linguistic structure with phenomena that directly concern other disciplines. These include courses in computational linguistics, language acquisition, the philosophy of language, psycholinguistics, and sociolinguistics.

A variety of open forums provide for the discussion of linguistic issues, including colloquia and regularly scheduled workshops in child language,

computational linguistics, phonology, psycholinguistics, semantics, sociolinguistics, and syntax.

Mission of the Undergraduate Program in Linguistics

The mission of the undergraduate program in Linguistics is to provide students with basic knowledge in the principal areas of linguistics (phonetics, phonology, morphology, syntax, semantics, pragmatics, historical linguistics, and sociolinguistics) and the skills to do more advanced work in these subfields. Courses in the major also involve interdisciplinary work with connections to other departments including computer science, psychology, cognitive science, communication, anthropology, and foreign language. The program provides students with excellent preparation for further study in graduate or professional schools as well as careers in business, social services, government agencies, and teaching.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. the ability to formulate theoretically interesting and tractable research questions.
2. the ability to identify sources of data relevant to answering their research questions.
3. facility with methods of collecting data relevant to their research questions.
4. knowledge of analytical methods to apply to the data they have collected.
5. the ability to bring the results of their data analysis to bear on their research questions.

Graduate Programs in Linguistics

The department offers an M.A., Ph.D., and Ph.D. minor in Linguistics.

Learning Outcomes (Graduate)

The purpose of the master's program is to develop students' knowledge and skills in Linguistics and to prepare them for a professional career or doctoral studies. This is achieved through completion of courses, including coursework in an area of specialization within the field, and experience with independent research.

The Ph.D. is conferred upon candidates who have demonstrated the ability to conduct substantive, independent research in Linguistics. Through completion of advanced coursework and rigorous methodological and analytical training, the doctoral program prepares students to make original contributions to knowledge in linguistics, to articulate the results of their work, and to demonstrate its significance to linguistics and related fields.

Cognitive Science

Linguistics is participating with the departments of Philosophy and Psychology in an interdisciplinary program in Cognitive Science for doctoral students. The program is intended to provide an interdisciplinary

education as well as a deeper concentration in linguistics. Students who complete the Linguistics and Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Linguistics. To receive this field designation, students must complete 30 units of approved courses, to be determined in consultation with the graduate studies adviser.

Linguistics Course Catalog Numbering System

Courses numbered under 100 are designed primarily for pre-majors. Courses with 100-level numbers are designed for majors, minors, and M.A. and Ph.D. minor candidates in Linguistics. Those with numbers 200 and above are primarily for graduate students, but with consent of instructor some of them may be taken for credit by qualified undergraduates. At all levels, the course numberings indicate a special area, as follows:

Number	Special Area
00-04	General
05-09	Phonetics
10-14	Phonology
15-19	Morphology
20-29	Syntax
30-39	Semantics, Pragmatics, Discourse
40-49	Language Acquisition, Psycholinguistics
50-61	Sociolinguistics, Language Variation, Change
62-73	Language and Culture, Structure of a Language
74-79	Methods, Mathematical Linguistics, Statistics
80-89	Computational Linguistics
90-99	Directed Work, Theses, Dissertations

Bachelor of Arts in Linguistics

The undergraduate major stresses the study of language both as a fundamental human faculty and as a changing social institution. At the core of the program is a set of departmental courses on the nature of human language; the major also draws on courses offered by other departments and programs.

The Linguistics major cuts across the humanities and the social and physical sciences. It provides a solid general education as a background for advanced studies in such disciplines as anthropology, cognitive science, communication, computer science, education (language, literacy, and culture), hearing and speech sciences, languages, law, linguistics, philosophy, and psychology.

Degree Requirements

Requirements for the B.A. include at least 50 units of course work in Linguistics and approved courses in related fields. Of the 50 units required for the major, no more than 12 may be below the 100 level. No more than two courses, neither of which can be a core course, may be taken on a credit/no credit basis. Students must receive a 'C-' or better in courses used towards the requirements.

Core Courses

The core courses are:

		Units
LINGUIST 1	Introduction to Linguistics	4
LINGUIST 110	Introduction to Phonetics and Phonology	4
LINGUIST 120	Introduction to Syntax	4
LINGUIST 130A or LINGUIST 130B	Introduction to Semantics and Pragmatics Introduction to Lexical Semantics	4
LINGUIST 150	Language in Society (which fulfills the Writing in the Major requirement (WIM))	4
Select one of the following:		4
LINGUIST 160	Introduction to Language Change	
or, in advance consultation with the Linguistics undergraduate studies adviser, a course in historical linguistics or the history of a language.		

All majors must complete at least five core courses, including LINGUIST 150 Language in Society.

Other Courses

Other courses counting toward the unit requirement should form a coherent program with emphases from among the areas of concentration listed below. Students should consult with the Linguistics undergraduate studies adviser when declaring the major, and maintain regular contact during the remainder of their Stanford career. Each student's major program must be approved by the Linguistics undergraduate studies adviser, or approved department adviser.

Students in the major must also take:

- At least two 200-level Linguistics courses, typically in their area of concentration

Other Requirements

- Foreign language: majors must have competence in at least one language other than English as part of their understanding of the field of linguistics and its study. This is usually demonstrated by the completion of six quarters of language study at Stanford or equivalent; level of proficiency is determined by the Language Center or the relevant language department. Students may petition to be exempted from the Language Requirement if they have grown up speaking a language other than English and can use it for everyday purposes and for linguistic analysis.

Areas of Concentration

Students select an area of concentration or develop one themselves in advance consultation with the Linguistics undergraduate studies adviser. These areas of concentration are not declared on Axess, and they do not appear on the transcript or diploma.

Honors Program

Students who wish to undertake a more intensive program of study, including independent research, should pursue departmental honors. Students should apply for honors by the end of Spring Quarter of their junior year. As part of the application, the student must write a research proposal describing the honors project which must be approved by the faculty adviser. Approval is given only to students who have maintained a grade point average (GPA) of 3.3 (B+) or better in the courses required for the major.

Honors students complete a total of 60 units including the 50 units for the major, plus 10 additional units of independent study and Honors Research. In addition, they must complete an honors thesis based on

research conducted with a principal adviser who must be a member of the Linguistics faculty, and a secondary faculty adviser who may, with the approval of the Undergraduate Studies Committee, be a member of another department. In the Autumn Quarter of the senior year, honors students enroll in LINGUIST 199 Independent Study, to work closely with one of their advisers on the research project. In Winter and Spring quarters, honors students enroll in LINGUIST 198 Honors Research, with the student's principal adviser for close supervision of the honors thesis. The thesis must be submitted in final, acceptable, form by May 15. The thesis topic is presented orally at a department Honors Colloquium late in Spring Quarter.

Minor in Linguistics

Requirements for the minor include at least 28 units of course work (typically seven courses) in Linguistics and related fields, approved in advance by the Linguistics undergraduate studies adviser. No more than two courses, neither of which can be a core course, may be taken on a credit/no credit basis. The courses counting towards the minor must be incremental units beyond those needed to satisfy the student's major course of study.

The minor consists of:

1.		Units
	LINGUIST 1 Introduction to Linguistics	4
	Select two of the following:	8
	LINGUIST 110 Introduction to Phonetics and Phonology	
	LINGUIST 120 Introduction to Syntax	
	LINGUIST 130A Introduction to Semantics and Pragmatics	
	Select one of the following:	4
	LINGUIST 150 Language in Society	
	LINGUIST 160 Introduction to Language Change	

or, in advance consultation with the Linguistics undergraduate studies adviser, a course in historical linguistics or the history of a language.

- At least four other courses determined in advance consultation with the Linguistics undergraduate studies adviser. Students are encouraged to take at least one 200-level Linguistics course. Students may also choose to do independent work with a faculty member of their choice.

Master of Arts in Linguistics

The University's basic requirements for the master's degree are discussed in the "Graduate Degrees (p. 38)" section of this bulletin. The following are additional departmental requirements. Candidates should review the department's Guidelines for the M.A. Degree in Linguistics for further particulars concerning these requirements.

- Courses:** candidates must complete 45 units of graduate work in Linguistics. Individual programs should be worked out in advance with an adviser in Linguistics. The majority of courses should be chosen to provide a broad foundation in Linguistics. Candidates should also develop an area of specialization; at least four courses should be in this area. No more than two courses should be at the 100 level. The overall grade point average (GPA) must be at least 3.0 (B) for all degree program course work.

- Language:** reading knowledge of a non-native language in which a substantial linguistic literature is written, with sufficient facility to understand and interpret linguistic research published in that language, or in-depth research on the structure of a non-native language.
- Thesis or Thesis Project:** a research paper supervised by a committee of three faculty (normally fulfilled by up to 6 units of LINGUIST 398 Directed Research).

Coterminal Bachelor's and Master's Degree Program in Linguistics

The Department of Linguistics admits a limited number of undergraduates to the coterminal degree program. Students are required to submit to the department a complete application, which includes a statement of purpose identifying a thesis topic, a Stanford transcript, three letters of recommendation (at least one of which must be from a faculty member in Linguistics), and a proposed course of study (worked out in advance with a Linguistics adviser). Applicants for the coterminal degree may apply as early as their eighth quarter and no later than early in the eleventh quarter of undergraduate study. Decisions on admission to the coterminal degree program rest with the Graduate Admissions Committee of the Department of Linguistics. For further application information, see the department's web pages.

For University coterminal degree program rules and University application forms, see the Publications and Online Guides (<http://registrar.stanford.edu/shared/publications.htm#Coterm>) web site.

Doctor of Philosophy in Linguistics

The following requirements are in addition to the basic University requirements for the degree sought; see the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin. Candidates should review the department's Guidelines for the Degree of Ph.D. in Linguistics, downloadable at <https://linguistics.stanford.edu/department-resources/> for further particulars concerning these requirements.

- Language**—candidates must demonstrate the ability to read at least one foreign language in which a substantial linguistic literature is written, with sufficient facility to understand and to interpret linguistic research published in that language. (Particular areas of specialization may require additional research languages.) In addition, each candidate must demonstrate an explicit in-depth knowledge of the structure of at least one language (normally neither the candidate's native language nor the language used for the reading exam). This requirement is fulfilled by writing an original research paper on a language.
- Courses**—a minimum of 135 units of graduate work beyond the bachelor's degree, or 90 units beyond the master's degree. The course requirements detailed in the Guidelines for the Degree of Ph.D. in Linguistics guarantee that each student covers a sufficient set of subareas within the field. Candidates must maintain a satisfactory record in the number and distribution of units completed. The overall course work GPA must be at least 3.0 (B), and all of the basic courses should be completed with at least a 'B.'
- Research**—the prospective Ph.D. candidate is expected to complete two substantial qualifying papers. The deadline for completion of the first qualifying paper is the end of Autumn Quarter of the second

year; the deadline for completion of the second qualifying paper is the end of Autumn Quarter of the third year. The subject matter of the two papers, although it may be related (for example, same language), must be clearly distinct. The requirement is fulfilled by two quarters of LINGUIST 395 Research Workshop (1-2 units each), and by oral discussion with a committee of at least three faculty members selected by the student and the faculty.

4. *Candidacy*—students must complete a prescribed portion of the basic course requirement (see item 2 above), one foreign language requirement (see item 1 above), and one qualifying paper (see item 3 above) by the end of their sixth academic quarter, normally the Spring Quarter of the second year. The department faculty reviews each sixth quarter student and votes on whether to admit the student to candidacy. A student is only admitted to candidacy if, in addition to the student's fulfilling the specified department prerequisites, the faculty makes the judgment that the student has the ability to complete the remaining stages of the Ph.D. program at a level of superior quality. Students who are not admitted to candidacy are terminated from the program; at the department's discretion, they may be allowed to complete any requirements that remain for the M.A. degree and receive this degree.
5. *Teaching*—at least three quarters serving as a teaching assistant in Linguistics courses.
6. *Colloquia*—two oral presentations exclusive of the public portion of the University oral (see item 7b below). This requirement is satisfied by class presentations, conference papers, or colloquium talks. Normally, both should be given during the first four years of study.
7. *Dissertation*—
 - A. appointment of a dissertation committee.
 - B. an approved written dissertation proposal is required by the end of Autumn Quarter of the fourth year.
 - C. oral discussion of the dissertation proposal with an augmented dissertation committee.
 - D. passing a University oral examination on the dissertation and related areas which includes a public presentation of the dissertation research.
 - E. dissertation (up to 15 units of LINGUIST 399 Dissertation Research).

Ph.D. Minor in Linguistics

1. Courses: the candidate must complete 30 units of course work in linguistics. The University requires that at least 20 of these units be at the 200 level or above; the remaining 10 units must be at the 100 level or above. The course work for the minor must include LINGUIST 110 Introduction to Phonetics and Phonology, LINGUIST 120 Introduction to Syntax, and either LINGUIST 130A Introduction to Semantics and Pragmatics or LINGUIST 130B Introduction to Lexical Semantics or 200-level introductory courses in the same areas and at least three courses related to the area of specialization. Courses submitted for the minor must be incremental units beyond those used to satisfy the major. Individual programs should be worked out in advance with the student's Ph.D. minor adviser in Linguistics.
2. Research Project (optional): the candidate may elect to present a paper which integrates the subject matter of linguistics into the field of specialization of the candidate.
3. The Linguistics minor adviser or designee serves on the candidate's University oral examination committee and may request that up to one-third of the examination be devoted to the minor subject.

Emeriti: (Professors) Joan Bresnan, Clara N. Bush, Shirley Brice Heath, William R. Leben, Stanley Peters, Elizabeth C. Traugott

Chair: Thomas A. Wasow

Professors: Eve V. Clark (on leave), Penelope Eckert, Daniel Jurafsky (on leave), Martin Kay (leave Fall), Paul Kiparsky, Beth Levin, Christopher Manning, John R. Rickford (leave Fall/Winter), Ivan A. Sag (leave Fall/Spring), Thomas A. Wasow

Associate Professors: Arto Anttila, Christopher Potts

Assistant Professors: Vera Gribova, Robert Podesva, Meghan Sumner

Courtesy Professors: Herbert H. Clark, Kenji Hakuta, Yoshiko Matsumoto, James McClelland, Orrin W. Robinson III, Chao Fen Sun

Courtesy Associate Professors: H. Samy Alim, James A. Fox, Miyako Inoue,

Courtesy Assistant Professor: Michael C. Frank, Noah Goodman

Senior Lecturer: Philip L. Hubbard, Language Center

Lecturers: Bill MacCartney (Winter), Kamal Mansour (Spring), Asya Pereltsvaig

Consulting Professors: Jared Bernstein, Ronald Kaplan, Lauri Karttunen, Paul Kay, Livia Polanyi, Annie Zaenen, Arnold Zwicky

Mathematical and Computational Science

Courses offered by the program in Mathematical and Computational Science are listed under the subject code MCS on the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) website.

This interdepartmental interschool undergraduate program provides a major for students interested in the mathematical and computational sciences, or in the use of mathematical ideas and analysis in problems in the social or management sciences. It provides a core of mathematics basic to all the mathematical sciences and an introduction to concepts and techniques of computation, optimal decision making, probabilistic modeling, and statistical inference. It also provides an opportunity for elective work in any of Stanford's mathematical science disciplines.

The program uses the faculty and courses of the departments of Computer Science, Management Science and Engineering, Mathematics, and Statistics. It prepares students for graduate study or employment in the mathematical and computational sciences or in those areas of applied mathematics which center around the use of computers and are concerned with the problems of the social and management sciences. A biology option is offered for students interested in applications of mathematics, statistics, and computer science to the biological sciences (bioinformatics, computational biology, statistical genetics, neurosciences); and in a similar spirit, an engineering option.

Undergraduate Mission Statement for Mathematical and Computational Science

The mission of the Mathematical and Computational Science Program is to provide students with a core of mathematics basic to all the mathematical sciences and an introduction to concepts and techniques of computation, optimal decision making, probabilistic modeling and statistical inference. The program is interdisciplinary in its focus, and students are required to complete course work in mathematics, computer science, statistics, and management science and engineering. A computational biology track is available for students interested in biomedical applications. The program

prepares students for careers in academic, financial and government settings as well as for study in graduate or professional schools.

Learning Outcomes

The program expects undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to be able to demonstrate:

1. understanding of principles and tools of statistics.
2. command of optimization and its applications and the ability to analyze and interpret problems from various disciplines.
3. an understanding of computer applications emphasizing modern software engineering principles.
4. an understanding of multivariate calculus, linear algebra, and algebraic and geometric proofs.

Bachelor of Science in Mathematical and Computational Science

The requirement for the bachelor's degree, beyond the University's basic requirements, is an approved course program of 73-77 units, distributed as follows:

	Units
Mathematics (MATH) (31)	
MATH 41 Calculus *	5
MATH 42 Calculus *	5
Select one of the following:	5
MATH 51 Linear Algebra and Differential Calculus of Several Variables	
MATH 51H Honors Multivariable Mathematics	
Select one of the following:	5
MATH 52 Integral Calculus of Several Variables	
MATH 52H Honors Multivariable Mathematics	
Select one of the following:	5
MATH 53 Ordinary Differential Equations with Linear Algebra	
MATH 53H Honors Multivariable Mathematics	
Select one of the following:	3
MATH 109 Applied Group Theory (satisfies WIM)	
MATH 110 Applied Number Theory and Field Theory (satisfies WIM)	
MATH 120 Groups and Rings (satisfies WIM)	
MATH 171 Fundamental Concepts of Analysis (satisfies WIM)	
Select one of the following:	3
MATH 104 Applied Matrix Theory	
MATH 113 Linear Algebra and Matrix Theory	
Computer Science (CS) (18-24)	
CS 103 Mathematical Foundations of Computing	5
Select one of the following:	5-10
CS 106X Programming Abstractions (Accelerated)	
or both	
CS 106A Programming Methodology	
CS 106B Programming Abstractions	

Select two of the following:	8-9
CME 108 Introduction to Scientific Computing	
CS 107 Computer Organization and Systems	
CS 154 Introduction to Automata and Complexity Theory	
CS 161 Design and Analysis of Algorithms	
CS 181W Computers, Ethics and Public Policy (satisfies WIM)	

Management Science and Engineering (MS&E) (6-7)		
MS&E 211 Linear and Nonlinear Optimization		3-4
MS&E 221 Stochastic Modeling		3

Or select three of the following:

MS&E 111 Introduction to Optimization		
MS&E 121 Introduction to Stochastic Modeling		
MS&E 211 Linear and Nonlinear Optimization		
MS&E 212 Mathematical Programming and Combinatorial Optimization		
MS&E 221 Stochastic Modeling		
MS&E 251 Stochastic Decision Models		

Statistics (STATS) (11-12)		
STATS 116 Theory of Probability		5
STATS 200 Introduction to Statistical Inference		3
Select one of the following:		3-4

STATS 191 Introduction to Applied Statistics		
STATS 203 Introduction to Regression Models and Analysis of Variance		

* Students with AP credit receive 10 units for Math 41 & 42 and should enroll in Math 51-53 series.

Mathematical and Computational Science Electives (9 Units)

Three courses in mathematical and computational science, 100-level or above, at least 3 units each.

	Units
Select at least one of the following:	9-15
ECON 140 Introduction to Financial Economics	
ECON 160 Game Theory and Economic Applications	
ECON 179 Experimental Economics	
EE 261 The Fourier Transform and Its Applications	
EE 263 Introduction to Linear Dynamical Systems	
EE 278B Introduction to Statistical Signal Processing	
EE 282 Computer Systems Architecture	
EE 364B Convex Optimization II	
MS&E 211 Linear and Nonlinear Optimization	
MS&E 221 Stochastic Modeling	
MS&E 212 Mathematical Programming and Combinatorial Optimization	
MS&E 251 Stochastic Decision Models	
MATH 104 Applied Matrix Theory	
MATH 106 Functions of a Complex Variable	
MATH 108 Introduction to Combinatorics and Its Applications	
MATH 113 Linear Algebra and Matrix Theory	
MATH 115 Functions of a Real Variable	
MATH 116 Complex Analysis	
MATH 131P Partial Differential Equations I	
MATH 136/ Stochastic Processes	
STATS 219	

MATH 171	Fundamental Concepts of Analysis
MATH 172	Lebesgue Integration and Fourier Analysis
MATH 174	Calculus of Variations
PHIL 151	First-Order Logic (Winte)
STATS 202	Data Mining and Analysis
STATS 208	Introduction to the Bootstrap
STATS 215	Statistical Models in Biology
STATS 217	Introduction to Stochastic Processes

For Computer Science (CS), electives can include courses not taken as units under the CS list above and the following:

CME 206	Introduction to Numerical Methods for Engineering
CME 302	Numerical Linear Algebra
CS 108	Object-Oriented Systems Design
CS 110	Principles of Computer Systems
CS 140	Operating Systems and Systems Programming
CS 143	Compilers
CS 157	Logic and Automated Reasoning
CS 161	Design and Analysis of Algorithms
CS 164	Computing with Physical Objects: Algorithms for Shape and Motion
CS 194	Software Project
CS 221	Artificial Intelligence: Principles and Techniques
CS 223A	Introduction to Robotics
CS 225A	Experimental Robotics
CS 228	Probabilistic Graphical Models: Principles and Techniques
CS 229	Machine Learning
CS 243	Program Analysis and Optimizations
CS 248	Interactive Computer Graphics

With the adviser's approval, courses other than those offered by the sponsoring departments may be used to fulfill part of the elective requirement. These may be in fields such as biology, economics, electrical engineering, industrial engineering, and medicine, that might be relevant to a mathematical sciences major, depending on a student's interests.

- At least three quarters before graduation, majors must file with their advisers a plan for completing degree requirements.
- All courses used to fulfill major requirements must be taken for a letter grade with the exception of courses offered satisfactory/no credit only.
- A course used to fulfill the requirements of one section of the program may not be applied toward the fulfillment of the requirements of another section.
- The student must have a grade point average (GPA) of 2.0 or better in all course work used to fulfill the major requirement.
- Electives that are not offered this year, but may be offered in subsequent years, are eligible for credit toward the major: CME 311, Econ 102C, MCS 100/ Stats 50

Mathematical and Computational Science Biology Option

STATS/BIO 141 Biostatistics ¹

Units
3-5

Select two of the following from the Biology Core:

BIO 41	Genetics, Biochemistry, and Molecular Biology
BIO 42	Cell Biology and Animal Physiology
BIO 43	Plant Biology, Evolution, and Ecology

Select one of the following:

BIO 41	Genetics, Biochemistry, and Molecular Biology
--------	---

BIO 42	Cell Biology and Animal Physiology
BIO 43	Plant Biology, Evolution, and Ecology
BIO 102	Demography: Health, Development, Environment
BIO 136	Evolutionary Paleobiology
BIO 143	Evolution
BIO 144	Conservation Biology
BIO 160A	Developmental Biology I
BIO 160B	Developmental Biology II
BIO 183	Theoretical Population Genetics
BIO 230	Molecular and Cellular Immunology

Honors students select the following three courses:

BIO 113	Fundamentals of Molecular Evolution
BIO 146	Population Studies

¹ Replaces STATS 191 Introduction to Applied Statistics/STATS 203 Introduction to Regression Models and Analysis of Variance with STATS 141 Biostatistics/BIO 141 Biostatistics

Mathematical and Computational Science Engineering Option

Students in the Engineering option take the introductory courses for the Mathematics and Computational Sciences major with the following allowable substitutions.

	Units
The MATH 51-53 series may be replaced by:	
CME 100/ENGR 154	5
CME 102/ENGR 155A	5
CME 104/ENGR 155B	5
CME 200	3
STATS 116 may be replaced by:	
STATS 110	3
STATS 191/STATS 203 may be replaced by:	
STATS 202	3
Engineering Track Electives:	
Select one of the following:	
MATH 106	3
MATH 108	3
MATH 116	3
MATH 174	3
PHIL 151	3
Select two of the following:	
ENGR 15	3
ENGR 20	3
ENGR 25B	3
ENGR 30	3
ENGR 40	3
ENGR 50	3
ENGR 105	3

Mission of the Undergraduate Program in Mathematics

The mission of the undergraduate program in Mathematics is to provide students with a broad understanding of mathematics encompassing logical reasoning, generalization, abstraction, and formal proof. Courses in the program teach students to create, analyze, and interpret mathematical models and to communicate sound arguments based on mathematical reasoning and careful data analysis. The mathematics degree prepares students for careers in the corporate sector and government agencies, and for graduate programs in mathematics.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. problem solving skills.
2. the ability to formulate proofs and to structure mathematical arguments.
3. the ability to communicate mathematical ideas via extended written presentation.

Advanced Placement in Mathematics for Freshmen

Students of unusual ability in mathematics often take one or more semesters of college-equivalent courses in mathematics while they are still in high school. Under certain circumstances, it is possible for such students to secure both advanced placement and credit toward the bachelor's degree. A decision as to placement and credit is made by the department after consideration of the student's performance on the Advanced Placement Examination in Mathematics (forms AB or BC) of the College Entrance Examination Board, and also after consideration of transfer credit in mathematics from other colleges and universities.

The department does not give its own advanced placement examination. Students can receive either 5 or 10 units of advanced placement credit, depending on their scores on the CEEB Advanced Placement Examination. Entering students who have credit for two quarters of single variable calculus (10 units) are encouraged to enroll in:

Select one of the following series:			Units
Standard Series (15)			
MATH 51	Linear Algebra and Differential Calculus of Several Variables	5	
MATH 52	Integral Calculus of Several Variables	5	
MATH 53	Ordinary Differential Equations with Linear Algebra	5	
Honors Series (15)			
MATH 51H	Honors Multivariable Mathematics	5	
MATH 52H	Honors Multivariable Mathematics	5	
MATH 53H	Honors Multivariable Mathematics	5	

These three-course sequences, which can be completed during the freshman year, supply the necessary mathematics background for most majors in science and engineering. They also serve as excellent background for the

major or minor in Mathematics, or in Mathematical and Computational Science.

Students who have credit for one quarter of single variable calculus (5 units) should take:

		Units
MATH 42	Calculus (Autumn Quarter)	5
MATH 51	Linear Algebra and Differential Calculus of Several Variables (Winter Quarter)	5
Options available in Spring Quarter include:		
MATH 52 or MATH 53	Integral Calculus of Several Variables Ordinary Differential Equations with Linear Algebra	5

For proper placement, contact the Department of Mathematics.

Bachelor of Science in Mathematical and Computational Science

The Department of Mathematics participates with the departments of Computer Science, Management Science and Engineering, and Statistics in a program leading to a B.S. in Mathematical and Computational Science. See the "Mathematical and Computational Science (p. 472)" section of this bulletin.

Introductory and Undergraduate Courses

The department offers two sequences of introductory courses in single variable calculus.

1. and MATH 42 Calculus present single variable calculus. Differential calculus is covered in the first quarter, integral calculus in the second.
2. MATH 19 Calculus, MATH 20 Calculus, and MATH 21 Calculus cover the material in MATH 41 Calculus, MATH 42 Calculus in three quarters instead of two.

There are options for studying multivariable mathematics:

1. MATH 51 Linear Algebra and Differential Calculus of Several Variables, MATH 52 Integral Calculus of Several Variables, and MATH 53 Ordinary Differential Equations with Linear Algebra cover differential and integral calculus in several variables, linear algebra, and ordinary differential equations. These topics are taught in an integrated fashion and emphasize application. MATH 51 Linear Algebra and Differential Calculus of Several Variables covers differential calculus in several variables and introduces matrix theory and linear algebra; MATH 52 Integral Calculus of Several Variables covers integral calculus in several variables and vector analysis; MATH 53 Ordinary Differential Equations with Linear Algebra studies further topics in linear algebra and applies them to the study of ordinary differential equations. This sequence is strongly recommended for incoming freshmen with 10 units of advanced placement credit.
2. MATH 51H Honors Multivariable Mathematics, MATH 52H Honors Multivariable Mathematics, and MATH 53H Honors Multivariable Mathematics cover the same material as MATH 51 Linear Algebra and Differential Calculus of Several Variables, MATH 52 Integral Calculus of Several Variables, and MATH 53 Ordinary Differential Equations with Linear Algebra, but with more emphasis on theory and rigor.

The department offers three classes on linear algebra:

		Units
MATH 51 or MATH 51H	Linear Algebra and Differential Calculus of Several Variables Honors Multivariable Mathematics	5

MATH 104	Applied Matrix Theory	3
MATH 113	Linear Algebra and Matrix Theory	3

Learning Outcomes (Graduate)

The Master's Degree is conferred upon candidates who have developed advanced knowledge and skills in Mathematics. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Mathematics. Through completion of advanced coursework and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Mathematics and to interpret and present the results of such research.

Bachelor of Science in Mathematics

The following department requirements are in addition to the University's basic requirements for the bachelor's degree:

Students wishing to major in Mathematics must satisfy the following requirements:

1. Department of Mathematics courses (other than MATH 100 Mathematics for Elementary School Teachers) totaling at least 49 units credit; such courses must be taken for a letter grade. For the purposes of this requirement, STATS 116 Theory of Probability, PHIL 151 First-Order Logic, and PHIL 152 Computability and Logic count as Department of Mathematics courses.
2. Additional courses taken from Department of Mathematics courses numbered 101 and above or from approved courses in other disciplines with significant mathematical content, totaling at least 15 units credit. At least 9 of these units must be taken for a letter grade.
3. A Department of Mathematics adviser must be selected, and the courses selected under items '1' and '2' above must be approved by the department's director of undergraduate study, acting under guidelines laid down by the department's Committee for Undergraduate Affairs. The Department of Mathematics adviser can be any member of the department's faculty.
4. To receive the department's recommendation for graduation, a student must have been enrolled as a major in the Department of Mathematics for a minimum of two full quarters, including the quarter immediately before graduation. Students are encouraged to declare as early as possible, preferably by the end of the sophomore year.

Students are normally expected to complete either the sequence MATH 19 Calculus, MATH 20 Calculus, MATH 21 Calculus or the sequence MATH 41 Calculus, MATH 42 Calculus (but not both). Students with an Advanced Placement score of at least 4 in BC math or 5 in AB math may receive 10 units credit and fulfill requirement '1' by taking at least 39 units of Department of Mathematics courses numbered 51 and above. Students with an Advanced Placement score of at least 3 in BC math or at least 4 in AB math may receive 5 units credit and fulfill requirement '1' by taking at least 44 units of Department of Mathematics courses numbered 42 and above.

Sophomore seminar courses may be counted among the choice of courses under item '1'. Other variations of the course requirements laid down above (under items '1' and '2') may, in some circumstances, be allowed. For example, students transferring from other universities may be allowed

credit for some courses completed before their arrival at Stanford. However, at least 24 units of the 49 units under item '1' above and 9 of the units under item '2' above must be taken at Stanford. In all cases, approval for variations in the degree requirements must be obtained from the department's Committee for Undergraduate Affairs. Application for such approval should be made through the department's director of undergraduate studies. The policy of the Mathematics Department is that no courses other than the MATH 50 series and below may be double-counted toward any other University major or minor.

It is to be emphasized that the above regulations are minimum requirements for the major; students contemplating graduate work in mathematics are strongly encouraged to include the courses MATH 116 Complex Analysis, MATH 120 Groups and Rings, MATH 121 Galois Theory, MATH 147 Differential Topology or MATH 148 Algebraic Topology, and MATH 171 Fundamental Concepts of Analysis in their selection of courses, and in addition, take at least three Department of Mathematics courses over and above the minimum requirements laid out under items '1' and '2' above, including at least one 200-level course. Such students are also encouraged to consider the possibility of taking the honors program, discussed below.

To help develop a sense of the type of course selection (under items '1' and '2' above) that would be recommended for math majors with various backgrounds and interests, see the following examples. These represent only a few of a very large number of possible combinations of courses that could be taken in fulfillment of the Mathematics major requirements:

Example 1

A general program (a balanced program of both pure and applied components, without any particular emphasis on any one field of mathematics or applications) as follows:

	Units
Select one of the following series or Advanced Placement credit (see the Overview tab for details):	10
MATH 19 Calculus & MATH 20 and Calculus & MATH 21 and Calculus	
MATH 41 Calculus & MATH 42 and Calculus	
Math 50 Series:	15
MATH 51 Linear Algebra and Differential Calculus of Several & MATH 52 Variables & MATH 53 and Integral Calculus of Several Variables and Ordinary Differential Equations with Linear Algebra	
MATH 104 Applied Matrix Theory	3
or MATH 113 Linear Algebra and Matrix Theory	
MATH 106 Functions of a Complex Variable	3
MATH 109 Applied Group Theory	3
MATH 110 Applied Number Theory and Field Theory	3
MATH 115 Functions of a Real Variable	3
Plus any selection of at least eight of the following courses, including three Department of Mathematics courses:	24
MATH 108 Introduction to Combinatorics and Its Applications	
MATH 131P Partial Differential Equations I	
MATH 132 Partial Differential Equations II	
MATH 143 Differential Geometry	
MATH 146 Analysis on Manifolds	
MATH 147 Differential Topology	
MATH 148 Algebraic Topology	
MATH 152 Elementary Theory of Numbers	
MATH 161 Set Theory	
CME 108 Introduction to Scientific Computing	

ECON 50	Economic Analysis I
PHYSICS 41	Mechanics
PHYSICS 43	Electricity and Magnetism
PHYSICS 45	Light and Heat
STATS 116	Theory of Probability
<hr/>	
Total Units	64

The courses from other departments are only meant as examples; there are many suitable courses in several departments that can be taken to fulfill part or all of requirement '2'.

Example 2

A theoretical program recommended for those contemplating possible later graduate work providing an introduction to the main areas of mathematics both broader and deeper than the general program outlined above:

	Units
Select one of the following series or Advanced Placement credit (see the Overview tab for details):	10
MATH 19 & MATH 20 & MATH 21	Calculus and Calculus and Calculus
MATH 41 & MATH 42	Calculus and Calculus
Math 50 Series:	15
MATH 51	Linear Algebra and Differential Calculus of Several Variables
or MATH 51H	Honors Multivariable Mathematics
MATH 52	Integral Calculus of Several Variables
or MATH 52H	Honors Multivariable Mathematics
MATH 53	Ordinary Differential Equations with Linear Algebra
or MATH 53H	Honors Multivariable Mathematics
In addition to the series, the following courses are recommended:	
MATH 106	Functions of a Complex Variable
or MATH 116	Complex Analysis
MATH 113	Linear Algebra and Matrix Theory
MATH 120	Groups and Rings
MATH 171	Fundamental Concepts of Analysis
Plus nine or more 3-unit math courses numbered 121 or higher (the logic courses PHIL 151 and PHIL 152 are considered to be such courses), including at least one algebra course, one analysis course, and one geometry/topology course. (See the description of the honors program below)	27
<hr/>	
Total Units	64

In addition, those contemplating eventual graduate work in Mathematics should consider including at least one graduate-level math course such as MATH 205A Real Analysis, MATH 210A Modern Algebra I, or MATH 215A Complex Analysis, Geometry, and Topology or MATH 215B Complex Analysis, Geometry, and Topology. Such students should also consider the possibility of entering the honors program.

Example 3

An applied mathematics* program:

	Units
Select one of the following series or Advanced Placement credit (see the Overview tab for details):	10

MATH 19 & MATH 20 & MATH 21	Calculus and Calculus and Calculus
MATH 41 & MATH 42	Calculus and Calculus
Math 50 Series:	15
MATH 51 & MATH 52 & MATH 53	Linear Algebra and Differential Calculus of Several Variables and Integral Calculus of Several Variables and Ordinary Differential Equations with Linear Algebra
MATH 104	Applied Matrix Theory
MATH 106	Functions of a Complex Variable
MATH 108	Introduction to Combinatorics and Its Applications
MATH 109	Applied Group Theory
MATH 110	Applied Number Theory and Field Theory
MATH 115	Functions of a Real Variable
MATH 131P	Partial Differential Equations I
MATH 132	Partial Differential Equations II
STATS 116	Theory of Probability
Plus at least 12 units of additional courses in applied mathematics, including, for example, suitable courses from the departments of Physics, Computer Science, Economics, Engineering, and Statistics.	12
<hr/>	
Total Units	64-66

* Students interested in applied mathematics, but desiring a broader-based program than the type of program suggested in Example 3, including significant computational and/or financial and/or statistical components, are encouraged to also consider the Mathematics and Computational Science program.

Honors Program

The honors program is intended for students who have strong theoretical interests and abilities in mathematics. The goal of the program is to give students a thorough introduction to the main branches of mathematics, especially analysis, algebra, and geometry. Through the honors thesis, students may be introduced to a current or recent research topic, although occasionally more classical projects are encouraged. The program provides an excellent background with which to enter a Master's or Ph.D. program in Mathematics. Students completing the program are awarded a B.S. in Mathematics with Honors.

It is recommended that the sequence MATH 51H Honors Multivariable Mathematics, MATH 52H Honors Multivariable Mathematics, and MATH 53H Honors Multivariable Mathematics be taken in the freshman year. To graduate with a B.S. in Mathematics with Honors, the following conditions apply in addition to the usual requirements for math majors:

- The selection of courses under items '1' and '2' above must contain:

	Units
MATH 106	Functions of a Complex Variable
or MATH 116	Complex Analysis
MATH 120	Groups and Rings
MATH 171	Fundamental Concepts of Analysis

And must also include seven additional 3-unit Math courses numbered 121 or higher. (The logic courses PHIL 151 First-Order Logic and PHIL 152 Computability and Logic can also be used.) These seven courses must include at least:

	Units
One Algebra Course:	
MATH 121	Galois Theory
MATH 122	Modules and group representations
MATH 152	Elementary Theory of Numbers

MATH 154	Algebraic Number Theory	3
MATH 155	Analytic Number Theory	3
One Analysis Course:		
MATH 131P	Partial Differential Equations I	3
MATH 132	Partial Differential Equations II	3
MATH 136	Stochastic Processes	3
MATH 151	Introduction to Probability Theory	3
MATH 175	Elementary Functional Analysis	3
One Geometry/Topology Course:		
MATH 143	Differential Geometry	3
MATH 146	Analysis on Manifolds	3
MATH 147	Differential Topology	3
MATH 148	Algebraic Topology	3

- Students in the honors program must write a senior thesis. In order to facilitate this, the student must, by the end of the junior year, choose an undergraduate thesis adviser from the Department of Mathematics faculty, and map out a concentrated reading program under the direction and guidance of the adviser. During the senior year, the student must enroll in MATH 197 Senior Honors Thesis for a total of 6 units (typically spread over two quarters), and work toward completion of the thesis under the direction and guidance of the thesis adviser. The thesis may contain original material, or be a synthesis of work in current or recent research literature. The 6 units of credit for MATH 197 Senior Honors Thesis are required in addition to the course requirements laid out under items '1' and '2' above and in addition to all other requirements for math majors.

In addition to the minimum requirements laid out above, it is strongly recommended that students take at least one graduate-level course (that is, at least one course in the 200 plus range). MATH 205A Real Analysis, MATH 210A Modern Algebra I, and MATH 215A Complex Analysis, Geometry, and Topology or MATH 215B Complex Analysis, Geometry, and Topology are especially recommended in this context.

Students with questions about the honors program should see the director of undergraduate advising.

Minor in Mathematics

To qualify for the minor in Mathematics, a student should complete, for a letter grade, at least six Department of Mathematics courses (other than MATH 100 Mathematics for Elementary School Teachers) numbered 51 or higher, totaling a minimum of 24 units. For the purposes of this requirement, STATS 116 Theory of Probability, PHIL 151 First-Order Logic, and PHIL 152 Computability and Logic count as Department of Mathematics courses. No other courses from outside the Department of Mathematics may be used towards the minor in Mathematics.

It is recommended that these courses include:

	Units	
Math Minor (24)		
MATH 51	Linear Algebra and Differential Calculus of Several Variables	5
or MATH 51H	Honors Multivariable Mathematics	
MATH 52	Integral Calculus of Several Variables	5
or MATH 52H	Honors Multivariable Mathematics	
MATH 53	Ordinary Differential Equations with Linear Algebra	5
or MATH 53H	Honors Multivariable Mathematics	
Plus three additional MATH courses		9
<hr/> Total Units		24

At least 12 of the units applied toward the minor in Mathematics must be taken at Stanford. The policy of the Mathematics Department is that no courses other than the MATH 50 series and below may be double-counted toward any other University major or minor.

Master of Science in Mathematics

The University's basic requirements for the master's degree are discussed in the "Graduate Degrees (p. 38)" section of this bulletin. Students should pay particular attention to the University's course requirements for graduate degrees. The following are specific departmental requirements:

Candidates must complete an approved course program of 45 units of courses beyond the department requirements for the B.S. degree, of which at least 36 units must be Mathematics Department courses, taken for a letter grade. The Mathematics Department courses must include at least 18 units numbered 200 or above. The candidate must have a grade point average (GPA) of 3.0 (B) over all course work taken in Mathematics, and a GPA of 3.0 (B) in the 200-level courses considered separately. Course work for the M.S. degree must be approved during the first quarter of enrollment in the program by the department's Director of Graduate Studies.

For the M.S. degree in Financial Mathematics, see the "Financial Mathematics (p. 398)" section of this bulletin.

Doctor of Philosophy in Mathematics

The University's basic requirements for the doctorate (residence, dissertation, examinations, etc.) are discussed in the "Graduate Degrees (p. 38)" section of this bulletin. The following are specific departmental requirements.

To be admitted to candidacy, the student must have successfully completed 27 units of graduate courses (that is, courses numbered 200 and above). In addition, the student must pass qualifying examinations given by the department.

Beyond the requirements for candidacy, the student must complete a course of study approved by the Graduate Affairs Committee of the Department of Mathematics and submit an acceptable dissertation. In accordance with University requirements, Ph.D. students must complete a total of 135 course units beyond the bachelor's degree. These courses should be Department of Mathematics courses or approved courses from other departments. The course program should display substantial breadth in mathematics outside the student's field of application. The student must receive a grade point average (GPA) of 3.0 (B) or better in courses used to satisfy the Ph.D. requirement. In addition, the student must pass the Department area examination and the University oral examination.

Experience in teaching is emphasized in the Ph.D. program. Each student is required to complete nine quarters of such experience. The nature of the teaching assignment for each of those quarters is determined by the department in consultation with the student. Typical assignments include teaching or assisting in teaching an undergraduate course or lecturing in an advanced seminar.

For further information concerning degree programs, fellowships, and assistantships, inquire of the department's student services office.

Ph.D. Minor in Mathematics

Requirements for the Ph.D. in Mathematics are:

Complete both of the following Sequences: ^{1,2}

Sequence 1 (9)

MATH 106	Functions of a Complex Variable	3
or MATH 116	Complex Analysis	
MATH 131P	Partial Differential Equations I	3
MATH 132	Partial Differential Equations II	3

Sequence 2 (6)

MATH 113	Linear Algebra and Matrix Theory	3
MATH 120	Groups and Rings	3
or MATH 152	Elementary Theory of Numbers	

Additional Courses (21)

21 units of 200-level MATH courses ³	21
Total Units	36

- The 100-level courses may have been completed during undergraduate study, and their equivalents from other universities are acceptable.
- A third coherent sequence designed by the student, subject to the approval of the graduate committee, may be considered as a substitute for Sequence 1 or 2.
- The 200-level courses must be taken at Stanford and approved by the Department of Mathematics Ph.D. minor adviser.

Emeriti: Gregory Brumfiel, Solomon Feferman, Robert Finn, Yitzhak Katznelson, Joseph Keller, Georg Kreisel, Harold Levine, Tai-Ping Liu, R. James Milgram, Donald Ornstein

Chair: Steven Kerckhoff

Professors: Simon Brendle, Daniel Bump, Emmanuel Candes, Gunnar Carlsson, Ralph L. Cohen, Brian Conrad, Amir Dembo, Persi Diaconis, Yakov Eliashberg, Soren Galatius, Eleny Ionel, Steven Kerckhoff, Jun Li, Rafe Mazzeo, Maryam Mirzakhani, George Papanicolaou, Lenya Ryzhik, Richard Schoen, Leon Simon, Kannan Soundararajan, Ravi Vakil, Andras Vasy, Akshay Venkatesh, Brian White, Lexing Ying

Assistant Professor: Zhiwei Yun

Szegő Assistant Professors: Ricardo Andrade, Isabelle Camilier, Thomas Church, Sheel Ganatra, Zhiyuan Li, Martin Luu, Peter McNamara, Georg Menz, Yi Wang

Lecturers: Mark Lucianovic, Rob Rhoades, Christelle Vincent, Wojciech Wicczorek

Courtesy Professors: Renata Kallosh, Grigori Mints

Consulting Professors: Brian Conrey, David Hoffman

Simons Fellows: Richard Bamler, Alexander Subotic

Medieval Studies

Stanford Center for Medieval and Early Modern Studies (CMEMS) is a multidisciplinary community working together to produce new perspectives on medieval and early modern studies. The mission of CMEMS is to promote innovative research and foster a lively dialogue among faculty, students, librarians, and research affiliates, to rethink the nature of the field across time, space, and disciplinary boundaries, and to explore the significance of these earlier periods for our understanding of today's world.

There are a number of programs and courses related to medieval and early modern studies. To learn more, please visit our website (<http://cmems.stanford.edu>).

At present, Stanford University does not offer any degrees in Medieval Studies.

Units

Affiliated Faculty: Vincent Barletta (Iberian and Latin American Cultures), Shahzad Bashir (Religious Studies), Carl Bielefeldt (Religious Studies), George H. Brown (English, Emeritus), Steven Carter (Asian Languages), Paula Findlen (History), Charlotte Fonrobert (Religious Studies), Marisa Galvez (French and Italian), Hester Gelber (Religious Studies), Avner Greif (Economics), Hans Ulrich Gumbrecht (French and Italian), Robert Harrison (French and Italian), Michelle Karnes (English), Nancy S.Kollmann (History), Mark E. Lewis (History), William Mahrt (Music), Patricia Parker (Comparative Literature), Bissera Pentcheva (Art and Art History), Barbara Pitkin (Religious Studies, *Lecturer*), Orrin W. Robinson (German Studies), David Riggs (English, Emeritus), Jesse Rodin (Music), Behnam Sadeki (Religious Studies), Carolyn Springer (French and Italian), Kathryn Starkey (German Studies), Laura Stokes (History), Jennifer Summit (English), Elaine Treharne (English)

Modern Thought and Literature

Courses offered by the Program in Modern Thought and Literature are listed under the subject code MTL on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=MTL&filter-catalognumber-MTL=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=MTL&filter-catalognumber-MTL=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=MTL&filter-catalognumber-MTL=on>).

The program in Modern Thought and Literature admits students for the Ph.D. and a limited number for a coterminal B.A./M.A. Program.

Graduate Programs in Modern Thought and Literature

Modern Thought and Literature (MTL) is an interdisciplinary humanities graduate program advancing the study of critical issues in the modern world. Since 1971, MTL students have helped to redefine the cutting edge of many interdisciplinary fields and to reshape the ways in which disciplinary scholarship is understood and practiced. MTL graduates are leaders in fields such as American studies, ethnic studies, film studies, social and cultural studies, and women's studies, as well as English and comparative literature.

The program trains students to understand the histories and methods of disciplines and to test their assumptions. It considers how disciplines shape knowledge and, most importantly, how interdisciplinary methods reshape objects of study. MTL students produce innovative analyses of diverse texts, forms, and practices, including those of literature, history, philosophy, anthropology, law, and science; film, visual arts, popular culture, and performance; and material culture and technology.

Each student constructs a unique program of study suited to his or her research. Students have focused on such areas as gender and sexuality; race and ethnicity; science, technology, and medicine; media and performance; legal studies; and critical and social theory. The program's affiliated faculty is drawn from fields throughout the humanities and humanistic social sciences, as well as from education and law. As interdisciplinary study is impossible without an understanding of the disciplines under consideration, each student is expected to master the methods of literary analysis and to gain a foundation in a second field or discipline.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in interdisciplinary literary studies and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in interdisciplinary literary studies. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of interdisciplinary literary studies and to interpret and present the results of such research.

Master of Arts

The Master of Arts is available to students who are admitted to the doctoral program and have not been awarded an M.A. previously. Students are not admitted into the program for the purpose of earning a terminal Master of Arts degree. Candidates for the Ph.D. who satisfy the committee of their progress and satisfactorily complete 45 units of course work forming a coherent program of study, may apply for an M.A. in Modern Thought and Literature.

Coterminal Bachelor's and Master's Program in Modern Thought and Literature

Each year, one or two undergraduates who are exceptionally well prepared in literature and at least one foreign language and whose undergraduate course work includes a strong interdisciplinary component, may petition to be admitted to the program for the purpose of completing a coterminal M.A. degree. Admission to this program is granted only on condition that in the course of working on their master's degrees they do not apply to enter the Ph.D. program in Modern Thought and Literature. The deadline for application is early February.

To apply, applicants submit:

1. An unofficial grade transcript from Axess.
2. A Petition for Admission to the Coterminal Program from the Registrar's Office.
3. A statement giving the reasons the student wishes to pursue this program and its place in his or her future plans. This statement should pay particular attention to the reasons why the student could not pursue the studies he or she desires in some other way.
4. An initial plan of study listing, quarter by quarter, each course by name, units, and instructor, to be taken in order to fulfill the requirements for the degree for a total of 45 units, including at least 20 units of advanced work in one literature, and at least 20 units in a coherent interdisciplinary program of courses taken in non-literature departments. (Changes in the course list are to be expected.)
5. A writing sample of critical or analytical prose, 20 pages maximum.
6. Two letters of recommendation from members of the faculty who know the applicant well and who can speak directly to the question of his or her ability to do graduate-level work.
7. A designated adviser from among the Stanford faculty; normally one letter of recommendation will be from this faculty member.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (p. 36)" section of this bulletin. For University coterminal degree program rules and University

application forms, see the Registrar's Publications and Online Guides (<http://studentaffairs.stanford.edu/registrar/publications/#Coterm>) web site.

Degree Requirements

The candidate for the M.A. must complete at least 45 units of graduate work, to be divided in the following manner:

1. The introductory seminar, MTL 334A Concepts of Modernity 1: Philosophical Foundations, 5 units; students may substitute MTL 334B Concepts of Modernity 2: The Study of Culture in the Age of Globalization, with the director's permission.
2. At least 20 units of advanced course work in literature, to be approved by the director.
3. At least 20 units of course work in a coherent and individually arranged interdisciplinary program, to be approved by the director.

By the end of the course of study, each candidate must also demonstrate a reading knowledge of at least one foreign language.

Doctor of Philosophy in Modern Thought and Literature

University requirements for the Ph.D. are discussed in the "Graduate Degrees (p. 38)" section of this bulletin.

A candidate for the Ph.D. degree in Modern Thought and Literature must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the B.A. degree. He or she is expected to complete at least 18 courses of graduate work in addition to the dissertation. Students may spend one year of graduate study abroad.

Requirements for the Ph.D. in Modern Thought and Literature are:

- | | | Units |
|----|--|-------|
| 1. | MTL 334A Concepts of Modernity 1: Philosophical Foundations | 5 |
| | MTL 334B Concepts of Modernity 2: The Study of Culture in the Age of Globalization | 5 |
| | MTL 299 Edgework: New Directions in the Study of Culture (Spring Quarter; required of all first-year students) | 1-3 |
2. A coherent program of eight courses of advanced work in literary studies to be worked out with the adviser, of which at least six must be regularly scheduled courses in literature. Courses in the teaching of composition, independent study, or thesis registration may not be counted among these six courses; ENGLISH 396L Pedagogy Seminar I, MTL 399 Reading for Orals, MTL 802 TGR Dissertation may not be counted toward these requirements under any circumstances. Petitions to modify this requirement to substitute a course from a non-literature department for one or more of the required eight literature courses must be approved by the MTL Committee in Charge.
 3. Eight courses of advanced work in non-literature departments, the core of which is completion of either a departmental minor or an interdepartmental concentration, typically consisting of six courses. Departmental minors are available from the departments of Anthropology, Art and Art History, Communication, History, Philosophy, Political Science, Religious Studies, and Sociology (see the relevant information in those sections of this bulletin). Individually designed concentrations may be approved by petition to the director. In addition to the required six courses in a minor or a concentration, two additional courses from non-literature departments are chosen in consultation with the student's academic adviser. At the end of the first year, each student must submit to the director a

preliminary statement of approximately 1500 words outlining the scope and coherence of the interdisciplinary focus, either as it relates to the departmental minor or to the interdepartmental concentration. In either case, the student should note the relevance of any proposed coursework to the overall program (see #7 below). Course restrictions noted above in item 2 also apply.

4. *Qualifying Paper:* This certifies that students are likely to be able to undertake the quality of research, sustained argumentation, and cogent writing demanded in a doctoral dissertation. The qualifying paper must be a substantial revision of a seminar paper written at Stanford during the first year and should embody a substantial amount of independent research, develop an intellectual argument with significant elements of original thinking, and demonstrate the ability to do interdisciplinary work. Each paper is evaluated by two or three readers (designated before the end of the first year of graduate study), one of whom must be a member of the Committee in Charge or have been a member within the previous five years. Qualifying papers must be submitted to the program office no later than the end of the third week of the fifth quarter of enrollment, normally, Winter Quarter of the second year.
5. *Teaching*, an essential part of the program, is normally undertaken in conjunction with the Department of English. Candidates are required to demonstrate competence in teaching.
6. Students must demonstrate, by the end of the third quarter of the first year, a reading knowledge of one foreign language and, by the beginning of the first quarter of the third year, a reading knowledge of one other foreign language. Reading knowledge means the ability to make a genuine scholarly use of the language: that is, to read prose of ordinary difficulty. Students may not take the University oral examination before completion of the foreign language requirement.
7. *Candidacy:* At the end of the second year, students apply for candidacy. The following qualifications are required before candidacy can be certified: the earlier submission of a satisfactory qualifying paper; demonstration of a reading knowledge of one foreign language; satisfactory progress in course work; a list of courses applicable to the degree, distinguishing between courses appropriate to the literary component and courses appropriate to the non-literary component; designation of a departmental minor or an interdisciplinary concentration; and the submission of a statement outlining the scope and coherence of the interdisciplinary component of the program in relation to the literary component, and noting the relevance of the course work to that program.
8. *Annual Review:* The program and progress of each student must be approved by the Committee in Charge at the end of each academic year. First-year students will submit the preliminary interdisciplinary statement along with the first year-end report (see #3 above).
9. *University Oral Examination:* This examination, covering the student's areas of concentration, is normally taken in the third year of graduate study. It is a two-hour oral examination administered by four faculty members specializing in the student's areas of concentration, and a chair from another department. The exam is based on a substantial reading list prepared by the student in conjunction with the faculty committee and designed to cover the areas of expertise pertinent to the student's dissertation project.
10. *Dissertation Proposal and Colloquium:* Within one quarter after the University oral examination, the student writes up the dissertation proposal: 15-20 pages with a general description of the project and a chapter breakdown plus a bibliography. The proposal is submitted to the program director and the dissertation committee for approval. After completion of the first chapter of the dissertation, the student sets up a meeting with the dissertation committee for one hour to discuss the work accomplished in the first chapter and plans for completing the rest of the dissertation.

11. *Dissertation:* The fourth and fifth years are devoted to the dissertation, which should be a substantial and original contribution acceptable to the Committee in Charge of Modern Thought and Literature. The subject is drawn from the literature of specialization and the area of nonliterary studies. The dissertation project will conclude with a two-hour defense. The first hour is open to the public and includes a brief presentation of the dissertation project on the part of the Ph.D. candidate. The second hour is reserved to the candidate and his/her Dissertation Committee.

Director: Paula M. L. Moya

Committee in Charge: Paula M.L. Moya (Chair), Scott Bukatman, Shelley Fisher Fishkin, Zephyr Frank, Sean Hanretta, Claire Jarvis, Pavle Levi, Alison McQueen, Jisha Menon (on leave), Vaughn Rasberry, José David Saldívar, Alex Woloch

Affiliated Faculty: Lanier Anderson (Philosophy), Russell Berman (German Studies), Joshua Cohen (Political Science, Philosophy, Law), Jean-Pierre Dupuy (French and Italian), Paulla Ebron (Anthropology), Harry Elam (Drama), Michele Elam (English), Amir Eshel (German Studies), Shelley Fisher Fishkin (English), Zephyr Frank (History), Estelle Freedman (History), Hans U. Gumbrecht (French and Italian, Comparative Literature), Sean Hanretta (History), Claire Jarvis (English), Matthew Kohrman (Anthropology), Aishwary Kumar (History), Pam Lee (Art and Art History), Pavle Levi (Art and Art History), Helen Longino (Philosophy), Andrea A. Lunsford (English), Saikat Majumdar (English), Douglas McAdam (Sociology), Alison McQueen (Political Science), Jisha Menon (Drama), Franco Moretti (English, Comparative Literature), Paula Moya (English), Sianne Ngai (English), Josiah Ober (Political Science), David Palumbo-Liu (Comparative Literature), Peggy Phelan (Drama), Vaughn Rasberry (English), José David Saldívar (Comparative Literature), Ramón Saldívar (English, Comparative Literature), Debra Satz (Philosophy), Londa Schiebinger (History), Stephen Sohn (English), Helen Stacy (Law), Fred Turner (Communication), Richard White (History), Bryan Wolf (Art and Art History), Alex Woloch (English), Yvonne Yarbro-Bejarano (Iberian and Latin American Cultures)

Music

Courses offered by the Department of Music are listed under the subject code MUSIC on the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=MUSIC&filter-catalognumber=MUSIC=on>) web site.

Mission of the Department of Music

The Department of Music promotes the practice, understanding and enjoyment of music in the university, offering a broad array of educational opportunities with specialization in composition, performance, musicology, ethnomusicology, and music technology.

Learning Outcomes (Undergraduate)

Students majoring in music pursue foundational theoretical and historical coursework before moving on to this in-depth, writing intensive musical analysis course. This course provides the requisite skills needed to continue in advanced work for the major. Students must demonstrate an understanding of tonal music and facility in discussing it.

1. the ability to select and outline an appropriate topic area and select appropriate methodologies for tonal music analysis.
2. an appropriate mastery of the principles underpinning tonal music analysis, referencing appropriate authors and analytical tools and methodologies.
3. appropriate mastery of the use of primary source materials in written and oral presentations.
4. appropriate mastery of the use of secondary source materials in written and oral presentations.
5. the analytical writing skills necessary for the execution of the course papers.
6. the skills necessary to present a musical analysis to an audience in a coherent manner.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Music, including concentration in the fields of Composition, Music History, Computer-Based Music Theory and Acoustics, or Music, Science, and Technology, and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge and practice of Music and to interpret and present the results of such work in appropriate venues and publications.

The Doctor of Philosophy (Ph.D.) is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in either Musicology or Computer-Based Music Theory and Acoustics, based at the Center for Computer Research in Music and Acoustics (CCRMA).

The Doctor of Musical Arts (D.M.A.) in Composition is conferred upon candidates who have demonstrated substantial abilities in creating new musical works as demonstrated by their completed works under the supervision of composition faculty.

Bachelor of Arts in Music

The undergraduate major in Music is built around a series of foundation courses in theory, musicianship, and music history, in addition to performance and the proficiency requirements outlined below. Majors must complete a minimum of 66 units within the department. All required courses for the B.A. in any concentration must be taken for a letter grade. Electives may be taken credit/no credit, but any courses taken towards concentration requirements must carry a letter grade.

Suggested Preparation for the Major

Because of the sequence of courses, it takes more than two years to complete the requirements for the major. Students are required to meet with the undergraduate student services officer in the department prior to declaring the major. It is recommended that prospective majors schedule this consultation with the undergraduate student services officer as early as possible in their careers in order to plan a program that allows sufficient time for major course work, practice, and University requirements outside the major. Early planning is especially important for students wishing to double-major, for those contemplating overseas study during their undergraduate years, for those wishing to do an in-depth concentration in the Music major, and for those with particular musical talents and interests.

It is recommended that music majors complete MUSIC 21 Elements of Music I, MUSIC 22 Elements of Music II, and MUSIC 23 Elements of Music III in the freshman year; the series should be completed by Autumn Quarter of the junior year. It is recommended that music majors complete MUSIC 40 Music History to 1600, MUSIC 41 Music History 1600-1830, and MUSIC 42 Music History Since 1830 in the sophomore year; the series should be completed by the end of the junior year.

Suggested Preparatory Course:

		Units
MUSIC 19A	Introduction to Music Theory	3
MUSIC 19B	Intermediate Music Theory	3

Fields of Study or Degree Options

Concentrations are offered in: performance; conducting; composition; history and theory; or music, science, and technology. Each concentration is declarable in Axxess as a subplan; guidelines and further information are available from the Department of Music office. In order to complete requirements in a timely manner, students are urged to select this option no later than the middle of the junior year for single-area concentrators and the middle of the sophomore year for multiple-area concentrators. Students pursuing multiple concentrations must fulfill all the requirements of each.

Degree Requirements

In conjunction with the undergraduate student services officer, the student is assigned a departmental adviser with whom the student is required to meet at least once each quarter. Total units and courses required to graduate for each concentration are specified in the relevant section following.

Required Courses

The following courses are required of all majors.

1. Theory

		Units
MUSIC 21	Elements of Music I	4
MUSIC 22	Elements of Music II	4
MUSIC 23	Elements of Music III	4

2. History

		Units
MUSIC 40	Music History to 1600	4
MUSIC 41	Music History 1600-1830	4
MUSIC 42	Music History Since 1830	4

3. Analysis

		Units
MUSIC 121	Analysis of Tonal Music	4
Select two, at the 4-unit level, of the following:		8
MUSIC 122A	Renaissance and Baroque Counterpoint	4
MUSIC 122B	Harmonic Materials of 19th Century	4
MUSIC 122C	Introduction to 20th-Century Composition	4

4. Writing in the Major (WIM)

		Units
Select three, at least two at the 4-unit level, of the following:		11-12
MUSIC 140	Studies in Medieval Music	4
MUSIC 141	Studies in Renaissance Music	4
MUSIC 142	Studies in Baroque Music	4
MUSIC 143	Studies in Classic Music	4

MUSIC 144	Studies in Romantic Music	4
MUSIC 145	Studies in Modern Music (Concepts of New Music)	4
MUSIC 146	Music and Urban Film	4
MUSIC 147	The Soul Tradition in African American Music	4
MUSIC 147A	Music Ethnography of the Bay Area	4
MUSIC 148	Musical Shakespeare: Theater, Song, Opera, and Film	4
MUSIC 149	Reactions to the Record: Interpreting Beethoven	4
MUSIC 251	Psychophysics and Music Cognition	4

5. Applied

- A minimum of five quarters totaling 15 units of private instruction in instrumental and/or vocal performance (MUSIC 172/272-177/277); students who do not qualify for private instruction at the intermediate or advanced level, but who wish to pursue the major may take introductory voice (MUSIC 65A Voice Class I and MUSIC 73 Intermediate Voice Class), piano (MUSIC 12A Introductory Piano Class MUSIC 12B Introductory Piano Class and MUSIC 72A Intermediate Piano Class), or guitar (MUSIC 74C Classical Guitar Class) to reach the minimum proficiency levels required to be accepted into a private studio and then complete their 5 quarters. Requirements for the minimum levels of proficiency in each instrument for private instruction are posted at: <http://music.stanford.edu/Academics/Auditions.html>.
- A minimum of five quarters totaling at least 5 units of work in one or more of the department's organizations or chamber groups. To fulfill the ensemble requirement, Music majors need at least three quarters of participation in the department's traditional large ensembles (MUSIC 159-167), with the exception of students whose primary instrument is harp, keyboard, or guitar, who need to participate at least one quarter in the ensembles above, but who may fulfill the rest of the requirement with chamber music (MUSIC 171 Chamber Music). MUSIC 156 "sic": Improvisation Collective may count for up to two of the ensemble-unit requirements for the Music major.

Note—The following courses do not satisfy this requirement:

		Units
MUSIC 128	Stanford Laptop Orchestra: Composition, Coding, and Performance	1-5
MUSIC 158	Soundwire Ensemble	2-3
MUSIC 160A	Stanford Philharmonia Orchestra	1
MUSIC 160B	Stanford New Ensemble	1
MUSIC 161C	Red Vest Band	1
MUSIC 161D	Stanford Brass Ensemble	1

6. Additional requirements

- Majors are required to pass a Piano Proficiency examination as part of the music theory core (MUSIC 21 Elements of Music I, MUSIC 22 Elements of Music II, MUSIC 23 Elements of Music III). The examination is given in the first two weeks of MUSIC 21 Elements of Music I. Students who do not pass the Piano Proficiency examination are required to enroll in either MUSIC 12A Introductory Piano Class, MUSIC 12B Introductory Piano Class, or MUSIC 12C Introductory Piano Class concurrently with the music theory core until they are able to pass the examination. The examination consists of scales and arpeggios, performance of a simple tune to be set by the examiner, sight-reading, and the performance of prepared pieces. Information regarding the proficiency examination may be downloaded at <http://music.stanford.edu/private/downloads/PIANO%20PROFICIENCY%20EXAM.doc>

- Majors must also pass an ear-training proficiency examination, which is one of the requirements to complete MUSIC 23 Elements of Music III. It may be taken by arrangement and demonstrates a student's ability to hear music accurately and to perform it at sight.

Electives

1. Concentration in Performance

In addition to degree requirements required of majors listed above, students in the Performance concentration must:

- Complete at least 6 additional, graded course units in one area of performance. Acceptable courses are described under "Applied" in the section describing private instruction and ensemble course work above. Additional courses might include, but are not limited to:

		Units
MUSIC 126	Introduction to Thoroughbass	1-3
MUSIC 154	History of Electronic Music	1-5
MUSIC 182	Diction for Singers	1
MUSIC 269	Research in Performance Practices	1-5
MUSIC 183A	German Art Song Interpretation	1
MUSIC 183B	French Art Song Interpretation	1
MUSIC 184	Vocal Repertory Workshop	1-3
- Register for an independent project (MUSIC 198 Concentrations Project, 4 units) in the senior year under faculty supervision, leading to a senior recital.

2. Concentration in Conducting

In addition to degree requirements required of majors listed above, students in the Conducting concentration must:

- Complete at least 6 additional, graded course units in conducting. Additional courses might include, but are not limited to:

		Units
MUSIC 127	Instrumentation and Orchestration	3
MUSIC 130A	Introduction to Conducting	3
MUSIC 130B	Elementary Orchestral Conducting	3
MUSIC 130C	Elementary Choral Conducting	3
MUSIC 230	Advanced Orchestral Conducting	2-4
MUSIC 231	Advanced Choral Conducting	2-4
- Register for an independent project (MUSIC 198 Concentrations Project, 4 units) in the senior year under faculty supervision, leading to a senior conducting project.

3. Concentration in Composition

In addition to degree requirements required of majors listed above, students in the Composition concentration must:

- Complete at least 6 additional, graded course units in composition. Additional courses might include, but are not limited to:

		Units
MUSIC 123	Undergraduate Seminar in Composition	3
MUSIC 125	Individual Undergraduate Projects in Composition	1-3
MUSIC 127	Instrumentation and Orchestration	3
MUSIC 150	Musical Acoustics	3
MUSIC 154	History of Electronic Music	1-5

Select one of the following Series:

Series A (6-12)

MUSIC 220A	Fundamentals of Computer-Generated Sound	2-4
------------	--	-----

MUSIC 220B	Compositional Algorithms, Psychoacoustics, and Computational Music	2-4
MUSIC 220C	Research Seminar in Computer-Generated Music	2-4

Series B (0)

Any of the series in computer-generated sound, music, and composition

- Register for an independent project (MUSIC 198 Concentrations Project, 4 units) in the senior year under faculty supervision, leading to a composition.

4. Concentration in History and Theory

In addition to degree requirements required of majors listed above, students in the History and Theory concentration must:

- Complete at least 6 additional, graded course units in history and theory. Additional courses might include, but are not limited to:

2. Units

Select any course not taken in fulfillment of the major requirement:

MUSIC 122A	Renaissance and Baroque Counterpoint	4
MUSIC 122B	Harmonic Materials of 19th Century	4
MUSIC 122C	Introduction to 20th-Century Composition	4
MUSIC 140	Studies in Medieval Music	3-4
MUSIC 141	Studies in Renaissance Music	3-4
MUSIC 142	Studies in Baroque Music	3-4
MUSIC 143	Studies in Classic Music	3-4
MUSIC 144	Studies in Romantic Music	3-4
MUSIC 145	Studies in Modern Music	4
MUSIC 146	Music and Urban Film	3-4
MUSIC 147	The Soul Tradition in African American Music	3-4
MUSIC 148	Musical Shakespeare: Theater, Song, Opera, and Film	3-4
MUSIC 149	Reactions to the Record: Interpreting Beethoven	3-4
MUSIC 251	Psychophysics and Music Cognition	1-5
MUSIC 221	Topics in the History of Theory	3-5

Select one of the following Series:

Series A (6-12)

MUSIC 220A	Fundamentals of Computer-Generated Sound	2-4
MUSIC 220B	Compositional Algorithms, Psychoacoustics, and Computational Music	2-4
MUSIC 220C	Research Seminar in Computer-Generated Music	2-4

Series B (0)

Any of the series in computer-generated sound, music, and composition.

- Register for an independent project (MUSIC 198 Concentrations Project 4 units) in the senior year under faculty supervision, leading to a senior research paper.

5. Concentration in Music, Science, and Technology

Requires completion of 62 units of course work that differs from that of the major and is delineated below. This field of study is designed for those students interested in the musical ramifications of rapidly evolving computer technology and digital audio, and in the acoustic and psychoacoustic foundations of music. This program can serve as a

complementary major to students in the sciences and engineering. Students in the program are required to include the following courses in their studies:

- Theory and Analysis
- | | Units | |
|------------|--|------|
| MUSIC 21 | Elements of Music I | 4 |
| MUSIC 22 | Elements of Music II | 4 |
| MUSIC 23 | Elements of Music III (includes passing the piano and ear-training proficiency examinations, as described for the major) | 4 |
| MUSIC 121 | Analysis of Tonal Music | 4 |
| MUSIC 150 | Musical Acoustics | 3 |
| MUSIC 251 | Psychophysics and Music Cognition | 1-5 |
| MUSIC 220A | Fundamentals of Computer-Generated Sound | 2-4 |
| MUSIC 220B | Compositional Algorithms, Psychoacoustics, and Computational Music | 2-4 |
| MUSIC 220C | Research Seminar in Computer-Generated Music | 2-4 |
| MUSIC 220D | Research in Computer-Generated Music | 1-10 |
| MUSIC 250A | Physical Interaction Design for Music | 3-4 |

- Applied

- Individual studies in performance, MUSIC 172/272-177/277 (6 units) or the sequence below: Course List

	Units	
MUSIC 192A	Foundations of Sound-Recording Technology	3
MUSIC 192B	Advanced Sound Recording Technology	3

- Ensemble as described above for the major (5 units) or MUSIC 192C: Session Recording (5 units)

- History

	Units	
2. Select two of the following:		
MUSIC 40	Music History to 1600	4
MUSIC 41	Music History 1600-1830	4
MUSIC 42	Music History Since 1830	4

- The program requires a senior research project (4 units) completed under faculty guidance. May be completed in conjunction with enrollment in any of the following:

	Units	
MUSIC 220D	Research in Computer-Generated Music	4
MUSIC 199	Independent Study	4
MUSIC 198	Concentrations Project	4

Honors Program

Honors in Music are awarded by the faculty to Majors who have produced an independent project of exceptional quality through the Concentration program. Students who wish to pursue Honors must declare their Concentration(s) by May 31 of the Junior year (see the Undergraduate Student Services Officer for concentration-specific requirements). To receive Honors students must also have earned an overall GPA of 3.60 or higher and a GPA of 3.70 or higher in courses required for the Music Major. Honors are conferred solely through faculty adjudication. For students concentrating in multiple areas, a single jury will be convened.

Overseas Study or Study Abroad

Courses in Music are often available at Stanford overseas programs, especially in Berlin, Paris, Florence, and Oxford. See the "Overseas Studies Program" section of this bulletin for this year's listings. Music majors and

minors should talk to the Department of Music undergraduate administrator prior to going overseas.

Minor in Music

Minors in Music in the concentration areas of performance, conducting, composition and history and theory, as well as in the concentration in music, science, and technology provide the student with a core of essential Music courses in the disciplines that establish both a foundation for informed appreciation of music and a basis for more advanced study, should the student wish to pursue it.

Degree Requirements

Total of 36 units required course work as delineated below. Students in either minor must also pass the piano and ear-training proficiency examinations required of Music majors.

Required Courses: Performance, Conducting, Composition, and History and Theory

1. Theory

		Units
MUSIC 21	Elements of Music I	4
MUSIC 22	Elements of Music II	4
MUSIC 23	Elements of Music III	4

2. History

		Units
MUSIC 40	Music History to 1600	4
MUSIC 41	Music History 1600-1830	4
MUSIC 42	Music History Since 1830	4

3. Applied: Ensemble

Two quarters, 2 units total.

		Units
MUSIC 159	Early Music Singers	1
MUSIC 160	Stanford Symphony Orchestra	1
MUSIC 160S	Summer Orchestra	1
MUSIC 161A	Stanford Wind Ensemble	1
MUSIC 161B	Jazz Orchestra	1
MUSIC 162	Symphonic Chorus	1
MUSIC 163	Memorial Church Choir	1
MUSIC 165	Chamber Chorale	1
MUSIC 167	University Singers	1
MUSIC 167S	Summer Chorus	1

4. Applied: Individual

Two quarters at 3 units per quarter, 6 units total.

		Units
MUSIC 159	Early Music Singers	1
MUSIC 160	Stanford Symphony Orchestra	1
MUSIC 160S	Summer Orchestra	1
MUSIC 161A	Stanford Wind Ensemble	1
MUSIC 161B	Jazz Orchestra	1
MUSIC 162	Symphonic Chorus	1

MUSIC 163	Memorial Church Choir	1
MUSIC 165	Chamber Chorale	1
MUSIC 167	University Singers	1
MUSIC 167S	Summer Chorus	1

4. WIM, 4 units

		Units
MUSIC 140	Studies in Medieval Music	4
MUSIC 141	Studies in Renaissance Music	4
MUSIC 142	Studies in Baroque Music	4
MUSIC 143	Studies in Classic Music	4
MUSIC 144	Studies in Romantic Music	4
MUSIC 145	Studies in Modern Music	4
MUSIC 146	Music and Urban Film	4
MUSIC 147	The Soul Tradition in African American Music	4
MUSIC 147A	Music Ethnography of the Bay Area	4
MUSIC 148	Musical Shakespeare: Theater, Song, Opera, and Film	4
MUSIC 149	Reactions to the Record: Interpreting Beethoven	4
MUSIC 251	Psychophysics and Music Cognition	4

Required Courses: Music, Science and Technology

1. Theory

		Units
MUSIC 21	Elements of Music I	4
MUSIC 22	Elements of Music II	4
MUSIC 23	Elements of Music III	4
MUSIC 150	Musical Acoustics	3
MUSIC 220A	Fundamentals of Computer-Generated Sound	2-4
MUSIC 220B	Compositional Algorithms, Psychoacoustics, and Computational Music	2-4

2. Applied

		Units
MUSIC 192A	Foundations of Sound-Recording Technology	3
MUSIC 192B	Advanced Sound Recording Technology	3
MUSIC 192C	Session Recording (two quarters, 3 units total)	1-2

3. WIM, 4 units

		Units
MUSIC 251	Psychophysics and Music Cognition	4

Performance Certificate Program for Non Music Majors

As a locus of great academic and artistic depth and diversity, the Department of Music's performance programs have long engaged students who, even though they are not music majors, are serious and dedicated to furthering their skills in music performance. The Certificate in Music Performance program provides a select cohort of these students the opportunity for further recognition of their artistic achievement.

This program is open by audition to undergraduate students who already demonstrate a high degree of accomplishment in their area of music performance, study privately with one of the Department of Music's faculty, and who wish to bolster their performance studies with coursework that may be drawn from the Department of Music's other areas of academic focus: history, theory, computer music, and composition. The Certificate in Music Performance is issued by the Department of Music and will not appear on any University record, including the student's transcript.

Admission

Students are admitted to the Certificate in Music Performance program based on an audition adjudicated by Department of Music faculty at the beginning of spring quarter. To request an audition, the student should speak with the private lesson instructor and the Department of Music's undergraduate student services officer. Email ugmusicinquiries@stanford.edu for additional information. At the time of the audition, students must have already declared a major outside of music.

Requirements

Once admitted into the program, students must complete a course plan to be approved by Department faculty based on the requirements below

1. Performance

- A minimum of 6 quarters of individual lessons of private instruction and/or vocal performance (MUSIC 172/272-177/277). Any quarters of instruction taken prior to admission into the program may also count towards these requirements. Requirements for the minimum levels of proficiency in each instrument for private instruction are posted on the Music Department's (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/music/%20http://music.stanford.edu/Academics/Auditions.html.html>) web site. All 6 quarters of lesson study must be in the same instrument area.
- A minimum of 6 quarters of ensemble experience in the Department of Music's ensembles and chamber groups. For students whose primary instrument area is guitar, keyboard or harp, at least one quarter of ensemble experience must be in one of the department's traditional large ensembles (MUSIC 159-167, or MUSIC 184). The remaining ensemble requirements may be filled with chamber music (MUSIC 171). Keyboard students may also take MUSIC 183B French Art Song Interpretation, MUSIC 183B French Art Song Interpretation, and MUSIC 183B French Art Song Interpretation to fulfill this requirement. All non-keyboard, guitar or harp students must successfully complete 3 quarters in the department's traditional ensembles (MUSIC 159-167 and MUSIC 184), and 3 quarters in conductor-less, small ensembles such as chamber music or jazz combos MUSIC 183B French Art Song Interpretation. MUSIC 156 "sic": Improvisation Collective may count for up to two of the ensemble unit requirements. Any quarters of ensemble taken prior to admission into the program may also count towards these requirements.

2. Music Theory

Students are required to complete one course in Music Theory (MUSIC 21 Elements of Music I, MUSIC 22 Elements of Music II, MUSIC 23 Elements of Music III, or MUSIC 121 Analysis of Tonal Music). For the purposes of the Performance Certificate, the student may elect to take these courses on a Credit/No Credit grading basis. However, students must also pass the associated Piano Proficiency Exam and Ear Training Exam as part of the Music Theory course requirements.

3. Elective Courses

6 or more total course units in Music, dependent upon course-plan document submitted following acceptance into the program.

4. Final Project

To complete the Performance Certificate, students must enroll in a 4 unit MUSIC 199 Independent Study and complete a final, capstone performance-based project. Students must pass faculty adjudication, and, in addition, complete a writing project (essay or program notes) pre-approved by the lesson instructor.

Master of Arts in Music

University requirements for the M.A. are described in the "Graduate Degrees (p. 38)" section of this bulletin.

None of Stanford's required undergraduate courses may be credited toward an advanced degree unless specifically required for both degrees. Only work that receives a grade of 'A,' 'B,' or 'Satisfactory' (a passing grade in an instructor-mandated credit/no credit course) in Music courses numbered 100 or higher taken as a graduate student is recognized as fulfilling the advanced-degree requirements. Students may need to devote more than the minimum time in residence if preparation for graduate study is inadequate.

Admission

Applicants are required to submit evidence of accomplishment (scores, recordings, and/or research papers) when they complete the application form. Applicants should arrange to take the Graduate Record Examination (GRE) well in advance of the December 11 application deadline. All components of the application are due by December 11. International students whose first language is not English are also required to take the TOEFL exam (with certain exceptions: see the Office of Graduate Admissions (<http://studentaffairs.stanford.edu/gradadmissions>) web site.

Fields of Study or Degree Options

All of the following fields of study are declarable as subplans in Axxess; they appear on the transcript but they do not appear on the diploma:

- Master of Arts degree (M.A.)—in Composition.
- Master of Arts degree (M.A.)—in Music History.
- Master of Arts degree (M.A.)—in Computer-Based Music Theory and Acoustics.
- Master of Arts degree (M.A.)—in Music, Science, and Technology (M.A./M.S.T.)
 - Note: The M.A./M.S.T. program is the only terminal master's degree; it is two years in duration.

Degree Requirements

A minimum of 45 academic units is required for the master's degree in Music. The Department of Music does not accept students for study only towards the M.A. degree except in the Music, Science, and Technology program, described below.

Required Courses

1. Composition

Students are not admitted into the M.A. as a terminal degree for composition: rather, students in the D.M.A. program in composition who enter directly from the bachelor's level may, upon completing 45 graduate-level units and advancing to candidacy by passing the qualifying examination, be recommended for the M.A. degree in composition.

2. Music History

Students are not admitted into the M.A. as a terminal degree for music history: rather, students in the Ph.D. program in musicology who enter directly from the bachelor's level may, upon completing 45 graduate-level units and advancing to candidacy by passing the qualifying examination, be recommended for the M.A. degree in music history.

3. Computer-Based Music Theory and Acoustics

Students are not admitted into the M.A. as a terminal degree for computer-based music theory and acoustics: rather, students in the Ph.D. program in computer-based music theory and acoustics who enter directly from the bachelor's level may, upon completing 45 graduate-level units and advancing to candidacy by passing the qualifying examination, be recommended for the M.A. degree in computer-based music theory and acoustics.

4. Music, Science, and Technology (M.S.T.)

The M.A. in music, science, and technology is the department's only terminal master's degree. This is a two-year program of 45 graduate-level units focusing on the integration of music perception, music-related signal processing and controllers, synthesis, performance, and composition. The program is designed for students who have an undergraduate music, engineering, or science degree. Required course work is listed below. A complete program with an individually-tailored list of electives will be formed in consultation with the student's adviser.

1. Required:

		Units
MUSIC 155	Intermedia Workshop	3-4
MUSIC 201	CCRMA Colloquium	1
MUSIC 220A	Fundamentals of Computer-Generated Sound	2-4
MUSIC 251	Psychophysics and Music Cognition	1-5
MUSIC 256A	Music, Computing, and Design I: Software Paradigms for Computer Music	1-4
MUSIC 320	Introduction to Digital Audio Signal Processing	3-4

3. Electives: students are required to complete an additional 24 units of graduate level work determined in consultation with the student's adviser and will include CCRMA electives, and may include courses taken outside the department.

Doctor of Musical Arts (D.M.A.) and Doctor of Philosophy (Ph.D.) in Music

University requirements for the D.M.A and Ph.D. are described in the "Graduate Degrees" section of this bulletin. The following statements apply to all the graduate degrees described below, unless otherwise indicated.

Admission

Applicants are required to submit evidence of accomplishment (scores, recordings, and/or research papers, according to the proposed field of concentration) when they complete the application form. Applicants should arrange to take the Graduate Record Examination (GRE) well in advance of the December 12 application deadline. All components of the application

are due by December 12. International students whose first language is not English are also required to take the TOEFL exam (with certain exceptions: see the Office of Graduate Admissions (<http://studentaffairs.stanford.edu/gradadmissions>) web site.

Department Examinations

All entering doctoral graduate students are required to take:

1. a diagnostic examination testing the student in theory (counterpoint, harmony, and analysis) and (for musicologists only) the history of Western art music; and,
2. a proficiency examination in sight-singing and piano sight-reading.

These exams are given at the beginning of study in the department (usually the week before school begins). Teaching Assistant assignments and the funding associated with this portion of a graduate student's financial aid package are determined based upon successful completion of these exams.

Graduate Credit

None of Stanford's required undergraduate courses may be credited toward an advanced degree unless specifically required for both degrees. Only work that receives a grade of 'A,' 'B,' or 'Satisfactory' (a passing grade in an instructor-mandated credit/no credit course) in music courses numbered 100 or higher taken as a graduate student is recognized as fulfilling the advanced-degree requirements. Students may need to devote more than the minimum time in residence if preparation for graduate study is inadequate.

The following may be taken as electives for graduate credit:

1. any course in another department numbered 100 or over (with adviser's consent)
2. any course in the Music department numbered 100 or over except those required for the B.A. degree. A letter grade of 'A,' 'B,' or 'S' (in an instructor-mandated pass/fail course) is required.
3. Music department group instruction:

MUSIC 72A	Intermediate Piano Class	1
MUSIC 72C	Harpsichord Class	1
MUSIC 72D	Jazz Piano Class	1
MUSIC 73	Intermediate Voice Class	1
MUSIC 74C	Classical Guitar Class	1
MUSIC 74D	Harp Class	1
MUSIC 75B	Renaissance Wind Instruments Class	1
MUSIC 76	Brass Instruments Class	1
MUSIC 77	Percussion Class	1

Fields of Study or Degree Options

All of the following fields of study are declarable as subplans in Axxess:

• Doctor of Musical Arts degree (D.M.A.) in Composition

The D.M.A. is offered to a limited number of students who demonstrate substantial training in the field and high promise of attainment as composers. Students may work in acoustic and/or electronic forms. Breadth is given through studies in other branches of music and in relevant fields outside music, as desirable. The final project for this degree is a large-scale composition.

• Doctor of Philosophy degree (Ph.D.) in Musicology

• Doctor of Philosophy degree (Ph.D.) in Computer-Based Music Theory and Acoustics

The Ph.D. is offered in areas of the research of Stanford's graduate faculty: Musicology, including specialties in musical aesthetics, history of music theory, and performance practice; and Computer-Based Music Theory and Acoustics (CBMTA), specializing in research in musical acoustics at the Center for Computer Research in Music and Acoustics (CCRMA). The department seeks students who demonstrate substantial scholarship, high promise of attainment, and the ability to do independent investigation and present the results of such research in a dissertation.

Degree Requirements

Residence

The candidate must complete a minimum of 135 academic units (see Residency under the "Graduate Degrees" section of this bulletin). Doctoral candidates working on Ph.D. dissertations or Doctor of Musical Arts (D.M.A.) final projects that require consultation with faculty members continue enrollment in the University under Terminal Graduate Registration (TGR), after they have reached the required 135 academic units and have completed their Special Area examinations.

Qualifying Examination

A written and oral examination for admission to candidacy is given just prior to the fourth quarter of residence for D.M.A. students and Ph.D. students in the Computer-Based Music Theory and Acoustics programs; for Ph.D. students in Musicology, the exams are given just prior to the eighth quarter of residence. This exam tests knowledge of history, theory, repertory, and analysis. For D.M.A. students a *Special Area Examination* topic proposal is due at the time of the *Qualifying Examination*.

Teaching

All students in the Ph.D. or D.M.A. degree programs, regardless of sources of financial support, are required to complete six quarters of supervised teaching at half time. Music 280 (given in Spring Quarter and taken at the end of the first year) is a required course for Teaching Assistants. Additional quarters of teaching may be required by the department.

Required Department Convocations

Until advancing to candidacy, graduate students in all programs are required to attend three events per year, to be announced at the beginning of the fall quarter: one particular Alexander Lecture in Musicology, one particular CCRMA Colloquium, and one particular Graduate Composition Forum.

I. Composition

The Doctor of Musical Arts (D.M.A.) degree in Composition is given breadth through collateral studies in other branches of music and in relevant studies outside music as seems desirable. In addition to degree requirements required of all doctoral graduate students and listed above, students must complete the following required courses:

Required Courses

MUSIC 280	TA Training Course	1
MUSIC 301C	Analysis of Music: Post-Tonal	4

MUSIC 323	Doctoral Seminar in Composition (4 quarters within 3-4 the first two years of study)	
MUSIC 324	Graduate Composition Forum *	1
MUSIC 325	Individual Graduate Projects in Composition †	1-5
One CCRMA elective course from the following list		
MUSIC 220A	Fundamentals of Computer-Generated Sound	
MUSIC 251	Psychophysics and Music Cognition	
MUSIC 255	Intermedia Workshop	
MUSIC 256A	Music, Computing, and Design I: Software Paradigms for Computer Music	
MUSIC 320	Introduction to Digital Audio Signal Processing	

* The requirement is for all six quarters during years 1 & 2, and a minimum of three quarters during years 3 & 4.

† Two or more quarters per year are required until advancement to candidacy; by the end of the second year the student shall have enrolled with a minimum of two different faculty members; but the end of the third year the student shall have enrolled with a minimum of three different faculty.

- Besides those requirements listed above, candidates are expected to produce a number of works demonstrating their ability to compose in a variety of forms and for the common media: vocal, instrumental, and electronic music. If possible, the works submitted are presented in public performance prepared by the composer. Annual progress is reviewed by the composition faculty with a major portfolio review conducted during the Fall Quarter of the third year.
- Foreign Language Requirement—At the time of advancement to candidacy, all D.M.A. students are required to have demonstrated a reading knowledge of one language other than English and the ability to translate it into idiomatic English.
- Special-Area Examination—A written examination in the candidate's field of concentration, one-hour presentation followed by questions in the Graduate Composition Forum, sample course syllabus, and final project proposal are required to be completed during the Winter Quarter of the fourth year of study, no later than the ninth week of classes.
- Final Project Presentation—Required during the last quarter of residence, no later than the ninth week of classes, the purpose of the presentation is to demonstrate the ability of the candidate to organize and present the topic of the final project for public review. It should be one hour in length, followed by questions, treating aspects of the final project. Details regarding the D.M.A. final project presentation may be found in the Department of Music Graduate Handbook (<http://music.stanford.edu/Academics/gradStudies.html>).
- Final Project—Candidate's work culminates in a required Final Project. The final project in composition must be a substantial composition, the scope of which shall be agreed upon by the members of the committee. Typically, work on the final project encompasses several quarters. Usually, smaller works, for specific performances, are composed at the same time.
- Reading Committee—The membership of the reading committee is the principal final project adviser and a minimum of two additional members. The notice of appointment of a D.M.A. Final Project Reading Committee should be submitted to the department at the same time as the approved final project proposal and the completion of the special area exam. It is the responsibility of the student, with the advice of his or her adviser, to approach appropriate faculty members and obtain their consent to serve on the reading committee. Obtain the D.M.A. reading committee form from the department office; fill it out; obtain committee members' signatures; return to the department office.

II. Musicology

In addition to degree requirements required of all doctoral graduate students and listed above, students must complete the following required courses:

Required Courses

MUSIC 200	Graduate Proseminar (required of all musicology students regardless of entering degree level)	4
MUSIC 221	Topics in the History of Theory	3-5
MUSIC 280	TA Training Course	1
MUSIC 300A	Medieval Notation	4
MUSIC 300B	Renaissance Notation	4
MUSIC 301A	Analysis of Music: Modal	4
MUSIC 301B	Analysis of Music: Tonal	4
MUSIC 301C	Analysis of Music: Post-Tonal	4
MUSIC 310	Research Seminar in Musicology *	3-5
MUSIC 312A	Aesthetics and Criticism of Music, Ancients and Moderns: Plato to Nietzsche	4
MUSIC 312B	Aesthetics and Criticism of Music, Contemporaries: Heidegger to Today	4
MUSIC 330	Musicology Dissertation Colloquium †	1

* The requirement is for eight seminars of 3-5 units each. Students may petition to take up to two graduate seminars in other departments, in consultation with their adviser.

† The requirement is for enrollment each Spring Quarter beginning in year four and continuing to graduation.

1. Foreign Language Requirement—At the time of advancement to candidacy, all Ph.D. students in Musicology must have passed a Ph.D. Language examination in German and in a second language, chosen from French, Italian, or Latin (or, on a case-by-case basis, another language, if it has significant bearing on the candidate's field of study). If one of these languages is the student's native language, the student may be exempted from an examination.
2. Special-Area Examination—A written and oral examination testing the student's knowledge of music and research in the student's field of concentration is completed during the fourth year of study, no later than the last day of classes in Autumn Quarter of that year. This includes an oral defense of the dissertation proposal. The examining committee comprises prospective readers of the dissertation.
3. University Oral Examination—Taken once the dissertation is substantially under way; an oral presentation is a defense of dissertation research methods and results.
4. Dissertation—After the first two years of graduate study, the student concentrates on research and writing of the dissertation. The dissertation demonstrates the student's ability to work systematically and independently to produce an essay of competent scholarship.
5. Reading Committee—The minimum membership of the reading committee is 1) the principal dissertation adviser, 2) a second member from the department, and 3) a third member from the major department or another department. If a third member is from another institution, a fourth member must be appointed from the department. The principal dissertation adviser and all other members of the committee must belong to the Academic Council. The notice of appointment of a Reading Committee should be submitted to the department at the same time as the approved dissertation proposal and the completion of the Special-Area Exam. It is the responsibility of the student, with the advice of his or her adviser, to approach appropriate faculty members and obtain their consent to serve on the reading committee.

III. Computer-Based Music Theory and Acoustics

In addition to degree requirements required of all doctoral graduate students and listed above, students must complete the following required courses:

Required Courses

MUSIC 200	Graduate Proseminar	3-4
MUSIC 220A	Fundamentals of Computer-Generated Sound	4
MUSIC 220B	Compositional Algorithms, Psychoacoustics, and Computational Music	4
MUSIC 220C	Research Seminar in Computer-Generated Music	2-4
MUSIC 220D	Research in Computer-Generated Music *	1-10
MUSIC 280	TA Training Course	1
MUSIC 301A	Analysis of Music: Modal	4
MUSIC 301B	Analysis of Music: Tonal	4
MUSIC 301C	Analysis of Music: Post-Tonal	4
MUSIC 320	Introduction to Digital Audio Signal Processing	4

* The requirement is for 12 units.

1. Foreign Language Requirement—At the time of advancement to candidacy, all Ph.D. students in computer-based music theory and acoustics are required to have demonstrated a reading knowledge of one language other than English and the ability to translate it into idiomatic English.
2. Special-Area Examination—A written and oral examination testing the student's knowledge of music and research in the student's field of concentration is completed during the fourth year of study, no later than the last day of classes in Autumn Quarter of that year. This includes an oral defense of the dissertation proposal. The examining committee comprises prospective readers of the dissertation.
3. University Oral Examination—Taken once the dissertation is substantially under way; an oral presentation is a defense of dissertation research methods and results.
4. Dissertation—After the first two years of graduate study, the student concentrates on research and writing of the dissertation. The dissertation demonstrates the student's ability to work systematically and independently to produce an essay of competent scholarship.
5. Reading Committee—The minimum membership of the reading committee is 1) the principal dissertation adviser, 2) a second member from the department, and 3) a third member from the major department or another department. If a third member is from another institution, a fourth member must be appointed from the department. The principal dissertation adviser and all other members of the committee must belong to the Academic Council. The notice of appointment of a Reading Committee should be submitted to the department at the same time as the approved dissertation proposal and the completion of the Special-Area Exam. It is the responsibility of the student, with the advice of his or her adviser, to approach appropriate faculty members and obtain their consent to serve on the reading committee.

Emeriti: (Professors) John M. Chowning, Albert Cohen, George Houle, William H. Ramsey, Leland C. Smith; *(Professors, Performance)* Arthur P. Barnes, Marie Gibson

Chair: Stephen M. Sano

Professors: Jonathan Berger, Karol Berger, Chris Chafe, Brian Ferneyhough, Thomas Grey, Stephen Hinton, Julius O. Smith

Associate Professors: Mark Applebaum, Heather Hadlock (on leave), William P. Maht

Assistant Professors: Takako Fujioka, Jaroslaw Kapuscinski (on leave), Charles Kronengold, Jesse Rodin, Anna Schultz (on leave Autumn), Ge Wang (on leave)

Professors (Teaching): George Barth (Piano), Stephen M. Sano (Director of Choral Studies)

Associate Professor (Performance): Jindong Cai (Director of Orchestral Studies)

Courtesy Professor: Paul DeMarinis

Senior Lecturers: Giancarlo Aquilanti (Director of Theory; Wind Ensemble; on leave Autumn), Talya Berger (Theory), Stephen Harrison (Violoncello), Thomas Schultz (Piano), Gregory A. Wait (Voice; Director of Vocal Studies), Frederick R. Weldy (Piano)

Lecturers: Kumaran Arul (Piano), Fredrick Berry (Jazz Ensemble), Mark Brandenburg (Clarinet), Marie-Louise Catsalis (Voice), Marjorie Chauvel (Harp), Tony Clements (Tuba), Laura Dahl (Resident Collaborative Pianist), Anthony Doheny (Violin), John Dornenburg (Viola da Gamba), Charles A. Ferguson (Guitar), Debra Fong (Violin), Claire Giovannetti (Voice), Dawn Harms (Violin, Viola), Alexandra Hawley (Flute), David Henderson (Classical Saxophone), Wendy Hillhouse (Voice), Robert Hubbard (Oboe), Joyce Johnson-Hamilton (Trumpet), Wendy Ju (HCI theory), Jay Kadis (Audio Recording), McDowell Kenley (Trombone), Mary Linduska (Voice, Summer only), Murray Low (Jazz Piano), Janet Maestre (Flute), Anthony Martin (Baroque Violin), James Matheson (Oboe), Seward McCain (Jazz Bass), Charles McCarthy (Jazz Saxophone), Robert Huw Morgan (University Organist, Organ), Bruce Moyer (Contrabass), Herbert Myers (Early Winds), James Nadel (Jazz), Rufus Olivier (Bassoon), Larry S. Ragent (French Horn), Craig Sapp (CCARH), Melody Schaeffe (Flute), Robin Sharp (Violin), Livia Sohn (Violin), Elaine Thornburgh (Harpsichord), Erik Ulman (Composition, Theory), Linda Uyechi (Taiko), Rick Vandivier (Jazz Guitar), Mark Veregge (Percussion), Sharon Wei (Viola), John Worley (Jazz Trumpet), Hui (Daisy) You (Guzheng), Timothy Zerlang (University Carillonneur, Piano)

Consulting Professors: Jonathan Abel (CCRMA), David Berners (CCRMA), Poppy Crum (CCRMA), Marina Bosi-Goldberg (CCRMA), Pierre Divenyi (CCRMA), Walter Hewlett (Computer-Assisted Research in the Humanities), Eleanor Selfridge-Field (Computer-Assisted Research in the Humanities), Malcolm Slaney (CCRMA)

Visiting Professor: Thomas Rossing (CCRMA)

Artists-in-Residence (St. Lawrence String Quartet): Geoff Nuttall (Violin), Scott St. John (Violin), Lesley Robertson (Viola), Christopher Costanza (Violoncello)

Philosophy

Courses offered by the Department of Philosophy are listed under the subject code PHIL on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=PHIL&filter-catalognumber-PHIL=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=PHIL&filter-catalognumber-PHIL=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=PHIL&filter-catalognumber-PHIL=on>).

Philosophy concerns itself with fundamental problems. Some are abstract and deal with the nature of truth, justice, value, and knowledge; others are more concrete, and their study may help guide conduct or enhance understanding of other subjects. Philosophy also examines the efforts of past thinkers to understand the world and people's experience of it.

Although it may appear to be an assortment of different disciplines, there are features common to all philosophical inquiry. These include an emphasis on methods of reasoning and the way in which judgments are

formed, on criticizing and organizing beliefs, and on the nature and role of fundamental concepts.

Students of almost any discipline can find something in philosophy which is relevant to their own specialties. In the sciences, it provides a framework within which the foundations and scope of a scientific theory can be studied, and it may even suggest directions for future development. Since philosophical ideas have had an important influence on human endeavors of all kinds, including artistic, political, and economic, students of the humanities should find their understanding deepened by acquaintance with philosophy.

Mission of the Undergraduate Program in Philosophy

The mission of the undergraduate program in Philosophy is to train students to think clearly and critically about the deepest and broadest questions concerning being, knowledge, and value and their connections to the full range of human activities and interests. The Philosophy major presents students with paradigms and perspectives of past thinkers and introduces students to a variety of methods of reasoning and the ways in which judgments are formed. Courses in the major equip students with core skills involved in critical reading, analytical thinking, sound argumentation, and the clear and well-organized expression of ideas. Philosophy is an excellent major for those planning a career in law, medicine, or business. It provides analytical skills and a breadth of perspective helpful to those called upon to make decisions about their own conduct and the welfare of others. Philosophy majors who have carefully planned their undergraduate program have an excellent record of admission to professional and graduate schools.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. the ability to communicate philosophical ideas effectively orally and in writing.
2. close reading, argument evaluation, and analytical writing.
3. dialectical ability to identify strengths and weaknesses of an argument and devise appropriate and telling responses.
4. the ability to think critically and demonstrate clarity of conceptualization.
5. the ability to differentiate good from unpromising philosophical questions.
6. the ability to sustain an argument of substantial scope, showing control over logical, argumentative, and evidential relations among its parts.

Special and Joint Majors

The Special Program in the History and Philosophy of Science enables students to combine interests in science, history, and philosophy. Students interested in this program should see the special advisor.

The Special Option in Philosophical and Literary Thought enables students to combine interests in philosophy and literary studies. Interested students should see the Director of Undergraduate Studies for Philosophy and Literature.

The joint major in Philosophy and Religious Studies combines courses from both departments into a coherent theoretical pattern.

Graduate Program in Philosophy

The Department of Philosophy offers an M.A. and a Ph.D. degree. The University's basic requirements for the M.A. and Ph.D. degrees are discussed in the "Graduate Degrees (<http://www.stanford.edu/dept/registrat/bulletin/4901.htm>)" section of this bulletin.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Philosophy and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Philosophy. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Philosophy and to interpret and present the results of such research.

Library and Associations

The Tanner Memorial Library of Philosophy contains an excellent working library and ideal conditions for study. Graduate students and undergraduate majors in philosophy have formed associations for discussion of philosophical issues and the reading of papers by students, faculty, and visitors.

Bachelor of Arts in Philosophy

There are three ways of majoring in Philosophy:

- The General Program
- The Special Program in the History and Philosophy of Science
- The Special Option in Philosophical and Literary Thought.

A student completing any of these receives a B.A. degree in Philosophy. There is also a major program offered jointly with the Department of Religious Studies. To declare a major, a student should consult with the Director of Undergraduate Study and see the undergraduate student services administrator to be assigned an advisor and work out a coherent plan. The department recommends proficiency in at least one foreign language.

General Program

1. Course requirements, minimum 55 units:
 - A. preparation for the major: an introductory course (under 100) and PHIL 80 Mind, Matter, and Meaning. (PHIL 80 Mind, Matter, and Meaning should normally be taken no later than the first quarter after declaring the major.) Students taking the Philosophy Thinking Matters course can count 4 units toward the introductory Philosophy requirement. Students who took the Winter/Spring Philosophy Introduction to the Humanities (IHUM) track may count 5 units toward the Introductory Philosophy requirement. IHUM courses are no longer offered.
 - B. the core: 24 additional Philosophy units as follows:
 - i logic:

Units

Select one of the following:

PHIL 50	Introductory Logic	4
PHIL 150	Basic Concepts in Mathematical Logic	4
PHIL 150E	Logic in Action: A New Introduction to Logic	4
PHIL 151	First-Order Logic	4
PHIL 152	Computability and Logic	4
PHIL 154	Modal Logic	4
PHIL 155	General Interest Topics in Mathematical Logic	4
PHIL 157	Topics in Philosophy of Logic	3

ii philosophy of science:

Units

Select any of the following:

PHIL 60	Introduction to Philosophy of Science	5
PHIL 61	Science, Religion, and the Birth of Modern Philosophy	5
PHIL 160A	Newtonian Revolution	4
PHIL 160B	Newtonian Revolution	4
PHIL 162	Philosophy of Mathematics	4
PHIL 163	Significant Figures in Philosophy of Science	4
PHIL 164	Central Topics in the Philosophy of Science: Theory and Evidence	4
PHIL 165	Philosophy of Physics	4
PHIL 166	Probability: Ten Great Ideas About Chance	4
PHIL 167A	Philosophy of Biology	2-4
PHIL 167B	Philosophy, Biology, and Behavior	4

iii moral and political philosophy:

Units

Select one of the following:

PHIL 170	Ethical Theory	4
PHIL 171	Justice	4-5
PHIL 172	History of Modern Moral Philosophy	4
PHIL 172B	Recent Ethical Theory	4
PHIL 173A	Aesthetics: Metaphor across the Arts	4
PHIL 173B	Metaethics	4
PHIL 174	Freedom and the Practical Standpoint	4
PHIL 174A	Moral Limits of the Market	4

iv metaphysics and epistemology:

Units

Select one of the following:

PHIL 180	Metaphysics	4
PHIL 180A	Realism, Anti-Realism, Irrealism, Quasi-Realism	4
PHIL 181	Philosophy of Language	4
PHIL 182	Truth	4
PHIL 184	Theory of Knowledge	4
PHIL 185	Memory	4
PHIL 186	Philosophy of Mind	4
PHIL 187	Philosophy of Action	4
PHIL 188	Personal Identity	4
PHIL 189	Examples of Free Will	4

v language, mind and action:

vi		Units
	Select one of the following:	
	PHIL 181 Philosophy of Language	4
	PHIL 181B Philosophy of Language: Contemporary Debates	4
	PHIL 186 Philosophy of Mind	4
	PHIL 187 Philosophy of Action	4

vii	history of philosophy:	Units
	Select both of the following	
	PHIL 100 Greek Philosophy	4
	PHIL 102 Modern Philosophy, Descartes to Kant	4

- C. one undergraduate philosophy seminar from PHIL 194A Empiricism and the Philosophy of Mind to PHIL 194T Practical Reason (194 series).
- D. electives: courses numbered 10 or above, at least 9 units of which must be in courses numbered above 99.

2. Units for Tutorial, Directed Reading (PHIL 196 Tutorial, Senior Year, PHIL 197 Individual Work, Undergraduate, PHIL 198 The Dualist), The Dualist (PHIL 198 The Dualist), Honors Seminar (PHIL 199 Seminar for Prospective Honors Students), or affiliated courses may not be counted in the 55-unit requirement. No more than 10 units completed with grades of 'satisfactory' and/or 'credit' may be counted in the 55-unit requirement.
3. A maximum of 10 transfer units or two courses can be used for the departmental major. In general, transfer courses cannot be used to satisfy the six area requirements or the undergraduate seminar requirement. Students may not substitute transfer units for the PHIL 80 requirement.

Special Program in History and Philosophy of Science

Undergraduates may major in Philosophy with a field of study in History and Philosophy of Science. This field of study is declared on Axess. Each participating student is assigned an advisor who approves the course of study. A total of 61 units are required for the sub-major, to be taken according to requirements 1 through 5 below. Substitutions for the listed courses are allowed only by written consent of the undergraduate adviser for History and Philosophy of Science. Students are encouraged to consider doing honors work with an emphasis on the history and philosophy of science. Interested students should see the description of the honors thesis in Philosophy and consult their advisers for further information.

1. Three science courses (for example, biology, chemistry, physics) for 12 units.
2. The following Philosophy (PHIL) core courses must be completed with a letter grade by the end of the junior year:
- 3.

	Select one of the following:	Units
	PHIL 50 Introductory Logic	3
	PHIL 150 Basic Concepts in Mathematical Logic	4
	PHIL 151 First-Order Logic	4
	PHIL 154 Modal Logic	4
	PHIL 60 Introduction to Philosophy of Science	5
	or PHIL 61 Science, Religion, and the Birth of Modern Philosophy	
	PHIL 80 Mind, Matter, and Meaning	5

4. Three history of science courses.

5. Three philosophy of science courses, of which one must be PHIL 164 Central Topics in the Philosophy of Science: Theory and Evidence.
6. Three additional courses related to the major, in philosophy or history, to be agreed on by the advisor.
7. At least six courses in the major must be completed at Stanford with a letter grade. Units for Tutorial, Directed Reading, or The Dualist (PHIL 196 Tutorial, Senior Year, PHIL 197 Individual Work, Undergraduate, PHIL 198 The Dualist) may not be counted in the 61-unit requirement. No more than 10 units completed with grades of 'satisfactory' and/or 'credit' may be counted in the 61-unit requirement.
8. Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring a major. Transfer courses are strictly limited when used to satisfy major requirements.

Special Option in Philosophical and Literary Thought

Undergraduates may major in Philosophy with a special option in philosophy and literature. This option is declared to the department; it is not declared on Axess, and it does not appear on the transcript or the diploma. Students in this option take courses alongside students from other major departments which also have a specialized option associated with the program for the study of philosophical and literary thought, with administrative staff in the DLCL. Each student in this option is assigned an advisor in Philosophy, and students' schedules and overall course of study must be approved in writing by the advisor, and the Directors of Undergraduate Studies of Philosophy and of the program.

A total of 65 units must be completed for this option, including the following requirements.

1. Core requirements for the major in Philosophy, including:
 - A. an introductory course
 - B. PHIL 80 Mind, Matter, and Meaning
 - C. the core distribution requirements listed in section 1b of the general program above.
2. Gateway course in philosophy and literature (PHIL 81 Philosophy and Literature). This course should be taken as early as possible in the student's career, normally in the sophomore year.
3. Three courses in a single national literature, chosen by the student in consultation with the advisor and the program director of undergraduate studies. This normally involves meeting the language proficiency requirements of the relevant literature department.
4. Electives within Philosophy beyond the core requirements totaling at least 5 units, and drawn from courses numbered 100 or higher.
5. Two upper division courses of special relevance to the study of philosophy and literature, as identified by the committee in charge of the program. A list of approved courses is available from the program director of undergraduate studies.
6. Capstone seminar in the PHIL 194A Empiricism and the Philosophy of Mind to PHIL 194T Practical Reason (194 series).
7. Capstone seminar of relevance to the study of philosophy and literature, as approved by the program committee. In some cases, with approval of the Philosophy Director of Undergraduate Study and the program director of undergraduate studies, the same course may be used to meet requirements 6 and 7 simultaneously. In any case, the student's choice of a capstone seminar must be approved in writing by the Philosophy Director of Undergraduate Study and the program director of undergraduate studies. For a Capstone course:
- 8.

Units

Select one of the following:

ENGLISH 117A	Irony: From Socrates to David Foster Wallace	5
COMPLIT 199	Senior Seminar	3-5
COMPLIT 213A	Martin Heidegger	3-5

Students are encouraged to consider doing honors work in a topic related to philosophy and literature through the Philosophy honors program.

The following rules also apply to the special option:

1. Units for Honors Tutorial, Directed Reading (PHIL 196 Tutorial, Senior Year, PHIL 197 Individual Work, Undergraduate, PHIL 198 The Dualist), The Dualist (PHIL 198 The Dualist), Honors Seminar (PHIL 199 Seminar for Prospective Honors Students) may not be counted toward the 65-unit requirement. No more than 10 units with a grade of 'satisfactory' or 'credit' may be counted toward the unit requirement.
2. A maximum of 15 transfer units may be counted toward the major, at most 10 of which may substitute for courses within Philosophy. Transfer credits may not substitute for PHIL 80 Mind, Matter, and Meaning or PHIL 81 Philosophy and Literature, and are approved as substitutes for the five area requirements or PHIL 194 only in exceptional cases.
3. Courses offered in other departments may be counted toward requirements 3, 5 and 7, but such courses, including affiliated courses, do not generally count toward the other requirements. In particular, such courses may not satisfy requirement 4.
4. Units devoted to meeting the language requirement are not counted toward the 65-unit requirement.

Honors Program

Students who wish to undertake a more intensive and extensive program of study, including seminars and independent work, are invited to apply for the honors program during Winter Quarter of the junior year. Admission is selective on the basis of demonstrated ability in philosophy, including an average grade of at least 'A-' in a substantial number of philosophy courses and progress towards satisfying the requirements of the major.

With their application, candidates should submit an intended plan of study for the remainder of the junior and the senior years. It should include at least 5 units of Senior Tutorial (PHIL 196 Tutorial, Senior Year) during Autumn and/or Winter Quarter(s) of the senior year. Students who are applying to Honors College may use the same application for philosophy honors. In the quarter preceding the tutorial, students should submit an essay proposal to the Philosophy undergraduate director and determine an adviser.

Students applying for honors should enroll in Junior Honors Seminar (PHIL 199 Seminar for Prospective Honors Students) during the Spring Quarter of the junior year.

The length of the honors essay may vary considerably depending on the problem and the approach; usually it falls somewhere between 7,500 and 12,500 words. This essay may use work in previous seminars and courses as a starting point, but it cannot be the same essay that has been used, or is being used, in some other class or seminar. It must be a substantially new and different piece of work reflecting work in the tutorials.

A completed draft of the essay is submitted to the adviser at the end of the Winter Quarter of the senior year. Any further revisions must be finished by the fifth full week of the Spring Quarter, when three copies of the essay are to be given to the undergraduate secretary. The honors essay is graded by the adviser together with a second reader, chosen by the adviser in consultation with the student. The student also provides an oral defense of the thesis at a meeting with the adviser and second reader. The essay must receive a grade of 'A-' or better for the student to receive honors.

Honors tutorials represent units in addition to the 55-unit requirement.

For further information, contact the Honors' Director.

Joint Major in Philosophy and Religious Studies

The joint undergraduate major in Philosophy and Religious Studies consists of 60 units of course work with approximately one third each in the philosophy core, the religious studies core, and either the general major or the special concentration. Affiliated courses cannot be used to satisfy this requirement.

No courses in either the philosophy or religious studies core may be taken satisfactory/no credit or credit/no credit.

In general, transfer units cannot be used to satisfy the core requirements. Transfer units and substitutions must be approved by the director of undergraduate studies in the appropriate department.

Core Requirements

1. Philosophy (PHIL) courses:

A. Required course:

	Units
B. PHIL 80 Mind, Matter, and Meaning (https://exploreddegrees-nextyear.stanford.edu/schoolofhumanitiesandsciences/philosophy)	5

- C. 16 units, including at least one Philosophy course from each of the following areas:

	Units
i logic and philosophy of science:	
ii PHIL 50 Introductory Logic (https://exploreddegrees-nextyear.stanford.edu/schoolofhumanitiesandsciences/philosophy)	4
PHIL 60 Introduction to Philosophy of Science (https://exploreddegrees-nextyear.stanford.edu/schoolofhumanitiesandsciences/philosophy)	5
PHIL 61 Science, Religion, and the Birth of Modern Philosophy (https://exploreddegrees-nextyear.stanford.edu/schoolofhumanitiesandsciences/philosophy)	5
PHIL 150 Basic Concepts in Mathematical Logic (https://exploreddegrees-nextyear.stanford.edu/schoolofhumanitiesandsciences/philosophy)	4
PHIL 150E Logic in Action: A New Introduction to Logic (https://exploreddegrees-nextyear.stanford.edu/schoolofhumanitiesandsciences/philosophy)	4

PHIL 150X	Basic Concepts in Mathematical Logic	2
(https://exploredegree.nextyear.stanford.schoolofhumanitiesandsciences/philosophy)		
PHIL 151	First-Order Logic	4
(https://exploredegrees-nextyear.stanford.edu/schoolofhumanitiesandsciences/philosophy)		
PHIL 152	Computability and Logic	4
(https://exploredegree.nextyear.stanford.schoolofhumanitiesandsciences/philosophy)		
PHIL 154	Modal Logic	4
(https://exploredegrees-nextyear.stanford.edu/schoolofhumanitiesandsciences/philosophy)		
PHIL 155	General Interest Topics in Mathematical Logic	4
(https://exploredegree.nextyear.stanford.schoolofhumanitiesandsciences/philosophy)		
PHIL 160A	Newtonian Revolution	4
(https://exploredegrees-nextyear.stanford.edu/schoolofhumanitiesandsciences/philosophy)		
PHIL 160B	Newtonian Revolution	4
(https://exploredegree.nextyear.stanford.schoolofhumanitiesandsciences/philosophy)		
PHIL 162	Philosophy of Mathematics	4
(https://exploredegrees-nextyear.stanford.edu/schoolofhumanitiesandsciences/philosophy)		
PHIL 163	Significant Figures in Philosophy of Science	4
(https://exploredegree.nextyear.stanford.schoolofhumanitiesandsciences/philosophy)		
PHIL 164	Central Topics in the Philosophy of Science: Theory and Evidence	4
(https://exploredegrees-nextyear.stanford.edu/schoolofhumanitiesandsciences/philosophy)		

PHIL 165	Philosophy of Physics	4
(https://exploredegree.nextyear.stanford.schoolofhumanitiesandsciences/philosophy)		
PHIL 166	Probability: Ten Great Ideas About Chance	4
(https://exploredegrees-nextyear.stanford.edu/schoolofhumanitiesandsciences/philosophy)		
PHIL 167A	Philosophy of Biology	2-4
(https://exploredegree.nextyear.stanford.schoolofhumanitiesandsciences/philosophy)		
PHIL 167B	Philosophy, Biology, and Behavior	4
(https://exploredegrees-nextyear.stanford.edu/schoolofhumanitiesandsciences/philosophy)		
iii	ethics and value theory:	
iv		Units
PHIL 170	Ethical Theory	4
(https://exploredegrees-nextyear.stanford.edu/schoolofhumanitiesandsciences/philosophy)		
PHIL 171	Justice	4-5
(https://exploredegree.nextyear.stanford.schoolofhumanitiesandsciences/philosophy)		
PHIL 172	History of Modern Moral Philosophy	4
(https://exploredegrees-nextyear.stanford.edu/schoolofhumanitiesandsciences/philosophy)		
PHIL 172B	Recent Ethical Theory	4

D. diversity requirement: Students may not take all their religion courses in one religious tradition.

General Major Requirements

Five additional courses (approximately 20 units) divided between the two departments. No more than five of these units may come from courses numbered under 99 in either department. Each student must also take at least one undergraduate seminar in religious studies and one undergraduate seminar in philosophy.

Special Concentration

With the aid of an adviser, students pursue a specialized form of inquiry in which the combined departments have strength; for example, American philosophy and religious thought, philosophical and religious theories of human nature and action, philosophy of religion. Courses for this concentration must be approved in writing by the advisor.

Directed Reading and Satisfactory/No Credit Units

Units of directed reading for fulfilling requirements of the joint major are allowed only with special permission. No more than 10 units of work with a grade of 'satisfactory' count toward the joint major.

Honors Program

Students pursuing a joint major in Philosophy and Religious Studies may also apply for honors by following the procedure for honors in either of the departments.

Minor in Philosophy

A minor in Philosophy consists of at least 30 units of Philosophy courses satisfying the following conditions:

- Students taking the Philosophy Thinking Matters course may count it as equivalent to a maximum of 4 units of Philosophy courses under 100. Students who took the Winter/Spring Philosophy Introduction to the Humanities (IHUM) track may count these courses as equivalent to a maximum of 5 units of Philosophy courses under 100. IHUM courses are no longer offered.
- At least 10 units must be from courses numbered 100 or above.
- The 30 units must include one of:
 - a history of philosophy course numbered 100 or above
 - one quarter of Philosophy Thinking Matters.
 - two quarters of IHUM (only 5 of the 10 units can count towards 30-unit requirement. IHUM courses are no longer offered.
- One course from any two of the following four areas (PHIL):
 - Philosophy of Science and Logic

		Units
PHIL 60	Introduction to Philosophy of Science	5
PHIL 61	Science, Religion, and the Birth of Modern Philosophy	5
PHIL 160A	Newtonian Revolution	4
PHIL 160B	Newtonian Revolution	4
PHIL 162	Philosophy of Mathematics	4
PHIL 163	Significant Figures in Philosophy of Science	4
PHIL 164	Central Topics in the Philosophy of Science: Theory and Evidence	4
PHIL 165	Philosophy of Physics	4
PHIL 166	Probability: Ten Great Ideas About Chance	4

PHIL 167A	Philosophy of Biology	2-4
PHIL 167B	Philosophy, Biology, and Behavior	4
PHIL 50	Introductory Logic	4
PHIL 150	Basic Concepts in Mathematical Logic	4
PHIL 151	First-Order Logic	4
PHIL 152	Computability and Logic	4
PHIL 154	Modal Logic	4
PHIL 155	General Interest Topics in Mathematical Logic	4
PHIL 157	Topics in Philosophy of Logic	3

B. **Units**

Moral and Political Philosophy		
PHIL 2	Introduction to Moral Philosophy	5
PHIL 170	Ethical Theory	4
PHIL 171	Justice	4-5
PHIL 172	History of Modern Moral Philosophy	4
PHIL 173A	Aesthetics: Metaphor across the Arts	4
PHIL 173B	Metaethics	4
PHIL 174A	Moral Limits of the Market	4
PHIL 174	Freedom and the Practical Standpoint	4

C. **Units**

Metaphysics and epistemology		
PHIL 1	Introduction to Philosophy	5
PHIL 80	Mind, Matter, and Meaning	5
PHIL 180	Metaphysics	4
PHIL 180A	Realism, Anti-Realism, Irrealism, Quasi-Realism	4
PHIL 182	Truth	4
PHIL 184	Theory of Knowledge	4
PHIL 185	Memory	4
PHIL 189	Examples of Free Will	4

D. **Units**

Language, mind and action		
PHIL 181	Philosophy of Language	4
PHIL 181B	Philosophy of Language: Contemporary Debates	4
PHIL 186	Philosophy of Mind	4
PHIL 187	Philosophy of Action	4

- Units for tutorials, directed reading, and affiliated courses may not be counted.
- Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring. The number of transfer units is generally limited to a maximum of 10.
- No more than 6 units completed with grades of 'satisfactory' or 'credit' count towards the 30-unit requirement.

Students must declare their intention to minor in Philosophy in a meeting with the Director of Undergraduate Study. This formal declaration must be made no later than the last day of the quarter two quarters before degree conferral. The Permission to Declare a Philosophy Minor (signed by the Director of Undergraduate Study) lists courses taken and to be taken to fulfill minor requirements. This permission is on file in the department office. Before graduation, a student's record is checked to see that requirements have been fulfilled, and the results are reported to the University Registrar.

Master of Arts in Philosophy

University requirements for the M.A. are discussed in the "Graduate Degrees (p. 38)" section of this bulletin.

Three programs lead to the M.A. in Philosophy. One is a general program providing a grounding in all branches of the subject. The others provide special training in one branch.

Coterminal Bachelor's and Master's Degrees in Philosophy

It is possible to earn an M.A. in Philosophy while earning a B.A. or B.S. This can usually be done by the end of the fifth undergraduate year, although a student whose degree is not in Philosophy may require an additional year. Standards for admission to, and completion of, this program are the same as for M.A. applicants who already have the bachelor's degree when matriculating. Applicants for the coterminal program are not, however, required to take the Graduate Record Exam.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (p. 36)" section of this bulletin. For University coterminal degree program rules and University application forms, see the Publications and Online Guides (<http://studentaffairs.stanford.edu/registrar/publications/#Coterm>) web site.

Admissions

All prospective master's students, including those currently enrolled in other Stanford programs, must apply for admission to the program. No fellowships are available. Entering students must meet with the director of the master's program and have their advisor's approval, in writing, of program proposals. The master's program should not be considered a stepping stone to the doctoral program; these two programs are separate and distinct.

Unit Requirements

Each program requires a minimum of 45 units in philosophy. Students in a special program may be allowed or required to replace up to 9 units of philosophy by 9 units in the field of specialization. Although the requirements for the M.A. are designed so that a student with the equivalent of a strong undergraduate philosophy major at Stanford might complete them in one year, most students need longer. Students should also keep in mind that although 45 units is the minimum required by the University, quite often more units are necessary to complete department requirements. Up to 6 units of directed reading in philosophy may be allowed. There is no thesis requirement, but an optional master's thesis or project, upon faculty approval, may count as the equivalent of up to 8 units. A special program may require knowledge of a foreign language. At least 45 units in courses numbered 100 or above must be completed with a grade of 'B-' or better at Stanford. Students are reminded of the University requirements for advanced degrees, and particularly of the fact that for the M.A., students must complete three full quarters as measured by tuition payment.

General Program

The General Program requires a minimum of 45 units in Philosophy courses numbered above 99. These courses must be taken for a letter grade, and the student must receive at least a 'B-' in the course. Courses taken to satisfy the undergraduate core or affiliated courses may not be counted in the 45 units. The requirement has three parts:

1. Undergraduate Core

Students must have when they enter, or complete early in their program, the following undergraduate courses (students entering from other institutions should establish equivalent requirements with a master's adviser upon arrival or earlier):

A. Logic:

Select one of the following:

		Units
PHIL 50	Introductory Logic	4
PHIL 150	Basic Concepts in Mathematical Logic	4
PHIL 150E	Logic in Action: A New Introduction to Logic	4
PHIL 151	First-Order Logic	4

B. Philosophy of science:

Select any of the following:

		Units
PHIL 60	Introduction to Philosophy of Science	5
PHIL 61	Science, Religion, and the Birth of Modern Philosophy	5
PHIL 163	Significant Figures in Philosophy of Science	4
PHIL 164	Central Topics in the Philosophy of Science: Theory and Evidence	4
PHIL 165	Philosophy of Physics	4
PHIL 166	Probability: Ten Great Ideas About Chance	4
PHIL 167A	Philosophy of Biology	2-4
PHIL 167B	Philosophy, Biology, and Behavior	4

C. Moral and political philosophy:

Select one of the following:

		Units
PHIL 170	Ethical Theory	4
PHIL 171	Justice	4-5
PHIL 172	History of Modern Moral Philosophy	4
PHIL 172B	Recent Ethical Theory	4
PHIL 173A	Aesthetics: Metaphor across the Arts	4
PHIL 173B	Metaethics	4
PHIL 174	Freedom and the Practical Standpoint	4
PHIL 174A	Moral Limits of the Market	4

D. Metaphysics and epistemology:

Select one of the following:

		Units
PHIL 80	Mind, Matter, and Meaning	5
PHIL 180	Metaphysics	4
PHIL 181	Philosophy of Language	4
PHIL 182	Truth	4
PHIL 184	Theory of Knowledge	4
PHIL 185	Memory	4
PHIL 186	Philosophy of Mind	4
PHIL 187	Philosophy of Action	4
PHIL 188	Personal Identity	4
PHIL 189	Examples of Free Will	4

E. History of philosophy: two history of philosophy courses numbered 100 or above

2. Graduate Core

Students must take at least one course numbered over 105 from three of the following five areas (courses used to satisfy the undergraduate core cannot also be counted toward satisfaction of the graduate core). Crosslisted and other courses taught outside the Department of Philosophy do not count towards satisfaction of the core.

- A. Logic and semantics
- B. Philosophy of science and history of science
- C. Ethics, value theory, and moral and political philosophy
- D. Metaphysics, epistemology, and philosophy of language
- E. History of philosophy

3. Each master's candidate must take at least two courses numbered above 200; these cannot be graduate sections of undergraduate courses.

4. Specialization

Students must take at least three courses numbered over 105 in one of the five areas.

Special Program in Symbolic Systems

Students should have the equivalent of the Stanford undergraduate major in Symbolic Systems. Students who have a strong major in one of the basic SSP disciplines (philosophy, psychology, linguistics, computer science) may be admitted, but are required to do a substantial part of the undergraduate SSP core in each of the other basic SSP fields. This must include the following three philosophy courses or their equivalents:

		Units
PHIL 80	Mind, Matter, and Meaning	5
PHIL 151	First-Order Logic	4
Select one of the following:		
PHIL 181	Philosophy of Language	4
PHIL 184	Theory of Knowledge	4
PHIL 186	Philosophy of Mind	4
PHIL 187	Philosophy of Action	4

This work does not count towards the 45-unit requirement.

Course Requirements

1. Four courses in philosophy at the graduate level (numbered 200 or above), including courses from three of the following five areas:
 - A. Philosophy of language
 - B. Logic
 - C. Philosophy of mind
 - D. Metaphysics and epistemology
 - E. Philosophy of science

At most two of the four courses may be graduate sections of undergraduate courses numbered 100 or higher.

2. Three courses numbered 100 or higher from outside Philosophy, chosen in consultation with an advisor. These courses should be from two of the following four areas:
 - A. Psychology
 - B. Linguistics
 - C. Computer Science
 - D. Education

Remaining courses are chosen in consultation with and approved by an advisor.

Special Program in the Philosophy of Language

Admission is limited to students with substantial preparation in philosophy or linguistics. Those whose primary preparation has been in linguistics may be required to satisfy all or part of the undergraduate core requirements as described in the "General Program" subsection above. Those whose preparation is primarily in philosophy may be required to take additional courses in linguistics.

Course Requirements

1. Philosophy of language: two approved courses in the philosophy of language numbered 180 or higher.

2. Syntactic theory and generative grammar:

		Units
PHIL 384	Seminar in Metaphysics and Epistemology	4
LINGUIST 230A	Introduction to Semantics and Pragmatics	4

3. Logic: at least two approved courses numbered PHIL 151 First-Order Logic or higher.
4. An approved graduate-level course in mathematical linguistics or automata theory.

Doctor of Philosophy in Philosophy

Prospective graduate students should see the Office of Graduate Admissions (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/philosophy/http://gradadmissions.stanford.edu>) web site for information and application materials. Applicants should take the Graduate Record Examination by October of the year the application is submitted.

The University's basic requirements for the Ph.D. degree including residence, dissertation, and examination are discussed in the "Graduate Degrees (p. 38)" section of this bulletin. The requirements detailed here are department requirements. These requirements are meant to balance structure and flexibility in allowing students, in consultation with their advisers, to take a path through the program that gives them a rigorous and broad philosophical education, with room to focus on areas of particular interest, and with an eye to completing the degree with an excellent dissertation and a solid preparation for a career in academic philosophy.

Courses used to satisfy any course requirement in Philosophy must be passed with a letter grade of 'B-' or better (no satisfactory/no credit), except in the case of a course/seminar used to satisfy the third-year course/seminar requirement and taken for only 2 units. Such a reduced-unit third-year course/seminar must be taken credit/no credit.

At the end of each year, the department reviews the progress of each student to determine whether the student is making satisfactory progress, and on that basis to make decisions about probationary status and termination from the program where appropriate.

Any student in one of the Ph.D. programs may apply for the M.A. when all University and department requirements have been met.

Proficiency Requirements

1. First-year Ph.D. Proseminar: a one quarter, topically focused seminar offered in Autumn Quarter, and required of all first-year students.

2. Distribution requirements during the first six quarters. Intended to ensure a broad and substantial exposure to major areas of philosophy while allowing for considerable freedom to explore.
 - A. six courses distributed across three areas as follows:
 - i two courses in value theory including ethics, aesthetics, political philosophy, social philosophy, philosophy of law. At least one of the courses satisfying this distribution requirement must be in ethics or political philosophy.
 - ii Two courses in language, mind, and action. One course satisfying this requirement must be drawn from the language related courses, and one from mind and action related courses.
 - iii two courses in metaphysics and epistemology (including metaphysics, epistemology, philosophy of science). At least one of the courses satisfying this requirement must be drawn from either metaphysics or epistemology.
 - iv Instructors indicate which courses may satisfy particular requirements. If a course potentially satisfies more than one requirement the student may use it for only one of those area requirements; no units may be double-counted. Students must develop broad competencies in all these areas. Those without strong backgrounds in these areas would normally satisfy these distribution requirements by taking more basic courses rather than highly specialized and focused courses. Students should consult with their adviser in making these course decisions, and be prepared to explain these decisions when reviewed for candidacy; see requirement 6 below.
 - B. Logic requirement: PHIL 150 Basic Concepts in Mathematical Logic or equivalent.
 - C. History/logic requirement. One approved course each in ancient and modern philosophy, plus either another approved history of philosophy course or PHIL 151 First-Order Logic.
 - D. Students should normally take at least 64 graduate level units at Stanford during their first six quarters (in many cases students would take more units than that) and of those total units, at least 49 units of course work are to be in the Philosophy department. These courses must be numbered above 110, but not including Teaching Methods (PHIL 239 Teaching Methods in Philosophy) or affiliated courses. Units of Individual Directed Reading are normally not to be counted toward this 49-unit requirement unless there is special permission from the student's adviser and the Director of Graduate Studies.
3. Writing requirement

A qualifying paper of professional quality and approximately 8000 words. Students must complete a version of the paper, which is itself likely to be a revision of a paper written during the first year of course work, by the beginning of their fourth quarter. The paper is read by a committee of two faculty who make suggestions for additional revision. The final version must be submitted by the first day of the sixth quarter, normally Spring Quarter of the second year.
4. Teaching Assistancy

A minimum of five quarters of teaching assistancy are required for the Ph.D. Normally one of these quarters is as a teaching assistant for the Philosophy Department's Writing in the Major course, PHIL 80 Mind, Matter, and Meaning. It is expected that students not teach in their first year and that they teach no more than two quarters in their second year. Students are required to take PHIL 239 Teaching Methods in Philosophy during Spring Quarter of their first year and during Autumn Quarter of their second year. Teaching is an important part of students' preparation to be professional philosophers.
5. Review at the End of the Second Year for Advancement to Candidacy

By the fourth week of the sixth quarter students must submit a one-page explanation of their first- and second-year course plan and their writing requirement paper. The faculty's review of each student includes a review of the student's record, an assessment of the qualifying paper, and an assessment of the student's preparation for work in her/his intended area of specialization, as well as recommendations of additional preparation, if necessary.
6. Candidacy

To continue in the Ph.D. program, each student must apply for candidacy during the sixth academic quarter, normally the Spring Quarter of the student's second year. Students may be approved for or denied candidacy by the end of that quarter by the department. In some cases, where there are only one or two outstanding deficiencies, the department may defer the candidacy decision and require the student to re-apply for candidacy in a subsequent quarter. In such cases, definite conditions for the candidacy re-application will be specified, and the student must work with his/her adviser and the DGS to meet those conditions in a timely fashion. A failure to maintain timely progress in satisfying the specified conditions will constitute grounds for a denial of advancement to candidacy.
7. Dissertation Development Seminar in the summer after the second year. This is the point at which students are expected to transition from spending much of their time on coursework to focusing on their thesis project. By the end of the summer, students are expected to have a plan for moving forward with the project in the third year; they should have formed advising relationships with faculty and should have made headway towards identifying a specific topic.
8. Upon completion of the summer dissertation development seminar, students will sign up for independent study credit, PHIL 240 Individual Work for Graduate Students, with their respective advisers each quarter. A plan at the beginning, and a report at the end of each quarter will be signed by both student and adviser and submitted to the Graduate Administrator for inclusion in the student's file. This will be the process every quarter up until the completion of the departmental oral.
9. In autumn and winter quarters of the third year, students will register in and satisfactorily complete PHIL 301 Dissertation Development Proseminar. Students meet to present their work in progress and discuss their thesis project. Participation in these seminars is required.
10. During the third and fourth years in the program, a student should complete at least three graduate-level courses/seminars, at least two of them in philosophy (a course outside philosophy can be approved by the adviser), and at least two of them in the third year. At most one can be taken credit/no-credit, and at most one can be taken for reduced (2) units (in which case it must be taken credit/no-credit); others must be passed with a B- or better. Courses required for candidacy are not counted toward satisfaction of this requirement. This light load of courses allows students to deepen their philosophical training while keeping time free for thesis research.
11. Dissertation Work and Defense

The third and following years are devoted to dissertation work. The few requirements in this segment of the program are milestones to encourage students and advisors to ensure that the project is on track.

 - A. Dissertation Proposal—By Spring Quarter of the third year, students should have selected a dissertation topic and committee. A proposal sketching the topic, status, and plan for the thesis project, as well as an annotated bibliography or literature review indicating familiarity with the relevant literature, must be received by the committee one week before the meeting on graduate student progress late in Spring Quarter. The dissertation proposal and the reading committee's report on it will constitute a substantial portion of the third year review.

- B. Departmental Oral—During Autumn Quarter of the fourth year, students take an oral examination based on at least 30 pages of written work, in addition to the proposal. The aim of the exam is to help the student arrive at an acceptable plan for the dissertation and to make sure that student, thesis topic, and advisors make a reasonable fit. It is an important chance for the student to clarify their goals and intentions with the entire committee present.
- C. Fourth-Year Colloquium—No later than Spring Quarter of the fourth year, students present a research paper in a 60-minute seminar open to the entire department. This paper should be on an aspect of the student’s dissertation research. This is an opportunity for the student to make their work known to the wider department, and to explain their ideas to a general philosophical audience.
- D. University Oral Exam—Ph.D. students must submit a completed draft of the dissertation to the reading committee at least one month before the student expects to defend the thesis in the University oral exam. If the student is given consent to go forward, the University oral can take place approximately two weeks later. A portion of the exam consists of a student presentation based on the dissertation and is open to the public. A closed question period follows. If the draft is ready by Autumn Quarter of the fourth year, the student may request that the University oral count as the department oral.

Interdisciplinary Study

The department supports interdisciplinary study. Courses in Stanford’s other departments and programs may be counted towards the degree, and course requirements in Philosophy are designed to allow students considerable freedom in taking such courses. Dissertation committees may include members from other departments. Where special needs arise, the department is committed to making it possible for students to obtain a philosophical education and to meet their interdisciplinary goals. Students are advised to consult their advisers and the department’s student services office for assistance.

Interdepartmental Programs Graduate Program in Cognitive Science

Philosophy participates with the departments of Computer Science, Linguistics, and Psychology in an interdisciplinary program in Cognitive Science. It is intended to provide an interdisciplinary education, as well as a deeper concentration in philosophy, and is open to doctoral students. Students who complete the requirements within Philosophy and the Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Philosophy. To receive this field designation, students must complete 30 units of approved courses, 18 of which must be taken in two disciplines outside of philosophy. The list of approved courses can be obtained from the Cognitive Science program located in the Department of Psychology.

Special Track in Philosophy and Symbolic Systems

Students interested in interdisciplinary work relating philosophy to artificial intelligence, cognitive science, computer science, linguistics, or logic may pursue a degree in this program.

Prerequisites—Admitted students should have covered the equivalent of the core of the undergraduate Symbolic Systems Program requirements as described in the "Symbolic Systems (p. 561)" section of this bulletin, including courses in artificial intelligence (AI), cognitive science, linguistics, logic, and philosophy. The graduate program is designed with

this background in mind. Students missing part of this background may need additional course work. Aside from the required course work below, the Ph.D. requirements are the same as for the regular program, with the exception that one course in value theory and one course in history may be omitted.

Courses of Study: The program consists of three years of courses and two years of dissertation work. Students are required to take the following courses in the first two years:

- 1. Philosophy courses:
 - A. at least three graduate seminars in the general area of symbolic systems other than logic, such as philosophy of mind and philosophy of language.
 - B. two quarters of graduate logic courses from among:

		Units
PHIL 350A	Model Theory	3
PHIL 351A	Recursion Theory	3
PHIL 352A	Set Theory	3
PHIL 353A	Proof Theory	3

- 2. Five cognitive science and computer science courses:
 - A. at least two courses in cognitive psychology
 - B. two or three graduate courses in computer science, at least one in AI and one in theory
- 3. Three linguistics and computational linguistics courses:
 - A. graduate courses on natural language that focus on two of the following areas: phonetics and phonology, syntax, semantics, or pragmatics
 - B. one graduate course in computational linguistics, typically LINGUIST 288 Natural Language Understanding
- 4. At least two additional graduate seminars at a more advanced level, in the general area of the program, independent of department. These would typically be in the area of the student’s proposed dissertation project.

The requirements for the third year and subsequent years are the same as for other third-year graduate students in philosophy: The dissertation committee must include at least one member of the Department of Philosophy and one member of the Program in Symbolic Systems outside the Department of Philosophy.

Joint Program in Ancient Philosophy

This program is jointly administered by the Departments of Classics and Philosophy and is overseen by a joint committee composed of members of both departments. It provides students with the training, specialist skills, and knowledge needed for research and teaching in ancient philosophy while producing scholars who are fully trained as either philosophers with a strong specialization in ancient languages and philology, or classicists with a concentration in philosophy.

Students are admitted to the program by either department. Graduate students admitted by the Philosophy department receive their Ph.D. from the Philosophy department; those admitted by the Classics department receive their Ph.D. from the Classics department. For Philosophy graduate students, this program provides training in classical languages, literature, culture, and history. For Classics graduate students, this program provides training in the history of philosophy and in contemporary philosophy.

Each student in the program is advised by a committee consisting of one professor in each department.

Requirements for Philosophy Graduate Students: These are the same as the proficiency requirements for the Ph.D. in Philosophy.

One year of Greek is a requirement for admission to the program. If students have had a year of Latin, they are required to take 3 courses in second- or third-year Greek or Latin, at least one of which must be in Latin. If they have not had a year of Latin, they are then required to complete a year of Latin, and take two courses in second- or third-year Greek or Latin.

Students are also required to take at least three courses in ancient philosophy at the 200 level or above, one of which must be in the Classics department and two of which must be in the Philosophy department.

Ph.D. Subplan in History and Philosophy of Science

Graduate students in the Philosophy Ph.D. program may pursue a Ph.D. subplan in History and Philosophy of Science. The subplan is declared in Axxess and subplan designations appear on the official transcript, but are not printed on the diploma.

Students must fulfill Departmental degree requirements and the following requirements:

1. Attendance at the HPS colloquium series.
2. Philosophy of Science courses:

		Units
Select one of the following:		
PHIL 263	Significant Figures in Philosophy of Science	4
PHIL 264	Central Topics in the Philosophy of Science: Theory and Evidence	4
PHIL 264A	Central Topics in Philosophy of Science: Causation	4
PHIL 266	Probability: Ten Great Ideas About Chance	4

3. One elective seminar in the history of science.
4. One elective seminar (in addition to the course satisfying requirement 2) in philosophy of science.

Ph.D. Minor in Philosophy

To obtain a Ph.D. minor in Philosophy, students must follow these procedures:

1. Consult with the Director of Graduate Study to establish eligibility, and select a suitable adviser.
2. Give to the Graduate Administrator a signed copy of the program of study (designed with the adviser) which offers:
 - A. 30 units of courses in the Department of Philosophy with a letter grade of 'B-' or better in each course. No more than 3 units of directed reading may be counted in the 30-unit requirement.
 - B. At least one course or seminar numbered over 99 to be taken in each of these six areas:
 - i Logic
 - ii Philosophy of science
 - iii Ethics, value theory, and moral and political philosophy
 - iv Metaphysics and epistemology
 - v Language, mind and action
 - vi History of philosophy
 - C. Two additional courses numbered over 199 to be taken in one of those (b) six areas.
3. A faculty member from the Department of Philosophy (usually the student's adviser) serves on the student's doctoral oral examination committee and may request that up to one third of this examination be devoted to the minor subject.
4. Paperwork for the minor must be submitted to the department office before beginning the program.

Emeriti (Professors): Fred Dretske, Solomon Feferman, Dagfinn Føllesdal, Georg Kreisel, John Perry, David S. Nivison, Patrick Suppes, Allen Wood, Rega Wood, Denis Phillips (Courtesy Professor)

Chair: R. Lanier Anderson

Director of Graduate Study: Michael Bratman

Director of Undergraduate Study: Tamar Schapiro

Honors Director and Undergraduate Outreach: Nadeem Hussain

Professors: Chris Bobonich, Michael Bratman, Alan Code, Joshua Cohen, John Etchemendy, Michael Friedman, Helen Longino (on leave), Grigori Mints (on leave), Thomas Ryckman (Teaching), Debra Satz, Brian Skyrms (Spring), Kenneth Taylor, Johan van Benthem (Spring), Thomas Wasow

Associate Professors: R. Lanier Anderson, Mark Crimmins, Graciela De Pierris (on leave), David Hills (Teaching), Nadeem Hussain, Krista Lawlor, Tamar Schapiro

Assistant Professors: Alexis Burgess, Anna-Sara Malmgren

Courtesy Professors: Eamonn Callan, Reviel Netz, Josiah Ober, Thomas Sheehan

Courtesy Associate Professor: Rob Reich

Courtesy Assistant Professor: Kristi Olson

Distinguished Visiting Professor: George Smith

Visiting Professors: André Laks, Dana Scott

Lecturers: Will Beals, Luis Cheng-Guajardo, Jorah Dannenberg, Shane Duarte, Laura Maguire, Paul Skokowski, Richard Sommer

Cognate Courses

The following courses have substantial philosophical content. However, in the absence of special permission these courses cannot generally be used to satisfy requirements for the Philosophy major or graduate degrees in Philosophy.

		Units
CLASSHIS 101	The Greeks	4-5
CLASSGRK 113	Advanced Greek: Scientific Writing	3-5
CLASSGEN 208B	Survey of Greek and Latin Literature: Classical Greek	3-5
MATH 161	Set Theory	3
RELIGST 278/378	Heidegger: Confronting the Ultimate	3-5

Physics

Courses offered by the Department of Physics are listed under the subject code PHYSICS on the Stanford Bulletin's ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=PHYSICS&filter-catalognumber-PHYSICS=on>).

Mission of the Undergraduate Program in Physics

The mission of the undergraduate program in Physics is to provide students with a strong foundation in both classical and modern physics. The goal of the program is to develop both quantitative problem solving skills and the ability to conceive experiments and analyze and interpret data. These abilities are acquired through both course work and opportunities to conduct

independent research. The program prepares students for careers in fields that benefit from quantitative and analytical thinking, including physics, engineering, teaching, medicine, law, science writing, and science policy, in government or the private sector. In some cases, the path to this career will be through an advanced degree in physics or a professional program.

Learning Outcomes (Undergraduate)

Students develop an understanding of the fundamental laws that govern the universe, and a strong foundation of mathematical, analytical, laboratory, and written communication skills. They will also be presented with opportunities for learning through research. Upon completion of the Physics degree, students should have acquired the following knowledge and skills:

1. a thorough quantitative and conceptual understanding of the core areas of physics, including mechanics, electricity and magnetism, thermodynamics, statistical physics, and quantum mechanics, at a level compatible with admission to graduate programs in physics at peer institutions.
2. the ability to analyze and interpret quantitative results, both in the core areas of physics and in complex problems that cross multiple core areas.
3. the ability to apply the principles of physics to solve new and unfamiliar problems. This ability is often described as "thinking like a physicist."
4. the ability to use contemporary experimental apparatus and analysis tools to acquire, analyze and interpret scientific data.
5. the ability to communicate scientific results effectively in written papers and presentations or posters.

Course Work

Course work is designed to provide students with a sound foundation in both classical and modern physics. Students who wish to specialize in astronomy, astrophysics, or space science should also consult the "Astronomy Program (p. 291)" section of this bulletin.

Three introductory series of courses include labs in which undergraduates carry out individual experiments. The Intermediate and Advanced Physics Laboratories offer facilities for increasingly complex individual work, including the conception, design, and fabrication of laboratory equipment. Undergraduates are also encouraged to participate in research; most can do this through the senior thesis and/or the summer research program.

The study of physics is undertaken by three principal groups of undergraduates: those including physics as part of a general education; those preparing for careers in professional fields that require a knowledge of physics, such as medicine or engineering; and those preparing for careers in physics or related fields, including teaching and research in colleges and universities, research in federally funded laboratories and industry, and jobs in technical areas. Physics courses numbered below 100 are intended to serve all three of these groups. The courses numbered above 100 mainly meet the needs of the third group, but also of some students majoring in other branches of science and in engineering.

Entry-Level Sequences in Physics

The Department of Physics offers three year-long, entry-level physics sequences, the PHYSICS 20, 40, and 60 series. The first of these (the 20 series) is non-calculus-based, and is intended primarily for those who are majoring in biology. Students with AP Physics credit, particularly those who are considering research careers, may wish to consider taking the PHYSICS 40 series, rather than using AP placement. These introductory courses provide a depth and emphasis on problem solving that has significant value in biological research, given today's considerable physics-based technology.

For those intending to major in engineering or the physical sciences, or simply wanting a stronger background in physics, the department offers the PHYSICS 40 and 60 series. Either of these satisfies the entry-level physics requirements of any Stanford major. The 60 series is intended for those who have already taken a Physics course at the level of the 40 series, or at least have a strong background in mechanics, some background in electricity and magnetism, and a strong background in calculus. The PHYSICS 40 series begins with mechanics in Winter Quarter, electricity and magnetism in Spring Quarter, and light and heat in Autumn Quarter. While it is recommended that most students begin the sequence with mechanics () in Winter Quarter, those who have had strong physics preparation in high school (such as a score of at least 4 on the Physics Advanced Placement C exam) may start the sequence with PHYSICS 45 Light and Heat in Autumn Quarter.

Students who are planning to take either of the calculus-based sequences (PHYSICS 40 or 60 sequence) are advised to take the Physics Placement Test (<https://physics.stanford.edu/undergraduate-program/placement-test>) that is offered each year during New Student Orientation and on the evening of the first day of instruction in the Autumn quarter. Advice will be sent to each student with guidance on placement in the 40 or 60 sequence. See this page for details: <https://physics.stanford.edu/undergraduate-program/placement-test>

All courses for the Physics major must be taken for a letter grade, and a grade of 'C-' or better must be received for all units applied toward the major.

Graduate Programs in Physics

Graduate students find opportunities for research in the fields of astrophysics, particle astrophysics, cosmology, experimental particle physics, particle theory, string theory, intermediate energy physics, low temperature physics, condensed matter physics, materials research, atomic physics, laser physics, quantum electronics, coherent optical radiation, novel imaging technologies, and biophysics. Faculty advisers are drawn from many departments, including Physics, Applied Physics, Materials Science and Engineering, Electrical Engineering, and Biology. Opportunities for research are also available with the faculty at SLAC in the areas of theoretical and experimental particle physics, particle astrophysics, cosmology, accelerator design, and photon science.

The number of graduate students admitted to the Department of Physics is strictly limited. Students should submit applications by Tuesday, December 18, 2012 for matriculation the following Autumn Quarter. Graduate students may normally enter the department only at the beginning of Autumn Quarter.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in physics and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis using the tools of Physics. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of physics and to interpret and present the results of such research.

Fellowships and Assistantships

The Department of Physics makes an effort to support all its graduate students through fellowships, teaching assistantships, research

assistantships, or a combination of sources. More detailed information is provided with the offer of admission.

Teaching Credentials

For information on teaching credentials, consult the "School of Education (p. 130)" section of this bulletin or visit the Stanford Teacher Education Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/physics/http://suse-step.stanford.edu>) web site. Also see the section on the Individually Designed Major program in Teaching Physical Science (<https://physics.stanford.edu/undergraduate-program/ba-teaching-physical-science>).

Laboratories and Institutes

The Russell H. Varian Laboratory of Physics, the Physics and Astrophysics Building, the W. W. Hansen Experimental Physics Laboratory (HEPL), the E. L. Ginzton Laboratory, and the Geballe Laboratory for Advanced Materials (GLAM) together house a range of physics activities from general courses through advanced research. Ginzton Lab houses research on optical systems, including quantum electronics, metrology, optical communication and development of advanced lasers. GLAM houses research on novel and nanopatterned materials, from high-temperature superconductors and magnets to organic semiconductors, subwavelength photon waveguides, and quantum dots. GLAM also supports the materials community on campus with a range of characterization tools: it is the site for the Stanford Nanocharacterization Lab (SNL) and the NSF-sponsored Center for Probing the Nanoscale (CPN). The SLAC National Accelerator Laboratory is just a few miles from the Varian Laboratory. SLAC is a national laboratory funded by the Offices of Basic Energy Sciences and High Energy Physics of the Department of Energy. Scientists at SLAC conduct research in photon science, accelerator physics, particle physics, astrophysics and cosmology. The laboratory hosts a two-mile-long linear accelerator that can accelerate electrons and positrons. The Stanford Synchrotron Radiation Light Source (SSRL) uses intense x-ray beams produced with a storage ring on the SLAC site. The Linac Coherent Light Source (LCLS), completed in 2009, is the world's first x-ray free-electron laser and has opened new avenues of research in ultra-fast photon science.

The Kavli Institute for Particle Astrophysics and Cosmology (KIPAC), formed jointly with the SLAC National Accelerator Laboratory, provides a focus for theoretical, computational, observational, and instrumental research programs. A wide range of research areas in particle astrophysics and cosmology are investigated by students, postdocs, research staff and faculty. The two major projects with which KIPAC is heavily involved are the Fermi Gamma-Ray Space Telescope (FGST) and the Large Synoptic Survey Telescope (LSST). KIPAC members also participate fully in the Cryogenic Dark Matter Search (CDMS), the Solar Dynamics Observatory (SDO), the EXO-200 double beta decay experiment, the Dark Energy Survey (DES), the NuSTAR and Astro-H X-ray satellites, the Cerenkov Telescope Array (CTA) and several cosmic microwave background experiments (BICEP, KECK, QUIET and POLAR-1).

The Ginzton Laboratory, HEPL, GLAM, KIPAC, SLAC, and SSRL are listed in the "Centers, Laboratories, and Institutes (p. 620)" section of this bulletin. Students may also be interested in research and facilities at two other independent labs: the Center for Integrated Systems, focused on electronics and nanofabrication; and the Clark Center, an interdisciplinary biology, medicine, and bioengineering laboratory.

The Stanford Institute for Theoretical Physics is devoted to the investigation of the basic structure of matter (particle theory, string theory, M-theory, quantum cosmology, condensed matter physics).

Physics Course Catalog Numbering System

There are four series of beginning courses.

One course from the teen series is recommended for the humanities or social science student who wishes to become familiar with the methodology and content of modern physics:

		Units
PHYSICS 15	The Nature of the Universe	3
PHYSICS 16	Cosmic Horizons	3
PHYSICS 17	Black Holes	3
PHYSICS 19	How Things Work: An Introduction to Physics	3

The 20 series is recommended for general students and for students preparing for medicine or biology:

		Units
PHYSICS 21	Mechanics and Heat	3
PHYSICS 22	Mechanics and Heat Laboratory	1
PHYSICS 23	Electricity and Optics	3
PHYSICS 24	Electricity and Optics Laboratory	1
PHYSICS 25	Modern Physics	3
PHYSICS 26	Modern Physics Laboratory	1

The 40 series is for students majoring in engineering, chemistry, earth sciences, mathematics, or physics:

		Units
PHYSICS 41	Mechanics	4
PHYSICS 42	Classical Mechanics Laboratory	1
PHYSICS 43	Electricity and Magnetism	4
PHYSICS 44	Electricity and Magnetism Lab	1
PHYSICS 45	Light and Heat	4
PHYSICS 46	Light and Heat Laboratory	1

The advanced freshman series is for students who have had strong preparation in physics and calculus in high school. Students who have had appropriate background and wish to major in physics should take this introductory series:

		Units
PHYSICS 61	Mechanics and Special Relativity	4
PHYSICS 62	Classical Mechanics Laboratory	1
PHYSICS 63	Electricity, Magnetism, and Waves	4
PHYSICS 64	Electricity, Magnetism and Optics Laboratory	1
PHYSICS 65	Quantum and Thermal Physics	4
PHYSICS 67	Introduction to Laboratory Physics	2

The 20, 40, and 60 series consist of demonstration lectures on the fundamental principles of physics, problem work on application of these principles to actual cases, and lab experiments related to the lectures. Their objectives are not only to give information on particular subjects, but also to provide training in the use of the scientific method. The primary difference between the series of courses is that topics are discussed more thoroughly and treated with greater mathematical rigor in the 40 and 60 series.

Courses beyond 99 are numbered in accordance with a three-digit code. The first digit indicates the approximate level of the course:

Digit	Description
100	undergraduate courses
200	first-year graduate courses
300	more advanced courses
400	research, special, or current topics

The second digit indicates the general subject matter:

Digit	Description
00	laboratory
10,20,30	general courses

40	nuclear physics, nuclear energy, energy
50	elementary particle physics
60	astrophysics, cosmology, gravitation
70	condensed matter physics
80	optics and atomic physics
90	miscellaneous courses

Bachelor of Science in Physics

To help in deciding which introductory sequence is most suitable, students considering a major in Physics may contact the undergraduate program coordinator (elva@stanford.edu) to arrange an advising appointment. Also see the Physics Placement Test webpage (<https://sites.stanford.edu/physics/undergraduate-program/placement-test>). Although it is possible to complete the Physics major in three years, students who contemplate starting the major during sophomore year should make an advising appointment to map out their schedule. Students who have had previous college-level courses (including EPGY) should make an advising appointment for placement and possible transfer credit. For advanced placement advice, see <http://studentaffairs.stanford.edu/registrar/students/ap>.

Undergraduates are offered help with physics problems in the Physics Tutoring Center in the Physics and Astrophysics Building, sub-basement, room S-17, which is staffed Monday through Friday. See schedule at <http://physicstutor.stanford.edu>.

Prospective Physics majors are advised to take PHYSICS 59 Current Research Topics Current Research Topics, in their freshman or sophomore year.

Required Courses for Majors

For sample schedules illustrating how to complete the Physics major, see the Department of Physics (<https://sites.stanford.edu/physics/undergraduate-program/four-year-plans>) web site.

		Units
Introductory Sequence		16-20
Complete either the 40 Series or the 60 Series		
40 Series (19-20 units):		
PHYSICS 41	Mechanics	4
PHYSICS 42	Classical Mechanics Laboratory	1
PHYSICS 43	Electricity and Magnetism	4
PHYSICS 44	Electricity and Magnetism Lab	1-2
or PHYSICS 67	Introduction to Laboratory Physics	
PHYSICS 45	Light and Heat	4
PHYSICS 46	Light and Heat Laboratory	1
PHYSICS 70	Foundations of Modern Physics	4
60 Series (16 units):		
PHYSICS 61	Mechanics and Special Relativity	4
PHYSICS 62	Classical Mechanics Laboratory	1
PHYSICS 63	Electricity, Magnetism, and Waves	4
PHYSICS 64	Electricity, Magnetism and Optics Laboratory	1
PHYSICS 65	Quantum and Thermal Physics	4
PHYSICS 67	Introduction to Laboratory Physics	2
One advanced Physics elective (100 level or higher): required only for students who are not required to take PHYSICS 70		
Required Math Courses		
MATH 51	Linear Algebra and Differential Calculus of Several Variables	5

or MATH 51H	Honors Multivariable Mathematics	
MATH 52	Integral Calculus of Several Variables	5
or MATH 52H	Honors Multivariable Mathematics	
MATH 53	Ordinary Differential Equations with Linear Algebra	5
or MATH 53H	Honors Multivariable Mathematics	
One advanced mathematics elective (3-5 units)		
Select one of the following:		
Any MATH (101 or higher)		
PHYSICS 112	Mathematical Methods of Physics	
STATS 116	Theory of Probability	
EE 261	The Fourier Transform and Its Applications	
Intermediate Sequence		
PHYSICS 105	Intermediate Physics Laboratory I: Analog Electronics	3
PHYSICS 107	Intermediate Physics Laboratory II: Experimental Techniques and Data Analysis	4
PHYSICS 108	Advanced Physics Laboratory: Project	4
PHYSICS 110	Advanced Mechanics	4
PHYSICS 112	Mathematical Methods of Physics (recommended) ¹	4
PHYSICS 113	Computational Physics (recommended) ²	4
PHYSICS 120	Intermediate Electricity and Magnetism I	4
PHYSICS 121	Intermediate Electricity and Magnetism II	4
MATH 131P	Partial Differential Equations I	3
or math 173		
Advanced Sequence		
PHYSICS 130	Quantum Mechanics	4
PHYSICS 131	Quantum Mechanics II	4
PHYSICS 134	Advanced Topics in Quantum Mechanics ²	4
PHYSICS 170	Thermodynamics, Kinetic Theory, and Statistical Mechanics I	4
PHYSICS 171	Thermodynamics, Kinetic Theory, and Statistical Mechanics II	4
Total Units		86-93

¹ Those wishing to pursue theoretical physics in graduate school may wish to take a collection of courses in the Department of Mathematics rather than or in addition to PHYSICS 112 Mathematical Methods of Physics.

² These courses are not required. PHYSICS 113 Computational Physics is recommended for students planning to work in technical fields. Both PHYSICS 113 Computational Physics and PHYSICS 134 Advanced Topics in Quantum Mechanics are recommended for students who intend to complete a Ph.D. in Physics.

Concentrations in Physics

The primary purpose of concentrations in the Physics major is to provide consistent and more formal advising to students who want to concentrate in a particular area of physics during their undergraduate education, or prepare for future graduate studies in a particular area of physics. Physics majors are not required to choose a concentration and a concentration does not add any formal requirements to the Physics major. Upon graduation, students receive a certificate of completion of a concentration.

Students seeking further advice on a given concentration should contact the professor whose name appears next to the respective title of each section below. Within the chosen concentration below, complete at least four courses from the list or three courses plus a senior thesis. No more than one of the courses can be taken for CR/NC.

A. Applied Physics (Hari Manoharan)

		Units
Solid State		
PHYSICS 172	Solid State Physics	3
APPPHYS 270	Magnetism and Long Range Order in Solids	3
MATSCI 195	Waves and Diffraction in Solids	3-4
Lasers		
EE 231	Introduction to Lasers	3
EE 232	Laser Dynamics	3
EE 268	Introduction to Modern Optics	3
Lab Methods		
APPPHYS 207	Laboratory Electronics	4
APPPHYS 304	Lasers Laboratory	4

B. Astrophysics (Roger Romani, Sarah Church)

		Units
PHYSICS 100	Introduction to Observational and Laboratory Astronomy	3-4
PHYSICS 160	Introduction to Stellar and Galactic Astrophysics	3
PHYSICS 161	Introduction to Extragalactic Astrophysics and Cosmology	3
Select one of the following:		
PHYSICS 211	Continuum Mechanics	3
PHYSICS 260	Introduction to Astrophysics and Cosmology	3
PHYSICS 262	Introduction to Gravitation	3
PHYSICS 312	Basic Plasma Physics	3

C. Biophysics (Seb Doniach)

		Units
BIOC 202	Biochemistry Bootcamp	1
BIOPHYS 228	Computational Structural Biology	3
BIO 141	Biostatistics	3-5
BIO 217	Neuronal Biophysics	4

It is recommended that Physics majors interested in pursuing a career in biophysics consider a minor in Biology.

D. Geophysics (Simon Klemperer, Geophysics)

The following requirements apply to students matriculating 2010-11 or later:

		Units
GEOPHYS 110	Earth on the Edge: Introduction to Geophysics	3
GEOPHYS 120	Ice, Water, Fire	3-5
Select one of the following:		
GEOPHYS 130	Introductory Seismology	
GEOPHYS 170	Global Tectonics	
GEOPHYS 190	Near-Surface Geophysics	

Physics majors matriculating prior to 2010-11 who wish to complete a concentration in Geophysics should consult Prof. Klemperer.

E. Theoretical Physics (Andrei Linde)

		Units
PHYSICS 152	Introduction to Particle Physics I	3
PHYSICS 260	Introduction to Astrophysics and Cosmology	3
PHYSICS 262	Introduction to Gravitation	3
PHYSICS 330	Quantum Field Theory I	3
PHYSICS 331	Quantum Field Theory II	3
PHYSICS 332	Quantum Field Theory III	3
PHYSICS 351	Standard Model of Particle Physics	3
PHYSICS 362	Advanced Extragalactic Astrophysics and Cosmology	3
PHYSICS 364	Advanced Gravitation	3

Notes to students taking this concentration:

1. Students should discuss the choice of courses with members of the Institute for Theoretical Physics and/or their major adviser.
2. Students may attend PHYSICS 330 Quantum Field Theory I after taking PHYSICS 130 Quantum Mechanics, PHYSICS 131 Quantum Mechanics II and PHYSICS 134 Advanced Topics in Quantum Mechanics. Prior study of special topics in quantum mechanics (PHYSICS 232, not offered this year) may be helpful.

Individually Designed Major Program in Teaching Physical Science

This major, a joint effort of the Department of Physics and the Stanford Teacher Education Program (STEP), is designed for students to prepare themselves as high school teachers of physics and general science. The program awards a B.A. in Physical Science.

Students complete 47-49 units of Physics and related Mathematics courses, 40-43 units of course work in other sciences such as the life sciences, chemistry, and geosciences, and in general issues of science, and 9-15 units of concentration and depth courses. Total program units: 96-107. Students interested in this program should consult Professor Patricia Burchat (burchat@stanford.edu, 725-5771), and Professor Rachel Lotan, Director of the Stanford Teacher Education Program (STEP) in the School of Education (rlotan@stanford.edu).

Core Physics Courses

		Units
Mechanics (5)		
Select one of the following:		5
PHYSICS 41 & PHYSICS 42	Mechanics and Classical Mechanics Laboratory	
PHYSICS 61 & PHYSICS 62	Mechanics and Special Relativity and Classical Mechanics Laboratory	
Heat (5-6)		
Select one of the following:		5-6
PHYSICS 45 & PHYSICS 46	Light and Heat and Light and Heat Laboratory	
PHYSICS 65 & PHYSICS 67	Quantum and Thermal Physics and Introduction to Laboratory Physics	

Electricity and Magnetism (8-9)		
Select one of the following:		5-6
PHYSICS 43 & PHYSICS 67	Electricity and Magnetism and Introduction to Laboratory Physics	
PHYSICS 63 & PHYSICS 64	Electricity, Magnetism, and Waves and Electricity, Magnetism and Optics Laboratory	
PHYSICS 105	Intermediate Physics Laboratory I: Analog Electronics	3
Wave Motion (4)		
PHYSICS 107	Intermediate Physics Laboratory II: Experimental Techniques and Data Analysis	4
Modern Physics (for students who take 40 series) (4)		
PHYSICS 70	Foundations of Modern Physics	4
Applications (1)		
PHYSICS 59	Current Research Topics	1
Mathematics (Physics department requirement) (15)		
MATH 51	Linear Algebra and Differential Calculus of Several Variables	5
MATH 52	Integral Calculus of Several Variables	5
MATH 53	Ordinary Differential Equations with Linear Algebra	5
Statistics (5)		
Select one of the following:		5
STATS 110	Statistical Methods in Engineering and the Physical Sciences	
STATS 116	Theory of Probability	
STATS 141	Biostatistics	
STATS 191	Introduction to Applied Statistics	
Total Units		47-49

Additional Science Breadth Courses

	Units
Life Sciences	
Select one of the following Series:	15
Series A	
BIO 41	Genetics, Biochemistry, and Molecular Biology
BIO 42	Cell Biology and Animal Physiology
BIO 43	Plant Biology, Evolution, and Ecology
Series B	
HUMBIO 2A	Genetics, Evolution, and Ecology
HUMBIO 2B	Culture, Evolution, and Society
HUMBIO 3A	Cell and Developmental Biology
HUMBIO 3B	Behavior, Health, and Development
HUMBIO 4A	The Human Organism
HUMBIO 4B	Environmental and Health Policy Analysis
Chemistry	12
CHEM 31A & CHEM 31B or CHEM 31X	Chemical Principles I and Chemical Principles II or Chemical Principles
CHEM 33	Structure and Reactivity
Geoscience	8
EARTHSYS 10	Introduction to Earth Systems

Select one of the following:

PHYSICS 15	The Nature of the Universe	
PHYSICS 16	Cosmic Horizons	
PHYSICS 17	Black Holes	
General Issues of Science		4-18
EDUC 180	Directed Reading in Education	
ENGR 103	Public Speaking	
Concentration and Depth Courses		
3 courses (100 level or above) in a single area of concentration		9-15
Total Units		44-64

This individually designed major program in Physical Science includes all the elements of a Program of Subject Matter Preparation for Secondary Teachers of Physics and General Science that has been approved by the California Commission on Teacher Credentialing (CCTC). Students who complete the program are exempt from taking the C-BEST examination in Physics and General Science for admission to the Stanford Teacher Education Program (STEP) or any other accredited secondary teacher education program in California. Full details of the CCTC-approved program may be found at the School of Education (<http://ed.stanford.edu/suse/programs-degrees/program-coterminal-step.html>) web site.

Note: the Stanford individually designed major program in Physical Science requires course work beyond the CCTC-approved program, specifically 9-15 units of depth courses in a field of concentration: Physics, Astrophysics, Biology, Chemistry, Earth Sciences, Human Biology, or Computational Mathematics. See the adviser in the Physics department or the School of Education for more details.

Senior Thesis

The department offers Physics majors the opportunity to complete a Senior Thesis. These are the guidelines:

1. Students must submit a Senior Thesis Application form once they identify a physics project, either theoretical or experimental, in consultation with individual faculty members. Proposal forms are available from the Undergraduate Coordinator and must be submitted by the week prior to the November Thanksgiving break of the academic year in which the student plans to graduate.
2. Credit for the project is assigned by the advisor within the framework of PHYSICS 205 Senior Thesis Research. A minimum of 3 units of PHYSICS 205 Senior Thesis Research must be completed for a letter grade during the senior year. Work completed in the Senior Thesis Program may not be used as a substitute for regular required courses for the Physics major.
3. A written report and a presentation of the work at its completion are required for the Senior Thesis. By mid-May, the Senior Thesis candidate is required to present the project at the department's Senior Thesis Presentation Program. This event is publicized and open to the general public. The expectation is that the student's advisor, second reader, and all other Senior Thesis candidates attend.

Honors Program

Physics majors are granted a Bachelor of Science in Physics with Honors if they satisfy these three requirements beyond the general Physics major requirements:

1. The student files for entry into the honors program by completing an Honors Program Application (available from the Undergraduate Coordinator) by the same deadline as the Senior Thesis Application. Eligibility is confirmed by the department.
2. The student completes a Senior Thesis by meeting the deadlines and requirements described above.

- The student completes course work with an overall GPA of 3.30 or higher, and a GPA of 3.50 or higher in courses required for the Physics major.

Minor in Physics or Astronomy

A minor is offered in either Physics or Astronomy. Students who take the PHYSICS 20, 40, or 60 series at Stanford in support of their major may count those units towards the minor. Those who have fulfilled Physics requirements at the 20 or 40 level by enrollment at another accredited university, or through advanced placement credits, may count credits towards / and /PHYSICS 24 Electricity and Optics Laboratory, or PHYSICS 41 Mechanics/PHYSICS 42 Classical Mechanics Laboratory and PHYSICS 43 Electricity and Magnetism/PHYSICS 44 Electricity and Magnetism Lab. PHYSICS 25 Modern Physics/PHYSICS 26 Modern Physics Laboratory, or PHYSICS 45 Light and Heat /PHYSICS 46 Light and Heat Laboratory for a minor in Physics or Technical minor in Astronomy, must be taken at Stanford even if similar material has been covered elsewhere. With the PHYSICS 21 Mechanics and Heat/PHYSICS 22 Mechanics and Heat Laboratory/PHYSICS 23 Electricity and Optics/PHYSICS 24 Electricity and Optics Laboratory or PHYSICS 41 Mechanics/PHYSICS 43 Electricity and Magnetism/PHYSICS 44 Electricity and Magnetism Lab exception noted above, all courses for the minor must be taken at Stanford University for a letter grade, and a grade of 'C-' or better must be received for all units applied toward the minor. The minor declaration deadline is three quarters before graduation, typically the beginning of Autumn Quarter if the student is graduating at the end of Spring Quarter.

Minor in Physics

An undergraduate minor in Physics requires a minimum of 25 units with the following course work:

	Units
Select one of the following Series:	
Series A	
PHYSICS 41 Mechanics & PHYSICS 42 and Classical Mechanics Laboratory	5
PHYSICS 43 Electricity and Magnetism & PHYSICS 44 and Electricity and Magnetism Lab ¹	5
PHYSICS 45 Light and Heat & PHYSICS 46 and Light and Heat Laboratory	5
PHYSICS 70 Foundations of Modern Physics	4
Series B	
PHYSICS 61 Mechanics and Special Relativity & PHYSICS 62 and Classical Mechanics Laboratory	5
PHYSICS 63 Electricity, Magnetism, and Waves & PHYSICS 64 and Electricity, Magnetism and Optics Laboratory	5
PHYSICS 65 Quantum and Thermal Physics & PHYSICS 67 and Introduction to Laboratory Physics	6
At least three PHYSICS courses numbered 100 or above	9-12

¹ PHYSICS 67 Introduction to Laboratory Physics may be substituted for PHYSICS 44 Electricity and Magnetism Lab.

Minor in Astronomy

Students wishing to pursue advanced work in astrophysical sciences should major in physics and concentrate in astrophysics. Students who take the 20, 40, or 60 series at Stanford in support of their major may count those units

towards the minor. However, students outside of physics with a general interest in astronomy may organize their studies by completing one of the following minor programs.

An undergraduate minor in astronomy requires the following courses:

Non-Technical

For students whose majors do not require the PHYSICS 40 or 60 series:

	Units
PHYSICS 21 Mechanics and Heat	3
PHYSICS 23 Electricity and Optics	3
PHYSICS 25 Modern Physics & PHYSICS 26 and Modern Physics Laboratory	4
PHYSICS 50 Astronomy Laboratory and Observational Astronomy or PHYSICS 100 Introduction to Observational and Laboratory Astronomy	3-4
Select two of the following:	6
PHYSICS 15 The Nature of the Universe	
PHYSICS 16 Cosmic Horizons	
PHYSICS 17 Black Holes	
Total Units	19-20

Technical

For students whose majors require the PHYSICS 40 or 60 series:

	Units
Select one of the following Series:	
Series A	
PHYSICS 41 Mechanics	4
PHYSICS 43 Electricity and Magnetism	4
PHYSICS 45 Light and Heat & PHYSICS 46 and Light and Heat Laboratory	5
PHYSICS 70 Foundations of Modern Physics	4
Series B	
PHYSICS 61 Mechanics and Special Relativity	4
PHYSICS 63 Electricity, Magnetism, and Waves	4
PHYSICS 65 Quantum and Thermal Physics	4
PHYSICS 67 Introduction to Laboratory Physics	2
And take the following three courses:	
PHYSICS 100 Introduction to Observational and Laboratory Astronomy	3-4
PHYSICS 160 Introduction to Stellar and Galactic Astrophysics	3
PHYSICS 161 Introduction to Extragalactic Astrophysics and Cosmology	3
Total Units	24-27

Students are also encouraged to take the electricity and magnetism/optics lab of the appropriate PHYSICS series PHYSICS 24, PHYSICS 44, and PHYSICS 64 for 1 additional unit.

Master of Science

The department does not offer a coterminal degree program, or a separate program for the M.S. degree, but this degree may be awarded for a portion of the Ph.D. degree work.

University requirements for the master's degree, discussed in the "Graduate Degrees (p. 38)" section of this bulletin, include completion of 45 units of unduplicated course work after the bachelor's degree. Among the

department requirements are a grade point average (GPA) of at least 3.0 (B) for the following required courses (or their equivalents):

		Units
PHYSICS 220	Classical Electrodynamics	3
PHYSICS 271	Thermodynamics, Kinetic Theory, and Statistical Mechanics II	3-4
Plus one of the following courses:		
PHYSICS 230	Quantum Mechanics	3
PHYSICS 231	Quantum Mechanics	3
PHYSICS 234	Advanced Topics in Quantum Mechanics	3
PHYSICS 330	Quantum Field Theory I	3
PHYSICS 331	Quantum Field Theory II	3
PHYSICS 332	Quantum Field Theory III	3
Plus two 3 unit graduate level courses in Physics or Applied Physics.		

Up to 6 of these required units may be waived on petition if a thesis is submitted.

Doctor of Philosophy in Physics

The University's basic requirements for the Ph.D. are discussed in the "Graduate Degrees (p. 38)" section of this bulletin.

The minimum department requirements for the Ph.D. degree in Physics consist of completing all courses listed below and at least one course from each of two subject areas outside the student's primary area of research (among biophysics, condensed matter, quantum optics and atomic physics, astrophysics and gravitation, and nuclear and particle physics). For this requirement students must choose from courses numbered above PHYSICS 234, excluding 270, 271, 290, and 294. For a full list of courses by concentration that satisfy the breadth requirement see the Physics Department (<https://sites.stanford.edu/physics>) website.

The requirements in the following list may be fulfilled by passing the course at Stanford or passing an equivalent course elsewhere:

		Units
PHYSICS 220	Classical Electrodynamics	3
PHYSICS 271	Thermodynamics, Kinetic Theory, and Statistical Mechanics II ¹	3-4
PHYSICS 290	Research Activities at Stanford	1-3
PHYSICS 294	Teaching of Physics Seminar	1
Plus one of the following courses:		
PHYSICS 230	Quantum Mechanics	3
PHYSICS 231	Quantum Mechanics	3
PHYSICS 234	Advanced Topics in Quantum Mechanics	3
PHYSICS 330	Quantum Field Theory I	3
PHYSICS 331	Quantum Field Theory II	3
PHYSICS 332	Quantum Field Theory III	3

¹ For students who have had a basic introduction to Thermal and Statistical Physics at the advanced undergraduate level. Students who have not had that level of preparation should additionally take PHYSICS 270 prior to taking PHYSICS 271.

A grade point average (GPA) of at least 3.0 (B) is required for courses taken toward the degree.

All Ph.D. candidates must have math proficiency equivalent to the following Stanford MATH courses:

		Units
MATH 106	Functions of a Complex Variable	3

MATH 113	Linear Algebra and Matrix Theory	3
MATH 116	Complex Analysis	3
MATH 132	Partial Differential Equations II	3

Prior to making an application for candidacy, each student is required to pass a comprehensive qualifying examination on undergraduate physics. This closed book exam is given in the month of January following the student's arrival at Stanford. This is a written examination held over two days, covering particle mechanics, electricity and magnetism, quantum mechanics, statistical mechanics, thermodynamics, special relativity, and general physics. A thesis proposal must be submitted during the third year. In order to assess the direction and progress toward a thesis, an oral report and evaluation are required during the fourth year. After completion of the dissertation, each student must take the University oral examination (defense of dissertation).

Three quarters of teaching (including a demonstrated ability to teach) are a requirement for obtaining the Ph.D. in Physics.

Students interested in applied physics and biophysics research should also take note of the Ph.D. granted independently by the Department of Applied Physics and by the Biophysics Program. Students interested in astronomy, astrophysics, or space science should also consult the "Astronomy Course Program (p. 291)" section of this bulletin.

Ph.D. Minor in Physics

Doctoral students seeking a minor in Physics must take at least six courses from the following list: 210, 211, 216, 220, 230, 231, 234, 270, and 271 among the 20 required units. All prospective minors must obtain approval of their Physics course program from the Physics Graduate Study Committee at least one year before conferral of the Ph.D.

Emeriti (Professors) Steven Chu, Alexander L. Fetter, Stanley S. Hanna, William A. Little, Douglas D. Osheroff*, David M. Ritson, H. Alan Schwettman, Robert V. Wagoner, John Dirk Walecka, Stanley G. Wojcicki*, Mason R. Yearian; (Professors, Research) John A. Lipa*, Todd I. Smith*, John P. Turneaure; (Professors, Courtesy) Peter A. Sturrock (Applied Physics), Richard Taylor (SLAC National Accelerator Laboratory)
Chair: Steven M. Kahn

Associate Chair: Giorgio Gratta

Professors: Roger Blandford, Phil Bucksbaum, Patricia Burchat, Blas Cabrera, Sarah Church, Persis Drell (on leave), Savas G. Dimopoulos, Sebastian Doniach, Giorgio Gratta, Shamit Kachru, Steven Kahn, Renata E. Kallosh, Aharon Kapitulnik, Mark Kasevich, Steven A. Kivelson, Robert B. Laughlin, Andrei D. Linde, Kathryn Moler, Peter F. Michelson, Vahe Petrosian, Roger W. Romani, Zhi-Xun Shen, Stephen Shenker, Eva Silverstein, Leonard Susskind, Shoucheng Zhang

Associate Professors: Tom Abel, Steven Allen, David Goldhaber-Gordon, Hari Manoharan

Assistant Professors: Stefan Funk, Peter Graham, Sean Hartnoll, Chao-Lin Kuo, Xiao-liang Qi, Srinivas Raghu, Monica Schleier-Smith (on leave), Leonardo Senatore (on leave), Risa Wechsler

Professors (Research): Leo Hollberg, Phillip H. Scherrer

Courtesy Professors: Rhiju Das, Benjamin Lev, Craig Levin, Stephen Quake, Richard N. Zare

Lecturers: Chaya Nanavati, Rick Pam

Consulting Professors: Ralph Devoe, Barbara Jones

* Recalled to active duty.

Political Science

Courses offered by the Department of Political Science are listed under the subject code POLISCI on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=POLISCI&filter-catalognumber-POLISCI=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=POLISCI&filter-catalognumber-POLISCI=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=POLISCI&filter-catalognumber-POLISCI=on>).

Mission of the Undergraduate Program in Political Science

The mission of the undergraduate program in Political Science is to provide students with a solid grasp of the American political system and other political systems within the context of global forces, international conflicts, social movements, ideological systems and diversity. Courses in the major are designed to help students gain competency in the primary subfields of political science including American and comparative politics, international relations, and the theory/philosophy of politics; to introduce students to a variety of research methodologies and analytical frameworks; and to develop students' written and oral communication skills. Students in the program have excellent preparation for further study in graduate or professional schools as well as careers in government, business, and not-for-profit organizations.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of core knowledge within the discipline of political science.
2. the ability to communicate ideas clearly and persuasively in writing.
3. the ability to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
4. the ability to evaluate theory and critique research within the discipline of Political Science.

Graduate Programs in Political Science

Admission—Prospective graduate students should go to the Office of Graduate Admissions (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/politicalscience/http://gradadmissions.stanford.edu>) web site for application materials. Applicants are required to submit a recent sample of their writing (not to exceed 35 pages) and to take the General Test of the Graduate Record Examination (GRE). Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL). The TOEFL requirements are waived for applicants who have recently completed two or more years of study at a university where all instruction is provided in English. The application deadline is December 4, 2012. Admission is offered for the

Autumn Quarter only. The department expects all students to pursue a full-time program except for time devoted to teaching or research assistantships.

Learning Outcomes (Graduate)

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Political Science. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Political Science and to interpret and present the results of such research.

Pursued in combination with a doctoral degree, the master's program furthers students' knowledge and skills in Political Science. This is achieved through completion of courses in three subfields, and experience with independent work and specialization.

Bachelor of Arts in Political Science

To receive a B.A. in Political Science, a student must:

1. Submit a Political Science major proposal to the undergraduate administrator and declare on Axess. Forms are available in Encina Hall West, room 100, or at the Department of Political Science (<http://polisci.stanford.edu/bachelors>) web site. For additional information, come to the office or phone (650) 723-1608. Students must complete their major declaration no later than the end of Autumn Quarter of their junior year.
2. Complete 70 units including:
 - A. 45 Political Science course units in the primary and secondary concentration combined. Each major should declare a primary concentration in one subfield and take at least 30 units in this concentration, including the introductory course for that subfield. The secondary concentration must be completed with at least 15 units, including the introductory course for that subfield. Subfields include:

		Units
POLISCI 1	Introduction to International Relations	5
POLISCI 116	History of Nuclear Weapons	5
POLISCI 316	International History and International Relations Theory	5
POLISCI 110C	America and the World Economy (WIM)	5
POLISCI 110D	War and Peace in American Foreign Policy (Offered next year, WIM)	5
POLISCI 110Y	War and Peace in American Foreign Policy (Offered next year, non-WIM version of 110D)	5
POLISCI 211P	International Security in South Asia: Pakistan, India and the United States.	5
POLISCI 213S	A Post American Century? American Foreign Policy in a Multi-unipolar World	5
POLISCI 215	Explaining Ethnic Violence	5
POLISCI 215F	Nuclear Weapons and International Politics	5
POLISCI 216E	International History and International Relations Theory	5

POLISCI 218J	Japanese Politics and International Relations	5		
POLISCI 218T	Terrorism	5		
POLISCI 110X	America and the World Economy (non-WIM version of 110C)	5		
POLISCI 114D	Democracy, Development, and the Rule of Law	5		
POLISCI 114S	International Security in a Changing World	5		
POLISCI 118P	U.S. Relations in Iran	5		
• American Politics:				
			Units	
POLISCI 2	Introduction to American National Government and Politics	5		
POLISCI 122	Introduction to American Law	5		
POLISCI 123	Politics and Public Policy	5		
POLISCI 120B	Campaigns, Voting, Media, and Elections (Undergraduates should take this course for 5 units)	5		
POLISCI 120C	American Political Institutions: Congress, the Executive Branch, and the Courts (WIM)	5		
POLISCI 121L	Racial-Ethnic Politics in US	5		
POLISCI 124R	The Federal System: Judicial Politics and Constitutional Law (WIM)	5		
POLISCI 124S	Civil Liberties: Judicial Politics and Constitutional Law	5		
POLISCI 127P	Economic Inequality and Political Dysfunction	5		
POLISCI 224H	Heretics to Headscarves	5		
POLISCI 224L	The Psychology of Communication About Politics in America	4		
POLISCI 226	Race and Racism in American Politics	5		
• Political Theory:				
			Units	
POLISCI 236	Theories of Civil Society, Philanthropy, and the Nonprofit Sector (non-WIM version of 236S)	5		
POLISCI 131L	Modern Political Thought	5		
POLISCI 134P	Contemporary Moral Problems	5		
POLISCI 136S	Justice (Undergraduates should take this class for five units)	5		
POLISCI 230A	Classical Seminar: Origins of Political Thought	4-5		
POLISCI 231	High-Stakes Politics: Case Studies in Political Philosophy, Institutions, and Interests	4-5		
POLISCI 232T	The Dialogue of Democracy	4-5		
POLISCI 234P	Deliberative Democracy and its Critics	3-5		
POLISCI 235J	Creative Political Thinking: Three Cases	5		
POLISCI 236S	Theories of Civil Society, Philanthropy, and the Nonprofit Sector	5		
POLISCI 237M	Politics and Evil	5		
POLISCI 3P	Justice	5		
• Comparative Politics:				
			Units	
POLISCI 4	Introduction to Comparative Politics	5		
POLISCI 148	Chinese Politics: The Transformation and the Era of Reform (WIM)	5		
POLISCI 140L	China in World Politics	5		
POLISCI 142B	British Politics	5		
POLISCI 147	Comparative Democratic Development	5		
POLISCI 149S	Islam, Iran, and the West	5		
POLISCI 240C	The Comparative Political Economy of Post-Communist Transitions	3-4		
POLISCI 243L	Politics of Economic Reform	5		
POLISCI 245R	Politics in Modern Iran	5		
POLISCI 246P	The Dynamics of Change in Africa (Undergraduates should enroll in this class for 5 units.)	4-5		
POLISCI 247G	Governance and Poverty	5		
POLISCI 248L	Political-Economy of Crime and Violence in Latin America	5		
POLISCI 114D	Democracy, Development, and the Rule of Law	5		
• Methodology				
			Units	
POLISCI 152	Introduction to Game Theoretic Methods in Political Science	3-5		
POLISCI 352	Introduction to Game Theoretic Methods in Political Science	3-5		
POLISCI 155	Applied Quantitative Research in Political Science	5		
B. A 5-unit methods requirement satisfied by:				
C.			Units	
Select one of the following:			5	
STATS 60	Introduction to Statistical Methods: Precalculus			
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists			
POLISCI 155	Applied Quantitative Research in Political Science	5		
D. 20 additional Political Science units including no more than 5 units of directed reading. 10 units of ECON 1A Introductory Economics A and/or ECON 1B Introductory Economics B may substitute for two 5-unit POLISCI courses.				
E. No more than two 5-unit Stanford Introductory Seminar courses can be applied toward the 70-unit major requirement.				

3. *Introductory Courses:* each student must take two from the following Political Science courses, one of which must be in the primary concentration, the other in the secondary concentration. These courses should be completed by the end of sophomore year.

		Units
POLISCI 1	Introduction to International Relations	5
POLISCI 2	Introduction to American National Government and Politics	5
POLISCI 4	Introduction to Comparative Politics	5
POLISCI 3P	Justice	4-5

5. Demonstrate the capacity for sustained research and writing in the discipline. This requirement is satisfied by taking a Political Science course designated as a Writing in the Major (WIM) course and may be in any subfield of the major.

6. Take at least one 5-unit, 200 or 300-level undergraduate seminar in Political Science.

7. Students may petition a maximum of ten units towards the major. Transfer students are allowed to petition up to twenty units towards the major. A maximum of 15 units may be applied towards the concentrations and 5 towards other Political Science course units. All Stanford-in-Washington courses and transfer credit from outside of Stanford require petitions which must be reviewed and approved by the Director of Undergraduate Studies. Petitions must be submitted within one quarter of course completion, or within one quarter of declaring the major. Cognate courses do not require a petition.

8. Directed reading and Oxford tutorial units also require a petition and may only be applied towards related course work units. These units may not be used in the concentrations, and no more than 10 combined units of directed reading and Oxford tutorial units may count toward the required 70 Political Science units.

9. All courses for the major must be completed with a letter grade of 'C' or better.

POLISCI 2 Introduction to American National Government and Politics

POLISCI 4 Introduction to Comparative Politics

POLISCI 3P Justice

iii It is recommended that research honors track students enroll in one of the discussion sections designed for students interested in research.

C. 10 units of statistics, which can be completed by taking one of the following sequences:

		Units
Select one of the following:		8-9
STATS 60 & POLISCI 155	Introduction to Statistical Methods: Precalculus and Applied Quantitative Research in Political Science	10
STATS 60 & STATS 191	Introduction to Statistical Methods: Precalculus and Introduction to Applied Statistics	8-9
STATS 116 & STATS 200	Theory of Probability and Introduction to Statistical Inference	6-8
ECON 102A & POLISCI 155	Introduction to Statistical Methods (Postcalculus) for Social Scientists and Applied Quantitative Research in Political Science	10
ECON 102A & ECON 102B	Introduction to Statistical Methods (Postcalculus) for Social Scientists and Introduction to Econometrics	10

D. Students are also encouraged to complete one of the following calculus sequences:

		Units
Select one of the following Series:		15
Series A		
MATH 19	Calculus	
MATH 20	Calculus	
MATH 21	Calculus	
Series B		
MATH 41	Calculus	
MATH 42	Calculus	
MATH 51	Linear Algebra and Differential Calculus of Several Variables	

F. Three courses designed for the research honors track, to be taken during junior year:

		Units
POLISCI 291	Political Institutions	5
POLISCI 292	Political Behavior	5
POLISCI 293	Research Design	5

G. To accommodate students studying at overseas campuses during their junior year, these courses are offered during the Winter and Spring quarters.

H. Two 300-level or 400-level graduate elective courses during senior year.

I. Three 100-level or 200-level Stanford POLISCI courses that must be approved by the student's adviser. One of these courses must be a POLISCI Writing in the Major (WIM) course.

Research Honors Track

The Research Honors Track in Political Science leads to a B.A.H. (Bachelor of Arts with Honors) in Political Science. This program is designed to provide its students with the analytical tools they need to write honors theses and collaborate with Stanford faculty and Ph.D. students. Professor Michael Tomz is the 2012-13 program director.

To receive a B.A.H. in Political Science, students must apply and be accepted to the Research Honors Track. Students must apply to the program in the Spring Quarter of the sophomore year or Autumn Quarter of the junior year. A complete application includes a transcript; a letter of recommendation from a member of the Stanford Political Science faculty or from a teaching assistant in a Political Science course; and an essay outlining the student's interest in the Research Honors Track.

To fulfill the research honors track major requirements, a student must:

1. Complete 70 units

A. All courses taken for the research honors track must receive a letter grade of 'C' or better. Junior research honors track courses (see 1d) must receive a 'B' or better to count toward the major. Students unable to meet these requirements may be removed from the track.

B. 10 units of introductory course work in Political Science.

i Students must complete at least two of the following courses, preferably by the end of Spring Quarter of sophomore year:

		Units
ii	Select two of the following:	10
	POLISCI 1 Introduction to International Relations	

J. 10 units of honors thesis writing. To satisfy this requirement, students must take POLISCI 299Q, during the Autumn of their senior year, and must complete the remaining units by taking POLISCI 299A Honors Thesis, POLISCI 299B Honors Thesis, and/or POLISCI 299C Honors Thesis with their thesis adviser.

2. Complete at least one intensive summer research experience by participating in the Political Science Department's Summer Research College (SRC) program, or by completing an independent project under the direction of a Political Science faculty member. Independent projects must be approved by the director of the research honors track.
3. Students may petition a maximum of 10 units to count for the major. Transfer students are allowed to petition a maximum of 20 units. All petitions and transfer courses require approval from the research honors track director.

Minor in Political Science

Students must complete their declaration of the minor on Axess no later than the end of the junior year. They must submit the minor declaration form to the undergraduate administrator in Encina Hall West 100. This form can be found in Encina Hall West 100 or at <http://politicalscience.stanford.edu/minor.html>.

To receive a minor in Political Science, a student must complete a minimum of 30 unduplicated units. All units must be in Political Science courses or cognate courses. All courses for the minor must be taken for a letter grade. Students must receive a minimum letter grade of 'C' in all courses for the minor.

Concentration

The student selects a primary subfield in which three courses are taken. One of these courses is the introductory course, the other two are at a more advanced level (numbered above 100). The concentration corresponds to one of the subfields the department already has in place, namely, American politics, comparative politics, international relations, and political theory.

Distribution

Three courses must be in the primary concentration, as specified above, for 15 units. An additional 10 units of intermediate and advanced courses (100 level or above) must be in two additional subfields. The final 5 units may be in any related subfield. ECON 1A Introductory Economics A, ECON 1B Introductory Economics B, or any of the Political Science related courses may also be used to satisfy the last five units.

Petitioned courses

Students may petition for a maximum of 5 units to count towards the minor. This includes directed readings and Stanford in Washington courses. Directed readings and Stanford in Washington courses may only count towards the last five related units for the minor. Transfer students can petition a maximum of 10 units towards the minor, while non-transfer students can petition a maximum of five units towards the major. All petitioned courses must be individually reviewed and approved by the Director of Undergraduate Studies. Students can download the petition form (<http://politicalscience.stanford.edu/PoliSciMajors/PoliticalSciencePetition.pdf>) or pick one up from Encina Hall West, room 100. Students must submit petitions to the undergraduate administrator in Encina Hall West, room 100.

Master of Arts in Political Science

The Political Science department does not offer a terminal M.A. degree. An M.A. degree may only be pursued in combination with a doctoral degree from another department within the University or with an advanced degree from one of the University's professional schools. Students interested in pursuing the M.A. should discuss the application requirements with the graduate administrator in Political Science.

Students from within the department and from other degree programs who have applied to the M.A. program may elect to take the M.A. degree in Political Science when they have met the following requirements:

1. Completion of at least three quarters of residency as a graduate student with 45 units of credit of which at least 25 units must be taken in Political Science graduate seminars of 300 level and above. Not more than 25 units of the 45-unit requirement may be taken in a single field.
2. At least two graduate seminars in each of two fields and at least one graduate seminar in a third field.
3. The remaining 20 units must come from courses numbered above 100. Of those 20 units, not more than 10 units of work from related departments may be accepted in lieu of a portion of the work in Political Science. Not more than 10 units may be taken as directed reading.
4. A grade point average (GPA) of 2.7 (B-) or better must be attained for directed readings and all course work. No thesis is required.

The department does not offer a coterminal bachelor's and master's degree.

Political Science doctoral candidates may pursue master's degrees from other departments. Recent examples include but are not restricted to master's degrees in Statistics and Economics. Students interested in this option should consult the relevant sections of this Bulletin for both University and department requirements for master's degrees.

Doctor of Philosophy in Political Science

The University's basic requirements for the Ph.D. degree are discussed in the "Graduate Degrees (p. 38)" section of this bulletin.

Programs of study leading to the Ph.D. degree are designed by the student, in consultation with advisers and the Director of Graduate Studies, to serve his or her particular interests as well as to achieve the general department requirements. A student is recommended to the University Committee on Graduate Studies to receive the Ph.D. degree in Political Science when the following program of study has been completed:

1. The candidate for the Ph.D. degree must take three of the following concentrations in political science: American politics, comparative politics, international relations, methodology, and political theory. Students concentrate on two of these areas by fulfilling, depending on the concentration, combinations of the following: written qualifying examinations, research papers, research design, or course work. The requirement for the third concentration may be satisfied by taking either a written examination in that area or by taking a minimum of 10 units with a grade point average (GPA) of 3.0 (B) or better in the third concentration from among the formal graduate-level courses in the five divisions of the department. The third concentration cannot be satisfied by courses taken as a requirement for a first or second concentration. A third concentration in theory requires two courses in addition to the five units necessary to fulfill the program requirement. A third concentration in methodology requires two

courses in addition to the 10 units necessary to fulfill the program requirement. Completion of special concentrations may require more than 10 units of course work.

2. The Ph.D. candidate is required to demonstrate competence in a language and/or skill that is likely to be relevant to the dissertation research. The level of competence needed for successful completion of the research is determined by the student's adviser. All candidates must complete at least 10 units of statistical methodology or its equivalent. Previous instruction can be counted towards this requirement only if approved by the Director of Graduate Studies.
3. Every Ph.D. candidate must complete at least five units of graduate-level instruction in political theory.
4. By the start of the fourth quarter in residence, each graduate student submits a statement of purpose to the student's adviser. This statement indicates the student's proposed major concentrations of study, the courses taken and those planned to be taken to cover those fields, the student's plan for meeting language and/or skill requirements, plans for scheduling of comprehensive examinations and/or research papers, and, where possible, dissertation ideas or plans. This statement is discussed with, and must be approved by, the student's adviser. In the Autumn Quarter following completion of their first year, students are reviewed at a regular meeting of the department faculty. The main purposes of this procedure are, in order of importance: to advise and assist the student to realize his or her educational goals; to provide an incentive for clarifying goals and for identifying ways to achieve them; and to facilitate assessment of progress toward the degree.
5. Students must take the comprehensive exams in two major fields by the end of their second year in the program. Students are expected to have passed these examinations and to have faculty approval of their research paper by the end of their second year.
6. The University and the department expect that students be advanced to candidacy by the completion of their sixth quarter as a full-time student. Each second-year student is reviewed and considered for admission to candidacy in a meeting of the faculty that is typically held during the tenth week of Spring Quarter. Since completion of two comprehensive exams and a research paper are prerequisites for admission to candidacy, students should plan their first- and second-year studies so that these requirements are satisfied by the time of the faculty review meeting. In particular, students should submit their research paper to the relevant faculty readers no later than the middle of Winter Quarter, since revisions of the paper are often required prior to obtaining faculty approval.
7. During the third year, a formal dissertation proposal must be submitted to and approved by the student's dissertation adviser and the Director of Graduate Studies. Dissertation proposals must be approved by the end of the third year.
8. A candidate for the Ph.D. in Political Science is required to serve as a teaching assistant (TA) in the department for a minimum of three quarters.
9. Doctoral candidates who apply for the M.A. degree are awarded that degree on completion of the requirements outlined in the description of the M.A. program.
10. The candidate must pass the University oral examination on the area of the dissertation at a time, after the passing of the written comprehensive examinations, suggested by the candidate's dissertation committee.
11. The candidate must complete a dissertation satisfactory to the dissertation reading committee.

Ph.D. Minor in Political Science

Candidates in other departments which accept a minor in Political Science select two concentrations in political science in consultation with the Director of Graduate Studies and submit to her or him a program of study for approval. Written approval for the program must be obtained from the Director of Graduate Studies before application for doctoral candidacy. Students are required to complete at least 20 units in Political Science courses. Courses must be 300 level and above. Grades must be a GPA of 3.0 (B) or better. Candidates may be examined in their concentrations in the general oral examination by a member of the Department of Political Science, chosen in consultation with the Director of Graduate Studies.

Emeriti: (Professors) David B. Abernethy, Lucius J. Barker, Richard A. Brody, David Danielski, Charles Drekeimer, Richard R. Fagen, John A. Ferejohn, John W. Lewis, John Manley, James March, Hubert R. Marshall, Daniel Okimoto, Robert A. Packenham, Philippe Schmitter, Hans N. Weiler

Chair: Josiah Ober

Professors: David W. Brady, Bruce E. Cain (on leave), Joshua Cohen, Gary W. Cox, James D. Fearon, Morris P. Fiorina, Judith L. Goldstein, Stephen H. Haber, David J. Holloway, Shanto Iyengar, Simon D. Jackman, Terry L. Karl, Stephen D. Krasner, Jon A. Krosnick, David D. Laitin, Michael A. McFaul (on leave), Terry M. Moe, Josiah Ober, Jean C. Oi, Jack N. Rakove, Condoleezza Rice, Douglas Rivers, Jonathan A. Rodden, Scott D. Sagan, Kenneth F. Scheve Jr., Kenneth A. Schultz, Gary M. Segura, Paul M. Sniderman, Michael R. Tomz, Barry R. Weingast

Associate Professors: Beatriz Magaloni, Rob Reich, Jeremy M. Weinstein

Assistant Professors: Lisa Blaydes, Adam Bonica, Lauren Davenport, Justin Grimmer, Karen L. Jusko, Phillip Y. Lipsy, Alison McQueen, Clayton Nall, Kristi Olson, Jonathan Wand

Lecturers: Roberto Blancarte, Tammy Frisby, Thomas Hegghammer, Syed Rifaat Hussain, Josef Joffe, Abbas Milani, Alice Miller, Vidal Romero, Andrew R. Rutten, James P. Steyer, Kathryn Stoner-Weiss, Amy Zegart

Courtesy Professors: David P. Baron, Jonathan B. Bendor, Coit D. Blacker, Gerhard Casper, Martha Crenshaw, Mariano Florentino-Cuellar, Larry Diamond, Jean-Pierre Dupuy, James Fishkin, Lawrence Friedman, Keith Krehbiel, Debra M. Satz, Stephen J. Stedman

Acting Instructors: Robert Barlow, Rachel Brule

Courtesy Associate Professors: Neil Malhotra, Ken Shotts

Courtesy Assistant Professor: Saumitra Jha

Overseas Studies Courses in Political Science

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/politicalscience/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/politicalscience/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/politicalscience/http://bosp.stanford.edu>).

Psychology

Courses offered by the Department of Psychology are listed under the subject code PSYCH on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=PSYCH&filter-catalognumber-PSYCH=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=PSYCH&filter-catalognumber-PSYCH=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=PSYCH&filter-catalognumber-PSYCH=on>).

The department, housed in Jordan Hall, maintains many computer-equipped laboratories and the Stanford Center for Cognitive and Neurobiological Imaging (CNI). Bing Nursery School, located on campus at 850 Escondido Road, provides a laboratory for child observation, training in nursery school teaching, and research. It was constructed with funding from the National Science Foundation and a special grant from Mrs. Anna Bing Arnold and Dr. Peter Bing.

The department provides

- courses designed for the general student
- a major program leading to the degree of Bachelor of Arts, including options for honors and a specialization in one of four content area tracks
- an undergraduate minor program
- a coterminal master's degree program leading to the degree of Master of Arts
- programs of graduate study and research leading to the degree of Doctor of Philosophy
- a Ph.D. minor

Applications are not accepted for the master's degree except as noted below.

Mission of the Undergraduate Program in Psychology

The mission of the undergraduate program in Psychology is to introduce students to the theories and empirical studies of human behavior. This includes the study of aging, achievement, child development, cognitive processes, conflict, culture, decision making, emotion, group behavior, health, identity, infancy, language, learning and memory, morality, motivation, personality, psychopathology, race, self, social perception,

visual perception, and other related topics. The major provides students with knowledge and skills relevant to professional careers in technology, business, counseling, education, public policy, law, and medicine, as well as graduate studies in Psychology.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of core knowledge within the discipline of psychology including relevant theory and research.
2. the ability to analyze a problem correctly using discipline specific methodology.
3. the ability to draw sound inferences and conclusions from data.
4. the ability to write and communicate ideas clearly.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Psychology and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Psychology. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Psychology and to disseminate this knowledge.

Bachelor of Arts in Psychology

Major Requirements

Students declaring a major in Psychology must complete a minimum of 70 units of course work in Psychology, 60 of which must be taken in the Psychology department. The remaining 10 units can be taken outside of the Psychology department but must be pre-approved by the student services office or faculty adviser. These courses should represent a coherent thematic focus. One way to achieve this focus is through a field of study. Courses taken to satisfy the 70-unit requirement must be taken for a grade of C- or better (except for courses offered only on a satisfactory/no credit basis). Majors must take PSYCH 1 Introduction to Psychology, and PSYCH 10 Introduction to Statistical Methods: Precalculus. Advanced placement (AP) credit may no longer be used toward the Psychology major requirements. Beyond these two required courses, students must complete at least five of the following eleven core Psychology courses, with a minimum of two from each area A and B:

Area A (21)		Units
BIO 20	Introduction to Brain and Behavior	3
PSYCH 30	Introduction to Perception	3
PSYCH 35	Introduction to Cognitive and Information Sciences	4
PSYCH 45	Introduction to Learning and Memory	3

PSYCH 50	Introduction to Cognitive Neuroscience	4
PSYCH 55	Introduction to Cognition and the Brain	4
Area B (21)		
PSYCH 60	Introduction to Developmental Psychology	3
PSYCH 70	Introduction to Social Psychology	4
PSYCH 75	Introduction to Cultural Psychology	5
PSYCH 80	Introduction to Personality and Affective Science	3
PSYCH 90	Introduction to Clinical Psychology	3
PSYCH 95	Introduction to Abnormal Psychology	3

Students who declared a major in Psychology prior to the 2005-06 academic year may choose to adhere to the 55-unit major requirement, taking PSYCH 1 Introduction to Psychology and PSYCH 10 Introduction to Statistical Methods: Precalculus, five core courses, and elective courses, totaling 55 units.

Students must take one Writing in the Major (WIM) course in Psychology, and should check the Stanford Bulletin yearly as these courses may change. The department also strongly recommends that all majors take at least one advanced seminar.

Students may count up to 10 units of research, independent study, and practica (including but not limited to PSYCH 194 Reading and Special Work, PSYCH 195 Special Laboratory Projects, PSYCH 281 Practicum in Teaching) toward the Psychology major. Students who are teaching assistants for a Psychology course or are enrolled in the senior honors program are allowed up to 15 units in independent study and research. Any units beyond the limit of 10 or 15 may be counted toward the 180 units required for graduation.

Students who are double majoring or completing a minor degree in another department may not overlap (double-count) courses, unless the overlapping courses constitute introductory skill requirements, such as PSYCH 10 Introduction to Statistical Methods: Precalculus. In this instance, while the course requirement would be satisfied, the units for the course can only be applied to one program of study, not both. Consult the student services office for further clarification.

Summer Quarter Psychology courses are not equivalent to courses given during the regular academic year and, while applicable toward the 70 units needed for the major, may not be used to fulfill core course requirements. Additionally, a course taken during the Summer Quarter cannot be used to replace the grade of a non-Summer Quarter course, even if the title and units of the two courses are the same.

Beyond the Minimal Requirements

The following recommendations may be helpful to students who wish to plan a program that goes beyond the minimal requirements listed above:

1. Within the general major, the student may take advanced undergraduate or graduate courses (although some require the consent of the instructor), including seminars. The student may also take advantage of widespread opportunities for directed research, working closely with individual faculty and graduate students.
2. The student may apply to the senior honors program, described below.
3. The student may elect to pursue one of four specialization tracks of study: Cognitive Sciences; Health and Development; Mind, Culture, and Society; or Neuroscience, described below.

The training obtained from the pursuit of any of these options is valuable not only for students considering graduate work in Psychology, but also for those thinking of professional careers outside of Psychology in fields such as technology, business, counseling, education, law, public policy or medicine.

Credit from Outside the Department

Psychology majors must complete at least 60 units of course work toward their major at Stanford within the Psychology department. Psychology minors may count no more than a total of 10 units credit from outside the department toward the minor. Both majors and minors, under extenuating circumstances, may use one course from outside the department to fulfill core course requirements. Additional courses may be used to fulfill the 70-unit major requirement, but may not be counted as core courses. Please see the student services office for further clarification.

Petition for transfer of credit is rarely granted. In cases where petitioning is necessary, there are two types of credit from outside the department: external transfer credit for courses taken at institutions other than Stanford and credit for courses in other Stanford departments. A student must have already declared Psychology as a major or minor in order to submit a petition for transfer credit. Stanford credit for courses completed at other institutions must have been granted by the External Credit Evaluation section of the Registrar's Office; those units may be applied toward the 180 units required for graduation. To have credit from outside the department evaluated to fulfill requirements toward the Psychology major or minor, students must complete an Undergraduate Petition form, available from the student services office, and submit it with a course syllabus. Students requesting external transfer credit must also submit a copy of the signed transcript from the External Credit Evaluation section of the Registrar's Office showing the number of Stanford units granted for the course. The Psychology department then evaluates external credit courses and courses from other Stanford departments to determine if they can be applied toward Psychology major or minor requirements.

Specialization Tracks

Students in the major program, including those in the senior honors program, may elect to specialize in one of four specialization tracks:

- Cognitive Sciences
- Health and Development
- Mind, Culture, and Society
- Neuroscience

These tracks consist of a coherent set of courses leading to advanced undergraduate or even graduate-level courses in an area. In the ideal case, the student who specializes would acquire an understanding of a range of psychological processes, as well as an appreciation of the significance of these processes in the chosen area of application. Specialization in one of the tracks can facilitate preparation for a professional career as well as for graduate work in Psychology.

Participation in a specialization track is optional, although students who do not wish to complete all the requirements for a track may still want to use the track as a guideline for an integrated program in Psychology. Students who choose to complete a specialization track must meet the requirements for the major plus the additional requirements designated for the track. Typically, the courses required for a track include one or two required courses, four to six recommended courses in Psychology, one or two advanced seminars, and three or four courses in related disciplines. Psychology courses completed for the track count toward satisfying the major requirements. Courses from other departments listed for the track may count toward the 10 outside units for the major requirement, but must be pre-approved by the student services office or faculty adviser.

These specialization tracks are declared on Axxess upon approval of faculty adviser. They appear on the transcript but not on the diploma.

Honors Program

The senior honors program is designed for exceptionally able Psychology majors who wish to pursue a year of intensive supervised independent

research. Admission to the program is made at the end of the student's junior year on the basis of:

- excellent academic performance
- previous research experience
- two letters of recommendation by faculty and/or graduate students

Applications are available in April and are to be submitted to the department's student services office with a current transcript and recommendations prior to the student's senior year.

Students interested in the program should involve themselves in research as early as possible and should acquire a broad general background in Psychology, including statistics, and a deep background in their chosen area. Typically, students work in their honor thesis adviser's lab for at least one quarter. The honors program is particularly appropriate for students planning to go to graduate school in Psychology or in other social sciences, as well as in computer science, business, counseling education, law, public policy and medicine.

During Autumn Quarter of their senior year, honors program students participate in a weekly seminar and meet with their advisers to develop their experimental program and begin data collection. Winter and Spring Quarters are devoted to completing the research, analyzing the data, and writing the thesis, which is submitted mid-May. Students give oral presentations of their projects at the annual Honors Convention. This convention is attended by undergraduates, graduate students, and faculty.

Minor in Psychology

Declaration

Students who wish to declare a minor field of concentration in Psychology must do so no later than the deadline for their application to graduate.

Degree Requirements

Completion of a minimum of 35 units in Psychology is required for the minor, including PSYCH 1 Introduction to Psychology and PSYCH 10 Introduction to Statistical Methods: Precalculus, or a comparable statistics course. Advanced placement (AP) credit may no longer be used towards the Psychology minor.

The minor must include three of eleven core courses with a minimum of one from each of two areas and elective Psychology courses of at least three units each, totaling 35 units:

Units

Area A

Select a minimum of one of the following:

BIO 20	Introduction to Brain and Behavior
PSYCH 30	Introduction to Perception
PSYCH 35	Introduction to Cognitive and Information Sciences
PSYCH 45	Introduction to Learning and Memory
PSYCH 50	Introduction to Cognitive Neuroscience
PSYCH 55	Introduction to Cognition and the Brain

Area B

Select a minimum of one of the following:

PSYCH 60	Introduction to Developmental Psychology
PSYCH 70	Introduction to Social Psychology
PSYCH 75	Introduction to Cultural Psychology
PSYCH 80	Introduction to Personality and Affective Science
PSYCH 90	Introduction to Clinical Psychology
PSYCH 95	Introduction to Abnormal Psychology

Elective Psychology Courses

Students who declared a Psychology minor prior to the 2002-03 academic year may choose any three of the eleven core courses.

Students who declared a Psychology minor prior to the 2005-06 academic year may choose to complete seven total courses:

	Units
PSYCH 1 Introduction to Psychology	5
PSYCH 10 Introduction to Statistical Methods: Precalculus	5
Three core courses	
Two elective courses	

Independent study, research, and practica cannot be counted toward the minor. Summer Quarter Psychology courses are not applicable toward the 35 units needed for the minor.

All courses used to fulfill the requirements of the minor must be passed with a grade of C- or better, except for courses offered only on a satisfactory/no credit basis. No more than 10 units of transfer credit may be counted toward the Psychology minor.

Master of Arts in Psychology

The Department of Psychology offers a Master of Arts degree only to students concurrently enrolled in other Stanford programs.

A Master of Arts degree is available to students enrolled in the Department's Ph.D. program. For such students, the requirements of the M.A. degree are listed in the "Doctoral" tab of this section.

A separate program called the Coterminal Master's Program (described below) is available to Stanford undergraduates.

In exceptional cases, students concurrently enrolled in another doctoral or professional program at Stanford may also apply for the M.A. degree. In such cases, the applicable admissions and degree requirements are determined on a case by case basis. Such applicants should consult with the student services office in the Department of Psychology.

All applicants must satisfy University residency requirements for the degree and are responsible for consulting with their primary departments or the Financial Aid Office about the effects of the proposed program on their current funding. General University requirements for the master's degree are described in the "Graduate Degrees (p. 38)" section of this bulletin.

Coterminal Master's Program

Stanford undergraduates who would like advanced training in Psychology may apply for a coterminal M.A. degree in Psychology. To do so, students should consult with the student services office. Along with a coterminal program application, applicants must submit:

1. a statement of purpose
2. a preliminary program plan specifying the courses in which they intend to enroll to fulfill degree requirements
3. at least two letters of recommendation from Stanford faculty members familiar with their academic work
4. a current Stanford undergraduate transcript
5. a written nomination by a member of the Psychology faculty who has agreed to serve as the student's master's degree adviser

This program is limited in size and admission is selective. Applicants must have earned a minimum of 120 units towards graduation as shown on the undergraduate transcript. The department's deadline for the submission of an application to the coterminal program is January 31, 2013.

Coterminal students cannot defer admission. Students must start the quarter for which they apply.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (p.)" section of this bulletin. For University coterminal degree program rules and University application forms, see <http://studentaffairs.stanford.edu/registrar/publications#Coterm>.

Students in the Coterminal program may be terminated if they no longer have an adviser, or if they are not making satisfactory progress in course work or research.

Degree Requirements for a Coterminal Master's Degree

Course work: For the coterminal master's degree, students must complete at least 45 units of Psychology courses, none of which may duplicate courses taken for the undergraduate degree, and none of which may be courses taken in the Summer Quarter. Courses to be counted toward the master's degree must be passed with a grade of B- or better, unless the course is offered only on a satisfactory/no credit basis.

Of these 45 required units, at least 27 must be in Psychology courses numbered 200 or above. Units from research, teaching, practica, independent study, and lab courses may not be counted toward these 27 units, but may be counted as part of the remaining 18 required units. Examples of such course that may not be counted toward these 27 units include:

	Units
PSYCH 246 Cognitive and Neuroscience Friday Seminar	1
PSYCH 258 Graduate Seminar in Social Psychology Research	1-3
PSYCH 269 Graduate Seminar in Affective Science	1
PSYCH 275 Graduate Research	1-15
PSYCH 281 Practicum in Teaching	1-5
PSYCH 282 Practicum in Teaching PSYCH 1	1-2
PSYCH 297 Seminar for Coterminal Master of Arts	1-2

Included in the 27 units of graduate-level courses must be at least one 3-unit course from each of Area A (cognitive science and neuroscience) and Area B (affective, developmental, and social psychology), and at least one upper division statistics course that has been approved by the student's adviser. Further, all coterminal students are encouraged to enroll in PSYCH 196 Contemporary Psychology: Overview of Theory, Research, Applications. The specific courses in Area A and Area B available to coterminal master students vary from year to year, and prospective students should consult with the department's Student Services Office for up-to-date information on courses available and their assignment to Area A and Area B.

Research: Demonstration of competence in the design and execution of psychological research is also required for receipt of the master's degree. This demonstration entails completion of a master's thesis containing original research. If the student is currently writing a senior honors thesis, this honors thesis may be accepted as proof of research competence provided the honors thesis is judged to be master's level research by the student's adviser and the department's graduate program committee. If the student has completed an honors thesis in Psychology in the prior year, the student would be expected to continue independent research during the coterminal year and to submit this research in a written report that, together with the completed honors thesis, would constitute the master's thesis. All students are required to make an oral presentation of their research during the Spring Quarter, and to present their thesis or written report at the end of that Quarter.

Doctor of Philosophy in Psychology

There are no specific course requirements for admission to the doctoral program. However, an applicant should have research experience as an undergraduate, as well as the equivalent of an undergraduate major in Psychology. The major focus of the doctoral program is on research training, and admission is highly selective.

Applicants for admission must submit their scores on the general Graduate Record Examination as part of the application. GRE subject scores are recommended.

General University requirements for the Ph.D. are described in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

In addition to fulfilling Stanford University requirements for the degree, the following departmental requirements are stipulated.

First-Year Course Requirements

During the first year of graduate study, the student must take PSYCH 207 Professional Seminar for First-Year Ph.D. Graduate Students, at least one approved graduate statistics course, and at least two core courses from the following list:

		Units
PSYCH 202	Cognitive Neuroscience	3
PSYCH 205	Foundations of Cognition	1-3
PSYCH 211	Developmental Psychology	1-3
PSYCH 212	Social Psychology	1-3
or PSYCH 215	Mind, Culture, and Society	
PSYCH 213	Affective Science	3

Students in each area may be required to take up to two additional non-core graduate courses in their area of specialization.

The student is expected to spend at least half of the time in research from the beginning of the first year of graduate study to the completion of the Ph.D., taking no more than 10 units of course work each quarter. At the end of the first year of graduate study, the student must file with the department a written report of the first-year research activities.

Second-Year Course Requirements

By the end of the second year of graduate study, the student should complete the core courses listed above and take a second approved graduate course in statistics.

Optional Application for Conferral of the M. A. Degree: Graduate students, who have complete (a) the first-year and second-year course requirements, and (b) at least 45 units of Psychology courses, may apply for conferral of the M.A. degree. This application should be discussed with the Student Services office in the Department of Psychology.

Third-Year and Beyond

Students are expected to form a research committee, which must include the dissertation reading committee, before the initiation of the dissertation research. The research committee includes the dissertation adviser and consists of at least three faculty members, at least two of whom should have primary appointments in the Psychology department. For University guidelines for the composition of the dissertation reading committee, see the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

The research committee should meet no later than the last day of classes of Spring Quarter of the third year, and determines the timeline for further

development of the dissertation research project. Subsequent meetings are triggered by the completion of one of two documents: a dissertation proposal (DP) or a conceptual analysis of the dissertation area (CADA). The timing and sequencing of the DP and CADA are developed by the student in consultation with the committee. As a general guide, one of the two preliminary elements (CADA or DP) should be completed by the end of the third Summer Quarter and the second should be completed by the end of the fourth Spring Quarter. Students are free to alter the membership of the committee at any time during the process, subject to consultation with the adviser.

The DP should be a description of the proposed research. The CADA provides a framework for the research topic of the dissertation, addresses the central issues within the specialty area, and reviews the pertinent literature.

Advanced Course or Minor Requirements

The candidate must complete 12 units of advanced graduate course work or a Ph.D. minor in another department. If a student waives the minor requirement in favor of the 12 advanced units, the student must fulfill the advanced course requirement by taking (a) non-core graduate courses required by a particular area, or (b) graduate-level courses in other departments comparable in quality to Psychology's graduate courses. If there is any question about comparability, the student should consult the adviser, student services, and, in some cases, the graduate program committee chair before taking the course.

Orals

The candidate must pass the University oral examination, which also serves as a dissertation defense. A committee is formed to review the oral examination, including the dissertation reading committee, an additional faculty member, and one oral examination committee chair from outside the Psychology department. The oral examination consists of a 40-45-minute presentation to the department of the completed dissertation research. Parents and friends are welcome to attend. Following the presentation, the student and the committee convene for a discussion of the dissertation and the presentation.

Dissertation Requirements

The candidate must complete a dissertation satisfactory to the dissertation reading committee prior to the oral examination. Minor revisions to formatting may be made after the oral examination.

Ph.D. candidacy expires five years after admission to candidacy at the end of the second year of study. Reapplication requires department reexamination.

Student Evaluations

First-Year Evaluation: It is the department's policy to evaluate the progress of each graduate student at the end of the first year of graduate study. As part of the procedure, each student is required to file with the department a report of the first-year research activities.

Students should discuss this report and the evaluation procedures with their adviser as early as possible in their first year. If the student fulfills the academic promise displayed upon entrance, he or she is invited to continue working towards the doctorate.

The first-year evaluation is primarily based on three factors:

1. quality of research carried out in the first year
2. performance in courses (especially required courses)
3. recommendations of the adviser (including a commitment on the part of that adviser to continue in that role).

Second-Year and Beyond Evaluation: A similar evaluation is conducted at the end of each year of graduate training involving the same criteria

as the first year; however, the student is not required to submit a paper. Students who are not making satisfactory progress may be dropped from the program.

The Doctoral Training Program

As indicated by the requirements described above, a student concentrates in any one of several areas within Psychology. Regardless of area, however, the training program places emphasis on the development of research competence, and students are encouraged to develop those skills and attitudes that are appropriate to a career of continuing research productivity. Two kinds of experience are necessary for this purpose. One is the learning of substantial amounts of technical information. A number of courses and seminars are provided to assist in this learning, and a student is expected to work out a program, with his or her adviser, to attain this knowledge in the most stimulating and economical fashion.

A second aspect of training is one that cannot be gained from the courses or seminars. This is firsthand knowledge of, and practical experience with, the methods of psychological investigation and study. These methods include ways of behaving with the subjects being studied. Students are provided with whatever opportunities they need to reach those levels of competence representative of doctoral standing. Continuing research programs, sponsored by members of the faculty, offer direct opportunities for experience in fields represented by the faculty's many research interests.

Each student achieves competence in unique ways and at different rates. Each student and adviser share in planning a program leading to the objectives discussed. The student is expected to spend half of his or her time on research and takes no more than 10 units of course work per quarter. For further information please contact the student services office and the department graduate guide.

Teaching Requirement

The department views experience in supervised teaching as an integral part of its graduate program. Regardless of the source of financial support, all students serve as teaching assistants for at least five Psychology courses during their graduate study. Of the courses, two must be:

		Units
PSYCH 1	Introduction to Psychology	5
or PSYCH 10	Introduction to Statistical Methods: Precalculus	
PSYCH 252	Statistical Methods for Behavioral and Social Sciences	1-6
or PSYCH 253	Statistical Theory, Models, and Methodology	

Students are discouraged from participating in teaching during the first year of graduate study. Students typically progress from closely supervised teaching to more independent work. Some students may be invited to offer a supervised, but essentially independent, seminar during their final year of graduate study.

Psychology Colloquium

The Psychology Colloquium meets on most Wednesday afternoons at 3:45 p.m. Speakers from Stanford and other institutions present topics of current interest. Graduate students are expected to attend. Additional announcements may be found at the Colloquium Schedule (<http://www.stanford.edu/dept/psychology/colloquium>) web site.

Ph.D. Minor in Psychology

Candidates for the Ph.D. degree in other departments may elect a minor in Psychology. To obtain a minor, the student must complete 20 units of course work at the graduate level in the Department of Psychology, excluding PSYCH 275 Graduate Research. Crosslisted graduate courses can be used to satisfy this requirement. All courses counting toward the Ph.D.

minor must be passed with a grade of 'B-' or better, unless the course is offered only on a credit/no credit basis.

Emeriti: (Professors) Albert Bandura, Gordon H. Bower, John H. Flavell, Leonard M. Horowitz, Roger N. Shepard, Claude Steele, Barbara Tversky, Philip G. Zimbardo

Chair: Ian Gotlib

Professors: Nalini Ambady, Laura L. Carstensen, Herbert H. Clark, Geoffrey Cohen, Carol Dweck, Ian H. Gotlib, James J. Gross, Stephen Kosslyn, John D. Krumboltz, Mark R. Lepper, Ellen M. Markman, Hazel R. Markus, James L. McClelland, Dale Miller, Benoit Monin, Lee D. Ross, Ewart A. C. Thomas, Anthony Wagner, Brian Wandell, Jeffrey J. Wine

Professor (Research): Anthony Norcia

Associate Professors: Jennifer L. Eberhardt, Anne Fernald, Kalanit Grill-Spector, Brian Knutson, Jeanne L. Tsai

Associate Professor (Teaching): Catherine Heaney

Assistant Professors: Michael Frank, Noah Goodman, Samuel M. McClure, Gregory M. Walton, Jamil Zaki

Assistant Professor (Research): Lera Boroditsky

Lecturers: Amie Haas, Beverley Hartman, Jennifer Winters

Courtesy Professors: William C. Dement, Gary H. Glover, Jon Krosnick, Tanya Luhmann, William T. Newsome, Anne C. Petersen

Public Policy

Courses offered by the Public Policy Program are listed under the subject code PUBLPOL on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=PUBLPOL&filter-catalognumber-PUBLPOL=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=PUBLPOL&filter-catalognumber-PUBLPOL=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=PUBLPOL&filter-catalognumber-PUBLPOL=on>).

Mission of the Undergraduate Program in Public Policy

The mission of the undergraduate program in Public Policy is to expose students to the concepts and tools used in evaluating public policy options and outcomes, and to prepare students for entry-level positions in organizations concerned with such analysis. The focus is chiefly on domestic policy issues, applicable anywhere in the world.

Courses in the major provide students with background in economics and quantitative methods, political science, law, philosophy, ethics, organizational behavior, and social psychology. Economics and quantitative analyses are central to but not sufficient for modern public policy analysis; political science, law, philosophy, organizational behavior, and psychology are among other necessary disciplinary perspectives. Political philosophy and ethics form the foundations of public policy. Political science offers insights to the decision making process and information needs of a democracy. Organizational behavior focuses on the decisions made outside the market environment in hierarchies, bureaucracies, and teams. Nearly all public policy is formulated as law, and economic analysis of legal rules and institutions is key to effective implementation of policy decisions.

Seniors have a research capstone requirement consisting either of an honors thesis or participation in a team practicum project, conducting applied

policy research for an outside client, typically a nonprofit or government agency. Students majoring in Public Policy are prepared for careers in elective or appointed public office, business, law, and governmental agencies, or for further study in graduate programs.

The Public Policy Program offers a Bachelor of Arts, an honors program, and a minor for undergraduates, as well as a coterminal M.A. in Public Policy.

Learning Outcomes (Undergraduate)

The program expects its undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Program in Public Policy. Students are expected to:

1. Demonstrate knowledge and understanding of Public Policy analytical tools.
2. Communicate ideas clearly and persuasively in written and oral forms.
3. Evaluate applied theoretical and empirical work in the discipline.
4. Apply skills and knowledge acquired in the curriculum to analyze policy issues and make policy recommendations.
5. Demonstrate mastery of the above outcomes in senior capstone project.

Mission of Graduate Program in Public Policy

The mission of the graduate program in Public Policy is to offer advanced skills necessary to assess the performance of alternative approaches to policy making and implementation, evaluate program effectiveness, understand the political constraints faced by policy makers, and appreciate the conflicts in fundamental human values that often animate policy debate. After completing the graduate core curriculum, students apply these skills by focusing their studies in a two quarter, 10-unit practicum for the M.P.P., or a 5-unit master's thesis for the M.A. Students in the M.P.P. program also complete at least one concentration tailored to the student's primary degree program or the student's interests and skills.

The Graduate Program in Public Policy offers two master's degrees to graduating seniors, all graduate students and recent alumni:

- Master of Public Policy (M.P.P.), a two-year program leading to a professional degree; available to current Stanford students and recent Stanford alumni
- Master of Arts (M.A.), a one-year program not intended as a professional degree; available to current Stanford students

The following joint degree programs, permitting students to complete requirements for two degrees with a reduced number of total residency units, are also offered:

- Juris Doctor with a Master of Public Policy (J.D./M.P.P.)
- Juris Doctor with an M.A. in Public Policy (J.D./M.A.)
- Doctor of Medicine with a Master of Public Policy (M.D./M.P.P.)
- Doctor of Philosophy in Economics, Education, Management Science and Engineering, Psychology, or Sociology with a Master of Public Policy (Ph.D./M.P.P.)
- Master of Business Administration with a Master of Public Policy (M.B.A./M.P.P.)
- Master of Arts in International Policy Studies with a Master of Public Policy (M.A./M.P.P.)

- Master of Science in Management Science and Engineering with a Master of Public Policy (M.S./M.P.P.)

Requirements for the joint degrees differ from completing the two degrees separately. See the "Master's Degrees in Public Policy (<http://www.stanford.edu/dept/registrar/bulletin/69277.htm>)" section for more details.

University requirements for the master's degree are described in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this Bulletin.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Public Policy and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The M.P.P. or M.A. degree is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Public Policy. Through completion of advanced course work and rigorous skills training, the graduate program prepares students to make original contributions to the knowledge of Public Policy and to interpret and present the results of such research.

Bachelor of Arts in Public Policy

The Public Policy undergraduate major develops the skills necessary for understanding the political constraints faced by policy makers, assessing the performance of alternative approaches to policy implementation, evaluating the effectiveness of policies, and appreciating the sharp conflicts in fundamental human values that often animate the policy debate.

There are four course elements to the major: preparatory, core, concentration, and senior capstone. Freshman and sophomore years are generally devoted to completing preparatory courses offered in Economics, Math, and Psychology. After completing core courses during the junior year, students apply these skills by focusing their studies in one of several areas of concentration. The areas of concentration address a specific field of public policy, types of institutions, or a deeper development of the tools of policy analysis. Seniors may complete the senior capstone either by participating in a Practicum, a team policy research project for an outside client, or by writing an honors thesis.

Completion of the Bachelor of Arts degree in Public Policy requires a minimum of 84 units of course work.

Students must complete the Public Policy core, concentration, and the senior capstone requirement with an overall grade point average of 2.3 (C+) or higher.

The Public Policy Program encourages students to attend the Bing Stanford in Washington Program (<http://bsiw.stanford.edu>) and to participate in appropriate Stanford internship programs, especially those available through the Haas Center for Public Service (<http://haas.stanford.edu>) and Stanford in Government (<http://sig.stanford.edu>).

1. Preparatory courses (39 units)

		Units
2.	ECON 1A	Introductory Economics A 5
	ECON 1B	Introductory Economics B 5
	ECON 50	Economic Analysis I (must be taken for a letter grade) 5

ECON 51	Economic Analysis II (must be taken for a letter grade)	5
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	5
ECON 102B	Introduction to Econometrics	5
MATH 51	Linear Algebra and Differential Calculus of Several Variables (must be taken for a letter grade)	5

Select one of the following:

MS&E 180	Organizations: Theory and Management
PSYCH 70	Introduction to Social Psychology
PSYCH 138	Wise Interventions

A maximum of 10 units, with the exception of MATH 51 Linear Algebra and Differential Calculus of Several Variables, ECON 50 Economic Analysis I and ECON 51 Economic Analysis II, may be taken as credit/no credit.

3. Core courses (25 units)

4. All core courses must be completed for a letter grade.

		Units
PUBLPOL 101	Politics and Public Policy	5
PUBLPOL 102	Organizations and Public Policy	5
PUBLPOL 103C	Justice	5
PUBLPOL 104	Economic Policy Analysis	5
PUBLPOL 106	Law and Economics	5

5. Concentration

• Majors must complete at least 15 units of course work in an area of concentration. This post-core course work must be approved by a faculty adviser and the director. Concentration courses must be completed for a letter grade. Recent areas of concentration include, but are not limited to:

- Advanced Methods of Policy Analysis
- Design of Public Institutions
- Development and Growth Policies
- Education
- Environment, Resources, and Population
- Health Care
- International Policies
- Law and the Legal System
- Science and Technology Policy
- Social Policy: Discrimination, Crime, Poverty

6. Capstone research requirement

7. Seniors are required to demonstrate competency in applied policy research. This requirement is fulfilled either by an honors thesis or by participation in a research project (Practicum) in which small student teams analyze real world policy problems faced by Bay Area agencies and produce a report for use by the client. A seminar for honors students is offered Autumn Quarter (PUBLPOL 200H Senior Honors Seminar, 3 units). The Practicum is offered Autumn, Winter and Spring quarters (PUBLPOL 200A Senior Seminar: Conducting Policy Analysis for Local Agencies, PUBLPOL 200B Senior Seminar: Conducting Policy Analysis for Local Agencies and

PUBLPOL 200C Senior Seminar: Conducting Policy Analysis for Local Agencies, 5 units). The capstone research requirement must be completed for a letter grade.

Honors Program

The Public Policy Program offers students the opportunity to pursue honors work during the senior year. To graduate with honors in Public Policy, a student must:

1. Apply for admission to the honors program no later than the end of Spring Quarter of junior year.
2. Students are encouraged to complete the applied econometrics course by the end of Spring Quarter of the junior year and take PUBLPOL 200H Senior Honors Seminar during Autumn Quarter. Courses not taken at Stanford are not included in calculating the GPA.
3. Complete the requirements for the B.A. in Public Policy and achieve an overall grade point average (GPA) of 3.5 in the following courses:

	Units
Public Policy core courses	25
Concentration	15
PUBLPOL 200H Senior Honors Seminar	3
PUBLPOL 199 Senior Research	8-15
Select one of the following applied econometrics courses:	
ECON 102C Advanced Topics in Econometrics	
STATS 202 Data Mining and Analysis	
PUBLPOL 303B Political Methodology II	
PUBLPOL 303C Bayesian Statistics and Econometrics	

4. During senior year, enroll in at least 8 but no more than 15 units of PUBLPOL 199 Senior Research, with the thesis adviser. Students need to contact the program office to have their thesis adviser listed as a 199 instructor. An 'N' grade will be given by the adviser in quarters prior to Spring, when the thesis is completed and presented. All PUBLPOL 199 Senior Research units must receive a final grade of at least a 'B+'. The honors thesis must demonstrate mastery of relevant analytical tools and address a policy issue.
5. The honors thesis must be submitted to both the thesis adviser and the Public Policy Program office. In order to be considered for University and department awards, the final thesis must be submitted to the program office no later than the third Wednesday in May in both printed and electronic forms. All other theses must be submitted by the last Friday in May in both printed and electronic forms.

Students who intend to pursue honors work should plan their academic schedules so that most of the core courses are completed before the beginning of the senior year, and all of the core and concentration courses are completed by the end of Winter Quarter of senior year. This scheduling gives students both the time and the necessary course background to complete their honors thesis during Spring Quarter. In addition, prospective honors students are encouraged to enroll in PUBLPOL 197 Junior Honors Seminar during Winter or Spring Quarter. This course focuses on developing a research plan and the research skills necessary to complete an honors thesis.

To apply for honors, a student must submit a completed application to the Public Policy Program office with a brief description of the thesis. Applications are found online (<https://publicpolicy.stanford.edu/honors>) or in the program office. The student must obtain the sponsorship of a faculty member who approves the thesis description and agrees to serve as a thesis adviser. Students intending to write a thesis involving more than one discipline may wish to have two advisers, at least one of whom is affiliated with the Public Policy Program.

Graduation with honors requires that the thesis be approved by both the adviser and the program director. The role of the director is to assure that the thesis deals with an issue of public policy and satisfies the standards of excellence of the program. However, the grade for the honors thesis (PUBLPOL 199 Senior Research units) is determined solely by the adviser.

Members of staff, executive committee, lecturers, and affiliated faculty in Public Policy are available to provide assistance in selecting a thesis topic and adviser.

Minors in Public Policy

The Public Policy Program offers a minor that is intended to provide bachelor's students with interdisciplinary training in applied social sciences. Students who pursue the minor are required to take the courses listed below for a total of 35 units in Public Policy and its supporting disciplinary departments. Because University rules prohibit double-counting courses, the requirements for a minor differ according to the student's major requirements. Courses for the minor must be completed for a letter grade, with the exception of PUBLPOL 311 Public Policy Colloquium.

For students whose major department or program requires no courses in economics and political science, the requirements for a Public Policy minor are:

		Units
ECON 1A	Introductory Economics A	5
ECON 1B	Introductory Economics B	5
ECON 50	Economic Analysis I	5
ECON 51	Economic Analysis II	5
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	5
PUBLPOL 101	Politics and Public Policy	5
PUBLPOL 104	Economic Policy Analysis	5

For Political Science majors, the requirements for a Public Policy minor are:

		Units
ECON 1A	Introductory Economics A	5
ECON 1B	Introductory Economics B	5
ECON 50	Economic Analysis I	5
ECON 51	Economic Analysis II	5
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	5
PUBLPOL 104	Economic Policy Analysis	5
PUBLPOL 106	Law and Economics	5

For students who major in another interdepartmental program such as International Relations and who satisfy major requirements by taking ECON 50 Economic Analysis I and an introductory course in statistics such as ECON 102A Introduction to Statistical Methods (Postcalculus) for Social Scientists or STATS 60 Introduction to Statistical Methods: Precalculus, the requirements for a Public Policy minor are:

		Units
ECON 51	Economic Analysis II	5
ECON 102B	Introduction to Econometrics	5
PUBLPOL 101	Politics and Public Policy	5
PUBLPOL 102	Organizations and Public Policy	5
PUBLPOL 103C	Justice	5
PUBLPOL 104	Economic Policy Analysis	5
PUBLPOL 106	Law and Economics	5

Coterminal M.A. in Public Policy

The coterminal M.A. in Public Policy is a program designed to impart the basic analytical tools of public policy analysis, or to permit public policy majors to specialize in an applied field of policy analysis. Most students complete their M.A. in a fifth year at Stanford; occasionally students may be able to complete their B.A. and coterminal M.A. in the fourth year.

The coterminal M.A. is also a gateway to the M.P.P. degree program. Stanford undergraduates may apply for the coterminal M.A. in Public Policy and then, after one quarter, apply to the M.P.P. program, using the Graduate Program Authorization Petition. The same is true for coterminal master's students in any other degree program. Students accepted to the M.P.P. program withdraw from the M.A. degree program and complete the requirements for the 90-unit M.P.P. degree. This does not reduce the total number of units required for the bachelor's or master's degrees. Earning the B.A. and M.P.P. typically takes at least five years. Students considering this option should be familiar with the University's coterminal degree policies and procedures and should consult the director of the Public Policy program early in their planning.

Application and Admission

There are three coterminal degree application deadlines for the 2012-13 academic year: November 16, 2012; February 22, 2013; and April 26, 2013. Seniors wishing to apply to the coterminal program must apply during the November or February application cycles.

To apply for admission to the Public Policy coterminal M.A. program, students should submit the following materials directly to the Public Policy office:

1. the coterminal application (<http://studentaffairs.stanford.edu/sites/default/files/registrar/files/CotermApplic.pdf>)
2. 1-2 page statement of purpose
3. one-page resume
4. GRE Scores
5. a preliminary program proposal (http://publicpolicy.stanford.edu/system/files/Sample%20Preliminary%20Program%20Proposal_PP%20Coterm%2C%20Track%20B%20Coterm%20Course%20Plan.pdf)
6. a current unofficial undergraduate transcript
7. two confidential letters of recommendation from Stanford faculty members familiar with the student's academic work.

Applicants will be contacted for an interview.

University regulations govern both the coterminal M.A. degree application process and the requirements for the degree. Undergraduates with strong academic records may apply for admission upon completion of 120 units, but no later than the quarter prior to the expected completion of the undergraduate degree. The University requires that units for a given course may not be counted to meet the requirements of more than one degree; that is, no units may be double-counted. No courses taken more than two quarters prior to admission to the coterminal master's program may be used to meet the 45-unit University minimum requirement for the master's degree.

The University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (p. 36)" section of this Bulletin. For University coterminal degree rules and forms, also see the Publications and Online Guides (<http://studentaffairs.stanford.edu/registrar/publications/#Coterm>) web site.

Degree Requirements

All applicants should have completed, or be currently enrolled in, required preparatory course work prior to application. These courses do not count towards the 45 unit M.A. requirement.

		Units
MATH 51	Linear Algebra and Differential Calculus of Several Variables	5
ECON 1A	Introductory Economics A	5
ECON 1B	Introductory Economics B	5
ECON 50	Economic Analysis I	5
ECON 51	Economic Analysis II	5
ECON 52	Economic Analysis III	5
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	5
ECON 102B	Introduction to Econometrics	5

To graduate with a coterminal M.A. in Public Policy, students must:

1. Take all courses applied to the coterminal master's degree for a letter grade (with the exception of PUBLPOL 311 Public Policy Colloquium, which is only offered C/NC). For courses with variable units, coterminal students in their graduate career should enroll in the course for 4 units. No units are counted for courses in which a student earns a grade less than 'B-'. Courses offered only for C/NC or other non-letter grade system may be applied upon approval of a petition to the program director.
2. Achieve a cumulative grade point average (GPA) of 3.0 (B) or better for all courses taken towards the M.A.
3. Comply with all relevant University and program deadlines and policies.
4. Follow one of two tracks (A or B) through the program, as described below.
5. Coterminal M.A. students who are admitted to the M.P.P. program must transfer all applicable M.A. units to the M.P.P. program.

Track A

Public Policy majors will complete Track A, which consists of at least 45 units of course work:

1. 26 or more units in an area of concentration. Current concentrations (<http://publicpolicy.stanford.edu/coterm.concentrations>) include:
 - Health Policy
 - Education Policy
 - International Policy
 - Regulatory Policy
 - Environmental Policy
 - Science and Technology Policy
 - Self-designed (requires detailed statement of study goals, relationship of each proposed course to those goals, and commitment by a supervising faculty member)

Each concentration includes a set of required core courses and a variety of electives. Students must present a coherent written study plan to support concentration course choices, designed in consultation with a faculty adviser and approved by the program director.

2. Select one of the following applied econometrics courses:

		Units
ECON 102C	Advanced Topics in Econometrics	5
STATS 202	Data Mining and Analysis	3
PUBLPOL 303C	Bayesian Statistics and Econometrics	5

3. Completion of PUBLPOL 302A Introduction to American Law and ECON 52 Economic Analysis III (units from ECON 52 do not count towards the 45 M.A. units needed).
4. All Public Policy graduate students are required to attend and enroll in three quarters of PUBLPOL 311 Public Policy Colloquium. Attendance and participation are mandatory.
5. Completion of PUBLPOL 309 Practicum or a faculty-supervised internship or thesis.
6. All 45 units must be taken in upper division (100-level) courses, and at least 25 of those units must be at the graduate level (200-level and above).
7. Track A students who are accepted into the M.P.P. program take advanced courses in those subjects where the standard M.P.P. curriculum would duplicate undergraduate major requirements.

Track B

Students who will not have completed the Public Policy core curriculum follow Track B, which consists of at least 45 units of core subjects in the analysis of public policy.

1. The following core courses are required and count toward the required 45 units:

		Units
PUBLPOL 201 or PUBLPOL 304A	Politics and Public Policy Collective Action: Ethics and Policy	4
PUBLPOL 301A	Microeconomics	4
PUBLPOL 301B or PUBLPOL 204	Cost-Benefit Analysis and Evaluation Economic Policy Analysis	4-5
PUBLPOL 302A	Introduction to American Law	3-5
PUBLPOL 305A or PUBLPOL 305B	Judgment and Decision Making Public Policy and Social Psychology: Implications and Applications	4
PUBLPOL 206 or PUBLPOL 302B	Law and Economics Economic Analysis of Law	4-5
PUBLPOL 307	Justice	4-5

Select one of the following organization courses:

MS&E 180	Organizations: Theory and Management	
PUBLPOL 202	Organizations and Public Policy	
PUBLPOL 317	Comparing Institutional Forms: Public, Private, and Nonprofit	

Select one of the following applied econometrics courses:

ECON 102C	Advanced Topics in Econometrics	
STATS 202	Data Mining and Analysis	
PUBLPOL 303B	Political Methodology II	
PUBLPOL 303C	Bayesian Statistics and Econometrics	

2. All Public Policy graduate students are required to attend and enroll in three quarters of PUBLPOL 311 Public Policy Colloquium. Attendance and participation are mandatory.

3. Students must petition to count additional advanced policy skills courses needed to meet the 45-unit degree requirement. All 45 units must be taken in upper division (100+ level) courses and at least 25 of those units must be taken at the graduate level (200-level and above).

Coterminal M.A. students must meet with their faculty adviser upon acceptance to the program. For Track A students, advisers must confirm that the courses proposed are likely to be taught during the applicable period, or that appropriate substitute courses are available. Public Policy student services will verify scheduling of courses.

Financial Aid

The Public Policy Program does not provide financial assistance to coterminal students. For information on student loans and other sources of support, please consult the Stanford Financial Aid Office. Students who enter public service employment with local, state, or federal agencies, schools, or certain not-for-profit organizations may obtain forgiveness for educational loans, based on years of public service employment.

Master's Degrees in Public Policy

The program offers two master's programs in Public Policy. The Master of Public Policy (M.P.P.) is a two-year professional degree and the Master of Arts in Public Policy (M.A.) is a one-year non-professional degree.

At this time, eligibility for admission to the M.P.P. and M.A. programs is restricted to current Stanford undergraduate and graduate students and recent (Class of 2009-2012) Stanford alumni. If you do not meet these criteria, you are not eligible for admission to the M.A. or the M.P.P. degree programs.

All Public Policy master's programs, with the exception of the J.D./M.A., require at least one year of study at Stanford beyond the requirements for the other joint or dual degree.

1. Public Policy Joint Degrees. Students enrolled in or applying to certain degree programs in the Schools of Business, Education, Engineering, Humanities and Sciences, and Law are eligible to apply for Public Policy joint degrees. For further information, see the "Joint Degree Programs (<http://www.stanford.edu/dept/registrar/bulletin/7376.htm>)" section of this bulletin and the University Registrar's site (<http://studentaffairs.stanford.edu/registrar/students/jdp-information>).
 - Juris Doctor and Master of Public Policy (J.D./M.P.P.)
 - Juris Doctor and Master of Arts of Public Policy (J.D./M.A.)
 - Doctor of Medicine with a Master of Public Policy (M.D./M.P.P.)
 - Doctor of Philosophy in Education and Master of Public Policy (Ph.D./M.P.P.)
 - Doctor of Philosophy in Economics and Master of Public Policy (Ph.D./M.P.P.)
 - Doctor of Philosophy in Management Science & Engineering and Master of Public Policy (Ph.D./M.P.P.)
 - Doctor of Philosophy in Psychology and Master of Public Policy (Ph.D./M.P.P.)
 - Doctor of Philosophy in Sociology and Master of Public Policy (Ph.D./M.P.P.)
 - Master of Business Administration and Master of Public Policy (M.B.A./M.P.P.)
 - Master of Arts in International Policy Studies and Master of Public Policy (M.A./M.P.P.)
 - Master of Science in Management Science & Engineering and Master of Public Policy (M.S./M.P.P.)

2. Dual Degrees. Any other Stanford graduate student (i.e., not covered in '1' above), undergraduate student or recent alumni/ae is eligible to apply for a Public Policy dual degree. A dual degree student may subsequently withdraw from the original degree program.
 - Master of Public Policy (M.P.P.)
 - Master of Arts in Public Policy (M.A.)

Prerequisites

Graduate students in Public Policy are expected to be literate in mathematics and microeconomics at a level equivalent to MATH 51 Linear Algebra and Differential Calculus of Several Variables and ECON 50 Economic Analysis I before beginning the curriculum. A no-credit refresher course in mathematics and economics is offered in the two weeks preceding the start of Autumn Quarter.

Application and Admissions

Applications for graduate study in Public Policy are only accepted from 1) students currently enrolled in any Stanford graduate or undergraduate degree program, 2) from external applicants seeking a joint degree or 3) from recent Stanford alumni (2009-current). To be considered for matriculation beginning in the Autumn Quarter 2013-14, all application materials must be submitted no later than April 2, 2013.

External applicants for joint degrees must apply to the department or school offering the other graduate degree (i.e., Ph.D., M.A., M.S., M.B.A., or J.D.), indicating an interest in the joint degree program; applicants admitted to the other degree program are then evaluated for admission to the M.P.P. or M.A. program.

Stanford Alumni and current Stanford seniors

Visit the Stanford Office of Graduate Admissions (<http://studentaffairs.stanford.edu/gradadmissions>). The online application for the M.P.P. will be available beginning Friday, February 1, 2013. The fee for all applicants is \$125. We are unable to refund your application fee, so please refer to eligibility requirements before submitting your application.

Only complete applications will be reviewed. A complete application includes the following:

- Application;
- Official Transcripts. Copies of your transcripts must bear the official seal of the institution and the signature of the registrar. Transcripts must be uploaded to the online application and two (2) hard copies must be sent directly to the Public Policy Program:
Attn: Graduate Admissions
366 Galvez Street
SIEPR Gunn Bldg, Room 106
Stanford, CA 94305-6050;
- GRE Scores;
- Letters of Recommendation: Three letters of recommendation from a Stanford faculty member or an employer should be submitted electronically via the online application. Please see the Stanford Office of Graduate Admissions website regarding letters of recommendation (<http://studentaffairs.stanford.edu/gradadmissions/applying/recommendations>);
- Statement of purpose (upload to the online application);
- Academic Writing Sample (upload to the online application): This can be on any topic and may be either something you have previously written or something written specifically for the application. It should be 6-10 pages (double-spaced) and should showcase your academic writing ability;
- Resume or Curriculum Vitae (upload to the online application);

Stanford current graduate students (including coterminal degree students)

- application form (<http://publicpolicy.stanford.edu/graduate>);
- two confidential letters of recommendation from an employer or a Stanford faculty member familiar with applicant's academic work;
- undergraduate and graduate transcripts;
- GRE, GMAT, LSAT or MCAT test scores;
- Statement of purpose;
- resume;
- preliminary program proposal;
- transcripts and course descriptions demonstrating completion of required prerequisite course work in multivariate calculus and intermediate microeconomics

Applicants will be interviewed. If admitted, students will submit a Graduate Authorization Petition (<http://studentaffairs.stanford.edu/registrar/students/grad-auth-pet>) through Axes.

Degree Requirements

1. Core Curriculum—

All core courses must be taken for a letter grade and must be completed with an overall grade point average (GPA) of 3.0 or better.

		Units
PUBLPOL 301A	Microeconomics	4
PUBLPOL 301B	Cost-Benefit Analysis and Evaluation	4
PUBLPOL 302A	Introduction to American Law	3
PUBLPOL 302B	Economic Analysis of Law	4
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	5
or PUBLPOL 303A	Political Methodology I	
PUBLPOL 303B	Political Methodology II	5
PUBLPOL 304A	Collective Action: Ethics and Policy	4
PUBLPOL 305A	Judgment and Decision Making	4
PUBLPOL 305B	Public Policy and Social Psychology: Implications and Applications	4
PUBLPOL 306	Writing and Rhetoric for Policy Audiences	4
PUBLPOL 307	Justice	4
PUBLPOL 317	Comparing Institutional Forms: Public, Private, and Nonprofit	4

2. Colloquium—All Public Policy graduate students are required to attend and enroll in three quarters of PUBLPOL 311 Public Policy Colloquium. Attendance and participation are mandatory.
3. Practicum (M.P.P. and Track A Coterminal M.A. students)—Completion of the two quarter practicum course, PUBLPOL 309 Practicum (10 units, Autumn and Winter Quarters), and presentation of a report in which interdisciplinary student teams analyze real world policy issues for outside clients.

4. Concentration (M.P.P. students only)—Advanced course work in a specialized field, chosen from the approved list of concentration courses with the prior approval of the student's faculty adviser and the program director.
5. Master's Thesis (M.A. students only)—All M.A. students must submit a 5-unit master's thesis, written under the guidance of an adviser who is a member of the Public Policy affiliated faculty on a topic approved in advance by the program director. Students give the program office the name of their thesis adviser during Autumn Quarter and enroll in PUBLPOL 310 during a quarter of their choosing. The 5 units may be spread over multiple quarters, and an 'N' (continuing course) grade is given during any quarters prior to Spring. The thesis must be submitted to the Public Policy Program office in both electronic and printed form no later than the last Friday in May. The final grade for PUBLPOL 310 Master of Arts Thesis is determined solely by the thesis adviser.

M.P.P. and M.A. Degree Requirements

1. All graduate degree candidates must submit a Master's Degree Program Proposal to the Public Policy office by the end of Autumn Quarter and must amend this proposal formally if plans for meeting the degree requirements change.
2. Public Policy students are never required to repeat a course which duplicates material they have already mastered. Students may, by petition, substitute a different course for a core requirement whose material would be duplicative. This flexibility does not reduce the unit requirements for any degree.
3. M.P.P. degree students are not permitted to enroll in PUBLPOL 309 Practicum, without having completed the following Core Courses: PUBLPOL 301A Microeconomics, PUBLPOL 301B Cost-Benefit Analysis and Evaluation, PUBLPOL 303A Political Methodology I or ECON 102A Introduction to Statistical Methods (Postcalculus) for Social Scientists, PUBLPOL 303B Political Methodology II, and PUBLPOL 306 Writing and Rhetoric for Policy Audiences.

Public Policy Joint Degree Requirements

1. A joint degree is regarded by the University as distinct from either of its component degrees, and requirements for the joint degree generally differ from the sum of the requirements for the individual degrees.
2. Up to a maximum of 45 units, or one year, of the University residency requirement can be credited toward both graduate degree programs (i.e., the joint degree requirements may contain up to 45 units less than the sum of the individual degree unit requirements). For example, a J.D./M.P.P. has a four-year residency requirement, one year less than the sum of the requirements for the separate degrees. This recognizes that there is a subject matter overlap between the fields comprising the joint degree.
3. The Public Policy Program strives to encourage an intellectual, professional, and social community among its students. For this reason, joint degree students are expected to devote one year of full-time study at Stanford (usually the second) entirely to the Public Policy Program, rather than spacing Public Policy courses throughout their graduate careers. Unavoidable scheduling conflicts involving joint degree students may be mitigated by substitution of equivalent courses approved in advance by petition.

4. Joint degree students are expected to have and to consult regularly with an academic adviser. The adviser is generally a member of the faculty of both degree programs. The program director is available to make adviser recommendations.
5. In order to take advantage of the reduced residency requirement, joint M.P.P. students must define their area of concentration from among courses offered in their non-Public Policy program. Students wishing to concentrate in another field should apply for a dual, rather than a joint, M.P.P. degree.

Director: Bruce M. Owen (Stanford Institute for Economic Policy Research)

Deputy Director: Gregory L. Rosston (Stanford Institute for Economic Policy Research)

Associate Director and Senior Lecturer: Geoffrey Rothwell (Economics, Public Policy)

Director of Undergraduate Capstone Program and Senior Lecturer: Mary Sprague (Public Policy)

Director of Graduate Practicum Program and Professor of the Practice of Public Policy: Joe Nation (Public Policy)

Executive Committee: Laurence Baker (Medicine), Jonathan Bendor (Graduate School of Business), David Brady (Political Science, Hoover Institution, Graduate School of Business, SIEPR), Samuel Chiu (Management Science and Engineering), Joshua Cohen (Political Science, Philosophy, Law), Morris Fiorina (Political Science, Hoover Institution), David Kennedy (History, emeritus), David Grusky (Sociology), Eric Hanushek (Hoover Institution, SIEPR), Deborah Hensler (Law), Jonathan Levin (Economics), Roger Noll (Economics, emeritus, SIEPR), Bruce Owen (SIEPR), Madhav Rajan (Graduate School of Business), Sean Reardon (Education), Lee Ross (Psychology), Gregory Rosston (SIEPR), Debra Satz (Philosophy), John Shoven (SIEPR, Economics), Kathryn Stoner-Weiss (Freeman Spogli Institute for International Studies)

Affiliated Faculty: William Abrams (Human Biology), Jonathan Bendor (Graduate School of Business), Eric Bettinger (Education), Jayanta Bhattacharya (Medicine), Coit Blacker (Freeman Spogli Institute for International Studies), Lisa Blaydes (Political Science), Adam Bonica (Political Science), Michael J. Boskin (Economics, Hoover Institution), Milana Boukham (Medicine), Paul Brest (Law, emeritus), Jeremy Bulow (Graduate School of Business), M. Kate Bundorf (Medicine), Eamonn Callan (Education), Martin Carnoy (Education), John Cogan (Hoover Institution), Geoffrey Cohen (Psychology), Joshua Cohen (Political Science, Philosophy, Law), Gary Cox (Political Science), Larry Diamond (Freeman Spogli Institute for International Studies, Hoover Institution), Walter Falcon (Freeman Spogli Institute for International Studies, emeritus), Lawrence Friedman (Law), Lawrence Goulder (Economics, Freeman Spogli Institute for International Studies), Stephen Haber (Political Science, Hoover Institution), Deborah Hensler (Law), Pamela Hinds (Management Science and Engineering), Daniel Ho (Law), Nicholas Hope (Stanford Center for International Development), Caroline Hoxby (Economics, Hoover Institution, SIEPR), Jakub Kastl (Economics), Daniel Kessler (Law, Hoover Institution, Graduate School of Business), Pete Klenow (Economics), Stephen Krasner (Political Science, Freeman Spogli Institute for International Studies, Hoover Institution), Jon A. Krosnick (Communication), Mark Lemley (Law), Thomas MacCurdy (Economics, Hoover Institution), Robert McGinn (Management Science and Engineering; Science, Technology and Society), Milbrey McLaughlin (Education), Terry Moe (Political Science, Hoover Institution), Petra Moser (Economics), Joan Petersilia (Law), James Phills (Graduate School of Business), A. Mitchell Polinsky (Law), Walter Powell (Education), Robert Reich (Political Science), Lee Ross (Psychology), Ken Shotts (Graduate School of Business), Stephan Stedman (Freeman Spogli Institute for International Studies), Jeff Strnad (Law), Barton Thompson (Law, Woods Institute, Freeman Spogli Institute for International Studies), Michael Tomz (Political Science, SIEPR), Michael Wald (Law), Greg Walton

(Psychology), Jonathan Wand (Political Science), Barry Weingast (Political Science, Hoover Institution), Robert M. White (Materials Science and Engineering), Frank Wolak (Economics, Freeman Spogli Institute for International Studies)

Lecturers: Laura Arrillaga-Andreessen (Graduate School of Business), Tanya Beder (Law), Frank Benest (Public Policy), David Crane (Public Policy), Tammy Frisby (Hoover Institution, Political Science), Dennis Gale (Urban Studies), Jonathan D. Greenberg (Law), Russell Hancock (Public Policy), Adrienne Jamieson (Bing Stanford in Washington), Anjini Kochar (SIEPR), Eva Meyersson Milgrom (SIEPR, Sociology), Alyssa O'Brien (Program in Writing and Rhetoric), Mark Tendall (Economics)

Overseas Studies Courses in Public Policy

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/publicpolicy/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/publicpolicy/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/publicpolicy/http://bosp.stanford.edu>).

		Units
OSPCTWN 31	Theory and Politics of Foreign Aid	3
OSPFLOR 78	An Extraordinary Experiment: Politics and Policies of the New European Union	5
OSPFLOR 85	Bioethics: Between Human Rights, Responsibility, and Care Ethics	4

OSPSANTG 71	Santiago: Urban Planning, Public Policy, and the Built Environment	4-5
OSPSANTG 119X	The Chilean Economy: History, International Relations, and Development Strategies	5

Religious Studies

Courses offered by the Department of Religious Studies are listed under the subject code RELIGST on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=RELIGST&filter=>

catalognumber-RELIGST=on) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=RELIGST&filter-catalognumber-RELIGST=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=RELIGST&filter-catalognumber-RELIGST=on>).

Mission of the Department

The field of Religious Studies brings a variety of disciplinary perspectives to bear on the phenomena of religion for the purpose of understanding and interpreting the history, literature, thought, social structures, and practices of the religious traditions of the world. Comprised of a dozen regular faculty with particular strengths in the study of Buddhism, Christianity, Islam, and Judaism, it enrolls about thirty graduate students (mostly doctoral) and roughly as many undergraduate majors, minors, and joint majors.

Religious Studies works closely with several related programs at Stanford: the Department of Philosophy, with which it offers a joint undergraduate major; the Ho Center for Buddhist Studies; the Taube Center for Jewish Studies; the Abbasi Program in Islamic Studies; the McCoy Center for Ethics in Society; and the Center for Medieval and Early Modern Studies.

While some undergraduates continue their study of religion in a graduate or professional program, most pursue meaningful and successful careers in business, government, the nonprofit sector, and medicine. In this respect, Religious Studies is an ideal interdisciplinary major in the liberal arts. Graduates of the department's doctoral program generally pursue academic careers and are routinely placed in the best universities and colleges in the country.

Undergraduate Programs in Religious Studies

The department offers a Bachelor of Arts major, minor, and honors program in Religious Studies, and a joint major with the Philosophy Department in Religious Studies and Philosophy. Undergraduate courses in Religious Studies are designed to engage students existentially and to assist them in thinking about intellectual, ethical, and sociopolitical issues in the world's religions. The department's faculty seek to provide tools for understanding the complex encounters among religious ideas, practices, and communities, and the past and present cultures that have shaped and been shaped by religion. Courses therefore expose students to: leading concepts in the field of religious studies such as god(s), sacrifice, ritual, scripture, prophecy, and priesthood; approaches developed over the past century, including the anthropological, historical, psychological, philosophical, and phenomenological, that open religion to closer inspection and analysis; and major questions, themes, developments, features, and figures in the world's religious traditions. The department encourages and supports the acquisition of languages needed for engagement with sacred texts and interpretive traditions as well as study abroad at Stanford's overseas centers where religions can be observed and experienced in the culture of their origin.

Major in Religious Studies and Philosophy

The departments of Religious Studies and Philosophy jointly nominate for the B.A. in Religious Studies and Philosophy those students who have completed a major in the two disciplines. See a description of this joint major in the "Philosophy (p.)" section of this bulletin, or in the guidelines available from the undergraduate director of either department.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. understanding of the subject matter of and methods used in the study of religion.
2. skill in reading and interpreting religious texts critically.
3. ability to conduct and present research within the discipline.

Graduate Programs in Religious Studies

The graduate mission of the department is to provide students with an interdisciplinary setting of study within which to focus on their respective areas of specialization. The department offers an M.A. and a Ph.D. degree in Religious Studies.

Learning Outcomes (Graduate)

Master's Program: The purpose of the Master's program is to develop knowledge and skills in Religious Studies. For some students this will serve as preparation for applications to Ph.D. programs. For others it will serve as a further capstone experience for their undergraduate program of study. The goals are achieved through the completion of courses, in the primary field as well as related areas, and experience with independent work and specialization. For some it will involve an optional Master's thesis.

Doctoral Program: The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Religious Studies. Through completion of advanced coursework and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Religious Studies and to interpret and present the results of such research through teaching and publication.

Bachelor of Arts in Religious Studies

Suggested Preparation for the Major

There is no prescribed route or prerequisite to the major; students typically find themselves majoring after taking courses in the department and becoming acquainted with department faculty. Students contemplating the major or joint major are invited to consult with the Director of Undergraduate Studies. The undergraduate student services associate in Building 70 can also field questions regarding the declaration procedure within the department.

Degree Requirements

The curriculum for majors is designed to move students sequentially from foundational courses, through deeper investigations, culminating in integrative research courses. Thus, the introductory sequence is designed to lead to courses which build on this foundation with topics including:

particular traditions such as Judaism or Buddhism; comparative studies such as nonviolence in Hinduism and Buddhism, or Muslim and Christian interpretations of scripture; specific topics such as mysticism, gender and religion, or theodicy; and distinctive approaches such as the philosophy of religion or ritual studies. Majors complete their careers with integrative courses that afford opportunity for research and consolidation of the knowledge and skills gained earlier.

A Bachelor of Arts in Religious Studies requires 60 units of course work. At least 44 units are to be taken in courses numbered above 100. Ten units out of the 60 may be taken for the grade of CR/NC.

Required Courses

- At least 8 of the 60 units must be courses at the introductory level. Students may satisfy this requirement from any courses in the following categories:
 - Religious Studies Thinking Matters courses.
 - Prior IHUM courses (Winter/Spring sequence) in Religious Studies, e.g., IHUM 73A,B: Ultimate Meanings. IHUM courses are no longer offered.
 - Introduction to religious traditions (courses numbered 11-50).
 - Introductory topics in the study of religion (courses numbered 51-99).
 - Introductory Seminars in Religious Studies.
- At least 29 units are to be taken in intermediate lecture and seminar courses numbered 100-289. Of these, at least two seminars are required from courses numbered above 200. With approval of the Undergraduate Director, language courses related to the student's program of study (such as Arabic, Biblical Hebrew, New Testament Greek, Chinese, or Japanese), but not counted towards the University language requirement, may be counted among these 29 units.
- 15 units in integrative courses:

Units

Majors' Seminar (5)

RELIGST 290	Majors Seminar (Winter Quarter of junior year; fulfills WIM requirement; letter grade only)	5
-------------	---	---

Senior Essay or Honors Thesis Research (3-5)

RELIGST 297	Senior Essay/Honors Essay Research (minimum 5 units; up to 10 units over two quarters; graded 'N' until completion of essay or thesis)	3-5
-------------	--	-----

Senior Majors' Colloquium (5)

RELIGST 298	Senior Colloquium (Spring Quarter; grading option S/NC)	5
-------------	---	---

Completion of either a senior essay or honors thesis. (0)

See below concerning the difference between these options.

- Each student, in consultation with his/her adviser, works out a focus of study centering either on a particular religious tradition or on a theme or problem that cuts across traditions such as ritual, ethics, scripture, or gender.
- Students focusing on one religious tradition must take at least 8 units in one or more religious traditions outside their concentration.

Senior Essay

A 25-30 page essay on a topic chosen by the student and approved by the adviser upon receipt of a student's proposal by the end of the third quarter prior to expected graduation. The character and content of the essay, which is meant to allow the student to call into play knowledge and skills learned in the course of the major, may take several forms. For example, a student may return to a subject studied earlier but now pursued in more depth or from a new perspective, research a recent or new topic of interest in the field, or offer a carefully framed critical assessment of what has been

learned in the major based on review of influential sources, theories, and methods of studying religion. The senior essay is read and graded by the student's adviser and one other member of the Religious Studies faculty.

Honors Thesis

A 40-80 page research paper on a topic chosen by the student and approved by the adviser upon receipt of a proposal in the fourth quarter prior to expected graduation. The paper, supported by mastery of primary and secondary scholarship, advances a well-reasoned, supportable thesis. Writers of honors theses must have a grade point average (GPA) of 3.5 in Religious Studies courses, and at least 3.2 overall, and are expected to have already demonstrated success in writing research papers. The honors thesis is read and graded by the student's adviser and one other member of the Religious Studies faculty. Theses earning a grade of 'B+' or above receive honors.

Minor in Religious Studies

A Religious Studies minor is a complement to many majors throughout the University. Students contemplating the minor are invited to consult with the Director of Undergraduate Studies. The undergraduate student services associate in Bldg. 70 can also field questions regarding the declaration procedure within the department.

Degree Requirements

A minor in Religious Studies requires a minimum of 30 graded units. Students are encouraged to focus their program of study either in a religious tradition or in a theme that cuts across traditions. In consultation with their advisors, students may design the minor in Religious Studies to complement their major. The minor must be declared no later than the last day of the quarter, two quarters before degree conferral.

Required Courses for the Minor

- Two introductory courses. Students may satisfy this requirement from any courses in the following categories:
 - Religious Studies Thinking Matters courses.
 - Prior IHUM courses (Winter/Spring sequence) in Religious Studies, e.g. 73A,B: Ultimate Meanings. IHUM courses are no longer offered.
 - Introduction to religious traditions (courses numbered 11-50).
 - Introductory topics in the study of religion (courses numbered 51-99).
 - Introductory Seminars in Religious Studies.
- At least 22 units in courses at the intermediate and advanced level (above 100), including at least one 200-level seminar.
- Diversity requirement: Students may not take all courses in one religious tradition.
- One course in directed reading (RELIGST 199 Individual Work) may count towards the minor.
- With approval of the Undergraduate Director, one language course related to the student's program of study (such as Arabic, Biblical Hebrew, New Testament Greek, Chinese, or Japanese), but not counted towards the University language requirement, may be counted toward the minor.
- Courses from other departments may not count towards the minor. (Exception: language courses covered by point 5.)

Master of Arts in Religious Studies

University requirements for the M.A. are described in the "Graduate Degrees (p. 38)" section of this bulletin. The department offers a one-year terminal M.A. program. Students can also earn their M.A. degree as part of their coterminal degree program. The M.A. program serves two groups of students: a) those who wish to prepare for a doctoral program in religious studies and b) those who wish to further deepen their knowledge in an area in which they have acquired some expertise during their undergraduate work.

Degree Requirements

The following requirements are in addition to the University's basic requirements.

The student completes at least 45 units of graduate work at Stanford beyond the B.A. degree, including:

	Units
Select one of the following:	
RELIGST 290 Majors Seminar	
RELIGST 304A Theories and Methods (with consent of instructor)	
RELIGST 304B Theories and Methods (with consent of instructor)	

Residence may be completed by three quarters of full-time work or the equivalent.

The student's plan of courses is subject to approval by the Graduate Director. No field of specialization is expected, but students may focus work in particular areas. Advanced and graduate courses in other departments may be taken (see below). No thesis is required; a thesis, if elected, may count for as many as 9 units.

Each student demonstrates reading knowledge of at least one foreign language.

Doctor of Philosophy in Religious Studies

University requirements for the Ph.D. are described in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin. The Ph.D. in Religious Studies signifies special knowledge of an interdisciplinary field of study and potential mastery of an area of specialization within it. The faculty of the department have established certain fields of study in which the department's strengths and those of other Stanford departments cohere. They are: Buddhist studies, Islamic studies, Jewish studies, and modern religious thought, ethics, and philosophy. Students who wish to specialize in other fields must obtain early approval by the faculty. Each of these areas of specialization follows a shared structure of study.

Degree Requirements

The following requirements are in addition to the University's basic requirements.

1. Residence

Each student completes three years (nine quarters) of full-time study, or the equivalent, in graduate work beyond the B.A. degree, and a minimum of 135 units of graduate course work (excluding the dissertation).

2. Required Courses

The 135 units of graduate course work must include the following:

		Units
A.		
RELIGST 304A	Theories and Methods	4
RELIGST 304B	Theories and Methods	4
RELIGST 391	Teaching Religious Studies	3
RELIGST 399	Recent Works in Religious Studies	1-2
B.	Two courses in an area outside the student's field.	
C.	The remainder of the course work is individually designed, in consultation with the advisor.	

3. Languages

Each student demonstrates a reading knowledge of two foreign languages, including French or German. One of those language requirements should be fulfilled by the time of advancing to candidacy at the end of the second year. Competence in the second language must be demonstrated at the time of the qualifying examination. Each student also demonstrates reading knowledge of other ancient or modern languages necessary for the field of study, area of specialization, and dissertation topic.

4. Candidacy

At the end of each academic year, the department's faculty recommend second-year students for candidacy on the basis of all relevant information, and especially on the student's candidacy dossier that includes the approved declaration of an area of specialization, certification for one foreign language, and two substantial papers written for courses during the previous two years. Students are required to take RELIGST 391 Teaching Religious Studies and RELIGST 399 Recent Works in Religious Studies prior to candidacy.

5. Paper-in-Field

During the third year, under the supervision of their advisors, students prepare a paper suitable for submission to an academic journal in their field. The paper is read and approved by at least two faculty members in the department. Students are encouraged to register for RELIGST 392 Paper in the Field while working on the paper.

6. Teaching Internship

At least one teaching internship under the supervision of faculty members is undertaken at a time negotiated with the Graduate Director. Students receive academic credit for the required internship, which is a part of academic training and not of employment.

7. Qualifying Examination

To qualify for writing a dissertation, the student must pass a comprehensive examination in the chosen field and the area of specialization, typically during the first quarter of their fourth year. The student must complete the second language requirement before taking the qualifying examination. The qualifying examination is normally conducted by a committee of at least three Academic Council members of the department, one of whom is the advisor. One faculty member may be from outside the department with permission of the Director of Graduate Studies.

8. Dissertation

The dissertation contributes to the humanistic study of religion and is written under the direction of the candidate's dissertation advisor and at least two other members of the Academic Council. The University Oral examination is a defense of a completed draft of the dissertation.

- A. Dissertation Committee—The dissertation committee is formed after successful completion of the qualifying examinations. It is normally composed of the dissertation advisor and at least two Academic Council members of the Religious Studies department. One non-departmental faculty member may serve as a reader when approved by the Director of Graduate Studies.
- B. Dissertation Proposal—Candidates submit their dissertation proposal in consultation with their advisors. It is read and approved by the three members of the dissertation committee.

9. University Oral Examination

This examination, required by the University of Ph.D. students, is a defense of a completed draft of the dissertation. The composition of the examination committee is set by University regulation: five or more faculty, normally all of whom are members of the Academic Council, one of whom must be outside the department to serve as chair of the committee. Normally, the examining committee includes all members of the dissertation committee.

Ph.D. Minor in Religious Studies

Candidates for the Ph.D. in other departments may select a Ph.D. minor in Religious Studies.

Degree Requirements

The minor requires at least 24 units in Religious Studies at the 200 level or above. Four of the 24 units should be in:

	Units
RELIGST 304A Theories and Methods	4
RELIGST 304B Theories and Methods	4

Optional Courses for the Minor

The student should choose any of the courses offered in the department at the 200 level or above, for the equivalent of at least 24 units. Other courses can be chosen in consultation with the Graduate Director.

Emeriti: (Professors) Arnold Eisen, Bernard Faure, Edwin M. Good, Robert C. Gregg, Van Harvey, David S. Nivison, René Girard (Courtesy Professor)

Chair: Hester G. Gelber

Director of Graduate Study: Shahzad Bashir

Director of Undergraduate Study: Steven Weitzman

Professors: Carl W. Bielefeldt, Shahzad Bashir, Hester G. Gelber, Paul Harrison, John Kieschnick, Thomas Sheehan, Steven Weitzman, Lee Yearley

Associate Professors: Charlotte Fonrobert, Brent Sockness (on leave)

Assistant Professors: Kathryn Gin Lum, Behnam Sadeghi

Senior Lecturers: Linda Hess, Barbara Pitkin

Lecturers: Kirsti Copeland, Ozgen Felek, Irene Lin, Bulbul Tiwari, Yuhua S.-D. Vevaina

Visiting Professors: Paul Crowley, Luis Gomez

Courtesy Associate Professor: Ari Y. Kelman

Affiliated Faculty: Vincent Barletta (Iberian and Latin American Cultures), Jean-Pierre Dupuy (French and Italian)

Cognate Courses

The following courses in other departments/programs have been approved by the Chair as fulfilling requirement 2 (<http://exploreddegrees.stanford.edu/religiousstudies/#bachelorstext-bachartsrelistud-degreq>) for the bachelor's degree.

	Units
CLASSGEN 18 Greek Mythology	3-5
POLISCI 149S Islam, Iran, and the West	5

Overseas Studies Courses in Religious Studies

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/religiousstudies/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/religiousstudies/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/religiousstudies/http://bosp.stanford.edu>).

	Units
OSPKYOTO Religion and Japanese Culture	4-5
OSPMADRD 74 Islam in Spain and Europe: 1300 Years of Contact	5
OSPMADRD 75 Sefarad: The Jewish Community in Spain	5

Russian, East European and Eurasian Studies

Courses offered by the Center for Russian, East European and Eurasian Studies are listed under the subject code REES on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=REES&filter-catalognumber-REES=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=REES&filter-catalognumber-REES=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=REES&filter-catalognumber-REES=on>).

The Center for Russian, East European and Eurasian Studies (CREES) coordinates the University's teaching, research, and extracurricular activities related to Russia, Eastern Europe, Central Asia, and the Caucasus and administers a one-year interdisciplinary M.A. graduate degree program. Information on the center's degree programs and other activities is available at the CREES (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/russianeasteuropeanandeurasianstudies/>).

<http://CREEES.stanford.edu>) web site. CREEES and its degree programs are directed by the CREEES Steering Committee, composed of faculty members associated with the Center. The program draws on the strengths of nationally recognized area faculty and research affiliates and significant library and archival collections at Stanford. The Center is a U.S. Department of Education Title VI National Resource Center for Russia, East Europe, and Eurasia.

Undergraduate Programs in Russian, East European and Eurasian Studies

Students interested in a minor should consult the Director of Undergraduate Studies in the Department of Slavic Languages and Literatures which offers the following relevant minors:

- Russian, East European and Eurasian Studies
- Russian Language
- Russian Language, Literature and Culture
- Russian Culture

Slavic Theme House

Slavianskii Dom (SlavDom), at 650 Mayfield Avenue, is an undergraduate residence which houses 50 students and offers a wide variety of opportunities to expand knowledge, understanding and appreciation of Russia and the nations of East Europe, the Caucasus and Central Asia.

Overseas Studies Programs

Undergraduates interested in the study of languages, history, culture and social organization of the countries of Russia, Eurasia and East Europe may apply to study at the Stanford centers in Moscow and Berlin. Information about these programs is available at the Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/russianeasteuropeanandeurasianstudies/http://bosp.stanford.edu>) at web site.

Graduate Programs in Russian, East European and Eurasian Studies

The center offers an M.A. in Russian, East European and Eurasian Studies. The center also offers a coterminal M.A. in Russian, East European and Eurasian Studies.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Russian, East European and Eurasian Studies and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

Financial Aid

Subject to funding, CREEES may have a limited number of Foreign Language and Area Studies (FLAS) fellowships for U.S. citizens or permanent residents. Additional financial aid may also be available from CREEES. Applicants to the M.A. program have priority in the annual FLAS competition; in recent years CREEES has also awarded FLAS fellowships to students enrolled in the School of Education and the School of Law.

Consult the CREEES associate director for further information about the application and award process. Applications for FLAS fellowships can be obtained at the CREEES (<http://CREEES.stanford.edu/grants>) web site.

Doctoral Programs

Since the University does not offer a Ph.D. in Russian, East European and Eurasian Studies, students wishing to pursue a REEES-related doctoral program must apply to one of the departments offering a Ph.D. with an emphasis on Russia, Eurasia, or Eastern Europe, such as the departments of History, Anthropology, Political Science, or Slavic Languages and Literatures.

Undergraduate Minor in Russian, East European, and Eurasian Studies

The Center for Russian, East European and Eurasian Studies no longer offers an undergraduate minor.

Students interested in a minor should consult the "Minors in Slavic Languages and Literatures (p. 546)" section of this bulletin which describes the following relevant minors:

- Russian, East European, and Eurasian Studies
- Russian Language
- Russian Language, Literature, and Culture
- Russian Culture

Master of Arts in Russian, East European and Eurasian Studies

CREEES offers a one-year interdisciplinary master's degree program in Russian, East European and Eurasian Studies for students with a strong prior language and area studies background. The program structure allows students the flexibility to pursue their particular academic interests, while providing intellectual cohesion through a required core curriculum that addresses historical and contemporary processes of change in the Russian Federation, Eastern Europe, the Caucasus, and Central Asia. This core curriculum consists of three core courses (one each quarter) and the REES 200 core seminar series (autumn and spring only). The program may be taken separately or coterminal with a B.A. degree program. The interdisciplinary M.A. program typically serves four types of students:

1. Those who intend to pursue careers and/or advanced degrees in such fields as business, education, government, journalism, medicine, or law, and who wish to establish competence in Russian, East European and Eurasian studies.
2. Those who are mid-career and wish to gain competence in Russian, East European and Eurasian studies.
3. Those who intend to apply to a Ph.D. program involving Russian, East European and Eurasian studies and who need to enhance their academic skills and credentials.
4. Those who are as yet undecided on a career but who wish to continue an interest in Russian, East European and Eurasian studies.

Advising

The advising structure is two-tiered: each M.A. candidate works with the CREEES associate director who advises on the program of course work and

monitors the student's progress toward completing the degree. Candidates are also assigned a faculty adviser from the Academic Council faculty, who provides intellectual and academic guidance.

Admission

Applicants apply electronically; see the Office of Graduate Admissions (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/russianeasteuropeanandeurasianstudies/http://gradadmissions.stanford.edu>) web site for a link to the electronic application and general information regarding graduate admission. In addition, prospective applicants may consult with the CREES associate director regarding the application process.

To qualify for admission to the program, the following apply:

1. Applicants must have earned a B.A. or B.S. degree, or the equivalent.
2. At least three years of college-level language study in Russian, an East European or Central Asian language is preferred. Candidates with fewer years of area language study will be considered.
3. Applicants must send official transcripts from all post-secondary institutions attended to Graduate Admissions, Office of the University Registrar.
4. All applicants must take the General Test of the Graduate Record Examination (GRE) and have the results sent to Graduate Admissions, Office of the University Registrar.
5. Applicants whose native language is not English and do not possess a U.S. bachelor's degree are expected to take the Test of English as a Foreign Language (TOEFL) and have the results sent to Graduate Admissions, Office of the University Registrar.
6. A one-page statement of purpose that explains how the program would advance the applicant's academic or career goals.
7. Applicants must include the following additional materials in their online application: a writing sample of 20 pages or less in English on an academic topic in Russian, East European, or Eurasian studies and a resume of college-level courses taken that are relevant to Russian, East European & Eurasian Studies, including language courses, with self-reported final grades. These additional materials may be uploaded as "Additional Materials" in a single file along with the application.

The deadline for submission of applications for admission and for financial aid is January 15, 2013. Admission is normally granted for Autumn Quarter, but requests for exceptions are considered.

The successful applicant generally demonstrates the following strengths: requisite foreign language study, significant course work in Russian, East European and Eurasian studies in multiple disciplines, outstanding grades in previous academic work, strong analytical writing skills, high GRE scores (particularly verbal and analytical writing), study or work experience in the region, strong letters of recommendation from faculty members in the Russian, East European, and Eurasian Studies field (one letter may be from a language instructor), and a persuasive statement of purpose explaining how the program would advance the applicant's academic and career goals.

Degree Requirements

Candidates for the M.A. degree must meet University requirements for an M.A. degree as described in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

The M.A. program in REEES can ordinarily be completed in one academic year by a well-prepared student; longer periods of study are permitted.

Requirements to complete the interdisciplinary M.A. degree are principally ones of distribution, with the exception of three required core courses and a core seminar, as described below. Each student, with the advice of the CREES associate director, selects courses according to the student's interests, needs, and goals.

All students in the M.A. REEES program must complete a minimum of 48 academic credit units within the following guidelines.

1. *Core courses:* Students must complete the following core courses in 2012-13.

		Units
REES 301	An Introduction to Russian, East European and Eurasian Studies	5
REES 320	State and Nation Building in Central Asia	5
SLAVIC 394	Russia: Literature, Film, Identity, Alterity	3-5
Total Units		13-15

2. *Core seminar series:* REES 200 is required of all students in the M.A. program in the autumn and spring quarters. (Students may attend but not enroll in REES 200 if they are taking 18 units or greater in a given academic quarter). The goal of this seminar series is to survey current methodological and substantive issues in Russian, East European and Eurasian studies, acquaint students with Stanford resources and faculty, and present professional development and career options.
3. *Interdisciplinary course work:* all courses (other than language courses and approved activity courses) must be taken on the graduate level (200-level or higher). Courses in Russian, East European and Eurasian studies must be completed and distributed among at least three disciplines. All course work applied to the 48-unit minimum must deal primarily with Russian, Eurasian, or East European studies.
4. *Language study:* students in the program are encouraged to study Russian or a language of Eastern Europe, Central Asia or the Caucasus. Credit towards the 48-unit minimum (maximum 4 units per quarter, 12 units total) is allowed for advanced language work.
5. Course work qualifying for the 48-unit minimum must have a letter grade of 'B' or higher. ('B-' does not count for degree credit, nor does 'CR'). Students may apply a maximum of three units of course work with a final grade of "S" to the 48-unit minimum from among the following courses only: REES 23, REES 35, REES 200 and/or HISTORY 299X.
6. All courses counting towards the 48-unit minimum must be approved by the CREES associate director, who ensures that planned course work satisfies requirements towards the degree. The CREES director and steering committee determine the requirements. Consult the CREES web site or the associate director for the complete and updated list of courses which may be taken toward the degree.
7. *Capstone requirement:* students must complete a capstone activity (research paper and/or research presentation) in consultation with the director, associate director, and/or affiliated faculty member.

Pre-approved courses for 2012-13

		Units
Choose from among the following:		
ARTHIST 208	Hagia Sophia	5
ARTHIST 209	Art and Religious Experience in Byzantium and Islam	5
ARTHIST 405	Art, Ekphrasis, and Music in Byzantium and Islam	5
FILMSTUD 345	Politics and Aesthetics in East European Cinema	4
HISTORY 221B	The Woman Question in Modern Russia	5
HISTORY 266C	The Cold War: An International History	5
HISTORY 299X	Preparing for International Field Work: Public Service or Research	1
HISTORY 307E	Totalitarianism	4-5
HISTORY 320G	Demons, Witches, and Priests: Religion and Popular Culture in Russia	4-5
HISTORY 322	Early Modern Russia in European Context	4-5

HISTORY 324C	Genocide and Humanitarian Intervention	3
HISTORY 327	East European Women and War in the 20th Century	4-5
HISTORY 328	Circles of Hell: Poland in World War II	5
HISTORY 382E	Jews, Christians and Muslims in the Ottoman World	4-5
HISTORY 384	The Ottoman Empire, 1300-1923	4-5
HISTORY 386C	Jews and the Russian Revolution	5
HISTORY 424A	The Soviet Civilization	4-5
HISTORY 424B	The Soviet Civilization, Part 2	4-5
POLISCI 215F	Nuclear Weapons and International Politics	5
POLISCI 243L	Politics of Economic Reform	5
REES 23	Issues in Global Health: Russia and Eastern Europe	1-2
REES 35	Films of Central Asia	1-2
REES 200	Current Issues in Russian, East European, and Eurasian Studies	1
REES 219	The Russian Economy	4-5
REES 247A	Folklore, Mythology, and Islam in Central Asia	3-5
SLAVIC 200	Proseminar in Literary Theory and Study of Russian Literature	3-5
SLAVIC 225	Readings in Russian Realism	3-5
SLAVIC 229	Poetry as System: Introduction to Theory and Practice of Russian Verse	3-4
SLAVIC 236	The Russian Long Take	3-5
SLAVIC 270	Pushkin's Golden Age	3-5
SLAVIC 311	Introduction to Old Church Slavic	2-4
SLAVIC 315	Isaac Babel and His Worlds	3-4
SLAVIC 327	Boris Pasternak and the Poetry of the Russian Avant Garde	4
SLAVIC 340	Russia's Castaway Classic: Andrei Platonov	3-5
SLAVIC 346	The Great Russian Novel: Theories of Time and Action	3-5
SLAVIC 347	Modern Russian Literature and Culture: The Age of War and Revolution	3-4
SLAVIC 379	Literature from Old Rus' and Medieval Russia	2-4
SLAVIC 387	Russian Poetry of the 18th and 19th Centuries	3-4
SLAVIC 395	Russian and East European Theater	3-5

Additional courses which may be counted for the M.A. degree (with approval) in 2012-13

		Units
ANTHRO 336A	The Posthumanistic Subject	3-5
ANTHRO 341	The Archaeology of Religious Crusading in Medieval Europe	5
ARTHIST 205A	Islamic Painting: Landscape, Body, Power	5
ARTHIST 347	The Visual Culture of Modernism and its Discontents	4
COMPLIT 222A	German Literature and Thought from 1900 to the Present: Wrestling with Modernity	3-5
COMPLIT 241B	Earthly and Heavenly Intoxication: Wine Imagery in Medieval Persian Poetry and Prose	3-5
COMPLIT 342	Alla Turca Love: Tales of Romance in Turkish Literature	3-5
FILMSTUD 300A	History of World Cinema I, 1895-1929	4
FILMSTUD 316	International Documentary	4
HISTORY 302E	The Great War	4-5

HISTORY 304G	War and Society	5
HISTORY 307B	Environment, Technology and Revolution in World History	4-5
HISTORY 307C	The Global Early Modern	4-5
HISTORY 308D	Pre-Modern Warfare	3-5
HISTORY 330K	Left, Right, and the Intellectual Life: Politics and Intellectuals in the Short Twentieth Century	5
HISTORY 333E	European Intellectual History: The Age of Grand Ideologies	4-5
HISTORY 391E	Maps, Borders, and Conflict in East Asia	4-5
IPS 210	The Politics of International Humanitarian Action	3-5
IPS 211	The Transition from War to Peace: Peacebuilding Strategies	3-5
IPS 213	International Mediation and Civil Wars	3-5
IPS 219	Intelligence and National Security	3-4
IPS 230	Democracy, Development, and the Rule of Law	5
IPS 241	International Security in a Changing World	5
IPS 250	International Conflict: Management and Resolution	3
IPS 264	Behind the Headlines: An Introduction to Contemporary South Asia	3-5
IPS 270	The Geopolitics of Energy	3-5
IPS 280	Transitional Justice, International Criminal Tribunals, and the International Criminal Court	3-5
IPS 314S	Decision Making in U.S. Foreign Policy	5
POLISCI 213S	A Post American Century? American Foreign Policy in a Multi-unipolar World	5
POLISCI 214G	International Political Economy and International Organizations: Theory and Practice	3-5
POLISCI 216E	International History and International Relations Theory	5
POLISCI 218S	Political Economy of International Trade and Investment	5
POLISCI 218T	Terrorism	5
SOC 309	Nations and Nationalism	4-5
SOMGEN 205	Human Trafficking: Historical, Legal, and Medical Perspectives	3

Other courses may be counted towards the M.A. by special arrangement with the instructor and the CREEES associate director.

A description of the M.A. program is also available on the web at the CREEES (<http://CREEES.stanford.edu/academic/graduate-masters.html>) web site and by request from the Center for Russian, East European and Eurasian Studies.

Coterminal Master's Program in Russian, East European, and Eurasian Studies

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (p. 36)" section of this bulletin. For University coterminal degree program rules and University application forms, see the Publications and Online Guides (<http://studentaffairs.stanford.edu/registrar/publications/#Coterm>) web site.

To qualify for a coterminal M.A. degree in Russian, East European, and Eurasian Studies, besides completing University requirements for the B.A. degree, a student must:

1. Submit a coterminal application for admission to the program no later than the quarter prior to the expected completion of the undergraduate degree, normally Winter Quarter prior to Spring Quarter graduation. Students with advanced placement and transfer credit must apply at least four quarters before the expected master's degree conferral date. The deadline for all coterminal applications to the M.A. program in Russian, East European, and Eurasian Studies is January 15, 2013.
2. Include in the application a program which outlines, by quarter, the schedule of courses the student plans to complete toward the M.A. degree. The student should seek the advice of the CREEES associate director in drafting this schedule. The application also should include:
 - A. a current Stanford transcript
 - B. a one-page statement of purpose
 - C. three letters of recommendation from Stanford faculty (one may be from a language instructor)
 - D. a writing sample of 20 pages or less in English on an academic topic in Russian, East European, or Eurasian Studies
3. Applicants must have a grade point average (GPA) of at least 3.0 (B). Coterminal applicants must take the general test of the Graduate Record Examination and have the results sent to Graduate Admissions, Office of the University Registrar.
4. Complete 15 full-time quarters or the equivalent, or three quarters in full-time residence after completing 180 units; and complete, in addition to the 180 units required for the bachelor's degree, a minimum of 48 units for the master's degree.

The same courses may not be counted to meet both undergraduate and graduate requirements, and no courses taken before the junior year may be used to meet the course requirements for the master's degree.

Director of the Center: Robert Crews

Associate Director: Robert Wessling

Lecturers: Jack Kollmann, Boris Kuznetsov

Affiliated Faculty and Staff:

Anthropology: Ewa Domanska, Alma Kunanbaeva

Art and Art History: Bissera Pentcheva, Pavle Levi (Film Studies)

Bing Overseas Studies: Alexander Abashkin

Biology: Dmitri Petrov

Comparative Literature: Dominic Parviz Brookshaw, Burcu Karahan

Economics: Geoffrey Rothwell

Education, School of: Martin Carnoy, Mitchell Stevens

Engineering, School of: Margaret Brandeau, Siegfried Hecker, William Perry (emeritus)

English: Nancy Ruttenburg

Freeman Spogli Institute for International Studies: Coit Blacker, Chaim Braun, Christophe Crombez, Gail Lapidus (emerita), Kathryn Stoner-Weiss

Graduate School of Business: Iya Strebulaev

History: Robert Crews, Arie Dubnov, Terence Emmons (emeritus), David Holloway, Katherine Jolluck, Nancy Kollmann, Norman Naimark, Aron Rodrigue, Edith Sheffer, Amir Weiner, Ali Yaycioglu, Steven Zipperstein

Hoover Institute: Michael Bernstam, Robert Conquest (emeritus), Elena Danielson (emerita), John Dunlop (emeritus), Timothy Garton Ash, Paul Gregory, Kenneth Jowitt, Bertrand Patenaude, Robert Service, Anatol Shmelev, Maciej Siekierski

International Policy Studies: Eric Morris, Christine Joarth

International Relations: Jasmina Bojic

Language Center: Taulant Bacaj, Jara Dusatko, Shahla Fahimi, Rima Greenhill, Lessia Jarboe, Eugenia Khassina, Suzan Negip Schatt, Bisera Rakicevic, Eva Soos Szoke, Gerardina Malgorzata Szudelski

Law, School of: Allen Weiner

Linguistics: Vera Gribanova, Asya Pereltsvaig

Medicine, School of: Jayanta Bhattacharya, Grant Miller, Douglas Owens

Political Science: David Holloway, David Laitin, Michael McFaul (on leave), Condoleezza Rice, Patricia Young

Psychology: Lera Boroditsky

Religious Studies: Shahzad Bashir, Azim Nanji

Slavic Languages and Literatures: Lazar Fleishman, Joseph Frank (emeritus), Gregory Freidin, Monika Greenleaf, Gabriella Safran, Richard Schupbach (emeritus), Nariman Skakov

Sociology: Nancy Tuma (emerita), Xueguang Zhou

Stanford Humanities Center: Oksana Bulgakova, Harriet Murav

Stanford Libraries: Zachary Baker, John Eilts, Karen Rondestvedt, Wojciech Zalewski (emeritus)

Theater and Performance Studies: Branislav Jakovljevic

Science, Technology, and Society

Courses offered by the Program in Science, Technology, and Society are listed under the subject code STS on the (<https://explorecourses.stanford.edu/search?q=STS&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-STS=on&filter-catalognumber-STS=on>) ExploreCourses web site (<https://explorecourses.stanford.edu/search?q=STS&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-STS=on&filter-catalognumber-STS=on>).

Mission of the Undergraduate Program in Science, Technology, and Society

The Program in Science, Technology, and Society (STS) aims to provide students with an interdisciplinary framework through which to understand the complex interactions of science, technology and the social world. After working through a common core of courses drawn from the social sciences, the humanities, the natural and physical sciences and engineering, students pursue coursework in one of five specialized areas:

- Information Technology, Media and Society
- Innovation, Technology and Organizations
- Environment and Sustainability
- Life Sciences and Biotechnology
- Policy, Security and Technology

Students may also undertake research in affiliated laboratories and through the honors program. All students complete a capstone project, either by taking the senior capstone seminar (STS 200A, STS 200B, or STS 200C) or by applying for and completing an honors thesis. Students must demonstrate mastery in at least one field from within the humanities or social sciences and at least one field from within the sciences or engineering. Majors may declare either a B.A. or a B.S. degree (see the specific requirements for each degree).

The Program's affiliated faculty represent over a dozen departments, including Anthropology, Communication, Computer Science, Education, Electrical Engineering, History, Law, Management Science and Engineering, Political Science and Sociology. By learning to bring such a rich collection of disciplinary approaches to bear on questions of science and technology, students graduate uniquely equipped to succeed in professions that demand fluency with both technical and social frameworks. Recent graduates of STS have entered top-ranked Ph.D. and MBA programs and forged successful careers in a variety of fields, including business, engineering, law, public service, medicine and academia.

Learning Outcomes (Undergraduate)

The Program expects undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Program in Science, Technology, and Society. Students are expected to demonstrate:

1. a knowledge of core theories and methods in the interdisciplinary field of STS.
2. an ability to deploy these theories and methods to analyze interactions between science, technology and society in particular historical and cultural contexts.
3. an ability to critically evaluate empirical evidence and theoretical claims in STS-related debates.
4. an ability to communicate clearly and persuasively about STS issues to a general audience in multiple media including oral presentation and writing.

Advising and Course Selection

The Program in Science, Technology, and Society offers an advising process that includes faculty, staff and peer advisers. Prospective majors must first meet with a peer adviser and then with the Program's Student Services Officer to determine which degree they will pursue (the B.A. or B.S.) and how they will fulfill the Program's basic requirements. Majors are then assigned to a faculty adviser who helps them identify the core questions driving their interest in the field and to draw together a set of courses from the Program's list of offerings that help them pursue those questions most effectively. The Program also sponsors a wide variety of events designed to help students meet their colleagues and Program alumni, discover research and internship opportunities, and make their way toward the career of their choice.

STS Core

The program offers a Bachelor of Arts and Bachelor of Science in Science, Technology, and Society. Both degree programs require that the student complete the STS Core.

Units

Complete 8 courses satisfying the following requirements:

A. Interdisciplinary Foundational Course (5) ¹		
STS 1	The Public Life of Science and Technology	5

B. Disciplinary Analyses: six courses, with two in each area, and at least one of these courses must be a WIM course. (22-30)²

1. Social Scientific Perspectives ³	8-10
COMM 120W Digital Media in Society	
ANTHRO 90C Theory of Ecological and Environmental Anthropology	
COMM 1A Media Technologies, People, and Society	
COMM 1B Media, Culture, and Society	
COMM 120W Digital Media in Society	
POLISCI 110Y War and Peace in American Foreign Policy	
SOC 114 Economic Sociology	
SOC 126 Introduction to Social Networks	
2. Cultural and Historical Perspectives ⁴	8-10
ANTHRO 180 Science, Technology, and Gender	
HISTORY 140 World History of Science	
HISTORY 140A The Scientific Revolution	
HISTORY 144 History of Women and Gender in Science, Medicine and Engineering	
STS 112 Ten Things: An Archaeology of Design	
3. Scientific and Engineering Perspectives	6-10
CS 106A Programming Methodology	
CS 181W Computers, Ethics and Public Policy	
ME 214 Good Products, Bad Products	
MS&E 189 Social Networks - Theory, Methods, and Applications	
MS&E 193W Technology and National Security	
STS 110 Ethics and Public Policy	
STS 115 Ethical Issues in Engineering	
C. Senior Requirements (5-10)	5-10
STS 200A STS Senior Capstone	
or STS 200B STS Senior Capstone	
or STS 200C STS Senior Capstone	
STS 299 Advanced Individual Work	
Total Units	32-45

¹Students may use STS 101 or STS 101Q to fulfill this requirement if completed in 2011-12 or prior

² WIM courses: ANTHRO 90C, COMM 120W, HISTORY 140A, STS 110, CS 181, or MS&E 193

³EDUC 120X may be used to fulfill this requirement, but is not offered this year

⁴HISTORY 131 may be used to fulfill this requirement, but is not offered this year

Concentration

Minimum of 50 units, at least twelve courses, from among those designated on the appropriate concentration area course list (available in the Related Courses tab (p. 539) and on the STS website). All courses must be taken for a letter grade where offered and may not be double-counted with core coursework. Students may petition only one course outside the list of approved courses to count toward their STS degree plan. Thematic concentrations are organized around an STS-related problem or area:

1. Information Technology, Media, and Society

2. Innovation, Technology, and Organizations
3. Environment and Sustainability
4. Life Sciences and Biotechnology
5. Policy, Security, and Technology
6. Self-Designed Concentration

A student pursuing a Bachelor of Arts degree must take at least eight classes from the social science and/or humanities course menus and at least four classes must be from the science and engineering course menus in a single thematic concentration area. The science and engineering courses chosen should include at least two advanced courses.

A student pursuing a Bachelor of Science degree must take at least eight classes from the science and engineering course menus and at least four classes must be from the social science and/or humanities course menus in a single thematic concentration area. The science and engineering courses should include 2-3 sequences of courses that build on one another.

Alternatively, subject to program approval, a student may choose to design a self-designed concentration. Students interested in this option must submit a 5-page proposal in which they describe their self-designed concentration in detail, compare their proposed area to similar majors at Stanford and explain the rationale for why a self-designed concentration is the optimal way to pursue their academic interests. Students also need to identify a faculty mentor who will approve and oversee the self-designed concentration.

Each concentration, certified or self-designed, requires the signature of the STS Associate Director before it is approved.

Honors Program

The Stanford Program in Science, Technology, and Society (STS) invites STS majors to apply for admission to its Honors Program. The innovative research projects carried out by STS honors students since the program was launched in 1978 represent meaningful achievements for their authors and academic advisers. Honors projects have also served students well after graduation, providing a springboard for graduate studies and for careers in fields such as information technology, entrepreneurship, finance, public policy, media, education, law, medicine, and the nonprofit sector. Not only do honors students become experts in a specialized field of interest, but the honors designation signifies intellectual rigor and a demonstrated ability to pursue original research. These skills are broadly marketable even outside of the specific area of expertise, and serve individuals well upon graduating from college. An STS honors thesis tackles a significant problem or question related to a particular area of STS. To develop the thesis, students develop research methods drawn from one or more of the disciplines that shape STS, such as history, sociology, communication, anthropology, environmental science, computer programming/modeling, engineering, economics, political science, and art history. Past honors projects are on file in the STS office library.

Honors Program Eligibility and Admission Criteria

To be eligible to apply for the honors program at the end of junior year, students must meet the following criteria:

1. Find an honors faculty adviser and develop a research methodology and research plan
2. Be a current junior or rising senior and have declared STS as a major in Axess
3. Attend at least one of the STS workshops offered for prospective honors students

4. Finish all STS core course work by the end of Spring Quarter, junior year (not including STS 299 Advanced Individual Work)
5. Submit a complete honors program application and research proposal by the last day of classes, Spring quarter, junior year

For application and proposal parameters, see the document STS Honors Program, available on the STS web site.

Honors Degree Requirements

To graduate with honors, seniors in the honors program must meet the following criteria:

1. Develop an original and complete thesis in consultation with honors faculty adviser
2. Submit a first draft of thesis to honors adviser no later than April 1
3. Submit the final thesis to honors adviser by May 1
4. Earn at least a grade of 'B' on final thesis
5. Maintain an overall Stanford GPA of 3.4
6. Attend required quarterly workshops for STS honors students

STS is no longer admitting non-majors to the honors program. Non-majors currently enrolled should consult the Stanford Bulletin 2011-12 for degree requirements.

Minor in Science, Technology, and Society

The program no longer offers a minor. Students currently enrolled in the minor should consult the Stanford Bulletin 2011-12 (<http://www.stanford.edu/dept/registrar/bulletin1112/6074.htm>) for degree requirements.

STS Affiliated Faculty

Director and Associate Professor of Communication: Fred Turner

Associate Director: Kyoko Sato

Program Committee: Stephen Barley (Management Science and Engineering), Paula Findlen (History), Duana Fullwiley (Anthropology), Mark Granovetter (Sociology), Hank Greely (Law), Sarah Lochlann Jain (Anthropology), Robert McGinn (Management Science and Engineering), Brad Osgood (Electrical Engineering), Eric Roberts (Computer Science), Scott Sagan (Political Science), Fred Turner (Communication), John Willinsky (Education)

Affiliated Faculty and Staff: Jeremy Bailenson (Communication), Stephen Barley (Management Science and Engineering), Scott Bukatman (Art and Art History), Thomas Byers (Management Science and Engineering), Jean-Pierre Dupuy (French), Paula Findlen (History), Duana Fullwiley (Anthropology), Mark Granovetter, (Sociology), Hank Greely (Law), Martin Hellman (Electrical Engineering, Emeritus), Miyako Inoue (Anthropology), Sandra Soo-Jin Lee (Biomedical Ethics), Sarah Lochlann Jain (Anthropology), Pamela Lee (Art and Art History), Helen Longino (Philosophy), Henry Lowood (Stanford University Libraries), Robert McGinn (Management Science and Engineering), Thomas Mullaney (History), Clifford Nass (Communication), Brad Osgood (Electrical Engineering), Walter Powell (Education), Robert Proctor (History), Jessica Riskin (History), Eric Roberts (Computer Science), Scott Sagan (Political Science), Londa Schiebinger (History), Michael Shanks (Classics, Anthropology), Kyoko Sato (STS), Fred Turner (Communication), John Willinsky (Education), Gavin Wright (Economics)

Emeriti: James Adams (Management Science and Engineering, Mechanical Engineering), Barton Bernstein (History), Walter Vincenti (Aeronautics and Astronautics)

Overseas Studies Courses in Science, Technology, and Society

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/sciencetechnologyandsociety/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/sciencetechnologyandsociety/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/sciencetechnologyandsociety/http://bosp.stanford.edu>).

OSPMOSC 68	From Science to Market: Technical Innovation Policy in Post-Soviet Russia	5

Slavic Languages and Literatures

Courses offered by the Department of Slavic Languages and Literatures are listed on the Stanford Bulletin's ExploreCourses web site (<http://bulletin.stanford.edu>) under the subject codes SLAVIC (Slavic Studies) (<https://explorecourses.stanford.edu/search?q=SLAVIC&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-SLAVIC=on>), and SLAVLANG (Slavic Language) (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=SLAVLANG&filter-catalognumber-SLAVLANG=on>). (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=SLAVLIT&filter-catalognumber-SLAVLIT=on>)

The department supports coordinated study of Russian language, literature, literary and cultural history, theory, and criticism. The department's programs may also be combined with the programs in Russian, East European and Eurasian Studies, Jewish Studies, Film Studies, Drama,

International Relations, Stanford's Overseas Studies, and the Special Languages Program.

A full undergraduate program provides a choice of several tracks leading to a B.A. (with a major or a minor) or to a B.A. with Honors. The department offers a full graduate program leading to an M.A. in Russian and a Ph.D. in Slavic Languages and Literatures. Stanford undergraduates are eligible to apply to the department for a coterminal B.A./M.A. degree. Students in the department's Ph.D. program are required to choose among minor programs in other national literatures, linguistics, Russian, East European, and Eurasian Studies, Jewish Studies, art and music history, theater, or film studies; or they may design their own minor or choose the related field option.

The department runs a colloquium series, which brings distinguished speakers to Stanford; organizes international conferences and symposia; and since 1987 maintains a continuing publication series, Stanford Slavic Studies. Along with the Center for Russian, East European and Eurasian Studies, the department offers qualified undergraduates summer grants (on a competitive basis) for intensive Russian language instruction in accredited programs in Russia and the U.S.

Improving cultural understanding is a critical part of the department's mission, and the department offers a full range of courses at all levels devoted to Russian literature, music and visual arts that do not require specialized knowledge, as well as advanced research seminars for graduate students. The Slavic theme house, Slavianskii Dom, serves as an undergraduate residence for many students in the program and hosts program-related activities. Undergraduates may also choose to study in Moscow through the Stanford Overseas Studies Program. The undergraduate program has attracted students seeking careers in journalism, business, international relations, law, medicine, and human rights, as well as academia. Russian is still the lingua franca over the vast territory of the former Soviet Union, and a good command of this language offers a gateway to Eurasia's diverse cultures, ethnicities, economies, and religions.

Stanford students are in a privileged position in relation to Russian, East European and Eurasian Studies, because of Stanford's faculty resources that are without peer in the U.S. Green Library and the Hoover Institution libraries and archives hold the premier Russian and East European collections, which undergraduates and graduate students use in their research. Department students master a difficult language and a rich and challenging literature, and are rewarded by gaining entry into a unique, powerful, and diverse civilization that defined major trends in the past century and plays an increasingly significant role in the world today.

Mission of the Undergraduate Program in Slavic Languages and Literatures

The mission of the undergraduate program in Slavic Language and Literatures is to expose students to a variety of perspectives on Russian language, history, culture, literature, and philosophical thought. The program offers three tracks. Courses in the Russian Language and Literature track focus on the linguistic and philological study of literature, as well as the history of Russian literature. The Russian Language, Culture, and History track guides students through a comprehensive interdisciplinary study of Russian literature and culture in historic context. The Russian and Philosophy track provides students with a background in the Russian language and literary tradition with emphasis on philosophical thought.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. the ability to develop effective and nuanced lines of interpretation.
2. critical thinking skills using Russian literary materials.
3. analytical writing skills and close reading skills in Russian and English.
4. skills in active listening and productive communication.
5. a minimum of Intermediate High Oral Proficiency level (established through an OPI test) in Russian or another Slavic language.

Slavic Theme House

Slavianskii Dom, at 650 Mayfield Avenue, is an undergraduate residence that offers opportunities for students to expand their knowledge, understanding, and appreciation of Russia, Eastern Europe, and Eurasia. Assignment is made through the regular undergraduate housing draw.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Slavic Languages and Literatures and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Slavic Languages and Literatures. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Slavic Languages and Literatures and to interpret and present the results of such research.

Bachelor of Arts in Slavic Languages and Literatures

The major tracks in Russian Language and Literature and Russian Language, Culture, and History are declared on Axess and appear on the transcript but not on the diploma. The degree option in Russian and Philosophy is not declared on Axess and does not appear on the transcript or the diploma.

Writing in the Major

Undergraduates are required by the University to pass at least one writing-intensive course in their field of concentration in order to graduate. Majors in any Slavic track may satisfy the writing requirement in 2012-13 by passing SLAVIC 146 The Great Russian Novel: Theories of Time and Action.

Russian Language and Literature

The Russian Language and Literature field of study is designed for those students who wish to gain command of the Russian language and to study

the nation's literary tradition. Emphasis is placed on the linguistic and philological study of literature, as well as the history of Russian literature and related media in the broader context of Russian culture. This major also welcomes students with an interest in Russian and Slavic linguistics.

Majors who concentrate in Russian Language and Literature must earn a grade point average (GPA) of 2.0 (C) or better in order to receive credit toward the major.

Prerequisites

Completion of first year Russian, or the equivalent, as determined by the Language Center placement examination.

Degree Requirements

Candidates for the B.A. degree with a Russian Language and Literature field of study must complete an additional 56 units according to the following distribution:

Russian Language

A minimum of 12 units from:

	Units
SLAVLANG 111 Third-Year Russian, First Quarter	4
SLAVLANG 112 Third-Year Russian, Second Quarter	4
SLAVLANG 113 Third-Year Russian, Third Quarter	4
SLAVLANG 177 Fourth-Year Russian, First Quarter	3
SLAVLANG 178 Fourth-Year Russian, Second Quarter	3
SLAVLANG 179 Fourth-Year Russian, Third Quarter	3
SLAVLANG 181 Fifth-Year Russian, First Quarter	3
SLAVLANG 182 Fifth-Year Russian, Second Quarter	3
SLAVLANG 183 Fifth-Year Russian, Third Quarter	3

Russian Literature

The 20-unit core literature sequence consisting of:

	Units
SLAVIC 145 Age of Experiment: Russian Experiments in Short Fiction (1820-1905)	3-5
SLAVIC 146 The Great Russian Novel: Theories of Time and Action	3-5
SLAVIC 147 Modern Russian Literature and Culture: The Age of War and Revolution	3-5
or SLAVIC 148 Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin	
SLAVIC 188 20th century Russian Poetry: From Aleksandr Blok to Joseph Brodsky	3-5

Electives

Students must take 24 units of electives. These courses are chosen in consultation with the department's chair of undergraduate studies. With department consent, work in related academic fields may be applied toward the degree requirements. Students who have completed IHUM 28A/B. Poetic Justice: Order and Imagination in Russian Culture, or Thinking Matters Courses instructed by Slavic faculty, with a grade of 'B' or better may count these 10 units towards elective courses required for the major, as may students who have completed the SLE sequence.

Russian courses for 2012-13 include:

	Units
SLAVIC 179 Literature from Old Rus' and Medieval Russia	2-4
SLAVIC 181 Philosophy and Literature	5
SLAVIC 187 Russian Poetry of the 18th and 19th Centuries	3-4
SLAVIC 194 Russia: Literature, Film, Identity, Alterity	3-5

SLAVIC 195	Russian and East European Theater	3-5
SLAVIC 200	Proseminar in Literary Theory and Study of Russian Literature	3-5
SLAVIC 225	Readings in Russian Realism	3-5
SLAVIC 229	Poetry as System: Introduction to Theory and Practice of Russian Verse	3-4
SLAVIC 236	The Russian Long Take	3-5
SLAVIC 270	Pushkin's Golden Age	3-5

Capstone

Students must designate a 200-level course taken in their junior or senior year as a capstone course. Before graduation, skills in writing, textual analysis, and discussion will be evaluated by the Chair of Undergraduate Studies based on work submitted for the capstone course.

Russian Language, Culture, and History

The Russian Language, Culture, and History field of study is for students who want to obtain command of the Russian language and to pursue a broad, interdisciplinary study of Russian literature and culture in historical context. Emphasis is on the relation of the Russian literary tradition to other arts, including film, as well as the disciplines that have enriched the historical understanding of Russian literature: history, anthropology, art history, political science, and sociology. Majors in the Russian Language, Culture, and History must earn a GPA of 2.0 (C) or better in order to receive credit toward the major.

Prerequisites

Completion of first year Russian, or the equivalent, as determined by the Language Center placement examination.

Degree Requirements

Candidates for the B.A. degree with a Russian Language, Culture, and History field of study must complete an additional 56 units according to the following distribution.

Russian Language

A minimum of 12 units from:

	Units
SLAVLANG 111 Third-Year Russian, First Quarter	4
SLAVLANG 112 Third-Year Russian, Second Quarter	4
SLAVLANG 113 Third-Year Russian, Third Quarter	4
SLAVLANG 177 Fourth-Year Russian, First Quarter	3
SLAVLANG 178 Fourth-Year Russian, Second Quarter	3
SLAVLANG 179 Fourth-Year Russian, Third Quarter	3
SLAVLANG 181 Fifth-Year Russian, First Quarter	3
SLAVLANG 182 Fifth-Year Russian, Second Quarter	3
SLAVLANG 183 Fifth-Year Russian, Third Quarter	3

19th-Century Russian Literature and History

A minimum of 10 units chosen from the following courses or the equivalent; students must choose one course from Slavic and one course from History:

	Units
SLAVIC 145 Age of Experiment: Russian Experiments in Short Fiction (1820-1905)	3-5

or SLAVIC 146 The Great Russian Novel: Theories of Time and Action

A pre-revolutionary Russian history course. 2012-2013 course options are:

HISTORY 120B The Russian Empire

HISTORY 221A Men, Women, and Power in Early Modern Russia, 1500-1800

20th-Century Russian Literature and History

A minimum of 10 units chosen from the following or the equivalent; students must choose one course from Slavic and one course from History.

SLAVIC 147 Modern Russian Literature and Culture: The Age of War and Revolution 3-5

or SLAVIC 148 Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin

A post-revolutionary Russian history course. 2012-2013 course options are:

HISTORY 222 Honor, Law, and Modernity

HISTORY 223 Art and Ideas in Imperial Russia

HISTORY 227 East European Women and War in the 20th Century

HISTORY 228 Circles of Hell: Poland in World War II

Electives

Students must take 24 additional units of course work in Russian language, literature, history, or other fields, chosen in consultation with the Chair of Undergraduate Studies. Students who have completed IHUM 28A/B. Poetic Justice: Order and Imagination in Russian Culture, or Thinking Matters Courses instructed by Slavic faculty, with a grade of 'B' or better may count these 10 units towards elective courses required for the major, as may students who have completed the SLE sequence.

Russian courses for 2012-13 include:

		Units
SLAVIC 179	Literature from Old Rus' and Medieval Russia	2-4
SLAVIC 181	Philosophy and Literature	5
SLAVIC 187	Russian Poetry of the 18th and 19th Centuries	3-4
SLAVIC 194	Russia: Literature, Film, Identity, Alterity	3-5
SLAVIC 195	Russian and East European Theater	3-5
SLAVIC 200	Proseminar in Literary Theory and Study of Russian Literature	3-5
SLAVIC 225	Readings in Russian Realism	3-5
SLAVIC 229	Poetry as System: Introduction to Theory and Practice of Russian Verse	3-4
SLAVIC 236	The Russian Long Take	3-5
SLAVIC 270	Pushkin's Golden Age	3-5

Capstone

Students must designate a 200-level course taken in their junior or senior year as a capstone course. Before graduation, skills in writing, textual analysis, and discussion will be evaluated by the Chair of Undergraduate Studies based on work submitted for the capstone course.

Russian and Philosophy

The Russian and Philosophy option offers students the opportunity to gain a command of the Russian language and literary tradition, while gaining a background in philosophical thought, broadly construed. They take courses alongside students in other departments participating in the program in Philosophical and Literary Thought, administered through the DLCL. This option is not declared on Axess, thus it does not appear on the transcript or diploma. Majors who concentrate in Russian and Philosophy must earn a grade point average (GPA) of 2.0 (C) or better in order to receive credit toward the major.

Prerequisites

Completion of first year Russian, or the equivalent, as determined by the Language Center placement examination.

Degree Requirements

Candidates for the B.A. degree with a concentration in Russian and Philosophy must complete an additional 67 units according to the following distribution:

Russian Language

A minimum of 12 units from:

		Units
SLAVLANG 111	Third-Year Russian, First Quarter	4
SLAVLANG 112	Third-Year Russian, Second Quarter	4
SLAVLANG 113	Third-Year Russian, Third Quarter	4
SLAVLANG 177	Fourth-Year Russian, First Quarter	3
SLAVLANG 178	Fourth-Year Russian, Second Quarter	3
SLAVLANG 179	Fourth-Year Russian, Third Quarter	3
SLAVLANG 181	Fifth-Year Russian, First Quarter	3
SLAVLANG 182	Fifth-Year Russian, Second Quarter	3
SLAVLANG 183	Fifth-Year Russian, Third Quarter	3

Russian Literature

A minimum of 16 units of Russian literature, including the following:

		Units
SLAVIC 145	Age of Experiment: Russian Experiments in Short Fiction (1820-1905)	3-5
SLAVIC 146	The Great Russian Novel: Theories of Time and Action	3-5
or SLAVIC 148	Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin	
SLAVIC 147	Modern Russian Literature and Culture: The Age of War and Revolution	3-4
SLAVIC 188	20th century Russian Poetry: From Aleksandr Blok to Joseph Brodsky	3-5

Electives

At least 12 units of electives in Russian language and literature, chosen in consultation with the Chair of Undergraduate Studies.

Philosophy and Literature Gateway Course

		Units
SLAVIC 181	Philosophy and Literature	5

Philosophy Writing in the Major

	Units
PHIL 80 Mind, Matter, and Meaning (prerequisite: introductory philosophy course)	5

Philosophy Core

12 units, including the following:

	Units
A course in the PHIL 170 series (value theory)	4
A course in the PHIL 180 series (theories of the mind, language, action)	4
A course in PHIL 100-139 series (history of philosophy)	4

Related Course

An upper-division course of special relevance to philosophy and literature. A list of approved courses is available from the program director.

Capstone Seminar

One capstone seminar must be taken in the student's senior year. This year's capstone seminars are:

	Units
ENGLISH 117A Irony: From Socrates to David Foster Wallace	5
COMPLIT 199 Senior Seminar	3-5
COMPLIT 213A Martin Heidegger	3-5

Honors Program

Slavic majors with an overall grade point average (GPA) of 3.3 or above, and who maintain a 3.5 (GPA) in major courses, are eligible to participate in the DLCL's honors program. Prospective honors students must choose a senior thesis adviser from among their home department's regular faculty, in their junior year, preferably by March 1, but no later than May 1.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but display an enhanced comparative or theoretical scope. Quality rather than quantity is the key criterion. Honors theses range from 40-90 pages not including bibliography and notes.

During Spring Quarter of the junior year, a student interested in the honors program should consult with the Chair of Undergraduate Studies of their home department to submit a thesis proposal (2-5 pages), DLCL Honors application and an outline of planned course work for their senior year. During this quarter, students may enroll for 2 units in DLCL 189C Honors Thesis Seminar for the drafting or revision of the thesis proposal. The proposal is reviewed by the Chair of Undergraduate Studies and the Director of the department and will be approved or returned for submission.

Honors students are encouraged to participate in the honors college hosted by Bing Honors College (http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/OO_honors_BingHonors.html) and coordinated by the Division of Literatures, Cultures, and Languages. The honors college is offered at the end of the summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted through the Bing program. For more information, view the Bing Honors website.

In Autumn Quarter of the senior year, the students must enroll in DLCL 189A Honors Thesis Seminar, a 5 unit seminar that focuses on researching and writing the honors thesis. During Winter Quarter students then enroll for 5 units in DLCL 189B Honors Thesis Seminar while composing their thesis. Students who did not enroll in DLCL 189C Honors Thesis Seminar during their Spring Quarter junior year may do so in the Spring Quarter of their senior year while revising the thesis, if approved by the thesis

supervisor. A total of 10-12 units will be awarded for completion of honors course work, and the finished thesis. Honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15th of the terminal year. If an essay is found deserving of a grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

Minors in Slavic Languages and Literatures

The Department of Slavic Languages and Literatures offers three undergraduate minor options.

The minor is designed for students who, while pursuing a major in another program, seek a comprehensive introduction to Russian culture through Russian language courses, a combination of minimal proficiency in Russian and courses in the history of Russian culture, or a multidisciplinary introduction to Russian, East European, and Eurasian studies. Students seeking a Slavic minor are encouraged to take advantage of the Bing Overseas Studies Program in Moscow. Students who have chosen one of the minor programs in Russian may use 5 units IHUM 28A/B. Poetic Justice: Order and Imagination in Russian Culture, with a grade of 'B' or better towards their electives.

Minor in Russian Language

Prerequisites

The minor option in Russian Language requires completion of second year Russian, or the equivalent, as determined by the results of the Language Center placement examination.

Requirements

Candidates for the B.A. degree with a minor option in Russian Language must complete 24 units of Russian language and literature courses according to the following distribution:

12 to 15 units of Russian language:

	Units
SLAVLANG 111 Third-Year Russian, First Quarter	4
SLAVLANG 112 Third-Year Russian, Second Quarter	4
SLAVLANG 113 Third-Year Russian, Third Quarter	4
SLAVLANG 177 Fourth-Year Russian, First Quarter	3
SLAVLANG 178 Fourth-Year Russian, Second Quarter	3
SLAVLANG 179 Fourth-Year Russian, Third Quarter	3

The remaining 9-12 units should be chosen from:

	Units
SLAVIC 145 Age of Experiment: Russian Experiments in Short Fiction (1820-1905)	3-5
SLAVIC 146 The Great Russian Novel: Theories of Time and Action	3-5
SLAVIC 147 Modern Russian Literature and Culture: The Age of War and Revolution	3-4
SLAVIC 148 Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin	3-5
SLAVIC 187 Russian Poetry of the 18th and 19th Centuries	3-4
SLAVIC 188 20th century Russian Poetry: From Aleksandr Blok to Joseph Brodsky	3-5

Other courses offered within the Slavic Languages and Literatures department.

Or, with the approval of the department's Chair of Undergraduate Studies, courses in history, politics, linguistics, or other relevant programs.

Minor in Russian Language, Literature, and Culture

Prerequisites

The minor option in Russian Language, Literature, and Culture requires completion of first year Russian, or the equivalent, as determined by the results of the Language Center placement examination.

Requirements

Candidates for the B.A. degree with the minor option in Russian Language, Literature, and Culture must complete 28 units according to the following distribution:

A minimum of 16 units of courses on literature and culture including:

Units

Option 1:

Two courses from the following:

SLAVIC 145 Age of Experiment: Russian Experiments in Short Fiction (1820-1905)

SLAVIC 146 The Great Russian Novel: Theories of Time and Action

SLAVIC 147 Modern Russian Literature and Culture: The Age of War and Revolution

SLAVIC 148 Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin

Option 2:

One course from the following:

SLAVIC 145 Age of Experiment: Russian Experiments in Short Fiction (1820-1905)

SLAVIC 146 The Great Russian Novel: Theories of Time and Action

SLAVIC 147 Modern Russian Literature and Culture: The Age of War and Revolution

SLAVIC 148 Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin

and one course from the following:

SLAVIC 187 Russian Poetry of the 18th and 19th Centuries

SLAVIC 188 20th century Russian Poetry: From Aleksandr Blok to Joseph Brodsky

12 units of elective courses either in the Department of Slavic Languages and Literatures or, with the approval of the Slavic Department's Chair of Undergraduate Studies, in other relevant programs dealing with Russian culture, politics, society, and history.

Minor in Russian, East European, and Eurasian Studies

The minor in Russian, East European and Eurasian Studies offers students the opportunity to choose courses offered by the Center for Russian, East European and Eurasian Studies (subject code REES) in various departments for their minor.

Requirements

Candidates for the B.A. degree with the minor option in Russian, East European, and Eurasian Studies must complete 28 units according to the following distribution:

1. Two core courses: one on Russia and one on Eastern Europe or Eurasia, to be chosen by the student from an annual list of qualifying courses issued by CREEES for their M.A. students.
2. At least four additional REES courses, totaling at least 20 units.
3. The student's core and additional courses must include 9 units of course work in the Slavic Department, either literature courses or Russian language in the third year or above. Courses must be distributed among at least three disciplines, such as Slavic, History, Political Science, Anthropology, Art and Art History, Economics, Religious Studies, and Sociology. The Slavic Chair of Undergraduate Studies determines which courses qualify for the minor.
4. A capstone experience in CREEES, including, but not limited to, one of the following:
 - A. a departmental seminar course for advanced undergraduates.
 - B. directed reading and research with a Stanford faculty member or a CREEES-approved resident or visiting scholar.
 - C. participation in the Stanford Overseas Studies Program in Moscow or Berlin.

Foreign Language

The Slavic/REES minor has no language requirement, but students are strongly encouraged to attain working competence in Russian or another relevant language. Courses at the third-year level or above in Russian or another language of Central Asia, the Caucasus, or Eastern Europe may be counted towards the Slavic/REES minor, up to a maximum of 3 units per academic quarter, 9 units total.

Additional Information

Courses taken at Stanford overseas campuses in Moscow and Berlin may count towards the REES minor, with the approval of the Slavic Chair of Undergraduate Studies; at least three courses for the minor must be taken in residence at Stanford.

Students interested in pursuing the Slavic/REES minor should consult the Slavic Chair of Undergraduate Studies.

Minor in Modern Languages

The Division of Literatures, Cultures, and Languages offers a minor in Modern Languages. This minor draws on literature and language courses offered in this and other literature departments. See the "Literatures, Cultures, and Languages (<http://www.stanford.edu/dept/registrar/bulletin/6009.htm>)" section of this bulletin for further details about this minor and its requirements.

Coterminal Bachelor's and Master's Program in Slavic Languages and Literatures

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin.

The department allows a limited number of undergraduates to work for coterminal B.A. and M.A. degrees in Slavic Languages and Literatures with

a concentration in Russian. In addition to University requirements for the B.A. degree, the student must:

1. Submit an application for admission by January 31 of the senior year. Applicants must meet the same general standards as those seeking admission to the M.A. program. Applicants must submit: an application for admission; a written statement of purpose; a transcript; and three letters of recommendation, at least two of which should be from members of the Department of Slavic Languages and Literatures faculty.
2. Meet all requirements for both the B.A. and M.A. degrees. Applicants must complete 15 full-time quarters (or the equivalent), or three full-time quarters after completing 180 units, for a total of 225 units. During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three graduate-level courses.

Master of Arts in Slavic Languages and Literatures

University requirements for the M.A. degree are discussed in the "Graduate Degrees (p. 38)" section of this bulletin.

Admission

The requirements for admission to the master's degree program in Russian are:

1. A B.A. (or its equivalent) from an accredited college or university.
2. A command of the Russian language sufficient to permit the student to do satisfactory graduate work.
3. A familiarity with Russian literature sufficient to permit the student to perform adequately in courses at the graduate level.

The applicant's previous academic training in Russian language and literature normally serves as an indication of competence. Accordingly, the department does not ordinarily consider applications from students who have not had at least three years of college Russian and some undergraduate training in Russian literature of the 19th and 20th centuries. Before registering for the first quarter's work in the department, entering graduate students are required to take placement examinations in Russian. Students who fail to perform satisfactorily on such examinations must register for remedial courses in the areas in which they are deficient. Course work in third-year Russian and below carries no credit toward the M.A. degree.

Course Requirements

Candidates for the M.A. should plan course work that ensures adequate preparation for the M.A. final examination at the end of the third quarter of work. Course work should be planned in consultation with the graduate adviser, whose approval of the overall course load is required.

Candidates for the M.A. must complete a program of 45 units, of which 36 units must be selected from courses given by the department.

The M.A. Thesis

The M.A. thesis represents a complete article-length research paper (6,000-9,000 words) that, in both form and substance, qualifies for submission to English-language professional publications in the Slavic field. The M.A. thesis must be submitted to the thesis adviser no later than the eighth week of the final quarter of registration.

Final Examination

A final examination may substitute for the M.A. thesis requirement. The final examination requires a student to demonstrate in a written examination:

1. command of the phonology, morphology, syntax, and lexicology of contemporary standard Russian sufficient to teach beginning and intermediate courses at the college level
2. an ability to read contemporary Standard Russian sufficiently to assist students studying contemporary Russian poetry or literary prose
3. sufficient familiarity with Russian literature of either the 19th or 20th century to successfully handle survey courses dealing with the chosen period of specialization.

The examination should be taken at the end of the final quarter of required course work.

Doctor of Philosophy in Slavic Languages and Literatures

University requirements for the Ph.D. are discussed in the "Graduate Degrees (p. 38)" section of this bulletin.

Students enrolled in the Ph.D. program in Slavic Languages and Literatures are expected to fulfill the following requirements while meeting the program's deadlines in the course of their progress toward the degree:

1. Course Work, Breadth Requirements, and Overall Scheduling

In consultation with the Chair of Graduate Studies, students are expected to take 18 units of credit each quarter of their first year, 10 units each funded summer, and 10 units each quarter thereafter. They are expected to reach 135 units and attain TGR status in the winter of their fourth year. Entering graduate students must enroll in SLAVIC 200 Proseminar in Literary Theory and Study of Russian Literature. For the Ph.D. degree students are free to select course work to suit their individual program of study. However, candidates must do so in consultation with their adviser (Chair of Graduate Studies or principal dissertation adviser) and are held responsible for all of the areas covered by the general examinations, regardless of whether they have registered for the department's offerings in a given field. For this reason, it is strongly recommended that before taking Ph.D. examinations, students complete seminar-level work directly related to the following broad areas:

- A. Russian Poetry
- B. the Russian novel
- C. 20th-century Russian literature
- D. 19th-century Russian literature (the Age of Pushkin and after)
- E. 18th-century Russian literature (the early 1700's to the Age of Pushkin)
- F. medieval Russian literature
- G. a monograph course on a major Russian author
- H. theory of literature relevant to the major field

2. Minor or Related Fields

During the course of study, students must develop substantial expertise in a field contiguous to the area of specialization. A candidate may elect to present a full minor or, in consultation with the graduate adviser, develop a special program in a related field, preferably no later than the second quarter of enrollment.

- A. *Related Field*—A student is required to complete a sequence of basic courses (12 units) in a chosen discipline outside the department of Slavic Languages and Literatures. The choice of patterns is one of the following:
- i a sequence of three courses in one West European literature, selected in consultation with the adviser, or
 - ii three basic courses in comparative literature chosen in consultation with the Chair of Graduate Studies (CGS), or
 - iii a sequence of three courses in another department selected in consultation with the CGS.
- B. *Minor*—Students electing a minor should take a minimum of 20 units in graduate-level courses in the minor department or fulfill the Ph.D. minor requirements established by that department. Students considering minors should consult with their adviser, the CGS, the Chair of Slavic Languages and Literatures, and the Chair of the minor department.

3. Admission to Candidacy

Candidates should read carefully the general regulations governing the degree, as described in the "Graduate Degrees" section of this bulletin. Department faculty make the decision to advance students to candidacy on the basis of the student's overall progress and promise in the sixth quarter of registration. The candidate by that time must have demonstrated commitment to graduate studies by completing a minimum of 21 content courses (not counting Summer Quarter) with a grade point average (GPA) of 3.3 or better. These must include 14 seminars in the Slavic Department.

4. M.A. Thesis

The candidate must submit a complete draft of an M.A. thesis approved by the thesis adviser. The M.A. thesis represents a complete article-length research paper (6,000-9,000 words) that qualifies in both form and substance for submission to an English language professional publication in the Slavic field. The deadline for the M.A. thesis approval is the eighth week of the sixth quarter of registration. Failure to meet these requirements results in termination of enrollment from the Ph.D. program. Following such termination, the student who has fulfilled all of the M.A. requirements may be given the opportunity to take the M.A. written examination in the history of Russian literature. If successful, the student is then awarded the terminal M.A. degree. In exceptional cases, the written examination requirement may be waived at the discretion of the Chair of Graduate Studies and the Chair of the department.

5. Proficiency Test

Administered to all entering graduate students, this test determines whether the student's knowledge of Russian language and literature falls below the department's standard (Advanced Low on the OPI test). Students who fail are required to complete appropriate courses in the first year of graduate study. Courses required to meet the language proficiency are not counted towards the Course Work requirement of the Ph.D. degree.

6. Foreign Languages

A candidate must demonstrate reading knowledge of French or German, plus another language useful for the student's area of concentration, by passing written examinations, or receiving a grade of 'A-' or better in a qualifying class with consent of the CGS. The reading examination in German or French must be passed by the end of the first year of study. The reading examination in the second language of choice must be passed by the end of the second year of study.

7. Examinations

A candidate must pass the departmental general qualifying examinations, which have written and oral parts. These must be scheduled early in the seventh quarter of enrollment (preferably a day or two before the beginning of academic instruction). The written part covers the history of Russian literature from the medieval period through the twentieth century. The departmental oral qualifying examination follows no later than two weeks after completion of the written exams. The oral examination committee consists of four faculty members and may include one member representing the student's minor or related field; the rest must be drawn from among the Slavic Department faculty. The student makes a 20-minute presentation, following an academic conference format, and based possibly on the student's M.A. thesis. Each examiner questions the student on the presentation and related topics in the history of Russian literature and the minor related field. Following the departmental examinations, a candidate must pass a University Oral examination, consisting of a defense of a doctoral dissertation prospectus and covering content relevant to the area of study, rationale for the proposed investigation, and strategy to be employed in the dissertation research. The prospectus defense is expected to be scheduled at the end of the ninth and, in any case, no later than the beginning of the tenth quarter of registration. Note: Ph.D. examinations are scheduled by the graduate student in consultation with the CGS.

8. Teaching

Students are required to complete five quarters of teaching within the funding period, including three quarters of first-year Russian and two quarters as a teaching assistant of literature for a faculty member, usually in the survey courses in translation:

A. SLAVIC 145	Age of Experiment: Russian Experiments in Short Fiction (1820-1905)	3-5
SLAVIC 146	The Great Russian Novel: Theories of Time and Action	3-5
SLAVIC 147	Modern Russian Literature and Culture: The Age of War and Revolution	3-4
SLAVIC 148	Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin	3-5

- B. Students are required to take DLCL 301 The Learning and Teaching of Second Languages in preparation for teaching.

9. Continuation

Continuation in the Ph.D. program is contingent on fulfilling the following criteria: for first-year students, a high quality of performance in course work (decided by department evaluation); for second-year students, satisfactory academic progress and approval of the M.A. thesis as described above. The principal conditions for continued registration of a graduate student are the timely and satisfactory completion of the university, department, and program requirements for the degree, and fulfillment of minimum progress requirements. Failure to meet these requirements will result in corrective measures, which may include a written warning, academic probation, and/or release from the program.

Overseas Studies Courses in Slavic Languages and Literatures

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/slaviclanguagesandliteratures/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/slaviclanguagesandliteratures/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/slaviclanguagesandliteratures/http://bosp.stanford.edu>).

		Units
OSPMOSC 62	Economic Reform and Economic Policy in Modern Russia	5
OSPMOSC 72	Space, Politics, and Modernity in Russia	5
OSPMOSC 74	Post-Soviet Eurasia and SCO: Society, Politics, Integration	5

Sociology

Courses offered by the Department of Sociology are listed under the subject code SOC on the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=SOC&filter-catalognumber-SOC=on>) web site.

Sociology seeks to understand all aspects of human social behavior, including the behavior of individuals as well as the social dynamics of small groups, large organizations, communities, institutions, and entire societies. Sociologists are typically motivated both by the desire to better understand the principles of social life and by the conviction that understanding these principles may aid in the formulation of enlightened and effective social policy. Sociology provides an intellectual background for students considering careers in the professions or business. Students may pursue degrees in sociology at the bachelor's, master's, or doctoral levels. The department organizes its courses by areas of study to assist students in tailoring their education and research to their academic interests and career goals.

Mission of the Undergraduate Program in Sociology

The mission of the undergraduate program in Sociology is to provide students with the skills necessary to understand and address social problems and inequalities in global, institutional, and interpersonal social relations. At its core, the curriculum in the major is rooted in social theory and the scientific method. Sociology majors are given opportunities to develop a broad understanding of core sociological theories and the methodological skills used to evaluate human behavior and social organizations. Sociology provides an intellectual background for students considering careers in business, social services, public policy, government service, international nongovernmental organizations, foundations, or academia.

The Sociology major consists of a core curriculum plus elective courses intended to provide breadth of exposure to the variety of areas encompassed by sociology.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of core knowledge within the discipline of sociology.
2. the ability to communicate ideas clearly and persuasively in writing.
3. the ability to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
4. the ability to evaluate theory and critique research within the discipline of sociology.

Graduate Programs in Sociology

The Department of Sociology offers three types of advanced degrees:

- the Doctor of Philosophy
- the coterminal Master of Arts in Sociology which is restricted to currently enrolled Stanford undergraduates
- the Master of Arts in Sociology which is available to Stanford students who are currently enrolled in other advanced degree programs.

The department does not have a terminal M.A. program for external applicants.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Sociology and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Sociology. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original

contributions to the knowledge of Sociology and to interpret and present the results of such research.

Areas of Study

The Department of Sociology specializes in four general areas of study, allowing students to tailor their education and research to their academic interests and career goals. The four areas of study supported by the department are:

Organizations, Business, and the Economy

Focus is on the arrangements which societies construct for the provision of material goods or services. A formal organization which provides goods or services for profit and sells them through a market is called a business, and the economic system is capitalism. Social needs are also met through government and not-for-profit organizations, such as garden clubs, hospitals, prisons, and the Red Cross; some private and social needs are met outside of organizations, such as health care provided by family members and exchange of favors among friends. Courses stress the factors that determine whether needs that people define are met through markets or non-market allocation, through organizations, or by other means. They also investigate the environmental and technical factors that shape organization structure, the determinants of how efficiently organizations operate, and the interpersonal processes that shape individual behavior within organizations. Careers related to this field include management and administration in business or public settings, management consulting and analysis, and legal studies related to corporations, organizations, and business.

Social Movements, Comparative Politics, and Social Change

Focus is on the emergence, reproduction, and change of political systems and institutions, especially on why and how different political systems and social movements appear in different times and places, and how differences in political regimes and economic systems influence attempts to change these systems. The origins and significance of national and transnational social movements, transition to democracy, including revolution, nationalism, and other forms of collective action, in creating and sustaining these changes analyzed across countries and over time. Careers that are relevant to this field include law, public policy, government service, nonprofit and international nongovernmental organizations, business organizations (especially those with international interests), consulting, and managerial jobs.

Social Psychology and Interpersonal Processes

Focus is on the social organization of individual identity, beliefs, and behavior, and upon social structures and processes which emerge in and define interpersonal interactions. Processes studied include social acceptance and competition for prestige and status, the generation of power differences, the development of intimacy bonds, the formation of expectation states which govern performance in task oriented groups, and social pressures to constrain deviance. Foundation courses emphasize the effect of social processes on individual behavior and the analysis of group processes. This field provides training for careers with a significant interpersonal component, including advertising and marketing, business, education, law, management, medicine and health, or social work.

Social Inequality

Focus is on forms of social inequality, including fields such as: the shape and nature of social inequalities; competition for power; allocation of privilege; production and reproduction of social cleavages; and consequences of class, race, and gender for outcomes such as attitudes, political behavior, and life styles. Many courses emphasize changes in

the structure of social inequalities over time, and the processes which produce similarities or differences in stratification across nations. Topics include educational inequality, employment history, gender differences, income distributions, poverty, race, and ethnic relations, social mobility, and status attainment. Careers related to this field include administration, advertising, education, foreign service, journalism, industrial relations, law, management consulting, market research, public policy, and social service.

Race, Gender, Immigration, Identity and Policy

Focus is on population diversity, primarily in the United States, and on how identity is formed and maintained. Classes in this subject area address segregation, integration, and assimilation. What does it mean to cross from one group to another? How has the law treated racial minorities, sexual minorities, and immigrants differently over time? Careers related to this field include social work, teaching, research, law, management, and population studies which can be applied to any industry.

Joint Programs in Sociology with the School of Law

The School of Law and Department of Sociology conduct joint programs leading to either a combined J.D. degree with an M.A. degree in Sociology or to a combined J.D. degree with a Ph.D. in Sociology.

Law students interested in pursuing an M.A. in Sociology apply for admission to the Department of Sociology during the first year of Law school. Once admitted to the Department of Sociology, the student must complete standard departmental master's degree requirements as specified in this bulletin. Applications for the joint J.D./M.A. degree program must be approved by both the department and the Law school. Faculty advisers from each program participate in the planning and supervising of the student's academic program.

The J.D./Ph.D. degree program is designed for students who wish to prepare themselves for research or teaching careers in areas relating to both legal and sociological concerns. Students interested in the joint degree program must be admitted to both the School of Law and the Department of Sociology. Interest in the joint degree program must be noted on each of the student's applications. Alternatively, an enrolled student in either the Law School or the Sociology department may apply to the other program, preferably during their first year of study. Students participating in the joint degree program are not eligible to transfer and receive credit for a masters, or other degree, towards the Sociology Ph.D..

Upon admission, students are assigned a joint program faculty adviser who assists the student in planning an appropriate program and ensuring that all requirements for both degrees are satisfied. The faculty adviser serves in this capacity during the student's course of study regardless of whether the student is enrolled in the School of Law or the Sociology department.

J.D./Ph.D. students may elect to begin their course of study in either the School of Law or the Department of Sociology. Students must be enrolled full-time in the Law school for the first year of Law school, and must enroll full time in the graduate school for the first year of the sociology program. After that time, enrollment may be in the graduate school or the Law school, and students may choose courses from either program regardless of where enrolled. Students must satisfy the requirements for both the J.D. and the Ph.D. degrees. Up to 81 quarter (54 semester) hours of approved courses may be counted toward both degrees, but no more than 36 quarter (24 semester) hours of courses that originate outside the Law school may count toward the Law degree. To the extent that courses under this joint degree program originate outside of the Law school but count toward the Law degree, the Law school credits permitted under Section 17(1) of the Law School Regulations for cross-registration in other schools or departments of Stanford University are reduced on a unit-per-unit basis, but not below zero. Students must complete the equivalent of 183 quarter units to complete both

degrees. Tuition and financial aid arrangements normally are through the school in which the student is currently enrolled.

The law degree may be conferred upon completion of applicable law school requirements; it is not necessary to have both degrees conferred simultaneously.

For more information, see the Sociology (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/sociology/> <http://sociology.stanford.edu>) web site, and the Law School web site on the J.D./Ph.D. (<http://www.law.stanford.edu/program/degrees/joint/sociology>)

Bachelor of Arts in Sociology

Declaring the Major in Sociology

To declare a major in Sociology, students should declare the B.A. in Axess, then download the major declaration form from the department website. Complete the top portion of the form, sign, and email the Director of the Undergraduate Program in Sociology to set up an entrance advising meeting.

Major Requirements

A 3.0 GPA is required to enter the Sociology major. The B.A. in Sociology requires 60 units of course work. Units applied to the major must be taken for a letter grade (except for independent study or directed reading), and all earned grades must be 'C' or better.

Core Curriculum for all Sociology Majors

Students are encouraged to complete some course work at the 200-level. Sociology majors are encouraged to participate in directed research or undertake independent research with Sociology faculty. See the department web site for additional information.

Units required for the Sociology B.A. are:

	Units
Sociology Core Courses	20
Sociology Foundation Courses	15
Social Science Electives	20
Statistics	5
Total Units	60

Core Courses Required for the Major

The following core courses are required of all Sociology majors.

	Units
SOC 170 Classics of Modern Social Theory	5
SOC 180A Foundations of Social Research	5
SOC 180B Introduction to Data Analysis	5
SOC 200 Junior/Senior Seminar for Majors	5
or SOC 202 Preparation for Senior Research	5
Total Units	20

- It is recommended that students take this required course during junior year or as early as possible during senior year. Students pursuing the regular B.A. should take SOC 200 Junior/Senior Seminar for Majors. Students considering honors are encouraged to enroll in SOC 202 Preparation for Senior Research instead of SOC 200 Junior/Senior Seminar for Majors.

Foundation Courses Required for the Major

Sociology majors must complete 15 units of foundation courses; one course in three different areas for a total of three courses. For further information about Sociology areas of study, see the department web site.

Foundation courses, classified by area of study, are as follows:

Organizations, Business, and the Economy

	Units
SOC 114 Economic Sociology	5
SOC 162 Markets and Governance	5

Social Movements, Comparative Politics, and Social Change

	Units
SOC 118 Social Movements and Collective Action	5
SOC 119 Understanding Large-Scale Societal Change: The Case of the 1960s	5
SOC 130 Education and Society	4-5

Social Psychology and Interpersonal Processes

	Units
SOC 120 Interpersonal Relations	5
SOC 121 The Individual in Social Structure: Foundations in Sociological Social Psychology (not offered 2012-13)	5
SOC 127 Bargaining, Power, and Influence in Social Interaction (not offered 2012-13)	5

Social Inequality

	Units
SOC 140 Introduction to Social Stratification	5
SOC 141 Controversies about Inequality (not offered 2012-13)	5
SOC 144 Inequality and the Workplace (not offered 2012-13)	5
SOC 149 The Urban Underclass	5

Race, Gender, Immigration, Identity, and Policy

	Units
SOC 135 Poverty, Inequality, and Social Policy in the United States	5
SOC 142 Sociology of Gender	5
SOC 145 Race and Ethnic Relations in the USA	5
SOC 155 The Changing American Family	5

Social Science Elective Courses

Four Social Science electives (20 units) are required for the major. You may take all four courses in Sociology if you wish. Students may choose their elective courses according to personal interest. Non-Sociology courses must be approved by the director of undergraduate studies. A maximum of 10 units taken in other Social Science departments (Anthropology, Communication, Economics, Political Science, Psychology) may be counted towards the 60 units required for the Sociology B.A.

Statistics Requirement

Sociology majors are required to take at least one statistics course (5 units). The department suggests the courses listed below, or other comparable course with approval of the director of undergraduate studies.

Suggested Statistics courses for Sociology majors:

		Units
PSYCH 10	Introduction to Statistical Methods: Precalculus	5
SOC 181B	Sociological Methods: Statistics (not offered 2012-13)	5
STATS 60	Introduction to Statistical Methods: Precalculus	5

Honors Program

Sociology majors who wish to complete an independent scholarly project under the direction of a faculty member are encouraged to apply for admission to the department's honors program. Admission to the program requires a grade point average (GPA) of 3.5 or higher in courses taken within the major, and an overall GPA of 3.3 (B+) or higher in all undergraduate course work. Applicants are required to identify a Sociology faculty member to advise on the research and writing of the essay. With the approval of the Director of Undergraduate Studies, students may work with faculty advisors in other departments.

Students are encouraged to begin planning their honors thesis in their junior year; at this time they should enroll in SOC 202 Preparation for Senior Research, or SOC 200 Junior/Senior Seminar for Majors. Students begin designing their honors project in connection with this seminar and in consultation with the seminar leader. To apply for the honors program, students should complete the honors application, obtain an advisor's approval and signature, and submit the application with a brief description of the proposed project, and a copy of the student's unofficial undergraduate transcript, to the Director of Undergraduate Studies. Prospective candidates are asked to submit an honors application as soon as possible in their junior or senior year, ideally no later than the end of the fourth quarter prior to graduation (typically Spring Quarter of the junior year). Honors students may earn up to 12 independent study units for work leading to completion of the required honors thesis, excluding units associated with the Junior/Senior Seminar.

If the student is admitted to the program, students will be directed to declare the B.A.H. in Axess and drop the general B.A. Completion of honors in Sociology requires:

1. Application and acceptance into the Sociology Honors Program
2. Completion of all requirements of the Sociology major
3. Completion of an honors thesis with a grade of A- or higher
4. Participation in the Sociology Honors Colloquium in the Spring quarter prior to graduation.

If honors program requirements are not met, students must drop the BAH degree program in Axess and declare the B.A. before applying to graduate.

Minor in Sociology

Students must complete a minimum of 35 units in Sociology for the minor. Courses must be taken for a letter grade, and a minimum grade point average (GPA) of 2.0 (C) must be achieved. Students are encouraged to complete a course in sociological theory, such as SOC 170 Classics of Modern Social Theory, and to obtain exposure to one of the areas of study. Students who wish to declare a minor in Sociology must do so no later than the deadline for their application to graduate. Related course work from other departments may fulfill a minor requirement. All course substitutions must be pre-approved by the Sociology student services office and the

Undergraduate Program Director; a student may not exceed 5 substitution units for the minor.

Course requirements for a minor in Sociology are as follows:

		Units
SOC 1	Introduction to Sociology at Stanford	5
SOC 180A or SOC 180B	Foundations of Social Research or Introduction to Data Analysis	5
Two foundation courses: see foundation courses required for the major above		10
Additional course work in the department (100- or 200-level courses)		15
Total Units		35

Coterminal Master of Arts in Sociology

Stanford undergraduates, regardless of undergraduate major, who wish to pursue an M.A. in Sociology may apply for the coterminal master's program. The coterminal M.A. in Sociology is a flexible, self-designed program. Most students complete their M.A. in a fifth year at Stanford; occasionally students are able to complete their B.A. and coterminal M.A. in the fourth year.

Application and admission

Undergraduates must be admitted to the program and enrolled as a graduate student for at least one quarter prior to their B.A. conferral. A cumulative GPA of at least 3.5 in previous undergraduate work is required for admission; GRE test scores are required. It is highly recommended that applicants have completed at least one Sociology course at the 100 level with a grade of 'B' or better. The department accepts applications once a year; the application deadline is January 15th for admission in the Spring quarter immediately following. There are no exceptions to this deadline. All application materials are submitted directly to the Sociology graduate student services office. The department does not fund coterminal M.A. students. To apply for admission to the Sociology coterminal M.A. program, students must submit the coterminal application and the following:

1. Statement of purpose; should be 2-5 pages double-spaced. Applicants should outline reasons for pursuing the M.A. in Sociology, including career aspirations and/or future plans for additional advanced degrees;
2. Preliminary program; this is a form in the application packet. Specify at least 45 units of course work relevant to the degree program with at least 40 units in Sociology;
3. Current unofficial undergraduate transcript;
4. Two letters of recommendation from Stanford faculty familiar with the student's academic work; additional letters from teaching assistants, employers, or other individuals will be accepted as supplemental materials but are not required;
5. GRE scores.

Program requirements

Coterminal M.A. students are required to take 45 units of course work during their graduate career; 40 of these units must be in Sociology courses. All units for the coterminal M.A. must be taken at or above the 100 level; advanced-level course work is encouraged and a minimum of 20 units must be taken at the 200 level. Students who wish to take courses outside the department must seek prior approval from the Sociology student services office; coterminal master's students are limited to 5 units from outside of the department; outside courses must be taken in other Social Science departments. Students may transfer a maximum of 10 units from

their undergraduate career; to be eligible for transfer, courses must have been taken in the two quarters preceding admission to the M.A. program. Courses cannot be transferred after a student's BA has been conferred. All units applied to the coterminal master's degree must be taken for a letter grade, and an overall grade point average (GPA) of 3.0 (B) or better is required for the degree. Because research methods are an important component of graduate training in the social sciences, coterminal students are encouraged to take SOC 180A Foundations of Social Research, and SOC 180B Introduction to Data Analysis, in sequence when possible. These methods courses provide skills for research opportunities within the department and in academic or professional careers. Coterminal M.A. students should meet with their assigned faculty adviser upon acceptance to the program.

Students are responsible for knowing and adhering to University and Departmental policies, standards, and requirements for coterminal students. For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/bulletin/4874.htm>. (<http://registrar.stanford.edu/pdf/CotermApplic.pdf.html>) For detailed information regarding the Sociology coterminal M.A. and how to apply, see the Department of Sociology (<http://www.stanford.edu/dept/soc/coterminal>) web site.

Master of Arts in Sociology for Current Stanford Graduate Students

The M.A. degree in Sociology is available to current Ph.D. candidates in Sociology and to students in advanced degree programs (Ph.D., J.D., M.D.) from other Stanford departments and schools.

For the M.A. degree, students must complete a minimum of 45 units of Sociology course work with a grade point average (GPA) of 3.0 (B) or better. All 45 units must be taken in courses taught by Sociology faculty. Students must enroll in SOC course offerings; crosslisted offerings are not accepted. All courses must be taken for a letter grade if possible. Workshop, research, directed reading, and independent study units do not count towards the M.A.

University regulations pertaining to the M.A. are listed in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

Students who wish to engage in more in-depth study in a specific area may do so by focusing on course work within an area of study.

No thesis is required.

While formal application to the M.A. program is not required, applicants from outside of the Sociology department must submit:

1. Graduate Authorization Petition form, available electronically through Axxess (<https://axess.stanford.edu>);
2. Program Proposal for an M.A. form available for download from the registrar's office website, submitted to Sociology graduate student services officer;
3. Short statement of purpose; 1 page double-spaced, submitted to Sociology graduate student services officer.

Sociology Ph.D.s may receive their M.A. in their second or third year of graduate study. Interested students from other degree programs should visit the department's (<http://www.stanford.edu/dept/soc/doctoral/magrad.html>) web site.

Doctor of Philosophy in Sociology

The Ph.D. curriculum and degree requirements are designed to provide students with the knowledge and skills to become proficient scholars and teachers. Doctoral students in the department must take required courses for a letter grade if available and are expected to earn a grade of 'B+' or better in each course. Any grade of 'B' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty and the following actions may take place: the grade stands and the student's academic performance is monitored to ensure that satisfactory progress is being made; the grade stands and the student is required to revise and resubmit the work associated with that course; or the student may be required to retake the course. The following program requirements apply to students who entered the Ph.D program in 2010-11; students admitted prior to 2010 should consult the department or the Bulletin from their year of admission for requirements specific to their cohort.

Students must complete the following department requirements for the Ph.D. degree in Sociology:

1. Students must enroll in , in Autumn Quarter of the first year; the course provides an introduction and orientation to the field of sociology, and to the department and faculty. One unit of credit is given for this course; grading is on a satisfactory/no credit basis.
2. Students are required to complete 45 units of course work in Sociology in the first academic year, then 15 units of Sociology course work in the second academic year. Course work excludes workshop, independent study, and directed reading units.
3. Theory: Students are required to take at least two courses in sociological theory. One course should be in either macro-sociological theory (SOC 370A Sociological Theory: Social Structure, Inequality, and Conflict), or micro-sociological theory (SOC 370B Social Interaction and Group Process), in the first year of the program. A second course, in research design, should be taken during the second year in the program (SOC 670 Designing Social Research or SOC 372 Theoretical Analysis and Design). Students without a background in Sociology are encouraged to enroll in SOC 370A Sociological Theory: Social Structure, Inequality, and Conflict as well as SOC 370B Social Interaction and Group Process.
4. Methodology: Students are required to complete a series of courses in methodology as well as one methods elective. Students with little background in statistics are encouraged to take an undergraduate statistics course in their first quarter of the program. The required methods sequence, to be taken in order, is listed below.
5. Survey Courses: Students must complete four broad survey courses to demonstrate command of a range of sociological literature. Each year the department specifies which courses meet this requirement, and will undertake to ensure that an adequate selection of such courses is offered. A list of courses that generally fulfill this requirement is listed below. Students should consult with their advisor to ensure that the combination of courses selected to meet this requirement exhibits sufficient breadth. This requirement is normally completed by the end of the second year of residency and must be met by the end of the third year of residency. The most current list of approved survey courses is available on the department website.
6. Workshops: Beginning in year two, doctoral students are required to enroll in at least one workshop each quarter. First year students may attend workshops but are not required to enroll. Sociology workshops are offered for 1-2 units on a credit/non-credit basis only and attendance is required to receive course credit. The Graduate Studies Director may approve a student's petition to attend a workshop when enrollment is prohibited by unit constraints; such attendance is not

noted on the transcript. A list of approved workshops that fulfill this requirement is listed in the requirements section below and also on the department website.

7. **Qualifying Exam #1:** The first comprehensive examination is designed to ensure that students will enter their second year with a firm reading knowledge of two substantive subfields. Students will write two essays in response to questions provided by the examining committee. The questions are due exactly one week later. Students will choose one out of two questions to write on for each subfield. Examinations will be offered in seven subject areas, based on comprehensive readings lists that will be available at the beginning of each academic year. Each subject area will have one faculty point person or "group leader." Group leaders are responsible for assembling essay questions and agree to meet with students as requested. Exam subject areas and the for 2012-13 are: Economic Sociology; Gender; Historical and Comparative Sociology; Organizations; Political Sociology; Population, Family, Demography, and Marriage; Race, Ethnicity, and Immigration; Social Inequality; Social Movements; Social Psychology. Students may work together to read and discuss the materials on the comprehensive reading lists (and in fact they are encouraged to do so). They may consult with faculty members as they study for the exams. However, once the examination questions are released, all such collaboration and consultation should stop, and students should work independently on their essays.
8. **Qualifying Exam #2:** The second qualifying examination is a longer critical essay that focuses on a bibliography devised by the student jointly with their faculty advisor. This exam will provide students with a more focused critical engagement in a specialized subfield or research area, and serves as a test of the student's ability to work and think independently. Exam #2 is due by May 15 of the second year in residence. A two-person committee that includes the primary advisor evaluates the paper. Although the reading committee is usually comprised of two regular faculty members in the department, emeritus and other faculty outside of the department may serve as a committee member with prior approval. Examinations are graded by both committee members, and the grades on these qualifying exams are an important component of the decision to advance a student to candidacy. To accommodate student interests and goals, there are two options for Exam #2, an analytic essay (option 1) or research paper (option 2) – see department website for more detailed information. Students may employ one of the comprehensive examination reading lists (from exam #1) for an area in which they did not take the exam to construct the bibliography. If students would like to be examined in a more specialized sub-area within one of the fields that they took for exam #1, they should consult with their reading committee and receive approval from the Director of Graduate Studies. Students should submit the Second Year Qualifying Paper form to the department (Student Services Officer) by the end of Fall quarter of the 2nd year.
9. **Third Year Paper:** In preparation for a career of writing scholarly papers, each student must complete a research paper in the third year of residency. This third-year paper may be on any sociological topic, and may address theoretical, empirical, or methodological issues. The paper is expected to reflect original work and be of publishable quality. Students will select a committee of at least two Sociology faculty members to serve as third year paper readers. To ensure that students are making adequate progress on their paper, students are required to provide a first draft of the paper to readers by April 1st. The final deadline for paper submission is May 15th. The committee will provide a review that speaks to (1) whether the paper is publishable and whether the student should therefore invest in attempting to publish it, and (2) what types of revisions, insofar as the paper is publishable, that the student should be pursuing to

ready the paper for publication. These comments will be shared with the Director of Graduate Studies, and copies of the paper and faculty comments will go in the student file.

10. **TA requirement:** Students must complete three quarters of teaching apprenticeship in departmental courses, or in other courses by approval. Work as either a teaching assistant (TA) under the supervision of a faculty member or as a teaching fellow (TF) fulfills this requirement. Students are required to take SOC 300, Workshop: Teaching Development, in Spring Quarter of the first year. In addition, students are encouraged to take advantage of department and University teacher training programs. Students for whom English is a second language are expected to acquire sufficient facility in English to be an effective teacher.
11. **RA requirement:** As partial preparation for becoming an accomplished researcher, each student must complete three quarters of research experience, working under the supervision of one or more faculty members, including regular, emeritus, and affiliated faculty. The experience may involve paid (or unpaid) work as a Research Assistant (RA). With the approval of the Director of Graduate Studies, research experience may be acquired by involvement in research projects outside the department. It is recommended that students complete their research requirements early in their graduate program; the requirement must be completed by the end of the fourth year of residency.
12. Students are required to present at least two papers at a major professional meeting (e.g., ASA) in their first five years of graduate study.
13. In order to demonstrate the ability to conduct independent scholarly work, each student must prepare and defend dissertation prospectus by the end of May during the fourth year in residence.
14. **Dissertation Prospectus and Prospectus Defense:** In order to demonstrate the ability to conduct independent scholarly work, each student must prepare and defend dissertation prospectus by the end of May during the fourth year in residence. Students should have their dissertation committee selected by the end of their third year in the program.
15. Each student must complete and defend a doctoral dissertation. At the choice of the student (and in consultation with her or his advisor), the dissertation requirement may be met either by (1) submitting the usual book-length document of the sort now required, or (2) submitting three independent papers. The papers may address the same topic, but should be written as stand-alone, single-authored papers in standard journal format (i.e., AJS or ASR). None of these papers may overlap substantially with one another, and none of them may be co-authored. (The main criterion in judging "substantial overlap" is whether any standard journal, such as AJS, would regard the papers as too similar to publish both.) The dissertation must be submitted to all committee members at least 30 days in advance of the defense date. The dissertation defense serves as the Oral Examination required by the University. Assessment of satisfactory completion is determined by the student's doctoral committee members. All students are invited to present their dissertation findings at an informal department colloquium.

The faculty are responsible for providing students with timely and constructive feedback on their progress toward the Ph.D. In order to evaluate student progress and to identify potential problem areas, the department's faculty reviews the academic progress of each first-year student at the beginning of Winter and Spring quarters and again at the end of the academic year. The first two reviews are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. The review at the end of Spring Quarter is more thorough; each student's performance during the first year is reviewed and discussed. Possible outcomes of the spring

review include: (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period of probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; (2) continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program. Students leaving the program at the end of the first year are usually allowed to complete the requirements to receive an M.A. degree, if this does not involve additional residence or financial support. All students are given feedback from their advisers at the end of their first year of graduate work, helping them to identify areas of strengths and potential weakness.

At the end of the second year of residency, students who are performing well, as indicated by their coursework, performance on qualifying examinations, and teaching and research assistantship performance, are advanced to candidacy. This step implies that the student has demonstrated the relevant qualities required for successful completion of the Ph.D. Future evaluations are based on the satisfactory completion of specific remaining department and University requirements. Students who are not advanced to candidacy will normally be terminated from the program and awarded an M.A. degree. In some cases, the department may require that a student complete outstanding work or complete unmet requirements before admission to candidacy. The university requires that all students must be admitted to candidacy by the beginning of the third year in residence in order to continue in the Ph.D. program. Therefore all requirements stipulated by the department must be met before registration for the fall quarter of the student's third year.

At any point during the degree program, evidence that a student is performing at a less than satisfactory level may be cause for a formal academic review of that student.

Degree Requirements

Survey Courses

Students must complete four courses from an approved list. This list is updated and circulated to students at the start of each academic year. *Note:* class offerings rotate; not all approved survey courses are offered every year. The following courses typically fulfill the survey course requirement:

	Units	
SOC 310	Political Sociology	
SOC 314	Economic Sociology	
SOC 316	Historical and Comparative Sociology	
SOC 318	Social Movements and Collective Action	
SOC 320	Foundations of Social Psychology	
SOC 339	Gender Meanings and Processes	
SOC 342B	Gender and Social Structure	
SOC 347	Race and Ethnicity in Society and Institutions	
SOC 357	Immigration and Assimilation	
SOC 358	Sociology of Immigration	
SOC 362	Organization and Environment	
SOC 363A	Seminar on Organizational Theory	
SOC 366A	Organizational Ecology	
SOC 376	Perspectives on Organization and Environment: Social Movement Organizations and Environments	

Research Methods

Required methodology courses are listed below. Students are required to enroll in SOC 384 New Models and Methods in the Social Sciences, in their first or second year of the program.

		Units
SOC 381	Sociological Methodology I: Introduction	5
SOC 382	Sociological Methodology II: Multivariate Regression	4-5
SOC 383	Sociological Methodology III: Models for Discrete Outcomes	5
SOC 384	New Models and Methods in the Social Sciences (not offered 2012-13)	2-5

Theory

		Units
SOC 370A	Sociological Theory: Social Structure, Inequality, and Conflict	5
SOC 370B	Social Interaction and Group Process	3-5
SOC 670	Designing Social Research	4
SOC 372	Theoretical Analysis and Design	3-5

Workshops

		Units
SOC 311A	Workshop: Comparative Studies of Educational and Political Systems (not offered 2012-13)	1-5
SOC 311B	Workshop: Comparative Systems of Educational and Political Systems	1-5
SOC 311C	Workshop: Comparative Studies of Educational and Political Systems	1-5
SOC 312W	Workshop: Political Sociology, Social Movements, and Collective Action	1-2
SOC 315W	Workshop: Economic Sociology and Organizations	1-2
SOC 317W	Workshop: Networks, Histories, and Theories of Action	1-2
SOC 321W	Workshop: Social Psychology and Social Structure	1-2
SOC 338W	Workshop: Sociology of Law	1-2
SOC 341W	Workshop: Inequality	1-2
SOC 350W	Workshop: Migration, Race, Ethnicity and Nation	1-3
SOC 368W	Workshop: China Social Science	1

Ph.D. Minor in Sociology

Sociology offers a minor for currently enrolled doctoral students in other Stanford departments and schools. Students must complete a minimum of 30 graduate-level units with a grade point average (GPA) of 3.0 (B) or better. All 30 units for the minor are to be in courses taught by Sociology faculty. Students must enroll in the SOC course offerings (not cross-listed sections). There is one exception: 5 units may be taken in a statistics or methods course taught in another department. All units must be taken for a letter grade. Workshop, research, directed reading, or independent study units do not count towards the Ph.D. Minor. The program must be approved by a Sociology adviser and filed with the Sociology student services office. While there is not a formal application process, candidates must submit a short statement of purpose (2 pages), and a completed Application for Ph.D. Minor to the Sociology student services office. The Application for Ph.D. Minor must have all Sociology or other courses to be applied to the minor listed, including course number, units, and final grades.

Emeriti: (Professors) Joseph Berger, Bernard P. Cohen, Sanford M. Dornbusch, James G. March, John W. Meyer, W. Richard Scott, Nancy B. Tuma, Morris Zelditch Jr.

Chair: Mark Granovetter

Professors: Karen Cook, Shelley Correll, Mark Granovetter, David Grusky, Michael T. Hannan, Douglas McAdam, Susan Olzak, Cecilia Ridgeway, Gi-Wook Shin, C. Matthew Snipp, Andrew Walder, Xueguang Zhou

Associate Professors: Michael Rosenfeld

Assistant Professors: Corey Fields, Tomás Jiménez, Paolo Parigi, Aliya Saperstein, Cristobal Young

Courtesy Professors: Glenn Carroll, Michele Landis Dauber, Larry Diamond, Clifford J. Nass, Walter Powell, Francisco Ramirez, Jesper Sorensen, Sarah Soule

Courtesy Associate Professors: Prudence Carter, Daniel McFarland, Sean Reardon, Mitchell Stevens, Christine Min Wotipka

Lecturer: Patricia Chang, Eva Meyersson Milgrom, Patricia Young

Consulting Professor: Ruth Cronkite

Visiting Associate Professors: Patricia Thornton

Overseas Studies Courses in Sociology

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/sociology/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/sociology/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/sociology/http://bosp.stanford.edu>).

		Units
OSPBEIJ 41	Chinese Society and Business Culture	4
OSPBER 66	Theory from the Bleachers: Reading German Sports and Culture	3
OSPCPTWN 32	Learning, Development, and Social Change: Service Learning in the Contemporary South African Context-	5
OSPFLOR 79	Migration, Media and Identity in Italy	5
OSPMADRD 61	Society and Cultural Change: The Case of Spain	5
OSPOXFRD 46	Organizations and Society	3
OSPOXFRD 117W	Gender and Social Change in Modern Britain	4-5

Statistics

Courses offered by the Department of Statistics are listed under the subject code STATS on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=STATS&filter-catalognumber-STATS=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=STATS&filter-catalognumber-STATS=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=STATS&filter-catalognumber-STATS=on>).

The department's goals are to acquaint students with the role played in science and technology by probabilistic and statistical ideas and methods, to provide instruction in the theory and application of techniques that have been found to be commonly useful, and to train research workers in probability and statistics. There are courses for general students as well as those who plan careers in statistics in business, government, industry, and teaching.

The requirements for a degree in Statistics are flexible, depending on the needs and interests of the students. Some students may be interested in the theory of statistics and/or probability, whereas other students may wish to apply statistical and probabilistic methods to a substantive area. The department has long recognized the relation of statistical theory to applications. It has fostered this by encouraging a liaison with other departments in the form of joint and courtesy faculty appointments: Economics (Anderson, Romano), Education (Olkin, Rogosa), Electrical Engineering (Montanari), Geological and Environmental Sciences (Rajaratnam, Switzer), Health Research and Policy (Efron, Hastie, Johnstone, Lavori, Olshen, Tibshirani, Wong), Mathematics (Candes, Dembo, Diaconis), Political Science (Jackman), and the SLAC National Accelerator Laboratory (Friedman). The research activities of the department reflect an interest in applied and theoretical statistics and probability. There are workshops in biology/medicine and in environmental factors in health.

In addition to courses for Statistics students, the department offers a number of service courses designed for students in other departments. These tend to emphasize the application of statistical techniques rather than their theoretical development.

The department has always drawn visitors from other countries and universities. As a consequence, there is usually a wide range of seminars offered by both the visitors and the department's own faculty.

Undergraduate Programs in Statistics

Majoring in Statistics

Students wishing to build a concentration in probability and statistics are encouraged to consider declaring a major in Mathematical and Computational Science (<http://www.stanford.edu/group/mathcompsci>). This interdepartmental program is administered in the Department of Statistics and provides core training in computing, mathematics, operations research, and statistics, with opportunities for further elective work and specialization. See the "Mathematical and Computational Science" section of this bulletin.

Graduate Programs in Statistics

University requirements for the M.S. and Ph.D. degrees are discussed in the "Graduate Degrees (p. 38)" section of this bulletin.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Statistics and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses, in the primary field as well as related areas, and experience with independent work and specialization.

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Statistics. Through completion of advanced course work and rigorous

skills training, the doctoral program prepares students to make original contributions to the knowledge of Statistics and to interpret and present the results of such research.

Minor in Statistics

The undergraduate minor in Statistics is designed to complement major degree programs primarily in the social and natural sciences. Students with an undergraduate Statistics minor should find broadened possibilities for employment. The Statistics minor provides valued preparation for professional degree studies in postgraduate academic programs.

The minor consists of a minimum of six courses with a total of at least 20 units. There are two required courses (8 units) and four qualifying or elective courses (12 or more units). All courses for the minor must be letter graded. An overall 2.75 grade point average (GPA) is required for courses fulfilling the minor.

Required Courses

		Units
STATS 116	Theory of Probability	3-5
STATS 200	Introduction to Statistical Inference	3

Qualifying Courses

At most, one of these two courses may be counted toward the six course requirement for the minor:

		Units
MATH 52	Integral Calculus of Several Variables	5
STATS 191	Introduction to Applied Statistics	3-4

Elective Courses

At least one of the elective courses should be a STATS 200-level course. The remaining two elective courses may also be 200-level courses. Alternatively, one or two elective courses may be approved courses in other departments. Special topics courses and seminars for undergraduates are offered from time to time by the department, and these may be counted toward the course requirement. Students may not count any Statistics courses below the 100 level toward the minor. Examples of elective course sequences are:

		Units
Examples of elective course sequences are:		
Data Analysis and Applied Statistics (6)		
STATS 202	Data Mining and Analysis	3
STATS 203	Introduction to Regression Models and Analysis of Variance	3
Statistical Methodology (9)		
STATS 205	Introduction to Nonparametric Statistics	3
STATS 206	Applied Multivariate Analysis	3
STATS 207	Introduction to Time Series Analysis	3
Economic Optimization (8)		
STATS 206	Applied Multivariate Analysis	3
ECON 160	Game Theory and Economic Applications	5
Psychology Modeling and Experiments (3)		
STATS 206	Applied Multivariate Analysis	3
Signal Processing (9)		
STATS 207	Introduction to Time Series Analysis	3
EE 264	Digital Signal Processing	3
EE 279	Introduction to Digital Communication	3
Genetic and Ecologic Modeling (6)		

STATS 217	Introduction to Stochastic Processes	3
BIO 283	Theoretical Population Genetics	3

Probability and Applications (6)

STATS 217	Introduction to Stochastic Processes	3
STATS 218	Introduction to Stochastic Processes	3

Mathematical Finances (9-11)

STATS 240	Statistical Methods in Finance	3-4
STATS 243	Statistical Models and Methods for Risk Management and Surveillance	3-4
STATS 250	Mathematical Finance	3

Master of Science in Statistics

The department requires that the student take 45 units of work from offerings in the Department of Statistics (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&filter-coursestatus-Active=on&page=0&catalog=&q=stats&collapse=>) or from authorized courses in other departments. With the advice of the masters advisers and of peer students, each student selects his or her own set of electives and pace of study. All requirements for the Statistics master's degree must be completed within three years after the student's first term of enrollment in the master's program (five years for Honors Cooperative students). Students pursuing a coterminal master's degree must complete their requirements within three years of their first quarter of graduate standing. Ordinarily, four or five quarters are needed to complete all requirements.

Students must fulfill the following requirements for the M.S. degree:

1. Statistics core courses (must complete all four courses):

		Units
STATS 116	Theory of Probability	3-5
STATS 191	Introduction to Applied Statistics	3-4
STATS 200	Introduction to Statistical Inference	3
STATS 217	Introduction to Stochastic Processes	3

All must be taken for a letter grade. Students with prior background may replace each course with a more advanced course from the same area. Courses previously taken may be waived by the adviser, in which case they must be replaced by other graduate courses offered by the department.

2. Linear Algebra Mathematics requirement:

		Units
Select one of the following:		
MATH 104	Applied Matrix Theory	3
MATH 113	Linear Algebra and Matrix Theory	3
MATH 115	Functions of a Real Variable	3
MATH 171	Fundamental Concepts of Analysis	3

Substitution of other courses in Mathematics and Computer Science may be made with consent of the adviser (may be taken for a letter grade or credit/no credit).

3. Programming requirement:

		Units
Select one of the following: ¹		
CS 106A	Programming Methodology	3-5
CS 106X	Programming Abstractions (Accelerated)	3-5
CME 108	Introduction to Scientific Computing	3-4

¹ The following courses are not offered this year but may be used by students who completed them in fulfillment of this requirement: CS 137, CS 138.

Substitution of other courses in Mathematics and Computer Science may be made with consent of the adviser (may be taken for a letter grade or credit/no credit).

4. At least four additional Statistics courses must be taken from graduate offerings in the department (202-399). All must be taken for a letter grade. Students cannot count more than 6 units of STATS 260A, STATS 260B, STATS 260C Workshop in Biostatistics, STATS 298 Industrial Research for Statisticians, STATS 390 Consulting Workshop, STATS 299 Independent Study, and STATS 399 Research toward the master's degree requirements.

		Units
STATS 260A	Workshop in Biostatistics	1-2
STATS 260B	Workshop in Biostatistics	1-2
STATS 260C	Workshop in Biostatistics	1-2
STATS 298	Industrial Research for Statisticians	1-3
STATS 299	Independent Study	1-10
STATS 390	Consulting Workshop	1-3
STATS 399	Research	1-10

5. Additional elective units to complete the requirements may be chosen from the list available from the department web site (http://www-stat.stanford.edu/academics/msc_electives.html). Other graduate courses (200 or above) may be authorized by the adviser if they provide skills relevant to statistics or deal primarily with an application of statistics or probability and do not overlap courses in the student's program. There is sufficient flexibility to accommodate students with interests in applications to business, computing, economics, engineering, health, operations research, and biological and social sciences.

Courses below 200 level are generally not acceptable, with the following exceptions:

		Units
STATS 116	Theory of Probability	3-5
STATS 191	Introduction to Applied Statistics	3-4
MATH 104	Applied Matrix Theory	3
MATH 113	Linear Algebra and Matrix Theory	3
MATH 115	Functions of a Real Variable	3
MATH 171	Fundamental Concepts of Analysis	3
MATH 180	Introduction to Financial Mathematics	3
CS 106A	Programming Methodology	3-5
CS 106B	Programming Abstractions	3-5
CS 106X	Programming Abstractions (Accelerated)	3-5
CS 140	Operating Systems and Systems Programming	3-4
CS 142	Web Applications	3
CS 143	Compilers	3-4
CS 144	Introduction to Computer Networking	3-4
CS 145	Introduction to Databases	3-4
CS 147	Introduction to Human-Computer Interaction Design	3-4
CS 148	Introduction to Computer Graphics and Imaging	3-4
CS 149	Parallel Computing	3-4
CS 154	Introduction to Automata and Complexity Theory	3-4
CS 155	Computer and Network Security	3
CS 157	Logic and Automated Reasoning	3
CS 161	Design and Analysis of Algorithms	3-5
CS 164	Computing with Physical Objects: Algorithms for Shape and Motion	3

CS 170	Stanford Laptop Orchestra: Composition, Coding, and Performance	1-5
CS 178	Digital Photography	3-5
CS 181	Computers, Ethics, and Public Policy	4

At most, one of these courses may be counted:

		Units
MATH 104	Applied Matrix Theory	3
MATH 113	Linear Algebra and Matrix Theory	3
MATH 151	Introduction to Probability Theory	3
STATS 116	Theory of Probability	3-5

6. Submission of approved Masters Program Proposal (http://exploreddegrees.stanford.edu/schoolofhumanitiesandsocieties/statistics/STATS-MS_Program_Proposal_Form_2011.pdf) by the master's adviser to the student services officer by the end of the first quarter of the master's degree program.

Students with a strong mathematical background who may wish to go on to a Ph.D. in Statistics should consider applying to the Ph.D. program.

The eight Statistics courses required for the M.S. degree must be taken for letter grades. Courses other than the eight required statistics courses may be taken for a letter grade or Credit/No Credit. There is no thesis requirement. An overall 2.75 grade point average (GPA) is required.

Units for a given course may not be counted to meet the requirements of more than one degree, that is, no units may be double-counted.

Students pursuing a coterminal master's degree must complete their requirements within three years of their first quarter of graduate standing. No courses taken more than two quarters prior to admission to the coterminal master's program may be used to meet the 45-unit university minimum requirement for the master's degree.

For further information about the Statistics master's degree program requirements, see the department web site (<http://www-stat.stanford.edu/academics/msc.html>).

Doctor of Philosophy in Statistics

The department looks for students who wish to prepare for research careers in statistics or probability, either applied or theoretical. Advanced undergraduate or master's level work in mathematics and statistics provides a good background for the doctoral program. Quantitatively oriented students with degrees in other scientific fields are also encouraged to apply for admission. In particular, the department is expanding its research and educational activities towards computational biology, mathematical finance and information science, via a VIGRE program. The program normally takes four years to complete.

Program Summary

		Units
First-year core program (18-34)		
STATS 300A	Theory of Statistics	2-3
STATS 300B	Theory of Statistics	2-4
STATS 300C	Theory of Statistics	2-4
STATS 305	Introduction to Statistical Modeling	2-4
STATS 306A	Methods for Applied Statistics	2-4
STATS 300B	Theory of Statistics	2-4
STATS 310A	Theory of Probability	2-4
STATS 310B	Theory of Probability	2-3
STATS 310C	Theory of Probability	2-4

- Pass two of three parts of the qualifying examinations (end of first year); breadth requirement (second or third year); successfully complete the thesis proposal meeting (before end of third year); pass the University oral examination (fourth year); dissertation (fourth year).
- In addition, students are required to take 9 units of advanced topics courses offered by the department:

Units

Select at least two of the following:

STATS 314	Advanced Statistical Methods	
STATS 317	Stochastic Processes	
STATS 318	Modern Markov Chains	
STATS 315A	Modern Applied Statistics: Learning	
STATS 315B	Modern Applied Statistics: Data Mining	

- Complete 3 units of STATS 390 Consulting Workshop.
- All students who have passed the qualifying exams but have not yet passed the University oral examination must take STATS 319 Literature of Statistics at least once per year.

Units

First-Year Core Courses

- STATS 300 Advanced Topics in Statistics systematically surveys the ideas of estimation and of hypothesis testing for parametric and nonparametric models involving small and large samples.
- STATS 305 Introduction to Statistical Modeling is concerned with linear regression and the analysis of variance.
- STATS 306A Methods for Applied Statistics and STATS 306B Methods for Applied Statistics: Unsupervised Learning survey a large number of modeling techniques, related to but going beyond the linear models of STATS 305 Introduction to Statistical Modeling.
- STATS 310A Theory of Probability, STATS 310B Theory of Probability, and STATS 310C Theory of Probability are measure-theoretic courses in probability theory, beginning with basic concepts of the law of large numbers and martingale theory.
 - Students who do not have enough mathematics background can take STATS 310A,B,C after their first year but need to have their first-year program approved by the Ph.D. program adviser.

Qualifying Examinations

These are intended to test the student's level of knowledge when the first-year program, common to all students, has been completed. There are separate examinations in the three core subjects of statistical theory and methods, applied statistics, and probability theory, and all are typically taken during the summer between the student's first and second years. Students may take two or three of these examinations and are expected to show acceptable performance in two examinations. Letter grades are not given. After passing the qualifying exams, students will file for Ph.D. candidacy, a University milestone.

Breadth Requirement

Students are advised to choose an area of concentration in a specific scientific field of statistical applications; this can be realized by taking at least 15 units of course work approved by the Ph.D. program adviser.

Current areas with suggested course options include:

Computational Biology and Statistical Genomics

Students are expected to take 9 units of graduate courses in genetics or neurosciences (imaging), such as GENE 203/BIO 203 (Advanced Genetics), as well as 9 units of classes in Statistical Genetics or Bioinformatics:

Courses can be chosen from the following list: ¹

STATS 345	Computational Algorithms for Statistical Genetics	2-3
STATS 366	Modern Statistics for Modern Biology	3

¹ The following courses are not offered this year but may be used by students who completed them in fulfillment of this requirement: GENE 344A, GENE 344B, STATS 367.

Machine Learning

Units

Courses can be chosen from the following list:

Statistical Learning (4-6)		
STATS 315A	Modern Applied Statistics: Learning	2-3
STATS 315B	Modern Applied Statistics: Data Mining	2-3

Data Bases (6) ¹		
CS 245	Database Systems Principles	3
CS 347	Parallel and Distributed Data Management	3

Probabilistic Methods in AI (6-7)		
CS 221	Artificial Intelligence: Principles and Techniques	3-4
CS 354	Topics in Circuit Complexity	3

Statistical Learning Theory and Pattern Classification (3-4)		
CS 229	Machine Learning	3-4

¹ CS 346 is not offered this year, but the department may offer it next year. If so, this course may be used in fulfillment of this requirement.

Applied Probability

Students are expected to take 15 units of graduate courses in some of the following areas:

Units

Control and Stochastic Calculus (6) ¹		
MS&E 322	Stochastic Calculus and Control	3
MS&E 351	Dynamic Programming and Stochastic Control	3

Finance (10)		
STATS 250	Mathematical Finance	3
FINANCE 622	Dynamic Asset Pricing Theory	4
MATH 236	Introduction to Stochastic Differential Equations	3

Information Theory (3) ¹		
EE 376A	Information Theory	3

Monte Carlo (10-12)		
STATS 318	Modern Markov Chains	3
STATS 345	Computational Algorithms for Statistical Genetics	2-3
STATS 362	Monte Carlo	2-3
MS&E 335	Queueing and Scheduling in Processing Networks	3

Stochastic Processes (6)		
STATS 317	Stochastic Processes	3
MATH 234	Large Deviations Theory	3

¹ The following courses are not offered this year but may be used by students who completed them in fulfillment of this requirement: MATH 237, EE 363, EE 376B.

Earth Science Statistics

Students are expected to take:

Units		
STATS 317	Stochastic Processes	3
STATS 318	Modern Markov Chains	3

Three courses from the GES or Geophysics departments, such as GES 144.¹

¹ GES 144 is no longer offered but may be used by students who completed the course in fulfillment of this requirement.

Social and Behavioral Sciences

Students are expected to take three advanced courses from the department with an applied orientation such as:

Units

Courses can be chosen from the following list:¹

STATS 261/262	Intermediate Biostatistics: Analysis of Discrete Data	3
STATS 324	Multivariate Analysis	2-3

¹ The following courses are not offered this year but may be used by students who completed them in fulfillment of this requirement: STATS 343, 354.

In addition, students must complete at least three advanced quantitative courses from departments such as Anthropology, Economics, Political Science, Psychology, and Sociology, and the schools of Education, Business, or Medicine.

Thesis Proposal Meeting and University Oral Examinations

The thesis proposal meeting is intended to demonstrate students' depth in some areas of statistics, and to examine the general plan for their research. It also confirms that students have chosen a Ph.D. faculty adviser and have started to work with that adviser on a research topic. In the meeting, they will give a short presentation and discuss their ideas for completing a PhD thesis, with a committee consisting of their adviser and thesis committee (a total of four members). The meeting must be successfully completed before the end of their third year. "Successful completion" means that the general research plan is sound and has a reasonable chance of success. If they do not successfully complete the meeting to the satisfaction of the committee, then the meeting must be repeated. Repeated failure can lead to a loss of financial support.

The oral examination consists of a 40-minute presentation on the thesis topic, followed by a question period. The questions relate both to the student's presentation and also explore the student's familiarity with broader statistical topics related to the thesis research. The oral examination is normally completed within the last few months of the student's Ph.D. period. The examining committee usually consists of four faculty members from the Statistics Department and a fifth faculty member from outside the department. Four out of five passing votes are required and no grades are given. Nearly all students can expect to pass this examination, although it is common for specific recommendations to be made regarding completion of the thesis.

A reading committee must also read and approve the thesis. The reading committee is typically the same as the thesis committee from the thesis proposal meeting.

For further information on University oral examinations and committees, see the Graduate Academic Policies and Procedures (GAP) Handbook, section 4.7 (<http://gap.stanford.edu/4-7.html>) or the "University Oral Examination (p. 40)" section of this bulletin.

Doctoral and Research Advisers

From the student's arrival until the selection of a research adviser, the student's academic progress is monitored by the department Doctoral Adviser. Each student should meet at least once a quarter with the Doctoral Adviser to discuss their academic plans and their progress towards choosing a thesis adviser.

Financial Support

Students accepted to the Ph.D. program are offered financial support. All tuition expenses are paid and there is a fixed monthly stipend determined to be sufficient to pay living expenses. Financial support can be continued for five years, department resources permitting, for students in good standing. The resources for student financial support derive from funds made available for student teaching and research assistantships. Students receive both a teaching and research assignment each quarter which, together, do not exceed 20 hours. Students are encouraged to apply for outside scholarships, fellowships, and other forms of financial support.

Ph.D. Minor in Statistics

Students must complete 30 total units for the Ph.D. minor. 20 units must be from Statistics courses numbered 300 and above and taken for letter grades. The remaining 10 units can be from Statistics courses numbered 200 and above. The selection of courses must be approved by one of the M.S. advisers. The Application for the Ph.D. Minor form must be approved by both the student's Ph.D. department and the Statistics department.

For further information about the Statistics Ph.D. degree program requirements, see the department web site (<http://www-stat.stanford.edu/academics/msc.html>).

Emeriti: Theodore W. Anderson, Jerome H. Friedman, Ingram Olkin, Charles Stein, Paul Switzer

Chair: Guenther Walther

Professors: Emmanuel Candes, Amir Dembo, Persi Diaconis, David L. Donoho, Bradley Efron, Trevor J. Hastie, Iain M. Johnstone, Tze L. Lai, Art Owen, Joseph P. Romano, David O. Siegmund, Robert J. Tibshirani, Guenther Walther, Wing H. Wong

Associate Professors: Andrea Montanari, Jonathan Taylor

Assistant Professors: Balakanapathy Rajaratnam

Courtesy Professors: John Ioannidis, Philip W. Laveri, Richard A. Olshen, Hua Tang

Courtesy Associate Professors: Simon Jackman, David Rogosa, Chiara Sabatti

Consulting Professors: John Chambers, Charles Chui

Stein Fellows: Michael Baiocchi, Sergio Bacallado

Symbolic Systems

Courses offered by the Program in Symbolic Systems are listed under the subject code SYMSYS on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=SYMSYS&filter-catalognumber-SYMSYS=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=SYMSYS&filter-catalognumber-SYMSYS=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=SYMSYS&filter-catalognumber-SYMSYS=on>).

The observation that both human beings and computers can manipulate symbols lies at the heart of Symbolic Systems, an interdisciplinary program focusing on the relationship between natural and artificial systems that represent, process, and act on information. Computer programs, natural languages, the human mind, and the Internet embody concepts whose study forms the core of the Symbolic Systems curriculum, such as computation, representation, communication, and intelligence. A body of knowledge and theory has developed around these notions, from disciplines such as philosophy, computer science, linguistics, psychology, statistics,

neurobiology, and communication. Since the invention of computers, researchers have been working across these disciplines to study questions such as: in what ways are computers and computer languages like human beings and their languages; how can the interaction between people and computers be made easier and more beneficial?

The core requirements of the Symbolic Systems Program (SSP) include courses in symbolic logic, the philosophy of mind, formal linguistics, cognitive psychology, programming, the mathematics of computation, statistical theory, artificial intelligence, and interdisciplinary approaches to cognitive science. These courses prepare students with the vocabulary, theoretical background, and technical skills needed for study and research at the advanced undergraduate and graduate levels. Most of the courses in SSP are drawn from affiliated departments. Courses designed specifically for the program are aimed at integrating and supplementing topics covered by the department-based offerings. The curriculum includes humanistic approaches to questions about language and intelligence, as well as training in science and engineering.

SSP offers B.S. and M.S. degree programs. Both programs require students to master a common core of required courses and to choose an area of specialization.

Mission of the Undergraduate Program in Symbolic Systems

The undergraduate program in Symbolic Systems is an interdisciplinary program focusing on the relationship between natural and artificial systems that represent, process, and act on information. The mission of the program is to prepare majors with the vocabulary, theoretical background, and technical skills necessary to research questions about language, information, and intelligence, both human and machine. The curriculum offers a combination of traditional humanistic approaches to these questions as well as a training and familiarity with contemporary developments in the science and technology of computation. Students in the major take courses in cognitive science, computer programming, computational theory, probability, cognitive psychology, linguistics, and artificial intelligence. The program prepares student for careers in corporate and private sectors as well as for further study in graduate school.

Learning Outcomes (Undergraduate)

The program expects its undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Symbolic Systems Program. Students are expected to demonstrate:

1. understanding of important concepts from the undergraduate core requirements.
2. ability to apply core concepts to an advanced problem area.
3. ability to apply concepts and methods from more than one discipline to a particular issue.
4. ability to think critically about advanced reading material.
5. ability to present a cogent, coherent, evidence-backed argument.

Learning Outcomes (Graduate)

The purpose of the master's program is to further develop knowledge and skills in Symbolic Systems and to prepare students for a professional career or doctoral studies. This is achieved through completion of courses

representing each of the core disciplines of Symbolic Systems as well as an individualized course program in support of the completion of a Master's thesis.

Bachelor of Science in Symbolic Systems

The program leading to a B.S. in Symbolic Systems provides students with a core of concepts and techniques, drawing on faculty and courses from various departments. The curriculum prepares students for advanced training in the interdisciplinary study of language and information, or for postgraduate study in any of the main contributing disciplines. It is also excellent preparation for employment immediately after graduation.

Symbolic Systems majors must complete a core of required courses plus a field of study consisting of five additional courses. All major courses are to be taken for letter grades unless an approved course is offered satisfactory/no credit only. All core courses must be passed with a grade of 'C-' or better. Students who receive a grade lower than this in a core course must alert the program of this fact so that a decision can be made about whether the student should continue in the major.

Core Requirements

In order to graduate with a B.S. in Symbolic Systems, a student must complete the following requirements. Some of these courses have other courses as prerequisites; students are responsible for completing each course's prerequisites before they take it. With the exception of the advanced small seminar requirement, courses cannot be used towards more than one area of the core requirements. For additional information, see the Symbolic Systems web site (http://symsys.stanford.edu/undergraduate_programs).

1. Introductory Core Course

	Units
SYMSYS 100 Introduction to Cognitive and Information Sciences	4

2. Continuous Fundamentals Level 1—Single Variable Calculus

	Units
Select one of the following Series:	
Series A (10)	10
10 units of Advanced Placement Calculus credit	
Series B (10)	10
MATH 19 Calculus & MATH 20 and Calculus & MATH 21 and Calculus	
Series C (10)	10
MATH 41 Calculus or MATH 41A Calculus ACE	
MATH 42 Calculus or MATH 42A Calculus ACE	

3. Continuous Fundamentals Level 2—Multivariable Calculus

	Units
Select one of the following: ¹	
CME 100 Vector Calculus for Engineers	5

CME 100A	Vector Calculus for Engineers, ACE	6
MATH 51	Linear Algebra and Differential Calculus of Several Variables	5
MATH 51A	Linear Algebra and Differential Calculus of Several Variables, ACE	6
MATH 51H	Honors Multivariable Mathematics	5

¹ MATH 52 Integral Calculus of Several Variables and/or MATH 53 Ordinary Differential Equations with Linear Algebra, or CME 102 Ordinary Differential Equations for Engineers and/or CME 104 Linear Algebra and Partial Differential Equations for Engineers, are recommended and may be required for some optional higher level courses.

4. Continuous Fundamentals Level 3—Probability and Statistics

Select one of the following:

CS 109	Introduction to Probability for Computer Scientists	3-5
STATS 116	Theory of Probability	3-5
STATS 110	Statistical Methods in Engineering and the Physical Sciences	4-5
MS&E 120	Probabilistic Analysis	5
EE 178	Probabilistic Systems Analysis	3-4
MATH 151	Introduction to Probability Theory	3
CME 106/ENGR 155C	Introduction to Probability and Statistics for Engineers	3-4

5. Discrete Fundamentals

a. Computing Level 1 (3-5)		3-5
CS 106A	Programming Methodology	
b. Computing Level 2 (3-5)		3-5
Select one of the following:		
CS 106B	Programming Abstractions	
CS 106X	Programming Abstractions (Accelerated)	
c. Logic and Computational Theory (3-5)		3-5
Select one of the following:		
CS 103	Mathematical Foundations of Computing	
PHIL 150	Basic Concepts in Mathematical Logic	
PHIL 150E	Logic in Action: A New Introduction to Logic	

6. Technical Depth

Two courses chosen from the list below (from either the same or different areas), appropriate to a student's concentration. Students concentrating in HCI, AI, or Computer Music must take CS 107 Computer Organization and Systems. Other concentrations may also restrict the particular courses that can be taken to fulfill this requirement. See concentration lists at <http://symsys.stanford.edu/viewing/htmldocument/16190>

Area A. Computer Programming (3-5)		
CS 107	Computer Organization and Systems (required for HCI, AI, or Computer Music)	3-5
Area B. Computational Theory (6-9) ¹		
CS 154	Introduction to Automata and Complexity Theory	3-4
CS 161	Design and Analysis of Algorithms	3-5
Area C. Logic (15)		

CS 157	Logic and Automated Reasoning	3
PHIL 151	First-Order Logic	4
PHIL 152	Computability and Logic	4
PHIL 154	Modal Logic	4

Area D. Decision Theory/Game Theory (14-15)

CS 224M	Multi-Agent Systems	3
ECON 160	Game Theory and Economic Applications	5
MS&E 236/236H	Game Theory with Engineering Applications	3
MS&E 252	Decision Analysis I: Foundations of Decision Analysis	3-4

Area E. Probability and Statistics (6-7)

STATS 200	Introduction to Statistical Inference	3
CS 228	Probabilistic Graphical Models: Principles and Techniques	3-4

¹ CS 156 is not offered in 2012-13 but may be used to fulfill this requirement.

7. Philosophical Foundations Level 1

Introductory Philosophy (3-5) ¹		3-5
Select one of the following:		
PHIL 1	Introduction to Philosophy	
PHIL 2	Introduction to Moral Philosophy	
PHIL 60	Introduction to Philosophy of Science	
PHIL 102	Modern Philosophy, Descartes to Kant	

¹ The following courses are no longer offered but may be used by students who completed them in fulfillment of this requirement: IHUM 10A,B, IHUM 23A,B, and IHUM 67.

8. Philosophical Foundations Level 2

PHIL 80	Mind, Matter, and Meaning	5
---------	---------------------------	---

9. Philosophical Foundations Level 3

Select one of the following advanced undergraduate course in metaphysics/epistemology: ¹		
PHIL 162	Philosophy of Mathematics	4
PHIL 164	Central Topics in the Philosophy of Science: Theory and Evidence	4
PHIL 166	Probability: Ten Great Ideas About Chance	4
PHIL 180	Metaphysics	4
PHIL 180A	Realism, Anti-Realism, Irrealism, Quasi-Realism	4
PHIL 181	Philosophy of Language	4
PHIL 182	Truth	2-4
PHIL 184	Theory of Knowledge	4
PHIL 184B	Philosophy of the Body	4
PHIL 184F	Feminist Theories of Knowledge	4
PHIL 184P	Probability and Epistemology	4
PHIL 185	Memory	4
PHIL 185B	Philosophy of Perception	4
PHIL 186	Philosophy of Mind	4

PHIL 187	Philosophy of Action	4
PHIL 188	Personal Identity	4
PHIL 189	Examples of Free Will	4

¹ The following courses are not offered this year but may be used by students who completed them in fulfillment of this requirement: PHIL 168 and PHIL 169.

10. Cognition and Neuroscience

		Units
PSYCH 45	Introduction to Learning and Memory	3
PSYCH 50	Introduction to Cognitive Neuroscience	4
PSYCH 55	Introduction to Cognition and the Brain	4

An additional undergraduate course in cognition and/or neurosciences¹

Select one of the following:

BIO 20	Introduction to Brain and Behavior
PSYCH 30	Introduction to Perception
PSYCH 45	Introduction to Learning and Memory
PSYCH 50	Introduction to Cognitive Neuroscience
PSYCH 60	Introduction to Developmental Psychology
PSYCH 70	Introduction to Social Psychology
PSYCH 131	Language and Thought
PSYCH 141	Cognitive Development
PSYCH 154	Judgment and Decision-Making

¹ The following course is not offered this year but may be used by students who completed them in fulfillment of this requirement: PSYCH 133

11. Natural Language

		Units
Language and Mind (4)		4

Select one of the following:

LINGUIST 1	Introduction to Linguistics
LINGUIST 106	Introduction to Speech Perception
LINGUIST 140	Language Acquisition I
PSYCH 131	Language and Thought

Linguistic Theory (4)		4
------------------------------	--	---

Select one of the following:

LINGUIST 110	Introduction to Phonetics and Phonology
LINGUIST 120	Introduction to Syntax
LINGUIST 130A/230A	Introduction to Semantics and Pragmatics

12. Computation and Cognition

Select one of the following:

A course applying core technical skills to cognition	
CS 221	Artificial Intelligence: Principles and Techniques
CS 222	Rational Agency and Intelligent Interaction
CS 224M	Multi-Agent Systems
CS 227	Knowledge Representation and Reasoning
CS 228	Probabilistic Graphical Models: Principles and Techniques

CS 229	Machine Learning
LINGUIST 180/CS 124	From Languages to Information
LINGUIST 182	Computational Theories of Syntax
PSYCH 204	Computation and cognition: the probabilistic approach
PSYCH 209	Models of Cognitive Processes
PSYCH 239	Formal and Computational Approaches in Psychology and Cognitive Science

Advanced Small Seminar Requirement

An upper-division, limited-enrollment seminar drawing on material from other courses in the core. Courses listed under Symbolic Systems Program offerings with numbers from SYMSYS 200 Symbolic Systems in Practice through SYMSYS 209 Battles Over Bits are acceptable, as are other courses which are announced at the beginning of each academic year. A course taken to fulfill this requirement can also be counted toward another requirement, as part of either the core or a student's concentration (see below), but not both.

Fields of Study

In addition to the core requirements listed above, the Symbolic Systems major requires each student to complete a field of study consisting of five courses that are thematically related to each other. Students select concentrations from the list below or design others in consultation with their advisers. The field of study is declared on Axxess; it appears on the transcript but not on the diploma.

- Applied Logic
- Artificial Intelligence
- Cognitive Science
- Computer Music
- Decision Making and Rationality
- Human-Computer Interaction
- Learning
- Natural Language
- Neurosciences
- Philosophical Foundations

Undergraduate Research

The program encourages all SSP majors to gain experience in directed research by participating in faculty research projects or by pursuing independent study. In addition to the Symbolic Systems Honors Program (see below), the following avenues are offered.

Summer Internships: students work on SSP-related faculty research projects. Application procedures are announced in the winter quarter for SSP majors.

Research Assistantships: other opportunities to work on faculty research projects are typically announced to SSP majors as they arise during the academic year.

Independent Study: under faculty supervision. For course credit, students should enroll in SYMSYS 196 Independent Study.

Contact SSP for more information on any of these possibilities, or see the Symbolic Systems (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/symbolicsystems/http://symsys.stanford.edu>) web site. In addition, the Undergraduate Advising and

Research office offers grants and scholarships supporting student research projects at all levels; see http://ual.stanford.edu/OO/research_opps/Grants.

Honors Program

Seniors in SSP may apply for admission to the Symbolic Systems honors program prior to the beginning of their final year of study. Students who are accepted into the honors program can graduate with honors by completing an honors thesis under the supervision of a faculty member. Course credit for the honors project may be obtained by registering for , for any quarters while a student is working on an honors project. Juniors who are interested in doing an honors project during their senior year are advised to take SYMSYS 200 Symbolic Systems in Practice. SYMSYS 191 Senior Honors Seminar, is recommended for honors students during the senior year. Contact SSP or visit the program's web site for more information on the honors program, including deadlines and policies.

Minor in Symbolic Systems

Students may minor in Symbolic Systems by completing either Option 1 or Option 2. For additional information see the Symbolic Systems minors web site (<http://symsys.stanford.edu/viewing/htmldocument/13635>).

Option 1

One course in each of the following core areas (please note that several of these courses have prerequisites):

	Units
a. Cognition (4)	
SYMSYS 100 Introduction to Cognitive and Information Sciences	4
1	
or PSYCH 55 Introduction to Cognition and the Brain	
b. Logic and Computation (3-5)	
Select one of the following:	3-5
PHIL 150 Basic Concepts in Mathematical Logic	
PHIL 150E Logic in Action: A New Introduction to Logic	
PHIL 151 First-Order Logic	
CS 103 Mathematical Foundations of Computing	
c. Computer Programming (3-5)	
Select one of the following:	3-5
CS 106B Programming Abstractions	
CS 106X Programming Abstractions (Accelerated)	
CS 107 Computer Organization and Systems	
d. Philosophical Foundations (9-10)	
SYMSYS 100 Introduction to Cognitive and Information Sciences	4-5
1	
or PHIL 80 Mind, Matter, and Meaning	
PHIL 80 Mind, Matter, and Meaning	5
e. Formal Linguistics (4)	
LINGUIST 110 Introduction to Phonetics and Phonology	4
Select one of the following:	
LINGUIST 120 Introduction to Syntax	
LINGUIST 130A Introduction to Semantics and Pragmatics	
f. Artificial Intelligence (3-4)	
CS 221 Artificial Intelligence: Principles and Techniques	3-4
CS 222 Rational Agency and Intelligent Interaction	
CS 224M Multi-Agent Systems	

CS 227	Knowledge Representation and Reasoning
CS 228	Probabilistic Graphical Models: Principles and Techniques
CS 229	Machine Learning
LINGUIST 180	From Languages to Information
LINGUIST 182	Computational Theories of Syntax
PSYCH 204	Computation and cognition: the probabilistic approach
PSYCH 209	Models of Cognitive Processes
PSYCH 239	Formal and Computational Approaches in Psychology and Cognitive Science

¹ SYMSYS 100 Introduction to Cognitive and Information Sciences may not be counted for both areas 'a' and 'd'.

Option 2

SYMSYS 100 Introduction to Cognitive and Information Sciences, plus an interdisciplinary SSP concentration listed on the SSP (<http://symsys.stanford.edu/viewing/htmldocument/16190>) web site. To qualify, the selection of courses used for the minor must be interdisciplinary; it must either include courses from at least three departments, or include more than one course from each of two departments.

Coterminal Bachelor's and Master's Degrees in Symbolic Systems

Many SSP majors also complete coterminal M.S. or M.A. degrees in affiliated departments. In addition to the Symbolic Systems M.S. program, the Department of Philosophy offers a Special Program in Symbolic Systems track for interdisciplinary graduate level work leading to the Master of Arts in Philosophy (<http://www.stanford.edu/dept/registrar/bulletin/6567.htm>).

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees (p. 36)" section of this bulletin. For University coterminal degree program rules and University application forms, see the Publications and Online Guides (<http://studentaffairs.stanford.edu/registrar/publications/#Coterm>) web site.

Master of Science in Symbolic Systems

The University's basic requirements for the M.S. degree is discussed in the "Graduate Degrees (p. 38)" section of this bulletin.

The M.S. degree in Symbolic Systems is designed to be completed in the equivalent of one academic year by coterminal students or returning students who already have a B.S. degree in Symbolic Systems, and in two years or less by other students depending upon level of preparation. Admission is competitive, providing a limited number of students with the opportunity to pursue course and project work in consultation with a faculty adviser who is affiliated with the Symbolic Systems Program. The faculty adviser may impose requirements beyond those described here.

Admission to the program as a coterminal student is subject to the policies and deadlines described in the "Coterminal Bachelor's and Master's Degrees (p. 36)" section of this bulletin. Applicants to the M.S. program are reviewed each Winter Quarter. Information on deadlines, procedures for applying, and degree requirements are available from the program's student services coordinator in the Linguistics Department office (460-127E)

and at the Symbolic Systems (<http://symsys.stanford.edu/viewing/htmldocument/13623>) web site.

Degree Requirements

A candidate for the M.S. degree in Symbolic Systems must complete a program of 45 units. At least 36 of these must be graded units, passed with an average grade of 3.0 (B) or better. Any course taken as part of the 45-unit program must be taken for a letter grade unless the course is offered 'S/NC' only. Furthermore, none of the 45 units to be counted toward the M.S. degree may include units counted toward an undergraduate degree at Stanford or elsewhere. Course requirements are waived only if evidence is provided that similar or more advanced courses have been taken, either at Stanford or another institution. Courses that are waived rather than taken may not be counted toward the M.S. degree. For additional information, see the Symbolic Systems web site (http://symsys.stanford.edu/graduate_programs).

Each candidate for the M.S. degree must fulfill the following requirements:

1. Submission to the Symbolic Systems Program office and approval of the following pre-project research documents:
 - A. Project Area Statement, endorsed with a commitment from a student's prospective project adviser no later than May 1 of the academic year prior to the expected graduation year; and
 - B. Qualifying Research Paper due no later than the end of the Summer Quarter prior to the expected graduation year.
2. Completion of a coherent plan of study, to be approved by the Graduate Studies Director in consultation with the student's adviser and designed to support a student's project. An initial plan of study should be delineated on the Program Proposal Form prior to the end of the student's first quarter of study, to be modified at the time of the Project Area Statement with the approval of a student's adviser and the Graduate Studies Director. The plan of study must include courses more advanced than the Symbolic Systems undergraduate core in four main skill areas: formal, empirical, computational, and philosophical; and in at least three of the following departments: Computer Science, Linguistics, Philosophy, and Psychology. More advanced courses in each of the skill areas are defined as follows:

a) formal: a course in logic and computational theory beyond the level of PHIL 151 First-Order Logic. The courses below have been approved. Other courses may be approved if appropriate.

- PHIL 252 Computability and Logic
- PHIL 254 Modal Logic
- PHIL 350A Model Theory
- PHIL 352A Set Theory
- PHIL 355 Logic and Social Choice
- CS 154 Introduction to Automata and Complexity Theory
- CS 157 Logic and Automated Reasoning
- CS 161 Design and Analysis of Algorithms
- CS 364A Algorithmic Game Theory

b) empirical: a course drawing on experimental or observational data or methods, beyond the level of Psych 55, Ling 120, or Ling 130A. The courses below are examples of those that have been approved. Other courses may be approved if appropriate.

- COMM 268 Experimental Research in Advanced User Interfaces
- CS 224N Natural Language Processing
- CS 376 Research Topics in Human-Computer Interaction
- LINGUIST 230B Advanced Semantics and Pragmatics
- LINGUIST 241 Language Acquisition II
- LINGUIST 274C Linguistic Field Methods: Syntax

- NBIO 258 Information and Signaling Mechanisms in Neurons and Circuits
- PSYCH 204 Computation and cognition: the probabilistic approach
- PSYCH 204A Human Neuroimaging Methods
- PSYCH 252 Statistical Methods for Behavioral and Social Sciences
- PSYCH 254 Lab in Experimental Methods
- STATS 200 Introduction to Statistical Inference

c) computational: a course involving programming beyond the level of CS 107. The courses below have been approved. Other courses may be approved if appropriate.

- CS 108 Object-Oriented Systems Design
- CS 110 Principles of Computer Systems
- CS 124 From Languages to Information
- CS 142 Web Applications
- CS 143 Compilers
- CS 148 Introduction to Computer Graphics and Imaging
- CS 249A Object-Oriented Programming from a Modeling and Simulation Perspective

d) philosophical: a course in the area of Philosophy of Mind/Language/Science/Epistemology or Metaphysics at the 200 level or above, certified by the instructor as worthy of graduate credit. The courses below are examples of those that have been approved. Other courses may be approved if appropriate.

- PHIL 264 Central Topics in the Philosophy of Science: Theory and Evidence
- PHIL 267B Philosophy, Biology, and Behavior
- PHIL 280 Metaphysics
- PHIL 281 Philosophy of Language
- PHIL 285B Philosophy of Perception
- PHIL 286 Philosophy of Mind
- PHIL 287 Philosophy of Action
- PHIL 383B What's an Inference?
- CS 378 Phenomenological Foundations of Cognition, Language, and Computation
- SYMSYS 206 philosophy of neuroscience

3. Completion of three quarters of SYMSYS 291 Master's Program Seminar.

4. Completion of a substantial project appropriate to the program plan, represented by the M.S. Thesis, the last of the the M.S research documents (<http://symsys.stanford.edu/viewing/htmldocument/13678>). The project normally takes three quarters, and work on the project may account for up to 15 units of a student's program. The thesis must be read and approved for the master's degree in Symbolic Systems by two qualified readers approved by the program, at least one of whom must be a member of the academic council. A copy of the thesis must be submitted (in both print and electronic forms) to the Associate Director of Symbolic Systems, with the print version including the signatures of each reader indicating approval of the thesis for the degree of Master of Science, no later than 5 pm on the last day of finals week in the quarter of a student's graduation.

Director: Kenneth Taylor

Director of Graduate Studies: Kenneth Taylor

Associate Director: Todd Davies

Program Committee: Lera Boroditsky, Herbert Clark, Todd Davies, Daniel Jurafsky, Scott Klemmer, Daphne Koller, Krista Lawlor, Christopher Manning, James McClelland, Clifford Nass, Stanley Peters, Christopher

Potts, Eric Roberts, Ivan A. Sag, Kenneth A. Taylor, Johan van Benthem, Thomas A. Wasow, Terry Winograd

Program Faculty:

Applied Physics: Bernardo Huberman (Consulting Professor)

Art and Art History: Scott Bukatman (Associate Professor)

Classics: Reviel Netz (Professor)

Civil and Environmental Engineering: John Kunz (Lecturer)

Communication: Jeremy Bailenson (Associate Professor), Clifford J. Nass (Professor), Byron Reeves (Professor), Frederick Turner (Associate Professor)

Computer Science: David Dill (Professor), Michael Genesereth (Associate Professor), Jeffrey Heer (Assistant Professor), Oussama Khatib (Professor), Scott Klemmer (Associate Professor), Daphne Koller (Professor), Jean-Claude Latombe (Professor, emeritus), Marc Levoy (Professor), Christopher Manning (Professor), Andrew Ng (Associate Professor), Nils Nilsson (Professor, emeritus), Vaughan Pratt (Professor, emeritus), Eric Roberts (Professor, Teaching), Tim Roughgarden (Associate Professor), Mehran Sahami (Associate Professor, Teaching), Sebastian Thrun (Professor), Terry Winograd (Professor)

Economics: Muriel Niederle (Associate Professor)

Education: Raymond P. McDermott (Professor), Roy Pea (Professor), Daniel Schwartz (Professor)

Electrical Engineering: Krishna Shenoy (Professor)

French and Italian: Jean-Pierre Dupuy (Professor)

Genetics: Russ B. Altman (Professor)

Graduate School of Business: Baba Shiv (Professor)

History: Jessica G. Riskin (Associate Professor)

Linguistics: Arto Anttila (Associate Professor), Joan Bresnan (Professor, emerita), Eve Clark (Professor), Daniel Jurafsky (Associate Professor), Ronald Kaplan (Consulting Professor), Lauri Karttunen (Consulting Professor), Martin Kay (Professor), Beth Levin (Professor), Christopher Manning (Associate Professor), Stanley Peters (Professor, emeritus), Christopher Potts (Associate Professor), Ivan A. Sag (Professor), Meghan Summer (Assistant Professor), Thomas A. Wasow (Professor), Annie Zaenen (Consulting Professor),

Management Science and Engineering: Pamela Hinds (Associate Professor)

Mathematics: Persi Diaconis (Professor), Solomon Feferman (Professor, emeritus)

Medicine: Russ B. Altman (Professor), Mark Musen (Professor)

Music: Jonathan Berger (Professor), Christopher Chafe (Professor), Eleanor Selfridge-Field (Consulting Professor), Ge Wang (Assistant Professor)

Neurobiology: Ben Barres (Professor), William T. Newsome (Professor), Jennifer Raymond (Associate Professor)

Philosophy: Michael Bratman (Professor), Alexis Burgess (Assistant Professor), Mark Crimmins (Associate Professor), John Etchemendy (Professor), Solomon Feferman (Professor, emeritus), Dagfinn Føllesdal (Professor, emeritus), Krista Lawlor (Associate Professor), Anna-Sara Malmgren (Assistant Professor), Grigori Mints (Professor), John Perry (Professor, emeritus), Brian Skryms (Professor), Kenneth Taylor (Professor), Johan van Benthem (Professor), Thomas A. Wasow (Professor)

Psychiatry and Behavioral Sciences: Vinod Menon (Associate Professor, Research)

Psychology: Lera Boroditsky (Assistant Professor), Herbert H. Clark (Professor), Anne Fernald (Associate Professor), Michael Frank (Assistant Professor), Noah Goodman (Assistant Professor), Brian Knutson (Associate Professor), Ellen Markman (Professor), James McClelland (Professor), Samuel McClure (Assistant Professor), Barbara Tversky (Professor, emerita), Anthony Wagner (Professor), Brian Wandell (Professor)

Statistics: Persi Diaconis (Professor), Susan P. Holmes (Professor, Teaching)

Symbolic Systems: Todd Davies (Lecturer), Jeff Shrager (Consulting Professor), Paul Skokowski (Consulting Professor)

Other Affiliates: David Barker-Plummer (CSLI Engineering Research Associate), Keith Devlin (CSLI Senior Researcher), Daniel Flickinger (CSLI Senior Research Engineer), Stephan Oepen (CSLI Senior Research Engineer)

Cognate Courses for the Bachelor's Degree

The following is a list of cognate courses that may be applied to the B.S. in Symbolic Systems. Click on the course or see ExploreCourses for course descriptions and General Education Requirements (GER) information.

Core

		Units
BIO 20	Introduction to Brain and Behavior	3
CME 100	Vector Calculus for Engineers	5
CME 100A	Vector Calculus for Engineers, ACE	6
CME 106	Introduction to Probability and Statistics for Engineers	3-4
CS 103	Mathematical Foundations of Computing	3-5
CS 106A	Programming Methodology	3-5
CS 106B	Programming Abstractions	3-5
CS 106X	Programming Abstractions (Accelerated)	3-5
CS 107	Computer Organization and Systems	3-5
CS 109	Introduction to Probability for Computer Scientists	3-5
CS 124	From Languages to Information	3-4
CS 154	Introduction to Automata and Complexity Theory	3-4
CS 157	Logic and Automated Reasoning	3
CS 161	Design and Analysis of Algorithms	3-5
CS 221	Artificial Intelligence: Principles and Techniques	3-4
CS 222	Rational Agency and Intelligent Interaction	3
CS 224M	Multi-Agent Systems	3
CS 227	Knowledge Representation and Reasoning	3
CS 228	Probabilistic Graphical Models: Principles and Techniques	3-4
CS 229	Machine Learning	3-4
ECON 160	Game Theory and Economic Applications	5
EE 178	Probabilistic Systems Analysis	3-4
ENGR 155C	Introduction to Probability and Statistics for Engineers	3-4
ETHICSOC 20	Introduction to Moral Philosophy	5

Cognate Courses for the Master's Degree

The following is a list of cognate courses that may be applied to the M.S. in Symbolic Systems. Click on the course or see ExploreCourses for course descriptions and General Education Requirements (GER) information.

		Units
BIO 153	Cellular Neuroscience: Cell Signaling and Behavior	4
BIO 154	Molecular and Cellular Neurobiology	4
BIO 222	Exploring Neural Circuits	3
BIO 250	Human Behavioral Biology	5
BIO 258	Developmental Neurobiology	4
BIO 263	Neural Systems and Behavior	4
BIOMEDIN 251	Outcomes Analysis	3
CME 100	Vector Calculus for Engineers	5
CME 100A	Vector Calculus for Engineers, ACE	6
CME 106	Introduction to Probability and Statistics for Engineers	3-4
CME 108	Introduction to Scientific Computing	3-4

COMM 206	Communication Research Methods	4-5
COMM 220	Digital Media in Society	4-5
COMM 268	Experimental Research in Advanced User Interfaces	1-5
COMM 269	Computers and Interfaces	4-5
COMM 272	Media Psychology	4-5
CS 103	Mathematical Foundations of Computing	3-5
CS 106A	Programming Methodology	3-5
CS 106X	Programming Abstractions (Accelerated)	3-5
CS 107	Computer Organization and Systems	3-5
CS 108	Object-Oriented Systems Design	3-4
CS 109	Introduction to Probability for Computer Scientists	3-5
CS 142	Web Applications	3
CS 147	Introduction to Human-Computer Interaction Design	3-4
CS 148	Introduction to Computer Graphics and Imaging	3-4
CS 154	Introduction to Automata and Complexity Theory	3-4
CS 157	Logic and Automated Reasoning	3
CS 161	Design and Analysis of Algorithms	3-5
CS 170	Stanford Laptop Orchestra: Composition, Coding, and Performance	1-5
CS 181	Computers, Ethics, and Public Policy	4
CS 204	Computational Law	3
CS 205A	Mathematical Methods for Robotics, Vision, and Graphics	3
CS 207	The Economics of Software	1
CS 221	Artificial Intelligence: Principles and Techniques	3-4
CS 222	Rational Agency and Intelligent Interaction	3
CS 223A	Introduction to Robotics	3
CS 224M	Multi-Agent Systems	3
CS 224N	Natural Language Processing	3-4
CS 224S	Speech Recognition and Synthesis	2-4
CS 224U	Natural Language Understanding	3-4
CS 225A	Experimental Robotics	3
CS 225B	Robot Programming Laboratory	3-4
CS 227	Knowledge Representation and Reasoning	3
CS 227B	General Game Playing	3
CS 228	Probabilistic Graphical Models: Principles and Techniques	3-4
CS 229	Machine Learning	3-4
CS 247	Human-Computer Interaction Design Studio	3-4
CS 261	Optimization and Algorithmic Paradigms	3
CS 270	Modeling Biomedical Systems: Ontology, Terminology, Problem Solving	3
CS 274	Representations and Algorithms for Computational Molecular Biology	3-4
CS 276	Information Retrieval and Web Search	3
CS 294H	Research Project in Human-Computer Interaction	3
CS 303	Designing Computer Science Experiments	3
CS 326A	Motion Planning	3
CS 364A	Algorithmic Game Theory	0
CS 376	Research Topics in Human-Computer Interaction	3-4
CS 377	Topics in Human-Computer Interaction	2-3
CS 377L	Learning in a Networked World: Learning Analytics in Technology-Enhanced Education	3
CS 378	Phenomenological Foundations of Cognition, Language, and Computation	3-4

CS 447	Software Design Experiences	3-4	LINGUIST 281	Grammar Engineering	1-4
CS 448B	Data Visualization	3	LINGUIST 282	Computational Theories of Syntax	3-4
ECON 102B	Introduction to Econometrics	5	LINGUIST 284	Natural Language Processing	3-4
ECON 102C	Advanced Topics in Econometrics	5	LINGUIST 285	Speech Recognition and Synthesis	2-4

PSYCH 204B	Computational Neuroimaging: Analysis Methods	1-3			
PSYCH 205	Foundations of Cognition	1-3			
PSYCH 212	Social Psychology	1-3			
PSYCH 215	Mind, Culture, and Society	3			
PSYCH 221	Applied Vision and Image Systems	1-3			
PSYCH 223	Social Norms	4			
PSYCH 226	Models and Mechanisms of Memory	1-3			
PSYCH 228	Ion Transport and Intracellular Messengers	1-3			
PSYCH 232	Brain and Decision Making	3			
PSYCH 239	Formal and Computational Approaches in Psychology and Cognitive Science	3			
PSYCH 245	Social Psychological Perspectives on Stereotyping and Prejudice	3			

Theater and Performance Studies

Courses offered by the Department of Theater and Performance Studies are listed on the Stanford Bulletin's ExploreCourses web site under the subject codes TAPS (<https://explorecourses.stanford.edu/search?q=TAPS&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-TAPS=on>) and DANCE (<https://explorecourses.stanford.edu/search?q=DANCE&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-DANCE=on>).

term=Summer=&on&filter-coursestatus=Active=&on&collapse=&filter-catalognumber=DANCE=&on&filter-catalognumber=DANCE=&on).

Mission of the Undergraduate Program in Theater and Performance Studies

The mission of the undergraduate program in Theater and Performance Studies is to provide a strong, non-conservatory program that joins the study and practice of performance within the context of a liberal arts curriculum. The department aims to provide students with a strong grasp of historical, cultural, and practical contexts in which performance develops. With close faculty contact, department majors pursue areas of interest that may include acting, directing, writing, dance, devised theater, video, installation, design, stage management, performance theory, and cultural studies. During the senior year students have the option of completing a senior project in addition to fulfilling the 60 units required for the major.

Learning Outcomes (Undergraduate)

The department expects undergraduate majors in the program to achieve the following learning outcomes:

1. the ability to combine literary and historical analyses within the discipline
2. the ability to put aesthetic and creative skills into practice
3. the ability to find organic and meaningful ways of integrating theory and practice
4. the ability to use effective research and writing skills that compliment practical work

Mission of the Graduate Program in Theater and Performance Studies

The graduate program in Theater and Performance Studies cultivates students who advance the field, working on the leading edge of scholarship and performance. Combining theoretical research and creative practice, the Ph.D. program includes the study of critical theory, dramatic literature, performance theory, theater history, and performance making. The program provides rich opportunities to collaborate with leading scholars, artists, faculty and visiting fellows. Faculty are committed to helping each student develop a unique portfolio of scholarly and practice-based expertise as well as mentoring students as they pursue their careers.

Learning Outcomes (Graduate)

The Ph.D. is conferred upon candidates who have demonstrated substantial scholarship and the ability to conduct independent research and analysis in Theater and Performance Studies. Through completion of advanced course work and rigorous skills training, the doctoral program prepares students to make original contributions to the knowledge of Theater and Performance Studies and to interpret and present the results of such research.

Institute for Diversity in the Arts and Black Performing Arts Division

The Institute for Diversity in the Arts (IDA) is an interdisciplinary program in the humanities that involves students in the study of culture, identity and diversity through artistic expression. The Committee on Black Performing Arts (CBPA) and the Institute for Diversity in the Arts (IDA) merged in Autumn 2005. The mission of IDA/CBPA is to engage artists, students, and the local community collaboratively to create performance and visual art that examine the intersections among race, diversity, and social action through programming that includes artist residencies, classes, workshops, public performances, a lecture series, and symposia. The division produces annual student productions and is a resource for student organizations promoting artistic expression through the exploration of the impact of ethnic representation in the arts, literature, media, and pop culture. The programs prepare students for work in areas including the arts and community development. Students have gone on to graduate-level critical studies, M.F.A. programs, public service, government and politics, arts administration, and teaching. Students can pursue an IDA concentration through the Comparative Studies in Race and Ethnicity major; students can also emphasize Black performance through the African and African American Studies major.

Dance Division

The Stanford Dance Division offers a range of broadly diverse approaches to dance as a performing art, cultural practice, political act and embodiment of ideology and beliefs. All of the dimensions through which one comes to experience dance, from studying a range of dance techniques, choreographing and performing, to viewing and critically and historically assessing dance, are represented in the course offerings of the Dance Division.

Bachelor of Arts in Theater and Performance Studies

The requirements for the B.A. degree in Theater and Performance Studies are designed to integrate the critical and historical study of drama with the study and experience of performance. A total of 60 units are required to obtain a B.A. degree in Theater and Performance Studies. The major provides aesthetic and critical opportunities for students to develop special aptitudes. Students are encouraged to declare the major in their sophomore year.

Suggested Preparation for the Major

Prospective majors in the first two years of study at Stanford are encouraged to take part in casting opportunities in department productions or independent undergraduate performing arts groups.

Recommended Preparatory Courses: Two years of a college-level foreign language.

Degree Requirements - 60 units total for the major

A course may be listed in more than one area; however, each course can only satisfy one major requirement. A course cannot be double-counted for different requirements in the major. Additionally, students may petition the department undergraduate adviser to have additional courses offered

by the department count towards requirements in areas 2, 3, and 4. All introductory courses are required with no exceptions.

1. Introductory Core Courses—12 units

		Units
TAPS 1	Introduction to Theater and Performance Studies	4
TAPS 30	How Theater is Designed	4
TAPS 171	Performance Making: Process (TAPS 101P, while not offered 2012-13, also satisfies the Introductory Core Course requirement)	5

2. Theatrical Literature/History—14 units

- Any course between TAPS 150-169, DANCE 160-161. The following courses are offered in 2012-13:

		Units
TAPS 151H	Improvisational Strategy Laboratory for Innovation through Performance	4-5
TAPS 153S	Japanese Theater: Noh to Contemporary Performance	4
TAPS 154S	Theater and Legal Regulation	4
TAPS 155T	Theatre of War	4
TAPS 158H	Proximity and Temporality in Performance	4-5
TAPS 158L	The Ethics of Storytelling: The Autobiographical Monologue in Theory, in Practice, and in the World	4
TAPS 160	Performance and History: Rethinking the Ballerina	4
DANCE 160	Performance and History: Rethinking the Ballerina	4
TAPS 161H	Dance, History and Conflict	4
TAPS 164T	Queer Art and Performance	4-5
TAPS 166H	Historiography of Theater	3-5

3. Theatrical Performance Courses: Acting, Dance, Design, Directing, and Playwriting—13 units

- Any course in DANCE 30-149
- Acting courses between TAPS 21-29, 103-105, 120-129, 203, 201V, 210. The following courses are offered in 2012-13:

		Units
TAPS 103	Beginning Improvising	3
TAPS 105V	Improv & Design	2
TAPS 120A	Fundamentals of Acting	1-3
TAPS 120B	Fundamentals of Acting	1-3
TAPS 120V	Vocal Production and Audition	1-3
TAPS 121C	Physical Characterization	3
TAPS 122P	Arthur Miller's "The Crucible, and Stephen Karam's "Speech and Debate,"	2-9

- Directing, Playwriting and Dramaturgy courses between TAPS 170-179. The following courses are offered in 2012-13:

		Units
TAPS 170B	Directing Workshop: The Actor-Director Dialogue	5
TAPS 171	Performance Making: Process	5
TAPS 173	SOLO PERFORMANCE	4-5
TAPS 174A	Performance Making: Production	5

TAPS 177	Writing for Performance: The Fundamentals	5
TAPS 178	Page to Stage: Playwriting and Solo Performance	3-5
TAPS 179	Chicano & Chicana Theater: Politics In Performance	3-5
TAPS 179C	Chroniclers of Desire: Creative Non-Fiction Writing Workshop	3-5
TAPS 179G	Indigenous Identity in Diaspora: People of Color Art Practice in North America	3-5

- Design, Stage Management, and Production courses between TAPS 28, 31, 42, 131-133, 137-139D, 140, 231-240. The following courses are offered in 2012-13:

		Units
TAPS 28	Makeup for the Stage	2
TAPS 31	Introduction to Lighting and Production	4
TAPS 131	Lighting Design	4
TAPS 132	Costume Design	4
TAPS 133	Stage Scenery Design	3-4
TAPS 137	Hand Drafting for Designers	3
TAPS 140	Projects in Theatrical Production	1-4

4. Theatrical Production—9 units

		Units
TAPS 34	Stage Management Techniques	4
TAPS 39	Theatre Crew	1-3
TAPS 134	Stage Management Project	2-5

5. Senior Project—2 units

		Units
TAPS 200	Senior Project	2-9

- All Theater and Performance Studies Majors must complete a Senior Project. The project must be a significant work in any area of theater/performance, such as: creating a performance through devising an original piece; writing, directing, and/or performing a major role; or another creative enterprise that requires an original contribution.
- The student has the option of writing an essay associated with the project.
- All majors must submit a two-page proposal to a faculty advisor of their choice area early in the junior year; details available from the undergraduate advisor. Students considering projects that include practical production should consult with the Director of Production. Practical projects are typically approved by department faculty at the end of Spring Quarter of the junior year.
- The proposal should include an outline of the courses the student has taken and grades received in the area requirements, and should describe the courses in which the student plans to enroll as part of the project.
- The proposal should describe in detail the purpose and methods involved in the project; it should include a bibliography, if appropriate, and a 1-2 page abstract of the associated essay if an essay is part of the project.
- Students receive credit for senior projects through TAPS 200; 2 units minimum are required, but additional units are available for larger projects.

6. Electives—10 units

- Any courses with the subject code TAPS or DANCE.

7. WIM—Writing in the Major.

- The following courses are offered in 2012-13:

		Units
TAPS 1	Introduction to Theater and Performance Studies	4
TAPS 160	Performance and History: Rethinking the Ballerina	4
DANCE 160	Performance and History: Rethinking the Ballerina	

Honors Program

For a limited number of students, the department confers the degree of Bachelor of Arts with Departmental Honors in Theater and Performance Studies. To be considered for departmental honors, students must meet the following requirements in addition to the other requirements of the Theater and Performance Studies major:

1. Prospective honors students must submit a written application, including transcript, establishing the student's work to date in the department and outlining the area of research that the student wishes to pursue.
2. To be admitted to the honors program, students must have an overall minimum University GPA of 3.3, as well as a GPA of 3.5 in courses counting towards the Theater and Performance Studies major.
3. For transfer students, the same GPA requirement applies at the time of transfer.
4. Students must complete the Theater and Performance Studies core requirements by the end of the junior year. Only in exceptional circumstances can this requirement be waived. Transfer from another university, extended overseas study, or temporary withdrawal from the major due to illness might constitute extenuating circumstances.
5. Students must have completed half of the courses in their specialization by the end of the junior year.
6. Students must complete 4 units in the honors colloquia, described below, beginning in Spring Quarter of the junior year and continuing in the following three regular quarters. Each quarter's colloquium is offered for 1 unit, S/NC. In extenuating circumstances (overseas study, for example), an honors program student may substitute other equivalent work for one quarter of the colloquium, with the approval of the honors adviser.
7. By the end of the sixth week of the quarter in which they plan to graduate, students in the honors program must submit an honors thesis, described below, to be read and evaluated by their thesis committee.
8. On the basis of a student's work in the Theater and Performance Studies core, in the area of specialization, on the senior project, in the honors colloquia, and on the honors thesis, the faculty determines and confers honors on graduating students who have completed the honors program.
9. Failure to meet any of these requirements, or to make satisfactory progress on the honors thesis, leads to dismissal from the Honors program.
10. Entry into the honors program does not guarantee a degree with honors. The final decision to confer honors is made by the student's thesis committee, upon evaluating the quality of the Senior Project and the thesis.

Honors Colloquium

The honors colloquium aims to engage honors program students in important issues in the field focusing on the students' areas of specialization and research. The honors program advisor convenes the colloquium three times per quarter and sets the agenda for meetings and discussion. Students discuss their work in the department and present and discuss their research for their Honors thesis. Students must enroll in TAPS 202 Honors Thesis.

Honors Thesis

The honors thesis typically consists of a 40-60 page essay presenting the student's research on an important issue or subject, determined by the student. The honors program adviser, the senior project adviser, and another faculty member constitute the student's honors thesis committee. They read and evaluate the thesis, and make recommendations to the faculty at large regarding its strengths and weaknesses. Additionally, students have the option of using their own senior project as a case study. In these situations, the honors thesis must critically analyze the strengths and weaknesses of the creative work. Generally, these essays tend to be shorter (about 20-25 pages) because the creative work constitutes one-half of the honors project.

Minor in Theater and Performance Studies

The requirements for the minor in Theater and Performance Studies are designed to integrate the critical and historical performance. A total of 30 units are required to obtain a Minor in Theater and Performance Studies. The minor provides aesthetic and critical opportunities for students to develop special aptitudes. Students are encouraged to declare a minor in their sophomore year.

Minor Requirements—30 units total for the minor

A course may be listed in more than one area; however, each course can only satisfy one minor requirement. There is no double credit for a course. A student may petition to the department undergraduate adviser to have additional courses offered by the department count towards requirements in areas 2 and 3. All core courses must be taken for a letter grade to satisfy the requirement.

1. Introductory Core Courses—8 units

		Units
TAPS 1	Introduction to Theater and Performance Studies	4
TAPS 30	How Theater is Designed	4
TAPS 171	Performance Making: Process (TAPS 101P, while not offered 2012-13, also satisfies the Introductory Core Course requirement)	5

2. Theatrical Literature/History—4 units

- Any course between TAPS 150-169, DANCE 160-161. The following courses are offered in 2012-13:

		Units
TAPS 151H	Improvisational Strategy Laboratory for Innovation through Performance	4-5
TAPS 153S	Japanese Theater: Noh to Contemporary Performance	4
TAPS 154S	Theater and Legal Regulation	4
TAPS 155T	Theatre of War	4
TAPS 158H	Proximity and Temporality in Performance	4-5
TAPS 158L	The Ethics of Storytelling: The Autobiographical Monologue in Theory, in Practice, and in the World	4
TAPS 160	Performance and History: Rethinking the Ballerina	4
DANCE 160	Performance and History: Rethinking the Ballerina	

TAPS 164T	Queer Art and Performance	4-5
TAPS 166H	Historiography of Theater	3-5

3. Theatrical Performance Courses: Acting, Dance, Design, Directing, and Playwriting—4 units

- Acting courses between TAPS 21-29, 103-105, 120-129, 203, 201V, 210.
- The following courses are offered in 2012-13:

		Units
TAPS 103	Beginning Improvising	3
TAPS 105V	Improv & Design	2
TAPS 120A	Fundamentals of Acting	1-3
TAPS 120B	Fundamentals of Acting	1-3
TAPS 120V	Vocal Production and Audition	1-3
TAPS 121C	Physical Characterization	3
TAPS 122P	Arthur Miller's "The Crucible," and Stephen Karam's "Speech and Debate,"	2-9

- Directing, Playwriting and Dramaturgy courses between TAPS 170-179.
- The following courses are offered in 2012-13:

		Units
TAPS 170B	Directing Workshop: The Actor-Director Dialogue	5
TAPS 171	Performance Making: Process	5
TAPS 173	SOLO PERFORMANCE	4-5
TAPS 174A	Performance Making: Production	5
TAPS 177	Writing for Performance: The Fundamentals	5
TAPS 178	Page to Stage: Playwriting and Solo Performance	3-5
TAPS 179	Chicano & Chicana Theater: Politics In Performance	3-5
TAPS 179C	Chroniclers of Desire: Creative Non-Fiction Writing Workshop	3-5
TAPS 179G	Indigenous Identity in Diaspora: People of Color Art Practice in North America	3-5

- Design, Stage Management, and Production courses between TAPS 28, 31, 42, 131-133, 137-139D, 140, 231-240, or DANCE courses 30-149.
- The following courses are offered in 2012-13:

		Units
TAPS 28	Makeup for the Stage	2
TAPS 31	Introduction to Lighting and Production	4
TAPS 131	Lighting Design	4
TAPS 132	Costume Design	4
TAPS 133	Stage Scenery Design	3-4
TAPS 137	Hand Drafting for Designers	3
TAPS 140	Projects in Theatrical Production	1-4

4. Theatrical Production—2 units

		Units
TAPS 39	Theatre Crew	1-3

5. Electives—12 units

- Any courses in TAPS or DANCE.

Minor in Theater and Performance Studies with Dance Concentration

A student declaring a minor in Theater and Performance Studies with a Dance Concentration must complete 30 units of course work in TAPS/DANCE. Upon declaring the minor, a proposed course of study must be submitted by each student in consultation with the Dance Director, Janice Ross, jross@stanford.edu, and approved by her no later than one quarter following the declaration. Declaration of the Theater and Performance Studies/Dance Minor should also be made on-line at <http://axess.stanford.edu>. Please note that special elective dance classes are offered every year and the following lists are some, but not all of the classes that fulfill the requirements. Other classes may be substituted with adviser's consent.

Minor Requirements —30 total units

1. Technique Classes:

Studio Classes: Minimum of six studio dance classes (12 units)

- A concentration of at least three classes chosen from a specific dance form (e.g., Contemporary, Modern, Jazz, Hip-Hop, Ballet, Social), and the attainment of intermediate or advanced level (at least two classes) in a style other than the concentration

2. Dance Studies Classes and TAPS Courses (12 units):

		Units
DANCE 161H	Dance, History and Conflict	4
DANCE 191	Independent Research	1-18
or DANCE 290	Special Research	
TAPS 1	Introduction to Theater and Performance Studies	4
TAPS 30	How Theater is Designed	4
TAPS 171	Performance Making: Process (TAPS 101P, while not offered 2012-13, also satisfies this course requirement)	5

3. Choreography/Repertory/Performance Classes - 6 units including 1 unit of production crew (6 units)

		Units
DANCE 27	Faculty Choreography	1
DANCE 30	The Chocolate Heads Movement Band and Performance	1
DANCE 57	Dance Repertory: Hope Mohr/Denae Hannah	1
DANCE 103	Dance, Text, Gesture: Performance and Composition	1
TAPS 39	Theatre Crew	1-3

Doctor of Philosophy in Theater and Performance Studies

University requirements for the Ph.D. are described in the "Graduate Degrees (p. 38)" section of this bulletin. All graduate study in the Department of Theater and Performance Studies (TAPS) leads to the Ph.D. degree. The doctoral program in Theater and Performance Studies aims to integrate practical theater work with the critical and historical study of dramatic literature and theory. Candidates are expected to function both as scholars and as theater directors. The curriculum offers a two-year practical concentration in directing along with the study of critical and performance theory, aesthetics, history, and literature. The goal of the program is to give students a thorough knowledge of the field that leads to original and significant scholarly work grounded in practice as well as an inventive directorial practice that is based on solid scholarly analysis.

Admission: Applicants for the Ph.D. program can visit our Theater and Performance Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/taps/http://drama.stanford.edu>) web site or write directly to the Department of Theater and Performance Studies, Attention: Graduate Admissions, for information. Online graduate applications are available at the Office of Graduate Admissions (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/taps/http://gradadmissions.stanford.edu>) web site. In addition to the required statement of purpose, applicants must submit a statement detailing their practical theater experience, a sample of their written critical work, and a statement on directing. An invitation to interview may be extended by the end of January. Graduate students in the Department of Theater and Performance Studies begin study in Autumn Quarter of each academic year; there are no mid-year admissions. Graduate students must be degree candidates.

The Department of Theater and Performance Studies awards a number of fellowships to students in the Ph.D. program.

Degree Requirements

Department requirements 2 through 9 following are in addition to the University's basic requirements for the doctorate.

1. Units and Course Requirements

1. A minimum of 135 units of graduate courses and seminars in support of the degree. These units are in addition to units for the doctoral dissertation.
2. Core seminars:

		Units
TAPS 300A	Critical Styles I	5
TAPS 300B	Critical Styles II	5
TAPS 301	Performance and Performativity	5
TAPS 303	Race and Performance: Art, Atrocity and Activism (or TAPS 302, not offered 2012-13)	5
TAPS 304	Historiography of Theater	3-5

3. Three additional graduate seminars within the Department of Theater and Performance Studies to be worked out with the advisor.
4. Four workshops in directing:

		Units
TAPS 371	Performance Making: Process	5
TAPS 372	Directing Workshop: The Actor-Director Dialogue	5
TAPS 374A	Performance Making: Production	5
TAPS 374B	Projects in Performance	3-5

1. Students take TAPS 374B, Production Project, to stage a more fully developed production chosen in consultation with the faculty.

In the first year, students take TAPS 371 Performance Making: Process which focuses on generating original creative work through a range of techniques. They also take TAPS 372 Directing Workshop: The Actor-Director Dialogue, which explores the relationship between acting and directing and actors and directors. In the second year they take TAPS 374A Performance Making: Production, which focuses on honing aesthetic and production skills for mounting a piece of work. This leads to TAPS 374B Projects in Performance, which is the production and performance of creative work approved by the Graduate Studies Committee (GSC) and supervised by a faculty member.

5. Students are allowed to take up to 6 units of TAPS 390 Directed Reading, to count towards their degree program and towards the 135 units requirement.

2. Language Requirement

The candidate must demonstrate reading knowledge of one foreign language in which there is a major body of dramatic literature. The language requirement must be met before the student can be advanced to candidacy. The language requirement may be fulfilled in any of the following ways:

1. achievement of a sufficiently high score (70th percentile) on the foreign language examination prepared by the Educational Testing Service (ETS). Latin and Greek are not tested by ETS.
2. a reading examination given each quarter by the various language departments, except for Latin and Greek.
3. pass with a grade of 'B' or higher courses in Literature/History numbered 100 or higher in a foreign language department at Stanford.

3. Examinations

Candidates must complete three examinations (comprehensive, qualifying, and department oral) by the end of the first three years of study at Stanford.

1. First-Year Comprehensive

The first year exam has two parts based on texts given to students in advance. Preparation for the two parts will include eight tutorials with faculty over the Fall and Winter quarters. Exams will be due in the 8th week of Fall and Winter quarters.

2. Second-Year Qualifying

The qualifying examination, which must be completed before advancement to candidacy at the end of the second year, consists of two 25-35-page essays. Each of these essays should demonstrate a broad knowledge of two different historical periods (pre-20th century), with emphasis on particular dramatic texts and/or performance practices. Essay topics should be designed and written up in consultation with a faculty advisor. The reading list for each period should be approved by the end of the first quarter. These essays should not duplicate any written work from seminars. After approval by the adviser, the Graduate Studies Committee reads and evaluates these essays. For the first qualifying examination, candidates must choose from the following historical periods:

- Classical
- Medieval and Renaissance
- 17th, 18th, or early 19th century

3. Third-Year Department Oral

The department oral examination requires three faculty members, at least two from the Department of Theater and Performance Studies, who most likely form the dissertation reading committee. This exam is based on a 2-3 page summary of the project and a 40-page review of the literature for the dissertation that the student creates in conjunction with the committee. This exam should be taken by the end of Spring Quarter in the third year.

4. Dissertation Prospectus

The dissertation prospectus must be approved by the candidate's advisor and by the departmental Graduate Studies Committee two quarters after taking the department oral. This should be done in the Autumn Quarter of the fourth year. Within 30 days of approval, a student should schedule a prospectus colloquium with the proposed reading committee (the dissertation director and two other faculty members). The prospectus must be prepared in close consultation with the dissertation adviser during the months preceding the colloquium. The prospectus should be approximately 15-20 pages and minimally cover three things:

1. the research question and context
2. the methodology for research
3. a lay-out of a complete chapter by chapter plan

5. University Oral Examination

The University oral examination is a defense of the dissertation based on a full draft submitted at least 75 days before the proposed degree conferral. The examining committee consists of four faculty members, at least two of whom must be from the Department of Theater and Performance Studies, as well as one faculty chair from outside the department who does not share an appointment with the department of any of the examiners. Thus the examining committee consists of five faculty members total.

6. Assistantships

1. Research Assistantship

Three quarters of research assistantship with faculty members are required. Generally, this requirement is fulfilled in the third year.

2. Teaching Assistantship

Four quarters of supervised teaching at half time are a required part of the Ph.D. program. The requirement is normally met by teaching three courses during the fourth year and one course during the fifth year.

7. Admission to Candidacy

By the end of the second year of residency, the following requirements or appropriate equivalents must be completed:

1. the core seminars:

		Units
TAPS 300A	Critical Styles I	5
TAPS 300B	Critical Styles II	5
TAPS 301	Performance and Performativity	5
TAPS 303	Race and Performance: Art, Atrocity and Activism (or TAPS 302, not offered 2012-13)	5
TAPS 304	Historiography of Theater	3-5

2. the directing workshop series, including the successful production of at least one work in public performance

3. a foreign language

4. successful completion of the comprehensive and qualifying exams.

Based on its evaluation of the student's progress, the Graduate Studies Committee certifies the student's qualifications for candidacy. Upon favorable action, the student files a formal application for candidacy, as prescribed by the University, by the end of Summer Quarter of the second year. By University policy, candidacy is valid for five years unless terminated by the department.

8. Dissertation

Normally, the Ph.D. program in Theater and Performance Studies is completed in five years. The first two years should be devoted to full-time graduate study, and the third, fourth, and fifth years to research, teaching, and writing the dissertation. A candidate taking more than five years is required to reinstate candidacy by repassing the written examinations on dramatic literature.

9. Satisfactory Progress, Annual Review

The program and progress of each student must be evaluated by the Graduate Studies Committee at the end of each academic year. At the end of the first year, the Graduate Studies Committee evaluates the work of each student in classes, seminars, examinations, and performance. Production planning in the Spring of each year for the following season is contingent upon students making satisfactory progress. Continuation in the program depends upon the recommendation of this faculty group. At the end of the second year, the committee reviews the student's work in consideration of being admitted to candidacy. At the end of the third year, students are expected to have developed an approved dissertation prospectus. Funding is contingent upon satisfactory progress. Failure to make satisfactory progress may result in dismissal from the program. University policy states that all requirements including dissertation must be completed before candidacy expires.

Emeriti: (Professors) Helen W. Schrader, Carl Weber. Alice Rayner; (*Associate Professor*) William S. Edelman; (*Senior Lecturers*) Susan Cashion, Patricia Ryan

Chair: Jennifer Brody

Department of Theater and Performance Studies (TAPS)

Professors: Jean-Marie Apostolidès (French and Italian; TAPS), Harry J. Elam, Jr. (Vice Provost for Undergraduate Education), Peggy Phelan (TAPS; English), Alice Rayner (TAPS), Rush Rehm (TAPS; Classics), Jennifer Brody (TAPS; Center for Comparative Studies in Race and Ethnicity)

Assistant Professors: Branislav Jakovljevic (Undergraduate Faculty Adviser), Jisha Menon (on leave)

Professors (Teaching): Michael F. Ramsaur, Janice Ross

Associate Professors (Teaching): Helen Paris, Leslie Hill

Senior Lecturer: Connie Strayer

Lecturers: Erik Flatmo Gambatese, Daniel Klein, Kathryn Kostopoulos

Guest Lecturers: Linda Apperson, Jeffrey Bihl, Josh Kornbluth, Michael Hunter

Artists in Residence: Amy Freed, Cherrie Moraga

Department Administrator: Patrice O'Dwyer

Student Services Officer: Justin Higinbotham

Institute for Diversity in the Arts and Black Performing Arts Division

IDA Faculty Director: H. Samy Alim (Education and, by courtesy, Anthropology and Linguistics)

Executive Director: Jeff Chang

Director (CBPA): Robert Moses

Dance Division

Director: Janice Ross

Lecturers: Diane Frank, Aleta Hayes, Muriel Maffre, Richard Powers, Ronnie Reddick, Susan Cashion, Erik Wagner

Mellon Postdoctoral Fellow: Jason Bush

Artist in Residence: Robert Moses

Overseas Studies Courses in Theater and Performance Studies

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/taps/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/taps/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/taps/http://bosp.stanford.edu>).

Urban Studies

Courses offered by the Urban Studies Program are listed under the subject code URBANST on the (<https://explorecourses.stanford.edu/search?q=urbanst&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-urbanst=on&filter-catalognumber-urbanst=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=URBANST&filter-catalognumber-URBANST=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=URBANST&filter-catalognumber-URBANST=on>).

The Urban Studies program treats urbanism as an interdisciplinary field; it brings together students, faculty, and outside specialists concerned with cities, and the impacts of cities on society and people's lives. The Urban Studies major encourages students to inquire deeply into the nature of cities and the techniques used to modify urban environments. It prepares students to address urbanization, and gives students a knowledge base

and theoretical, analytical, and practical skills to understand urban social systems and effect social change.

Mission of the Undergraduate Program in Urban Studies

The mission of the undergraduate program in Urban Studies is to develop students' understanding of the nature of cities and their impacts on both the individual and society at large. The program is interdisciplinary in nature drawing from fields in the social sciences, history, and education. Courses in the program focus on issues in contemporary urban society, and on the tools and concepts that can bring about change to improve urban life. Courses also address how cities have changed over time and how they continue to change today in societies around the world. Through a comprehensive program that includes course work, an internship, and independent research, a major in Urban Studies prepares students for careers and advanced academic pursuits in fields including architecture, community service, education, environmental planning, real estate development, urban design, and urban planning; many alumni have obtained graduate degrees in architecture, business, law, public policy, urban design, and urban planning from major universities across the country. Information on careers and graduate programs pursued by Urban Studies alumni is available from the Urban Studies program office.

Learning Outcomes (Undergraduate)

The program expects its undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Program in Urban Studies. Students are expected to demonstrate ability:

1. to formulate a research question and assess its significance in relation to one or more relevant scholarly literatures and, where relevant, to theoretical writings.
2. to collect data to answer the proposed research question.
3. to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
4. to write clearly and persuasively.

Coterminal Programs In Urban Studies

Undergraduates in Urban Studies may enter coterminal master's degree programs in a number of departments and schools in the University. In recent years, Urban Studies majors have developed coterminal programs with the departments of Civil and Environmental Engineering, Communication, and Sociology, and with the School of Education. Information and applications for coterminal degree programs are available at Undergraduate Advising and Research. Students should discuss the coterminal program with a program director during their junior year.

For University coterminal degree program rules and University application forms, see the Publications and Online Guides (<http://registrar.stanford.edu/shared/publications.htm#Coterm>) web site.

Bachelor of Arts in Urban Studies

The Urban Studies major requires students to complete four types of courses totaling at least 73 units:

1. 19 units in the core
2. 12 units (minimum) of skills courses (for those declaring after August 1, 2011; 8 units for those who declared earlier)
3. 25 units (minimum) in an area of concentration
4. 13 units in the capstone sequence

If units in these categories total less than 73, the remaining units may be fulfilled by courses in other concentrations or in Urban Studies courses numbered 100 or higher (except URBANST 198 Senior Research in Public Service and URBANST 199 Senior Honors Thesis).

Majors must complete one prerequisite: ECON 1A Introductory Economics A; this prerequisite course may be taken S/NC, as the units for this course do not count toward the 73 units required for the major. URBANST 198 Senior Research in Public Service, URBANST 199 Senior Honors Thesis, and prerequisites for required courses and for electives also do not count towards the 73-unit minimum.

Urban Studies students interested in graduate school in business or urban planning are advised to obtain basic quantitative skills by completing MATH 19 Calculus, MATH 20 Calculus, and MATH 21 Calculus, or MATH 41 Calculus and MATH 42 Calculus, preferably before the junior year, and to complete ECON 1B Introductory Economics B. A course in statistical methods, such as STATS 60 Introduction to Statistical Methods: Precalculus, ECON 102A Introduction to Statistical Methods (Postcalculus) for Social Scientists or SOC 181B Sociological Methods: Statistics, is recommended for students interested in business or urban planning.

Urban Studies students carry out an internship in an urban organization in the public or non-profit sector, typically by enrolling in URBANST 201B Capstone Internship Seminar during Spring Quarter of the junior year. This internship, or an appropriate substitution where necessary, should be arranged no later than Winter Quarter of the junior year, in consultation with the Urban Studies internship coordinator. Selected service learning courses may satisfy the internship requirement; consult with an advisor for details. Urban Studies majors who wish to receive academic credit for additional internship work may enroll in URBANST 194. Students may not count more than 7 units of internship, including URBANST 194 Internship in Urban Studies and URBANST 201A Capstone Internship in Urban Studies/URBANST 201B Capstone Internship Seminar, toward their major. Students can consult the Haas Center for Public Service for other courses with internship placements at community organizations.

Urban Studies students are encouraged to spend at least one quarter studying overseas to learn how cities vary across societies. Some Urban Studies concentration courses, as well as electives, can be satisfied at Stanford overseas campuses. Courses offered overseas vary from year to year, and students should check in advance with Overseas Studies and Urban Studies concerning which courses meet Urban Studies requirements. Students may arrange to fulfill the internship requirement through a placement at one of Stanford's overseas locations.

Courses counted toward the 73-unit graduation requirement for the major must be taken for a letter grade, and a minimum grade of 'C' is required. The only exceptions are Urban Studies courses numbered 100 and higher that are offered only on an S/NC basis, such as URBANST 201A Capstone Internship in Urban Studies and URBANST 201B Capstone Internship Seminar. Students may count up to three non-Stanford courses, for a maximum of 15 units, toward the major. These units must first be approved by the Office of Transfer Credit in the Registrar's Office and subsequently approved by the Urban Studies program. Transfer credit is not awarded for internship. Students may not count more than 5 units of URBANST 197 Directed Reading, toward the major without permission of the Director.

Qualified students may write a senior honors thesis and graduate with honors; see details in "Honors Program" below. Students interested in declaring Urban Studies as a major are required to meet first with the student services administrator and one of the program's advisers; they then declare the Urban Studies major on Axess.

Urban Studies Core

Urban Studies majors should complete URBANST 110 Utopia and Reality: Introduction to Urban Studies, before Spring Quarter of the junior year. The following courses, totaling 19 units, are required:

		Units
URBANST 110	Utopia and Reality: Introduction to Urban Studies	4
URBANST 112	The Urban Underclass	5
URBANST 113	Introduction to Urban Design: Contemporary Urban Design in Theory and Practice	5
URBANST 114	Urban Culture in Global Perspective	5

Skills

A minimum of 12 units are required (for those who declare after August 1, 2011; 8 units for those who declared before), and should be taken before the end of the junior year. The following course is recommended for most Urban Studies majors.

		Units
SOC 180A	Foundations of Social Research	5

The additional skills courses vary depending on a student's needs and interests. Student consult with an adviser to determine the best choice. Courses that fulfill the skills requirement are:

		Units
ANTHRO 91	Method and Evidence in Anthropology	5
ANTHRO 93B	Prefield Research Seminar: Non-Majors	5
ECON 102A	Introduction to Statistical Methods (Postcalculus) for Social Scientists	5
EDUC 191X	Introduction to Survey Research	3-4
HUMBIO 82A	Qualitative Research Methodology	3
HUMBIO 82B	Advanced Data Analysis in Qualitative Research	3
MED 147	Methods in Community Assessment, Evaluation, and Research	3
OSPCPTWN 22	Preparation for Community-Based Research in Community Health and Development	3
SOC 180B	Introduction to Data Analysis	5

Concentrations

Students must complete at least 25 units in one of the following concentrations:

- Cities in Comparative and Historical Perspective,
- Urban Education,
- Urban Society and Social Change
- Self-Designed

Courses may not be double-counted. Students should consult an adviser to develop a program that meets their intellectual goals; relevant courses not listed here, including research methods courses taken in preparation for the capstone project, may be counted toward the concentration with the prior consent of an adviser.

These concentrations are declared to the department; they are not declared on Axess, and they do not appear on the transcript or the diploma.

Cities in Comparative and Historical Perspective

Focus is on how cities have evolved over time, and how they are continuing to change today in societies around the world, drawing on disciplinary approaches including anthropology, archaeology, art history, geography, and history. By placing urban issues in perspective, students improve their comprehension of the present as well as the past.

Students in this concentration are encouraged to study off campus, and preferably overseas, for at least one quarter. Many courses offered through the Overseas Studies Program can be counted toward the concentration. Similarly, internships offered at many of Stanford's overseas locations can be used to fulfill the Urban Studies internship requirement.

The following courses may be counted toward the Cities in Comparative and Historical Perspective concentration:

		Units
AMELANG 177	Middle Eastern Cities in Literature and Film	4-5
ANTHRO 105	Ancient Cities in the New World	3-5
ANTHRO 112	Public Archaeology: Market Street Chinatown Archaeology Project	2-5
ANTHRO 127	City and Sounds	5
ARTHIST 3	Introduction to the History of Architecture	5
ARTHIST 107A	St. Petersburg, a Cultural Biography: Architecture, Urban Planning, the Arts	4
ARTHIST 142	Architecture Since 1900	4
ARTHIST 143A	American Architecture	4
ARTHIST 188A	The History of Modern and Contemporary Japanese and Chinese Architecture and Urbanism	4
CEE 32Q	Place: Making Space Now	3
CEE 131	Architectural Design Process	4
CLASSHIS 60	The Romans	3-5
CLASSHIS 101	The Greeks	4-5
FILMSTUD 150	Cinema and the City	4
HISTORY 106A	Global Human Geography: Asia and Africa	5
HISTORY 110C	Introduction to Modern Europe	5
HISTORY 150C	The United States in the Twentieth Century	5
HISTORY 166	Introduction to African American History: The Modern African American Freedom Struggle	3-5
HISTORY 206	History and Geography of Contemporary Global Issues	5
HISTORY 232D	Rome: The City and the World, 1350-1750	4-5
HISTORY 260	California's Minority-Majority Cities	4-5
HISTORY 287D	Tel Aviv: Site, Symbol, City	4-5
HISTORY 291B	The City in Imperial China	3-5
ME 120	History and Philosophy of Design	3
OSPBER 30	Berlin vor Ort: A Field Trip Module	1
OSPBER 60	Cityscape as History: Architecture and Urban Design in Berlin	5
OSPCPTWN 16	South Africa Sites of Memory	2
OSPCPTWN 17	Western Cape Sites of Memory	1
OSPCPTWN 22	Preparation for Community-Based Research in Community Health and Development	3
OSPCPTWN 24A & OSPCTWN 24B	Targeted Research Project in Community Health and Development	8
OSPCPTWN 43	Public and Community Health in Sub-Saharan Africa	4

OSPCPTWN 68	Cities in the 21st Century: Urbanization, Globalization and Security	4
OSPFLOR 58	Space as History: Urban Change and Social Vision in Florence 1059 to the Present	4
OSPFLOR 75	Florence in the Renaissance	5
OSPFLOR 115Y	The Duomo and Palazzo della Signoria: Symbols of a Civilization	4
OSPMADRD 60	Integration into Spanish Society: Service Learning and Professional Opportunities	5
OSPPARIS 92	Building Paris: Its History, Architecture, and Urban Design	4
OSPSANTG 71	Santiago: Urban Planning, Public Policy, and the Built Environment	4-5
POLISCI 110C	America and the World Economy	5
RELIGST 237	Jewish and Christian Rome, 1st to 6th Centuries	5
URBANST 115	Urban Sustainability: Long-Term Archaeological Perspectives	3-5
URBANST 150	History of San Francisco	5
URBANST 160	Environmental Policy and the City in U.S. History	5
URBANST 166	East Palo Alto: Reading Urban Change	5

Urban Education

The purpose of this concentration is to prepare students for a career in educational policy and practice in diverse settings. This concentration is a useful basis for graduate study in educational policy, law, or business, and for students who have been admitted by the School of Education to pursue a coterminal master's degree in the Stanford Teacher Education Program (STEP) or the Policy, Organization, and Leadership Studies Program (POLS). Stanford undergraduates can apply to the Stanford Teacher Education Program (STEP) in their Junior or Senior year.

Coterminal students applying to STEP are encouraged to take EDUC 101 before applying to the program. Additionally, students interested in STEP Secondary (Single Subject) must demonstrate subject matter competency in their intended teaching area. Transcripts should reflect coursework in the intended teaching subject even if it was not a student's undergraduate major.

For additional information please contact the STEP Admissions Officer at 723-2110, or consult the STEP web site (<http://suse-step.stanford.edu>).

The following course is required for the urban education concentration:

		Units
EDUC 112X	Urban Education	3-4

The following courses may be counted toward the urban education concentration:

		Units
EDUC 101	Introduction to Teaching and Learning	3-5
EDUC 103A	Tutoring: Seeing a Child through Literacy	4
EDUC 103B	Race, Ethnicity, and Linguistic Diversity in Classrooms: Sociocultural Theory and Practices	3-5
EDUC 103C	Educational Policy, Diversity, and English Learners	3-4
EDUC 104X	Conduct of Research with and in Communities	3-4
EDUC 115Q	Identities, Race, and Culture in Urban Schools	3
EDUC 123X	Contexts that Promote Youth Development: Understandings of Effective Interventions	2-4
EDUC 148X	Critical Perspectives on Teaching and Tutoring English Language Learners	3
EDUC 149	Theory and Issues in the Study of Bilingualism	3-5
EDUC 178X	Latino Families, Languages, and Schools	3-5
EDUC 179	Urban Youth and Their Institutions: Research and Practice	4-5

EDUC 201	History of Education in the United States	3-5
EDUC 202	Introduction to Comparative and International Education	4-5
EDUC 203	The Anthropology of Education	3-5
EDUC 204	Introduction to Philosophy of Education	3
EDUC 207X	School: What Is It Good For?	3-4
EDUC 216X	Education, Race, and Inequality in African American History, 1880-1990	3-5
EDUC 220A	Introduction to the Economics of Education	4
EDUC 220C	Education and Society	4-5
EDUC 220D	History of School Reform: Origins, Policies, Outcomes, and Explanations	3-5
EDUC 221A	Policy Analysis in Education	4-5
EDUC 223	Good Districts and Good Schools: Research, Policy, and Practice	3-4
EDUC 233A & EDUC 233B	Counseling Theories and Interventions from a Multicultural Perspective and Adolescent Development and Mentoring in the Urban Context	6-8
HUMBIO 142 or PSYCH 60	Adolescent Development Introduction to Developmental Psychology	3-4
OSPCPTWN 32	Learning, Development, and Social Change: Service Learning in the Contemporary South African Context-	5
SOC 132	Sociology of Education: The Social Organization of Schools	4

CEE 142A	Negotiating Sustainable Development	3
CEE 171	Environmental Planning Methods	3
CEE 172	Air Quality Management	3
EARTHSYS 49N	Multi-Disciplinary Perspectives on a Large Urban Estuary: San Francisco Bay	3
EARTHSYS 104	The Water Course	3
EARTHSYS 105	Food and Community: New Visions for a Sustainable Future	3-5
EARTHSYS 124	Environmental Justice: Local, National, and International Dimensions	4
EARTHSYS 133	Climate Change Law and Policy: From California to the Federal Government	3
EARTHSYS 181	Concepts of Urban Agriculture	3
ECON 150	Economic Policy Analysis	4-5
ECON 155	Environmental Economics and Policy	5

HUMBIO 116	Controlling Climate Change in the 21st Century	3
HUMBIO 122S	Social Class, Race, Ethnicity, and Health	4
HUMBIO 127A & HUMBIO 127B	Community Health: Assessment and Planning I and Community Health: Assessment and Planning II	8
HUMBIO 128	Community Health Psychology	4
MS&E 180 or Soc 160	Organizations: Theory and Management	4
OSPCPTWN 22	Preparation for Community-Based Research in Community Health and Development	3
OSPCPTWN 32	Learning, Development, and Social Change: Service Learning in the Contemporary South African Context-	3-5
PUBLPOL 102	Organizations and Public Policy	4-5
POLISCI 236	Theories of Civil Society, Philanthropy, and the Nonprofit Sector	5
PUBLPOL 135	Regional Politics and Decision Making in Silicon Valley	3
PUBLPOL 183	Philanthropy and Social Innovation	4
SOC 118	Social Movements and Collective Action	5
SOC 119	Understanding Large-Scale Societal Change: The Case of the 1960s	5
SOC 135	Poverty, Inequality, and Social Policy in the United States	5
SOC 140	Introduction to Social Stratification	5
SOC 141	Controversies about Inequality	5
SOC 145	Race and Ethnic Relations in the USA	5
SOC 161	The Social Science of Entrepreneurship	5
SOC 166	Mexicans, Mexican Americans, and Chicanos in American Society	5
URBANST 111	Urban Politics	5
URBANST 115	Urban Sustainability: Long-Term Archaeological Perspectives	3-5
URBANST 123	Approaching Research and the Community	2-3

Urban Society and Social Change

Focus is on issues in contemporary urban society and the tools and concepts that planners, policy makers, and citizens use to address those issues. Topics include environmental challenges, racial and class inequality, and the provision of adequate urban infrastructure. Students learn how community action, urban planning and design, and organizations in nonprofit, for-profit, and government sectors address urban social and environmental problems. This concentration prepares students to enter graduate programs concerned with urban affairs, community service, and public policy, and to work with local governmental agencies and for-profit and nonprofit organizations engaged in community service and development.

The following courses may be counted toward the urban society and social change concentration:

		Units
ANTHRO 32	Theories in Race and Ethnicity: A Comparative Perspective	5
ASNAMST 146S	Asian American Culture and Community	3-5
CEE 64	Air Pollution and Global Warming: History, Science, and Solutions	3
CEE 100	Managing Sustainable Building Projects	4
CEE 115	Goals and Methods of Sustainable Building Projects	3
CEE 124	Sustainable Development Studio	1-5
CEE 129	Climate Change Adaptation for Seaports: Engineering and Policy for a Sustainable Future	3
CEE 131	Architectural Design Process	4
CEE 131A	Professional Practice: Mixed-Use Design in an Urban Setting	3
CEE 141A	Infrastructure Project Development	3
CEE 141B	Infrastructure Project Delivery	3

URBANST 131	Social Innovation and the Social Entrepreneur	1
URBANST 132	Concepts and Analytic Skills for the Social Sector	4
URBANST 133	Social Entrepreneurship Collaboratory	4
URBANST 137	Innovations in Microcredit and Development Finance	4
URBANST 160	Environmental Policy and the City in U.S. History	5
URBANST 162	Managing Local Governments	0
URBANST 163	Land Use Control	0
URBANST 166	East Palo Alto: Reading Urban Change	5
URBANST 167	The Automobile and the City	4
URBANST 172	Design Approaches to Mending a City: Rethinking the 101 in East Palo Alto (Rethinking Detroit's Infrastructure)	4

Self-Designed Concentration

Students who wish to concentrate in an area of urban studies other than one of the above concentrations must complete the Urban Studies core, skills, and capstone requirement, and design additional units to bring the total to at least 73 units. The self-designed portion of the major should concentrate on a particular area of urban study, such as urban health care or urban environmental management. Additional units must be approved by both the Director of Urban Studies and an academic adviser who is a member of the Academic Council and has expertise in the particular area of interest to the student. A proposal for a self-designed concentration should include a list of courses and a description of how each course meets the student's educational objectives. A proposal for a self-designed concentration must be accompanied by a letter to the Director of Urban Studies indicating that the academic adviser has examined and approved the student's plan.

Students pursuing a self-designed concentration must submit proposals for approval by the Director of Urban Studies by the beginning of the third quarter of the student's sophomore year. Applications received after that deadline are not considered. Students interested in designing their own concentration are strongly encouraged to meet with the Director of Urban Studies before the end of their sophomore year.

Capstone

All majors are required to complete an internship and a sequence of two seminars, totaling 13 units, in which students participate in the work of an urban organization related to their area of interest, design a senior project, and write the results of their project. The capstone seminars can be used to satisfy the Writing in the Major requirement and to complete some work on an honors thesis. URBANST 201A Capstone Internship in Urban Studies or URBANST 201B Capstone Internship Seminar, and URBANST 202 Preparation for Senior Research, should be taken in the junior year, and URBANST 203 Senior Seminar in the senior year. Students who plan to be away during Winter Quarter of their junior year are advised to take URBANST 202 Preparation for Senior Research in the Winter Quarter of their sophomore year.

	Units
URBANST 201A Capstone Internship in Urban Studies or URBANST 201B Capstone Internship Seminar	3-4
URBANST 202 Preparation for Senior Research	5
URBANST 203 Senior Seminar	5

Honors Program

The honors program offers qualified students an opportunity to conduct independent research and to write a thesis summarizing the results. Before being accepted to the honors program in Urban Studies, a student must:

1. declare a major in Urban Studies and complete at least 30 of the 73 required units including all prerequisites and core classes
2. complete URBANST 202 Preparation for Senior Research (offered Winter quarter)
3. have an overall GPA of 3.3 and a GPA of at least 3.5 in Urban Studies
4. submit an application, including a one-page abstract and the signatures of an adviser and, if applicable, a second reader. If the adviser is not a member of Stanford's Academic Council, the student must have a second reader who is an Academic Council member. The application must be submitted to the program office no later than April 30 of the junior year, and it must then be approved by the Director of the Urban Studies honors program.

Honors students are expected to complete a portion of their honors work in URBANST 203 Senior Seminar, in Autumn Quarter. Additionally, they must register for 5-10 units total in URBANST 199 Senior Honors Thesis, over the course of their senior year. The units of URBANST 199 Senior Honors Thesis are in addition to the 73-units required for the major. Honors students are required to present their theses at the Senior Colloquium in Spring Quarter of senior year.

To graduate with honors, students must receive a grade of at least 'A-' in the honors work and have a GPA of at least 3.5 in courses for the Urban Studies major at the time of graduation.

Minor in Urban Studies

The minor in Urban Studies is designed to introduce students to several disciplinary approaches to the study of cities, and provides the opportunity to explore one of three specialized options:

- Cities in comparative and historical perspective
- Urban education
- Urban society and social change

The minor in Urban Studies requires completion of seven courses for a letter grade, including the four core courses, the required course in the student's chosen concentration area, and two additional courses in that option as listed in the "Bachelor of Arts in Urban Studies (p. 581)" section of this bulletin.

Director: Doug McAdam (Sociology)

Associate Director: Michael Kahan (Lecturer, Urban Studies)

Executive Committee: Prudence Carter (Education), Zephyr Frank (History), Thomas Hansen (Anthropology), Michael Rosenfeld (Sociology), Walter Scheidel (Classics), Jeff Wachtel (President's Office)

Affiliated Faculty: Arnetha Ball (Education), Eric Bettinger (Education), Scott Bukatman (Art and Art History), Albert Camarillo (History), Prudence Carter (Education), Samuel Chiu (Management Science and Engineering), Karen Cook (Sociology), Paula Ebron (Anthropology), Paula Findlen (History), James Fishkin (Communication), Shelley Fisher Fishkin (English), Charlotte Fonrobert (Religious Studies), Richard Ford (Law), Zephyr Frank (History), Leah Gordon (Education), Gary Griggs (Civil and Environmental Engineering), David Grusky (Sociology), Thomas Hansen (Anthropology), Allyson Hobbs (History), Ian Hodder (Anthropology), Miyako Inoue (Anthropology), Sarah Jain (Anthropology), Tomás Jiménez (Sociology), David Labaree (Education), Raymond Levitt (Civil and Environmental Engineering), Carolyn Lougee Chappell (History),

Raymond McDermott (Education), Daniel McFarland (Education), William McLennan (Office of Religious Life), Ian Morris (Classics), Clayton Nall (Political Science), Josiah Ober (Classics, Political Science), Susan Olzak (Sociology), Leonard Ortolano (Civil and Environmental Engineering), Sean Reardon (Education), Rob Reich (Political Science), Ian Robertson (Anthropology), Michael Rosenfeld (Sociology), Walter Scheidel (Classics), Gary Segura (Political Science), Michael Shanks (Classics), Jennifer Trimble (Classics), Nancy Brandon Tuma (Sociology, Hoover Institution), Fred Turner (Communication), Guadalupe Valdes (Education), Barbara Voss (Anthropology), Steve Zipperstein (History)

Lecturers: Rohit Aggarwala, Naseem Alizadeh, Melanie Edwards, Dennis Gale, Dehan Glanz, Clayton Hurd, Michael Kahan, Radford 'Skid' Hall, Michael Levin, Lawrence Litvak, Judith Ned, Laura Scher, Frederic Stout

Overseas Studies Courses in Urban Studies

The Bing Overseas Studies Program (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/urbanstudies/http://bosp.stanford.edu>) manages Stanford study abroad programs for Stanford undergraduates. Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

The Bing Overseas Studies course search site (http://bosp.stanford.edu/cgi-bin/course_search.php) displays courses, locations, and quarters relevant to specific majors.

For course descriptions and additional offerings, see the listings in the Stanford Bulletin's ExploreCourses (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/urbanstudies/http://explorecourses.stanford.edu>) or Bing Overseas Studies (<http://exploreddegrees.stanford.edu/schoolofhumanitiesandsciences/urbanstudies/http://bosp.stanford.edu>).

Stanford in Washington

Director: Adrienne Jamieson

The Bing Stanford in Washington program provides highly-qualified undergraduates with an opportunity to work and study in the nation's capital. In addition to providing students with an understanding of public policy making, the program offers an opportunity to take advantage of the city's unique cultural resources.

Central in the student's educational experience is a full-time internship. Students serve as interns at such institutions and agencies as the Senate, the House of Representatives, the Office of Management and Budget, the White House, the National Institutes of Health, the Smithsonian Institution, CNN, World Bank, the departments of State, Justice, Treasury, Education, and Health and Human Services.

In addition to the internship, students also complete an academic course of study consisting of small courses taught by policy experts, and weekly seminars taught by Stanford faculty members. Seminars are generally 3-5 units. Past topics have included congressional oversight and the press; economic growth and development patterns, policies, and prospects; critical health issues in the U.S. and abroad; policy making in the Washington community; and criminal justice policy. Speakers from the Washington policy community frequently join students and faculty for discussions. Students often write a major paper related to their internship for 3-5 units of credit. Course and seminar topics vary according to student and faculty interest.

The Bing Stanford in Washington program offers stretch quarters in the Autumn and Spring (early September to mid-December, and late March to the end of June) and a regular quarter in Winter, which focuses on environmental and health policy. The program is designed for students in their junior year or during the first or second quarter of their senior year. Applications must be completed two quarters in advance, and three quarters in advance if a student is overseas or otherwise not on campus during the qualifying quarter.

Students interested in the program should contact the campus office of the Bing Stanford in Washington program; see contact information above.

School of Law

Courses offered by the School of Law are listed on the Stanford Bulletin's ExploreCourses (<http://explorecourses.stanford.edu>) web site under the subject codes LAW (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=LAW&filter-catalognumber=LAW=on>) and LAWGEN (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=LAWGEN&filter-catalognumber=LAWGEN=on>).

The School of Law, established in 1893, provides a legal education for students who are fitted by their maturity and academic training to pursue professional study under University methods of instruction. The curriculum leading to the first professional degree in law, the Doctor of Jurisprudence (J.D.), constitutes an adequate preparation for the practice of law in any English-speaking jurisdiction. Graduate work leading to the degrees of Master of Laws (L.L.M.), Master of the Science of Law (J.S.M.), and Doctor of the Science of Law (J.S.D.), and a non-professional degree, Master of Legal Studies (M.L.S.), is also offered. For the full curriculum, see the Course Schedule & Description on the Law School (<http://lawreg.stanford.edu/stanford>) web site. Stanford Law School offers joint or dual degree options in combination with other Stanford graduate departments and universities across the country; see the "Joint and Dual Degrees in Law" (<http://www.stanford.edu/dept/registrar/bulletin/5344.htm>) section of this bulletin.

The school is on a three-term academic calendar. For a complete list of academic dates see the Academic Calendar on the Law School (<http://www.law.stanford.edu/calendar>) web site.

For further information about admission, programs, curriculum, and faculty, see the Law School (<http://exploreddegrees.stanford.edu/schooloflaw/http://www.law.stanford.edu>) web site.

Joint and Dual Degrees in Law

Formal admission to both the Law School and to the other cooperating school or department in accordance with the established admission standards of each school or department is required. In addition to the formal joint degree programs offered, the school considers requests for a dual program on an individually designed basis. For additional information on Law School joint or dual degree programs, see the Law School (<http://www.law.stanford.edu/program/degrees>) web site. See relevant web sites or department sections of this bulletin for degree requirements.

Formal joint degree programs at Stanford:

School of Business

See <http://www.gsb.stanford.edu/mba>.

J.D./M.B.A. Master of Business Administration

School of Earth Sciences

J.D./M.S. Emmett Interdisciplinary Program in Environment and Resources (E-IPER)

J.D./Ph.D. Emmett Interdisciplinary Program in Environment and Resources (E-IPER)

School of Education

J.D./M.A. Education

School of Engineering

J.D./M.S. Bioengineering

J.D./Ph.D. Bioengineering

J.D./M.S. Computer Science

J.D./M.S. Electrical Engineering

J.D./M.S. Management Science and Engineering (MS&E)

J.D./Ph.D. Management Science and Engineering (MS&E)

School of Humanities and Sciences

J.D./M.A. Economics

J.D./Ph.D. Economics

J.D./M.A. History

J.D./Ph.D. History

J.D./M.A. in degree granting programs in the Division of International Comparative and Area Studies (ICA): African Studies, East Asian Studies, Latin American Studies, and Russian, East European and Eurasian Studies

J.D./M.A. in International Policy Studies

J.D./Ph.D. Philosophy

J.D./Ph.D. Political Science

J.D./Ph.D. Psychology

J.D./M.P.P. Public Policy

J.D./Ph.D. Sociology

School of Medicine

J.D./M.S. Health Research and Policy (HRP)

Formal joint degree programs with other universities

J.D./M.P.A. with the Woodrow Wilson School of Public and International Affairs at Princeton University

J.D./M.A. with the Paul H. Nitze School of Advanced International Studies at Johns Hopkins University

Courses in Law

Some Law courses have special enrollment instructions and restrictions, but many Law courses are open to qualified graduate students in other departments of Stanford University with instructor consent. Non-Law students may not enroll in courses that are part of the required first-year JD curriculum. Stanford non-Law students intending to enroll in any course with a LAW subject code must consult the Office of the Law School Registrar in the Stanford Law School Administration Building, room 100, or see the Stanford Law School, Office of the Registrar (<http://www.law.stanford.edu/school/offices/registrar>) web site.

Emeriti: (Professors) Barbara Allen Babcock, Wayne G. Barnett, Paul Brest, Gerhard Casper, William Cohen, Lance E. Dickson, Marc A. Franklin, Jack H. Friedenthal, Robert A. Girard, William B. Gould IV, Thomas C. Grey, Thomas C. Heller, Miguel A. Méndez, John Henry Merryman, Margaret Jane Radin, Kenneth E. Scott, Byron D. Sher, William H. Simon, Michael S. Wald

Dean: Mary Elizabeth "Liz" Magill

Vice Dean: Mark G. Kelman

Associate Dean for Curriculum: Jane Schacter

Associate Dean for Executive Education and Special Programs: F. Daniel Siciliano

Associate Dean for Graduate Studies: Deborah R. Hensler

Associate Dean for Public Interest and Clinical Education: Lawrence C. Marshall

Senior Associate Dean and Chief Financial Officer: Frank Brucato

Associate Deans: Diane Chin, Faye Deal, Julia Erwin-Weiner, Catherine Glaze, Sabrina Johnson, Susan Robinson

Professors: Janet Cooper Alexander, Joseph Bankman, R. Richard Banks, Joshua Cohen (on leave), G. Marcus Cole, Richard Craswell, Mariano-Florentino (Tino) Cuéllar, Robert M. Daines, Michele Landis Dauber, John J. Donohue III, George Fisher, Richard T. Ford, Barbara H. Fried, Lawrence M. Friedman, Ronald J. Gilson (on leave autumn), Paul Goldstein, Robert W. Gordon (on leave autumn), Henry T. Greely, Joseph A. Grundfest, Deborah R. Hensler, Daniel E. Ho, Pamela S. Karlan (on leave winter), Mark G. Kelman, Amalia D. Kessler (on leave autumn), Daniel P. Kessler, Michael Klausner, Mark A. Lemley, Lawrence C. Marshall, Jenny S. Martinez, Michael W. McConnell (on leave autumn), Alison D. Morantz, Joan Petersilia, A. Mitchell Polinsky (on leave autumn), Robert L. Rabin, Deborah L. Rhode, Jane Schacter, Norman W. Spaulding, James F. Strnad II, Barton H. Thompson, Jr., George Triantis, Robert Weisberg

Associate Professor: Barbara van Schewick, Michael Wara

Assistant Professors: David Freeman Engstrom, Nora Freeman Engstrom, Shirin Sinnar (on leave autumn)

Professors (Teaching): Juliet M. Brodie, James Cavallaro, Jeffrey L. Fisher, William S. Koski, Deborah A. Sivas, Jayashri Srikantiah (on leave autumn)

Associate Professors (Teaching): Jay A. Mitchell, Ronald C. Tyler

Professors of the Practice of Law: Erik G. Jensen, David W. Mills, Dan Reicher, F. Daniel Siciliano

Senior Lecturers: Margaret R. Caldwell, Janet Martinez, Allen S. Weiner

Professors (by courtesy): Michael Genesereth, David Larcker, Jose Maldonado, Clifford Nass, Paul C. Pfeleiderer, Madhav Rajan, Jack Rakove, Frank Wolack

Visiting Professors: Michelle Anderson, Michael Asimow, Siegfried Fina, Michael Karayanni, Robert P. Merges, Burt Neuborne, Joost Pauwelyn, Rogelio Perez-Perdomo

Legal Research and Writing Instructors: Albertina Antognini, Beth Colgan, Andrew Gilden, Thea Johnson, Kaipo Matsumura, Jeanne Merino

Lecturers: Alvin Attles, Simao Avila, Daniel L. Barton, William Baude, Marilyn Bautista, Jeanine Becker, Byron Bland, Viola Canales, Diane Chin, Daniel Cooperman, Margaret (Maggie) Crosby, Betsy de la Vega, Michael E. Dickstein, Ron Dolin, Jared Ellias, Bonnie Eskanazi, Russ Feingold, Randee G. Fenner, Bertram Fields, Jay Finkelstein, David Forst, Simon Frankel, Laurence Franklin, Michelle Galloway, Mei Gechlik, Tracy Genesen, Marshall Goldberg, Thomas C. Goldstein, Jonathan Greenberg, Lucas Guttentag, Timothy H. Hallahan, Brad Handler, Laurie Hane, Keith Hennessey, Brooke Heymach, Ivan Humphreys, David Johnson, Danielle Jones, Julie Matlof Kennedy, Jason Kipnis, Suzanne McKechnie Klahr, Jeffery W. Kobrick, Charles Koob, Phil Levine, May Liang, Goodwin Liu, Titi Liu, Paul Lomio, Beth McLellan, Jeanne Merino, Roberta J. Morris, Linda Netsch, Thomas J. Nolan, Jessica Notini, B. Howard Pearson, Lisa M. Pearson, Sergio Puig, John Quigley, Sarah Rajec, Stephan Ray, Susan Robinson, John Rodkin, Michael Romano, Andrew Roper, Stephen Rosenbaum, Kevin Russell, Ticien Sassoubre, William (Billy) Schwartz, Rachelle Silverberg, Bryant Walker Smith, Stephanie Smith, Steven Smith, James Sonne, Stephan Sonnenberg, Kimberly Summe, Dan Torres, Adine Varah, Roland Vogl, Vaughn Walker, Erika V. Wayne, Dana Weintraub, Robert Wexler, Katherine C. Wright, James Yoon

Affiliated Faculty: Elizabeth (Beth) Blankespoor (GSB), Alexandria (Ali) Boehm (Civil and Environmental Engineering), Kate Bundorf (Health Research and Policy), John-Paul Ferguson (GSB), Joy Ishii (GSB), Stefan Reichelstein (GSB), Helen Stacy (FSI), Barry Weingast (Political Science)

School of Medicine

The School of Medicine offers courses of study leading to the M.S., Ph.D., and M.D. degrees.

Undergraduate Programs in the School of Medicine

Many courses in the School of Medicine are open to any registered Stanford student who has fulfilled the prerequisites, subject to the usual limits of course enrollment and faculty approval. The school also offers courses specifically for undergraduates, as well as graduate-level courses where advanced undergraduates with backgrounds in the life sciences are welcome. Among the undergraduate offerings are numerous Stanford Introductory Seminars for freshmen and sophomores, the Emergency Medical Technician program, Stanford Immersion in Medicine Physician Shadowing, Pre-Vet Advisory, and courses in Community Health, including participation in the Stanford Free Clinics. The school also offers several undergraduate courses through the Department of Biology and the Interdisciplinary Program in Human Biology in the School of Humanities and Sciences.

M.S. and Ph.D. Programs in the School of Medicine

The School of Medicine is home to graduate programs covering a broad range of disciplines within biomedicine leading to Ph.D. or M.S. degrees. These programs focus on interdisciplinary training with in-depth investigation of an original problem of fundamental importance to the biosciences. Each degree program sets its own curriculum, but many courses are taught by groups of faculty from multiple programs and departments. Flexibility is a priority to ensure that all students obtain the best possible training for pursuing careers in their areas of interest. The school is dedicated to training students from diverse backgrounds, and to the promotion of diversity in graduate education. Admission is through one of about 15 home programs. These home programs enable students to carry out dissertation research and training with School of Medicine faculty, as well as investigators in the departments of Biology and Biophysics in the School of Humanities and Sciences. Detailed information on School of Medicine M.S. and Ph.D. programs, curricula, and research can be found at Stanford's School of Medicine Master's Degree Programs (<http://med.stanford.edu/ms>) and Ph.D. Programs (<http://med.stanford.edu/phd>) web site. Application information can be found at Stanford's Office of Graduate Admissions (<http://exploreddegrees.stanford.edu/schoolofmedicine/> <http://gradadmissions.stanford.edu>) web site.

M.D. Program in the School of Medicine

The School of Medicine seeks to attract students who are passionate about scholarship and wish to improve the health of the world's people through research, innovation, and leadership. The Stanford M.D. curriculum provides education in biomedical and clinical sciences along with study and independent research through scholarly concentrations. Emphasis is placed on interdisciplinary learning, with streamlined content and melding of basic science and clinical instruction across the curriculum. Blocks of unscheduled time allow for individual or group study, participation in elective courses, research, and reflection. Alternative pathways through the curriculum include an option of a fifth or sixth year of study as well as opportunities for pursuing a second degree, such as an M.P.H., M.B.A.,

Master's of Science in Epidemiology or Health Services Research, or a Ph.D.

Broad clinical science education occurs throughout the curriculum with exposure to patient care and the practice of medicine beginning on the first day of medical school. Students begin clinical clerkships in June of the second year. A population health course combines classroom and experiential learning to provide understanding of the socioeconomic determinants of the health of patients and communities.

Scholarly concentrations offer opportunities for developing skills that enhance basic science and clinical training in areas such as bioengineering, biomedical ethics and medical humanities, biomedical informatics, clinical research, community health, health services and policy research, and the molecular basis of medicine. Through the scholarly concentration program, these skills may be applied in clinical areas housed within centers at Stanford such as the Comprehensive Cancer Center, the Cardiovascular Institute, the Neuroscience Institute, the Institute of Immunity, Transplantation, and Infection, and Women's Health at Stanford. Study in a scholarly concentration typically includes course work and research activities. Research for scholarly concentrations is supported through the Medical Scholars program, which funds student research projects at Stanford and overseas.

Students with interests in medical research as a career are encouraged to investigate opportunities available through the Medical Scientist Training Program (MSTP). Stanford also collaborates with the University of California, Berkeley, to offer students opportunities for M.D./M.P.H. training. Details about these programs may be found at Stanford's Dual Degree and Multi-Degree Programs (http://med.stanford.edu/combined_degree) web site.

Stanford is committed to representing the diversity of the U.S. and California populations by seeking a diverse body of students who are interested in the intellectual substance of medicine and committed to advancing the field of health care, broadly defined. Provided an applicant to the school has completed basic courses in physics, chemistry, and biology, the choice of an undergraduate major may reflect other interests, including the arts and humanities. Course work in advanced biology such as biochemistry, molecular biology, or genetics and the behavioral sciences is recommended because of their importance in understanding health care. Breadth of interests and depth of experiences play an important role in the selection of students from among those applicants having superior academic records.

The M.D. degree requires 13 quarters of registration at full Med-MD tuition; the joint M.D./Ph.D. degree requires 16 quarters. Completion of the M.D. degree must be achieved within six years, unless a petition is granted to extend this time frame. For further details on the M.D. degree, including admission requirements, see the Medical Education at Stanford (<http://med.stanford.edu/md>) web site.

Multiple-Degree Programs in the School of Medicine

M.D./Ph.D.

Many M.D. students undertake a Ph.D. while they are at Stanford. Popular choices are School of Medicine programs in Bioengineering, Biomedical Informatics, or one of the 13 Biosciences home departments. At the School of Engineering, the Biomechanical Engineering M.D./Ph.D. program also makes a special effort to work with M.D. students.

Medical Scientist Training Program

The Medical Scientist Training Program (MSTP) provides medical students with an opportunity to pursue an individualized program of research and course work leading to both the M.D. and Ph.D. degrees. It is designed

to equip students for careers in academic investigative medicine, and emphasizes flexibility of curricular and research programs for each trainee. Training for a combined M.D.-Ph.D. includes the same content encountered by students who pursue each degree separately, but the total training time is less than the sum of the time normally required for each degree. The flexible curriculum at Stanford's School of Medicine allows each student, in consultation with a preceptor and other advisers, to pursue a plan of study that satisfies the requirements for the M.D. and allows performance of doctoral-level research leading to the Ph.D. Students interested in joining the MSTP are considered for admission at the time of their application to the School of Medicine M.D. program and are asked to provide supplemental information relevant to their research background. Current Stanford M.D. students may also apply for admission to the MSTP.

M.D./M.B.A.

M.D. students interested in combining their medical training with training in business can take advantage of a dual degree M.D./M.B.A. program that allows students to obtain both degrees after completion of a 5-year curriculum. Students must apply to and be admitted by the Stanford Graduate School of Business, at the time of their admission to the medical school or after beginning their M.D. studies.

M.D./M.P.H.

A unique collaboration with UC Berkeley allows M.D. students to pursue and obtain a Master of Public Health degree while still at the Stanford School of Medicine. This dual degree M.D./M.P.H. program is open to M.D. students who participate in the Scholarly Concentration in Community Health. Students must apply to and be admitted by the UC Berkeley program; course work is undertaken at the UC Berkeley campus.

Ph.D./M.S.M.

The Master of Science in Medicine (<http://msm.stanford.edu>) program admits current Stanford Ph.D. students who have a commitment to translational research, but are not interested in becoming clinicians. The goal of the program is to train researchers in human biology and disease to be better equipped to translate new scientific discoveries into useful medical advances. Students offered admission into any Ph.D. program at Stanford may apply for admission to the master's program. During their first five quarters, students take basic biomedical science courses with Stanford M.D. students. The School of Medicine M.D. curriculum is presented in a succinct format that allows time for students to concurrently complete their Ph.D. course requirements and lab rotations. By early in their second year, students choose a lab for their Ph.D. thesis research and complete their medical course work. They also elect a clinical co-mentor to discuss translational research needs and help to arrange a short clinical experience. Upon completion of the Program., participating students receive an M.S. in Medicine.

M.D./M.S. Degrees

Health Services Research: The Master's Degree program in Health Services Research is a research-oriented program with a concentration on economics and statistics, outcomes research, cost-effectiveness, and technology assessment. The program is designed to complement training in the medical and social sciences and prepare students for research careers in health services or health policy analysis. The program provides specialized training in selected areas of health care policy, research methodology, and the application of these skills to a specific research problem. Course work requirements allow students to design a program of study suited to their individual backgrounds and interests.

Epidemiology: The Graduate Interdisciplinary Program in Epidemiology is a research oriented program that offers instruction and research opportunities leading to the M.S. degree in Epidemiology - the study of the distribution and determinants of diseases in populations.

Medical Information Sciences: An option for anyone who wishes to either perform research in Biomedical Informatics as clinical faculty at a school of medicine or for those who wish to continue into the health care industry or government. There is high need for trained individuals who understand the practice of medicine and who are able to develop and implement applications in biomedical informatics.

Biomechanical Engineering: Bioengineering is a fusion of engineering and the life sciences that promotes scientific discovery and the invention of new technologies and therapies through research and education. It encompasses both the use of biology as a new engineering paradigm and the application of engineering principles to medical problems and biological systems. The discipline embraces biology as a new science base for engineering.

M.D./M.P.P. Degree

Matriculated M.D. students from Stanford's School of Medicine may apply for admission to the joint M.P.P./M.D. degree program (http://publicpolicy.stanford.edu/jt_mdmp). Applications are accepted anytime after a student has completed one year in the M.D. program. Students must obtain the permission of the School of Medicine to participate in the joint degree program. Students are required to devote two continuous years of full-time study to the completion of the first two years of the core M.D. curriculum. Students then devote one continuous academic year of study to the completion of the M.P.P. core curriculum. At other times, the student may be enrolled in either unit and may take courses from either unit to satisfy the joint degree requirements.

Departmental Dual Degrees

Education: The Individually designed M.A. in Education is designed for Stanford doctoral students enrolled outside of the School of Education. Individuals enrolled at the doctoral level at Stanford can be considered for this program.

E-IPER: Stanford's Emmett Interdisciplinary Program in Environment and Resources (E-IPER) gives students a focused science, engineering, and technology background, allowing them to integrate science with law and business to address critical environmental and sustainability issues. http://e-iper.stanford.edu/admissions.jointms_application.php

Public Policy: Stanford University offers two master's programs in Public Policy. A Master's of Public Policy (M.P.P.) is a two-year professional degree and the Masters of Arts in Public Policy (M.A.) is a one-year non-professional degree. Students currently enrolled in other Stanford graduate programs, and applicants to those programs, may apply for either of the Public Policy master's programs. M.D. students are eligible to apply for a dual M.A. degree program See above for the joint M.D./M.P.P. program.

Dean: Philip Pizzo

Senior Associate Dean for Graduate Education and Postdoctoral Affairs: Daniel Herschlag

Senior Associate Dean for Medical Education: Charles Prober

Biochemistry

Courses offered by the Department of Biochemistry are listed under the subject code BIOC on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=BIOC&filter-catalognumber-BIOC=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=BIOC&filter-catalognumber-BIOC=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=BIOC&filter-catalognumber-BIOC=on>).

Biochemistry is a department within the School of Medicine, with offices and labs located in the Beckman Center for Molecular and Genetic Medicine at the Stanford Medical Center. Courses offered by the department may be taken by undergraduates as well as graduate and medical school students.

Advanced courses offered in more specialized areas emphasize recent developments in biochemistry, cell biology, and molecular biology. These courses include the physical and chemical principles of biochemistry, enzyme reaction mechanisms, membrane trafficking and biochemistry, molecular motors and the cytoskeleton, mechanisms and regulation of nucleic acid replication and recombination, the biochemistry of bacterial and animal viruses, the molecular basis of morphogenesis, the molecular and cell biology of yeast, and the structure and function of both eukaryotic and prokaryotic chromosomes.

Opportunities exist for directed reading and research in biochemistry and molecular biology, using the most advanced research facilities, including those for light and electron microscopy, chromatography and electrophoresis, protein and nucleic acid purification, rapid kinetic analysis, synthesis and analysis, single molecule analyses using laser light traps, microarray generation and analysis, and computer graphic workstation facilities for protein and nucleic acid structural analysis. Ongoing research uses a variety of organisms from bacteria to animal cells.

Doctor of Philosophy in Biochemistry

Requirements for the M.S. and Ph.D. degrees are described in the "Graduate Degrees (p. 38)" section of this bulletin. The department does not offer undergraduate degrees.

The Department of Biochemistry offers a Ph.D. program which begins in the Autumn Quarter of each year. The program of study is designed to prepare students for productive careers in biochemistry; its emphasis is training in research, and each student works closely with members of the faculty. In addition to the requirement for a Ph.D. dissertation based on original research, students are required to complete six advanced courses in biochemistry and related areas among the 135 total units required for the Ph.D. Selection of these courses is tailored to fit the background and interests of each student. A second requirement involves the submission of two research proposals which are presented by the student to a small committee of departmental faculty members who are also responsible for monitoring the progress of student curricular and research programs, and a journal club presentation. All Ph.D. students are expected to participate actively in the department's seminar program, and students are encouraged to attend and to present papers at regional and national meetings in cellular biochemistry and molecular biology. Teaching experience is an integral part of the Ph.D. curriculum and is required for the degree.

The Department of Biochemistry offers an M.S. degree only to students already enrolled in the Ph.D. program. Students should contact the Graduate Studies adviser for more details.

Those applying for graduate study should have at least a baccalaureate degree and should have completed work in cell and developmental biology, basic biochemistry and molecular biology, and genetics. Also required are: at least one year of university physics; differential and integral calculus; and organic, inorganic, and physical chemistry. The department is especially interested in those applicants who have research experience in biology or chemistry. Students must submit an application, including transcripts and letters of recommendation, by December for admission in the following Autumn Quarter.

Applications should be submitted at the Office of Graduate Admissions (<http://exploreddegrees.stanford.edu/schoolofmedicine/biochemistry/http://gradadmissions.stanford.edu>) web site. Applicants are notified by March 31 of decisions on their applications. Stanford University requires scores from the Graduate Record Examination (GRE) (verbal, quantitative, and

analytical), and applicants are encouraged to submit scores from the GRE Subject Test in biochemistry, biology, or chemistry. Applicants should take the October GRE exam.

All applicants are urged to compete for non-Stanford fellowships or scholarships, and U.S. citizens should complete an application for a National Science Foundation Predoctoral Traineeship. Students are provided with financial support to cover normal living expenses; Stanford tuition costs are paid. Applicants for admission to the department are considered without regard to race, color, creed, religion, sex, age, national origin, or marital status.

Postdoctoral research training is available to graduates who hold a Ph.D. or an M.D. degree. Qualified individuals may write to individual faculty members for further information.

At present, the primary research interests of the department are the structure and function of proteins and nucleic acids, the biochemistry and control of development processes, molecular motors and the cytoskeleton, the trafficking of proteins between membrane-bound organelles, the control and regulation of gene expression, bioinformatics/protein structure design, and the application of microarrays to problems in human health and disease.

Emeriti (Professors): Robert L. Baldwin, Paul Berg, Douglas L. Brutlag, David S. Hogness, A. Dale Kaiser, I. Robert Lehman

Chair: Mark A. Krasnow

Professors: Philip Beachy, Patrick O. Brown, Gilbert Chu, Ronald W. Davis, James E. Ferrell, Jr., Daniel Herschlag, Mark A. Krasnow, Suzanne R. Pfeffer, James A. Spudich

Associate Professors: Pehr A. B. Harbury, Aaron F. Straight, Julie A. Theriot

Assistant Professors: Rhiju Das

Courtesy Professors: Steven Artandi, Kerwyn C. Huang, Chaitan S. Khosla, Sharon Long, Rajat Rohatgi

Biomedical Ethics

The Stanford University Center for Biomedical Ethics (SCBE) is dedicated to interdisciplinary research and education, and provides clinical and research ethics consultation. SCBE serves as a scholarly resource on emerging ethical issues raised by medicine and biomedical research.

SCBE offers a scholarly concentration in Biomedical Ethics and Medical Humanities (BEMH) to medical students. This program allows medical students to study in depth the moral, social, and humanistic dimensions of medicine and biomedical science. Using cross-disciplinary methods such as those from philosophy, social science, film, literature, art, and law, students examine the meaning and implications of medicine and medical research.

Degree Requirements

Students who pursue Biomedical Ethics and Medical Humanities in conjunction with an application area, such as Immunology, are required to complete 6 units including:

		Units
INDE 212	The Human Condition: Medicine, Arts, and Humanities	2
PEDS 251A	Medical Ethics I	2

Students may select the other two core BEMH units from a wide variety of University, Medical School, and Law School courses. Students interested in completing all 12 units in the BEMH scholarly area may do the same. Students are encouraged to go through the various offerings and devise a course plan to present to the director, David Magnus, and Audrey Shafer. Additional information on requirements for the scholarly concentration, is

available at the BEMH (<http://bioethics.stanford.edu/education/bemh>) web site.

Director: David C. Magnus

Director Emeritus: Thomas A. Raffin

Associate Director: Mildred K. Cho

Participating Faculty and Staff: Clarence H. Braddock, Julie A. Collier, LaVera M. Crawley, Maren Grainger-Monsen, Henry Greely, Katrina A. Karkazis, Sandra S. Lee, Jose R. Maldonado, Kelly E. Ormond, Laura W. Roberts, Christopher T. Scott, Audrey Shafer, Abraham C. Verghese, Lawrence I. Zaroff

Biomedical Informatics

Courses offered by the Program in Biomedical Informatics are listed under the subject code BIOMEDIN on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=BIOMEDIN&filter-catalognumber-BIOMEDIN=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=BIOMEDIN&filter-catalognumber-BIOMEDIN=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=BIOMEDIN&filter-catalognumber-BIOMEDIN=on>).

The program in Biomedical Informatics emphasizes research to develop novel computational methods that can advance biomedicine. Students receive training in the investigation of new approaches to conceptual modeling and to development of new algorithms that address challenging problems in the biological sciences and clinical medicine. Students with a primary interest in developing new informatics methods and knowledge are best suited for this program. Students with a primary interest in the biological or medical application of existing informatics techniques may be better suited for training in the application areas themselves.

Graduate Programs in Biomedical Informatics

The Biomedical Informatics Program is interdepartmental and offers instruction and research opportunities leading to M.S. and Ph.D. degrees in Biomedical Informatics. All students are required to complete the core curriculum requirements, and also to elect additional courses to complement both their technical interests and their goals in applying informatics methods to clinical settings, biology, or imaging.

The core curriculum is common to all degrees offered by the program but is adapted or augmented depending on the interests and experience of the student. Deviations from the core curriculum must be justified in writing and approved by the student's Biomedical Informatics academic adviser and the chair of the Biomedical Informatics Executive Committee. It should be noted, however, that the program is intended to provide flexibility and to complement other opportunities in applied medical research that exist at Stanford. Although most students are expected to comply with the basic program of study outlined here, special arrangements can be made for those with unusual needs or those simultaneously enrolled in other degree programs within the University. Similarly, students with prior relevant training may have the curriculum adjusted to eliminate requirements met as part of prior training.

The University requirements for the M.S. degree are described in the "Graduate Degrees (p. 38)" section of this bulletin.

Master of Science in Biomedical Informatics (Academic)

This degree is designed for individuals who wish to undertake in-depth study of biomedical informatics with research on a full-time basis. Normally, a student spends two years in the program and implements and documents a substantial project during the second year. The first year involves acquiring the fundamental concepts and tools through course work and research project involvement. All first- and second-year students are expected to devote 50 percent or more of their time participating in research projects. Research rotations are not required, but can be done with approval of the academic adviser or training program director. Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics. This degree requires a written research paper to be approved by two faculty members.

Master of Science in Biomedical Informatics (Professional/Honors Cooperative Program)

This degree is designed primarily for the working professional who already has advanced training in one discipline and wishes to acquire interdisciplinary skills. All classes necessary for the degree are available online. The professional M.S. is offered in conjunction with Stanford Center for Professional Development (SCPD), which establishes the rates of tuition and fees. The program uses the honors cooperative model (HCP), which assumes that the student is working in a corporate setting and is enrolled in the M.S. on a part-time basis. The student has up to five years to complete the program. Research projects are optional and the student must make arrangements with program faculty. Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics.

Master of Science in Biomedical Informatics (Coterminal)

The coterminal degree program allows Stanford University undergraduates to study for a master's degree while completing their bachelor's degree(s) in the same or a different department. Please refer to the "Coterminal Degrees" section in this bulletin for additional information.

The coterminal Master of Science program follows the same program requirements as the Master of Science (Professional), except for the requirement to be employed in a corporate setting. The coterminal degree is available only to current Stanford undergraduates. Coterminal students are enrolled full-time and courses are taken on campus. Research projects are optional and the student must make arrangements with program faculty. Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/pdf/CotermAppRules.pdf>

Core Curriculum and Program Requirements in Biomedical Informatics

Core Curriculum in Biomedical Informatics

Students are expected to participate regularly in BIOMEDIN 201 Biomedical Informatics Student Seminar and a research Colloquium, such as BIOMEDIN 200 Biomedical Informatics Colloquium or BIOMEDIN 205 Precision Practice with Big Data. In addition, all students are expected to fulfill requirements in the following five categories:

1. Core Biomedical Informatics (17 units)

Students are expected to complete the core offerings in biomedical informatics:

- A. BIOMEDIN 212 Introduction to Biomedical Informatics Research Methodology
- B. and 4 of the following:

		Units
BIOMEDIN 210	Modeling Biomedical Systems: Ontology, Terminology, Problem Solving	3
BIOMEDIN 214	Representations and Algorithms for Computational Molecular Biology	3-4
BIOMEDIN 215	Data Driven Medicine	3
BIOMEDIN 217	Translational Bioinformatics	4
BIOMEDIN 260	Computational Methods for Biomedical Image Analysis and Interpretation	3-4

- C. Any remaining units must be graduate level courses listed under BIOMEDIN.
- D. Note that BIOMEDIN 211 is no longer offered, however it may be used by students who completed it to fulfill a core BMI requirement.

2. Computer Science, Statistics, Mathematics & Engineering (18 units)

Students are expected to create a program of study with a mixture of graduate-level courses in computer science, statistics or other technical informatics-related disciplines that allows them to achieve in-depth mastery of these areas. The programs of study may focus on aspects of these disciplines including (but not limited to): machine learning, artificial intelligence, data mining, image analysis, human-computer interaction, systems engineering, scientific and numerical computing or graphics. In general, this course of study should include no more than 9 units in courses 100-199, and the rest should be 200 or above (unless specifically approved by adviser). CS courses 106, 107 and 108 cannot be counted for this requirement, and all courses should be formal classroom-based courses, unless approved by the executive committee. Up to 6 units of this portion of the core curriculum may be taken on a pass/fail basis, but at least half of the units in this portion of the curriculum must be taken for a grade. BIOMEDIN units above 17 may also be counted for the requirements in this category. Students may petition for quantitative courses in the medical school or Humanities and Sciences to be counted in this section of the curriculum.

3. Social and Ethical Issues (4 units)

Students are expected to be familiar with issues regarding ethical, legal, social, organizational and behavioral aspects of the impact of biomedical informatics technologies on society in general. They should select courses broadly from University offerings to explore one or more of these aspects more deeply. In addition, students are required to take MED 255 The Responsible Conduct of Research, or the equivalent.

4. Unrestricted Electives (6 units)

Students may fulfill this requirement with any Stanford course, including courses taken to satisfy core curriculum prerequisites.

5. For PhD Students only

Domain Biology/Medicine, Pedagogy, Electives (9 units): In order to reach a total of 54 units of core curriculum, PhD students should take an additional 9 units; this should include 6 units of biology or medicine classes relevant to their research interests, 2 units of BIOMEDIN 290 Biomedical Informatics Teaching Methods and one additional unit of unrestricted elective.

The core curriculum generally entails a minimum of 45 units of course work for master's students and 54 units of course work for Ph.D. students, but can require substantially more or less depending upon the courses chosen and the previous training of the student.

The following courses may be taken for satisfactory/no credit (S/NC):

		Units
BIOMEDIN 200	Biomedical Informatics Colloquium	1
BIOMEDIN 201	Biomedical Informatics Student Seminar	1
BIOMEDIN 205	Precision Practice with Big Data	1
BIOMEDIN 206	Informatics in Industry	1
BIOMEDIN 299	Directed Reading and Research	1-18
BIOMEDIN 801	TGR Master's Project	0
BIOMEDIN 802	TGR PhD Dissertation	0
MED 255	The Responsible Conduct of Research	1

The varying backgrounds of students are well recognized and no one is required to take courses in an area in which he or she has already been adequately trained; under such circumstances, students are permitted to skip courses or substitute more advanced work using a formal annual process administered by the BMI executive committee, in which students demonstrate satisfaction of core curriculum prerequisites, and request permission to receive core curriculum credit for classes taken previously in areas of the core curriculum. Students design appropriate programs for their interests with the assistance and approval of their Biomedical Informatics academic adviser. At least 27 units of formal course work are expected for the core curriculum.

Program Requirements for the Academic M.S., Professional M.S., and Coterminal M.S. Degrees

Students enrolled in any of the M.S. degrees must complete the program requirements in order to graduate. Programs of at least 45 units that meet the following guidelines are normally approved:

1. Completion of the core curriculum with overall GPA of 3.0.
2. Students are expected to participate regularly in BIOMEDIN 201 Biomedical Informatics Student Seminar and a research colloquium, such as BIOMEDIN 200 Biomedical Informatics Colloquium or

BIOMEDIN 205 Precision Practice with Big Data. HCP professional masters candidates who are able to attend classes on campus should also participate regularly.

3. Electives: additional courses to bring the total to 45 or more units taken at Stanford to fulfill the University's residency requirement.
4. Masters candidates should sign up for BIOMEDIN 801 TGR Master's Project for their project units after completing their 45-unit residency requirement.

Doctor of Philosophy in Biomedical Informatics

The University's basic requirements for the doctorate (residence, dissertation, examination, and so on) are discussed in the "Graduate Degrees (p. 38)" section of this bulletin.

Individuals wishing to prepare themselves for careers as independent researchers in biomedical informatics, with applications experience in bioinformatics, clinical informatics, or imaging informatics, should apply for admission to the doctoral program. The following are additional requirements imposed by the Biomedical Informatics Executive Committee:

1. A student plans and completes a coherent program of study including the core curriculum and additional requirements as for the master's program. In the first year, two or three research rotations are encouraged. The master's requirements should be completed by the end of the second year in the program (six quarters of study, excluding summers).
2. Doctoral students are generally advanced to Ph.D. candidacy after passing the qualifying exam, which takes place during the end of the second year of training. A student's academic adviser has primary responsibility for the adequacy of the program, which is regularly reviewed by the Biomedical Informatics Executive Committee.
3. To remain in the Ph.D. program, each student must attain a grade point average (GPA) of 3.0 for the core curriculum. The student must fulfill these requirements and apply for admission to candidacy for the Ph.D. by the end of six quarters of study (excluding summers). In addition, reasonable progress in the student's research activities is expected of all doctoral candidates.
4. During the third year of training, generally in Winter Quarter, each doctoral student is required to give a preproposal seminar that describes evolving research plans.
5. By the end of nine quarters (excluding summers), each student must orally present a written thesis proposal for the written dissertation and must orally defend the proposal before a University oral examination committee that generally includes at least one member of the Biomedical Informatics Executive Committee. The committee determines whether the student's general knowledge of the field and the details of the planned thesis are sufficient to justify proceeding with the dissertation.
6. After application for Terminal Graduate Registration (TGR) status, the Ph.D. candidate should register each quarter for BIOMEDIN 802 TGR PhD Dissertation so their research effort may be counted toward the degree.
7. As part of the training for the Ph.D., each student is required to be a teaching assistant for two courses approved by the Biomedical Informatics Executive Committee; one should be completed in the first two years of study.
8. The most important requirement for the Ph.D. degree is the dissertation. Prior to the oral dissertation proposal and defense, each student must secure the agreement of a member of the program faculty to act as dissertation adviser. The principal adviser should be

approved by the Biomedical Informatics Executive Committee, and all dissertation committees should include at least one participating BMI faculty member.

9. At the completion of training, while still matriculated and shortly prior to deposit of the dissertation, the student gives a final talk describing his or her results. No official additional oral examination is required upon completion of the written dissertation. The oral defense of the dissertation proposal satisfies the University oral examination requirement.
10. The student is expected to demonstrate an ability to present scholarly material and research in a lecture at a formal seminar.
11. The student is expected to demonstrate an ability to present scholarly material in concise written form. Each student is required to write a paper suitable for publication, usually discussing his or her doctoral research project. This paper must be approved by the student's academic adviser as suitable for submission to a refereed journal before the doctoral degree is conferred.
12. The dissertation must be accepted by a reading committee composed of the principal dissertation adviser, a member of the program faculty, and a third faculty member chosen from anywhere within the University. A fourth reader may be added at the discretion of the student and their adviser.

Ph.D. Minor in Biomedical Informatics

For a Ph.D. minor in Biomedical Informatics (BMI), a candidate must complete a minimum of 20 unduplicated units of biomedical informatics course work, including 12 units in BMI core courses from:

		Units
BIOMEDIN 210	Modeling Biomedical Systems: Ontology, Terminology, Problem Solving	3
BIOMEDIN 212	Introduction to Biomedical Informatics Research Methodology	3
BIOMEDIN 214	Representations and Algorithms for Computational Molecular Biology	3-4
BIOMEDIN 215	Data Driven Medicine	3
BIOMEDIN 217	Translational Bioinformatics	4
BIOMEDIN 260	Computational Methods for Biomedical Image Analysis and Interpretation	3-4

The candidate must complete the one-unit MED 255 The Responsible Conduct of Research or an approved substitute.

The remaining units must be courses that would count towards the BMI master's degree, taken from these areas:

- Computer Science, Probability, Statistics, Machine Learning, Mathematics, Engineering
- Biomedicine
- Other BMI courses from the list above

Courses used for the BMI Ph.D. minor may not be double-counted to meet the requirements of a master's or Ph.D. degree.

All courses used for the BMI Ph.D. minor, except MED 255, must be taken for a letter grade and passed with an overall GPA of 3.0 or better.

Stanford students apply using the Application for Ph.D. Minor and must provide an unofficial Stanford transcript as well as a statement of purpose for adding the Ph.D. minor degree.

This degree offering became effective in Autumn Quarter 2010-11. Courses taken at Stanford prior to that date may be counted towards the BMI Ph.D.

minor degree. A minor program adviser is assigned from the Biomedical Informatics Executive Committee or advising faculty.

Committee: Russ B. Altman (Chair and Program Director), Mark A. Musen (Co-Director), Steven C. Bagley (Executive Director), Atul Butte, Teri Klein, David Paik, Daniel L. Rubin, Nigam Shah

Participating Faculty and Staff by Department*

Biochemistry: Douglas L. Brutlag (Professor, emeritus), Rhiju Das (Assistant Professor), Ronald Davis (Professor), James Ferrell (Professor), Hunter Fraser (Assistant Professor), Julie Theriot (Associate Professor)

Bioengineering: Russ B. Altman (Professor), Kwabena Boahen (Associate Professor), Markus Covert (Assistant Professor), Hunter Fraser (Assistant Professor), Ingmar Riedel-Kruse (Assistant Professor)

Biology: Dmitri Petrov (Professor)

Chemistry: Vijay Pande (Professor)

Chemical and Systems Biology: Joshua Elias (Assistant Professor), James Ferrell (Professor)

Computer Science: Serafim Batzoglou (Associate Professor), Gill Bejerano (Assistant Professor), David Dill (Professor), Leo Guibas (Professor), Daphne Koller (Professor), Terry Winograd (Professor)

Developmental Biology: Gill Bejerano (Assistant Professor)

Genetics: Russ B. Altman (Professor), Steven C. Bagley (Senior Research Engineer), Carlos Bustamante (Professor), Mike Cherry (Associate Professor, Research), Stanley N. Cohen (Professor), Ronald Davis (Professor), Teri E. Klein (Senior Research Scientist), Jin Billy Li (Assistant Professor), Stephen B. Montgomery (Assistant Professor), Gavin Sherlock (Associate Professor), Arend Sidow (Associate Professor), Michael P. Snyder (Professor), Hua Tang (Associate Professor)

Health Research and Policy: Richard A. Olshen (Professor), Chiara Sabatti (Associate Professor), Robert Tibshirani (Professor)

Management Science and Engineering: Margaret Brandeau (Professor), Ross D. Shachter (Associate Professor)

Medicine: Russ B. Altman (Professor), Euan Ashley (Assistant Professor), Mary Goldstein (Professor), Hanlee P. Ji (Assistant Professor), Peter D. Karp (Consulting Assistant Professor), Henry Lowe (Associate Professor, Research; Senior Associate Dean for Information Resources and Technology), Mark A. Musen (Professor), Douglas K. Owens (Professor), Daniel R. Rubin (Assistant Professor), Robert W. Shafer (Professor, Research), Nigam Shah (Assistant Professor), Samson Tu (Senior Research Scientist), P.J. Utz (Associate Professor), Michael G. Walker (Consulting Associate Professor)

Microbiology and Immunology: Karla Kirkegaard (Professor), Garry Nolan (Professor), Julie Theriot (Associate Professor)

Operations, Information and Technology: Mohsen Bayati (Assistant Professor)

Pathology: Stephen B. Montgomery (Assistant Professor)

Pediatrics: Atul Butte (Associate Professor), Chris Longhurst (Clinical Associate Professor), Henry Lowe (Associate Professor, Research; Senior Associate Dean for Information Resources and Technology), Jonathan Palma (Clinical Assistant Professor)

Psychiatry and Behavioral Sciences: Vinod Menon (Professor)

Radiation Oncology: Lei Xing (Professor)

Radiology: Sam Gambhir (Professor), Sandy A. Napel (Professor), David Paik (Assistant Professor), Sylvia Plevritis (Associate Professor), Daniel L. Rubin (Assistant Professor)

Structural Biology: Michael Levitt (Professor), Vijay Pande (Professor)

Statistics: Trevor J. Hastie (Professor), Susan Holmes (Professor), Art Owen (Professor), Chiara Sabatti (Associate Professor), Robert Tibshirani (Professor), Michael G. Walker (Consulting Associate Professor)

* Research opportunities are not limited to faculty and departments listed.

Cancer Biology

Courses offered by the Cancer Biology Program are listed under the subject code CBIO on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=CBIO&filter-catalognumber-CBIO=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=CBIO&filter-catalognumber-CBIO=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=CBIO&filter-catalognumber-CBIO=on>).

The Cancer Biology Program at Stanford University is an interdisciplinary program leading to the Ph.D. degree. During the past three decades, understanding of cancer has increased with the discovery of oncogenes, tumor suppressor genes, pathways of DNA damage and repair, chromatin remodeling, cell cycle regulation, angiogenesis, and responses to hypoxia, and recent glimpses into the molecular basis of metastasis and cancer stem cell biology. In addition, methods of parallel analysis including gene expression arrays, protein arrays, and tissue arrays have begun to refine and redefine the taxonomy of cancer diagnosis. This explosion of basic and clinical science has resulted in the first successful cancer chemotherapies and immunotherapies based on the knowledge of specific molecular targets. Stanford presents a unique environment to pursue interdisciplinary cancer research because the schools of Medicine, Humanities and Sciences, and Engineering are located on a single campus.

The goal of the Cancer Biology Ph.D. program is to provide students with education and training that enables them to make significant contributions to this field. Course work during the first year is designed to provide a broad understanding of the molecular, genetic, cell biological, and pathobiological aspects of cancer. Students also learn about the current state of the epidemiology, clinical diagnosis, treatment, and prevention of human cancers. Equally important during the first year is a series of three rotations in research laboratories chosen by each student. By the beginning of the second year, each student chooses a research adviser and begins work on the dissertation project. A qualifying examination must be completed by the end of the second year. An annual Cancer Biology conference at Asilomar in Pacific Grove, California, provides students with an opportunity to present their research to one another and to faculty. The expected time to degree is four to five years.

Students are not limited to a single department in choosing their research adviser. The Cancer Biology Ph.D. program currently has approximately 65 graduate students located in basic science and clinical departments throughout the School of Medicine and the School of Humanities and Sciences.

Doctor of Philosophy in Cancer Biology

University requirements for the Ph.D. are described under the "Graduate Degrees (p. 38)" section of this bulletin.

A small number of applicants are admitted to the program each year. Applicants should have completed an undergraduate major in the biological sciences; applicants with undergraduate majors in physics, chemistry, or mathematics may be admitted if they complete background training in biology during the first two years of study. During the first year, each student is required to complete a minimum of three, one quarter laboratory rotations. Students must choose a dissertation adviser prior to the end of Summer Quarter, first year, but not before the end of Spring Quarter, first year.

The requirements for the Ph.D. degree are as follows:

1. Training in biology equivalent to that of an undergraduate biology major at Stanford.
2. Completion of the following courses:

		Units
BIOS 200	The Nucleus (For classes entering in 2012 or later. Students who entered in 2011 or earlier took GENE 203, Advanced Genetics.)	8
CBIO 241	Molecular, Cellular, and Genetic Basis of Cancer (Offered in Winter Quarter)	5
BIO 214	Advanced Cell Biology	4
Select one of the following:		
BIOMEDIN 214	Representations and Algorithms for Computational Molecular Biology	
BIOMEDIN 217	Translational Bioinformatics	
CBIO 243	Principles of Cancer Systems Biology	
CSB 210	Cell Signalling	
GENE 211	Genomics	
GENE 212	Introduction to Biomedical Informatics Research Methodology	
SBIO 241	Biological Macromolecules	
CBIO 280	Cancer Biology Journal Club (required for first- and second-year graduate students in Autumn, Winter, and Spring quarters, totaling 6 units)	1
MED 255	The Responsible Conduct of Research	1

3. At least 6 units of additional cancer biology-related, graduate-level courses. Course work taken is determined in consultation with the student's adviser and/or the Program Director.
4. Presentation of research results at the annual Cancer Biology Conference on at least three occasions, at least one being an oral presentation.
5. Completion of a qualifying examination in Cancer Biology is required for admission to Ph.D. candidacy. The exam consists of an NIH-style written grant proposal not to exceed ten pages (excluding references) and an oral examination. The examining committee consists of three faculty members from the Cancer Biology Program and does not include the student's dissertation adviser. The composition of this committee is chosen by the student and dissertation adviser and must be submitted to and approved by the program director prior to the end of Autumn Quarter, second year. The qualifying examination must be taken prior to the end of Spring Quarter, second year. If necessary, one retake is permitted prior to the end of Summer Quarter, second year. After the qualifying examination has been completed, the student is required to form a dissertation reading committee that includes the student's adviser and three other members of the Academic Council with appropriate expertise. Each student is required to arrange annual meetings (more frequently, if necessary) of the dissertation reading committee, at which time progress during the past year and a plan of study for the coming year are presented orally and discussed. Completion of each annual committee meeting must be communicated in writing to the program director by the adviser by the end of Spring Quarter each year.

The major accomplishment of each successful Ph.D. student is the presentation of a written dissertation resulting from independent investigation that contributes to knowledge in the area of cancer biology. An oral examination is also required for the Ph.D. degree. In the Cancer Biology Program, a public seminar (one hour) is presented by the Ph.D. candidate, followed by a closed-door oral examination. The oral examination committee consists of at least four examiners (the members of the doctoral dissertation reading committee) and a chair. The oral

examination chair must be from outside the Cancer Biology Program faculty and may not have a full or joint appointment in the adviser's or student's home department. However, a courtesy appointment does not affect eligibility. The oral examination chair may be from the same department as any other member(s) of the examination committee. All members of the oral examination committee are normally members of the Academic Council, as the oral examination chair must be. With the prior approval of the program director or school dean, one of the examiners may be a person who is not a member of the Academic Council if that individual contributes expertise not otherwise available. Official responsibility for selecting the oral examination chair rests with the program. Cancer Biology delegates this to the student and dissertation adviser.

Program Director: Amato Giaccia (Radiation Oncology)

Committee on Cancer Biology: Steven Artandi (Medicine, Hematology), Jeffrey Axelrod (Pathology), Katrin Chua (Medicine, Endocrinology), Max Diehn (Radiation Oncology), Edward Graves (Radiation Oncology), Ashby Morrison (Biology), Sylvia Plevritis (Radiology), Jonathan Pollack (Pathology), Alejandro Sweet-Cordero (Pediatrics), Monte Winslow (Genetics)

Participating Departments and Faculty

Biochemistry: Philip Beachy (Professor), Patrick O. Brown (Professor)

Bioengineering: Jennifer Cochran (Assistant Professor)

Biology (School of Humanities and Sciences): Martha Cyert (Professor), Judith Frydman (Professor), Or Gozani (Associate Professor), Ashby Morrison (Assistant Professor), W. James Nelson (Professor), Tim Stearns (Professor), Virginia Walbot (Professor)

Chemical And Systems Biology: James K. Chen (Associate Professor), Karlene Cimprich (Associate Professor), James E. Ferrell (Professor), Tobias Meyer (Professor), Daria Mochly-Rosen (Professor), Mary Teruel (Assistant Professor)

Dermatology: Howard Y. Chang (Professor), Paul A. Khavari (Professor), M. Peter Marinkovich (Associate Professor), Anthony Oro (Professor)

Developmental Biology: Margaret Fuller (Professor), Seung Kim (Professor), Stuart Kim (Professor), Roeland Nusse (Professor), Matthew Scott (Professor), Lucy Shapiro (Professor)

Genetics: Anne Brunet (Associate Professor), Michele Calos (Professor), Stanley Cohen (Professor), Monte M. Winslow (Assistant Professor)

Medicine/Blood and Marrow Transplantation: Robert Negrin (Professor)

Medicine/Cardiovascular Medicine: Ching-Pin Chang (Associate Professor)

Medicine/Endocrinology/Gerontology/Metabolism: Katrin Chua (Assistant Professor), Andrew R. Hoffman (Professor)

Medicine/Gastroenterology and Hepatology: Christine Cartwright (Professor), Anson Lowe (Associate Professor)

Medicine/Hematology: Steven Artandi (Professor), Linda Boxer (Professor), Calvin Kuo (Professor), Ravindra Majeti (Assistant Professor)

Medicine/Oncology: Ash Alizadeh (Assistant Professor), Gilbert Chu (Professor), Michael Clarke (Professor), Dean Felsher (Associate Professor), James Ford (Associate Professor), Ronald Levy (Professor), Shoshana Levy (Professor, Research), Beverly S. Mitchell (Professor; Director, Stanford Cancer Institute), Rajat Rohatgi (Assistant Professor), Branimir Sikic (Professor)

Medicine/Pulmonary and Critical Care Medicine: Glenn Rosen (Associate Professor)

Microbiology and Immunology: Helen M. Blau (Professor), Garry Nolan (Professor)

Neurology and Neurological Sciences: Thomas Rando (Professor)

Neurology and Neurosurgery: Yoon-Jae Cho (Assistant Professor)

Neurosurgery: Albert J. Wong (Professor)

Obstetrics and Gynecology: Renee A. Reijo Pera (Professor)

Orthopaedic Surgery: Nidhi Bhutani (Assistant Professor)

Otolaryngology: John Sunwoo (Assistant Professor)

Pathology: Jeff Axelrod (Associate Professor), Matthew Bogyo (Associate Professor), Michael Cleary (Professor), Gerald Crabtree (Professor), Edgar Engleman (Professor), Andrew Fire (Professor), Isabella Graef (Assistant Professor), Joseph Lipsick (Professor), Bingwei Lu (Associate Professor), Jonathan Pollack (Associate Professor), Arend Sidow (Associate Professor), Irving Weissman (Professor; Virginia & D.K. Ludwig Professor for Clinical Investigation in Cancer Research, Professor of Developmental Biology), Marius Wernig (Assistant Professor)

Pediatrics/Cancer Biology: Matthew Porteus (Associate Professor), Julien Sage (Associate Professor), Alejandro Sweet-Cordero (Assistant Professor)

Pediatrics/Cardiology: Marlene Rabinovitch (Professor)

Pediatrics/Endocrinology: Brian Feldman (Assistant Professor)

Pediatrics/Hematology/Oncology: Kathleen Sakamoto (Professor)

Pediatrics/Neonatal & Developmental Medicine: Christopher Contag (Professor)

Radiation Oncology/Radiation Biology: Laura Attardi (Associate Professor), J. Martin Brown (Professor), Amato Giaccia (Professor; Director, Stanford University Cancer Biology Program)

Radiation Oncology/Radiation Physics: Edward Graves (Associate Professor)

Radiation Oncology/Radiation Therapy: Max Diehn (Assistant Professor), Susan Knox (Associate Professor), Albert Koong (Associate Professor), Quynh-Thu Le (Professor)

Radiology/Diagnostic Radiology: Sylvia Plevritis (Associate Professor), Jianghong Rao (Associate Professor)

Structural Biology: William Weis (Professor)

Urology: Donna Peehl (Professor, Research), Zijie Sun (Associate Professor)

Chemical and Systems Biology

Courses offered by the Department of Chemical and Systems Biology are listed under the subject code CSB on the (<https://explorecourses.stanford.edu/search?q=CSB&view=catalog&page=0&catalog=71&filter-term-Autumn=on&filter-term-Winter=on&filter-term-Spring=on&filter-term-Summer=on&filter-coursestatus-Active=on&collapse=&filter-catalognumber-CSB=on&filter-catalognumber-CSB=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=CSB&filter-catalognumber-CSB=on>) ExploreCourses web site. (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=CSB&filter-catalognumber-CSB=on>)

The department emphasizes individualized training at the interface of physical science and biomedical science. The program encourages students to draw upon a variety of modern scientific techniques, ranging from recent advances in molecular biology and protein biochemistry to synthetic organic chemistry and single cell imaging. Graduate students in the department take courses in signal transduction networks, chemical biology, and other areas of importance to their research goals.

Master of Science in Chemical and Systems Biology

Students in the Ph.D. program may apply for an M.S. degree after having satisfactorily completed the course and laboratory requirements of the first two years. The degree also requires a written thesis based on literature or laboratory research. Postdoctoral research training is available to graduates having the Ph.D. or M.D. degree.

Doctor of Philosophy in Chemical and Systems Biology

University requirements for the Ph.D. are described in the "Graduate Degrees (<http://exploreddegrees.stanford.edu/schoolofmedicine/chemicalandsystemsbiology/%20/graduatedegrees/>)" section of this bulletin.

The Department of Chemical and Systems Biology offers interdisciplinary training to prepare students for independent careers in biomedical science. The main focus of the program is cell signaling, chemical biology, and systems biology.

The program leading to the Ph.D. degree includes formal and informal study in chemical biology, systems biology, drug discovery, biochemistry, and other areas of relevance to the interests of particular students. First-year students spend one quarter in each of three different laboratories, working closely with other graduate students, a professor, and postdoctoral fellows on various research projects. During the fourth quarter, the student chooses a faculty mentor with whom to undertake thesis research, based on available positions and the student's interest. During or before the eighth quarter of study, students must pass a qualifying exam which consists of an oral exam on general knowledge and a defense of a research proposal. Course requirements are fulfilled during the first two years of study; the later years of the four- to six-year program are devoted to full-time dissertation research. Close tutorial contact between students and faculty is stressed throughout the program.

Research opportunities also exist for medical students and undergraduates. The limited size of the labs in the department allows for close tutorial contact between students, postdoctoral fellows, and faculty.

The department participates in the four quarter Health and Human Disease and Practice of Medicine sequence which provides medical students with a comprehensive, systems-based education in physiology, pathology, microbiology, and pharmacology.

Emeriti: (Professors) Robert H. Dreisbach, Avram Goldstein, Dora B. Goldstein, Tag E. Mansour, Oleg Jardetzky, Richard A. Roth, James P. Whitlock

Chair: Tobias Meyer

Professors: James E. Ferrell, Jr., Tobias Meyer, Daria Mochly-Rosen
Associate Professors: James K. Chen, Karlene A. Cimprich, Thomas J. Wandless

Assistant Professors: Joshua Elias, Mary Teruel, Joanna K. Wysocka

Courtesy Professors: Stuart Kim, Beverly S. Mitchell, Paul A. Wender

Courtesy Associate Professors: Calvin J. Kuo, Matthew Bogyo

Courtesy Assistant Professors: Ajay Chawla, Markus Willard Covert, Jan M. Skotheim

Comparative Medicine

Courses offered by the Department of Comparative Medicine are listed under the subject code COMPMED on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=COMPMED&filter-catalognumber-COMPED=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=COMPMED&filter-catalognumber-COMPED=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=COMPMED&filter-catalognumber-COMPED=on>).

The Department of Comparative Medicine is a clinical department that offers residency training in laboratory animal medicine for veterinarians. Its faculty offer courses at the undergraduate and graduate levels. Clinical faculty and basic science faculty in the Department of Comparative Medicine accept students to participate in research projects.

The discipline of Comparative Medicine studies the differences and similarities among species to elucidate biological and disease mechanisms. The research interests of faculty include neuroscience, infectious diseases, neuropathology, cancer, molecular genetics, and laboratory animal science.

Chair: Sherril Green

Professors: Donna M. Bouley, Sherril Green

Associate Professors: Paul Buckmaster, Corinna Darian-Smith, Joseph Garner, Shaul Hestrin

Assistant Professors: Megan Albertelli, Stephen Felt, Jennifer Johns, Claude Nagamine, Cholawat Pacharinsak

Developmental Biology

Courses offered by the Department of Development Biology are listed under the subject code DBIO on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=DBIO&filter-catalognumber-DBIO=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=DBIO&filter-catalognumber-DBIO=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=DBIO&filter-catalognumber-DBIO=on>).

A fundamental problem in biology is how the complex set of multicellular structures that characterize an adult animal is generated from the fertilized egg. Recent advances at the molecular level, particularly with respect to the genetic control of development, have been explosive. These advances represent the beginning of a major movement in the biological sciences toward the understanding of the molecular mechanisms underlying developmental decisions and the resulting morphogenetic processes. This new thrust in developmental biology derives from the extraordinary methodological advances of the past decade in molecular genetics, immunology, and biochemistry. However, it also derives from groundwork laid by the classical developmental studies, the rapid advances in cell biology and animal virology, and from models borrowed from prokaryotic

systems. Increasingly, the work is directly related to human diseases, including oncogene function and inherited genetic disease.

The Department of Developmental Biology includes a critical mass of scientists who are leading the thrust in developmental biology and who can train new leaders in the attack on the fundamental problems of development. Department labs work on a wide variety of organisms from microbes to worms, flies, and mice. The dramatic evolutionary conservation of genes that regulate development makes the comparative approach of the research particularly effective. Scientists in the department labs have a very high level of interaction and collaboration. The discipline of developmental biology draws on biochemistry, cell biology, genetics, molecular biology, and genomics. People in the department have a major interest in regenerative medicine and stem cell biology.

The department is located in the Beckman Center for Molecular and Genetic Medicine within the Stanford University Medical Center.

Master of Science in Developmental Biology

University requirements for the M.S. are described in the "Graduate Degrees (p. 38)" section of this bulletin.

Students in the Ph.D. program in Developmental Biology may apply for an M.S. degree, assuming completion of their course requirements and preparation of a written proposal. The master's degree awarded by the Department of Developmental Biology does not include the possibility of minors for graduate students enrolled in other departments or programs.

Students are required to take, and satisfactorily complete, at least three lecture courses offered by the department, including DBIO 210 Developmental Biology. In addition, students are required to take three courses outside the department. Students are also expected to attend Developmental Biology seminars and journal clubs. In addition, the candidate must complete a research paper proposing a specific experimental approach and background in an area of science relative to developmental biology.

Doctor of Philosophy in Developmental Biology

University requirements for the Ph.D. are described in the "Graduate Degrees (p. 38)" section of this bulletin.

The graduate program in Developmental Biology leads to the Ph.D. degree. The department also participates in the Medical Scientists Training Program (MSTP) in which individuals are candidates for both the M.D. and Ph.D. degrees.

		Units
Students are required to complete at least six courses, including:		
DBIO 210	Developmental Biology	4
BIOS 200	The Nucleus	8
DBIO 215	Frontiers in Biological Research	1

An advanced molecular biology, biochemistry, or biophysics course

Students are expected to attend Developmental Biology seminars and journal clubs.

Completion of a qualifying examination is required for admission to Ph.D. candidacy. The examination consists of two parts. One proposal is on a subject different from the dissertation research and the other proposal is on the planned subject of the thesis. The final requirements of the program include presentation of a Ph.D. dissertation as the result of independent investigation and constituting a contribution to knowledge in the area of developmental biology. The student must pass the University oral

examination, taken only after the student has substantially completed research. The examination is preceded by a public seminar in which the research is presented by the candidate. The oral examination is conducted by a dissertation reading committee.

Emeriti: (Professors) David S. Hogness, A. Dale Kaiser

Chair: William Talbot

Associate Chair: tba

Professors: Ben Barres, Philip Beachy, Gerald Crabtree, Margaret Fuller, Seung Kim, Stuart Kim, David Kingsley, Roeland Nusse, Matthew Scott, Lucy Shapiro, William Talbot, Anne Villeneuve, Irving Weissman

Assistant Professors: Maria Barna, Gill Bejerano, Joanna Wysocka

Associate Professor: James Chen

Professor (Teaching): Ellen Porzic

Professor (Research): Harley McAdams

Genetics

Courses offered by the Department of Genetics are listed under the subject code GENE on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=GENE&filter-catalognumber-GENE=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=GENE&filter-catalognumber-GENE=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=GENE&filter-catalognumber-GENE=on>).

An underlying theme in the department is that genetics is not merely a set of tools but a coherent and fruitful way of thinking about biology and medicine. To this end, the department emphasizes a spectrum of approaches based on molecules, organisms, populations, and genomes. It provides training through laboratory rotations, dissertation research, seminar series, didactic and interactive course work, and an annual three-day retreat of nearly 200 students, faculty, postdoctoral fellows, and research staff.

The mission of the department includes education and teaching as well as research: graduates from our program pursue careers in many different venues including research in academic or industrial settings, health care, health policy, and education. The department is especially committed to increasing diversity within the program, and to the training of individuals from traditionally underrepresented minority groups.

Master of Science in Human Genetics

The University requirements for the M.S. are described in the "Graduate Degrees (<http://www.stanford.edu/dept/registrar/bulletin/4901.htm>)" section of this bulletin.

The Department of Genetics offers an M.S. in Human Genetics, which is accredited by the American Board of Genetic Counseling. This program prepares students to practice in the healthcare profession of genetic counseling. The program is a full time two-year program, and accepts students to begin the program only in Autumn Quarter. Students must be admitted directly into this program, and cannot automatically transfer from the Ph.D. programs within the department, or vice versa. While courses are oriented primarily towards genetic counseling students, they may also be taken by medical students, other graduate students, residents or post-doctoral fellows, and (with permission) undergraduates.

The degree requires the completion of clinical rotations and an approved research project.

Students must also complete:

- required course work:

		Units
GENE 271	Human Molecular Genetics	4
GENE 272	Introduction to Medical Genetics	2-3
GENE 273	Introduction to Clinical Genetics Testing	1
GENE 274A	A Case Based Approach to Clinical Genetics	2
GENE 274B	A Case Based Approach to Clinical Genetics	2
GENE 275	Role Play and Genetic Counseling Observations	2
GENE 276	Genetic Counseling Clinical Rotations	4-7
GENE 278	Prenatal Genetic Counseling	1
GENE 279	Pediatric and Adult Genetic Counseling	1
GENE 280	Metabolic Genetic Counseling	1
GENE 281	Cancer Genetic Counseling	1
GENE 282A	Genetic Counseling Research Seminar	1
GENE 282B	Genetic Counseling Research Seminar	1
GENE 283	Genetic Counseling Research	1-8
GENE 284	Medical Genetics Seminar	1-2
GENE 285A	Genetic Counseling Seminar	2-3
GENE 285B	Genetics Counseling Seminar	2-3
GENE 285C	Genetic Counseling Seminar	2-3
GENE 286	Advanced Genetic Counseling Seminar	2

- several additional required courses (bioethics, research ethics and developmental biology),
- and are encouraged to take 2-4 elective courses of their choice, including a research methods elective.

Faculty members include members of the Stanford faculty from Genetics, Pediatrics, Obstetrics, Pathology, Developmental Biology, Biomedical Ethics, Law, and Psychology, and practicing genetic counselors and clinical geneticists in various medical centers across the Bay Area.

Applications are due in December (see web site) for admission in the following Autumn Quarter. Applicants should demonstrate a combination of academic preparation, exposure to genetic counseling, and counseling and/or laboratory experiences. Exposure to persons with disabilities or chronic illness is also helpful. Additional information about the program is available at Stanford's Master's Program in Human Genetics (<http://www.med.stanford.edu/genetic-counseling>) web site.

Doctor of Philosophy in Genetics

University requirements for the Ph.D. degree are described in the "Graduate Degrees (p. 38)" section of this bulletin.

The Ph.D. program in the Department of Genetics offers graduate students the opportunity to pursue a discipline that encompasses both a set of tools and a coherent way of thinking about biology and medicine. All major areas of genetics are represented in the department, including human genetics (molecular identification of Mendelian traits and the pathophysiology of genetic disease, gene therapy, genetic epidemiology, analysis of complex traits, and human evolution), and application of model organisms such as bacteria, yeast, flies, worms, or mice to basic questions in biomedical research. The department is especially strong in genomic and bioinformatic approaches to genome biology and evolution, and includes several genome-scale databases such as the *Saccharomyces* Genome Database (SGD), the Stanford Microarray Database (SMD), and the Pharmacogenetics and Pharmacogenomics Knowledge Base (PharmGKB) and, administered through the Department of Biochemistry, the Stanford Genome Technology Center (SGTC).

Exposure to the intellectual scope of the department is provided by laboratory rotations, dissertation research, advanced courses in genetics and other areas of biomedical science, seminar series, journal clubs, and an annual three-day retreat of faculty, students, postdoctoral fellows, and staff scientists. Emphasis is placed on interactions and collaborations among students, postdoctoral students, and faculty within the department and throughout the campus.

During their first year, graduate students in the department take graduate courses and sample areas of research by doing rotations in three or four laboratories. At the end of the first three quarters, students may select a laboratory in which to do their dissertation research. While the dissertation research is generally performed in one laboratory, collaborative projects with more than one faculty member are encouraged. In addition to interacting with their faculty preceptor, graduate students receive advice regularly from other faculty members who serve as members of their dissertation committee. Study for the Ph.D. generally requires between four and five years of graduate work, most of which is focused on dissertation research.

Students are generally enrolled in the program to receive the Ph.D. degree, although a limited number of M.D. candidates can combine research training in genetics with their medical studies. Ph.D. candidates who have passed the qualifying exam in the second year can opt to receive the M.S. as a terminal degree.

There are opportunities for graduate students to teach in graduate-level and professional-school courses. In addition, students have the opportunity to participate in educational outreach activities coordinated by the department, which include opportunities to interact with secondary school students and teachers, lay groups, and local science museums.

Students who have recently received a bachelor's, master's, M.D., or Ph.D. degree in related fields may apply for graduate study. Prospective students must have a background in biology, mathematics, physics, and chemistry. Decisions for admission are based on comparison of the relative merits of all the candidates' academic abilities and potential for research and the department's interest in promoting a diverse learning environment. Interviews take place in late February or early March and successful applicants are offered admission by early spring. Students who wish to pursue a combined M.D./Ph.D. degree are considered for admission into the graduate program in the department after they have been admitted to the M.D. program in the School of Medicine.

Students begin graduate studies in Autumn Quarter. Prospective students are encouraged to start the application process early to ensure that they are able to submit a complete application by the December deadline. All students accepted into the Ph.D. program in the Department of Genetics are provided with full tuition and a stipend. Two training grants from the National Institutes of Health provide major support for the graduate training program in the department. Other student support is provided by departmental funds and from research grants, both federal and private, of the faculty. In addition, a number of graduate students are funded by fellowships, including those from the National Science Foundation and the Stanford Graduate Fellows program.

Emeritus: (Professor) Greg Barsh, Leonard Herzenberg, Uta Francke

Chair: Michael Snyder

Professors: Russ Altman, Carlos Bustamante, Michele Calos, Stanley Cohen, Ronald Davis, Andrew Fire, Margaret Fuller, Mark Kay, Stuart Kim, Joseph Lipsick, John Pringle, Matthew Scott, Tim Stearns, Anne Villeneuve

Associate Professors: Laura Attardi, Julie Baker, Anne Brunet, James Ford, Gavin Sherlock, Aaron Gitler, Arend Sidow, Julien Sage, Zijie Sun, Hua Tang, Douglas Vollrath

Assistant Professors: William Greenleaf, Jin Billy Li, Stephen Montgomery, Monte Winslow

Professor (Research): Leonore Herzenberg

Associate Professor (Research): J. Michael Cherry

Associate Professor (Teaching): Kelly Ormond

Courtesy Professor: Hank Greely, Alexander Urban

Lecturer: Andrea Kwan

Health Research and Policy

Courses offered by the Department of Health Research and Policy are listed under the subject code HRP on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=HRP&filter-catalognumber-HRP=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=HRP&filter-catalognumber-HRP=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=HRP&filter-catalognumber-HRP=on>).

The Department of Health Research and Policy has three principal areas of scholarly interest:

1. Biostatistics deals with scientific methodology in the medical sciences, emphasizing the use of statistical techniques.
2. Epidemiology is the study of the distribution and determinants of illness and impairment in human populations. Epidemiology training provides analytic tools for clinical and translational research, including studies of disease etiology, prevention, and therapy.
3. Health Services Research is concerned with many aspects of health policy analysis in the public and private sectors

Graduate Programs in Health Research Policy

The Program in Epidemiology and the Program in Health Services Research are housed in the Department of Health Research and Policy. These programs offer M.S. degrees in Epidemiology and in Health Services Research. Students with an interest in pursuing advanced degrees with an emphasis on biostatistics can do so through programs offered by the Department of Statistics. Division of Biostatistics faculty participate in these programs.

For additional information, address inquiries to the Educational Coordinator, Department of Health Research and Policy, Stanford University School of Medicine, HRP Redwood Building, Room T-152F, Stanford, California 94305-5405.

Master of Science in Health Services Research

The master's degree program in Health Services Research seeks to train students in the quantitative analysis of issues in health and medical care. The program emphasizes an individually designed program of course work and completion of a master's project under the mentorship of a faculty member. The typical student in the program is either a physician who has completed residency training and is preparing for a research career, or a student with a strong background in policy analysis who wishes to focus on problems in health or medical care. Faculty interests include outcomes research, health economics, health care organization, health care access, quality of care, decision analysis, clinical guidelines, and assessment of patient preferences and quality of life.

To receive the degree, students are expected to demonstrate knowledge of issues in health services research and the quantitative skills necessary for research in this area. Students must take at least 45 units of course work and write a University thesis. The course work requirements are:

1. At least 8 units from the following group of Health Research and Policy (HRP) core courses:

		Units
HRP 256	Economics of Health and Medical Care	5
HRP 391	Health Care Regulation, Finance and Policy	3
HRP 392	Analysis of Costs, Risks, and Benefits of Health Care	4
<hr/>		
Total Units		12
2. At least 6 units of graduate-level statistics courses.

		Units
HRP 261 & HRP 262	Intermediate Biostatistics: Analysis of Discrete Data and Intermediate Biostatistics: Regression, Prediction, Survival Analysis (strongly recommended)	6
<hr/>		
Total Units		6
3. At least 3 units of:
4. At least 15 units:

		Units
HRP 283	Health Services Research Core Seminar	1
<hr/>		
Total Units		1
5. At least 15 units:

		Units
HRP 299	Directed Reading in Health Research and Policy	1-18
or HRP 399	Graduate Research	
<hr/>		
Total Units		1-18
6. An additional set of approved elective courses to complete the program total of at least 45 units.

For additional information, address inquiries to the Educational Coordinator, Department of Health Research and Policy, Stanford University School of Medicine, HRP Redwood Building, Room T138C, Stanford, California 94305-5405.

Master of Science in Epidemiology

The Graduate Program in Epidemiology offers instruction and interdisciplinary research opportunities leading to the M.S. degree in Epidemiology. Epidemiology is the study of the distribution and determinants of illness and impairment in human populations. It is important in its own right, and epidemiologic methods are used by clinical investigators and by other scientists who conduct observational and experimental research on the identification, prevention, and treatment of human disorders.

Core and affiliated faculty come from the Department of Health Research and Policy; other Stanford University departments, and notable Bay Area research facilities. The Program has particular strengths in cancer epidemiology, cardiovascular disease epidemiology, infectious disease epidemiology, musculoskeletal disease epidemiology, neuroepidemiology, and aspects of epidemiologic methods, genetic epidemiology, and reproductive epidemiology and women's health.

The mission of the Stanford University School of Medicine is to be a premier research-intensive medical school that improves health through leadership and collaborative discoveries and innovation in patient care, education and research. With support from a NIH Clinical and Translational

Science Award, the graduate program in Epidemiology fosters this mission through the training of physician investigators in techniques of clinical research. The department also considers students from other disciplines who would benefit from formal training in epidemiologic methods.

A typical student has the M.D. degree and is in the fellowship stage of his or her postgraduate training, or in an early stage of faculty development. Other students may not have prior clinical training. These may include behavioral, social, and life scientists; law students; and students with the baccalaureate degree. They may wish to bring an epidemiologic orientation to their research or practice, or they may be considering careers in epidemiology or a related discipline.

To receive the M.S. degree, students are expected to obtain a grounding in epidemiologic methods and applied biostatistics and to demonstrate research skills through the completion of a thesis. Students must complete at least 45 units of course work:

1. Epidemiologic methods:

		Units
HRP 225	Design and Conduct of Clinical and Epidemiologic Studies	3-4
HRP 226	Advanced Epidemiologic and Clinical Research Methods	3-4
HRP 251	Design and Conduct of Clinical Trials	3
2. Biostatistics:

		Units
HRP 259	Introduction to Probability and Statistics for Epidemiology	3-4
HRP 261	Intermediate Biostatistics: Analysis of Discrete Data	3
HRP 262	Intermediate Biostatistics: Regression, Prediction, Survival Analysis	3
3. Research seminars:

		Units
HRP 236	Epidemiology Research Seminar (at least 3 units)	1
4. Research:

		Units
HRP 399	Graduate Research (at least 12 units)	1-18
5. Research conduct:

		Units
MED 255	The Responsible Conduct of Research	1
Attend a Human Subjects Institutional Review Board meeting.		
6. Additional approved selective and elective courses to complete the program total of at least 45 units.

Students are assigned a methodology mentor from the Department of Health Research and Policy, and they also select a research mentor, who may be from another department. For physicians, the research mentor is often an affiliated faculty member from the department of the student's clinical specialty.

University requirements for the M.S. degree are described in the "Graduate Degrees (p. 38)" section of this bulletin. Other programmatic requirements are in Graduate Program in Epidemiology, Information and Guidelines, available from the educational coordinator in the Department of Health Research and Policy.

Health Research and Policy

Emeriti: (Professors) Dan Bloch, John Farquhar, Victor R. Fuchs

Chair: Phil Lavori

Co-Chair: Robert Tibshirani

Professors: Laurence Baker, Bradley Efron, Trevor Hastie, Victor W. Henderson, Mark Hlatky, John Ioannidis, Iain M. Johnstone, Abby C. King, Philip W. Lavori, Ying Lu, Yvonne Maldonado, Richard A. Olshen, Julie Parsonnet, Robert Tibshirani, Alice S. Whittemore, Dee W. West, Wing Wong

Associate Professor: M. Kate Bundorf, Lorene M. Nelson, Chiara Sabatti

Consulting Professors: Gary Friedman, Elizabeth Holly, Marion Lee, George Lundberg, Peggy Reynolds

Consulting Associate Professors: Paul Barnett, Sally Glaser, Pamela Horn-Ross, Esther John, Ciaran Phibbs

Consulting Assistant Professors: Ellen Chang, Christina Clarke-Dur, Theresa Keegan, Bang Nguyen, Ingrid Oakley-Girvan, Rudy Rull, Todd Wagner

Health Services Research

Director: Mark Hlatky (Professor, Health Research and Policy, and Medicine)

Executive Committee: Laurence Baker (Professor, Health Research and Policy), M. Kate Bundorf (Associate Professor, Health Research and Policy), Mary Goldstein (Professor, Medicine), Mark Hlatky (Professor, Health Research and Policy, and Medicine), Douglas Owens (Professor, Medicine)

Participating Faculty and Staff by Department:

Anesthesia: Alex Macario (Professor)

Business: Alain Enthoven (Professor, emeritus)

Health Research and Policy: Laurence Baker (Professor), Paul Barnett (Consulting Associate Professor), M. Kate Bundorf (Associate Professor), Victor Fuchs (Professor, emeritus), Trevor Hastie (Professor), Mark Hlatky (Professor), Philip Lavori (Professor), Richard Olshen (Professor), Ciaran Phibbs (Consulting Associate Professor), Joseph Selby (Consulting Professor), Robert Tibshirani (Professor)

Law: Henry Greely (Professor), Daniel Kessler (Professor)

Management Science and Engineering: Margaret Brandeau (Professor)

Medicine: Jay Bhattacharya (Associate Professor), Jeremy Goldhaber-Fiebert (Assistant Professor), Mary Goldstein (Professor), Michael Gould (Associate Professor), Paul Heidenreich (Associate Professor), Mark Hlatky (Professor), Grant Miller (Assistant Professor), Douglas Owens (Professor), Wolfgang Winkelmayr (Associate Professor)

Pediatrics: Paul Wise (Professor)

Psychiatry: Rudolph Moos (Professor, emeritus)

Sociology: Richard Scott (Professor, emeritus)

Epidemiology

Director: Victor W. Henderson (Professor, Health Research and Policy, and Neurology and Neurological Sciences)

Core Faculty and Academic Teaching Staff: Raymond R. Balise (Lecturer, Health Research and Policy), Gary D. Friedman (Consulting Professor, Health Research and Policy), Victor W. Henderson (Professor, Health Research and Policy, and Neurology and Neurological Sciences), Abby C. King (Professor, Health Research and Policy, and Medicine), Allison Kurian (Assistant Professor, Medicine, and Health Research and Policy), Philip Lavori (Professor, Health Research and Policy), Yvonne A. Maldonado (Professor, Pediatrics), Lorene M. Nelson (Associate Professor, Health Research and Policy), Julie Parsonnet (Professor, Medicine, and Health Research and Policy), Rita A. Papat (Clinical Assistant Professor, Health Research and Policy), Kristin L. Sainani (Clinical Assistant Professor, Health Research and Policy), Weiva Sieh (Assistant Professor, Health Research and Policy), Dee W. West (Professor, Health Research and Policy), Alice S. Whittemore (Professor, Health Research and Policy)

Immunology

Courses offered by the Immunology Program are listed under the subject code IMMUNOL on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=IMMUNOL&filter-catalognumber=IMMUNOL=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=IMMUNOL&filter-catalognumber=IMMUNOL=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=IMMUNOL&filter-catalognumber=IMMUNOL=on>).

Stanford Immunology is home to faculty, students, postdocs, and staff who work together to produce internationally recognized research in many fields of immunology. The long tradition of collaboration among the immunology laboratories at Stanford fosters productive interdisciplinary research, with an emphasis on the application of molecular approaches to problems in cellular and clinical immunology. Faculty research interests include both bench-to-bedside approaches and basic science research. Graduate students and postdoctoral scholars receive outstanding training through their participation in research, teaching, seminars, journal clubs, and the annual Stanford Immunology Scientific Conference.

Mission of the Graduate Program in Immunology

The Immunology graduate program offers instruction and research opportunities leading to a Ph.D. in Immunology. The goal of the program is to develop investigators who have a strong foundation in Immunology and related sciences in order to carry out innovative research. The program features a flexible choice of courses and seminars combined with extensive research training in the laboratories of participating Immunology faculty. Specifically, immunology graduate students:

1. acquire a fundamental, broad, and comprehensive body of knowledge and skills through an extensive curriculum.
2. identify important scientific questions, design and conduct experiments using the most appropriate methods.
3. read and critically analyze current literature in immunology and other relevant fields.
4. present research findings and communicate ideas effectively to a variety of audiences.

- prepare manuscripts that will be published in leading journals.
- learn to teach effectively.

Master of Science in Immunology

Students in the Ph.D. program in Immunology may apply for an M.S. degree in Immunology only under special circumstances, assuming completion of appropriate requirements. Students must complete:

- At least 45 units of academic work, all of which must be in courses at or above the 100 level, 36 units of which must be at or above the 200 level.
- 3 quarters of graduate research (IMMUNOL 399 Graduate Research), consisting of rotations in the labs of three faculty members.
- Participation in the Immunology journal club (IMMUNOL 305 Immunology Journal Club), and attendance at the Immunology seminar series and at the annual Stanford Immunology Scientific Conference.
- First Year Rotations Presentations and General Advising Sessions, June. Students present on one out of three lab rotations.
- Students must submit a master's thesis paper on one of their rotations. This requirement may be waived under special circumstances.

Course work in Immunology as follows:

Track: Cellular, Molecular and Translational Immunology		Units
BIO 200	Advanced Molecular Biology	5
BIO 230A	Molecular and Cellular Immunology Literature Review	1
IMMUNOL 201	Advanced Immunology I	3
IMMUNOL 202	Advanced Immunology II	3
IMMUNOL 203	Advanced Immunology III	2
IMMUNOL 311	Seminar in Immunology	1
IMMUNOL 311A	Discussions in Immunology	1
IMMUNOL 305	Immunology Journal Club	1
IMMUNOL 215	Principles of Biological Technologies	3
IMMUNOL 399	Graduate Research	1-15
MI 210	Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites	4
BIO 141	Biostatistics	4-5
MED 255	The Responsible Conduct of Research	1
Total Units		30-45

Track: Computational Immunology		Units
BIOS 200	The Nucleus	8
BIO 230A	Molecular and Cellular Immunology Literature Review	1
IMMUNOL 201	Advanced Immunology I	3
IMMUNOL 202	Advanced Immunology II	3
IMMUNOL 206A	Systems Immunology	3-4
IMMUNOL 206B	Directed Projects in Systems Immunology	3-10
IMMUNOL 209	Translational Immunology	1
BIOMEDIN 212	Introduction to Biomedical Informatics Research Methodology	3

BIOMEDIN 214	Representations and Algorithms for Computational Molecular Biology	3-4
BIOMEDIN 217	Translational Bioinformatics	4
IMMUNOL 399	Graduate Research	1-15
MED 255	The Responsible Conduct of Research	1
Total Units		34-57

Doctor of Philosophy in Immunology

Courses offered by the Stanford Graduate Program in Immunology are listed under the subject code IMMUNOL on the Stanford Bulletin's ExploreCourses website.

Admissions

Students seeking admissions to the Immunology Graduate Program typically have an undergraduate major in biological sciences, but majors from other areas are acceptable if the applicants have sufficient coursework in biology, chemistry, general physics, and mathematics (through calculus). Applications are evaluated by the Immunology Graduate Program committee based upon: GRE scores; grades; evidence of research experience; letters of recommendation, including letters from research sponsor(s); and commitment to a career in biomedical research. The GRE Subject test is not required. Applicants should plan on taking the GRE at least one month prior to the application deadline of December 2nd to ensure that official scores are available when applications are evaluated. Interested Stanford medical students are welcome to apply to the program and should also submit a formal application by December 2.

Prospective graduate students must apply via Stanford's online graduate application.

The Immunology graduate program offers two tracks:

- Track 1: Molecular, Cellular, and Translational Immunology
- Track 2: Computational and Systems Immunology

Financial Aid

Students admitted to the program are offered financial support for tuition, a living stipend, insurance coverage, and a small allowance for books/travel. Applicants are urged to apply for independent fellowships such as from the National Science Foundation or National Defense Science and Engineering Graduate Fellowships. NSF Fellowship applications are due in November of the year prior to matriculation in the graduate program, but Immunology graduate students may continue to apply for outside fellowships after matriculation. Admitted students are typically offered financial support in the form of Stanford Graduate Fellowships, NIH traineeships, or research assistantships.

General Requirements

Immunology Startup and the First-Year Advising Process

Since students enter with differing backgrounds, each student is assisted by the first-year adviser in selecting courses and lab rotations in the first year and in choosing a lab for the dissertation research. In addition, the *Immunology Startup*, a four-day long introduction to immunology in the third week of September, exposes incoming Immunology Ph.D. students to a variety of techniques and concepts. Students learn basic laboratory techniques in immunology and participate in in-depth discussions with faculty.

All students must be enrolled in exactly 10 units during Autumn, Winter, Spring, and Summer quarters until reaching TGR status in the summer

quarter of their fourth year. Students are required to pass all courses in which they are enrolled; required and elective courses must be taken for a letter grade. Students must earn a grade of 'B-' or better in all courses applicable to the degree that are taken for a letter grade. Satisfactory completion of each year's general and track specific requirements listed below is required. During the first year, degree progress is monitored closely by the first-year adviser in quarterly meetings and by the Stanford Graduate Program Committee in a final advising session in June.

First-year students are required to do three rotations in at least two immunology labs. In the spring quarter, two mini-rotations of six weeks each may be arranged.

A specific program of study for each student is developed individually with the first-year adviser.

All students in the two tracks, Molecular, Cellular, and Translational Immunology (MCT) and Computational and Systems Immunology (CSI) are required to enroll in the following core courses:

		Units
BIOS 200	The Nucleus	8
BIO 230A	Molecular and Cellular Immunology Literature Review	1
IMMUNOL 201	Advanced Immunology I	3
IMMUNOL 202	Advanced Immunology II	3
IMMUNOL 305	Immunology Journal Club	1
IMMUNOL 311	Seminar in Immunology	1
IMMUNOL 311A	Discussions in Immunology	1
IMMUNOL 399	Graduate Research	1-15
IMMUNOL 290	Teaching in Immunology	1-15
MED 255	The Responsible Conduct of Research	1

In the third week of June, first-year immunology graduate students are required to give a presentation on one of their three rotations to the Immunology Graduate Program Committee. After the rotation presentation, the first-year student will meet with the Stanford Graduate Program Committee in a one-on-one advising session to review degree progress and choice of a PhD thesis lab. The first-year graduate student is asked to complete a "Big Picture" advising document, which takes stock of the first year student's accomplishments in the past year, discusses near- and long-term plans, and develops a strategy for realizing those plans.

Once a dissertation adviser has been selected, a dissertation committee, including the dissertation adviser and two additional Immunology faculty, is constituted to guide the student during the dissertation research. The student must meet with the dissertation committee at least once a year. In addition, a secondary adviser is assigned who can provide additional advice on issues such as career path choices and other non-academic issues.

Qualifying Exam and Admission to Candidacy

Second-year students are required to pass a general orals examination and write and orally present a dissertation proposal which is evaluated by a committee of three faculty (the dissertation advising committee). All students must be admitted to candidacy by the end of their second year. This is contingent upon satisfactory completion of course work, all first and second year requirements, the dissertation proposal, and the University's requirements for candidacy outlined in the Candidacy section of this bulletin. If a student does not meet the requirements for admission to candidacy by the end of the second year, the student is subject to dismissal from the PhD program.

Candidates for Ph.D. degrees at Stanford must satisfactorily complete a program of study that includes 135 units of graduate course work and research. At least 3 units must be taken with each of four different Stanford

faculty members. All core course requirements must be completed by the end of the second year.

Immunology Journal Club

Students are required to attend the IMMUNOL 305 Immunology Journal Club for their first through third years. Attendance is optional for fourth year and above graduate students.

Immunology Seminar Series

Graduate seminars are an important means of attaining a broad and comprehensive exposure to all areas in immunology as well as gaining a professional perspective and competence in the field. First-year students are required to attend all immunology seminars (IMMUNOL 311 Seminar in Immunology, Tuesdays, 4:15 pm) and the companion immunology seminar discussions course (IMMUNOL 311A Discussions in Immunology, Mondays, 10:00 am); in the latter, first-year the seminar speakers' papers are discussed. Students in their second year and above are required to attend 50% of the seminar series each academic year.

Immunology Scientific Retreat

The annual Retreat is held at the Asilomar Conference Grounds, Pacific Grove, CA, and is attended by students, staff, postdocs and faculty of the Stanford immunology community. All immunology graduate students are required to attend. In the third through fifth years, students will present a poster and give a talk on their graduate research.

Teaching Assistantships

Teaching experience and training are part of the graduate curriculum. Each student assists in teaching two courses in the immunology core or electives.

Doctoral Dissertation

A substantial draft of the dissertation must be turned in to the student's oral examination committee at least one month before the oral exam is scheduled to take place. The oral examination committee must be comprised of at least five faculty members, at least 3 of whom should be immunology program faculty. In addition, the final written dissertation must be approved by the student's reading committee (a minimum of three approved faculty), and submitted to the Registrar's Office. Upon completion of this final requirement, a student is eligible for conferral of the degree.

Track Specific Requirements

In addition to the general requirements listed above, students must also complete requirements within their track. Written petitions for exemptions to core curriculum and lab rotation requirements are considered only in the first year by the advising committee and the chair of the graduate program committee. Approval is contingent upon special circumstances and is not routinely granted.

Molecular, Cellular, and Translational Immunology

MCT first-year students are required to take the following courses in their first year for a letter grade:

	Units
IMMUNOL 203 Advanced Immunology III	2
1 out of possible two courses:	
MI 210 Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites	4

BIO 214	Advanced Cell Biology	4
One elective (see elective list below)		
Electives:		
		Units
IMMUNOL 260	HIV: The Virus, the Disease, the Research	3-4
IMMUNOL 275	Tumor Immunology	3
IMMUNOL 285	Brain and the Immune System	3
CSB 210	Cell Signalling	4
SBIO 241	Biological Macromolecules	3-5
DBIO 210	Developmental Biology	4
CBIO 241	Molecular, Cellular, and Genetic Basis of Cancer	5
IMMUNOL 204	Innate Immunology	3
IMMUNOL 205	Immunology in Health and Disease	4
IMMUNOL 209	Translational Immunology	1
IMMUNOL 231	Medicine for Innovators and Entrepreneurs	3-4
IMMUNOL 206A	Systems Immunology	3-4
IMMUNOL 206B	Directed Projects in Systems Immunology	3-10
CS 106X	Programming Abstractions (Accelerated)	3-5
CS 145	Introduction to Databases	3-4
CS 448B	Data Visualization	3
MS&E 220	Probabilistic Analysis	3-4
STATS 116	Theory of Probability	3-5
STATS 300	Advanced Topics in Statistics	2-3

Computational and Systems Immunology

CSI students are required to take the following courses in their first or second years:

		Units
IMMUNOL 206A	Systems Immunology	3-4
IMMUNOL 206B	Directed Projects in Systems Immunology	3-10
IMMUNOL 209	Translational Immunology	1
BIOMEDIN 212	Introduction to Biomedical Informatics Research Methodology	3
BIOMEDIN 214	Representations and Algorithms for Computational Molecular Biology	3-4
BIOMEDIN 217	Translational Bioinformatics	4
One elective (see elective list below)		
Electives:		
		Units
CS 106X	Programming Abstractions (Accelerated)	3-5
STATS 116	Theory of Probability	3-5
CS 145	Introduction to Databases	3-4
CS 448B	Data Visualization	3
MS&E 220	Probabilistic Analysis	3-4
STATS 300	Advanced Topics in Statistics	2-3
Other		

Chair, Executive Committee for the Immunology Program: Patricia Jones (Professor, Biology)

Director for Immunology Program: Olivia Martinez (Professor, Research, Surgery, Transplantation)

Participating Departments and Faculty (Cellular, Molecular, Translational Immunology):

Biology: Patricia P. Jones (Professor)

Genetics: Leonard A. Herzenberg (Professor, emeritus), Leonore A. Herzenberg (Professor, Research)

Medicine/Blood and Bone Marrow Transplantation Program: Robert Negrin (Professor), David Miklos (Assistant Professor), Judith Shizuru (Associate Professor)

Medicine/Cardiovascular Medicine: Joseph Wu (Associate Professor, and Radiology and Institute for Stem Cell and Regenerative Medicine)

Medicine/Gastroenterology and Hepatology: Aida Habtezion (Assistant Professor)

Medicine/Hematology: Calvin Kuo (Professor, and Chemical Systems Biology), Ravi Majeti (Assistant Professor, and Institute for Stem Cell and Regenerative Medicine)

Medicine/Immunology and Rheumatology: C. Garrison Fathman (Professor), Jorg Goronzy (Professor), William Robinson (Associate Professor), Samuel Strober (Professor), Paul J. Utz (Associate Professor), Cornelia Weyand (Professor)

Medicine/Infectious Diseases: Catherine Blish (Assistant Professor), Robert Shafer (Associate Professor, Research, and Pathology)

Medicine/Oncology: Ash Alizadeh (Assistant Professor), Gilbert Chu (Professor, and Biochemistry), Dean Felsher (Associate Professor, and Pathology), Ronald Levy (Professor), Shoshana Levy (Professor, Research)

Medicine/Pulmonary and Critical Care Medicine: Mark Nicolls (Associate Professor)

Microbiology and Immunology: John Boothroyd (Professor), Chang-Zheng Chen (Assistant Professor), Yueh-Hsiu Chien (Professor), Mark M. Davis (Professor, and Director, Institute for Immunity, Transplantation and Infection), Holden Maecker (Associate Professor, Research), Hugh McDavitt (Professor,emeritus), Denise Monack (Assistant Professor), Garry P. Nolan (Professor), David Schneider (Associate Professor)

Molecular and Cellular Physiology: K. Christopher Garcia (Professor, and Structural Biology), Richard S. Lewis (Professor)

Neurology and Neurological Sciences: May Han (Assistant Professor), Lawrence Steinman (Professor, and Pediatrics), Tony Wyss-Coray (Professor)

Neurosurgery: Theo Palmer (Associate Professor)

Otolaryngology/Head and Neck Surgery (ENT): John B. Sunwoo (Assistant Professor)

Pathology: Eugene C. Butcher (Professor), Michael Cleary (Professor), Gerald R. Crabtree (Professor, and Developmental Biology), Edgar G. Engleman (Professor, and Medicine/Immunology and Rheumatology), Magali Fontaine (Assistant Professor, and Associate Director, Transfusion Service), Stephen Galli (Professor and Chair), Sara Michie (Professor), Raymond A. Sobel (Professor), Irving Weissman (Professor, and Director, Stem Cell Institute)

Pediatrics: Ann Arvin (Professor, and Microbiology and Immunology), Atul Butte (Associate Professor, Immunology and Rheumatology, and Computer Science), Manish Butte (Assistant Professor), Christopher Contag (Professor, Research, and Microbiology and Immunology, and Radiology), David B. Lewis (Professor), Elizabeth Mellins (Professor), Kari Nadeau (Associate Professor)

Psychiatry and Behavioral Sciences: Firdaus Dhabhar (Associate Professor), Emmanuel Mignot (Professor)

Structural Biology: Peter Parham (Professor, and Microbiology and Immunology)

Surgery/Multi-Organ Transplantation: Sheri Krams (Associate Professor, Research), Olivia Martinez (Professor, Research)

Urology: Michael Hsieh (Assistant Professor)

Participating Departments and Faculty (Computational Immunology):

Bioengineering: Stephen Quake (Professor, and Applied Physics and Physics)

Genetics: Leonore Herzenberg (Professor, Research)

Health and Research Policy - Biostatistics: Richard Olshen (Professor)

Med/Oncology: Ash Alizadeh (Assistant Professor)

Microbiology and Immunology: Mark M. Davis (Professor, and Director, Institute for Immunity, Transplantation and Infection), Holden Maecker (Associate Professor, Research), Garry Nolan (Professor)

Pathology: Scott Boyd (Assistant Professor), Andrew Fire (Professor, and Genetics)

Pediatrics-Systems Medicine: Atul Butte (Associate Professor, Immunology and Rheumatology, and Computer Science)

Affiliate Members:

Biochemistry: Ron Davis (Professor, and Genetics)

Bioengineering: Russ Altman (Professor, and Genetics and Computer Science)

Computer Science: Daphne Koller (Professor, and Pathology)

Health and Research Policy - Biostatistics: Robert Tibshirani (Professor, and Statistics)

Microbiology and Immunology

Courses offered by the Department of Microbiology and Immunology are listed under the subject code MI on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=MI&filter-catalognumber-MI=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=MI&filter-catalognumber-MI=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=MI&filter-catalognumber-MI=on>).

Graduate Programs in Microbiology and Immunology

The Department of Microbiology and Immunology offers a program of training leading to the Ph.D. degree, as well as research training, courses, and seminars for medical students and postdoctoral fellows. Research interests focus on two broad areas: host/parasite interactions, and the function of the immune system. Laboratories investigate mechanisms of pathogenesis and the physiology of viruses, bacteria, and protozoan parasites, as well as the lymphocyte function in antigen recognition, immune response, and autoimmunity.

Master of Science

A regular M.S. program is not offered, although this degree is awarded under special circumstances. Candidates for master's degrees are expected to have completed the preliminary requirements for the B.S. degree, or the equivalent. In addition, the candidate is expected to complete 45 quarter

units of work related to microbiology; at least 25 of these units should concern research devoted to a thesis. The thesis must be approved by the student's committee.

Doctor of Philosophy in Microbiology and Immunology

University requirements for the Ph.D. are described in the "Graduate Degrees (p. 38)" section of this bulletin.

Application, Admission, and Financial Aid

Prospective Ph.D. candidates should have completed a bachelor's degree in a discipline of biology or chemistry, including course work in biochemistry, chemistry, genetics, immunology, microbiology, and molecular biology. The deadline for receipt of applications with all supporting materials is December 3.

Applicants must file a report of scores on the general subject tests of the Graduate Record Examination (GRE). It is strongly recommended that the GRE be taken before October so that scores are available when applications are evaluated.

In the absence of independent fellowship support, entering predoctoral students are fully supported with a stipend and tuition award. Highly qualified applicants may be honored by a nomination for a Stanford Graduate Fellowship. Successful applicants have been competitive for predoctoral fellowships such as those from the National Science Foundation.

Program for Graduate Study

The Ph.D. degree requires course work and independent research demonstrating an individual's creative, scholastic, and intellectual abilities. On entering the department, students meet an advisory faculty member; together they design a timetable for completion of the degree requirements. Typically, this consists of first identifying gaps in the student's undergraduate education and determining courses that should be taken. Then, a tentative plan is made for two to four lab rotations (one rotation per quarter). During the first year of graduate study in the department, each student also takes six or seven upper-level (200-series) courses.

Course requirements:

		Units
BIOS 200	The Nucleus	8
BIO 214	Advanced Cell Biology	4
MED 255	The Responsible Conduct of Research	1
MI 204	Innate Immunology	3
MI 210	Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites	4
MI 215	Principles of Biological Technologies	3
MI 250	Frontiers in Microbiology and Immunology (Taken once in the first year and once in the second year for a total of 2 units.)	1

Recommended courses:

		Units
BIO 230	Molecular and Cellular Immunology	4
BIO 214/BIOC 224	Advanced Cell Biology	4

In Autumn Quarter of the second year, a research proposal based on the student's own thesis topic is defended to the thesis committee. In Spring Quarter of the second year, each student defends orally a formal research proposal on a topic outside the intended thesis project. This qualifying examination proposal is due to the graduate program steering committee by May 1. Based on successful performance on this proposal, the student is admitted to candidacy. Teaching experience and training are also part of the graduate curriculum. Graduate students are required to act as teaching assistants for two courses. In addition, first- and second-year graduate students are required to participate in a bi-weekly journal club.

Emeriti: (Professors) Stanley Falkow, Hugh O. McDevitt, Edward S. Mocarski, Sidney Raffel

Chair: Peter Sarnow

Associate Chair: David Schneider

Professors: Ann Arvin, Helen Blau, John C. Boothroyd, Yueh-Hsiu Chien, Christopher Contag, Mark M. Davis, Stephen J. Galli, Harry B. Greenberg, Karla Kirkegaard, A. C. Martin, Garry Nolan, Peter Parham, Phillip Pizzo, Charles Prober, David Relman, Peter Sarnow, Gary K. Schoolnik, Lucy S. Tompkins

Associate Professors: Manuel Amieva, Matthew Bogoyo, Jeffrey Glenn, David Schneider, Upinder Singh, Julie Theriot

Assistant Professors: Chang-Zheng Chen, Shirin Einav, K.C. Huang, Denise Monack, Justin Sonnenburg

Assistant Professor: Jan Carette

Associate Professor (Teaching): Robert D. Siegel

Institute for Immunity, Transplantation and Infection

Director, Human Immune Monitoring Center and Associate Professor (Research): Holden Maecker

Molecular and Cellular Physiology

Courses offered by the Department of Molecular and Cellular Physiology are listed under the subject code MCP on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=MCP&filter-catalognumber-MCP=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=MCP&filter-catalognumber-MCP=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=MCP&filter-catalognumber-MCP=on>).

The Department of Molecular and Cellular Physiology is located in the Beckman Center for Molecular and Genetic Medicine.

A central goal of physiology in the post-genomic era is to understand how thousands of encoded proteins serve to bring about the highly coordinated behavior of cells and tissues. Research in the department approaches this goal at many levels of organization, ranging from single molecules and individual cells to multicellular systems and the whole organism. The faculty share common interests in the molecular mechanisms of cell signaling and behavior, with a special focus on structure/function analysis of ion channels and G-protein coupled receptors, and their roles at the cellular, organ, and whole-organism levels; the molecular basis of sensory transduction, synaptic transmission, plasticity and memory; the role of ion channels and calcium in controlling gene expression in neural and immune cells; and the regulation of vesicle trafficking and targeting, cell polarity, and cell-cell interactions in the nervous system and in epithelia. Research programs employ a wide range of approaches, including molecular and cell biology, biochemistry, genetics, biophysics, x-ray crystallography and

solution NMR, electrophysiology, and in vitro and in vivo imaging with confocal and multi-photon microscopy.

Graduate Programs in Molecular and Cellular Physiology

The department offers required and elective courses for students in the School of Medicine and is also open to other qualified students with the consent of the instructor. Training of medical, graduate, and postdoctoral students is available. The program offers a course of study leading to the Ph.D. degree. No B.S. is offered, and an M.S. is offered only in the unusual circumstance where a student completes the course work, rotation, and the written section of the qualifying exam, but is unable to complete the requirements for the Ph.D.

Doctor of Philosophy in Molecular and Cellular Physiology

Students with undergraduate or master's degrees who have completed a year each of college chemistry (including lectures in organic and physical chemistry), physics, calculus, and biology are considered for admission to graduate study. Applicants submit a report of scores from the Graduate Record Examination (verbal, quantitative, analytical, and an advanced subject test in one of the sciences) as part of the application. Students who do not speak English as their native language must submit scores from TOEFL unless waived by Graduate Admissions.

Study toward the Ph.D. is expected to occupy five years, including summers. A minimum of six quarter-long courses is required, including:

- MCP 221 Advanced Cell Biology or MCP 256 How Cells Work: Energetics, Compartments, and Coupling in Cell Biology
- BIOS 200 The Nucleus
- two graduate-level courses (200-300 series)
- a choice of two out of these three courses:

		Units
MCP 216	Genetic Analysis of Behavior	4
MCP 202	Advanced Immunology II	3
MCP 222	Imaging: Biological Light Microscopy	3

Students are also required to participate in the Molecular and Cellular Physiology Seminar Series and attend Department Scientific Meeting. Grades for course work must be a minimum of 'B', and at least two grades equal to 'A-' or above are necessary but not sufficient for continuation in the program. In addition, students in the program must maintain a grade point average of at least 3.3 for their required courses as a whole.

Qualifying Examination

At the beginning of the second year in residence as a graduate student, each Ph.D. candidate presents a written thesis proposal to be defended at an oral comprehensive examination. The examination should be taken prior of all course work completed by the required standard. Students undertake individual research studies as early as possible after consultation with their preceptor. Upon passing this exam, the student is advanced to candidacy for the Ph.D.

Dissertation and University Oral Examination

The results of independent, original work by the students are presented in a dissertation. The oral examination is largely a defense of the dissertation.

Advisers and Advisory Committees

A graduate advisory committee, currently professors Kobilka, Lewis, Nachury and Madison, advises students during the period before the formation of their qualifying committees.

Financial Aid

Students may be funded by their advisers' research grants, by training grants, by department funds, or by extramural funds. Students are encouraged to obtain funding from outside sources such as NIH and NSF.

Chair: Brian K. Kobilka

Professors: Axel T. Brunger, K. Christopher Garcia, Brian K. Kobilka, Richard S. Lewis, W. James Nelson, Stephen J. Smith, Thomas C. Sudhof, William Weis

Associate Professors: Miriam B. Goodman, V. Daniel Madison, Merritt C. Maduke

Assistant Professors: Liang Feng, Maxence V. Nachury, Lucy E. O'Brien (WTR 13')

Courtesy Professors: Stefan Heller, John Huguenard, Anthony J. Ricci

Courtesy Associate Professor: Richard J. Reimer

Neurobiology

Courses offered by the Department of Neurobiology are listed under the subject code NBIO on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=NBIO&filter-catalognumber-NBIO=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=NBIO&filter-catalognumber-NBIO=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=NBIO&filter-catalognumber-NBIO=on>).

Graduate Program in Neurobiology

Graduate students in the Department of Neurobiology obtain the Ph.D. degree through the interdepartmental Neurosciences Ph.D. program. Accepted students receive funding for tuition and a living stipend. Applicants should familiarize themselves with the research interests of the faculty and, if possible, indicate their preference on the application form which is submitted directly to the Neurosciences Program.

Medical students also are encouraged to enroll in the Ph.D. program. The requirements of the Ph.D. program are fitted to the interests and time schedules of the student. Postdoctoral training is available to graduates holding Ph.D. or M.D. degrees, and further information is obtained directly from the faculty member concerned.

Research interests of the department include information processing in vertebrate retina; structure, function, and development of auditory and visual systems; development and regeneration in the central and peripheral nervous system; neural mechanisms mediating higher nervous system functions, including perception, learning, attention and decision making.

Emeritus: Denis Baylor, Uel J. McMahan, Eric Shooter, Lubert Stryer

Chair: Ben Barres

Professors: Eric I. Knudsen, William T. Newsome

Associate Professors: Thomas Clandinin, Ricardo Dolmetsch, Tirin Moore, Jennifer Raymond

Assistant Professor: Stephen Baccus

Neurosciences

Courses offered by the Neurosciences Program are listed under the subject code NEPR on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=NEPR&filter-catalognumber-NEPR=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=NEPR&filter-catalognumber-NEPR=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=NEPR&filter-catalognumber-NEPR=on>).

Doctor of Philosophy in Neurosciences

University requirements for the Ph.D. are described in the "Graduate Degrees (<http://exploreddegrees.stanford.edu/graduatedegrees/>)" section of this bulletin.

The interdepartmental Neurosciences Program offers instruction and research opportunities leading to a Ph.D. in Neurosciences. The requirements for a Ph.D. degree follow those of the University and in addition are tailored to fit the background and interests of the student. Accepted students receive an award covering tuition, a basic health plan, and a living stipend. Qualified applicants should, where possible, apply for the predoctoral fellowships in open competition, especially those from the National Science Foundation. December 2 is the deadline for receipt in the Neurosciences Program office of applications with all supporting material. Applicants should familiarize themselves with the research interests of the faculty and indicate their preferences clearly on the application form.

Since students enter with differing backgrounds, and the labs in which they may elect to work cover several different disciplines, the specific program for each student is developed individually with an advisory committee. All students are required to complete the basic introduction to neurobiology (NBIO 206 The Nervous System or equivalent). All students must complete nine quarters of Professional Development and Integrity in Neuroscience (NBIO 300 Professional Development and Integrity in Neuroscience). Lastly, students must also take five courses within (and at least one course in each of) the following three areas:

1. Molecular, Cellular and Developmental Neuroscience
2. Systems, Computational, Cognitive and Behavioral Neuroscience
3. Translational Neuroscience

Courses from outside the neuroscience core can satisfy the elective requirement.

Students usually rotate through several labs during their first year, although they may choose to begin thesis research on entry. After the first rotation, students may rotate both within and outside the Neurosciences Program. Required course work should be completed by the end of the second year. Passing of a comprehensive oral preliminary examination given by the student's advisory committee is required for admission to Ph.D. candidacy. This examination is usually taken by the end of the second year. The student is required to present a Ph.D. dissertation, which is the result of independent investigation contributing to knowledge in an area of neuroscience, and to defend his or her dissertation in a University oral examination, which includes a public seminar.

Medical students may participate in this program provided they meet the prerequisites and satisfy all the requirements of the graduate program as listed above. The timing of the program may be adjusted to fit their special circumstances.

Director: John R. Huguenard (Professor, Neurology and Neurological Sciences)

Steering Committee: Katrin Andreasson, Paul S. Buckmaster, Thomas Clandinin, John R. Huguenard, Fei-Fei Li, Merritt Maduke, Samuel McClure, Michelle Monje-Deisseroth, Giles Plant, Anthony Ricci, Carla Shatz, Thomas Sudhof

Participating Faculty:

Anesthesia: Rona Giffard (Professor), Sean Mackey (Associate Professor), David Yeomans (Associate Professor)

Applied Physics: Surya Ganguli (Assistant Professor), Mark Schnitzer (Associate Professor)

Bioengineering: Kwabena Boahen (Associate Professor), Karl Deisseroth (Associate Professor), Michael Lin (Assistant Professor), Matthew Scott (Professor)

Biology: Russell D. Fernald (Professor), H. Craig Heller (Professor), Ron Kopito (Professor), Liqun Luo (Professor), Susan McConnell (Professor), Robert M. Sapolsky (Professor), Mark Schnitzer (Associate Professor), Carla Shatz (Professor), Kang Shen (Associate Professor),

Comparative Medicine: Paul S. Buckmaster (Associate Professor), Corinna Darian-Smith (Associate Professor), Shaul Hestrin (Associate Professor)

Computer Science: Fei-Fei Li (Assistant Professor)

Developmental Biology: Ben Barres (Professor), Seung Kim (Professor), David Kingsley (Professor), Matthew P. Scott (Professor)

Electrical Engineering: Krishna Shenoy (Associate Professor)

Genetics: Anne Brunet (Associate Professor), Aaron Gitler (Associate Professor, Acting), Matthew Scott (Professor)

Microbiology and Immunology: Helen Blau (Professor)

Molecular and Cellular Physiology: Axel Brunger (Professor), Miriam B. Goodman (Associate Professor), Brian Kobilka (Professor), Richard S. Lewis (Professor), Daniel V. Madison (Associate Professor), Merritt C. Maduke (Associate Professor), Stephen Smith (Professor), Thomas Sudhof (Professor)

Neurobiology: Stephen Baccus (Assistant Professor), Ben Barres (Professor), Tom Clandinin (Associate Professor), Ricardo Dolmetsch (Associate Professor), Eric I. Knudsen (Professor), Tirin Moore (Assistant Professor), William T. Newsome (Professor), Jennifer Raymond (Associate Professor), Carla Shatz (Professor)

Neurology and Neurological Sciences: Katrin Andreasson (Associate Professor), Ben Barres (Professor), Paul Buckmaster (Associate Professor), Marion Buckwalter (Assistant Professor), Yoon-Jae Cho (Assistant Professor), May Han (Assistant Professor), Ting-Ting Huang (Associate Professor, Research), John R. Huguenard (Professor), Jin Hyung Lee (Assistant Professor, Acting), Frank Longo (Professor), Michelle Monje-Deisseroth (Assistant Professor), Josef Parvizi (Assistant Professor), Kathleen Poston (Assistant Professor), Thomas A. Rando (Professor), Richard Reimer (Associate Professor), Robert M. Sapolsky (Professor), Tony Wyss-Coray (Associate Professor, Research), Yanmin Yang (Associate Professor)

Neurosurgery: Marion Buckwalter (Assistant Professor), Theo Palmer (Associate Professor), Giles Plant (Associate Professor), Gary K. Steinberg (Professor), Xinnan Wang (Assistant Professor), Heng Zhao (Assistant Professor, Research)

Ophthalmology: Yaping Joyce Liao (Assistant Professor)

Otolaryngology: Mirna Mustapha (Assistant Professor), Anthony Ricci (Professor)

Pathology: Bingwei Lu (Associate Professor), Marius Wernig (Assistant Professor)

Pediatrics: Michael Lin (Assistant Professor), Anna Penn (Assistant Professor)

Philosophy: Patrick Suppes (Professor, emeritus)

Psychiatry and Behavioral Sciences: Lu Chen (Associate Professor), Luis de Lecea (Associate Professor), Karl Deisseroth (Associate Professor), Firdaus Dhabhar (Associate Professor), Amit Etkin (Assistant Professor), Craig Garner (Professor), David Lyons (Associate Professor, Research), Robert C. Malenka (Professor), Vinod Menon (Professor, Research), Karen Parker (Assistant Professor), Allan L. Reiss (Professor), Jamie Zeitler (Assistant Professor)

Psychology: Ian Gotlib (Professor), Kalanit Grill-Spector (Associate Professor), James J. Gross (Professor), Brian Knutson (Associate Professor), James McClelland (Professor), Samuel McClure (Assistant Professor), Anthony Norcia (Professor), Anthony Wagner (Associate Professor), Brian Wandell (Professor)

Radiology: Gary H. Glover (Professor)

Obstetrics and Gynecology

Courses offered by the Department of Obstetrics and Gynecology are listed under the subject code OBGYN on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=OBGYN&filter-catalognumber-OBGYN=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=OBGYN&filter-catalognumber-OBGYN=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=OBGYN&filter-catalognumber-OBGYN=on>).

The Department of Obstetrics and Gynecology does not offer degrees; however, qualified medical, graduate, or undergraduate students with an interest in basic research in reproductive biology may apply to arrange individual projects under the supervision of the faculty. The focus for the Division of Reproductive Biology is the study of the molecular and cellular biology of male and female reproductive organs.

Chair: Jonathan S. Berek

Pathology

Courses offered by the Department of Pathology are listed under the subject code PATH on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=PATH&filter-catalognumber-PATH=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=PATH&filter-catalognumber-PATH=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=PATH&filter-catalognumber-PATH=on>).

Programs of Study in Pathology

The Department of Pathology offers advanced courses in aspects of pathology. The department does not offer advanced degrees in pathology, but qualified graduate students who are admitted to department-based or interdepartmental graduate programs may elect to pursue their thesis requirements in the department's research laboratories. The discipline of pathology has served as a bridge between the preclinical and clinical sciences and is concerned with the application of advances in the basic

biological sciences, both to the diagnosis of human disease and the elucidation of the mechanisms of normal molecular, cellular, and organ structure and function that manifest themselves in clinical disease. Accordingly, the department's research interests extend from fundamental molecular biology to clinical-pathological correlations, with an emphasis on experimental oncology.

Investigation in the department includes basic studies in areas using molecular biological, biochemical, and genetic cell biological techniques: DNA replication in yeast and cultured eukaryotic cells, cell cycle control in animal cells and yeast, identification and pathogenetic role of chromosomal aberrations in human malignancies and mechanisms of activation of oncogenes in human and animal cells, lymphocyte and neutrophil-interactions with endothelial cells, cell type specification and signal transduction pathways leading to specific gene expression or modulation of cytoskeletal behavior; cytoskeletal architecture, cell-matrix interaction, developmental biology of hematopoietic stem cells and thymus, regulation of the immune system, mechanisms of immune and other responses in the central nervous system, and neuro-degenerative diseases. Various studies focus on the development of novel diagnostic and immunotherapeutic treatment modalities and techniques for solid tumors, lymphomas, HIV, and genetic diseases. Research training in all of these areas is available for qualified medical and graduate students by individual arrangement with the appropriate faculty member. A summary of the research interests of the department faculty is available at Sanford's School of Medicine (<http://exploreddegrees.stanford.edu/schoolofmedicine/pathology/http://pathology.stanford.edu>) web site.

Emeriti: (Professor) Ellen Jo Baron, Michael Hendrickson, Richard L. Kempson, Lawrence F. Eng, Luis Fajardo, F. Carl Grumet, Jon Kosek, Theresa Wang, Roger Warnke; (Associate Professor) P. Joanne Cornbleet

Chair: Stephen J. Galli

Professors: Daniel Arber, Ellen Jo Baron, Gerald J. Berry, Eugene C. Butcher, Athena Cherry, Michael L. Cleary, Gerald R. Crabtree, Edgar G. Engleman, Dean Felsher, Marcelo Fernandez-Vina, Andrew Fire, Steven Fount, Stephen J. Galli, Lawrence Tim Goodnough, Teri Longacre, Joseph S. Lipsick, Sara Michie, Yasodha Natkunam, Donald P. Regula, Robert V. Rouse, Richard K. Sibley, Raymond Sobel, Howard H. Sussman, Dolly Tyan, Matt van de Rijn, Hannes Vogel, Irving L. Weissman, James Zehnder

Associate Professors: Jeffrey D. Axelrod, Matt Bogyo, Andrew Connolly, Tina Cowan, Susan A. Galel, Sharon M. Geaghan, John P. Higgins, Neeraja Kambham, Christina Kong, Bingwei Lu, Jonathan R. Pollack, Iris Schrijver, Arend Sidow, Robert West

Assistant Professors: Matt Anderson, Niaz Banaei, Raffick Bowen, Scott Boyd, Magali Fontaine, Tracy George, Isabella Graef, Dita Gratzinger, F. Kim Hazard, Kristin Jensen, Jinah Kim, Stephen Montgomery, Benjamin Pinsky, Ed Plowey, Jesse McKenney, Erich Schwartz, Uma Sundram, Marius Wernig

Courtesy Professors: Donna Bouley, John Day, Bertil Glader, Daphne Koller, Lucy Tompkins

Courtesy Associate Professor: Robert Shafer

Clinician Educators: Jennifer Andrews, Susan Atwater, David Bingham, Brittney De Clerck, James Faix, Ann Folkins, Christopher Gonzales, Terri Haddix, Steven Long, Melanie Manning, Moravid Moayari, Marcelo Pando, Kerri Rieger, Run Shi, Brent Tan

Instructors: Jason Kurzer, Jason Merker, Franklin Mullins, Ellen Yeh

Adjunct Clinical Faculty: Robert Archibald, Jerome S. Burke, Glenn Cockerham, Seth Haber, Maie K. Herrick, Paul W. Herrmann, Michelle Jordan, Charles Lombard, Gregory Moes, Joseph O'Hara, Girish Putcha, Mahendra Ranchod, Thomas W. Rogers

Radiation Oncology

Courses offered by the Department of Radiation Oncology are listed under the subject code RADO on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=RADO&filter-catalognumber-RADO=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=RADO&filter-catalognumber-RADO=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=RADO&filter-catalognumber-RADO=on>).

Radiation Oncology focuses on the use of radiation for cancer therapy and research. The department does not offer degrees; however, its faculty teach courses open to medical students, graduate students, and undergraduates. The department also accepts students in other curricula as advisees for study and research. Graduate students in Biophysics and Cancer Biology may perform their thesis research in the department. Undergraduates may arrange individual research projects under supervision of faculty.

At the present time, the major areas of basic research investigation in the department include: DNA repair in mammalian cells after ionizing irradiation; studies of the mechanism of tumor hypoxia in animal tumors; development of new anti-cancer drugs to exploit tumor hypoxia; cytogenetic and molecular methods of predicting the sensitivity of individual tumors to cancer therapy; radiolabeled monoclonal antibodies for cancer detection and treatment; studies of oxygen levels in human tumors using polarographic electrodes; clinical trials of a new hypoxic cytotoxic agent (tirapazamine); studies of the late effects of cancer therapy; and techniques of conformal and intensity modulated radiation therapy.

Emeriti: Malcolm A. Bagshaw, Peter Fessenden, Don R. Goffinet, George M. Hahn, Kendric Smith

Chair: Richard T. Hoppe

Professors: J. Martin Brown, Sarah S. Donaldson, Amato J. Giaccia, Steven L. Hancock, Richard T. Hoppe, Quynh-Thu Le, Daniel S. Kapp, Steven A. Liebel

Associate Professors: Iris C. Gibbs, Paul Keall, Christopher R. King, Susan J. Knox, Gary Luxton, Lei Xing

Assistant Professors: Laura Attardi, Daniel Chang, Nicholas Denko, Edward Graves, Albert C. Koong

Consulting Professor: Robert M. Sutherland

Radiology

Web Site: <http://www-radiology.stanford.edu>

Courses offered by the Department of Radiology are listed under the subject code RAD on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=RAD&filter-catalognumber-RAD=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=RAD&filter-catalognumber-RAD=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=RAD&filter-catalognumber-RAD=on>).

The Department of Radiology does not offer degrees; however, its faculty teach courses open to medical students, graduate students, and undergraduates. The department also accepts students in other curricula as advisees for study and research. Undergraduates may also arrange individual research projects under the supervision of the department's faculty. This discipline focuses on the use of radiation, ultrasound, and magnetic resonance as diagnostic, therapeutic, and research tools. The

fundamental and applied research within the department reflects this broad spectrum as it relates to anatomy, pathology, physiology, and interventional procedures. Original research and development of new clinical applications in medical imaging is supported within the Radiological Sciences Laboratory.

Emeriti: (Professors) Herbert L. Abrams, Malcolm Bagshaw, Ronald Castellino, Barton Lane, Gerald Friedland, David A. Goodwin, Henry H. Jones, William Marshall, I. Ross McDougall, Robert E. Mindelzun, William H. Northway, Bruce R. Parker, Lewis Wexler, Leslie M. Zatz

Chair: Gary M. Glazer

Professors: Scott W. Atlas, Richard A. Barth, Christopher F. Beaulieu, Michale Federle, Sanjiv Sam Gambhir, Gary M. Glazer, Gary H. Glover, Michael L. Goris, Robert J. Herfkens, Dave Hovsepian, Debra M. Ikeda, R. Brooke Jeffrey, Ann Leung, Michael Marks, Michael Moseley, Sandy Napel, Matilde Nino-Murcia, Norbert J. Pelc, Allan Reiss, Geoffrey Rubin, Brian Rutt, George Segall, F. Graham Sommer, Daniel Spielman

Professors (Research): R. Kim Butts-Pauly

Associate Professors: Francis Blankenberg, Francis P. Chan, Bruce Daniel, Terry Desser, Huy M. Do, Nancy Fischbein, Dominik Fleischmann, Garry E. Gold, Lawrence Hofmann, Beverley Newman, Eric W. Olcott, Kathryn J. Stevens, Daniel Y. Sze

Associate Professors (Research): Roland Bammer, Rebecca Fahrig, Sylvia Plevritis

Assistant Professors: Sandip Biswal, Robert Dodd, Gloria Hwang, Aya Kamaya, Nishita Kothary, William Kuo, Jafi Lipson, Andrew Quon, Jianghong Rao, Daniel Rubin, Lewis Shin, Shreyas Vasanawala, Juergen Willmann, Joseph Wu, Kristen Yeom, Greg Zaharchuk

Assistant Professors (Research): Zhen Cheng, Brian Hargreaves, David Paik, Ramasamy Paulmurugan

Stem Cell Biology and Regenerative Medicine

Courses offered by the Program in Stem Cell Biology and Regenerative Medicine are listed under the subject code STEMREM on the Stanford Bulletin's Explore Courses web site.

Graduate Program in Stem Cell Biology and Regenerative Medicine

The Stanford Stem Cell Biology and Regenerative Medicine (SCBRM) program is dedicated to doctoral education that translates basic science to clinical applications, typically referred to as Translational Science, and of intense interest internationally in medical schools and universities. Our doctoral program provides exceptional didactic education and research experience in the basic sciences underlying stem cell biology. In addition, program participants will receive specialized training in the development and clinical application of discoveries in the basic sciences to achieve regenerative therapies. Thus, our graduates will be uniquely positioned to develop successful translational careers in Stem Cell Biology and Regenerative Medicine, and will emerge prepared to deliver on their passion to improve the human condition. The core curriculum is combined with unique research and clinical/professional immersion rotations to provide opportunities for doctoral students to specialize in

the broad subject of translational medicine and yet focus specifically on fundamentals of SCBRM. The curriculum combines education in genetics and developmental biology with an introductory laboratory-based stem cell course, an advanced course in stem cell biology and regenerative medicine, and a clinical rotation with alternative opportunities in law, business and/or engineering.

The mission of the SCBRM graduate program is to produce future leaders in translational science through a combination of basic science and clinical/professional immersion. The program aims to be innovative and to change the landscape for graduate education in the biomedical sciences by having the immersion tailored to each student's translational goals. The program accommodates students who wish to focus primarily at the basic science level alongside those who wish to focus specifically on innovation such as a new device to solve a clinical problem. In the former case, the student might seek out a primary mentor affiliated with the basic sciences and take electives that reflect the more basic interest. In the latter case, the student might select an elective with an engineering focus and seek out primary mentorship with a more clinically or engineering focused mentor. In this way, graduates from our doctoral program receive exceptional didactic education and research experience and are well positioned to develop successful translational careers in SCBRM, in line with their passion to improve human health via applications of their knowledge of human health.

Master of Science in Stem Cell Biology and Regenerative Medicine

University requirements for the M.S. degree are described in the "Graduate Degree (p. 38)s" section of this bulletin.

Students in the Ph.D. program in SCBRM may apply for an M.S. degree in SCBRM, assuming completion of appropriate requirements. The program does not accept applications for a standalone M.S. degree.

To receive an M.S. in Stem Cell Biology and Regenerative Medicine, Students must complete the following:

1. Four full-tuition quarters of residency as a graduate student at Stanford.
2. At least 45 units of academic work, all of which must be in courses at or above the 100 level, 16 units of which must be at or above the 200 level.
3. Four quarters of graduate research, consisting of rotations in the labs of at least three SCBRM faculty members.
4. Course work in Stem Cell Biology and Regenerative Medicine as well as other core requirements:
 - A. STEMREM 201A Stem Cells and Human Development: From Embryo to Cell Lineage Determination and STEMREM 201B Stem Cells and Human Development Laboratory develop a fundamental understanding of introductory stem cell principles in human development, aging, and disease accompanied by a laboratory-based module with immersion in stem cell-based methods (embryology, embryonic stem cells, reprogramming, adult stem cells).
 - B. STEMREM 202 Stem Cells and Translational Medicine, advanced topics related to individual organ systems, cancer stem cells, translational principles of medicine and immunology as related to regenerative medicine, as well as bioengineering and bioinformatics as related to stem cell biology.
 - C. STEMREM 203 Stem Cells Immersion: Applications in Medicine, Business and Law, students specialize and choose a clinical immersion, rotation in a biotechnology company or

venture firm, or further delve into cutting edge technologies, bioinformatics, materials and/or engineering approaches for stem cell applications in industry, diagnostics and medicine.

- D. STEMREM 250 Regenerative Medicine Seminar Series, a forum for researchers to meet and discuss Stem Cell Biology and Regenerative Medicine and to spark collaborations.
- E. STEMREM 280 Stem Cell Biology and Regenerative Medicine Journal Club, review and discussion of current literature in both basic and translational medicine as it relates to stem cell biology and/or regenerative medicine.

		Units
STEMREM 201A	Stem Cells and Human Development: From Embryo to Cell Lineage Determination	2
STEMREM 201B	Stem Cells and Human Development Laboratory	3
STEMREM 202	Stem Cells and Translational Medicine	5
STEMREM 203	Stem Cells Immersion: Applications in Medicine, Business and Law	3
STEMREM 250	Regenerative Medicine Seminar Series	1
STEMREM 280	Stem Cell Biology and Regenerative Medicine Journal Club	2
BIO 214	Advanced Cell Biology	4
DBIO 210	Developmental Biology	4
MED 255	The Responsible Conduct of Research	1
STEMREM 399	Graduate Research	1-18
Total Units		26-43

F. Students may also take two courses (6 units) of elective course work

- 5. Participation and attendance at the annual SCBRM Retreat.
- 6. The qualifying examination process in SCBRM before admission to Ph.D. candidacy has two parts:
 - Part I: a comprehensive written exam in the form of a 5-page NIH grant proposal
 - Part II: a 15-minute oral presentation of the proposal to the thesis committee followed by open questions from the qualifying exam committee on the proposal or encompassing areas of research/academic scholarship that are deemed relevant to the proposal.

Students who do not pass the qualifying exam may retake the full qualifying exam, be retested in a sub-area, or be asked to redo their presentation. Those students who fail the qualifying exam twice may be awarded a master's degree based on completion of course work and rotations. In addition, students who choose to voluntarily leave the program are also awarded a master's degree based on completion of the qualifying exam.

Doctor of Philosophy in Stem Cell Biology and Regenerative Medicine

University requirements for the Ph.D. are discussed in the "Graduate Degrees (p. 38)" section of this bulletin.

The Stem Cell Biology and Regenerative Medicine curriculum, combined with the research and rotation opportunities, provides a flexible educational opportunity for doctoral students to specialize in the broad subject of

translational medicine while being focused more specifically on the fundamentals of Stem Cell Biology and Regenerative Medicine while training in the laboratories of participating SCBRM faculty. The goal of the SCBRM program is to provide an avenue for graduate education to translate the best of basic research into a clinical setting.

Application and Admission

Applications are made through the Graduate Admissions (<http://exploreddegrees.stanford.edu/schoolofmedicine/stemcellbiologyandregenerativemedicine/http://gradadmissions.stanford.edu>) web site.

Applicants will be assessed based on their undergraduate transcripts, test scores, research experience, statement of purpose and letters of recommendation that document exceptional potential, ability, or achievements.

Students admitted to the program are offered financial support covering tuition, a living stipend, insurance coverage, and an allowance for books/travel. Applicants are urged to apply for independent fellowships such as from the National Science Foundation. Fellowship applications are due in November of the year prior to matriculation in the graduate program, but SCBRM graduate students may continue to apply for outside fellowships after matriculation. Because of the small number of department-funded slots, students who have been awarded an outside fellowship have an improved chance of acceptance into the program. On matriculation, each student is assisted by a first-year advising committee in selecting courses and lab rotations in the first year and in choosing a lab for the dissertation research. Once a dissertation adviser has been selected, a dissertation committee including the dissertation adviser and two additional SCBRM faculty, is constituted to guide the student during the dissertation research. The student must meet with the dissertation committee at least once a year.

Degree Requirements

Candidates for Ph.D. degrees at Stanford must satisfactorily complete a program of study that includes 135 units of graduate course work and research.

Requirements for the Ph.D. degree in SCBRM include:

1. Completion of at least 3 research rotations (STEMREM 399 Graduate Research) in the labs of SCBRM faculty members.
2. Completion of the following courses:
 - A. STEMREM 201A Stem Cells and Human Development: From Embryo to Cell Lineage Determination and STEMREM 201B Stem Cells and Human Development Laboratory develop a fundamental understanding of introductory stem cell principles in human development, aging, and disease accompanied by a laboratory-based module with immersion in stem cell-based methods (embryology, embryonic stem cells, reprogramming, adult stem cells).
 - B. STEMREM 202 Stem Cells and Translational Medicine, advanced topics related to individual organ systems, cancer stem cells, translational principles of medicine and immunology as related to regenerative medicine, as well as bioengineering and bioinformatics as related to stem cell biology.
 - C. STEMREM 203 Stem Cells Immersion: Applications in Medicine, Business and Law, students specialize and choose a clinical immersion, rotation in a biotechnology company or venture firm, or further delve into cutting edge technologies, bioinformatics, materials and/or engineering approaches for stem cell applications in industry, diagnostics and medicine.
 - D. STEMREM 250 Regenerative Medicine Seminar Series, a forum for researchers to meet and discuss Stem Cell Biology and Regenerative Medicine and to spark collaborations.

E. STEMREM 280 Stem Cell Biology and Regenerative Medicine Journal Club, review and discussion of current literature in both basic and translational medicine as it relates to stem cell biology and/or regenerative medicine.

3. Students have the option to select from the following courses in the first year:

		Units
STEMREM 201A	Stem Cells and Human Development: From Embryo to Cell Lineage Determination	2
STEMREM 201B	Stem Cells and Human Development Laboratory	3
STEMREM 202	Stem Cells and Translational Medicine	5
STEMREM 203	Stem Cells Immersion: Applications in Medicine, Business and Law	3
STEMREM 250	Regenerative Medicine Seminar Series	1
STEMREM 280	Stem Cell Biology and Regenerative Medicine Journal Club	2
BIO 214	Advanced Cell Biology	4
DBIO 210	Developmental Biology	4
MED 255	The Responsible Conduct of Research	1
STEMREM 399	Graduate Research	1-18
Total Units		26-43

4. Students have the option to select two electives in the second year.

5. Biochemistry proficiency is required by the end of the second year, as well as a total of 80 units and completed qualifying examinations. Students who do not pass the qualifying examination may retake a full qualifying exam, be retested in a few areas, or be asked to redo their presentation.

6. STEMREM 802 TGR Dissertation.

Students unable to meet Ph.D. milestones after remediation are offered a M.S. degree if they have completed all requirements.

Program Director: Renee A. Reijo Pera

Program Co-Directors: Theo D. Palmer, Michael T. Longaker, Irving L. Weissman

Teaching Faculty:

Philip A. Beachy (Professor, Institute for Stem Cell Biology and Regenerative Medicine, Department of Biochemistry and Developmental Biology)

Michael F. Clarke (Professor, Institute for Stem Cell Biology and Regenerative Medicine and Department of Medicine-Oncology and Member of Bio-X and Stanford Cancer Institute)

Maximilian Diehn (Assistant Professor, Institute for Stem Cell Biology and Regenerative Medicine and Department of Radiation Oncology/Radiation Therapy and Member of Stanford Cancer Institute)

Sarah C. Heilshorn (Assistant Professor, Materials Science and Engineering, Professor (By courtesy), Chemical Engineering and Bioengineering and Member of Bio-X)

Michael T. Longaker (Professor, Institute for Stem Cell Biology and Regenerative Medicine and Department of Surgery/Plastic and Reconstructive Surgery, Professor (By courtesy), Bioengineering and Materials Science and Engineering/Engineering Materials and Science and Member of Bio-X and Stanford Cancer Institute)

Ravindra Majeti (Assistant Professor, Institute for Stem Cell Biology and Regenerative Medicine and Department of Medicine/Hematology and Member of Bio-X and Stanford Cancer Institute)

Michelle Monje-Deisseroth (Assistant Professor, Institute for Stem Cell Biology and Regenerative Medicine and Neurology and Neurological Sciences and Member of Bio-X and Child Health Research Institute)

Roeland Nusse (Professor, Institute for Stem Cell Biology and Regenerative Medicine and Department of Developmental Biology and Member of Bio-X and Stanford Cancer Institute)

Theo D. Palmer (Associate Professor, Institute for Stem Cell Biology and Regenerative Medicine and Department of Neurosurgery and Member of Bio-X and Stanford Cancer Institute)

Renee A. Reijo Pera (Professor, Institute for Stem Cell Biology and Regenerative Medicine and Department of Obstetrics & Gynecology and Member of Bio-X and Stanford Cancer Institute)

Irving L. Weissman (Professor, Institute for Stem Cell Biology and Regenerative Medicine, Department of Pathology and Developmental Biology, Professor (By courtesy) Department of Biology and Member of Bio-X and Stanford Cancer Institute)

Marius Wernig (Assistant Professor, Institute for Stem Cell Biology and Regenerative Medicine and Department of Pathology and Member of Bio-X)

Joanna Wysocka (Assistant Professor, Institute for Stem Cell Biology and Regenerative Medicine, Department of Chemical and Systems Biology and Developmental Biology and Member of the Stanford Cancer Institute)

Structural Biology

Courses offered by the Department of Structural Biology are listed under the subject code SBIO on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=SBIO&filter-catalognumber-SBIO=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=SBIO&filter-catalognumber-SBIO=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=SBIO&filter-catalognumber-SBIO=on>).

The department offers course work and opportunities for research in structural biology. Courses fall into two categories: (1) a series of one quarter courses that treat topics of current interest in structural biology and biophysics at an advanced level; and (2) INDE 216 Cells to Tissues, a course for medical students that includes lectures on structure-function relationships of mammalian cells and tissues and a lab on medical histology.

The emphasis of research in the department is on understanding fundamental cellular processes in terms of the structure and function of biological macromolecules and their assemblies. Techniques used include standard methods of biochemistry, cell culture, single-molecule fluorescence spectroscopy, genetic engineering, and three dimensional structure determination by x-ray diffraction, nuclear magnetic resonance spectroscopy and electron microscopy, coupled with the development of computational methods.

Doctor of Philosophy in Structural Biology

University requirements for the Ph.D. are described in the "Graduate Degrees (p. 38)" section of this bulletin.

The graduate program in Structural Biology leads to the Ph.D. degree. The department also participates in the Medical Scientists Training Program (MSTP) in which individuals are candidates for both Ph.D. and M.D. degrees.

The graduate program is intended to prepare students for careers as independent investigators in cell and molecular biology. The principal

requirement of a Ph.D. degree is the completion of research constituting an original and significant contribution to the advancement of knowledge. The requirements and recommendations for the Ph.D. degree include:

1. Training in a major with connections to biophysics (e.g., physics, chemistry, or biology, with a quantitative background equivalent to that of an undergraduate physics or chemistry major at Stanford).
2. Completion of the following background courses or their equivalents at other institutions:
3.

		Units
CHEM 131	Organic Polyfunctional Compounds	3
CHEM 171	Physical Chemistry	3
CHEM 173	Physical Chemistry	3
CHEM 175	Physical Chemistry	3
BIOC 200	Applied Biochemistry	1
4. Completion of the following courses or their equivalents:
 - A.

		Units
SBIO 241	Biological Macromolecules	3-5
or BIOE 300A	Molecular and Cellular Bioengineering	
SBIO 242	Methods in Molecular Biophysics	3
MED 255	The Responsible Conduct of Research	1
 - B. At least four additional graduate-level courses in physical or biological science, with at least one in physical science and one as a literature-based biological science course
5. Opportunities for teaching are available during the first nine quarters at the discretion of the advising committee.
6. The student must prepare a dissertation proposal defining the research to be undertaken including methods of procedure. This proposal should be submitted by Winter Quarter of the third year, and it must be approved by a committee of at least three members including the principal research adviser and at least one member from the Department of Structural Biology. The candidate must defend the dissertation proposal in an oral examination. The dissertation reading committee normally evolves from the dissertation proposal review committee.
7. The student must present a Ph.D. dissertation as the result of independent investigation and expressing a contribution to knowledge in the field of structural biology.
8. The student must pass the University oral examination, taken only after the student has substantially completed the research. The examination is preceded by a public seminar in which the research is presented by the candidate.

Applicants to the program should have a bachelor's degree and should have completed at least a year of course work in biology, mathematics, organic chemistry, physical chemistry, and physics. Application forms must be received by the department before December 15 for notification by April 15. Application to the National Science Foundation for fellowship support is also encouraged. Remission of fees and a personal stipend are available to graduate students in the department. Prospective applicants should contact the Department of Structural Biology for further information.

Current topics of research in the department lie in the areas of gene expression; theoretical, crystallographic, and genetic analysis of protein structure; and cell-cell interaction. See Stanford's School of Medicine (<http://www.med.stanford.edu/school/structuralbio>) web site for further information.

Chair: Joseph D. Puglisi

Associate Chair: Michael Levitt

Professors: K. Christopher Garcia, Theodore Jardetzky, Roger D. Kornberg, Michael Levitt, Peter Parham, Joseph D. Puglisi, Soichi Wakatsuki, William I. Weis

Associate Professor (Research): Yahli Lorch

Assistant Professor: Adam de la Zerda

Assistant Professor (Research): Elizabetta Viani Puglisi

Other Offices

These pages list various offices, centers, laboratories, and institutes of direct relevance to study at Stanford. The listings are not all-inclusive. Click on the "Expand Menus" link at the top of the right hand menu to show a broad selection of other sites at Stanford University. A comprehensive list of Stanford offices is available on the University's A to Z Index page (<http://www.stanford.edu/atoz>).

Student Affairs

Web Site: <http://studentaffairs.stanford.edu/>

The Student Affairs division encompasses a broad range of programs and services for undergraduates and graduate students, including the Office of Residential Education, University Registrar, Student Life, Educational Resources, Vaden Health Center, Career Development Center, Office of Accessible Education, Graduate Life Office, Haas Center for Public Service, Judicial Affairs, Bechtel International Center, Asian American Activities Center, Black Community Services Center, El Centro Chicano, LGBT Community Resources Center, Native American Cultural Center, Women's Community Center, Office of Student Activities and Leadership, Diversity and First Gen Programs, Office of Sexual Assault and Relationship Abuse Education and Response, and the Office of Alcohol Policy and Education.

The Vice Provost for Student Affairs reports directly to the Provost and is responsible for providing leadership, policy direction, and administrative support for budget, personnel, facilities, and development, as well as oversight of the efficiency and effectiveness of each of the division's units. The Vice Provost interacts with the President, the Provost, the Vice Provosts, faculty, schools, department representatives, students, and parents. The Vice Provost is a member of the Stanford University Cabinet, and ex officio member of the Stanford Alumni Association Board of Directors, Stanford Athletic Board, and Haas Center for Public Service National Advisory Board. The Vice Provost also attends the Senate meetings of the Academic Council.

Student Services Center

Office: Tresidder Memorial Union, 2nd floor

Contact via HelpSU: <https://remedyweb.stanford.edu/helpsu/helpsu?pcat=StuAcct&dtag=10772>

Phone: (650) 723-7772 or (866) 993-7772 (toll-free)

Web Site: <http://studentservicescenter.stanford.edu>

The AskJane Online Answers Resource: <http://askjane.stanford.edu>

The Student Services Center (SSC) is committed to providing a single point of friendly, professional service for answers to questions concerning administrative and financial issues. The center strives to resolve 90% of students' issues upon first contact. The SSC represents Student Financial Services, the Office of the University Registrar, the University Cashier's Office, the Financial Aid Office, and Stanford ID Card Services, and is able to assist students with questions including those related to University billing, financial aid disbursements, refunds, payroll deductions, payment plan, enrollment, Stanford degree policies and procedures, Stanford ID card, and forms pickup and submission.

Dean of Student Life

Dean of Student Life: Chris Griffith

Office: Old Union

Phone: (650) 723-2733

Web Site: <http://studentaffairs.stanford.edu/studentlife>

The Dean of Student Life has responsibility for overseeing the development, implementation, and monitoring of comprehensive student life programs. The unit consists of the Graduate Life Office, Office of Student Activities and Leadership, Judicial Affairs, Organization Conduct Board, Office of Sexual Assault and Relationship Abuse Education & Response, Old Union, and 5-SURE. The Dean reports to the Vice Provost for Student Affairs and is a member of his executive group.

Dean of Educational Resources

Dean of Educational Resources: Sally Dickson

Office: Old Union

Phone: (650) 721-4037

Web Site: <http://studentaffairs.stanford.edu/educationalresources>

The Dean of Educational Resources is responsible for overseeing the development, implementation, and monitoring of comprehensive programs relating to ethnic, gender, career, and learning needs and interests of student groups. The unit is comprised of the Asian American Activities Center, Black Community Services Center, El Centro Chicano, LGBT Community Resources Center, Native American Cultural Center, Women's Community Center, Diversity and First Gen Programs, Bechtel International Center, Career Development Center, and the Office of Accessible Education. The Dean also has oversight responsibility for the Haas Center for Public Service, as well as responsibility for the Acts of Intolerance Protocol. The Dean reports to the Vice Provost for Student Affairs and serves as a member of his executive group.

Office of Accessible Education (OAE)

Offices: 563 Salvatierra Walk

Phone: (650) 723-1066; TDD (650) 723-1067

Web Site: <http://studentaffairs.stanford.edu/oae>

The Office of Accessible Education (OAE) is the campus office designated to work with students, faculty, and staff to put in place appropriate accommodations for all Stanford students with disabilities, at both the undergraduate and graduate levels (including the professional schools). The OAE provides a wide array of support services, accommodations, and programs to remove barriers to full participation in the life of the University.

In reaching its determinations about appropriate accommodations, the OAE considers factors such as the documentation from professionals specializing in the area of the student's diagnosed disability, the student's functional limitations, and the student's input and accommodation history in regard to particular needs and limitations. The OAE then works with the student and relevant faculty and staff through an interactive process designed to achieve an accommodation that meets the needs of all parties.

Office of Alcohol Policy and Education (OAPE)

Offices: Rogers House, 581 Capistrano Way

Phone: (650) 723-5947

Web Site: <http://studentaffairs.stanford.edu/alcohol>

<http://studentaffairs.stanford.edu/alcohol>

The Office of Alcohol Policy and Education (OAPE) empowers students to make healthy decisions about drinking behaviors that not only affect them as individuals, but ultimately impact the campus community as a whole. OAPE is focused on reducing the harm of high-risk behaviors while increasing safe, legal, responsible actions. Services offered include individual consultation, educational workshops and seminars, and academic

coursework. OAPE also sponsors Cardinal Nights, a program of weekly events that allow students to socialize in an environment free of alcohol.

Career Development Center

Offices: 563 Salvatierra Walk

Web Site: <http://studentaffairs.stanford.edu/cdc>

Counseling Services—Monday through Friday, 9 a.m. to 12 noon, 1 p.m. to 5 p.m.; (650) 725-1789.

Employment Services—Monday through Friday, 8:15 a.m. to 4:30 p.m.; (650) 723-9014.

The Career Development Center (CDC) offers services such as counseling, workshops, presentations, on-campus recruiting, job/internship databases, library resources, and alumni networking, to help students make informed decisions and to plan for life after Stanford.

Services are available to undergraduates and graduate students, and all students are encouraged to visit in person or via the web. Programs and services are free to students; limited services are available to first-year alumni and student spouses/domestic partners.

The following suggestions may assist students in getting the most out of the CDC:

- Visit early in a Stanford career.
- Register with the CDC's Cardinal Career (<http://studentaffairs.stanford.edu/cdc/jobs-internships>) online system to access internships, part-time, and full-time opportunities.
- Gather general career information through the career resource library, jobs, and internship database, handouts, and alumni network.
- Inquire about individual counseling for all stages of career planning and development.
- Participate in workshops and other programs to clarify career goals.

Community Centers

There are six ethnic and community centers that support students who seek services associated with a particular group or community. Each center has its own site and professional staff who advise and counsel students. In addition, the centers sponsor programs throughout the year that foster intellectual, personal, and cultural growth. Detailed information is available on the following web sites:

- Asian American Activities Center (<http://stanford.edu/group/a3c>)
- Black Community Services Center (<http://stanford.edu/dept/BCSC>)
- El Centro Chicano (<http://studentaffairs.stanford.edu/elcentro>)
- LGBT Community Resources Center (<http://studentaffairs.stanford.edu/lgbtcrcc>)
- Native American Cultural Center (<http://studentaffairs.stanford.edu/nacc>)
- Women's Community Center (<http://studentaffairs.stanford.edu/wcc>)

Diversity and First Gen Programs

Office: Old Union, 520 Lasuen Mall, Suite 206

Phone: (650) 723-2733

Email: tlw@stanford.edu

Web Site: <http://studentaffairs.stanford.edu/diversityandfirstgen>

Established in 2010 to serve first generation and low-income students and help them be successful, the Office of Diversity and First Gen Programs provides:

- a Thrive Guide to publicize the abundance of support available
- contact information for student groups, staff, faculty, and alumni for networking and mentoring
- signature programs and special events to build community
- administrative support and advocacy for diversity programs, especially those highlighting socioeconomic issue

Graduate Life Office

Graduate Life Office: Escondido Village Office, 859 Comstock Circle
Graduate Life Office, Graduate Community Center: 750 Escondido Road
Phone: (650) 736-7078

Email: graduatelife@stanford.edu

Web Site: <http://glo.stanford.edu>

The Graduate Life Office (GLO) works with students on and off campus and with student groups, including Community Associates (student residence staff), the Graduate Student Programming Board, and the Graduate Student Council, to create an inclusive environment through programs in the residences and campus-wide. The Graduate Community Center (GCC) serves as a focal point for meetings and activities in the graduate community.

The GLO staff also works with individual students who need information and support or who may be experiencing personal difficulties. Staff members are knowledgeable about and have access to support and resources available throughout the University. Staff work closely with student services administrators in academic departments to provide consultation and services to students in need.

Graduate Student Residence Program

The University's philosophy of graduate student housing is based on the premise that supporting high quality graduate scholarship and research is central to the mission of the University. By providing affordable housing in proximity to academic resources, the University creates an environment conducive to research and intellectual dialogue among students, their peers, and faculty members. The Community Associate (CA) program in the residences serves as a supportive resource for residents and to connect student neighbors through social events and activities to build a sense of community in the residences.

Haas Center for Public Service

Center Offices: 562 Salvatierra Walk

Mail Code: 8620

Phone: (650) 723-0992

Web Site: <http://haas.stanford.edu>

The Haas Center for Public Service connects academic study with public service to strengthen communities and develop effective public leaders. The center aspires to develop aware, engaged, and thoughtful citizens who contribute to the realization of a more just and humane world.

To accomplish these objectives, the center collaborates with associated units at Stanford to implement programs in the following areas of work.

- Through the center's fellowship programs, undergraduates perform summer internships in nonprofit organizations, foundations, and government agencies locally, nationally, and internationally. Postgraduate fellowships allow graduating seniors to work with a mentor in a nonprofit or public agency for a year.

- The Public Service Leadership Fellows Program provides an opportunity for students who want to be intentional about their leadership development. Center staff also provides leadership development through training, advising, and resources to Stanford in Government, Alternative Spring Break, and other student groups engaged in service.
- With support from the center, Stanford faculty members have created service-learning courses that involve Stanford students in providing direct service and community-based research efforts in collaboration with local schools and other partner agencies. The center's Public Service Scholars Program supports seniors writing honors theses that combine academic research with service to communities.
- Faculty from Stanford's School of Education collaborate with center staff to provide curriculum guidance and training for tutors and mentors at nearby schools. Another program trains Stanford students to bring results of scientific research to neighborhood programs. The federally supported Community Service Work-Study program, administered in conjunction with the University's Financial Aid Office, allows students to satisfy work-study obligations year-round by working in community organizations and public agencies.
- The postgraduate and alumni programs help students, particularly graduating seniors, identify opportunities to assist in launching their public service careers in nonprofit and government agencies, and in the private sector in service-related positions. The Haas Center houses the Center on Philanthropy and Civil Society, a program of the Institute for Research in the Social Sciences (IRISS).

Students interested in public service fellowships, service-learning courses, community-based research, public and community service internships for youth and education, or service organization leadership development should contact the center.

Bechtel International Center

Office: 584 Capistrano Way
Web Site: <http://icenter.stanford.edu>

The Bechtel International Center (I-Center) is a meeting place for students and senior research scholars at Stanford from throughout the world and for internationally oriented U.S. students, faculty, and short-term visitors on the campus. Through a variety of social, cultural, and educational programs, I-Center facilities are used to acquaint students and scholars with the life of the University and the community, and to bring them together in activities of mutual interest.

The Center believes that international educational exchange nurtures a lifelong global perspective, and plays a key role in supporting Stanford's standing as a truly international university in the following ways:

- Provides information about and assistance with obtaining and maintaining legal status in the U.S. to foreign students, scholars, and Stanford departments.
- Advises U.S. students who are pursuing scholarships for study and research abroad.
- Enables foreign students, scholars, and their family members at Stanford to receive maximum academic, cultural, and personal benefit from their stays in the U.S.
- Contributes to international activities at Stanford by helping to create a welcoming and supportive environment that is responsive to the needs of the international community.
- Facilitates professional meetings between visiting international delegations and their Stanford counterparts.

- Provides opportunities for Stanford students, faculty, staff, and members of the local community to broaden their horizons by interacting with people from different cultures through programs to increase international awareness and understanding.

Judicial Affairs and Student Conduct

Office: Tresidder Memorial Union, 2nd floor
Mailing Address: 459 Lagunita Drive, Suite 9
Mail Code: 94305-3010
Phone: (650) 725-2485
Fax: (650) 736-0247
Web Site: <http://judicialaffairs.stanford.edu>
Email: judicial.affairs@stanford.edu

The primary codes of conduct for students are the Fundamental Standard and Honor Code. Cases of alleged violations of the University's Honor Code, Fundamental Standard, and other student conduct or University policies now proceed through an established student judicial process based upon the Student Judicial Charter of 1997, which can be found in its entirety at the University's Office of Judicial Affairs (<http://exploreddegrees.stanford.edu/studentaffairs/http://judicialaffairs.stanford.edu>) web site. The web site also contains the policies, rules, and interpretations, as well as the University's Student Conduct Penalty Code, applicable to those students found responsible for violating the Honor Code, the Fundamental Standard, or other University policy or rule.

Allegations of sexual misconduct, sexual harassment, stalking, or dating violence proceed through the Dean's Alternate Misconduct Review Process (<http://studentaffairs.stanford.edu/judicialaffairs/process/alternate-review>).

When a violation of the Fundamental Standard, Honor Code, or other University policy or rule governing student conduct is alleged, or whenever a member of the University community believes such a violation has occurred, he or she should contact the Office of Judicial Affairs.

Fundamental Standard

Students at Stanford are expected to know, understand, and abide by the Fundamental Standard, which is the University's basic statement on behavioral expectations articulated in 1896 by Stanford's first President, David Starr Jordan, as follows:

Students are expected to show both within and without the University such respect for order, morality, personal honor, and the rights of others as is demanded of good citizens. Failure to do this will be sufficient cause for removal from the University.

Actions that have been found to be in violation of the Fundamental Standard include:

- Physical assault
- Property damage
- Forgery
- Theft
- Sexual harassment or other sexual misconduct
- Misrepresentation in seeking financial aid, University housing, University meals, or other University benefits
- Driving on campus while under the influence of alcohol
- Misuse of computer equipment or email
- Sending threatening messages

There is no standard penalty that applies to violations of the Fundamental Standard. Penalties range from a formal warning to expulsion. Each case is fact specific; considerations include the nature and seriousness of the

offense, the motivation underlying the offense, and precedent in similar cases.

Honor Code

The Honor Code is the University's statement on academic integrity. It is essentially the application of the Fundamental Standard to academic matters. Provisions of the Honor Code date from 1921, when the honor system was established by the Academic Council of the University Faculty at the request of the student body and with the approval of the President. The Honor Code reads:

1. The Honor Code is an undertaking of the students, individually and collectively:
 - A. that they will not give or receive aid in examinations; that they will not give or receive unpermitted aid in class work, in the preparation of reports, or in any other work that is to be used by the instructor as the basis of grading;
 - B. that they will do their share and take an active part in seeing to it that others as well as themselves uphold the spirit and letter of the Honor Code.
2. The faculty on its part manifests its confidence in the honor of its students by refraining from proctoring examinations and from taking unusual and unreasonable precautions to prevent the forms of dishonesty mentioned above. The faculty will also avoid, as far as practicable, academic procedures that create temptations to violate the Honor Code.
3. While the faculty alone has the right and obligation to set academic requirements, the students and faculty will work together to establish optimal conditions for honorable academic work.

Examples of conduct that has been found to be in violation of the Honor Code include:

- Copying from another's examination paper or allowing another to copy from one's own paper
- Unpermitted collaboration
- Plagiarism
- Revising and resubmitting a quiz or exam for regrading without the instructor's knowledge and consent
- Representing as one's own work the work of another
- Giving or receiving aid on an academic assignment under circumstances in which a reasonable person should have known that such aid was not permitted

For more information, see the Interpretations and Applications of the Honor Code at the Judicial Affairs (<http://stanford.edu/dept/vpsa/judicialaffairs/guiding/honorcode>) web site. The standard penalty for a first offense is a one quarter suspension from the University and 40 hours of community service. In addition, many faculty members issue a 'No Pass' for the course in which the violation occurred.

Old Union

Stanford's student union, known as the Old Union, serves as a hub for student activities on campus. The central structure in a three-building complex, the Old Union has administrative offices for ASSU, Office of Student Activities and Leadership (SAL), Dean of Student Life, and Dean of Educational Resources. It also houses a multifaith center known as CIRCLE (Center for Inter-Religious Community, Learning, and Experiences), meeting rooms for student use, and the Axe and Palm which offers casual dining. Adjoining the Old Union, the Nitery houses a black-box theater and El Centro Chicano, and the Clubhouse is home to the Asian American Activities Center and the Native American Cultural Center.

Office of Residential Education

Office: Tresidder Memorial Union

Phone: (650) 725-2800

Web Site: <http://studentaffairs.stanford.edu/resed>

The Office of Residential Education is responsible for developing the policies, programs, and staffing which support the intellectual, educational, and community-building activities in student residences. The conviction behind the Stanford residence program is that formal teaching, informal learning, and personal support in residences play an important role in a Stanford education.

Residential Education Program

The Residential Education program provides Stanford undergraduates with a small community experience within a large research university. Residential Education programs extend the classroom into the residences and complement the academic curriculum with activities and experiences that contribute to students' preparation for a life of leadership, intellectual engagement, citizenship, and service. An extensive network of staff, including many who live in the residence halls, supports students during their undergraduate careers.

Residence Deans

Residence Deans provide assistance to on- and off-campus undergraduate students. They can advise students about personal matters, occasionally intervene directly in behavioral problems or mental health concerns, and assist with personal emergencies. Advice is also available on issues of academic probation or suspension, leaves of absence, special concerns of students, and administrative matters. Residence Deans work closely with the Dean of Student Life and other University offices. They are assigned to specific residences and to off-campus students. For further information, undergraduates should call Residential Education at (650) 725-2800. For assistance, graduate students can consult Assistant Deans in the Graduate Life Office at (650) 736-7078.

Sexual Assault and Relationship Abuse Education and Response

Office: Mariposa House, 585 Capistrano Way, Room 209

Phone: (650) 725-9129

Email: saraoffice@stanford.edu

Web Site: <http://studentaffairs.stanford.edu/sara>

The Office of Sexual Assault and Relationship Abuse Education and Response (SARA) addresses policies, programs, protocols, and services related to interpersonal relationship violence on campus. The office is designed to coordinate response to reports of sexual assault, relationship abuse, and stalking to ensure the delivery of compassionate, comprehensive, and consistent services. The office also assists with educational outreach and training to increase awareness, sensitivity, and community accountability in the prevention of these acts. Questions and concerns can be addressed to saraoffice@stanford.edu.

Student Activities and Leadership

Office: Old Union, 520 Lasuen Mall, Suite 206

Web Site: <http://studentaffairs.stanford.edu/sal>

The Office of Student Activities and Leadership (SAL), located in Old Union, supports student activities, over 600 student organizations and the ASSU through publications, workshops, one-on-one consultation, advising and major event planning support.

Voluntary Student Organizations

There are over 600 different Voluntary Student Organizations (VSOs) at Stanford. VSOs are those organizations:

1. in which membership is not mandatory and is nondiscriminatory,
2. in which membership is both open and limited to current Stanford students registered in a degree-granting program,
3. in which students make all organizational decisions, and
4. whose purposes and procedures are consistent with the goals and standards of the University. In order to use University facilities, the Stanford name, or to receive ASSU funding, all voluntary student organizations must register with the University through the Office of Student Activities, Old Union, room 206.

As a condition of registration, each voluntary student organization must file and have approved each of the following:

1. A statement of purpose and organizational constitution.
2. A statement about membership eligibility.
3. Clear procedures for officer elections.
4. Identification of the authorized representatives of the group, who must be a currently registered student, and at least five active members in the organization who are currently registered students.

Each voluntary student organization must renew its registration with the University annually, early in Autumn Quarter, by submitting new registration materials.

If a voluntary student organization that is registered with the University seeks to use University facilities for meetings open to more than its own members and to specifically invited guests, such meetings shall be subject to the policies of the Committee on Public Events. All organization events held in University facilities must receive event approval from the Student Activities and Leadership and Stanford Events.

A voluntary student religious organization may hold open meetings in University facilities only with the approval of the Office of the Dean for Religious Life (as the delegatee of Student Activities and Leadership).

A registered voluntary student organization may advocate publicly a position on a public issue, provided the organization clearly identifies itself, and provided such an organization in any public statement makes clear it does not represent or speak for the University or for the Associated Students.

No student group or individual student(s) may use University space or facilities or receive other University support for purposes of supporting candidates for public office. Groups may use White Plaza for tables, speeches, and similar activities and may request to reserve auditoriums and similar space for public events including speeches by political candidates as long as all University guidelines are followed.

Tresidder Memorial Union

Tresidder Memorial Union (TMU) is a center of community activity on the Stanford campus. It houses a variety of restaurants and meeting rooms, a ticket office and campus information center, a convenience store, banking and credit union offices with ATMs, a fitness center, FedEx/Kinkos and a hair salon.

TMU is also the home of several administrative offices: Meeting Services, Judicial Affairs, Residential Education, Student Services Center, Stanford Catering, Stanford Dining (Meal Card program), the LAIR computer center and the Office of the Vice Provost for Student Affairs.

Vaden Health Center

Center Office: 866 Campus Drive
Web Site: <http://vaden.stanford.edu>

The Allene G. Vaden Health Center strictly protects the confidentiality of information obtained in medical care and counseling.

Medical Services

Medical Services (650-498-2336, ext. 1) is the first stop for diagnosis and treatment of illness, injury, and ongoing conditions, as well as preventive counseling and education. Services available without additional charge for students who have paid the Campus Health Service fee include:

- Medical appointments in general medicine and sports medicine.
- Medical advice for routine concerns throughout the day. When Medical Services is closed, advice for urgent conditions is available from the on-call physician.
- Referral to specialists, primarily at Stanford Hospital and Clinics and Menlo Medical Clinic.

Additional services (fees apply):

- Allergy injections, immunizations, travel services, physical exams for employment and scholarships, HIV testing, laboratory, X-rays, drug screening (academic year only).
- Pharmacy (650-498-2336, ext. 3) and physical therapy (650-723-3195) are available on site.

Counseling and Psychological Services (CAPS)

CAPS (650-723-3785) helps students who experience a wide variety of personal, academic, and relationship concerns. Services available without additional charge for students who have paid the Campus Health Service Fee include:

- Evaluation and brief counseling, including personal, couples and group therapy. Students requesting or requiring longer, ongoing therapy incur fees.
- Workshops and groups that focus on students' social, personal and academic effectiveness.
- Crisis counseling for urgent situations 24 hours a day.
- Consultation and outreach to faculty, staff, and student organizations.

YWCA Sexual Assault Hotline

Stanford has contracted with the YWCA to assist students, staff, faculty and other Stanford campus affiliates who are victims of sexual assault. The YWCA also can be reached at its 24-hour campus telephone line (650) 725-9955.

Health Promotion Services

Health Promotion Services (650-723-0821) educates and supports students to help them make informed, healthy decisions about their lifestyle. Services include:

- Individual preventive counseling and resource referral concerning nutrition, weight management, eating and body image, alcohol, tobacco and other drug use, sexual assault and harassment, relationships, intimacy and gender issues, and sexual health.
- Health education speakers, programs, and events and workshops at student residences, community centers, student organizations, and for new students (such as Real World: Stanford).
- Academic courses and internships.

- Student groups and volunteer opportunities including Peer Health Educators, HIV Peer Anonymous Counseling and Testing (HIV*PACT), Sexual Health Peer Resource Center (SHPRC), and CPR/First Aid classes.

Health Insurance

All registered students are required to have health insurance. Call (650) 723-2135 for more information. Cardinal Care (<http://vaden.stanford.edu/insurance>), the University-sponsored plan for students, fulfills this requirement. Insured by Aetna Student Health (medical), and ValueOptions (mental health), Cardinal Care features comprehensive, worldwide coverage, services by referral at Stanford University Medical Center and Menlo Medical Clinic, and lowest costs when one initiates care at Vaden Health Center. Stanford does not sponsor a health insurance plan for dependents; for available options, see the Dependent Health Insurance (<http://vaden.stanford.edu/insurance/dependent.html>) web site. Options for voluntary dental insurance are also offered.

Under certain circumstances, students with their own health insurance may waive Cardinal Care coverage. Domestic students who choose not to participate in Cardinal Care only have to waive once each academic year and must waive coverage before the first quarter in which they are enrolled for that academic year. At that time, and that time only, they will be able to waive Cardinal Care for the rest of the year by documenting equivalent health insurance in Axess (<http://exploreddegrees.stanford.edu/studentaffairs/http://axess.stanford.edu>) by the applicable deadline listed on Vaden's web site (http://vaden.stanford.edu/insurance/using_your_own.html#wave). International students must have coverage that meets or exceeds minimum standards established by the university in order to opt out of Cardinal Care; for more information see Vaden's web site (http://vaden.stanford.edu/insurance/using_your_own.html#international).

Vice Provost for Student Affairs: Greg Boardman

Associate Vice Provost and Dean of Student Life: Chris Griffith

Associate Vice Provost and Dean of Educational Resources: Sally Dickson

Associate Vice Provost and Director of Vaden Health Center: Ira Friedman

Associate Vice Provost and University Registrar: Thomas C. Black

Associate Vice Provost and Dean of Residential Education: Deborah Golder

Centers, Laboratories, and Institutes

Independent research laboratories, centers, and institutes perform multidisciplinary research that extends beyond the scope of any one of the University's organized schools. The listings are not all-inclusive. Click on the "Expand Menus" link at the top of the right hand menu to show a broad selection of other sites at Stanford University. A comprehensive list of Stanford offices is available on the University's A to Z Index page (<http://www.stanford.edu/atoz>).

The following tabs contain information on programs for undergraduates:

- Freeman Spogli Institute for International Studies (FSI) (p. 621)
- Woods Institute for the Environment (p. 622)

Office of Vice Provost and Dean of Research

Vice Provost and Dean of Research and Dean of the Independent Laboratories, Centers, and Institutes: Ann M. Arvin

Office: 450 Serra Mall, Main Quadrangle, Building 60

Mail Code: 94305-2064

Phone: 650-723-8789 / Fax 650-723-0662

Web Site: <http://www.stanford.edu/group/CSSA>

The Center for Space Science and Astrophysics is an interdepartmental organization coordinating research in space science and astrophysics. Its members are drawn from the Department of Geological and Environmental Sciences in the School of Earth Sciences; the departments of Aeronautics and Astronautics, Electrical Engineering, and Mechanical Engineering in the School of Engineering; the departments of Applied Physics, Physics, and Statistics in the School of Humanities and Sciences; the W. W. Hansen Experimental Physics Laboratory; and the SLAC National Accelerator Laboratory. Its membership also includes all faculty and appropriate staff at the Kavli Institute for Particle Astrophysics and Cosmology, located at SLAC and the Physics department.

The facilities of the center are available to any interested and qualified student, who must be admitted by and registered in a department.

The departments of Aeronautics and Astronautics, Applied Physics, Electrical Engineering, Mechanical Engineering, and Physics offer opportunities leading to an M.S. or Ph.D. degree for work in space science or astrophysics. The center also offers opportunities to undergraduates who may, for instance, participate in research projects in their junior or senior years, on a part-time basis during the school year or on a full-time basis during the summer. The Astronomy Course Program operates a small student observatory where students may gain practical experience in astronomical observing.

Freeman Spogli Institute for International Studies (FSI)

The Freeman Spogli Institute for International Studies (FSI) provides opportunities for undergraduate research through the CISAC Interschool Honors Program in International Security Studies and the CDDRL Undergraduate Honors Program. For information on the institute that manages student fellowship programs, see the Fellowship (<http://fsi.stanford.edu/fellowships>) web site.

Interschool Honors Program in International Security Studies

Co-Directors: Martha Crenshaw, Joseph Felter

The Center for International Security and Cooperation (CISAC) coordinates a University-wide Interschool Honors Program in International Security Studies. Students chosen for the honors program intern with a security-related organization, attend the program's honors college in Washington, D.C., in September, attend a year-long core seminar on international security research, and produce an honors thesis with policy implications. Upon fulfilling individual department course requirements and completing the honors program, students graduate in their major with a certificate in Honors in International Security Studies. To be considered for the program, students must demonstrate sufficient depth and breadth of international security course work. Successful applicants to the program are expected to have taken:

POLISCI 114S International Security in a Changing World

Units

5

MS&E 193	Technology and National Security	3
and at least one related course such as		4-5
ECON 150/ PUBLPOL 104	Economic Policy Analysis	
STS 110/ MS&E 197/ PUBLPOL 103B	Ethics and Public Policy	
PUBLPOL 102/SOC 166	Organizations and Public Policy	
POLISCI 110D	War and Peace in American Foreign Policy	
POLISCI 116/ HISTORY 103E	History of Nuclear Weapons	
POLISCI 123/ PUBLPOL 101	Politics and Public Policy	

Students in the program enroll in IIS 199 Interschool Honors Program in International Security Studies, in Autumn, Winter, and Spring quarters. Information about and applications to this program may be obtained from the Center for International Security and Cooperation, C206-7 Encina Hall Central, telephone (650) 725-9132 or <http://cisac.stanford.edu>.

Interschool Honors Program in Democracy, Development, and the Rule of Law

Directors: Francis Fukuyama

The Center on Democracy, Development, and the Rule of Law (CDDRL) Undergraduate Senior Honors Program provides students majoring in any Stanford academic department the opportunity to conduct an independent research project focused on the fields of democracy, development, and the rule of law under CDDRL faculty guidance. Students are required to complete a year-long honors research seminar that begins autumn quarter of the junior year. They will spend the last quarter of the senior year working independently with their faculty advisor to complete and submit their honors thesis ahead of their formal defense in mid-May. Upon fulfilling individual department course requirements and completing the honors program, students graduate with a certificate in Honors in Democracy, Development, and the Rule of Law.

Students interested in the program consult with their prospective honors advisers in their junior year to determine the tentative thesis topic, which should have some degree of policy relevance. Prerequisites for the program include: a 3.5 grade-point average at the time they apply; a strong overall academic record; sufficient depth and breadth in the fields of democracy, economic and social development, rule of law, and human rights course work; and demonstrated skills in writing and conducting independent research.

Students are required to attend honors college in Washington, D.C. in September before autumn quarter classes begin. Applicants are discouraged from studying abroad during the duration of the CDDRL Undergraduate Honors program.

Required course work includes:

- CDDRL's flagship undergraduate lecture course taught during Autumn Quarter, which ideally should be completed before the student enters the honors program.

•	INTNLREL 114D	Democracy, Development, and the Rule of Law	5	Units
•	or POLISCI 114D	Democracy, Development, and the Rule of Law		

- DDRL Honors Research Methods Seminars: Students meet their peers and faculty on a weekly basis to present their project theses and receive feedback.

•				Units
		Spring Quarter, Junior Year (0)		
		Autumn Quarter, Senior Year (0)		
		Winter Quarter, Senior Year (0)		

- Two additional courses that relate to the fields of democracy, development, and the rule of law (please see the program application for a list of examples).

Admitted students must be able to fulfill all course requirements in their individual majors by the time they graduate, in addition to the units required for the honors program.

For more information, contact Sarina Beges, CDDRL Program Manager at sbeges@stanford.edu or see the CDDRL (<http://exploreddegrees.stanford.edu/centerslaboratoriesandinstitutes/http://cddl.stanford.edu>) web site.

Woods Institute for the Environment

Goldman Interschool Honors Program in Environmental Science, Technology, and Policy

The Woods Institute for the Environment (<http://woods.stanford.edu>) coordinates a University-wide interschool honors program in environmental science, technology, and policy. Undergraduates planning to participate in the honors program are required to pursue studies in environmental sciences, technology, and policy, with a concentration in a single discipline. After completion of the prerequisite units, students join small group honors seminars to work with faculty members in the environmental field on an honors thesis that incorporates both scientific principles and policy aspects of environmental issues.

Courses in environmental studies appear under the course listings of the schools of Earth Sciences, Engineering, and Humanities and Sciences. Information about and applications to this program may be obtained by phoning (650) 723-5697 and at Goldman Honors Program (<http://woods.stanford.edu/education/goldman>) web site.

The Woods Institute provides support for student group projects focusing on the environment and sustainability. For details, see the Mel Lane Student Program (<http://woods.stanford.edu/students/projects.html>) web site.

The Woods Institute also sponsors a weekly series of talks on a broad range of energy topics under the rubric of:

•	CEE/ENERGY 301	The Energy Seminar	1	Units
---	-------------------	--------------------	---	--------------

For more information, see the Energy Seminar (<http://woods.stanford.edu/cgi-bin/energyseminar.php>) web site.

Libraries and Computing Resources

Stanford University Libraries and Academic Information Resources

University Librarian and Director of Academic Information Resources:
Michael A. Keller
Web Site: <http://library.stanford.edu>

Stanford University Libraries and Academic Information Resources (SULAIR) includes more than 30 libraries and programs supporting research, teaching, and learning at Stanford University. SULAIR acquires and delivers library collections in all formats, establishes policies and standards to guide the use of academic information resources, develops training and support programs for academic uses of computers, and maintains a broad array of electronic information resources, including the online library catalog and several hundred article and indexing databases and electronic journal subscriptions.

In each library unit, knowledgeable professional staff provide assistance in locating and using print and online information resources. Subject specialists and reference librarians are available for individual consultation, group classes, demonstrations, and special workshops by request.

Libraries throughout campus provide group and individual study spaces, public computers, personal laptop connections, photocopy machines, and digital scanners for use by Stanford faculty, staff, and students.

For information about library hours, see the Library Hours (<http://exploreddegrees.stanford.edu/librariesandcomputingresources/http://libraryhours.stanford.edu>) web site.

In support of the University's academic mission, Academic Computing Services provides technology expertise, resources and services to students and faculty. Academic Computing Services supports the use of technology in teaching, learning, research, and community; operates and manages technology-enabled teaching and learning environments including classrooms and public study spaces, the Multimedia Studio in Meyer Library, the Digital Language Lab, and computer clusters in Green Library, Tresidder Union, and the student residences; provides technology education, consulting support, and multimedia services at Meyer and in the residences; provides faculty-specific computing resources through the Academic Technology Specialist Program and Academic Technology Lab; and provides technology support to Stanford University Libraries' services.

Information about the library collections, facilities, services, and policies is available at the Libraries & Academic Information Resources (<http://exploreddegrees.stanford.edu/librariesandcomputingresources/http://library.stanford.edu>) web site.

Further information about library services and resources is available from the Information Center staff in Cecil H. Green Library (<http://exploreddegrees.stanford.edu/librariesandcomputingresources/http://infocenter.stanford.edu>) and from reference staff in all University libraries.

Central Campus Libraries

The Cecil H. Green Library (East and Bing Wings) maintains research collections in the humanities, social sciences, area studies, and interdisciplinary areas. These collections number approximately 2.8 million volumes. Major services in Green Library include: the Information Center, the Media Microtext Center, the Jonsson Reading Room, the Lane Reading Room, the Bender Room, Loan Desk and Privileges, Interlibrary Services, course reserves, the Department of Special Collections, and the University Archives.

The J. Henry Meyer Memorial Library houses the East Asia Library as well as the Academic Computing Services group of SULAIR and provides study, multimedia, consulting, and instructional support services. In addition, Meyer Library houses the University's Digital Language Lab, technology enabled study spaces and classrooms, the Academic Technology Lab, and the central offices of Student Computing and Academic Computing Services.

Branch Libraries

Humanities and Social Sciences Branch Libraries include the Art and Architecture Library, Cubberley Education Library, East Asia Library, Music Library, and Archive of Recorded Sound.

Science Branch Libraries include the Branner Earth Sciences Library, Engineering Library, Falconer Biology Library, Mathematical and Computer Sciences Library, Harold A. Miller Library at the Hopkins Marine Station, Physics Library, and Swain Library of Chemistry and Chemical Engineering.

For a complete list of campus libraries, see the Libraries and Collections (<http://exploreddegrees.stanford.edu/librariesandcomputingresources/http://libraries.stanford.edu>) web site.

Coordinate Libraries

J. Hugh Jackson Library (<http://www.gsb.stanford.edu/jacksonlibrary>), Graduate School of Business

Director: Kathy Long

Lane Medical Library (<http://lane.stanford.edu>)

Director: Debra Ketchell

Crown Law Library (<http://www.law.stanford.edu/library>)

Director: Paul Lomio

SLAC Research Library (<http://www-group.slac.stanford.edu/library>)

Director of Technical Information Services: Patricia Kreitz

Hoover Institution Library and Archives

Director: John Raisian

Web Site: <http://www.hoover.org/library-and-archives>

Since its founding by Herbert Hoover in 1919 as a special collection dealing with the causes and consequences of World War I, the Hoover Institution has become an international center for documentation, research, and publication on political, economic, social, and educational change in the 20th and 21st centuries.

The Hoover Library and Archives include one of the largest private archives in the world and contain outstanding area collections on Africa, East Asia, Eastern Europe, Russia and the former Soviet Union, Latin America, the Middle East, North America, and Western Europe.

Holdings include government documents, files of newspapers and serials, manuscripts, memoirs, diaries, and personal papers of men and women who have played significant roles in the events of these centuries, the publications of societies and of resistance and underground movements, the publications and records of national and international bodies, both official and unofficial, and books and pamphlets, many of them rare and irreplaceable. The materials are open to all Stanford students, faculty, and staff, to scholars from outside the University, and to the public at large.

Information Technology Services (IT Services)

Web Site: <http://itservices.stanford.edu>

IT Services manages the University's central information technology infrastructure and provides hundreds of services and applications for use in academic and business activities. Support is provided in four layers:

- Participation and client-focused leadership in institutional IT planning, including strategies for data center expansion, centrally managed storage and backup, and business continuity and disaster recovery.
- Applications and services for departments and end-users including email, calendaring, wireless connectivity, web authentication, and Windows and Linux server hosting. These services are supported by a help desk, contract-support consultants, online self-help, and training.
- Applications and services that support other campus service providers, including the help desk, change management, and network registration systems.
- A communications and collaboration infrastructure robust enough to support advanced network, voice, and web-based services.

To learn about the variety of information technology resources available at Stanford, see the Information Technology Services (<http://exploreddegrees.stanford.edu/librariesandcomputingresources/http://computing.stanford.edu>) web site. For assistance with technology services at Stanford, contact the Stanford IT Help Desk at (650) 725-HELP (5-4357) or submit a request through the HelpSU (<http://exploreddegrees.stanford.edu/librariesandcomputingresources/http://helpsu.stanford.edu>) web site.

The Continuing Studies Program

The Continuing Studies Program provides adults from the surrounding communities the opportunity to take courses for the purpose of intellectual enrichment. Courses and events are offered in all four academic quarters,

with over 400 courses planned throughout the year. The Continuing Studies Program is a non-degree bearing program.

The instructors are largely drawn from the ranks of the University's professoriate and academic staff. The program presents a wide variety of courses, with a central concentration in the liberal arts, including literature, history, art and architecture, and music.

Tuition discounts are available to University employees, Stanford students and faculty, Stanford Alumni Association members, educators, and those over age 65.

For a list of offered courses, see the Courses tab the Continuing Studies web site (<http://exploreddegrees.stanford.edu/continuingstudies/http://continuingstudies.stanford.edu>).

Master of Liberal Arts Program

Associate Dean and Director: Linda Paulson

Participating Faculty: Russell Berman (Comparative Literature, German Studies), Marc Bertrand (French and Italian, emeritus), Jay Bhattacharya (Medicine), Eamonn Callan (Education), William Chace (English, emeritus), Gerry Dorfman (Hoover Institution, Political Science), Michele Elam (English), Martin Evans (English), Paula Findlen (History), Larry Friedlander (English), Kenneth Fields (English), Hester Gelber (Religious Studies), Albert Gelpi (English, emeritus), Barbara Gelpi (English, emerita), Robert Gregg (Religious Studies, emeritus), Tom Grey (Music), Hans Ulrich Gumbrecht (French and Italian), Van Harvey (Religious Studies, emeritus), Gavin Jones (English), Charles Junkerman (Continuing Studies Program), Nancy Kollmann (History), Herbert Lindenberger (English, emeritus), Marsh McCall (Classics, emeritus), Mark Mancall (History, emeritus), Scotty McLennan (Religious Life), David Palumbo-Liu (Comparative Literature), Linda Paulson (English), Denis Phillips (Education, emeritus), Ronald Rebholz (English, emeritus), Rush Rehm (Drama, Classics), John Rick (Anthropology), John Rickford (Linguistics), Paul Robinson (History, emeritus), Ramón Saldivar (English), Paul Seaver (History, emeritus), Thomas Sheehan (Religious Studies), Robert Siegel (Microbiology and Immunology), Peter Stansky (History, emeritus), Stephen Stedman (Freeman Spogli Institute for International Studies), Thomas Wasow (Linguistics), Ernlé Young (Medicine, emeritus), Steven Zipperstein (Jewish Culture and History)

Program Offices: 365 Lasuen Street, Littlefield Center

Mail Code: 94305-6079

Phone: (650) 725-0061 Fax: (650) 725-4248

Email: mlaprogram@stanford.edu

Web Site: <http://mla.stanford.edu>

Courses offered by the Master of Liberal Arts Program are listed under the subject code MLA on the (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=MLA&filter-catalognumber-MLA=on>) Stanford Bulletin's (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=MLA&filter-catalognumber-MLA=on>) ExploreCourses web site (<http://explorecourses.stanford.edu/CourseSearch/search?view=catalog&catalog=&page=0&q=MLA&filter-catalognumber-MLA=on>).

Program Description

The Master of Liberal Arts (MLA) program aims to provide a flexible, interdisciplinary program for returning adult students who seek a broad education in the liberal arts. The underlying premise of the MLA program is that knowledge gained through an interdisciplinary course of study leads to intellectual independence and satisfaction not always found in discipline-based programs of study. The goals of the MLA program are to develop advanced critical thinking, to foster intellectual range and flexibility, and

to cultivate an individual's ability to find the connections among different areas of human thought: art, history, literature, music, philosophy, political science, science, and theology.

The program is designed with part-time students in mind: seminars meet in the evening, and students complete the degree in 4-5 years. All master's seminars are taught by members of the Stanford faculty. Seminar size is limited to 20 students.

Learning Outcomes (Graduate)

The purpose of the Master of Liberal Arts Program is to address subjects that cross disciplinary boundaries; to develop an understanding of the strength and the shortcomings of disciplinary evaluation; to help students to refine their skills in writing, research, critical thinking, collaborative work, and collegial discussion. While students are not being groomed for academic careers, graduates of the program have used their experience to gain acceptance into Ph.D. programs at Stanford and elsewhere. Students who complete the MLA program are well positioned to advance in careers that require the careful analytical and rhetorical training they receive. This training is achieved through the completion of four foundations courses, which together emphasize the program's goals as stated above; seven seminars that offer a more specific engagement with interdisciplinary subject matter; and a master's thesis, accomplished under the direction of a Stanford faculty member who is expert in the subject of the thesis.

Degree Requirements

Candidates for the MLA degree must complete a minimum of 50 units of course work with at least a grade point average of 3.3 (B+). These units must include a three-quarter foundation course (equal to 12 units total), one 4-unit core introductory seminar for second-year students, at least seven 4-unit MLA seminars, and a 6-unit master's thesis. Students must also fulfill distribution requirements in each of the following areas: humanities; social science or social policy; and science, engineering, or medicine.

Foundation Course

During the Autumn, Winter, and Spring quarters following admission to the program, a three quarter foundation course is required of all students. The purpose of this course is to lay the groundwork for the interdisciplinary, intercultural studies the student will shortly undertake. The foundation course introduces students to the broad framework of history, literature, philosophy, political science, and art.

Core Seminar

During the first quarter of the second year, students take the core introductory seminar, MLA 102 An Introduction to Interdisciplinary Graduate Study. This seminar prepares students for interdisciplinary graduate work at Stanford. Students concentrate on writing a critical graduate paper, conducting library research, presenting the results of their research, and productively participating in a collaborative seminar.

MLA Seminars

Students are required to take at least seven MLA seminars of 4 units each. Each year, at least nine seminars are offered in the MLA program. Each MLA course requires a substantial seminar paper. Students are encouraged to use these papers as a way to investigate new fields of interest, as well as a way to develop different perspectives on issues in which they have an ongoing interest.

Master's Thesis

The MLA program culminates in the master's thesis. Students approaching the end of the program write a thesis, approximately 75-100 pages in length, that evolves out of work they have pursued during their MLA studies. The

thesis is undertaken with the prior approval of the MLA program, and under the supervision of a Stanford faculty member. During the process of writing the thesis, students are members of a work-in-progress group, which meets regularly to provide peer critiques, motivation, and advice. Each student presents the penultimate draft of the thesis to a colloquium of MLA faculty and students, in preparation for revising and submitting the final draft to the adviser and to the MLA program.

Enrollment Requirements

MLA students must enroll for each academic year from the time of original matriculation until conferral of the degree. To remain active, students must either:

1. complete a minimum of two courses (eight units) in one academic year, defined as from the beginning of Autumn Quarter through the end of the following Summer Quarter; or,
2. be actively working on their thesis and regularly attend a minimum of three quarters of the work-in-progress meetings from the time the student enrolls in work-in-progress through graduation.

Timeline for Completion

All requirements for the Master of Liberal Arts degree must be completed within five years after the student's first term of enrollment in the program. If extraordinary circumstances prevent completion within five years, a student may submit a written petition for a maximum one-year extension to the Associate Dean and Director. This petition is reviewed by a committee which makes a recommendation to the Director; the final decision is at the discretion of the Director. To be considered, the petition must be submitted on or before May 1 of the student's fifth year in the program.

Registration

Master of Liberal Arts students enroll in courses through Stanford's Axess (<http://axess.stanford.edu>) system.

Summer Session

Associate Dean of Summer Session: Jess Matthews

Assistant Dean of Summer College: John Robichaux

Contact

Program Offices: 365 Lasuen Street

Mail Code: 94305-6079

Phone: (650) 723-3109; Fax: (650) 725-6080

Email: summersession@stanford.edu

Web Site: <http://summer.stanford.edu>

Students attending Stanford Summer Session are either Matriculated Stanford students, visiting undergraduate or graduate students, or enrolled in the High School Summer College.

Degree-seeking Stanford students should indicate on Axess during Spring Quarter that they intend to register for Summer Quarter. Separate application is not required.

Visiting undergraduate or graduate students are not presently candidates for a Stanford degree. These are students and adults who have taken at least one course at another college or university. These students must complete a short application, available at <http://summer.stanford.edu>. Qualified high school students who are at least sixteen years old may apply to the High School Summer College (<http://summer.stanford.edu/programs>) program.

Students in Stanford Summer Session, in general, enjoy the privileges of students in the regular degree programs except that work completed cannot be applied toward a Stanford degree or credential until the student has been admitted to regular standing. Admission as a visiting student does not imply later admission to matriculated status. However, should the visiting

student matriculate at a later date through normal admission procedures, the summer work may be applied toward the requirements for a Stanford degree or credential at the discretion of the University or academic department.

Visiting undergraduate and graduate students and students in the High School Summer College are not matriculated Stanford University students, and not all University student policies apply to such students. The University reserves the right, at its discretion, to withhold registration from or require withdrawal from Stanford Summer Session for these students or applicants.

Stanford University admits qualified students of any race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, and gender identity to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, Stanford prohibits unlawful discrimination, including harassment, on the basis of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity, or any other characteristic protected by applicable law in the administration of the University's programs and activities.

For more information, contact Summer Session by email, mail, phone, or fax using the listings above. Information is updated annually in January and may also be found online at <http://summer.stanford.edu>.

Dean and Associate Provost: Charles Junkerman

Associate Dean and Director: Dan Colman

Other Services and Programs

Bookstore

Web Site: <http://stanfordbookstore.com>

Organized in 1897, Stanford Bookstore, (650) 329-1217, located at 519 Lasuen Mall (White Plaza), provides a diverse selection of books, course materials, and supplies to the students, faculty, staff, and community in and surrounding Stanford. The bookstore carries over 130,000 titles, including a wide selection of medical books and books written by Stanford authors, making it one of the largest bookstores in the nation. The bookstore also carries medical instruments, Stanford logo apparel, gifts and souvenirs, periodicals, and features a café that provides an enhanced shopping experience. The Computer Store, in the main branch, sells academically priced computer hardware and software. Other services include shipping of purchases, gift cards, book buyback, fax service, postage stamp sales, an ATM, and Enterprise Rent-A-Car hotline. There are four branches in addition to the Stanford Bookstore that also serve the community: the Stanford Athletics Shop (formerly the Track House Sports Shop), (650) 327-8870, underneath the Cobb Track and Angell Field bleachers, is the headquarters for Stanford Athletic Gear; Tresidder Express convenience store, (650) 723-9224 in Tresidder Union; the Stanford Shop, (650) 614-0295, at the Stanford Shopping Center, provides Stanford apparel; and the Bookshop, (650) 725-2775, at the Cantor Center for the Arts, carries books on the arts, fine gifts, apparel, and jewelry.

Stanford Conference Services

Phone: (650) 723-3126

Email: conferenceinquiries@stanford.edu

Web Site: <http://conference.stanford.edu>

A conference is defined as any student, youth, or adult group that convenes for part of a day (including a luncheon), overnight, or for several days, outside the regular or summer academic sessions for registered students. Policies concerning conferences are the responsibility of the offices of the President and the Provost.

To make arrangements for hosting a new, academically sponsored residential summer conference during the mid-June through late-August time frame, contact Stanford Conference Services by phone or email as listed above. Stanford Conference Services also offers meeting planning services on a year-round basis for academically sponsored conference groups seeking assistance with planning and managing residential and non-residential conferences. In addition, conference organizers seeking to conduct conferences outside of the late August to early June time frame can also contact the non-academic facilities scheduling in the Office of the University Registrar, (650) 723-6755 or reg-events@stanford.edu, or contact Stanford Events, (650) 723-2551 or stanfordevents@stanford.edu.

Academic sponsorship by a Stanford dean or department head is required for first time conferences hosted by University departments or by conferences hosted by external organizations interested in meeting at Stanford. Conferences initiated by University departments or external organizations must demonstrate consistency with the University's academic mission. For summer conferences, the sponsoring department submits its proposal to the Director of Stanford Conference Services for review in terms of available facilities and for the approval of the President's Office. At least half of the participants in any summer conference at Stanford hosted by an external organization must be housed in Stanford's campus residences and participate in daily meal plans provided by Stanford Dining. On-campus residential housing and dining services are normally available from the Sunday following Commencement through late August.

Summer conference groups should contact Stanford Conference Services concerning arrangements for tables, chairs, audio-visual aids, signage, janitorial services, trash pick-up and removal, sprinkler shutoffs, and other conference-related products/services. During the academic year, housing arrangements for University-sponsored visitors can be made through the Stanford Guest House (<http://exploreddegrees.stanford.edu/otherservicesandprograms/http://guesthouse.stanford.edu>) web site or call (650) 926-2800.

Ombuds

Stanford University Ombuds: David Rasch

Ombuds Office: Mariposa House, 585 Capistrano Way, Room 210

Phone: (650) 723-3682

Fax: (650) 725-7288

Mail Code: 94305-8200

Email: rasch@stanford.edu

Web Site: <http://stanford.edu/dept/ombuds>

School of Medicine Ombuds: Martha McKee

Office: MSOB X301

Phone: (650) 498-5744

Fax: (650) 498-5865

Mail Code: 94305-5404

Email: mmckee@stanford.edu

Web Site: <http://med.stanford.edu/ombuds>

The charge to the Ombuds office at Stanford is: "The Ombudsperson's task is to protect the interests and rights of members of the Stanford community from injustices or abuses of discretion, from gross inefficiency, from unnecessary delay and complication in the administration of University rules and regulations, and from inconsistency, unfairness, unresponsiveness, and prejudice in the individual's experience with University activities. The Ombudsperson's office exists to receive, examine, and channel the complaints and grievances of members of the Stanford community, and to secure expeditious and impartial redress."

Any troublesome matter in the University community may be discussed in confidence with the University Ombuds. Services of the office are available

to students, staff, and faculty. Although possessing no decision making authority, the Ombuds has wide powers of inquiry. The Ombuds refers matters to the proper person or office expeditiously and also provides conflict resolution services. For the role of the office of the Ombuds in cases of sexual harassment, see the "Non-Academic Regulations (<http://exploreddegrees.stanford.edu/nonacademicregulations>)" section of this bulletin.

Police Services

Department Office: Corner of Campus Drive and Serra Street
Phone: (650) 723-9633
Web Site: <http://police.stanford.edu>

The Stanford Department of Public Safety is a full service police department that operates 24 hours a day, 7 days a week. For police, fire, or ambulance response, dial 9-1-1, or 9-9-1-1 from a University phone. Emergency assistance can also be obtained by using one of the nearly 100 Blue Emergency Phone Towers strategically placed around campus.

The department is composed of the following divisions:

The Field Services Division consists of sworn and non-sworn officers who patrol the campus and respond to calls for service. Sworn officers receive their police powers through the Santa Clara County Sheriff's Office. Sworn officers have the legal authority to stop vehicles, make arrests, and enforce all laws. Non-sworn officers assist the sworn officers with security patrols, evidence collection, crime prevention presentations, and other assigned tasks.

Community Service Division: Community Service Officers (CSOs) enforce the parking rules and regulations on campus, and provide traffic control at special events, construction zones, and accident scenes. CSOs also provide building security during emergency or critical incidents.

The Support Services Division provides logistical, technical, and accounting support to the department. Special events are handled through this division as well. Special Events Personnel (SEPs) provide security at campus events including athletic events, concerts, student-sponsored events, and dignitary visits. SEPs are available for hire by groups needing security at their University events. Contact the special events office at (650) 723-4924, or email event_security@stanford.edu, for more information.

The Administrative Support Division supports the department through training, recruiting, payroll, human resources, and other business functions. For additional safety information or to view the yearly crime statistics, see the Stanford Safety and Security Almanac, available free from the Public Safety (<http://exploreddegrees.stanford.edu/otherservicesandprograms/http://police.stanford.edu>) web site.

Office for Religious Life

Office: Memorial Church
Phone: (650) 723-1762
Web Site: <http://religiouslife.stanford.edu>

The mission of the Office for Religious Life (ORL) is to guide and enhance spiritual, religious, and ethical life within the Stanford University community. Multifaith exploration and dialogue, central in Stanford's history from its founding, is a vital part of both its ethos and education.

The ORL is committed to welcoming students of all genders and sexual identities, all religious and non-religious traditions, and all cultural backgrounds, striving to ensure that students, faculty, and staff have access to supportive contexts in which to pursue their spiritual journeys on the Stanford campus.

The ORL oversees and provides support for Stanford Associated Religions (SAR), more than thirty religious organizations that offer their spiritual services to the campus, as well as the Center for Inter-Religious Community, Learning, and Experiences (the CIRCLE). Located on the third floor of the remodeled Old Union, the CIRCLE offers an interfaith

sanctuary, a seminar room, a common room, a student lounge, a non-lending library, and offices housing many SAR member groups.

Stanford Alumni Association

Web Site: <http://stanfordalumni.org>
Phone: (800) 786-2586 or (650) 723-2021

The Stanford Alumni Association (SAA) seeks to serve all Stanford alumni and students by offering programs and services such as reunions, regional events, Stanford Magazine, online services, volunteer and learning opportunities, and the alumni directory.

The Stanford Alumni Association's alumni and student class outreach department (ASCO) provides undergraduates and graduate students with networking opportunities, celebratory and social events, and programs that enhance their Stanford experience and help connect them to the 200,000 alumni worldwide who make up the Stanford alumni community. ASCO programs bring students and alumni together through Reunion Homecoming Weekend each autumn and Commencement weekend in the spring, along with alumni networking events throughout the year.

For students, SAA sponsors events such as student tailgates, alumni panels, Senior Send-off, Senior Dinner on the Quad, and Class Day. The Alumni Association gives out the J.E. Wallace Sterling Award and the Stanford Award of Excellence annually to honor graduating seniors for exemplary service to the University. For more information on student programs at the Stanford Alumni Association (<http://exploreddegrees.stanford.edu/otherservicesandprograms/http://police.stanford.edu>) web site.

Office of Special Events & Protocol and the Stanford Ticket Office

The Office of Special Events & Protocol (OSEP) (<https://osep.stanford.edu>) and Stanford Ticket Office (STO) (<http://tickets.stanford.edu>) are divisions of the Office of Public Affairs (<http://publicaffairs.stanford.edu>). OSEP manages the University's public ceremonies such as Commencement, Baccalaureate, New Student Orientation Convocation, and the Founders' Celebration. The organization also designs and produces other high-profile university events hosted by the President and Provost, such as the Roundtable at Stanford, international symposia and visits to campus by foreign delegations and heads of state.

OSEP also serves in an advisory capacity and/or can provide direct planning expertise to campus schools, departments, and student groups. The department has final approval authority of Stanford facility and open space use for non-academic events on campus. For information or event planning assistance, information about policies, procedures, and University facilities, see the OSEP (<https://osep.stanford.edu>) web site, or call (650) 724-1387.

The STO is the University's official full-service box office that provides online, in-person and by phone ticketing services, as well as day-of-event staffing support to hundreds of events throughout the year. Important arts organizations and venues it serves include Stanford Live, Stanford Jazz and Music Departments, the Bing Concert Hall, Frost Amphitheater, and Memorial Auditorium. The Stanford Ticket Office also provides professional ticketing and registration services to all academic departments, institutes, and student groups for lectures, festivals, concerts, and various high profile public events. For more information, see the Stanford Ticket Office (<http://tickets.stanford.edu>) web site, or call (650) 725-ARTS (2787).

Diversity and Access Office

Director of the Diversity and Access Office and Title IX Coordinator: Rosa Gonzalez

Office: Mariposa House, 585 Capistrano Way

Mail Code: 94305-8230

Phone: (650) 723-0755; TTY: (650) 723-1216

Email: equal.opportunity@stanford.edu, disability.access@stanford.edu

Web Site: <http://stanford.edu/dept/diversityaccess>

The Diversity and Access Office has two primary missions:

1. To oversee University compliance with nondiscrimination and equal opportunity laws (including but not limited to Title VI, Title VII, and Title IX), as well as the regulations relating to affirmative action. This includes collecting, monitoring, reporting, and analyzing personnel data regarding the hiring, promotion, and retention of women and minorities. Rosa Gonzalez, Title IX Coordinator, serves as the University's coordinator of Title IX matters relating to concerns of denial of educational opportunities on the basis of gender, including sexual harassment or sexual violence.
2. To oversee University compliance with federal and state disability-related laws, including (but not limited to) the Americans with Disabilities Act, and Sections 503 and 504 of the Rehabilitation Act. This includes providing certain non-academic services (and accommodations) to students with disabilities, and providing assistance and information to staff and faculty with disabilities needing workplace accommodations. The office also provides auxiliary aids and services to the public visiting Stanford and attending public events. In addition, the office monitors disability access on campus and provides information regarding web accessibility.

Awards and Honors

Faculty and Staff Awards

Kenneth M. Cuthbertson Award

The Kenneth M. Cuthbertson Award was established in 1981 to recognize exceptional service to Stanford University. It was established by members of the faculty who wish to remain anonymous. All members of the Stanford community are eligible for the award; the sole criterion is the quality of the contribution that the recipients have made to the University. The award provides a way of honoring members of the staff and faculty for their efforts on behalf of the University.

Ordinarily, one award is made each year. The award was first presented in 1981 to the person for whom it is named. Kenneth M. Cuthbertson was one of the early architects of Stanford's long-term financial planning and fundraising program. His service to Stanford set an enduring standard for those who will come after him. The award is made annually at the University Commencement Ceremony.

Lloyd W. Dinkelspiel Awards

The Lloyd W. Dinkelspiel Awards recognize distinctive and exceptional contributions to undergraduate education at Stanford University. The two principal awards are made to the faculty or staff members adjudged to have made the most distinctive contribution to the development and enrichment of undergraduate education in its broadest sense. Two awards are also made to graduating seniors who combine academic achievement with effective contributions to undergraduate student life. Preference is given to service in the School of Humanities and Sciences in the area of liberal education. The awards are made from an endowment fund established in memory

of Lloyd W. Dinkelspiel, a Stanford alumnus and trustee. The awards are made annually at the University Commencement Ceremony.

Walter J. Gores Awards

The Walter J. Gores Faculty Achievement Awards for excellence in teaching were established by bequest of Walter J. Gores, Stanford Alumnus of the Class of 1917 and a professor at the University of Michigan for 30 years. Teaching is understood in its broadest sense and includes, in particular, lecturing, leading discussions, tutoring, and advising at the undergraduate or graduate levels. Any member of the teaching staff of the University is eligible for an award, including all faculty of professorial rank, instructors, lecturers, teaching fellows, and teaching and course assistants. Ordinarily, awards are made to a senior faculty member (associate or full professor) or senior lecturer; a junior faculty member or member of the teaching staff; and a teaching assistant (graduate or undergraduate student). The awards are made annually at the University Commencement Ceremony.

Allan Cox Medal For Faculty Excellence Fostering Undergraduate Research

The Allan Cox Medal for Faculty Excellence Fostering Undergraduate Research is awarded annually to a faculty member who has established a record of excellence directing undergraduate research over a number of years. It may also go to a faculty member who has done an especially outstanding job with just one or two undergraduates who have demonstrated superior work. The medal was established in memory of the former professor of Geophysics and Dean of the School of Earth Sciences, a strong supporter of faculty-student research collaboration.

Herbert Hoover Medal For Distinguished Service

David Starr Jordan's belief that every academic degree should represent work actually done in or under the direction of the institution granting it has meant that, since its founding, Stanford has awarded no honorary degrees. As a means of recognizing extraordinary individuals who deserve special acknowledgment, the Stanford Alumni Association in 1962 voted to establish the Herbert Hoover Medal for Distinguished Service. The name pays tribute to the former President's example of service to his University, to his country, and to the cause of world humanitarianism. Indeed, Mr. Hoover was the first award recipient. The gold medal is presented following selection by an anonymous committee appointed by the Chair of the Board of Directors of the Alumni Association.

Student Awards

Boothe Prize for Excellence in Writing

Awarded during the freshman year, the Boothe Prize recognizes excellence in writing. Students are selected for this honor on the basis of essays written for courses fulfilling the Introduction to the Humanities or Writing and Rhetoric requirements. The prize is named for Mr. and Mrs. D. Power Boothe, Jr., whose gifts to the University reflect their interest in the humanities.

President's Award for Academic Excellence in the Freshman Year

The President's Award honors students in the top 3% of the class who have exceptionally distinguished academic records that exemplify a strong program of study in the freshman year. Students eligible for the award normally have completed Writing and Rhetoric and Introduction to the Humanities requirements during their first year at Stanford.

Deans' Award for Academic Achievement

The Deans of Earth Sciences, Engineering, and Humanities and Sciences recognize from five to ten undergraduate students each year for their academic endeavors. Honorees are cited for noteworthy accomplishments which represent more than a high grade point average or success in course work. Faculty nominate students who have exceptional tangible achievements in classes or independent research, national academic competitions, a presentation or publication for a regional or national audience, or exceptional performance in the creative arts.

Firestone Medal for Excellence in Research

The Firestone Medal is awarded to seniors in recognition of excellence in undergraduate research. Departments in the School of Humanities and Sciences nominate students who have completed outstanding honors projects in the social, physical, and natural sciences.

Robert M. Golden Medal for Excellence in the Humanities and Creative Arts

The Golden Medal recognizes outstanding achievement in the humanities and the creative arts. Seniors receive these medals upon nomination by their major department.

Hoefer Prize for Excellence in Undergraduate Writing

The Hoefer Prize recognizes students and faculty for their work in courses that meet the University Writing Requirement for writing in the major. Prizes are awarded in each of the five areas of the undergraduate curriculum: humanities, social sciences, natural sciences, engineering, and earth sciences.

Frederick Emmons Terman Engineering Scholastic Award

The School of Engineering annually presents the Terman Award to seniors for outstanding academic achievement. The awardees share their award with a high school teacher of their nomination.

Phi Beta Kappa

Phi Beta Kappa is a nationwide society honoring students for the excellence and breadth of their undergraduate scholarly accomplishments. Membership in the Stanford Chapter (Beta of California) is open to undergraduates of all majors. To be elected to Phi Beta Kappa at Stanford, a student must achieve academic distinction in the major as well as in courses across a broad range of fields.

Approximately a tenth of the members of a graduating class are elected to Phi Beta Kappa. Of this number, about one fifth are chosen in their junior year, the remainder in their senior year.

The chapter's election guidelines define breadth of study as excellence beyond the major field. To be considered for election, a student must have taken at least three courses of 3 units or more at Stanford by the time elections are held early in the Spring Quarter with a letter grade of 'B-' or better in each of the following three major domains of knowledge: humanities; science, engineering, and math; and social sciences. Students who transfer in their junior year must have taken at least two courses at Stanford in two of the major domains and at least one course in the third domain, and must have completed a minimum of 75 units of academic work at Stanford by the end of Winter Quarter. Students who transfer in their

sophomore year must have taken at least two courses at Stanford in each of the major domains.

There is no direct correlation between Stanford University General Education Requirements (GERs) and Phi Beta Kappa breadth requirements. The elections committee analyzes the content of individual courses to determine which major domain requirement they may satisfy. IHUM, PWR, and first-year language courses do not satisfy the PBK breadth criterion.

A grade of '+' or 'CR' is not considered a sign of distinction. Minimally satisfying the breadth criterion is not considered a sign of distinction.

The academic records of eligible students are automatically reviewed, so no special action is required for students wishing to be considered for membership. Anonymity in the election process is ensured by removal of the students' names from their academic records before consideration. Students who desire that their records not be made available for consideration by the Stanford chapter of Phi Beta Kappa should inform the Registrar, 630 Serra Street, Suite 120, Stanford, CA 94305-6032.

Exchange Programs and Cross-enrollment Agreements

Stanford has exchange programs and cross-enrollment agreements with a number of other colleges and universities. The purpose of these programs and agreements is to offer Stanford students courses and training that are not available in the Stanford curriculum.

Undergraduate

Stanford has exchange programs with four colleges and universities that allow students to exchange schools for a quarter/semester or for a year, depending on the school. These programs are best suited to students in their junior year, when the major area of study has been determined. Stanford students register for zero units at Stanford during the quarter(s) in which they are attending another college or university and pay the regular Stanford tuition. Courses taken at the other institution are treated as transfer credit back to Stanford. Students should contact the External Credit Evaluation section of the Office of the University Registrar to determine whether the courses taken through an exchange program may qualify for credit toward a Stanford degree. Only the number of units accepted in transfer, not the course titles or the grades received, are recorded on the Stanford transcript.

Exchange programs are currently available at three historically black institutions: Howard University in Washington D.C.; and Morehouse College and Spelman College in Atlanta, Georgia. The exchange program at Dartmouth College in Hanover, New Hampshire, focuses on Native American Studies. Further information is available at the Undergraduate Advising and Research Center.

Graduate

The Exchange Scholar Program is open to doctoral students in the fields of humanities, social sciences, and sciences who have completed one full year of study at one of the participating institutions. These students may apply to study at Stanford, and Stanford students may apply to one of these other institutions, for a maximum of one academic year (Autumn, Winter, and Spring quarters) to take advantage of particular educational opportunities not available on the home campus. The participating institutions are Brown University, University of Chicago, Columbia University, Cornell University, Harvard University, Massachusetts Institute of Technology, Princeton University, Stanford University, University of Pennsylvania, and Yale University. Further information on the program may be obtained from the Office of the University Registrar, or the graduate dean's office at participating institutions. Some institutions may place restrictions on specific departments.

Stanford also has separate exchange programs with the University of California, Berkeley, and the University of California, San Francisco. Further information may be obtained at the Office of the University Registrar.

Cross-Enrollment

See the ROTC section (p.) of this bulletin for information on ROTC cross-enrollment programs.

Descriptions

Courses

Courses

Accounting Courses

ACCT 210. Financial Accounting. 4 Units.

In general terms, financial accounting is the measurement of economic activity for decision-making. Financial statements are a key product of this measurement process and an important component of firms' financial reporting activities. In the past few years, financial accounting came to the forefront of the national consciousness as the stock market continued to decline amid faltering investor confidence. The crisis of confidence began with the revelation of accounting irregularities at some of the United States largest companies. However, the implications extended well beyond the effects of individual accounting or company failures: investors seemed to lose confidence in the integrity of the financial system as a whole. The capital markets, whose relative efficiency is based largely on the timely dissemination of relevant and reliable financial information, were at risk. Clearly, the importance of understanding accounting has never been so salient. The objective of this course is not to train you to become an accountant but rather to help you develop into an informed user of financial statement information. While financial statement users face a wide variety of decisions, they are often interested in understanding the implications of financial statement information for the future cash flows and earnings potential of a firm. We will focus on understanding the mapping between underlying economic events and financial statements, and on understanding how this mapping affects inferences about future profitability. Because annual reports are somewhat formidable, we will spend time familiarizing ourselves with how firms present the information for various accounts in the financial statements, including the footnotes. We also will discuss the role of the various institutions involved in the reporting process. By understanding the environment in which financial reporting takes place you will be in a better position to evaluate critically the disclosures made by firms in published financial statements. The following learning objectives will be emphasized: (1) familiarity with the transactions businesses engage in, (2) fluency in accounting terminology, (3) understanding the structure that maps transactions into accounting numbers, (4) understanding the rationale for various accounting methods, and (5) awareness of the judgment involved and the discretion allowed in choosing accounting methods, making estimates, and disclosing information in financial statements.

ACCT 212. Managerial Accounting: Base. 3 Units.

Managerial accounting refers to the preparation and use of information for internal planning, control, coordination, and performance evaluation purposes. This orientation contrasts with financial accounting where the focus is on accounting disclosures for parties external to the firm. The majority of the course covers the vocabulary and mechanics of cost accounting, issues involved in the design of an internal accounting system, and the role of accounting in decisions concerning resource allocation and performance measurement. Included in this are discussions of capacity costs, inter-departmental allocations, and activity-based management in manufacturing and service environments. We will pay particular attention to the trade-offs embedded in the choice of internal accounting systems, as well as ways in which to attenuate the problems created by these trade-offs. The second part of the course examines the process of evaluating the performance of individuals, business units and firms. We will study the optimal choice of performance metrics for incentive purposes and the rationale behind the balanced scorecard, as well as the importance of designing appropriate transfer prices for intrafirm transactions.

ACCT 213. Financial Accounting - Accelerated. 4 Units.

This course develops students' ability to read, understand, and use corporate financial statements. The course is oriented toward the user of financial accounting data (rather than the preparer) and emphasizes the reconstruction and interpretation of economic events from published accounting reports. The course is geared toward students with some familiarity in dealing with financial statement information and allows for deeper coverage and discussion in class.

ACCT 215. Managerial Accounting: Accelerated. 3 Units.

This course provides a comprehensive introduction to the concepts and tools of managerial accounting. The first part of the course demonstrates how management can rely on internal accounting information to measure and manage the profitability of individual products and customers. As part of that analysis, we examine alternative costing methods and illustrate how the resulting cost information can be used for decision making. The second part of the course focuses on the role of the internal accounting system in evaluating managerial performance and in coordinating the activities among business units within the firm. Our focus here will be on performance metrics that enable effective decentralization by aligning the objectives of individual business units with the overall corporate goals.

ACCT 219. Sloan: Accounting. 4 Units.

A characteristic of business is the extensive use of accounting data. The financial accounting course has the general objective of developing students' understanding of the nature, scope, and limitations of accounting information. To achieve this objective the course attempts to: (1) develop students' understanding of the conceptual accounting framework, including the objectives of financial reporting, and (2) develop students' ability to understand and critically evaluate the financial disclosures made by corporations. An issue of particular interest will be the managerial incentive aspects of accounting information and disclosures.

ACCT 311. Global Financial Reporting. 4 Units.

This course is designed to enhance students' understanding of current financial reporting issues through a detailed analysis and comparison of U.S. and International Financial Reporting Standards. The course will cover the development of accounting standards, implementation of these standards, and how to interpret output from these standards. The course highlights intermediate and advanced financial reporting topics including fair value accounting, asset securitization, consolidation including special purpose entities, foreign currency translation, derivatives and hedging, leases, revenue recognition, pensions, and equity compensation. The course also focuses on evaluating emerging financial reporting issues such as proposed financial reporting standards put forth by U.S. or international standard setting bodies. This course should help students better understand the environment governing global financial reporting and how firms develop financial statement information within this environment.

ACCT 313. Accounting-Based Valuation. 4 Units.

This course is structured to develop students' ability to interpret and use financial accounting information in equity valuation contexts. The perspective taken is that of an outsider relying on publicly available financial information for investment purposes, and builds heavily on the residual income framework for equity valuation. The first half of the course covers financial statement analysis-based tools for assessing a firm's current financial performance and economic condition, including traditional ratio analysis. The second half of the course introduces the accounting-based valuation framework, and develops the link between financial statement analysis, forecasting and valuation. This portion of the course focuses on techniques for forecasting specific income statement and balance sheet items, the creation of pro-forma financial statements, and the implementation of several accounting-based valuation models. The capstone to the course is the completion of a comprehensive equity valuation project. In addition to learning basic financial statement analysis tools and accounting-based valuation theory, students benefit from applying these tools and theories in the context of weekly cases and the final project. The course is structured for students to gain a deeper understanding of the economic pressures behind the analysis and valuation process by drawing upon and synthesizing concepts from microeconomics, corporate finance, corporate strategy, statistics and accounting. The course will be of value to those students who, as either senior managers or outsiders, anticipate making investment or credit decisions at least partially based on financial statement information.

ACCT 317. Managerial Accounting: Performance Measurement, Compensation, and Governance. 3 Units.

The course will examine the academic and professional controversies surrounding corporate governance and executive compensation. A basic framework will be developed to integrate the many important dimensions of corporate governance in the U.S. and international settings. The institutional features of corporate governance and executive compensation will be documented using the professional business and legal literatures. In addition, the scientific research in accounting, economics, finance, and organizational behavior will be used to provide insights into the measurement and consequences of observed corporate governance and executive compensation choices. After successfully finishing the course, a student should be able to (i) understand the debates about appropriate choices for corporate governance and executive compensation and (ii) critically evaluate the implications of academic and professional research studies on these controversial issues.

ACCT 332. Mergers and Acquisitions: Accounting, Regulatory, and Governance Issues. 4 Units.

This course covers various financial and economic issues related to mergers and acquisitions. For example, we review the financial reporting implications of business combinations (e.g., consolidation, the "acquisition" method), and income tax treatments of M&A transactions (e.g., taxable vs. non-taxable deals). We also examine corporate governance issues related to firms' decision to acquire or be acquired, the M&A regulatory environment (e.g., anti-trust), and other factors that can potentially shape the structure of M&A transactions. In covering these and other related issues, we will discuss both the theory and practice of mergers and acquisitions. To provide some specific context we will analyze specific M&A deals (e.g., the mergers of HP/Compaq, UpJohn/Pharmacia, and AOL/Time Warner; Oracle's hostile takeover of PeopleSoft; and many more). In discussing these cases, we will examine the situation faced by the company, the issues surrounding the transaction, including the financial reporting implications, and focus on the managerial incentives and the judgment applied. We will also discuss some of the important strategies that underlay a successful negotiation. We will also review some of the related literatures in accounting, economic, and finance, to gain broader perspectives and insights into the financial issues associated with M&A transactions. Class time comprises mini lectures that introduce some of the more technical concepts, case discussions, and guest speakers who will offer additional perspectives on the subject matters. The course is co-taught by Ron Kasznik (GSB) and Safra Catz (Oracle Corporation). Ms. Catz is President of Oracle and a member of its Board of Directors. She has led Oracle through more than 50 acquisitions in recent years (including PeopleSoft, Siebel, BEA, and Sun Microsystems). Prior to joining Oracle in 1999, Ms. Catz was Managing Director at Donaldson, Lufkin & Jenrette, a global investment bank (now part of CSFB). Ms. Catz also serves on the board of directors for HSBC Holdings plc since 2008.

ACCT 340. Alphanomics: Informational Arbitrage in Equity Markets. 4 Units.

This is an advanced elective course on the economics of active investing in equity markets. The 2012-13 version of this class will be offered in two parts: A 4-credit class for the Fall quarter (ACCT340), and a 2-credit class for the Spring quarter (ACCT541). If you sign up for the Fall class, your spot on the Spring roster will be automatically reserved. However, you will still have the option at the end of the Fall quarter to opt out of the 2-credit Spring class. The Fall course (ACCT340) is designed as a "start-up kit for an equity hedge fund." In the Fall quarter, we will cover some of the foundational skills needed to build and manage a portfolio of public stocks. There is no final exam. However, there will be a number of individual cases and a final group project. 25% of the grade will be based on class participation, and 75% will be based on cases and projects. Towards the end of Fall, student who choose to continue onto the Spring course (ACCT541) will form teams (of 4 to 6 each) and submit a proposal for a hedge fund product. Once their proposal is approved, each team will be given a \$1 million paper portfolio. Students then manage this portfolio for the rest of the school year (their trades and portfolio statistics are automatically tracked). Students enrolled in the Spring (ACCT541) will reconvene in the second half of the quarter for a series of class lectures/talks as well as team presentations, summarizing their experience. The ACCT541 portion of the course will require each student group to make a class presentation, as well as turn in a written report. A separate grade will be assigned for ACCT541. 25% of this grade will be based on class participation, and 75% will be based on the presentations and reports. The overall goal of this course is to improve student skills in assessing the relative attractiveness of individual companies, as well as in managing portfolio risk according to pre-specified targets. This is a hands-on course with an emphasis on experiential learning. Students will make extensive use of analytical tools in the new "Real-time Analytics and Investment Lab" (High-speed R.A.I.L.) facility in the Bass Center. As part of this course, students will design stock screens, conduct back-tests, do detailed company analyses, execute (virtual) trades, and manage portfolio risk. Because it is an advanced elective, students taking this class are expected to be well versed in core economic, accounting, and finance skills. Material covered in a second Financial Modeling course, as well as in Accounting 312 (Evaluating Financial Statement Information) and Accounting 313 (Accounting-based Valuation) will come in handy. However, none of these courses are required.

ACCT 354. Analysis and Valuation for Event-Driven Investing. 3 Units.

This Bass seminar is designed to develop students' ability to interpret and use financial accounting information in credit and equity valuation contexts. The course will focus on valuing the securities of companies undergoing significant changes as a result of litigation, restructuring, regulatory changes, mergers, spin-offs or significant industry shifts. Throughout the course, students will (1) enrich their understanding of how alternative economic, legal, political and regulatory outcomes affect the value of various components of a company's capital structure and (2) develop their ability to apply financial statement analysis to assess the likelihood and valuation implications of the events of interest. Event-driven investing follows the life cycle of companies as they revamp their corporate structures in response to economic and regulatory environments. For example, in rising economic periods companies may undertake acquisitions or spin off divisions to enhance shareholder value. During adverse environments, bankruptcy and reorganizations often reshape the capital structure by offering opportunities to create value through the restructuring process. During economic transitions, debt and equity investors may make significantly different assessments of the quality of a company's earnings, its assets, and its likelihood to meet its debt obligations. To assess the probability of corporate events, investors must make judgments about the quality of a company's earnings and assets and understand how accounting policies may influence management's representations. Investors must also interpret how accounting policies function at various points in a firm's life cycle, influencing the quality of earnings for firms differently in different economic environments. In the first half of the course, we will develop the course framework, and apply it to illustrative cases. Companies featured in the cases include Tyco, AIG, CIT, Fannie Mae and Pharmasset and Gilead. Students will interpret information from companies' public financial disclosures to assess the likelihood of different events or outcomes. The course will also feature readings on current accounting standards, articles from the popular press, publicly available financial statement information, and guest speakers with in-depth knowledge of investing strategies vis a vis the case companies. The latter half of the course will be devoted to project work, with students working in teams to develop an event-driven investing strategy. The aim is to allow students to conduct independent research on a company, industry, economic context, or financial reporting environment of particular interest. Students will develop their investment idea, articulate their sense of the possible outcomes for the components of the firm's capital structure, and explain how they have assessed the likelihood and valuation consequences of those outcomes. At the conclusion of the course, students will present their strategies to the class and a panel of expert judges.

ACCT 518. Analysis and Valuation of Emerging Market Firms. 1 Unitss.

The course is designed to introduce students to the unique institutional, corporate governance and transparency issues facing managers and investors in emerging economies, and the impact these issues have on assessment of firm performance and value. The goal of the class is to gain an understanding of how country-level institutional forces interact with firm-level factors to shape firm value in these countries, how to interpret published financial reports in this environment to identify the source of firm-level value creation, and to use your assessment of the firm to identify the primitive sources of the firm's risks and opportunities. Topics covered will include an assessment of related party transactions, importance of political factors and social networks, governance conflicts, and the risk of expropriation. Students will be expected to: (1) make one presentation (most likely as a part of a two-to-three person group) that explores the valuation and value drivers of a specific emerging market firm and (2) attend all four classes. Grades will be on a pass/fail basis. Professor Piotroski teaches the "Accounting-based Valuation" and "Valuation in Emerging Economies" courses at the GSB.

ACCT 523. Board Governance. 2 Units.

This course is focused on helping students understand the role boards and board members play in corporate governance and the lives of businesses large and small. This case-driven course is designed to help students who plan to serve on boards as private-equity or venture investors, entrepreneurs who will need to assemble and manage boards, and executives who realize they will need to interact with and answer to boards. The course is designed to help students understand the issues boards face ? both routine and non-routine ? through the eyes of the board member. By understanding the roles and responsibilities of board members and the mechanisms through which they exercise these duties, students will come away with an understanding of how boards function effectively (and in too many cases fail to function effectively). The course will include examining boards in a variety of corporate contexts including: public and private, large and small, for-profit and not-for profit.

ACCT 541. Alphanomics II. 2 Units.

This is a 2-credit advanced elective in equity investing that will be offered in the Spring 2013 quarter. This course is open only to students that were enrolled in Alphanomics (ACCT340) in the Fall of 2012. If you complete ACCT340 in the Fall of 2012, your spot in this course will be automatically reserved. However, you still have a chance to opt out of this course at the end of the Fall 2012 quarter. The Fall (ACCT340) course is designed as a "start-up kit for an equity hedge fund". In the Fall quarter, we will cover some of the foundational skills needed to build and manage a portfolio of public stocks. Towards the end of Fall, student who choose to continue onto the Spring course (ACCT541) will form teams (of 4 to 6 each) and submit a proposal for a hedge fund product. Once their proposal is approved, each team will be given a \$1 million paper portfolio. Students then manage this portfolio for the rest of the school year (their trades and portfolio statistics are automatically tracked). Students enrolled in the Spring (ACCT541) will reconvene in the second half of the quarter for a series of class lectures/ talks as well as team presentations, summarizing their experience. The ACCT541 portion of the course will require each student group to make a class presentation, as well as turn in a written report. 25% of the grades will be based on class participation, and 75% will be based on the presentations and reports. The overall goal of this course is to improve student skills in assessing the relative attractiveness of individual companies, as well as in managing portfolio risk according to pre-specified targets. This is a hands-on course with an emphasis on experiential learning. Students will make extensive use of analytical tools in the new "Real-time Analytics and Investment Lab" (High-speed R.A.I.L.) facility in the Bass Center. As part of this course, students will be required to design stock screens, conduct back-tests, do detailed company analyses, execute (virtual) trades, and manage portfolio risk.

ACCT 609. Financial Reporting and Management Control. 4 Units.

This course is aimed at doctoral students in accounting and neighboring fields including economics, finance, political economics and operations management. The course seeks to provide an introduction to the role of accounting information in (i) measuring firm performance, (ii) projecting profitability and firm value for external constituents, (iii) and motivating and controlling the firm's management. The main topics covered in this course include: 1. Accrual Accounting and Profitability Measurement 2. Accounting-based Equity Valuation 3. Accounting Conservatism 4. Performance Evaluation and Managerial Incentives The primary objective of the course is to introduce students to current research paradigms on these topics and to identify promising avenues for future research. The course readings include recent theoretical and empirical papers.

ACCT 610. Seminar in Empirical Accounting Research. 3 Units.

Empirical Research on Financial Reporting: This doctoral-level course covers research on the role of accounting information in capital markets. The focus is on introducing students to key themes in empirical accounting and capital markets research, and to key research designs applied to examine information-related questions. Course topics include market efficiency, limits to arbitrage, the role of accounting in providing information to investors, anomalies, alternative sources of information, bankruptcy prediction, accounting measurement attributes, earnings management, earnings quality, and the role of accounting information in managers' investment decisions. The course is interdisciplinary in nature. The readings focus on research design, and key theories, themes and approaches from the accounting, finance, economics and psychology literature. Our overall goal is not only to review existing research, but also to identify new research opportunities.

ACCT 611. Applications of Information Economics in Management and Accounting. 4 Units.

This course develops tools from information economics to study the strategic interactions between agents inside a firm and between firm insiders and market participants. Common to these studies is that agents acquire private information that is valuable to other parties. The range of applications includes: the structure of managerial performance measures, buyer-supplier contracting arrangements, earnings management, voluntary and mandatory disclosure and financial analysts.

ACCT 612. Financial Reporting Seminar. 4 Units.

The purpose of this PhD seminar is to facilitate your conception and execution of substantive individual research in financial reporting. It provides a vehicle for supplementing and integrating your knowledge of basic research tools and methods, as well as an exposure to the dimensions of contemporary research in the field of financial reporting. The focus of the research we will discuss in this seminar is on global financial reporting. Such research encompasses studies dealing with contemporary financial reporting issues as well as research addressing issues relating to the globalization of financial reporting. Because these issues are also of concern to financial reporting standard setters, we will discuss whether and how the research we study informs standard setting debates. Prerequisite: Consent of the instructor.

ACCT 615. Selected Topics in Accounting Research. 3 Units.

This course examines selected topics in accounting research. The course features four faculty who will each give a focused look at a given area, introduce students to important questions in that area, key papers in the related literature, and critical aspects of the research designs applied in the area. The aim is to increase student's familiarity with current accounting research, to improve their ability to critically evaluate research and research designs, and to prepare students to conduct independent research.

ACCT 617. Managerial Incentives and Corporate Governance: Concepts and Empirical Methodology. 4 Units.

The course will consist of three set of topics. The first part of the class will examine a set of applied econometric topics that are useful in empirical accounting research. Each of these topics will be illustrated using contemporary examples from accounting, economics, and finance. The second part of the class will cover some of the basic theoretical work in moral hazard agency models and various extensions to this type of research. The final part of the course will discuss the empirical literature on corporate governance and executive compensation. The course will be taught in a seminar style and students will be required to develop a series of research projects on the topics covered in the class.

ACCT 691. PhD Directed Reading. 1-15 Units.

This course is offered for students requiring specialized training in an area not covered by existing courses. To register, a student must obtain permission from the faculty member who is willing to supervise the reading.

Same as: FINANCE 691, GSBGEN 691, HRMGT 691, MGTECON 691, MKTG 691, OB 691, OIT 691, POLECON 691, STRAMGT 691.

ACCT 692. PhD Dissertation Research. 1-15 Units.

This course is elected as soon as a student is ready to begin research for the dissertation, usually shortly after admission to candidacy. To register, a student must obtain permission from the faculty member who is willing to supervise the research.

Same as: FINANCE 692, GSBGEN 692, HRMGT 692, MGTECON 692, MKTG 692, OB 692, OIT 692, POLECON 692, STRAMGT 692.

ACCT 802. TGR Dissertation. 0 Unit.

Same as: FINANCE 802, GSBGEN 802, HRMGT 802, MGTECON 802, MKTG 802, OB 802, OIT 802, POLECON 802, STRAMGT 802.

Aeronautics Astronautics Courses

AA 100. Introduction to Aeronautics and Astronautics. 3 Units.

The principles of fluid flow, flight, and propulsion; the creation of lift and drag, aerodynamic performance including takeoff, climb, range, and landing performance, structural concepts, propulsion systems, trajectories, and orbits. The history of aeronautics and astronautics. Prerequisites: MATH 41, 42; elementary physics.

AA 115N. The Global Positioning System: Where on Earth are We, and What Time is It?. 3 Units.

Preference to freshmen. Why people want to know where they are: answers include cross-Pacific trips of Polynesians, missile guidance, and distraught callers. How people determine where they are: navigation technology from dead-reckoning, sextants, and satellite navigation (GPS). Hands-on experience. How GPS works; when it does not work; possibilities for improving performance.

AA 116N. Electric Automobiles and Aircraft. 3 Units.

Transportation accounts for nearly one-third of American energy use and greenhouse gas emissions and three-quarters of American oil consumption. It has crucial impacts on climate change, air pollution, resource depletion, and national security. Students wishing to address these issues will need to reconsider how we move, finding sustainable transportation solutions. This course will provide an introduction to the issue, covering the past and present of transportation and its impacts; examining alternative fuel proposals; and digging deeper into the most promising option: battery electric vehicles. Energy requirements of air, ground, and maritime transportation; design of electric motors, power control systems, drive trains, and batteries; and technologies for generating renewable energy. Two fun opportunities for hands-on experiences with electric cars. Prerequisites: Introduction to calculus and Physics AP or elementary mechanics.

AA 190. Directed Research and Writing in Aero/Astro. 3-5 Units.

For undergraduates. Experimental or theoretical work under faculty direction, and emphasizing development of research and communication skills. Written report(s) and letter grade required; if this is not appropriate, enroll in 199. Consult faculty in area of interest for appropriate topics, involving one of the graduate research groups or other special projects. May be repeated for credit. Prerequisite: consent of student services manager and instructor.

AA 199. Independent Study in Aero/Astro. 1-5 Units.

Directed reading, lab, or theoretical work for undergraduate students. Consult faculty in area of interest for appropriate topics involving one of the graduate research groups or other special projects. May be repeated for credit. Prerequisite: consent of instructor.

AA 200. Applied Aerodynamics. 3 Units.

Analytical and numerical techniques for the aerodynamic analysis of aircraft, focusing on airfoil theory, finite wing theory, far-field and Trefftz-plane analysis, two-dimensional laminar and turbulent boundary layers in airfoil analysis, laminar-to-turbulent transition, compressibility effects, and similarity rules. Biweekly assignments require MATLAB or a suitable programming language. Prerequisite: undergraduate courses in basic fluid mechanics and applied aerodynamics, AA 210A.

AA 201B. Topics in Aeroacoustics. 3 Units.

Acoustic equations for moving medium, simple sources, Kirchhoff formula, and multipole representation; radiation from moving sources; acoustic analogy approach to sound generation in compact flows; theories of Lighthill, Powell, and Mohring; acoustic radiation from moving surfaces; theories of Curl, Ffowcs Williams, and Hawkings; application of acoustic theories to the noise from propulsive jets, and airframe and rotor noise; computational methods for acoustics. Prerequisite: 201A or consent of instructor.

AA 202. Hypersonic Flow. 3 Units.

The fundamental principals and equations governing hypersonic flight and high temperature gas dynamics, including chemical and thermal equilibrium and non-equilibrium; statistical thermodynamics; kinetic theory; transport phenomena; radiation; surface heating; and scramjet engines. Prerequisite: understanding of aerodynamics. Recommended: AA 200A.

AA 203. Introduction to Optimal Control Theory. 3 Units.

Basic solution techniques for optimal control problems. Dynamic programming, calculus of variations, and numerical techniques for trajectory optimization. Special cases (chiefly LQR and robotic motion planning); modern solution approaches (such as MPC and MILP); and introduction to stochastic optimal control. Examples in MATLAB. Prerequisites: Linear algebra (EE 263 or equivalent).

AA 206. Bio-Aerodynamics. 3 Units.

Topics: flapping flight, low Reynolds number aerodynamics, wing design, flocks, swarms, and dynamic soaring. Readings from current and historical literature dealing with theoretical and observational studies. Applications in aircraft design, and simulation-based problem sets. Prerequisite: course in aerodynamics such as 100, 200A, or 241A.

AA 208. Aerodynamics of Aircraft Dynamic Response and Stability. 3 Units.

Companion to 200A for those interested in control and guidance. Typical vehicles and the technical tradeoffs affecting their design. Equations of motion, stressing applications to dynamic performance, stability, and forced response. Forms and sources for the required aerodynamic data. Response to small disturbances and stability derivatives. Static stability and trim. Review of aerodynamic fundamentals, leading to airload predictions for wings, bodies, and complete aircraft. Paneling and other methods for derivative estimation. Natural motions of the aircraft, and the influence on them of various configuration parameters. Vehicle behavior in maneuvers of small and large amplitudes. Prerequisites: 200A, 210A, or equivalents (may be taken concurrently).

AA 210A. Fundamentals of Compressible Flow. 3 Units.

Topics: development of the three-dimensional, non-steady, field equations for describing the motion of a viscous, compressible fluid; differential and integral forms of the equations; constitutive equations for a compressible fluid; the entropy equation; compressible boundary layers; area-averaged equations for one-dimensional steady flow; shock waves; channel flow with heat addition and friction; flow in nozzles and inlets; oblique shock waves; Prandtl-Meyer expansion; unsteady one-dimensional flow; the shock tube; small disturbance theory; acoustics in one-dimension; steady flow in two-dimensions; potential flow; linearized potential flow; lift and drag of thin airfoils. Prerequisites: undergraduate background in fluid mechanics and thermodynamics.

AA 210B. Fundamentals of Compressible Flow. 3 Units.

Continuation of 210A with emphasis on more general flow geometry. Use of exact solutions to explore the hypersonic limit. Identification of similarity parameters. Solution methods for the linearized potential equation with applications to wings and bodies in steady flow; their relation to physical acoustics and wave motion in nonsteady flow. Nonlinear solutions for nonsteady constant area flow and introduction to Riemann invariants. Elements of the theory of characteristics; nozzle design; extension to nonisentropic flow. Real gas effects in compressible flow. Flows in various gas dynamic testing facilities. Prerequisite: 210A.

AA 212. Analysis and Design of Multivariable Feedback Systems. 3 Units.

Analysis and design techniques for multivariable feedback systems. Review of basic properties of multi-input, multi-output linear time-invariant systems. Study of the stability and robustness of feedback loops. Approaches for optimal and robust feedback control design, chiefly H_2 and H_∞ synthesis. Prerequisites: Linear algebra (EE 263 or CME 200).

AA 214A. Introduction to Numerical Methods for Engineering. 3 Units.

Numerical methods from a user's point of view. Lagrange interpolation, splines. Integration: trapezoid, Romberg, Gauss, adaptive quadrature; numerical solution of ordinary differential equations: explicit and implicit methods, multistep methods, Runge-Kutta and predictor-corrector methods, boundary value problems, eigenvalue problems; systems of differential equations, stiffness. Emphasis is on analysis of numerical methods for accuracy, stability, and convergence. Introduction to numerical solutions of partial differential equations; Von Neumann stability analysis; alternating direction implicit methods and nonlinear equations. Prerequisites: CME 200/ME 300A, CME 204/ME 300B. Same as: CME 206, ME 300C.

AA 214B. Numerical Methods for Compressible Flows. 3 Units.

For M.S.-level graduate students. Covers the hierarchy of mathematical models for compressible flows. Introduction to finite difference, finite volume, and finite element methods for their computation. Ideal potential flow; transonic potential flow; Euler equations; Navier-Stokes equations; representative model problems; shocks, expansions, and contact discontinuities; treatment of boundary conditions; time and pseudo-time integration schemes. Prerequisites: basic knowledge of linear algebra and ODEs (CME 206 or equivalent).

AA 214C. Numerical Computation of Viscous Flow. 3 Units.

Numerical methods for solving parabolic sets of partial differential equations. Numerical approximation of the equations describing compressible viscous flow with adiabatic, isothermal, slip, and no-slip wall boundary conditions. Applications to the Navier-Stokes equations in two and three dimensions at high Reynolds number. Computational problems are assigned. Prerequisite: 214B.

AA 215A. Advanced Computational Fluid Dynamics. 3 Units.

High resolution schemes for capturing shock waves and contact discontinuities; upwinding and artificial diffusion; LED and TVD concepts; alternative flow splittings; numerical shock structure. Discretization of Euler and Navier Stokes equations on unstructured meshes; the relationship between finite volume and finite element methods. Time discretization; explicit and implicit schemes; acceleration of steady state calculations; residual averaging; math grid preconditioning. Automatic design; inverse problems and aerodynamic shape optimization via adjoint methods. Pre- or corequisite: 214B or equivalent. Same as: CME 215A.

AA 215B. Advanced Computational Fluid Dynamics. 3 Units.

High resolution schemes for capturing shock waves and contact discontinuities; upwinding and artificial diffusion; LED and TVD concepts; alternative flow splittings; numerical shock structure. Discretization of Euler and Navier Stokes equations on unstructured meshes; the relationship between finite volume and finite element methods. Time discretization; explicit and implicit schemes; acceleration of steady state calculations; residual averaging; math grid preconditioning. Automatic design; inverse problems and aerodynamic shape optimization via adjoint methods. Pre- or corequisite: 214B or equivalent. Same as: CME 215B.

AA 218. Introduction to Symmetry Analysis. 3 Units.

Methods of symmetry analysis and their use in the reduction and simplification of physical problems. Topics: dimensional analysis, phase-space analysis of autonomous systems of ordinary differential equations, use of Lie groups to reduce the order of nonlinear ODEs and to generate integrating factors, use of Lie groups to reduce the dimension of partial differential equations and to generate similarity variables, exact solutions of nonlinear PDEs generated from groups. Mathematica-based software developed by the instructor is used for finding invariant groups of ODEs and PDEs.

AA 222. Introduction to Multidisciplinary Design Optimization. 3 Units.

Design of aerospace systems within a formal optimization environment. Mathematical formulation of the multidisciplinary design problem (parameterization of design space, choice of objective functions, constraint definition); survey of algorithms for unconstrained and constrained optimization and optimality conditions; description of sensitivity analysis techniques. Hierarchical techniques for decomposition of the multidisciplinary design problem; use of approximation theory. Applications to design problems in aircraft and launch vehicle design. Prerequisites: multivariable calculus; familiarity with a high-level programming language: FORTRAN, C, C++, or MATLAB.

AA 236A. Spacecraft Design. 3-5 Units.

The design of unmanned spacecraft and spacecraft subsystems emphasizing identification of design drivers and current design methods. Topics: spacecraft configuration design, mechanical design, structure and thermal subsystem design, attitude control, electric power, command and telemetry, and design integration and operations.

AA 236B. Spacecraft Design Laboratory. 3 Units.

Continuation of 236A. Emphasis is on practical application of systems engineering to the life cycle program of spacecraft design, testing, launching, and operations. Prerequisite: 236A or consent of instructor.

AA 236C. Spacecraft Design Laboratory. 3 Units.**AA 240A. Analysis of Structures. 3 Units.**

Elements of two-dimensional elasticity theory. Boundary value problems; energy methods; analyses of solid and thin walled section beams, trusses, frames, rings, monocoque and semimonocoque structures. Prerequisite: ENGR 14 or equivalent.

AA 240B. Analysis of Structures. 3 Units.

Thin plate analysis. Structural stability. Material behavior: plasticity and fracture. Introduction of finite element analysis; truss, frame, and plate structures. Prerequisite: 240A or consent of instructor.

AA 241A. Introduction to Aircraft Design, Synthesis, and Analysis. 3 Units.

New aircraft systems emphasizing commercial aircraft. Economic and technological factors that create new aircraft markets. Determining market demands and system mission performance requirements; optimizing configuration to comply with requirements; the interaction of disciplines including aerodynamics, structures, propulsion, guidance, payload, ground support, and parametric studies. Applied aerodynamic and design concepts for use in configuration analysis. Application to a student-selected aeronautical system; applied structural fundamentals emphasizing fatigue and fail-safe considerations; design load determination; weight estimation; propulsion system performance; engine types; environmental problems; performance estimation. Direct/indirect operating costs prediction and interpretation. Aircraft functional systems; avionics; aircraft reliability and maintainability. Prerequisite: 100 or equivalent.

AA 241B. Introduction to Aircraft Design, Synthesis, and Analysis. 3 Units.

New aircraft systems emphasizing commercial aircraft. Economic and technological factors that create new aircraft markets. Determining market demands and system mission performance requirements; optimizing configuration to comply with requirements; the interaction of disciplines including aerodynamics, structures, propulsion, guidance, payload, ground support, and parametric studies. Applied aerodynamic and design concepts for use in configuration analysis. Application to a student-selected aeronautical system; applied structural fundamentals emphasizing fatigue and fail-safe considerations; design load determination; weight estimation; propulsion system performance; engine types; environmental problems; performance estimation. Direct/indirect operating costs prediction and interpretation. Aircraft functional systems; avionics; aircraft reliability and maintainability. Prerequisite: 100 or equivalent.

AA 241X. Design, Construction, and Testing of Autonomous Aircraft. 3 Units.

Students grouped according to their expertise to carry out the multidisciplinary design of a solar-powered autonomous aircraft that must meet a clearly stated set of design requirements. Design and construction of the airframe, integration with existing guidance, navigation, and control systems, and development and operation of the resulting design. Design reviews and reports. Prerequisites: expertise in any of the following disciplines by having satisfied the specified courses or equivalent work elsewhere: conceptual design (241A,B); applied aerodynamics (200A,B); structures (240A); composite manufacturing experience; guidance and control (208/271, ENGR 205).

AA 242A. Classical Dynamics. 3 Units.

Accelerating and rotating reference frames. Kinematics of rigid body motion; Euler angles, direction cosines. D'Alembert's principle, equations of motion. Inertia properties of rigid bodies. Dynamics of coupled rigid bodies. Lagrange's equations and their use. Dynamic behavior, stability, and small departures from equilibrium. Prerequisite: ENGR 15 or equivalent.

AA 242B. Mechanical Vibrations. 3 Units.

For M.S.-level graduate students. Covers the vibrations of discrete systems and continuous structures. Introduction to the computational dynamics of linear engineering systems. Review of analytical dynamics of discrete systems; undamped and damped vibrations of N-degree-of-freedom systems; continuous systems; approximation of continuous systems by displacement methods; solution methods for the Eigenvalue problem; direct time-integration methods. Prerequisites: AA 242A or equivalent (recommended but not required); basic knowledge of linear algebra and ODEs; no prior knowledge of structural dynamics is assumed.

AA 244A. Introduction to Plasma Physics and Engineering. 3 Units.

Physics and engineering of plasmas, including space and laboratory plasmas. Debye length and distribution functions. Single-particle motion and drifts. Plasmas as fluids and fluid drifts. Waves in plasmas, including electrostatic and electromagnetic. Diffusion and resistivity. Magnetohydrodynamics.

AA 244B. Advanced Plasma Physics and Engineering. 3 Units.

Equilibrium and instability. Turbulent flow in plasmas. Kinetic theory and the Vlasov equation. Nonlinear effects and solutions. Radiation in a plasma. Plasma diagnostics in ground- and space-based experiments.

AA 252. Techniques of Failure Analysis. 3 Units.

Introduction to the field of failure analysis, including fire and explosion analysis, large scale catastrophe projects, traffic accident reconstruction, aircraft accident investigation, human factors, biomechanics and accidents, design defect cases, materials failures and metallurgical procedures, and structural failures. Product liability, failure modes and effects analysis, failure prevention, engineering ethics, and the engineer as expert witness.

AA 254. Information Systems in Aerospace Vehicles. 2 Units.

Sensors, processors, activators, and operators, and the media and protocols that integrate them for performance and safety.

AA 256. Mechanics of Composites. 3 Units.

Fiber reinforced composites. Stress, strain, and strength of composite laminates and honeycomb structures. Failure modes and failure criteria. Environmental effects. Manufacturing processes. Design of composite structures. Individual design project required of each student, resulting in a usable computer software. Prerequisite: ENGR 14 or equivalent.

AA 257. Design of Composite Structures. 3 Units.

Hands-on design, analysis, and manufacturing in composites. Composite beams, columns, and plates; application of finite element methods to composite structures; failure analysis and damage tolerance design of composite structures; and impact damage, compression after impact, and bolted and bonded composites joints. Class divided into working teams (design, analysis, manufacturing, and tests) to design and build a composite structure to be tested to failure; the structure may enter the national SAMPE composite bridge design contest. Prerequisite: 256 or consent of instructor.

AA 260. Sustainable Aviation. 3 Units.

Quantitative assessment of the impact of aviation on the environment including noise, local, and global emissions, and models used to predict it. Current and future technologies that may allow the air transportation system to meet anticipated growth while reducing or minimizing environmental problems. Atmospheric effects of NO_x, CO₂, particulates, unburned hydrocarbons, and water vapor deposition at high altitudes and metrics for assessing global climate effects. Noise sources, measurement, and mitigation strategies. Fundamentals of aircraft and engine performance needed to assess current and future concepts. Major national and international policy implications of existing and future technology choices. Recommended: AA 241B.

AA 271A. Dynamics and Control of Spacecraft and Aircraft. 3 Units.

The dynamic behavior of aircraft and spacecraft, and the design of automatic control systems for them. For aircraft: non-linear and linearized longitudinal and lateral dynamics; linearized aerodynamics; natural modes of motion; autopilot design to enhance stability, control the flight path, and perform automatic landings. For spacecraft in orbit: natural longitudinal and lateral dynamic behavior and the design of attitude control systems. Prerequisites: AA242A, ENGR 105.

AA 272C. Global Positioning Systems. 3 Units.

The principles of satellite navigation using GPS. Positioning techniques using code tracking, single and dual frequency, carrier aiding, and use of differential GPS for improved accuracy and integrity. Use of differential carrier techniques for attitude determination and precision position determination. Prerequisite: familiarity with matrix algebra and MatLab (or another mathematical programming language).

AA 279. Space Mechanics. 3 Units.

Orbits of near-earth satellites and interplanetary probes; transfer and rendezvous; decay of satellite orbits; influence of earth's oblateness; sun and moon effects on earth satellites. Prerequisite: ENGR 15 or equivalent, and familiarity with MatLab (or another mathematical programming language).

AA 280. Smart Structures. 3 Units.

Mechanics of smart materials and current approaches for engineering smart structures to monitor health, self heal, and adapt to environment. Definition of smart structures; constitutive models for smart materials; piezoelectric ceramics; electro-active polymers; shape memory alloys; bio-inspired materials and structures; self-healing materials; sensors and sensor networks; structural health monitoring; and energy harvesting. Prerequisite: AA 240A or consent of instructor.

AA 283. Aircraft and Rocket Propulsion. 3 Units.

Introduction to the design and performance of airbreathing and rocket engines. Topics: the physical parameters used to characterize propulsion system performance; gas dynamics of nozzles and inlets; cycle analysis of ramjets, turbojets, turbofans, and turboprops; component matching and the compressor map; introduction to liquid and solid propellant rockets; multistage rockets; hybrid rockets; thermodynamics of reacting gases. Prerequisites: undergraduate background in fluid mechanics and thermodynamics.

AA 284A. Advanced Rocket Propulsion. 3 Units.

The principles of rocket propulsion system design and analysis. Fundamental aspects of the physics and chemistry of rocket propulsion. Focus is on the design and analysis of chemical propulsion systems including liquids, solids, and hybrids. Nonchemical propulsion concepts such as electric and nuclear rockets. Launch vehicle design and optimization issues including trajectory calculations. Limited enrollment. Prerequisites: 283 or consent of instructor.

AA 284B. Propulsion System Design Laboratory. 3 Units.

Propulsion systems engineering through the design and operation of a sounding rocket. Students work in small teams through a full project cycle including requirements definition, performance analysis, system design, fabrication, ground and flight testing, and evaluation. Prerequisite: 284A and consent of instructor.

AA 284C. Propulsion System Design Laboratory. 3 Units.

Continuation of 284A,B. Prerequisite: 284B, and consent of instructor.

AA 290. Problems in Aero/Astro. 1-5 Units.

(Undergraduates register for 190 or 199.) Experimental or theoretical investigation. Students may work in any field of special interest. Register for section belonging to your research supervisor. May be repeated for credit.

AA 291. Practical Training. 1-3 Units.

Educational opportunities in high-technology research and development labs in aerospace and related industries. Internship integrated into a student's academic program. Research report outlining work activity, problems investigated, key results, and any follow-on projects. Meets the requirements for Curricular Practical Training for students on F-1 visas. Student is responsible for arranging own employment and should see department student services manager before enrolling. May be repeated for credit.

AA 294. Case Studies in Aircraft Design. 1 Unitss.

Presentations by researchers and industry professionals. Registration for credit optional. May be repeated for credit.

AA 295. Aerospace Structures and Materials. 1 Unitss.

Presentations by researchers and industry professionals in aerospace structures and materials. May be repeated for credit.

AA 297. Seminar in Guidance, Navigation, and Control. 1 Unitss.

For graduate students with an interest in automatic control applications in flight mechanics, guidance, navigation, and mechanical design of control systems; others invited. Problems in all branches of vehicle control, guidance, and instrumentation presented by researchers on and off campus. Registration for credit optional. May be repeated for credit.

AA 300. Engineer Thesis. 1-15 Units.

Thesis for degree of Engineer. Students register for section belonging to their thesis adviser.

AA 301. Ph.D. Dissertation. 1-15 Units.

Prerequisite: completion of Ph.D qualifying exams. Students register for section belonging to their thesis adviser. (Staff).

AA 801. TGR Engineer Thesis. 0 Unit.

Engineer's thesis or non-doctoral work for a TGR student.

AA 802. TGR Ph.D. Dissertation. 0 Unit.

Doctoral dissertation for a TGR student in PhD program.

African American Studies Courses

AFRICAAM 16N. African Americans and Social Movements. 3 Units.

Theory and research on African Americans' roles in post-Civil Rights, US social movements. Topics include women's right, LGBT rights, environmental movement, and contemporary political conservatism. Same as: CSRE 16N, SOC 16N.

AFRICAAM 30. The Egyptians. 3-5 Units.

Overview of ancient Egyptian pasts, from predynastic times to Greco-Roman rule, roughly 3000 BCE to 30 BCE. Attention to archaeological sites and artifacts; workings of society; and cultural productions, both artistic and literary. Same as: CLASSHIS 105.

AFRICAAM 40SI. We Are Never Radical Enough. The Personal Philosophy and Politics of Radical Thought. 1-2 Units.

This course seeks to present students with a more accessible view of radical thinkers and activists throughout history. This course will examine the politics, philosophy and personal lives of eight scholars, activists and leaders, the course will challenge students to question what radicalism means, where it is rooted and how history and memory create the saints and sinners of the past.

AFRICAAM 43. Introduction to African American Literature. 3-5 Units.

(English majors and others taking 5 units, register for 143.) African American literature from its earliest manifestations in the spirituals, trickster tales, and slave narratives to recent developments such as black feminist theory, postmodern fiction, and hip hop lyricism. We will engage some of the defining debates and phenomena within African American cultural history, including the status of realist aesthetics in black writing; the contested role of literature in black political struggle; the question of diaspora; the problem of intra-racial racism; and the emergence of black internationalism. Attuned to the invariably hybrid nature of this tradition, we will also devote attention to the discourse of the Enlightenment, modernist aesthetics, and the role of Marxism in black political and literary history.

Same as: AMSTUD 143, ENGLISH 43, ENGLISH 143.

AFRICAAM 45. Dance Improvisation Techniques and Strategies Lab: From Hip Hop to Contact. 1 Unitss.

By learning various dance improvisation forms across cultures, students will develop techniques to gain a deep understanding of generating movement from the inside-out, harnessing that potential for creating dances. Guest dancer/choreographer workshops and Dance Jams enhance the learning experience.

Same as: DANCE 45.

AFRICAAM 47. History of South Africa. 3 Units.

(Same as HISTORY 147. History majors and others taking 5 units, register for 147.) Introduction, focusing particularly on the modern era. Topics include: precolonial African societies; European colonization; the impact of the mineral revolution; the evolution of African and Afrikaner nationalism; the rise and fall of the apartheid state; the politics of post-apartheid transformation; and the AIDS crisis.

Same as: HISTORY 47.

AFRICAAM 48Q. South Africa: Contested Transitions. 3 Units.

Preference to sophomores. The inauguration of Nelson Mandela as president in May 1994 marked the end of an era and a way of life for S. Africa. The changes have been dramatic, yet the legacies of racism and inequality persist. Focus: overlapping and sharply contested transitions. Who advocates and opposes change? Why? What are their historical and social roots and strategies? How do people reconstruct their society? Historical and current sources, including films, novels, and the Internet.

Same as: HISTORY 48Q.

AFRICAAM 50B. 19th Century America. 3 Units.

(Same as HISTORY 150B. History majors and others taking 5 units, register in 150B.) Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture.

Same as: HISTORY 50B.

AFRICAAM 54N. African American Women's Lives. 3-4 Units.

Preference to freshmen. The everyday lives of African American women in 19th- and 20th-century America in comparative context of histories of European, Hispanic, Asian, and Native American women. Primary sources including personal journals, memoirs, music, literature, and film, and historical texts. Topics include slavery and emancipation, labor and leisure, consumer culture, social activism, changing gender roles, and the politics of sexuality.

Same as: HISTORY 54N.

AFRICAAM 64C. From Freedom to Freedom Now!: African American History, 1865-1965. 3 Units.

(Same as HISTORY 164C. History majors and others taking 5 units, register for 164C.) Explores the working lives, social worlds, political ideologies and cultural expressions of African Americans from emancipation to the early civil rights era. Topics include: the transition from slavery to freedom, family life, work, culture, leisure patterns, resistance, migration and social activism. Draws largely on primary sources including autobiographies, memoirs, letters, personal journals, newspaper articles, pamphlets, speeches, literature, film and music.

Same as: HISTORY 64C.

AFRICAAM 75E. Black Cinema. 2 Units.

How filmmakers represent historical and cultural issues in Black cinema.

AFRICAAM 103. Dance, Text, Gesture: Performance and Composition. 1 Unitss.

Students practice, compose and combine the languages of dance, gestural movement, music and text, to render complete expression in performance. Suitable for dancers, actors, spoken word artists and triple threat performers to devise original performance, dance and theater, culminating in an end of quarter showing.

Same as: DANCE 103.

AFRICAAM 105. Introduction to African and African American Studies. 5 Units.

Interdisciplinary. Central themes in African American culture and history related to race as a definitive American phenomenon. African survivals and interpretations of slavery in the New World, contrasting interpretations of the Black family, African American literature, and art. Possible readings: Frederick Douglass, Harriet Jacobs, Booker T. Washington, W.E.B. DuBois, Richard Wright, Maya Angelou, James Baldwin, Malcolm X, Alice Walker, and bell hooks. Focus may vary each year. This course is a WIM course.

AFRICAAM 106. Race, Ethnicity, and Linguistic Diversity in Classrooms: Sociocultural Theory and Practices. 3-5 Units.

Focus is on classrooms with students from diverse racial, ethnic and linguistic backgrounds. Studies, writing, and media representation of urban and diverse school settings; implications for transforming teaching and learning. Issues related to developing teachers with attitudes, dispositions, and skills necessary to teach diverse students.

Same as: CSRE 103B, EDUC 103B, EDUC 337.

AFRICAAM 107C. The Black Mediterranean: Greece, Rome and Antiquity. 4-5 Units.

Explore problems of race and ethnicity as viable criteria in studying ancient societies and consider the question, What is the Mediterranean?, in relation to premodern evidence. Investigate the role of blackness as a marker of ethnicity; the demography of slavery and its roles in forming social identities; and environmental determinism as a factor in ethnic and racial thinking. Consider Greek and Roman perspectives and behavior, and their impact on later theories of race and ethnicity as well as the Mediterranean as a whole.

Same as: CLASSGEN 107, CSRE 107.

AFRICAAM 112. Urban Education. 3-4 Units.

(Graduate students register for EDUC 212X or SOC 229X). Combination of social science and historical perspectives trace the major developments, contexts, tensions, challenges, and policy issues of urban education.

Same as: EDUC 112X, EDUC 212X, SOC 129X, SOC 229X.

AFRICAAM 121X. Hip Hop, Youth Identities, and the Politics of Language. 3-4 Units.

Focus is on issues of language, identity, and globalization, with a focus on Hip Hop cultures and the verbal virtuosity within the Hip Hop nation. Beginning with the U.S., a broad, comparative perspective in exploring youth identities and the politics of language in what is now a global Hip Hop movement. Readings draw from the interdisciplinary literature on Hip Hop cultures with a focus on sociolinguistics and youth culture.

Same as: AMSTUD 121X, ANTHRO 121A, CSRE 121X, EDUC 121X, LINGUIST 155.

AFRICAAM 123. Great Works of the African American Tradition. 5 Units.

Foundational African and African American scholarly figures and their work from the 19th century to the present. Historical, political, and scholarly context. Dialogues distinctive to African American culture. May be repeated for credit.

AFRICAAM 127A. Can't Stop Won't Stop: A History Of The Hip-Hop Arts. 4 Units.

This course explores the history and development of the hip-hop arts movement, from its precursor movements in music, dance, visual arts, literature, and folk and street cultures to its rise as a neighborhood subculture in the Bronx in the early 1970s through its local, regional and global expansion and development. Hip-hop aesthetics, structures, and politics will be explored within the context of the movement's rise as a post-multicultural form in an era of neoliberal globalization.

Same as: CSRE 127A.

AFRICAAM 130. Discourse of Liberation and Equity in Communities and Classrooms. 3-5 Units.

Issues and strategies for studying oral and written discourse as a means for understanding classrooms, students, and teachers, and teaching and learning in educational contexts. The forms and functions of oral and written language in the classroom, emphasizing teacher-student and peer interaction, and student-produced texts. Individual projects utilize discourse analytic techniques. Prerequisite: graduate status or consent of instructor. Same as: EDUC 322.

AFRICAAM 145A. Poetics and Politics of Caribbean Women's Literature. 5 Units.

Mid 20th-century to the present. How historical, economic, and political conditions in Haiti, Cuba, Jamaica, Antigua, and Guadeloupe affected women. How Francophone, Anglophone, and Hispanophone women novelists, poets, and short story writers respond to similar issues and pose related questions. Caribbean literary identity within a multicultural and diasporic context; the place of the oral in the written feminine text; family and sexuality; translation of European master texts; history, memory, and myth; and responses to slave history, colonialism, neocolonialism, and globalization.

Same as: CSRE 145A.

AFRICAAM 147. History of South Africa. 5 Units.

(Same as HISTORY 47. History majors and others taking 5 units, register for 147.) Introduction, focusing particularly on the modern era. Topics include: precolonial African societies; European colonization; the impact of the mineral revolution; the evolution of African and Afrikaner nationalism; the rise and fall of the apartheid state; the politics of post-apartheid transformation; and the AIDS crisis.

Same as: HISTORY 147.

AFRICAAM 150B. 19th-Century America. 5 Units.

(Same as HISTORY 50B. History majors and others taking 5 units, register for 150B.) Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture.

Same as: AMSTUD 150B, HISTORY 150B.

AFRICAAM 152G. Global Harlem Renaissance. 5 Units.

Examination of the explosion of African American artistic expression during 1920s and 30s New York known as the Harlem Renaissance. Amiri Baraka once referred to the Renaissance as a kind of vicious Modernism, as a Clash that impacted and was impacted by political, cultural and aesthetic changes not only in the U.S. but Europe, the Caribbean and Latin America. Focus on the literature, graphic arts, and the music of the era in this global context.

Same as: AMSTUD 152G, ENGLISH 152G.

AFRICAAM 166. Introduction to African American History: The Modern African American Freedom Struggle. 3-5 Units.

This course is an introduction to African-American Political movements of the period after 1930, with special emphasis on mass protest and civil rights activism as well as leaders such as W. E. B. Du Bois, Thurgood Marshall, Martin Luther King, Jr., Malcolm X, Jesse Jackson, and Barack Obama.

The lectures will utilize audio-visual materials extensively, and the exams will cover these materials as well as the traditional lectures. In addition to attending lectures, students are encouraged to undertake research projects. Same as: AMSTUD 166, HISTORY 166.

AFRICAAM 190. Directed Reading. 1-5 Units.

May be repeated for credit. Prerequisite: consent of instructor.

AFRICAAM 195. Independent Study. 5 Units.**AFRICAAM 199. Honors Project. 1-5 Units.**

May be repeated for credit. Prerequisite: consent of instructor.

AFRICAAM 200X. Honors Thesis and Senior Thesis Seminar. 5 Units.

Required for seniors. Weekly colloquia with AAAS Director and Associate Director to assist with refinement of research topic, advisor support, literature review, research, and thesis writing. Readings include foundational and cutting-edge scholarship in the interdisciplinary fields of African and African American studies and comparative race studies. Readings assist students situate their individual research interests and project within the larger. Students may also enroll in AFRICAAM 200Y in Winter and AFRICAAM 200Z in Spring for additional research units (up to 10 units total).

AFRICAAM 200Y. Honors Thesis and Senior Thesis Research. 3-5 Units.

Winter. Required for students writing an Honors Thesis. Optional for Students writing a Senior Thesis.

AFRICAAM 200Z. Honors Thesis and Senior Thesis Research. 3-5 Units.

Spring. Required for students writing an Honors Thesis. Optional for Students writing a Senior Thesis.

AFRICAAM 204F. The Modern Tradition of Non-Violent Resistance. 5 Units.

During the twentieth century, peasants and menial laborers who comprised the majority of humanity launched liberation movements to secure citizenship rights. Mohandas K. Gandhi, Martin Luther King, Jr., and Nelson Mandela are among the leaders whose ideas continue to influence contemporary movements for global peace with social justice in a sustainable environment.

Same as: CSRE 104F, HISTORY 204F.

AFRICAAM 233A. Counseling Theories and Interventions from a Multicultural Perspective. 3-5 Units.

In an era of globalization characterized by widespread migration and cultural contacts, professionals face a unique challenge: How does one practice successfully when working with clients/students from so many different backgrounds? This course focuses upon the need to examine, conceptualize, and work with individuals according to the multiple ways in which they identify themselves. It will systematically examine multicultural counseling concepts, issues, and research. Literature on counselor and client characteristics such as social status or race/ethnicity and their effects on the counseling process and outcome will be reviewed. Issues in consultation with culturally and linguistically diverse parents and students and work with migrant children and their families are but a few of the topics covered in this course.

Same as: CSRE 233A, EDUC 233A.

AFRICAAM 245. Understanding Racial and Ethnic Identity Development. 3-5 Units.

African American, Native American, Mexican American, and Asian American racial and ethnic identity development; the influence of social, political and psychological forces in shaping the experience of people of color in the U.S. The importance of race in relationship to social identity variables including gender, class, and occupational, generational, and regional identifications. Bi- and multiracial identity status, and types of white racial consciousness.

Same as: CSRE 245, EDUC 245.

AFRICAAM 255. Racial Identity in the American Imagination. 4-5 Units.

Major historical transformations shaping the understanding of racial identity and how it has been experienced, represented, and contested in American history. Topics include: racial passing and racial performance; migration, immigration, and racial identity in the urban context; the interplay between racial identity and American identity; the problems of class, gender, and sexuality in the construction of racial identity. Sources include historical and legal texts, memoirs, photography, literature, film, and music.

Same as: AMSTUD 255D, CSRE 255D, HISTORY 255D, HISTORY 355D.

AFRICAAM 261E. Mixed Race Literature in the U.S. and South Africa. 5 Units.

As scholar Werner Sollors recently suggested, novels, poems, stories about interracial contacts and mixed race constitute an orphan literature belonging to no clear ethnic or national tradition. Yet the theme of mixed race is at the center of many national self-definitions, even in our U.S. post-Civil Rights and South Africa's post-Apartheid era. This course examines aesthetic engagements with mixed race politics in these trans- and post-national dialogues, beginning in the 1700s and focusing on the 20th and 21st centuries.

Same as: AMSTUD 261E, ENGLISH 261E.

AFRICAAM 262D. African American Poetics. 5 Units.

Examination of African American poetic expressive forms from the 1700s to the 2000s, considering the central role of the genre--from sonnets to spoken word, from blues poetry to new media performance--in defining an evolving literary tradition and cultural identity.

Same as: AMSTUD 262D, ENGLISH 262D.

African Middle Eastern Languages Courses

AMELANG 1S. Intensive Beginning Arabic, Part A. 5 Units.

(Formerly AMELANG 20A.) Stanford graduate students restricted to 9 units register for 1G.

AMELANG 2S. Intensive Beginning Arabic, Part B. 5 Units.

(Formerly AMELANG 20A.) Continuation of 1S. Stanford graduate student restricted to 9 units register for 2G.

AMELANG 3S. Intensive Beginning Arabic, Part C. 5 Units.

(Formerly AMELANG 20C.) Continuation of 2S. Stanford graduate students restricted to 9 units register for 3G.

AMELANG 11G. Intensive Intermediate Arabic, Part A. 3-4 Units.

For Stanford graduate students restricted to 9 units. Speaking, listening, reading, and writing, emphasizing Arabic grammar and functional applications.

AMELANG 11S. Intensive Intermediate Arabic, Part A. 4 Units.

(Formerly AMELANG 221A.) Speaking, listening, reading, and writing, emphasizing Arabic grammar and functional applications. Stanford graduate students restricted to 9 units register for 11G.

AMELANG 12G. Intensive Intermediate Arabic, Part B. 3-4 Units.

Continuation of 11G. For Stanford graduate students restricted to 9 units. Speaking, listening, reading, and writing, emphasizing Arabic grammar and functional applications.

AMELANG 12S. Intensive Intermediate Arabic, Part B. 4 Units.

Continuation of 11S. Speaking, listening, reading, and writing, emphasizing Arabic grammar and functional applications. Stanford graduate students restricted to 9 units register for 12G.

AMELANG 13G. Intensive Intermediate Arabic, Part C. 3-4 Units.

Continuation of 12G. For Stanford graduate students restricted to 9 units. Speaking, listening, reading, and writing, emphasizing Arabic grammar and functional applications.

AMELANG 13S. Intensive Intermediate Arabic, Part C. 4 Units.

(Formerly AMELANG 221C.) Continuation of 12S. Speaking, listening, reading, and writing, emphasizing Arabic grammar and functional applications. Stanford graduate students restricted to 9 units register for 13G.

AMELANG 27A. Advanced Arabic Conversation, First Quarter. 2 Units.

(Formerly AMELANG 143A.) Repeatable once for credit. Prerequisite: second-year year Arabic or consent of instructor.

AMELANG 27B. Advanced Arabic Conversation, Second Quarter. 2 Units.

Continuation of 27A. Repeatable once for credit. Prerequisite: second-year Arabic or consent of instructor.

AMELANG 27C. Advanced Arabic Conversation, Third Quarter. 2 Units.

Continuation of 27B. Repeatable once for credit. Prerequisite: second-year year Arabic or consent of instructor.

AMELANG 50A. Reading Hebrew, First Quarter. 2-4 Units.

Introduction to Hebrew literature through short stories and poetry by notable Israeli writers. In Hebrew. Prerequisite: one year of Hebrew or equivalent.

Same as: JEWISHST 50A.

AMELANG 51A. Reading Biblical Hebrew, First Quarter. 2 Units.**AMELANG 100A. Beginning Amharic, First Quarter. 4 Units.****AMELANG 100B. First-Year Amharic, Second Quarter. 4 Units.**

Continuation of AMELANG 100A. Prerequisite AMELANG 100A or consent of instructor.

AMELANG 100C. First-Year Amharic, Third Quarter. 4 Units.
Continuation of AMELANG 100B. Prerequisite: AMELANG 100B or consent of instructor. Fulfills the University Foreign Language Requirement.

AMELANG 103A. First-Year Hausa, First Quarter. 4 Units.

AMELANG 103B. First-Year Hausa, Second Quarter. 4 Units.
Continuation of AMELANG 103A. Prerequisite: AMELANG 103A or consent of instructor.

AMELANG 103C. First-Year Hausa, Third Quarter. 4 Units.
Continuation of AMELANG 103B. Prerequisite: AMELANG 103B or consent of instructor.

AMELANG 106A. First-Year Swahili, First Quarter. 5 Units.

AMELANG 106B. First-Year Swahili, Second Quarter. 5 Units.
Continuation of AMELANG 106A. Prerequisite: AMELANG 106A or consent of instructor.

AMELANG 106C. First-Year Beginning Swahili, Third Quarter. 5 Units.
Continuation of AMELANG 106B. Prerequisite: AMELANG 106B or consent of instructor. Fulfills the University foreign language requirement.

AMELANG 107A. Second-Year Swahili, First Quarter. 5 Units.
Continuation of AMELANG 106C. Prerequisite: AMELANG 106C or consent of instructor.

AMELANG 107B. Second-Year Swahili, Second Quarter. 5 Units.
Continuation of AMELANG 107A. Prerequisite: AMELANG 107A or consent of instructor.

AMELANG 107C. Second-Year Swahili, Third Quarter. 5 Units.
Continuation of AMELANG 107B. Prerequisite: AMELANG 107B or consent of instructor.

AMELANG 108A. Third-Year Swahili, First Quarter. 5 Units.
Continuation of AMELANG 107C. Prerequisite: AMELANG 107C or consent of instructor.

AMELANG 108B. Third-Year Swahili, Second Quarter. 5 Units.
Continuation of AMELANG 108A. Prerequisite: AMELANG 108A or consent of instructor.

AMELANG 108C. Third-Year Swahili, Third Quarter. 5 Units.
Continuation of AMELANG 108B. Prerequisite: amelang 108B or consent of instructor.

AMELANG 126. Reflection on the Other: The Jew in Arabic Literature, the Arab in Hebrew Literature. 4 Units.
How literary works outside the realm of western culture struggle with questions such as identity, minority, and the issue of the other. How the Arab is viewed in Hebrew literature and how the Jew is viewed in Arabic literature. Historical, political, and sociological forces that have contributed to the shaping of the writer's views. Arab and Jewish (Israeli) culture. Same as: COMPLIT 145, JEWISHST 106.

AMELANG 128A. First-Year Hebrew, First Quarter. 5 Units.
Same as: JEWISHST 101A.

AMELANG 128B. First-Year Hebrew, Second Quarter. 5 Units.
Continuation of AMELANG 128A. Prerequisite: Placement Test, AMELANG 128A, or consent of instructor
Same as: JEWISHST 101B.

AMELANG 128C. First-Year Hebrew, Third Quarter. 5 Units.
Continuation of AMELANG 128B. Prerequisite: Placement Test, AMELANG 128B or consent of instructor. Fulfill the University Foreign Language Requirement.
Same as: JEWISHST 101C.

AMELANG 129A. Second-Year Hebrew, First Quarter. 4 Units.
Continuation of AMELANG 128C. Prerequisite: Placement Test, AMELANG 128C or consent of instructor.
Same as: JEWISHST 102A.

AMELANG 129B. Second-Year Hebrew, Second Quarter. 4 Units.
Continuation of AMELANG 129A. Prerequisite: Placement Test, AMELANG 129A or consent of instructor.
Same as: JEWISHST 102B.

AMELANG 129C. Second-Year Hebrew, Third Quarter. 4 Units.
Continuation of AMELANG 129B. Prerequisite: Placement Test, AMELANG 129B or consent of instructor.
Same as: JEWISHST 102C.

AMELANG 131. Hebrew Forum. 2-4 Units.
Intermediate and advanced level. Biweekly Hebrew discussion on contemporary issues with Israeli guest speakers. Vocabulary enhancement. Focus on exposure to academic Hebrew.
Same as: JEWISHST 104.

AMELANG 133B. The African Forum, Second Quarter. 1 Unitss.

AMELANG 133C. The African Forum, Third Quarter. 1 Unitss.

AMELANG 134A. First-Year Igbo, First Quarter. 4 Units.

AMELANG 134B. First-Yer Igbo, Second Quarter. 4 Units.
Continuation of AMELANG 134A. Prerequisite: AMELANG 134A or consent of instructor.

AMELANG 134C. Fist-Year Igbo, Third Quarter. 4 Units.
Continuation of AMELANG 134B. Prerequisite: AMELANG 134B or consent of instructor.

AMELANG 135A. Second-Year Igbo, First Quarter. 3 Units.
Continuation of AMELANG 134C. Prerequisite: AMLENAG 134C or consent of instructor. Fulfills the University foreign language requirement.

AMELANG 140A. First-Year Yiddish, First Quarter. 4 Units.
Reading, writing, and speaking.
Same as: JEWISHST 104A.

AMELANG 140B. First-Year Yiddish, Second Quarter. 4 Units.
Continuation of AMELANG 140A. Prerequisite: AMELANG 140A or consent of instructor.
Same as: JEWISHST 104B.

AMELANG 140C. First-Year Yiddish, Third Quarter. 4 Units.
Continuation of AMELANG 140B. Prerequisite: AMELANG 140B or consent of instructor. Fulfills the University Foreign Language Requirement.
Same as: JEWISHST 104C.

AMELANG 144A. First-Year Modern Persian, First Quarter. 5 Units.
One-year sequence. Modern Persian for beginners; concentrates on rapidly developing basic skills in speaking, reading, writing, and understanding modern Persian. Strong emphasis is on the links between language and culture. The course is based on a fully integrated multimedia program. Students will learn the language with an emphasis on communicative and interactive classroom activities.

AMELANG 144B. First-Year Modern Persian, Second Quarter. 5 Units.

Continuation of AMELANG 144A. One-year sequence. Modern Persian for beginners; concentrates on rapidly developing basic skills in speaking, reading, writing, and understanding modern Persian. Strong emphasis is on the links between language and culture. The course is based on a fully integrated multimedia program. Students will learn the language with an emphasis on communicative and interactive classroom activities. Prerequisite: Placement Test, AMELANG 144A or consent of instructor.

AMELANG 144C. First-Year Modern Persian, Third Quarter. 5 Units.

Continuation of AMELANG 144B. One-year sequence. Modern Persian for beginners; concentrates on rapidly developing basic skills in speaking, reading, writing, and understanding modern Persian. Strong emphasis is on the links between language and culture. The course is based on a fully integrated multimedia program. Students will learn the language with an emphasis on communicative and interactive classroom activities. Fulfills the University Foreign Language Requirement. Prerequisite: Placement Test, AMELANG 144B, or consent of instructor. Fulfills the University Foreign Language Requirement.

AMELANG 145A. Second-Year Modern Persian, First Quarter. 5 Units.

Continuation of AMELANG 144C. Expands students' proficiency in Persian language and culture at intermediate level through various texts and multimedia. It stresses oral fluency, written expression, and reading comprehension. Students will continue to learn the language with an emphasis on communicative and interactive classroom activities. Students will be introduced to contemporary as well as classical short poems by famous Persian poets like Rumi. Prerequisite: Placement Test, AMELANG 144C or consent of instructor.

AMELANG 145B. Second-Year Modern Persian, Second Quarter. 5 Units.

Continuation of AMELANG 145A. Expands students' proficiency in Persian language and culture at intermediate level through various texts and multimedia. It stresses oral fluency, written expression, and reading comprehension. Students will continue to learn the language with an emphasis on communicative and interactive classroom activities. Students will be introduced to contemporary as well as classical short poems by famous Persian poets like Rumi. Prerequisite: Placement Test, AMELANG 144A or consent of instructor.

AMELANG 145C. Second-Year Modern Persian, Third Quarter. 5 Units.

Continuation of AMELANG 145B. Expands students' proficiency in Persian language and culture at intermediate level through various texts and multimedia. It stresses oral fluency, written expression, and reading comprehension. Students will continue to learn the language with an emphasis on communicative and interactive classroom activities. Students will be introduced to contemporary as well as classical short poems by famous Persian poets like Rumi. Prerequisite: Placement Test, AMELANG 144B or consent of instructor.

AMELANG 146A. Third-Year Persian, First Quarter. 4 Units.

Continuation of AMELANG 145C. Prerequisite: Placement Test, AMELANG 145C or consent of instructor.

AMELANG 146B. Third-Year Persian, Second Quarter. 4 Units.

Continuation of AMELANG 146A. Prerequisite: Placement Test, AMELANG 146A or consent of instructor.

AMELANG 146C. Third-Year Persian, Third Quarter. 4 Units.

Continuation of AMELANG 146B. Prerequisite: Placement Test, AMELANG 146B or consent of instructor.

AMELANG 153A. First-Year Twi, First Quarter. 4 Units.**AMELANG 153B. First-Year Twi, Second Quarter. 4 Units.**

Continuation of AMELANG 153A. Prerequisite: AMELANG 153A or consent of instructor.

AMELANG 153C. First-Year Beginning Twi, Third Quarter. 4 Units.

Continuation of AMELANG 153B. Prerequisite: AMELANG 153B or consent of instructor. Fulfills the University Foreign Language Requirement.

AMELANG 154A. Second-Year Twi, First Quarter. 4 Units.

Continuation of AMELANG 153C. Prerequisite: AMELANG 153C or consent of instructor.

AMELANG 154B. Second-Year Twi, Second Quarter. 4 Units.

Continuation of AMELANG 154A. Prerequisite: AMELANG 154A or consent of instructor.

AMELANG 154C. Second-Year Twi, Third Quarter. 4 Units.

Continuation of AMELANG 154B. Prerequisite: AMELANG 154B or consent of instructor.

AMELANG 156A. First-Year Zulu, First Quarter. 4 Units.**AMELANG 156B. First-Year Zulu, Second Quarter. 4 Units.**

Continuation of AMELANG 156A. Prerequisite AMELANG 156A or consent of instructor.

AMELANG 156C. First-Year Zulu, Third Quarter. 4 Units.

Continuation of AMELANG 156B. Prerequisite: AMELANG 156B or consent of instructor. Fulfills the University Foreign Language Requirement.

AMELANG 157B. Second-Year Zulu, Second Quarter. 4 Units.

Continuation of AMELANG 157A. Prerequisite: AMELANG 157A or consent of instructor.

AMELANG 157C. Second-Year Zulu, Third Quarter. 4 Units.

Continuation of AMELANG 157B. Prerequisite: AMELANG 157B or consent of instructor.

AMELANG 170A. Biblical Hebrew, First Quarter. 1 Unitss.

Establish a basic familiarity with the grammar and vocabulary of Biblical Hebrew and will begin developing a facility with the language. Students that are enrolled in this course must also enroll in Beginning Hebrew. This course requires no prior knowledge of Hebrew and will begin with learning the alphabet. By the end of the year, students will be able to translate basic biblical texts, will be familiar with common lexica and reference grammars, and will have sufficient foundational knowledge to enable them to continue expanding their knowledge either in a subsequent course or own their own. Same as: JEWISHST 107A, RELIGST 170A.

AMELANG 170B. Biblical Hebrew, Second Quarter. 1 Unitss.

Continuation of 170A
Same as: JEWISHST 107B.

AMELANG 170C. Biblical Hebrew, Third Quarter. 1 Unitss.

Continuation of 170B.
Same as: JEWISHST 107C.

AMELANG 171. The Bible in Modern Hebrew Literature. 3-4 Units.

The role of biblical myths in shaping Israeli identity and the development of a secular Hebrew literature. Readings include modern Hebrew poems and novels which offer new meanings to the stories of Genesis, Exodus, David, and the Song of Songs and make them relevant to the context of modern and postmodern Israeli culture. Readings in Hebrew and English. Prerequisite: intermediate Hebrew.

AMELANG 176. Introduction to Ladino: Language, Literature, and Culture. 1-4 Units.

Prerequisite: two quarters of Spanish.

AMELANG 177. Middle Eastern Cities in Literature and Film. 4-5 Units.

Sources include short stories, novels, and movies about Beirut, Tel Aviv, Jerusalem, Cairo, and Amman. Focus is on a cultural and intellectual history of each city. Issues such as the role that Middle Eastern cities play in the development of the modern Hebrew and Arabic novels, the city as a center of social and political life, and the city as a space of collective memory.

AMELANG 182A. Intermediate Fulani, First Quarter. 3 Units.

Fulfill the University foreign language requirement.

AMELANG 182B. Intermediate Fulani, Second Quarter. 3 Units.

Continuation of 182A.

AMELANG 182C. Intermediate Fulani, Third Quarter. 3 Units.

Continuation of 182B.

AMELANG 184A. First-Year Turkish, First Quarter. 5 Units.

Designed for students who have interest in learning Turkish language, culture, history, cuisine and social life. Proficiency-based orientation with emphasis on oral comprehension and speaking. The grammar is presented through communicative activities where students are exposed to authentic input.

AMELANG 184B. First-Year Turkish, Second Quarter. 5 Units.

Continuation of AMELANG184A. Emphasis on speaking, oral comprehension and beginning reading and writing skills. Turkish culture and social life is integrated in daily language learning process through authentic materials. Prerequisite: AMELANG 184A or consent of instructor.

AMELANG 184C. First-Year Turkish, Third Quarter. 5 Units.

Continuation of AMELANG 184B. Emphasis is on speaking, oral comprehension, reading and writing skills. Reading simple texts, studying Turkish pop music, viewing short documentaries and communicative writing exercises are part of daily class activities. Prerequisite: AMELANG 184B or consent of instructor. Fulfills the University Foreign Language Requirement.

AMELANG 185A. Second-Year Turkish, First Quarter. 5 Units.

Continuation of AMELANG 184C. Designed for students with previous knowledge of Turkish who wish to learn in depth about Turkish culture, history, social life, literature, cuisine and artistic trends. Emphasis on developing intermediate proficiency in reading, writing, listening and speaking. Class discussions and activities aim to enable students to perform various tasks in the target language. Prerequisite: AMELANG 184C or consent of instructor.

AMELANG 185B. Second-Year Turkish, Second Quarter. 5 Units.

Continuation of AMELANG 185A. Main focus is on class discussions and essay writing practices about daily life in Turkey. Prerequisite: AMELANG 185A or consent of instructor.

AMELANG 185C. Second-Year Turkish, Third Quarter. 5 Units.

Continuation of AMELANG 185B. Main focus is on class discussions and essay writing practices about daily life in Turkey. End of quarter presentation in Turkish. Prerequisite: AMELANG 185B or consent of instructor.

AMELANG 186A. Third-Year Turkish, First Quarter. 3 Units.

Continuation of AMELANG 185C. Prerequisite: AMELANG 185C or consent of instructor.

AMELANG 186B. Third-Year Turkish, Second Quarter. 3 Units.

Continuation of AMELANG 186A. Prerequisite: AMELANG 186A or consent of instructor.

AMELANG 186C. Third-Year Turkish, Third Quarter. 3 Units.

Continuation of AMELANG 186B. Prerequisite: AMELANG 186B or consent of instructor.

AMELANG 187A. First-Year Yoruba, First Quarter. 4 Units.**AMELANG 187B. First-Year Beginning Yoruba, Second Quarter. 4 Units.**

Continuation of 187A.

AMELANG 187C. First-Year Yoruba, Third Quarter. 4 Units.

Continuation of 187B.

AMELANG 203A. Beginning Hausa, First Quarter. 3 Units.

For grads only.

AMELANG 203B. Beginning Hausa, Second Quarter. 3 Units.

For grads only.

AMELANG 206B. Intensive Beginning Swahili, Part B. 4 Units.**AMELANG 206C. Intensive Beginning Swahili, Part C. 4 Units.****AMELANG 216A. Contemporary Language of Iran, First Quarter. 3 Units.****AMELANG 216B. Contemporary Language of Iran, Second Quarter. 3 Units.****AMELANG 216C. Contemporary Language of Iran, Third Quarter. 3 Units.****AMELANG 297. Directed Reading in African and Middle Eastern Languages. 1-5 Units.**

May be repeated for credit. Prerequisite: consent of instructor.

AMELANG 395. Graduate Studies in African and Middle Eastern Languages. 1-5 Units.

Prerequisite: consent of instructor.

African Studies Courses

AFRICAST 72SI. Conflict in the Congo. 1-2 Units.**AFRICAST 109. Running While Others Walk: African Perspectives on Development. 5 Units.**

Throughout the history of modern Africa, Africans have specified their desired future development, understood broadly, and identified the major obstacles in achieving it. Debates about development have intensified in the post-colonial period, especially as African countries have replaced the leaders installed at independence. Amidst the general critique of the imposition of external values and rules, Africans have differed, sometimes sharply, on priorities, process, and programs. While for some the challenge is to catch up with development elsewhere, for others it is essential to leap ahead, to set the pace, to initiate a radical social, economic, and political transformation. To ground and extend the common approaches to studying development that emphasize economics and that rely largely on external commentators, we will explore African perspectives. Our major task will be a broad overview, sampling the analyses of Africa's intellectuals in several domains. Course participants will review, compare, and analyze major contributions, developing an understanding of contemporary intellectual currents.

Same as: AFRICAST 209.

AFRICAST 112. AIDS, Literacy, and Land: Foreign Aid and Development in Africa. 5 Units.

Public policy issues, their roots, and the conflicts they engender. The policy making process: who participates, how, why, and with what results? Innovative approaches to contested policy issues. Foreign roles and their consequences. Case studies such as: a clinic in Uganda that addresses AIDS as a family and community problem; and strategies in Tanzania to increase girls' schooling.

Same as: AFRICAST 212.

AFRICAST 124. Memory and Heritage In South Africa Syllabus. 1 Unitss.

The focus of this course is to provide a forum in which students examine the role of memory and heritage in South Africa. The course will include visiting speakers, discussion and other activities. The complex relationship between memory and heritage in South Africa will provide the basis for a series of broad conversations about citizenship, national reconciliation, memorialization, justice, modernity and heritage ethics.

Same as: AFRICAST 224.

AFRICAST 151. AIDS in Africa. 3 Units.

Medical, social, and political aspects of the HIV epidemic in sub-Saharan Africa including: biology, transmission, diagnosis, and treatment of HIV; mother-to-child transmission and breastfeeding; vaccines; community and activist responses to the HIV epidemic; economics of HIV treatment; governance and health; ethics in research and program implementation.

AFRICAST 195. BACK FROM AFRICA WORKSHOP. 1-2 Units.

This course is being offered for students who conducted research over the summer in Africa. It will have students reflect on their time in Africa, transform their observations and research into scholarship and connect them as a community. Cape Town fellows and any others who conducted summer research in Africa can use this course to finish their research.

AFRICAST 199. Independent Study or Directed Reading. 1-5 Units.

May be repeated for credit.

AFRICAST 200. The HIV/AIDS Epidemic in Tanzania: A Pre-Field Seminar. 1 Unitss.

Goal is to prepare students for an HIV/AIDS prevention, service-learning experience in Tanzania. Topics include: history of HIV/AIDS epidemic globally and in Tanzania; social and economic impact of AIDS; national and societal responses; ethical issues in crosscultural service learning; teaching for prevention; biology of HIV transmission, disease progression, and prevention; introduction to Tanzanian history and politics; HIV/AIDS and development; social, cultural, and economic context of HIV risk; and strategies for HIV prevention in Tanzania.

AFRICAST 209. Running While Others Walk: African Perspectives on Development. 5 Units.

Throughout the history of modern Africa, Africans have specified their desired future development, understood broadly, and identified the major obstacles in achieving it. Debates about development have intensified in the post-colonial period, especially as African countries have replaced the leaders installed at independence. Amidst the general critique of the imposition of external values and rules, Africans have differed, sometimes sharply, on priorities, process, and programs. While for some the challenge is to catch up with development elsewhere, for others it is essential to leap ahead, to set the pace, to initiate a radical social, economic, and political transformation. To ground and extend the common approaches to studying development that emphasize economics and that rely largely on external commentators, we will explore African perspectives. Our major task will be a broad overview, sampling the analyses of Africa's intellectuals in several domains. Course participants will review, compare, and analyze major contributions, developing an understanding of contemporary intellectual currents.

Same as: AFRICAST 109.

AFRICAST 212. AIDS, Literacy, and Land: Foreign Aid and Development in Africa. 5 Units.

Public policy issues, their roots, and the conflicts they engender. The policy making process: who participates, how, why, and with what results? Innovative approaches to contested policy issues. Foreign roles and their consequences. Case studies such as: a clinic in Uganda that addresses AIDS as a family and community problem; and strategies in Tanzania to increase girls' schooling.

Same as: AFRICAST 112.

AFRICAST 224. Memory and Heritage In South Africa Syllabus. 1 Unitss.

The focus of this course is to provide a forum in which students examine the role of memory and heritage in South Africa. The course will include visiting speakers, discussion and other activities. The complex relationship between memory and heritage in South Africa will provide the basis for a series of broad conversations about citizenship, national reconciliation, memorialization, justice, modernity and heritage ethics.

Same as: AFRICAST 124.

AFRICAST 299. Independent Study or Directed Reading. 1-10 Units.**AFRICAST 300. Contemporary Issues in African Studies. 1 Unitss.**

Guest scholars present analyses of major African themes and topics. Brief response papers required. May be repeated for credit.

AFRICAST 301A. The Dynamics of Change in Africa. 4-5 Units.

Crossdisciplinary colloquium; required for the M.A. degree in African Studies. Open to advanced undergraduates and PhD students. Addresses critical issues including patterns of economic collapse and recovery; political change and democratization; and political violence, civil war, and genocide. Focus on cross-cutting issues including the impact of colonialism; the role of religion, ethnicity, and inequality; and Africa's engagement with globalization.

Same as: POLISCI 246P, POLISCI 346P.

AFRICAST 302. Research Workshop. 1 Unitss.

Required for African Studies master's students. Student presentations.

American Studies Courses

AMSTUD 1B. Media, Culture, and Society. 5 Units.

The institutions and practices of mass media, including television, film, radio, and digital media, and their role in shaping culture and social life. The media's shifting relationships to politics, commerce, and identity.

Same as: COMM 1B.

AMSTUD 2. Introduction to American National Government and Politics. 5 Units.

The role and importance of the ideal of democracy in the evolution of the American political system. American political institutions (the Presidency, Congress, and the Court) and political processes (the formation of political attitudes and voting) are examined against the backdrop of American culture and political history. The major areas of public policy in the current practice of the ideal of democracy.

Same as: POLISCI 2.

AMSTUD 12. Race, Poverty and Disaster Relief. 1 Unitss.

An Exploration of pre and post-Katrina New Orleans, is Hillel at Stanford's preparation course for all students participating in Hillel's alternative spring break trip to New Orleans from March 25-April 2. Professors and other speakers from a variety of fields will offer perspectives on the historical, racial, and political context for the disastrous effects of Hurricane Katrina in the Gulf Coast. This course will also offer Jewish and secular perspectives on service, emphasizing the importance of questioning our motivations and approaches to helping others.

AMSTUD 15. Global Flows: The Globalization of Hip Hop Art, Culture, and Politics. 1-2 Units.

This course consists of film screenings, dialogues, and performances that examine and engage Hip Hop Cultures and artists from around the world. We will explore diverse scenes and artists, from the formation of new musical genres such as hiplife in Ghana, to the impact of the first Hip Hop concert in Morocco, to comparative investigations of race and citizenship in Japan, Cuba, Palestine, France, and the United States (including Black, Mexican and Arab-Americans).
Same as: CSRE 15.

AMSTUD 50N. The Literature of Inequality: Have and Have-Nots from the Gilded Age to the Occupy Era. 3 Units.

Not since the turn of the last century have Americans experienced such a profound gap between those who have and those who do not, between wealthy and working poor, between defacto upper and lower classes, between those of the status quo and those who slip to the social periphery. We will be examining literary and artistic explorations of social and economic inequity, fiction and art that looks at reversals of fortune as well as the possibilities for social change. Readings include Jacob Riis, *How the Other Half Lives*, W.E.B. Du Bois, *The Souls of Black Folk*, Edith Wharton, *House of Mirth*, James Agee & Walker Evans, *Let Us Not Forget Famous Men*, T.C. Boyle, *The Tortilla Curtain*, Julie Otsuka, *When the Emperor Was Divine* and Occupy Movement art.
Same as: ENGLISH 50N.

AMSTUD 51N. Comparative Fictions of Ethnicity. 5 Units.

We may "know" "who" we "are," but we are, after all, social creatures. How does our sense of self interact with those around us? How does literature provide a particular medium for not only self expression, but also for meditations on what goes into the construction of "the Self"? After all, don't we tell stories in response to the question, "who are you"? Besides a list of nouns and names and attributes, we give our lives flesh and blood in telling how we process the world. Our course focuses in particular on this question--Does this universal issue ("who am I") become skewed differently when we add a qualifier before it, like "ethnic"? Satisfies PWR2.
Same as: COMPLIT 51N, CSRE 51N.

AMSTUD 68N. Mark Twain and American Culture. 4 Units.

Preference to freshmen. Mark Twain has been called our Rabelais, our Cervantes, our Homer, our Tolstoy, our Shakespeare. Ernest Hemingway maintained that all modern American literature comes from one book by Mark Twain called *The Adventures of Huckleberry Finn*. President Franklin D. Roosevelt got the phrase New Deal from *A Connecticut Yankee in King Arthur's Court*. Class discussions will focus on how Twain's work illuminates and complicates his society's responses to such issues as race, technology, heredity versus environment, religion, education, and what it means to be American.
Same as: ENGLISH 68N.

AMSTUD 101. American Fiction into Film: How Hollywood Scripts and Projects Black and White Relations. 3-5 Units.

Movies and the fiction that inspires them; power dynamics behind production including historical events, artistic vision, politics, and racial stereotypes. What images of black and white does Hollywood produce to forge a national identity? How do films promote equality between the races? What is lost or gained in film adaptations of books?.

AMSTUD 103. On the Road: Cars and the Auto-Mobility of Race, Gender, Class, and Age in American Literature. 3-5 Units.

The car in American literature, history, and culture, provides hope and makes it possible to relocate, transcend social status, and reinvent oneself. In this class we will examine how the car allows Americans to navigate identity in new ways. Readings include: Fitzgerald, Stein, Steinbeck, Escovedo-Colton, Nabokov, Barrett, Walker, Murray, Simpson, Wolfe, Kerouac, Davis, Freeman, Gilroy, Lucasi, Hamper, Moore, and Nass.
Same as: COMPLIT 120A.

AMSTUD 105Q. Law and Popular Culture. 3 Units.

This seminar focuses on the interface between two important subjects: law and popular culture. Before class, students will see a series of films or television shows relating to law, lawyers, and the legal system. There is also a weekly homework assignment based on materials in the assigned text and the assigned film or TV show. We will discuss the pop culture treatment of subjects such as the adversary system, good and bad lawyers, female and gay lawyers, the work life of lawyers, legal education, ethical issues, the jury system, and criminal and civil justice. The seminar discussions will draw on film theory and film-making technique to deepen understanding of the interrelationship between law and popular culture. The discussions will illuminate the ways in which pop culture products both reflect and change social views about law and lawyers. The assigned text is Michael Asimow & Shannon Mader, "Law and Popular Culture: A Course Book" (Peter Lang 2004).

AMSTUD 107. Introduction to Feminist Studies. 4-5 Units.

Introduction to interdisciplinary feminist scholarship, which seeks to understand the creation, perpetuation, and critiques of gender inequalities. Topics include the historical emergence of feminist politics and contemporary analyses of work and family, health and sexuality, creativity, and politics. Close attention to the intersections of race, gender, ethnicity, and sexuality and to international, as well as U.S., perspectives. Students learn to think critically about gender in the past, present, and future.
Same as: CSRE 108, FEMST 101.

AMSTUD 114N. Visions of the 1960s. 5 Units.

Preference to sophomores. Introduction to the ideas, sensibility, and, to a lesser degree, the politics of the American 60s. Topics: the early 60s vision of a beloved community; varieties of racial, generational, and feminist dissent; the meaning of the counterculture; and current interpretive perspectives on the 60s. Film, music, and articles and books.

AMSTUD 116. American Economic History. 5 Units.

The American economy from colonial times to the present, illustrating the role of history in economic life. Topics: U.S. economic development in global and comparative context; slavery as an economic system; origins and consequences of the American technology and business organization; economics of the Great Depression and New Deal; post-World War II economic performance and social change. Prerequisite: 1A.
Same as: ECON 116.

AMSTUD 120. Digital Media in Society. 4-5 Units.

(Graduate students register for 220.) Contemporary debates concerning the social and cultural impact of digital media. Topics include the historical origins of digital media, cultural contexts of their development and use, and influence of digital media on conceptions of self, community, and state. Priority to Juniors and Seniors.
Same as: COMM 120W, COMM 220.

AMSTUD 121. Masterpieces of American Literature. 3-5 Units.

(English majors and others taking 5 units, register for 121.) A survey of some of the definitive texts of American writing, such as *Leaves of Grass*, *Benito Cereno*, *Adventures of Huckleberry Finn*, *The Waste Land*, *The Sun Also Rises*, *The Golden Apples*, and *The Crying of Lot 49*.
Same as: ENGLISH 21, ENGLISH 121.

AMSTUD 121X. Hip Hop, Youth Identities, and the Politics of Language. 3-4 Units.

Focus is on issues of language, identity, and globalization, with a focus on Hip Hop cultures and the verbal virtuosity within the Hip Hop nation. Beginning with the U.S., a broad, comparative perspective in exploring youth identities and the politics of language in what is now a global Hip Hop movement. Readings draw from the interdisciplinary literature on Hip Hop cultures with a focus on sociolinguistics and youth culture.
Same as: AFRICAAM 121X, ANTHRO 121A, CSRE 121X, EDUC 121X, LINGUIST 155.

AMSTUD 123D. American Literature, 1855 to World War I. 5 Units.

A survey of American writers from Whitman to T.S. Eliot, including Emily Dickinson, Mark Twain, Stephen Crane, Frank Norris, Kate Chopin, Theodore Dreiser, and Henry James. Topics include the tension between romance and realism, the impact of naturalism and modernism, as well as race, gender, and the literary evolution of the American language. Same as: ENGLISH 123D.

AMSTUD 123G. Mark Twain: A Fresh Look at an Icon and Iconoclast, 100 Years after His Death. 3-5 Units.

The vitality and versatility of a writer who has been called America's Rabelais, Cervantes, Homer, Tolstoy, and Shakespeare. Journalism, travel books, fiction, drama, and sketches by Mark Twain; how Twain engaged such issues as personal and national identity, satire and social justice, imperialism, race and racism, gender, performance, travel, and technology. What are Twain's legacies in 2010, the centennial of his death, the 175th anniversary of his birth, and the 125th anniversary of his most celebrated novel? Guests include actor Hal Holbrook. Same as: ENGLISH 123G.

AMSTUD 135. Deliberative Democracy and its Critics. 3-5 Units.

This course examines the theory and practice of deliberative democracy and engages both in a dialogue with critics. Can a democracy which emphasizes people thinking and talking together on the basis of good information be made practical in the modern age? What kinds of distortions arise when people try to discuss politics or policy together? The course draws on ideas of deliberation from Madison and Mill to Rawls and Habermas as well as criticisms from the jury literature, from the psychology of group processes and from the most recent normative and empirical literature on deliberative forums. Deliberative Polling, its applications, defenders and critics, both normative and empirical, will provide a key case for discussion. Same as: COMM 135, COMM 235, COMM 335, POLISCI 234P, POLISCI 334P.

AMSTUD 137. The Dialogue of Democracy. 4-5 Units.

All forms of democracy require some kind of communication so people can be aware of issues and make decisions. This course looks at competing visions of what democracy should be and different notions of the role of dialogue in a democracy. Is it just campaigning or does it include deliberation? Small scale discussions or sound bites on television? Or social media? What is the role of technology in changing our democratic practices, to mobilize, to persuade, to solve public problems? This course will include readings from political theory about democratic ideals - from the American founders to J.S. Mill and the Progressives to Joseph Schumpeter and modern writers skeptical of the public will. It will also include contemporary examinations of the media and the internet to see how those practices are changing and how the ideals can or cannot be realized. Same as: COMM 137W, COMM 237, POLISCI 232T, POLISCI 332T.

AMSTUD 140. Stand Up Comedy and the "Great American Joke" Since 1945. 3-5 Units.

Development of American Stand Up Comedy in the context of social and cultural eruptions after 1945, including the Borscht Belt, the Chitlin' Circuit, the Cold War, censorship battles, Civil Rights and other social movements of the 60s and beyond. The artistry of stories, monologues, jokes, impersonations, persona, social satire, scatology, obscenity, riffs, rants, shtick, and more by such artists as Lenny Bruce, Dick Gregory, Richard Pryor, George Carlin, Margaret Cho, Sarah Silverman, Jon Stewart, Stephen Colbert, as well as precursors such as Mark Twain, minstrelsy and vaudeville and related films, TV shows, poems and other manifestations of similar sensibilities and techniques.

AMSTUD 142. The Literature of the Americas. 5 Units.

A wide-ranging overview of the literatures of the Americas in comparative perspective, emphasizing continuities and crises that are common to North American, Central American, and South American literatures as well as the distinctive national and cultural elements of a diverse array of primary works. Topics include the definitions of such concepts as empire and colonialism, the encounters between worldviews of European and indigenous peoples, the emergence of creole and racially mixed populations, slavery, the New World voice, myths of America as paradise or utopia, the coming of modernism, twentieth-century avant-gardes, and distinctive modern episodes--the Harlem Renaissance, the Beats, magic realism, Noigandres--in unaccustomed conversation with each other. Same as: COMPLIT 142, CSRE 142, ENGLISH 172E.

AMSTUD 143. Introduction to African American Literature. 3-5 Units.

(English majors and others taking 5 units, register for 143.) African American literature from its earliest manifestations in the spirituals, trickster tales, and slave narratives to recent developments such as black feminist theory, postmodern fiction, and hip hop lyricism. We will engage some of the defining debates and phenomena within African American cultural history, including the status of realist aesthetics in black writing; the contested role of literature in black political struggle; the question of diaspora; the problem of intra-racial racism; and the emergence of black internationalism. Attuned to the invariably hybrid nature of this tradition, we will also devote attention to the discourse of the Enlightenment, modernist aesthetics, and the role of Marxism in black political and literary history. Same as: AFRICAAM 43, ENGLISH 43, ENGLISH 143.

AMSTUD 146. Asian American Culture and Community. 3-5 Units.

An examination of the history, art and culture of Vietnamese Americans, and their contemporary experiences in the South Bay. The course will combine in-class learning with a major conference featuring prominent artists and scholars on the Vietnamese Diasporic community. A service learning component requires community work at a service organization in San Jose. Service Learning Course (certified by Haas Center). Course can be repeated once. Same as: ASNAMST 146S, COMPLIT 146, CSRE 146S.

AMSTUD 147. The Soul Tradition in African American Music. 3-4 Units.

The African American tradition of soul music from its origins in blues, gospel, and jazz to its influence on today's r&b, hip hop, and dance music. Style such as rhythm and blues, Motown, Southern soul, funk, Philadelphia soul, disco, Chicago house, Detroit techno, trip hop, and neo-soul. Soul's cultural influence and global reach; its interaction with politics, gender, place, technology, and the economy. Pre-/corequisite (for music majors): MUSIC 22. (WIM at 4 units only.) Same as: MUSIC 147, MUSIC 247.

AMSTUD 150. American Literature and Culture to 1855. 5 Units.

A survey of early American writings, including sermons, poetry, captivity and slave narratives, essays, autobiography, and fiction, from the colonial era to the eve of the Civil War. Same as: ENGLISH 123.

AMSTUD 150A. Colonial and Revolutionary America. 5 Units.

(Same as HISTORY 50A. History majors and others taking 5 units, register for HISTORY 150A.) Survey of the origins of American society and polity in the 17th and 18th centuries. Topics: the migration of Europeans and Africans and the impact on native populations; the emergence of racial slavery and of regional, provincial, Protestant cultures; and the political origins and constitutional consequences of the American Revolution. Same as: HISTORY 150A.

AMSTUD 150B. 19th-Century America. 5 Units.

(Same as HISTORY 50B.) Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture.

Same as: AFRICAAM 150B, HISTORY 150B.

AMSTUD 150C. The United States in the Twentieth Century. 5 Units.

(Same as HISTORY 50C.) Major political, economic, social, and diplomatic developments in the U.S. Themes: the economic and social role of government (Progressive, New Deal, Great Society, and Reagan-Bush eras); ethnic and racial minorities in society (mass immigration at the turn of the century and since 1965, the civil rights era of the 50s and 60s); the changing status of women since WW II; shifting ideological bases, institutional structures, and electoral characteristics of the political system (New Deal and post-Vietnam); determinants of foreign policy in WW I and II, and the Cold War.

Same as: HISTORY 150C.

AMSTUD 152. U.S. Society and Politics since 1945. 5 Units.

Surveys United States history following World War II, blending political, cultural, and intellectual history. Topics include: the Cold War as foreign policy and domestic concern, the Civil Rights movement as a political, social, and religious phenomenon, the Sixties including social movements like the New Left, feminism, black power, and the New Right, the Vietnam War, contemporary transformations in the U.S. economy, the culture wars of the 1980s, and the growing geopolitical importance of the Middle East. Same as: HISTORY 152.

AMSTUD 152A. "Mutually Assured Destruction": American Culture and the Cold War. 5 Units.

The temperature of the early Cold War years via readings of Soviet and U.S. propaganda; documentary film and film noir; fiction by Bellow, Ellison, O'Connor, and Mailer; social theory by Arendt, the New York Intellectuals, and the Frankfurt School; and political texts such as Kennan's *Sources of Soviet Conduct*, the Truman Doctrine speech, and the National Security Council Report 68. Major themes include the discourse of totalitarianism, MacCarthyism, strategies of containment, the nuclear threat, the figure of the outsider, and the counterculture, and the cultural shift from sociological to psychological idioms.

Same as: ENGLISH 152A.

AMSTUD 152G. Global Harlem Renaissance. 5 Units.

Examination of the explosion of African American artistic expression during 1920s and 30s New York known as the Harlem Renaissance. Amiri Baraka once referred to the Renaissance as a kind of vicious Modernism, a BangClash that impacted and was impacted by political, cultural and aesthetic changes not only in the U.S. but Europe, the Caribbean and Latin America. Focus on the literature, graphic arts, and the music of the era in this global context.

Same as: AFRICAAM 152G, ENGLISH 152G.

AMSTUD 156H. Women and Medicine in US History: Women as Patients, Healers and Doctors. 5 Units.

Women's bodies in sickness and health, and encounters with lay and professional healers from the 18th century to the present. Historical construction of thought about women's bodies and physical limitations; sexuality; birth control and abortion; childbirth; adulthood; and menopause and aging. Women as healers, including midwives, lay physicians, the medical profession, and nursing.

AMSTUD 159X. American Photographs, 1839-1971: A Cultural History. 4 Units.

This course concentrates on many important American photographers, from the era of daguerreotypes to near the end of the pre-digital era. We study photographs of the Civil War, western exploration, artistic subjects, urban and rural poverty, skyscrapers, crime, fashion, national parks, and social protest, among other topics. Among the photographers we study: Carleton Watkins, Eadweard Muybridge, Walker Evans, Dorothea Lange, Garry Winogrand, and Diane Arbus. Emphasis on developing students' abilities to discuss and write about photography; to see it.

Same as: ARTHIST 159, ARTHIST 359.

AMSTUD 160. Perspectives on American Identity. 5 Units.

Required for American Studies majors. Changing interpretations of American identity and Americanness.

AMSTUD 161. Women in Modern America. 4-5 Units.

The transformation from the New Woman of the 1890s to the New Woman of the 1990s; attention to immigrant, black, and white women, both historical analyses and personal accounts. Topics include: workforce participation; family and reproductive labor; educational and professional opportunities; the impact of wars, economic depression, and popular culture; and recurrent feminist movements.

Same as: CSRE 162, HISTORY 161.

AMSTUD 164C. From Freedom to Freedom Now: African American History, 1865-1965. 5 Units.

(Same as HISTORY 64C.) History majors and others taking 5 units, register for 164C.) Explores the working lives, social worlds, political ideologies and cultural expressions of African Americans from emancipation to the early civil rights era. Topics include: the transition from slavery to freedom, family life, work, culture, leisure patterns, resistance, migration and social activism. Draws largely on primary sources including autobiographies, memoirs, letters, personal journals, newspaper articles, pamphlets, speeches, literature, film and music.

Same as: HISTORY 164C.

AMSTUD 165. History of Higher Education in the U.S.. 3-5 Units.

Major periods of evolution, particularly since the mid-19th century. Premise: insights into contemporary higher education can be obtained through its antecedents, particularly regarding issues of governance, mission, access, curriculum, and the changing organization of colleges and universities.

Same as: EDUC 165, EDUC 265, HISTORY 158C.

AMSTUD 166. Introduction to African American History: The Modern African American Freedom Struggle. 3-5 Units.

This course is an introduction to African-American Political movements of the period after 1930, with special emphasis on mass protest and civil rights activism as well as leaders such as W. E. B. Du Bois, Thurgood Marshall, Martin Luther King, Jr., Malcolm X, Jesse Jackson, and Barack Obama.

The lectures will utilize audio-visual materials extensively, and the exams will cover these materials as well as the traditional lectures. In addition to attending lectures, students are encouraged to undertake research projects. Same as: AFRICAAM 166, HISTORY 166.

AMSTUD 179. Introduction to American Law. 3-5 Units.

For undergraduates. The structure of the American legal system including the courts; American legal culture; the legal profession and its social role; the scope and reach of the legal system; the background and impact of legal regulation; criminal justice; civil rights and civil liberties; and the relationship between the American legal system and American society in general.

Same as: POLISCI 122, PUBLPOL 302A.

AMSTUD 183. Border Crossings and American Identities. 5 Units.

How novelists, filmmakers, and poets perceive racial, ethnic, gender, sexual preference, and class borders in the context of a national discussion about the place of Americans in the world. How Anna Deavere Smith, Sherman Alexie, or Michael Moore consider redrawing such lines so that center and margin, or self and other, do not remain fixed and divided. How linguistic borderlines within multilingual literature by Caribbean, Arab, and Asian Americans function. Can Anzaldúa's conception of borderlands be constructed through the matrix of language, dreams, music, and cultural memories in these American narratives? Course includes examining one's own identity.

Same as: CSRE 183.

AMSTUD 185. American Studies Internship. 1-3 Units.

Restricted to declared majors. Practical experience working in a field related to American Studies for six to ten weeks. Students make internship arrangements with a company or agency, under the guidance of a sponsoring faculty member, and with the consent of the director or a program coordinator of American Studies. Required paper focused on a topic related to the internship and the student's studies. May be repeated for credit.

AMSTUD 186. Tales of Three Cities: New York, Chicago, Los Angeles. 5 Units.

How urban form and experience shape literary texts and how literary texts participate in the creation of place, through the literature of three American cities as they ascended to cultural and iconographical prominence: New York in the early to mid 19th century; Chicago in the late 19th and early 20th centuries; and Los Angeles in the mid to late 20th century.

Same as: ENGLISH 186.

AMSTUD 186A. American Hauntings. 5 Units.

Cultural, psychological, social, and political dynamics of haunting in American literature, from the early national period to the late 20th century. Sources include ghost stories and other instances of supernatural, emotional, or mental intervention. Authors include Charles Brockden Brown, Washington Irving, Edgar Allan Poe, Nathaniel Hawthorne, Louisa May Alcott, Charlotte Perkins Gilman, Charles Chesnut, Henry James, Edith Wharton, Toni Morrison, and Stephen King.

Same as: ENGLISH 186A.

AMSTUD 195. Individual Work. 1-5 Units.**AMSTUD 201. History of Education in the United States. 3-5 Units.**

How education came to its current forms and functions, from the colonial experience to the present. Focus is on the 19th-century invention of the common school system, 20th-century emergence of progressive education reform, and the developments since WW II. The role of gender and race, the development of the high school and university, and school organization, curriculum, and teaching.

Same as: EDUC 201, HISTORY 158B.

AMSTUD 210. Critical Theory and The Environment. 3-5 Units.

Critical theoretical approaches (such as cultural studies, Marxism, postcolonial theory, cultural geography, feminism, and science studies) have generally been underutilized as methodologies for grappling with environmental situations, yet they hold much promise for addressing their complexity. This course asks: How does critical theory about the environment construe the current situation? What kinds of political or technological solutions do these theories call for or imply? The first half of the seminar introduces critical approaches and methodologies in relation to the environment. In the second section, we will use a variety of theoretical approaches to address environmental justice, water, agriculture, toxics, and animals.

Same as: ANTHRO 210B, MTL 210.

AMSTUD 214. The American 1960s: Thought, Protest, and Culture. 5 Units.

The meaning of the American 60s emphasizing ideas, culture, protest, and the new sensibility that emerged. Topics: black protest, the new left, the counterculture, feminism, the new literature and journalism of the 60s, the role of the media in shaping dissent, and the legacy of 60s protest. Interpretive materials from film, music, articles, and books.

AMSTUD 226. Race and Racism in American Politics. 5 Units.

Topics include the historical conceptualization of race; whether and how racial animus reveals itself and the forms it might take; its role in the creation and maintenance of economic stratification; its effect on contemporary U.S. partisan and electoral politics; and policy making consequences.

Same as: CSRE 226, POLISCI 226, POLISCI 326.

AMSTUD 240A. Pre-Honors Seminar. 2-5 Units.

Methods, interpretations, and issues pertinent to honors work in American Studies. Open to juniors interested in honors.

AMSTUD 244. The Visual Culture of the American Home Front, 1941-1945. 5 Units.

How does home front of WWII look now? What sort of meanings appear with the vantage of more than sixty years' distance? Examining Hollywood films from those years - films made during the war but mostly not directly about the war - the seminar focuses on developing students' abilities to write emotion-based criticism and history. Weekly short papers, each one in response to a film screening, are required. Among the films screened: *Shadow of a Doubt*, *Gaslight*, *I Walked with a Zombie*, *The Best Years of Our Lives*.

Same as: ARTHIST 244.

AMSTUD 250. Senior Research. 1-15 Units.

Research and writing of senior honors thesis under the supervision of a faculty member. The final grade for the thesis is assigned by the chair based on the evaluations of the primary thesis adviser and a second reader appointed by the program. Prerequisite: consent of chair.

AMSTUD 251C. The American Enlightenment. 5 Units.

Eighteenth century America was like a laboratory for exciting new social, political, religious, scientific, and artistic theories that we collectively call "the Enlightenment." With readings in original texts and studies of material culture, examines ways in which eighteenth century Americans applied Enlightenment thinking to some of the most important problems and questions of their time. What was the best kind of government, and how could this be known? Was the new world of America fundamentally different or the same as Europe, and did animals, plants, and people improve or worsen there? What creatures (children, apes, women, slaves) were considered unreasonable in the Age of Reason, and why? What was the place of religion and passion in the Age of Reason?

Same as: HISTORY 251C.

AMSTUD 255D. Racial Identity in the American Imagination. 4-5 Units.

Major historical transformations shaping the understanding of racial identity and how it has been experienced, represented, and contested in American history. Topics include: racial passing and racial performance; migration, immigration, and racial identity in the urban context; the interplay between racial identity and American identity; the problems of class, gender, and sexuality in the construction of racial identity. Sources include historical and legal texts, memoirs, photography, literature, film, and music.

Same as: AFRICAAM 255, CSRE 255D, HISTORY 255D, HISTORY 355D.

AMSTUD 256. U.S.-China Relations: From the Opium War to Tiananmen. 4-5 Units.

The history of turbulent relations, military conflict, and cultural clashes between the U.S. and China, and the implications for the domestic lives of these increasingly interconnected countries. Diplomatic, political, social, cultural, and military themes from early contact to the recent past. Same as: HISTORY 256, HISTORY 356.

AMSTUD 257. Journalism and Imaginative Writing in America. 5 Units.

Walt Whitman spent twenty-five years as a journalist before publishing his first book of poems. Mark Twain was a journalist for twenty years before publishing his first novel. Topics include examination of how writers; backgrounds in journalism shaped the poetry or fiction for which they are best known; study of recent controversies surrounding writers who blurred the line between journalism and fiction. Writers include Whitman, Fanny Fern, Twain, Pauline Hopkins, Theodore Dreiser, Charlotte Perkins Gilman, Ernest Hemingway, Meridel LeSueur. Same as: COMM 278, ENGLISH 257.

AMSTUD 258. Topics in the History of Sexuality: Sexual Violence. 4-5 Units.

Recent historical interpretations of sexual violence, with particular attention to the intersections of gender and race in the construction of rape, from early settlement through the twentieth century. Topics include the legal prosecution of rape in Early America; the racialization of rape in the U.S.; lynching and anti-lynching in the U.S.; and feminist responses to sexual violence.

Same as: CSRE 192E, FEMST 258, FEMST 358, HISTORY 258, HISTORY 358.

AMSTUD 261A. Geography, Time, and Trauma in Asian American Literature. 5 Units.

The notion that homes can be stable locations for cultural, racial, ethnic, and similarly situated identity categories. The possibility that there really is no place like home for Asian American subjects. How geography, landscape, and time situate traumas within fictional Asian American narratives.

Same as: ASNAMST 187, ENGLISH 261A.

AMSTUD 261B. East Goes West: Transnational Asia/Pacific Spatial Geographies. 5 Units.

East goes west as a metaphor to invoke the conceptions of fantasy and desire that play out in transnational scope. What attracts diasporic Asian/American subjects to the locations that they travel to, whether it be an identified homeland with which a character attaches a strong affinity, or to a new country where the promise of economic possibilities await?

Same as: ASNAMST 261B, ENGLISH 261B.

AMSTUD 261E. Mixed Race Literature in the U.S. and South Africa. 5 Units.

As scholar Werner Sollors recently suggested, novels, poems, stories about interracial contacts and mixed race constitute an orphan literature belonging to no clear ethnic or national tradition. Yet the theme of mixed race is at the center of many national self-definitions, even in our U.S. post-Civil Rights and South Africa's post-Apartheid era. This course examines aesthetic engagements with mixed race politics in these trans- and post-national dialogues, beginning in the 1700s and focusing on the 20th and 21st centuries.

Same as: AFRICAAM 261E, ENGLISH 261E.

AMSTUD 261F. Gender and Sexuality in Asian American Literature. 5 Units.

How writers and representations dialogue, challenge, resist, and complicate such formative constructions of gendered/sexual identities. How queer Asian Americans face multiple negations that include potential expulsion from their own families and from various communities. Authors include Bharati Mukherjee, Russell Leong, Suki Kim, Shawn Wong, Louis Chu, Lawrence Chua, Catherine Liu, Jessica Hagedorn, Timothy Liu, Shani Mootoo, David Mura, among others. Secondary readings will include literary criticism, feminist and queer theory.

Same as: ASNAMST 188, ENGLISH 261F, FEMST 261F, FEMST 361F.

AMSTUD 262D. African American Poetics. 5 Units.

Examination of African American poetic expressive forms from the 1700s to the 2000s, considering the central role of the genre—from sonnets to spoken word, from blues poetry to new media performance—in defining an evolving literary tradition and cultural identity.

Same as: AFRICAAM 262D, ENGLISH 262D.

AMSTUD 262F. Transnational American Studies. 5 Units.

Exploration of the transnational turn in American Studies, focusing on how transnational perspectives enrich and complicate our understanding of American literature, history and the arts. Readings include recent work in transnational American Studies. Topics include experiments with ways of using digital technology to allow archival materials in different locations to be in conversation with each other.

Same as: ENGLISH 262F, ENGLISH 362F.

AMSTUD 265. Writing Asian American History. 5 Units.

Recent scholarship in Asian American history, with attention to methodologies and sources. Topics: racial ideologies, gender, transnationalism, culture, and Asian American art history. Primary research paper.

Same as: HISTORY 265, HISTORY 365.

AMSTUD 267. Religion in Twentieth Century American Life. 5 Units.

Why is the United States such a religious country? Over 90% of Americans profess a belief in God, and more than half identify religion as "very important" to their lives. In this seminar, we will examine the durability and power of religion in modern American history, from the emergence of Christian fundamentalism to the theology of the Cold war to the conflict with radical Islam. Other topics include: the Holocaust, Civil Rights and religion, gender and sexuality.

Same as: HISTORY 267.

Anesthesia Courses

ANES 76Q. The Psychology and Psychopharmacology of Abused Drugs. 2 Units.

Preference to sophomores. Explores the psychology and pharmacology of abused drugs, both legal and illegal. Discusses pharmaceutical compounds such as ecstasy and LSD, as well as medicinal drug classes with abuse potential (examples being opioids, benzodiazepines, and amphetamines). Also covers lesser-known psychotropics (phenethylamines and tryptamines, and naturally-occurring compounds with controversial and shifting legal statuses, like marijuana and salvia divinorum). Examines the physiological mechanisms by which these drugs exert their effects on human experience, as well as the health implications, history, cultural impact, and legal issues that revolve around these psychoactive chemicals.

ANES 199. Undergraduate Research. 1-18 Units.

Allows for qualified students to undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

ANES 202. Anesthesiology and Pathophysiologic Implications for the Perioperative Patient. 1 Unitss.

Provides participants a patient-care-related review of organ physiology and an in- depth discussion of the pathophysiologic mechanisms at work in the perioperative period that influence outcome in the surgical patient and their management. Organ systems addressed include cardiovascular, respiratory, renal, hematologic, and cerebral. Subject matter including airway management, ventilatory support, transfusion practices and the acute management of shock provides useful information for all students currently or in the future involved in acute care of the critically ill patient. Additional topics specific to anesthesia, including anesthetic pharmacology. Lecturers are Stanford anesthesia faculty and visiting guest faculty. Prerequisite: completion of first year curriculum is strongly encouraged.

ANES 207. Medical Acupuncture. 2 Units.

Acupuncture is part of a comprehensive system of traditional Chinese Medicine developed over the past two millennia. This course reviews the history and theoretical basis of acupuncture for the treatment of various diseases as well as for the alleviation of pain. Issues related to the incorporation of acupuncture into the current health care system and the efficacy of acupuncture in treating various diseases are addressed. Includes practical, hands-on sections.

ANES 215. Journal Club for Neuroscience, Behavior and Cognition Scholarly Concentration. 1 Unitss.

Review of current literature in both basic and clinical neuroscience in a seminar format consisting of both faculty and student presentations.

ANES 243. Introduction to Integrative Medicine. 1 Unitss.

Presentations by local, national, and international experts in various modalities of integrative medicine commonly used by patients in the US, including mind-body medicine (biofeedback, clinical hypnosis, meditation, yoga); traditional whole systems of medicine (traditional Chinese medicine, Ayurveda); biological therapies (botanical medicine, supplements, herbal medicine); manipulative therapies (chiropractic, massage); and acupuncture. Lectures focus on evidence supporting the potential value of various treatment modalities and explanations of both the traditional and proposed scientific mechanisms of actions. Most classes include an experiential portion.

Same as: FAMMED 243.

ANES 280. Early Clinical Experience in Anesthesia. 1-2 Units.

Provides an observational experience as determined by the instructor and student. Prerequisite: consent of instructor.

ANES 299. Directed Reading in Anesthesiology. 1-18 Units.

Prerequisite: consent of instructor.

ANES 370. Medical Scholars Research. 4-18 Units.

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

ANES 399. Graduate Research. 1-18 Units.

Students undertake investigations sponsored by individual faculty members. Problems related to metabolism, toxicity, and mechanisms of anesthesia; pharmacologic studies involving pain management; the genetic and molecular basis of hemodynamic insufficiency. Animal studies may be included. Interested students should contact Drs. Trudell, MacIver, Clark, Giffard, Patterson, Angelotti, Drover, Chu, or Angst.

Anthropology Courses

ANTHRO 1. Introduction to Cultural and Social Anthropology. 5 Units.

Crosscultural anthropological perspectives on human behavior, including cultural transmission, social organization, sex and gender, culture change, technology, war, ritual, and related topics. Case studies illustrating the principles of the cultural process. Films.

Same as: ANTHRO 201.

ANTHRO 1S. Introduction to Cultural and Social Anthropology. 3-5 Units.

Crosscultural anthropological perspectives on human behavior, including cultural transmission, social organization, sex and gender, culture change, technology, war, ritual, and related topics. Case studies illustrating the principles of the cultural process. Films.

Same as: ANTHRO 101S.

ANTHRO 3. Introduction to Prehistoric Archeology. 3-5 Units.

Aims, methods, and data in the study of human society's development from early hunters through late prehistoric civilizations. Archaeological sites and remains characteristic of the stages of cultural development for selected geographic areas, emphasizing methods of data collection and analysis appropriate to each.

Same as: ARCHLGY 1.

ANTHRO 4. Language and Culture. 4-5 Units.

Comparative approach, using examples from many languages. Emphasis is on generally non-Western speech communities. Topics include: the structure of language; the theory of signs; vocabulary and culture; grammar, cognition, and culture (linguistic relativism and determinism); encodability of cultural information in language; language adaptiveness to social function; the ethnography of speaking; registers; discourse (conversation, narrative, verbal art); language and power; language survival and extinction; and linguistic ideology (beliefs about language).

ANTHRO 6. Human Origins. 5 Units.

The human fossil record from the first non-human primates in the late Cretaceous or early Paleocene, 80-65 million years ago, to the anatomically modern people in the late Pleistocene, between 100,000 to 50,000 B.C.E. Emphasis is on broad evolutionary trends and the natural selective forces behind them.

Same as: ANTHRO 206, HUMBIO 6.

ANTHRO 10SC. Darwin, Evolution, and Galapagos. 2 Units.

The tiny remote islands of Galápagos have played a large and central role in the study of evolution. Not surprisingly, they have also been central to the study of conservation. The fascinating adaptations of organisms to the unique ecosystems of the archipelago have left them particularly vulnerable to outside introductions. Drawing on lessons learned in Galapagos from Darwin's time to the present, this seminar explores evolution, conservation, and their connection in the Galapagos. Using case-study material on finches, iguanas, tortoises, cacti, Scalesia plants, and more, we will explore current theory and debate about adaptation, sexual selection, speciation, adaptive radiation, and other topics in evolution. Similarly, we will explore the special challenges Galápagos poses today for conservation, owing to both its unusual biota and the increasing human impact on the archipelago. This course includes an intensive eleven-day expedition to Galápagos to observe firsthand the evolutionary phenomena and conservation issues discussed in class. A chartered ship will serve as our floating classroom, dormitory, and dining hall as we work our way around the archipelago to visit as many as ten islands. For this portion of the class, undergraduates will be joined by a group of Stanford alumni and friends in a format called a Stanford "Field Seminar." Because our class time on campus is limited to one week before travel, students will be required to complete all course readings over the summer. Both on campus and in South America, the course emphasizes student contributions and presentations. Students will be asked to lead discussions and carry out literature research on the evolutionary and conservation biology of particular Galápagos species. The final assignment for the seminar is to complete a seven- to ten-page paper on the evolutionary biology and conservation challenges of a particular organism or adaptation and to present the main findings of that paper in a joint seminar of undergrads and alumni as we travel in Galápagos. Note: Students will arrive on campus and will be housed at Stanford until we leave for Galápagos. Travel to Galápagos will be provided and paid by Sophomore College (except incidentals) and is made possible by the support of the Stanford Alumni Association Travel/Study Program and generous donors. Students will return to campus late afternoon or evening on Sunday, September 23, the day before the fall term begins. Same as: HUMBIO 17SC.

ANTHRO 12. Anthropology and Art. 5 Units.

Modernity. How the concept of art appears timeless and commonsensical in the West, and with what social consequences. Historicizing the emergence of art. Modernist uses of primitive, child art, asylum, and outsider art.

ANTHRO 14. Introduction to Anthropological Genetics. 3 Units.

For upper division undergraduates. The extent and pattern of variation among human genomes, the origin of these patterns in human evolution, and the social and medical impact of recent discoveries. Topics include: the Human Genome Project; human origins; ancient DNA; genetic, behavioral, linguistic, cultural, and racial diversity; the role of disease in shaping genetic diversity; DNA forensics; genes and reproductive technology.

ANTHRO 15. Sex and Gender. 3 Units.

Commonality and diversity of gender roles in crosscultural perspective. Cultural, ecological, and evolutionary explanations for such diversity. Theory of the evolution of sex and gender, changing views about men's and women's roles in human evolution, conditions under which gender roles vary in contemporary societies, and issues surrounding gender equality, power, and politics.

ANTHRO 16. Native Americans in the 21st Century: Encounters, Identity, and Sovereignty in Contemporary America. 5 Units.

What does it mean to be a Native American in the 21st century? Beyond traditional portrayals of military conquests, cultural collapse, and assimilation, the relationships between Native Americans and American society. Focus is on three themes leading to in-class moot court trials: colonial encounters and colonizing discourses; frontiers and boundaries; and sovereignty of self and nation. Topics include gender in native communities, American Indian law, readings by native authors, and Indians in film and popular culture. Same as: NATIVEAM 16.

ANTHRO 18. Peopling of the Globe: Changing Patterns of Land Use and Consumption Over the Last 50,000 Years. 3-5 Units.

Fossil, genetic and archaeological evidence suggest that modern humans began to disperse out of Africa about 50,000 years ago. Subsequently, humans have colonized every major landmass on earth. This class introduces students to the data and issues regarding human dispersal, migration and colonization of continents and islands around the world. We explore problems related to the timing and cause of colonizing events, and investigate questions about changing patterns of land use, demography and consumption. Students are introduced to critical relationships between prehistoric population changes and our contemporary environmental crisis. Same as: ARCHLGY 12, EARTHYSYS 21, HUMBIO 182.

ANTHRO 19Q. Hauntings, Visions, and Prophecy. 1-3 Units.

Preference to sophomores. Why do people see ghosts? Why do people believe that stars foretell the future? When do people see demons and angels? Focus is on the conditions under which people experience themselves as having sensory evidence of supernatural phenomena and the role of training and expectation in the process. Intellectual exploration of what is known from the ethnographic, historical, and psychological record. Practical experimental projects involve attempting to induce positive supernatural experience. Prerequisite: consent of instructor.

ANTHRO 21N. The Anthropology of Globalization. 4 Units.

Preference to freshmen. Anthropological approach to how cultural change, economic restructuring, and political mobilization are bound up together in the process of globalization.

ANTHRO 22. Archaeology of North America. 3-5 Units.

Why and how people of N. America developed. Issues and processes that dominate or shape developments during particular periods considering the effects of history and interactions with physical and social environment. Topics include the peopling of the New World, explaining subsequent diversity in substance and settlement adaptations, the development of social complexity, and the impact of European contact.

ANTHRO 22N. Ethnographies of North America: An Introduction to Cultural and Social Anthropology. 3-4 Units.

Preference to freshmen. Ethnographic look at human behavior, including cultural transmission, social organization, sex and gender, culture change, and related topics in N. America. Films.

ANTHRO 23N. Glimpses of Divinity. 3 Units.

Preference to freshmen. How human beings search for and identify the presence of the divine in everyday human life. Sources include spiritual classics in the Christian, Jewish, and Hindu traditions including works by Augustine, Teresa of Avila, Jonathan Edwards, the Bhagavad Gita, the Zohar, and some ethnographies of non-literate traditions.

ANTHRO 24N. Maya Hieroglyphic Writing. 4 Units.

Preference to freshmen. Decipherment of classic Maya writing. Principles of archaeological decipherment. Maya calendrical, astronomical, historical, mythological, and political texts on stone, wood, bone, shell, murals, ceramics, and books (screenfold codices). Archaeology and ethnohistory of Maya scribal practice and literacy. Related Mesoamerican writing systems. The evolution of writing and the relevance of writing to theories of culture and civilization.

ANTHRO 25N. Contemporary Japanese Popular Culture. 3 Units.

This is a seminar focusing on the intersection between politics and popular culture in contemporary Japan. It will survey a range of social and political implications of practices of popular culture. Topics include representations of gender in J-pop, manga, and anime, the otaku culture and its pathologization. Students will be introduced to theories of popular culture in general, and a variety of contemporary anthropological studies on Japanese popular culture in particular as well.

ANTHRO 26N. God and the Supernatural. 3-5 Units.

This course explores the conditions under which people have experiences that they identify as "supernatural": experiences of something that is not physically present. We will explore the cultural and psychological dimensions of this very real phenomenon. We will not, however, make ontological judgments about whether something which is experienced as externally present is in fact externally present: in other words, this is a class about culture and psychology, not about metaphysics. We will do experimental work, using our selves and fellow classmates, as subjects, to understand who, when and how people have experiences that they deem "supernatural."

ANTHRO 27N. Ethnicity and Violence: Anthropological Perspectives. 3-5 Units.

Ethnicity is one of the most compelling and most modern ways in which people - in the midst of considerable global and local uncertainty - all across the world imagine and narrate themselves. This seminar will take an anthropological look at both the modernity and the compulsions of ethnic allegiance, and, why struggles over ethnic identity are so frequently violent. Our questions will be both historical ¿ how, why and when did people come to think of themselves as possessing different ethnic identities - and contemporary ¿ how are these identities lived, understood, narrated, and transformed and what is the consequence of such ethnicisation. We follow this through anthropological perspectives which ask persistently how people themselves locally narrate and act upon their experiences and histories. Through this we will approach some of the really big and yet everyday questions that many of us around the world face: how do we relate to ourselves and to those we define as others; and how do we live through and after profound violence? The seminar will take these larger questions through a global perspective focusing on cases from Rwanda and Burundi, India, Sri Lanka, Northern Ireland, Guatemala, and the countries of Former Yugoslavia among others. These cases cover a broad canvas of issues from questions of historicity, racial purity, cultural holism, and relations to the state, to contests over religious community, indigeneity, minority identities, globalization, gender, and generation.

ANTHRO 28N. Secularism and its Critics. 3-5 Units.

Secularism is often taken to be a necessary prerequisite for democracy in the modern world. The separation of religion and politics is often written into constitutions as a fundamental priority. Yet around the world, growing numbers of religious movements have sought to dispute the legitimacy of secularism. Social scientists, including anthropologists, are beginning to research the forms of domination and political violence that have been justified in the name of secularism. This course seeks to make sense of this global debate about secularism. It does so by taking up an anthropological perspective: much as anthropologists might study culture, religion, or kinship, we will interrogate secularism as a comparative social artifact, constituted by historically specific repertoires of signs, identities, everyday practices, and institutional powers. The course focuses on case studies in the United States, Western Europe, the Middle East, and South Asia.

ANTHRO 30Q. The Big Shift: An Anthropological Approach to Wealth, Migration, and the New Margins of America. 4 Units.

Is the middle class shrinking? How do people who live at the extremes of American society- the super rich, the working poor and those who live on the margins, imagine and experience "the good life"? How do we understand phenomena such as gang cultures, addiction and the realignment of white consciousness? This class uses the methods and modes of ethnographic study in an examination of American culture. Ethnographic materials range from an examination of the new American wealth boom of the last 20 years (Richistan by Robert Frank) to the extreme and deadly world of the invisible underclass of homeless addicts on the streets of San Francisco (Righteous Dopefiend by Phillippe Bourgois and Jeff Schonberg). The experiences of Hispanic immigrants and the struggle to escape gang life in Los Angeles are highlighted in the story of Homeboy Industries a job creation program initiated by a priest working in LA's most deadly neighborhoods (G-Dog and the Homeboys by Celeste Fremon). Finally in Searching for Whitoopia: an improbable journey into the heart of White America, Rich Benjamin explores the creation on ethnic enclaves (whitopias) as fear over immigration and the shrinking white majority redefine race consciousness in the 21st century. Each of these narratives provides a window into the various ways in which Americans approach the subjects of wealth and the good life, poverty and the underclass, and the construction of class, race, and gender in American society. Students will not be required to have any previous knowledge, just curiosity and an open mind.

ANTHRO 31. Ecology, Evolution, and Human Health. 3-5 Units.

Ecology, Evolution, and Human Health Human ecology, environments, adaptation and plasticity, and their relationship to health and well-being considered in the broad comparative context. Topics include human population history, subsistence ecology, demography, reproductive decision making, urbanization, migration, infectious disease, the physiology of stress and the inflammatory response, social capital and social networks, nutrition, nutritional deficiencies, growth, and social inequalities. No prior course work in ecological or medical anthropology required. Same as: ANTHRO 331A.

ANTHRO 32. Theories in Race and Ethnicity: A Comparative Perspective. 5 Units.

This undergraduate course employs an anthropological and historical perspective to introduce students to ideas and concepts of race and ethnicity that emerged primarily in Europe and the United States in the eighteenth and nineteenth centuries and that continue to shape contemporary racial attitudes, interactions, and inequalities. Ideas about race and ethnicity forged outside the U.S. and case studies from other nations are presented to broaden students' understanding and to overcome the limitations of an exclusive focus on the U.S. This course is geared to sophomores and juniors who have already taken at least one course on race and ethnicity, anthropology, African American Studies, Asian American Studies, Chicana/o Studies, Jewish Studies or Native American Studies. Same as: CSRE 32.

ANTHRO 33. Introduction to Comparative Studies in Race and Ethnicity. 5 Units.

How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. Same as: CSRE 196C, ENGLISH 172D, PSYCH 155, SOC 146.

ANTHRO 55A. Introduction to Archaeobotany. 5 Units.

The aim of this course is to provide a short introduction to archaeobotany. An overview of types of archaeobotanical remains will include an examination of macrobotanical remains (seeds, charcoal), microfossil remains (starch, pollen, phytoliths) and molecular remains (aDNA, isotopes). The ways in which various types of plant remains have been used will be discussed through case studies. Major debates that archaeobotanical research has shed light on, including the origins of agriculture and issues around domestication will also be examined. Some practical work will allow students to gain familiarity with botanical nomenclature and some archaeobotanical protocols and plant identification techniques. Students will look at microfossil residues from local grinding slabs and write a short paper on the residues recovered. They will also look at seed remains from either Chinese or local flotation samples using microscopes in the lab. Same as: ARCHLGY 55.

ANTHRO 77. Japanese Society and Culture. 5 Units.

Focus is on power, identity, and the politics of knowledge production. How transnational interactions influence Japanese identity. How anthropological knowledge has contributed to understanding Japanese culture and society. Gender, race and class; contemporary ethnographies. Modernity and globalization. Cultural politics, domestic work, labor management, city planning, ad images, anime, martial art, fashion, theater, leisure, and tourism. Same as: ANTHRO 277.

ANTHRO 82. Medical Anthropology. 3-5 Units.

Emphasis is on how health, illness, and healing are understood, experienced, and constructed in social, cultural, and historical contexts. Topics: biopower and body politics, gender and reproductive technologies, illness experiences, medical diversity and social suffering, and the interface between medicine and science. Same as: ANTHRO 282.

ANTHRO 90A. History of Archaeological Thought. 5 Units.

Introduction to the history of archaeology and the forms that the discipline takes today, emphasizing developments and debates over the past five decades. Historical overview of culture, historical, processual and post-processual archaeology, and topics that illustrate the differences and similarities in these theoretical approaches. Same as: ARCHLGY 103.

ANTHRO 90B. Theory of Cultural and Social Anthropology. 5 Units.

Preference to Anthropology majors. Anthropological interpretations of other societies contain assumptions about Western societies. How underlying assumptions and implicit categories have influenced the presentation of data in major anthropological monographs. Emphasis is on Karl Marx, Emile Durkheim, Max Weber, and anthropological analyses of non-Western societies.

ANTHRO 90C. Theory of Ecological and Environmental Anthropology. 5 Units.

Dynamics of culturally inherited human behavior and its relationship to social and physical environments. Topics include a history of ecological approaches in anthropology, subsistence ecology, sharing, risk management, territoriality, warfare, and resource conservation and management. Case studies from Australia, Melanesia, Africa, and S. America. Same as: HUMBIO 118.

ANTHRO 90D. Social Theory in the Anthropological Sciences. 5 Units.

Required of majors. Foundational course in the history of social theory in anthropology from the late 19th century to the present. Major approaches to human culture and society: symbolic, social, material, and psychological. Questions about the role of theory in anthropology and how it can be applied to human issues. (HEF IV).

ANTHRO 91. Method and Evidence in Anthropology. 5 Units.

This course provides a broad introduction to various ways of designing anthropological questions and associated methods for collecting evidence and supporting arguments. We review the inherent links between how a question is framed, the types of evidence that can address the question, and way that data are collected. Research activities such as interviewing, participant observation, quantitative observation, archival investigation, ecological survey, linguistic methodology, tracking extended cases, and demographic methods are reviewed. Various faculty and specialists will be brought in to discuss how they use different types of evidence and methods for supporting arguments in anthropology.

ANTHRO 91A. Archaeological Methods. 5 Units.

Methodological issues related to the investigation of archaeological sites and objects. Aims and techniques of archaeologists including: location and excavation of sites; dating of places and objects; analysis of artifacts and technology and the study of ancient people, plants, and animals. How these methods are employed to answer the discipline's larger research questions. Same as: ARCHLGY 102.

ANTHRO 92A. Undergraduate Research Proposal Writing Workshop. 2-3 Units.

Practicum. Students develop independent research projects and write research proposals. How to formulate a research question; how to integrate theory and field site; and step-by-step proposal writing.

ANTHRO 92B. Undergraduate Research Proposal Writing Workshop. 2-3 Units.

Practicum. Students develop independent research projects and write research proposals. How to formulate a research question; how to integrate theory and field site; and step-by-step proposal writing.

ANTHRO 93. Prefield Research Seminar. 5 Units.

For Anthropology majors only; non-majors register for 93B. Preparation for anthropological field research in other societies and the U.S. Data collection techniques include participant observation, interviewing, surveys, sampling procedures, life histories, ethnohistory, and the use of documentary materials. Strategies of successful entry into the community, research ethics, interpersonal dynamics, and the reflexive aspects of fieldwork. Prerequisites: two ANTHRO courses or consent of instructor.

ANTHRO 93B. Prefield Research Seminar: Non-Majors. 5 Units.

Preparation for anthropological field research in other societies and the U.S. Data collection techniques include participant observation, interviewing, surveys, sampling procedures, life histories, ethnohistory, and the use of documentary materials. Strategies for successful entry into the community, research ethics, interpersonal dynamics, and the reflexive aspects of fieldwork. Service Learning Course (certified by Haas Center).

ANTHRO 94. Postfield Research Seminar. 5 Units.

Goal is to produce an ethnographic report based on original field research gathered during summer fieldwork, emphasizing writing and revising as steps in analysis and composition. Students critique classmates' work and revise their own writing in light of others' comments. Ethical issues in fieldwork and ethnographic writing, setting research write-up concerns within broader contexts.

ANTHRO 95. Research in Anthropology. 1-10 Units.

Independent research conducted under faculty supervision, normally taken junior or senior year in pursuit of a senior paper or an honors project. May be repeated for credit.

ANTHRO 95B. Directed Study in Honors and Senior Papers. 1-10 Units.

Taken in the final quarter before graduation. Independent study and work on senior paper for students admitted to the program. Prerequisite: consent of program adviser and instructor.

ANTHRO 96. Directed Individual Study. 1-10 Units.

Prerequisite: consent of instructor.

ANTHRO 97. Internship in Anthropology. 1-10 Units.

Opportunity for students to pursue their specialization in an institutional setting such as a laboratory, clinic, research institute, or government agency. May be repeated for credit. Service Learning Course (certified by Haas Center).

ANTHRO 98B. Digital Methods in Archaeology. 3-5 Units.

This is a course on digital technologies in archaeology used for documentation, visualization, and analysis of archaeological spaces and objects. Emphasizes hands-on approaches to image manipulation, virtual reality, GIS, CAD, and photogrammetry modeling methods.

Same as: ANTHRO 298B.

ANTHRO 98E. Catalhoyuk and Neolithic Archaeology. 1-3 Units.

Catalhoyuk as a case study to understand prehistoric social life during the Neolithic in Anatolia and the Near East. Developments in agriculture, animal domestication, material technology, trade, art, religion, skull cults, architecture, and burial practices. Literature specific to Catalhoyuk and other excavations throughout the Anatolian and Levantine regions to gain a perspective on diversity and variability throughout the Neolithic. The reflexive methodology used to excavate Catalhoyuk, and responsibilities of excavators to engage with larger global audiences of interested persons and stakeholders.

ANTHRO 98F. Field School Training Workshop. 1-3 Units.

Provides students important preparatory orientation to anthropology as well as the methods, ethics, and logistics of the specific field school each student will be attending in the summer.

ANTHRO 100A. India's Forgotten Empire: The Rise and Fall of Indus Civilization. 3 Units.

How and why cities with public baths, long-distance trade, sophisticated technologies, and writing emerged, maintained themselves, and collapsed in the deserts of present-day Pakistan and India from 2500 to 1900 B.C.

ANTHRO 100C. Chavin de Huantar Research Seminar. 2-5 Units.

For participants in fieldwork at Chavín de Huantar. Archaeological research techniques, especially as applied at this site. Students work on data from the previous field season to produce synthetic written materials. Maybe repeated for credit.

ANTHRO 101. The Aztecs and Their Ancestors: Introduction to Mesoamerican Archaeology. 3-5 Units.

The prehispanic cultures of Mesoamerica through archaeology and ethnohistory, from the archaic period to the Spanish conquest in the 16th century.

ANTHRO 101A. Archaeology as a Profession. 5 Units.

Academic, contract, government, field, laboratory, museum, and heritage aspects of the profession.

Same as: ARCHLGY 107A.

ANTHRO 101S. Introduction to Cultural and Social Anthropology. 3-5 Units.

Crosscultural anthropological perspectives on human behavior, including cultural transmission, social organization, sex and gender, culture change, technology, war, ritual, and related topics. Case studies illustrating the principles of the cultural process. Films.

Same as: ANTHRO 1S.

ANTHRO 102. Urban Ethnography. 5 Units.

Ethnographic research and writing focuses on the ways our lives are shaped by interacting forces such as history, political economy, and creative cultural practices. In the last fifty years, more and more cultural anthropology has been carried out in urban contexts, due to both urbanization around the world and changes in anthropology as a field. This seminar focuses on careful reading and analysis of book-length ethnographies about urban cultures, people and dynamics to consider what the theory and methodological tools of anthropology have to offer us as we seek to better understand ¿the city.¿ Readings include a variety of approaches to ethnographic research in and/or about cities, with a mix from different eras and about different cities around the world.

Same as: URBANST 140,.

ANTHRO 102. Urban Ethnography. 5 Units.

Ethnographic research and writing focuses on the ways our lives are shaped by interacting forces such as history, political economy, and creative cultural practices. In the last fifty years, more and more cultural anthropology has been carried out in urban contexts, due to both urbanization around the world and changes in anthropology as a field. This seminar focuses on careful reading and analysis of book-length ethnographies about urban cultures, people and dynamics to consider what the theory and methodological tools of anthropology have to offer us as we seek to better understand ¿the city.¿ Readings include a variety of approaches to ethnographic research in and/or about cities, with a mix from different eras and about different cities around the world.

Same as: URBANST 140,.

ANTHRO 102. Urban Ethnography. 5 Units.

Ethnographic research and writing focuses on the ways our lives are shaped by interacting forces such as history, political economy, and creative cultural practices. In the last fifty years, more and more cultural anthropology has been carried out in urban contexts, due to both urbanization around the world and changes in anthropology as a field. Same as: URBANST 140,.

ANTHRO 102. Urban Ethnography. 5 Units.

Ethnographic research and writing focuses on the ways our lives are shaped by interacting forces such as history, political economy, and creative cultural practices. In the last fifty years, more and more cultural anthropology has been carried out in urban contexts, due to both urbanization around the world and changes in anthropology as a field. This seminar focuses on careful reading and analysis of book-length ethnographies about urban cultures, people and dynamics to consider what the theory and methodological tools of anthropology have to offer us as we seek to better understand ¿the city.¿ Readings include a variety of approaches to ethnographic research in and/or about cities, with a mix from different eras and about different cities around the world.

Same as: URBANST 140,.

ANTHRO 102A. Ancient Civilizations: Complexity and Collapse. 3-5 Units.

How archaeology contributes to understanding prehistoric civilizations. How and why complex social institutions arose, and the conditions and processes behind their collapse. The development of monumental architecture, craft specialization, trade and exchange, and social stratification using examples from the archaeological record. (HEF II, III; DA-B)

Same as: ANTHRO 202A.

ANTHRO 103. The Archaeology of Modern Urbanism. 5 Units.

Seminar. Urbanism as a defining feature of modern life. The perspective of archaeology on the history and development of urban cultures. Case studies are from around the globe; emphasis is on the San Francisco Bay Area megalopolis. Cities as cultural sites where economic, ethnic, and sexual differences are produced and transformed; spatial, material, and consumption practices; and the archaeology of communities and neighborhoods.

ANTHRO 105. Ancient Cities in the New World. 3-5 Units.

Preindustrial urbanism as exemplified by prehispanic New World societies. Case studies: the central and southern highlands of Mesoamerica, and the Maya region. Comparative material from highland S. America. Same as: ANTHRO 205.

ANTHRO 108A. Latin Americans in the Diaspora: Citizenship and Belonging Across Transnational Migration Regimes. 3-5 Units.

In this course we will explore some of the dilemmas of citizenship and belonging in the era of migration, from the point of view of Latin Americans across transnational migration regimes. While "Latin@s" may appear to be a social category specific to the U.S., Latin Americans are also migrating to the European Union, and most especially to Spain, the former colonial metropolis, where new linguistic, cultural and postcolonial issues arise. The course will review some crucial literature on diaspora and transnational studies to scrutinize how Latin Americans are shaping their cosmopolitan experience beyond the US. We will learn about the European Union migratory regime (and compare it to the US) from selected ethnographic material as well as documentary films, movies and biographic fictional narratives. Emphasis will be placed on understanding the challenges of the (de-) coupling of identity and rights in today's globalized societies through analysis of political and cultural practices of Latin Americans in the diaspora.

Same as: ANTHRO 208A.

ANTHRO 108E. Catalhoyuk and Neolithic Archaeology. 3-5 Units.

Catalhoyuk as a case study to understand prehistoric social life during the Neolithic in Anatolia and the Near East. Developments in agriculture, animal domestication, material technology, trade, art, religion, skull cults, architecture, and burial practices. Literature specific to Catalhoyuk and other excavations throughout the Anatolian and Levantine regions to gain a perspective on diversity and variability throughout the Neolithic. The reflexive methodology used to excavate Catalhoyuk, and responsibilities of excavators to engage with larger global audiences of interested persons and stakeholders.

ANTHRO 109. Archaeology: World Cultural Heritage. 5 Units.

Focus is on issues dealing with rights to land and the past on a global scale including conflicts and ethnic purges in the Middle East, the Balkans, Afghanistan, India, Australia, and the Americas. How should world cultural heritage be managed? Who defines what past and which sites and monuments should be saved and protected? Are existing international agreements adequate? How can tourism be balanced against indigenous rights and the protection of the past?

Same as: ANTHRO 209.

ANTHRO 110A. Neandertals and Modern Humans: Origin, Evolution, Interactions. 3 Units.

The expansion out of Africa of our species represents the last spectacular step in the course of Human Evolution. It resulted in the colonization of the whole planet and the replacement of archaic forms of humans in Eurasia. One way to investigate why Homo sapiens has been such a successful species is to compare its evolution with that of its closest relative, the Neandertals. Exploring the bio-cultural processes at work in the two lineages leads to examine some of the main issues in Paleoanthropology and the most recent methodological advances in the field.

Same as: ANTHRO 210A.

ANTHRO 111. Archaeology of Sex, Sexuality, and Gender. 5 Units.

How archaeologists study sex, sexuality, and gender through the material remains left behind by past cultures and communities. Theoretical and methodological issues; case studies from prehistoric and historic archaeology.

Same as: ANTHRO 211.

ANTHRO 111A. Archaeology of the Andes of Argentina. 3-5 Units.

The aim of this course is to provide a panorama of the archaeology of the andean region of Argentina, along some main topics of past and current researches. North andean Argentina has been considered for a long time as subordinated to the major developments in the central Andes and Puna, as if it were in a marginal position that mirrored their history. More than a hundred years of research in the area have produced different insights, which put that affirmation in relative terms. The course will give an overview of major historical contributions and contemporary trends in the archaeological thinking in relation to themes such as time, the space, people, things and nature. An overview of the conceptions and construction of time. Space seen as cultural area; natural environment and built landscape; archaeological areas as national territory. Historical conceptions of people; bodies; social inequality; the past and present others in the archaeological research. Artefacts, classifications and typologies; material archaeological contexts as cultural units; from artefacts to things; past ontologies. Nature and environment; domestication; ecological approaches; agropastoralism; nature/culture. It is expected that by the end of the course students will gain a panorama of the major problems of the archaeology of andean Argentina with historically and theoretically informed perspectives.

Same as: ANTHRO 211A.

ANTHRO 112. Public Archaeology: Market Street Chinatown Archaeology Project. 4-5 Units.

This internship-style course centers on the practice and theory of historical archaeology research and interpretation through a focused study of San Jose's historic Chinese communities. The course includes classroom lectures, seminar discussion, laboratory analysis of historic artifacts, and participation in public archaeology events. Course themes include immigration, urbanization, material culture, landscape, transnational identities, race and ethnicity, gender, cultural resource management, public history, and heritage politics. The course includes required lab sections, field trips, and public service. Transportation will be provided for off-site activities.

Same as: ANTHRO 212, ASNAMST 112.

ANTHRO 112B. Advanced Study in Public Archaeology. 2-5 Units.

This service-learning course is offered only to students who have completed Anthro 112a and wish to deepen their scholarship in public archaeology and heritage practice through continued study. Students enrolled in Anthro 112b complete readings, collections management study, public archaeology events, and community-based research oriented towards their specific interests. Prerequisite: Completion of Anthro 112a AND instructor consent.

ANTHRO 113. Faunal Analysis: Animal Remains for the Archaeologist. 5 Units.

The analysis of fossil animal bones and shells to illuminate the behavior and ecology of prehistoric collectors, especially ancient humans. Theoretical and methodological issues. The identification, counting, and measuring of fossil bones and shells. Labs. Methods of numerical analysis.

Same as: ANTHRO 213, BIO 166, BIO 266.

ANTHRO 114. Prehistoric Stone Tools: Technology and Analysis. 5 Units.

Archaeologists rely on an understanding of stone tools to trace much of what we know about prehistoric societies. How to make, illustrate, and analyze stone tools, revealing the method and theory intrinsic to these artifacts.

Same as: ANTHRO 214.

ANTHRO 114A. Caste, Religion, and Dalit Liberation in India. 2-4 Units.

'Caste' points to systems of social hierarchy based on birth, long prevalent in India, associated with Hinduism but also practiced by non-Hindu groups. 'Dalit' is a modern, politically positive name for the most oppressed caste groups, the so-called 'untouchables.' Though specific to India, the study of caste touches themes relevant to social inequality everywhere. A series of lectures and films by distinguished scholars and directors, illuminating the nature and history of caste and modern movements to end untouchability, Same as: RELIGST 114.

ANTHRO 115A. The Aegean in the Neolithic and Bronze Age. 3-5 Units.

This course provides a survey of Aegean prehistory (7th-2nd millennium BC), focusing on traditions that were picked up or renegotiated, instead of taking a standpoint that evaluates phenomena as steps leading up to a 'state-like' palatial society. It will draw on the region's wealth of data, and will be set within a theoretically informed, problem-oriented framework, aiming to introduce students to current interpretations and debates, mainly through discussion of specific case-studies.

Same as: ANTHRO 215A, ARCHLGY 139, ARCHLGY 239.

ANTHRO 116. Data Analysis for Quantitative Research. 5 Units.

This course allows graduate and advanced undergraduate students in archaeology and anthropology to acquire practical skills in quantitative data analysis. Some familiarity with basic statistical methods is useful but not assumed; the structure of the course will be flexible enough to accommodate a range of student expertise and interests. Topics covered include: statistics and graphics in R; database design, resampling methods, diversity measures, contingency table analysis, and introductory methods in spatial analysis.

Same as: ANTHRO 216.

ANTHRO 117. Acultural Animals as Proxies for Cultural Humans. 5 Units.

The human-animal relationship is dynamic, all encompassing and durable. Without exception, all socio-cultural groups have evidenced complex interactions with the animals around them, both domesticated and wild. However, the individual circumstances of these interactions are hugely complicated, and involve much more than direct human-animal contact, going far beyond this to incorporate social, ecological and spiritual contexts. This course delves into this complexity, covering the gamut of social roles played by animals, as well as the methods and approaches to studying these, both traditional and scientific. While the notion of 'animals as social actors' is well acknowledged, their use as proxies for human autecology (the relationship between a species and its environment) is also increasingly recognised as a viable mechanism for understanding our cultural and economic past. The module presents an overview covering a broad timespan from the Pleistocene to the modern day. It will piece together the breadth of human-animal relationships using a wide geographic range of case studies.

Same as: ANTHRO 217.

ANTHRO 118. Heritage, Environment, and Sovereignty in Hawaii. 4 Units.

This course explores the cultural, political economic, and environmental status of contemporary Hawaiians. What sorts of sustainable economic and environmental systems did Hawaiians use in prehistory? How was colonization of the Hawaiian Islands informed and shaped by American economic interests and the nascent imperialism of the early 20th century? How was sovereignty and Native Hawaiian identity been shaped by these forces? How has tourism and the leisure industry affected the natural environment? This course uses archaeological methods, ethnohistorical sources, and historical analysis in an exploration of contemporary Hawaiian social economic and political life.

Same as: EARTHSYS 118.

ANTHRO 119. Zooarchaeology: An Introduction to Faunal Remains. 5 Units.

As regularly noted, whether historic or pre-historic, animal bones are often the most commonly occurring artefacts on archaeological sites. As bioarchaeological samples, they offer the archaeologist an insight into food culture, provisioning, trade and the social aspects of human-animal interactions. The course will be taught through both practical and lecture sessions: the 'hands-on' component is an essential complement to the lectures. The lectures will offer grounding in the main methodological approaches developed, as well as provide case-studies to illustrate where and how the methods have been applied. The practical session will walk students through the skeletal anatomy of a range of species. It will guide students on the identification of different parts of the animal, how to age / sex individuals, as well as recognise taphonomic indicators and what these mean to reconstructing post-depositional modifications.

ANTHRO 119A. Spirits, Selves, and the Social: Histories of Thinking about Religion. 5 Units.

This course explores how anthropological approaches to religion have changed over the discipline's history. What key questions and assumptions motivate various approaches to the study of religion? How do anthropologists attempt to understand and represent religious experiences? How does the practice of various religions ranging from Sufi Islam to Haitian Vodou work together produce the self's relationship to society? Starting with E.B. Tylor's 19th-century designation of 'religion' as a category, the first half of the course will explore how the study of religion reflects broader theoretical trends in the discipline such as symbolism and structural-functionalism. Talal Asad's late-20th-century critique of religion as a universal category serves as a pivotal point in the anthropological study of religion. The second half of the course will explore how anthropologists respond to Asad's critique, turning their attention from immaterial belief to material histories and practices.

ANTHRO 121. Language and Prehistory. 3-5 Units.

Language classification and its implications for human prehistory. The role of linguistic data in analyzing prehistoric populations, cultures, contact, and migrations. Comparison of linguistic and biological classifications. Reconstruction, proto-vocabularies, and culture. Archaeological decipherment and the origins and evolution of writing. Archaeological and genetic evidence for human migrations. (DA-A; HEF II,III)

Same as: ANTHRO 221.

ANTHRO 121A. Hip Hop, Youth Identities, and the Politics of Language. 3-4 Units.

Focus is on issues of language, identity, and globalization, with a focus on Hip Hop cultures and the verbal virtuosity within the Hip Hop nation. Beginning with the U.S., a broad, comparative perspective in exploring youth identities and the politics of language in what is now a global Hip Hop movement. Readings draw from the interdisciplinary literature on Hip Hop cultures with a focus on sociolinguistics and youth culture.

Same as: AFRICAAM 121X, AMSTUD 121X, CSRE 121X, EDUC 121X, LINGUIST 155.

ANTHRO 123. Readings in Linguistic Anthropology. 2 Units.

One or two major related works on language in its cultural context. Works for 2007-08 involve attempts to correlate linguistic and non-linguistic data for analysis of prehistoric human contact and migrations. May be repeated for credit.

Same as: ANTHRO 223.

ANTHRO 124. Maya Mythology and the Popol Vuh. 3-5 Units.

The mythology and folklore of the ancient Maya, emphasizing the relationship between the 16th-century Quiché Maya mythological epic *Popol Vuh* (Book of the Council) and classic lowland Maya art, architecture, religion, and politics. General Mesoamerican mythology. Anthropological and other theories of mythology. Class participates in the creation of a web project on the *Popol Vuh*.

ANTHRO 125. Language and the Environment. 3-4 Units.

Lecture course on vocabulary and grammar as keys to peoples' understanding and use of the environment. Ethnobotany, ethnobiology, and ethnosemantics in the analysis of the language of place, plants and animals, the earth, the body, and disease. Terminological gaps and gluts and what they imply. Language as a strategic resource in environmental management. Language contact and conflict in the modern global environment, with particular attention to the vocabularies of capitalism and property. Language extinction and its environmental implications. Anthropology concentration: CS, EE. No prerequisites. Same as: ANTHRO 225.

ANTHRO 126. Urban Culture in Global Perspective. 5 Units.

Core course for Urban Studies majors. We will study urban space both historically and cross-culturally. Urban Studies, by definition, is an interdisciplinary field, where the methodological approaches draw upon a diverse set of analytic tools. Disciplines that occupy a prominent place in this class are geography, cultural anthropology, sociology, history, media studies, and literature. In this context, we will discuss the importance of cities around the world to the economic, cultural, and political well-being of modern societies and examine how forces such as industrialization, decentralization, and globalization affect the structure and function of cities. Same as: URBANST 114.

ANTHRO 127. City and Sounds. 5 Units.

How do people experience modern cities and urban public cultures through auditory channels? How does sound mediate and constitute urban space? How to listen to and write about culture through sound. Students carry out narrative interviews and sound fieldwork in the Bay Area. Readings include urban anthropology, semiotics, art history, social studies of science and technology, media studies, and musicology.

ANTHRO 127A. Cities and the Future: Utopias, Dystopias, and Other Urbanisms to Come. 3 Units.

What sort of futures are being imagined for the cities of the twenty-first century? An interdisciplinary seminar, this course will critically analyze how the future of cities, and the cities of the future, are being thought about and acted upon in the present. It is designed for graduate students and advanced undergraduates with experience in the social sciences and humanities and who also have a keen interest in urban studies. Its primary objective is to develop sophisticated ways of thinking about the future of cities, since doing so has real significance for the kind of city we want to, and eventually will, ourselves inhabit.

ANTHRO 128. Visual Studies. 5 Units.

Drawing on anthropology, art history, cultural studies, and other fields, this course explores how and why one might want to think critically about the politics of visibility, social imagination, the politics of making and consuming images and things, iconophilia and iconophobia, the classification of people and things into *artists* and *art*, and cultural production more generally.

ANTHRO 130A. Interpreting Space and Place: An Introduction to Mapmaking. 5 Units.

How mapmaking, geographical information systems (GIS), and spatial tools can be applied in social research. Qualitative and quantitative approaches in the use of geospatial information. Methodologies and case examples.

ANTHRO 130B. Introduction to GIS in Anthropology. 5 Units.

How GIS and spatial tools can be applied in social research. Case studies and student projects address questions of social and cultural relevance using real data sets, including the collection of geospatial data and building of spatial evidence. Analytical approaches and how they can shape a social and cultural interpretation of space and place. Same as: ANTHRO 230B.

ANTHRO 132. Religion and Politics in the Muslim World. 5 Units.

This course provides an ethnographic examination of religion and politics in the Muslim world. What is the role of Islam in the political life of modern Muslim societies? Conversely, how do modern political powers shape and constrain the terms of religious life? This course takes an anthropological perspective on the study of Islam: our investigations will not focus on the origins of scriptures and doctrines but rather on the use of religious texts and signs in social context and on the political significance of ritual and bodily practices. A major aim of the course is provide students with analytical resources for thinking critically about the history and politics of modern Muslim societies, with a particular focus on issues of religious authority, gender and sexuality, and the politics of secularism.

ANTHRO 134. Object Lessons. 5 Units.

Human-object relations in the processes of world making. Objectification and materiality through ethnography, archaeology, material culture studies, and cultural studies. Interpretive connotations around and beyond the object, the unstable terrain of interrelationships between sociality and materiality, and the cultural constitution of objects. Sources include: works by Marx, Hegel, and Mauss; classic Pacific ethnographies of exchange, circulation, alienability, and fetishism; and material culture studies. Same as: ANTHRO 234.

ANTHRO 135. Cultural Studies. 5 Units.

Identity, community, and culture; their interactions and formation. Same as: ANTHRO 235.

ANTHRO 135A. The Anthropology of Security. 3-5 Units.

This seminar begins by outlining the main theoretical and empirical challenges in the areas of surveillance studies and security studies. The seminar provides a space wherein students will be able to discuss these inter-disciplinary areas and develop their own Anthropology-informed perspectives. The seminar then discusses the work of Anthropologists who through their ethnographic and theoretical work have helped developed and important and emergent area: *The Anthropology of Security*. Areas covered include, inter alia, national security, security and war, biometrics, gated-ness, and environmental and bio-security threats. Same as: ANTHRO 235A.

ANTHRO 135H. Conversations in CSRE: Case Studies in the Stanford Community. 1-2 Units.

Race, ethnicity, gender, and religion using the tools, analytical skills and concepts developed by anthropologists. Same as: CSRE 135H.

ANTHRO 135I. CSRE House Seminar: Race and Ethnicity at Stanford. 1-2 Units.

Race, ethnicity, gender, and religion using the tools, analytical skills and concepts developed by anthropologists. Same as: CSRE 135I.

ANTHRO 136. The Anthropology of Global Supply Chains. 5 Units.

This upper-division undergraduate seminar focuses on recent studies by anthropologists and scholars in related disciplines on global supply chains and consumption practices. The goal of the course is to assess concepts and methods for integrating a cultural analysis of transnational production with a cultural analysis of transnational consumption. We will review ethnographic studies of the production and consumption of commodities linked by transnational and global networks. The class will then pursue collaborative research on the global production, distribution, and consumption of a selected commodity. Prerequisite: junior or senior standing and previous coursework in cultural anthropology or permission of instructor. Same as: ANTHRO 236.

ANTHRO 137. The Politics of Humanitarianism. 5 Units.

What does it mean to want to help, to organize humanitarian aid, in times of crisis? At first glance, the impulse to help issue generis a good one. Helping is surely preferable to indifference and inaction. This does not mean that humanitarian interventions entail no ethical or political stakes, or that they are beyond engaged critique. We need to critique precisely that which we value, and to ask some hard questions, among them these: What are the differences among humanitarianism, charity, and philanthropy? What of social obligations and solidarities? How does the neoliberal world order currently create structural inequalities that ensure the reproduction of poverty and violence? How does the current order of things resemble or differ from the colonial world order? This course examines the history of humanitarian sensibilities and the emergence of organized action in the cause of humanity. In the early years of humanitarian intervention, political neutrality was a key principle; it has now come under ever greater analytical and political scrutiny. We will examine the reasons for the politicization and militarization of aid -- be it humanitarian aid in natural disasters or political crises; development programs in the impoverished south (the Third World), or peace-keeping. We will end with a critical exploration of the concept of human rights, humanity, and personhood. The overall methodological aim of the course is to demonstrate what insights an ethnographic approach to the politics, ethics, and aesthetics of humanitarianism can offer.

Same as: ANTHRO 237.

ANTHRO 140A. Ethnographic Archaeologies. 4-5 Units.

How have ethnographic and archaeological methods been combined in anthropological research? What methodological and theoretical implications do these kinds of projects generate? Seminar topics will include ethnoarchaeology, ethnographies of archaeological practice, public archaeology and heritage ethics. Lecture and discussion.

Same as: ANTHRO 240A, ARCHLGY 137.

ANTHRO 144A. Practice of Everyday Life in Kazakhstan: From Nomadism to Modernity. 3-5 Units.

An interdisciplinary introduction to the historically nomadic land of Kazakhstan, its peoples and their lifestyles, the practice of everyday life. Ranked as the ninth largest country in the world, Kazakhstan is also the world's largest landlocked country; its territory is greater than Western Europe: it stretches from the fringes of Europe to the borders of Mongolia and China. The seminar surveys language and society, traditional economics and customary law, rituals and folk customs, local dwelling, craft and art, the cultural panorama, the historical relationship between sedentary and nomadic peoples as well as new approaches to the study of nomads in modernity. Speaking of the present time, we will follow the changing nomads in a changing world. The instructor is going to base, to the extent possible, on the extremely rich fieldwork data recently discovered in Kazakhstan -- the data is yet little known in the West. The seminar will make extensive use of audio-visual materials and films.

Same as: REES 244A.

ANTHRO 146. STS Senior Capstone. 5 Units.

Car Culture. Since at least the 50s, the U.S. has been notorious as a nation in love with the car. An examination of this premise, analyzing new methods of production brought by automobile manufacture, how automobiles shaped urban growth, debates about pollution and environmental degradation, and debates around auto safety. How the car has influenced American practices including courting, eating out, and suburban living.

Same as: STS 200B.

ANTHRO 146A. Anthropology of Youth. 5 Units.

This course will be a survey of classical texts and contemporary research on youth and generations. We will explore the historical and cultural construction of 'youth' and youth practices across regions over time. We will pay special attention to the organization of contemporary capitalism, its effect in producing marginality and exclusion, and issues underlying youth political movements.

ANTHRO 147. Nature, Culture, Heritage. 5 Units.

Seminar. Shared histories of natural and cultural heritage and their subsequent trajectories into the present. How thought about archaeological sites and natural landscapes have undergone transformations due to factors including indigenous rights, green politics, and international tourism. The development of key ideas including conservation, wilderness, sustainability, indigenous knowledge, non-renewability and diversity. Case studies draw on cultural and natural sites from Africa, the Americas and Australia.

Same as: ANTHRO 247.

ANTHRO 147A. Folklore, Mythology, and Islam in Central Asia. 3-5 Units.

Central Asian cults, myths, and beliefs from ancient time to modernity. Life crisis rites, magic ceremonies, songs, tales, narratives, taboos associated with childbirth, marriage, folk medicine, and calendrical transitions. The nature and the place of the shaman in the region. Sources include music from the fieldwork of the instructor and the Kyrgyz epoch *Manas*. The cultural universe of Central Asian peoples as a symbol of their modern outlook.

Same as: REES 247A.

ANTHRO 149. South Asia: History, People, Politics. 5 Units.

The South Asian subcontinent (comprising of India, Pakistan, Bangladesh, Nepal, Bhutan and Sri Lanka) is one of the most diverse and densely populated regions in the world and increasingly prominent in new global political and cultural economies. South Asia has also provided the inspiration for cutting edge theories about the colonial state, postcolonial studies, democracy, popular culture, and religious conflict. The course will provide an overview of major historical events and social trends in contemporary South Asia and focus on themes such as gender, religion, caste, migration and movement, new technologies, the urban and rural, the state, and new forms of consumption among others. Thus, the course will give students historically and theoretically informed perspectives on contemporary South Asia, as well as how to apply insights learned to larger debates within the political and social sciences.

Same as: ANTHRO 249.

ANTHRO 151. Women, Fertility, and Work. 5 Units.

How do choices relating to bearing, nursing, and raising children influence women's participation in the labor force? Cultural, demographic, and evolutionary explanations, using crosscultural case studies. Emphasis is on understanding fertility and work in light of the options available to women at particular times and places.

Same as: ANTHRO 251, HUMBIO 148W.

ANTHRO 152A. Urban Poverty and Inequality in Contemporary China. 5 Units.

Experiences of poverty and inequality and their relationship to gender, space development, post-socialism, and globalization. How processes of class-making in China's cities are bound up with transformations in the country's sociopolitical landscape.

ANTHRO 153A. Population and social trends in Japan. 3-5 Units.

Anthropological theories and concepts as applied to Japan. Postwar demographic trends. Delayed marriage. Declining nuclear family. Restructuring of education and workplace. Problems for the seniors. Foreign laborers shaking fundamentals of Japan.

Same as: ANTHRO 253A.

ANTHRO 155. Research Methods in Ecological Anthropology. 3-5 Units.

The course prepares students for the methodological and practical aspects of doing ecologically oriented, quantitative anthropological field research. The primary goal is to explore what it means to ask anthropological questions in a systematic way. We will focus on understanding what can constitute an interesting question, how to frame a question in a way that facilitates investigation, and how to design methods to begin investigating a question. In turn, the course will provide a format to refine research projects in preparation for doing more extensive fieldwork.
Same as: ANTHRO 255.

ANTHRO 161. Human Behavioral Ecology. 3-5 Units.

Theory, method, and application in anthropology. How theory in behavioral ecology developed to understand animal behavior is applied to questions about human economic decision making in ecological and evolutionary contexts. Topics include decisions about foraging and subsistence, competition and cooperation, mating, and reproduction and parenting.
Same as: ANTHRO 261, HUMBIO 117H.

ANTHRO 161A. Human Ecology: Adaptations to Climate and Climate Change. 5 Units.

Humans face essentially the same adaptive challenges as all organisms but are unique for having successfully adapted to virtually every environment on Earth. The resulting diversity of phenotypes and cultures, past and present, is key to understanding how interactions with environments shape the economic, social, and cultural lives of hunter-gatherers, pastoralists and agriculturalists. This course surveys the range of human adaptations from an ecological and evolutionary perspective to understand human adaptive capacity and vulnerability to climate change.
Same as: ANTHRO 261A.

ANTHRO 162. Indigenous Peoples and Environmental Problems. 3-5 Units.

The social and cultural consequences of contemporary environmental problems. The impact of market economies, development efforts, and conservation projects on indigenous peoples, emphasizing Latin America. The role of indigenous grass roots organizations in combating environmental destruction and degradation of homeland areas.
Same as: ANTHRO 262.

ANTHRO 163. Conservation and Evolutionary Ecology. 5 Units.

Environmental degradation resulting from human behavior, and what can be done about it. Patterns of interaction between people and environments, and why they vary over time and space. Topics include adaptation and behavior, resource acquisition and utilization, conflicts of interest, collective action problems, conspicuous consumption, waste, land management, and public policy.
Same as: ANTHRO 263.

ANTHRO 164A. Anthropology of Ecotourism. 5 Units.

Ecotourism has been touted as a win-win scenario for both biodiversity conservation and the well-being of local residents. In practice, these lofty ideals of ecotourism have proven difficult to implement. The rapid development of ecotourism over the last two decades. Focus is on the scholarly literature relating to ecotourism from both supporting and critical perspectives.

ANTHRO 164B. Anthropology of Tourism. 5 Units.

As the largest scale movement of goods, services, and people that humanity has ever seen, tourism is an immense phenomenon and is currently the world's most immense industry, reaching some of the most remote people and places on the planet. Yet scholars have only begun to focus on the topic in recent decades. This seminar-style course will focus on the key anthropological and social science literature relating to tourism from both supporting and critical perspectives; however, tourism is an inherently multi-disciplinary subject and students from all disciplines are encouraged to enroll. After providing an initial overview of this phenomenon and field of study, later sections of the course will focus on emerging sub-types of tourism including sustainable tourism, ecotourism, agritourism, and geotourism to name just a few.

ANTHRO 165. Parks and Peoples: The Benefits and Costs of Protected Area Conservation. 5 Units.

Seminar. Emphasis is on the social impact of parks and reserves. Integrated conservation and development projects (ICDPs) based on protected areas; alternative ways to derive local social benefits from them. Cases include Yellowstone, Manu, Galápagos, Ngorongoro, and Guanacaste.

ANTHRO 165A. People and Parks: Management of Protected Areas. 5 Units.

As resources become scarcer, parks increasingly serve as ideological battlegrounds for contested core human values and often put livelihoods at stake. Their historical development and the complex array of present-day issues associated with the formal protection of biodiversity. The ideas behind parks and the evolution of these ideas.

ANTHRO 168. Everest: Extreme Anthropology. 3 Units.

Using Mt. Everest as a touch point, this class will examine the anthropology of nature, specifically focusing on exploration and adventure travel.

ANTHRO 168A. Risky Environments: The Nature of Disaster. 5 Units.

This seminar explores topics including environmental movements and countercultures, human agency and geoengineering ecotourism, and indigenous perspectives of changing climates to query how humans view nature in terms of stability, instability, risk and disaster in the 21st century. Case studies draw upon a broad range of geographical regions including the Arctic, Iceland, Australia, and the Americas. Discussions will draw upon film portrayals and interviews with researchers in addition to readings.

Same as: ANTHRO 268A.

ANTHRO 169. The Ecology of Cuisine: Food, Nutrition, and the Evolution of the Human Diet. 3-5 Units.

This course is an interdisciplinary approach to understanding human food consumption and nutrition, incorporating biological, evolutionary, ecological and social perspectives. Topics include a broad survey of primate diets and their physiological and behavioral correlates; fossil and archaeological evidence for early human diets; adaptations to dietary shifts since the Neolithic; infant and early child feeding practices and their role in shaping human social arrangements, metabolic syndrome, food security, food taboos; the origins of spices; cultural diversity in the social uses and meanings of food and the sharing of food; gathering, hunting and locavorism as high hipster cuisine. Emphasis is on understanding the diversity of human foodways through time and space: how biology, culture, and ecology interact to shape the food we eat, and how the food we eat shapes us.

Same as: ANTHRO 269.

ANTHRO 172. Seminar on Cultural Evolution and Coevolution. 3-5 Units.

Upper division/graduate seminar on recent approaches to the study of cultural evolution and coevolution. Critical evaluation of Darwinian and non-Darwinian theories, with special attention to the interplay of culture, genes, environment and society. Students will undertake projects of their own design to review, test, or improve current theoretical formulations. Prerequisite: a university-level course in evolution, ecology, or human behavioral biology.

Same as: ANTHRO 272.

ANTHRO 173. Human Dimensions of Global Environmental Change: Resilience, Vulnerability, and Environmental Justice. 3 Units.

The complexity of social and political issues surrounding global environmental change. Emphasis is on synergies precipitated by human-induced climatic change. Case studies and scenarios to explore the vulnerability and resilience in households, communities, regions, and nation-states most affected by extreme weather conditions. Their concerns, livelihood changes, and diverse responses of rural smallholders, indigenous communities, the state, and local and regional migrants. Central theme is environmental justice.

Same as: HUMBIO 111.

ANTHRO 174. Beginnings of Social Complexity. 5 Units.

Models and examples of the social evolution of stratification and political centralization in prehistoric human societies. Inferences from the archaeological record concerning the forces and mechanisms behind the rise and fall of complex societies, particularly in S. America. (HEF II; DA-B)

Same as: ANTHRO 274.

ANTHRO 175. Human Skeletal Anatomy. 5 Units.

Study of the human skeleton (a. k. a. human osteology), as it bears on other disciplines, including medicine, forensics, archaeology, and paleoanthropology (human evolution). Basic bone biology, anatomy, and development, emphasizing hands-on examination and identification of human skeletal parts, their implications for determining an individual's age, sex, geographic origin, and health status, and for the evolutionary history of our species. Three hours of lecture and at least three hours of supervised and independent study in the lab each week.

Same as: ANTHRO 275, BIO 174, BIO 274, HUMBIO 180.

ANTHRO 176. Cultures, Minds, and Medicine. 1 Unitss.

This workshop aims to bring together scholars from the social sciences, humanities, medicine and bio-science and technology to explore the ways that health and illness are made through complex social forces. We aim for informal, interactive sessions, full of debate and good will. We will meet every other week on Wednesday evening 5:30-7, starting on January 11, for dinner and conversation.

Same as: ANTHRO 276.

ANTHRO 178A. Culture, Narrative, and Medicine. 5 Units.

This course examines the ways in which medicine is practiced in diverse cultural contexts with narrative skills of recognizing, interpreting and being moved by the stories of illness. It is an examination of the human experience of illness and healing through narratives as presented in literature, film, and storytelling. We explore how cultural resources enable and empower healing and how narrative medicine can guide the practice of culturally competent medical care.

Same as: HUMBIO 177C.

ANTHRO 179. Cultures of Disease: Cancer. 5 Units.

History, politics, science, and anthropology of cancer; political and economic issues of disease and health care in the U.S., including the ethics and economics of health care provision, the pharmaceutical industry, carcinogen production, and research priorities.

ANTHRO 179A. Health, Illness, and Healing in South Asia. 5 Units.

This course has three related goals pertinent to medicine and healing in South Asia. The first is to understand the experiences of illness, and therapy in ordinary South Asian communities. How do social and economic inequality, religious commitments, available healing traditions, and community and family contexts shape the experience of illness and healing? The second goal is to think about South Asian medical systems using a broad historical perspective. How had biomedicine been used during the colonial period to manage the health of native populations? What is the legacy of this colonial history on current practices? What happens when South Asian medical traditions (such as Ayurveda) become global? Third, we will explore crucial health problems in South Asia from the perspective of medical anthropology. Possible topics for the third portion of the course include: child birth and maternal health, sex-selection technologies, malnutrition, metabolic diseases, the selling of organs, medical tourism, tuberculosis, HIV, suicide, and schizophrenia.

Same as: ANTHRO 279A.

ANTHRO 180. Science, Technology, and Gender. 3-5 Units.

Why is engineering often seen as a masculine profession? What have women's experiences been in entering fields of science and technology? How has gender been defined by scientists? Issues: the struggles of women in science to negotiate misogyny and cultural expectation (marriage, children), reproductive issues (surrogate motherhood, visual representations of the fetus, fetal surgery, breast feeding, childbirth practices), how the household became a site of consumerism and technology, and the cultural issues at stake as women join the ranks of scientists.

ANTHRO 181A. Gender in the Middle East: Iran, Turkey, and Egypt. 3-5 Units.

This course explores the construction of gender in the Middle East. Drawing on the historical, sociological and anthropological research in the region, the course aims to question the stereotypes about the subordination of Muslim women and to offer students a systematic reading and analytical discussion of the political, economic and cultural structures that inform gender relations and practices in the region. The course starts with an examination of early Islam and religious sources with regard to women's status, then moves on to nationalist and modernization movements in the 19th and 20th centuries, and finally explores women's and men's lives in contemporary Egypt, Turkey and Iran. In this framework, we will pay special attention to Islamist mobilizations, family and sexual relations, as well as women's changing livelihoods and labor.

ANTHRO 182. An Anthropology of Annihilation: Tobacco at the Turn of the Millennium. 3-5 Units.

The cigarette as the world's greatest weapon of mass destruction: 100 million dead worldwide from cigarettes during the 20th century, one billion expected to die in the 21st century. How to understand this toll, its production, management, politicization, and depoliticization? What can anthropological and allied perspectives disclose? How does the catastrophe challenge key precepts within anthropology and other branches of the academy?.

ANTHRO 182A. Down and Out: Marginal Lives and Institutional Technologies. 5 Units.

This course examines the neglect and management of socially marginalized persons including the mentally ill, youth runaways, child wards of the state, drug addicts and prisoners. In this course, we will approach the concept of marginality by investigating the spaces and institutions of decay, neglect and rehabilitation to which unwanted and indigent individuals are relegated. Readings are focused on qualitative research conducted within institutions of health, welfare, and reform. There will be two comparative public mental health sections in this course: one focused on South Asia and the second on Africa. This course is relevant for students interested in medical anthropology, applied anthropology, public health policy, or clinical careers in medicine, psychology, or social work.

Same as: ANTHRO 282A.

ANTHRO 184. Spirituality and Healing. 3-5 Units.

This course considers the puzzle of symbolic healing. How have societies without the resources of modern medicine approached healing? Why do these rituals have common features around the world? We explore shamanism, spirit possession, prayer, and the role of placebos in modern biomedicine. Students will do ethnographic work and practical explorations along with more traditional scholarly approaches to learning.
Same as: HUMBIO 179S.

ANTHRO 185A. Race and Biomedicine. 3-5 Units.

Race, identity, culture, biology, and political power in biomedicine. Biological theories of racial ordering, sexuality and the medicalization of group difference. Sources include ethnography, film, and biomedical literature. Topics include colonial history and medicine, the politics of racial categorization in biomedical research, the protection of human subjects and research ethics, immigration health and citizenship, race-based models in health disparities research and policy, and recent developments in human genetic variation research.
Same as: ASNAMST 185A.

ANTHRO 192. Capstone Course: Careers in Anthropology. 3 Units.

This course offers senior Anthropology majors the opportunity to explore various professional and career options open to trained anthropologists, while offering individualized support for postgraduate planning. Enrollment limited to Anthropology majors and minors, required of majors in EE, CS and MED tracks.

ANTHRO 199. Senior and Master's Paper Writing Workshop. 1-2 Units.

Techniques of interpreting data, organizing bibliographic materials, writing, editing and revising. Preparation of papers for conferences and publications in anthropology. Seniors register for 199; master's students register for 299.
Same as: ANTHRO 299.

ANTHRO 200C. STS Senior Capstone. 5 Units.

Genetics, Ethics and Society. This course will explore three socially transforming components of genetics research that hold simultaneously liberating and constraining possibilities for populations and publics, both locally and globally. Typically the course will be divided into three sections. First, we will examine past and present issues dealing with the study of human subjects, as well as recent proposals to eventually bring full genome scans to every individual (personal genomics). Next we will learn of large-scale projects that aim to map the presence of environmental pathogens by their genetic signatures on a planetary scale and how different global populations may be affected. The last section of the course will focus on still other projects and policies that aim to expand the scope and capacity of state and international law enforcement through DNA-based forensics (the FBI CODIS database and the UK's Human Provenance Pilot Project). Projects like the latter also overlap with theories about community, families, and citizens who may or may not be linked through DNA. New concepts, such as the forensic "genetic informant" within a family unit, human DNA and isotope ζ country matches ζ in cases of state asylum, and DNA based kinship rules for family reunification in many Western countries, will be explored. In all three sections we will also examine scientific ethics when subject populations are minorities, or somehow structurally disadvantaged globally. This capstone course will provide students with tools to explore and critically assess the various technical, social, and ethical positions of researchers, as well as the role of the state and certain publics in shaping scientific research agendas that promise to reorganize critical aspects of human life. Students will be encouraged to explore these dynamics within such important societal domains as health, law, markets of bio-surveillance, and the growing industry of disease and heritage DNA identity testing among others. We will read works from social scientists of science practice, ethicists, medial humanists and scientists. This course will equip students with tools to write about the intersection of science and society and to engage in a research project that relates to the topical foci of the course, broadly conceived.
Same as: STS 200C.

ANTHRO 201. Introduction to Cultural and Social Anthropology. 5 Units.

Crosscultural anthropological perspectives on human behavior, including cultural transmission, social organization, sex and gender, culture change, technology, war, ritual, and related topics. Case studies illustrating the principles of the cultural process. Films.
Same as: ANTHRO 1.

ANTHRO 202A. Ancient Civilizations: Complexity and Collapse. 3-5 Units.

How archaeology contributes to understanding prehistoric civilizations. How and why complex social institutions arose, and the conditions and processes behind their collapse. The development of monumental architecture, craft specialization, trade and exchange, and social stratification using examples from the archaeological record. (HEF II, III; DA-B)
Same as: ANTHRO 102A.

ANTHRO 205. Ancient Cities in the New World. 3-5 Units.

Preindustrial urbanism as exemplified by prehispanic New World societies. Case studies: the central and southern highlands of Mesoamerica, and the Maya region. Comparative material from highland S. America.
Same as: ANTHRO 105.

ANTHRO 206. Human Origins. 5 Units.

The human fossil record from the first non-human primates in the late Cretaceous or early Paleocene, 80-65 million years ago, to the anatomically modern people in the late Pleistocene, between 100,000 to 50,000 B.C.E. Emphasis is on broad evolutionary trends and the natural selective forces behind them.
Same as: ANTHRO 6, HUMBIO 6.

ANTHRO 208A. Latin Americans in the Diaspora: Citizenship and Belonging Across Transnational Migration Regimes. 3-5 Units.

In this course we will explore some of the dilemmas of citizenship and belonging in the ζ era of migration ζ , from the point of view of Latin Americans across transnational migration regimes. While "Latin@s" may appear to be a social category specific to the U.S., Latin Americans are also migrating to the European Union, and most especially to Spain, the former colonial metropolis, where new linguistic, cultural and postcolonial issues arise. The course will review some crucial literature on diaspora and transnational studies to scrutinize how Latin Americans are shaping their cosmopolitan experience beyond the US. We will learn about the European Union migratory regime (and compare it to the US) from selected ethnographic material as well as documentary films, movies and biographic fictional narratives. Emphasis will be placed on understanding the challenges of the (de-) coupling of identity and rights in today's globalized societies through analysis of political and cultural practices of Latin Americans in the diaspora.
Same as: ANTHRO 108A.

ANTHRO 209. Archaeology: World Cultural Heritage. 5 Units.

Focus is on issues dealing with rights to land and the past on a global scale including conflicts and ethnic purges in the Middle East, the Balkans, Afghanistan, India, Australia, and the Americas. How should world cultural heritage be managed? Who defines what past and which sites and monuments should be saved and protected? Are existing international agreements adequate? How can tourism be balanced against indigenous rights and the protection of the past?
Same as: ANTHRO 109.

ANTHRO 210. Examining Ethnographies. 5 Units.

Eight or nine important ethnographies, including their construction, their impact, and their faults and virtues.

ANTHRO 210A. Neandertals and Modern Humans: Origin, Evolution, Interactions. 3 Units.

The expansion out of Africa of our species represents the last spectacular step in the course of Human Evolution. It resulted in the colonization of the whole planet and the replacement of archaic forms of humans in Eurasia. One way to investigate why *Homo sapiens* has been such a successful species is to compare its evolution with that of its closest relative, the Neandertals. Exploring the bio-cultural processes at work in the two lineages leads to examine some of the main issues in Paleoanthropology and the most recent methodological advances in the field.

Same as: ANTHRO 110A.

ANTHRO 210B. Critical Theory and The Environment. 3-5 Units.

Critical theoretical approaches (such as cultural studies, Marxism, postcolonial theory, cultural geography, feminism, and science studies) have generally been underutilized as methodologies for grappling with environmental situations, yet they hold much promise for addressing their complexity. This course asks: How does critical theory about the environment construe the current situation? What kinds of political or technological solutions do these theories call for or imply? The first half of the seminar introduces critical approaches and methodologies in relation to the environment. In the second section, we will use a variety of theoretical approaches to address environmental justice, water, agriculture, toxics, and animals.

Same as: AMSTUD 210, MTL 210.

ANTHRO 211. Archaeology of Sex, Sexuality, and Gender. 5 Units.

How archaeologists study sex, sexuality, and gender through the material remains left behind by past cultures and communities. Theoretical and methodological issues; case studies from prehistoric and historic archaeology.

Same as: ANTHRO 111.

ANTHRO 211A. Archaeology of the Andes of Argentina. 3-5 Units.

The aim of this course is to provide a panorama of the archaeology of the andean region of Argentina, along some main topics of past and current researches. North andean Argentina has been considered for a long time as subordinated to the major developments in the central Andes and Puna, as if it were in a marginal position that mirrored their history. More than a hundred years of research in the area have produced different insights, which put that affirmation in relative terms. The course will give an overview of major historical contributions and contemporary trends in the archaeological thinking in relation to themes such as time, the space, people, things and nature. An overview of the conceptions and construction of time. Space seen as cultural area; natural environment and built landscape; archaeological areas as national territory. Historical conceptions of people; bodies; social inequality; the past and present others in the archaeological research. Artefacts, classifications and typologies; material archaeological contexts as cultural units; from artefacts to things; past ontologies. Nature and environment; domestication; ecological approaches; agropastoralism; nature/culture. It is expected that by the end of the course students will gain a panorama of the major problems of the archaeology of andean Argentina with historically and theoretically informed perspectives.

Same as: ANTHRO 111A.

ANTHRO 212. Public Archaeology: Market Street Chinatown Archaeology Project. 4-5 Units.

This internship-style course centers on the practice and theory of historical archaeology research and interpretation through a focused study of San Jose's historic Chinese communities. The course includes classroom lectures, seminar discussion, laboratory analysis of historic artifacts, and participation in public archaeology events. Course themes include immigration, urbanization, material culture, landscape, transnational identities, race and ethnicity, gender, cultural resource management, public history, and heritage politics. The course includes required lab sections, field trips, and public service. Transportation will be provided for off-site activities.

Same as: ANTHRO 112, ASNAMST 112.

ANTHRO 213. Faunal Analysis: Animal Remains for the Archaeologist. 5 Units.

The analysis of fossil animal bones and shells to illuminate the behavior and ecology of prehistoric collectors, especially ancient humans. Theoretical and methodological issues. The identification, counting, and measuring of fossil bones and shells. Labs. Methods of numerical analysis.

Same as: ANTHRO 113, BIO 166, BIO 266.

ANTHRO 214. Prehistoric Stone Tools: Technology and Analysis. 5 Units.

Archaeologists rely on an understanding of stone tools to trace much of what we know about prehistoric societies. How to make, illustrate, and analyze stone tools, revealing the method and theory intrinsic to these artifacts.

Same as: ANTHRO 114.

ANTHRO 215A. The Aegean in the Neolithic and Bronze Age. 3-5 Units.

This course provides a survey of Aegean prehistory (7th-2nd millennium BC), focusing on traditions that were picked up or renegotiated, instead of taking a standpoint that evaluates phenomena as steps leading up to a `state-like` palatial society. It will draw on the region's wealth of data, and will be set within a theoretically informed, problem-oriented framework, aiming to introduce students to current interpretations and debates, mainly through discussion of specific case-studies.

Same as: ANTHRO 115A, ARCHLGY 139, ARCHLGY 239.

ANTHRO 216. Data Analysis for Quantitative Research. 5 Units.

This course allows graduate and advanced undergraduate students in archaeology and anthropology to acquire practical skills in quantitative data analysis. Some familiarity with basic statistical methods is useful but not assumed; the structure of the course will be flexible enough to accommodate a range of student expertise and interests. Topics covered include: statistics and graphics in R; database design, resampling methods, diversity measures, contingency table analysis, and introductory methods in spatial analysis.

Same as: ANTHRO 116.

ANTHRO 217. Acultural Animals as Proxies for Cultural Humans. 5 Units.

The human-animal relationship is dynamic, all encompassing and durable. Without exception, all socio-cultural groups have evidenced complex interactions with the animals around them, both domesticated and wild. However, the individual circumstances of these interactions are hugely complicated, and involve much more than direct human-animal contact, going far beyond this to incorporate social, ecological and spiritual contexts. This course delves into this complexity, covering the gamut of social roles played by animals, as well as the methods and approaches to studying these, both traditional and scientific. While the notion of 'animals as social actors' is well acknowledged, their use as proxies for human autecology (the relationship between a species and its environment) is also increasingly recognised as a viable mechanism for understanding our cultural and economic past. The module presents an overview covering a broad timespan from the Pleistocene to the modern day. It will piece together the breadth of human-animal relationships using a wide geographic range of case studies.

Same as: ANTHRO 117.

ANTHRO 221. Language and Prehistory. 3-5 Units.

Language classification and its implications for human prehistory. The role of linguistic data in analyzing prehistoric populations, cultures, contact, and migrations. Comparison of linguistic and biological classifications. Reconstruction, proto-vocabularies, and culture. Archaeological decipherment and the origins and evolution of writing. Archaeological and genetic evidence for human migrations. (DA-A; HEF II,III)

Same as: ANTHRO 121.

ANTHRO 223. Readings in Linguistic Anthropology. 2 Units.

One or two major related works on language in its cultural context. Works for 2007-08 involve attempts to correlate linguistic and non-linguistic data for analysis of prehistoric human contact and migrations. May be repeated for credit.

Same as: ANTHRO 123.

ANTHRO 225. Language and the Environment. 3-4 Units.

Lecture course on vocabulary and grammar as keys to peoples; understanding and use of the environment. Ethnobotany, ethnobiology, and ethnosemantics in the analysis of the language of place, plants and animals, the earth, the body, and disease. Terminological gaps and gluts and what they imply. Language as a strategic resource in environmental management. Language contact and conflict in the modern global environment, with particular attention to the vocabularies of capitalism and property. Language extinction and its environmental implications. Anthropology concentration: CS, EE. No prerequisites.

Same as: ANTHRO 125.

ANTHRO 230B. Introduction to GIS in Anthropology. 5 Units.

How GIS and spatial tools can be applied in social research. Case studies and student projects address questions of social and cultural relevance using real data sets, including the collection of geospatial data and building of spatial evidence. Analytical approaches and how they can shape a social and cultural interpretation of space and place.

Same as: ANTHRO 130B.

ANTHRO 234. Object Lessons. 5 Units.

Human-object relations in the processes of world making. Objectification and materiality through ethnography, archaeology, material culture studies, and cultural studies. Interpretive connotations around and beyond the object, the unstable terrain of interrelationships between sociality and materiality, and the cultural constitution of objects. Sources include: works by Marx, Hegel, and Mauss; classic Pacific ethnographies of exchange, circulation, alienability, and fetishism; and material culture studies.

Same as: ANTHRO 134.

ANTHRO 235. Cultural Studies. 5 Units.

Identity, community, and culture; their interactions and formation. Same as: ANTHRO 135.

ANTHRO 235A. The Anthropology of Security. 3-5 Units.

This seminar begins by outlining the main theoretical and empirical challenges in the areas of surveillance studies and security studies. The seminar provides a space wherein students will be able to discuss these inter-disciplinary areas and develop their own Anthropology-informed perspectives. The seminar then discusses the work of Anthropologists who through their ethnographic and theoretical work have helped developed and important and emergent area: 'The Anthropology of Security'. Areas covered include, inter alia, national security, security and war, biometrics, gated-ness, and environmental and bio-security threats.

Same as: ANTHRO 135A.

ANTHRO 236. The Anthropology of Global Supply Chains. 5 Units.

This upper-division undergraduate seminar focuses on recent studies by anthropologists and scholars in related disciplines on global supply chains and consumption practices. The goal of the course is to assess concepts and methods for integrating a cultural analysis of transnational production with a cultural analysis of transnational consumption. We will review ethnographic studies of the production and consumption of commodities linked by transnational and global networks. The class will then pursue collaborative research on the global production, distribution, and consumption of a selected commodity. Prerequisite: junior or senior standing and previous coursework in cultural anthropology or permission of instructor.

Same as: ANTHRO 136.

ANTHRO 237. The Politics of Humanitarianism. 5 Units.

What does it mean to want to help, to organize humanitarian aid, in times of crisis? At first glance, the impulse to help issue generis a good one. Helping is surely preferable to indifference and inaction. This does not mean that humanitarian interventions entail no ethical or political stakes or that they are beyond engaged critique. We need to critique precisely that which we value, and to ask some hard questions, among them these: What are the differences among humanitarianism, charity, and philanthropy? What of social obligations and solidarities? How does the neoliberal world order currently create structural inequalities that ensure the reproduction of poverty and violence? How does the current order of things resemble or differ from the colonial world order? This course examines the history of humanitarian sensibilities and the emergence of organized action in the 'cause of humanity'. In the early years of humanitarian intervention, political neutrality was a key principle; it has now come under ever greater analytical and political scrutiny. We will examine the reasons for the politicization and militarization of aid -- be it humanitarian aid in natural disasters or political crises; development programs in the impoverished south ('the Third World'), or peace-keeping. We will end with a critical exploration of the concept of human rights, humanity, and personhood. The overall methodological aim of the course is to demonstrate what insights an ethnographic approach to the politics, ethics, and aesthetics of humanitarianism can offer.

Same as: ANTHRO 137.

ANTHRO 240A. Ethnographic Archaeologies. 4-5 Units.

How have ethnographic and archaeological methods been combined in anthropological research? What methodological and theoretical implications do these kinds of projects generate? Seminar topics will include ethnoarchaeology, ethnographies of archaeological practice, public archaeology and heritage ethics. Lecture and discussion.

Same as: ANTHRO 140A, ARCHLGY 137.

ANTHRO 241. The State in Africa. 5 Units.

Postcolonial African states in historical and ethnographic context. Focus is on contemporary African states not as failures, but as the products of distinctive regional histories and political rationalities.

Same as: ANTHRO 141.

ANTHRO 245A. Evolutionary Theory in Archaeology. 3-5 Units.

The ability of scientific evolutionary theory to explain human behavior as represented in the archaeological record. Past attempts to apply evolutionary theory in archaeology are compared to more recent Darwinian efforts, as are current evolutionary approaches to human behavior in related fields. The ontological underpinnings and methodological requirements of a Darwinian archaeology and its potential contribution to archaeology as an explanatory system. (HEF I)

Same as: ANTHRO 145A.

ANTHRO 247. Nature, Culture, Heritage. 5 Units.

Seminar. Shared histories of natural and cultural heritage and their subsequent trajectories into the present. How thought about archaeological sites and natural landscapes have undergone transformations due to factors including indigenous rights, green politics, and international tourism. The development of key ideas including conservation, wilderness, sustainability, indigenous knowledge, non-renewability and diversity. Case studies draw on cultural and natural sites from Africa, the Americas and Australia.

Same as: ANTHRO 147.

ANTHRO 249. South Asia: History, People, Politics. 5 Units.

The South Asian subcontinent (comprising of India, Pakistan, Bangladesh, Nepal, Bhutan and Sri Lanka) is one of the most diverse and densely populated regions in the world and increasingly prominent in new global political and cultural economies. South Asia has also provided the inspiration for cutting edge theories about the colonial state, postcolonial studies, democracy, popular culture, and religious conflict. The course will provide an overview of major historical events and social trends in contemporary South Asia and focus on themes such as gender, religion, caste, migration and movement, new technologies, the urban and rural, the state, and new forms of consumption among others. Thus, the course will give students historically and theoretically informed perspectives on contemporary South Asia, as well as how to apply insights learned to larger debates within the political and social sciences.

Same as: ANTHRO 149.

ANTHRO 251. Women, Fertility, and Work. 5 Units.

How do choices relating to bearing, nursing, and raising children influence women's participation in the labor force? Cultural, demographic, and evolutionary explanations, using crosscultural case studies. Emphasis is on understanding fertility and work in light of the options available to women at particular times and places.

Same as: ANTHRO 151, HUMBIO 148W.

ANTHRO 253A. Population and social trends in Japan. 3-5 Units.

Anthropological theories and concepts as applied to Japan. Postwar demographic trends. Delayed marriage. Declining nuclear family. Restructuring of education and workplace. Problems for the seniors. Foreign laborers shaking fundamentals of Japan.

Same as: ANTHRO 153A.

ANTHRO 255. Research Methods in Ecological Anthropology. 3-5 Units.

The course prepare students for the methodological and practical aspects of doing ecologically oriented, quantitative anthropological field research. The primary goal is to explore what it means to ask anthropological questions in a systematic way. We will focus on understanding what can constitute an interesting question, how to frame a question in way that facilitates investigation, and how to design methods to begin investigating a question. In turn, the course will provide a format to refine research projects in preparation for doing more extensive fieldwork.

Same as: ANTHRO 155.

ANTHRO 261. Human Behavioral Ecology. 3-5 Units.

Theory, method, and application in anthropology. How theory in behavioral ecology developed to understand animal behavior is applied to questions about human economic decision making in ecological and evolutionary contexts. Topics include decisions about foraging and subsistence, competition and cooperation, mating, and reproduction and parenting.

Same as: ANTHRO 161, HUMBIO 117H.

ANTHRO 261A. Human Ecology: Adaptations to Climate and Climate Change. 5 Units.

Humans face essentially the same adaptive challenges as all organisms but are unique for having successfully adapted to virtually every environment on Earth. The resulting diversity of phenotypes and cultures; past and present; is key to understanding how interactions with environments shape the economic, social, and cultural lives of hunter-gatherers, pastoralists and agriculturalists. This course surveys the range of human adaptations from an ecological and evolutionary perspective to understand human adaptive capacity and vulnerability to climate change.

Same as: ANTHRO 161A.

ANTHRO 262. Indigenous Peoples and Environmental Problems. 3-5 Units.

The social and cultural consequences of contemporary environmental problems. The impact of market economies, development efforts, and conservation projects on indigenous peoples, emphasizing Latin America. The role of indigenous grass roots organizations in combating environmental destruction and degradation of homeland areas.

Same as: ANTHRO 162.

ANTHRO 263. Conservation and Evolutionary Ecology. 5 Units.

Environmental degradation resulting from human behavior, and what can be done about it. Patterns of interaction between people and environments, and why they vary over time and space. Topics include adaptation and behavior, resource acquisition and utilization, conflicts of interest, collective action problems, conspicuous consumption, waste, land management, and public policy.

Same as: ANTHRO 163.

ANTHRO 268A. Risky Environments: The Nature of Disaster. 5 Units.

This seminar explores topics including environmental movements and countercultures, human agency and geoengineering ecotourism, and indigenous perspectives of changing climates to query how humans view nature; in terms of stability, instability, risk and disaster in the 21st century. Case studies draw upon a broad range of geographical regions including the Arctic, Iceland, Australia, and the Americas. Discussions will draw upon film portrayals and interviews with researchers in addition to readings.

Same as: ANTHRO 168A.

ANTHRO 269. The Ecology of Cuisine: Food, Nutrition, and the Evolution of the Human Diet. 3-5 Units.

This course is an interdisciplinary approach to understanding human food consumption and nutrition, incorporating biological, evolutionary, ecological and social perspectives. Topics include a broad survey of primate diets and their physiological and behavioral correlates; fossil and archaeological evidence for early human diets; adaptations to dietary shifts since the Neolithic; infant and early child feeding practices and their role in shaping human social arrangements, metabolic syndrome, food security, food taboos; the origins of spices; cultural diversity in the social uses and meanings of food and the sharing of food; gathering, hunting and locavorism as high hipster cuisine. Emphasis is on understanding the diversity of human foodways through time and space: how biology, culture, and ecology interact to shape the food we eat, and how the food we eat shapes us.

Same as: ANTHRO 169.

ANTHRO 272. Seminar on Cultural Evolution and Coevolution. 3-5 Units.

Upper division/graduate seminar on recent approaches to the study of cultural evolution and coevolution. Critical evaluation of Darwinian and non-Darwinian theories, with special attention to the interplay of culture, genes, environment and society. Students will undertake projects of their own design to review, test, or improve current theoretical formulations. Prerequisite: a university-level course in evolution, ecology, or human behavioral biology.

Same as: ANTHRO 172.

ANTHRO 274. Beginnings of Social Complexity. 5 Units.

Models and examples of the social evolution of stratification and political centralization in prehistoric human societies. Inferences from the archaeological record concerning the forces and mechanisms behind the rise and fall of complex societies, particularly in S. America. (HEF II; DA-B)

Same as: ANTHRO 174.

ANTHRO 275. Human Skeletal Anatomy. 5 Units.

Study of the human skeleton (a. k. a. human osteology), as it bears on other disciplines, including medicine, forensics, archaeology, and paleoanthropology (human evolution). Basic bone biology, anatomy, and development, emphasizing hands-on examination and identification of human skeletal parts, their implications for determining an individual's age, sex, geographic origin, and health status, and for the evolutionary history of our species. Three hours of lecture and at least three hours of supervised and independent study in the lab each week.

Same as: ANTHRO 175, BIO 174, BIO 274, HUMBIO 180.

ANTHRO 276. Cultures, Minds, and Medicine. 1 Unit.

This workshop aims to bring together scholars from the social sciences, humanities, medicine and bio-science and technology to explore the ways that health and illness are made through complex social forces. We aim for informal, interactive sessions, full of debate and good will. We will meet every other week on Wednesday evening 5:30-7, starting on January 11, for dinner and conversation.

Same as: ANTHRO 176.

ANTHRO 277. Japanese Society and Culture. 5 Units.

Focus is on power, identity, and the politics of knowledge production. How transnational interactions influence Japanese identity. How anthropological knowledge has contributed to understanding Japanese culture and society. Gender, race and class; contemporary ethnographies. Modernity and globalization. Cultural politics, domestic work, labor management, city planning, ad images, anime, martial art, fashion, theater, leisure, and tourism.

Same as: ANTHRO 77.

ANTHRO 279A. Health, Illness, and Healing in South Asia. 5 Units.

This course has three related goals pertinent to medicine and healing in South Asia. The first is to understand the experiences of illness, and therapy in ordinary South Asian communities. How do social and economic inequality, religious commitments, available healing traditions, and community and family contexts shape the experience of illness and healing? The second goal is to think about South Asian medical systems using a broad historical perspective. How had biomedicine been used during the colonial period to manage the health of native populations? What is the legacy of this colonial history on current practices? What happens when South Asian medical traditions (such as Ayurveda) become global? Third, we will explore crucial health problems in South Asia from the perspective of medical anthropology. Possible topics for the third portion of the course include: child birth and maternal health, sex-selection technologies, malnutrition, metabolic diseases, the selling of organs, medical tourism, tuberculosis, HIV, suicide, and schizophrenia.

Same as: ANTHRO 179A.

ANTHRO 282. Medical Anthropology. 3-5 Units.

Emphasis is on how health, illness, and healing are understood, experienced, and constructed in social, cultural, and historical contexts. Topics: biopower and body politics, gender and reproductive technologies, illness experiences, medical diversity and social suffering, and the interface between medicine and science.

Same as: ANTHRO 82.

ANTHRO 282A. Down and Out: Marginal Lives and Institutional Technologies. 5 Units.

This course examines the neglect and management of socially marginalized persons including the mentally ill, youth runaways, child wards of the state, drug addicts and prisoners. In this course, we will approach the concept of marginality by investigating the spaces and institutions of decay, neglect and rehabilitation to which unwanted and indigent individuals are relegated. Readings are focused on qualitative research conducted within institutions of health, welfare, and reform. There will be two comparative public mental health sections in this course: one focused on South Asia and the second on Africa. This course is relevant for students interested in medical anthropology, applied anthropology, public health policy, or clinical careers in medicine, psychology, or social work.

Same as: ANTHRO 182A.

ANTHRO 293B. Master's Thesis Writing Seminar. 2-4 Units.

May be repeated for credit.

ANTHRO 298B. Digital Methods in Archaeology. 3-5 Units.

This is a course on digital technologies in archaeology used for documentation, visualization, and analysis of archaeological spaces and objects. Emphasizes hands-on approaches to image manipulation, virtual reality, GIS, CAD, and photogrammetry modeling methods.

Same as: ANTHRO 98B.

ANTHRO 299. Senior and Master's Paper Writing Workshop. 1-2 Units.

Techniques of interpreting data, organizing bibliographic materials, writing, editing and revising. Preparation of papers for conferences and publications in anthropology. Seniors register for 199; master's students register for 299. Same as: ANTHRO 199.

ANTHRO 299. Senior and Master's Paper Writing Workshop. 1-2 Units.

Techniques of interpreting data, organizing bibliographic materials, writing, editing and revising. Preparation of papers for conferences and publications in anthropology. Seniors register for 199; master's students register for 299. Same as: ANTHRO 199.

ANTHRO 300. Reading Theory Through Ethnography. 5 Units.

Required of and restricted to first-year ANTHRO Ph.D. students. Focus is on contemporary ethnography and related cultural and social theories generated by texts. Topics include agency, resistance, and identity formation, and discourse analysis. Prerequisite: consent of instructor.

ANTHRO 301. History of Anthropological Theory, Culture and Society. 5 Units.

Required of Anthropology Ph.D. students. The history of cultural and social anthropology in relation to historical and national contexts and key theoretical and methodological issues as these inform contemporary theory and practices of the discipline. Enrollment limited to 15. Prerequisite: consent of instructor.

ANTHRO 301A. Foundations of Social Theory. 5 Units.

The purpose of this course is to introduce key themes in social theory - the social, the modern subject, reason, autonomy, civility, interests, exchange, morality, life, the senses - through a reading of classic texts from Descartes up to psychoanalysis and phenomenology. Each section has original texts, commentaries, and background readings that place these texts in their deeper historical setting. Many of these commentaries trace how practical theories of 'lower' or minor selves - the subject people of the colonies, slaves, and other - were integral to the very development of ideas of the modern, autonomous and reasonable self in the western world.

ANTHRO 302. History of Anthropological Theory, Ecology and Environment. 5 Units.

Evolutionary and ecological theory from the 19th century to present. Theory and concepts from evolution and ecology, emphasizing anthropological applications. Evolutionary theories of human behavior, culture, and societies. Ecological theory behind carrying capacity, sustainable yield, and population growth. Emphasis is on tools of analysis and formulating research questions in anthropology today. Upper division undergrads require consent of instructor.

ANTHRO 303. Introduction to Archaeological Theory. 5 Units.

The history of archaeological thought emphasizing recent debates. Evolutionary theories, behavioral archaeology, processual and cognitive archaeology, and approaches termed feminist and post-processual archaeology in the context of wider debate in adjacent disciplines. The application and integration of theory on archaeological problems and issues. Prerequisite: consent of instructor.

ANTHRO 304. Data Analysis for Quantitative Research. 5 Units.

Univariate, multivariate, and graphical methods used for analyzing quantitative data in anthropological research. Archaeological and paleobiological examples. Recommended: algebra. Prerequisite: consent of instructor.

ANTHRO 305. Research Methods in Ecological Anthropology. 5 Units.

The course prepare students for the methodological and practical aspects of doing ecologically oriented, quantitative anthropological field research. The primary goal is to explore what it means to ask anthropological questions in a systematic way. We will focus on understanding what can constitute an interesting question, how to frame a question in way that facilitates investigation, and how to design methods to begin investigating a question. In turn, the course will provide a format to refine research projects in preparation for doing more extensive fieldwork.

ANTHRO 306. Anthropological Research Methods. 5 Units.

Required of ANTHRO Ph.D. students; open to all graduate students. Research methods and modes of evidence building in ethnographic research. Enrollment limited to 10. Prerequisite: consent of instructor.

ANTHRO 307. Archaeological Methods and Research Design. 5 Units.

Methodological aspects of field and laboratory practice from traditional archaeological methods to the latest interdisciplinary analytical techniques. The nature of archaeological data and inference; interpretive potential of these techniques. Prerequisite: consent of instructor. Same as: ARCHLGY 307.

ANTHRO 308. Proposal Writing Seminar. 5 Units.

Required of second-year Ph.D. students in the culture and society track. The conceptualization of dissertation research problems, the theories behind them, and the methods for exploring them. Participants draft a research prospectus suitable for a dissertation proposal and research grant applications. Limited enrollment. Prerequisite: consent of instructor.

ANTHRO 309. Advanced Evolutionary Theory in Anthropological Sciences. 5 Units.

History of evolutionary theory from the 19th century to present, emphasizing anthropological applications. Theory and concept in evolutionary biology; evolutionary theories of culture; and interactions of genetic, social, and cultural evolution and their implications. Emphasis is on tools of analysis and the value of evolutionary thinking for formulating research questions in anthropology today. Prerequisite: graduate standing or consent of instructor. (HEF II, III).

ANTHRO 310C. Intersections. 5 Units.

Themes of materiality and visibility, aesthetic and other forms of cultural production, and the meanings of creativity and convention. Ethnographic and archaeological material and case studies from worldwide cultural contexts. Prerequisite: consent of instructor.

ANTHRO 310G. Introduction to Graduate Studies. 2 Units.

Required graduate seminar. The history of anthropological theory and key theoretical and methodological issues of the discipline. Prerequisite: consent of instructor.

ANTHRO 311. Ethnographic Writing. 3-5 Units.

For graduate students writing or planning to write a dissertation using ethnographic methods. The choices made by the authors of ethnographies in constructing an argument, using data and speaking to an audience of readers. Readings include chapters written by class members currently writing dissertations. Prerequisite: consent of instructor.

ANTHRO 311G. Introduction to Culture and Society Graduate Studies in Anthropology. 2 Units.

Required graduate seminar for CS track. The history of anthropological theory and key theoretical and methodological issues in cultural anthropology. Prerequisites: for 1st year PhD students in the cultural and society track or by permission of the instructor.

ANTHRO 312. Writing Across Audiences: Styles and Methods. 5 Units.

This course examines the way anthropologists and others write to different audiences. What do you need to do communicate to a mainstream anthropology audience? How does that change when you write an editorial or place something in a popular venue? When you try to capture a non-anthropological medical audience? What methods might you consider adding to enable that cross-talk? We will examine a series of examples of people who have written across. Prerequisite: consent of instructor.

ANTHRO 313. Anthropology of Neoliberalism. 5 Units.

How is the recent worldwide restructuring under the name neoliberalism understood as a social, cultural, and economic phenomenon? Focus is on interrogation of analytic categories, and ethnographic explorations of social and political processes.

ANTHRO 318. Democracy and Political Authority. 5 Units.

Democracy is commonly defined in formalist terms as a form of government (involving the consent of the governed) and a procedure of governance (involving the rule of law). In place of a formalist definition, this course examines democracy as a historical and discursive form. In what ways have the rights of citizenship for some been premised on the domination of others (workers, women, the colonized, etc.)? What forms of violence are not only tolerated as practical necessity in the contemporary order of democratic states but sanctioned as morally just? What mechanisms of political authority operate by defining the boundaries between the tolerable and the intolerable, between citizenly belonging and terrorism—in short, between democracy and its others (e.g., an arbitrary despot, a feudal economy, a religious fundamentalism)? These questions require urgent interrogation in the present day: the past thirty years have witnessed a virtual explosion of new constitutions proclaiming democratic sovereignty across the world. What forms of global power and institutional domination are constitutive of the contemporary era of liberty, freedom, and equality? Readings are drawn from a variety of disciplines, including anthropology, political theory, and political philosophy. Prerequisite: consent of instructor.

ANTHRO 319. South Asia: History, People, Politics. 5 Units.

The South Asian subcontinent (comprising of India, Pakistan, Bangladesh, Nepal, Bhutan and Sri Lanka) is one of the most diverse and densely populated regions in the world and increasingly prominent in new global political and cultural economies. South Asia has also provided the inspiration for cutting edge theories about the colonial state, postcolonial studies, democracy, popular culture, and religious conflict. The course will provide an overview of major historical events and social trends in contemporary South Asia and focus on themes such as gender, religion, caste, migration and movement, new technologies, the urban and rural, the state, and new forms of consumption among others. Thus, the course will give students historically and theoretically informed perspectives on contemporary South Asia, as well as how to apply insights learned to larger debates within the political and social sciences. Prerequisite: consent of instructor.

ANTHRO 320A. Race, Ethnicity, and Language. 3-4 Units.

This seminar explores the linguistic construction of race and ethnicity across a wide variety of contexts and communities. Throughout the course, we will take a comparative perspective and highlight how different racial/ethnic formations participate in similar, yet different, ways of "doing race" through language, interaction and culture. Readings draw heavily from perspectives in (linguistic) anthropology and sociolinguistics. Prerequisite: consent of instructor.

Same as: EDUC 389X, LINGUIST 253.

ANTHRO 321. Reading Marx, Reading Weber. 5 Units.

This advanced graduate seminar is devoted to a critical reading of selected writings by two nineteenth century social theorists who continue to shape anthropology and social analysis more broadly. Prerequisites: Graduate standing in Anthropology or permission of the instructor. Previous graduate level coursework in cultural or social anthropology, social theory or cultural studies is required. No auditing is permitted. Maximum enrollment 12.

ANTHRO 321A. Anthropology and Literature: Problems of Representation, Power, and Textuality. 5 Units.

How are literary and social scientific forms of cultural description, evocation, and interpretation related? The seminar reads classic texts as well as recent experiments, addressing issues of genre, rhetoric, epistemology, translation, authority, and collaboration. The emphasis is on writing as a situated practice—embodied, relational, and historically circumscribed. Authors may include Malinowski, Mead, Benedict, Lévi-Strauss, Geertz, Taussig, Leiris, Conrad, Achebe, Said, Barthes, Kroeber, Le Guin, and selected contemporary ethnographies. Examples from film, visual culture, and performance art may also be included.

ANTHRO 322. From Biopolitics to Necropolitics and Beyond. 5 Units.

Scholarship produced and informed by Michel Foucault. Focus is on the final period of Foucault's life; how his discussions of biopolitics, subjectification, governmentality, and death have served as touchstones for recent empirical research. Key interventions initially made under these rubrics; how anthropologists and others have applied, challenged, and extended them. Prerequisite: consent of instructor.

ANTHRO 324. Political Anthropology. 5 Units.

An anthropological approach to politics through bringing anthropological ways of thinking and modes of analysis to bear on key presuppositions of modern Western political thought. Ideas of rights, the individual, society, liberty, democracy, equality, and solidarity; ethnographic accounts used to identify the limits of conventional analytical approaches and to document the forms of politics that such approaches either ignore or misunderstand. Prerequisite: consent of instructor.

ANTHRO 326. Postcolonial and Indigenous Archaeologies. 5 Units.

The role of postcolonial and Indigenous archaeologies as emergent disciplinary activities within contemporary society. Community based archaeologies; the roles of oral history, landscape, and memory; archaeology as political action; and history in archaeological projects. The emergence of Indigenous archaeology within N. America in relation to limitations imposed by processual or new archaeology; and NAGPRA, Kennewick, essentialism, and terminal narratives within this context. Prerequisite: consent of instructor.

ANTHRO 327. Language and Political Economy. 5 Units.

Theories of language: Saussure, Jakobson, Hymes, Marx, Foucault, Butler, and Derrida. The theorization of language in its linkages to power, social relations, and history. Prerequisites: Linguistics or Anthropology course work. Prerequisite: consent of instructor.

ANTHRO 331. The Anthropology of Technology. 5 Units.

Iconic discipline-building works of the last three decades; readings that lay out and intervene in contemporary debates. Prerequisite: consent of instructor.

ANTHRO 331A. Ecology, Evolution, and Human Health. 3-5 Units.

Ecology, Evolution, and Human Health Human ecology, environments, adaptation and plasticity, and their relationship to health and well-being considered in the broad comparative context. Topics include human population history, subsistence ecology, demography, reproductive decision making, urbanization, migration, infectious disease, the physiology of stress and the inflammatory response, social capital and social networks, nutrition, nutritional deficiencies, growth, and social inequalities. No prior course work in ecological or medical anthropology required.

Same as: ANTHRO 31.

ANTHRO 332A. The Anthropology of Heritage: Concepts, Contexts and Critique. 3-5 Units.

This seminar will explore foundational concepts currently employed within heritage practice and debates. Readings will examine the historically formative context of colonial-era and nationalist discourses on stewardship and culture, as well as postcolonial reformulations of such concepts as cultural property, cultural recognition and public history. The seminar will engage the question of the relationship between foundational concepts and the current cosmopolitan and internationalist vision for heritage, probing the enduring dynamics of North-South divides in heritage development and archaeological practice.

Same as: ARCHLGY 132, ARCHLGY 232, ARCHLGY 332.

ANTHRO 333. Anthropologies of Evidence. 5 Units.

Drawing on literature in Anthropology and Science and Technology Studies, this course will examine what kinds of artifacts and arguments count as evidence in intellectual and scientific debate.

ANTHRO 333A. The Cultural Politics of Ambiguity. 5 Units.

Contemporary conceptual approaches to understanding the politics and production of certainty, ambiguity, and doubt. The seemingly ambiguous nature of the science of industrial pollution and contamination exonerate corporate and government polluters from rising rates of cancer, while the science of liberal economic models seems to create no alternative to massive economic subsidies of the financial sector. How culpability, exoneration, transformative action, institutional stasis, and political rely on the production of certainty, ambiguity, and doubt. Prerequisite: consent of instructor.

ANTHRO 334. Trauma and Healing. 5 Units.

This course considers class and recent work on culture and psychiatry with an emphasis on trauma. We consider work on the main diagnostic categories like depression and schizophrenia, but also the work on dissociation, war combat, PTSD, and psychosis.

ANTHRO 336. Anthropology of Rights. 5 Units.

Ideas of rights at the center of contemporary politics around the world. An anthropological perspective on how rights are invoked, claimed, and translated into institutional policies in ethnographic cases. The limitations of liberal notions of rights and innovative forms of politics emerging within and against rights talk. Prerequisite: consent of instructor.

ANTHRO 336A. The Posthumanistic Subject. 3-5 Units.

The course will examine the need to rethink the traditional western idea of the strong subject. Through close readings of works by Agamben, Braidotti, Derrida, Deleuze, Hall, Haraway, Latour, Wolfe, among others, this course will explore posthumanist theories of individual and collective subjectivity that challenge traditional ways of defining the human and the non-human subject/person and promote fundamental reconsideration of issues such as agency, autonomy, essence, freedom, dignity, otherness, substance, personhood, sociality, and life itself. The course would consider, how we can empower the subject and community in order to develop a desired model of participatory democracy.

Same as: FRENGEN 320.

ANTHRO 337. The Politics of Humanitarianism. 5 Units.

What does it mean to want to help, to organize humanitarian aid, in times of crisis? At first glance, the impulse to help issues a good one. Helping is surely preferable to indifference and inaction. This does not mean that humanitarian interventions entail no ethical or political stakes or that they are beyond engaged critique. We need to critique precisely that which we value, and to ask some hard questions, among them these: What are the differences among humanitarianism, charity, and philanthropy? What of social obligations and solidarities? How does the neoliberal world order currently create structural inequalities that ensure the reproduction of poverty and violence? How does the current order of things resemble or differ from the colonial world order? This course examines the history of humanitarian sensibilities and the emergence of organized action in the cause of humanity. In the early years of humanitarian intervention, political neutrality was a key principle; it has now come under ever greater analytical and political scrutiny. We will examine the reasons for the politicization and militarization of aid -- be it humanitarian aid in natural disasters or political crises; development programs in the impoverished south (the Third World), or peace-keeping. We will end with a critical exploration of the concept of human rights, humanity, and personhood. The overall methodological aim of the course is to demonstrate what insights an ethnographic approach to the politics, ethics, and aesthetics of humanitarianism can offer.

ANTHRO 338. Anthropological Approaches to Religion. 5 Units.**ANTHRO 339. Anthropology of Religion. 5 Units.**

This course presents classic and contemporary work on the anthropology of religion: Durkheim *Elementary Forms of the Religious Life*; Levy-Bruhl; *Primitive Mentality*; Douglas *Purity and Danger*; Evans Pritchard *Nuer Religion*; and recent ethnographies/scholarly work by Robbins, Keane, Keller, Boyer, Barrett, and others.

ANTHRO 341. The Archaeology of Religious Crusading in Medieval Europe. 5 Units.

This course will present a chronologically framed outline of the three main regions that witnessed the greatest impact of the crusading period. Commencing with the initial capture of Jerusalem and the subsequent establishment of a crusader kingdom in the Middle East in AD1099, till its eventual end in 1291, this will be followed by the pagan conversions of the Northern Baltic. Centred on Poland (Prussia) and Latvia (Livonia) from the 13th to 15th c., this example will also be compared with neighbouring Lithuania, which never fell under the political hegemony of the Monastic Orders. Finally, the course covers the Iberian case, where the Reconquista or reconquest - of lands from Muslim groups concluded with the fall of Granada and the unification of Spain in 1492. Through archaeological and historical evidence, the materials, technologies and ideas of the crusading groups will be compared and contrasted, with a particularly emphasis on bioarchaeological datasets. Ultimately, the course deals with the economic, social and practical mechanisms used by the religious orders to colonise, once the initial conquest had been achieved.

ANTHRO 343. Culture as Commodity. 5 Units.

Focus is on theories of commodification, interests in tourism, national cultures as marketable objects, and how identities are constituted through production and consumption. The formation of global style and taste. Prerequisite: consent of instructor.

ANTHRO 344. Graphic Medicine. 5 Units.

In this course students will study medical cultures through visual communication ranging from x-rays and PET scans to graphic novels. Course will also include literature on visual theory.

ANTHRO 345. New Visions in Medical Anthropology. 5 Units.

Recent experimental histories of the field. Emphasis is on how, working within anthropology's classic format, the ethnographic monograph, authors have innovatively responded to the challenges of representing amorphous, unspoken, and often violent relationships between the body and social change. The authors' expository techniques, and how they engage and extend theoretical debate. How to assess works within medical anthropology and its allied fields. Prerequisite: consent of instructor.

ANTHRO 346A. Sexuality Studies in Anthropology. 5 Units.

Current research on sexuality from perspectives including paleoanthropology, archaeology, ethnography, and linguistic anthropology. Readings paired with case studies that explore theoretical and methodological issues. Prerequisite: consent of instructor.

ANTHRO 349. Anthropology of Capitalism. 5 Units.

This advanced graduate seminar explores capitalism as an historically-situated and culturally-mediated articulation of practices rather than as an economic system or social structure governed by an internal logic. It draws on poststructural theories of culture, society and subjectivity to investigate the processes through which diverse capitalist practices are produced. Prerequisite: Graduate standing in Anthropology or permission of the instructor. Previous graduate level coursework in cultural anthropology, social theory or cultural studies is required. No auditing is permitted. Enrollment limited to 12.

ANTHRO 352. Foucault: The Question of Method. 5 Units.

Foucault as methodological exemplar for historical and social research. Emphasis is on his historical studies of clinical medicine, prisons, and sexuality, and on applying his methods to empirical studies of topics such as colonialism, race, and liberal governmental rationality.

ANTHRO 355. Cities in Global Perspective. 5 Units.

Interdisciplinary approach to examining global cities. The concept of the global city, and the interdependent processes that help produce urban spaces. Situating the transformation of urban spaces within globalization and its differential effects; current explanatory frameworks that pay attention to multiple scales of spatial and economic articulation. Prerequisite: graduate standing. Prerequisite: consent of instructor.

ANTHRO 356. The Anthropology of Development. 5 Units.

Multidisciplinary. Topics vary annually. Areas include Africa, S. Asia, and Latin America. Prerequisite: consent of instructor.

ANTHRO 357. Other Minds: Puzzles in Psychiatric and Psychological Anthropology. 5 Units.

Problems in the way anthropologists explore other minds anthropologically and the ways in which anthropologists seek to understand the models of other minds held by the people observed. Topics include theory of mind, witchcraft, belief, empathy, psychosis, trauma, Freud, Vygotsky, and cognitive dissonance. Prerequisite: consent of instructor. Under grads cannot take this class without permission of the instructor.

ANTHRO 360. Social Structure and Social Networks. 5 Units.

In this course, we will explore social network analysis, a set of methods and theories used in the analysis of social structure. The fundamental conceit underlying social network analysis is that social structure emerges from relationships between individuals. We will therefore concentrate in particular on the measurement of relationships, emphasizing especially practical methodology for anthropological fieldwork. This is a somewhat unusual course because of its focus on social network research coming out of anthropological and ethnological traditions. While most current practitioners of social network analysis are (probably) sociologists, many of both the methodological antecedents and theoretical justifications for the field can be found in these two traditions. A major goal of this course is to understand how the methods and perspectives of social network analysis can be usefully incorporated into contemporary approaches to ethnography and other anthropological modes of investigation.

ANTHRO 361. Life and Death in Contemporary Latin America: An Anthropological Inquiry. 5 Units.

This seminar explores life and death in contemporary Latin America. We will address anthropological understanding of the role of colonialism, migration, violence, urbanization, democratic transition and neoliberalism as they configure the experience of, and threshold between, vital and deadly processes. This is not a standard survey course, covering the region as a whole however. Instead, we will critically engage several recent ethnographies that explore, for example: the politics and practices of memory; border thinking and living; the political economy of death and desire; state violence and social movements; the relationship between the laboring city and body. We will supplement ethnographies with contemporary Latin American critical theory, film, and literary texts. Prerequisite: consent of instructor.

ANTHRO 362. Human Spatial Dynamics: Seminar in Communicating Contemporary Science. 5 Units.

This seminar is designed to bring together all students and faculty currently working on issues related to human use of land and spatially defined resources. The focus is to provide a forum for reporting on recent results and question development, providing students with vital skills in designing and communicating the results of research. Under grads by permission of instructor.

ANTHRO 362A. Introduction to Human Evolution, Ecology, Genetics, and Culture. 5 Units.

Themes and topics of lasting heuristic value in the anthropological sciences. Combines the lecture content of 2A and 2B with a discussion section for graduate students. Must be taken in the Autumn Quarter of a student's first year in the graduate program.

ANTHRO 363. Demography and Life History Theory. 5 Units.

Problems in demography and theoretical population biology applied to human systems. Emphasis is on establishing relationships between models in theoretical population biology and empirical demographic methodology. Topics include philosophy of models and model building, population dynamics, stable population theory, species interactions in human ecology, models of infectious diseases and their control, cultural evolution. Prerequisites: HUMBIO 137 or consent of instructor.

ANTHRO 364. EcoGroup: Current Topics in Ecological, Evolutionary, and Environmental Anthropology. 5 Units.

Seminar; restricted to graduate students. Topics vary with instructor. How to ask appropriate questions, how to derive research hypotheses from theory, how to design methodologies for testing hypotheses, and how to present results by reading and critiquing key contemporary papers in the field. Ph.D. students enrolling in this course to fulfill the department review course requirement must enroll in 5 units. Graduate students enrolling in this course to participate in a topical forum may enroll in 2 units. Course may be repeated for 2 units. Prerequisites: by consent of instructor.

ANTHRO 365. The Theory of the Modern Subject. 5 Units.

This course traces the emergence of a coherent theory of the modern subject through readings of philosophical works and social theory from 18th century to the 20th century.

ANTHRO 366. Material Semiotics. 5 Units.

This seminar will focus on the emerging body of literature on the materiality of the production, circulation, and mediation of paperwork as constitutive of modern forms of governance. We will discuss specific genres of paperwork; notes, memos, files, documents, as well as archives and other mnemonic technologies; both as cultural practices and reflexive objects, and examine how they produce modern social epistemologies of accountability, evidence, the fact, and truth in the fields of law, business, and public administration, as well as in civil society generally. Readings will include works by Max Weber, Bruno Latour, Jacques Derrida, Michel Foucault, Cornelia Vismann, Ann Stoler, and others.

ANTHRO 367. The Anthropology of Science: Global Politics and Laboratory Life. 5 Units.

Science and technology are important cultural products that often dramatically reorganize various aspects of human life. In this course we will explore how recent innovations in the life sciences and biomedicine may reconfigure crucial elements of social institutions, lend new structures to identity politics, and often change the way we interact with and conceive of nature. We will examine these issues in various global settings to explore how everyday politics shape politics of life in different locales.

ANTHRO 370. Advanced Theory and Method in Historical Archaeology. 5 Units.

Current debates about theory and method. Prerequisite: consent of instructor.

ANTHRO 371. Proposal Writing for Archaeologists. 2 Units.

Required of second-year Ph.D. students in the archaeology track. The conceptualization of dissertation research problems, the theories behind them, and the methods for exploring them. Participants draft a research prospectus suitable for a dissertation proposal and research grant applications. Limited enrollment. Prerequisite: consent of instructor. Same as: ARCHLG 371.

ANTHRO 373. Things: An Archaeology of the Relationships Between Humans and Things. 5 Units.

This course examines a variety of approaches that claim to explore the relationships between humans and things. Some of the approaches include Marx and material culture studies; Heidegger; cognitive and phenomenological; Actor Network Theory. But there is a need also to examine behavioral and ecological and Darwinian approaches. Many of these approaches do not adequately deal with the physicality of things as objects and there is a need to seek a way to incorporate such aspects of things into social theory.

ANTHRO 374. Archaeology of Colonialism/Postcolonialisms. 5 Units.

Advanced graduate seminar focused on the archaeology of colonial and postcolonial contexts, both prehistoric and historic. Emphasis on intersections between archaeological research and and subaltern, postcolonial, and transnational feminist/queer theory. Prerequisite: consent of instructor.

ANTHRO 375. Archaeology and Globalism. 4-5 Units.

The emergence of archaeology as a discipline in the context of the rise of the nation state. Global economies and other issues have created a new context for archaeology. How are archaeology and heritage responding? The idea of world heritage. The impact of postcolonialism. The commodification of the past: the past as theme park, as travel tourism or nostalgia, as exotic and other. Conflict between uses of the past for identity and as theme park; between heritage and resource or play. The impact of the Goddess, New Age, and other movements. Archaeology and human rights issues including forensic archaeology. Prerequisite: consent of instructor.

ANTHRO 380. Practice and Performance: Bourdieu, Butler, Giddens, de Certeau. 5 Units.

Poststructuralist theories of iteration and mimesis used by social scientists to negotiate the tension between social structure and social practice: Giddens' structuration theory; Bourdieu's practice theory; Butler's theories of gender performativity; and de Certeau's analysis of tactics and strategies. Ethnographic and archaeological case studies that employ methodologies inspired by these approaches. Intersections and contradictions between these theorists' work; their use in anthropological practice. Issues of gender, sexuality, and ethnicity. Prerequisite: consent of instructor.

ANTHRO 382. Advanced Topics in Medical Anthropology. 5 Units.

Graduate seminar. The history and theories of medical anthropology. Focus is on medical anthropology's transformations in the 20th century: how medical anthropology has emerged as a field of inquiry, grown in dialogue with other areas of scholarships, and come to offer a unique array of theoretical positions and modes of ethnographic engagement. Emphasis is on debates within interpretive and critical medical anthropology, and how an understanding of these debates may be used to assess contemporary works within the field. Prerequisite: consent of instructor.

ANTHRO 400. Dissertation Writers Seminar. 1-3 Units.

Required of fifth-year Ph.D. students returning from dissertation field research and in the process of writing dissertations and preparing for professional employment. Prerequisite: consent of instructor.

ANTHRO 401A. Qualifying Examination: Topic. 2-5 Units.

Required of second- and third-year Ph.D. students writing the qualifying paper or the qualifying written examination.

ANTHRO 401B. Qualifying Examination: Area. 2-5 Units.

Required of second- and third-year Ph.D. students writing the qualifying paper or the qualifying written examination. May be repeated for credit one time.

ANTHRO 440. Teaching Assistantship. 3-5 Units.

Supervised experience as assistant in one undergraduate course.

ANTHRO 441. Master's Research Thesis. 1-15 Units.

Supervised work for terminal and coterminial master's students writing the master's project in the final quarter of the degree program.

ANTHRO 442. Reading Group. 2-3 Units.

Graduate student reading group on a thematic topic of interest. Intended for first or second-year cohort PhD students. Sections: Liisa Malkki, Sylvia Yanagisako, Thomas Hansen, Paulla Ebron, and Miyako Inoue.

ANTHRO 444. Anthropology Colloquium: Graduate Seminar. 1 Unit.

Department Colloquia Lecture Series. Lectures presented on a variety of anthropological topics. Enrollment is required and restricted to the Department of Anthropology Master's students and First and Second-year PhD students. May be repeated for credit.

ANTHRO 445. Anthropology Brown Bag Series. 1 Unit.

Current topics and trends in cultural/social anthropology, archaeology, and environmental and ecological anthropology. Enrollment in this noon-time series is restricted to the Department of Anthropology Master's students and First and Second-year PhD students.

ANTHRO 446A. Method of Analysis Program in the Social Sciences. 1 Unit.

Colloquium series. Creation and application of new methodological techniques for social science research. Presentations on methodologies of use for social scientists across departments at Stanford by guest speakers from Stanford and elsewhere. See <http://mapss.stanford.edu>. Same as: COMM 310.

ANTHRO 450. Research Apprenticeship. 1-15 Units.

Supervised work on a research project with an individual faculty member. May be repeated for credit.

ANTHRO 451. Directed Individual Study. 1-15 Units.

Supervised work for a qualifying paper, examination, or project with an individual faculty member.

ANTHRO 452. Graduate Internship. 3-5 Units.

Provides graduate students with the opportunity to pursue their area of specialization in an institutional setting such as a laboratory, clinic, research institute, or government agency.

ANTHRO 801. TGR Project. 0 Unit.**ANTHRO 802. TGR Dissertation. 0 Unit.**

Applied Physics Courses

APPPHYS 77N. Functional Materials and Devices. 3 Units.

Preference to freshmen. Exploration via case studies how functional materials have been developed and incorporated into modern devices. Particular emphasis on magnetic and dielectric materials and devices. Recommended: high school physics course including electricity and magnetism.

APPPHYS 79N. Energy Options for the 21st Century. 3 Units.

Preference to freshmen. Choices for meeting the future energy needs of the U.S. and the world. Basic physics of energy sources, technologies that might be employed, and related public policy issues. Trade-offs and societal impacts of different energy sources. Policy options for making rational choices for a sustainable world energy economy.

APPPHYS 201. Electrons and Photons. 4 Units.

Applied Physics Core course appropriate for graduate students and advanced undergraduate students with prior knowledge of elementary quantum mechanics, electricity and magnetism, and special relativity. Interaction of electrons with intense electromagnetic fields from microwaves to x-ray, including electron accelerators, x-ray lasers and synchrotron light sources, attosecond laser-atom interactions, and x-ray matter interactions. Mechanisms of radiation, free-electron lasing, and advanced techniques for generating ultrashort brilliant pulses. Characterization of electronic properties of advanced materials, prospects for single-molecule structure determination using x-ray lasers, and imaging attosecond molecular dynamics.

APPPHYS 202. Quantum Probability and Quantum Information. 4 Units.

Applied Physics Core course appropriate for graduate students and advanced undergraduate students with prior knowledge of elementary quantum mechanics, basic probability, and linear algebra. Quantum probability as a generalization of classical probability theory, with implications for information theory and computer science. Generalized quantum measurement theory, conditional expectation, and quantum noise theory with an emphasis on communications and precision measurements. Classical versus quantum correlations, entanglement and Bell's theorem. Introduction to quantum information processing including algorithms, error correction and communication protocols.

APPPHYS 203. Atoms, Fields and Photons. 4 Units.

Applied Physics Core course appropriate for graduate students and advanced undergraduate students with prior knowledge of elementary quantum mechanics, electricity and magnetism, and ordinary differential equations. Structure of single- and multi-electron atoms; electron correlation, atom-photon and atom-atom entanglement; fundamentals of laser spectroscopy and coherent control. Phenomenology and quantitative modeling of atoms in strong fields, with modern applications. Introduction to quantum optical theory of atom-photon interactions, including quantum trajectory theory.

APPPHYS 204. Quantum Materials. 4 Units.

Applied Physics Core course appropriate for graduate students and advanced undergraduate students with prior knowledge of elementary quantum mechanics. Introduction to materials of current interest, with an emphasis on quantum matter. Topics include superconductivity, magnetism, phase transitions, multiferroics, surface and interface states. Prerequisite: elementary course in quantum mechanics.

APPPHYS 205. Introduction to Biophysics. 3-4 Units.

Core course appropriate for advanced undergraduate students and graduate students with prior knowledge of calculus and a college physics course. Introduction to how physical principles offer insights into modern biology, with regard to the structural, dynamical, and functional organization of biological systems. Topics include the roles of free energy, diffusion, electromotive forces, non-equilibrium dynamics, and information in fundamental biological processes.
Same as: BIO 126, BIO 226.

APPPHYS 207. Laboratory Electronics. 4 Units.

Lecture/lab emphasizing analog and digital electronics for lab research. RC and diode circuits. Transistors. Feedback and operational amplifiers. Active filters and circuits. Pulsed circuits, voltage regulators, and power circuits. Precision circuits, low-noise measurement, and noise reduction techniques. Circuit simulation tools. Analog signal processing techniques and modulation/demodulation. Principles of synchronous detection and applications of lock-in amplifiers. Common laboratory measurements and techniques illustrated via topical applications. Limited enrollment. Prerequisites: undergraduate device and circuit exposure.

APPPHYS 208. Laboratory Electronics. 4 Units.

Lecture/lab emphasizing analog and digital electronics for lab research. Continuation of APPPHYS 207 with emphasis on applications of digital techniques. Combinatorial and synchronous digital circuits. Design using programmable logic. Analog/digital conversion. Microprocessors and real time programming, concepts and methods of digital signal processing techniques. Current lab interface protocols. Techniques commonly used for lab measurements. Development of student lab projects during the last three weeks. Limited enrollment. Prerequisites: undergraduate device and circuit exposure. Recommended: previous enrollment in APPPHYS 207.

APPPHYS 215. Numerical Methods for Physicists and Engineers. 4 Units.

Review of basic numerical techniques with additional advanced material: derivatives and integrals; linear algebra; linear least squares fitting, FFT and wavelets, singular value decomposition, linear prediction; optimization, nonlinear least squares, maximum entropy methods; deterministic and stochastic differential equations, Monte Carlo methods.

APPPHYS 216. X-Ray and VUV Physics. 3 Units.

Research and classical concepts in photon science. Photon-electron interactions; x-ray absorption and Compton scattering. X-ray spectroscopy; EXAFS, SEXAFS, edge structure, magnetic circular dichroism, and linear dichroism. Photoemission spectroscopy and many-electron effects: angle-resolved and integrated photoemission, resonance photoemission, spin-polarized photoemission. Photoelectron diffraction and holography. X-ray interactions with condensed matter: diffraction and scattering. Photon sources: synchrotron, wigglers, and undulators. Photon and electron detectors and analyzers. Prerequisite: familiarity with quantum mechanics.

APPPHYS 217. Estimation and Control Methods for Applied Physics. 4 Units.

Recursive filtering, parameter estimation, and feedback control methods based on linear and nonlinear state-space modeling. Topics in: dynamical systems theory; practical overview of stochastic differential equations; model reduction; and tradeoffs among performance, complexity, and robustness. Numerical implementations in MATLAB. Contemporary applications in systems biology and quantum precision measurement. Prerequisites: linear algebra and ordinary differential equations.

APPPHYS 219. Solid State Physics and the Energy Challenge. 3 Units.

Technology issues for a secure energy future; role of solid state physics in energy technologies. Topics include the physics principles behind future technologies related to solar energy and solar cells, solid state lighting, superconductivity, solid state fuel cells and batteries, electrical energy storage, materials under extreme condition, nanomaterials.

APPPHYS 220. Applied Electrodynamics. 3 Units.

Techniques for general electrodynamics, illustrated by examples from geophysics, microwave engineering, optical devices, accelerators, antennas, and plasma physics. RF/microwave structure representations, scattering matrices, treatments for periodic systems. Perturbation and variational techniques applied to approximate solutions, fundamentals of numerical techniques. Analysis methods via expansions in terms of natural modes. Introduction to finite element methods via the application of variational techniques. Laboratory experiments including time domain and frequency domain methods. Solutions of inverse electrodynamic problems via perturbation techniques coupled with lab measurements (such as estimation of a physical structure via experimental measurements and formal models). Prerequisites: PHYSICS 121, MATH 106 and MATH 132, or equivalent experience.

APPPHYS 223. Stochastic and Nonlinear Dynamics. 3 Units.

Theoretical analysis of dynamical processes: dynamical systems, stochastic processes, and spatiotemporal dynamics. Motivations and applications from biology and physics. Emphasis is on methods including qualitative approaches, asymptotics, and multiple scale analysis. Prerequisites: ordinary and partial differential equations, complex analysis, and probability or statistical physics.
Same as: BIO 223.

APPPHYS 223B. Nonlinear Dynamics: This Side of Chaos. 3 Units.

Linear dynamics, periodic systems, Hamiltonian motion and phase space. The physics of nonlinear motion: thinking in phase space. Perturbation theory, periodic orbits, resonances, stability and instability. Integrability and symplectic integration. The KAM theorem and renormalization description of the transition to chaos. Dissipation and bifurcation. Application of methods to nanoscience, lasers and accelerators, condensed matter physics and biophysics. Prerequisites: differential equations and classical mechanics.

APPPHYS 227. Quantum Device Physics of Atomic and Semiconductor Systems. 3 Units.

Concepts and constituent technologies of quantum information systems. Quantum cryptography: single photon and entangled photon-pair-based quantum key distributions, quantum teleportation, quantum repeater. Quantum computer: Deutsch-Josza algorithm, Grover algorithm, Shor algorithm, quantum simulation, quantum circuits. Quantum hardware: atomic physics, nuclear magnetic resonance, spintronics and quantum optics.

APPPHYS 232. Advanced Imaging Lab in Biophysics. 4 Units.

Laboratory and lectures. Advanced microscopy and imaging, emphasizing hands-on experience with state-of-the-art techniques. Students construct and operate working apparatus. Topics include microscope optics, Koehler illumination, contrast-generating mechanisms (bright/dark field, fluorescence, phase contrast, differential interference contrast), and resolution limits. Laboratory topics vary by year, but include single-molecule fluorescence, fluorescence resonance energy transfer, confocal microscopy, two-photon microscopy, and optical trapping. Limited enrollment. Recommended: basic physics, Biology core or equivalent, and consent of instructor.
Same as: BIO 132, BIO 232, BIOPHYS 232, MCP 232.

APPPHYS 236. Biology by the Numbers: Evolution. 3 Units.

Topics in biology from a quantitative perspective. Subjects vary. 2012-13 focus: evolution, from basic principles of evolutionary dynamics to fundamental quantitative questions that are far from being answered; from early life, metabolic processes, and molding of earth by microbes to spread of human epidemics; from analysis of genomes and molecular phylogenies to aspects of multi-cellular development. Prerequisite: familiarity with ordinary differential equations and probability. Biology background not required.
Same as: BIOC 236.

APPPHYS 240. From Atom Smashers to X-ray Lasers. 3 Units.

Physics and impact of particle beams and accelerators from their origins up to the present state of the art. Accelerator fundamentals, special topic lectures by expert scientists, laboratory accelerator experiment using state of the art accelerators at SLAC. Prerequisites: Advanced undergraduate courses in Maxwell's equations, special relativity, mathematical physics, and introductory quantum mechanics.

APPPHYS 270. Magnetism and Long Range Order in Solids. 3 Units.

Cooperative effects in solids. Topics include the origin of magnetism in solids, crystal electric field effects and anisotropy, exchange, phase transitions and long-range order, ferromagnetism, antiferromagnetism, metamagnetism, density waves and superconductivity. Emphasis is on archetypal materials. Prerequisite: PHYSICS 172 or MATSCI 209, or equivalent introductory condensed matter physics course.

APPPHYS 272. Solid State Physics. 3 Units.

Introduction to the properties of solids. Crystal structures and bonding in materials. Momentum-space analysis and diffraction probes. Lattice dynamics, phonon theory and measurements, thermal properties. Electronic structure theory, classical and quantum; free, nearly-free, and tight-binding limits. Electron dynamics and basic transport properties; quantum oscillations. Properties and applications of semiconductors. Reduced-dimensional systems. (Graduate student enrollees will be required to complete additional assignments in a format determined by the instructor). Undergraduates should register for PHYSICS 172 and graduate students for APPPHYS 272. Prerequisites: PHYSICS 170 and PHYSICS 171, or equivalents.
Same as: PHYSICS 172.

APPPHYS 273. Solid State Physics II. 3 Units.

Introduction to the many-body aspects of crystalline solids. Second quantization of phonons, anharmonic effects, polaritons, and scattering theory. Second quantization of Fermi fields. Electrons in the Hartree-Fock and random phase approximation; electron screening and plasmons. Magnetic exchange interactions. Electron-phonon interaction in ionic/covalent semiconductors and metals; effective attractive electron-electron interactions, Cooper pairing, and BCS description of the superconducting state. Prerequisite: APPPHYS 272 or PHYSICS 172.

APPPHYS 280. Phenomenology of Superconductors. 3 Units.

Phenomenology of superconductivity viewed as a macroscopic quantum phenomenon. Topics include the superconducting pair wave function, London and Ginzburg-Landau theories, the Josephson effect, type I type II superconductivity, and the response of superconductors to currents, magnetic fields, and RF electromagnetic radiation. Introduction to thermal fluctuation effects in superconductors and quantum superconductivity.

APPPHYS 285. Physics of Disordered Systems. 3 Units.

Topics include types of disorder, percolation, localization, glasses and spin glasses, fractals, self-organized criticality, aggregation, gelation, and other random processes leading to disordered media.

APPPHYS 290. Directed Studies in Applied Physics. 1-15 Units.

Special studies under the direction of a faculty member for which academic credit may properly be allowed. May include lab work or directed reading.

APPPHYS 291. Practical Training. 3 Units.

Opportunity for practical training in industrial labs. Arranged by student with research adviser's approval. Summary of activities required.

APPPHYS 293. Theoretical Neuroscience. 3 Units.

Introduction to fundamental theoretical ideas that provide conceptual insights into how networks of neurons cooperatively mediate important brain functions. Topics include basic mathematical models of single neurons, neuronal computation through feedforward and recurrent network dynamics, principles of associative memory, applications of information theory to early sensory systems, correlations and neural population coding, network plasticity and the self-organization of stimulus selectivity, and supervised and unsupervised learning through multiple mechanisms of synaptic plasticity. Emphasis on developing mathematical and computational skills to analyze complex neural systems. Prerequisites: calculus, linear algebra, and basic probability theory, or consent of instructor.

APPPHYS 294. Cellular Biophysics. 3 Units.

Physical biology of dynamical and mechanical processes in cells. Emphasis is on qualitative understanding of biological functions through quantitative analysis and simple mathematical models. Sensory transduction, signaling, adaptation, switches, molecular motors, actin and microtubules, motility, and circadian clocks. Prerequisites: differential equations and introductory statistical mechanics.
Same as: BIO 294.

APPPHYS 302. Experimental Techniques in Condensed Matter Physics. 4 Units.

Cryogenics; low signal measurements and noise analysis; data collection and analysis; examples of current experiments. Prerequisites: PHYSICS 170, PHYSICS 171, and PHYSICS 172, or equivalents.

APPPHYS 304. Lasers Laboratory. 4 Units.

Theory and practice. Theoretical and descriptive background for lab experiments, detectors and noise, and lasers (helium neon, beams and resonators, argon ion, cw dye, titanium sapphire, semiconductor diode, and the Nd:YAG). Measurements of laser threshold, gain, saturation, and output power levels. Laser transverse and axial modes, linewidth and tuning, Q-switching and modelocking. Limited enrollment. Prerequisites: EE 231 and EE 232, or consent of instructor.

APPPHYS 305. Advanced Nonlinear Optics Laboratory. 4 Units.

Core concepts and experiments in the nonlinear interaction of laser light with matter. Experiments on second harmonic generation and optical parametric oscillation culminate with assembly and use of an optical frequency comb for student-defined, open-ended experiments. Supercontinuum light generation, carrier-envelope phase stabilization, and metrology and spectroscopy. Prerequisites: APPPHYS 304 and EE 346 or EE 231 and EE 232, or consent of instructor.

APPPHYS 315. Methods in Computational Biology. 3 Units.

Methods of bioinformatics and biomolecular modeling from the standpoint of biophysical chemistry. Methods of genome analysis; cluster analysis, phylogenetic trees, microarrays; protein, RNA and DNA structure and dynamics, structural and functional homology; protein-protein interactions and cellular networks; molecular dynamics methods using massively parallel algorithms.

APPPHYS 324. Introduction to Accelerator Physics. 3 Units.

Physics of particle beams in linear and circular accelerators. Transverse beam dynamics, acceleration, longitudinal beam dynamics, synchrotron radiation, free electron lasers, collective instabilities and nonlinear effects. Topics of current research in accelerator physics. Selected laboratory measurements at SLAC to augment the lecture material.

APPPHYS 325. X-rays: Past, Present and Future. 3 Units.

Introduction to the physics of bright x-ray sources. Topics include: physics and basic properties of short wavelength radiation, X-ray generation via incoherent Compton scattering and High Harmonic Generation (HHG), applications and impact of insertion devices in synchrotron radiation facilities and the development of x-ray free electron lasers. Includes selected laboratory tours of the Linac Coherent Light Source and/or measurements at SLAC. Prerequisite: graduate-level electrodynamics, or consent of instructor.

APPPHYS 345. Advanced Numerical Methods for Data Analysis and Simulation. 3 Units.

Gaussian and unit sphere quadrature, singular value decomposition and principal component analysis, Krylov methods, non-linear fitting and super-resolution, independent component analysis, 3d reconstruction, "shrink-wrap", hidden Markov methods, support vector machines, simulated annealing, molecular dynamics and parallel tempering, Markov state methods, Monte Carlo methods for constrained systems.

APPPHYS 376. Literature of Ultracold Atomic Physics. 3 Units.

Ultracold atomic gases in modern quantum optics, metrology, quantum information science, and quantum many-body physics. Review of basic concepts and survey of key literature in seminar format.

APPPHYS 383. Introduction to Atomic Processes. 3 Units.

Atomic spectroscopy, matrix elements using the Coulomb approximation, summary of Racah algebra, oscillator and line strengths, Einstein A coefficients. Radiative processes, Hamiltonian for two- and three-state systems, single- and multi-photon processes, linear and nonlinear susceptibilities, density matrix, brightness, detailed balance, and electromagnetically induced transparency. Inelastic collisions in the impact approximation, interaction potentials, Landau-Zener formulation. Continuum processes, Saha equilibrium, autoionization, and recombination.

APPPHYS 387. Quantum Optics and Measurements. 3 Units.

Basic concerns and fundamental postulates in quantum theory of measurements. Quantum non-demolition measurements, nonlinear measurements and continuous measurements. Non-local quantum correlation and Bell's inequality. Generation, detection, and application of single photons and entangled photon-pairs. Reservoir theory of an open dissipative system. Laser phase transition versus BCS transition in microcavities.

APPPHYS 389. Bose-Einstein Condensation and Lasers. 3 Units.

Topics include comparison of physics of Bose-Einstein Condensation (BEC) to physics of lasers, system differences and similarities between the quantum statistical properties of BEC and of lasers, BEC of non-interacting particles, Bogoliubov theory of interacting BEC and Gross-Pitaevskii equation, superfluidity and quantized vortices, quantum theory of laser, quantum noise and coherence functions, quantum correlation and squeezing.

APPPHYS 390. Dissertation Research. 1-15 Units.**APPPHYS 392. Topics in Molecular Biophysics. 3 Units.**

Concepts from statistical mechanics applied to contemporary molecular biology: allosteric transitions; protein folding; molecular recognition; actin polymers and gels; molecular motors; lipids and membrane proteins; ion channels. Some of the basic models used to quantitate fundamental biomolecular functions. Prerequisites: elementary statistical mechanics and chemical kinetics.

APPPHYS 470. Condensed Matter Seminar. 1 Unitss.

Current research and literature; offered by faculty, students, and outside specialists. May be repeated for credit.

APPPHYS 483. Optics and Electronics Seminar. 1 Unitss.

Current research topics in lasers, quantum electronics, optics, and photonics by faculty, students, and invited outside speakers. May be repeated for credit.

APPPHYS 802. TGR Dissertation. 0 Unit.

Arabic Language Courses

ARABLANG 1. First-Year Arabic, First Quarter. 5 Units.

(Formerly AMELANG 1A.) One-year sequence designed to develop beginning proficiency, with additional emphasis is on reading and writing standard Arabic (*fusha*).

ARABLANG 1A. Accelerated First-Year Arabic, Part I. 5 Units.

completes first-year sequence in two rather than three quarters. For students with previous knowledge of Arabic. Prerequisite: Placement Test or consent of instructor.

ARABLANG 1H. First-Year Arabic for Heritage Learners, First Quarter. 5 Units.

(Formerly AMELANG 1H). For students with home background or study/living experience in the Arab world. Designed to develop reading, writing, speaking and listening abilities in Arabic, as well as cultural knowledge. The course offers Arabic heritage and semi-heritage learners an opportunity to reactivate and expand their skills while studying both Modern Standard and Colloquial Arabic (Levantine Arabic) formally in an academic setting. Prerequisite: Placement Test or consent of instructor.

ARABLANG 2. First-Year Arabic, Second Quarter. 5 Units.

(Formerly AMELANG 1B.) One-year sequence designed to develop beginning proficiency, with additional emphasis is on reading and writing standard Arabic (*fusha*). Prerequisite: Placement Test, ARABLANG 1 or consent of instructor.

ARABLANG 2A. Accelerated First-Year Arabic, Part II. 5 Units.

Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Arabic. Prerequisite: Placement Test, completion of ARABLANG 1A or consent of instructor. This course fulfills the University Foreign Language Requirement.

ARABLANG 2H. First-Year Arabic for Heritage Learners, Second Quarter. 5 Units.

(Formerly AMELANG 2H). Continuation of ARABLANG 1H. For students with home background or study/living experience in the Arab world. Designed to develop reading, writing, speaking and listening abilities in Arabic, as well as cultural knowledge. The course offers Arabic heritage and semi-heritage learners an opportunity to reactivate and expand their skills while studying both Modern Standard and Colloquial Arabic (Levantine Arabic) formally in an academic setting. Prerequisite: Placement Test, ARABLANG 1H or consent of instructor.

ARABLANG 3. First-Year Arabic, Third Quarter. 5 Units.

(Formerly AMELANG 1C.) Continuation of ARABLANG 2. One-year sequence designed to develop beginning proficiency, with additional emphasis on reading and writing standard Arabic (*fusha*). Fulfills the University Foreign Language Requirement. Prerequisite: Placement Test, ARABLANG 2 or consent of instructor.

ARABLANG 3H. Beginning Arabic for Heritage Learners, Third Quarter. 5 Units.

Continuation of ARABLANG 2H. For students with home background or study/living experience in the Arab world. Designed to develop reading, writing, speaking and listening abilities in Arabic, as well as cultural knowledge. The course offers Arabic heritage and semi-heritage learners an opportunity to reactivate and expand their skills while studying both Modern Standard and Colloquial Arabic (Levantine Arabic) formally in an academic setting. Prerequisite: ARABLANG 2H or consent of instructor.

ARABLANG 10. Arabic Calligraphy. 2 Units.

(Formerly AMELANG 30). Calligraphy requires no linguistic background, stipulates no artistic skill for one to appreciate it and is the supreme art form of the Islamic world. Other Islamic arts (architecture, metal work, ceramics, glass, and textiles) draw on calligraphy as their principal source of embellishment. Interactive lecture-workshop sketches its development and illustrates the forms of Arabic calligraphy in use today.

ARABLANG 21. Second-Year Arabic, First Quarter. 5 Units.

(Formerly AMELANG 11A.) One-year sequence designed to develop intermediate proficiency, with additional emphasis on functional applications and reading and writing standard Arabic. Prerequisite: Placement Test, ARABLANG 3 or consent of instructor.

ARABLANG 21A. Accelerated Second-Year Arabic, Part I. 5 Units.

Completes Second-year sequence in two rather than three quarters. For students with previous knowledge of Arabic. Prerequisite: Placement Test, ARABLANG 2A or consent of instructor.

ARABLANG 21H. Second-Year Arabic for Heritage Learners, First Quarter. 5 Units.

(Formerly AMELANG 11H). For students with home background or study/living experience in the Arab world. Designed to develop reading, writing, speaking and listening abilities in Arabic, as well as cultural knowledge. The course offers Arabic heritage and semi-heritage learners an opportunity to reactivate and expand their skills while studying both Modern Standard and Colloquial Arabic (Levantine Arabic) formally in an academic setting. Prerequisite: Placement Test, ARABLANG 3H, or consent of instructor.

ARABLANG 22. second-Year Arabic, Second Quarter. 5 Units.

(Formerly AMELANG 11B.) Continuation of ARABLANG 21. One-year sequence designed to develop intermediate proficiency, with additional emphasis on functional applications and reading and writing standard Arabic. Prerequisite: Placement Test, ARABLANG 21 or consent of instructor.

ARABLANG 22A. Accelerated second-Year Arabic, Part II. 5 Units.

Completes Second-year sequence in two rather than three quarters. For students with previous knowledge of Arabic. Prerequisite: Placement Test, ARABLANG 22A or consent of instructor.

ARABLANG 22H. Second-Year Arabic for Heritage Learners, Second Quarter. 5 Units.

(Formerly AMELANG 12H). Continuation of ARABLANG 21H. For students with home background or study/living experience in the Arab world. Designed to develop reading, writing, speaking and listening abilities in Arabic, as well as cultural knowledge. The course offers Arabic heritage and semi-heritage learners an opportunity to reactivate and expand their skills while studying both Modern Standard and Colloquial Arabic (Levantine Arabic) formally in an academic setting. Prerequisite: Placement Test, ARABLANG 21H or consent of instructor.

ARABLANG 23. Second-Year Arabic, Third Quarter. 5 Units.

(Formerly AMELANG 11C.) Continuation of ARABLANG 22. One-year sequence designed to develop intermediate proficiency, with additional emphasis on functional applications and reading and writing standard Arabic. Prerequisite: Placement Test, ARABLANG 22 or consent of instructor.

ARABLANG 23H. Second-Year Arabic for Heritage Learners, Third Quarter. 5 Units.

(Formerly AMELANG 13H). Continuation of ARABLANG 22H. For students with home background or study/living experience in the Arab world. Designed to develop reading, writing, speaking and listening abilities in Arabic, as well as cultural knowledge. The course offers Arabic heritage and semi-heritage learners an opportunity to reactivate and expand their skills while studying both Modern Standard and Colloquial Arabic (Levantine Arabic) formally in an academic setting. Prerequisite: Placement Test, ARABLANG 23H or consent of instructor.

ARABLANG 125A. Colloquial Arabic, First Quarter. 2-4 Units.

(Formerly AMELANG 25A.) Sources include authentic videotaped conversations with native speakers, conversations, and texts of these conversations to enhance comprehension and improve aural skills. Prerequisite: 2 years of Arabic or consent of instructor.

ARABLANG 125B. Colloquial Arabic, Second Quarter. 2-4 Units.

(Formerly AMELANG 25B.) Continuation of ARABLANG 125A. Sources include authentic videotaped conversations with native speakers, conversations, and texts of these conversations to enhance comprehension and improve aural skills. Prerequisite: ARABLANG 125A or consent of instructor.

ARABLANG 125C. Colloquial Arabic, Third Quarter. 2-4 Units.
(Formerly AMELANG 25C.) Continuation of ARABLANG 125B. Sources include authentic videotaped conversations with native speakers, conversations, and texts of these conversations to enhance comprehension and improve aural skills. Prerequisite: ARABLANG 125B or consent of instructor.

ARABLANG 126A. Media Arabic, First Quarter. 2-4 Units.
(Formerly AMELANG 26A.) Arabic language used today in the printed and electronic media, including the Internet. Emphasizes current vocabulary and structures used in different modes of media coverage. Prerequisite: 2 years of Arabic or consent of instructor.

ARABLANG 126B. Media Arabic, Second Quarter. 2-4 Units.
(Formerly AMELANG 26B.) Continuation of ARABLANG 126A. Arabic language used today in the printed and electronic media, including the Internet. Emphasizes current vocabulary and structures used in different modes of media coverage. Prerequisite: ARABLANG 126A or consent of instructor.

ARABLANG 126C. Media Arabic, Third Quarter. 2-4 Units.
(Formerly AMELANG 26C.) Continuation of ARABLANG 126B. Arabic language used today in the printed and electronic media, including the Internet. Emphasizes current vocabulary and structures used in different modes of media coverage. Prerequisite: ARABLANG 126B or consent of instructor.

ARABLANG 131. Third-Year Arabic, First Quarter. 5 Units.
(Formerly AMELANG 21A.) Continuation of ARABLANG 23. One-year sequence designed to develop advanced proficiency with emphasis on complex and compound sentences through use of literary works, media Arabic, the Internet, and cultural productions. Prerequisite: Placement Test, ARABLANG 23 or consent of instructor.

ARABLANG 131H. Third-Year Arabic for Heritage Learners, First Quarter. 5 Units.
Continuation of ARABLANG 23H. Prerequisite ARABLANG 23H or consent of instructor.

ARABLANG 132. Third-Year Arabic, Second Quarter. 5 Units.
(Formerly AMELANG 21B.) Continuation of ARABLANG 131. One-year sequence designed to develop advanced proficiency with emphasis on complex and compound sentences through use of literary works, media Arabic, the Internet, and cultural productions. Prerequisite: Placement Test, ARAB;AMG 131 or consent of instructor.

ARABLANG 132H. Third-Year Arabic for Heritage Learners, Second Quarter. 5 Units.
Continuation of ARABLANG 131H. Prerequisite: ARABLANG 131H or consent of instructor.

ARABLANG 133. Third-Year Arabic, Third Quarter. 5 Units.
(Formerly AMELANG 21C.) Continuation of ARABLANG 132. One-year sequence designed to develop advanced proficiency with emphasis on complex and compound sentences through use of literary works, media Arabic, the Internet, and cultural productions. Prerequisite: Placement Test, ARABLANG 132 or consent of instructor.

ARABLANG 133H. Third-Year Arabic for Heritage Learners, Third Quarter. 5 Units.
Continuation of ARABLANG 132H. Prerequisite: ARABLANG 132H or consent of instructor.

ARABLANG 141. Fourth-Year Arabic, First Quarter. 3-4 Units.
(Formerly AMELANG 23A.) Prerequisite: three years of Arabic or consent of instructor.

ARABLANG 142. Fourth-Year Arabic, Second Quarter. 3-4 Units.
(Formerly AMELANG 23B.) Continuation of ARABLANG 141. Prerequisite: ARABLANG 141 or consent of instructor.

ARABLANG 143. Fourth-Year Arabic, Third Quarter. 3-4 Units.
(Formerly AMELANG 23C.) Continuation of ARABLANG 142. Prerequisite ARABLANG 142 or consent of instructor.

ARABLANG 297. Directed Reading. 1-5 Units.

ARABLANG 395. Graduate Studies in Arabic. 2-5 Units.
Prerequisite: Consent of instructor.

Archaeology Courses

ARCHLGY 1. Introduction to Prehistoric Archeology. 3-5 Units.
Aims, methods, and data in the study of human society's development from early hunters through late prehistoric civilizations. Archaeological sites and remains characteristic of the stages of cultural development for selected geographic areas, emphasizing methods of data collection and analysis appropriate to each.
Same as: ANTHRO 3.

ARCHLGY 1. Introduction to Prehistoric Archeology. 3-5 Units.
Aims, methods, and data in the study of human society's development from early hunters through late prehistoric civilizations. Archaeological sites and remains characteristic of the stages of cultural development for selected geographic areas, emphasizing methods of data collection and analysis appropriate to each.
Same as: ANTHRO 3.

ARCHLGY 12. Peopling of the Globe: Changing Patterns of Land Use and Consumption Over the Last 50,000 Years. 3-5 Units.
Fossil, genetic and archaeological evidence suggest that modern humans began to disperse out of Africa about 50,000 years ago. Subsequently, humans have colonized every major landmass on earth. This class introduces students to the data and issues regarding human dispersal, migration and colonization of continents and islands around the world. We explore problems related to the timing and cause of colonizing events, and investigate questions about changing patterns of land use, demography and consumption. Students are introduced to critical relationships between prehistoric population changes and our contemporary environmental crisis.
Same as: ANTHRO 18, EARTHYSYS 21, HUMBIO 182.

ARCHLGY 12. Peopling of the Globe: Changing Patterns of Land Use and Consumption Over the Last 50,000 Years. 3-5 Units.
Fossil, genetic and archaeological evidence suggest that modern humans began to disperse out of Africa about 50,000 years ago. Subsequently, humans have colonized every major landmass on earth. This class introduces students to the data and issues regarding human dispersal, migration and colonization of continents and islands around the world. We explore problems related to the timing and cause of colonizing events, and investigate questions about changing patterns of land use, demography and consumption. Students are introduced to critical relationships between prehistoric population changes and our contemporary environmental crisis.
Same as: ANTHRO 18, EARTHYSYS 21, HUMBIO 182.

ARCHLGY 55. Introduction to Archaeobotany. 5 Units.

The aim of this course is to provide a short introduction to archaeobotany. An overview of types of archaeobotanical remains will include an examination of macrobotanical remains (seeds, charcoal), microfossil remains (starch, pollen, phytoliths) and molecular remains (aDNA, isotopes). The ways in which various types of plant remains have been used will be discussed through case studies. Major debates that archaeobotanical research has shed light on, including the origins of agriculture and issues around domestication will also be examined. Some practical work will allow students to gain familiarity with botanical nomenclature and some archaeobotanical protocols and plant identification techniques. Students will look at microfossil residues from local grinding slabs and write a short paper on the residues recovered. They will also look at seed remains from either Chinese or local flotation samples using microscopes in the lab. Same as: ANTHRO 55A.

ARCHLGY 55. Introduction to Archaeobotany. 5 Units.

The aim of this course is to provide a short introduction to archaeobotany. ARCHLGY 64. Cultural Heritage and Human Rights. 1 Unitss.

This interdisciplinary research workshop will critically engage the issue of the growing currency of human rights discourse within cultural heritage. Epistemological and practical areas of tension between rights discourse and cultural discourse will be surveyed within the context of current global challenges facing heritage practice, conservation and archaeology. Topics will include the inequities of cultural recognition between North-South globalizations, questions of cultural property and rights, the role of tourism, and the impact of environmental conservation discourse on cultural rights. Same as: ARCHLGY 164.

ARCHLGY 64. Cultural Heritage and Human Rights. 1 Unitss.

This interdisciplinary research workshop will critically engage the issue of the growing currency of human rights discourse within cultural heritage. Epistemological and practical areas of tension between rights discourse and cultural discourse will be surveyed within the context of current global challenges facing heritage practice, conservation and archaeology. Topics will include the inequities of cultural recognition between North-South globalizations, questions of cultural property and rights, the role of tourism, and the impact of environmental conservation discourse on cultural rights. Same as: ARCHLGY 164.

ARCHLGY 85. The Archaeology of Roman Imperialism. 3-5 Units.

Analysis of the material culture of the early Roman empire (1st and 2nd c. CE). Focus is on new archaeological perspectives, theories and anthropological insights. Imperialism, colonialism and novel perspectives on centres, peripheries and frontiers. Imperial conceptualizations of time and space. Imperial landscapes: colonies, cities (private and public buildings), the country side, roads and ports. Imperial memories: the past in the past, ancestor cult in the house and the tomb, imperial funerals. Experiencing empire, discrepant identities (gender, age, the Roman 'others'). Same as: CLASSART 85.

ARCHLGY 85. The Archaeology of Roman Imperialism. 3-5 Units.

Analysis of the material culture of the early Roman empire (1st and 2nd c. CE). Focus is on new archaeological perspectives, theories and anthropological insights. Imperialism, colonialism and novel perspectives on centres, peripheries and frontiers. Imperial conceptualizations of time and space. Imperial landscapes: colonies, cities (private and public buildings), the country side, roads and ports. Imperial memories: the past in the past, ancestor cult in the house and the tomb, imperial funerals. Experiencing empire, discrepant identities (gender, age, the Roman 'others'). Same as: CLASSART 85.

ARCHLGY 99A. Historical Archaeology in the Archive, Lab, and Underground: Methods. 5 Units.

The practice of historical archaeology through methodologies including archival research, oral history, material culture analysis, and archaeological excavation. Students use these methods to analyze the history and archaeology of a local park, the Thornewood Open Space Preserve.

ARCHLGY 99A. Historical Archaeology in the Archive, Lab, and Underground: Methods. 5 Units.

The practice of historical archaeology through methodologies including archival research, oral history, material culture analysis, and archaeological excavation. Students use these methods to analyze the history and archaeology of a local park, the Thornewood Open Space Preserve.

ARCHLGY 102. Archaeological Methods. 5 Units.

Methodological issues related to the investigation of archaeological sites and objects. Aims and techniques of archaeologists including: location and excavation of sites; dating of places and objects; analysis of artifacts and technology and the study of ancient people, plants, and animals. How these methods are employed to answer the discipline's larger research questions. Same as: ANTHRO 91A.

ARCHLGY 102. Archaeological Methods. 5 Units.

Methodological issues related to the investigation of archaeological sites and objects. Aims and techniques of archaeologists including: location and excavation of sites; dating of places and objects; analysis of artifacts and technology and the study of ancient people, plants, and animals. How these methods are employed to answer the discipline's larger research questions. Same as: ANTHRO 91A.

ARCHLGY 103. History of Archaeological Thought. 5 Units.

Introduction to the history of archaeology and the forms that the discipline takes today, emphasizing developments and debates over the past five decades. Historical overview of culture, historical, processual and post-processual archaeology, and topics that illustrate the differences and similarities in these theoretical approaches. Same as: ANTHRO 90A.

ARCHLGY 103. History of Archaeological Thought. 5 Units.

Introduction to the history of archaeology and the forms that the discipline takes today, emphasizing developments and debates over the past five decades. Historical overview of culture, historical, processual and post-processual archaeology, and topics that illustrate the differences and similarities in these theoretical approaches. Same as: ANTHRO 90A.

ARCHLGY 104C. The Archaeology of Ancient China. 5 Units.

Early China from the perspective of material remains unearthed from archaeological sites; the development of Chinese culture from early hominid occupation nearly 2 million years ago through the development of agriculture in the Neolithic period and complex society in the Bronze Age to the political unification of China under the Qin Dynasty. Continuity of Chinese culture from past to present, history of Chinese archaeology, relationships between archaeology and politics, and food in early China. Same as: ARCHLGY 304C.

ARCHLGY 104C. The Archaeology of Ancient China. 5 Units.

Early China from the perspective of material remains unearthed from archaeological sites; the development of Chinese culture from early hominid occupation nearly 2 million years ago through the development of agriculture in the Neolithic period and complex society in the Bronze Age to the political unification of China under the Qin Dynasty. Continuity of Chinese culture from past to present, history of Chinese archaeology, relationships between archaeology and politics, and food in early China. Same as: ARCHLGY 304C.

ARCHLGY 105. Heritage: Theorizations of the Past. 3-5 Units.

This course explores the emergence of heritage from within the broader field of modern historical thought. Readings explore how transformations in economic theory and changes in traditional philosophies of history have shaped how the historical event and historical figures are cast and recast within heritage. The distinctive modes by which archaeological sites and heritage sites are spatialized, linked and narrated are explored as these relate to corresponding turns in the modern concepts of freedom, inequality, personhood, sovereignty, community and culture.

Same as: ARCHLGY 205.

ARCHLGY 105. Heritage: Theorizations of the Past. 3-5 Units.

This course explores the emergence of heritage from within the broader field of modern historical thought. Readings explore how transformations in economic theory and changes in traditional philosophies of history have shaped how the historical event and historical figures are cast and recast within heritage. The distinctive modes by which archaeological sites and heritage sites are spatialized, linked and narrated are explored as these relate to corresponding turns in the modern concepts of freedom, inequality, personhood, sovereignty, community and culture.

Same as: ARCHLGY 205.

ARCHLGY 106A. Museums and Collections. 5 Units.

Practical, theoretical, and ethical issues which face museums and collections. Practical collections-based work, museum visits, and display research. The roles of the museum in contemporary society. Students develop their own exhibition and engage with the issues surrounding the preservation of material culture.

Same as: ARCHLGY 306A.

ARCHLGY 111. Emergence of Chinese Civilization from Caves to Palaces. 3-4 Units.

Introduces processes of cultural evolution from the Paleolithic to the Three Dynasties in China. By examining archaeological remains, ancient inscriptions, and traditional texts, four major topics will be discussed: origins of modern humans, beginnings of agriculture, development of social stratification, and emergence of states and urbanism.

Same as: CHINGEN 141, CHINGEN 241.

Same as: CHINGEN 141, CHINGEN 241.

ARCHLGY 124. Archaeology of Food: production, consumption and ritual. 3-5 Units.

This course explores many aspects of food in human history from an archaeological perspective. We will discuss how the origins of agriculture helped to transform human society; how food and feasting played a prominent role in the emergence of social hierarchies and the development of civilization; and how various foodways influenced particular cultures. We will also conduct experimental studies to understand how certain methods of food procurement, preparation, and consumption can be recovered archaeologically.

ARCHLGY 125. ARCHAEOLOGICAL SURVEY METHODS. 3-5 Units.

Practicum applying a variety of survey techniques to discover, map, and record prehistoric and historic archaeological sites on Stanford's 8180 acres. Basic cartographic skills for archaeologists and an introduction to GIS tools, GPS instruments, and geophysical techniques. Participants should be able to walk 3-4 miles in uneven terrain or make special arrangements with the instructor for transportation.

ARCHLGY 127. Introduction to bioarchaeological Method and Theory. 3-5 Units.

This course deals with the skeletal biology of past populations, covering both the theoretical approaches and methods used in the study of skeletal and dental remains. Issues surrounding the reconstruction of the individual and population, which include age, sex and other paleodemographic factors, will be explored. The health and disease of teeth and bones, and the biomechanical and chemical analyses of bone will also be explored to illustrate how the variety of methods available to bioarchaeologists can be used to reconstruct past lifeways. While this course will be of primary interest to students interested in skeletal biology and archaeology, it is not exclusive to those pursuing careers in biological anthropology. The emphasis is on critical analysis, research skills, and communication skills that can be useful to students pursuing careers in other sub-disciplines of anthropology, laboratory research, or other lateral health-related fields. Required readings will be selected from current literature, and in some classes there will be practical material/exercises so that students can learn some of these techniques. The class is intended to be an interactive learning process in discussion format, and students are required to take an active part in class along with lectures.

ARCHLGY 129. Archaeology, Heritage, and the Contemporary Middle East. 3-5 Units.

This course will explore the influence of the Ancient Near East on the Modern Middle East in terms of the religious, ethnic, racial and national identities of indigenous and diaspora communities and tourists. The goal is to understand today's issues and the current cultural character of the region in terms of its past. It will utilize anthropological and archaeological methodologies to show these connections, through examination of people, places, artifacts and ideologies. Among the concepts to be explored in the course will be the significance of sacred sites, migrations, exodus myths, conquest ideologies, East/West conflicts, imperialism, nationalism, identities, dichotomies and archaeology as expressed through heritage sites and symbolism. As an exploration of archaeology and human heritage, the curriculum focuses on modern peoples and their connections to the past rather than on the physical remains of past cultures, which is the central concern of traditional archaeology. Class sessions will combine presentations by the professor as well as specific topical papers given by students after consultation. Students will also be expected to participate and comment at the end of presentations. The following lecture outlines and readings may be slightly modified according to scheduling.
Same as: ARCHLGY 229.

ARCHLGY 130. To the Gods of the Underworld: Roman Funerary Archaeology. 3-5 Units.

Contextual study of archaeological objects linked to funerary practices and traditions during the late Roman Republic and the early Empire (2nd c. BCE-1st c. CE). Funerary rituals and ritualization of space, the outskirts of the city. Beautiful and dangerous dead. Ancestor cult and ancestor representation. Funerary landscapes: monumental and not so monumental tombs. Grave offerings and grave assemblages. Public personas and funerary iconography: gender, age, occupation. Death in Rome and death in the provinces.
Same as: CLASSART 125.

ARCHLGY 132. The Anthropology of Heritage: Concepts, Contexts and Critique. 3-5 Units.

This seminar will explore foundational concepts currently employed within heritage practice and debates. Readings will examine the historically formative context of colonial-era and nationalist discourses on stewardship and culture, as well as postcolonial reformulations of such concepts as cultural property, cultural recognition and public history. The seminar will engage the question of the relationship between foundational concepts and the current cosmopolitan and internationalist vision for heritage, probing the enduring dynamics of North-South divides in heritage development and archaeological practice.
Same as: ANTHRO 332A, ARCHLGY 232, ARCHLGY 332.

Same as: ANTHRO 140A, ANTHRO 240A.

ARCHLGY 139. The Aegean in the Neolithic and Bronze Age. 3-5 Units.

This course provides a survey of Aegean prehistory (7th-2nd millennium BC), focusing on traditions that were picked up or renegotiated, instead of taking a standpoint that evaluates phenomena as steps leading up to a "state-like" palatial society. It will draw on the region's wealth of data, and will be set within a theoretically informed, problem-oriented framework, aiming to introduce students to current interpretations and debates, mainly through discussion of specific case-studies.

Same as: ANTHRO 115A, ANTHRO 215A, ARCHLGY 239.

ARCHLGY 139. The Aegean in the Neolithic and Bronze Age. 3-5 Units.

ARCHLGY 142. Lost and found: Roman Coinage. 4-5 Units.

New trends in Roman numismatics (from the late Republic to the early Empire, 3rd c. BCE-1st c. CE). Archaeology from coins. Barter, money and coinage. The introduction of coinage in Rome and the provinces. Making money (coin production), using money (monetary, non-monetary and ritual uses), losing money (coin circulation, hoards, single finds): contextual interpretations. Monetary systems: coins from Rome and coins from the provinces. Coinage and identity. False coinage.

Same as: ARCHLGY 242, CLASSART 132, CLASSART 232.

ARCHLGY 306A. Museums and Collections. 5 Units.

Practical, theoretical, and ethical issues which face museums and collections. Practical collections-based work, museum visits, and display research. The roles of the museum in contemporary society. Students develop their own exhibition and engage with the issues surrounding the preservation of material culture.

Same as: ARCHLGY 106A.

ARCHLGY 306A. Museums and Collections. 5 Units.

Practical, theoretical, and ethical issues which face museums and collections. Practical collections-based work, museum visits, and display research. The roles of the museum in contemporary society. Students develop their own exhibition and engage with the issues surrounding the preservation of material culture.

Same as: ARCHLGY 106A.

ARCHLGY 307. Archaeological Methods and Research Design. 5 Units.

Methodological aspects of field and laboratory practice from traditional archaeological methods to the latest interdisciplinary analytical techniques. The nature of archaeological data and inference; interpretive potential of these techniques. Prerequisite: consent of instructor.

Same as: ANTHRO 307.

ARCHLGY 307. Archaeological Methods and Research Design. 5 Units.

Methodological aspects of field and laboratory practice from traditional archaeological methods to the latest interdisciplinary analytical techniques. The nature of archaeological data and inference; interpretive potential of these techniques. Prerequisite: consent of instructor.

Same as: ANTHRO 307.

ARCHLGY 308. Hispania: The Making of a Roman Province. 4-5 Units.

Overview of the archaeology of early Roman Spain (3rd c. BCE-1st c. CE) and the processes involved in the creation of the Roman provinces. What is a province? Critical (postcolonial) analysis of the "Romanization" paradigm. Study of the role of the army, early Roman settlements and Roman provincial capitals in tying province and metropolis together. Change and the persistence of local heritage (temples, houses, tombs, coins). Hispania in Rome and Rome in Hispania.

Same as: CLASSART 308.

ARCHLGY 308. Hispania: The Making of a Roman Province. 4-5 Units.

ARCHLGY 319. Theory for Arch and Classics. 3-5 Units.

TBA

Same as: CLASSART 319.

ARCHLGY 319. Theory for Arch and Classics. 3-5 Units.

TBA

Same as: CLASSART 319.

ARCHLGY 332. The Anthropology of Heritage: Concepts, Contexts and Critique. 3-5 Units.

This seminar will explore foundational concepts currently employed within heritage practice and debates. Readings will examine the historically formative context of colonial-era and nationalist discourses on stewardship and culture, as well as postcolonial reformulations of such concepts as cultural property, cultural recognition and public history. The seminar will engage the question of the relationship between foundational concepts and the current cosmopolitan and internationalist vision for heritage, probing the enduring dynamics of North-South divides in heritage development and archaeological practice.

Same as: ANTHRO 332A, ARCHLGY 132, ARCHLGY 232.

ARCHLGY 332. The Anthropology of Heritage: Concepts, Contexts and Critique. 3-5 Units.

Art History Courses

ARTHIST 1. Introduction to the Visual Arts: History of Western Art from the Renaissance to the Present. 5 Units.

This course surveys the history of Western painting from the start of the 14th century to the late 20th century and our own moment. Lectures introduce important artists (Giotto, Rembrandt, Velazquez, Goya, Manet, Matisse, Pollock, and others), and major themes associated with the art of particular periods and cultures. The course emphasizes training students to look closely at - and to write about - works of art. WIM Course.

ARTHIST 2. Asian Art and Culture. 5 Units.

The religious and philosophical ideas and social attitudes of India, China, and Japan and how they are expressed in architecture, painting, woodblock prints, sculpture, and in such forms as garden design and urban planning. Same as: JAPANGEN 60.

ARTHIST 3. Introduction to the History of Architecture. 5 Units.

From antiquity to the 20th century, mostly Western with some non-Western topics. Buildings and general principles relevant to the study of architecture.

ARTHIST 99A. Student Guides at the Cantor Center for the Visual Arts. 2 Units.

Open to all Stanford students. Public speaking, inquiry methods, group dynamics, theme development, and art-related vocabulary. Introduction to museum administration; art registration, preparation and installation; rights and reproduction of images; exhibition planning; and art storage, conservation, and security. Students research, prepare, and present discussions on art works of their choice.

ARTHIST 101. Archaic Greek Art. 4 Units.

The development of Greek art and culture from protogeometric beginnings to the Persian Wars, 1000-480 B.C.E. The genesis of a native Greek style; the orientalizing phase during which contact with the Near East and Egypt transformed Greek art; and the synthesis of East and West in the 6th century B.C.E.

Same as: ARTHIST 301, CLASSART 101, CLASSART 201.

ARTHIST 102. Empire and Aftermath: Greek Art from the Parthenon to Praxiteles. 4 Units.

The course explores the art and architecture of the Athenian Empire in the age of Pericles, and then considers the effects of civil war and plague on Greek art and society in the later 5th and early 4th centuries.

Same as: ARTHIST 302, CLASSART 102.

ARTHIST 105. Art & Architecture in the Medieval Mediterranean. 4 Units.

Chronological survey of Byzantine, Islamic, and Western Medieval art and architecture from the early Christian period to the Gothic age. Broad art-historical developments and more detailed examinations of individual monuments and works of art. Topics include devotional art, court and monastic culture, relics and the cult of saints, pilgrimage and crusades, and the rise of cities and cathedrals.

Same as: ARTHIST 305, CLASSART 115, CLASSART 215.

ARTHIST 107A. St. Petersburg, a Cultural Biography: Architecture, Urban Planning, the Arts. 4 Units.

The most premeditated city in the whole world, according to Dostoevsky; created in 1703 by Peter the Great as a counterpoise to Moscow and old Russian culture; planned as a rational, west-European-appearing capital city of the Russian Empire. St. Petersburg's history through works of its artists, architects, urban planners, writers, and composers.

Same as: REES 207A.

ARTHIST 108. Virginité and Power: Mary in the Middle Ages. 4 Units.

The most influential female figure in Christianity whose state cult was connected with the idea of empire. The production and control of images and relics of the Virgin and the development of urban processions and court ceremonies though which political power was legitimized in papal Rome, Byzantium, Carolingian and Ottonian Germany, Tuscany, Gothic France, and Russia.

Same as: ARTHIST 308.

ARTHIST 109. The Book in the Medieval World. 4 Units.

Studying the design and function of books in medieval society from the 7th to the 15th century, and the ways in which manuscripts are designed to meet (and shape) the cultural and intellectual demands of their readers. Major themes are the relationships between text and image, and between manuscripts and other media; the audience and production context of manuscripts; and changing ideas about pictorial space, figural style, page design, and progression through the book. Final project may be either a research paper or an original artist's book.

Same as: ARTHIST 309.

ARTHIST 111. Introduction to Italian Renaissance, 1420-1580. 4 Units.

New techniques of pictorial illusionism and the influence of the humanist revival of antiquity in the reformulation of the pictorial arts in 15th-century Italy. How different Italian regions developed characteristic artistic cultures through mutual interaction and competition.

Same as: ARTHIST 311.

ARTHIST 118. Titian, Veronese, Tintoretto. 4 Units.

The course addresses the ways in which Venetian painters of the sixteenth century redefined paradigms of color, disegno, and invention. Themes to be examined include civic piety, new kinds of mythological painting, the intersection between naturalism and eroticism, and the relationship between art and rituals of church and statecraft.

Same as: ARTHIST 318.

ARTHIST 120. Living in a Material World: Seventeenth-century Dutch and Flemish Painting. 4 Units.

Painting and graphic arts by artists in Flanders and Holland from 1600 to 1680, a period of political and religious strife. Historical context; their relationship to developments in the rest of Europe and contributions to the problem of representation. Preferences for particular genres such as portraits, landscapes, and scenes of everyday life; the general problem of realism as manifested in the works studied.

Same as: ARTHIST 320.

ARTHIST 121. 18th-Century Art in Europe, ca 1660-1780. 4 Units.

Major developments in painting across Europe including the High Baroque illusionism of Bernini, the founding of the French Academy, and the revival of antiquity during the 1760s, with parallel developments in Venice, Naples, Madrid, Bavaria, and London. Shifts in themes and styles amidst the emergence of new viewing publics. Artists: the Tiepolos, Giordano, Batoni, and Mengs; Ricci, Pellegrini, and Thornhill; Watteau and Boucher; Chardin and Longhi; Reynolds and West; Hogarth and Greuze; Vien, Fragonard, and the first works by David. Additional discussion for graduate students.

Same as: ARTHIST 321.

ARTHIST 124. The Age of Naturalism, ca 1830-1874. 4 Units.

The origins, development, and triumph of naturalist painting in Europe. The creative tensions that emerged between traditional forms of history painting and the challenge of modern subjects drawn from contemporary life. Emphasis is on the development of open-air painting as an alternative to traditional studio practice, and to the rise of new imaging technologies, such as lithography and photography, as popular alternatives to the hand-wrought character and elitist appeal of high art.

Same as: ARTHIST 324.

ARTHIST 126. Post-Naturalist Painting. 4 Units.

How conceptual models from language, literature, new technologies, and scientific theory affected picture making following the collapse of the radical naturalism of the 1860s and 1870s. Bracketed in France by the first Impressionist exhibition (1874) and the first public acclamation of major canvases by Matisse and Picasso (1905), the related developments in England, Germany, Belgium, and Austria. Additional weekly discussion for graduate students. Recommended: some prior experience with 19th-century art.

Same as: ARTHIST 326.

ARTHIST 142. Architecture Since 1900. 4 Units.

The development of competing versions of modern and postmodern architecture and design in Europe and America, from the early 20th century to the present. Recommended: 141.

Same as: ARTHIST 342.

ARTHIST 143A. American Architecture. 4 Units.

A historically based understanding of what defines American architecture. What makes American architecture American, beginning with indigenous structures of pre-Columbian America. Materials, structure, and form in the changing American context. How these ideas are being transformed in today's globalized world.

Same as: ARTHIST 343A.

ARTHIST 145. Culture Wars: Art and Social Conflict in the USA, 1890-1950. 4 Units.

This course examines social conflicts and political controversies in American culture through the lens of visual art and photography. We consider how visual images both reflect and participate in the social and political life of the nation and how the terms of citizenship have been represented; and, at times, contested; by artists throughout the first half of the 20th century. The class explores the relation between American art and the body politic by focusing on issues of poverty, war, censorship, consumerism, class identity, and racial division.

Same as: ARTHIST 345.

ARTHIST 147. The Visual Culture of Modernism and its Discontents. 4 Units.

The development of modern art and visual culture in Europe and the US, beginning with Paris in the period of Haussmann, Baudelaire and Manet, and ending with Surrealism in the 1920s and 30s. Modernism in art, architecture and design (e.g., Gauguin, Picasso, Duchamp, Tatlin, Le Corbusier, Breuer, Dali) will be presented as a compelling dream of utopian possibilities involving multifaceted and often ambivalent, even contradictory responses to the changes brought about by industrialization, urbanization, and the rise of mass culture.

Same as: ARTHIST 347.

ARTHIST 156. American and European Art, 1945-1968. 4 Units.

Examines the pivotal figures, movements, themes and practices of art in the United States and Europe, from the conclusion of World War 2 to the end of the 1960s. Emphasis is on the changed nature of the avant-garde after the catastrophic events of midcentury. Topics include: modern art, ideology and the Cold War; the rise of consumer society and the "Society of the Spectacle"; concepts of medium specificity; the impact of new media and technologies on postwar art making; the role of the artist as worker and activist. Movements include: Abstract Expressionism, Art Informel, Pop, minimalism, process, performance conceptual art. An introductory art history course is recommended.

Same as: ARTHIST 356.

ARTHIST 157A. Histories of Photography. 4 Units.

This course investigates multiple histories of photography. It begins in early nineteenth-century Europe with the origins of the medium and ends in the United States on September 11, 2001, a day that demonstrated the limits of photographic seeing. Rather than stabilizing any single trajectory of technological iterations, the course is more interested in considering the work performed by photography. Through historical case studies, it considers how to photograph is to order and to construct the world; to incite action and to persuade; to describe and to document; to record and to censor; to wound; to heal.

Same as: ARTHIST 357A.

ARTHIST 159. American Photographs, 1839-1971: A Cultural History. 4 Units.

This course concentrates on many important American photographers, from the era of daguerreotypes to near the end of the pre-digital era. We study photographs of the Civil War, western exploration, artistic subjects, urban and rural poverty, skyscrapers, crime, fashion, national parks, and social protest, among other topics. Among the photographers we study: Carleton Watkins, Eadweard Muybridge, Walker Evans, Dorothea Lange, Garry Winogrand, and Diane Arbus. Emphasis on developing students' abilities to discuss and write about photography; to see it.

Same as: AMSTUD 159X, ARTHIST 359.

ARTHIST 164A. Technology and the Visual Imagination. 4 Units.

An exploration of the dynamic relationship between technology and the ways we see and represent the world. The course examines technologies from the Renaissance through the present day, from telescopes and microscopes to digital detectors, that have changed and enhanced our visual capabilities as well as shaped how we imagine the world. We also consider how these technologies influenced and inspired the work of artists. Special attention is paid to how different technologies such as linear perspective, photography, cinema, and computer screens translate the visual experience into a representation; the automation of vision; and the intersection of technology with conceptions of time and space.

Same as: ARTHIST 364A, FILMSTUD 164A, FILMSTUD 364A.

ARTHIST 165A. Fashion Shows: From Lady Godiva to Lady Gaga. 4 Units.

This course considers the complex and interdependent relationship between fashion and art. Topics covered will include: the ways in which artists have used fashion in different art forms as a means to convey social status, identity, and other attributes of the wearer; the interplay between fashion designers and various art movements, especially in the twentieth century; the place of prints, photography, and the internet in fashion, in particular how different media shape how clothes are seen and perceived. We will discuss texts by Thorstein Veblen, Roland Barthes, Dick Hebdige, and other theorists of fashion.

Same as: ARTHIST 365A.

ARTHIST 173. Issues in Contemporary Art. 4 Units.

Major figures, themes, and movements of contemporary art from the 80s to the present. Readings on the neo-avant garde; postmodernism; art and identity politics; new media and technology; globalization and participatory aesthetics. Prerequisite: ARTHIST 155, or equivalent with consent of instructor.

Same as: ARTHIST 373.

ARTHIST 176. Feminism and Contemporary Art. 4 Units.

(Same as ARTHIST 176) The impact of second wave feminism on art making and art historical practice in the 70s, and its reiteration and transformation in contemporary feminist work. Topics: sexism and art history, feminist studio programs in the 70s, essentialism and self-representation, themes of domesticity, the body in feminist art making, bad girls, the exclusion of women of color and lesbians from the art historical mainstream, notions of performativity.

Same as: ARTHIST 376.

ARTHIST 184. Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting. 4 Units.

Changes marking the transition from medieval to early modern Japanese society that generated a revolution in visual culture, as exemplified in subjects deemed fit for representation; how commoners joined elites in pictorializing their world, catalyzed by interactions with the Dutch.

Same as: ARTHIST 384, JAPANGEN 184, JAPANGEN 384.

ARTHIST 187. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868. 4 Units.

Narratives of conflict, pacification, orthodoxy, nostalgia, and novelty through visual culture during the change of episteme from late medieval to early modern, 16th through early 19th centuries. The rhetorical messages of castles, teahouses, gardens, ceramics, paintings, and prints; the influence of Dutch and Chinese visuality; transformation in the roles of art and artist; tensions between the old and the new leading to the modernization of Japan. Same as: ARTHIST 387, JAPANGEN 185.

ARTHIST 188A. The History of Modern and Contemporary Japanese and Chinese Architecture and Urbanism. 4 Units.

The recent rapid urbanization and architectural transformation of Asia; focus is on the architecture of Japan and China since the mid-19th century. History of forms, theories, and styles that serve as the foundation for today's buildings and cityscapes. How Eastern and Western ideas of modernism have merged or diverged and how these forces continue to shape the future of Japanese and Chinese architecture and urban form. Same as: ARTHIST 388A.

ARTHIST 200N. The Artist in Ancient Greek Society. 3 Units.

Given the importance of art to all aspects of their lives the Greeks had reason to respect their artists. Yet potters, painters and even sculptors possessed little social standing. Why did the Greeks value the work of craftsmen but not the men themselves? Why did Herodotus dismiss those who worked with their hands as "mechanics?" What prompted Homer to claim that, "there is no greater glory for a man, than what he achieves with his own hands," provided that he was throwing a discus and not a vase on a wheel? Painted pottery was essential to the religious and secular lives of the Greeks. Libations to the gods and to the dead required vases from which to pour them. Economic prosperity depended on the export of wine and oil in durable clay containers. At home, vases depicting gods and heroes reinforced Greek values and helped parents to educate their children. Ceramic sets with scenes of Dionysian excess were reserved for elite symposia from which craftsmen were excluded. Sculptors were less lowly but even those who carved the Parthenon's pediments and frieze were still "mechanics," with soft bodies and soft minds (Xenophon), "indifferent to higher things" (Plutarch). The seminar addresses these issues. Students will read and discuss texts, write response papers and present slide lectures on aspects of the artist's profession.

Same as: CLASSART 22N.

ARTHIST 203. Greek Art In and Out of Context. 4-5 Units.

The cultural contexts in which art served religious, political, commercial, athletic, sympotic, and erotic needs of Greek life.

Same as: CLASSART 109.

ARTHIST 205. Cairo: Architecture and Urbanism from the Middle Ages to the 19th century. 5 Units.

This undergraduate seminar introduces students to the architectural and urban history of Cairo (Egypt) one of the major political, cultural, and economic centers of the Islamic world. Beginning with the conquest of Egypt by Arab Muslims in the early seventh century CE, the seminar will show how the newly founded city was established, and subsequently became a crucial urban center in the Middle East. Discussing the history of the city from the initial conquest, to the breakup of central Abbasid power, the establishment of the Fatimid Shi'i caliphate in the 10th to 12th centuries, the return of Sunni rule under the Ayyubids in the late 12th century, and the rule of the Mamluks from the 1260s to the early sixteenth century based on existing monuments as well as medieval Arabic sources will provide a double perspective on this development. The final weeks will focus on the urban development of Cairo under Ottoman rule from 1517 until the 19th century, colonialism, and issues of preservation of the historical city since the mid-19th century.

ARTHIST 205A. Islamic Painting: Landscape, Body, Power. 5 Units.

This seminar focuses on the production of paintings, mostly but not exclusively miniatures in books, in the Islamic world. A particular focus lies on the Muslim Empires of the sixteenth to eighteenth centuries, namely the Ottoman, Safavid, and Mughal realms, together stretching from the Balkans to India. During this period, illustrated books were popular objects of high-level patronage, and numerous examples have survived that allow a detailed study of the implications of these images. Themes discussed include: figural representation in Islam, patronage and court culture; gender and the body; illustrations of literature and history; images of Sufis ceremonies; portraiture; images of animals and nature; the impact of European prints and paintings; space and landscape. A field-trip to the Museum of Asian Art in San Francisco to view Mughal paintings from India is planned.

ARTHIST 208. Hagia Sophia. 5 Units.

By employing a methodology based in psychoacoustics, semiotics, and phenomenology, this course explores the relationship among sound, water, marble, meaning, and religious experience in the sixth-century church of Hagia Sophia built by emperor Justinian in Constantinople. We will read medieval sources describing the interior and ritual, make short movies exploring the shimmer of marble in buildings on campus, and study the acoustics of domed buildings through computer auralization done at Stanford's CCRMA (Center for Computer Research in Music and Acoustics)

Same as: CLASSART 118.

ARTHIST 209. Art and Religious Experience in Byzantium and Islam. 5 Units.

This course presents a comparative study of Christian and Islamic paradigms (sixth to the thirteenth centuries) in the construction of religious experience through the material fabric of the building, the interior decor, objects, and rituals. We will read medieval ekphrastic texts and poetry, which stirred the viewer/participant to experience the building/object as animate. Among the sites we will study are: Hagia Sophia, the Ka'ba, the Dome of the Rock, the Mosque at Damascus and at Cordoba. We will read Byzantine and Arabic writers such as Paul the Silentiary, Patriarch Germanos, Maximus Confessor, Shahrawardi, and Ibn Arabi.

Same as: CLASSART 139.

ARTHIST 212. Renaissance Florence, 1440-1540. 5 Units.

Notions of cultural superiority in light of changes in Florentine society as it went from being a republic to a duchy ruled by the Medici. Artists and architects such as Donatello, Brunelleschi, Botticelli, Michelangelo, and Pontormo praised as having revived the arts and returned them to a level of ancient splendor. The role of the sacred in daily life and uses of the pagan past for poetic and scholarly expressions and as vehicles for contemporary experience.

ARTHIST 213. Renaissance Print Culture: From Durer to Goltzius. 5 Units.

Prints became vehicles for the spreading of artistic inventions as well as political and religious propaganda during the societal upheavals of the 16th century. How the new medium of reproducible images changed attitudes towards visuality. Prints as self-reflective performances of virtuosity. Class taught at the Cantor Arts Center.

ARTHIST 232B. Design Theory. 4 Units.

This seminar focuses on the key themes, histories, and methods of architectural theory -- a form of architectural practice that establishes the aims and philosophies of architecture. Architectural theory is primarily written, but it also incorporates drawing, photography, film, and other media. One of the distinctive features of modern and contemporary architecture is its pronounced use of theory to articulate its aims. One might argue that modern architecture is modern because of its incorporation of theory. This course focuses on those early-modern, modern, and late-modern writings that have been and remain entangled with contemporary architectural thought and design practice. Rather than examine the development of modern architectural theory chronologically, it is explored architectural through thematic topics. These themes enable the student to understand how certain architectural theoretical concepts endure, are transformed, and can be furthered through his/her own explorations.

Same as: CEE 32B.

ARTHIST 232Q. Place: Making Space Now. 3 Units.

This seminar argues that architects are ultimately "placemakers," and questions what that means in the contemporary world. Part I investigates the meaning of the word "place." Additional background for understanding contemporary place making will include a critique of the history of modern place-making through an examination of modern form. Part II examines two traditional notions of place by scale: from "home" to "the city." What elements give these conceptions of space a sense of place? To answer this question, themes such as memory, mapping, and boundary, among others, will be investigated. Part III presents challenges to the traditional notions of place discussed in Part II. Topics addressed include: What does it mean to be "out of place"? What sense of place does a nomad have, and how is this represented? What are the "non-places" and how can architects design for these spaces? Part IV addresses the need to re-conceptualize contemporary space. The role of digital and cyber technologies, the construction of locality in a global world, and the in-between places that result from a world in flux are topics discussed in this section of the seminar. Learning goals: Specific goals include close reading of texts, understanding of philosophical thinking and writing, argument under uncertainty, and developed concepts of place, space and architecture.

Same as: CEE 32Q.

ARTHIST 240N. Couture Culture: Fashion, Art & Modernism from Manet to Mondrian. 3-4 Units.

This course examines the ways in which fashion has figured in the construction of modern experience and how it has been represented in the visual arts, primarily in Europe and the United States between about 1850 and 1965. Alongside the emergence of haute couture, the rise of the ready-to-wear industry during this period coincided with the consolidation of the department store; these institutions contributed to the development of a culture of consumption and display that continues to shape our lives today. Manet, Degas and other Impressionist painters were sensitive to the nuances of fashion, which they, like Baudelaire, saw as an aspect of modernity indispensable to their art. Clothing was no less significant in the context of the Russian revolution, when Alexander Rodchenko, for example, outfitted himself in a home-made version of workers' overalls in order to reinforce his identification with factory laborers and thereby to suggest the breaking down of class distinctions. The course also explores the significance of fashion for an abstract painter like Piet Mondrian, but, more to the point, we look at how Mondrian's work was appropriated to the world of fashion by Yves Saint-Laurent, who assured that Mondrian's signature geometric style would become instantly recognizable and eventually function as a hugely popular brand. The circuits through which we can trace the historical trajectory of fashion will illuminate its importance for understanding many facets of modern culture.

ARTHIST 244. The Visual Culture of the American Home Front, 1941-1945. 5 Units.

How does home front of WWII look now? What sort of meanings appear with the vantage of more than sixty years' distance? Examining Hollywood films from those years - films made during the war but mostly not directly about the war - the seminar focuses on developing students' abilities to write emotion-based criticism and history. Weekly short papers, each one in response to a film screening, are required. Among the films screened: *Shadow of a Doubt*, *Gaslight*, *I Walked with a Zombie*, *The Best Years of Our Lives*.

Same as: AMSTUD 244.

ARTHIST 245. Art, Business & the Law. 5 Units.

This course examines the intersection of art, business, and the law from a number of different angles, focusing on issues that impact our understanding of works of art and their circulation in the modern and contemporary periods. Topics range from individual case studies (e.g., Leonardo da Vinci; Richard Serra) to the consolidation of the art market, and include cultural heritage issues, problems of censorship, and conceptions of authorship and intellectual property.

ARTHIST 246A. California Dreaming: West Coast Art and Visual Culture, 1848 - present. 5 Units.

This seminar examines art, photography, and other forms of cultural production (e.g. film, advertisements, postcards) in and about California from the middle of the 19th century to the present. It approaches California as a contested political, historical and geographical site and as a series of images and alternative "lifestyles." How have artists pictured the state's diverse landscapes, both natural and commercial, as well as its complex history of labor, immigration, ethnicity, tourism, and social division?.

ARTHIST 262. Office of Metropolitan Architecture: Workshop of the New. 4-5 Units.

This seminar investigates all aspects of the work of the Office of Metropolitan Architecture (OMA) and its leader Rem Koolhaas. Topics for class research and inquiry include but are not be limited to: Koolhaas's early work at the Architectural Association and the founding of OMA, the publications of OMA and their style of presentation and theoretical foundations, the importance of AMO, and the architects who have left OMA and founded their own practices and how these differ from OMA. Each student completes an in-depth research paper and an in-class presentation.

Same as: CEE 132Q.

ARTHIST 264A. Picturing the Cosmos. 5 Units.

This seminar explores the place of images in how we understand and imagine the universe. The course draws on art, science, and popular culture, and pays particular attention to the ways they inform each other. Examples include: star maps, science fiction films, appropriated astronomical images, and telescopic views of stars, planets, and nebulae. Using these representations as well as accompanying readings we will discuss the importance of aesthetics for conceptions of the cosmos; the influence of technology on representations; strategies for representing concepts that exceed the limits of human vision; and the ways that views of the universe reflect and shape their cultural context. Open to undergraduates and graduates.

ARTHIST 287. Pictures of the Floating World: Images from Japanese Popular Culture. 5 Units.

Printed objects produced during the Edo period (1600-1868), including the Ukiyo-e (pictures of the floating world) and lesser-studied genres such as printed books (ehon) and popular broadsheets (kawaraban). How a society constructs itself through images. The borders of the acceptable and censorship; theatricality, spectacle, and slippage; the construction of play, set in conflict against the dominant neo-Confucian ideology of fixed social roles.

Same as: JAPANLIT 287.

ARTHIST 287A. The Japanese Tea Ceremony: The History, Aesthetics, and Politics Behind a National Pastime. 5 Units.

The tea ceremony, a premodern multimedia phenomenon, integrates architecture, garden design, ceramics, painting, calligraphy, and treasured objects into a choreographed ritual wherein host, objects, and guests perform roles on a tiny stage. Aesthetic, philosophical, and political dimensions. The evolution of tea taste including its inception in Zen monasteries, use for social control during the 16th century, the development of a class of tea connoisseurs, and 20th-century manipulation by the emerging industrialist class.

Same as: JAPANGEN 287A.

ARTHIST 288B. The Enduring Passion for Ink: Contemporary Chinese Ink Painting. 5 Units.

Contemporary Chinese ink painters are exploring new ground. They push the limits of the medium, creating installations and performances, mixing ink with other media, and advancing age-tested brushstrokes and compositions. The recent flurry of exhibitions attests to contemporary ink painting's increasing importance. This seminar introduces major figures (Xu Bing, Liu Dan, Zheng Chongbin, Li Huasheng, etc.) and movements in contemporary Chinese ink art. Emphasis is placed on improving writing abilities and on in-class reports and discussion. Topics for discussion include readings, individual works of art, and broad issues in contemporary art. Prerequisite: courses in Art History and/or Studio Art OR permission of instructor. open to undergraduates and graduates.

ARTHIST 295. Visual Arts Internship. 1-5 Units.

Professional experience in a field related to the Visual Arts for six to ten weeks. Internships may include work for galleries, museums, art centers, and art publications. Students arrange the internship, provide a confirmation letter from the hosting institution, and must receive consent from the faculty coordinator to enroll in units. To supplement the internship students maintain a journal and write a research paper related to the experience and their area of academic interest. Evaluations from the student and the supervisor are submitted at the end of the internship. Restricted to declared majors and minors. May be repeated for credit.

ARTHIST 296. Junior Seminar: Methods & Historiography of Art History. 5 Units.

Historiography and methodology.

ARTHIST 297. Honors Thesis Writing. 1-5 Units.

May be repeated for credit.

ARTHIST 298. Individual Work: Art History. 1-15 Units.

For approved independent research with individual faculty members. Letter grades only. May be repeated for credit.

ARTHIST 301. Archaic Greek Art. 4 Units.

The development of Greek art and culture from protogeometric beginnings to the Persian Wars, 1000-480 B.C.E. The genesis of a native Greek style; the orientaling phase during which contact with the Near East and Egypt transformed Greek art; and the synthesis of East and West in the 6th century B.C.E.

Same as: ARTHIST 101, CLASSART 101, CLASSART 201.

ARTHIST 302. Empire and Aftermath: Greek Art from the Parthenon to Praxiteles. 4 Units.

The course explores the art and architecture of the Athenian Empire in the age of Pericles, and then considers the effects of civil war and plague on Greek art and society in the later 5th and early 4th centuries.

Same as: ARTHIST 102, CLASSART 102.

ARTHIST 305. Art & Architecture in the Medieval Mediterranean. 4 Units.

Chronological survey of Byzantine, Islamic, and Western Medieval art and architecture from the early Christian period to the Gothic age. Broad art-historical developments and more detailed examinations of individual monuments and works of art. Topics include devotional art, court and monastic culture, relics and the cult of saints, pilgrimage and crusades, and the rise of cities and cathedrals.

Same as: ARTHIST 105, CLASSART 115, CLASSART 215.

ARTHIST 308. Virginity and Power: Mary in the Middle Ages. 4 Units.

The most influential female figure in Christianity whose state cult was connected with the idea of empire. The production and control of images and relics of the Virgin and the development of urban processions and court ceremonies though which political power was legitimized in papal Rome, Byzantium, Carolingian and Ottonian Germany, Tuscany, Gothic France, and Russia.

Same as: ARTHIST 108.

ARTHIST 309. The Book in the Medieval World. 4 Units.

Studying the design and function of books in medieval society from the 7th to the 15th century, and the ways in which manuscripts are designed to meet (and shape) the cultural and intellectual demands of their readers. Major themes are the relationships between text and image, and between manuscripts and other media; the audience and production context of manuscripts; and changing ideas about pictorial space, figural style, page design, and progression through the book. Final project may be either a research paper or an original artist's book.

Same as: ARTHIST 109.

ARTHIST 311. Introduction to Italian Renaissance, 1420-1580. 4 Units.

New techniques of pictorial illusionism and the influence of the humanist revival of antiquity in the reformulation of the pictorial arts in 15th-century Italy. How different Italian regions developed characteristic artistic cultures through mutual interaction and competition.

Same as: ARTHIST 111.

ARTHIST 318. Titian, Veronese, Tintoretto. 4 Units.

The course addresses the ways in which Venetian painters of the sixteenth century redefined paradigms of color, disegno, and invention. Themes to be examined include civic piety, new kinds of mythological painting, the intersection between naturalism and eroticism, and the relationship between art and rituals of church and statecraft.

Same as: ARTHIST 118.

ARTHIST 320. Living in a Material World: Seventeenth-century Dutch and Flemish Painting. 4 Units.

Painting and graphic arts by artists in Flanders and Holland from 1600 to 1680, a period of political and religious strife. Historical context; their relationship to developments in the rest of Europe and contributions to the problem of representation. Preferences for particular genres such as portraits, landscapes, and scenes of everyday life; the general problem of realism as manifested in the works studied.

Same as: ARTHIST 120.

ARTHIST 321. 18th-Century Art in Europe, ca 1660-1780. 4 Units.

Major developments in painting across Europe including the High Baroque illusionism of Bernini, the founding of the French Academy, and the revival of antiquity during the 1760s, with parallel developments in Venice, Naples, Madrid, Bavaria, and London. Shifts in themes and styles amidst the emergence of new viewing publics. Artists: the Tiepolos, Giordano, Batoni, and Mengs; Ricci, Pellegrini, and Thornhill; Watteau and Boucher; Chardin and Longhi; Reynolds and West; Hogarth and Greuze; Vien, Fragonard, and the first works by David. Additional discussion for graduate students.

Same as: ARTHIST 121.

ARTHIST 324. The Age of Naturalism, ca 1830-1874. 4 Units.

The origins, development, and triumph of naturalist painting in Europe. The creative tensions that emerged between traditional forms of history painting and the challenge of modern subjects drawn from contemporary life. Emphasis is on the development of open-air painting as an alternative to traditional studio practice, and to the rise of new imaging technologies, such as lithography and photography, as popular alternatives to the hand-wrought character and elitist appeal of high art.

Same as: ARTHIST 124.

ARTHIST 326. Post-Naturalist Painting. 4 Units.

How conceptual models from language, literature, new technologies, and scientific theory affected picture making following the collapse of the radical naturalism of the 1860s and 1870s. Bracketed in France by the first Impressionist exhibition (1874) and the first public acclamation of major canvases by Matisse and Picasso (1905), the related developments in England, Germany, Belgium, and Austria. Additional weekly discussion for graduate students. Recommended: some prior experience with 19th-century art.

Same as: ARTHIST 126.

ARTHIST 342. Architecture Since 1900. 4 Units.

The development of competing versions of modern and postmodern architecture and design in Europe and America, from the early 20th century to the present. Recommended: 141.

Same as: ARTHIST 142.

ARTHIST 343A. American Architecture. 4 Units.

A historically based understanding of what defines American architecture. What makes American architecture American, beginning with indigenous structures of pre-Columbian America. Materials, structure, and form in the changing American context. How these ideas are being transformed in today's globalized world.

Same as: ARTHIST 143A.

ARTHIST 345. Culture Wars: Art and Social Conflict in the USA, 1890-1950. 4 Units.

This course examines social conflicts and political controversies in American culture through the lens of visual art and photography. We consider how visual images both reflect and participate in the social and political life of the nation and how the terms of citizenship have been represented; and, at times, contested; by artists throughout the first half of the 20th century. The class explores the relation between American art and the body politic by focusing on issues of poverty, war, censorship, consumerism, class identity, and racial division.

Same as: ARTHIST 145.

ARTHIST 347. The Visual Culture of Modernism and its Discontents. 4 Units.

The development of modern art and visual culture in Europe and the US, beginning with Paris in the period of Haussmann, Baudelaire and Manet, and ending with Surrealism in the 1920s and 30s. Modernism in art, architecture and design (e.g., Gauguin, Picasso, Duchamp, Tatlin, Le Corbusier, Breuer, Dali) will be presented as a compelling dream of utopian possibilities involving multifaceted and often ambivalent, even contradictory responses to the changes brought about by industrialization, urbanization, and the rise of mass culture.

Same as: ARTHIST 147.

ARTHIST 356. American and European Art, 1945-1968. 4 Units.

Examines the pivotal figures, movements, themes and practices of art in the United States and Europe, from the conclusion of World War 2 to the end of the 1960s. Emphasis is on the changed nature of the avant-garde after the catastrophic events of midcentury. Topics include: modern art, ideology and the Cold War; the rise of consumer society and the "Society of the Spectacle"; concepts of medium specificity; the impact of new media and technologies on postwar art making; the role of the artist as worker and activist. Movements include: Abstract Expressionism, Art Informel, Pop, minimalism, process, performance conceptual art. An introductory art history course is recommended.

Same as: ARTHIST 156.

ARTHIST 357A. Histories of Photography. 4 Units.

This course investigates multiple histories of photography. It begins in early nineteenth-century Europe with the origins of the medium and ends in the United States on September 11, 2001, a day that demonstrated the limits of photographic seeing. Rather than stabilizing any single trajectory of technological iterations, the course is more interested in considering the work performed by photography. Through historical case studies, it considers how to photograph is to order and to construct the world; to incite action and to persuade; to describe and to document; to record and to censor; to wound; to heal.

Same as: ARTHIST 157A.

ARTHIST 359. American Photographs, 1839-1971: A Cultural History. 4 Units.

This course concentrates on many important American photographers, from the era of daguerreotypes to near the end of the pre-digital era. We study photographs of the Civil War, western exploration, artistic subjects, urban and rural poverty, skyscrapers, crime, fashion, national parks, and social protest, among other topics. Among the photographers we study: Carleton Watkins, Eadweard Muybridge, Walker Evans, Dorothea Lange, Garry Winogrand, and Diane Arbus. Emphasis on developing students' abilities to discuss and write about photography; to see it.
Same as: AMSTUD 159X, ARTHIST 159.

ARTHIST 364A. Technology and the Visual Imagination. 4 Units.

An exploration of the dynamic relationship between technology and the ways we see and represent the world. The course examines technologies from the Renaissance through the present day, from telescopes and microscopes to digital detectors, that have changed and enhanced our visual capabilities as well as shaped how we imagine the world. We also consider how these technologies influenced and inspired the work of artists. Special attention is paid to how different technologies such as linear perspective, photography, cinema, and computer screens translate the visual experience into a representation; the automation of vision; and the intersection of technology with conceptions of time and space.
Same as: ARTHIST 164A, FILMSTUD 164A, FILMSTUD 364A.

ARTHIST 365A. Fashion Shows: From Lady Godiva to Lady Gaga. 4 Units.

This course considers the complex and interdependent relationship between fashion and art. Topics covered will include: the ways in which artists have used fashion in different art forms as a means to convey social status, identity, and other attributes of the wearer; the interplay between fashion designers and various art movements, especially in the twentieth century; the place of prints, photography, and the internet in fashion, in particular how different media shape how clothes are seen and perceived. We will discuss texts by Thorstein Veblen, Roland Barthes, Dick Hebdige, and other theorists of fashion.
Same as: ARTHIST 165A.

ARTHIST 373. Issues in Contemporary Art. 4 Units.

Major figures, themes, and movements of contemporary art from the 80s to the present. Readings on the neo-avant garde; postmodernism; art and identity politics; new media and technology; globalization and participatory aesthetics. Prerequisite: ARTHIST 155, or equivalent with consent of instructor.
Same as: ARTHIST 173.

ARTHIST 376. Feminism and Contemporary Art. 4 Units.

(Same as ARTHIST 176) The impact of second wave feminism on art making and art historical practice in the 70s, and its reiteration and transformation in contemporary feminist work. Topics: sexism and art history, feminist studio programs in the 70s, essentialism and self-representation, themes of domesticity, the body in feminist art making, bad girls, the exclusion of women of color and lesbians from the art historical mainstream, notions of performativity.
Same as: ARTHIST 176.

ARTHIST 384. Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting. 4 Units.

Changes marking the transition from medieval to early modern Japanese society that generated a revolution in visual culture, as exemplified in subjects deemed fit for representation; how commoners joined elites in pictorializing their world, catalyzed by interactions with the Dutch.
Same as: ARTHIST 184, JAPANGEN 184, JAPANGEN 384.

ARTHIST 387. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868. 4 Units.

Narratives of conflict, pacification, orthodoxy, nostalgia, and novelty through visual culture during the change of episteme from late medieval to early modern, 16th through early 19th centuries. The rhetorical messages of castles, teahouses, gardens, ceramics, paintings, and prints; the influence of Dutch and Chinese visuality; transformation in the roles of art and artist; tensions between the old and the new leading to the modernization of Japan.
Same as: ARTHIST 187, JAPANGEN 185.

ARTHIST 388A. The History of Modern and Contemporary Japanese and Chinese Architecture and Urbanism. 4 Units.

The recent rapid urbanization and architectural transformation of Asia; focus is on the architecture of Japan and China since the mid-19th century. History of forms, theories, and styles that serve as the foundation for today's buildings and cityscapes. How Eastern and Western ideas of modernism have merged or diverged and how these forces continue to shape the future of Japanese and Chinese architecture and urban form.
Same as: ARTHIST 188A.

ARTHIST 405. Art, Ekphrasis, and Music in Byzantium and Islam. 5 Units.

Focus is on the interrelation of art, architecture, verbal description, poetry, and music (including the singing of psalms and recitation of the Qur'an). We explore how ekphrasis - the style of writing vividly intended to transform the listeners into spectators - structures the perception of and response to artistic production be it an art object, building, or a musical performance. More specifically, we will study the role of ekphrasis in animating the inanimate and the importance of breath and spirit, which become manifest in visual, acoustic, olfactory, and gustatory terms. The material covers both religious and courtly settings: Hagia Sophia, The Great Palace of Constantinople, The Dome of the Rock, The palaces of Baghdad and Samarra, the mosque at Cordoba, Medinat al-Zahra and the Alhambra. We will read Greek and Arabic writers on ekphrasis in translation, juxtaposing the medieval material to the ancient theories of ekphrasis and modern scholarship.
Same as: CLASSART 305.

ARTHIST 415. Baroque: 1900-2000. 5 Units.

The seminar, which is largely methodological and historiographic, problematizes issues of periodization. The course examines different approaches to the question of "what is baroque," from Alois Riegl and Erwin Panofsky to Michel Foucault, Svetlana Alpers and Giovanni Careri.

ARTHIST 426. NARRATIVE THEORY & VISUAL FORM. 5 Units.

The theoretical terrain of narrative studies in literary criticism and historiography. The critical implications of narrative analysis for the writing of history in general. Readings integrated with students' current research projects.

ARTHIST 442. Looking at Violence. 5 Units.

Violence in the media and its effects upon viewers, especially the young, is an issue of national concern that has produced legislation for the ratings of movies, television shows, and computer/video games. Parental control software makes it possible to program cable boxes and computers to censor what broadcasts or websites are accessible to children. These are political and technical fixes to a perceived social problem. They do not ask why one is drawn to watch violence in the first place, nor why certain kinds of violent imagery is compelling. Debates about how such measures should be implemented usually proceed from the given that images of violence are subjectspecific, with little or no consideration of their formal qualities or visual protocols. This seminar assumes that the tools and categories of visual analysis specific to the History of Art might enrich our thinking about the attraction and impact of violence across media and across time. The seminar proposes to situate its topic at the intersection of social, philosophic, and visual traditions so as to allow productive points of view to emerge. Readings will include texts from the history of aesthetics, psychology, and moral philosophy. Research projects will encourage analysis of all forms of visual media: painting, sculpture, prints, photographs, film, video, and computer graphics.

ARTHIST 445. What's not American about American Art?. 5 Units.

This seminar focuses on American art as a history of migration (of people but also of visual objects) across national and continental boundaries. We examine trans-Atlantic and trans-Pacific dialogues and consider how anxieties about foreigners, immigrants, and political dissidents shaped American art and culture at particular moments in the 20th century. In the second half of the course, we consider a series of museum exhibitions that repositioned American art as a history of social conflict and exclusion.

ARTHIST 447. Piet Mondrian: Art, History and Historiography. 5 Units.

Taking Mondrian as a case study, this seminar will examine some of the salient factors that shape how a modern artist emerges into history. Participants will explore Mondrian's work and ideas, attending not only to his own self-fashioning but also to the myriad forces that have shaped his reception since his death in New York in 1944, including scholarship, museum exhibitions, the art market, the responses of innumerable subsequent artists, and the wide circulation of his work in popular culture.

ARTHIST 449. Flesh and Metal: Art History in the Museum and the Academy. 5 Units.

This course is designed to anticipate an exhibition, also entitled *Flesh and Metal*, of works by major European and American modern artists, ca. 1914-1955, from the collection of the San Francisco Museum of Modern Art that will be on loan to the Cantor Art Center from November 2013 to March 2014. Artists include Bellmer, Brancusi, Calder, Dalí, De Kooning, Duchamp, Gorky, Moholy-Nagy, Mondrian, Picasso, Man Ray, Rodchenko, Sheeler, Tauber-Arp, among many others. Inspired by the concept of institutional critique, the seminar will examine theoretical and historical problems of exhibition installation, presentation, display, labeling, funding, etc. The reconstruction of historical works (e.g., Duchamp's *Fountain* and Dalí's *Surrealist object that functions symbolically*, *Gala's Shoe*, both in the show) will also receive attention. The conventions and possibilities of museum-based art history will be interrogated in part through examination of museum records and research into the works of art to be included in the Cantor exhibition.

ARTHIST 461. The American Civil War: An Experiential History. 5 Units.

Can one write a history of lived experience, of ephemeral states that never were represented? Can one look at representations of paintings, photographs, and literature to see where these ephemeral states might be trapped, or might otherwise be pictured? Feeling that the real war did not get in the books (for the most part), the course examines those books and other representations and so many things that never attained so exalted a form to look at the war anew. Methodological readings as well as readings about the Civil War.

ARTHIST 470. Globalization and the Visual Arts. 5 Units.

Enrollment restricted to graduate students. Globalization as the most important paradigm for the production, circulation, and reception of contemporary art since the 1990s. The expanding terrain of the art world; biennial culture; new economies of scale and the art market along with its critique in the discourses of empire and multitudes. Debates on the thematics of hybridity; post-Fordism; the flat world and capital flows; exteriority and site specificity; and new models of collectivism in recent art.

ARTHIST 485. The Situation of the Artist in Traditional Japan. 5 Units.

Topics may include: workshop production such as that of the Kano and Tosa families; the meaning of the signature on objects including ceramics and tea wares; the folk arts movement; craft guilds; ghost painters in China; individualism versus product standardization; and the role of lineage. How works of art were commissioned; institutions supporting artists; how makers purveyed their goods; how artists were recognized by society; the relationship between patrons, desires and artists, modes of production. Same as: JAPANGEN 220.

ARTHIST 489. Connoisseurship Studies of Chinese Painting, Calligraphy, and Seals. 5 Units.

This course focuses on taking connoisseurship out of the classroom and into the collecting world. With many classes being held at the Asian Art Museum and private collections in the Bay Area, students will learn not only what the role connoisseurship plays in the current art landscape, but how a museum works. Combines case studies in the field, reading material, eyes-on experience, and discussion, this class will address the topics of utilizing resources, conducting research, cultivating collectors, building collections, and curating exhibitions through the lens of connoisseurship.

ARTHIST 490. Curatorial Activism in the Arts of Africa. 5 Units.

Enrollment restricted to graduate students and advanced undergraduates. What is contemporary in African art and how does one curate the contemporary in and through African art? The course examines curatorial practices and activist projects. Topics include redefining museum exhibitions and collections of African art at the Cantor Arts Center and museums around the world; breaking away from stereotypical representations of the arts and cultures of Africa; controversial issues and dilemmas; curatorial activities directed toward cultural, social, and political activism; strategic modes of display and design; subjectivity vs. objectivity; and fostering critical dialogues about the arts and cultures of Africa.

ARTHIST 502. Methods and Debates in Art History: The Writer's Voice. 5 Units.

This course introduces graduate students to a range of interpretive methods within art history and visual culture studies. In addition to scrutinizing multiple schools of thought and critical debates within the field, the seminar pays particular attention to the style and strategies of writing taken up by individual critics and scholars. How, and to whom, does the art historian's voice speak in different moments, visual contexts, and interpretive communities?

ARTHIST 600. Art History Bibliography and Library Methods. 1 Unit.**ARTHIST 610. Teaching Praxis. 1-5 Units.****ARTHIST 620. Area Core Examination Preparation. 5 Units.**

For Art History Ph.D. candidates. Prerequisite: consent of instructor.

ARTHIST 640. Dissertation Proposal Preparation. 5 Units.

(Staff).

ARTHIST 650. Dissertation Research. 5 Units.

(Staff).

ARTHIST 660. Independent Study. 1-15 Units.

For graduate students only. Approved independent research projects with individual faculty members.

ARTHIST 660E. Extended Seminar. 4 Units.

May be repeated for credit. (Staff).

ARTHIST 670. Dissertation Seminar. 3-5 Units.

For graduate students writing and researching dissertations and dissertation proposals. How to define research projects, write grant proposals, and organize book-length projects.

ARTHIST 802. TGR Dissertation. 0 Unit.

Art Studio Courses

ARTSTUDI 4SI. Beginner Ceramics. 1-2 Units.

Student Initiated Course - Introduction to Ceramics. Students learn basic hand-building and wheel techniques using stoneware clay, including how to throw cups, mugs, bowls, plates, and a lidded vessel. Class held in the Stanford Ceramics Studio (Elliot Program Center). \$50 lab fee covers clay, glaze, tools, and firing costs. All levels of experience welcome. Register on Axxess (limit 10 students). Please check <http://ceramics.stanford.edu> for any updates.

ARTSTUDI 10AX. Filmmaking. 2 Units.

Production skills and project development in documentary filmmaking. The fundamentals of filmmaking using digital video production techniques focused on documentary storytelling. Shooting in mini-DV format and editing with Final Cut Pro software, students actualize their ideas in an audiovisual medium from conceptualization through post-production and exhibition.

ARTSTUDI 11A. Drawing: Means & Alternate Means. 2 Units.

The first half of the quarter students explore more traditional ways of drawing (still life, models, etc..) to develop a hand/eye relationship. The class will focus on seeing and documenting what is in front of them. The second half of the quarter expands into using alternative means of mark making to deconstruct and re-construct ideas learned in the first half of the quarter. String, tape, body parts and shadows are all fair game. This will be a lively class. The students are graded on their attendance, participation, weekly assignments and one final assignment consisting of two finished works, one being traditional, the other experimental.

ARTSTUDI 11AX. Digital Art and Design in Practice. 2 Units.

Hands-on exploration of art and design using digital tools. Overview of contemporary digital art and design including fine art, graphic design, film, and animation. Analysis of new work in these areas and visits to Bay Area production and artist studios. Demos will focus on 2D and time-based techniques, but students interested in procedural or 3D computer graphic are welcome. Students will complete a multi-part visual project to be included in a final exhibit.

ARTSTUDI 12AX. Drawing Intensive: Revisiting Nature. 2 Units.

As increasing technological advances can further separate us from direct impressions of nature, this class is designed to reconnect and enhance our relationship to the natural world and our surrounding environment. To do this we will develop visual skills and critical thinking through careful observation and classical drawing techniques. Inspired by Stanford's natural and manicured landscapes, students will enjoy the great outdoors while learning elements of perspective, composition, light, and form. Students will learn about master landscape artists, investigate the built and natural environment of the campus, and experiment with various drawing techniques, mediums, and styles.

ARTSTUDI 13A. Fundamentals of Oil Painting. 2 Units.

This course is an introduction to oil painting. Students concentrate primarily on the technical aspects of the medium (i.e. how to paint as opposed to what to paint.) We examine color: how to mix it, how it establishes spatial relationships, light, and shadow. The class progresses through a series of problems designed to develop a sensitivity to paint application and surface quality; as well as to value, composition, volume, light, and space as the necessary elements of recreating perceptual experience. By the end of the course, students are able to apply some sophisticated techniques to visual problem solving. The aim of the course is to demonstrate the mechanical structure of oil painting.

ARTSTUDI 13AX. Photography. 2 Units.

This hands-on course in photography will emphasize the techniques, aesthetics, and conceptual considerations of traditional black and white photography. Students will also explore photography's history and applications as an expressive tool, with the power to communicate ideas and move the viewer. Throughout the course, students will master the use of their own manual 35mm camera and process the film themselves in our lab. They will also learn the techniques needed to make quality black and white prints in the darkroom. Students will coordinate an exhibition and present their finest work in a professional manner.

ARTSTUDI 17A. Black and White Darkroom. 2 Units.

A beginning black & white darkroom photography class with an emphasis on project conceptualization and the utilization of local environments. Students in addition to learning photography basics, will complete a cohesive, short body(s) of work. Students work collectively to realize a group exhibition. Theme and title of the exhibition are chosen at the beginning of the quarter and projects will be developed within its framework.

ARTSTUDI 122E. Art in the Streets: Identity in Murals, Site-specific works, and Interventions in Public Spaces. 4 Units.

This class will introduce students to both historical and contemporary public art practices and the expression of race and identity through murals, graffiti, site-specific works and performative interventions in public spaces. Involving lectures, guest speakers, field trips, and hands-on art practice, students will be expected to produce both an individual and group piece as a final project.
Same as: CSRE 122E.

ARTSTUDI 130. Interactive Art: Making it with Arduino. 4 Units.

Students use electronics and software to create kinetic and interactive elements in artwork. No prior knowledge of electronics or software is required. Students learn to program the Arduino, a small easy-to-use microprocessor control unit (see <http://www.arduino.cc/>). Learn to connect various sensors such as light, motion, sound and touch and use them to control software. Learn to interface actuators like motors, lights and solenoids to create movement. Learn to connect the Arduino to theMAX/MSP/Jitter programming environment to create media-intensive video and audio environments. Explore the social dimensions of electronic art. (lower level).

ARTSTUDI 131. Sound Art I. 4 Units.

Acoustic, digital and analog approaches to sound art. Familiarization with techniques of listening, recording, digital processing and production. Required listening and readings in the history and contemporary practice of sound art. (lower level)
Same as: MUSIC 154A.

ARTSTUDI 138. Sound and Image. 4 Units.

Practices that combine audio and visual media. Topics include synesthesias, visual music, film soundtracks, and immersive multimedia practices that combine sound, music, still and moving images, projections, and performance. (lower level).

ARTSTUDI 140. Drawing I. 4 Units.

Functional anatomy and perspective as they apply to problems of drawing the form in space. Individual and group instruction as students work from still life set-ups, nature, and the model. Emphasis is on the development of critical skills and perceptual drawing techniques for those with little or no previous experience with pastels, inks, charcoal, conte, and pencil. Lectures alternate with studio work. (lower level).

ARTSTUDI 145. Painting I. 4 Units.

Introduction to techniques, materials, and vocabulary in oil painting. Still life, landscape, and figure used as subject matter. Emphasis is on painting and drawing from life. (lower level).

ARTSTUDI 147. Artist's Book. 4 Units.

Explores contemporary aesthetic interpretations of the book as an art object while invigorating traditional artistic practices of the art of the book. Through the medium of drawing, collage, and mixed media students produce their own artist's book. The course familiarizes students with bookbinding and the various techniques used, as well as exploring the narrative, text and image, and the book as a sculptural object.

ARTSTUDI 147S. Painting and Drawing. 4 Units.**ARTSTUDI 148. Monotype. 4 Units.**

Introduction to printmaking using monotype, a graphic art medium used by such artists as Blake, Degas, Gauguin, and Pendergast. May be repeated for credit. Prerequisite: 140. (lower level). May be repeated 2 times for total of 8 units.

ARTSTUDI 148A. Lithography. 4 Units.

The classic technique of printing from limestones. Techniques to draw an image on the stone, etch and fix the image on the stone, and print it in numbered editions. Students work on a variety of stone sizes. Field trips to local publishers of lithography or lithography exhibitions. (lower level).

ARTSTUDI 148B. Introduction to Printmaking Techniques. 4 Units.

Techniques such as monotype, monoprint, photocopy transfers, linocut and woodcut, intaglio etching. Demonstrations of these techniques. Field trips to local print collections or print exhibitions. (lower level).

ARTSTUDI 151. Sculpture I. 4 Units.

Traditional and non-traditional approaches to sculpture production through working with materials including wood, metal, and plaster. Conceptual and technical skills, and safe and appropriate use of tools and materials. Impact of material and technique upon form and content; the physical and expressive possibilities of diverse materials. Historical and contemporary forming methods provide a theoretical basis for studio work. Field trips; guest lecturers.

ARTSTUDI 160. Design I : Fundamental Visual Language. 3-4 Units.

Formal elements of visual expression (color, composition, space, and process) through hands-on projects. Two- and three-dimensional media. Emphasis is on originality and inventiveness. Content is realized abstractly. Centered in design; relevant to visual art study and any student seeking to develop visual perception. (lower level).

ARTSTUDI 161. Catalysts for Design. 3-4 Units.

Nature and science as sources of design inspiration. Projects in natural pattern formation, biological growth and form, Fibonacci numbers and the golden section, planar and spatial symmetry, mechanics, chaos, and fractals. Emphasis is on importance of creative synthesis to the design process. Projects take the form of physical constructions as opposed to renderings or computer models. Field trips. (lower level).

ARTSTUDI 166. Design in Motion. 3-4 Units.

Design areas for which movement and transformation are essential. Experimentation with mechanical means such as linking, hinging, inflating, and rotating. Projects in lighting, automata, tools and utensils, chain reactions, toys and games, festival props, and quasi-architecture emphasize the creation of works in which motion is a significant agent for aesthetic gratification. No experience in mechanical engineering required. (lower level).

ARTSTUDI 167. Introduction to Animation. 3-4 Units.

Projects in animation techniques including flipbook, cutout/collage, stop-motion such as claymation, pixilation, and puppet animation, rotoscoping, and time-lapse. Films. Computers used as post-production tools, but course does not cover computer-generated animation. (lower level).

ARTSTUDI 170. Introduction to Photography. 4 Units.

Critical, theoretical, and practical aspects of creative photography through camera and lab techniques. Field work. Cantor Art Center and Art Gallery exhibitions. Course requires the use of a 35mm camera. The Department will supply if necessary. (lower level).

ARTSTUDI 177. Video Art I. 4 Units.

Students create experimental video works. Conceptual, formal, and performance-based approaches to the medium. The history of video art since the 70s and its influences including experimental film, television, minimalism, conceptual art, and performance and electronic art. Topics: camera technique, lighting, sound design, found footage, cinematic conventions, and nonlinear digital editing. (lower level).

ARTSTUDI 178. Art and Electronics. 4 Units.

Analog electronics and their use in art. Basic circuits for creating mobile, illuminated, and responsive works of art. Topics: soldering; construction of basic circuits; elementary electronics theory; and contemporary electronic art. (lower level).

ARTSTUDI 179. Digital Art I. 4 Units.

Contemporary electronic art focusing on digital media. Students create works exploring two- and three-dimensional, and time-based uses of the computer in fine art. History and theoretical underpinnings. Common discourse and informative resources for material and inspiration. Topics: imaging and sound software, web art, and rethinking the computer as interface and object. (lower level).

ARTSTUDI 180. Color. 3-4 Units.

Hands-on study of color to develop color sensitivity and the ability to manipulate color to exploit its expressive potential. Guided experimentation and observation. Topics include color relativity, color and light, color mixing, color harmony, and color and content. (lower level).

ARTSTUDI 230. Interdisciplinary Art Survey. 4 Units.

This course is designed to develop diversity of concepts and strategies within the student's artistic practice. The course includes a survey of artists using different media taught in the department's studio program such as painting, drawing, video and digital art, printmaking, photography, and sculpture. This seminar-style class seeks to expand the artistic practice outside of traditional media boundaries and focuses on the translation of concepts across various media. Priority to Art Practice majors and minors. (upper level).

ARTSTUDI 236. Future Media, Media Archaeologies. 3-4 Units.

Hand-on. Media technologies from origins to the recent past. Students create artworks based on Victorian era discoveries and inventions, early developments in electronic media, and orphaned technologies. Research, rediscover, invent, and create devices of wonder and impossible objects. Readings in history and theory. How and what media technologies mediate. Same as: MUSIC 236.

ARTSTUDI 240. Drawing II. 4 Units.

Intermediate/advanced. Observation, invention, and construction. Development of conceptual and material strategies, with attention to process and purpose. May be repeated for credit. Prerequisite: 140 or consent of instructor. (upper level).

ARTSTUDI 245. Painting II. 4 Units.

Symbolic, narrative, and representational self-portraits. Introduction to the pictorial strategies, painting methods, and psychological imperatives of Dürer, Rembrandt, Cézanne, Kahlo, Beckmann, Schiele, and Munch. Students paint from life, memory, reproductions, and objects of personal significance to create a world in which they describe themselves. May be repeated for credit. Prerequisites: 140, 145, or consent of instructor. (upper level).

ARTSTUDI 246. Individual Work: Drawing and Painting. 1-15 Units.
Prerequisites: two quarters of painting or drawing and consent of instructor.**ARTSTUDI 249. Advanced Undergraduate Seminar. 3-4 Units.**

Capstone experience for majors in Art Practice. Interdisciplinary. Methods of research, cross-media critiques, and strategies for staging and presenting work, including a group exhibition for Commencement. Guest artists from the Bay Area. Minors may interview for possible inclusion. (upper level).

ARTSTUDI 250. Individual Work: Sculpture. 1-15 Units.
May be repeated for credit.**ARTSTUDI 252. Sculpture II. 4 Units.**

Builds upon 151. Installation and non-studio pieces. Impact of material and technique upon form and content; the physical and expressive possibilities of diverse materials. Historical and contemporary forming methods provide a theoretical basis for the studio work. Field trips; guest lecturers. (upper level).

ARTSTUDI 254. Kinetic Sculpture. 3-4 Units.

Students will work with visiting artist Bernie Lubell and Assistant Professor Berlier in the design and construction of a large-scale collaborative kinetic sculpture. Students will use both the Sculpture Lab facilities and the Product Realization Lab. Students will work in four teams of four throughout the quarter. The finished sculpture will be exhibited at the Exploratorium in San Francisco in the summer of 2013.

ARTSTUDI 260. Design II: The Bridge. 3-4 Units.

The historical spectrum of design including practical and ritual. The values and conceptual orientation of visual fundamentals. Two- and three-dimensional projects grouped to relate design theory to application, balancing imaginative and responsible thinking. Prerequisite: ARTSTUDI 160. Corequisite: ME 203 (upper level). May be repeated for credit.

ARTSTUDI 261. Individual Work: Design. 1-15 Units.
May be repeated for credit.**ARTSTUDI 262. The Chair. 3-4 Units.**

Students design and fabricate a highly refined chair. The process is informed and supported by historical reference, anthropometrics, form studies, user testing, material investigations, and workshops in fiberglass molding, wood steam-bending, plywood forming, metal tube bending, TIG & MIG welding, upholstery & sewing. Prerequisites: ARTSTUDI 260 and ME 203, or consent of instructor. (upper level).

ARTSTUDI 263. Paper. 3-4 Units.

Beyond conventional use of paper as a foundation for mark making to its potential as a medium in its own right. Students experiment with papers to develop facility with techniques of folding, scoring, curling, cutting, tearing, piercing, embossing, layering, and binding to create three-dimensional forms, patterned/textured surfaces, reliefs, interactive dynamic structures such as pop-ups, containers, and book forms. (upper level). May be repeated for credit.

ARTSTUDI 270. Advanced Photography Seminar. 1-5 Units.

Student continues with own work, showing it in weekly seminar critiques. May be repeated for credit. (upper level).

ARTSTUDI 271. The View Camera: Its Uses and Techniques. 4 Units.

For students of photography who wish to gain greater control and refine skills in image making. 4x5 view cameras provided. Enrollment limited to 8. (upper level).

ARTSTUDI 272. Individual Work: Photography. 1-5 Units.

Student continues with own work, showing it in weekly seminar critiques. May be repeated for credit.

ARTSTUDI 273. Individual Work: Experimental Media Art. 1-15 Units.

May be repeated for credit.

ARTSTUDI 274. Alternative Processes. 4 Units.

Priority to advanced students. Technical procedures and the uses of primitive and hand-made photographic emulsions. Enrollment limited to 10. Prerequisites: 170, 270, or consent of instructor. (upper level).

ARTSTUDI 275. Introduction to Digital Photography and Visual Images. 4 Units.

Students use Adobe Lightroom to organize and edit images, manipulate and correct digital files, print photographs, create slide shows, and post to the Internet. How to use digital technology to concentrate on visual thinking rather than darkroom techniques. (upper level). May be repeated 2 times for a total of 8 units.

ARTSTUDI 276. The Photographic Book. 4 Units.

Grouping and sequencing photographic images to produce a coherent body of work with a thematic structure. (lower level).

ARTSTUDI 277. Projects in Photography. 4 Units.

Students pursue a topic of their own definition. Further exploration of darkroom and other printing techniques; contemporary theory and criticism. (lower level). May be repeated for credit 2 times for a maximum of 8 units.

ARTSTUDI 278. Intermediate Black and White Photography. 4 Units.

This course explores several intermediate-level topics and techniques in film based photography. These include medium format photography utilizing the school's cameras; fine printing techniques using fiber paper; the full range of black and white films currently available; and alternative black and white techniques such as pinhole photography, photograms, and Holga cameras. We briefly discuss basic lighting techniques. The course emphasizes improving the student's image content and sequencing of images.

ARTSTUDI 279A. Digital Art II. 4 Units.

Advanced. Interactive art works using multimedia scripting software. Experimental interfaces, computer installation work, and mobile technologies. Contemporary media art theory and practice. (upper level).

ARTSTUDI 284. Art and Biology. 4 Units.

The relationship between biology and art. Rather than how art has assisted the biological sciences as in medical illustration, focus is on how biology has influenced art making practice. New technologies and experimental directions, historical shifts in artists' relationship to the living world, the effects of research methods on the development of theory, and changing conceptions of biology and life. Projects address these themes and others that emerge from class discussions and presentations. (upper level).

ARTSTUDI 310A. Directed Reading: Studio. 1-15 Units.**ARTSTUDI 310B. Directed Reading: Studio. 1-15 Units.****ARTSTUDI 310C. Directed Reading: Studio. 1-15 Units.**

ARTSTUDI 342. MFA Project: Studio. 1-15 Units.

Two weekly seminars, studio practice, and individual tutorials. Object seminar: student work is critiqued on issues of identity, presentation, and the development of coherent critical language. Concept seminar: modes of conceptualization to broaden the base of cognitive and generative processes. May be repeated for credit.

ARTSTUDI 350A. Art in Context I: Post-Readymade Production. 3 Units.

This class introduces key concepts of contemporary art for first-year graduate Design students. From art installations that function as storefronts to works that directly address the intersections of art, design and technology, visual artists are increasingly blurring the boundaries between the disciplines of applied and fine art. What were the historical roots of this intersection and how are artists responding with new forms? How can these conceptual and material tactics contribute to an expanded mode of design thinking? A series of readings and project assignments will be given, with time implemented for discussion and reflection. Field trips to sites such as The Exploratorium in San Francisco and the Zero1 Art & Technology Biennial in San Jose are planned, as well as talks by artists working in the field. Students will be asked to examine their own methods and materials of design and situate themselves within the larger context of art practice in order to consider an expanded field of concept, innovation, and audience.

ARTSTUDI 350B. Art in Context II: Expanded Forms, Alternative Functions. 3 Units.

This class introduces key concepts of contemporary art for first-year graduate Design students. From art installations that function as storefronts to works that directly address the intersections of art, design and technology, visual artists are increasingly blurring the boundaries between the disciplines of applied and fine art. What were the historical roots of this intersection and how are artists responding with new forms? How can these conceptual and material tactics contribute to an expanded mode of design thinking? A series of readings and project assignments will be given, with time implemented for discussion and reflection. Field trips to sites such as The Exploratorium in San Francisco and the Zero1 Art & Technology Biennial in San Jose are planned, as well as talks by artists working in the field. Students will be asked to examine their own methods and materials of design and situate themselves within the larger context of art practice in order to consider an expanded field of concept, innovation, and audience.

ARTSTUDI 360A. Master's Project: Design. 2-4 Units.

Students enroll concurrently in ME 316. Over the course of the year, students create and present two master's theses involving the synthesis of aesthetics and technological concerns in the service of human need and possibility. May be repeated for credit.

ARTSTUDI 360B. Master's Project: Design. 2-4 Units.

Students enroll concurrently in ME 316. Over the course of the year, students create and present two master's theses involving the synthesis of aesthetics and technological concerns in the service of human need and possibility.

ARTSTUDI 360C. Master's Project: Design. 2-4 Units.

Students enroll concurrently in ME 316. Over the course of the year, students create and present two master's theses involving the synthesis of aesthetics and technological concerns in the service of human need and possibility.

ARTSTUDI 801. TGR Project. 0 Unit.

Asian American Studies Courses

ASNAMST 74N. Race and Ethnicity in Contemporary American Fiction: Boundaries and Border Crossings. 3 Units.

The question of "place" and "locality" in studies of identity and racial formation. Goal is to engage and examine texts with a critical eye both toward the social contexts represented and to the imaginative aesthetic techniques that American writers of color offer to bring their fictional worlds to life. Theme of border hopping and boundary crossing in works by authors including Charles Johnson, Toni Morrison, Alejandro Morales, Julie Otsuka, Stephen Graham Jones, and Lan Samantha Chang. Same as: ENGLISH 74N.

ASNAMST 88N. Graphic Novels Asian American Style. 3 Units.

Though genre fiction has occasionally been castigated as a lowbrow form only pandering to the uneducated masses, this course reveals how Asian American writers transform the genre to speak to issues of racial difference and social inequality. Same as: ENGLISH 88N.

ASNAMST 100C. EAST House Seminar: Current Issues and Debates in Education. 1 Units.

Education and Society Theme (EAST) House seminar. In fall quarter, faculty from around the University discuss the latest issues, debates, and research in Education. In winter quarter, research and practice pertaining to gender, sexuality, and education are covered by scholars from around the University and beyond. In the spring, the seminar revolves around higher education and political activism through the lens of race and ethnicity. Through an examination of these topics, students are able to share and develop their varied interests in educational research, policy, and practice. Same as: EDUC 100C.

ASNAMST 112. Public Archaeology: Market Street Chinatown Archaeology Project. 4-5 Units.

This internship-style course centers on the practice and theory of historical archaeology research and interpretation through a focused study of San Jose's historic Chinese communities. The course includes classroom lectures, seminar discussion, laboratory analysis of historic artifacts, and participation in public archaeology events. Course themes include immigration, urbanization, material culture, landscape, transnational identities, race and ethnicity, gender, cultural resource management, public history, and heritage politics. The course includes required lab sections, field trips, and public service. Transportation will be provided for off-site activities. Same as: ANTHRO 112, ANTHRO 212.

ASNAMST 146S. Asian American Culture and Community. 3-5 Units.

An examination of the history, art and culture of Vietnamese Americans, and their contemporary experiences in the South Bay. The course will combine in-class learning with a major conference featuring prominent artists and scholars on the Vietnamese Diasporic community. A service learning component requires community work at a service organization in San Jose. Service Learning Course (certified by Haas Center). Course can be repeated once. Same as: AMSTUD 146, COMPLIT 146, CSRE 146S.

ASNAMST 158. Screening Asian America. 5 Units.

This course examines the history of Asian Americans on the screen and behind the camera. Class discussion will cover early Edison shorts, Griffith's Broken Blossoms, and the work of Sessue Hayakawa and Anna May Wong. The course then explores independent Asian American filmmaking and surveys key works in documentary, experimental, and avant-garde film and video production by Asian Americans. Films include Wayne Wang's Chan is Missing, Rea Tajiri's History and Memory, Richard Fung's Sea in the Blood.

ASNAMST 161. Asian American Immigration and Health. 3-5 Units.
Employing a critical medical anthropological approach, this course focuses on the health of Asian and Pacific Islander immigrants to the United States. This course explores the construction of the Asian immigrant in biomedical discourse and governmental policies. Beginning with an historical study of Asian immigrants as feared sources of disease and contagion, this course addresses the impact of immigration status, language, health beliefs, gender, age, and definitions of community on health programs and policies.

ASNAMST 174S. When Half is Whole: Developing Synergistic Identities and Mestiza Consciousness. 5 Units.

This is an exploration of the ways in which individuals construct whole selves in societies that fragment, label, and bind us in categories and boxes. We examine identities that overcome the destructive dichotomies of ζ us ζ and ζ them, ζ crossing borders of race, ethnicity, culture, nation, sex, and gender. Our focus is on the development of hybrid and synergistic forms of identity and mestiza consciousness in which the whole is greater than the sum of its parts.
Same as: CSRE 174S.

ASNAMST 185A. Race and Biomedicine. 3-5 Units.

Race, identity, culture, biology, and political power in biomedicine. Biological theories of racial ordering, sexuality and the medicalization of group difference. Sources include ethnography, film, and biomedical literature. Topics include colonial history and medicine, the politics of racial categorization in biomedical research, the protection of human subjects and research ethics, immigration health and citizenship, race-based models in health disparities research and policy, and recent developments in human genetic variation research.
Same as: ANTHRO 185A.

ASNAMST 187. Geography, Time, and Trauma in Asian American Literature. 5 Units.

The notion that homes can be stable locations for cultural, racial, ethnic, and similarly situated identity categories. The possibility that there really is no place like home for Asian American subjects. How geography, landscape, and time situate traumas within fictional Asian American narratives.
Same as: AMSTUD 261A, ENGLISH 261A.

ASNAMST 188. Gender and Sexuality in Asian American Literature. 5 Units.

How writers and representations dialogue, challenge, resist, and complicate such formative constructions of gendered/sexual identities. How queer Asian Americans face ζ multiple negations ζ that include potential expulsion from their own families and from various communities. Authors include Bharati Mukherjee, Russell Leong, Suki Kim, Shawn Wong, Louis Chu, Lawrence Chua, Catherine Liu, Jessica Hagedorn, Timothy Liu, Shani Mootoo, David Mura, among others. Secondary readings will include literary criticism, feminist and queer theory.
Same as: AMSTUD 261F, ENGLISH 261F, FEMST 261F, FEMST 361F.

ASNAMST 200R. Directed Research. 1-5 Units.

May be repeated for credit.

ASNAMST 200W. Directed Reading. 1-5 Units.
(Staff).

ASNAMST 261B. East Goes West: Transnational Asia/Pacific Spatial Geographies. 5 Units.

East goes west as a metaphor to invoke the conceptions of fantasy and desire that play out in transnational scope. What attracts diasporic Asian/American subjects to the locations that they travel to, whether it be an identified homeland with which a character attaches a strong affinity, or to a new country where the promise of economic possibilities await?
Same as: AMSTUD 261B, ENGLISH 261B.

ASNAMST 295F. Race and Ethnicity in East Asia. 4-5 Units.

Historical, cultural, political and theoretical perspectives. Commonly misunderstood as an ethnically homogeneous country, the People's Republic of China is home to 55 officially recognized minority groups, many of whom inhabit the strategic border regions of the country. How similar assumptions of ethnic and racial homogeneity in Taiwan, Japan, and Korea are being reexamined by scholars in disciplines including anthropology, history, and political science.
Same as: HISTORY 295F, HISTORY 395F.

Asian Languages Courses

ASNLANG 1. 1ST YR JPNESE. 0-60 Units.

Astronomy Courses

Athletics, Physical Education, Recreation Courses

ATHLETIC 1. Alcohol & Health in College Life. 1 Unitss.

This course centers on alcohol issues from both a health and psychological perspective focusing on college alcohol issues and concerns.

ATHLETIC 2. Abs and Glutes. 1 Unitss.

Lower body workout to strengthen glutes and thighs, and abdominal training. Fee. (AU).

ATHLETIC 3M. Aikido. 1 Unitss.

ATHLETIC 4C. Archery Club Team. 1 Unitss.

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. (AU) (Staff).

ATHLETIC 10. Band, Sports Activity. 1 Unitss.
(AU).

ATHLETIC 12V. Baseball, Varsity Men. 1-2 Units.
(AU).

ATHLETIC 14. Basketball Skills. 1 Unitss.

Although this course is designed for players of intermediate to advance skill level, it is open to anyone hoping to learn more about the game and to improve as a player. Focus will be placed on the fundamentals of basketball with an emphasis on dribbling, passing and shooting. Time will be spent on defensive principles and team concepts will be addressed as the course progresses.

ATHLETIC 14V. Basketball, Varsity Men. 1-2 Units.
(AU).

ATHLETIC 15V. Basketball, Varsity Women. 1-2 Units.
(AU).

ATHLETIC 18. Strengthening the Heart through Compassion. 1 Unitss.

Guided practices and simple evidence based strategies to develop self-compassion, experience genuine happiness, reduce stress and negative thoughts, resolve differences with difficult others and take compassionate action that makes a difference in the world. Sponsored by Stanford's Center for Compassion and Altruism Research and Education (CCARE) and following the Stanford Compassion Training program. Each week includes: meditation, group discussion, current research and its real world application.

ATHLETIC 20M. Capoeira Club. 1 Unitss.**ATHLETIC 22C. Competitive Cheer Club. 1 Unitss.**

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member.

ATHLETIC 23. Core Training. 1 Unitss.

Exercises to build muscular strength and body core endurance, focusing on balance and stability. Equipment includes stability and medicine balls. Fee. (AU).

ATHLETIC 25V. Crew, Varsity Men. 1-2 Units.

(AU).

ATHLETIC 26V. Crew, Varsity Women. 1-2 Units.

(AU).

ATHLETIC 27. Cross Training Fitness. 1 Unitss.

Cross training fitness class will focus on combining different types of exercises to work the body as a whole to develop cardiovascular fitness, strength and power. All fitness levels are welcome. Class sessions will include exercises such as: indoor cycling, plyometrics, rowing, jump rope, circuit training, and various other exercises.

ATHLETIC 28V. Cross Country, Varsity Men. 1-2 Units.

(AU).

ATHLETIC 29V. Cross Country, Varsity Women. 1-2 Units.

(AU).

ATHLETIC 30. Cycling: Indoor. 1 Unitss.

Get a fantastic cardio workout on our stationary bikes. All levels and abilities welcome. Instructors motivate participants through intervals, hill climbs and coasts for the ultimate workout.

ATHLETIC 31C. Cycling Club Team. 1 Unitss.

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. (AU).

ATHLETIC 33. Diving, Springboard. 1 Unitss.

Basic techniques and mechanics of springboard and platform diving. Five basic categories of dives will be introduced: front, back, inward, reverse and twist. Competitive aspects of diving. Fee.

ATHLETIC 34V. Diving, Varsity Men. 1-2 Units.

(AU).

ATHLETIC 35V. Diving, Varsity Women. 1-2 Units.

(AU).

ATHLETIC 37C. Equestrian Club Team. 1 Unitss.

(AU).

ATHLETIC 38M. Eskrima. 1 Unitss.**ATHLETIC 39. Fencing: Beginning. 1 Unitss.**

The sport of swordmanship develops quick hands, strong legs, and a strategic mind. Footwork, handwork, and bouting. Emphasis is on foil technique. All equipment provided. Fee. (AU).

ATHLETIC 40. Fencing, Intermediate. 1 Unitss.

Continuation of 39; learn advanced footwork and handwork. Strategy and bouting. Introduction to epee and saber. All equipment provided. Prerequisite: 39. Fee. (AU).

ATHLETIC 41V. Fencing, Varsity Men. 1-2 Units.

(AU).

ATHLETIC 42V. Fencing, Varsity Women. 1-2 Units.

(AU) (Milgram).

ATHLETIC 43. Futsal. 1 Unitss.

Futsal is a variant of soccer that is played on a smaller playing surface and mainly played indoors. Soccer greats such as Kaka, Ronaldo, Ronaldinho, Marta and Messi grew up playing Futsal and credit it for developing their incredible skills. Learn quick reflexes, fast thinking and pin-point passing. With five-a-side play and a special low bounce ball, Futsal will improve your game through its intense pace and rapid execution.

ATHLETIC 45. Field Hockey, Indoor. 1 Unitss.

Learn the game and rules of indoor field hockey, prior outdoor field hockey experience required.

ATHLETIC 46. Field Hockey, Intermediate. 1 Unitss.

For those with prior experience. Techniques, skills, and strategy. Scrimmages and game-like scenarios. Fee. (AU).

ATHLETIC 47V. Field Hockey, Varsity Women. 1-2 Units.

(AU).

ATHLETIC 48V. Football, Varsity. 1-2 Units.

(AU).

ATHLETIC 51. Golf: Beginning. 1 Unitss.

Fundamentals of the golf swing; putting, chipping, and sand play. Golf etiquette and rules. Fee. (AU).

ATHLETIC 52. Golf: Advanced Beginning. 1 Unitss.

Further development of the golf swing and short game. How to practice. Rules and etiquette. Prerequisite: 51 or golf experience. Fee. (AU).

ATHLETIC 53. Golf: Intermediate. 1 Unitss.

Drills and practice on all facets of golf. How to lower scores and manage the game on the course. Prerequisite: 52 or equivalent. Fee. (AU).

ATHLETIC 54. Golf: Advanced. 1 Unitss.

Goal is to refine the golf swing and increase power, distance, and accuracy. Course management, mental preparation, visualization techniques. Prerequisites: 53 or experience playing and practicing, and the ability to hit shots with relative accuracy and distance. Fee. (AU).

ATHLETIC 55V. Golf, Varsity Men. 1-2 Units.

(AU).

ATHLETIC 56V. Golf, Varsity Women. 1-2 Units.

AU.

ATHLETIC 58. Gymnastics: Beginning. 1 Unitss.

Fundamental gymnastics movement for men and women, including flexibility and strength exercises taught on the Olympic apparatus including floor, balance beam, bars, and rings. Fee. (AU).

ATHLETIC 59. Gymnastics: Intermediate. 1 Unitss.

For students who have completed 58 or have a background in gymnastics. Emphasis is on tumbling and somersaulting. Group work and individualized instruction for men and women. Limited apparatus work. Fee. (AU).

ATHLETIC 60V. Gymnastics, Varsity Men. 1-2 Units. (AU).**ATHLETIC 61V. Gymnastics, Varsity Women. 1-2 Units. (AU).****ATHLETIC 63. Hip Hop. 1 Unitss.**

Funky, jazzy, hip hop dance for fun and cardiovascular fitness. Fee. (AU).

ATHLETIC 65. Horsemanship: Beginning Riding. 1 Unitss.

No experience needed. Basic horsemanship and riding at the walk, trot and canter. Fee. (AU).

ATHLETIC 66. Horsemanship: Advanced Beginning Riding. 1 Unitss.

Horsemanship and horse care; the canter and basic jumping. Prerequisite: 65 or equivalent. Fee. (AU).

ATHLETIC 67. Horsemanship: Intermediate Riding. 1 Unitss.

Basic veterinary skills and barn management. Riding at all gaits and completing horsemanship patterns (Western) or jumping basic courses (English). Fee. Prerequisite: 66 or equivalent. (AU).

ATHLETIC 68. Horsemanship: Student Assistant. 1 Unitss. (Bartsch).**ATHLETIC 69. Leadership: Assertiveness and Creativity. 1 Unitss.**

This class will teach leadership techniques for maximizing creativity in a group setting through facilitated interaction with horses. Students will practice increasing personal and situational mind/body awareness, develop an authentic, assertive leadership style, and access creativity in challenging circumstances. No experience needed. Fee.

ATHLETIC 70. Horsemanship. 1 Unitss.

This course explores the basics of horsemanship and provides the necessary foundation for beginning riding. Topics include, but are not limited to, general horse care, handling techniques, horse health and disease, and stable management. This is an un-mounted course. No experience needed. Fee.

ATHLETIC 70C. Horse Polo Club Team. 1 Unitss.

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. (AU).

ATHLETIC 72C. Ice Hockey Club Team. 1 Unitss.

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. Men (AU).

ATHLETIC 73M. JKA Shotokan Karate. 1 Unitss.**ATHLETIC 74C. Judo Club Team. 1 Unitss.**
