 - a) *Advising committee*: shortly after arrival, each entering student meets with the first-year advising committee. The committee reviews the student's previous academic work and current goals and advises the student on a program of Stanford courses, some of which may be required and others recommended. Satisfactory completion of the core curriculum (below) is required of all students.
 - b) *Core curriculum*:* all students are required to take the following courses for a letter grade, unless previous course work has fulfilled these requirements:
 - BIOSCI 203. Advanced Genetics
 - BIOSCI 214. Cell Biology of Physiological Process
 - BIOSCI 301. Frontiers in Biology: satisfies first-year talk requirement; must be taken Autumn and Winter quarters.
 One of the following:
 - BIOC/SBIO 241. Biological Macromolecules
 - MCP 256. Molecular Physiology of Cells
 - MPHA 210. Signal Transduction
 Three additional courses in the student's area of interest, or as advised by committee.
 - c) *Lab rotations*:* first-year students are required to complete rotations in three different laboratories.

* Written petitions for exemptions to core curriculum and lab rotation requirements are considered by the advising committee and the chair of the graduate studies committee. Approval is contingent upon special circumstances and is not routinely granted.

2. *Second year*: each student must pass a qualifying exam.
 - a) *Dissertation proposal*: during Winter and Spring quarters of the second year, the student must prepare a dissertation proposal that outlines the student's projected dissertation research. An expert assessment of the current literature is expected. After submission of the proposal to the dissertation advising committee, an oral examination is held. The student's adviser is a silent member of the examination committee; the other members of the dissertation advising committee can provide feedback.

Advancement to candidacy is contingent upon satisfactory completion of the dissertation proposal and oral exam. The written proposal is due by March 31 and the oral defense must take place no later than May 1. Failure to complete these requirements on schedule results in the withholding of the graduate stipend.
3. *Third year and beyond, dissertation and dissertation defense*: a completed draft of the dissertation must be turned in to the student's oral examination committee at least one month before the oral exam is scheduled to take place. See University guidelines for the composition of this committee in the "Graduate Degrees" section of this bulletin.

Integrative/Organismal Students—

1. *First year*: each entering student is assigned a first-year advising committee whose function is to develop a schedule of required and recommended courses and to meet once each quarter with the student during the first year.
 - a) *Students are required to take*: BIOSCI 306, Current Topics in Integrative and Organismal Biology. Students specializing in integrative biology may also be asked to take appropriate graduate-level courses such as DBIO 210; MCP 215; NBIO 206, 216; or PSYCH 228.
 - b) *First-year paper*: each student must prepare and submit a paper that is evaluated by the advising committee, before the end of Spring Quarter of their first year. This paper should be a step toward the development of a dissertation proposal and may consist of an analysis of new data or a literature review and synthesis. Evaluation is in written form by two faculty members.
2. *Second year*: the student is expected to write a major dissertation proposal. The proposal is evaluated by a committee of three faculty (the dissertation advising committee) in an oral presentation. This

is to be completed by the end of Spring Quarter of the second year. Advancement to candidacy depends on satisfactory completion of the dissertation proposal and oral exam.

3. *Third year and beyond, dissertation and dissertation defense:* a completed draft of the dissertation must be turned in to the student's oral examination committee at least one month before the oral exam is scheduled to take place. See University guidelines for the composition of this committee in the "Graduate Degrees" section of this bulletin.

Ecology, Evolution, and Population Biology Students—

1. *First year:* each entering student is assigned a first-year advising committee whose function is to develop a schedule of required and recommended courses and to meet once each quarter with the student during the first year.
 - a) Students are required to take BIOSCI 302, 303, 304, Current Topics and Concepts in Population Biology, Ecology, and Evolution.
 - b) *First-year paper:* each student must prepare and submit a paper that is evaluated by the advising committee before the end of Spring Quarter of their first year. This paper should be a step toward the development of a dissertation proposal and may consist of an analysis of new data or a literature review and synthesis. Evaluation is in written form by two faculty members.
2. *Second year:* the student is expected to write a major dissertation proposal. The proposal is evaluated by a committee of three faculty (the dissertation advising committee) in an oral presentation. This is to be completed by the end of Spring Quarter of the second year. Advancement to candidacy depends on satisfactory completion of the dissertation proposal and oral exam.
3. *Third year and beyond, dissertation and dissertation defense:* a completed draft of the dissertation must be turned in to the student's oral examination committee at least one month before the oral exam is scheduled to take place. See University guidelines for the composition of this committee in the "Graduate Degrees" section of this bulletin.

COURSES

Course and laboratory instruction in the Department of Biological Sciences conforms to the "Policy on the Use of Vertebrate Animals in Teaching Activities," the text of which is available at <http://www.stanford.edu/dept/DoR/rph/8-2.html>.

INTRODUCTORY

BIOSCI 1. Human Evolution and Environment—Human genetic and cultural evolution and how people interact with their environments, from the ancestors of Australopithecus to current events. Issues include race, gender, and intelligence; pesticide and antibiotic resistance; abortion and contraception; ecosystem services; environmental economics and ethics; the evolution of religion; climate change; population growth and overconsumption; origins and spread of ideas and technologies; and the distribution of political and economic power. GER:DB-NatSci

3 units, Spr (Ehrlich, P)

BIOSCI2. Current Research Topics in Biological Sciences—Primarily for sophomores interested in majoring in Biological Sciences. Weekly seminars by faculty: molecular biology and genetics; theory and mathematics in biology; ecology, physiology, and the environment; molecular and cellular aspects of neurobiology, immunology, and developmental biology; biological chemistry; behavioral biology; and evolution. May be repeated for credit.

1 unit, Aut, Win (Meier, T)

BIOSCI 3. Frontiers in Marine Biology—An introduction to contemporary research in marine biology, including ecology, conservation biology, environmental toxicology, behavior, biomechanics, evolution, neurobiology, and molecular biology. Emphasis is on new discoveries and the technologies used to make them. Weekly lectures by faculty from the Hopkins Marine Station.

1 unit, Aut (Somero, G)

BIOSCI8. Frontiers in Organismal Biology—Preference to freshmen and sophomores. How animals work. Research frontiers in organismal biology including integrative physiology, biomechanics, neurobiology, and environmental physiology and ecology.

1 unit, Aut (Block, B)

BIOSCI20. Introduction to Brain and Behavior—(Same as HUMBIO 21.) Evolutionary principles to understand how the brain regulates behavior, described in physiological terms, and is influenced by behavioral interactions. Topics include neuron structure and function, transmission of neural information, anatomy and physiology of sensory and motor systems, regulation of body states, the biological basis of learning and memory, and behavioral abnormalities. GER:DB-NatSci

3 units, Aut (Fernald, R), alternate years, not given next year

STANFORD INTRODUCTORY SEMINARS

BIOSCI 11N. Biotechnology in Everyday Life—Stanford Introductory Seminar. Preference to freshmen. The science that makes transgenic plants and animals possible. Current and future applications of biotechnology and the ethical issues raised. GER:DB-NatSci

3 units, Aut (Walbot, V)

BIOSCI 13N. Environmental Problems and Solutions—Stanford Introductory Seminar. Preference to freshmen. Students do independent investigations of current environmental problems, analyzing differing views of them and discussing possible solutions. Each student gives two seminar presentations and leads two seminar discussions. Short, documented position papers are written for policy makers. GER:DB-NatSci

3 units, Spr (Ehrlich, P)

BIOSCI 14N. Plants and Civilization—Stanford Introductory Seminar. Preference to freshmen. The role of plants in the development of civilization. Topics: the use of forests, woodlands, and grazing lands; centers of origins and spread of crops; viticulture, and wine and beer making; the spice route; the use of plants as medicine; fungi in human affairs; the global spread of weeds; engineering plants for the future; the importance of tea, coffee, sugar, potatoes, natural dyes, and rubber in societal affairs and change. GER:DB-NatSci

3 units, Spr (Mooney, H)

BIOSCI 15N. Environmental Literacy—Stanford Introductory Seminar. Preference to freshmen. Lack of public understanding of the details of most environmental problems is cited as a cause of environmental deterioration. Good citizenship requires literacy about the elements of the scientific and decision making processes that accompany most environmental issues: what can happen, what are the odds, how can the credibility of sources of expertise be assessed, which components of environmental debates deal with factual and theoretical issues, and which are political value judgments? Student-led discussions, peer review and term papers, and paper presentation. GER:DB-NatSci, WRITE-2

3 units, Win (Schneider, S)

BIOSCI21N. Evolutionary Basis of Animal Sexual Behaviors—Stanford Introductory Seminar. Preference to freshmen. The genetic and evolutionary basis for innate sexual behavioral patterns in animals. Readings from primary scientific literature, and Olivia Judson's *Dr. Tatiana's Sex Advice for All Creation*. GER:DB-NatSci

3 units, Spr (Baker, B)

BIOSCI 25N. Biogeography of Disease—Stanford Introductory Seminar. Preference to freshmen. Geographic distribution of disease. Biotic interactions among vectors, hosts, and environment. Influence of climatic and environmental change on spread and virulence of disease. Human and animal diseases. Primary literature. GER:DB-NatSci

3 units, Aut (Hadly, E)

BIOSCI 25Q. The Molecular Basis of Genetic Disease—Stanford Introductory Seminar. Preference to sophomores. Focus is on two genetic diseases resulting from the production of protein molecules that are unable to fold into their native conformations, called conformational diseases: cystic fibrosis and amyotrophic lateral sclerosis or Lou Gehrig's disease. Hypotheses and controversies surrounding the molecular basis of these disorders, and implications for novel therapeutics. Readings from research literature. GER:DB-NatSci
3 units, Spr (Kopito, R)

BIOSCI 26N. Maintenance of the Genome—Stanford Introductory Seminar. Preference to freshmen. Focus is on DNA repair systems which scan the genome to ensure genomic stability in the face of natural endogenous threats to DNA and those due to radiation and chemicals in the external environment. Redundancy of the genetic message ensured by complementary DNA strands facilitates recovery of information when one of the strands is altered. Predisposition to cancer often implicates a defective DNA repair gene. Relevance for oncology, aging, developmental biology, environmental health, and neurobiology. GER:DB-NatSci
3 units, Spr (Hanawalt, P)

BIOSCI 28N. Molecular Basis of Cancer—Stanford Introductory Seminar. Preference to freshmen. Topics: cell cycle regulation, oncogenes, tumor suppressor genes, telomere biology, angiogenesis, and apoptosis. Current cancer biology literature. GER:DB-NatSci
3 units, Spr (Fang, G)

BIOSCI 31Q. Ants: Behavior, Ecology, and Evolution—Stanford Introductory Seminar. Preference to sophomores. Behavior: the organization of colonies, how they operate without central control, how they resemble other complex systems like brains. Ecology: how populations of colonies change, comparing the ecology of a species in SW American desert and invasive Argentine ants. Evolution: why are there so many species of ants; how are they alike, how do they differ, and why? Ants as the theme for exploring how to do research in animal behavior, ecology, and evolution. Research project will be on the invasive Argentine ant: its distribution on campus, foraging trails, and nest structure.
3 units, Spr (Gordon, D)

BIOSCI 33N. Conservation Science and Practice—Stanford Introductory Seminar. Preference to freshmen. What types of species and ecosystems are likely to survive human impact; which most merit protection, and what is the scientific basis for deciding? Scope and limitations of conservation and restoration practices? Global scale and case studies. Student presentations and research. GER:DB-NatSci
3 units, Spr (Daily, G)

CORE

BIOSCI 41, 42, 43. Principles of Biology—The principles of modern biological sciences, taken in sequence, preferably in the sophomore year. Biological Sciences majors must take for a letter grade. Prerequisites: CHEM 31X (or 31A and B), 33, 35; MATH 19, 20, 21, or 41, 42.

BIOSCI 41. Genetics, Biochemistry, and Molecular Biology—Emphasis is on macromolecules (proteins, lipids, carbohydrates, and nucleic acids) and how their structure relates to function and higher order assembly; molecular biology, genome structure and dynamics, gene expression from transcription to translation. GER:DB-NatSci
5 units, Aut (Simoni, R; Bergmann, D)

BIOSCI 42. Cell Biology and Animal Physiology—Cell structure and function; principles of animal physiology (immunology, renal, cardiovascular, sensory, motor physiology, and endocrinology); neurobiology from cellular and developmental to neural regulation of physiology. GER:DB-NatSci
5 units, Win (Sapolsky, R; Jones, P; Cyert, M; Luo, L; Heller, C)

BIOSCI 43. Plant Biology, Evolution, and Ecology—Principles of evolution: macro- and microevolution and population genetics. Ecology: the principles underlying the exchanges of mass and energy between organisms and their environments; population, community, and ecosystem ecology; populations, evolution, and global change. Equivalent to BIOHOPK 43. GER:DB-NatSci
5 units, Spr (Gordon, D; Petrov, D)

BIOSCI 44X,Y. Core Experimental Laboratory—Two quarters of lab projects provide a working familiarity with the concepts, organisms, and techniques of modern biological research. Emphasis is on experimental design, analysis of data, and written and oral presentation of the experiments. Lab fee. Prerequisites: CHEM 31X, or 31A,B, and 33. Recommended: Biological Sciences or Human Biology core, and statistics; 44X,Y should be taken sequentially in same year. 44Y equivalent to BIOHOPK 44Y. WIM
4 units, X: Win, Y: Spr (Malladi, S)

BIOSCI 54. Genes, Genomes, and Proteins: Introduction to Advanced Independent Research Laboratory—Preference to sophomores. First of two-part sequence. For students interested in pursuing research-oriented careers in biological sciences. The impact of genomic information on experimental biology. Recently developed techniques at a conceptual level and examples of their application to biology. Emphasis is on primary scientific literature and hands-on analyses of genome information using online databases and computational tools. Topics include microarray analysis, the use of comprehensive genome-wide mutant collections, and investigation of the proteome. Limited enrollment. Prerequisite: consent of instructors. 54,55 substitutes for 44X,Y to fulfill Biological Sciences major lab requirement. GER:DB-NatSci, WIM
4 units, not given this year (Cyert, M; Stearns, T)

BIOSCI 55. Advanced Independent Research Laboratory—Preference to sophomores. Second of two-part sequence. For students interested in pursuing research-oriented careers in biological sciences. Project lab course using a modern research laboratory with cutting-edge technologies introduced in 54 to investigate gene and protein function on a genomic level to understand how cells work. Students design and execute original research projects using the yeast *Saccharomyces cerevisiae* to explore fundamental questions in eukaryotic cell biology. Limited enrollment. Prerequisite: 54, consent of instructors. 54,55 substitutes for 44X,Y to fulfill Biological Sciences major lab requirement. GER:DB-NatSci, WIM
6 units, not given this year (Cyert, M; Stearns, T)

BIOSCI 96A,B. Jasper Ridge Docent Training—Two quarter preparation for Stanford and community students to join the Jasper Ridge education program. Multidisciplinary environmental education; hands-on field research. Field ecology and the natural history of plants and animals, archaeology, geology, hydrology, land management, and research projects of the preserve presented by faculty, local experts, and staff. Participants lead research-focused educational tours, assist with classes, and attend continuing education classes available to members of the JRBP community after the course.
2 units, A: Win, B: Spr (Wilber, C; Vitousek, P)

HOPKINS MARINE STATION

For courses offered at the Hopkins Marine Station, see the "Hopkins Marine Station" section of this bulletin which follows immediately after this section. Many of the Hopkins Marine Station courses may be used to fulfill department major requirements.

INTERMEDIATE UNDERGRADUATE AND GRADUATE

BIOSCI 101. Ecology—Introduction to the principles of ecology. Topics: interactions of organisms with their environment, dynamics of populations, species interactions, structure and dynamics of ecological communities, biodiversity. Prerequisites: 43, or consent of instructor. Recommended: statistics. GER:DB-NatSci
3 units, Aut (Vitousek, P; Dirzo, R)

BIOSCI 102. Demography: Health, Development, Environment—(Same as HUMBIO 119.) Demographic methods and their application to understanding and projecting changes in human infant, child, and adult mortality and health, fertility, population, sex ratios, and demographic transitions. Progress in human development, capabilities, and freedoms. Relationships between population and environment. Prerequisites: numeracy and basic statistics. GER:DB-SocSci
3 units, Spr (Tuljapurkar, S)

BIOSCI 104/200. Advanced Molecular Biology—Molecular mechanisms that govern the replication, recombination, and expression of eukaryotic genomes. Topics: DNA replication, DNA recombination, gene transcription, RNA splicing, regulation of gene expression, protein synthesis, and protein folding. Prerequisite: Biological Sciences core. GER:DB-NatSci
3 units, Spr (Fang, G)

BIOSCI 109A/209A. The Human Genome and Disease—(Formerly 109; same as HUMBIO 158.) The variability of the human genome and the role of genomic information in research, drug discovery, and human health. Concepts and interpretations of genomic markers in medical research and real life applications. Human genomes in diverse populations. Original contributions from thought leaders in academia and industry and interaction between students and guest lecturers. GER:DB-NatSci
3 units, Win (Heller, R)

BIOSCI 109B/209B. The Human Genome and Disease: Genetic Diversity and Personalized Medicine—Continuation of 109A/209A. Genetic drift: the path of human predecessors out of Africa to Europe and then either through Asia to Australia or through northern Russia to Alaska down to the W. Coast of the Americas. Support for this idea through the histocompatibility genes and genetic sequences that predispose people to diseases. Guest lectures from academia and pharmaceutical companies. Prerequisite: Biological Sciences or Human Biology core. GER:DB-NatSci
3 units, Spr (Heller, R)

BIOSCI 112/212. Human Physiology—(Same as HUMBIO 133.) The functioning of organ systems emphasizing mechanisms of control and regulation. Topics: structure and function of endocrine and central nervous systems, cardiovascular physiology, respiration, salt and water balance, exercise, and gastrointestinal physiology. Prerequisite: Biological Sciences or Human Biology core. GER:DB-NatSci
4 units, Win (Garza, D)

BIOSCI 113/244. Fundamentals of Molecular Evolution—The inference of key molecular evolutionary processes from DNA and protein sequences. Topics include random genetic drift, coalescent models, effects and tests of natural selection, combined effects of linkage and natural selection, codon bias and genome evolution. Prerequisites: Biological Sciences core or graduate standing in any department, and consent of instructor. GER:DB-NatSci
4 units, Spr (Petrov, D)

BIOSCI 117. Biology and Global Change—(Same as EARTHSYS 111, GEOPHYS 117.) The biological causes and consequences of anthropogenic and natural changes in the atmosphere, oceans, and terrestrial and freshwater ecosystems. Topics: glacial cycles and marine circulation, greenhouse gases and climate change, tropical deforestation and species extinctions, and human population growth and resource use. Prerequisite: Biological Sciences or Human Biology core or graduate standing. GER:DB-NatSci
3 units, Win (Vitousek, P; Arrigo, K)

BIOSCI 118/218. Genetic Analysis of Biological Processes—Genetic principles and their experimental applications. Emphasis is on the identification and use of mutations to study cellular function. Prerequisite: Biological Sciences core. GER:DB-NatSci
5 units, Spr (Baker, B)

BIOSCI 120. General Botany—Introduction to plant development, structure, and function in an ecological and evolutionary context. Themes include comparative morphology, systematics and diversity, and broad-scale evolutionary trends. Prerequisites: Biological Sciences or Human Biology core, or consent of instructor. GER:DB-NatSci
3-5 units, not given this year

BIOSCI 121. Biogeography—Global distributions of organisms through the Phanerozoic, with emphasis on historical causes. Topics: plate tectonics, island biogeography, climatic change, dispersal, vicariance, ecology of invasions, extinction, gradients, diversity. GER:DB-NatSci
3 units (Hadly, E) alternate years, not given this year

BIOSCI 125. Ecosystems of California—Distribution, functioning, human utilization, and management through time. Prerequisite: 43, HUMBIO 2A, or EARTHSYS 10. GER:DB-NatSci
3 units, Spr (Mooney, H)

BIOSCI 129A. Cellular Dynamics I: Cell Motility and Adhesion—Cell motility emphasizing role of actin assembly and dynamics coupling actin organization to cell movement. Interaction of cells with extracellular matrix, and remodelling of extracellular matrix in development and disease. Directed cell migration by chemotaxis (neuronal path-finding, immune cells). Cell-cell adhesion, formation of intercellular junctions and mechanisms regulating cell-cell interactions in development and diseases. Emphasis is on experimental logic, methods, problem solving, and interpretation of results. Students present research papers. Prerequisite: Biological Sciences core. GER:DB-NatSci
4 units, Win (Nelson, W)

BIOSCI 129B. Cellular Dynamics II: Building a Cell—Principles of cell organization; how common biochemical pathways are modified to generate diversity in cell structure and function. Roles of actin and microtubule cytoskeletons in cellular architecture. Mechanisms of protein sorting and trafficking, and protein modules and switches in regulating cell polarity. Yeast to polarized epithelial cells and neurons. Emphasis is on experimental logic, methods, problem solving, and interpretation of results. Students present research papers. Prerequisite: Biological Sciences core. Recommended: 129A. GER:DB-NatSci
4 units, Spr (Nelson, W)

BIOSCI 132/232. Advanced Imaging Lab in Biophysics—(Same as BIOPHYS 232, MCP232.) Laboratory and lectures. Microscopy, emphasizing hands-on experience with a range of apparatus and techniques. Topics include microscope optics, Koehler illumination, contrast-generating mechanisms (bright/dark field, fluorescence, phase contrast, differential interference contrast), and resolution limits. Advanced topics vary by year, but include single-molecule fluorescence, fluorescence resonance energy transfer, confocal microscopy, two-photon microscopy, optical trapping, and fiber optic methods. Limited enrollment. Recommended: basic physics, Biological Sciences core or equivalent, and consent of instructor. GER:DB-NatSci
4 units, Spr (Block, S; Schnitzer, M; Smith, S; Stearns, T)

BIOSCI 133. Genetics of Prokaryotes—Genetic approaches for understanding cellular processes in bacteria, including metabolism, adaptive and stress responses, signal transduction, gene expression, genetic exchange and recombination, chromosome dynamics and evolution, cell division, motility, surface attachment, and developmental responses. Emphasis is on the power of effectively combining genetics with biochemistry, microscopy, and genomics. Prerequisite: Biological Sciences core. GER:DB-NatSci
4 units, Aut (Burkholder, W; Campbell, A)

BIOSCI 134. Replication of DNA—Seminar. Modes of DNA replication and their control in prokaryotes and eukaryotes. Structures, properties, and functions of DNA polymerases and associated factors. Emphasis is on experimental approaches and their limitations. Current research literature. Students prepare journal club style report and lead class discussions. Enrollment limited to 20 advanced undergraduates. Prerequisite: Biological Sciences core. Recommended: 118. GER:DB-NatSci
3 units, Win (Burkholder, W)

BIOSCI 135. Biological Clocks—(Same as HUMBIO 186.) The biological basis for endogenous timekeeping in organisms from flies to human beings. How biological clocks are constructed at the molecular, tissue, and behavioral levels; how these clocks interact with other physiological systems and allow animals to anticipate changes in their environment. Applications of circadian rhythm principles to treating human disorders and diseases such as cancer. Prerequisite: Biological Sciences or Human Biology core, or consent of instructor. GER:DB-NatSci

3 units, Spr (Staff)

BIOSCI 136. Evolutionary Paleobiology—A paleontological approach to evolutionary theory. Topics: history of life, speciation, heterochrony, evolutionary constraint, coevolution, macroevolution, the Cambrian Explosion, mass extinctions, taphonomy, life on land, life in the sea, life in the air. GER:DB-NatSci

4 units, alternate years, not given this year (Hadly, E)

BIOSCI 137/237. Plant Genetics—Gene analysis, mutagenesis, and transposable elements; developmental genetics of flowering and embryo development; biochemical genetics of plant metabolism; scientific and societal lessons from transgenic plants. Prerequisite: Biological Sciences core or consent of instructor. GER:DB-NatSci

3 units, alternate years, not given this year (Walbot, V)

BIOSCI 138/238. Ecology and Evolution of Plants—Topics: plants in the environment, natural selection in plant populations, population dynamics, evolution of life history, and physiological ecology. Prerequisite: 43 or consent of instructor. Recommended: statistics. GER:DB-NatSci

3 units, not given this year

BIOSCI 138A/238A. Plant Ecology Lab—Weekly lab sessions to design and conduct field research projects and read primary literature. Corequisite: 138.

2 units, not given this year

BIOSCI 139. Biology of Birds—How birds interact with their environments and each other, emphasizing studies that had impact in the fields of population biology, community ecology, and evolution. Local bird communities. Emphasis is on field research. Enrollment limited to 20. Prerequisites: 43 or equivalent, and consent of instructor. Recommended: birding experience. GER:DB-NatSci

3 units, Spr (Root, T)

BIOSCI 140. Population Biology of Butterflies—Field work on Euphydryas populations under study on campus and elsewhere in California. Course offered as participation in research when conditions permit; decisions not made until Winter Quarter. Prerequisites: 43 and consent of instructor.

2-5 units, Spr (Ehrlich, P)

BIOSCI 141. Biostatistics—(Same as STATS 141.) Statistical methods for biological data. Describing numerical and graphical data; introduction to probability and statistical inference, including hypothesis tests and confidence intervals. Intermediate statistical methods: comparing groups and analysis of variance; analyzing associations and linear and logistic regression; and methods for categorical data such as contingency tables and odds ratio. Content integrated with statistical computing in R. See <http://www-stat.stanford.edu/~rag/stat141>. GER:DB-Math

4-5 units, Aut (Rogosa, D), Win (Feldman, M)

BIOSCI 142/242. Topics in Theoretical Ecology—Issues include foraging theory, demography and life history theory, population dynamics and species interactions including ecosystem stability, ecological economics and marine reserve design, evolutionary theory, evolutionary ecology, and evolution of gender sexuality and family structure. Prerequisites: 43 or 101, calculus, and computer programming. Recommended: linear algebra and differential equations. GER:DB-NatSci

3 units, Win (Roughgarden, J)

BIOSCI 143/243. Evolution—The basic facts and principles of the evolution of all life. The logic of and evidence for the correctness of Darwin's argument for evolution by natural selection. How Mendelian genetics was integrated into evolutionary thinking. The integration of physiological and

ecological perspectives into the study of evolutionary adaptation within species. Species formation and evolutionary divergence among species. Patterns of evolution over long time scales. GER:DB-NatSci

3 units, Aut (Watt, W)

BIOSCI 144. Conservation Biology—(Same as HUMBIO 112.) Principles and application of the science of preserving biological diversity. Topics: sources of endangerment of diversity; the Endangered Species Act; conservation concepts and techniques at the population, community, and landscape levels; reserve design and management; conflict mediation. Case studies and local field trips. 3 units if taken without field trips. Prerequisites: BIOSCI 101, or HUMBIO 2A with consent of instructor. GER:DB-NatSci

3-4 units, Win (Boggs, C; Launer, A)

BIOSCI 145/245. Behavioral Ecology—Animal behavior from an evolutionary and ecological perspective. Topics: foraging, territoriality, reproductive behavior, social groups. Lecture/seminar format; seminars include discussion of journal articles. Independent research projects. Prerequisites: Biological Sciences or Human Biology core, or consent of instructor. Recommended: statistics. GER:DB-NatSci, WIM

4 units, Spr (Gordon, D)

BIOSCI 146. Population Studies—Series of talks by distinguished speakers introducing approaches to population and resource studies.

1 unit, Win (Feldman, M)

BIOSCI 147/247. Controlling Climate Change in the 21st Century—(Same as EARTHSYS 147/247, HUMBIO 116.) The science, economics, and environmental diplomacy of global climate change. Topics: the science of climate change, climate change and global environmental law; global economic approaches to carbon abatement, taxes, and tradable permits; joint implementation, consensus, and division in the EU; gaining the support of China, other developing countries, and U.S. corporations; alternative energy and energy efficiencies for less carbon-intensive electric power and transport. GER:DB-NatSci

3 units, Win (Schneider, S; Mastrandrea, M)

alternate years, not given next year

BIOSCI 149/249. Principles of Sleep Research—Preference to seniors and graduate students. The neurochemistry and neurophysiology of changes in brain activity and conscious awareness associated with changes in the sleep/wake state. Behavioral and neurobiological phenomena including sleep regulation, sleep homeostasis, circadian rhythms, sleep disorders, sleep function, and the molecular biology of sleep. Enrollment limited to 16. GER:DB-NatSci

4 units, Win (Heller, C)

BIOSCI 150/250. Human Behavioral Biology—(Same as HUMBIO 160.) Multidisciplinary. How to approach complex normal and abnormal behaviors through biology. How to integrate disciplines including sociobiology, ethology, neuroscience, and endocrinology to examine behaviors such as aggression, sexual behavior, language use, and mental illness. GER:DB-NatSci

6 units, alternate years, not given this year, (Sapolsky, R)

BIOSCI 151. Mechanisms of Neuron Death—For Biology majors with background in neuroscience. Cell and molecular biology of neuron death during neurological disease. Topics: the amyloid diseases (Alzheimer's), prion diseases (kuru and Creutzfeldt-Jakob), oxygen radical diseases (Parkinson's and ALS), triplet repeat diseases (Huntington's), and AIDS-related dementia. Student presentations. Enrollment limited to 15; application.

3 units, Aut (Sapolsky, R)

BIOSCI 152. Imaging: Biological Light Microscopy—(Same as MCP 222.) Survey of instruments which use light and other radiation for analysis of cells in biological and medical research. Topics: basic light microscopy through confocal fluorescence and video/digital image processing. Lectures on physical principles; involves partial assembly and extensive use of lab instruments. Lab. Prerequisites: some college physics, Biological Sciences core. GER:DB-NatSci

3 units, Spr (Smith, S)

BIOSCI 153. Cellular Neuroscience: Cell Signaling and Behavior—(Same as PSYCH 120.) Neural interactions underlying behavior. Prerequisites: 1 or basic biology. GER:DB-NatSci
4 units, not given this year (*Wine, J*)

BIOSCI 154/254. Molecular and Cellular Neurobiology—(Same as NBIO 254.) For advanced undergraduates and graduate students. Cellular and molecular mechanisms in the organization and functions of the nervous system. Topics: wiring of the neuronal circuit, synapse structure and synaptic transmission, signal transduction in the nervous system, sensory systems, molecular basis of behavior including learning and memory, molecular pathogenesis of neurological diseases. Prerequisite for undergraduates: Biological Sciences core or equivalent, or consent of instructors. GER:DB-NatSci

4-5 units, *Aut (Luo, L; Shen, K; Clandinin, T; Dolmetsch, R),*
alternate years, not given next year

BIOSCI 157/257. Plant Biochemistry—The biochemistry of plants relevant to their physiology and cell biology. Topics include: the biosynthesis, assembly, function, and regulation of cell walls; lipids; pigments; photoreceptors; transporters; and the response of plants to pathogens and stresses. Prerequisite: Biological Sciences core or equivalent, or consent of instructors. GER:DB-NatSci

3-4 units, not given this year (*Mudgett, M*)

BIOSCI 158. Developmental Neurobiology—For advanced undergraduates and coterminal students. The principles of nervous system development from the molecular control of patterning, cell-cell interactions, and trophic factors to the level of neural systems and the role of experience in influencing brain structure and function. Topics: neural induction and patterning cell lineage, neurogenesis, neuronal migration, axonal pathfinding, synapse elimination, the role of activity, critical periods, and the development of behavior. Prerequisite: 42 or equivalent. GER:DB-NatSci

4 units, *Spr (McConnell, S; Shen, K; Garner, C),*
alternate years, not given next year

BIOSCI 159/259. Chromatin Biology in Health and Disease—Molecular principles of chromatin dynamics, such as modification and remodeling, in the regulation of nuclear functions, and the relationship of these activities to human diseases. Topics include the role of chromatin biology in gene expression, gene silencing, DNA damage responses and repair, DNA recombination, and epigenetics. The molecular mechanisms behind chromatin signaling networks, and their perturbations in disease processes. Students identify open questions in the field and design experimental strategies to address these issues. Prerequisite: Biological Sciences core. GER:DB-NatSci

4 units, *Spr (Gozani, O; Chua, K)*

BIOSCI 160. Developmental Biology—The principles of developmental biology. Focus is on the molecular mechanisms underlying the generation of diverse cell types and tissues during embryonic and post-embryonic development in animals. Prerequisite: Biological Sciences core. GER:DB-NatSci

4 units, not given this year (*Simon, M; McConnell, S*)

BIOSCI 162/262. Advanced Microbial Genetics and Genomics—(Same as GENE 262.) Genetic tools for studying the cell biology and behavior of bacteria. Case studies on genetic approaches in combination with biochemistry, microscopy, and genomics to study mechanisms of gene expression, signal transduction, cell cycle regulation, development, and pathogenesis. GER:DB-NatSci

4 units, *Spr (Burkholder, W; Tan, M)* alternate years, not given next year

BIOSCI 163/263. Neural Systems and Behavior—(Same as HUMBIO 163.) The field of neuroethology and its vertebrate and invertebrate model systems. Research-oriented. Readings include reviews and original papers. How animal brains compare; how neural circuits are adapted to species-typical behavior; and how the sensory worlds of different species represent the world. Prerequisites: BIOSCI 42, HUMBIO 4A, or equivalents. GER:DB-NatSci

4 units, alternate years, not given this year (*Fernald, R*)

BIOSCI 164/264. Biosphere-Atmosphere Interactions—Physiological, ecological, and physical aspects of ecosystem function, emphasizing how ecosystems influence and are influenced by the atmosphere. Prerequisites: 42, 43; or consent of instructor.

4 units, *Win (Field, C; Berry, J)*

BIOSCI 175. Tropical Ecology and Conservation—Field trip to a field station at Los Tuxtlas, Mexico; lectures at Stanford. How to address scientific questions concerning ecology and conservation. Field trip includes natural history observations and group research projects. Symposium based on project results. Recommended: 43, 101, and 141 or STATS 60.

5 units, *Spr (Dirzo, R)*

BIOSCI 180/280. Fundamentals of Sustainable Agriculture—(Same as EARTHSYS 180/280.) Ecological, economic, and social dimensions of sustainable agriculture in the context of a growing world population. Focus is on management and technological approaches, and historical content of agricultural growth and change, organic agriculture, soil and water resource management, nutrient and pest management, biotechnology, ecosystem services, and climate change. GER:DB-NatSci

3 units, *Spr (Naylor, R; Daily, G),* alternate years, not given next year

BIOSCI 183A/283A. Population Genetic Theory and Evolution I—Relationship between the theory of evolution and genetic variation. Selection in large populations, interaction between genes, quantitative inheritance, and gene-culture coevolution. GER:DB-NatSci

4 units, alternate years, not given this year (*Feldman, M*)

BIOSCI 183B/283B. Population Genetic Theory and Evolution II—Role of population size and random effects in evolution. Genomic data and how they are used to infer the processes of evolution. Introduction to population structure and expansion. Prerequisite: 183A/283A. GER:DB-NatSci

4 units, alternate years, not given this year (*Feldman, M*)

BIOSCI 184/284. Principles and Practice of Biosystematics—The principles and major operating procedures of systematic biology; the classification of organisms and of the relationships among them. Concepts and issues common to the study of all organisms; examples from particular groups of creatures. GER:DB-NatSci

4 units, not given this year

BIOSCI 188/288. Biochemistry I—(Same as CHEM 188, CHEMENG 188/288.) Chemistry of major families of biomolecules including proteins, nucleic acids, carbohydrates, lipids, and cofactors. Structural and mechanistic analysis of properties of proteins including molecular recognition, catalysis, signal transduction, membrane transport, and harvesting of energy from light. Molecular evolution. Pre- or corequisites: BIOSCI 41, CHEM 131, and CHEM 135 or CHEM 171. GER:DB-NatSci

3 units, *Aut (Kohler, J)*

BIOSCI 189/289. Biochemistry II—(Same as CHEM 189, CHEMENG 189/289.) Metabolism. Glycolysis, gluconeogenesis, citric acid cycle, oxidative phosphorylation, pentose phosphate pathway, glycogen metabolism, fatty acid metabolism, protein degradation and amino acid catabolism, protein translation and amino acid biosynthesis, nucleotide biosynthesis, DNA replication, recombination and repair, lipid and steroid biosynthesis. Medical consequences of impaired metabolism. Therapeutic intervention of metabolism. Prerequisite: 188/288. GER:DB-NatSci

3 units, *Win (Khosla, C)*

UNDERGRADUATE, INVOLVING INDIVIDUAL WORK

Students majoring in Biological Sciences are encouraged to pursue directed reading and research opportunities. An introduction to research is provided by BIOSCI 2.

BIOSCI 191. Research in Bird Biology—Semi-independent field research in ornithology emphasizing ecological relationships. Projects involve research, planned and carried out by the student in consultation with the instructor. Results are written in publication format. Enrollment limited. Prerequisites: 43, concurrent or subsequent enrollment in 139, and consent of instructor. GER:DB-NatSci

3 units, *Win, Spr (Ehrlich, P; Root, T)*

BIOSCI 193. Undergraduate Journal Club—Weekly discussion, led by students and facilitated by faculty, for reading scientific literature and presenting papers. Contact Tim Meier (gastrula@stanford.edu) by the fifth week of the previous quarter if requesting a particular research topic. Minimum enrollment required. Prerequisites: Biological Sciences core and consent of instructor. Recommended: 199 or 199X.

1 unit, Aut, Win, Spr (Meier, T)

BIOSCI 198. Directed Reading in Biological Sciences—Individually arranged under the supervision of members of the faculty.

1-15 units, Aut, Win, Spr, Sum (Staff)

BIOSCI 198X. Out-of-Department Directed Reading—Individually arranged under the supervision of members of the faculty. Credit for work arranged with out-of-department faculty is restricted to Biological Sciences majors and requires department approval. See <http://biohonors.stanford.edu> for information and petitions, or email gastrula@stanford.edu for more information.

1-15 units, Aut, Win, Spr, Sum (Staff)

BIOSCI 199. Advanced Research Laboratory in Experimental Biology—Individual research taken by arrangement with in-department instructors. See <http://biohonors.stanford.edu> for information on research sponsors, units, and credit for summer research, or email gastrula@stanford.edu.

1-15 units, Aut, Win, Spr, Sum (Staff)

BIOSCI 199X. Out-of-Department Advanced Research Laboratory in Experimental Biology—Individual research by arrangement with out-of-department instructors. Credit for 199X is restricted to declared Biological Sciences majors and requires department approval. See <http://biohonors.stanford.edu> for information on research sponsors, units, petitions, deadlines, credit for summer research, and out-of-Stanford research, or email gastrula@stanford.edu.

1-15 units, Aut, Win, Spr, Sum (Staff)

ADVANCED UNDERGRADUATE AND GRADUATE

BIOSCI 203. Advanced Genetics—(Same as DBIO 203, GENE 203.) For graduate students in Bioscience programs; may be appropriate for graduate students in other programs. The genetic toolbox. Examples of analytic methods, genetic manipulation, genome analysis, and human genetics. Emphasis is on use of genetic tools in dissecting complex biological pathways, developmental processes, and regulatory systems. Faculty-led discussion sections with evaluation of papers. Students with minimal experience in genetics should prepare by working out problems in college level textbooks.

4 units, Aut (Stearns, T; Barsh, G; Sidow, A; Kim, S)

BIOSCI 205. DNA Repair and Genomic Stability—Interactions of endogenous and environmental mutagens with cellular DNA. Cellular responses to damaged DNA including molecular mechanisms for DNA repair, translesion DNA synthesis, and genetic recombination. Inducible repair responses and error-prone mechanisms. Human hereditary diseases that predispose to cancer. Relationships of DNA repair to mutagenesis, carcinogenesis, aging, and human genetic disease. Current research literature. Prerequisites: 41 and 118, or consent of instructor.

3 units, Spr (Ford, J; Hanawalt, P)

BIOSCI 206. Field Studies in Earth Systems—(Same as EARTHSYS 189.) For advanced upper-division undergraduates and graduate students. Field-based, focusing on the components and processes by which terrestrial ecosystems function. Topics from biology, chemistry, ecology, geology, and soil science. Lecture, field, and lab studies emphasize standard field techniques, experimental design, analysis of data, and written and oral presentation. Small team projects test the original questions in the functioning of natural ecosystems. Admission by application; see *Time Schedule*. Prerequisites: BIOSCI 141 or GES 160, or equivalent.

5 units, Spr (Chiariello, N; Fendorf, S; Matson, P; Miller, E; Field, C; Dirzo, R), alternate years, not given next year

BIOSCI 207. Life and Death of Proteins—How proteins are made and degraded in the cell. Discussion of primary literature. Case studies follow the evolution of scientific ideas, and evaluate how different experimental approaches contribute to our understanding of a biological problem. Topics: protein folding and assembly, mechanisms of chaperone action, sorting into organelles and the ubiquitin-proteasome pathway. Enrollment limited to 20.

3 units, not given this year (Frydman, J)

BIOSCI 211. Biophysics of Sensory Transduction—Neural and aneural mechanisms that organisms have evolved to detect physical cues from the environment. Sensory topics: vision, hearing, taste, olfaction, chemoreception, mechanoreception, electromagnetic sensing, and other modalities. Emphasis is on common and/or emergent biophysical themes, such as sensitivity, amplification, encoding, adaptation, and the molecular basis of cellular signaling. Interdisciplinary aspects of biology and physics. Student presentations. Prerequisites: undergraduate physics, calculus, and basic biology.

4 units, not given this year (Block, S)

BIOSCI 213. Biology of Viruses—Principles of virus growth, genetics, architecture, and assembly. The relation of temperate viruses and other episomes to the host cell. Prerequisite: Biological Sciences core. Recommended: 118.

3 units, Win (Campbell, A)

BIOSCI 214. Cell Biology of Physiological Processes—(Same as BIOC 224.) Mechanisms of membrane and cellular biogenesis in relation to physiological processes. Emphasis is on regulatory and signaling mechanisms involved in coordinating complex cellular phenomena such as cellular organization, function, and differentiation. Topics: cellular compartmentalization, transport and trafficking of macromolecules, organelle biogenesis, cell division, motility and adhesion, and multicellularity. Prerequisites: Biological Sciences core. Open to graduate and medical students. Undergraduates may enroll with consent of instructor and prerequisites Biological Science core and Biochemistry 205.

2-5 units, Win (Theriot, J; Kopito, R; Straight, A; Nelson, W)

BIOSCI 215. Biochemical Evolution—Biochemical viewpoints on the evolutionary process. Topics: prebiotic biochemistry and the origins of life; adaptive organization of metabolism; enzyme polymorphisms and other biochemical aspects of population genetics; macromolecular phylogeny and protein clocks. Prerequisites: Biological Sciences core or substantial equivalent.

3 units, Win (Watt, W)

BIOSCI 216. Terrestrial Biogeochemistry—Nutrient cycling and the regulation of primary and secondary production in terrestrial, freshwater, and marine ecosystems; land-water and biosphere-atmosphere interactions; global element cycles and their regulation; human effects on biogeochemical cycles. Prerequisite: graduate standing in science or engineering; consent of instructor for undergraduates or coterminal students.

3 units, Spr (Vitousek, P) alternate years, not given next year

BIOSCI 217. Neuronal Biophysics—Biophysical descriptions and mechanisms of passive and excitable membranes, ion channels and pumps, action potential propagation, and synaptic transmission. Introduction to dynamics of single neurons and neuronal networks. Emphasis is on the experimental basis for modern research applications. Interdisciplinary aspects of biology and physics. Literature, problem sets, and student presentations. Prerequisites: undergraduate physics, calculus, and biology.

4 units, Spr (Schnitzer, M)

BIOSCI 221. Methods of Theoretical Population Biology—Formulation and analysis of problems in population biology using theoretical and computational numerical methods. Topics include deterministic and stochastic models, structured populations, stability and bifurcations, and data-driven models with applications in ecology and genetics. No auditors. Prerequisites: recent courses in advanced calculus and linear algebra.

4 units, Spr (Tuljapurkar, S)

BIOSCI 222. Exploring Neural Circuits—Seminar. The logic of how neural circuits control behavior; how neural circuits are assembled during development and modified by experience. Emphasis is on primary literature. Topics include: neurons as information processing units; simple and complex circuits underlying sensory information processing and motor control; and development and plasticity of neural circuits. Advanced undergraduates with background in physical science, engineering, and biological sciences may apply to enroll. Recommended: background in neuroscience.
3 units, Win (Luo, L)

BIOSCI 230. Molecular and Cellular Immunology—For graduate students and advanced undergraduates. Components of the immune system: structure and functions of antibody molecules; cellular basis of immunity and its regulation; molecular biology and biochemistry of antigen receptors and signaling pathways; genetic control of immunity and disease susceptibility. Emphasis is on key experimental approaches. Extra unit for discussion section on immunology literature. Prerequisite for undergraduates: Biological Sciences or Human Biology core, or consent of instructor.
4-5 units, Aut (Jones, P)

BIOSCI 258. Neural Development—For Ph.D. students. Seminar; students also attend BIOSCI 158 lectures. Topics: neural induction and patterning, cell lineage, neurogenesis, neuronal migration, axonal path-finding, synapse elimination, the role of activity, critical periods, and the development of behavior.
4 units, Spr (McConnell, S; Shen, K; Garner, C),
alternate years, not given next year

BIOSCI 261A. Advanced Topics in Behavioral Biology—Seminar. The biological roots of aggression, competition, cooperation, and altruism. Prerequisite: 150/250, and consent of instructor.
3 units, Aut (Sapolsky, R), alternate years, not given next year

BIOSCI 261B. Advanced Topics in Behavioral Biology—Seminar. The biological roots of aggression, competition, cooperation, and altruism. Prerequisite: 150/250, and consent of instructor.
3 units, Win (Sapolsky, R), alternate years, not given next year

BIOSCI 267. Molecular Mechanisms of Neurodegenerative Disease—(Same as NENS 267.) The epidemic of neurodegenerative disorders such as Alzheimer's and Parkinson's disease occasioned by an aging human population. Genetic, molecular, and cellular mechanisms. Clinical aspects through case presentations.
4 units, alternate years, not given this year (Kopito, R; Reimer, R; Wyss-Coray, A)

BIOSCI 290. Teaching of Biological Sciences—Open to upper-division undergraduates and graduate students. Practical experience in teaching lab biology or serving as an assistant in a lecture course. May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

BIOSCI 290X. Out-of-Department Teaching of Biological Science—May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (Staff)

BIOSCI 291. Development and Teaching of Core Experimental Laboratories—Preparation for teaching the core experimental courses (44X and 44Y). Emphasis is on lab, speaking, and writing skills. Focus is on updating the lab to meet the changing technical needs of the students. Must be taken prior to teaching either of the above courses. May be repeated for credit. Prerequisite: selection by instructor.
1-2 units, Aut, Win (Malladi, S)

PRIMARYLY FOR GRADUATE STUDENTS

BIOSCI 300. Graduate Research—For graduate students only. Individual research by arrangement with in-department instructors.
1-15 units, Aut, Win, Spr, Sum (Staff)

BIOSCI 300X. Out-of-Department Graduate Research—Individual research by arrangement with out-of-department instructors. Master's students: credit for work arranged with out-of-department instructors is restricted to Biological Sciences students and requires approved department petition. See <http://biohonors.stanford.edu> for information on research sponsors, units, petitions, deadlines, credit for summer research, and out-of-Stanford research, or email gastrula@stanford.edu. May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

BIOSCI 301. Frontiers in Biology—Limited to and required of first-year Ph.D. students in molecular, cellular, and developmental biology. Current research in molecular, cellular, and developmental biology emphasizing primary research literature. Held in conjunction with the department's Monday seminar series. Students and faculty meet weekly before the seminar for a student presentation and discussion of upcoming papers.
1-3 units, Aut, Win (Bergmann, D; Gozani, O)

BIOSCI 302. Current Topics and Concepts in Population Biology, Ecology, and Evolution—Required of first-year graduate students in population biology, and ecology and evolution; open to all graduate students. Major conceptual issues and developing topics.
1 unit, Aut (Feldman, M)

BIOSCI 303. Current Topics and Concepts in Population Biology, Ecology, and Evolution—Required of first-year graduate students in population biology, and ecology and evolution; open to all graduate students. Major conceptual issues and developing topics.
1 unit, Win (Vitousek, P; Ehrlich, P)

BIOSCI 304. Current Topics and Concepts in Population Biology, Ecology, and Evolution—Required of first-year graduate students in population biology, and ecology and evolution; open to all graduate students. Major conceptual issues and developing topics.
1 unit, Spr (Feldman, M)

BIOSCI 305. DNA Repair and Genetic Toxicology—Seminar. Literature review and discussion of current research, emphasizing experimental approaches for studying DNA damage processing in bacteria, yeast, and mammalian cells. Enrollment limited to graduate students and advanced undergraduate students doing research in this field. Prerequisite: consent of instructor.
1-3 units, Win, Spr (Hanawalt, P)

BIOSCI 306. Current Topics in Integrative Organismal Biology—Limited to and required of graduate students doing research in this field. At Hopkins Marine Station.
1 unit, Aut (Epel, D)

BIOSCI 312. Ethical Issues in Ecology and Evolutionary Biology—Focus is on ethical issues addressed in Donald Kennedy's *Academic Duty* and others of importance to academics and scientists in the fields of ecology, behavior, and evolutionary biology. Discussions led by faculty and outside guests. Satisfies ethics course requirement for ecology and evolutionary biology. Prerequisite: graduate standing in the ecology and evolutionary biology or marine program, or consent of instructor.
1 unit, Aut (Ehrlich, P)

BIOSCI 315. Seminar in Biochemical Evolution—Literature review and discussion of current topics in biochemical evolution and molecular evolutionary genetics. Prerequisite: consent of instructor.
1-3 units, Spr (Watt, W)

BIOSCI 325. The Evolution of Body Size—(Same as GES 325.) The influence of organism size on evolutionary and ecological patterns and processes. Focus is on integration of theoretical principles, observations of living organisms, and data from the fossil record. What are the physiological and ecological correlates of body size? Is there an optimum size? Do organisms tend to evolve to larger size? Does productivity control the size distribution of consumers? Does size affect the likelihood of extinction or speciation? How does size scale from the genome to the phenotype? How is metabolic rate involved in evolution of body size? What is the influence of geographic area on maximum body size?

2 units, Aut (Hadly, E; Payne, J)

BIOSCI 342. Plant Biology Seminar—Topics announced at the beginning of each quarter. Current literature. May be repeated for credit. See <http://carnegiedpb.stanford.edu/seminars/seminars.php>.

1-3 units, Aut, Win, Spr (Walbot, V)

BIOSCI 344. Advanced Seminar in Cellular Biology—Enrollment limited to graduate students directly associated with departmental research groups working in cell biology.

1 unit, Aut, Win, Spr (Burkholder, W; Cyert, M; Fang, G; Frydman, J; Kopto, R; Stearns, T)

BIOSCI 346. Advanced Seminar on Prokaryotic Molecular Biology—Enrollment limited to graduate students associated with departmental research groups in genetics or molecular biology.

1 unit, Aut, Win, Spr (Long, S; Campbell, A; Spormann, A; Grossman, A; Burkholder, W; Yanofsky, C),

BIOSCI 358. Advanced Topics in Biological Sciences—Restricted to doctoral and medical students in neurobiology labs. May be repeated for credit.

1-3 units, Aut, Win, Spr (McConnell, S; Baker, B; Luo, L; Shen, K; Fernald, R)

BIOSCI 383. Seminar in Population Genetics—Literature review, research, and current problems in the theory and practice of population genetics and molecular evolution. Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr (Feldman, M)

BIOSCI 384. Theoretical Ecology—Recent and classical research papers in ecology, and presentation of work in progress by participants. Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr (Roughgarden, J)

BIOSCI 385. Speaking About Science—Communication about science occurs in settings such as presenting scientific work to an audience of peers, communicating difficult concepts in a classroom, or describing a new finding to a reporter. Focus is on practice in speaking about science, emphasizing strategies for making difficult ideas easy to understand and integrating visual aids into oral presentations. Limited to Ph.D. students.

2 units, alternate years, not given this year (McConnell, S)

BIOSCI 388. Communication and Leadership Skills—(Same as IPER 210.) Focus is on delivering information to policy makers and the lay public. How to speak to the media, congress, and the general public; how to write op-eds and articles; how to package ideas including titles, abstracts, and CVs; how to survive peer review, the promotion process, and give a job talk; and how to be a responsible science advocate.

2 units, not given this year (Root, T)

BIOSCI 459. Frontiers in Interdisciplinary Biosciences—(Same as BIOC 459, BIOE 459, CHEMENG 459, CHEM 459, PSYCH 459.) (Cross-listed in departments in the schools of H&S, Engineering, and Medicine; students register through their affiliated department; otherwise register for CHEMENG 459.) For specialists and non-specialists. Sponsored by the Stanford BioX Program. Three seminars per quarter address scientific and technical themes related to interdisciplinary approaches in bioengineering, medicine, and the chemical, physical, and biological sciences. Leading investigators from Stanford and the world present breakthroughs and endeavors that cut across core disciplines. Pre-seminars introduce background for non-experts. Registered students attend all pre-seminars; others welcome. See <http://www.stanford.edu/group/biox/courses/459.html>. Recommended: basic mathematics, biology, chemistry, and physics.

1 unit, Aut, Win, Spr (Robertson, C)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the department's student services office for applicability of these courses to a major or minor program.

CEE 274A,B. Environmental Microbiology

3 units, A: Aut, Sum (Staff), B: Spr (Spormann, A)

DBIO 210. Developmental Biology

5 units, Spr (Staff)

S BIO 241. Biological Macromolecules—(Same as BIOC 241, BIOPHYS 241.)

3-5 units, Aut (Herschlag, D; Puglisi, J)

OVERSEAS STUDIES

These courses are approved for the Biological Sciences major and taught overseas at the campus indicated. Students should discuss with their major advisers which courses would best meet individual needs. Descriptions are in the "Overseas Studies" section of this bulletin, or at the Overseas Studies Office, 126 Sweet Hall.

AUSTRALIA

BIOSCI 109Z. Coral Reef Ecosystems—(Same as CEE 168X, EARTHSYS 120X, HUMBIO 111X.) Two units only counted for Biological Sciences major. GER:DB-EngrAppSci

3 units, Aut (Ward, S; Fine, M; Anthony, K)

BIOSCI 110Z. Coastal Resource Management—(Same as CEE 168Y, EARTHSYS 121X, HUMBIO 112X.) Two units only counted for Biological Sciences major. GER:DB-EngrAppSci

3 units, Aut (Johnstone, R; Chiffings, T)

BIOSCI 111Z. Coastal Forest Ecosystems—(Same as CEE 168Z, EARTHSYS 122X, HUMBIO 113X.) Two units only counted for Biological Sciences major. GER:DB-EngrAppSci

3 units, Aut (Pole, M; Duke, N)

DIVISION OF MARINE BIOLOGY HOPKINS MARINE STATION

Emeriti: (Professor) John H. Phillips, Jr.

Director: George N. Somero

Professors: Barbara A. Block, Mark W. Denny, David Epel, William F. Gilly, Stephen R. Palumbi, George N. Somero, Stuart H. Thompson

Assistant Professor: Fiorenza Micheli

Assistant Professor (Research): Anthony DeTomaso

Lecturer: James Watanabe

Station Offices: Oceanview Blvd., Pacific Grove, CA 93950

Phone: (831) 655-6200

Email: information@marine.stanford.edu

Web Site: <http://hopkins.stanford.edu>

Courses given in Marine Biology at the Hopkins Marine Station have the subject code BIOHOPK. For a complete list of subject codes, see Appendix.

The Hopkins Marine Station, located 90 miles from the main University campus in Pacific Grove, was founded in 1892 as the first marine laboratory on the west coast of North America. The modern laboratory facilities on the 11-acre campus on Cabrillo Point house ten faculty, all members of the Department of Biological Sciences. The Miller Library has a collection of literature in marine science. The Hopkins faculty offers undergraduate and graduate courses in biology which focus on the marine realm and involve topics including oceanography, environmental and comparative physiology, molecular evolution, biomechanics, cellular biology, conservation biology, and neurobiology and behavior. Most courses have laboratory sections that exploit the potential of working with readily available marine

plants and animals. Small class sizes encourage close student-faculty interactions. Undergraduates have opportunities to carry out research projects with Hopkins faculty during the academic year or summer months. Courses are offered in Winter, Spring, and Summer quarters.

COURSES

BIOHOPK 43. Plant Biology, Evolution, and Ecology—Introduction to biology in a marine context. Principles of plant biology: physiology, structure, diversity. Principles of evolution: macro and microevolution, population genetics. Ecology: the principles governing the distribution and abundance of organisms; population, community, and ecosystem ecology. Equivalent to BIOSCI 43. GER: DB-NatSci

5 units, Spr (Denny, M; Palumbi, S; Watanabe, J)

BIOHOPK 44Y. Core Experimental Laboratory—Laboratory and field projects provide working familiarity with the concepts, organisms, and techniques of plant and evolutionary biology, and ecology. Emphasis is on hands-on experimentation in the marine environment, analysis of data, and written and oral presentation of the experiments. Lab fee. Equivalent to BIOSCI 44Y. Corequisite: BIOHOPK 43. GER: DB-NatSci, WIM

5 units, Spr (Denny, M; Palumbi, S; Watanabe, J)

BIOHOPK 56H. History and Philosophy of Science—The nature of scientific inquiry, its logic, historical patterns, and sociology. Emphasis is on the unique aspects of the biological sciences.

2 units, Spr (Somero, G)

BIOHOPK 161H/261H. Invertebrate Zoology—(Graduate students register for 261H.) Survey of invertebrate diversity emphasizing form and function in a phylogenetic framework. Morphological diversity, life histories, physiology, and ecology of the major invertebrate groups, concentrating on local marine forms as examples. Current views on the phylogenetic relationships and evolution of the invertebrates. Lectures, lab, plus field trips. Prerequisite: Biological Sciences core or consent of instructor. GER: DB-NatSci

5 units, Win (Watanabe, J)

BIOHOPK 162H/262H. Comparative Animal Physiology—(Graduate students register for 262H.) How animals work. Topics: physiology of respiration, circulation, energy metabolism, thermal regulation, osmotic regulation, muscle physiology, and locomotion. Evolutionary and ecological physiology. Lectures, lab, and field research. An option to combine the course work with a more intensive research focus, with more units, is available. Prerequisite: Biological Sciences core or consent of instructor. GER: DB-NatSci

5-8 units, alternate years, not given this year (Block, B)

BIOHOPK 163H/263H. Oceanic Biology—(Graduate students register for 263H.) How the physics and chemistry of the oceanic environment affect marine plants and animals. Topics: seawater and ocean circulation, separation of light and nutrients in the two-layered ocean, oceanic food webs and trophic interactions, oceanic environments, biogeography, and global change. Lectures, discussion, and field trips. Recommended: PHYSICS 21 or 51, CHEM 31, Biological Sciences core, or consent of instructor. GER: DB-NatSci

4 units, Win (Denny, M; Somero, G)

BIOHOPK 164H/264H. Marine Botany—(Graduate students register for 264H.) Phytoplankton and oceanic productivity; macrophytes and nearshore ecology; marine angiosperms from taxonomical, physiological, and ecological perspectives. Lectures, lab. Prerequisite: Biological Sciences core or consent of instructor. GER: DB-NatSci

5 units, Win (Connor, J), alternate years, not given next year

BIOHOPK 166H/266H. Molecular Ecology—(Graduate students register for 266H.) How modern technologies in gene sequencing, detection of nuclear nucleotide polymorphisms, and other approaches are used to gather data on genetic variation that allow measurement of population structure, infer demographic histories, inform conservation efforts, and advance understanding of the ecology of diverse types of organisms. GER: DB-NatSci

5 units, Win (Palumbi, S)

BIOHOPK 167H/267H. Nerve, Muscle, and Synapse—(Graduate students register for 267H.) Fundamental aspects of membrane excitability, nerve conduction, synaptic transmission, and excitation-contraction coupling. Emphasis is on biophysical, molecular, and cellular level analyses of these processes in vertebrate and invertebrate systems. Labs on intra- and extracellular recording and patch clamp techniques. Lectures, discussions, and labs. Prerequisites: PHYSICS 23, 28, 43, or equivalent; CHEM 31, 135; calculus; or consent of instructor. GER: DB-NatSci

5 units, Spr (Gilly, W)

BIOHOPK 168H/268H. Marine Pollution—(Graduate students register for 268H.) Major pollutants in marine organisms; how they are affected and how they cope.

2 units, Spr (Epel, D)

BIOHOPK 169H/269H. Neurobiology and Behavior—(Graduate students register for 269H.) The neural mechanism responsible for generating animal behavior. Topics: sensory ecology, neuronal excitability, synaptic plasticity, and neural circuits. Lectures, discussions, demonstrations, and lab. Prerequisite: Biological Sciences core or consent of instructor. GER: DB-NatSci

5 units, Win (Thompson, S)

BIOHOPK 170H/270H. Topics in Marine Biology—(Graduate students register for 270H.) Primary literature. Prerequisite: Biological Sciences core or consent of instructor. May be repeated for credit.

1 unit, Win (Staff)

BIOHOPK 171H/271H. Ecological and Evolutionary Physiology—(Graduate students register for 271H.) The interplay between environmental factors, such as temperature, light, nutrient supply, salinity, and oxygen availability, and adaptive change at the physiological level. Emphasis is on marine species and the roles played by physiological adaptations in establishing their distribution and performance. Prerequisite: Biological Sciences core or consent of instructor. GER: DB-NatSci

4 units, Win (Somero, G)

BIOHOPK 172H/272H. Marine Ecology—(Graduate students register for 272H.) Introduction to the principles of ecology as applied to life in the sea. Population dynamics, community ecology, and the effects of man on the oceans. Lectures, lab. Prerequisite: Biological Sciences core or consent of instructor. GER: DB-NatSci

5 units, Win (Micheli, F)

BIOHOPK 173H/273H. Marine Conservation Biology—(Graduate students register for 273H.) The science of preserving marine diversity. Goal is to introduce students to major conservation issues associated with marine ecosystems. Topics include decline of open ocean fisheries, salmon conservation, bycatch issues in fisheries, use of marine reserves, marine invasions, marine pollution, and global warming. Includes five lecturers from other universities who specialize in marine conservation.

1-3 units, alternate years, not given this year (Block, B)

BIOHOPK 174H/274H. Experimental Design and Probability—(Graduate students register for 274H.) Variability is an integral part of biology. Introduction to probability and its use in designing experiments to address biological problems. Focus is on analysis of variance, when and how to use it, why it works, and how to interpret the results. Design of complex, but practical, asymmetrical experiments and environmental impact studies, and regression and analysis of covariance. Computer-based data analysis. Prerequisite: Biological Sciences core or consent of instructor. GER: DB-NatSci, WIM

3 units, Spr (Watanabe, J)

BIOHOPK 175H. Problems in Marine Ecology and Ecophysiology—Field-based, emphasizing individual and small group research for advanced undergraduates. Students learn field and laboratory techniques to address ecological, ecophysiological, and biomechanical problems faced by marine organisms. Original research projects may be integrated with ongoing research programs in the Hopkins Marine Life refuge. Prerequisites: Biological Sciences core, consent of instructor. GER: DB-NatSci, WIM

10 units, Spr (Somero, G; Epel, D)

BIOHOPK 176H. Experimental Neurobiology—Lab, emphasizing methods in the neurosciences, including electrophysiological, biochemical, molecular, behavioral, and histological techniques. Students work on individual original research projects under guidance of the faculty. Prerequisites: strong interest in neurobiology and previous relevant course work, consent of instructors. GER: DB-NatSci, WIM
6-12 units, Spr (Thompson, S)

BIOHOPK 178H/278H. Polar Biology—(Graduate students register for 278H.) Seminar. The deep sea is the largest, least understood fraction of the biosphere. Organisms living here possess diverse adaptations to allow life under high pressure. Recent discoveries in deep-sea biology including the biology of the hydrothermal vents, and the technology that makes these advances possible. Prerequisites: Biological Sciences core, consent of instructor.
2 units, Spr (Somero, G)

BIOHOPK 182H/323H. Stanford at Sea—(Graduate students register for 323H; same as EARTHSYS 323, GES 323.) Five weeks of marine science including oceanography, marine physiology, policy, maritime studies, conservation, and nautical science at Hopkins Marine Station, followed by five weeks at sea aboard a sailing research vessel in the Pacific Ocean. Shore component comprised of three multidisciplinary courses meeting daily and continuing aboard ship. Students develop an independent research project plan while ashore, and carry out the research at sea. In collaboration with the Sea Education Association of Woods Hole, MA. Only 6 units may count towards the BioSci major. GER: DB-NatSci
16 units, Spr (Block, B; Dunbar, R; Micheli, F), alternate years, not given next year

BIOHOPK 184H/284H. Holistic Biology: Monterey Bay and the Sea of Cortez—(Graduate students register for 284H.) For majors and non-majors. Complexity in natural systems from complementary points of view, including scientific, historical, philosophical, and literary. The work and writings of Ed Ricketts and John Steinbeck and historical and contemporary works concerning marine ecology and fisheries. Field work, laboratory studies with living invertebrates, and an individual research project. Course includes a component in Baja California, Mexico. Only 6 units may count towards the BioSci major. GER: DB-NatSci
16 units, alternate years, not given this year (Gilly, W)

BIOHOPK 186H/286H. Ocean Pollution: Land, Air, and Sea Interactions—(Graduate students register for 286H.) The scientific basis of environmental pollution; how organisms protect themselves against toxicants; how protection can be overcome; policy issues in government regulation of pollution.
3 units, Win (Epel, D)

BIOHOPK 198H. Directed Instruction or Reading—May be taken as a prelude to research and may also involve participation in a lab or research group seminar and/or library research. Credit for work arranged with out-of-department instructors restricted to Biological Sciences majors and requires department approval.
1-15 units, Aut, Win, Spr, Sum (Staff)

BIOHOPK 199H. Undergraduate Research—Qualified undergraduates undertake individual work in the fields listed under 300H. Arrangements must be made by consultation or correspondence.
1-15 units, Aut, Win, Spr, Sum (Staff)

BIOHOPK 290H. Teaching of Biological Science—Open to upper-division undergraduates and graduate students. Experience in teaching lab biology or serving as a lecture course assistant. Prerequisite: consent of instructor.
1-15 units, Win, Spr, Sum (Staff)

BIOHOPK 300H. Research—Graduate study involving original work undertaken with staff in the fields indicated:
B. Block: Comparative Vertebrate Physiology—biomechanics, metabolic physiology and phylogeny of pelagic fishes, evolution of endothermy.
M. Denny: Biomechanics—the mechanical properties of biological materials and their consequences for animal size, shape, and performance.
A. De Tomaso: Developmental and Comparative Immunology, Stem Cell Biology—evolution of self/non-self recognition systems.

D. Epel: Developmental Biology—physiology and regulation of early embryonic development. Embryonic adaptation to environmental stress.

W. Gilly: Neurobiology—analysis of giant axon systems in marine invertebrates from molecular to behavioral levels.

F. Micheli: Marine Ecology—species interactions and community ecology, scale-dependent aspects of community organization, marine conservation and design of multi-species marine protected areas, behavioral ecology.

S. Palumbi: Molecular Evolution—mechanisms of speciation, genetic differentiations of populations, use of molecular tools in conservation biology, design of marine protected areas.

G. Somero: Ecological and Evolutionary Physiology—adaptations of marine organisms to the environment: temperature, pressure, desiccation, and oxygen availability.

S. Thompson: Neurobiology—neuronal control of behavior and mechanisms of ion permeation, signal transduction, calcium homeostasis, and neurotransmission.

J. Watanabe: Marine Ecology—kelp forest ecology and invertebrate zoology.

1-15 units, Aut, Win, Spr, Sum (Staff)

SUMMER PROGRAM

The summer program is open to advanced undergraduate, graduate students, and postdoctoral students, and to teachers whose biological backgrounds, teaching, or research activities can benefit from a summer's study of marine life. Applications and further information may be obtained by writing to Hopkins Marine Station, Pacific Grove, CA 93950. Completed applications should be submitted by April 15. Applications received later are considered if space is still available.

Summer Quarter is divided into two terms. It is possible to register for either term, or for the full quarter. Registration is possible for only one course during each term.

FIRST TERM

BIOHOPK 179H/279H. Subtidal Communities—(Graduate students register for 279H.) Lectures, lab, and field trips treating shallow water marine communities. Emphasis is on local habitats and the introduction of physical environmental parameters, community composition, aspects of the biology of constituent species, and methods for subtidal studies. Prerequisites: scuba certification, scuba equipment, ocean diving experience, and some background in biology. GER: DB-NatSci
6 units, Sum (Watanabe, J)

BIOHOPK 274. Hopkins Microbiology Course—(Same as BIOSCI 274S, CEE 274S, GES 274S.) Four-week, intensive. The interplay among molecular, physiological, ecological, evolutionary and geochemical processes that constitute, cause, and maintain microbial diversity. How to isolate key microorganisms driving marine biological and geochemical diversity, interpret culture-independent molecular characterization of microbial species, and predict causes and consequences. Laboratory component: what constitutes physiological and metabolic microbial diversity; how evolutionary and ecological processes diversify individual cells into physiologically heterogeneous populations; and the principles of interactions between individuals, their population, and other biological entities in a dynamically changing microbial ecosystem. Prerequisites: CEE 274A,B, or equivalents.
9-12 units, Sum (Spormann, A; Francis, C)

BIOHOPK 277H. Biomechanics, Ecological Physiology, and Genetics of Intertidal Communities—Introduction to the mechanical and physiological design of wave-swept organisms. How different abiotic stresses (wave exposure, wind speed, temperature, light) influence marine animals and plants, and adaptive responses to these stresses. Lab introduces methods for measuring environmental stress and organismal responses. Recommended: background in algology, intertidal ecology, or invertebrate zoology; basic physics and calculus.

4 units, Sum (Denny, M; Somero, G; Palumbi, S)
alternate years, not given next year

SECOND TERM

BIOHOPK 180H/280H. Problems in Subtidal Ecology—(Graduate students register for 280H.) Group and individual research projects focus on shallow water marine communities. Daily lectures, SCUBA dives, labs. Prerequisites: SCUBA certification; advanced or comparable experience, or 179H. GER: DB-NatSci
6 units, Sum (Watanabe, J)

BIOPHYSICS PROGRAM

Emeritus: Harden M. McConnell (Chemistry)

Director: William I. Weis

Professors: Russ Altman (Genetics, Medical Informatics), Steve Block (Applied Physics, Biological Sciences), Steven Boxer (Chemistry), Axel Brunger (Molecular and Cellular Physiology), Douglas Brutlag (Biochemistry), Gilbert Chu (Oncology), Mark Davis (Microbiology and Immunology), Sebastian Doniach (Physics, Applied Physics), James Ferrell (Molecular Pharmacology), Gary Glover (Radiology), Philip C. Hanawalt (Biological Sciences), Daniel Herschlag (Biochemistry), Keith O. Hodgson (Chemistry), Chaitan Khosla (Chemical Engineering, Chemistry), Brian Kobilka (Molecular and Cellular Physiology), Eric Kool (Chemistry), Ron Kopito (Biological Sciences), Roger D. Kornberg (Structural Biology), Michael Levitt (Structural Biology), Richard Lewis (Molecular and Cellular Physiology), David B. McKay (Structural Biology), Uel J. McMahan (Neurobiology), Tobias Meyer (Molecular Pharmacology), W. E. Moerner (Chemistry), Norbert Pelc (Bioengineering, Radiology), Joseph D. Puglisi (Structural Biology), Stephen Quake (Bioengineering), Stephen J. Smith (Molecular and Cellular Physiology), Edward I. Solomon (Chemistry), James A. Spudich (Biochemistry, Developmental Biology), William I. Weis (Structural Biology), Richard N. Zare (Chemistry)

Associate Professors: Judith Frydman (Biological Sciences), K. Christopher Garcia (Microbiology and Immunology, Structural Biology), Pehr Harbury (Biochemistry), Craig Levin (Radiology), Vijay Pande (Chemistry), Julie Theriot (Biochemistry)

Assistant Professors: Xiaoyuan Chen (Radiology), Jennifer Cochran (Bioengineering), Miriam Goodman (Molecular and Cellular Physiology), Merritt Maduke (Molecular and Cellular Physiology), Jianghong Rao (Radiology), Mark Schnitzer (Biological Sciences, Applied Physics)

Program Offices: Fairchild Building D118

Mail Code: 94305-5126

Phone: (650) 723-7576

Email: biophysics@med.stanford.edu

Web Site: <http://med.stanford.edu/biophysics/>

Courses given in Biophysics have the subject code BIOPHYS. For a complete list of subject codes, see Appendix.

The Biophysics Program offers instruction and research opportunities leading to the Ph.D. in Biophysics. Students admitted to the program may perform their graduate research in any appropriate department.

GRADUATE PROGRAM

For information on the University's basic requirements for the Ph.D. degree, see the "Graduate Degrees" section of this bulletin.

A small number of qualified applicants are admitted to the program each year. Applicants should present strong undergraduate backgrounds in the physical sciences and mathematics. The graduate course program, beyond the stated requirements, is worked out for each student individually with the help of appropriate advisers from the Committee on Biophysics. The requirements and recommendations for the Ph.D. degree include:

1. Training in physics or chemistry equivalent to that of an undergraduate physics or chemistry major at Stanford.
2. Completion of the following background courses or their equivalents at other institutions:

a) CHEM 131, 171, 173, and 175

b) BIOC 200, 201

3. Completion of the following courses or their equivalents:

a) SBIO 241 and 242

b) at least four additional graduate level courses in physical or biological science

c) BIOPHYS 250

d) MED 255

4. Opportunities for teaching are available during the first nine quarters, at the discretion of the advising committee.

5. The student must prepare a dissertation proposal defining the research to be undertaken, including methods of procedure. This proposal should be submitted by Winter Quarter of the third year, and it must be approved by a committee of at least three members including the principal research adviser and at least one member from the Biophysics Program. The candidate must defend the dissertation proposal in an oral examination. The dissertation reading committee normally evolves from the dissertation proposal review committee.

6. The student must present a Ph.D. dissertation as the result of independent investigation and expressing a contribution to knowledge in the field of biophysics.

7. The student must pass the University oral exam, taken only after the student has substantially completed the research. The examination is preceded by a public seminar in which the research is presented by the candidate.

COURSES

BIOPHYS 227. Functional MRI Methods—(Same as RAD 227.)

Basics of functional magnetic resonance neuroimaging, including data acquisition, analysis, and experimental design. Journal club sections. Cognitive neuroscience and clinical applications. Prerequisites: basic physics, mathematics. Recommended: neuroscience.

3 units, Win (Glover, G)

BIOPHYS 228. Computational Structural Biology—(Same as SBIO

228.) Interatomic forces and interactions such as electrostatics and hydrophobicity, and protein structure in terms of amino acid properties, local chain conformation, secondary structure, domains, and families of folds. How protein motion can be simulated. Bioinformatics introduced in terms of methods that compare proteins via their amino acid sequences and their three-dimensional structures. Structure prediction via simple comparative modeling. How to detect and model remote homologues. Predicting the structure of a protein from knowledge of its amino acid sequence. Via internet.

3 units, Aut, Spr (Levitt, M)

BIOPHYS 232. Advanced Imaging Lab in Biophysics—(Same as

BIOSCI 232, MCP 232.) Laboratory and lectures. Microscopy, emphasizing hands-on experience with a range of apparatus and techniques. Topics include microscope optics, Koehler illumination, contrast-generating mechanisms (bright/dark field, fluorescence, phase contrast, differential interference contrast), and resolution limits. Advanced topics vary by year, but include single-molecule fluorescence, fluorescence resonance energy transfer, confocal microscopy, two-photon microscopy, optical trapping, and fiber optic methods. Limited enrollment. Recommended: basic physics, Biological Sciences core or equivalent, and consent of instructor.

4 units, Spr (Block, S; Schnitzer, M; Smith, S; Stearns, T)

BIOPHYS 241. Biological Macromolecules—(Same as BIOC 241,

SBIO 241.) The physical and chemical basis of macromolecular function. The forces that stabilize biopolymers with three-dimensional structures and their functional implications. Thermodynamics, molecular forces, and kinetics of enzymatic and diffusional processes, and relationship to their practical application in experimental design and interpretation. Biological function and the level of individual molecular interactions and at the level of complex processes. Case studies. Prerequisites: introductory Biochemistry and Physical Chemistry or permission of instructor.

3-5 units, Aut (Herschlag, D; Puglisi, J; McKay, D; Garcia, K.C.; Ferrell, J; Block, S; Pande, V; Weis, W)

BIOPHYS 242. Methods in Molecular Biophysics—(Same as SBIO 242.) The potential utility of physical approaches to research, and how to evaluate literature that incorporates these methods. Experimental methods in molecular biophysics from theoretical and practical standpoints. Emphasis on x-ray diffraction and nuclear magnetic resonance spectroscopy. Additional topics include fluorescence spectroscopy, circular dichroism, calorimetry, and separation methods. Prerequisite: Physical Chemistry or permission of instructor.

3 units, Win (Weis, W; Puglisi, J)

BIOPHYS 250. Seminar in Biophysics—Required of Biophysics graduate students. Presentation of current research projects and results by faculty in the Biophysics program. May be repeated for credit.

1 unit, Aut, Win (Weis, W)

BIOPHYS 297. Bio-Inorganic Chemistry—(Same as CHEM 297.) Overview of metal sites in biology. Metalloproteins as elaborated inorganic complexes, their basic coordination chemistry and bonding, unique features of the protein ligand, and the physical methods used to study active sites. Active site structures are correlated with function. Prerequisites: 153 and 173, or equivalents.

3 units, not given this year

BIOPHYS 300. Graduate Research—Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

BIOPHYS 399. Directed Reading—Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

BIOSCI 205. DNA Repair and Genomic Stability

3 units, Spr (Hanawalt, P; Ford, J)

ECON 126. Economics of Health and Medical Care—(Same as BIOMEDIN 156/256.)

5 units, Aut (Bhattacharya, J)

MCP 256. How Cells Work: Energetics, Compartments, and Coupling in Cell Biology

4 units, Spr (Maduke, M; Lewis, R)

CHEMISTRY*

Emeriti: (Professors) William A. Bonner, James P. Collman, Carl Djerassi, Harden M. McConnell, John Ross, Douglas A. Skoog, Eugene E. van Tamelen

Chair: Richard N. Zare

Vice Chair: Wray H. Huestis

Professors: Hans C. Andersen, Steven G. Boxer, John I. Brauman, Hongjie Dai, Michael D. Fayer, Keith O. Hodgson, Wray H. Huestis, Chaitan Khosla, Eric T. Kool, W. E. Moerner, Robert Pecora, Edward I. Solomon, Barry M. Trost, Robert M. Waymouth, Paul A. Wender, Richard N. Zare

Associate Professors: Christopher E. D. Chidsey, Justin Du Bois, Vijay S. Pande, T. Daniel P. Stack

Assistant Professors: Jennifer J. Kohler, Dmitry V. Yandulov

Lecturers: John A. Flygare, Hilary Hua, Christopher R. Moylan

Courtesy Professors: Stacey F. Bent, Curtis W. Frank, Daniel Herschlag
Courtesy Assistant Professors: James K. Chen, Karlene A. Cimprich, Thomas J. Wandless

Director of Undergraduate Laboratories: Christopher R. Moylan

* The curriculum leading to the B.S. degree in Chemical Engineering is described in the "School of Engineering" section of this bulletin.

Department Offices: 121 S. G. Mudd

Mail Code: 94305-5080

Phone: (650) 723-2501

Web Site: <http://www.stanford.edu/dept/chemistry/>

Courses given in Chemistry have the subject code CHEM. For a complete list of subject codes, see Appendix.

Chemistry is central to many scientific disciplines and plays an important role in the emerging areas of biotechnology and material science. Fluorescent imaging of biological molecules, modeling of protein folding, manipulation of carbon nanotubes, development of new oxidation and polymerization catalysts, and synthesis of organic molecules for probing ion-channels are all research areas that are pursued actively in the Chemistry department. The overarching theme of these pursuits is a focus at the atomic and molecular levels, whether this concerns probing the reactivity of molecules as small as dihydrogen or synthesizing large polymer assemblies. The ability to synthesize new molecules and materials and to modify existing structures allows the exploration of properties of well-defined systems through systematic modification. The Chemistry department has a long-standing tradition of encouraging undergraduate majors to become involved in research during the academic year and through the 10-week Bing Summer Research Program.

UNDERGRADUATE PROGRAMS

BACHELOR OF SCIENCE

Entrance Preparation—Entrance credit in the preparatory subjects of chemistry, physics, and especially mathematics provides flexibility in creating a four-year schedule for students intending to major in Chemistry.

Minimum Requirements—

Chemistry option: University Writing and General Education Requirements; CHEM 31A and B or 31X, 33, 35, 36, 130, 131, 134, 136, 151, 153, 171, 173, 174, 175, 176; MATH 41, 42, 51, 53, or CME 100, 102, 104; PHYSICS 41, 43, 44, 45, 46.

Biological chemistry option: University Writing and General Education Requirements; CHEM 31A and B or 31X, 33, 35, 36, 130, 131, 134, 136, 151, 171, 173, 176, 184, 185, 188, 189; BIOSCI 41, 42, 44X; MATH 41, 42, 51, 53, or CME 100, 102, 104; PHYSICS 41, 43.

In addition, CS 106A and B are recommended for students planning graduate study. All degree courses must be taken for a letter grade. For further information on the undergraduate program, see <http://www.stanford.edu/dept/chemistry/undergrad/>.

TYPICAL SCHEDULE FOR A FOUR-YEAR PROGRAM**FIRST YEAR**

Subject and Catalog Number	Qtr. and Units		
	A	W	S
CHEM 31X. Chemical Principles	4		
CHEM 33. Structure and Reactivity		4	
CHEM 35. Organic Monofunctional Compounds			4
CHEM 36. Organic Chemistry Laboratory I			3
MATH 41, 42, 51. Calculus, Linear Equations	5	5	5

SECOND YEAR

CHEM 130. Organic Chemistry Laboratory II	4		
CHEM 131. Organic Polyfunctional Compounds	3		
CHEM 134. Analytical Chemistry Laboratory			5
CHEM 136. Synthesis Laboratory		3	
MATH 53. Differential Equations			5
PHYSICS 41, 43, 44. Mechanics, Electricity and Magnetism	4	5	

THIRD AND FOURTH YEARS

CHEM 151, 153. Inorganic Chemistry		3	3
CHEM 171, 173, 175. Physical Chemistry	3	3	3
CHEM 174, 176. Physical Chemistry Laboratory		4	3
PHYSICS 45, 46. Light and Heat	5		

* Elective courses must be used to complete the University Writing, General Education, and Language Requirements. They may also be used to broaden one's background in science and nonscience areas and to provide an opportunity for advanced study in Chemistry. Courses offered by other departments that may be of interest to Chemistry majors include BIOSCI 41, 42, 43; CHEMENG 20, 120A,B, 130; CS 106A,B; ECON 1; ENGR 50; MATH 52, 106, 109, 113, 131; MATSCI 50; PHYSICS 110; STATS 60, 110, 116.

MINORS

Courses required for a minor are CHEM 33, 35, 36, 130, 131, 134, 151, 171; MATH 51; and PHYSICS 21, 23, 25, or 28, 29, or 41, 43, 45 (no substitutions). All courses must be taken for a letter grade.

AMERICAN CHEMICAL SOCIETY CERTIFICATION

Students who wish to be certified as having met the minimum requirements of the American Chemical Society for professional training must complete, in addition to the above requirements, CHEM 188 and 189, and 6 units of CHEM 190.

HONORS PROGRAM

A B.S. degree in Chemistry with honors is available to those students interested in chemical research. Admission to the honors program requires a scientific grade point average (GPA) of 3.3 and an overall GPA of 3.0 in all University courses. Beyond the standard B.S. course requirements for each track, 9 units of CHEM 190 research credit, 9 units of course work need to be completed during the junior and senior academic years. For students graduating after 2006-07, a thesis, approved by a Chemistry research adviser, needs to be completed during the senior year. The use of a single course for multiple requirements for honors, major, minor, or coterminal requirements is not allowed. Students who wish to be admitted to the honors program should register in the department student services office in the Mudd Chemistry building.

CHEM 190 research units towards honors may be completed, once accepted into the program, in any laboratory within Chemistry or with courtesy faculty in Chemistry. Other chemical research can be approved through a formal petitioning of the undergraduate studies committee. At least 3 units of CHEM 190 must be completed during the senior year. Participation in a summer research program in an academic setting between junior and senior years may be used in lieu of 3 units of CHEM 190. For each quarter, a progress report reflecting the units undertaken is required. This report must be signed by the Chemistry faculty adviser and filed in the department student services office in Mudd Chemistry before the last day of finals in the quarter during which the research is performed.

The 9 units of course work must be completed from courses approved by the undergraduate studies committee. At least six of these units need to be taken from following CHEM courses: 153, 174, 175, 188, 189, 221, 223, 225, 235, 251, 253, 255, 271, 273, 275, 297. Courses from Mathematics (MATH 114 or higher), Physics (PHYSICS 100 or higher), Engineering,

and Structural Biology or Biochemistry in the School of Medicine can be used to fulfill this requirement.

TEACHING CREDENTIALS

The requirements for certification to teach chemistry in the secondary schools of California may be ascertained by consulting the section on credentials under the "School of Education" section of this bulletin and the Credential Administrator of the School of Education.

GRADUATE PROGRAMS

The University's basic requirements for the M.S., M.A.T., and Ph.D. degrees are discussed in the "Graduate Degrees" section of this bulletin.

GENERAL REQUIREMENTS

Placement Examinations—Each new graduate student must take placement examinations on entrance. These consist of three written examinations of two hours each in the fields of inorganic, organic, and physical chemistry, and cover such material as ordinarily is given in a rigorous one-year undergraduate course in each of these subjects. Students majoring in biophysical chemistry or chemical physics must take examinations in biophysical or chemical physics, physical chemistry, and organic or inorganic chemistry. All placement examinations are given the week before instruction begins in Autumn Quarter, and must be taken at that time. Each new graduate student meets with a member of the graduate study committee to define a program of courses based on results of the placement examinations.

Candidates for advanced degrees must have a minimum grade point average (GPA) of 3.0 for all Chemistry lecture courses as well as for all courses taken during graduate study. Required courses must be taken for a letter grade. Most course work ends in the second year of studies and students will then focus on full-time dissertation research. All prospective Ph.D. candidates, regardless of the source of financial support, are required to gain teaching experience as an integral part of graduate training. During the period in which a dissertation is being read by members of the faculty, candidates must be available for personal consultation until the dissertation has had final department approval.

MASTER OF SCIENCE

The Master of Science is available only to current Ph.D. students or as part of a coterm program. Applicants for the M.S. degree in Chemistry are required to complete, in addition to the requirements for the bachelor's degree, a minimum of 45 units of work and a M.S. thesis. Of the 45 units, approximately two-thirds must be in the department and must include at least 12 units of graduate-level lecture courses exclusive of the thesis. Of the 12 units, at least 6 units must be from CHEM 221, 223, 225, 235, 251, 253, 255, 271, 273, 275, 276, or 297.

DOCTOR OF PHILOSOPHY

Graduate students are eligible to become formal candidates for the Ph.D. degree after taking the department placement examinations, satisfactorily completing most of the formal lecture course requirements, and beginning satisfactory progress on a dissertation research project. They then file for admission to candidacy for the Ph.D. degree. This filing must be done before June of the second year of graduate registration.

After taking the departmental placement examinations, students select research advisers by first interviewing members of the Chemistry faculty about their research. Students then file an Application to Start Research form with the Department of Chemistry graduate study committee and begin research on their Ph.D. dissertation under the supervision of the adviser. All students in good standing are required to start research by the end of the Winter Quarter of the first year of graduate registration.

There is no foreign language requirement for the Ph.D. degree.

Candidates for the Ph.D. degree are required to participate continually in the department colloquium (CHEM 300), and in the division seminar of the major subject. In addition, continuous enrollment in CHEM 301 is expected after the student has chosen a research supervisor. As part of graduate training, Ph.D. candidates are required to gain experience as teaching assistants.

Before candidates may request scheduling of the University oral examination, clearance must be obtained from the major professor and the chair of the department's Graduate Study Committee. Conditions that must be fulfilled before clearance is granted vary with the different divisions of the department and may be ascertained by consulting the chair of the committee.

It is the policy of the department to encourage and support in every possible way the pursuit of research and other advanced work by qualified students. Information about faculty members with lists of their recent research publications is found in *Chemistry at Stanford*, the *Directory of Graduate Research* published by the American Chemical Society, and at <http://www.stanford.edu/dept/chemistry/faculty.html>.

COURSE REQUIREMENTS

Students may major in biophysical, inorganic, organic, or physical chemistry. All graduate students are required to take six graduate-level lecture courses (course numbers greater than 199) of at least 3 units each in chemistry or related disciplines (for example, biochemistry, electrical engineering, mathematics, pharmacology, physics, and so on), to be selected in consultation with their research adviser and the Graduate Study Committee. At least four of these courses should be taken by the end of the first year. Required courses must be taken for a letter grade.

In addition, students majoring in organic chemistry must take 3 units of CHEM 231 in the second year and 3 units of 233 in the second and third year. Students in physical or biophysical chemistry or chemical physics must take CHEM 271, 273, and 275 in the first year, and 2 units of CHEM 278 in the second and third year. Students majoring in inorganic chemistry must take 3 units of CHEM 258 in the second, third, and fourth year.

CHEMICAL PHYSICS

Students with an exceptionally strong background in physics and mathematics may, upon special arrangement, pursue a program of studies in chemical physics.

PH.D. MINOR

Candidates for the Ph.D. degree in other departments who wish to obtain a minor in chemistry must complete, with a GPA of 3.0 or higher, 20 graduate-level units in Chemistry including four lecture courses of at least 3 units each.

FELLOWSHIPS AND SCHOLARSHIPS

In addition to school fellowships and scholarships open to properly qualified students, there are several department fellowships in chemistry. Undergraduate scholarships are administered through the Financial Aid Office. Teaching assistantships and research assistantships are open to graduate students. Graduate fellowships, scholarships, and teaching assistantships are administered through the Department of Chemistry.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Note—Lab fees are a minimum of \$75 per quarter and are not refundable.

UNDERGRADUATE

CHEM 22N. Naturally Dangerous—Stanford Introductory Seminar. Preference to freshmen. Topics from Collman's *Naturally Dangerous: Surprising Facts About Food, Health, and the Environment*. Designed for nonscientists, but also of interest to scientists and engineers.

2 units, Aut, Spr (Collman, J)

CHEM 24N. Nutrition and History—Stanford Introductory Seminar. Preference to freshmen. Intended to broaden the introductory chemistry experience. The biochemical basis of historically important nutritional deficiencies (vitamins, minerals, starvation, metabolic variants that predispose to disease) and environmental toxins is related to physiological action and the sociological, political, and economic consequences of its effect on human populations. Prerequisite: high school chemistry. Recommended: 31A,B, or 31X, or 33.

2 units, Spr (Huestis, W)

CHEM 25N. Science in the News—Stanford Introductory Seminar. Preference to freshmen. Possible topics include: diseases such as avian flu, HIV, SARS, and malaria; environmental issues such as climate change, and atmospheric pollution, and human population; evolution; stem cell research; nanotechnology; and drug development. The scientific basis for these topics to have an intelligent discussion of societal and political implications. Sources include the popular media and scientific media for the nonspecialist, especially those available on the web.

3 units, Aut (Andersen, H)

CHEM 27N. Lasers: The Light Fantastic—Stanford Introductory Seminar. Preference to freshmen. Introduction to lasers and their impact on everyday life. The operation of lasers using concepts of atomic and molecular energy levels, optics, and resonance. The use of lasers to produce guide stars for astronomy, sculpt the cornea, measure molecules in the ozone layer, transmit optical information over the web, measure the distance to the moon, and observe a single protein molecule in action. Prerequisites: CHEM 31A or X, or PHYSICS 23 and 25, or equivalents. GER: DB-NatSci

3 units, Win (Moerner, W)

CHEM 31A. Chemical Principles I—For students with moderate or no background in chemistry. Stoichiometry; periodicity; simple models of ionic and covalent bonding; dissolution/precipitation, acid/base, and oxidation/reduction reactions; gas laws; phase behavior; rates of reactions. Emphasis is on skills to address structural and quantitative chemical questions; lab provides practice. Recitation. GER: DB-NatSci

4 units, Aut (Chidsey, C)

CHEM 31B. Chemical Principles II—Chemical equilibria; rates and mechanisms to reach equilibrium; thermochemistry, free energy, and relation to equilibrium; quantum concepts, and atomic and molecular orbital theory. Lab provides practice. Recitation. Prerequisite: 31A. GER: DB-NatSci

4 units, Win (Andersen, H)

CHEM 31X. Chemical Principles—Accelerated; for students with substantial chemistry background. Chemical equilibria concepts, equilibrium constants, acids and bases, chemical thermodynamics, quantum concepts, models of ionic and covalent bonding, atomic and molecular orbital theory, periodicity, and bonding properties of matter. Recitation. Prerequisites: high school chemistry and algebra. Recommended: high school physics. GER: DB-NatSci

4 units, Aut (Waymouth, R; Fayer, M), Sum (Staff)

CHEM 33. Structure and Reactivity—Organic chemistry, functional groups, hydrocarbons, stereochemistry, thermochemistry, kinetics, chemical equilibria. Recitation. Prerequisite: 31A,B, or 31X, or an AP Chemistry score of 4 or 5. GER: DB-NatSci

4 units, Win (Stack, T; Kohler, J), Spr (Wender, P), Sum (Staff)

CHEM 35. Organic Monofunctional Compounds—Organic chemistry of oxygen and nitrogen aliphatic compounds. Recitation. Prerequisite: 33. GER: DB-NatSci

4 units, Aut (Huestis, W), Spr (Du Bois, J), Sum (Staff)

CHEM 36. Organic Chemistry Laboratory I—Techniques for separations of compounds; distillation, crystallization, extraction, and chromatographic procedures. Lecture treats theory; lab provides practice. Limited enrollment Spring Quarter; preference to students who have completed CHEM 33. GER: DB-NatSci

3 units, Aut (Moylan, C), Spr (Hua, H), Sum (Moylan, C)

CHEM 110. Directed Instruction/Reading—Undergraduates pursue a reading program under supervision of a faculty member in Chemistry; may also involve participation in lab. Prerequisites: superior work in 31A,B, 31X, or 33; and consent of instructor and the Chemistry undergraduate study committee.

1-2 units, Aut, Win, Spr, Sum (Staff)

CHEM 111. Exploring Chemical Research at Stanford—Preference to freshmen and sophomores. Department faculty describe their cutting-edge research and its applications.

1 unit, Win (Kohler, J)

CHEM 130. Organic Chemistry Laboratory II—Diels-Alder, reduction, and Wittig reactions; qualitative analysis. Lab. Limited enrollment Autumn Quarter. Prerequisite: 36. Corequisite: 35. GER: DB-NatSci

4 units, Aut, Win (Hua, H)

CHEM 131. Organic Polyfunctional Compounds—Aromatic compounds, polysaccharides, amino acids, proteins, natural products, dyes, purines, pyrimidines, nucleic acids, and polymers. Prerequisite: 35. GER: DB-NatSci

3 units, Aut (Kool, E), Win (Trost, B)

CHEM 134. Analytical Chemistry Laboratory—Methods include gravimetric, volumetric, spectrophotometric, and electrometric. Lab. Prerequisite: 130. GER: DB-NatSci, WIM

5 units, Spr (Moylan, C)

CHEM 135. Physical Chemical Principles—Terminal physical chemistry for non-chemistry majors. Emphasis is on portions of physical chemistry most useful for students of the life sciences. Introduction to chemical thermodynamics: rate laws, integration of rate laws, reaction mechanisms, enzyme kinetics, first, second, and third laws, thermochemistry, entropy, free energy, chemical equilibrium, osmotic pressure, other colligative properties. Prerequisites: 31A,B, or 31X, calculus. GER: DB-NatSci

3 units, Win (Pecora, R)

CHEM 136. Synthesis Laboratory—Advanced synthetic methods in organic and inorganic laboratory chemistry. Prerequisites: 35, 130. GER: DB-NatSci

3 units, Win (Yandulov, D)

CHEM 137. Special Topics in Organic Chemistry—(Formerly 181.) Chemical view of the biological processes of life. Topics include: structure and function of proteins, peptides, and nucleic acids; and how to use chemistry to mediate biological processes. GER: DB-NatSci

3 units, Win (Flygare, J)

CHEM 151. Inorganic Chemistry I—Theories of electronic structure, stereochemistry, and symmetry properties of inorganic molecules. Topics: ionic and covalent interactions, electron-deficient bonding, and molecular orbital theories. Emphasis is on the chemistry of the metallic elements. Prerequisites: 35. Recommended: 171. GER: DB-NatSci

3 units, Win (Stack, T)

CHEM 153. Inorganic Chemistry II—The theoretical aspects of inorganic chemistry. Group theory; many-electron atomic theory; molecular orbital theory emphasizing general concepts and group theory; ligand field theory; application of physical methods to predict the geometry, magnetism, and electronic spectra of transition metal complexes. Prerequisites: 151, 173. GER: DB-NatSci

3 units, Spr (Solomon, E)

CHEM 171. Physical Chemistry—Chemical thermodynamics; fundamental principles, Gibbsian equations, systematic deduction of equations, equilibrium conditions, phase rule, gases, solutions. Prerequisites: 31A,B, or 31X, 35; MATH 51. GER: DB-NatSci

3 units, Aut (Pande, V)

CHEM 173. Physical Chemistry—Introduction to quantum chemistry: the basic principles of wave mechanics, the harmonic oscillator, the rigid rotator, infrared and microwave spectroscopy, the hydrogen atom, atomic structure, molecular structure, valence theory. Prerequisites: MATH 51, 53; PHYSICS 51, 53, 55. GER: DB-NatSci

3 units, Win (Boxer, S)

CHEM 174. Physical Chemistry Laboratory I—Experimental investigations in spectroscopy, thermodynamics, and electronics. Students take measurements on molecular systems, design and build scientific instruments, and computer-automate them with software that they write themselves. Prerequisites: 134, PHYSICS 56. Corequisites: 173, MATH 53. GER: DB-NatSci

4 units, Win (Moylan, C)

CHEM 175. Physical Chemistry—Introduction to kinetic theory and statistical mechanics: molecular theory of matter and heat, transport phenomena in gases, Boltzmann distribution law, partition functions for ideal gases. Introduction to chemical kinetics: measurement of rates of reactions, relationship between rate and reaction mechanism, consideration of specific reactions, transition-state theory of reaction rates. Prerequisites: 171, 173. GER: DB-NatSci

3 units, Spr (Moerner, W)

CHEM 176. Physical Chemistry Laboratory II—Use of chemical instrumentation to study physical chemical time-dependent processes. Experiments include reaction kinetics, fluorimetry, and nuclear magnetic and electron spin resonance spectroscopy. Lab. Prerequisites: 173, 174, previous or concurrent enrollment in 175. GER: DB-NatSci

3 units, Spr (Dai, H)

CHEM 184. Biological Chemistry Laboratory—Modern techniques in biological chemistry including protein purification, characterization of enzyme kinetics, heterologous expression of His-tagged fluorescent proteins, site-directed mutagenesis, and single-molecule fluorescence microscopy. Prerequisite: 188.

4 units, Spr (Elrad, D; Kool, E; Zare, R)

CHEM 185. Biochemistry III—Advanced biophysical chemistry. Topics may include spectroscopy and other structure elucidation techniques, photochemistry, advanced quantum mechanics and statistical mechanics, and polymer structure and dynamics, emphasizing biological macromolecules and higher order systems.

3 units, not given this year

CHEM 188. Biochemistry I—(Same as BIOSCI 188/288, CHEMENG 188/288.) Chemistry of major families of biomolecules including proteins, nucleic acids, carbohydrates, lipids, and cofactors. Structural and mechanistic analysis of properties of proteins including molecular recognition, catalysis, signal transduction, membrane transport, and harvesting of energy from light. Molecular evolution. Pre- or corequisites: BIOSCI 41, CHEM 131, and CHEM 135 or CHEM 171. GER: DB-NatSci

3 units, Aut (Kohler, J)

CHEM 189. Biochemistry II—(Same as BIOSCI 189/289, CHEMENG 189/289.) Metabolism. Glycolysis, gluconeogenesis, citric acid cycle, oxidative phosphorylation, pentose phosphate pathway, glycogen metabolism, fatty acid metabolism, protein degradation and amino acid catabolism, protein translation and amino acid biosynthesis, nucleotide biosynthesis, DNA replication, recombination and repair, lipid and steroid biosynthesis. Medical consequences of impaired metabolism. Therapeutic intervention of metabolism. Prerequisite: 188/288. GER: DB-NatSci

3 units, Win (Khosla, C)

GRADUATE

CHEM 221. Advanced Organic Chemistry—Molecular orbital theory and orbital symmetry. Thermochemistry and thermochemical kinetics. Unimolecular reaction rate theory. Methods of determining organic reaction mechanisms from a theoretical and experimental point of view. Prerequisites: 137, 175.

3 units, Aut (Du Bois, J)

CHEM 223. Advanced Organic Chemistry—Continuation of 221 with emphasis on physical methods. Prerequisite: 221 or consent of instructor.

3 units, Win (Trost, B)

CHEM 225. Advanced Organic Chemistry—Continuation of 223. Organic reactions, new synthetic methods, conformational analysis, and exercises in the syntheses of complex molecules. Prerequisite: 223 or consent of instructor.

3 units, Spr (Wender, P)

CHEM 227. Topics in Organic Chemistry—Possible topics: synthetic organic chemistry, photochemistry, inorganic-organic chemistry, bio-organic chemistry, reaction mechanisms, stereochemistry, structural chemistry of organic and biological molecules. May be repeated for credit.

3 units, Aut (Du Bois, J)

CHEM 229. Organic Chemistry Seminar—Required of graduate students majoring in organic chemistry. Students giving seminars register for 231.

1 unit, Aut, Win, Spr (Kohler, J)

CHEM 231. Organic Chemistry Seminar Presentation—Required of graduate students majoring in organic chemistry for the year in which they present their organic seminar. Second-year students must enroll all quarters.

1 unit, Aut, Win, Spr (Waymouth, R)

CHEM 233A,B,C. Creativity in Organic Chemistry—Required of second- and third-year Ph.D. candidates in organic chemistry. The art of formulating, writing, and orally defending a research progress report (A) and two research proposals (B, C). Second-year students register for A and B; third-year students register for C.

1 unit, A: Aut, B: Spr, C: Spr (Waymouth, R)

CHEM 235. Applications of NMR Spectroscopy—The uses of NMR spectroscopy in chemical and biochemical sciences, emphasizing data acquisition for liquid samples and including selection, setup, and processing of standard and advanced experiments.

3 units, Win (Lynch, S)

CHEM 237. Electrochemistry—Principles of electrochemistry and their application to redox systems, electron transfer, electroanalysis, electrodeposition, electrocatalysis, batteries, and fuel cells. Prerequisite: 171 or equivalent.

3 units, Win (Chidsey, C)

CHEM 251. Advanced Inorganic Chemistry—Chemical reactions of inorganic compounds with focus on mechanisms of reactions mediated by inorganic and organometallic complexes. The structural and electronic basis of reactivity including oxidation and reduction; kinetics and thermodynamics of inorganic reactions. Prerequisite: one year of physical chemistry.

3 units, Aut (Yandulov, D)

CHEM 253. Advanced Inorganic Chemistry—Electronic structure and physical properties of transition metal complexes. Ligand field and molecular orbital theories, magnetism and magnetic susceptibility, electron paramagnetic resonance including hyperfine interactions and zero field splitting and electronic absorption spectroscopy including vibrational interactions. Prerequisite: 153 or the equivalent.

3 units, Win (Solomon, E)

CHEM 255. Advanced Inorganic Chemistry—Chemical reactions of organotransition metal complexes and their role in homogeneous catalysis. Analogous patterns among reactions of transition metal complexes in lower oxidation states. Physical methods of structure determination. Prerequisite: one year of physical chemistry.

3 units, Spr (Waymouth, R)

CHEM 258A,B,C. Research Progress in Inorganic Chemistry—Required of all second-, third-, and fourth-year Ph.D. candidates in inorganic chemistry. Students present their research progress in written and oral forms (A); present a seminar in the literature of the field of research (B); and formulate, write, and orally defend a research proposal (C). Second-year students register for A; third-year students register for B; fourth-year students register for C.

1 unit, A: Win, B: Spr, C: Aut, Win (Yandulov, D)

CHEM 259. Inorganic Chemistry Seminar—Required of graduate students majoring in inorganic chemistry.

1 unit, Aut, Win, Spr (Solomon, E)

CHEM 271. Advanced Physical Chemistry—The principles of quantum mechanics. General formulation, mathematical methods, and elementary applications of quantum theory to the structure of atoms and molecules, including variational procedures, perturbation theory, operator and matrix methods, theory of angular momentum, and elements of the electronic structure of atoms. Prerequisite: 175.

3 units, Aut (Fayer, M)

CHEM 273. Advanced Physical Chemistry—Topics in advanced quantum mechanics: vibrations and rotations of polyatomic molecules (normal modes, anharmonicity, wavefunctions and energy levels of rigid rotations, vibration-rotation interaction), ab initio electronic structure theory (Hartree-Fock, configuration interaction, multiconfiguration self-consistent-field, and many-body perturbation theory techniques), angular momentum theory (operators and wavefunctions, Clebsch-Gordan coefficients, rotation matrices), time-dependent quantum mechanics (time evolution operator, Feynman path integrals, scattering theory, Born approximation, Lipmann-Schwinger equation, correlation functions), interaction of radiation and matter (semiclassical and quantum theories of radiation, transition probabilities, selection rules). Prerequisite: 271 or PHYSICS 230.

3 units, not given this year

CHEM 275. Advanced Physical Chemistry—The principles and methods of statistical mechanics from the ensemble point of view, statistical thermodynamics, heat capacities of solids and polyatomic gases, chemical equilibria, equations of state of fluids, and phase transitions. Prerequisite: 271.

3 units, Win (Pande, V)

CHEM 276. Advanced Physical Chemistry—Time-dependent statistical mechanics: ensemble theory for equilibrium and nonequilibrium systems; static and dynamic correlation functions for fluctuating equilibrium systems; the relationship of correlation functions, spectroscopy, and transport; dynamical models used in chemistry, including classical mechanics, quantum mechanics, Brownian dynamics, Smoluchowski dynamics, and Markov processes. Applications to topics in physical chemistry. Prerequisite: 275.

3 units, not given this year

CHEM 277. Topics in Physical Chemistry—Possible topics: structure elucidation using diffraction techniques, advanced statistical mechanics, crystal field theory, advanced quantum mechanics, magnetic relaxation, advanced thermodynamics, chemical applications of group theory. May be repeated for credit. Prerequisite: 275 or consent of instructor.

3 units, Spr (Pecora, R)

CHEM 278A,B. Research Progress in Physical Chemistry—Required of all second- and third-year Ph.D. candidates in physical and biophysical chemistry and chemical physics. Second-year students present their research progress and plans in brief written and oral summaries (A); third-year students prepare a written progress report (B).

1 unit, A: Win, B: Win (Pecora, R)

CHEM 279. Physical Chemistry Seminar—Required of graduate students majoring in physical chemistry. May be repeated for credit.

1 unit, Aut, Win, Spr (Dai, H)

CHEM 280. Single-Molecule Spectroscopy and Imaging—Theoretical and experimental techniques necessary to achieve single-molecule sensitivity in laser spectroscopy: interaction of radiation with spectroscopic transitions; systematics of signals, noise, and signal-to-noise; modulation and imaging methods; and analysis of fluctuations; applications to modern problems in biophysics, cellular imaging, physical chemistry, single-photon sources, and materials science. Prerequisites: 271, previous or concurrent enrollment in 273.

3 units, not given this year

CHEM 297. Bio-Inorganic Chemistry—(Same as BIOPHYS 297.) Overview of metal sites in biology. Metalloproteins as elaborated inorganic complexes, their basic coordination chemistry and bonding, unique features of the protein ligand, and the physical methods used to study active sites. Active site structures are correlated with function. Prerequisites: 153 and 173, or equivalents.

3 units, not given this year

CHEM 299. Teaching of Chemistry—Required of all teaching assistants in Chemistry. Techniques of teaching chemistry by means of lectures and labs.

1-3 units, Aut, Win, Spr (Moylan, C)

CHEM 300. Department Colloquium—Required of graduate students. May be repeated for credit.

1 unit, Aut, Win, Spr (Du Bois, J)

CHEM 301. Research in Chemistry—Required of graduate students who have passed the qualifying examination. Open to qualified graduate students with consent of major professor. Research seminars and directed reading deal with newly developing areas in chemistry and experimental techniques. May be repeated for credit.

2 units, Aut, Win, Spr, Sum (Staff)

CHEM 309. Navigating Career Options for Ph.D. Chemists—Planning a post-graduate career. Topics include career options, job search strategies, job application process, long-term career planning, and minority issues in science careers. Workshops focused on developing professional skills working with CDC and CTL, and panel discussions with chemistry Ph.D.s working in a range of fields.

1 unit, Sum (Zare, R)

CHEM 459. Frontiers in Interdisciplinary Biosciences—(Same as BIOC 459, BIOE 459, BIOSCI 459, CHEMENG 459, PSYCH 459.) (Crosslisted in departments in the schools of H&S, Engineering, and Medicine; students register through their affiliated department; otherwise register for CHEMENG 459.) For specialists and non-specialists. Sponsored by the Stanford BioX Program. Three seminars per quarter address scientific and technical themes related to interdisciplinary approaches in bioengineering, medicine, and the chemical, physical, and biological sciences. Leading investigators from Stanford and the world present breakthroughs and endeavors that cut across core disciplines. Pre-seminars introduce basic concepts and background for non-experts. Registered students attend all pre-seminars; others welcome. See <http://www.stanford.edu/group/biox/courses/459.html>. Recommended: basic mathematics, biology, chemistry, and physics.

1 unit, Aut, Win, Spr (Robertson, C)

RESEARCH AND SPECIAL ADVANCED WORK

CHEM 190. Introduction to Methods of Investigation—Limited to undergraduates admitted under the honors program or by special arrangement with a member of the teaching staff. For general character and scope, see 200. Prerequisite: 130. Corequisite: 300.

1-5 units, Aut, Win, Spr, Sum (Staff)

CHEM 200. Research and Special Advanced Work—Qualified graduate students undertake research or advanced lab work not covered by listed courses under the direction of a member of the teaching staff. For research and special work, students register for 200.

1-15 units, Aut, Win, Spr, Sum (Staff)

CLASSICS

Emeriti: (Professors) Mark W. Edwards, Marsh H. McCall, Jr.,* Susan Treggiari, Michael Wigodsky; (Professor, Teaching): Edward Spofford

Chair: Richard P. Martin

Graduate Director: Walter Scheidel

Undergraduate Director: Maud Gleason

Professors: Alessandro Barchiesi, Susanna Braund, Andrew M. Devine, Richard P. Martin, Ian Morris (Classics, History), Reviel Netz, Andrea Nightingale (Classics, Comparative Literature), Josiah Ober (Classics, Political Science), M. Rush Rehm (Classics, Drama), Walter Scheidel, Michael Shanks, Susan A. Stephens

Associate Professors: Joseph Manning, Jody Maxmin (Art and Art History, Classics), Jennifer Trimble

Assistant Professors: Giovanna Ceserani, Grant Parker

Associate Professor (Teaching): Anastasia-Erasmia Peponi

Lecturers: Maud Gleason, Patrick Hunt, Norbert Lain

Courtesy Professors: Ian Hodder, Chris Bobonich, Eva Prionas

* Recalled to active duty.

Department Offices: Building 20, Main Quad

Mail Code: 94305-2080

Phone: (650) 723-0479

Email: mgsm@stanford.edu

Web Site: <http://www.stanford.edu/dept/classics>

Courses given in Classics have the subject codes CLASSART, CLASSGEN, CLASSGRK, CLASSHIS, and CLASSLAT. For a complete list of subject codes, see Appendix.

The study of Classics has traditionally centered on the literature and material culture of ancient Greece and Rome, including Greek and Latin language, literature, philosophy, history, art, and archaeology. At Stanford, Classics also explores ancient Egypt; ancient China and the modern world; the Iron Age, Hellenistic period, and late antique cultures; law; papyrology; and ancient science. The department's faculty approach Classics from an interdisciplinary perspective that crosses geographical, temporal, and thematic territories. Studying ancient epic poetry can lead to looking at modern cinema afresh; ancient Athenian politics opens new perspectives on modern politics; and Roman studies present cultural parallels just as Latin illuminates the history of English and the Romance languages. In short, Classics at Stanford is an interdisciplinary subject concerned not only with Greek and Roman civilization but also with the interaction of cultures and societies that influenced the ancient Mediterranean basin and continue to influence human society across the globe.

UNDERGRADUATE PROGRAMS

The department offers eight options for degrees in Classics: Classical Studies; Classical Studies with a Philosophy and Literature Focus; Ancient History; Greek; Greek with Philosophy and Literature; Latin; Latin with Philosophy and Literature; and Greek and Latin. Each major can be completed in conjunction with a second major in the sciences or in other humanities departments. The department also offers minors in classical languages; history; and literature and philosophy.

BACHELOR OF ARTS

Those interested in majoring in Classical Studies, Classical Studies with a Philosophy and Literature Focus, Greek, or Latin are encouraged to declare at the beginning of their junior year, but are urged to discuss their plans with the undergraduate director as early as possible. Students who choose to major in Greek and Latin (option 8) should begin the curriculum as soon as possible, since it is difficult to complete the language requirements without an early start; those with no previous knowledge of Latin or Greek should begin study in the freshman year or as early as possible in the sophomore year.

To declare the major, a student must fill out the Declaration of Major on Axess and meet with the undergraduate director in the Department of

Classics. At that time, the undergraduate director assigns each student a department adviser who helps to prepare a program of study; students should meet with their advisers at least once a quarter. Each student's progress towards fulfillment of the major requirements is recorded in a file kept in the main office. It is the student's responsibility to work with his or her adviser in keeping this file up to date.

The B.A. degree may be earned by fulfilling the requirements for one of the following options:

1. *Classical Studies*: Courses counted for the degree must be taken for a letter grade. This track is declared on Axess. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. This major is recommended for students who wish to study the classical civilizations in depth but do not wish to study the languages to the extent required by options 2, 3, and 4. It is not suitable for students who wish to do graduate work in Classics or to teach Latin or Greek in high school, as the language work is insufficient for these purposes. Students must complete at least 60 units of approved courses including:
 - a) Classics majors seminar (CLASSGEN 176)
 - b) at least two courses in Latin or Greek at the 100 level or higher, *or* one course in one of the languages at the 100 level or higher plus the series 1, 2, 3, or 51 and 52 in the other language (or an equivalent approved by the department)
 - c) at least one course in each of the following groups:
 - 1) ancient history
 - 2) art and archaeology
 - 3) literature in translation
 - 4) science and philosophy
 - 5) religion or mythology
2. *Classical Studies with a Philosophy and Literature Focus*: Courses counted for the degree must be taken for a letter grade. This track is not declared on Axess. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Students must complete at least 65 units of approved courses including:
 - a) Classics majors seminar (CLASSGEN 176)
 - b) one course in Classics in each of the following areas:
 - 1) ancient history
 - 2) art and archaeology
 - 3) literature in translation
 - 4) philosophy and history of science
 - 5) religion or mythology
 - c) two courses in Latin or Greek at the 100 level or higher, or one course in one of the languages at the 100 level or higher plus the series 1,2,3, or 51,52 in the other language.
 - d) Writing in the Major (WIM) in the Philosophy department (one introductory Philosophy course)
 - e) one course in each of the following areas:
 - 1) aesthetics, ethics, and social and political philosophy (PHIL 170 series)
 - 2) philosophy of language, mind, metaphysics, and epistemology (PHIL 180 series)
 - 3) history of philosophy (above 100 level)
 - f) PHIL 81. Philosophy and Literature
 - g) two related courses in Classics or Philosophy. Students may double count a Classics course in philosophy or ancient science for one of the two related courses provided that this course fulfills the Philosophy and Literature requirements and is approved by a member of the committee in Philosophy and Literature.
 - h) Philosophy and literature capstone seminar in the PHIL 194 series
3. *Ancient History Major*: at least 60 units of approved courses. Courses counted for the degree must be taken for a letter grade. This track is declared on Axess. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Students must satisfy four requirements:
 - a) Writing in the Major (WIM) Requirement fulfilled by taking the Majors Seminar (CLASSGEN 176).
 - b) *core requirements*: majors must take at least three survey courses in ancient history
 - c) *depth requirement*: majors must take at least 40 units of ancient history and civilization courses, drawn from courses with CLASSHIS and CLASSGEN prefixes. IHUM 31A,B, The Ancient Empires, may be counted toward this or the core requirement. Courses chosen must be approved in advance by the undergraduate director. With the approval of the instructor and the undergraduate director, students may substitute graduate seminars in ancient history for some of these courses.
 - d) *breadth requirement*: majors must take at least 4 units in each of the following areas: archaeology and art; comparative ancient civilizations; and historical and social theory. The courses chosen must be approved in advance by the undergraduate director, and are normally chosen from the list of areas below:
 1. archaeology and art: for example, any course with the CLASS ART prefix; CASA 1/201, 90, 301; ARTHIST 120A, 200, 200C.
 2. comparative ancient civilizations: majors must take a course on the ancient world outside the Mediterranean and western Asia, such as ANTHSCI 3, 7, 103, 141; HISTORY 192.
 3. historical and social theory: for example, CASA 1/201, 90; HISTORY 107, 206; SOC 1, 110, 113, 140, 142, 170.
4. *Greek*: Courses counted for the degree must be taken for a letter grade. This track is declared on Axess. Beginning courses in Greek, if required, may be counted towards the total of 60 units. Relevant courses in other departments of the humanities may count towards the major with the consent of the undergraduate director. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Students must complete at least 60 units of approved courses including:
 - a) Classics majors seminar (CLASSGEN 176)
 - b) a minimum of 31 units in Greek courses at the 100 level or higher. It is recommended that one of these courses be CLASSGRK 175A, although this course should not be taken until students have completed three years of Greek.
 - c) at least one course in each of the following groups:
 - 1) history or archaeology
 - 2) literature in translation
 - 3) religion or philosophy
 - d) the introductory Latin sequence CLASSLAT 1,2,3, *or* 51,52, *or* one 100-level course in Latin (recommended)
5. *Greek with Philosophy and Literature*: Courses counted for the degree must be taken for a letter grade. This track is not declared on Axess. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Students must complete at least 65 units of approved courses including:
 - a) Classics majors seminar (CLASSGEN 176)
 - b) one course in Classics in each of the following areas:
 - 1) history or archaeology
 - 2) literature in translation
 - 3) religion, philosophy, and ancient science
 - c) 31 units in Greek courses at the 100 level or higher.
 - d) Writing in the Major (WIM) in the Philosophy Department (one introductory Philosophy course)
 - e) one course in each of the following areas:
 - 1) aesthetics, ethics, and social and political philosophy (PHIL 170 series)
 - 2) philosophy of language, mind, metaphysics, and epistemology (PHIL 180 series)
 - 3) history of philosophy (above 100 level)
 - f) PHIL 81. Philosophy and Literature
 - g) two related courses in Classics or Philosophy. Students may double count a Classics course in philosophy or ancient science for one of the two related courses provided that this course fulfills the Philosophy and Literature requirements and is approved by a member of the committee in Philosophy and Literature.
 - h) Philosophy and literature capstone seminar in the PHIL 194 series

6. *Latin*: Courses counted for the degree must be taken for a letter grade. This track is declared on Axess. Beginning courses in Latin, if required, may be counted towards the total of 60 units. Relevant courses in other departments of the humanities may count towards the major with the consent of the undergraduate director. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Students must complete at least 60 units of approved courses including:
- Classics majors seminar (CLASSGEN 176)
 - a minimum of 31 units in Latin courses at the 100 level or higher. It is recommended that one of these courses be CLASSLAT 175A, although this course should not be taken until students have completed three years of Latin.
 - at least one course in each of the following groups:
 - history or archaeology
 - literature in translation
 - religion or philosophy
 - the introductory sequence CLASSGRK 1,2,3, or 51,52, or one 100-level course in Greek (recommended).
7. *Latin with Philosophy and Literature*: Courses counted for the degree must be taken for a letter grade. This track is not declared on Axess. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Students must complete at least 65 units of approved courses including:
- Classics majors seminar (CLASSGEN 176)
 - one course in Classics in each of the following areas: history and archaeology; literature in translation; and religion, philosophy, and ancient science
 - history and archaeology
 - literature in translation
 - religion, philosophy, and ancient science
 - 31 units in Latin courses at the 100 level or higher.
 - Writing in the Major (WIM) in the Philosophy Department (one introductory Philosophy course)
 - one course in each of the following areas:
 - aesthetics, ethics, and social and political philosophy (PHIL 170 series)
 - philosophy of language, mind, metaphysics, and epistemology (PHIL 180 series)
 - history of philosophy (above 100 level)
 - PHIL 81. Philosophy and Literature
 - two related courses in Classics or Philosophy. Students may double count a Classics course in philosophy or ancient science for one of the two related courses provided that this course fulfills the Philosophy and Literature requirements and is approved by a member of the committee in Philosophy and Literature.
 - Philosophy and literature capstone seminar in the PHIL 194 series
8. *Greek and Latin*: Courses counted for the degree must be taken for a letter grade. This track is declared on Axess. Relevant courses in other departments of the humanities may count towards the major with the consent of the undergraduate director. Students are encouraged to meet with the undergraduate director to discuss options for pursuing a period of study in the Mediterranean region. Students must complete at least 60 units of approved courses including:
- Classics majors seminar (CLASSGEN 176)
 - 30 units in Greek courses and the same number in Latin. It is recommended that students take either or both CLASSGRK or CLASSLAT 175A, although these courses should not be taken until students have completed three years of the respective language.
 - it is recommended that students take a course in ancient history.

Note 1: University credit earned by placement tests or advanced placement work in secondary school is not counted towards any major program in the department; work done in other universities or colleges is subject to department evaluation.

Note 2: A letter grade is required in all courses taken for the major. No course receiving a grade lower than 'C' is counted toward fulfilling major requirements.

MINORS

The undergraduate director meets with each student who opts for a minor to discuss curriculum choices and assigns the student an adviser in the relevant field. Students are required to work closely with their advisers to create a cohesive curriculum within each area. Students may organize their curriculum according to different principles: for example, they may wish to focus on a specific historical period (Classical Athens, Imperial Rome), or on a specific theme or topic (women in antiquity). After consulting with the adviser, each student must submit (in writing) a "Proposed Curriculum" to the undergraduate director. Students may proceed with the minor when the undergraduate director has approved the proposal. Courses offered in Greek and Latin above the 100 level may count toward the minor, provided the subject matter is suitable. Students who minor in Classics are required to take the Majors Seminar (CLASSGEN 176), which is writing intensive.

Students may choose among three minors in Classics:

- Classical Languages*: students are required to take a minimum of five courses in Greek or in Latin plus the majors seminar (CLASSGEN 176). Students wishing to combine Greek and Latin may only do so if courses for one of the two languages are all above the 100 level; for example, CLASSGRK 1, 10, plus CLASSLAT 103, 111, 175.
- History*: students are required to take a minimum of five courses in history, art history, and archaeology plus the majors seminar (CLASSGEN 176). Courses offered in Latin and Greek that focus on historical topics or authors may count toward the minor.
- Literature and Philosophy*: students are required to take a minimum of five courses in classical literature or philosophy, including classical science, plus the majors seminar (CLASSGEN 176). Courses offered in Latin and Greek that focus on philosophical or literary topics or authors may count toward the minor.

HONORS PROGRAMS

A minimum grade point average (GPA) of 3.3 in Classics courses is required for students to enroll in the honors program. To be considered for honors in Classics, the student must select a professor who can supervise his or her honors thesis. Together with the supervisor, the student writes a two- to three-page proposal at the beginning of the senior year. The proposal should outline the project in detail, list relevant courses that have been taken, and name the supervisor. The department gives approval only if it is satisfied that the student has a sufficient basis of knowledge derived from department course work in the general areas the thesis covers (i.e., course work in Art, Greek and/or Latin language, History, Literature, Philosophy, etc.). If the proposal is approved, the student may sign up for undergraduate thesis (CLASSGEN 199) during one or two quarters of the senior year for a maximum of 6 units a term, up to an overall total of 10 units. Honors are awarded only if the essay receives a grade of 'B+' or higher from the supervisor and a second reader.

HUMANITIES

For majors in Classics with appropriate interests, the honors program in Humanities is available, a description of which is found under the "Interdisciplinary Studies in Humanities" section of this bulletin.

DIGITAL HUMANITIES MODULE

The Classic department, in collaboration with the Humanities Lab, also offers a digital humanities module that can be combined with any of the department's major programs. Students who are interested in digital humanities should contact the department's Director of Undergraduate Studies who facilitates coordination with the Humanities Lab. Students planning to combine a Classics major and the digital humanities module must fulfill the following requirements in addition to the general Russian major requirements:

- CS 105 or equivalent
- Participate in the Humanities Lab Gateway core seminar (4 units)
- Complete the Humanities Lab Practicum (2 units) in the junior year
- Complete one digital project, in lieu of the course's main writing requirement, in a course offered in the Slavic department under the supervision of the course instructor and humanities lab adviser. This should usually be done in an upper-division course.

Students are encouraged to enroll in DLCL 99, Multimedia Course Lab, when working on the digital course project.

OVERSEAS STUDIES

Funding—Students whose record in Classics indicates that they are fully qualified may apply for funding from the Department of Classics. Students must submit a proposal to the undergraduate director, which should include an itemized list of expenses based on the fees charged by the program (that is, room, board, tuition, and other expenses). Limited funding is available each year; preference is shown to students with strong records.

Programs—

1. *Rome*: Classics majors are encouraged to apply for the Intercollegiate Center for Classical Studies (ICCS) in Rome which is managed by Duke University for about 50 constituent colleges and universities. It is open to Stanford majors in Classics, History, and Art History. All courses receive full credit at Stanford and may be applied to the respective major. Students interested in this program should consult the undergraduate director and the ICCS representative in the Department of Classics as early as possible in their career at Stanford to plan their course preparation and application. Competition is strong and applicants are expected to have taken one or more courses in Roman history and at least two years of Latin before they arrive in Rome. Brochures are available at the department office.

Other programs offer a quarter, semester, or summer session in Rome. Interested students are urged to visit Bechtel International Center.

2. *Greece*: students are encouraged to apply for the summer session at the American School of Classical Studies in Athens. The school is recommended principally for Classics majors with at least two years of ancient Greek. A student wishing to apply should prepare by taking courses in Greek history, archaeology, and art; beginning modern Greek is strongly recommended. Applicants should see the undergraduate director early in the academic year. Other programs offer a quarter, semester, or summer session in Greece. Interested students are urged to visit Bechtel International Center.

GRADUATE PROGRAMS

MASTER OF ARTS

University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin.

Students who have completed an undergraduate major in Classics (in Greek, Latin, or Greek and Latin) or its equivalent may be accepted as candidates for the M.A. degree in Classics and may expect to complete the program in twelve months (usually three quarters of course work plus three months study for the thesis or examination). Students with an undergraduate major in Classics (Ancient History or Classical Studies) or without an undergraduate major in Classics may also be accepted as candidates, though they may require a longer period of study before completing the requirements for the degree. These requirements are:

1. Attaining a standard of scholarship such as would be reached by three quarters of study in the department after fulfilling the requirements for an undergraduate major in the department. Normally, this means completing at least 25 units of graduate courses and 20 units of work at the 140 level or above.
2. Satisfactory completion of one Greek course at the 100 level (if the undergraduate major has been Latin) or one Latin course at the 100 level (if the undergraduate major has been Greek). This requirement is waived for students with an undergraduate major in Classics (Greek and Latin).
3. Passing an examination testing the candidate's ability to translate into English from a selected list of Greek and/or Latin authors.
4. Satisfactory completion of the 275A,B sequence in at least one language (Latin or Greek).
5. Writing a thesis, or passing of an examination on a particular author or topic, or having written work accepted by the graduate committee as an equivalent. Three completed and satisfactory seminar papers are normally an acceptable equivalent.

6. A reading examination in French or German; these examinations are administered every quarter.
7. Completion of a Program Proposal for a Master's Degree form in the first quarter of enrollment.

Candidates for the Ph.D. degree may also (on the recommendation of the department) become candidates for the M.A. degree. In their case, requirement '5' above is waived provided that they have completed some work beyond the course requirements listed under requirements '1' and '2' above.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin. There are four specializations within the Classics Ph.D. program: language and literature; classical archaeology; ancient history; and ancient philosophy.

I. Language and Literature—Candidates for the Ph.D. degree in Classics with specialization in language and literature must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor's degree at the end of the fourth year.
2. This includes:
 - a) Greek and Latin survey sequence (CLASSGEN 207-208)
 - b) Greek and Latin syntax sequence (CLASSGRK 275A,B and CLASSLAT 275A,B)
 - c) semantics of grammar sequence (CLASSGEN 205A,B)
 - d) twelve graduate seminars, nine of which must be Classics seminars, and one of the remaining three of which must be outside the department. The other two seminars may be in Classics, from other departments (with Director of Graduate Studies approval), and/or directed readings. However, no more than two directed readings can be taken. Classics seminars are generally offered for 4-5 units. In some cases, instructors allow a student to complete a seminar for 4 units without requiring a written paper but with completion of all other requirements.
3. Examinations:
 - a) Students must take Greek and Latin translation exams at the end of each survey sequence (the end of the first and second years). These exams are based on the Greek and Latin reading lists available on the Classics Department web site at: <http://www.stanford.edu/dept/classics>. Greek and Latin survey courses cover less than half of the material on which the translation exams test, and students need to prepare much of the work on their own. It is possible to take both exams in the same year if the student chooses. However, students are obligated to take the exam in the language which the survey has covered that year. The exam consists of a choice of six of eight passages, and students are allowed three hours. A grade of 'B-' or higher, on every passage, is required to pass. If a student does not attain a 'B-', the exam must be retaken later in the summer before registering for the Autumn Quarter, in order to continue in the program. The exam can only be retaken once.
 - b) Students must pass modern language translation exams in both German and French; Italian or modern Greek may be substituted in place of French, with consent of the graduate director. Students arrange with the student services officer to take the exam. One modern language exam must be passed by the end of the second year, the other by the end of the third year. These examinations are administered once each quarter.
 - c) At the beginning of Autumn Quarter of the third year, students take general examinations in four of the following fields: Greek literature, Latin literature, ancient philosophy, Greek history, and Roman history. Students select the fields in consultation with the graduate director no later than June of the second year of graduate study. Candidates must have taken at least one course at Stanford in each of the chosen fields (in the case of ancient philosophy, a seminar or its equivalent); students need to confer with the professor overseeing the exam. General examinations must be taken by October of the third year.
 - d) the University oral examination, which is a defense of the candidate's dissertation

4. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.
5. Students are required to undertake the equivalent of four, one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.
6. A typical program for a graduate student in Classics is as follows. First year: CLASSLAT 275A,B (6 units), CLASSGRK 275A,B (6 units), CLASSGEN 205A,B, Semantics (3 units), either CLASSGEN 207A-C or 208A-C, Literature Survey (offered alternate years; 15 units), and three elective seminars (12-15 units). Second year: either CLASSGEN 207A,B,C or 208A,B,C, Literature Survey (offered alternate years) (15 units), five to nine elective seminars (20-45 units), and one to three teaching assistantships (9-27 units). Third year: three to eight elective seminars (12-40 units), one to three teaching assistantships (9-27 units). Fourth year: three quarters of predoctoral dissertation research assistantship (30 units).

II. Classical Archaeology—Candidates for the Ph.D. degree in Classics with a specialization in classical archaeology must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor's degree at the end of the candidate's fourth year.
2. These must include:
 - a) at least three graduate (200) level courses in Latin and/or Greek literature
 - b) History of Classical Archaeology (CLASSART 201), to be taken as early as possible in the candidate's Stanford career
 - c) the interdepartmental graduate core sequence in archaeology. The Archaeology Center announces the courses which fulfill this requirement. The core sequence currently comprises a seminar in archaeology theory and a course on archaeological methods.
 - d) at least one further course outside the Classics department
 - e) at least five graduate seminars in classical archaeology
 - f) at least three graduate seminars in ancient history
 - g) Students may petition to count independent study courses in place of up to two required courses, but no more.
 - h) Students who enter the program with only one ancient language at the level needed for graduate study are strongly encouraged to take additional course work to reach graduate (200 and above) level in another language.
 - i) Students are urged to enroll in or audit other undergraduate courses that may fill gaps in their undergraduate training
 - j) All students are expected to take part in archaeological fieldwork in the classical world areas.
 - k) At least three consecutive quarters of course work must be taken at Stanford.
3. Examinations:
 - a) As soon as students arrive, they must take a diagnostic exam in either Greek or Latin. Depending on performance, students may be required to enroll in undergraduate language classes in that language to improve their skills to the level required for graduate work.
 - b) reading examinations in two of the following languages: French, German, Italian, and modern Greek. Candidates may petition to

substitute a different modern language for one of these, if their area of specialization requires it. One modern language exam must be passed by the end of the second year, the other by the end of the third year. These examinations are administered once each quarter.

- c) a translation examination from Latin or Greek into English. This examination must be taken either at the end of the first year or at the end of the second year. A grade of 'B-' or higher on every passage is required to pass. If a student does not attain a 'B-', the exam must be retaken later in the summer before registering for Autumn Quarter, in order to continue in the program. The exam can only be retaken once.
 - d) general examinations in Greek archaeology and Roman archaeology, and two of the following fields: Greek literature, Latin literature, ancient philosophy, Greek history, Roman history. Candidates select the fields in consultation with the graduate director no later than the first week of Spring Quarter of the second year of graduate study. Candidates must have taken at least one course at Stanford in each of the chosen fields (in the case of ancient philosophy, a seminar or its equivalent). General examinations must be taken by October of the third year.
 - e) the University oral examination, which is a defense of the candidate's dissertation
4. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.
 5. Students are required to undertake the equivalent of four, one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.
- III. Ancient History*—Candidates for the Ph.D. degree in Classics with specialization in ancient history must fulfill the following requirements:
1. Complete 135 units of academic credit or equivalent in study beyond the bachelor's degree at the end of the fourth year. This includes:
 - a) in the Autumn Quarter of the first year, Approaches to History (HISTORY 304), offered in the History department
 - b) two proseminars. These introduce students to primary sources of evidence for ancient history that require special training: papyrology, epigraphy, paleography, numismatics, and archaeology. The department should offer one each year, but students may also fulfill this requirement by doing a directed reading, or (with the approval of the ancient history track adviser) by taking a course at another university with which Stanford has an exchange agreement.
 - c) three skills courses relevant to the individual student's chosen research approach. For example, a student could take classes in economics, demography, legal history, or anthropology. The skills courses can also be used to learn other ancient or modern languages, either by course work or directed reading. Students need to consult with their advisers and the graduate director.
 - d) 10 graduate seminars: These normally have course numbers in the 200s, 300s, or 400s. Most of these are taken in the department, but students may also take seminars outside the department or at another university with which Stanford has an exchange agreement. Approval from the ancient history adviser and the graduate director must be obtained prior to exercising this option. While only two of the ten seminars can be replaced by directed readings, up to three additional seminars may be taken outside the department.

This leaves five ancient history seminars that must be chosen from those in the department. Other Classics graduate seminars may be substituted for these ancient history seminars, with approval of the ancient history track adviser.

- e) The range and sequence of other courses to be taken depend on which of the following two options the student selects within the Ancient History track.
 1. *Option 1:* Students focus more on one language. This requires students to take: the three quarter survey course in either Greek or Latin (CLASSGEN 207A,B,C or CLASSGEN 208 A,B,C); the fifteen-week syntax course in the same language (CLASSGEN 275A,B or CLASSLAT 285A,B); one quarter of the survey course sequence in the other language; and the two quarter Semantics of Grammar sequence (CLASSGEN 205A,B).
 2. *Option 2:* Students emphasize broader linguistic skills. This requires students to take the three quarter survey sequence in both Greek and Latin (CLASSGEN 207A,B,C and 208A,B,C).
2. Examinations:
 - a) As soon as students arrive, they take diagnostic exams in two areas of ancient history. Choices are: Egyptian, Greek, and Roman history. The test is mainly on narrative history, especially important names, dates, and events. Depending on performance, students may be asked to sit in on the undergraduate history courses and take directed reading or a graduate survey if offered. Reading lists are available upon request.
 - b) Students must take the final offered at the end of each quarter of Greek or Latin survey (for Option 1 above) or both Greek and Latin surveys (for Option 2 above). Students must earn a 'B-' or higher on each final to pass.
 - c) Students must pass modern language translation exams in both German and French; Italian or modern Greek may be substituted in place of French with consent of the graduate director. One modern language exam must be passed by the end of the second year, the other by the end of the third year. These examinations are administered once each quarter.
 - d) *General examinations:* Students must take two exams in history (Egyptian, Greek, or Roman) and two exams in other fields (Greek literature, Latin literature, Greek archaeology, Roman archaeology, or ancient philosophy). Students select the fields in consultation with the graduate director no later than June of their second year of graduate study. Candidates must have taken at least one course at Stanford in each of the chosen fields (in the case of ancient philosophy, a seminar or its equivalent). General examinations must be taken by October of the third year. In preparing for the general examinations, candidates are expected to make full use of relevant secondary material in modern languages. They should therefore plan to satisfy the requirements in French and German as soon as possible, preferably before the translation examinations.
 - e) the University oral examination which is a defense of the candidate's dissertation.
3. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.
4. Candidates are required to undertake the equivalent of four, one quarter courses of teaching under department supervision. This teaching

requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.

IV. Joint Program in Ancient Philosophy—This specialization is jointly administered by the departments of Classics and Philosophy and is overseen by a joint committee composed of members of both departments. It provides students with the training, specialist skills, and knowledge needed for research and teaching in ancient philosophy while producing scholars who are fully trained as either philosophers or classicists.

Graduate students admitted by the Classics department receive their Ph.D. from the Classics department. This specialization includes training in ancient and modern philosophy. Each student in the program is advised by a committee consisting of one professor from each department.

All candidates for the Ph.D. degree in Classics with specialization in ancient philosophy must fulfill the following requirements:

1. Complete 135 units of academic credit or equivalent in study beyond the bachelor's degree at the end of the fourth year. This includes:
 - a) all the requirements listed for the language and literature specialization in the graduate program in Classics (see "I" above).
 - b) three courses in the Philosophy department (including 100/200 and two courses at the 200 level or higher). These include:
 1. one course in logic which can be fulfilled at any level
 2. one course in aesthetics, ethics, or political philosophy
 3. one course in metaphysics, epistemology, philosophy of mind, or philosophy of science.
 - c) at least three courses in ancient philosophy at the 200 level or above, one of which must be in the Philosophy department.
 - d) All courses taken in the Philosophy department count for seminar credit (i.e., as contributing to the 12 seminar requirement in the Language and Literature track in the Classics department).
2. *Examinations:* The requirements are the same as those listed in the language and literature specialization, except that one of the four areas of general examination must be taken in ancient philosophy.
3. The graduate director assigns a dissertation proposal director to each candidate who has passed the general examination. During the third year, the candidate, in consultation with the dissertation proposal director, prepares a dissertation proposal which is examined by the dissertation proposal defense committee (set up by the dissertation proposal director and consisting of the dissertation proposal director and two other faculty members, one of whom may be from outside the department), no later than the end of the first quarter of the fourth year. If the proposal is deemed unsatisfactory, this proposal examination is repeated in the following quarter and must be passed. Subsequently, each candidate, in consultation with the graduate director and the dissertation proposal director, selects a dissertation director who must be a member of the Academic Council. The candidate, the dissertation director, and the graduate committee collaborate to select an appropriate dissertation reading committee. Two of the three members of the reading committee, including the chair, must be members of the Academic Council.
4. Students are required to undertake the equivalent of four, one quarter courses of teaching under department supervision. This teaching requirement is normally completed during the second and third years of study. Summer teaching does not satisfy this requirement.

PH.D. MINOR

For a graduate minor, the department recommends at least 20 units in Latin or Greek at the 100 level or above, and at least one course at the graduate (200) level.

CLASSICS AND A MINOR FIELD

The Ph.D. in Classics may be combined with a minor in another field, such as anthropology, history, humanities (see below), or classical linguistics (see below). Requirements for the minor field vary, but might be expected to involve about six graduate-level courses in the field and one written examination, plus a portion of the University oral exam. Such a program is expected to take five years. The department encourages such programs for especially able and well prepared students. The following timetable would be typical for a five-year program:

First Year: course work, almost entirely in Classics. One translation exam taken in June. One or both modern language exams taken.

Second Year: course work, both in Classics and the minor field. Second translation exam completed. French and German exams completed.

Third Year: course work, both in Classics and the minor field. General examinations in Classics.

Fourth Year: remaining course work, both in Classics and the minor field.

General examination in the minor field. Preparation for dissertation.

Fifth Year: dissertation, University oral examination.

GRADUATE PROGRAM IN HUMANITIES

The Department of Classics participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in Classics and Humanities. For a description of that program see the “Interdisciplinary Studies in Humanities” section of this bulletin.

COMPARATIVE LITERATURE

The Department of Classics cooperates closely with the graduate program in the Department of Comparative Literature. Interested students should consult the chair of the department.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Comparative Literature, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages. For courses in modern Greek language with the subject code SPECLANG, see the “Language Center” section of this bulletin.

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Classics department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in Classics are advised to consider satisfying their IHUM requirements by registering for the following courses.

IHUM 31A,B. Ancient Empires—A decisive place and period in world history: the Mediterranean basin from 800 B.C. to 400 A.D. Great empires (Assyria, Persia, Macedonia, and Rome) were carved out in war and changed the course of human development. Why did these empires arise when and where they did, how did they work, and what is their legacy? Their economic, religious, and artistic achievements balanced against genocide, enslavement, and warfare using evidence from ancient literature and archaeology, and tracing the roles of religion, property, and freedom. What they mean for the world today. GER:IHUM-2,3

IHUM 31A: 5 units, Win (Morris, I)

IHUM 31B: 5 units, Spr (Scheidel, W)

GREEK

UNDERGRADUATE

Students whose major work is in another department and who wish to fulfill a departmental foreign language requirement by taking Greek should consult their department advisers to determine the precise nature of that department’s requirements.

Courses in Greek have the subject code CLASSGRK. Classics majors and minors must take courses for letter grade.

CLASSGRK 1,2,3. Beginning Greek—No knowledge of Greek is assumed. Classics majors and minors must take course for letter grade.

3-5 units, **1:** Aut, **2:** Win, **3:** Spr (Porta, F)

CLASSGRK 10. Intensive Beginning Greek—Equivalent to CLASSGRK 1, 2, and 3. Goal is to read easy classical or New Testament Greek

by the end of the quarter. Short readings in philosophical Greek. Classics majors and minors must take course for letter grade.

8-9 units, Sum (Staff)

INTERMEDIATE/ADVANCED

Students are admitted to these courses by completing CLASSGRK 3 or 10, or on the basis of previous work in secondary school or elsewhere. Usually two to three years of secondary school Greek qualifies a student for 101, three to four years for 111. Students with previous knowledge of Greek should consult the Undergraduate Director in Classics to determine the course for which they are best suited.

Students whose major work is in another department and who wish to fulfill a departmental foreign language requirement by taking Greek should consult their department advisers to determine the precise nature of that department’s requirements. Most departments are satisfied if part of the series 101, 102, 103 is completed.

CLASSGRK 101. Intermediate Greek: Plato—Focus is on Plato’s *Crito*. Grammar and syntax. Classics majors and minors must take course for letter grade. May be repeated for credit.

5 units, Aut (McCall, M)

CLASSGRK 102. Intermediate Greek: Greek Tragedy—Euripides’ *Medea* with attention to questions of poetics, dramatic structure, theatrical performance, myth, and history. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Win (Balsley, K)

CLASSGRK 103. Intermediate Greek: Homer—Selections from the *Iliad*. Focus is on reading Homeric poetry with fluency and rapid comprehension. Style, meter, poetic techniques, and cultural background. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Spr (De Vivo, J)

CLASSGRK 111. Advanced Greek: Lyric Poetry—Invectives, love songs, drinking songs, elegies, and choral odes from 700-500 B.C.E. Readings include Sappho, Alcaeus, Archilochus, Mimnermus, Alcman, Solon, and Pindar. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Aut (Peponi, A)

CLASSGRK 112. Advanced Greek: Scientific Writings—Reading texts from Greek mathematics, physics, biology, and other areas. The relationship between form and meaning in the presentation of scientific information. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Win (Netz, R)

CLASSGRK 175A,B/275A,B. Greek Syntax: Prose Composition—(First-year graduate students register for 275A,B.) Review of Greek grammar and instruction in Greek prose composition skills. Begins 6th week of Winter Quarter and continues through Spring Quarter. Prerequisite for undergraduates: three years of Greek. Classics majors and minors must take course for letter grade.

A: 2 units, Win (Staff); **B:** 4 units, Spr (Kamen, D)

LATIN

UNDERGRADUATE

Students whose major work is in another department and who wish to fulfill a departmental foreign language requirement by taking Latin should consult their department’s advisers to determine the precise nature of those requirements. Most departments are satisfied if part of the series 101, 102, 103 is completed.

Courses in Latin have subject code CLASSLAT.

CLASSLAT 1,2,3. Beginning Latin: Vocabulary and Syntax—Vocabulary and syntax of the classical language, preparing students for readings including Cicero, Caesar, and Catullus. No previous knowledge of Latin is assumed. Classics majors and minors must take course for letter grade.

3-5 units, **1:** Aut, **2:** Win (Lain, N); **3:** Spr (Tomasso, V)

CLASSLAT 10. Intensive Beginning Latin—Equivalent to CLASSLAT 1, 2, 3; or 51 and 52. Goal is to read easy Latin prose and poetry by the end of the quarter. Classics majors and minors must take course for letter grade.

8-9 units, *Sum (Staff)*

INTERMEDIATE/ADVANCED

Students are admitted to these courses by completing CLASSLAT 3 or 10, or on the basis of previous work in secondary school or elsewhere. Usually two to three years of secondary school Latin qualifies a student for 101, three to four years for 111. Students with previous knowledge of Latin should consult the Undergraduate Director in Classics to determine the course for which they are best suited. Students whose major work is in another department and who wish to fulfill a departmental foreign language requirement by taking Latin should consult their department's advisers to determine the precise nature of those requirements. Most departments are satisfied if part of the series 101, 102, 103 is completed.

CLASSLAT 101. Intermediate Latin: Portrayals of Rome—Readings introducing major literary genres and figures of the period. Focus is on physical, moral, and societal aspects of Rome. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, *Aut (Janda, S)*

CLASSLAT 102. Intermediate Latin: Sallust's *War with Catiline*—The work in its entirety; its literary significance. Classics majors and minors must take course for letter grade. May be repeated for credit.

5 units, *Win (Braund, S)*

CLASSLAT 103. Intermediate Latin: Virgil—Readings from the *Aeneid*; its literary, artistic, and cultural background. Classics majors and minor must take course for letter grade. May be repeated for credit.

3-5 units, *Spr (Aftosmis, J)*

CLASSLAT 111. Advanced Latin: Livy—Preface, exemplary episodes, battle scenes, and speeches with stylistic analysis in relation to Livy's practice of history and its reception. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, *Aut (Ceserani, G)*

CLASSLAT 112. Advanced Latin: Cicero's *Catilinarian Orations*—Cicero as the cornerstone of classical Latin prose. Grammar, style and historical context in his speeches in prosecution of Catiline. What elements of his style may be considered classical, and why? How his involvement with the Catilinarian conspiracy affected his perspective and reputation. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, *Win (Parker, G)*

CLASSLAT 113. Advanced Latin: Elegiac Poetry—The genre of love elegy as practiced by Propertius, Ovid, and Tibullus; its antecedents and related forms in classical literature. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, *Spr (Haas, C)*

CLASSLAT 175A,B/275A,B. Latin Syntax—(First-year graduate students register for 275A,B.) Intensive review of Latin syntax. Begins Autumn Quarter and continues through the 5th week of Winter Quarter. See CLASSGEN 205A/B for supplemental course. Prerequisite for undergraduates: three years of Latin. Classics majors and minors must take course for letter grade.

A: 4 units, *Aut*; **B:** 2 units, *Win (Devine, A)*

GRADUATE

These courses have subject code CLASSGEN.

CLASSGEN 205A,B. The Semantics of Grammar—Supplements CLASSLAT/CLASSGRK 275. Introduction to the grammatical encoding of semantic and pragmatic meaning. 205A: morphology-semantics interface (gender, tense, aspect, case). 205B: syntax-pragmatics interface (Latin word order). Begins in Autumn Quarter and continues through 5th week of Winter Quarter.

2 units, *Aut, Win (Devine, A)*

CLASSGEN 207A,B,C/208A,B,C. Survey of Greek and Latin Literature—First course in a required two-year sequence. Focus is on the origins, development, and interaction of Greek and Latin literature, history, and philosophy. Greek and Latin material taught in alternate years. All major genres of Latin literature through Cicero. The social contexts of their production and consumption.

CLASSGEN 207A. Survey of Greek and Latin Literature: Republican Latin

4-5 units, *Aut (Parker, G)*

CLASSGEN 207B. Survey of Greek and Latin Literature: Augustan Age Latin

4-5 units, *Win (Barchiesi, A)*

CLASSGEN 207C. Survey of Greek and Latin Literature: Imperial Latin

4-5 units, *Spr (Braund, S)*

CLASSGEN 208A. Survey of Greek and Latin Literature: Archaic Greek

4-5 units, *alternate years, not given this year*

CLASSGEN 208B. Survey of Greek and Latin Literature: Classical Greek

4-5 units, *alternate years, not given this year*

CLASSGEN 208C. Survey of Greek and Latin Literature: Hellenistic and Late Greek

4-5 units, *alternate years, not given this year*

COURSES IN TRANSLATION

UNDERGRADUATE

CLASSGEN 6N. Antigone: From Ancient Democracy to Contemporary Dissent—(Same as DRAMA 12N.) Stanford Introductory Seminar. Preference to freshmen. Tensions inherent in the democracy of ancient Athens; how the character of Antigone emerges in later drama, film, and political thought as a figure of resistance against illegitimate authority; and her relevance to contemporary struggles for women's and workers' rights and national liberation. Readings and screenings include versions of Antigone by Sophocles, Anouilh, Brecht, Fugard/Kani/Ntshona, Paulin, Glowacki, Gurney, and von Trotta. GER:DB-Hum, EC-Gender

4 units, *Aut (Rehm, R)*

CLASSGEN 16. Eureka! Archimedes and His Science—The legends and reality of the life of one of the most important scientists in history. Archimedes' major discoveries in pure and applied science. No background in Greek or science required. GER:DB-Hum

3-5 units, *Win (Netz, R)*

CLASSGEN 17N. Odysseus of Many Turnings—Stanford Introductory Seminar. Preference to freshmen. Odysseus, the archaic Greek hero, through three millennia of fiction, poetry, art, and philosophy in the Old and New Worlds. Themes include initiation, seduction, wisdom, paternity, poetry, and death. Readings include: the *Odyssey*, Shakespeare's *Troilus and Cressida*, Sophocles' *Ajax* and *Philoctetes*, and Derek Walcott's *Omeros*; selections from Virgil, Seneca, Joyce, Adorno; and modern poets such as George Seferios and Constantine Cavafy. Films include *Gaze of Ulysses*, *Bloom*, and *O Brother, Where Art Thou?* GER:DB-Hum

4-5 units, *Aut (Martin, R)*

CLASSGEN 18. Greek Mythology—The heroic and divine in the literature, mythology, and culture of archaic Greece. Interdisciplinary approach to the study of individuals and society. Illustrated lectures. Readings in translation of Homer, Hesiod, Herodotus, and the poets of lyric and tragedy. GER:DB-Hum

3-5 units, *Aut (Hunt, P)*

CLASSGEN 20N. Mapping the Mediterranean—Stanford Introductory Seminar. Preference to freshman. How the Mediterranean has been represented, visually and textually, and the contexts in which such representations evolved. The roles of polytheistic and monotheistic religions in cartography. From the ancient period including Homer's *Iliad* to the times of Gerhardus Mercator, 1512-94. How the time span from Homer to

Mercator reveals the changes that make it necessary to examine the idea of the map. GER:DB-Hum

4-5 units, *Aut (Parker, G)*

CLASSGEN 24N. Sappho: Erotic Poetess of Lesbos—Stanford Introductory Seminar. Preference to freshmen. Sappho, the archaic poetess from the Greek island of Lesbos, as the most influential woman poetess in Western civilization. Readings include all of the surviving fragments in English. Traditions and writings referring to or fantasizing about her life and circle, from ancient to contemporary times. Knowledge of Greek poetry or culture not required. GER:DB-Hum, EC-Gender

3-5 units, *Win (Peponi, A)*

CLASSGEN 34. Ancient Athletics—The cultural history of ancient athletics, including funerary games described in Homer and Virgil. The balance between soul and body sought by ancient philosophers including Plato. Striving for excellence, finding glory without seeking it, and aiming for self-mastery in athleticism and intellectual training. Scholar-athletes at Nemea, Delphi, and Isthmia; city-state festivals hosted by Athens and Sparta.

3-5 units, *Win (Hunt, P)*

CLASSGEN 35. Becoming Like God: An Introduction to Greek Ethical Thought—The claim by Socrates, Plato, and Aristotle that people should identify wisdom as becoming like gods. Their rejection of Greek religion and morality, differing ethical theories, conceptions of happiness, and new conceptions of ethics. Ethical and political choices that involve justice and courage, and how Socrates, Plato, and Aristotle respond to them. Do they offer useful solutions to current ethical problems? GER:DB-Hum, EC-EthicReas

3-5 units, *Win (Nightingale, A)*

CLASSGEN 53N. Are We Our Bodies?—(Same as COMPLIT 53N.) Preference to freshmen. Is the mind a bodily entity, or is it separate from the body, a purely rational or spiritual entity? If people identify with their minds, what are the ethical obligations to the bodily world? Do intellectual faculties make people superior to nonhumans? Do human beings have the right to control the natural world and use it for human purposes? If minds are bodily entities, how does this affect ethics and values? GER:DB-Hum

3-4 units, *Spr (Nightingale, A)*

CLASSGEN 102. The River Nile: Ancient Representations of the River—Why the Nile fascinated ancient Greeks and Romans. Sources include ancient texts and images, from Herodotus through early Christianity, and their social contexts. 18th- and 19th-century uses of ancient geographies and attempts to locate the sources of the Nile. GER:DB-Hum

4-5 units, *Win (Parker, G)*

CLASSGEN 105. The Ends of the Earth, Ancient and Modern—How the ancient Greeks and Romans imagined far away places and peoples. To what extent do ancient travel experiences resonate in modern times? Greek and Roman travels and encounters with foreign peoples and exotic places. Sources include ancient texts in English such as Homer's *Odyssey* and Tacitus' descriptions of Britain and Germany, and visual representations. GER:DB-Hum, EC-GlobalCom

4-5 units, *Win (Ceserani, G)*

CLASSGEN 114/214. The Paradox of Seneca—(Graduate students register for 214; same as PHIL 114/214.) Millionaire or ascetic, principled Stoic or compromised courtier, advocate of detachment or addict of bloodthirsty tragedies: the contradictory facets of the philosopher Seneca, tutor to the young Nero. His views on living and dying well, passion and philosophy, and nature and civilization. Readings in English from his prose writings and tragedies. GER:DB-Hum

3-5 units, *Spr (Bobonich, C; Braund, S)*

CLASSGEN 117. Gender, Violence, and the Body in Ancient Religion—The sex-gender system of ancient Greece. How did polarization of the sexes become a master metaphor for power struggles between husbands and wives, among men, and among parts of the self? How did religious activity, including drama, mitigate or intensify the stresses of living in a society polarized along gender lines? GER:DB-Hum, EC-Gender

3-4 units, *Spr (Gleason, M)*

CLASSGEN 133. Invention of Science—Does science have to be the way it is? Does it have to be at all? The creation of science in the ancient Greek world; its invention of concepts such as nature, rationality, and proof; and its invention of fields from biology to geometry. Comparison with the Chinese invention of a different kind of science. The extent to which contemporary science is still Greek science. GER:DB-Hum

3-5 units, *Aut (Netz, R)*

CLASSGEN 161/261. Performance and Politics—(Same as DRAMA 161/261.) Ancient Greek tragedy which developed simultaneously with democracy. The theater of Bertolt Brecht, Friedrich Duerrenmatt, Peter Weiss, Howard Barker, Naomi Wallace, Anna Deavere Smith, and Tony Kushner. Films by Tomás Gutiérrez Alea, Lina Wertmüller, Mike Nichols, Barbara Kopple, John Sayles, and Michael Moore. The politics of popular music. GER:DB-Hum

5 units, *Aut (Rehm, R)*

CLASSGEN 163. Texts in History: Classics from Greece to Rome—(Same as DRAMA 161R, HUMNTIES 161.) Priority to students in the Humanities honors program. Ancient texts situated in their intellectual and cultural contexts. Readings include Homer's *Iliad* and *Odyssey*, plays of Aeschylus, Sophocles' *Antigone*, Euripides' *Medea*, Thucydides' *Peloponnesian War*, Plato's *Symposium*, Aristotle's *Poetics*, Virgil's *Aeneid*, Seneca's *Trojan Women* and *Agamemnon*, and Augustine's *On Christian Doctrine*. GER:DB-Hum

5 units, *Aut (Rehm, R)*

CLASSGEN 176. Majors Seminar: Desire in Antiquity—Verbal and visual representations of desire in Greece and Rome. How Greeks and Romans experienced, theorized, and fantasized about this aspect of their private and social life. GER:DB-Hum, WIM

3-5 units, *Win (Peponi, A)*

CLASSICS/HISTORY

CLASSHIS 22N. Ancient and Modern Slavery—Stanford Introductory Seminar. Preference to freshmen. Greeks and Romans created the largest slave societies in premodern history. How did slavery shape classical civilization and define perceptions of human nature; how does it compare to later slave systems? Focus is on comparison of ancient and modern slavery. GER:DB-Hum

3-5 units, *Spr (Scheidel, W)*

CLASSHIS 50Q. Rome, Europe, and China: Convergence and Divergence—Stanford Introductory Dialogue. Preference to sophomores. How states and cultures in eastern and western Eurasia developed over the past 3,000 years; present-day relevance. Recent scholarship, including current faculty research. GER:DB-SocSci

5 units, *Win (Scheidel, W)*

CLASSHIS 60. The Romans—How did a tiny village create a huge empire and shape the world, and why did it fail? Roman history, imperialism, politics, social life, economic growth, and religious change. GER:DB-Hum

3-5 units, *Win (Scheidel, W)*

CLASSHIS 101. The Greeks—Greek history from the palaces of the late Bronze Age through Alexander the Great's conquest of Persia, surveying economics, society, culture, and technology. Why Greek culture combined unusual freedom for ordinary men with large-scale chattel slavery and extreme gender ideologies; the origins and practices of democracy; and relations with non-Greek peoples. Focus is on ancient sources and archaeological remains. GER:DB-Hum

4-5 units, *alternate years, not given this year*

CLASSHIS 105. History and Culture of Ancient Egypt—From 3000-30 B.C.E. Emphasis is on long-term social and economic development. GER:DB-Hum, EC-GlobalCom

3-5 units, *Spr (Manning, J)*

CLASSHIS 131. Science and Technology in Ancient Egyptian Society—(Same as STS 120.) From 3000 B.C.E. to the Roman period. What was the source of technological change and innovation in Egypt? Why

is the ancient Egyptian legacy important for later developments? What was the balance between changes internal and external to Egypt? Topics: ancient texts concerned with science, technology, mathematics, astronomy, medicine; Egyptian material culture and building techniques; the economic role of technology; Alexandrian science and its legacy. GER:DB-Hum

3-4 units, *Spr* (Manning, J)

CLASSHIS 132. Ethics of Political Animals—(Same as ETHICSOC 132X, POLISCI 132.) The ancient Greek conception of ethics as arising from human social and political nature. Problems related to values, identity, and responsibility. Topics include civic friendship, equality, reciprocity, integrity, dignity, and legal obedience. GER:DB-Hum, EC-EthicReas

5 units, *Spr* (Ober, J)

CLASSHIS 133/333. History of Political Thought I—(Graduate students register for 333; same as POLISCI 130A/330A.) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change. GER:DB-Hum

5 units, *Win* (Ober, J)

CLASSHIS 150. Ancient Greece in the Modern West: History, Politics, and Classics—How ancient Greece become central to the definition of modernity; how ancient Greek ideas and ideals shaped modern life over the last 250 years; how modern perspectives changed perception of the ancients. Sources include ancient and modern historians, travel and antiquarian writings, French and American revolutionary debates, archaeological images, and modern visual imagery. May be repeated for credit. GER:DB-Hum

4-5 units, *Aut* (Ceserani, G)

CLASSICS, ART/ARCHAEOLOGY

CLASSART 21Q. Eight Great Archaeological Sites in Europe—Stanford Introductory Seminar. Preference to sophomores. Focus is on excavation, features and finds, arguments over interpretation, and the place of each site in understanding the archaeological history of Europe. Goal is to introduce the latest archaeological and anthropological thought, and raise key questions about ancient society. The archaeological perspective foregrounds interdisciplinary study: geophysics articulated with art history, source criticism with analytic modeling, statistics interpretation. A Web site with resources about each site, including plans, photographs, video, and publications, is the basis for exploring. GER:DB-Hum, WRITE-2

3-5 units, *Aut* (Shanks, M)

CLASSART 61. Archaeologies of the Greek Past—From the collapse of the Bronze Age palaces to the conquests of Alexander the Great. How material culture helps reconstruct ancient Greek society. Why the Greeks built temples. The influence of the Near East on Greek culture. Archaeology and class, gender, and ethnic relations. Is there an archaeology of Greek democracy? Complements ARTHIST 101, CLASSHIS 101, 102. GER:DB-Hum

3-5 units, *Aut* (Staff)

CLASSART 81. Introduction to Roman Archaeology—The Roman past, 8th century B.C.E. to 5th century C.E., interpreted through its material remains including imperial palaces, temples, provincial towns, and garbage pits. Material evidence on key areas of Roman life and history: cultural identity, economics, religion, ancient state formation, the emperor's image, sex and gender, Roman encounters with non-Romans, and military life. Relationship between literary and archaeological evidence. Sites include Rome, Pompeii, Athens, Ephesus, Vindolanda and Hadrian's Wall, Palmyra and the provinces of Africa, Asia Minor, Britain, and Gaul. GER:DB-Hum

3-5 units, *Win* (Staff)

CLASSART 101/201. Archaic Greek Art—(Graduate students register for 201; same as ARTHIST 101/301.) The development of Greek art and culture from protogeometric beginnings to the Persian Wars, 1000-480 B.C.E. The genesis of a native Greek style; the orientalizing phase during which contact with the Near East and Egypt transformed Greek art; and the synthesis of East and West in the 6th century B.C.E. GER:DB-Hum

4 units, *Aut* (Maxmin, J)

CLASSART 102/202. Classical and 4th-Century Greek Art—(Graduate students register for 202; same as ARTHIST 102/302.) The formation of the classical ideal in 5th-century Athenian art, and its transformation and diffusion in the 5th and 4th centuries against changing Greek history, politics, and religion. GER:DB-Hum

4 units, *not given this year*

CLASSART 105. The Body in Roman Art—Ancient and modern ideas about the body as ideal and site of lived experience. Themes include representation, portrayal, power, metamorphosis, and replication. Works that exemplify Roman ideas of heroism and power versus works portraying nude women, erotic youth, preserved corpses, and suffering enemies. Recommended: background in ancient Mediterranean art, archaeology, history, or literature. GER:DB-Hum

4-5 units, *Spr* (Trimble, J)

CLASSART 109. Greek Art in Context—(Same as ARTHIST 203.) The cultural contexts in which art served religious, political, commercial, athletic, sympotic, and erotic needs of Greek life.

5 units, *Aut* (Maxmin, J)

CLASSART 110. Appropriations of Greek Art—(Same as ARTHIST 204A.) The history of the appropriation of Greek art by Rome, the Renaissance, Lord Elgin, and Manet.

5 units, *Spr* (Maxmin, J)

CLASSART 113/213. Ten Things: Science, Technology, and Design—(Graduate students register for 213; same as STS 112.) Connections among science, technology, society and culture by examining the design of a prehistoric hand axe, Egyptian pyramid, ancient Greek perfume jar, medieval castle, Wedgewood teapot, Edison's electric light bulb, computer mouse, Sony Walkman, supersonic aircraft, and BMW Mini. Interdisciplinary perspectives include archaeology, cultural anthropology, science studies, history and sociology of technology, cognitive science, and evolutionary psychology. GER:DB-SocSci

4-5 units, *Win* (Shanks, M)

CLASSART 126. Alpine Archaeology—What distinguishes archaeological research in high montane environments with year-round cold temperatures from other archaeological contexts and fieldwork? Comparison with other global field methodologies. Emphasis is on Gallo-Roman, Celtic, and medieval finds. Required for students participating in Stanford's late summer dig in the Grand-St-Bernard pass in the Alps. GER:DB-Hum

3-5 units, *Spr* (Hunt, P)

CLASSART 150/250. Archaeological Field Work in the Mediterranean—(Graduate students register for 250.) Required for students taking part in Stanford's excavation at Monte Polizzo, Sicily. The history and archaeology of Sicily from 1000 B.C.E. to the present. Excavation techniques and recording system in use at Monte Polizzo. GER:DB-Hum

3 units, *Spr* (Staff)

CLASSART 198S. Digital Humanities—(Same as HUMNTIES 198S.) How digital technologies are involved in rethinking research and learning in the arts and humanities. Topics include: visualization, simulation and gaming, authoring, collaborative research, publication and dissemination, interactivity, and information management. Examples of cutting-edge research. Project-based. GER:DB-Hum

4-5 units, *Spr* (Shanks, M)

INDIVIDUAL STUDY

CLASSGEN 160. Directed Readings (Undergraduate)

1-15 units, *Aut, Win, Spr, Sum* (Staff)

CLASSGEN 199. Undergraduate Thesis: Senior Research

1-6 units, *Aut, Win, Spr, Sum* (Staff)

CLASSGEN 260. Directed Reading in Classics

1-15 units, *Aut, Win, Spr, Sum* (Staff)

CLASSGEN 360. Dissertation Research in Classics

10 units, *Aut, Win, Spr, Sum* (Staff)

GRADUATE SEMINARS

Graduate seminars vary each year. The following are given this year.

GENERAL (CLASSGEN)

CLASSGEN 209. Seneca's *De Clementia* and Its Context—The Stoic treatise written to guide the young Nero on his accession to emperor, as a work of literature and political philosophy, and in the context of other contemporaneous Latin works including Seneca's *Apocolocyntosis* and Calpurnius Siculus' *Eclogues*. The methodology of preparing a philological commentary on a Latin text.

4-5 units, Aut (Braund, S)

CLASSGEN 212. Mimesis in Greek Poetry and Philosophy—Mimesis as the cornerstone of Greek thought on artistic representation, poetry, performance, and the visual arts, and relationships among them; its influence on Western theory. The concepts of mimesis as used by poets and philosophers themselves. Focus is on semantics and implications of the term in lyric and dramatic poetry and the philosophies of Plato and Aristotle. The notion of fictionality, and its conceptualization in philosophic texts.

4-5 units, Spr (Nightingale, A; Peponi, A)

CLASSGEN 213. The Poetics of Ancient Science—Science as a literary genre as an integral part of ancient civilization, with attention to its cognitive, semiotic, and aesthetic properties. Examples from classical, hellenistic, and late ancient sources.

3-5 units, Aut (Netz, R)

CLASSGEN 216. Homer and Greek Religion—(Same as HISTORY 311.) The relationship between poetic representation and archaeological record; development of polis ideology; ritual, topography, and language as religious expressions; and the meaning of religion as a cultural category.

4-5 units, Aut (Martin, R; Morris, I)

CLASSGEN 217. Homeric Text and Language—Homeric grammar and syntax, and diction and verse. Relative chronology, formulaic variation and diction systems, differences in speech versus narrative passages, the role of archaisms and innovations, and contrasts with other hexameter poetry in Greek. Fulfills archaeology track literature requirement.

4-5 units, Win (Martin, R)

CLASSGEN 218. The Lyric Poems of Horace—The four books of *Carmina* and the *Carmen Saeculare*. Tools for interpretation. The relationship between performance and text; meter and music; presence of Greek models and their functions; praise and political admonition; choral and individual voice; landscape; and symposium culture.

4-5 units, Win (Barchiesi, A)

CLASSGEN 321. Classical Seminar—(Same as HUMNTIES 321.) The dialogue between literature and philosophy in Greek and Roman cultures. Homer, Greek tragedy, Plato, Aristotle, Lucretius, Virgil, Augustine, Nietzsche's *Birth of Tragedy*, and Walcott's *Omeros*.

3-5 units, Aut (Nightingale, A)

HISTORY (CLASSHIS)

CLASSHIS 210. The Remaking of Classics—Redefinition, reconfiguration, and enrichment by new perspectives on the study of classical antiquity over the last two centuries. The main currents of thought that have shaped the field, focusing on competing approaches to themes such as people, power, beliefs, and letters. Guest moderators.

4-5 units, Win (Ceserani, G; Scheidel, W)

CLASSHIS 431. Collective Action in Democratic Athens—(Same as POLISCI 431.) How can a collectivity reap the social benefits of cooperation in the face of the tendency of self-seeking individuals to defect? The problem is pressing in democracies, which require cooperation by diverse persons, and in highly competitive environments such as the classical Greek city states. Focus is on the organizational design of classical Athens as a state; how political institutions served to organize useful social and technical knowledge.

5 units, Spr (Ober, J)

ART AND ARCHAEOLOGY (CLASSART)

CLASSART 309. New Directions in Roman Archaeology—Past, present, and future developments in Roman archaeology, including research trends, sites and projects, the impact of theoretical developments, and the relationship of changing methods to research design and interpretation. What this field has been and why, questions currently driving the field, and new directions for students' research and fieldwork.

5 units, Aut (Trimble, J)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

ARTHIST 3. Introduction to the History of Architecture

5 units, Spr (Beischer, T)

ARTHIST 105A/305A. Islamic Art around the Mediterranean

4 units, Win (Staff)

ARTHIST 106/306. Byzantine Art and Architecture, 300-1453 C.E.

4 units, Win (Pentcheva, B)

ARTHIST 107/307. Age of Cathedrals

4 units, Aut (Pentcheva, B)

ARTHIST 410. Aesthetics of the Icon

5 units, Win (Pentcheva, B)

ARTHIST 507. Medieval Image Theory

5 units, Aut (Pentcheva, B)

ARTHIST 512. The Time of the Object

5 units, Win (Lee, P)

CASA 108. History of Archaeological Thought—(Same as ARCH-LGY 103.)

5 units, Aut (Meskell, L)

CASA 158. Sex, Death, and the Body in Ancient Egypt

5 units, Win (Meskell, L)

CASA 172/272. Object Lessons

3-5 units, Aut (Meskell, L)

CASA 360. Archaeological Methods and Research Design

5 units, Spr (Hodder, I)

CASA 373. Introduction to Archaeological Theory

5 units, Win (Hodder, I)

ENGLISH 112A. Wicked Witches of the West: Dangerous Women in Greek and Shakespearean Tragedy

5 units, Aut (Friedlander, L)

ENGLISH 170A/270A. Introduction to Critical Theory: Literary Theory and Criticism Since Plato

5 units, Win (Kaufman, R)

FRENGEN 181. Philosophy and Literature—(Same as ITALGEN 181, PHIL 81.)

4 units, Win (Anderson, L; Landy, J)

HISTORY 135/335. History of European Law, Medieval to Contemporary

5 units, Win (Herzog, T)

HISTORY 203A/303A. Theories of the State from the Ancient World to the Present

5 units, Win (Baker, K; Sheehan, J)

HISTORY 205B/305B. Quantitative Methods in Historical Research

5 units, Win (Klein, H)

HISTORY 305. Graduate Workshop in Teaching

1 unit, Spr (Kollmann, N; Roberts, R)

HISTORY 309E. History Meets Geography*5 units, Spr (Frank, Z)***PHIL 10. God, Self, and World: An Introduction to Philosophy***5 units, Win (Perry, J)***PHIL 20. Introduction to Moral Philosophy**—(Same as ETHICSOC 20.)*5 units, Spr (Seidman, J)***PHIL 30. Introduction to Political Philosophy**—(Same as ETHICSOC 30, POLISCI 3.)*5 units, Win (Stone, P)***PHIL 107/207. Plato and Heraclitus***3 units, Spr (Moravcsik, J)***PHIL 194C. Undergraduate Seminar***4 units, Win (Wood, A)***PHIL 194D. Certainty and Language***4 units, Spr (Dunlop, K)*

COMMUNICATION

Emeriti: (Professors) Henry S. Breitrose, Richard A. Brody, Donald F. Roberts; (Professors, Teaching) Ronald Alexander, Marion Lewenstein, James Risser

Chair: James Fishkin

Director, Institute for Communication Research: James Fishkin

Director, John S. Knight Fellowships for Professional Journalists: James R. Bettinger

Director, Media Studies: Jeremy Bailenson

Director, Undergraduate Studies: Fred Turner

Deputy Director, John S. Knight Fellowships for Professional Journalists: Dawn E. Garcia

Acting Director, Journalism: Ann Grimes

Professors: James Fishkin, Theodore L. Glasser, Shanto Iyengar, Jon Krosnick, Clifford Nass, Byron B. Reeves

Associate Professor: Marcyliena Morgan

Assistant Professors: Jeremy Bailenson, Fred Turner

Lecturers: John Markoff, Howard Rheingold, James Wheaton, Gregg Zachary

Courtesy Professors: Jan Krawitz, Lawrence Lessig, Walter W. Powell, Kristine M. Samuelson

Visiting Professors: Joel Brinkley, Ann Grimes

Visiting Associate Professors: Robert Luskin, Beth Noveck

Visiting Hearst Professional in Residence: Glenn Frankel

Department Offices: McClatchy Hall, Building 120, Room 110

Mail Code: 94305-2050

Phone: (650) 723-1941

Web Site: <http://communication.stanford.edu>

Courses given in Communication have the subject code COMM. For a complete list of subject codes, see Appendix.

The Department of Communication engages in research in communication and offers curricula leading to the B.A., M.A., and Ph.D. degrees. The M.A. degree prepares students for a career in journalism. The department also offers students who are completing a B.A. in another department, a co-terminal program with an M.A. emphasis in Media Studies. The Ph.D. degree leads to careers in university teaching and research-related specialties.

The Institute for Communication Research offers research experience primarily to advanced Ph.D. students.

The John S. Knight Fellowships program brings outstanding mid-career journalists to the University to study for an academic year. The John S. and James L. Knight Foundation sponsors twelve U.S. journalists. They are joined by eight International Fellows sponsored by the Shinyoung Journalism Fund, the Lyle and Corrine Nelson International Fellowship Fund, the Knight Foundation, the Hearst Foundation, the Fulbright Program, the Koura Foundation, and others.

ADMISSION

Prospective Undergraduates—Write to the University's Office of Undergraduate Admissions, Stanford University, Stanford, California 94305-3020.

Prospective Coterminal Students—Applications are available online at <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

Prospective Graduate Students—Online applications are preferred and can be submitted on the web at <http://gradadmissions.stanford.edu>.

The department requires that applicants for graduate admission submit verbal and quantitative scores from the Graduate Record Examination (GRE). Admission to each graduate degree program is competitive, based on the pool of applicants each year rather than on standard criteria that can be stated in advance. The GRE should be taken no later than early November prior to the early December application deadline.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

PREPARATION

Before declaring the major, students must have completed or be concurrently enrolled in one of the following:

COMM 1A (formerly COMM 1) or COMM 1B

COMM 106

COMM 108

Students interested in declaring the major should see the student services administrator in Building 120, Room 110A, during scheduled office hours. Students are required to take at least 60 units (approximately 12 courses), not counting statistics, to complete the major.

PROGRAM OF STUDY

The undergraduate curriculum is intended for liberal arts students who wish to develop an understanding of communication in society, drawing on the perspective of the social sciences. Undergraduates majoring in Communication are expected to become acquainted with the fundamental concerns, theoretical approaches, and methods of the field, and to acquire advanced knowledge in one or more of the sub-areas of communication institutions, processes, and effects.

While the department does not attempt to provide comprehensive practical training at the undergraduate level, the curriculum provides a diverse range of internship opportunities including professional print journalism, some of which are funded by the department's prestigious Rebele Internship Program.

The department is committed to providing students with analytical and critical skills for future success in graduate programs, professional schools, or immediate career entry.

The major is structured to provide several levels of study: a core curriculum, intended to expose students to a broad-based understanding of communication theory and research, and a number of intermediate-level options and electives. Majors also have the opportunity to do advanced research in the form of senior projects and honors theses.

All undergraduate majors are required to complete a set of core communication courses which include COMM 1A (formerly COMM 1), Media Technologies, People, and Society (5 units) or COMM 1B, Media, Culture, and Society (5 units); COMM 120, Digital Media in Society (WIM, 5 units); COMM 106, Communication Research Methods (5 units); and COMM 108, Media Processes and Effects (5 units). Core courses are usually given only once each year.

The department also requires completion of or concurrent registration in an introductory statistics course (STATS 60 or PSYCH 10) prior to registration in COMM 106, Communication Research Methods, in preparation for courses in methodology and advanced courses in communication processes and effects. It is recommended that this be done as soon as possible so as not to prevent registration in a course requiring statistical understanding. The Statistics course does not count toward the 60 units to complete the Communication major.

In addition to the core courses and the statistics requirement, undergraduate majors select courses from the areas described below. Many of the courses require core courses as prerequisites.

Area I: Communication Processes and Effects—Area I emphasizes the ways in which communication scholars conduct research in, and consider the issues of, human communication. These studies aim to provide expert guidance for social policy makers and media professionals. A minimum of two courses must be taken from COMM 146, 149, 160, 162, 166, 169, 170, 172.

Area II: Communication Systems/Institutions—Area II considers the roles and interaction of institutions such as broadcasting, film, journalism, constitutional law, and business within communication and mass communication contexts. A minimum of two courses must be taken from COMM 104, 116, 120, 125, 131, 136, 148.

Options—The Communication curriculum is designed to provide a theoretical base that can be effectively applied to numerous environments. The potential options listed below are not required, but are examples of how to focus your interests.

1. Communication Technologies
 - a) Department of Communication (COMM):
 120. Digital Media in Society
 166. Virtual People
 169. Computers and Interfaces: Psychology and Design
 172. Psychological Processing of Media
 - b) Affiliated department offerings (elective credit toward the major):
 - 1) Computer Science (CS)
 105. Introduction to Computers
 - 106A. Programming Methodology
 147. Introduction to HCI
 201. Computers, Ethics, and Social Responsibility
 247. Human Computer Interaction: Interaction Design Studio
 - 2) Science, Technology, and Society (STS)
 101. Science, Technology, and Contemporary Society
2. Communication and Public Affairs
 - a) Department of Communication (COMM)
 125. Perspectives on American Journalism
 136. Democracy and the Communication of Consent
 160. The Press and the Political Process
 162. Analysis of Political Campaigns
 170. Communication and Children
 - b) Affiliated department offerings (elective credit toward the major)
 - 1) Department of Political Science (POLISCI)
 123. Politics and Public Policy
 - 2) Department of Psychology (PSYCH)
 75. Cultural Psychology
 167. Seminar on Aggression
 180. Social Psych. Perspectives on Stereotyping and Prejudice
 - 3) Public Policy Program (PUBLPOL)
 104. Economic Policy Analysis
 194. Technology Policy
3. Media Practices and Performance
 - a) Department of Communication (COMM)
 120. Digital Media in Society
 125. Perspectives on American Journalism
 131. Media Ethics and Responsibilities
 160. The Press and the Political Process

The remainder of the 60 required units may be fulfilled with any elective Communication courses, or crosslisted courses in other departments.

To be recommended for the B.A. degree in Communication, the student must complete at least 60 units (approximately twelve courses) in the department. No more than 10 units of transfer credit or Summer Session may be applied to meet department requirements. Communication majors must receive a letter grade for all Communication courses unless they are offered only for satisfactory/no credit (S/NC), and maintain a grade point average (GPA) of 2.0 (C) in courses towards the major.

MINORS

PREPARATION

Before declaring the minor, students must have completed or be currently enrolled in one of the following:

COMM 1A (formerly COMM 1) or COMM 1B
COMM 106
COMM 108

Students interested in declaring the minor should apply via Axess. Students are required to take 36 units (approximately 8 courses), not counting statistics, to complete the minor.

PROGRAM OF STUDY

The minor is structured to provide a foundation for advanced course work in communication through a broad-based understanding of communication theory and research.

The minor in Communication consists of three introductory Communication core courses that include COMM 1A (formerly COMM 1), Media Technologies, People, and Society (5 units) or COMM 1B, Media, Culture, and Society (5 units); COMM 106, Communication Research Methods (5 units); and COMM 108, Media Processes and Effects (5 units).

In addition to the three core courses, the minor requires a minimum of five intermediate-level elective courses in the department. The department also requires completion of or concurrent registration in an introductory statistics course (STATS 60 or PSYCH 10) prior to registration in COMM 106, Communication Research Methods. It is recommended that the course in statistics be taken as early as possible, preferably in the Autumn Quarter of the junior year. The Statistics course does not count toward the 36 units to complete the Communication minor.

Students interested in declaring a minor must do so no later than registration day in the Autumn Quarter of the junior year. Core courses are usually offered only once annually, and they constitute a sequence:

Prerequisite: introductory statistics course (for example, PSYCH 10)
Core Courses: COMM 1A (formerly COMM 1) or COMM 1B, 106, 108

Area I: Communication Processes and Effects: a minimum of one course from COMM 146, 149, 160, 162, 166, 169, 170, 172

Area II: Communication Systems/Institutions: a minimum of one course from COMM 104, 116, 120, 125, 131, 136, 148

Plus elective courses amounting to 15 units.

Some courses are not given every year. Refer to the *Time Schedule* for details.

HONORS PROGRAM

The honors program provides undergraduates the opportunity to undertake a significant program of research in an individual professor/student mentoring relationship. The aim is to guide students through the process of research, analysis, drafting, rethinking, and redrafting, which is essential to excellence in scholarship. Working one-on-one with a faculty adviser, seniors earn 15 Communication units, culminating in an honors thesis. In order to be eligible for the honors program, interested majors must have: (1) successfully completed both a research methods and statistics course, (2) selected an adviser, and (3) submitted an application to the department by the end of their junior year. An application may be picked up outside Room 110, Building 120.

Students are expected to make steady progress on their honors thesis throughout the year. Students who fail to submit a satisfactory draft Autumn Quarter will be dropped from the program.

A final copy of the honors thesis must be read and approved by the adviser and submitted to the department by the eighth week of Spring Quarter (exact date to be arranged). It becomes part of a permanent record held by the department. Honors work may be used to fulfill communication elective credit but must be completed and a letter grade submitted prior to graduation. A student failing to fulfill all honors requirements may still receive independent study credit for work completed and it may be applied toward fulfilling major requirements.

The designation “with honors” is awarded by the Department of Communication to those graduating seniors who, in addition to having completed all requirements for the Communication major:

1. complete an honors thesis
2. maintain a distinguished GPA in all Communication course work
3. are recommended by the Communication faculty

COTERMINAL BACHELOR’S AND MASTER’S PROGRAM

The Department of Communication offers students who are completing a B.A. in another department, a coterminal program with an M.A. emphasis in Media Studies; see “Media Studies Program” below for more information.

Applications for coterminal study must be submitted at least four quarters in advance of the expected master’s degree conferral date. Applicants must have earned a minimum of 120 units toward graduation (UTG) as shown on the undergraduate unofficial transcript. This includes allowable advanced placement (AP) and transfer credit. Applications may be submitted no later than December 1, 2006 for admission beginning in either Winter or Spring Quarter 2006-07 or Autumn Quarter 2007-08. There is no rolling admission in the Communication department. Requirements include: Application for Admission to Coterminal Master’s Program form, preliminary program proposal, statement of purpose, three letters of recommendation from Stanford professors, and a current Stanford transcript. GRE scores are not required. Coterminal applications are submitted directly to the department. Review procedures and the Graduate Admissions Committee determine criteria.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

GRADUATE PROGRAMS MASTER OF ARTS

University requirements for the master’s degree are described in the “Graduate Degrees” section of this bulletin.

The department awards a terminal M.A. degree in Journalism. Applicants for this program, and for doctoral work, are evaluated for admission on different criteria. A student may complete more than one M.A. degree in the department, but course work applied to the requirements for one M.A. degree may not be applied to a second. All work to fulfill graduate degree requirements must be in courses numbered 100 or above.

Students who complete an M.A. degree and who desire entry into the Ph.D. program must file a Graduate Program Authorization Petition application that may be picked up at the Registrar’s Information Windows or at <http://registrar.stanford.edu/publications/#GradStud>. Such students are considered alongside all other doctoral applicants.

The M.A. degree in Media Studies is only available to current Stanford University undergraduates who are majoring in another department. See more information on subsequent pages for additional description.

JOURNALISM

Stanford’s Graduate Program in Journalism focuses on the knowledge and skills required to report, analyze, and write authoritatively about public issues. The curriculum combines a sequence of specialized reporting and writing courses with seminars and courses devoted to deepening the students’ understanding of the roles and responsibilities of American news media in their coverage of public issues.

The program emphasizes preparation for the practice of journalism and a critical perspective from which to understand it. The program’s objective is twofold: (1) to graduate talented reporters and writers to foster public understanding of the significance and consequences of public issues and the debates they engender; and (2) to graduate thoughtful journalists to respond openly and eloquently when called on to explain and defend the methods of their reporting and the quality of their writing.

CURRICULUM

The curriculum includes several required courses, examples of which are shown below, and a master’s project:

- 216. Journalism Law
- 217. Digital Journalism
- 220. Digital Media in Society
- 225. Perspectives on American Journalism
- 231. Media Ethics And Responsibilities
- 273. Public Issues Reporting I
- 274. Public Issues Reporting II
- 289. Journalism M.A. Project
- 291. Graduate Journalism Seminar

Additionally, students are usually required to take two specialized writing courses, chosen from a list of four or five, and one to four approved electives from among graduate-level courses in the Department of Communication, or from among courses on campus that deal substantively with issues of public importance. The M.A. degree in Communication (Journalism) requires a minimum of 49 units.

Except for the Graduate Journalism Seminar and the Journalism Project, all courses must be taken for a letter grade. To remain in good academic standing, students must maintain a grade point average (GPA) of 3.0 or better. Graduation requires a GPA of 3.0 or better.

JOURNALISM PROJECT

The master’s project, a requirement for graduation, is intended as an opportunity for students to showcase their talents as writers and reporters. It is also an opportunity to undertake an in-depth critique of an area of journalism in which the author has a special interest. Work on the project usually begins during the Winter Quarter and continues through the Spring Quarter. It represents a major commitment of time, research, and writing. Although it is not a requirement that the project be published, it must be judged by a member of the faculty to be of a quality acceptable for publication. At a minimum, the project should demonstrate the rigor and discipline required of good scholarship and good journalism; it should offer ample evidence of students’ ability to gather, analyze, and synthesize information in a manner that goes beyond what ordinarily appears in daily newspapers.

MEDIA STUDIES

The Media Studies coterminal master’s program provides a broad introduction to scholarly literature in mass communication. This one-year program is designed for current Stanford students without prior academic work in communication, who wish academic preparation for teaching.

Media Studies students need to satisfy four basic requirements:

1. *Required Units and GPA*: students must complete a minimum of 45 units in Communication and related areas, including items 2 and 3 below. All courses, except for the Media Studies M.A. Project, must be taken for a letter grade if offered, and courses in related areas outside the department must be approved by the student’s adviser. To remain in good academic standing, students must maintain a grade point average (GPA) of 3.0 or better. Graduation requires a GPA of 3.0 or better.
2. *Core Requirements*: students must complete COMM 206, 208, and a statistics course. Typically, the statistics requirement is met with STATS 160 or 190. Other courses occasionally are approved as a substitute before the student is admitted to the program. The Statistics course does not count toward the 45 units.
3. *Six Media Studies Courses*: students must complete a minimum of 6 additional communication courses from the following list of department courses concerned with the study of media. While the department also offers graduate-level courses teaching media-related skills (e.g., COMM 277), these courses are intentionally excluded from the list. Not all the listed courses are offered every year and the list may be updated from one year to the next. However, its intent is to include only courses in media studies, not media skills. In addition to the core requirements and a minimum of 6 courses listed below, students may select additional courses from the list and any related course approved by the student’s adviser.

- 211. Media Technologies, People, and Society
- 216. Journalism Law
- 217. Digital Journalism

- 220. Digital Media in Society
- 225. Perspectives on American Journalism
- 231. Media Ethics and Responsibility
- 236. Democracy and the Communication of Consent
- 238. Democratic Theory
- 246. Language and Discourse: Race, Class, and Gender
- 248. Hip-Hop and Don't Stop: Introduction to Modern Speech Communities
- 260. The Press and the Political Process
- 262. Analysis of Political Campaigns
- 266. Virtual People
- 268. Experimental Research in Advanced User Interfaces
- 269. Computers and Interfaces: Psychology and Design
- 270. Communication and Children
- 272. Psychological Processing of Media
- 273. Public Issues Reporting I
- 274. Public Issues Reporting II
- 314. Doctoral Research Methods IIB*
- 318. Doctoral Research Methods II*
- 319. Doctoral Research Methods III*

4. *The Media Studies MA Project*: students complete a project usually related to one of the required Communication courses listed in item 3 above. The project requirement is intentionally flexible to permit students to adjust it to their interests, in consultation with professors.
- a) The project typically evolves from a paper assigned in a Communication course that has been pre-approved by the student's Media Studies adviser.
 - b) The project must be supervised by a faculty member, usually the professor who taught the course that inspired the project (but not necessarily the student's adviser for the Media Studies program). Only a faculty member, not a Ph.D. student, can approve a topic and supervise a paper.

* These courses are designed for Ph.D. students. Master's students are unlikely to be admitted to take them, but the final decision is up to the faculty.

Additional courses are selected in consultation with an academic adviser. A course in statistical methods is strongly recommended.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin. The minimum number of academic units required for the Ph.D. at Stanford is 135, up to 45 of which can be transferred either from a master's degree at the University or from another accredited institution.

The department offers a Ph.D. in Communication Theory and Research. First-year students are required to complete introductory courses in communication theory and research, research methods, and statistics. These core courses, grounded in the social science literature, emphasize how people respond to media and how media institutions function. In addition, Ph.D. students must complete a minimum of three literature survey courses and related advanced seminars in Communication. Students also take significant course work outside the department in their area of interest. Each student builds a research specialty relating communication to current faculty interests in such areas as ethics, human-computer interactions, information processing, information technology, law, online communities, politics and voting, virtual reality, and youth and media. Regardless of the area of specialization, the Ph.D. program is designed primarily for students interested in university research and teaching or other research or analyst positions.

The Ph.D. program encompasses four years of graduate study (subsequent to completion of the B.A. degree) during which, in addition to fulfilling University residency requirements, Ph.D. candidates are required to:

1. Complete all departmental course requirements with grades of 'B+' or above. Currently these courses include COMM 206, 208, 311, 314 or 318, 317, and 319. Students are also required to take two quarters of statistics or one quarter of statistics and an advanced methods course.
2. Pass the general qualifying examinations by the end of the second academic year of study and pass a specialized area examination by the end of the third academic year of study.
3. Demonstrate proficiency in tools required in the area of research specialization. Identified with the advice of the faculty, such tools may include detailed theoretical knowledge, advanced statistical methods, computer programming, a foreign language, or other technical skills.

4. Complete at least two pre-dissertation research projects (the Major Project and the Complementary Project).
5. Teach or assist in teaching at least two courses, preferably two different courses, at least one of which is ideally a core undergraduate course (COMM 1A, 1B, 106, and 108).
6. Complete a dissertation proposal and proposal meeting approved by the dissertation committee.
7. Apply for candidacy by the end of the second year of graduate study. The requirements and procedures for applying for candidacy can be found in the document, "Official Rules and Procedures for the Ph.D. in the Department of Communication," available from the student services administrator of the department.
8. Complete a dissertation satisfactory to a reading committee of three or more faculty members in the Department of Communication and one faculty member not in the Department of Communication.
9. Pass the University oral examination, which is a defense of the dissertation.

Because the multifaceted nature of the department makes it possible for the Ph.D. student to specialize in areas that draw on different related disciplines, the plan of study is individualized and developed between the faculty adviser and the student.

Ph.D. candidacy is valid for five years.

Other requirements and details of the requirements can be found in the document, "Official Rules and Procedures for the Ph.D. in the Department of Communication," available from the student services administrator of the department.

PH.D. MINOR

Candidates for the Ph.D. degree in other departments who elect a minor in Communication are required to complete a minimum of 20 units of graduate courses in the Department of Communication, including a total of three theory or research methods courses, and are examined by a representative of the department. A department adviser in consultation with the individual student determines the particular communication theory and methods courses.

THE INSTITUTE FOR COMMUNICATION RESEARCH

The Institute is an office of project research for the faculty of the Department of Communication and operates under grants to faculty from government, industry, and non-profit organizations. Research assistantships are often available to qualified Ph.D. students in Communication.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

PRIMARILY FOR UNDERGRADUATES

COMM 1A. Media Technologies, People, and Society — (Graduate students register for 211.) Open to non-majors. The concepts and contexts of communication. A topics-structured orientation emphasizing the field and the scholarly endeavors represented in the department. GER:DB-SocSci 5 units, Aut (Nass, C)

COMM 1B. Media, Culture, and Society — The institutions and practices of mass media, including television, film, radio, and digital media, and their role in shaping culture and social life. The media's shifting relationships to politics, commerce, and identity. GER:DB-SocSci 5 units, Win (Iyengar, S; Turner, F)

COMM 12SI. Global Noise: Appropriation, Localization, and Racial Identification of World Hip Hop
2 units, Aut (Morgan, M)

COMM 104. Reporting, Writing, and Understanding the News — Techniques of news reporting and writing. The value and role of news in democratic societies. GER:DB-SocSci 5 units, Aut (Brinkley, J), Win (Frankel, G)

COMM 106. Communication Research Methods—(Graduate students register for 206.) Conceptual and practical concerns underlying commonly used quantitative approaches, including experimental, survey, content analysis, and field research, in communication. GER:DB-SocSci
5 units, Spr (Danielson, D)

COMM 107. The First Amendment in the Digital Age—(Graduate students register for 207.) Interdisciplinary. History and general principles. The First Amendment and computer code; regulation of the Internet as a conduit for speech; regulation of content in new communications networks, including obscenity, defamation, and privacy; and the public forum in an era of private networks. Freedom of the press in light of blogging and citizen journalism, and the impact of new technologies on fair use. Relationship between technology design and free expression: do technologies strengthen free expression? Legal, policy, and technological solutions that promote the values of free speech.
5 units, Win (Noveck, B)

COMM 108. Media Processes and Effects—(Graduate students register for 208.) The process of communication theory construction including a survey of social science paradigms and major theories of communication. Recommended: 1 or PSYCH 1. GER:DB-SocSci
5 units, Aut (Bailenson, J)

COMM 109. Research Practicum in Media Effects—Topic and instructor change each year. May be repeated for credit. Prerequisite: 106 and 108 or consent of instructor.
3 units, not given this year (Roberts, D)

COMM 116. Journalism Law—(Undergraduate section; see 216.)
5 units, Aut (Wheaton, J)

COMM 117. Digital Journalism—(Undergraduate section; see 217.)
5 units, Win (Rheingold, H)

COMM 118Q. Theories of Film Practice—Stanford Introductory Seminar. Preference to sophomores. How theory connects with practice in the production of film and television. Film and television from the perspectives of practitioners who have theorized about their work in directing, editing, screenwriting, cinematography, and sound, and social scientists whose research has explored similar issues empirically. WRITE-2
4 units, Win (Breitrose, H)

COMM 120. Digital Media in Society—(Graduate students register for 220.) Contemporary debates concerning the social and cultural impact of digital media. Topics include the historical origins of digital media, the cultural contexts of their development and use, and the influence of digital media on our conceptions of self, community, and state. GER:DB-SocSci, WIM
5 units, Spr (Turner, F)

COMM 125. Perspectives on American Journalism—(Graduate students register for 225.) Issues, ideas, and concepts in the development of American journalism, emphasizing the role of the press in society, the meaning and nature of news, and professional norms that influence conduct in and outside the newsroom. Prerequisite: 1 or junior standing. GER:DB-SocSci
5 units, Aut (Glasser, T)

COMM 131. Media Ethics and Responsibilities—(Graduate students register for 231.) The development of professionalism among American journalists, emphasizing the emergence of objectivity as a professional and the epistemological norm. An applied ethics course where questions of power, freedom, and truth autonomy are treated normatively so as to foster critical thinking about the origins and implications of commonly accepted standards of responsible journalism. GER:DB-SocSci
5 units, Win (Glasser, T)

COMM 136. Democracy and the Communication of Consent—(Graduate students register for 236.) Focus is on competing theories of democracy and the forms of communication they presuppose, combining normative and empirical issues, and historical and contemporary sources. Topics include representation, public opinion, mass media, small group

processes, direct democracy, the role of information, and the prospects for deliberative democracy. GER:DB-SocSci
5 units, not given this year (Fishkin, J)

COMM 146. Language and Discourse: Race, Class, and Gender—(Graduate students register for 246.) Theories concerning the discursive construction of identity and representation of cultures. Relationships between power and powerful speech. How language mediates and constructs identity; how it is associated with race, class and gender; and how people resist and manipulate these associations. Sources include conversation, public and popular culture, education, literature, and film.
5 units, not given this year (Morgan, M)

COMM 148. Hip-Hop and Don't Stop: Introduction to Modern Speech Communities—(Graduate students register for 248.) Focus this year is hip-hop and the media. Hip-hop as a global phenomenon with social influences beyond the music and entertainment industries. The development of standards. Hip-hop in the U.S. and its role as a cultural, political, social, and artistic resource for youth. Perspectives include cultural and linguistic anthropology, and media studies. Guest lecturer.
5 units, Spr (Morgan, M)

COMM 149. Ethnography of Modern Speech Communities—(Graduate students register for 249.) Concepts and analytical techniques in the social sciences that privilege observation, participation, video recording, and transcription of spontaneous interaction rather than experimental tasks or introspection. Interconnections among communications, social sciences, linguistics, and sociocultural anthropology. Focus is on details of everyday activities in communities and interactive environments. Topics include language socialization, literacy, music, and the visual arts, the power of language, miscommunication, and universal and culture-specific properties of human communication.
5 units, Spr (Morgan, M)

COMM 160. The Press and the Political Process—(Graduate students register for 260; same as POLISCI 323R.) The role of mass media and other channels of communication in political and electoral processes. GER:DB-SocSci
5 units, not given this year (Iyengar, S)

COMM 162. Analysis of Political Campaigns—(Graduate students register for 262; same as POLISCI 323S.) Seminar. The evolution of American political campaigns, and the replacement of the political party by the mass media as intermediary between candidates and voters. Academic literature on media strategies, the relationship between candidates and the press, the effects of campaigns on voter behavior, and inconsistencies between media campaigns and democratic norms. Do media-based campaigns enable voters to live up to their civic responsibility? Has the need for well-financed campaigns increased the influence of elites over nominations? Have citizens become disengaged? GER:DB-SocSci
5 units, Aut (Iyengar, S)

COMM 166. Virtual People—(Graduate students register for 266.) The concept of virtual people or digital human representations; methods of constructing and using virtual people; methodological approaches to interactions with and among virtual people; and current applications. Viewpoints including popular culture, literature, film, engineering, behavioral science, computer science, and communication.
5 units, Win (Bailenson, J)

COMM 169. Computers and Interfaces—(Graduate students register for 269.) Interdisciplinary. User responses to interfaces and design implications of those responses. Theories from different disciplines illustrate responses to textual, voice-based, pictorial, metaphoric, conversational, adaptive, agent-based, intelligent, and anthropomorphic interfaces. Group design project applying theory to the design of products or services for developing countries. GER:DB-SocSci
5 units, Win (Nass, C)

COMM 170. Communication and Children I—(Graduate students register for 270.) Developmental approach to how children come to use and process mass media, what information they obtain, and how their behavior is influenced by the media. Prerequisite: 1, PSYCH 1, or SOC 1. GER:DB-SocSci

5 units, Win (Roberts, D)

COMM 172. Psychological Processing of Media—(Graduate students register for 272.) The literature related to psychological processing and the effects of media. Topics: unconscious processing; picture perception; attention and memory; emotion; the physiology of processing media; person perception; pornography; consumer behavior; advanced film and television systems; and differences among reading, watching, and listening. GER:DB-SocSci

5 units, Spr (Reeves, B)

COMM 177F. Specialized Writing and Reporting: Literary Journalism—(Same as 277F.)

5 units, Win (Bettinger, J)

COMM 177G. Specialized Writing and Reporting: Covering a Business Beat—(Same as 277G.)

5 units, Win (Grimes, A)

COMM 177R. Specialized Writing and Reporting: Covering Silicon Valley—(Same as 277R.)

5 units, Spr (Zachary, G; Markoff, J)

COMM 177T. Specialized Writing and Reporting: Journalism as Biography—(Same as 277T.)

5 units, not given this year

COMM 190. Senior Project—Research project. Prerequisite: senior standing.

5 units, Aut, Win, Spr (Staff)

COMM 195. Honors Thesis—Qualifies students to conduct communication research. Student must apply for department honors thesis program during Spring Quarter of junior year.

5 units, Aut, Win, Spr (Staff)

COMM 199. Individual Work—For students with high academic standing. May be repeated for credit.

1-5 units, Aut, Win, Spr, Sum (Staff)

PRIMARILY FOR MASTER'S STUDENTS

COMM 206. Communication Research Methods—(Graduate section; see 106.)

4 units, Spr (Danielson, D)

COMM 207. The First Amendment in the Digital Age—(Graduate section; see 107.)

4 units, Win (Noveck, B)

COMM 208. Media Processes and Effects—(Graduate section; see 108.)

4 units, Aut (Bailenson, J)

COMM 211. Media Technologies, People, and Society—(Graduate section; see 1A.)

4 units, Aut (Nass, C)

COMM 216. Journalism Law—(Undergraduates register for 116.) Laws and regulation impacting journalists. Topics include libel, privacy, news gathering, protection sources, fair trial and free press, theories of the First Amendment, and broadcast regulation. Prerequisite: Journalism M.A. student or advanced Communication major.

4 units, Aut (Wheaton, J)

COMM 217. Digital Journalism—(Undergraduates register for 117.) Seminar and practicum. The implications of new media for journalists. Professional and social issues related to the web as a case of new media deployment, as a story, as a research and reporting tool, and as a publishing channel. Prerequisite: Journalism M.A. student or consent of instructor.

4 units, Win (Rheingold, H)

COMM 220. Digital Media in Society—(Graduate section; see 120.)

4 units, Spr (Turner, F)

COMM 225. Perspectives on American Journalism—(Graduate section; see 125.)

4 units, Aut (Glasser, T)

COMM 231. Media Ethics and Responsibilities—(Graduate section; see 131.)

4 units, Win (Glasser, T)

COMM 236. Democracy and the Communication of Consent—(Graduate section; see 136.)

4 units, not given this year (Fishkin, J)

COMM 236G. Democracy, Justice, and Deliberation—(For undergraduates and M.A. students; Ph.D. students, register for 336G.) Decision processes that make a normative claim to resolve questions of public choice, at any of these levels of choice: first principles, constitutions, public policies, or particular outcomes. Topics include democratic theory, the theory of justice and issues of deliberation in small groups, public consultations, conventions, juries, and thought experiments popular in contemporary political theory. Readings include Madison, de Tocqueville, Mill, Marx, Rawls, Nozick, Ackerman, and Schudson. Preference to graduate students. Prerequisite: consent of instructor.

1-5 units, not given this year (Fishkin, J)

COMM 238. Democratic Theory: Normative and Empirical Issues—(For undergraduates and M.A. students; Ph.D. students, register for 338.) Conflicting visions in terms of normative conflicts and empirical evidence. How citizens communicate with each other and their representatives, and how their representatives deliberate. Topics include theories of deliberation, how democracy is transformed when brought to the mass public, how informed a public is needed, and potential pathologies of small group communication in settings including juries, town meetings, and contemporary public consultations. Readings include Madison, Burke, Mill, Lippmann, Dewey, Schumpeter, Dahl, Sunstein, and Mansbridge.

1-5 units, Win (Fishkin, J; Luskin, R)

COMM 239. Questionnaire Design for Surveys and Laboratory Experiments: Social and Cognitive Perspectives—The social and psychological processes involved in asking and answering questions via questionnaires for the social sciences; optimizing questionnaire design; open versus closed questions; rating versus ranking; rating scale length and point labeling; acquiescence response bias; don't-know response options; response choice order effects; question order effects; social desirability response bias; attitude and behavior recall; and introspective accounts of the causes of thoughts and actions.

4 units, Spr (Krosnick, J)

COMM 244. Democracy, Press, and Public Opinion—(For undergraduates and M.A. students; Ph.D. students, register for 344.) The democratic tradition provides conflicting visions of what a democracy is or might be, offering different views of the role of the press and citizens in engaging public issues. Focus is on democratic theory with empirical work on public opinion and the role of the media. Topics include campaigns, the effects of new technology, competing strategies of public consultation, public journalism, and possibilities for citizen deliberation. Prerequisite: consent of instructor.

1-4 units, not given this year (Fishkin, J)

COMM 246. Language and Discourse: Race, Class, and Gender—(Graduate section; see 146.)

4 units, not given this year (Morgan, M)

COMM 248. Hip-Hop and Don't Stop: Introduction to Modern Speech Communities—(Graduate section; see 148.)

4 units, Spr (Morgan, M)

COMM 249. Ethnography of Modern Speech Communities—(Graduate section; see 149.)

4 units, Spr (Morgan, M)

COMM 260. The Press and the Political Process—(Graduate section; see 160; same as POLISCI 323R.)

4 units, not given this year (Iyengar, S)

COMM 262. Analysis of Political Campaigns—(Graduate section; see 162; same as POLISCI 323S.)

4 units, Aut (Iyengar, S)

COMM 266. Virtual People—(Graduate section; see 166.)

4 units, Win (Bailenson, J)

COMM 268. Experimental Research in Advanced User Interfaces—(For undergraduates and M.A. students; Ph.D. students, register for 368.) Project-based course involves small groups designing and implementing an experiment concerning voice and agent user interfaces. Each group is involved in a different, publishable research project. Prerequisite: consent of instructor.

1-5 units, Win, Spr (Nass, C)

COMM 269. Computers and Interfaces—(Graduate section; see 169.)

4 units, Win (Nass, C)

COMM 270. Communication and Children I—(Graduate section; see 170.)

4 units, Win (Roberts, D)

COMM 272. Psychological Processing of Media—(Graduate section; see 172.)

4 units, Spr (Reeves, B)

COMM 273. Public Issues Reporting I—Reporting and writing on government and public policies and issues; their implications for the people and the press. Required for journalism M.A. students.

4 units, Aut (Grimes, A)

COMM 274. Public Issues Reporting II—Student teams study one major public policy issue that has broad societal impact. Students report and write individually, and as a team produce a body of journalism that advances the understanding of a new issue each year, published on a web site and offered for publication to newspapers and other media outlets. Prerequisites: 273, Journalism M.A. student.

4 units, Win (Brinkley, J)

COMM 277F. Specialized Writing and Reporting: Literary Journalism—(Undergraduates register for 177F.) Using the tools of literature to tell the true stories of journalism. Characterization, narrative plotting, scene-setting, point of view, tone and style, and the techniques of reporting for literary journalism, interviewing, and story structure. Prerequisite: 104 or consent of instructor.

4 units, Win (Bettinger, J)

COMM 277G. Specialized Writing and Reporting: Covering a Business Beat—(Undergraduates register for 177G.) How to write news and feature stories about companies and personalities in the business world. Prerequisite: 104 or consent of instructor.

4 units, Win (Grimes, A)

COMM 277R. Specialized Writing and Reporting: Covering Silicon Valley—Undergraduates register for 177R.) Techniques to write and report about Silicon Valley technologies. Visits from professional writers. Prerequisite: 104 or consent of instructor.

4 units, Spr (Zachary, G; Markoff, J)

COMM 277T. Specialized Writing and Reporting: Journalism as Biography—(Undergraduates register for 177T.) How journalistic techniques, such as interviews and public record searches, can be used in writing biographies and profiles. The limits and challenges of such methods, and the opportunities and ethical dilemmas. Prerequisite: 104 or consent of instructor.

4 units, not given this year

COMM 289. Journalism Master's Project

4 units, Spr (Staff)

COMM 290. Media Studies M.A. Project—Individual research for coterminous Media Studies students.

1 unit, Aut, Win, Spr, Sum (Staff)

COMM 291. Graduate Journalism Seminar—Required of students in the graduate program in Journalism. Forum for current issues in the practice and performance of the press. Journalists in or visiting the Bay Area are often guest speakers. May be repeated for credit.

1 unit, Aut (Grimes, A), Win (Garcia, D), Spr (Bettinger, J)

COMM 299. Individual Work

1-4 units, Aut, Win, Spr (Staff)

PRIMARYLY FOR DOCTORAL STUDENTS

COMM 308. Graduate Seminar in Political Psychology—For students interested in research in political science, psychology, or communication. Methodological techniques for studying political attitudes and behaviors.

1-3 units, Aut, Win, Spr (Krosnick, J)

COMM 310. Methods of Analysis Program in the Social Sciences (MAPSS) Workshop—(Same as POLISCI 402.) Colloquium series. Creation and application of new methodological techniques for social science research. Presentations on methodologies of use for social scientists across departments at Stanford by guest speakers from Stanford and elsewhere. See <http://mapss.stanford.edu>. May be repeated for credit.

1 unit, Aut, Win, Spr (Krosnick, J)

COMM 311. Theory of Communication—Required of Communication doctoral students.

1-5 units, Aut (Luskin, R)

COMM 314. Doctoral Research Methods II B—Part of the doctoral research methods sequence. Focus is on the logic of qualitative research methods and modes of inquiry relevant to the study of communication and meaning. Prerequisite: Communication Ph.D. student, or consent of instructor.

1-5 units, Spr (Glasser, T)

COMM 317. Doctoral Research Methods I—Approaches to social science research and their theoretical presuppositions. Readings from the philosophy of the social sciences. Research design, the role of experiments, and quantitative and qualitative research. Cases from communication and related social sciences. Prerequisite: consent of instructor.

1-5 units, Spr (Fishkin, J)

COMM 318. Doctoral Research Methods II—Prerequisite: consent of instructor.

1-5 units, Win (Krosnick, J)

COMM 319. Doctoral Research Methods III—Prerequisite: consent of instructor.

1-5 units, Spr (Luskin, R)

COMM 320G. Advanced Topics in New Media and American Culture—Primarily for Ph.D. students. Prerequisite: 220 (formerly 219) or consent of instructor.

1-5 units, Spr (Turner, F)

COMM 325G. Comparative Studies of News and Journalism—Focus is on topics such as the roles and responsibilities of journalists, news as a genre of popular literature, the nexus between press and state, and journalism's commitment to political participation.

1-5 units, Win (Glasser, T)

COMM 326. Advanced Topics in Human Virtual Representation—Topics include the theoretical construct of person identity, the evolution of that construct given the advent of virtual environments, and methodological approaches to understanding virtual human representation. Prerequisite: consent of instructor.

1-5 units, Spr (Bailenson, J)

COMM 331G. Communication and Media Ethics—Limited to Ph.D. students. Advanced topics in press ethics and responsibility. Prerequisite: 231 or consent of instructor.

1-3 units, not given this year (Glasser, T)

COMM 336G. Democracy, Justice, and Deliberation—(Same as 236G; see 236G.)

1-5 units, not given this year (Fishkin, J)

COMM 338. Democratic Theory: Normative and Empirical Issues—(Same as 238; see 238.)

1-5 units, Win (Fishkin, J; Luskin, R)

COMM 344. Democracy, Press, and Public Opinion—(Same as 244; see 244.)

1-4 units, not given this year (Fishkin, J)

COMM 347. Research in Political Psychology—Multi-methodological. Public preferences about government policies; the impact of the mass media on public opinion; party identification formation and change; voter decision making; determinants of voter turnout; issue public membership and its effects; measurement of public opinion; and the interface of democratic governments with their constituents.

2-4 units, not given this year (Krosnick, J)

COMM 348. Gender, Culture, and Communication—The field of gender and communication and principal questions in feminist theory in the context of linguistics, media studies, and sociolinguistics. Historiographical and theoretical perspectives on feminism and technology. International and multicultural focus. Areas include discourse and interaction, gender and culture, communication theory, gender and media, cultural studies, political economy, and symbolic communication. How everyday interactions, media, film, popular culture, and journalism incorporate gender and sexuality and perpetuate stereotypes of men, women, and sexuality. Prerequisite: consent of instructor.

1-5 units, not given this year (Morgan, M)

COMM 349. Ethnography of Communication—Ethnographic methods and the study of discourse and interaction. The impact of ethnography on research and field methods; how results validate knowledge across disciplines. The relationship of ethnography of communication to disciplines such as anthropology, linguistics, communications, and sociology. Focus is on the integration of ethnography and other research techniques for the documentation of communication and its role in the establishment and management of social encounters. Prerequisite: consent of instructor.

1-5 units, Spr (Morgan, M)

COMM 360G. Political Communication—Limited to Ph.D. students. Advanced topics. Prerequisite: 260 or consent of instructor.

1-5 units, not given this year (Iyengar, S)

COMM 361. Field Experimentation in Political Communication Research—The design of large-scale field experiments. Recent developments in analysis of experimental data including matching, propensity scores, and other techniques that address the problem of selection bias. Prerequisite: consent of instructor.

4 units, not given this year (Iyengar, S)

COMM 368. Experimental Research in Advanced User Interfaces—(Same as 268; see 268.)

1-5 units, Win, Spr (Nass, C)

COMM 370G. Communication and Children—Limited to Ph.D. students. Prerequisite: 270 or consent of instructor.

1-5 units, Win (Roberts, D)

COMM 372G. Seminar in Psychological Processing—Limited to Ph.D. students. Advanced topics. Prerequisite: 272 or consent of instructor.

1-5 units, Win (Reeves, B)

COMM 374G. Freedom and Control of Communication—The meaning of freedom of public communication in democratic communities, focusing on the tensions between freedom and control, rights and opportunities, individual liberty and political equality.

1-5 units, not given this year (Glasser, T)

COMM 379. History of the Study of Communication—The origins of communication/media theory and research emphasizing the rise of communication as a separate field of study. The influence of schools of thought concerning the scope and purpose of the study of communication. Readings include foundational essays and studies. Prerequisite: Ph.D. student or consent of instructor.

1-5 units, not given this year (Glasser, T)

COMM 380. Curriculum Practical Training—Practical experience in the communication industries. Prerequisites: graduate standing in Communication, consent of instructor. Meets requirements for Curricular Practical Training for students on F-1 visas. 380 May be repeated four times for credit.

1-5 units, Aut, Win, Spr, Sum (Staff)

COMM 397. Complementary Project—Individual research for Ph.D. candidates.

1-6 units, Aut, Win, Spr, Sum (Staff)

COMM 398. Major Research Project—Individual research for Ph.D. candidates.

1-6 units, Aut, Win, Spr, Sum (Staff)

COMM 399. Advanced Individual Work

1-9 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES

Courses approved for the Communication major and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

FLORENCE

COMM 53. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema—(Same as ARTHIST 160Y, ITALGEN 191F, HISTORY 235V.) GER:DB-Hum

5 units, Win (Campani, E)

COMPARATIVE LITERATURE

Emeriti: (Professors) Joseph Frank, John Freccero, René Girard, Herbert Lindenberger, Mary Pratt, Richard Rorty; *(Courtesy Professors)* W. B. Carnochan, Gerald Gillespie, Marjorie G. Perloff

Chair: Russell Berman

Director of Admissions: Russell Berman

Director of Graduate Studies: Seth Lerer

Director of Undergraduate Studies: David Palumbo-Liu

Chair of Curriculum Committee: Andrea Nightingale

Professors: John Bender (English, Comparative Literature), Russell Berman (German Studies, Comparative Literature), Margaret Cohen (French and Italian, Comparative Literature), Amir Eshel (German Studies, Comparative Literature), Roland Greene (English, Comparative Literature), Hans U. Gumbrecht (French and Italian, Spanish and Portuguese, Comparative Literature), Seth Lerer (English, Comparative Literature), Franco Moretti (English, Comparative Literature), Elisabeth Mudimbe-Boyi (French and Italian, Comparative Literature), Andrea Nightingale (Classics, Comparative Literature), David Palumbo-Liu (Comparative Literature), Patricia Parker (English, Comparative Literature), Ramón Saldívar (English, Comparative Literature), Jeffrey T. Schnapp (French and Italian, Comparative Literature; on leave)

Associate Professor: Monika Greenleaf (Slavic Languages and Literatures, Comparative Literature)

Lecturer: Ann Gelder (Spring)

Courtesy Professors: David G. Halliburton, John Wang

Consulting Professor: Hayden White (on leave)

Visiting Professor: Abbas M. Milani (Autumn)

Visiting Associate Professor: Eelco Runia (Winter, Spring)

Visiting Lecturer: Jessie Labov (Humanities Fellow)

Department Offices: Building 260, Room 209

Mail Code: 94305-2031

Phone: (650) 723-3566

Email: comparativelit@stanford.edu

Web Site: <http://complit.stanford.edu>

Courses given in Comparative Literature have the subject code COMPLIT. For complete list of subject codes, see Appendix.

The Department of Comparative Literature offers courses in the history and theory of literature through comparative approaches. The department accepts candidates for the degrees of Bachelor of Arts, Master of Arts, and Doctor of Philosophy. Several major options are available for each degree, some of them offered in cooperation with other departments.

Comparative Literature provides students the opportunity to explore characteristics of literary writing in reflective and probing ways that go beyond the framework of a single national literary history. Familiarity with a specific national or linguistic literary tradition becomes an indispensable base for comparative scholarship across geopolitical and disciplinary boundaries. Along with the traditional model of comparative literature that juxtaposes two or more national literary cultures, the department supports teaching and research that examine literary phenomena with additional tools of inquiry. This can involve enhanced consideration of literary theory, the relationship between literature and philosophy, or the enrichment of literary study with other disciplinary methodologies. Comparative Literature also encourages the study of aspects of literature that surpass national boundaries, such as transnational literary movements or the dissemination of particular genres. In each case, students emerge from the program with enhanced verbal and writing skills, a command of literary studies, the ability to read deeply, analytically, and critically, and a more global knowledge of literature.

UNDERGRADUATE PROGRAM BACHELOR OF ARTS

The undergraduate major in Comparative Literature is designed for students who combine the drive and ability to master foreign languages

with a strong commitment to literary study. In all cases, students must do a substantial portion of their work in at least one foreign language. The major enables these students to pursue carefully constructed programs involving the in-depth study of literature in one or more languages not their own; and the study of their literature of specialization, its theory, and its practice in relation to other literatures, communications media, and disciplines.

The major is distinguished from those in the national literatures by its comparative scope, by the requirement of seminars that focus on fundamental theoretical questions regarding the nature of literature and literary inquiry, and by its requirement that the students' programs of study be structured around the exploration of a single literary genre, historical epoch, or theoretical problem. It differs from the interdisciplinary majors in English and Modern Thought and Literature (MTL) by its requirement that every student's program be anchored in the study of a literature *other* than that of his or her native language and, with specific regard to MTL, by its chronological scope.

The comparative aspect of each student's program of specialization is fulfilled according to which of the three available options that the student elects to follow. These options are declared to the department; they are not declared on Axess, and they do not appear on the transcript or the diploma.

Option A: The *Literary Studies* option integrates in-depth work in a primary literature with extensive work in a second literature (in the original language) and complementary course work in an outside field.

Option B: The *Interdisciplinary* option integrates in-depth work in a primary literature with the focused study of literature in relation to other arts (film, music, painting, etc.), intellectual disciplines (anthropology, history, linguistics, philosophy, etc.), or comparative work in area studies.

Option C: Interdisciplinary option with special concentration in the study of *Philosophical and Literary Thought*. This option integrates in-depth work in a primary literature with a systematic and articulated study of philosophy and its relations to literature.

An honors program is available in Comparative Literature for all three of these options (see below) that integrates substantial in-depth work in a primary literature with extensive work in a second literature (in the original language) or discipline, but also requires the writing of a senior honors paper.

In all three options, students work closely with the department's Director of Undergraduate Studies in designing an individually tailored program of specialization involving two related areas of study. Individual study plans require considerable advance planning and must meet the approval of the Director of Undergraduate Studies.

Declaring the Major—As soon as a student knows that he or she would like to declare the Comparative Literature major (and no later than Autumn Quarter of the junior year), he or she should obtain a worksheet for the appropriate option (see below) from the Comparative Literature office. The completed worksheet (with prospective courses for future years) should be handed to the Director of Undergraduate Studies with an updated official transcript and the student's advising file. The director should sign the worksheet, indicating his or her approval of the feasibility of the proposed program. This worksheet needs to be updated at least once during each academic year.

Advising—When a student declares Comparative Literature, he or she may choose to declare the Director of Undergraduate Studies as his or her adviser since the director approves credit for all course work (including course work abroad). The adviser may also be a member of the core Comparative Literature faculty. If this occurs, the student must meet periodically with the Director of Undergraduate Studies to monitor his/her progress in the major and for all questions regarding the major's requirements.

Overseas Campuses and Abroad Programs—The Department of Comparative Literature encourages time abroad, both for increased proficiency in language and the opportunity for advanced course work. Course work done at campuses other than Stanford is counted toward the major at the discretion of the Director of Undergraduate Studies and is contingent upon the University's acceptance of classes for units. To that

end, students abroad must make an effort to save all notes, papers, correspondence, etc., to increase the chance of acceptance.

Honors College—The Department of Comparative Literature encourages all honors students to enroll in the honors college scheduled during the weeks preceding the beginning of every academic year. Applications to the college are available from the department administrator. The honors college is coordinated by the Division of Literatures, Cultures, and Languages (DLCL).

Writing in the Major (WIM)—In 2006-07, the WIM requirement for Comparative Literature should be met through COMPLIT 101.

REQUIREMENTS

CORE FOR OPTIONS A, B, AND C

All majors in Comparative Literature (including honors) are required to complete the following courses, the first as near as possible to the date of declaration and the second during the senior year. Together, these core seminars ensure that majors have been introduced to the framing propositions and principal methods of the discipline. More specifically these courses are designed to lead students to inquire about the historical standing of such concepts as the literary, the aesthetic, criticism, genre, text, and theory.

1. COMPLIT 101, Seminar on Literature and the Institution of Literary Study (5 units), provides students with an introduction to the comparative study of literature, to the history of poetic theory, and to the historical development of literary fields. It is concerned with addressing foundational questions such as: what kind of knowledge is literary knowledge and how has this knowledge been codified and categorized with respect to other forms of knowledge? Fulfills the Writing in the Major requirement for Comparative Literature majors.
2. COMPLIT 199, Senior Seminar on Literary Theory (5 units), offers advanced students of comparative literature the opportunity for in-depth study of the evolution of modern literary theory and, particularly, of contemporary theoretical perspectives regarding the study of literary artifacts.

OPTION A—LITERARY STUDIES

Literary works are shaped by a complex interplay of historical forces and constraints, including contacts between differing cultures and traditions; the evolution of literary genres, practices, and conventions; shifts in media and technologies of reproduction and diffusion; and the imitation of model authors. By combining in-depth work in a primary literature with work in a second literature, this option emphasizes the study of such phenomena. It requires:

1. Courses using materials in the original language:
 - a) five courses which make up an intellectually coherent program, in the literature of the first language A.
 - b) three courses are in the literature of language B. These course selections must be coordinated with the courses selected in the literature of language A in order that, taken together, they form a cohesive program of study focused on one of:
 - 1) a specific literary genre
 - 2) a historical epoch
 - 3) a theoretical question

Note: if either A or B is the student's native language, further work must be done in a third language to the extent of at least one course in its literature. Literature courses usually begin after two years of college-level study. Bilingual students may count either tongue as native and the other as acquired. If language A, B, or C is Chinese, Japanese, Russian, or another language in which two years of language study does not constitute sufficient basis for literary study, some of the advanced work required for the major may be completed in translation or fulfilled through work in an advanced language course. An appropriate program should be approved following consultation with the department's Director of Undergraduate Studies.

2. Three cognate courses supplementing a student's work in the two chosen literatures and lending it further intellectual shape according to the criteria noted above. One course from the COMPLIT 100 series (but neither 101 or 199), or another course offered by the Department

of Comparative Literature may be counted under this rubric.

3. One course, usually in translation, in a literature distant from the literatures of the student's concentration that can provide an outside perspective on the student's area of specialization.
4. Students in this option must also write at least one seminar paper that is comparative in nature. This paper should bring together material from courses taken in their primary and secondary literatures and may be an honors paper (see below), an individual research paper (developed through independent work with a faculty member, COMPLIT 194), or a paper integrating materials developed for two separate courses (by arrangement with the two instructors). It may be based on, though not identical to, a paper submitted for a requirement for a class. General guidelines for length require approximately 18-20 pages. The paper must be submitted to the Director of Undergraduate Studies and receive his or her approval no later than the end of Winter Quarter in the senior year of study.

OPTION B—INTERDISCIPLINARY

Literary creation is a complex human enterprise that intersects with a wide array of other fields of human endeavor and creation. Option B is designed to promote the focused study of intersections between literature and the arts (including film, music, and painting), and other disciplines (including anthropology, feminist studies, history, history of science, linguistics, and philosophy). It requires:

1. Five courses using materials in the original language, and making up an intellectually coherent program in the literature of a language other than the student's native tongue. Bilingual students may satisfy this requirement in either of their original languages or in a third language.
2. Six courses (chosen as a function of the courses noted above) in:
 - a) a single discipline or closely related cluster of disciplines
 - b) the cultural history of a single historical epoch
 - c) one or more of the fine arts; media or film studies
 - d) area studies

This course work must be shaped around the literature courses selected in item 1. It must either treat cogent analytical or thematic issues in the chosen discipline, or be directly relevant to the chosen historical specialization. Students who chose option '2d' must select courses that include work outside a single area studies focus or that have a genuinely comparative aspect. Each of these six courses must be approved in advance by the Director of Undergraduate Studies.

3. At least two of the eleven courses in items 1 and 2 shall be taught by Comparative Literature faculty.
4. One course, usually in translation, on a literature distant from the student's two concentrations. The intention here is, as above, to offer an outside perspective on the student's field of specialization.
5. Students in this option must also write at least one seminar paper that is interdisciplinary in nature. This paper should bring together material from courses taken in their primary literature and in another discipline and may be an honors paper (see below), an individual research paper (developed through independent work with a faculty member in COMPLIT 194), or a paper integrating materials developed for two separate courses (by arrangement with the two instructors). Though it may draw on previous course work, the paper must be an original composition; general guidelines for length require 18-20 pages. It must be submitted to the Director of Undergraduate Studies and receive his or her approval no later than the end of Winter Quarter in the fourth year of study.

Students who choose the interdisciplinary option should be aware that it requires careful advance planning given that many course offerings are offered in alternate years.

OPTION C—PHILOSOPHICAL AND LITERARY THOUGHT

Undergraduates may major in Comparative Literature with a special degree field in interdisciplinary studies at the intersection of literature and philosophy. Students in this option take courses alongside students from other departments that also have specialized options associated with the program for the study of Philosophical and Literary Thought. Each student in this option is assigned an adviser in Comparative Literature, and student

schedules and course of study must be approved in writing by the adviser, the Director of Undergraduate Studies of Comparative Literature, and the Director of Undergraduate Studies of the program.

A total of 65 units must be completed for this option, including the following requirements:

- Five courses using materials in the original language and making up an intellectually coherent program in the literature of a language other than the student's native tongue. Bilingual students may satisfy this requirement in either of their original languages or in a third language. The coherence of this program must be approved in writing by the Director of Undergraduate Studies of Comparative Literature.
- Philosophy and Literature Gateway Course* (4 units): COMPLIT 181 (enroll in PHIL 81, FRENGEN 181, ORITALGEN 181). This course should be taken as early as possible in the student's career, normally in the sophomore year.
- Philosophy Writing in the Major* (5 units): PHIL 80. Prerequisite: introductory philosophy class.
- Aesthetics, Ethics, Political Philosophy* (ca. 4 units): one course from the PHIL 170 series.
- Language, Mind, Metaphysics, and Epistemology* (ca. 4 units): one course from the PHIL 180 series.
- History of Philosophy* (ca. 8 units): two courses in the history of philosophy, numbered above PHIL 100.
- Related Courses* (ca. 8 units): two upper division courses relevant to the study of philosophy and literature as identified by the committee in charge of the program. A list of approved courses is available from the undergraduate adviser of the program in philosophical and literary thought.
- One course, typically in translation, in a literature distant from that of the student's concentration and offering an outside perspective on that literary tradition.
- Capstone Seminar* (ca. 4 units): in addition to COMPLIT 199, students take a capstone seminar of relevance to philosophy and literature approved by the undergraduate adviser of the program in philosophical and literary thought. The student's choice of a capstone seminar must be approved in writing by the Director of Undergraduate Studies of Comparative Literature and by the Director of Undergraduate Studies of the program.
- Seminar Paper Requirement*: students must write at least one seminar paper that is interdisciplinary in nature. This paper brings together material from courses taken in philosophy and literature, and may be an honors paper (see below), an individual research paper (developed through independent work with a faculty member), or a paper integrating materials developed for two separate courses (by arrangement with the two instructors). Though it may draw on previous course work, the paper must be an original composition, 18-20 pages in length. It must be submitted to the Director of Undergraduate Studies and receive approval no later than the end of Winter Quarter in the fourth year of study.

At least two of the courses counted toward requirements 1, 2, 7, 8, and 9 must be taught by Comparative Literature faculty. Transfer units may not normally be used to satisfy requirements 2, 3, 4, 5, 6 and 9. Units devoted to acquiring language proficiency are not counted toward the 65-unit requirement.

DIGITAL HUMANITIES MODULE

The Comparative Literature department, in collaboration with the Humanities Lab, also offers a digital humanities module that can be combined with any of the department's major programs. Students who are interested in digital humanities should contact the department's Director of Undergraduate Studies who facilitates coordination with the Humanities Lab. Students planning to combine the Comparative Literature major and the digital humanities module must fulfill the following requirements in addition to the general major requirements:

- CS 105 or equivalent
- Participate in the Humanities Lab Gateway core seminar (4 units)
- Complete the Humanities Lab Practicum (2 units) in the junior year

- Complete one digital project, in lieu of the course's main writing requirement, in a course offered in the department under the supervision of the course instructor and humanities lab adviser. This should usually be done in an upper-division course.

Students are encouraged to enroll in DLCL 99, Multimedia Course Lab, when working on the digital course project.

MINORS

The undergraduate minor in Comparative Literature (CL) represents an abbreviated version of the major. In all cases, students must do a substantial portion of their work in at least one foreign language.

All minors in Comparative Literature are required to complete COMPLIT 101, Seminar on Literature and the Institution of Literary Study (5 units). This provides an essential introduction to the framing propositions and principal methods of the discipline.

In addition, all minors must complete two courses in the literature of a language other than their native tongue. All materials in each course must be in the original language.

- Literary Studies Option*: integrates in-depth work in a primary literature with work in a second literature. Requirements are:
 - two courses in a second literature (this may include courses in translation, as well as courses in English and/or American literature).
 - one additional course in Comparative Literature.
- Interdisciplinary Option*: integrates in-depth work in the primary literature with the focused study of literature in relation to another art or intellectual discipline. Requirements are:
 - two courses in a single discipline, or the cultural history of a single historical epoch.
 - one additional course in Comparative Literature.

The minor is modeled primarily on the structure and progression of the major (with the appropriate reduction in course and unit requirements, as stipulated by the Committee on Undergraduate Studies). It retains the distinction between the two CL options and enables students to design a course of study built around the core CL seminar.

The Director of Undergraduate Studies is responsible for evaluating all requests and individual study plans for the minor.

MINOR IN LITERATURE

An undergraduate minor in Literature is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through Comparative Literature. Students should consult the "Division of Literatures, Cultures, and Languages" section of this bulletin for further details about the minor and its requirements.

MINOR IN MODERN LANGUAGES

An undergraduate minor in Modern Languages is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through Comparative Literature. Students should consult the "Division of Literatures, Cultures, and Languages" section of this bulletin for further details about the minor and its requirements.

HONORS PROGRAM

The honors option is reserved for exceptionally motivated students who wish to undertake an even more intensive and extensive program of study leading to the writing of a senior honors paper. The program allows for either a literary studies or an interdisciplinary emphasis and it requires:

- Six courses, using materials in the original language and making up an intellectually coherent program, in the literature of language A. For the interdisciplinary emphasis, these courses must be in the literature of a language other than the student's native tongue.
- Emphasis:
 - For a literary studies emphasis*: three courses using materials in the original language, in the literature of language B.

Note: Option A's rules regarding students' native languages, bilingualism, and special exemptions for students studying Chinese, Japanese, Russian, or another language in which two years of lan-

guage study does not constitute sufficient basis for literary study, also govern students in the honors program who opt for a literary studies emphasis. These course selections must be coordinated with the courses selected in the literature of language A in order that, taken together, they form a cohesive program of study focused on one of the following:

- 1) a specific literary genre
- 2) an historical epoch
- 3) a theoretical question and three cognate courses that supplement a student's work in the two chosen literatures and lend it further intellectual shape. One course from the COMPLIT 100 series (but not 101 or 199) may be counted under this rubric.
- b) *For an interdisciplinary emphasis*: six courses as outlined in the general requirements for the Interdisciplinary Option (Option B), above. This course work must be shaped around the literature courses selected in item 1. It must either treat cogent analytic or thematic issues in the chosen discipline, or be directly relevant to the chosen historical specialization. Each of these six courses must be approved in advance by the Director of Undergraduate Studies.
3. One further course is required, usually in translation, on a literature distant from the two of the student's concentrations, so as to provide an outside perspective on the student's area of specialization.
4. During Spring Quarter of the junior year, a letter requesting admission to the honors program must be submitted to the department's Director of Undergraduate Studies. This letter must be accompanied by:
 - a) the completed, signed worksheet
 - b) an updated transcript
 - c) a sample seminar paper
 - d) an intended plan of study for the senior year drawn up according to the emphasis selected
 - e) a preliminary statement (two to five pages) regarding the proposed topic of the honors paper elaborated in consultation with the Director of Undergraduate Studies

In Spring Quarter of the junior year, the student may enroll for 2 units of credit for independent research in COMPLIT 194.

This application is voted on by the Comparative Literature honors committee, composed of the Director of Undergraduate Studies and the Chair of the Department of Comparative Literature. Should it be approved, a faculty tutor is appointed by the director according to the topic. At the appropriate time, a second reader is designated by the honors committee.

5. Once the request for admission to the honors option has been approved, the student must enroll in DLCL 189, a 5-unit seminar focusing on research and writing the honors thesis, in the Autumn Quarter of the senior year. This course helps the student to refine the project description and begin research in preparation for composing the honors paper.
6. During Winter Quarter of the senior year, the student must enroll in a 5-unit independent study (COMPLIT 195) with his or her faculty tutor for purposes of drafting the honors paper. At the end of the quarter, a completed draft must be submitted to the tutor. If it meets his or her approval as is, two copies must then be forwarded to the honors committee, which decides on the basis of the paper's quality whether or not the student is awarded honors. If the faculty tutor feels that the paper still requires rewriting at the end of Winter Quarter, the student may complete revisions during Spring Quarter for purposes of final submission. In order to be considered for honors in Comparative Literature, two copies of the final paper must be submitted to the honors committee no later than the fifth week of Spring Quarter. Completion of honors course work, independent research, and the finished thesis earns a total of 10-12 units of credit.

Honors papers vary considerably in length as a function of their topic, historical scope, and methodology. They may make use of previous work developed in seminars and courses, but must be of appropriate comparative or theoretical scope and should reflect the student's chosen emphasis. Quality rather than quantity is the key criterion. As a rule of thumb, however, they run in the range of 40-70 pages.

Honors Awards—The two readers of any honors thesis in Comparative Literature may elect to nominate the thesis in question for University-

wide awards if they feel that it is deserving. In addition, the department honors committee evaluates on a competitive basis the honors theses completed in a given year and nominates one for University-wide awards competitions.

GRADUATE PROGRAM DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

The Ph.D. program is designed for a small group of students whose linguistic background, breadth of interest in literature, and curiosity about the problems of literary scholarship and theory (including the relation of literature to other disciplines) make this program more appropriate to their needs than the Ph.D. in one of the individual literatures. Students take courses in at least three literatures (one may be that of the native language), to be studied in the original. The program is designed to encourage familiarity with the major approaches to literary study prevailing today.

Before starting graduate work at Stanford, students should have completed an undergraduate program with a strong background in one literature and some work in a second literature studied in the original language. Since the program demands an advanced knowledge of two non-native languages and a reading knowledge of a third non-native language, students should at the time of application have an advanced enough knowledge of one of the three to take graduate-level courses in that language when they enter the program. They should be making enough progress in the study of a second language to enable them take graduate courses in that language not later than the beginning of the second year, and earlier if possible. Applicants are expected to take an intensive course in the third language before entrance.

A considerable part of a student's work consists of individual study toward the oral examinations, for which each student devises reading lists in consultation with the graduate adviser. These examinations are centered on the study of particular periods, genres, and problems of literary study.

Students are admitted under a fellowship plan which attempts to integrate financial support and completion of residence requirements with their training as prospective university teachers. Tenure as a fellow, assuming satisfactory academic progress, is for a maximum of four or five years. The minimum teaching requirement is the same regardless of financial support. (For specific teaching requirements, see below.) Five years of support are normally available, from a combination of fellowships and teaching assistantships, to Ph.D. candidates admitted to the Comparative Literature Department who are making satisfactory progress toward the degree.

APPLICATION PROCEDURES

Competition for entrance into the program is keen. The program is kept small so that students have as much opportunity as possible to work in individual projects under faculty supervision throughout the period of study. No more than 16 students are in residence at any one time. The department does not plan to admit more than three or four new students for the class entering in September. Completed applications are due January 3. Because of the special nature of comparative literature studies, the statement of purpose included in the application for admission should contain the following information besides the general plan for graduate work called for on the application:

1. A detailed description of the applicant's present degree of proficiency in each of the languages studied, indicating the languages in which the applicant is prepared to do graduate work at present and outlining plans to meet additional language requirements of the program.
2. A description of the applicant's area of interest (for instance, theoretical problems, genres, periods) within literary study and the reasons for finding comparative literature more suitable to his or her needs than the study of a single literature. Applicants should also indicate what they think will be their primary field.

All applicants should arrange to have the results of the general section of the Graduate Record Examination sent to the Department of Comparative Literature.

Recommendations should, if possible, come from faculty in at least two of the literatures in which the student proposes to work.

Applicants must submit a copy of an undergraduate term paper which they consider representative of their best work.

DEGREE REQUIREMENTS

Residence—A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the B.A. degree. The student must take 135 units of graduate work, in addition to the doctoral dissertation, of which at least 72 units must be within the department. At least three consecutive quarters of course work must be taken at Stanford.

Languages—Students must know three non-native languages, two of them sufficiently to qualify for graduate courses in these languages and the third sufficiently to demonstrate the ability to read a major author in this language. Only the third language may be certified by examination. The other two are certified by graduate-level course work specified below. Language preparation must be sufficient to support graduate-level course work in at least one language during the first year and in the second language during the second year. Students must demonstrate a reading knowledge of the third non-native language no later than the beginning of the third year.

Literatures made up of works written in the same language (such as Spanish and Latin American) are counted as one. One of the student's three literatures usually is designated as the primary field, the other two as secondary fields, although some students may offer two literatures at the primary level (six or more graduate courses).

Teaching—Fellows, whatever their sources of financial support, are ordinarily required to undertake a total of five quarters of supervised apprenticeships and teaching at half time. Fellows must complete whatever pedagogy courses are required by the departments in which they teach. The department's minimum teaching requirement is a total of three quarters.

Minimum Course Requirements—Students are advised that the range and depth of preparation necessary to support quality work on the dissertation, as well as demands in the present professional marketplace for coverage of both traditional and interdisciplinary areas of knowledge, render these requirements as bare minimums. The following are required:

1. COMPLIT 369
2. COMPLIT 396L
3. A sufficient number of courses (six or more) in the student's primary field to assure knowledge of the basic works in one national literature from its beginnings until the present.
4. At least two additional complementary courses, with most of the reading in the original, in each of two different national literatures. Students whose primary field is a non-native language are required to take two courses in one additional literature not their own.

Minimum course requirements must be completed before the student is scheduled to take the University oral examination. These requirements are kept to a minimum so that students have sufficient opportunity to seek out new areas of interest. A course is an offering of 3-5 units. Independent study may take the place of up to two of the required courses, but no more; classroom work with faculty and other students is central to the program.

Examinations—Three examinations are required. The third and last is the University oral examination. Students' reading lists for each examination must be approved by an examination committee and by the graduate adviser. The examinations consist of the following, each of which takes the form of an oral colloquy between the student and a committee of faculty members with interests in the subject areas:

1. *First One-Hour Examination*: on a literary genre to consist of (a) a knowledge of a substantial number of literary works in a single genre, the list to include works from a number of centuries and from at least three national literatures, and (b) a grasp of the theoretical problems involved in dealing with this genre and with the question of genre in general. The examination must be taken no later than the beginning of the student's second year of graduate work (or the third quarter of the first year for students who enter with a year of previous graduate work).

2. *Second One-Hour Examination*: on literary criticism and theory, to consist of the exploration of a specific problem proposed and defined by the student. The problem must be sufficiently wide-ranging to demand the reading of critical texts from a variety of periods. The examination must be taken no later than the first quarter of the student's third year of graduate work (or the third quarter of the second year for students who enter with a year of graduate work). Students may elect to take this section of the examination before the genre section, in which case it must be taken at the earlier time.

3. *University Oral Examination*: on a literary period, to consist of in-depth knowledge of a period of approximately a century, in three or more literatures with primary emphasis on a single national literature or, in occasional cases, two national literatures. The reading list covers chiefly the major literary texts of this period but may also include some studies of intellectual backgrounds and modern critical discussions of the period. Students must demonstrate a grasp of how to discuss and define this period as well as the concept of periods in general. This examination is *not* to be on the dissertation topic, on a single genre, or on current criticism, but rather on a multiplicity of texts from the period. Students whose course work combines an ancient with a modern literature have the option of dividing the period sections into two wholly separate periods.

Qualifying Procedures—The qualification procedures for students in Comparative Literature take place during the quarter in which the student takes the first Ph.D. examination. Ordinarily, this is the beginning of the second year, but students who enter with a year of graduate work elsewhere must take the examination no later than the third quarter of the first year. Any student may elect to take the examination during the third quarter of the first year.

Students are judged qualified to proceed to the Ph.D. on the basis of the first part of the Ph.D. examination as well as other aspects of their work (for example, performance in courses, ability to do original research) that predict strong promise for their dissertations and future careers as scholars and critics. As soon as the student has completed the qualifying procedures, the chair recommends him or her for admission to candidacy for the Ph.D. At this time the student is also recommended for the Master of Arts degree in Comparative Literature if he or she has completed 45 units of work at Stanford and has not already completed an M.A. before entering the program.

Colloquium—The colloquium normally takes place in the quarter following the University oral examination. The colloquium lasts one hour, begins with a brief introduction to the dissertation prospectus by the student lasting no more than five minutes, and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium.

The prospectus must be prepared in close consultation with the dissertation adviser during the months preceding the colloquium. It must be submitted in its final form to the readers no later than one week before the colloquium. A prospectus should not exceed ten double spaced pages, in addition to which it should include a working bibliography of primary and secondary sources. It should offer a synthetic overview of the dissertation, describe its methodology and the project's relation to prior scholarship on the topic, and lay out a complete chapter by chapter plan.

It is the student's responsibility to schedule the colloquium no later than the first half of the quarter after that quarter in which the student passed the University Oral Examination. The student should arrange the date and time in consultation with the department administrator and with the three examiners. The department administrator schedules an appropriate room for the colloquium.

Members of the dissertation reading committee ordinarily are drawn from the University oral examination committee, but need not be the same.

PH.D. MINOR

This minor is designed for students working toward the Ph.D. in the various foreign language departments. Students working toward the Ph.D. in English are directed to the program in English and Comparative Literature described among the Department of English offerings. Students must have:

1. A knowledge of at least two foreign languages, one of them sufficient to qualify for graduate-level courses in that language, the second sufficient to read a major author in the original language.
2. A minimum of six graduate courses, of which three must be in the department of the second literature and three in the Department of Comparative Literature, the latter to include a seminar in literary theory or criticism. At least two of the three courses in comparative literature should originate in a department other than the one in which the student is completing the degree. Except for students in the Asian languages, students must choose a second literature outside the department of their major literature.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

Course Numbering System

Course Topic	Number
Authors	10–19
Genre	20–29
Periods and Movements	30–39
Cultures	40–49
Philosophy and Theory	50–59
Required courses:	101, 181, 199, 369, 396L

GENERAL

These courses are aimed at freshmen and sophomores who are non-majors (and/or potential majors) and provide an entry point to the discipline of Comparative Literature.

All majors are required, as soon as possible after declaration, to complete COMPLIT 101. During the senior year, majors enroll in 199.

COMPLIT 10N. Shakespeare and Performance—Stanford Introductory Seminar. Preference to freshmen. The problem of performance including the performance of gender through the plays of Shakespeare. In-class performances of scenes from plays by students. The history of theatrical performance. Sources include filmed versions of plays, and readings on the history of gender, gender performance, and transvestite theater. GER:DB-Hum, EC-Gender

3 units, Spr (Parker, P)

COMPLIT 11Q. Shakespeare, Playing, Gender—Stanford Introductory Seminar. Preference to sophomores. Focus is on several of the best and lesser known plays of Shakespeare, on theatrical and other kinds of playing, and on ambiguities of both gender and playing gender. Topics: transvestism inside and outside the theater, medical and other discussions of sex changes from female to male, hermaphrodites, and fascination with the monstrous. GER:DB-Hum, EC-Gender

3 units, Win (Parker, P)

COMPLIT 18N. Thomas Mann's *Death in Venice*—(Same as GERGEN 18N.) Stanford Introductory Seminar. Preference to freshmen. The philosophical treatment of the problem of authorship and the relationship between knowledge and passion in a work of art. Mann's novella contrasted as a document of modernism with Nietzsche's *Birth of Tragedy* and Plato's *Phaedrus*. The relevance of the text's questioning of the proximity of writing and democracy on the eve of WW I. In English.

4 units, Aut (Berman, R)

COMPLIT 40N. Reading Across Literature—Stanford Introductory Seminar. Preference to freshmen. How literature serves as a medium across which we encounter others. What happens when people are not only other readers but also other authors. What happens when the boundary between reading and writing is blurred, confused, refracted; how that enables a particular aesthetic and ethics. Introduction to literary texts which incorporate issues of culture, history, and ethics. Sources include Barthes, Woolf, Coetzee, Daif, Shamma, and Ozeki. GER:DB-Hum

5 units, Spr (Palumbo-Liu, D)

COMPLIT 41Q. Ethnicity and Literature—Stanford Introductory Seminar. Preference to sophomores. What is meant by ethnic literature? How is ethnic writing different from non-ethnic writing, or is there such a thing as either? How does ethnicity as an analytic perspective affect the way literature is read by ethnic peoples? Articles and works of fiction; films on ethnic literature and cultural politics. How ethnic literature represents the nexus of social, historical, political, and personal issues. GER:DB-Hum, EC-AmerCul

3-5 units, Aut (Palumbo-Liu, D)

COMPLIT 53N. Are We Our Bodies?—(Same as CLASSGEN 53N.) Preference to freshmen. Is the mind a bodily entity, or is it separate from the body, a purely rational or spiritual entity? If people identify with their minds, what are the ethical obligations to the bodily world? Do intellectual faculties make people superior to nonhumans? Do human beings have the right to control the natural world and use it for human purposes? If minds are bodily entities, how does this affect ethics and values? GER:DB-Hum

3-4 units, Spr (Nightingale, A)

COMPLIT 101. Introduction to Comparative Literature: Literary Theory—History of academic literary studies and the emergence of literary theory since the early 19th century. The most important discourses that have shaped the discussion of the phenomenon of literature during the 20th century. Readings from Richter's anthology, *The Critical Tradition*. WIM; GER:DB-Hum

5 units, Aut (Gumbrecht, H)

COMPLIT 194. Independent Research

1-5 units, Aut, Win, Spr (Staff)

COMPLIT 195. Honors Research—Autumn and Winter should total 10 units between two quarters. Winter and Spring must be the same grade.

1-10 units, Aut, Win, Spr (Staff)

COMPLIT 199. Senior Seminar on Literary Theory—Advanced literary theory and critical practice including antecedents in canonical theory and iterations today. Topics for this year: world literature as a problem for comparative literature; and the debate about the nature of comparative literature as a discipline. Prerequisite: senior Comparative Literature major or consent of instructor. GER:DB-Hum

5 units, Aut (Greene, R)

UNDERGRADUATE/GRADUATE

COMPLIT 115/215. Nabokov and Modernism—(Same as SLAVGEN 156/256.) Nabokov's stories, novels, and a film script in the context of: modernist writers such as Bergson, Proust, and Joyce; media including painting, film, and photography; and philosophical thought. Critical approaches that elude the author's control. Readings include *Bend Sinister*, *Lolita*, *Pale Fire*, *Speak Memory*, and *Ada*. GER:DB-Hum

3-5 units, Spr (Greenleaf, M)

COMPLIT 119/219. Dostoevsky and His Times—(Same as SLAVGEN 151/251.) Open to juniors, seniors, and graduate students. Major works in English translation with reference to related developments in Russian and European culture, literary criticism, and intellectual history. GER:DB-Hum

4 units, Win (Frank, J)

COMPLIT 120. Of Beauties and Beasts: Tales of Transformation from Antiquity to the Present—Representative texts from the literary traditions initiated by Ovid's *Metamorphoses*, concerning transformation: human to animal, man to woman, beast to beauty, nose to man. A conceptual toolbox for understanding the social and cultural function of narratives about transformation across time and place. Theoretical readings from history, mythology, psychology, and literary studies.

5 units, Spr (Pojarska, E)

COMPLIT 125. Underground Literatures and Unofficial Cultures—The concept of underground literature, beginning with *samizdat* literature in Cold War E. Europe. Forms of cultural expression beyond print important to the Soviet-era underground such as radio, film, and graphic art; historical precursors to samizdat; the role of unofficial culture, such as indie and zine publishing in the U.S., in non-authoritarian societies; and how new media have been used to foster unofficial culture in repressive societies since 1989

3-5 units, Win (Labov, J)

COMPLIT 130. Fantastic Baubles: Aesthetics and Ideology in Renaissance Poetry—Lyric poetry of the 16th century in light of contemporaneous Renaissance literary theories; the interpretive world for which these texts were created. Readings include poems, commentaries, and treatises including: Wyatt, Sidney, Spenser, and Shakespeare in English; Garcilaso de la Vega, San Juan de la Cruz, Góngora, and Quevedo in Spanish; and Scève, Labé, du Bellay, and Ronsard in French.

5 units, Aut (Kirkbride, B)

COMPLIT 141. Literature and Society: Introduction to Francophone Literature from Africa and the Caribbean—(Same as FRENLIT 133.) Major African and Caribbean writers. The issues raised in literary works which reflect changing aspects of the societies and cultures of Francophone Africa and the French Caribbean: meeting the challenge of acculturation and the search for identity; tradition competing with modernity; the use of oral tradition and writing; women's role and status; writers' social responsibility. Visual material; readings from fiction, poetry, plays, and criticism. In French. Prerequisite: FRENLANG 126 or consent of instructor. GER:DB-Hum, EC-GlobalCom

3-5 units, Spr (Boyi, E)

COMPLIT 142. The Literature of the Americas—(Same as ENGLISH 172E.) Representations of the creation of an American new world experience, myths of America as utopia, and critiques of notions of the self and the nation to which such myths give rise in political, historical, literary, and mass media forms. Readings include Columbus, Bernal Díaz del Castillo, Aztec codices, Sor Juana, Tocqueville, Fenimore Cooper, Whitman, Machado de Assis, Mario de Andrade, Martí, Neruda, Williams, Rulfo, Faulkner, Morrison, and Sandra Cisneros. GER:DB-Hum, EC-AmerCul

5 units, Aut (Greene, R; Saldívar, R)

COMPLIT 143. Contemporary France: Immigration, Culture, and Politics—(Same as FRENLIT 135.) France as a place of migration or exile for people from all over the world: workers, writers, artists, political exiled, and students. Focus is on N. African immigration and its impact on literature, politics, and culture in contemporary France. Topics include: secularism and religion, insertion and integration, and nationality and citizenship. Films and readings include Azouz Begag, Yasmina Benguigui, Nina Bouraoui, Paul Smail, Dominique Schnapper, Michèle Winock, and Benjamin Stora. GER:EC-GlobalCom

4 units, Aut (Boyi, E)

COMPLIT 144. Arab Minorities in a Transnational Context: Fictions of Race, Ethnicity, Periphery—The transnational formation of Arab cultural identities through literary texts. The invention of Arabness in the context of a secular cultural program after postcolonial independence, the racialization of Arabness and Islam in the Arab diaspora, and the cultural provincialization of the Arab world under the signs of globalization.

3-5 units, Spr (Tanoukhi, N)

COMPLIT 148. Introduction to Asian American Cultures—Asian American cultural production (film, drama, poetry, fiction, music) in sociohistorical context. Topics include ethnicity, race, class, and gender, and the political economy of ethnic culture in the U.S. GER:DB-Hum, EC-AmerCul

3-5 units, Win (Palumbo-Liu, D)

COMPLIT 149. What is Nobel Literature? Reading, Assessing, and Interpreting the Nobel Novels on the World Stage—Recent Nobel laureates in literature: Gabriel García Márquez, Nadine Gordimer, Toni Morrison, Kenzaburo Oe, and V.S. Naipaul. These writers come from different locations, yet each participates in a global conversation about the human condition. The impact of their identities upon their thought and writing. How the Nobel prize is awarded. The role of literature in the world, and analytical skills for reading literary texts. GER:DB-Hum, EC-GlobalCom

5 units, Sum (Palumbo-Liu, D)

COMPLIT 157. Imitation of Life—What happens when authors create human characters, and when readers create them from authors' words? How do readers decide whether a character seems real, and what if the characterization is a bit off from their sense of reality? What are the relationships between external and internal characterizations, and how does each strategy foster or frustrate the sense of a human presence? When is characterization an impersonation, and what are the ethical and aesthetic concerns of speaking in another person's voice whether the other is fictional or a self-portrait?

3-5 units, Spr (Gelder, A)

COMPLIT 219A. Henrich von Kleist—Major literary and critical works. The era in which von Kleist worked. His language, topics, and obsessions which have resisted categorizations and survived the effects of temporal distance. The conditions for the emergence of Kleist's prose style. Readings in German and English. Undergraduates require consent of instructor.

3-5 units, Win (Gumbrecht, H)

COMPLIT 222. Chrétien de Troyes—(Same as FRENGEN 205.) Verse romances seen as the origin of the modern Western novel, including *Yvain*, *Lancelot*, and *Perceval*. Historical analysis, courtly culture, and the literary tradition that they produced. Source is a bilingual edition of Chrétien's complete works in medieval and modern French.

3-5 units, Aut (Gumbrecht, H)

COMPLIT 224/324. The Contemporary Novel—(Same as GERGEN 290A/390A.) Anglo-American and European novels; how they address central aspects of the contemporary condition: memory, ethnicity, and political violence. Theoretical contributions on the intersection of the arts and literature, and politics. Readings include Kadare, Pamuk, Houellebecq, Smith, Barthes, Fish, Rorty, Jameson, Butler, White, Appiah, Bhabha, and Zizek.

3-5 units, Win (Eshel, A)

COMPLIT 225. Encyclopedia as Literature—The history and theories of the encyclopedia, including Voltaire, Diderot, and D'Alembert's collective authorship of the *Encyclopédie*, the development of a literary mode based on the encyclopedia form by Borges, Eco, Kis, and Pavic, current toolkits for sifting and distilling information such as the database, search engine, and Wikipedia. The essay as a form, the notion of anti-authoritarian dissidence, and debates over access to information and open source systems. How to read an encyclopedia and its the entries as literature. The status of the literary knowledge thereby gained.

3-5 units, Spr (Labov, J)

COMPLIT 230B. The Novel in Europe: The Bourgeois Age, 1848-1900—(Same as ENGLISH 230B.) New forms that make sense of historical novelties and address new segments of the reading public during the period when the industrial world consolidates in western Europe. Authors include Dickens, Flaubert, Dostoevsky, Zola, Doyle, and Stevenson.

5 units, Aut (Moretti, F)

COMPLIT 240. Introduction to Old Norse—(Same as ENGLISH 200.) The literary language of medieval Scandinavia known as Old Norse or Old Icelandic. Goal is to gain a reading knowledge to explore poetry and prose. N. European mythology, historical and social change, and the narrative and imagistic artistry of medieval Scandinavian culture. Learned, courtly, and ecclesiastical contexts; narratives of violence, power, and moral argument. Texts to be read in Old Norse include *Hrafnkel's Saga*, *Gylfaginning*, and *Hamdismal*. Background reading in translation from major works of the tradition including Snorri Sturluson's *Edda* and *Njal's Saga*. Recommended: course work in German, Old English, or historical linguistics.

4-5 units, Win (Lerer, S)

COMPLIT 241. Comparative Fictions of Ethnicity—How authors create fiction informed by the notions of ethnicity, difference, and social ideologies. Focus is on narratives written by racial and ethnic minorities whose representation reveals how they came to write and how they sense themselves to be written by historical, social, and cultural forces. How ideas such as identity, national character, ethnicity, and gender evolved. Novels from settings including the U.S., Middle East, and Asia. Authors include Sandra Cisneros, John Wideman, Zora Neale Hurston, Toshio Mori, Nieh Hualing, Anton Shammas, and N. Scott Momaday.

5 units, Win (Palumbo-Liu, D)

COMPLIT 243. Literature and History in the Israeli Novel—In what modes and to what effects does literature engage with history? How did major Israeli writers after the establishment of the state of Israel discuss the recent past including the Holocaust, the birth of the Palestinian refugee problem, and the Arab-Israeli wars? Readings include Agnon, Yishar, Yehoshua, Oz, Grossman, Castel-Bloom, Govrin, Gutfreund, and literary theory about history and literature, Israeli historiography, cultural-political discourse, and post-Zionism.

3-5 units, Spr (Eshel, A)

COMPLIT 246. Rethinking Identities in the Era of Globalization—(Same as FRENLIT 278.) Cultural issues faced by postcolonial societies and new visions proposed by writers and thinkers to meet the challenge of globalization and preserve the local. Emphasis is on questions of difference, language, nation and identities, and identity construction. Theoretical and fictional readings include Derrida, Glissant, Kristeva, Malouf, Morejon, Senghor, and Serres. May be repeated for credit.

3-5 units, alternate years, not given this year

COMPLIT 249. Tradition and Modernity in Contemporary Iranian Literature—Modern Iranian literary texts in light of narrative theory and cultural alterity. Formal aesthetic aspects and social historical contexts. The problem of censorship in Iranian literary history. Were the sources of Iranian and Muslim modernity derived from the West or as an indigenous development? GER:DB-Hum

5 units, Aut (Milani, A)

COMPLIT 251. Space and the Modern Sublime—(Same as FRENGEN 231.) The power of space in producing modern notions of the sublime in philosophy, literature, and art. The role of global exploration in producing terrifying European encounters with nature and unknown peoples that the sublime transforms into art. Sublime spaces such as sea, desert, mountains, and city; the Romantic interiorization of the sublime into the psyche; mimesis, memory, and technology. Sources may include explorer writings; Burke, Kant, Lyotard, Deleuze and Guattari, Freud, the Shelleys, Coleridge, Hugo, Baudelaire, Rimbaud, and Irigaray; and artists such as Gericault, Turner, Delacroix, and Friedrich.

3-5 units, Win (Cohen, M)

COMPLIT 255A. Moved by the Past—How experience intrudes on the present, impacting emotion or eliciting action. The presence of the past and its capacity to move. Sources include: readings by Balzac, Barthes, Sebald, and Wordsworth; monuments including the Vietnam Veterans Memorial in Washington and the Berlin Holocaust Memorial; and films such as Cavani's *Night Porter*.

3 units, Win (Runia, E)

COMPLIT 255B. Beginnings and Mutations—Transgressive deeds can create new realities without prior conceptualization: innovation without theoretical anticipation. Literary and other texts that question the primacy of the word and conscious intention in the creative process. Authors include Stendhal, Musil, Conrad, Ibsen, and Weber. Processes in the visual arts through works by Kandinsky and Pollock.

3-5 units, Spr (Runia, E)

COMPLIT 256. Heidegger and Poetry in an Age of Technology: Rilke, Trakl, and Char—(Same as FRENGEN 282, GERGEN 282.) Heidegger's thinking on language and poetry. The technological transformation of language into univocal information and the resources of poetry for an ambiguous resistance. Parallel consideration of philosophy's relation to poetry. Readings from Rilke, Trakl, and Char.

3-5 units, Spr (Mitchell, A)

COMPLIT 259. Self-Reflexivity Historicized, or the Emergence of the Second-Order Observer—(Same as FRENGEN 259.) The origin of self-reflexivity as a habit and institution typical of intellectuals. Focus is on historical case studies from Western literatures and cultures since the Renaissance, based on a conceptual apparatus concerning the second-order observer, mainly derived from the work of Niklas Luhmann. Readings in original and translation include Descartes, Rousseau, Schlegel, Hegel, Gracián, and de Goya.

3-5 units, Win (Gumbrecht, H)

COMPLIT 320A. Epic and Empire—(Same as ENGLISH 314.) Focus is on Virgil's *Aeneid* and its influence, tracing the European epic tradition (Ariosto, Tasso, Camoes, Spenser, and Milton) to New World discovery and mercantile expansion in the early modern period.

5 units, Win (Parker, P)

COMPLIT 329. Novel of the Americas—(Same as ENGLISH 309A.) The possibility of identifying aesthetic visions of an American imaginary in terms not defined by nationalist ideologies but open to the consequences of transnational forces. How America has been invented as a category in geographical and sociocultural terms. Readings include Willa Cather's *Death Comes for the Archbishop*, Faulkner's *Absalom, Absalom*, Mariano Azuela's *The Underdogs*, Toni Morrison's *Beloved*, Alejo Carpentier's *The Kingdom of this World*, and Silko's *Almanac of the Dead*.

5 units, Win (Saldívar, R)

COMPLIT 330. The Bourgeois—(Same as ENGLISH 363.) Interdisciplinary. Goal is to define the ruling class of modern times. Social history (Weber, Hirschmann, Marx); literary texts (Defoe, Goethe, Gaskell); and Henrik Ibsen who produced an intransigent criticism of the bourgeois ethos.

5 units, Aut (Moretti, F)

COMPLIT 341. Algeria, My Mother—(Same as FRENLIT 341.) The representation of Algeria through authors from both shores of the Mediterranean. Literature and Algerianism. Politics and the Algerian war. Memory and mourning. Readings include Louis Bertrand, Frantz Fanon, Pierre Bourdieu, Benjamin Stora, Assia Djebar, Jean Pélégri, Albert Camus, Jacques Derrida, and Nina Bouraoui.

3-5 units, Spr (Boyi, E)

COMPLIT 343. The Bible and Literature—(Same as ENGLISH 300B.) Readings from Genesis to Revelation; other texts include Dante, medieval drama, Shakespeare, Spenser, Renaissance lyric, Milton, 19th- and 20th-century poetry, and British, American, African American, and African novels. Topics: citations in radical and hegemonic political contexts; the influence on prototypes of race/gender difference; the relation between biblical eschatology and literary structures; and Song of Songs and the history of lyric.

5 units, Spr (Parker, P)

COMPLIT 354. The Frankfurt School—Major thinkers of the Frankfurt School emphasizing their contributions to the aesthetics and epistemology of modernity. Thinkers include Georg Lukács, Theodor Adorno, Max Horkheimer, and Walter Benjamin. Recommended: background in continental philosophy.

5 units, Win (Cohen, M)

COMPLIT 354A. Literature of Affiliation—Literature as a medium across which people encounter others. The formal or theoretical space of mediating. How that form is impacted by history, institutions, and language. What happens when the boundary between reading and writing is blurred; how does that enable a particular aesthetic and ethics? Works by Barthes, Said, Spivak, Ricoeur, Levinas, Henry James, Ruth Ozeki, and Nadine Gordimer.

5 units, Spr (Palumbo-Liu, D)

COMPLIT 356. Terrorism—(Same as GERGEN 353, LAW 360.) Interdisciplinary seminar. How to define terrorism and distinguish it from legitimate forms of political resistance. Is terrorism political or criminal? How has terrorism altered the perception of permissible restriction of civil liberties? How does terrorism affect societies?

3-5 units, Aut (Eshel, A)

COMPLIT 357. Surrealism to Structuralism—(Same as FRENGEN 357.) Authors such as Saussure, Breton, Bataille, Artaud, Lacan, Jakobson, Sartre, Merleau-Ponty, Beauvoir, Fanon, Foucault, Althusser, Cixous, Irigaray, and Barthes. Background reading in Hegel, Marx, and Freud, if necessary.

3-5 units, Aut (Cohen, M)

COMPLIT 359A. Philosophical Reading Group—(Same as FRENGEN 395, ITALGEN 395.) Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht is required. May be repeated for credit.

1 unit, Aut, Win, Spr (Staff)

COMPLIT 369. Introduction to Graduate Studies: Criticism as Profession—(Same as GERLIT 369.) Major texts of modern literary criticism in the context of professional scholarship today. Readings of critics such as Lukács, Auerbach, Frye, Ong, Benjamin, Adorno, Szondi, de Man, Abrams, Bourdieu, Vendler, and Said. Contemporary professional issues including scholarly associations, journals, national and comparative literatures, university structures, and career paths.

5 units, Aut (Staff)

COMPLIT 395. Research

1-15 units, Aut, Win, Spr (Staff)

COMPLIT 396L. Pedagogy Seminar I—(Same as ENGLISH 396L.) Required for first-year Ph.D students in English, Modern Thought and Literature, and Comparative Literature (except for Comparative Literature students teaching in a foreign language). Preparation for surviving as teaching assistants in undergraduate literature courses. Focus is on leading discussions and grading papers.

2 units, Aut (Jones, G)

COMPLIT 399. Dissertation

1-15 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

Comparative Literature majors are advised to consult the “Division or Literature, Culture, and Languages” section of this bulletin for additional cognate offerings. See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

CLASSGEN 17N. Odysseus of Many Turnings

4-5 units, Aut (Martin, R)

CLASSGEN 212. Mimesis in Greek Poetry and Philosophy

4-5 units, Spr (Nightingale, A; Peponi, A)

DLCL 189. Honors Thesis Seminar

5 units, Aut (Reichert, J)

DLCL 377. Topics in Literature and Culture

3-4 units, Aut (Bohrer, K)

FRENGEN 221. The History of the Book in Europe—(Same as ITALGEN 221.)

3-5 units, Win (Sussman, S; Mustain, J)

GERGEN 123. Modern Tyranny in Culture and Political Thought

3-5 units, Spr (McIntyre, S)

GERGEN 168A/268A. Freud and the Enterprise of Psychoanalysis

3-5 units, Win (Dowaldzi, C)

GERGEN 191A/291A. Oedipus, Hamlet, Moses: Archetypes of the Hero

3-5 units, Spr (Dowaldzi, C)

GERGEN 206/306. Narrative, Visuality, Memory

3-5 units, Spr (Dowaldzi, C)

GERLIT 196/296. Idealist and Romantic Aesthetics

3-5 units, Aut (Dornbach, M)

GERLIT 197/297. Theories of Art after Idealism

3-5 units, Win (Dornbach, M)

GERLIT 278/378. Modernity as Succession: Imitation, Emulation, Influence

3-5 units, Spr (Dornbach, M)

ITALGEN 260. The Fantastic Mode

3-5 units, Spr (Staff)

ITALGEN 263. Love Books of the Middle Ages—(Same as FRENGEN 263.)

3-5 units, Win (Harrison, R)

SLAVLIT 310. Civilizing Process: Paradigms of Society and Culture in Modern Russian Literature and Film

2-4 units, not given this year

COMPARATIVE STUDIES IN RACE AND ETHNICITY (CSRE)

Director: David-Palumbo-Liu

Curriculum Committee: Lawrence Bobo, Vera Grant, Teresa LaFromboise, Purnima Mankekar, David Palumbo-Liu, Vered Shemtov, Yvonne Yarbro-Bejarano, Steven Zipperstein

Affiliated Faculty and Teaching Staff: David Abernethy (Political Science, emeritus), Anthony Antonio (Education), Rick Banks (Law), Lucius Barker (Political Science, emeritus), Donald Barr (Human Biology), Joel Beinin (History), Karen Biestman (Native American Studies), Lawrence Bobo (Sociology), Michele Elam (English), Albert Camarillo (History), Martin Carnoy (Education), Clayborne Carson (History), Gordon Chang (History), Karen Cook (Sociology), Irene Corso (Spanish and Portuguese), Loan Dao (Asian American Studies), Michele Dauber (Law), Linda Darling-Hammond (Education), Carol Delaney (Cultural and Social Anthropology, emeritus), Carolyn Duffey (Comparative Studies in Race and Ethnicity), Jennifer Eberhardt (Psychology), Paulla Ebron (Cultural and Social Anthropology), Penny Eckert (Linguistics), Harry Elam (Drama), James Ferguson (Cultural and Social Anthropology), Shelley Fisher-Fishkin (English), James Fishkin (Communication), Luis Fraga (Political Science), George Fredrickson (History, emeritus), Estelle Freedman (History), Vera Grant (African and African American Studies), David Grusky (Sociology), Akhil Gupta (Cultural and Social Anthropology), Miyako Inoue (Cultural and Social Anthropology), Shanto Iyengar (Communication), Gavin Jones (English), Terry Karl (Political Science), Pamela Karlan (Law), Matthew Kohrman (Cultural and Social Anthropology), Jan Krawitz (Art and Art History), Jon Krosnick (Communication), Teresa LaFromboise (Education), David Laitin (Political Science), Liisa Malkki (Cultural and Social Anthropology), Purnima Mankekar (Cultural and Social Anthropology), Hazel Markus (Psychology), Barbaro Martinez-Ruiz (Art and Art History), Douglas McAdam (Sociology), Monica McDermott (Sociology), Raymond McDermott (Education), James Montoya (Comparative Studies in Race and Ethnicity), Cherríe Moraga (Drama), Marcyliena Morgan (Communication), Joanna Mountain (Anthropological Sciences), Paula Moya (English), Norman Naimark (History), Na'ilah Nasir (Education), Sharon Nelson-Barber (Native American Studies), Hilton Obenzinger (Undergraduate Advising and Research), Susan Olzak (Sociology), Amado Padilla (Education), José Palafox (Chicana/o Studies), David Palumbo-Liu (Comparative Literature), Jack Rakove (History), Arnold Rampersad (English), Robert Reich (Political Science), John Rickford (Linguistics), Cecilia Ridgeway (Sociology), Richard Roberts (History), Aron Rodrigue (History), Michael Rosenfeld (Sociology), Ramón Saldívar (English), Joel Samoff (Center for African Studies), Stephen Sano (Music), Debra Satz (Philosophy), JoEllen Shively (Native American Studies), C. Matthew Snipp (Sociology), Paul Sniderman (Political Science), Sandra Soo-Jin Lee (Cultural and Social Anthropology), Claude Steele (Psychology), James Steyer (Comparative Studies in Race and Ethnicity), Ewart Thomas (Psychology), Jeanne Tsai (Psychology), Linda Uyechi (Music), Guadalupe Valdés (Education; Spanish and Portuguese), Richard White (History), Michael Wilcox (Cultural and Social Anthropology), Joy Williamson (Education), Bryan Wolf (Art and Art History), Sylvia Yanagisako (Cultural and Social Anthropology), Yvonne Yarbro-Bejarano (Spanish and Portuguese), Bob Zajonc (Psychology), Steven Zipperstein (History)

Teaching Fellows: Sapna Cheryan, Teresa Pellinen-Chavez, Victor Thompson

Program Offices: Building 240, Room 103

Mail Code: 94305-2152

Phone: (650) 723-8449

Email: mibarra@stanford.edu

Web Site: <http://ccsre.stanford.edu>

Courses given in CSRE have the subject code CSRE. For a complete list of subject codes, see Appendix.

UNDERGRADUATE PROGRAMS

MAJORS

CORE CURRICULUM

The Interdisciplinary Program in Comparative Studies in Race and Ethnicity (CSRE) provides students the opportunity to structure a major or minor in comparative ethnic studies or to focus their course work in a single ethnic studies area. Four majors and minors (Asian American Studies, Comparative Studies, Chicana/o Studies, and Native American Studies) are offered as part of CSRE. All courses taken for the major must be taken for a letter grade. In addition, majors in the Program in African and African American Studies enroll in the core curriculum offered by CSRE. The directors of the programs and of each major constitute the CSRE curriculum committee, the policy making body for the interdisciplinary program.

Students who declare any of the five majors participate in a common curriculum of the CSRE consisting of at least two introductory core courses and a senior seminar. Individually designed majors in Jewish Studies may also enroll in the CSRE core curriculum.

There are two types of introductory, interdisciplinary core courses taught by senior CSRE-affiliated faculty: regular core courses that compare across racial and ethnic groups; and single-group core courses that focus on a specific racial or ethnic group.

MINORS

Students who wish to minor in the study areas must complete six courses (a minimum of 30 units) from the approved CSRE course list, two of which must be introductory core courses. Proposals for the minor must be approved by the director of each study area.

DIRECTED READING AND RESEARCH

Directed reading and research allows students to focus on a special topic of interest. In organizing a reading research plan, the student consults with the director of the major and one or more faculty members specializing in the area or discipline.

SENIOR SEMINAR

Research and the writing of the senior honors thesis or senior paper is under the supervision of a faculty project adviser. All CSRE-related students, even those who opt to write honors theses in other departments and programs, must enroll in CSRE 200X, Senior Seminar, offered in Autumn Quarter. The course takes students through the process of research including conceptualization, development of prospectus, development of theses, research, analysis, and writing. This course meets the Writing in the Major requirement (WIM). Those who opt to write senior papers are organized into tutorial groups in Autumn Quarter.

RELATED PROGRAMS

CSRE-related majors have several unique opportunities available to them. The program supports full-time paid summer internships for those who apply to work in a non-profit or government agency in a public policy-related area. The CSRE Public Policy/Leadership Institute is a two week, pre-Autumn Quarter seminar that provides exposure to critical public policy issues and is taught by a leading faculty member. The residence-based institute provides room and board and all seminar materials for participants, including a visit to Sacramento to meet with policy makers. The CSRE program also sponsors quarterly career workshops and informal luncheons for all majors and minors.

HONORS

Majors in each of the study areas who meet academic qualifications (at least a grade point average of 3.5 in CSRE-related courses) may apply for honors. Majors are expected to participate in a Spring Quarter junior workshop in preparation for honors thesis research. Prizes for best undergraduate honors theses are awarded annually by the CSRE curriculum committee.

AFRICAN AND AFRICAN AMERICAN STUDIES (AAAS)

Director: Lawrence Bobo

Since 1997-98, AAAS has been a CSRE-related major. For major and minor descriptions and requirements, see the "African and African American Studies" section of this bulletin.

ASIAN AMERICAN STUDIES

Director: Purnima Mankekar

Asian American Studies (AAS) provides an interdisciplinary approach to understanding the historical and current experiences of persons of Asian ancestry in the United States. In using the term "Asian American," the AAS faculty recognize that the term seeks to name a rapidly developing, complex, and heterogeneous population and that there is neither a single Asian American identity nor one community that comprises all Asian Americans. Asian Americans include those with ancestral ties to countries or regions in East Asia, South Asia, Southeast Asia, or the Philippines, among others.

AAS brings together courses that address the artistic, historical, humanistic, political, and social dimensions of Asian Americans and is an appropriate course of study for students interested in a variety of concerns related to Asian Americans, including: artistic and cultural contributions; current social significance; historical experiences; immigration, intellectual, and policy issues; relationships with other social groups; and the construction of the notion of Asian American as it addresses important theoretical and practical issues.

REQUIREMENTS

Asian American majors must take the 15-unit CSRE core curriculum including two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One single-group, core course that focuses on a non-Asian ethnic group may be counted toward the 15-unit core requirement.

Majors are required to take one foundational thematic course in Asian American Studies, such as COMPLIT 148, Introduction to Asian American Cultures. Majors must complete an additional 40 units of course work from an approved list. One course must have an international dimension, preferably a focus on Asia. Five other courses must have an Asian American focus and must be selected from social science and humanities departments. Majors must take two courses offering a comparative perspective on race and ethnicity. Students may obtain credit for their study of a related Asian language towards their degree. A total of 60 units of course work is required for the major.

Students who wish to minor in Asian American Studies must complete two core introductory courses and four additional courses related to the thematic concentration. A total of 30 units of approved course work are required for the minor.

CHICANA/O STUDIES

Director: Yvonne Yarbro-Bejarano

Chicana/o Studies is an interdisciplinary major focusing on the Mexican-origin population of the U.S., the second largest ethnic group in the nation. Students who major or minor in Chicana/o Studies have an opportunity to select from courses in the humanities, social sciences, and courses offered by affiliated faculty in the School of Education.

REQUIREMENTS

Chicana/o Studies majors must take the 15-unit CSRE core curriculum including two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One single-group, core course that focuses on a non-Mexican origin group may be counted toward the 15-unit core requirement.

Majors are required to take CHICANST 180E/SPANLIT 180E, Introduction to Chicana/o Studies. Majors complete an additional 40 units of courses relevant to the thematic concentration and approved by the adviser. A total of 60 units of course work are required for the major.

Students who wish to minor in Chicana/o Studies must complete two core introductory courses, including CHICANST 180E/SPANLIT 180E, Introduction to Chicana/o Studies, and one additional course from the approved list available from the CSRE undergraduate program office, and four additional courses related to the thematic concentration. A total of 30 units of approved course work are required for each minor.

COMPARATIVE STUDIES IN RACE AND ETHNICITY

Director: David Palumbo-Liu

Comparative Studies in Race and Ethnicity, the largest of the five major/minors offered in the program, does not focus on a particular ethnic group. Rather, a student in consultation with the adviser designs a curriculum in relation to a thematic concentration that compares various ethnic groups or explores topics that cut across group experiences in the United States and elsewhere in the world. For example, students may compare groups within the U.S., or compare groups in the U.S. to ethnic groups elsewhere, or study the diaspora of a single group or the sovereignty of indigenous peoples within and across different national contexts. Students in this major are able to take advantage of courses in over 22 fields offered by the affiliated faculty of CSRE.

REQUIREMENTS

All CSRE-related majors enroll in the 15-unit CSRE core curriculum, which consists of two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One single-group, core course may be counted toward the 15-unit core requirement.

Comparative Studies majors complete another 45 units of course work relevant to the thematic concentration they have chosen in consultation with the adviser.

Students who wish to minor in Comparative Studies must complete six courses (a minimum of 30 units) from the approved course list.

TAUBE CENTER FOR JEWISH STUDIES

Director: Steven Zipperstein

Associate Director: Vered Shemtov

Jewish Studies is an affiliated program of CSRE. For program and course descriptions, see the "Jewish Studies" section of this bulletin.

NATIVE AMERICAN STUDIES

Director: Teresa LaFromboise

Native American Studies provides an intensive approach to understanding the historical and contemporary experiences of Native American people. Attention is paid not only to the special relationship between tribes and the federal government, but to issues across national boundaries, including tribal nations within Canada, and North, Central, and South America. In using the term "Native American," the NAS faculty recognize the heterogeneous nature of this population. Native Americans include the Alaska Native population, which comprises Aleuts, Eskimo, and other Native American people residing in Alaska.

The purpose of the Native American Studies major and minor is to introduce students to approaches in the academic study of Native American people, history, and culture. Students who major in Native American Studies have the opportunity of doing advanced work in related fields, including literature, sociology, education, and law. In addition to specialized course work on Native American issues, students also are expected to concentrate in a traditional discipline such as anthropology, history, or psychology to ensure a well rounded educational experience. The area of concentration and related course work should be selected in consultation with a faculty adviser in Native American Studies. All courses in the program promote the discussion of how academic knowledge about Native Americans relates to the historical and contemporary experiences of Native American people and communities.

REQUIREMENTS

Native American Studies must take the 15-unit CSRE core curriculum, including two introductory core courses and a senior seminar taken in Autumn Quarter of the senior year. One single-group, core course that

focuses on a non-Native American group may be counted toward the 15-unit core requirement.

Majors complete an additional 45 units of course work that satisfy three categories of their thematic concentration: Native American focus, comparative focus, and a methodology/research course. A total of 60 units of coursework are required for the major.

Students who wish to minor in Native American Studies must complete two core introductory courses and four additional courses related to the thematic concentration. A total of 30 units of approved course work are required for the minor.

THEMATIC CONCENTRATION IN IDENTITIES, DIVERSITY, AND AESTHETICS (IDA)

Students interested in focusing their study on how questions of race and diversity can be critically examined through the arts can choose a thematic concentration in Identities, Diversity, and Aesthetics (IDA) within any of the CSRE majors. This concentration is not declared on Axess; it does not appear on the transcript or diploma. A thematic concentration in IDA offers students a curriculum that integrates academic theory and artistic practice focused on issues of diversity including race and ethnicity and gender and sexuality. This area of study encourages new thinking in cultural theory and the arts because it cuts across traditional disciplines within the humanities, and moves beyond the boundaries between the humanities and other disciplines.

The IDA thematic concentration develops social, cultural, and practical knowledge and leadership through hands-on work with artists and the Institute for Diversity in the Arts and courses with Stanford faculty that use the arts as a lens for understanding the dynamic interrelationship of race, gender, and sexuality. The Institute for Diversity in the Arts offers performing arts workshops with professional artists working in culturally rooted, community-based art forms. Students learn techniques, historical significance, and social application of artistic processes from their origins to contemporary practice.

For details about the requirements for the thematic concentration in Identities, Diversity and Aesthetics, contact the CSRE undergraduate program office.

THEMATIC CONCENTRATION IN PUBLIC SERVICE

The Public Service thematic concentration is designed to ensure that CSRE students interested in public service have access to a structured curriculum providing a solid grounding in the theory and practice of public service that enables them to become future leaders in the sphere of public life. This concentration is not declared on Axess; it does not appear on the transcript or diploma. This thematic concentration can be completed within any of the majors within CSRE. Students should consult with the CCSRE undergraduate program director and the chair of African and African American Studies, Asian American Studies, Chicana/o Studies, or Native American Studies to ensure that the courses chosen for the Public Service thematic concentration also fulfill the requirements of the respective majors. Students who wish to pursue a thematic concentration in public service must organize their studies to include 15 credits of approved CSRE core courses, including CSRE 200X, CSRE Senior Seminar, in which students with a thematic concentration in public service may select a topic for their senior paper or honors thesis that reflects their interest in public or experience with a past internship.

In addition to the usual core requirements expected of all CCSRE majors, students who wish to pursue a thematic concentration in Public Service must take an additional 40 units organized around four subject matter areas: organization and leadership; inquiry and assessment; serving diverse communities; and service learning. They also must complete 5 units in a public service internship. Students interested in the Public Service thematic concentration should contact the CSRE Undergraduate Program Office for details about its requirements.

COURSES

CORE

COMPARATIVE LITERATURE

COMPLIT 241. Comparative Fictions of Ethnicity
5 units, Win (Palumbo-Liu, D)

COMPARATIVE STUDIES IN RACE AND ETHNICITY

CSRE 196C. Introduction to Comparative Studies in Race and Ethnicity—(Same as ENGLISH 172D, PSYCH 155.) How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. GER: DB-SocSci

5 units, not given this year

CSRE 200X. CSRE Senior Seminar—WIM

5 units, Aut (Palumbo-Liu, D; Thompson, V)

DRAMA

DRAMA 169/269. Contemporary Dramatic Voices of Color

5 units, Win (Elam, H)

EDUCATION

EDUC 177/277. Education of Immigrant Students: Psychological Perspectives

4 units, Win (Padilla, A)

ENGLISH

ENGLISH 45/145. Writings by Women of Color

3-5 units, Win (Moya, P)

ENGLISH 172E. The Literature of the Americas—(Same as COMPLIT 142.)

5 units, Aut (Greene, R; Saldivar, R)

PSYCHOLOGY

PSYCH 75. Introduction to Cultural Psychology

5 units, Spr (Markus, H)

SOCIOLOGY

SOC 145/245. Race and Ethnic Relations

5 units, not given this year

SOC 147A/247A. Comparative Ethnic Conflict

5 units, Spr (Olzak, S)

THEMATIC FOR MAJORS AND MINORS

AFRICAN AND AFRICAN AMERICAN STUDIES

For courses in African and African American Studies with the subject code AFRICAAM, see the “African and African American Studies” section of this bulletin.

ASIAN AMERICAN STUDIES

ASNAMST 181P. Asian Americans in Film and Video—(Same as CSRE 181P.) The history and relevance of film and video production in Asian America. How Asian Americans have represented themselves through film and video. Themes, methods, and debates in Asian American cultural criticism through history and politics, race and ethnicity, gender and sexuality.

5 units, not given this year

ASNAMST 185D. Southeast Asian Migration and Community Formation—(Same as CSRE 185D.) The migration processes of communities from Laos, Vietnam, and Cambodia in the U.S. Colonialism, imperialism, globalization, and diaspora. S.E. Asian immigration and resettlement policies along the axes of political, social, and economic state agendas, and racial, gender, and class structures. Why S.E. Asians migrated to the U.S.; their relationships to their countries of origin.

5 units, Win (Doa, L)

ASNAMST 200R. Directed Research—May be repeated for credit.

1-5 units, Aut, Win, Spr (Staff)

ASNAMST 200W. Directed Reading

1-5 units, Aut, Win, Spr (Staff)

CHICANA/O STUDIES

CHICANST 121C. Chicana/o Film Practices—(Same as CSRE 121C.)

The ideological parameters of Chicanismo, including migration, labor, organized state violence, collectivism, familialism, spiritual practices, gender, and sexual politics. The cultural, aesthetic, and political dimensions of film form, including formal and textual analysis.

5 units, Aut (Campos, D)

CHICANST 165G. American Dreams: Mexican Americans, Immigration since 1964, and the Middle Class—(Same as CSRE 165G.) How does the Mexican American population stand in relation to the attainment of middle-class status? Topics include immigration, religion, political participation, the labor market, marriage, and pan-ethnic identification. Introduction to sociological methodology. Final project.

5 units, Win (Gonzalez, M)

CHICANST 180E. Introduction to Chicana/o Studies—(Same as CSRE 180E, SPANLIT 180E.) Historical and contemporary experiences that have defined the status of Mexican-origin people living in the U.S. Topics include the U.S./Mexico border and the borderlands; immigration and anti-immigration sentiment; literary and cultural traditions; music; labor; historical perspectives on Mexicans in the U.S. and the Chicano movement; urban realities; gender relations; political and economic changes; and inter- and intra-group interactions. Sources include social science and humanities scholarship.

5 units, Spr (Yarbro-Bejarano, Y; Palafox, J)

CHICANST 181S. U.S.-Mexico Borderlands in Comparative Perspective—(Same as CSRE 181S.) The border as zone of political, social, economic, and cultural interaction, conflict, and interdependence from before the U.S.-Mexico War. Manifest destiny, the incorporation of the boundary into the capitalist world system, and contemporary boundary issues including the border industrialization program, urbanization and migration, and the function of borders in reinforcing global apartheid.

5 units, Spr (Palafox, J)

CHICANST 187C. Latino Children: Cultural and Social Contexts of Development—(Same as CSRE 187C.) Ecological contexts, including family, school, and society, that shape the psychosocial and educational outcomes of Latino children. Sources include developmental and cultural psychology, anthropology of education, and sociology.

5 units, not given this year

CHICANST 200R. Directed Research

1-5 units, Aut, Win, Spr (Staff)

CHICANST 200W. Directed Reading

1-5 units, Aut, Win, Spr (Staff)

COMPARATIVE STUDIES IN RACE AND ETHNICITY

CSRE 10. Topics in the Study of Race and Ethnicity—(Same as AF-RICAAM 10.) Guest speakers, panel presentations, film screenings, and artistic performances. Autumn Quarter theme is immigration. May be repeated for credit.

1-3 units, Aut, Win, Spr (Palumbo-Liu, D)

CSRE 145A. Poetics and Politics of Caribbean Women's Literature—Mid 20th-century to the present. How historical, economic, and political conditions in Haiti, Cuba, Jamaica, Antigua, and Guadeloupe affected women. How Francophone, Anglophone, and Hispanophone women novelists, poets, and short story writers respond to similar issues and pose related questions. Caribbean literary identity in a multicultural and diasporic context; the place of the oral in the written feminine text; family and sexuality; translation of European master texts; history, memory, and myth; and responses to slave history, colonialism, neocolonialism, and globalization. GER:DB-SocSci, EC-Gender

5 units, Win (Duffey, C)

CSRE 190. Disciplinary Boundaries: Research Methods in the Academy—Faculty presentations from CASA, English, Psychology, Political Science, History, Sociology, and Drama. Collaborative research, and feminist ethnographic methods.

3 units, not given this year

CSRE 192. Race and Slavery in Brazil and the United States—Did race motivate enslavement or was racial profiling a product of slavery? Brazilian or American slavery and what it means to be a person of color in these countries today. Love, hatred, and endurance in two divided societies. Sources include historical narratives, literature, film, music and iconography.

5 units, not given this year

CSRE 198. Internship for Public Service—Restricted to CSRE comparative studies majors with a concentration in public service. Students consult with the CSRE undergraduate program director and CSRE affiliated faculty to develop an internship. Some group meetings. May be repeated for credit.

1-5 units, Aut, Win, Spr (Staff)

CSRE 199. Pre-Honors Seminar—For students interested in writing a senior honors thesis. Conceptualizing and defining a manageable honors project, conducting interdisciplinary research, the parameters of a literature review essay, and how to identify a faculty adviser.

1 unit, Win (Thompson, V)

CSRE 200R. Directed Research

1-5 units, Aut, Win, Spr (Staff)

CSRE 200W. Directed Reading

1-5 units, Aut, Win, Spr (Staff)

CSRE 200Y. CSRE Senior Honors Research

1-10 units, Win (Thompson, V)

CSRE 200Z. CSRE Senior Honors Research

1-10 units, Spr (Thompson, V)

CSRE 203A. The Changing Face of America: Civil Rights and Education Strategies for the 21st Century—For students with leadership potential who have studied these topics in lecture format. Race discrimination strategies, their relation to education reform initiatives, and the role of media in shaping racial attitudes in the U.S.

5 units, Spr (Montoya, J; Steyer, J)

NATIVE AMERICAN STUDIES

NATIVEAM 109A. Federal Indian Law—(Same as CSRE 109A.) Cases, legislation, comparative justice models, and historical and cultural material. The interlocking relationships of tribal, federal, and state governments. Emphasis is on economic development, religious freedom, and environmental justice issues in Indian country.

5 units, Aut (Biestman, K)

NATIVEAM 116. Language, Culture, and Education in Native North America—(Same as CSRE 116.) Communication and language in cross-cultural education, including literacy and interethnic communication in relation to native classrooms in the mainland U.S., Alaska, and nations and territories of the Pacific. Focus is on implications of social, cultural, and linguistic diversity for educational practice in bridging intercultural differences between schools and native communities. GER:DB-SocSci

5 units, Spr (Nelson-Barber, S)

NATIVEAM 117A. Diversity in Contemporary American Indian Cultures and Communities—(Same as CSRE 117A.) The social, political, and economic position of American Indians in contemporary American society. Demographic resurgence, changes in socioeconomic status, ethnic identification and political mobilization, and institutions such as tribal governments, states, and the Bureau of Indian Affairs. Topics include the aftermath of allotment, the Indian New Deal, postwar termination efforts, health and education, and current controversies such as conflicts over assertion of treaty rights and reservation casino operations. GER:DB-SocSci

5 units, Win (Shively, J)

NATIVEAM 200R. Directed Research*1-5 units, Aut, Win, Spr (Staff)***NATIVEAM 200W. Directed Reading***1-5 units, Aut, Win, Spr (Staff)***COGNATE COURSES**

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

Web Site: <http://anthroCASA.stanford.edu>

Courses given in Cultural and Social Anthropology have the subject code CASA. For a complete list of subject codes, see Appendix.

The courses offered in CASA are designed to: (1) provide undergraduates with instruction in cultural and social anthropology; (2) provide undergraduate majors in anthropology with a program of work leading to the bachelor's degree; and (3) prepare candidates for advanced degrees in Cultural and Social Anthropology.

Cultural and Social Anthropology addresses issues in the comparative study of society and culture, including race, class, national origin, gender, sexual orientation, and religion as they are shaped by experiences of education, history, and migration through which people in past and contemporary societies have defined themselves in relation to others. The scope of the field includes American society and culture as well as those of other parts of the world, especially as they are drawn together and shape one another in increasingly transnational and global interactions.

The department offers approaches to the subfields and topics in anthropology that include archaeology, environmental anthropology, linguistics, medical anthropology, political economy, science and technology studies, and sociocultural anthropology. Methodologies for the study of micro- and macro-social processes are taught through qualitative and quantitative approaches. Training is offered in: ethnographic research; collection and interpretation of oral histories, surveys, and archival materials; analysis of material culture, including mapping, cataloguing, and interpretation of material objects; and methodologies in the performative arts, including

visual and performance studies. The department provides students with training in theory and methods to enable them to pursue graduate study in any of the above mentioned subfields of anthropology. Students interested in the biological and evolutionary approaches to anthropology should consult the Department of Anthropological Sciences.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The Department of Cultural and Social Anthropology (CASA) offers a B.A. degree in Cultural and Social Anthropology and an honors program. The major provides students with expertise for understanding social and cultural transformations from an international and cross-cultural perspective. In addition to gaining an excellent foundation for graduate research and study, students majoring in Cultural and Social Anthropology can pursue careers in government, international business, international development agencies, international education, law, mass media, non-profit organizations, and public policy.

Within the major, students may include course offerings in other departments such as Anthropological Sciences, Classics, Economics, English, History, Political Science, Psychology, and Sociology, as well as course offerings in programs such as African Studies, American Studies, Archaeology, Comparative Studies in Race and Ethnicity, East Asian Studies, Feminist Studies, Latin American Studies, Public Policy, and Urban Studies.

To declare a major in Cultural and Social Anthropology, students should contact the department's student peer adviser or student program coordinator. The department checklist for the major can be downloaded in pdf format from <http://www.stanford.edu/dept/anthroCASA/programs/undergrad.html>. Submit the checklist to the student program coordinator and apply for the major in Axxess. The checklist must be approved by the faculty chair of the CASA committee on undergraduate degrees. Requirements for the major include:

1. A faculty adviser in Cultural and Social Anthropology.
2. A program of 65 units, with at least 40 units of Cultural and Social Anthropology course work. The remaining 25 units may be taken from courses in related departments, including Anthropological Sciences, or transferred from other anthropological study programs, such as overseas programs. The 65 units must form a coherent program of study and be approved by the student's faculty adviser.
3. A grade of 'B-' or better in CASA 90, Theory in Cultural and Social Anthropology. This course is required of all CASA majors and should be taken within a year of declaring the major or before the end of the junior year. It introduces students to anthropological theory and prepares them for upper-division courses in the department.
4. The 40 units of Cultural and Social Anthropology course work required for the major must include at least one course from four of the six topical categories listed below:
 - a) Archaeology
 - b) Gender and Feminism
 - c) Globalization and Transnationalism
 - d) Linguistic and Symbolic Anthropology
 - e) Race and Ethnicity
 - f) Science, Technology, or Medicine
5. Students must choose a concentration, taking at least 15 units in three or more courses on one theme or topic. Concentrations can be defined by subject matter or cultural area. Some examples of themes for a concentration are: cultural studies, economic development, kinship, mass media, material culture, migration and immigration, political economy, popular culture, race and ethnicity, religion, urban cultures, or a particular culture area such as Japan, Europe, or South Asia. A student's area of concentration must be approved by the major adviser.
6. A minimum of 15 units must be in CASA seminars numbered 100 or above.
7. Competence in a foreign language beyond the first-year level. Such competence is usually demonstrated by completing a 5 unit course at the second-year level with a grade of 'B-' or better. The requirement may be met by special examination administered through the Language

Center.

8. 10 units from IHUM 27A,B (Introduction to the Humanities) may be counted towards the major. Students whose programs require non-English language study as part of a geographical or linguistics focus may ask their faculty adviser to approve up to 5 units from language courses toward the degree if such courses are at the second-year level and above, or are in a second non-English language. No more than 10 units of CASA 96, Directed Individual Study, may be counted towards the major, and may only be included among the 25 "related units" permitted for the major. All required units for the undergraduate degree program must be passed with a grade of 'C' or better, and not more than 10 (maximum of 5 units in Cultural and Social Anthropology and 5 units in related subjects) of the required 65 units may be taken for a "satisfactory/no credit" grade.

Deadline for Declaring the Major—Students must complete the declaration process, including planning form submission and Axxess declaration, upon completion of 90 units or upon achieving junior class status.

Majors are encouraged to develop field research projects under the supervision of a CASA faculty member. The department offers research grants to support individually-designed summer field research in cultural and social anthropology. The CASA research grant should be used to support field research as a supplement to other field research grants such as the UAR research grants. Eligibility for application to the research grants program requires that a student has completed a minimum of two CASA courses with a grade point average of 3.3 (B+) or better. One of the two courses may be completed in the quarter in which the grant application is submitted to the department. Michelle Z. Rosaldo grant applications for individually-designed summer field research projects are due by the end of the fifth week in Winter Quarter.

Prospective majors may meet with the chair of the Undergraduate Committee or the undergraduate peer adviser for initial advice on choosing an appropriate faculty adviser in the department. In consultation with their faculty advisers, students must develop a coherent program of study for the major. Students are required to submit the application form for the major, including their completed proposed plan of study, to the student program coordinator, no later than the beginning of the Winter Quarter of the junior year. Required course work for the research grants program includes CASA 93, Prefield Research Seminar, and CASA 94, Postfield Research Seminar. Suggested course work for the research grants program includes CASA 92, Research Writers Workshop, CASA 95A, Research in Anthropology, and CASA 96, Directed Individual Study. Contact the student program coordinator for more information.

Majors are required to meet with their faculty advisers at least once each quarter. Each student's progress towards fulfilling the major requirements is recorded in a file kept in the student program coordinator's office. It is the student's responsibility to see that this file is accurate and up to date.

MINORS

To declare a minor in Cultural and Social Anthropology, students should contact the department's student peer adviser or student program coordinator. The department checklist for the minor can be downloaded in pdf format from <http://www.stanford.edu/dept/anthroCASA/programs/undergrad.html>. Submit the checklist to the student program coordinator and apply for the minor in Axxess. The checklist must be approved by the faculty chair of the CASA committee on undergraduate degrees. Requirements for the minor include the following:

1. A faculty adviser in Cultural and Social Anthropology.
2. 30 units of CASA course work. IHUM 27A,B may be applied to the 30 units. Only 5 units of directed individual study may apply towards the 30 units in the minor. All units for the minor must be passed with a grade of 'C' or better.
3. Up to 10 of the 30 units may be taken for instructor-elected, satisfactory/no credit grade.
4. At least 15 of the 30 units must be from CASA courses numbered 70 or above.
5. A minimum of 5 of the 30 units must be taken in a cultural area course approved by the program adviser on the undergraduate minor checklist.

Deadline for Declaring the Minor—Students must complete the declaration process, both planning form submission and Axess registration, by the last day of the quarter, two quarters prior to degree conferral, for example by the last day of Autumn Quarter if Spring graduation is intended.

SENIOR PAPER AND DEPARTMENTAL HONORS

The senior paper program in Cultural and Social Anthropology provides majors the opportunity to conduct original research under the guidance of a faculty advisor. The senior paper program is open to all majors in the department. Students must initiate their participation in the senior paper program by filing an application of intent with the student program coordinator. The application must include a description of the proposed project, a program of study, and a letter of approval from a faculty sponsor. Students are encouraged to apply to the senior paper program in their sophomore or junior year prior to initiating fieldwork or other research. The senior paper application of intent must be submitted no later than the second week of Autumn Quarter in the senior year.

All CASA majors are encouraged to write a senior paper. Majors should begin research for a senior paper during their junior year with guidance from their CASA faculty adviser. At the latest, department majors must submit an application of intent to write a senior paper to the student program coordinator no later than the end of the second week of Autumn Quarter in the senior year. Enrollment in CASA 95A, Research in Anthropology, is recommended during Autumn and Winter quarters. The Senior Paper Checklist must be completed, signed by the program adviser, and handed in to the student program coordinator by the end of the second week in Autumn Quarter in the senior year. Students must enroll in CASA 95B, Senior Paper, in the final quarter in the undergraduate degree program before graduating. The senior paper is submitted in the final quarter before graduation. For more information, see the student program coordinator.

All CASA majors are encouraged to write an honors paper. Majors should begin research for an honors paper prior to the last quarter of the junior year with guidance from their CASA faculty adviser. At the latest, department majors must submit an application of intent to write an honors paper to the student program coordinator no later than the end of Spring Quarter (or the third quarter) in the junior year. Department majors are eligible to apply for honors candidacy with a 3.5 GPA in the department major and a 3.0 GPA in overall course work. Enrollment in CASA 95A, Research in Anthropology, is recommended during Autumn and Winter quarters. The Honors Checklist and Timeline must be completed, signed by the program adviser, and handed in to the student program coordinator by the end of the second week in Autumn Quarter in the senior year. Students must enroll in CASA 95B, Senior Paper, in the final quarter in the undergraduate degree program before graduating. A senior paper to be considered for departmental honors is submitted in the final quarter before graduation. Senior papers with a letter grade of 'A-' or better may be awarded departmental honors. For more information, see the student program coordinator.

GRADUATE PROGRAMS

University requirements for the degrees of Master of Arts and Doctor of Philosophy are described in the "Graduate Degrees" section of this bulletin.

MASTER OF ARTS

The Department of Cultural and Social Anthropology offers the M.A. degree to four groups of students: (1) Stanford undergraduates who are admitted to the coterminal program; (2) Stanford graduate students taking advanced degrees in other departments or schools at Stanford who are admitted to the terminal M.A. program; (3) Ph.D. students in Cultural and Social Anthropology who fulfill the M.A. requirements on the way to the Ph.D. degree; and (4) students who apply from outside Stanford for entry into the terminal M.A. program.

Applicants whose ultimate goal is the Ph.D. degree should apply directly to the Ph.D. program. Students accepted for the terminal M.A. degree program cannot transfer to the Ph.D. program; they must reapply on the same basis as other Ph.D. applicants and in competition with other Ph.D. applicants. Ph.D. students who decide to take the M.A. on the way to the Ph.D. are governed by separate requirements described in the department's *Guide to the Ph.D. Program*.

COTERMINAL B.A./M.A. PROGRAM

The deadline for graduate applications to the coterminal M.A. degree program is March 13, 2007. Prospective applicants should refer to the department's web site for information about application for graduate admission. Successful applicants for the M.A. program usually enter in Autumn Quarter. Applicants must submit a writing sample in English that demonstrates the ability to produce original analytical work at the graduate level. Applicants should also submit three letters of reference, recent original transcripts, and a statement of purpose.

The department prerequisites for application to the coterminal M.A. program are listed below. Stanford undergraduates who are currently enrolled and interested in applying to the department's coterminal graduate M.A. degree program are required to pass CASA 90, Theory in Cultural and Social Anthropology, and a minimum of 10 additional units of CASA course work with a grade of 'A-' or better. An overall undergraduate GPA of 3.3 (B+) or better is required.

Graduate enrollment at Stanford for at least three quarters of full tuition for a minimum of 45 units is required of all candidates for the master's degree, including coterminal students. Coterminal M.A. students in Cultural and Social Anthropology must take a minimum of 45 quarter units in Cultural and Social Anthropology course work beyond the undergraduate degree with a grade point average (GPA) of 3.0 (B) or better. 45 units constitute the University minimum for the M.A. degree. However, the department requires 60 units of course work for the coterminal M.A. degree. Of the required 60 units, 15 units may be accepted from previous undergraduate or other course work. Course work must be at or above the 100-level. 18 of the 45 units required from Cultural and Social Anthropology course work must be in courses designated primarily for graduate students (typically at least at the 200 level). Course work applied to the coterminal M.A. degree may not also be applied to the requirements for the undergraduate degree, or any other degree program.

Within the 45 units taken at Stanford, students must take CASA 290, History and Theory in Cultural and Social Anthropology or, if not given, CASA 301, History of Anthropological Theory, and two additional graduate-level seminars in the department. The remaining units may be made up of departmental courses selected in consultation with the faculty adviser to meet the needs and interests of the student.

The coterminal program may require more than one year of study. However, full-time students entering the program with appropriate background should complete the coterminal program in one calendar year. To provide a meaningful M.A. program within a one-year period, advance planning of course work with an adviser is required. All requirements for the master's program must be completed within three years after the student's first quarter of enrollment in the degree program.

A field or library research paper, read and approved by at least two departmental faculty members, must be presented. Coterminal students must submit an acceptable project/paper proposal for the master's paper to their faculty adviser for approval no later than the end of the fourth week in the first quarter of the graduate degree program. In addition, an acceptable master's degree program proposal, approved and signed by the program adviser and department chair, must be submitted no later than the end of the fourth week in the first quarter of the graduate degree program. Coterminal students should enroll in CASA 399, Masters Research Paper, or CASA 801, TGR Project, in the final quarter during which they will submit the M.A. paper.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

TERMINAL MASTER'S DEGREE PROGRAM

The deadline for graduate applications to the terminal M.A. degree program is March 13, 2007. Prospective applicants should refer to the department web site for information about application for graduate admission. Successful applicants to the M.A. program may enter only in the following Autumn Quarter. Applicants must file a report of their Graduate Record Examination score electronically, and submit a writing sample in English that demonstrates the ability to produce original analytical work at the graduate level. Applicants should also submit three letters of reference, recent original transcripts, and a statement of purpose.

Graduate enrollment at Stanford for three consecutive quarters of full tuition for at least 45 units is required of all candidates for the master's degree. M.A. students in Cultural and Social Anthropology must take a minimum of 45 units in social and cultural anthropology course work beyond the undergraduate degree with a grade point average (GPA) of 3.0 (B) or better. 45 units constitute the University minimum for the M.A. degree. Courses must be at or above the 100 level, and 18 of the 45 units must be in courses designated primarily for graduate students, typically at least at the 200 level.

Within the 45 units taken at Stanford, students must take CASA 302, Anthropological Research Methods, and CASA 290, History and Theory in Cultural and Social Anthropology or, if not given, CASA 301, History of Anthropological Theory; three additional graduate-level seminars in the department (usually offered at the 200 level or above); and three courses from one of these department tracks:

1. Feminist Anthropology
2. Heritage and Museum
3. Race and Ethnicity
4. Science, Technology, and Medicine
5. Globalization and Transnationalism

The remaining units may be made up of departmental courses chosen in consultation with the faculty adviser to meet the needs and interests of the student.

The M.A. program usually requires more than one year of study. However, full-time students entering the program with appropriate background should complete the M.A. program in one calendar year. All requirements for the M.A. degree should be completed within three calendar years (consecutive) after the student's first quarter of enrollment in the graduate M.A. degree program. The University allows no transfer units to the M.A. program. To provide a meaningful M.A. program within a one-year period, advance planning of course work with an adviser is required.

A field or library research paper, read and approved by at least two departmental faculty members, must be presented. For current Ph.D. students in the department who are pursuing a master's degree on the way to the Ph.D., a paper completed for a department evaluation course may be submitted in fulfillment of this requirement. Terminal M.A. students may select a paper, written for one of the courses taken in Cultural and Social Anthropology, and present the extended paper to the faculty member responsible for the course in which the paper was written originally. Terminal M.A. students must submit an acceptable project/paper proposal for the master's paper to their faculty adviser for approval not later than the end of the fourth week in the first quarter of the graduate degree program. In addition, an acceptable master's degree program proposal, approved and signed by the program advisor and the department chair, must be submitted no later than the end of the fourth week of the first quarter of enrollment in the graduate degree program. Terminal M.A. students should enroll in CASA 399, Master's Research Paper, or CASA 801, TGR Project, in the final quarter during which they will submit the M.A. paper.

DOCTOR OF PHILOSOPHY

The deadline for graduate applications to the Ph.D. degree program is January 9, 2007. Prospective applicants should reference the department web site for information about application for graduate admission. Successful applicants for the Ph.D. program may enter only in Autumn Quarter. It is department policy not to defer graduate admission. Applicants must file a report of their Graduate Record Examination score electronically and submit a writing sample in English that demonstrates the ability to produce original analytical work at the graduate level. Applicants should

also submit three letters of reference, recent original transcripts, and a statement of purpose. In addition to a clear statement of research interests in the statement of purpose, it is especially important for applicants choosing the Archaeology track to provide a detailed description of the area of specialization as well as the topical interests for dissertation research.

The Ph.D. program includes a number of required courses and examinations. It also allows the student to develop a flexible program reflecting special interests, under the supervision of a faculty committee chosen by the student. Students are encouraged to plan for completion of all work for the Ph.D. in five years.

The Ph.D. requirements for students who matriculate beginning 2006-07 are as follows. Those matriculating in earlier academic years should consult the department's *Ph.D. Handbook* or previous editions of this bulletin for their entering cohort year. Ph.D. students in Cultural and Social Anthropology must take a minimum of 135 quarter units with a minimum grade point average (GPA) of 3.0 (B). The maximum allowable number of transfer units is 45.

1. Pass in the first year, with a grade of 'B+' or better:
 - a) at least three of the graduate-level courses in the department designated by the faculty as theory/evaluation courses, including CASA 301, History of Anthropological Theory, during Autumn Quarter; CASA 300, Reading Theory Through Ethnography (Anthropology track only), or CASA 373, Introduction to Archaeological Theory (Archaeology track only), during Winter Quarter.
 - b) CASA 302, Anthropological Research Methods (Anthropology track only), or CASA 360, Archaeological Methods and Research Design (Archaeology track only), during Spring Quarter; or for the Archaeology track, a primary-level methods survey or advanced-level methods course relevant to research interests.
 - c) for the Archaeology track: a course, to be decided on in consultation with the faculty adviser, that satisfies the department specialization requirement in a topical interest required of graduate Ph.D. students. Although it is suggested that the topical interest course requirement be completed during the first year in the Ph.D. degree program, it may also be completed at any time until the end of the third year.
 - d) at least 45 units of completed course work overall.
2. Satisfy the department ethics requirement for review of ethics in Cultural and Social Anthropology. Courses approved this year follow. This list is subject to updating. See <http://www.stanford.edu/dept/anthro-CASA/forms.html> for updates after the publication of this bulletin.
 - CASA 203. Laboratory Methods in Archaeology
 - CASA 285. Environmental Ethics
 - CASA 302. Research Methods
 - CASA 325. Ethics and Anthropology
 - CASA 360. Archaeological Methods and Research Design
3. Enroll in CASA 395, Introduction to Cultural and Social Anthropology: Faculty Research, during Autumn, Winter, and/or Spring quarters for 1-2 units for a total of no more than 5 units over the three quarters.
4. In the second year, pass with a grade of 'B+' or better:
 - a) additional graduate-level theory/evaluation courses in the department for a total of six such courses with a grade of 'B+' or better over the first two years of the program.
 - b) CASA 394, Proposal Writing Seminar (offered Spring Quarter).
 - c) CASA 310, Intersections (offered Winter Quarter). This course requirement is usually completed during the second year in the Ph.D. program, but it may also be completed by the end of the third year.
5. At least 40 units of completed course work in the second year for a total of at least 85 units of course work by the end of the second year.
6. At the beginning of Autumn Quarter in the second year, attend the teaching assistantship training workshop.
7. Serve as a teaching assistant for one quarter, of a required minimum of two quarters, in the second year.
8. By the first day of finals week in Winter Quarter of the second year, recruit a total of four committee members for the qualifying written examinations for topic (two committee members made up of an adviser and a reader) and for area (two committee members made up of an adviser and a reader).

- 9 By the first day of finals week in Spring Quarter of the second year, confirm the qualifying written examination schedule. The written exam must be completed by the first day of finals week in the Winter Quarter of the third year and the oral exam must be completed no later than the beginning of the fourth week of Spring Quarter in the third year.
10. For those whose native language is English, pass, by the end of Spring Quarter of the second year, an examination in a language other than English in which there is a substantial body of general theoretical literature relevant to anthropology. For those whose native language is not English, demonstrate satisfactory command of English, as evidenced by successful completion of the first two years of graduate study. The examination may be taken through the Stanford Language Center, other Stanford language departments, or by appointment with the department's language coordinator. The examination format must be approved in advance of the examination by the department's language coordinator.
11. During Spring Quarter, enroll in CASA 394, Proposal Writing Seminar.
12. Upon completion of the above requirements, and upon recommendation of the CASA faculty, petition the University for candidacy by the end of Spring Quarter of the second year.
13. Upon completion of the above requirements, and upon recommendation of the Cultural and Social Anthropology faculty, request the Master's Degree on the way to the Ph.D. degree program by the end of Spring Quarter of the second year.
14. In the third year, complete the following requirements:
 - a) during the Autumn Quarter, by December 8, 2006, submit three dissertation research grant proposals, including the approved dissertation proposal, the grant application, and the approved non-medical human subjects protocol, to the faculty adviser.
 - b) provide a statement to the departmental committee on higher degrees declaring the date planned for the oral examination and submit a declaration of the oral examination committee, inclusive of the external committee chair, the committee adviser, and the three committee members, to the student program coordinator by the first day of finals week in Autumn Quarter of the third year.
 - c) complete the qualifying written projects examinations for topic and area (two separate exams) by the first day of finals week in Winter Quarter, in the third year. The examinations may be scheduled as two separate four-hour exams scheduled approximately two days apart in a given week, or as two separate week-long exams (seven days for each examination) to be scheduled approximately one week apart in a given month.
 - d) by the end of the fourth week in Spring Quarter, schedule and pass the University oral examination in the form of an area/topic examination. During this exam, file the dissertation reading committee form and confirm the committee's revisions for the dissertation proposal to begin fieldwork and dissertation research. Secure approval for the revised dissertation proposal before leaving for dissertation fieldwork.
15. In the fourth year, complete the following requirements:
 - a) conduct 9-12 months of dissertation field research with an approved and current non-medical human subjects protocol.
 - b) submit frequent field status reports to the dissertation reading committee.
16. In the fifth year, complete the following requirements:
 - a) during the fifth year and after returning from fieldwork, complete one or more teaching assistant quarters in the department. During each of Autumn, Winter and Spring quarters of the fifth year, students must attend a minimum of four of five class meetings of CASA 392, Dissertation Writers Seminar. Each quarter, chapter drafts of the dissertation must be handed in to the dissertation reading committee for review.
 - b) after submission of the penultimate draft of the dissertation and before the quarter preceding the quarter in which the dissertation will be submitted for Ph.D. degree, Ph.D. students may schedule and deliver an oral presentation of the dissertation in the department.

PH.D. MINOR

Prospective Ph.D. minors in Cultural and Social Anthropology should request an application from the student program coordinator. The requirements for a minor in Cultural and Social Anthropology are as follows:

1. Complete 30 units of courses in the Department of Cultural and Social Anthropology (CASA) at Stanford with a grade point average (GPA) of 3.0 or better. Course work for a minor cannot also be used to meet requirements for a master's degree.
2. Enlist a faculty member within CASA at Stanford who will provide written consent to serve as the adviser for the minor and serve on the student's oral examination and dissertation committees (see the student program coordinator for a listing of faculty and office hours).
3. In conjunction with the program adviser, determine a coherent course of study related to the Ph.D. program, including CASA 301, History of Anthropological Theory, two additional CASA theory or methods courses, and one CASA course in a geographical area. For a list of current theory courses, see the student program coordinator.
4. File the necessary paperwork with the student program coordinator. Please note that the department requirements, listed above, are more extensive than the University requirements.

FINANCIAL SUPPORT

The department endeavors to provide needed financial support (through fellowships, teaching and research assistantships, and tuition grants) to all students admitted to the Ph.D. program who maintain satisfactory degree progress. Applicants for the Ph.D. program must file a request for financial aid when applying to the program if they wish to be considered for support. Second-year students in the Ph.D. program are required to perform one teaching assistantship quarter. Second-year students who have not secured funding for the second year summer of pre-dissertation field research are advised to make at least two pre-dissertation field research funding applications for summer support. Third-year students in the Ph.D. program who have not secured outside funding are required to make at least three extramural applications for dissertation research funding by the end of Autumn Quarter of the third year. Fourth-year students must submit a department application for funding as a predoctoral research affiliate before leaving for fieldwork. Fifth-year students in the Ph.D. program are required to perform at least one quarter of teaching assistantship. Depending upon department need, fifth-year students may be asked to provide a second quarter of teaching assistantship. Fifth-year students in the Ph.D. program who have not secured extramural funding for the sixth year and beyond are advised to make at least two dissertation write-up funding applications and secure extramural funding for dissertation write-up from the sixth year and beyond.

In order to be eligible for department funding of summer fieldwork and research, usually taken in either the first or second-year and again in the third-year of the Ph.D. degree program, first- through fifth-year students must submit the department's application establishing eligibility for summer funding. No financial support is available to students enrolled for the M.A. degree.

TEACHING CREDENTIALS

For information concerning the requirements for teaching credentials, consult the "School of Education" section of this bulletin or address the inquiry to the Credential Administrator, School of Education.

COURSES

Undergraduates register in courses numbered in the 100s or below. Graduate students register in courses numbered in the 200s or above.

WIM indicates that the course satisfies the writing in the major requirements.

UNDERGRADUATE

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Cultural and Social Anthropology department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER: IHUM requirements; see the "Introduction to the Humanities" section of this bulletin for further information. Prospective Cultural and Social Anthropology majors are advised to consider satisfying their GER: IHUM2,3 requirements by registering for the following IHUM courses.

IHUM 27A,B. Encounters and Identities—The formation of ideas about individual and collective identities in S. Africa, W. Europe, and the U.S. Contemporary ideas about identity, including national, racial, ethnic, and gender identity; historical encounters and social transformations linking these areas. Challenging popular assumptions about the origins of identities through similarities and differences among ideas of individual and collective identity in different regions of the world. GER: IHUM-2,3

IHUM 27A: 5 units, *Win (Ferguson, J)*

IHUM 27B: 5 units, *Spr (Burce, A)*

INTRODUCTORY

Open to all students, these courses are introductory in the sense that prior knowledge is not assumed. Students who want a general introduction to human behavior and culture are advised to take CASA 1; those who are interested in introductory courses focused on specific areas of anthropological inquiry should choose from among the courses numbered 2 through 18.

CASA 1/201. Introduction to Cultural and Social Anthropology—Crosscultural anthropological perspectives on human behavior, including cultural transmission, social organization, sex and gender, culture change, technology, war, ritual, and related topics. Case studies illustrating the principles of the cultural process. Films. GER: DB-SocSci, EC-GlobalCom
5 units, *Win (Wilcox, M), Sum (Staff)*

CASA 4. Language and Culture—Language in relation to inequality and power. Focus is on the roles of linguistic practices in constituting and reproducing social relationships, institutional arrangements, and political interests and identities. How language is implicated in differing contexts of domination and struggle including class, race, gender, and sexuality, using existing empirical studies of the language-power linkage. Student projects involve data collection, transcription, analysis, theoretical implications, and connections to existing literature. GER: DB-SocSci

5 units, *not given this year*

CASA 8N. The Anthropology of Globalization—Stanford Introductory Seminar. Preference to freshmen. Anthropological approach to how cultural change, economic restructuring, and political mobilization are bound up together in the process of globalization. Is this a new world of planet-wide interconnections and prosperity and democracy, or a grim world of exploitative transnational corporations that exploit labor and markets to produce culturally homogeneous consumer goods? How new forms of social and political organization are restructuring a world that is culturally diverse, interconnected, and increasingly unequal. GER: DB-SocSci

3-4 units, *Aut (Ebron, P)*

CASA 9N. Anthropology of Food—Stanford Introductory Seminar. The production, consumption, and distribution of food, emphasizing culture as a means to examine topics such as ecological history, class, poverty, hunger, ethnicity, nationalism, capitalism, gender, race, and sexuality. Food as the most obvious and least explored window into the shaping of identities, desires, and needs in the contemporary world. GER: DB-SocSci

3-4 units, *Spr (Gupta, A)*

CASA 14. Anthropology and Art—Modernity. How the concept of art appears timeless and commonsensical in the West, and with what social consequences. Historicizing the emergence of art. Modernist uses of primitive, child art, asylum, and outsider art. GER: DB-Hum

5 units, *Aut (Malkki, L)*

CASA 16. Native Americans in the 21st Century: Encounters, Identity, and Sovereignty in Contemporary America—What does it mean to be a Native American in the 21st century? Beyond traditional portrayals of military conquests, cultural collapse, and assimilation, the relationships between Native Americans and American society. Focus is on three themes leading to in-class moot court trials: colonial encounters and colonizing discourses; frontiers and boundaries; and sovereignty of self and nation. Topics include gender in native communities, American Indian law, readings by native authors, and Indians in film and popular culture. GER: DB-SocSci, EC-AmerCul

5 units, *Aut (Wilcox, M)*

CASA 17. Anthropological Approaches to Rights—What are rights? How did people come to believe that they have them? Is the idea of rights a Western cultural concept; can it be the foundation of a universal or global politics? The relation between rights and equality. GER: DB-SocSci

5 units, *not given this year*

THEORY AND RESEARCH (UNDERGRADUATE AND MASTER'S)

CASA 88. Theories in Race and Ethnicity—Concepts and theories of race and ethnicity in the social sciences and cultural studies. U.S. based definitions, ideas, and problems of race and ethnicity are compared to those that have emerged in other areas of the world. GER: DB-SocSci

5 units, *not given this year*

CASA 90. Theory of Cultural and Social Anthropology—Preference to CASA majors. Anthropological interpretations of other societies contain assumptions about Western societies. How underlying assumptions and implicit categories have influenced the presentation of data in major anthropological monographs. Emphasis is on Karl Marx, Emile Durkheim, Max Weber, and anthropological analyses of non-Western societies. WIM

5 units, *Win (Ebron, P)*

CASA 92. Undergraduate Research Proposal Writing Workshop—Practicum. Students develop independent research projects and write research proposals. How to formulate a research question; how to integrate theory and field site; and step-by-step proposal writing.

1-3 units, *Aut, Win (Roque, A)*

CASA 93. Prefield Research Seminar—For CASA majors only; non-majors register for 93B. Preparation for anthropological field research in other societies and the U.S. Data collection techniques include participant observation, interviewing, surveys, sampling procedures, life histories, ethnohistory, and the use of documentary materials. Strategies of successful entry into the community, research ethics, interpersonal dynamics, and the reflexive aspects of fieldwork. Prerequisites: two CASA courses or consent of instructor.

5 units, *Spr (Inoue, M)*

CASA 93B. Prefield Research Seminar: Non-Majors—Preparation for anthropological field research in other societies and the U.S. Data collection techniques include participant observation, interviewing, surveys, sampling procedures, life histories, ethnohistory, and the use of documentary materials. Strategies for successful entry into the community, research ethics, interpersonal dynamics, and the reflexive aspects of fieldwork.

5 units, *Spr (Burce, A)*

CASA 94. Postfield Research Seminar—Goal is to produce an ethnographic report based on original field research gathered during summer fieldwork, emphasizing writing and revising as steps in analysis and composition. Students critique classmates' work and revise their own writing in light of others' comments. Ethical issues in fieldwork and ethnographic writing, setting research write-up concerns within broader contexts.

5 units, *Aut (Burce, A)*

CASA 95A. Research in Anthropology—Independent research conducted under faculty supervision, normally taken junior or senior year in pursuit of a senior paper or an honors project. May be taken more than one quarter for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

CASA 95B. Senior Paper—Taken in the final quarter before graduation. Independent study and work on senior paper for students admitted to the program. Prerequisite: consent of program adviser and instructor.

1-10 units, Aut, Win, Spr, Sum (Staff)

CASA 96. Directed Individual Study—Prerequisite: consent of instructor.

1-15 units, Aut, Win, Spr, Sum (Staff)

CASA 103/203. Laboratory Methods in Archaeology—What do archaeologists do with the things they dig up, and how can they use artifacts to learn about past cultures? Hands-on experience cataloging, analyzing, and interpreting an archaeological collection. Students are exposed to standard methods in cataloging and curation, and in analysis of different types of artifacts, animal bone, and botanical remains. Individual or group analysis projects with reports that communicate the research findings. GER:DB-SocSci

5 units, Win (Voss, B)

CASA 108. History of Archaeological Thought—(Same as ARCHLGY 103.) Introduction to the history of archaeology and the forms that the discipline takes today, emphasizing developments and debates over the past five decades. Historical overview of culture, historical, processual and post-processual archaeology, and topics that illustrate the differences and similarities in these theoretical approaches. GER:DB-SocSci

5 units, Aut (Meskell, L)

CASA 150. Archaeological Methods—Methodological issues related to the investigation of archaeological sites and objects. Aims and techniques of archaeologists including: location and excavation of sites; dating of places and objects; analysis of artifacts and technology and the study of ancient people, plants, and animals. How these methods are employed to answer the discipline's larger research questions. GER:DB-SocSci

5 units, Spr (Hodder, I)

GENERAL

AREA COURSES

CASA 36. Life on the Streets: Anthropology of U.S. Urban Life—Focus is on the U.S. How race, ethnicity, and class shape cities; structural inequalities based on gender, sexuality, and age. Readings from geography, literature, philosophy, and anthropology.

5 units, Sum (Staff)

CASA 74. South Asian Histories and Cultures through Popular Film: Bollywood and Beyond—Indian cinema has been a site for the articulation of ideas about nation, class, caste, gender and sexuality, community, and diaspora. Focus is on Bollywood films, and Indian cinema in general, as social, cultural, and political phenomena. How cinematic form, production and distribution networks, and audience reception mediate the emergence of postcolonial forms of identity and consciousness. Film screenings. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Mankekar, P)

CASA 77/277. Japanese Society and Culture—Focus is on power, identity, and the politics of knowledge production. How transnational interactions influence Japanese identity. How anthropological knowledge has contributed to understanding Japanese culture and society. Gender, race and class; contemporary ethnographies. Modernity and globalization. Cultural politics, domestic work, labor management, city planning, ad images, anime, martial art, fashion, theater, leisure, and tourism. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year

CASA 82/282. Medical Anthropology—Emphasis is on how health, illness, and healing are understood, experienced, and constructed in social, cultural, and historical contexts. Topics: biopower and body politics, gender and reproductive technologies, illness experiences, medical diversity and social suffering, and the interface between medicine and science. GER:DB-SocSci, EC-GlobalCom

4-5 units, Spr (Kohrman, M)

CASA 100Q. Ethnographies of North America: An Introduction to Cultural and Social Anthropology—Stanford Introductory Seminar. Preference to sophomores. Ethnographic look at human behavior, including cultural transmission, social organization, sex and gender, culture change, and related topics in N. America. Films. GER:DB-SocSci

3-4 units, Win (Wilcox, M)

CASA 106. Tales of Cannibalism and Capital in Latin America—How agrarian, proletarian, and hunter-gatherer populations in Latin America have envisioned elements of capitalist modernity in terms of cannibalism, vampirism, and other violations of the bodies of the poor. Focus is on ethnographic research.

5 units, Aut (Armstrong Fumero, F)

CASA 120/220. Archaeology of Early China—The current rapid pace of unearthing remains of ancient societies. The formation of Chinese civilization from sites of early human occupation through the Chinese Bronze Age which display elements of Chinese civilization such as writing, architecture, warfare, philosophy, art, and cuisine. Sources include non-Chinese texts and Chinese archaeological sources. How archaeology sheds light on the past and present. Chinese language not required.

5 units, Aut (Reinhart, K)

CASA 127. Tibetan Ritual Life—(Same as RELIGST 217A.) The human life cycle, the calendar year, and pilgrimage as organizing principles to examine Buddhist and lay rituals that mark important occasions, bless people and places, ward off danger, heal wounds, alleviate suffering, predict the future, affirm Tibetan identity, and inspire political activism. Material culture of rituals including butter sculpture, thangka painting, and costumes; performance including monastic dance, chanting, instrumental music, song, and opera; and the meanings of rituals to those who participate in them. The role of ritual in human culture. GER:DB-Hum, EC-GlobalCom

5 units, not given this year

CASA 128. Cultural History of Japan—(Same as ANTHSCI 24/228.) Since WWII. Transformation of religion, kinship, gender, education, work, leisure, ideology, and national identity as interconnected institutions. Tokugawa and prewar Japan as antecedents to postwar developments. GER:DB-SocSci

3-5 units, Spr (Befu, H)

CASA 128B. Globalization and Japan—(Same as ANTHSCI 128B/228B.) Globalization theories in anthropology and sociology, and Japan in the context of these theories. Ethnographic cases of Japan's global presence from the 15th century to the present. Processes of globalization in business management, popular culture, and expatriate communities. Japan's multiculturalization through its domestic globalization. GER:DB-SocSci, EC-GlobalCom

3-5 units, Spr (Befu, H)

CASA 158. Sex, Death, and the Body in Ancient Egypt—The Egyptian life course from conception to death and burial focusing on New Kingdom materials. Egyptian ideology pertaining to the self, in which the individual is multifaceted and whose embodiment transcended death. Their concerns with questions about being and non-being, the meaning of death, the constitution of the body, the nature of the cosmos and humanity, and the basis of human society. Recent theoretical developments in anthropology, feminist theory, and studies of the body which explore hierarchies of difference in age, sex, class, ethnicity, and sexuality. GER:DB-SocSci

5 units, Win (Meskell, L)

CASA 171. Mythology, Folklore, and Oral Literature of Central Asia—Central Asian cults, myths, and beliefs from ancient time to modernity. Life crisis rites, magic ceremonies, songs, tales, narratives, taboos associated with childbirth, marriage, folk medicine, and calendrical transitions. The nature and the place of the shaman in the region. Sources include music from the fieldwork of the instructor and the Kyrgyz epoch *Manas*. The cultural universe of Central Asian peoples as a symbol of their modern outlook. GER:DB-SocSci

3-5 units, Spr (Kunanbaeva, A)

CASA 180. Ethnography of Africa—The politics of producing knowledge in and about Africa through the genre of ethnography, from the colonial era to the present. The politics of writing and the ethics of social imagination. Sources include novels juxtaposed to ethnographies. GER:DB-SocSci

5 units, Spr (Malkki, L)

TOPIC COURSES

CASA 114. The Crusades and Their Legacies—Interdisciplinary. How Pope Urban II helped inaugurate and define an East/West dichotomy which still echoes discursively and literally today. The production of the divisions between East and West in the Crusade era, as seen by Europeans and Middle Easterners; the legacies of such divisions in the present.

5 units, not given this year

CASA 115. Race and the American City—How contemporary American notions of race and urban life intersect with and define one another. Contesting notions of identity, citizenship, inequality, multiculturalism, and difference. Readings in anthropology, sociology, social geography, and theory. Sites include Chicago, Los Angeles, and San Francisco.

5 units, Spr (Roque, A)

CASA 132. Science, Technology, and Gender—Why is engineering often seen as a masculine profession? What have women's experiences been in entering fields of science and technology? How has gender been defined by scientists? Issues: the struggles of women in science to negotiate misogyny and cultural expectation (marriage, children), reproductive issues (surrogate motherhood, visual representations of the fetus, fetal surgery, breast feeding, childbirth practices), how the household became a site of consumerism and technology, and the cultural issues at stake as women join the ranks of scientists. GER:DB-SocSci, EC-Gender

3-5 units, Spr (Jain, S)

CASA 133. City and Sounds—How do people experience modern cities and urban public cultures through auditory channels? How does sound mediate and constitute urban space? How to listen to and write about culture through sound. Students carry out narrative interviews and sound fieldwork in the Bay Area. Readings include urban anthropology, semiotics, art history, social studies of science and technology, media studies, and musicology.

5 units, Spr (Inoue, M)

CASA 135X. Pilgrimage and Sacred Landscapes—(Same as RELIGST 235.) Perspectives include cultural, spiritual, psychological, medical, economic, and political. Christianity, Buddhism, Hinduism, Islam, Native American and secular; sources include Europe, Tibet, India, Native America, and the Middle East. Why do pilgrims often make their journeys as difficult and painful as possible? How do landscapes become sacred? What happens when places such as Jerusalem are intersections for groups with different belief systems? Contemporary U.S. destinations such as Graceland and the Vietnam Memorial; journeys of personal or non-parochial cultural significance. GER:DB-Hum

4 units, not given this year

CASA 158X. Culture and Learning—(Same as EDUC 287.) Learning in institutional settings in the U.S. and around the globe. Learning in families, in schools, on the job, and on the streets. Emphasis is on the cultural organization of success and failure in American schools. Tentative consideration of opportunities for making less inequality.

3-4 units, not given this year

CASA 172/272. Object Lessons—Human-object relations in the processes of world making. Objectification and materiality through ethnography, archaeology, material culture studies, and cultural studies. Interpretive connotations around and beyond the object, the unstable terrain of interrelationships between sociality and materiality, and the cultural constitution of objects. Sources include: works by Marx, Hegel, and Mauss; classic Pacific ethnographies of exchange, circulation, alienability, and fetishism; and material culture studies. GER:DB-SocSci

3-5 units, Aut (Meskell, L)

CASA 174. Cultures of Disease: Cancer—History, politics, science, and anthropology of cancer; political and economic issues of disease and health care in the U.S., including the ethics and economics of health care provision, the pharmaceutical industry, carcinogen production, and research priorities.

5 units, Win (Jain, S)

CASA 188. South Asian American Experiences in Cultural and Historical Perspective—Interdisciplinary. How narratives and histories about communities from the S. Asian subcontinent are constructed and situated within scholarly literature in Asian American studies. Transnational feminist perspectives on categories such as homeland and diaspora. Sources include literary texts, film, historical narrative, anthropological analyses, immigration histories, and state policy. GER:DB-SocSci

5 units, Spr (Mankekar, P)

ADVANCED UNDERGRADUATE AND GRADUATE SEMINARS

AREA SEMINARS

CASA 113/213. Women in Islam: The Central Asian Case—Roles of women in the Central Asian independent states in historical and modern perspectives. Traditional family and religious rituals, keeping an appropriate household, and women's lore, craft, and art. Sources include instructor's field data. GER:DB-SocSci

5 units, Win (Kunanbaeva, A)

CASA 117/217. Archaeology of the American Southwest: Contemporary Peoples, Contemporary Debates—Cultural diversity and archaeology from paleo-indians to the present. Focus is on cultural florescences in areas such as the Mimbres Valley, Chaco Canyon, Mesa Verde, the Rio Grande, and the Hohokam in the Phoenix Basin. The development of agriculture, theories of social complexity and political economy, and the relationships between contemporary Native Americans, archaeologists, and the production of the past. GER:DB-SocSci

5 units, Aut (Wilcox, M)

CASA 118/218. Literature, Politics, and Gender in Africa—Intersections of gender, power, and desire; the politics of colonialism and Christianity; and nationalism and postcoloniality. Emphasis is on the politics of writing and critical imagination in historical and social context. Readings include novels and other texts by African writers. GER:DB-SocSci, EC-Gender

5 units, not given this year

CASA 119/219. The State in Africa—Postcolonial African states in historical and ethnographic context. Focus is on contemporary African states not as failures, but as the products of distinctive regional histories and political rationalities. GER:DB-SocSci

5 units, not given this year

CASA 135/235. Native Peoples of the Americas: Prehistory, Contacts, and Contemporary Debates—Using archaeological, ethnographic, and historical sources, exploration of the distinctive features and cultural traditions of indigenous societies in the Americas. Pre-Columbian religion, arts, and the construction of power, social complexity, official history, and myth. Continuities and changes in those traditions resulting from Spanish conquest, colonial rule, and subsequent global changes in the 20th century. Rise of nationalism, indigenous movements, and the changing roles of anthropologists and archaeologists. GER:DB-SocSci, EC-AmerCul

5 units, not given this year

CASA 137E/237E. Excavation at Catalhoyuk, Turkey—Archaeological field experience by participating in Stanford's excavation at Catalhoyuk in Summer. Focus is on the urban character of this earliest of towns. Prepares students for the Summer dig. Prerequisite: consent of instructor.

3-5 units, Spr (Staff)

CASA 163/263. The Politics of Humanitarianism—Anthropological approaches to contemporary practices of humanitarian intervention. How social theory can inform the politics of humanitarianism, charity, and philanthropy. Focus is on Africa from the colonial era to the present. GER:DB-SocSci

5 units, not given this year

CASA 173/273. Nomads of Eurasia—The nomads of the Eurasian steppes, their lifestyles, and cultural history, including Mongolia, Kazakhstan, Kyrgyzstan, and Turkmenistan. Languages, traditional economics, art, the relationships between sedentary and nomadic peoples, and the early background and gradual Turkification and Islamization of Central Asia and Lamaization of S. Siberia. Regional trade networks (the Silk Road) where nomads were the mediators in innovations, the Mongol empire and its fate, Imperial Russian expansion, and the incorporation of inner Asia into the USSR. GER:DB-SocSci

4-5 units, not given this year

CASA 178/278. Archaeology of the Middle East—The roles of memory, archives, and deep time in the periods before writing in the Middle East and Europe. Prehistoric societies and their relationships with their own pasts. These societies constructed complex histories well in advance of writing. GER:DB-SocSci

5 units, not given this year

CASA 179/279. Anthropology of the Middle East—The roles of memory, archives, and deep time in the periods before writing in the Middle East and Europe. Prehistoric societies and relationships with their own pasts. These societies constructed complex histories well in advance of writing. GER:DB-SocSci

5 units, not given this year

TOPIC SEMINARS

CASA 112/212. The Archaeology of Modern Urbanism—Case study approach. The archaeological evidence of urban life from first cities formed nearly 8,000 years ago through the archaeological remains of urban life in the San Francisco Bay Area. Focus is on the material and spatial aspects of urban cultures. Field trips to Bay Area archaeological sites and collections. GER:DB-SocSci

5 units, Aut (Voss, B)

CASA 134/234. Archaeology of Architecture—How archaeologists have approached the interpretation of architectural remains. Emphasis is on the cultural and social aspects of spatial arrangements in the past and includes ethnographic, ethnoarchaeological, and archaeological case studies. Technical and analytical strategies are integral to the interpretive process. The ways in which archaeological data are identified, analyzed, and deployed in social interpretation of structured space. GER:DB-Hum

5 units, not given this year

CASA 146/246. Masculinity: Technologies and Cultures of Gender—What is masculinity? How are masculinities invested with power and meaning in cultural contexts? How is anthropological attention to them informed by and extending inquiry across the academy in spheres such as culture studies, political theory, gender studies, history, and science and technology studies? Limited enrollment. GER:DB-SocSci

5 units, not given this year

CASA 151/251. Cultural Studies—Identity, community, and culture; their interactions and formation. GER:DB-SocSci

5 units, not given this year

CASA 152/252. Archaeology: World Cultural Heritage—Focus is on issues dealing with rights to land and the past on a global scale including conflicts and ethnic purges in the Middle East, the Balkans, Afghanistan, India, Australia, and the Americas. How should world cultural heritage be

managed? Who defines what past and which sites and monuments should be saved and protected? Are existing international agreements adequate? How can tourism be balanced against indigenous rights and the protection of the past? GER:DB-SocSci

5 units, Win (Hodder, I)

CASA 155/255. Virtual Communities: Online Technologies and Ethnographic Practice—Theoretical and practical approaches to ethnographic projects involving online technologies. Focus is on virtual communities. The methodological implications of online ethnographic research: researcher roles, the notion of identities, human subject issues, distributed collaboration, and alternative representations. Conceptual implications such as interpreting online technologies as virtual environments for human interaction versus a cultural artifact, and the nature of the Internet as setting and technology for ethnography. GER:DB-SocSci

5 units, Aut (Engel, C)

CASA 157/257. Fundamentalism and Modernity—Why is fundamentalism becoming more popular around the world? Is fundamentalism a reaction against or an integral aspect of modernity? GER:DB-SocSci

3-5 units, not given this year

CASA 161/261. Modern Material Culture—How social experience is impacted by material culture from toys to theme parks. How consumers perceive themselves and others through commodities. The historical development of the relationship between goods and identity from the 18th century; how systems of inequality are reproduced and subverted through material consumption. How archaeological techniques can probe the technological, social, and ideological meaning of everyday minutiae. GER:DB-Hum

5 units, not given this year

CASA 185/285. Environmental Ethics—Crosscultural perspective. Application of environmental ethics to contentious or incommensurable beliefs or values. GER:DB-SocSci

3-5 units, Win (Gupta, A)

CASA 201X. Readings in Science, Technology, and Society—Focus is on anthropological approaches and contributions to the field.

5 units, not given this year

GRADUATE SEMINARS

Courses in this section numbered 300 through 380, except 302, satisfy the department's evaluation course requirement.

CASA 300. Reading Theory Through Ethnography—Required of and restricted to first-year CASA Ph.D. students. Focus is on contemporary ethnography and related cultural and social theories generated by texts. Topics include agency, resistance, and identity formation, and discourse analysis.

5 units, Win (Gupta, A)

CASA 301. History of Anthropological Theory—Required of CASA Ph.D. students. The history of cultural and social anthropology in relation to historical and national contexts and key theoretical and methodological issues as these inform contemporary theory and practices of the discipline. Enrollment limited to 15. Prerequisite: consent of instructor.

5 units, Aut (Ferguson, J)

CASA 302. Anthropological Research Methods—Required of CASA Ph.D. students; open to all graduate students. Research methods and modes of evidence building in ethnographic research. Enrollment limited to 10.

5 units, Spr (Ebron, P)

CASA 310. Intersections—Themes of materiality and visibility, aesthetic and other forms of cultural production, and the meanings of creativity and convention. Ethnographic and archaeological material and case studies from worldwide cultural contexts. Prerequisite: consent of instructor.

5 units, Win (Malkki, L; Meskell, L)

CASA 313. Anthropology of Neoliberalism—How is the recent worldwide restructuring under the name neoliberalism understood as a social, cultural, and economic phenomenon? Focus is on interrogation of analytic categories, and ethnographic explorations of social and political processes.

5 units, not given this year

CASA 322. From Biopolitics to Necropolitics and Beyond—Scholarship produced and informed by Michel Foucault. Focus is on the final period of Foucault's life; how his discussions of biopolitics, subjectification, governmentality, and death have served as touchstones for recent empirical research. Key interventions initially made under these rubrics; how anthropologists and others have applied, challenged, and extended them.

5 units, Win (Kohrman, M)

CASA 325. Ethics and Anthropology: Contemporary Debates—Anthropology as multidisciplinary: archaeological, biological, linguistic, and sociocultural. The historical development of ethics within anthropology and changes in epistemological frameworks. Topics include: theories of race and gender; human genomics and the new raciology of DNA; development and poverty; cultural evolution and the primitive; and rational choice theory and economic modeling. How these controversial topics are dealt with in the profession and how this information is disseminated in the public sphere. Case studies.

5 units, Win (Wilcox, M)

CASA 326. Continental Philosophy and the Human Sciences: The Self and the Oppressive Other—(Same as FRENGEN 326.) Research seminar. Students work on papers for other classes, theses, and individual projects. Approaches to the self and the other; how to draw on and combine approaches for analyzing students' own research materials. Students choose an epistemology and integrate approaches according to intellectual goals and field of study.

5 units, Spr (Domanska, E)

CASA 327. Language and Political Economy—Theories of language: Saussure, Jakobson, Hymes, Marx, Foucault, Butler, and Derrida. The theorization of language in its linkages to power, social relations, and history. Prerequisites: Linguistics or Anthropology course work.

5 units, Win (Inoue, M)

CASA 329. Image, Art, Power—The social imagination of beauty and ugliness, the good and the bad, the moral and the immoral, art and not-art; how people have engaged with art and the image in different parts of the world. Sources include anthropology, art history, and philosophy.

5 units, Aut (Malkki, L)

CASA 331. The Anthropology of Technology—Iconic discipline-building works of the last three decades; readings that lay out and intervene in contemporary debates.

5 units, Win (Jain, S)

CASA 334B. The Modern Tradition II: Gramsci, Lacan, and Derrida as Cultural Critique—(Same as MTL 334B.) Responses, refutations, elaborations, modifications to texts in critical theory such as Gramsci, Lacan, and Derrida, and postcolonial and feminist theory. Prerequisite: consent of instructor.

3-5 units, Win (Mankekar, P)

CASA 336. Anthropology of Rights—Ideas of rights at the center of contemporary politics around the world. An anthropological perspective on how rights are invoked, claimed, and translated into institutional policies in ethnographic cases. The limitations of liberal notions of rights and innovative forms of politics emerging within and against rights talk.

5 units, Spr (Ferguson, J)

CASA 337. Violence—How violence has been understood, bounded, and interpreted in anthropology.

5 units, Spr (Jain, S)

CASA 341. Food and Globalization—Globalization through the history of food and cuisine. Commodities and cuisines, the movement of plants, technologies of production, and the mechanisms of distribution.

5 units, Spr (Gupta, A)

CASA 343. Culture as Commodity—Focus is on theories of commodification, interests in tourism, national cultures as marketable objects, and how identities are constituted through production and consumption. The formation of global style and taste.

5 units, not given this year

CASA 346A. Sexuality Studies in Anthropology—Current research on sexuality from perspectives including paleoanthropology, archaeology, ethnography, and linguistic anthropology. Readings paired with case studies that explore theoretical and methodological issues.

5 units, Spr (Mankekar, P; Voss, B)

CASA 349. Anthropology of Capitalism—Issues in cultural theory and methodology through research on people who have greater material and cultural resources than those usually studied by anthropologists. How ideas about ideology, hegemony, identity, power, and practice are altered in studying those considered to be agents of power rather than the subaltern. Topics: global capitalism, masculinity, white racial subjectivity. Enrollment limited to 20.

4-5 units, not given this year

CASA 350. Nationalism and Gender—The co-implication of discourses of nationalism and gender, focusing on nationalist movements and ideologies in newly-independent countries and Third World contexts. Themes: discourses and practices of nationalism with institutions such as the state, mass media, and the family; masculinity, femininity, and militarization; and questions of representation, historiography, location, and strategy.

5 units, not given this year

CASA 352. Foucault: The Question of Method—Foucault as methodological exemplar for historical and social research. Emphasis is on his historical studies of clinical medicine, prisons, and sexuality, and on applying his methods to empirical studies of topics such as colonialism, race, and liberal governmental rationality.

5 units, not given this year

CASA 355. Cities in Global Perspective—Interdisciplinary approach to examining global cities. The concept of the global city, and the interdependent processes that help produce urban spaces. Situating the transformation of urban spaces within globalization and its differential effects; current explanatory frameworks that pay attention to multiple scales of spatial and economic articulation. Prerequisite: graduate standing.

5 units, Aut (Ebron, P)

CASA 360. Archaeological Methods and Research Design—Methodological aspects of field and laboratory practice from traditional archaeological methods to the latest interdisciplinary analytical techniques. The nature of archaeological data and inference; interpretive potential of these techniques.

5 units, Spr (Hodder, I)

CASA 362. Topics in Political Economy—Emphasis is on Marxist approaches. Topics: the development and articulation of capitalism, imperialism, colonialism, dependency, and world systems; 20th-century capitalism, post-Fordism, and postmodernism; the political economy of race, gender, and ethnicity; class relations and productive inequalities in the Third World; the discourse of development; and the cultural mediation of political economic transformation. The ethnographic material that employs these theories used to examine sociohistorical contexts.

5 units, not given this year

CASA 364. The Anthropology of Development—Multidisciplinary. Topics vary annually. Areas include Africa, S. Asia, and Latin America.

5 units, not given this year

CASA 367. Advanced Topics: Medical Anthropology—Ad hoc reading group. May be repeated for credit. Prerequisite: consent of instructor.

2 units, not given this year

CASA 372. Materiality—The relationships between people and things. The world of objects plays a major role in materialism and the anthropology of material culture. Approaches that break down subject-object opposition. New social and psychological approaches that explore the mutual constitution of people and things, and object and subject. Approaches in which objects are seen to have agency, and people are seen as entangled in object worlds. Authors include Hegel, Marx, Benjamin, Miller, Gell, and Latour.

5 units, not given this year

CASA 373. Introduction to Archaeological Theory—The history of archaeological thought emphasizing recent debates. Evolutionary theories, behavioral archaeology, processual and cognitive archaeology, and approaches termed feminist and post-processual archaeology in the context of wider debate in adjacent disciplines. The application and integration of theory on archaeological problems and issues.

5 units, Win (Hodder, I)

CASA 375. Archaeology and Globalism—The emergence of archaeology as a discipline in the context of the rise of the nation state. Global economies and other issues have created a new context for archaeology. How are archaeology and heritage responding? The idea of world heritage. The impact of postcolonialism. The commodification of the past: the past as theme park, as travel tourism or nostalgia, as exotic and other. Conflict between uses of the past for identity and as theme park; between heritage and resource or play. The impact of the Goddess, New Age, and other movements. Archaeology and human rights issues including forensic archaeology.

4-5 units, not given this year

CASA 391A,B. Qualifying Project—Required of second- and third-year Ph.D. students writing the qualifying paper or the qualifying written examination.

2-5 units, A: Topic, B: Area, Aut, Win, Spr (Staff)

CASA 392. Dissertation Writers Seminar—Required of fifth-year Ph.D. students returning from dissertation field research and in the process of writing dissertations and preparing for professional employment.

1-3 units, Aut, Win, Spr (Voss, B)

CASA 393. Internship—Prerequisite: consent of instructor.

1-15 units, Aut, Win, Spr, Sum (Staff)

CASA 394. Proposal Writing Seminar—Required of second-year Ph.D. students in Cultural and Social Anthropology. The conceptualization of dissertation research problems, the theories behind them, and the methods for exploring them. Participants draft a research prospectus suitable for a dissertation proposal and research grant applications. Limited enrollment. Prerequisite: 212 or consent of instructor.

5 units, Spr (Inoue, M)

CASA 395. Introduction to Cultural and Social Anthropology: Faculty Research—Required of first-year CASA Ph.D.. May be repeated for a total of 5 units of credit over three quarters.

1-2 units, Aut, Win, Spr (Staff)

CASA 396. Research Apprenticeship—Supervised work on a research project with an individual faculty member.

1-15 units, Aut, Win, Spr (Staff)

CASA 397. Directed Individual Study—Supervised work for a qualifying paper, examination, or project with an individual faculty member.

1-15 units, Aut, Win, Spr, Sum (Staff)

CASA 397A. Directed Individual Tutorial—Supervised study with an individual faculty member.

1-15 units, Aut, Win, Spr, Sum (Staff)

CASA 397B. Directed Individual Field Research—Supervised work for CASA Ph.D. students conducting pre-dissertation or dissertation field research with an individual faculty member.

1-15 units, Aut, Win, Spr, Sum (Staff)

CASA 398. Teaching Apprenticeship—Supervised work for a teaching mentor participating in an undergraduate course; not the same as teaching assistantship.

1-15 units, Aut, Win, Spr, Sum (Staff)

CASA 399. Master's Research Thesis—Supervised work for terminal and coterminal master's students writing the master's project in the final quarter of the degree program.

1-15 units, Aut, Win, Spr, Sum (Staff)

CASA 444. Cultural and Social Anthropology Colloquium—Required of CASA graduate students.

1 unit, Aut, Win, Spr (Staff)

CASA 445. Cultural and Social Anthropological Symposium—Current topics and trends in cultural and social anthropology, cultural archaeology, and archaeology.

1 unit, Aut, Win, Spr (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

AMSTUD 183. Border Crossings and American Identities

5 units, Aut (Duffey, C)

CSRE 145A. Caribbean Women's Literature

5 units, Win (Duffey, C)

DANCE 168. Dance and Culture in Latin America

4 units, Spr (Cashion, S)

FEMST 120. Introduction to Queer Studies

4-5 units, Win (Rivers, D)

FRENGEN 256E. Political Anthropology from Rousseau to Freud

3-5 units, Spr (Dupuy, J)

HISTORY 277F/377F. Marranos, Conversos, and Crypto-Jews in Latin America, 16th-20th Centuries

5 units, Win (Staff)

LINGUIST 156. Language and Gender

4 units, Win (Eckert, P)

RELIGST 207. Gender in Islamic Scripture

4 units, Spr (McLarney, E)

OVERSEAS STUDIES

Courses approved for the Cultural and Social Anthropology major and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

FLORENCE

CASA 101. Investigating Culture: An Introduction to Cultural Anthropology

5 units, Win (Yanagisako, S)

KYOTO

CASA 149. An Enduring Kyoto—(Same as ANTHSCI 125X.)

2 units, Aut (Befu, H)

DRAMA

Emeriti: (Professors) Wendell Cole, Helen W. Schrader, Carl Weber; (*Associate Professor*) William S. Eddelman; (*Senior Lecturer*) Patricia Ryan

Chair: Harry J. Elam, Jr.

Drama Division

Professors: Jean-Marie Apostolidès (French and Italian, Drama), Harry J. Elam, Jr., Peggy Phelan (Drama, English), Alice Rayner, Rush Rehm (Drama, Classics)

Assistant Professors: Ehren Fordyce, Branislav Jakovljevic

Professor (Teaching): Michael F. Ramsaur

Associate Professor (Teaching): Janice Ross

Senior Lecturer: Connie Strayer

Lecturers: Maya Arad, Jeffrey Bihl, Soyica Diggs, Alison Duxbury, Erik Flatmo, Daniel Klein, Kathryn Kostopoulos, Ben Yalom

Visiting Professors: Stan Lai, Freddie Rokem

Artists in Residence: Amy Freed, Cherríe Moraga

Institute for Diversity in the Arts and Black Performing Arts Division

Division Director: Harry J. Elam, Jr.

Associate Director (IDA): Georgina Hernandez

Director (CBPA): Robert Moses

Steering Committee: Suzanne Abel (Haas Center for Public Service), Jan Barker Alexander (Black Community Services Center), Elena Becks (Staff), Enrique Chagoya (Associate Professor, Studio Art), Regina Covington (King Papers), Alice Endamne (*Black Arts Quarterly*), Diane Frank (Lecturer, Dance), Vera Grant (African and African American Studies), Tony Kramer (Senior Lecturer, Dance), Barbaro Martinez-Ruiz (Associate Professor, Art History), Julia Melancon (Staff), Cindy Ng (Asian American Activities Center), Janice Ross (Associate Professor, Teaching, Drama), Stephen Sano (Associate Professor, Teaching, Music), Laura Selznick (VPUE), Yvonne Yarbrow-Bejarano (Professor, Chicana/o Studies), Patience Young (Cantor Arts Center)

Dance Division

Director: Tony Kramer

Senior Lecturers: Susan Cashion, Tony Kramer

Lecturers: Kristine Elliott, Hala Fauzi, Diane Frank, Aleta Hayes, Rika Onizuka, Richard Powers, Ronnie Reddick

Artist in Residence: Robert Moses

Courses given in Drama have the subject code DRAMA. Courses given in Dance have the subject code DANCE. For a complete list of subject codes, see Appendix B.

DRAMA DIVISION

The Department of Drama bases its undergraduate and graduate programs on the integration of theory and performance. The faculty commit themselves to the idea that artists must be able to analyze their creative work and that scholars must approach their own specializations creatively. The department prepares students for continued work at the graduate level, either in the academy or in conservatory programs that educate artists for careers in the theater within a comprehensive liberal arts education. The Ph.D. program, which demands that its candidates work as both scholars and theater artists, prepares the students to pursue a career in university teaching and research, and to undertake further work in professional and university theaters.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The requirements for the B.A. degree in Drama are designed to integrate the critical and historical study of drama with the study and experience of

performance. The major provides aesthetic and critical opportunities for students to develop special aptitudes. For example, a student may elect an emphasis in acting, directing, design, or critical theory, or may combine areas of emphasis. Examples of how students can structure course work to take advantage of such an emphasis are available from the major adviser. Students are encouraged to declare a major in their sophomore year.

The core program of Drama courses required of all majors is:

1. Performance/Literature/History: four of the following: 160, 161, 162, 163, 164, 165, 166, 167, 168, 169
2. Stage Management Project: 134 or 34 plus two of 39A,B,C, or D
3. Senior Project: Drama majors must complete an approved senior project in the area of their specialization: a minimum of 2 units in DRAMA 200 or 205.

Two years of a college-level foreign language are recommended.

All majors, in addition to completing the core described above, are required to complete one of the following seven specializations:

1. *Acting:*
 - a) DRAMA 120A,B, Fundamentals of Acting; DRAMA 121M, Movement; DRAMA 121V, Voice and Stage Speech
 - b) The student must have completed at least 4 units of DRAMA 29 and acted in at least two department productions.
 - c) DRAMA 28, Makeup for the Stage
 - d) 2 units of studio class in Dance
 - e) three additional acting classes
 - f) one course in dramatic literature
 - g) 5 units of approved electives in Drama or Dance
 - h) one of DRAMA 39A,B,C, or D
2. *Directing:*
 - a) DRAMA 170A, Introduction to Directing; 170B, Advanced Directing; and 171, Undergraduate Theater Workshop
 - b) one course in dramatic literature
 - c) DRAMA 30, Introduction to Theatrical Design
 - d) DRAMA 31, Introduction to Lighting and Production
 - e) one course in acting
 - f) one of 39A,B,C, or D
 - g) nine units of approved electives in Drama
3. *Playwriting/Dramaturgy:*
 - a) DRAMA 177, Playwriting
 - b) DRAMA 178, Intensive Playwriting
 - c) DRAMA 170A, Introduction to Directing; 170B, Advanced Directing; and 171, Undergraduate Theater Workshop
 - d) DRAMA 176, Undergraduate Dramaturgy Project
 - e) one course in dramatic literature
 - f) one course in acting
 - g) one of 39A,B,C, or D
 - h) four units of approved electives in Drama
4. *Design:*
 - a) DRAMA 30, Introduction to Theatrical Design
 - b) DRAMA 31, Introduction to Lighting and Production
 - c) two of 131, 132, 133, or 135
 - d) two units each: 39A,B, and C
 - e) two of 231, 232, 233, or 235
 - f) one course in acting
 - g) nine units of approved electives in Drama or Art
5. *Technical Production/Stage Management:*
 - a) DRAMA 30, Introduction to Theatrical Design
 - b) DRAMA 31, Introduction to Lighting and Production
 - c) one of 131, 132, 133
 - d) two units each: 39A,B, and C
 - e) DRAMA 34, Stage Management
 - f) one course in acting
 - g) DRAMA 136, Drafting or MUSIC 19
 - h) DRAMA 135, Sound Design for Theater
 - i) nine units of approved electives in Drama
6. *Dance:*
 - a) DANCE 158, The Body in Motion
 - b) one of: DANCE 102, Duets Project; DANCE 103, Marriage of Text and Movement; DANCE 105, Contemporary African Styles

and Dancemaking; DANCE 106, Essence of Contemporary Dance Performance; DANCE 169, Choreography, Creation, Staging, and Reconstruction

- c) one additional dance theory class from DANCE 166, 168, 197, or 242, or DRAMA 160
 - d) DRAMA 31, Introduction to Lighting and Production
 - e) one of DRAMA 39A,B,C, or D
 - f) ten classes of studio work: at least one dance class from modern, jazz, world, ballet, social dance and improvisation plus contact, and acting; and two classes of Dance Performance: 100, 102, 103, 105, 106, 169
 - g) three units of approved electives in Music and Art
7. *Performance Theory and Cultural Studies:*
- a) ENGLISH 163, Shakespeare
 - b) one course in acting
 - c) one of 39A,B,C, or D
 - d) three courses in dramatic literature
 - e) an ethnic drama class
 - f) six units of course work in dramatic literature, criticism, theater history, history, art history to be determined in consultation with the undergraduate adviser

SENIOR PROJECT

Work for this project normally begins in Spring Quarter of the junior year and is completed by the end of the senior year. The student must do a senior project in his or her area of specialization: Acting, Directing, Playwriting/Dramaturgy, Design, Technical Production/Stage Management, Dance, or Performance Theory and Cultural Studies. The project can be a creative or research project, or a combination of both. The student has the option of writing an essay associated with the project. Students receive credit for senior projects through DRAMA 200, Senior Project, or DRAMA 205, Senior Project: Acting.

Students pursuing senior projects should consult with both the Department of Drama undergraduate adviser and a faculty adviser in the project's specialty area. These consultations should take place early in the junior year. Students must petition approval of senior projects through the Department of Drama undergraduate adviser. Projects are typically approved by the department faculty at the end of Spring Quarter of the junior year or the end of Autumn Quarter of the senior year.

The proposal should include an outline of the courses the student has taken and grades received in the area requirements, and should describe the courses in which the student plans to enroll as part of the project. It should describe in detail the purpose and methods involved in the project; a bibliography, if appropriate; and a one-to-two page abstract of the associated essay if an essay is part of the project.

MINORS

For students wishing to minor in Drama, the following core requirements must be met:

1. The three quarter sequence in Performance/Literature/History: three of the following: DRAMA 160, 161, 162, 163, 164, 165, 166, 167, 168, 169.
2. Stage Management Project: 134, or 34 plus two of 39A,B,C, or D.
3. A practical production class in technical theater or performance: one of 29, 39A,B,C, or D.
4. Elective courses totaling a minimum of 15 units from the specified courses in any one of the seven specializations listed above would constitute a minor concentration in: Acting, Directing, Playwriting/Dramaturgy, Design, Technical Production/Stage Management, Dance, or Performance Theory and Cultural Studies.

HONORS PROGRAMS

DRAMA

For a limited number of students, the department confers the degree of Bachelor of Arts with Departmental Honors in Drama. To be considered for departmental honors, students must meet the following requirements in addition to the other requirements of the Drama major:

1. Application involves a written submission (including transcript) establishing the student's work-to-date in the department and outlining the area of research that the student wishes to pursue. No students are admitted to the honors program with a grade below 'B-' in a course (departmental or otherwise) that constitutes part of their Drama major.
2. Students must complete the Drama core requirements by the end of their junior year, earlier if possible. Only in exceptional circumstances can this requirement be waived; transfer from another university, extended overseas study, or temporary withdrawal from the major due to illness might constitute extenuating circumstances.
3. Students also must have completed half of the courses in their specialization by the end of their junior year.
4. Students must complete 4 units in the Honors Colloquia (described below), beginning Spring Quarter of their junior year and continuing the following three regular quarters. Each quarter's colloquium is offered for 1 unit, S/NC. In extenuating circumstances (overseas study, for example), an honors program student may substitute other equivalent work for one quarter of the colloquium, with the approval of the honors adviser.
5. GPA in courses counting towards the major must be 3.5 by the time of graduation.
6. By the end of the seventh week of the quarter in which they plan to graduate, all students in the honors program must submit an honors thesis (described below), to be read and evaluated by their thesis committee.
7. On the basis of a student's work in the Drama core, in the area of specialization, on the senior project, in the honors colloquia, and on the honors thesis, the faculty determines and confers honors on graduating students who have successfully completed the honors program.
8. Failure to meet any of these requirements, or to make satisfactory progress on the honors thesis, leads to dismissal from the honors program.

HONORS COLLOQUIA AND THESIS

The honors colloquia aim to engage honors program students in an ongoing discussion of important issues in the field, with particular focus on the students' areas of specialization and research. The honors program adviser convenes the colloquia three times per quarter and sets the agenda for meetings and discussion. The colloquia offer venues for honors students to discuss their work in the department (their senior projects, for example), and to present and discuss their research for their honors thesis. The honors thesis represents an extended engagement with an important issue or subject, determined by the student, the honors program adviser, and the student's senior project adviser. It typically consists of a long essay (7,500-10,000 words) presenting the student's research on the subject. As an honors thesis may deal with issues related to the student's senior project, or with issues related to the student's specialization, the honors program adviser, the senior project adviser, and another faculty member constitute the student's honors thesis committee. They read and evaluate the thesis, and make recommendations to the faculty at large regarding its strengths and weaknesses. In the case of an honors program student whose senior project does not involve production or performance but takes written form, the requirements for the honors thesis change. In discussions with the student's honors committee, the student develops a performance/production-based project that provides the equivalent of a written honors thesis.

HUMANITIES

An honors program in Humanities is available for Drama majors who wish to supplement their major with related and carefully guided studies. See the "Interdisciplinary Studies in Humanities" section of this bulletin for a description of the honors program. Students who enroll in this program may offer HUMNTIES 160 and two seminars from 190-198 in fulfillment of the departmental elective requirement.

GRADUATE PROGRAMS

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the “Graduate Degrees” section of the bulletin.

All graduate study in the Department of Drama leads to the Ph.D. degree. The doctoral program in Drama aims to integrate practical theater work with the critical and historical study of dramatic literature and theater. All candidates are expected to function both as scholars and as theater directors. The curriculum offers a two-year practical concentration in directing along with the study of critical and performance theory, aesthetics, history, and literature. The goal of the program is to give students a thorough knowledge of the field that leads to original and significant scholarly work grounded in practice as well as an inventive directorial practice that is based on solid scholarly analysis.

The following department requirements are in addition to the University’s basic requirements for the doctorate.

1. *Units and Course Requirements*—
 - a) a minimum of 135 units of graduate courses and seminars in support of the degree. These units are in addition to units for the doctoral dissertation.
 - b) a one quarter introductory seminar: DRAMA302, Research Methods in Drama
 - c) a coherent program of eight additional graduate seminars within the Department of Drama to be worked out with the adviser. These must include at least one seminar in each of the following fields:
 1. intersections of theory and performance (designated by suffix A in course number)
 2. theater history (designated by suffix B in course number)
 3. dramatic literature (designated by suffix C in course number)
 - d) The six workshops in directing: DRAMA 370, 371, 372A, 372B, 373, 374. In the first two years, students take 370, Concepts of Directing; 371, Visual Aesthetics for the Director; 372A,B, Projects in Directing; and 373, Directing and Dramaturgy. 372A,B consists of the conceptual development, design, and production of a short play in a multi-form space. In the second year, students take 374, Graduate Directors’ Performance Project, to stage a more fully developed production chosen in consultation with the faculty.
2. *Language Requirement*—The candidate must demonstrate reading knowledge of one foreign language in which there is a major body of dramatic literature. The language requirement must be met before the student can be advanced to candidacy. The language requirement may be fulfilled in any of the following ways:
 - a) achievement of a sufficiently high score (70th percentile) on the foreign language examination prepared by the Educational Testing Service (ETS). Latin and Greek are not tested by ETS.
 - b) a reading examination given each quarter by the various language departments, except for Latin and Greek
 - c) pass with a grade of ‘B’ or higher a course in literature numbered 100 or higher in a foreign language department at Stanford.
3. *Teaching Requirement*—Four quarters of supervised teaching at half time are a required part of the Ph.D. program. The requirement is normally met by teaching three courses during the fourth year and one course during the fifth year.
4. *Examinations*—Candidates must complete three examinations (one comprehensive and two qualifying) by the end of the first three years of study at Stanford.
 - a) *The comprehensive examination* is taken over the first weekend in December of the first year. The exam is based on texts given to the student by the department before the beginning of the first year. Students study these texts independently. For the exam, they should be able to identify and compare plays and playwrights from the list of texts in terms of dramatic genres, styles, and periods, and to address comparatively and analytically critical issues of texts and performance.
 - b) *The first qualifying exam*, which must be completed before advancement to candidacy at the end of the second year, consists of three 25-35-page essays written in consultation with a faculty

adviser. These essays should demonstrate mastery of the field such that a student would be able to teach an introductory class in the area. Reading lists for each period should be approved by the end of the first year. Each essay should cover a different period of dramatic literature and theater history. These essays should not duplicate any written work from seminars. After approval by the adviser, the graduate studies committee reads and evaluates these essays, one in each of Autumn, Winter, and Spring quarters. For the first qualifying examination, choose from the following periods of Western drama:

- Classical
- Medieval and Renaissance
- 17th, 18th, and early 19th century
- Modern: 1870-1980
- Contemporary: 1980 to the present

- c) *The second qualifying examination* is a departmental oral with three faculty members, at least two from the Department of Drama. This oral is based on a 40-page review of the literature for the dissertation that the student creates in conjunction with the dissertation reading committee.
5. *Satisfactory Progress, Annual Review*—The program and progress of each student must be evaluated by the Graduate Studies Committee at the end of each academic year. At the end of the first year, the departmental graduate studies committee evaluates the work of each student in classes, seminars, examinations, and performance. Production planning in the Spring of each year for the following season is contingent upon students making satisfactory progress. Continuation in the program depends upon the recommendation of this faculty group. At the end of the second year, the committee reviews the student’s work in consideration of advancement to candidacy. At the end of the third year, students are expected to have developed an approved dissertation prospectus. Funding is contingent upon satisfactory progress. Any student not making satisfactory progress is subject to having funding suspended.
6. *Application for Candidacy*—By the end of the second year of residence, the following requirements or appropriate equivalents must be completed:
 - a) DRAMA 302, Research Methods in Drama; and five seminars
 - b) The directing workshop series (DRAMA 370-374), including the successful production of at least one work in public performance
 - c) A foreign language
 - d) At least two examinationsBased on its evaluation of the student’s progress, the graduate studies committee certifies the student’s qualifications for candidacy. Upon favorable action, the student files a formal application for candidacy, as prescribed by the University, by the end of Summer Quarter of the second year.
7. *Research Assistantship*—Generally, the third year is devoted to graduate study and research assistantships with faculty members.
8. *Dissertation Prospectus*—The dissertation prospectus must be approved by the candidate’s adviser and by the departmental graduate studies committee by the end of Spring Quarter of the third year.
9. *University Oral Examination*—The University oral examination, to be taken during the fourth year, covers the area of the dissertation. The examining committee consists of four faculty members, at least two of whom must be from the Department of Drama, as well as one faculty chair from outside the department who does not share an appointment with the department of any of the examiners.
10. *Dissertation*—Normally, the Ph.D. program is completed in five years. The first two years should be devoted to full-time graduate study, and the third, fourth, and fifth years to research, teaching, and writing the dissertation. Following formal admission to candidacy (typically at the end of the second year), the dissertation must be completed and approved within five years from the quarter in which candidacy is granted. A candidate taking more than five years is required to reinstate candidacy by repassing the written examinations on dramatic literature.

APPLICATION AND FELLOWSHIPS

Applicants for the Ph.D. program may write directly to the Department of Drama for information. Online graduate applications are available at <http://gradadmissions.stanford.edu/>. In addition to the required statement of purpose, all applicants must submit a statement detailing their practical theater experience, a sample of their written critical work, and a statement on directing. An invitation to interview may be extended by the end of January. Graduate students in the Department of Drama begin study in the Autumn Quarter of each academic year; there are no mid-year admissions. All graduate students must be degree candidates. All admissions materials must be submitted to the Department of Drama, Memorial Auditorium 144, 551 Serra Mall, Stanford, CA 94305-5010 by December 12.

The Department of Drama awards a number of fellowships to students in the Ph.D. program.

For more information, write to the address above, telephone (650) 723-2576, fax (650) 723-0843, email radavies@stanford.edu, or see <http://www.stanford.edu/dept/drama/> to download the latest information in .pdf format.

JOINT PH.D. IN DRAMA AND HUMANITIES

The Department of Drama participates in the Graduate Program in Humanities (GPH) leading to a joint Ph.D. degree in Drama and Humanities. For a description of that program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

INSTITUTE FOR DIVERSITY IN THE ARTS AND BLACK PERFORMING ARTS DIVISION

The Institute for Diversity in the Arts (IDA) is an interdisciplinary program in the humanities that involves students in the study of culture, identity and diversity through artistic expression.

The Committee on Black Performing Arts (CBPA) and the Institute for Diversity in the Arts (IDA) merged in Autumn 2005. The mission of IDA/CBPA is to engage artists, students, and the local community collaboratively to create performance and visual art that examines the intersections among race, diversity, and social action through programming that includes artist residencies, classes, workshops, public performances, a lecture series, symposia, and a literary journal, the *Black Arts Quarterly*. The division produces annual student productions, and is a resource for student organizations promoting artistic expression through the exploration of the impact of ethnic representation in the arts, literature, media, and pop culture.

The programs prepare students for work in areas including the arts and community development. Students have gone on to graduate-level critical studies, M.F.A. programs, public service, arts administration, and teaching.

Students can pursue an IDA concentration through the Comparative Studies in Race and Ethnicity major. Students can emphasize Black performance through the African and African American Studies major.

DANCE DIVISION

The Dance Division aims to develop trained bodies, inquiring minds, and aesthetic imaginations through movement as well as dance scholarship. The program emphasizes informed and active engagement in dance by stimulating a range of intelligences that honor somatic wisdom.

Since its inception in 1920, dance at Stanford University has positioned itself responsively to the changing needs of the University and society. It offers a range of studio and lecture courses aimed at enhancing the understanding of dance as a way to create and communicate knowledge and meaning. The program encourages students to make connections between dance, other disciplines, culture, and society.

UNDERGRADUATE PROGRAMS

Students who wish to major in Drama with a specialization in Dance, or minor in Dance, should see the undergraduate adviser, Susan Cashion, in the Dance Division.

MINORS

For students wishing to minor in Dance, the following core requirements must be met and a program of study arranged in consultation with the minor adviser in Dance.

1. *Studio Classes*—A minimum of eight classes. There must be a concentration of at least three classes chosen from a particular dance form such as world, modern, jazz, ballet, or social, and the attainment of intermediate or advanced level; at least two classes in a style other than the concentration; and three additional classes. The studio dance classes are from series in: modern dance (DANCE 40, 45, 140, 141); world dance (DANCE 42, 43, 55); jazz (DANCE 44, 58, 59, 144, 145); social dance (DANCE 46, 146, 147, 156, 166); ballet (DANCE 48, 148, 149); and acting (any class).
2. *Theory Courses*—A minimum of three of the following: DANCE 158, *The Body in Motion*; DRAMA 160, *Performance and Movement*; DANCE 168, *Dance and Culture in Latin America*; DANCE 191, *Independent Research*; DANCE 197A,B, *Dance in Prisons*; DRAMA 184Q, *The Dancing Couple as a Lens on American Culture, 1890-1950*
3. *Performance Practice*—DRAMA 39D, *Stage Management Project*; and one of the following: DANCE 100, *Student Choreography: Studio to Stage*; DANCE 102, *Duets Project*; DANCE 103, *Marriage of Text and Movement*; DANCE 105, *Contemporary African Styles and Dance-making*; DANCE 106, *Essence of Contemporary Dance Performance*; DANCE 169, *Choreography: Creation, Staging, and Reconstruction*

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. (AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by Drama department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the “Introduction to the Humanities” section of this bulletin for further information. Prospective majors in Drama are advised to consider satisfying their IHUM requirements by registering for the following courses.

IHUM 25A,B. Art and Ideas: Performance and Practice—Issues in aesthetics and performance through examples from the classical age to the present. Concepts of art and practice intersecting with topics such as imitation, instruction through pleasure, the creative process, perception, social analysis, and embodiment as a form of knowledge. Texts and performances from drama, dance, music, visual arts, and performance art practices that reflect aesthetic ideas. GER:IHUM-2,3

IHUM 25A: 5 units, *Win (Ross, J)*

IHUM 25B: 5 units, *Spr (Rayner, A)*

DRAMA DIVISION

Registration for most drama classes takes place at the first class meeting; further registration information is printed in the *Time Schedule* each quarter. Some class sizes are limited and require advanced registration in the Department of Drama, Room 144, Memorial Auditorium.

INTRODUCTORY

DRAMA 3. Production Processes—All aspects of production in conjunction with the shows of the Stanford Summer Theater.

1-5 units, Sum (Rehm, R)

DRAMA 12N. Antigone: From Ancient Democracy to Contemporary Dissent—(Same as CLASSGEN 6N.) Stanford Introductory Seminar. Preference to freshmen. Tensions inherent in the democracy of ancient Athens; how the character of Antigone emerges in later drama, film, and political thought as a figure of resistance against illegitimate authority; and her relevance to contemporary struggles for women’s and workers’ rights and national liberation. Readings and screenings include versions

of *Antigone* by Sophocles, Anouilh, Brecht, Fugard/Kani/Ntshona, Paulin, Glowacki, Gurney, and von Trotta. GER:DB-Hum, EC-Gender

4 units, Aut (Rehm, R)

DRAMA 13N. Hamlet(s)—Stanford Introductory Seminar. Preference to freshmen. The many versions of Hamlet on stage, in film, and in criticism. Why this play seems so open to interpretation and reveals historical changes in ideas about the individual and society, as well as in performance and acting styles. The text and its critics, and comparison of film versions, including those starring John Gielgud, Laurence Olivier, Kenneth Branagh, Mel Gibson, and Ethan Hawke. GER:DB-Hum

4 units, Win (Rayner, A)

DRAMA 16N. Beauty or the Beast? Kitsch and Contemporary Culture—Stanford Introductory Seminar. Preference to freshmen. What kind of esthetic experience does kitsch describe? Is it a matter of taste? Kitsch through disciplines such as visual arts, theater, literature, music, advertising, fashion, celebrity culture, and food.

4 units, Aut (Jakovljevic, B)

DRAMA 17N. From Inside the First World: Women of Color Playwrights Re-mapping the U.S.—(Same as SPANLIT 178N.) Stanford Introductory Seminar. Preference to freshmen. From the 60s to the present. Playwrights who create an aesthetic and political space outside the geopolitics of white capitalist patriarchy through social issues including the legacy of slavery and forced immigration, dislocation and relocation, diasporic ties, indigenous inheritance, sexuality, self-censorship, and the war on terror. Students create and perform in public short dramatic pieces informed by the playwrights' style and subject matter. GER:DB-Hum, EC-AmerCul

3 units, Win (Moraga, C)

DRAMA 18N. American Performance Traditions—Stanford Introductory Seminar. Preference to freshmen. Hybrid traditions behind American performance. Materials drawn from the performing arts and sociocultural performances. Topics include blackface minstrelsy, melodrama, and vaudeville; the acting tradition known as the method; and multiethnic performances surrounding the 1992 L.A. riots. GER:DB-Hum

4 units, Spr (Fordyce, E)

DRAMA 20. Introduction to Acting—Theater games and physical exercises in concentration, attention, playing an objective, voice, movement, stage terminology, characterization, performing a monologue, and rehearsal techniques. Provides an experiential overview of actor training and prepares actors for advanced courses. Limited enrollment.

2 units, Aut, Win, Spr, Sum (Staff)

DRAMA 22. Scene Work—For actors who complete substantial scene work with graduate directors in the graduate workshop.

1-2 units, Aut, Win, Spr (Staff)

DRAMA 25. Shakespearean Skills—Scansion, stage combat, period movement, vocal production, and other skills for the Shakespearean actor. Limited enrollment. May be repeated for credit. Prerequisite: consent of instructor.

1 unit, Aut, Win, Spr (Kostopoulos, K)

DRAMA 28. Makeup for the Stage—Techniques of makeup application for the artist and actor: aging, prosthetics, stylization, characterization, animals, and fantasy make-up.

2 units, Aut (Strayer, C)

DRAMA 29. Theater Performance: Acting—Students cast in department productions receive credit for their participation as actors; 1-2 units for graduate directing workshop projects and 1-3 units for major productions (units determined by instructor). May be repeated for credit. Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr (Staff)

DRAMA 30. Introduction to Theatrical Design—Lecture/lab. Visual communication skills used in stage productions. Design and construction methods for stage scenery, costumes, and lighting.

4 units, Aut (Flatmo, E)

DRAMA 31. Introduction to Lighting and Production—The technical and aesthetic aspects of lighting and the production process.

4 units, Win (Ramsaur, M)

DRAMA 32. Textiles—Introduction to fabric techniques and processes for stage costumes.

2-3 units, alternate years, not given this year (Strayer, C)

DRAMA 34. Stage Management Techniques—The production process, duties, and responsibilities of a stage manager. Skills needed to stage manage a production.

2-3 units, Aut (Duxbury, A)

DRAMA 35. Introduction to Sound for the Theater—Lecture/lab. The practical handling of sound equipment, acoustics, and editing. Analysis, creation, and implementation of theatrical sound effects, live and recorded.

3-4 units, Aut (Duxbury, A)

DRAMA 36. Scene Shop Tutorial—Lecture/lab. The practical handling of shop equipment used in theatrical production. Prerequisite: 36A or consent of instructor.

1-2 units, Aut, Win (Staff)

DRAMA 36A. Introduction to Woodworking—Techniques for building furniture and theatrical projects.

1-2 units, not given this year

DRAMA 36B. Scene Shop Techniques—Lecture/lab. Practical handling of shop equipment used in theatrical production.

1-2 units, Aut (Duxbury, A)

DRAMA 39A,B,C,D. Theater Performance: Crew—Participation in the design and technical areas of department productions. Students commit to a specific show and receive credit for preparation and construction as a member of a running crew in a specific area.

DRAMA 39A. Theater Performance: Scenery and/or Property

1-3 units, Aut, Win, Spr (Staff)

DRAMA 39B. Theater Performance: Lighting/Sound

1-3 units, Aut, Win, Spr (Staff)

DRAMA 39C. Theater Performance: Costumes/Makeup

1-3 units, Aut, Win, Spr (Staff)

DRAMA 39D. Theater Performance: Prosser Stage Management

1-3 units, Aut, Win, Spr (Duxbury, A)

DRAMA 42. Costume Construction—Lecture/lab.

2-3 units, Win (Strayer, C)

DRAMA 77. Playwriting Workshop—Individual or small group work in play development extending from earlier classes. May be repeated for credit.

2-4 units, Aut (Freed, A)

INTERMEDIATE

Primarily for the major, but open to all undergraduates who have the necessary prerequisites.

DRAMA 103. Improvising—The improvisational theater techniques that teach spontaneity, cooperation, team building, and rapid problem solving, emphasizing common sense, attention to reality, and helping your partner. Based on *TheatreSports* by Keith Johnstone. Readings, papers, and attendance at performances of improvisational theater. Limited enrollment.

3 units, Aut, Win (Klein, D)

DRAMA 110. Identity, Diversity, and Aesthetics: The Institute for Diversity in the Arts—Students work with a visiting artist on art projects concerning diversity, culture, and race. Workshop. Service learning within a community population to probe diversity and social change through the arts. GER:DB-Hum

5 units, Win (Elam, H)

DRAMA 120A,B. Acting: The Fundamentals—For students who intend to begin serious actor training. First quarter: the basic vocabulary of objective and action. Theater games and improvisation develop the ability to act

with focus, intention, and energy. Basics of characterization and transformation. Second quarter: the actor's spontaneity and imagination are used to reveal the life of a play, working with dramatic texts. Approaches to the actor's craft include character biography and moment-to-moment truthful playing. Exercises including from Strasberg, Meisner, Chaikin, and Linklater. Scene and monologue work from primarily naturalistic plays. Outside rehearsal time required. Must be taken in sequence. Prerequisite: 120A or consent of instructor.

A: 3 units, *Aut (Kostopoulos, K), Win (Bihl, J)*

B: 3 units, *Spr (Kostopoulos, K)*

DRAMA 121C. Acting: The Craft of Comedy—The basics of comedy playing, from its origins in the utterly truthful to its destination in the over-the-top. Characterization, mask, and exaggeration; class work on non-verbal scenes. The mechanics of comedy, timing, and clowning developed through improvisation and in-class exercises designed to free the imagination. Texts may include scenes from Georges Feydeau, Woody Allen, Moss Hart, and Alan Ayckbourn.

3 units, *alternate years, not given this year (Freed, A)*

DRAMA 121M. Movement for Actors—Kinesthetic awareness and physical presence of the performer in relationship to others through techniques of focus, spatial intent, task, and choreographic improvisation.

3 units, *alternate years, not given this year*

DRAMA 121V. Voice and Speech for the Stage—Goal is to strengthen, support, and vary the voice through breath, resonance, articulation, and projection. Speech work includes phonetics, text analysis, and verbal action as it relates to dramatic material.

2 units, *alternate years, not given this year*

DRAMA 121W. Actors Who Write, Writers Who Act—The development of dramatic scripts for solo performance and multi-character plays. Work happens on its feet, with writing deadlines and an informal workshop environment in which students present scripts, with support and feedback in dramaturgy, and help with performance and staging issues.

3 units, *not given this year (Freed, A)*

DRAMA 121Y. Physical Approaches to Acting—Techniques in contemporary theater emphasizing physical acting styles to make performances more compelling. Techniques and styles including viewpoints, Suzuki, buffoonery, methods of physical improvisation, and focused writing exercises. Innovation and ensemble collaboration in the creation process.

3 units, *Spr (Yalom, B)*

DRAMA 125. Acting Shakespeare—Formal training in skills needed to perform Shakespeare.

3 units, *Aut (Kostopoulos, K)*

DRAMA 128. Being a Performer, Creating a Performance—For directors, dance makers, actors, and dancers. Process-oriented composition lab. The place of movement in the world; how it operates in the theater. How dance and movement translate into art forms such as music and visual arts. Short, individual-student, movement-based performance at end of quarter.

2 units, *Aut (Hayes, A)*

DRAMA 131. Lighting Design—Lecture/lab. Practical and aesthetic aspects of lighting: electricity, light sources, color instrumentation, control, drafting, plotting, and the aesthetic principles of lighting design, interpretation, and concept. Prerequisites: 30, 31, or consent of instructor.

4 units, *not given this year (Ramsaur, M)*

DRAMA 132. Costume Design—A visual analysis of the historical styles of costume design, interpreted for the modern theater and developed by the student in various presentational media. Prerequisite: 30 or consent of instructor.

4 units, *Spr (Strayer, C)*

DRAMA 133. Stage Scenery Design—Creations of increasing complexity involve text analysis, historical and artistic style, visual research, spatial organization, drafting, sketching, model building, and director-designer collaboration. Prerequisite: 30, or consent of instructor.

4 units, *Win (Flatmo, E)*

DRAMA 133C. CAD for Designers—Fundamentals of computer-aided-design software. 2- and 3-dimensional drawing conventions; the use of line weight, color, composition, and graphic style. Creation of construction documents for real-world applications. Students create their own symbol library.

3 units, *alternate years, not given this year*

DRAMA 133F. Design, Space, and Documentation—Art installation, theater, dance, film, and music video projects through studio techniques including drafting and model making. Emphasis is on design projects in unconventional spaces.

2-3 units, *not given this year*

DRAMA 133P. Scenic Painting—Techniques of painting for the stage.

2-3 units, *Spr (Flatmo, E)*

DRAMA 134. Stage Management Project—For students stage managing a Department of Drama production.

2-9 units, *Aut, Win, Spr, Sum (Staff)*

DRAMA 135. Sound Design—All aspects of sound for the theater from equipment, acoustics, and editing to the creation of theatrical sound effects, live and recorded.

4 units, *Win (Duxbury, A)*

DRAMA 140. Projects in Theatrical Production—(Graduate students register for 240.) Assistant directing; stage, costume, lighting, and sound design; technical production, stage managing, or other work in connection with Department of Drama productions. Prerequisite: consent of instructor.

1-5 units, *Aut, Win, Spr, Sum (Staff)*

DRAMA 150. Chekhov and Before—(Graduate students register for 250.) Chekhov's dramatic masterpieces in light of his Russian predecessors. Authors include Griboyedov, Gogol, Turgenev, and Ostrovsky; Chekhov's early plays and vaudevilles.

4 units, *not given this year (Arad, M)*

DRAMA 151. Adaptation: Turning into Drama—(Graduate students register for 251.) Adaptation in theater: from script to production, from book to stage and screen, from one period and culture to another. The adaptations that a single author, Chekhov, has undergone: different productions of his plays and different dramatizations of his prose.

4 units, *not given this year (Arad, M)*

DRAMA 155D. Performances of Race, Race-ing Performance—(Graduate students register for 255D.) Representation and performance of race in plays and films. Can race be performed, and under what circumstances? What actions, gestures, or movements signify race? How does language contribute to the performance of race? What histories allow performances to be read as racial? How does appearance inform understanding of a performance? GER:DB-Hum

5 units, *Spr (Diggs, S)*

DRAMA 156F. Female Performers—(Graduate students register for 256F.) The portrayal of women performers in modern drama and cinema, including naïve youths, cynical ladies past their prime, divas who serve the arts, and women of dubious calling. Issues include gender, race, and class, and their relation to performance. GER:DB-Hum

4 units, *Win (Arad, M)*

DRAMA 156M. Israeli Film and Theater, 1948-2006—(Graduate students register for 256M.) The representation of dramatic conflict and identity in a society that lives through daily political strife and struggles to define its identity. Themes include the performance of gender in a militarized society, tensions between religion and secularity, and issues of multiculturalism. GER:DB-Hum

5 units, *Aut (Arad, M)*

DRAMA 157H. Urban Rituals: Anna Halprin's 1960s Participatory Dance Theater—(Graduate students register for 257H.) The reconstruction and restaging of Halprin's *Ten Myths*, an influential work of audience participation theater from the early 60s, with Anna Halprin in residence.

4-5 units, *Aut (Ross, J)*

DRAMA 158D. Comedy on the Western Stage—(Graduate students register for 258D.) Emphasis is on comedy of social protest, performance structure, and the role of the comic body. Humor theory. Works from: Greek and Roman antiquity; medieval, Renaissance, and 20th-century France; Elizabethan and 19th-century England; and 18th- and 20th-century Italy.

5 units, Aut (*Daube, M*)

DRAMA 160. Performance, Dance History, and Gender—(Graduate students register for 260; same as DANCE 160.) Shifting gender identities in western theatrical dance from the mid-18th to mid-20th centuries. The birth and development of theatrical dance. Changing notions of gender construction and the body in performance. GER:DB-Hum, EC-Gender, WIM

4 units, Win (*Ross, J*)

DRAMA 161. Performance and Politics—(Graduate students register for 261; same as CLASSGEN 161.) Ancient Greek tragedy which developed simultaneously with democracy. The theater of Bertolt Brecht, Friedrich Duerrenmatt, Peter Weiss, Howard Barker, Naomi Wallace, Anna Deavere Smith, and Tony Kushner. Films by Tomás Gutiérrez Alea, Lina Wertmüller, Mike Nichols, Barbara Kopple, John Sayles, and Michael Moore. The politics of popular music. GER:DB-Hum, WIM

5 units, Aut (*Rehm, R*)

DRAMA 161R. Texts in History: Classics from Greece to Rome—(Same as CLASSGEN 163, HUMNTIES 161.) Priority to students in the Humanities honors program. Ancient texts situated in their intellectual and cultural contexts. Readings include Homer's *Iliad* and *Odyssey*, plays of Aeschylus, Sophocles' *Antigone*, Euripides' *Medea*, Thucydides *Peloponnesian War*, Plato's *Symposium*, Aristotle's *Poetics*, Virgil's *Aeneid*, Seneca's *Trojan Women* and *Agamemnon*, and Augustine's *On Christian Doctrine*. GER:DB-Hum

5 units, Aut (*Rehm, R*)

DRAMA 162. Performance and the Text—(Graduate students register for 262.) Formal elements in Greek, Elizabethan, Noh, Restoration, romantic, realistic, and contemporary world drama; how they intersect with the history of performance styles, character, and notions of action. Emphasis is on how performance and media intervene to reproduce, historicize, or criticize the history of drama. GER:DB-Hum, WIM

5 units, alternate years, not given this year (*Rayner, A*)

DRAMA 163. Performance and America—(Graduate students register for 263.) Dramas by women, men, Asian Americans, Latino Americans, and African Americans are examined with regard to the role of dramatic performance within contemporary American society, and as an affective and effective arena for inducing social change. GER:DB-Hum, EC-AmerCul, WIM

5 units, not given this year (*Elam, H*)

DRAMA 164. Performance and Gender—(Graduate students register for 264.) The intersectionality of race, sex, gender, and class in the formation of gendered performance. Readings from the work of Judith Butler, Eve Sedgwick, David Savran, Judith Halberstam, and David Eng. Case studies include: *M. Butterfly*, *The Crying Game*, *Paris is Burning*, *Angels in America*, and *American Idol*. GER:DB-Hum, WIM

5 units, not given this year (*Phelan, P*)

DRAMA 165. Theater History: Classical to 1900—(Graduate students register for 265.) A dramaturgical, historical, and design approach to the study of drama, theater, and performance. GER:DB-Hum

4 units, not given this year

DRAMA 166. Twentieth-Century Theater History: Production Research and Design—(Graduate students register for 266.) A dramaturgical, historical, and design approach to the study of drama, theater, and performance. GER:DB-Hum

4 units, Spr (*Sack, D*)

DRAMA 167. Avant Garde Theater—(Graduate students register for 267.) From its origins in the early 19th century to the present. GER:DB-Hum

5 units, Win (*Jakovljevic, B*)

DRAMA 168. African American Drama: Traditions and Revisions—(Graduate students register for 268.) Relationships between African American performance traditions and drama. How drama as a genre calls attention to the materiality of performance, transforms cultural performances, and offers strategies for communal formations. Playwrights include William Wells Brown, W.E.B. Du Bois, Zora Neale Hurston, Langston Hughes, Alice Childress, Lorraine Hansberry, James Baldwin, Adrienne Kennedy, Amiri Baraka, August Wilson, and Suzan-Lori Parks. GER:DB-Hum

5 units, Aut (*Diggs, S*)

DRAMA 169. Contemporary Dramatic Voices of Color—(Graduate students register for 269.) Crossculturally contemporary African American, Asian American, Latino American, and Native American drama. Sources include articles on culture and cultural theory, ethnic theater, and dramatic criticism. The position of the plays in contemporary discourses on American culture, cultural diversity, and the politics of identity. GER:DB-Hum, WIM

5 units, Win (*Elam, H*)

DRAMA 170A. Introduction to Directing—Practices of stage composition, work with the actor, approaches to character, and techniques of storytelling. Prerequisite: consent of instructor.

4 units, Aut (*Salata, K*)

DRAMA 170B. Advanced Directing—Deconstructing and constructing. Tools for analyzing text and developing directorial concepts, and putting them into practice. Class exercises culminate in a short theater piece written and directed by the student. Prerequisite: 170A or consent of instructor. GER:DB-Hum

4 units, Win (*Lai, S*)

DRAMA 171. Undergraduate Theater Workshop—Undergraduate directors present one act plays in workshop performances. Credit available for actors and directors. Prerequisite: 170A/170B or consent of instructor.

1-4 units, Spr (*Duxbury, A; Lai, S*)

DRAMA 172. Late Postmodern Experimental Theater—(Graduate students register for 272.) History and theory behind artists such as Richard Foreman, Robert Wilson, The Wooster Group, Forced Entertainment, Goat Island, and Societas Raffaello Sanzio. Assignments include critical writing, creative writing, and *mise-en-scène*. GER:DB-Hum

4-5 units, not given this year (*Fordyce, E*)

DRAMA 173. Studies in Creativity—(Graduate students register for 273.) For potential artists in all fields. Key components of creativity. Sources include classic texts by artists and scholars, *Twelve Lessons in Creativity*, and workshop exercises to enhance personal creativity, develop creative regimens, and work through bottlenecks. Final project.

3-5 units, not given this year (*Lai, S*)

DRAMA 176. Dramaturgy Project—(Graduate students register for 276.) Serve as a dramaturg on any department production. Research the production's text source, the writing of program notes, the compilation and editing of the playbill, and possible adapting/editing of the performance text or translating text from a foreign language.

2 units, Aut, Win, Spr, Sum (*Staff*)

DRAMA 177. Playwriting—(Graduate students register for 277.) The autobiographical monologic and poetic possibilities in performance art explored to learn the elements of playwriting. GER:DB-Hum

5 units, Win (*Moraga, C*)

DRAMA 178. Intensive Playwriting—(Graduate students register for 278.) Goal is to develop new material for the stage or complete a play-in-progress. Focus is on essential elements of playwriting, emphasizing the process of revision, and culminating in public readings of highlights of plays-in-progress. Prerequisite: experience in playwriting or consent of instructor.

5 units, Spr (*Moraga, C*)

DRAMA 179A. Teatro America Workshop: The Theater of Native/Chicano America—(Same as SPANLIT 287.) A Chicana feminist and indigenist approach to the theory and practice of performance. Introduction to writing for the stage. Readings include plays, stories, and performance texts by Chicano/a and Native American writers. Public performance. Prerequisite: consent of instructor. GER:DB-Hum
5 units, Spr (Diaz-Sanchez, M)

DRAMA 179F. Flor y Canto: Poetry Workshop—(Same as SPANLIT 281.) Poetry reading and writing. The poet as philosopher and the poet as revolutionary. Texts: the philosophical meditations of pre-Columbian Aztec poetry known as *flor y canto*, and reflections on the poetry of resistance born out of the nationalist and feminist struggles of Latin America and Aztlán. Required 20-page poetry manuscript. GER:DB-Hum
3-5 units, Spr (Moraga, C)

DRAMA 180Q. Noam Chomsky: The Drama of Resistance—Stanford Introductory Seminar. Preference to sophomores. Chomsky's ideas and work which challenge the political and economic paradigms governing the U.S. Topics include his model for linguistics; cold war U.S. involvements in S.E. Asia, the Middle East, Central and S. America, the Caribbean, and Indonesia and E. Timor; the media, terrorism, ideology, and culture; student and popular movements; and the role of resistance. GER:DB-Hum
3 units, Aut (Rehm, R)

DRAMA 184Q. The Dancing Couple as a Lens on American Culture, 1890-1950—Preference to sophomores. Race, identity, gender redefinition, and the public body through the lens of social and theatrical dancing couples. The structure of domestic partnerships as mirrored on the social dance floor and theatrical and Hollywood stage. Sources include anti-dance treatises, African American dance spaces, dance marathons of the 20s and 30s, Savoy Lindy hop, Irene and Vernon Castle, Fred Astaire and Ginger Rogers, precision dance, gay square dance, and same sex and gender switch tango. Live demonstrations.
4 units, Spr (Powers, R; Ross, J)

DRAMA 188Q. From Brecht to Müller: German Theater and Performance since World War II—Stanford Introductory Seminar. Preference to sophomores. History and aesthetics of theater in the German-speaking countries of Central Europe: the Fascist-Nationalist tradition of the Third Reich; Brecht's influence; developments of the 60s; political stagnation of the 70s and 80s; and the end of the Cold War.
3-5 units, Aut (Weber, C)

DRAMA 189Q. Mapping and Wrapping the Body—Stanford Introductory Seminar. Preference to sophomores. The concepts behind gender boundaries and clothing systems. GER:DB-Hum
3 units, Aut (Eddelman, W)

DRAMA 190. Special Research—Individual project on the work of a playwright, period, or genre. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 191. Independent Study—Individual supervision of off-campus internship. Prerequisite: consent of instructor.
1-18 units, Aut, Win, Spr, Sum (Staff)

ADVANCED COURSES

Courses numbered 200 through 299 are designed for advanced undergraduates and graduates.

DRAMA 200. Senior Project—See "Undergraduate Programs" for description.
2-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 201A,B,C,D. Honors Colloquium—See "Undergraduate Programs" for description.
1 unit, Aut, Win, Spr, Sum (Staff)

DRAMA 202. Honors Thesis—See "Undergraduate Programs" for description. May be repeated for credit.
2-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 203. Advanced Improvisation—Further development of improvisational skills.
3 units, Aut (Klein, D)

DRAMA 205. Senior Project: Acting—Collaborative work on a project culminating in a production.
2-5 units, Spr (Kostopoulos, K)

DRAMA 210A,B. Actor in Performance—Preference to Drama majors and minors and to students interested in further training in the performing arts. Taught in the professional conservatory tradition, with the creation of an acting ensemble. Skill building in acting, movement, voice, and speech. How to analyze and play the dramatic action of the text. Guest teachers from professional theater complement and expand the work of the ensemble. Limited enrollment. Prerequisite: interview with instructor.
4-5 units, A: Aut (Freed, A), B: Win (Kostopoulos, K)

DRAMA 210C. Actor in Performance: Ensemble Workshop in Today's Theater—Actors apply themselves to performance challenges of plays from the U.S. and UK theater today: Stephen Adly Guirgis, Richard Greenberg, Philip Ridley, Kia Cothron, Diana Son, Winsome Pinnock, and emerging student playwrights. Final presentation of an adapted contemporary script chosen to suit the casting needs of the ensemble.
4-5 units, Spr (Freed, A)

DRAMA 213. Stanford Improv Ensemble—By audition only, for members of the improvisation troupe. Special project work. Prerequisite: 103.
1-2 units, Aut, Win, Spr (Klein, D)

DRAMA 231. Advanced Stage Lighting Design—Individually structured class in lighting mechanics and design through experimentation, discussions, and written reports. Prerequisite: 131 or consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 232. Advanced Costume Design—Individually structured tutorial for costume designers. May be repeated for credit. Prerequisite: 132 or consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 233. Advanced Scene Design—Fast-paced, individually structured workshop. May be repeated for credit. Prerequisite: 133 or consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 234. Advanced Stage Management Project—For students stage managing a Department of Drama production. Prerequisite: 134.
2-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 235. Advanced Sound Design—Individually structured tutorial for sound designers. May be repeated for credit. Prerequisite: 135 or consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 240. Projects in Theatrical Production—(Same as 140; see 140.)
1-5 units, Aut, Win, Spr, Sum (Staff)

DRAMA 250. Chekhov and Before—(Same as 150; see 150.)
4 units, not given this year (Arad, M)

DRAMA 251. Adaptation: Turning into Drama—(Same as 151; see 151.)
4 units, not given this year (Arad, M)

DRAMA 255D. Performances of Race, Race-ing Performance—(Same as 155D; see 155D.)
5 units, Spr (Diggs, S)

DRAMA 256F. Female Performers—(Same as 156F; see 156F.)
4 units, Win (Arad, M)

DRAMA 256M. Israeli Film and Theater, 1948-2006—(Same as 156M; see 156M.)
5 units, Aut (Arad, M)

DRAMA 257H. Urban Rituals: Anna Halprin's 1960s Participatory Dance Theater—(Same as 157H; see 157H.)
4-5 units, Aut (Ross, J)

DRAMA 258D. Comedy on the Western Stage—(Same as 158D; see 158D.)

5 units, Aut (*Daube, M*)

DRAMA 260. Performance, Dance History, and Gender—(Same as 160; see 160; same as DANCE 160.)

4 units, Win (*Ross, J*)

DRAMA 261. Performance and Politics—(Same as 161; see 161; same as CLASSGEN 161.)

5 units, Aut (*Rehm, R*)

DRAMA 262. Performance and the Text—(Same as 162; see 162.)

5 units, alternate years, not given this year (*Rayner, A*)

DRAMA 263. Performance and America—(Same as 163; see 163.)

5 units, not given this year (*Elam, H*)

DRAMA 264. Performance and Gender—(Same as 164; see 164.)

5 units, not given this year (*Phelan, P*)

DRAMA 265. Theater History: Classical to 1900—(Same as 165; see 165.)

4 units, not given this year

DRAMA 266. Twentieth-Century Theater History: Production Research and Design—(Same as 166; see 166.)

4 units, Spr (*Sack, D*)

DRAMA 267. Avant Garde Theater—(Same as 167; see 167.)

5 units, Win (*Jakovljevic, B*)

DRAMA 268. African American Drama: Traditions and Revisions—(Same as 168; see 168.)

5 units, Aut (*Diggs, S*)

DRAMA 269. Contemporary Dramatic Voices of Color—(Same as 169; see 169.)

5 units, Win (*Elam, H*)

DRAMA 272. Late Postmodern Experimental Theater—(Same as 172; see 172.)

4-5 units, not given this year (*Fordyce, E*)

DRAMA 273. Studies in Creativity—(Same as 173; see 173.)

3-5 units, not given this year (*Lai, S*)

DRAMA 276. Dramaturgy Project—(Same as 176; see 176.)

2 units, Aut, Win, Spr, Sum (*Staff*)

DRAMA 277. Playwriting—(Same as 177; see 177.)

5 units, Win (*Moraga, C*)

DRAMA 278. Intensive Playwriting—(Same as 178; see 178.)

5 units, Spr (*Moraga, C*)

DRAMA 290. Special Research—Individual project on the work of a playwright, period, or genre.

1-5 units, Aut, Win, Spr, Sum (*Staff*)

DRAMA 299. Prospectus Writing—Workshop. How to develop a prospectus for the dissertation. May be repeated for credit.

1-3 units, Aut (*Kendall, A*)

GRADUATE

Open to advanced undergraduates with consent of instructor.

DRAMA 300. Theories of Drama and Performance—Seminar. Critical theory including readings from Marx, Freud, and Nietzsche.

5 units, not given this year

DRAMA 301. From Theory to Criticism—Performance theory in readings from Austin, Derrida, Butler, Schechner, Turner, Phelan, Auslander, Foster, Roach, and Diamond.

5 units, not given this year (*Phelan, P*)

DRAMA 302. Research Methods in Drama—Projects involving examination of live performance, play texts, and theories of drama. Principles of argument. Foundation for course work and writing the dissertation.

5 units, Aut (*Elam, H*)

DRAMA 303A. Theory/Theater—How theater has provided the ground for epistemological concerns with questions of being, events, human action, and ethics, from classical Greek thought to postcolonialism. Theoretical work including Aristotle, Artaud, Anzaldúa, Brecht, Bhabha, DuBois, and Derrida. Theater practices including perspectival staging and postmodern performance.

3 units, Win (*Rayner, A*)

DRAMA 316V. Seminar: The Avant Garde—Theoretical paradigms of avant garde practices past and present.

3-5 units, Win (*Jakovljevic, B*)

DRAMA 317A. Performance and Philosophy: Historical Dimensions and Contemporary Issues—Encounters between the discursive practices of theater/performance and philosophy including: theater and the performative as seen from a philosophical perspective; and meetings between practitioners of theater/performance and philosophers. Works by Sophocles, Aristotle, Nietzsche, Benjamin, Brecht, Butler, and Lacan.

3-5 units, Aut (*Rokem, F*)

DRAMA 320. Basic Approaches to Teaching Acting—Workshop. The pedagogy of acting to prepare graduate student teachers for introductory classes in acting.

1-3 units, Aut (*Freed, A*)

DRAMA 321. Proseminar—Skills for the academic profession including abstract, conference presentation, and dissertation or book chapter.

1-3 units, not given this year (*Phelan, P*)

DRAMA 322. Seminar: Postmodern Performance—Theory and practice in America and Europe.

3-5 units, Spr (*Fordyce, E*)

DRAMA 370. Concepts of Directing—Directorial definitions of time, space, movement, and the performer/spectator relationship. Experimentation with texts from literary and other sources, including works from the realistic tradition in drama, using a multi-form performance space.

5 units, Aut (*Weber, C*)

DRAMA 371. Visual Aesthetics for the Director—International theater design emphasizing the last thirty years. Productions from Europe, Asia, and the U.S.

3 units, not given this year (*Eddelman, W*)

DRAMA 372A,B. Projects in Directing—Theatrical text and its transformation into performance. Textual analysis, research, evolution of a directorial concept, and its investigation in scene-work with actors. Students design and stage the production of a short play in a multi-form space. Public performance. May be repeated once for credit.

3-5 units, A: Win (*Ramsaur, M; Lai, S*), B: Spr (*Lai, S*)

DRAMA 373. Directing and Dramaturgy—Dramaturgy, directorial methods, and visual concepts in the production of plays from the Elizabethan tradition to postmodernist texts. Work on the text is tested in the staging of scenes.

3-5 units, Aut (*Weber, C*)

DRAMA 374. Graduate Directors' Performance Project—Production of a full-length play, selected in consultation with faculty. Project is designed by graduate students, sometimes in collaboration with undergraduate design students, under the supervision of design faculty. Four to five weeks rehearsal. Public performance.

3-5 units, Aut, Win, Spr, Sum (*Staff*)

DRAMA 375. Main Stage Production—Production of a full-length play as part of the Department of Drama season. Public performance.

3-5 units, Aut (*Salata, K; Strayer, C*)

DRAMA 376. Graduate Directors' Dramaturgy Project—Serve as a dramaturg on any department production. Work includes research on the production's text source, the writing of program notes, and the compilation and editing of the play bill. Possible adapting/editing of the performance text, and translating text from a foreign language.

2 units, Aut, Win, Spr, Sum (*Staff*)

DRAMA 377. Graduate Directors' Staged Reading Project—Presentation of a new or newly adapted work for the stage, in a mode employed in professional theater for the development of new plays. Two to four rehearsals. Public performance.

2 units, Aut, Win, Spr, Sum (Staff)

DRAMA 380. Graduate Colloquium—Topics concerning theory and practice in the theater such as the relationship between the director and designer. May be repeated for credit. Autumn: directing and scene design; the design process from the director's point of view. Winter: directing and lighting design; the creative possibilities of stage lighting. Spring: directing and the creative process; assimilation of academic, theatrical, and creative skills; creative tools for collaboration with actors, designers, and directors.

2-3 units, Aut (Flatmo, E), Win (Ramsaur, M), Spr (Lai, S)

DRAMA 390. Tutorial

1-9 units, Aut, Win, Spr, Sum (Staff)

DRAMA 399. Dissertation Research

1-9 units, Aut, Win, Spr, Sum (Staff)

INSTITUTE FOR THE ARTS AND BLACK PERFORMING ARTS DIVISION

The following are core courses. See also course listings in the "Comparative Studies in Race and Ethnicity" and "African and African American Studies" sections of this bulletin.

DRAMA 110. Identity, Diversity, and Aesthetics: The Institute for Diversity in the Arts

5 units, Win (Elam, H)

DRAMA 169/269. Contemporary Dramatic Voices of Color

5 units, Win (Elam, H)

DANCE DIVISION

Registration for most dance classes takes place at the first class meeting; further registration information is printed in the *Time Schedule* each quarter. Some class sizes are limited and require advanced registration in the Dance office in Roble Gym. Series classes (I, II, III) should be taken in order or with consent of instructor.

INTRODUCTORY

Open to all students. No previous dance experience needed.

DANCE 40. Introduction to Dance and Movement: Liquid Flow—Body expression, articulation, and anatomical basics through contemporary art dance. Emphasis is on development of awareness of the body in space. Exploration of improvisation and creativity. May be repeated for credit.

2 units, Aut, Win (Hayes, A), Spr (Kramer, A)

DANCE 42. Dances of Latin America—Dances of Argentina, Brazil, Chile, Colombia, Cuba, Mexico, Peru, and Puerto Rico. May be repeated for credit.

2 units, Spr (Cashion, S)

DANCE 43. Afro-Peruvian Dance—Dances include festejo and zamacueca. May be repeated for credit.

1 unit, Aut (Cashion, S)

DANCE 44. Jazz Dance I—Basic techniques emphasizing current jazz style. Historical jazz steps enhance understanding of contemporary jazz forms. May be repeated for credit.

2 units, Aut, Win, Spr (Kramer, A)

DANCE 45. Improvisation Plus Contact—The development of improvisation skills as a creative performance practice and as a basis for choreography; techniques of contact improvisation. May be repeated for credit.

2 units, Win, Spr (Kramer, A)

DANCE 46. Social Dances of North America I—Introduction to the partner dances found in American popular culture: waltz, swing, tango, club two step, cha cha, merengue, and salsa. Fee. May be repeated for credit. (AU)

1 unit, Aut, Win, Spr (Powers, R)

DANCE 48. Beginning Ballet—Fundamentals of ballet technique including posture, placement, and the foundation steps of classical ballet. Emphasis is on the development of coordination, strength, and flexibility. May be repeated for credit.

2 units, Aut (Elliott, K)

DANCE 55. Middle Eastern Dance—Emphasis is on traditional Egyptian forms. May be repeated for credit.

1 unit, Win (Fauzi, H)

DANCE 58. Beginning Hip Hop—Steps and styling in one of America's 21st-century vernacular dance forms. May be repeated for credit.

1 unit, Aut (Reddick, R)

DANCE 59. Intermediate-Advanced Hip-Hop—Steps and styling in one of America's 21st-century vernacular dance forms. May be repeated for credit.

1 unit, Aut (Reddick, R)

INTERMEDIATE

Open to all undergraduates with dance experience.

DANCE 140. Intermediate Modern Dance—Intermediate technique. Improvisation and composition in directed studies. May be repeated for credit.

2 units, Aut, Win, Spr (Moses, R)

DANCE 146. Social Dances of North America II—Intermediate survey of dances in American popular culture: Lindy hop, Viennese waltz, cross-step waltz, foxtrot, and hustle. May be repeated for credit.

2 units, Win (Powers, R)

DANCE 147. Living Traditions of Swing—Swing dancing: the early Lindy of the 20s; 6- and 8-count Lindy hop, shag, Big Apple. Partnering and improvisation. Swing's crosscultural influences and personal creativity. May be repeated for credit.

2 units, Win (Powers, R)

DANCE 148. Intermediate Ballet—Continuation of 48, repeating the fundamentals with increased complexity and introducing additional movement vocabulary. May be repeated for credit.

2 units, Aut, Win, Spr (Onizuka, R)

ADVANCED

Open to all undergraduates with dance experience.

DANCE 141. Advanced Modern Dance—Intermediate/advanced technique. Complex movement combinations emphasizing performance demands. May be repeated for credit.

2 units, Aut, Win, Spr (Frank, D)

DANCE 149. Advanced Ballet—Professional-level class in a supportive environment. Comprehensive classical ballet technique including pointe work if the student desires. May be repeated for credit.

2 units, Aut, Win, Spr (Elliott, K)

DANCE 156. Social Dances of North America III—Advanced survey of the partner dances found in American popular culture: hustle, waltz, redowa, tango, cha cha, salsa, samba. May be repeated for credit. Prerequisite: 146 or equivalent experience.

2 units, Win (Powers, R)

PERFORMANCE

DANCE 23. Public Performance—For students participating in Dance Division performances. May be repeated for credit.

1 unit, Aut, Win, Spr (Kramer, A)

DANCE 27. Faculty Choreography—Rehearsal and performance of faculty choreography. Selection by audition. May be repeated for credit.

2 units, Aut, Win, Spr (Kramer, A)

DANCE 57. Guest Artist—Students perform the work of a visiting artist. Audition required. May be repeated for credit.

2 units, Aut, Win, Spr (Staff)

DANCE 100. Student Choreography: Studio to Stage—Student choreography is mentored to develop composition and performance skills. Required for participation in certain faculty- and student-directed productions. May be repeated for credit.

2 units, Win, Spr (Frank, D; Kramer, A)

DANCE 102. Duets Project—Rehearsal experiences and techniques embedded in the reconstruction of repertory by three artists whose collective works represent differing approaches to the choreographic process. May be repeated for credit.

2 units, Win (Frank, D)

DANCE 103. Marriage of Text and Movement—Nonclassical modes of choreographic development in relation to written and spoken text. Students create works from existing material by use of developing structures. May be repeated for credit.

2 units, Aut (Moses, R)

DANCE 105. Contemporary Afro Styles and Dancemaking: Technique, Rhythm, Architecture—Current and traditional African diaspora styles. African polyrhythms, body percussion, and geometric forms, fused with postmodern concepts of composition and space. May be repeated for credit.

2 units, Aut (Hayes, A)

DANCE 106. Essence of Contemporary Dance Performance: African Styles on Stage—Contemporary dance technique and repertory based on African diaspora movement styles. Focus is on articulation of expression, enhancement of stage presence, and awareness of individual movement strengths. May be repeated for credit.

2 units, Win (Hayes, A)

DANCE 111. Participatory Dance of 1960s: Restaging Anna Halprin's Myths—Studio lecture course. Focus is on the quarter-long residency of dance and theater artist, Anna Halprin. Participants incorporate narratives from residents of local senior centers to recreate three of Halprin's works from 1967's *10 Myths* which helped to launch the participatory theater and dance experimentation that gave rise to postmodern dance.

2 units, Aut (Ross, J; Frank, D)

DANCE 115. Women's Bodies at the Intersection of Science, Technology, and Art—Interdisciplinary project exploring medical images of the body and its representation in dance and technology, emphasizing video.

2 units, Win (Frank, D)

DANCE 169. Choreography: Creation, Staging, and Reconstruction—Skills and criteria for the choreographic process. Invention, staging, and reconstruction. The creative process and practical considerations in making a dance work.

2 units, not given this year

THEORY

Classroom or classroom/studio combination courses on topics in Dance and Performance.

DANCE 133. History of the Waltz—From Vienna in 1800. Redowa and mazurka, waltz variations, the 20th-century hesitation waltz, Parisian valse musette, and 30s Boston and waltz swing. Studio technique with performance practice for stage.

2 units, alternate years, not given this year

DANCE 134. Ballet Folklorico—The history of Ballet Folklorico including its roots in Mexican folk and N. American modern dance, Guadalajara choreographic narratives, and U.S. performance ensembles. GER: EC-GlobalCom

3 units, alternate years, not given this year

DANCE 158. The Body in Motion—Approaches and methods in body therapy: body maintenance and conditioning, the Laban movement system, body-mind centering. GER:DB-Hum

3 units, alternate years, not given this year

DANCE 160. Performance, Dance History, and Gender—(Same as DRAMA 160/260.) Shifting gender identities in western theatrical dance from the mid-18th to mid-20th centuries. The birth and development of theatrical dance. Changing notions of gender construction and the body in performance. WIM for Drama. GER:DB-Hum, EC-Gender

4 units, Win (Ross, J)

DANCE 166. History of Social Dance in Western Culture—Movement and historic social dance from the past five centuries, including studio technique and history. Performance practices for stage, including deportment, body language, and demeanor distinctive to each era. GER:DB-Hum

2 units, Spr (Powers, R)

DANCE 168. Dance and Culture in Latin America—Dance forms of Latin America as aspects of human behavior. Emphasis is on cultural influences (European, African, and indigenous) that have shaped the ritual and social dance forms of Argentina, Brazil, Chile, Cuba, Mexico, and Puerto Rico. May be repeated for credit. GER:DB-Hum, EC-GlobalCom

4 units, Spr (Cashion, S)

DANCE 190. Special Research—Topics related to the discipline of dance. May be repeated for credit.

1-5 units, Aut, Win, Spr, Sum (Staff)

DANCE 191. Independent Research—Individual supervision of off-campus internship. Prerequisite: consent of instructor.

1-18 units, Aut, Win, Spr, Sum (Staff)

DANCE 197A,B. Dance in Prisons: The Arts, Juvenile Justice, and Rehabilitation in America—Participatory seminar. The nexus of art, community, and social action, using dance to study how the performing arts affect self-construction, perception and experiences of embodiment, and social control for incarcerated teenagers in Santa Clara Juvenile Hall. GER:DB-Hum

4 units, A: Win, B: Spr (Ross, J)

ADVANCED THEORY

Courses numbered 200 through 299 are designed for advanced undergraduates and graduate students.

DANCE 290. Special Research—Individual project on the work of any choreographer, period, genre, or dance-related topic. May be repeated for credit.

1-18 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

ENGLISH 163. Shakespeare

5 units, Aut, Win (Orgel, S)

ENGLISH 344A,B. Shakespeare, Marlowe, Jonson

5 units, A: Aut, B: Win (Orgel, S)

OVERSEAS STUDIES

Courses approved for the Drama major and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BERLIN

DRAMA 101A. Contemporary Theater—(Same as GERLIT 195.)
GER:DB-Hum
5 units, Spr (Kramer, K)

DRAMA 158F. Live Art and Performance in Berlin
3 units, Win (Fordyce, E)

OXFORD

DRAMA 129F. Workshop in Shakespearean Production—(Same as ENGLISH 84Z.)
2 units, Aut (Friedlander, L)

SANTIAGO

DANCE 42X. Dances of Latin America
2 units, Win (Cashion, S)

DANCE 168. Dance and Culture in Latin America
4 units, Win (Cashion, S)

EAST ASIAN STUDIES

Director: Chaofen Sun

Affiliated Faculty and Staff:

Anthropological Sciences: Melissa Brown (on leave), Arthur P. Wolf
Art and Art History: Jean Ma, Melinda Takeuchi, Richard Vinograd
Asian Languages: Fumiko Arao, Adil Atawulla, Kazuko M. Busbin, Steven Carter, Yin Chuang, Marina Chung, Richard Dasher, Sik Lee Dennig, Michelle DiBello, Albert E. Dien (emeritus), Momoe Saito Fu, Hee-sun Kim, Sonam Topgyal Lama, Indra Levy, Mark Lewis, Nina Lin, Hisayo O. Lipton, Momoyo Kubo Lowdermilk, Yoshiko Matsumoto, Kiyomi Nakamura, James Reichert, Yu-hwa Liao Rozelle, Chaofen Sun, Melinda Takeuchi, Yoshiko Tomiyama, Ban Wang (Visiting Professor), Huazhi Wang, John C. Y. Wang, Hong Zeng, Youping Zhang, Yiqun Zhou, Qi Zhu
Business: Hau Lee, Bruce McKern, Kenneth Singleton
Comparative Literature: David Palumbo-Liu
Cultural and Social Anthropology: Harumi Befu (emeritus), Miyako Inoue, Matthew Kohrman
East Asian Studies: Weifang Min, E. Anthony Zaloom
Economics: Masahiko Aoki (emeritus), Ronald McKinnon
Education: Jennifer Adams
Electrical Engineering: Richard Dasher

The Center for East Asian Studies (CEAS) coordinates all University instructional, research, and special activities related to China, Japan, and Korea. Faculty and students who share a common interest in the study of East Asia are brought together by the center from a broad range of academic

concerns covering nearly every discipline and historical period. CEAS belongs to the Division of International and Comparative Area Studies in the School of Humanities and Sciences, and collaborates with the Walter H. Shorenstein Asia-Pacific Research Center (<http://aparc.stanford.edu/>).

**UNDERGRADUATE PROGRAMS
BACHELOR OF ARTS**

The undergraduate major in East Asian Studies enables students to obtain a comprehensive understanding of East Asia broadly conceived, which is the vast area stretching from Japan through Korea and China to the contiguous areas of the Central Asian land mass. Majors in East Asian Studies begin or continue the mastery of Chinese, Japanese, or Korean. Within the humanities or social sciences, they may focus on a particular sub-region, for example, Japan, South China, Hong Kong and Taiwan; or western China and Central Asia; or a substantive issue involving the region as a whole, such as environmental protection, public health, rural development, historiography, cultural expression, or religious beliefs. The major seeks to reduce the complexity of a region to intellectually manageable proportions and illuminate the interrelationships among the various facets of a society.

Potential majors must submit a Student Proposal for a Major in East Asian Studies form not later than the end of the first quarter of the junior year for approval by the East Asian Studies undergraduate committee.

Majors must complete at least 75 units of course work on China, Japan, and/or Korea. Courses to be credited toward major requirements must be completed with a grade of 'C' or better. Requirements are:

- Language:* proficiency in Chinese, Japanese, or Korean language at the second-year level or above, to be met either by course work or examination. Students who meet the requirement through examination are still expected to take an additional 15 units of language at a higher level, or literature courses taught in the language, or the first year in an additional Asian language. No more than 30 units of language courses are counted toward the major.
- Gateway Courses:* a minimum of three gateway courses, one in each area. The gateway courses are:
 - Art, Literature and Religion
ARTHIST 2. Asian Art and Culture
CHINGEN 91. Traditional East Asian Civilization: China
JAPANGEN 92. Traditional East Asian Civilization: Japan
RELIGST 18. Introduction to Zen Buddhism
RELIGST 46. Introduction to Daoism
 - History
HISTORY 92A. Historical Roots of Modern East Asia
HISTORY 191. East Asia in the Early Buddhist Age
HISTORY 198. History of Chinese Modernity
 - Contemporary Social Sciences
ANTHSCI 7. Marriage and Kinship
ANTHSCI 128B. Globalization and Japan
POLISCI 148S: The U.S. and Asia During the Cold War
SOC 111. State and Society in Korea
SOC 117A. China Under Mao
- Substantive Concentration:* additional courses on East Asia, one of which must be a seminar.
- Capstone Essay:* completion of a paper of approximately 7,500 words, written either in a directed reading course or for one of the courses in item 3 above, which should be built upon the student's thematic interest. A 1-unit Spring Quarter course is required for all majors, in which they discuss and work through their capstone essays or senior honors theses.
- At least one quarter overseas in the country of focus.

Majors are encouraged to distribute their course work among at least three disciplines and two subregions in Asia. The subregions need not be traditionally defined. Examples include China, Japan, or Korea; or, in recognition of the new subregions which are emerging: South China, Hong Kong, and Taiwan; or Central Asia, Xinjiang, and Mongolia. At least four courses must have a thematic coherence built around a topic such as:

Buddhism's impact on East Asian cultures

Culture and society of modern Japan
 Ethnic identities in East Asia
 Fine arts and literature in late imperial China
 Foreign policy in East Asia
 Social transformation of modern China
 Traditional Japanese civilization

An East Asian Studies course that satisfies the University Writing in the Major requirement (WIM) should be completed before beginning the senior essay. This year, CHINGEN 133, JAPANGEN 138, and HISTORY 256 satisfy the WIM requirement.

The courses for the major must add up to at least 75 units and all must be taken for a letter grade.

MINORS

The goal of the minor in East Asian Studies is to provide the student with a broad background in East Asian culture as a whole, while allowing the student to focus on a geographical or temporal aspect of East Asia. The minor may be designed from the following, for a total of six courses. All courses should be taken for a letter grade.

1. Three gateway courses, one in each area (see above for listing of gateway courses).
2. One undergraduate seminar and two other courses from among those listed each quarter as approved for East Asian Studies majors, including literature courses but excluding language courses.

Applications for the minor are due no later than the second quarter of the junior year.

HONORS PROGRAM

Majors with a grade point average (GPA) of 3.25 or better in all courses related to East Asia may apply for the honors program no later than the final quarter of the junior year. Application entails submitting an honors prospectus to the student's adviser for approval. Admission is granted by the CEAS undergraduate committee, acting on the adviser's recommendation.

Honors requirements are satisfactory completion of:

1. An honors thesis of high quality of approximately 10,000 words to be submitted in lieu of the senior capstone essay.
2. 5 to 10 units of directed individual study in connection with the thesis project.
3. One advanced level colloquium or seminar dealing with China, Japan, or Korea.

COTERMINAL BACHELOR'S AND MASTER'S PROGRAM

The center admits a limited number of Stanford undergraduates to work for a coterminal M.A. degree in East Asian Studies. Applications must be submitted by January 9 of the junior year. Applicants are expected to meet the same standards as those seeking admission to the M.A. program: they must submit a written statement of purpose; a Stanford transcript; three letters of recommendation, at least two of which should be from members of the department of concentration; and scores from the General Test of the Graduate Record Exam. In addition, applicants must provide a list of courses they intend to take to fulfill degree requirements. The decision on admission rests with the M.A. admissions committee of the Center for East Asian Studies. Students must meet all requirements for both B.A. and M.A. degrees. They must complete a total of 15 full-time quarters or the equivalent, or three full quarters after completing 180 units for a total of 225 units.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

CEAS OVERSEAS PROGRAMS

Internships—Undergraduates of any major may apply for summer internship opportunities in China, Japan, and Korea. Host organizations include government and non-profit organizations, and media, financial, and electronic companies. Applications are due in February.

Language Study—CEAS provides undergraduate fellowships for language study in China, Japan, or Korea; students must simultaneously apply to a pre-approved language program abroad. Applications are due in February.

For more information about CEAS overseas programs, contact Denise Chu at denisech@stanford.edu or see <http://ceas.stanford.edu>.

DISTINGUISHED PRACTITIONERS

Eminent professionals whose work in East Asia brings real-life knowledge to the classroom serve as visiting lecturers through the CEAS Distinguished Practitioners from East Asia program. Teaching this year are: Dr. Weifang Min, Executive Vice President of Peking University (EASTASN 184C, Reforming Higher Education in a Changing China); and Anthony Zaloom, international attorney (EASTASN 183C, Doing Business in China).

ACADEMIC THEME HOUSE

The East Asian Studies Theme House, or EAST House, is an undergraduate residence that houses 60 students and offers them opportunities to expand their knowledge, understanding, and appreciation of Asia. EAST House is located on campus at Governor's Corner. Assignment is made through the regular undergraduate housing draw.

BING OVERSEAS STUDIES PROGRAMS

Beijing—Stanford undergraduates can live and study at Peking University through the Stanford Program in Beijing. Classes are taught in English by the Stanford faculty-in-residence and Peking University professors. Students are considered enrolled in Peking University and may participate in athletic and musical activities on campus, including Chinese art and calligraphy, tai-chi, and wu shu.

Kyoto—Students interested in the study of Japanese language, history, culture, and social organization can attend one or two quarters at the Kyoto Center for Japanese Studies which is supported by a consortium of 13 American universities including Stanford. The Bing Overseas Studies Program also offers a Spring Quarter program focused on Japanese organizations and the political economy of research, development, and production of high technology and advanced industries at the Stanford Center in Technology and Innovation (SCTI). An internship in a Japanese firm, laboratory, or agency follows the SCTI training program.

Overseas Seminars—Three-week seminars led by Stanford faculty are offered in late summer, with destinations and study topics changing each year. For more information about Bing Overseas Studies Programs, contact the Overseas Studies office at Sweet Hall, or see <http://osp.stanford.edu>.

GRADUATE PROGRAMS MASTER OF ARTS

University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin.

The M.A. program in East Asian Studies is designed both for students who plan to complete a Ph.D. but who have not yet decided on the particular discipline in which they prefer to work, and for students who wish to gain a strong background in East Asian Studies in connection with a career in nonacademic fields such as business, law, education, journalism, or government service. Students interested in pursuing professional careers are encouraged to plan for additional training through internships or graduate professional programs, in conjunction with obtaining an M.A. in East Asian Studies.

The master's degree program allows a great deal of flexibility in combining language training, interdisciplinary area studies, and a disciplinary concentration. The director of the center assigns faculty advisers to all students. Members of the staff and faculty are available for academic and career planning. The M.A. program is normally completed in two academic years, but students can shorten this time by receiving credit for prior language work or by attending summer sessions. Students are urged to complete the degree requirements within one year if their background makes it possible.

Applicants must submit scores for the General Test of the Graduate Record Examination. Foreign applicants are also required to take the Test of English as a Foreign Language. Applications for admission and financial aid should be made online; see <http://gradadmissions.stanford.edu/>.

The requirements for the M.A. in East Asian Studies are as follows:

Language Requirement—Students must complete the equivalent of Stanford's first three years of language training in either Chinese, Japanese, or Korean. Students entering the program without any language preparation should complete first- and second-year Chinese, Japanese, or Korean within the first year of residence at Stanford. This will necessitate completing a summer language program. Language courses taken at Stanford must be for letter grades.

The language requirement may be satisfied in part or in full by placing into an appropriate Stanford language class through the language proficiency exam given by the Language Center. Students who fulfill this minimum three-year language requirement before completing other requirements are encouraged to continue language study, or take courses in which Chinese or Japanese are used, for as long as they are in the program. Language courses beyond the third-year level may be applied to the Area Studies requirement discussed below.

Students in the M.A. program are eligible to apply for the Inter-University language programs in Beijing and Yokohama. Work completed in one of these programs may be counted toward the M.A. degree's language requirement.

Area Studies Requirement—Students must complete the 1-unit core course, EASTASN 330, and an additional nine courses numbered 100 or above related to East Asia. (Chinese and Japanese language courses numbered 100-199 are considered to be at the third-year level and do not count toward the courses required for the degree.) The nine courses must be 3 or more units, taken for a letter grade. At least 23 units must be designated primarily for graduate students (typically at the 200-300 levels).

An integral part of the program is training in research and a demonstration of research ability in a discipline. Three courses, one of which must be a seminar, colloquium, or advanced course in which a research paper on China, Korea, or Japan is written, must be within a single department. The six additional area courses may be taken in departments of the student's choosing. Some theory-oriented or methodological courses may be used to meet part of these requirements provided they are demonstrably useful for understanding East Asian problems. Credit toward the area studies requirement is not given for courses taken before entering the M.A. program. Students in this program may, however, take courses for exchange credit at the University of California, Berkeley, with the approval of their adviser and the Office of the Registrar.

M.A. Thesis Requirement—A master's thesis, representing a substantial piece of original research, should be filed with the center's program office as part of the graduation requirements. With the adviser's approval, the master's thesis requirement may be satisfied by expanding a research paper written for an advanced course.

DUAL DEGREE PROGRAMS

EAST ASIAN STUDIES AND LAW

This program grants an M.A. degree in East Asian Studies and a Doctor of Jurisprudence (J.D.) degree. It is designed to train students interested in a career in teaching, research, or the practice of law related to East Asian legal affairs. Students must apply separately to the East Asian Studies M.A. program and to the Stanford School of Law and be accepted by both. Completing this combined course of study requires approximately four academic years, depending on the student's background and level of training in Chinese, Japanese, or Korean.

EAST ASIAN STUDIES AND EDUCATION

This program grants an M.A. degree in East Asian Studies and a secondary school teaching credential in social studies. To be eligible for this program, students should apply to the M.A. program in East Asian Studies and then apply to the Stanford Teacher Education Program during the first year at Stanford. Completing the dual program requires at least two years, including one summer session when beginning the education component of the program.

EAST ASIAN STUDIES AND BUSINESS

This program grants an M.A. degree in East Asian Studies and a Master of Business Administration degree. Students must apply separately to the East Asian Studies M.A. program and the Graduate School of Business and be accepted by both. Completing this combined course of study requires approximately three academic years (perhaps including summer sessions), depending on the student's background and level of training in Chinese, Japanese, or Korean language.

DOCTORAL PROGRAMS

Stanford does not offer a Ph.D. in East Asian Studies. However, there are more than 100 doctoral students with a specialization on China, Korea, or Japan within various departments and schools of the University. The departments that offer an East Asian concentration are: Anthropological Sciences, Art and Art History, Asian Languages, Comparative Literature, Cultural and Social Anthropology, History, Linguistics, Political Science, Religious Studies, and Sociology. It is also possible to specialize in East Asia within some of the doctoral programs of the professional schools of Business, Education, and Law. Inquiries should be directed to the individual department or school concerned.

POSTDOCTORAL PROGRAMS

The Center for East Asian Studies offers two postdoctoral fellowships in Chinese Studies each year. Two postdoctoral fellowships in Japanese Studies are available from the Freeman-Spogli Institute of International Studies. The Walter H. Shorenstein Asia-Pacific Research Center has a postdoctoral program in contemporary Korean Studies.

FINANCIAL AID

Students in graduate programs who plan to do work in Chinese, Japanese, or Korean language, and area studies courses, may be eligible for Foreign Language and Area Studies (FLAS) fellowships and are encouraged to apply for them at the time of application to Stanford. Recipients of FLAS fellowships must be American citizens or permanent residents. For further information, see <http://ceas.stanford.edu>.

COURSES

The courses listed below deal primarily with China, Japan, and/or Korea. Many other theoretical and methodological courses within the departments at Stanford are taught by faculty who are East Asian specialists; these courses often have a substantial East Asian component and may be found under the department listings in this bulletin.

EAST ASIAN LANGUAGES

For courses in Chinese, Japanese, and Korean language instruction with the subject codes CHINLANG, JAPANLANG, and KORLANG, see the "Language Center" section of this bulletin. For courses in Classical Chinese with the subject code CHINLIT, see the "Asian Languages" section of this bulletin.

UNDERGRADUATE

EASTASN 5. East House Seminar—May be repeated for credit.

1 unit, Aut, Spr (Sun, C)

EASTASN 150T. Introduction to Tibetan Culture and History—The formation of Tibetan culture and history through the 20th century. Geography, the spread of Tibetan civilization and culture, emergence of the Tibetan Empire, introduction of Buddhism into Tibet, and development of the Dalai Lama institution.

5 units, Spr (Tsomu, Y)

EASTASN 182K. U.S.-Korean Relations

3 units, not given this year

EASTASN 183C. Doing Business in China: Challenges and Approaches—Challenges facing international businesses as they take part in China's economic boom. Chinese economic reform, and changes in sino-foreign commercial interaction. Guest lectures by business executives working in China. Student teams participate in negotiation simulation.

3-5 units, Win (Zaloom, A)

EASTASN 184C. Reforming Higher Education in a Changing China—China’s comprehensive higher education reforms in the context of its socioeconomic transition since the late 70s. Topics include interactions between universities and the economic sector, new human resource needs, reforms in higher education governance and finance, curriculum and teaching, university-industry relationships, and comparison to other countries.
5 units, Aut (Min, W)

ADVANCED

EASTASN 191. Journal of East Asian Studies
1 unit, Aut, Win, Spr (Sun, C)

EASTASN 198. Senior Colloquium in East Asian Studies
1 unit, Spr (Sun, C)

EASTASN 199. Directed Reading
1-9 units, Aut, Win, Spr, Sum (Staff)

EASTASN 330. Core Seminar: Issues and Approaches in East Asian Studies—For East Asian Studies M.A. students only.
1 unit, Aut (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

ASIAN LANGUAGES

See the “Asian Languages” section of this Bulletin for courses in Chinese General Studies (CHINGEN), Chinese Literature (CHINLIT), Japanese General Studies (JAPANGEN), Japanese Literature (JAPANLIT), and Korean Studies (KORGEN).

OTHER COGNATE COURSES

ANTHSCI 7. Marriage and Kinship
4-5 units, Spr (Wolf, A)

ANTHSCI 128B/228B. Globalization and Japan—(Same as CASA 128B.)
3-5 units, Spr (Befu, H)

ANTHSCI 203. Topics in the Anthropology of China and Taiwan
3-5 units, not given this year

ANTHSCI 210. Examining Ethnographies
5 units, Aut (Wolf, A)

ARTHIST 2. Asian Art and Culture
5 units, Win (Vinograd, R)

ARTHIST 182/382. Arts of China, 900-1500: Cultures in Competition
4 units, Aut (Vinograd, R)

ARTHIST 281A. Making Art History in Republican China
5 units, Aut (Vinograd, R)

ARTHIST 287A. The Japanese Tea Ceremony: The History, Aesthetics, and Politics Behind a National Pastime
5 units, Win (Staff)

CASA 77/277. Japanese Society and Culture
5 units, not given this year

CASA 82/282. Medical Anthropology
4-5 units, Spr (Kohrman, M)

CASA 113/213. Women in Islam: The Central Asian Case
5 units, Win (Kunanbaeva, A)

CASA 120/220. Archaeology of Early China
5 units, Aut (Reinhart, K)

CASA 171. Mythology, Folklore, and Oral Literature of Central Asia
3-5 units, Spr (Kunanbaeva, A)

CASA 173/273. Nomads of Eurasia
4-5 units, not given this year

ECON 113. Technology and Economic Change
5 units, Aut (Moser, P)

ECON 124. Contemporary Japanese Economy
5 units, Win (Staff)

EDUC 306B. Politics, Policy Making, and Schooling Around the World
3-4 units, Spr (Adams, J)

EDUC 309X. Educational Issues in Contemporary China
3-4 units, Spr (Adams, J)

EE 402T. Entrepreneurship in Asian High Tech Industries
1 unit, Spr (Dasher, R)

FILMSTUD 132/332. East Asian Cinema
4 units, Spr (Ma, J)

HISTORY 62N. The Atomic Bomb in Policy and History
4-5 units, Spr (Bernstein, B)

HISTORY 90Q. Buddhist Political and Social Theory
4-5 units, Aut (Mancall, M)

HISTORY 92A. The Historical Roots of Modern East Asia
5 units, Spr (Miller, L)

HISTORY 92N. Comparative Colonialism
5 units, Aut (Uchida, J)

HISTORY 92S. Lives of the Samurai
5 units, Aut (Goldsmith, B)

HISTORY 93S. Silk Road or Great Wall: Early Imperial China in Eurasia
5 units, Win (Staff)

HISTORY 103E. History of Nuclear Weapons—(Same as POLISCI 116.)
5 units, Spr (Holloway, D)

HISTORY 191. East Asia in the Early Buddhist Age
5 units, Win (Lewis, M)

HISTORY 194B. Japan in the Age of the Samurai
5 units, not given this year

HISTORY 195. Introduction to Korean History and Culture
5 units, not given this year

HISTORY 195C. Modern Japanese History
5 units, Win (Staff)

HISTORY 198. The History of Chinese Modernity
5 units, Aut (Mullaney, T)

HISTORY 205/309F. Historical Geography: Maps in the Early Modern World
5 units, not given this year

HISTORY 256/356. U.S.-China Relations: From the Opium War to Tiananmen
5 units, Win (Chang, G)

HISTORY 291A/391A. Archaeology and Modernity in Asia: The Excavation of Ancient Civilizations in Modern Times
5 units, Spr (Mullaney, T)

HISTORY 291E/391E. Maps, Borders, and Conflict in East Asia
5 units, not given this year

HISTORY 292D/392D. Japan in Asia, Asia in Japan
5 units, Spr (Uchida, J)

HISTORY 293J. Korean History and Culture through Film
5 units, not given this year

- HISTORY 295J/395J. Chinese Women's History**
5 units, not given this year
- HISTORY 297E/397E. Meiji Japan**
5 units, Win (Staff)
- HISTORY 299X/399A. Design and Methodology for International Field Research**
1 unit, Spr (Kollmann, N; Roberts, R)
- HISTORY 390. Han Chinese and the Global White: The Production of Ethnoracial Majorities, East and West**
5 units, Win (Mullaney, T)
- HISTORY 392C. Key Topics in Qing History**
5 units, not given this year
- HISTORY 394A. Directions in Asian Studies**
5 units, not given this year
- HISTORY 396D. Modern Japan**
5 units, Spr (Staff)
- HISTORY 492. Society in Ancient and Medieval China**
5 units, not given this year
- HISTORY 492B. Proseminar on Research in Early China: Origins of Technical Medicine in the Han Dynasty**
4-5 units, Spr (Lewis, M)
- HISTORY 494. The Body in Early China**
5 units, not given this year
- HISTORY 495A. Qing Legal Documents**
4-5 units, not given this year
- HISTORY 495B. Qing Legal Documents**
4-5 units, not given this year
- IPS 225. Japanese Politics and Political Economy**
5 units, Aut (Mcelwain, K)
- IPS 236. The Chinese Economy**
5 units, Spr (Lorentzen, P)
- INTNLREL 161A. Global Human Geography: Asia and Africa—**
(Same as HISTORY 106A.)
5 units, Aut (Lewis, M)
- LINGUIST 172/273. Structure of Korean—**(Same as KORGEN 172.)
3-4 units, Spr (Sells, P)
- MUSIC 13Q. Classical Music and Politics: Western Music in Modern China**
3 units, Spr (Cai, J)
- POLISCI 112/312. Japanese Foreign Policy**
5 units, not given this year
- POLISCI 140L. China in World Politics**
5 units, Spr (Miller, L)
- POLISCI 148/348. Chinese Politics: The Transformation and the Era of Reform**
5 units, Aut (Miller, L)
- POLISCI 148R. Chinese Politics**
5 units, not given this year
- POLISCI 148S. The U.S. and Asia During the Cold War**
5 units, Win (Miller, L)
- POLISCI 345R. Political Economy of Japan**
5 units, not given this year
- RELIGST 6N. The Life of the Buddha**
3 units, Win (Zimmermann, M)
- RELIGST 18. Introduction to Zen Buddhism**
4 units, Spr (Bielefeldt, C)
- RELIGST 46. Introduction to Daoism**
4 units, Win (Staff)
- RELIGST 55. Introduction to Chinese Religions**
4 units, not given this year
- RELIGST 135. From Monastery to Boardroom: the Diamond Sutra and its History**
4 units, Aut (Harrison, P)
- RELIGST 150. Mahayana Buddhism in East Asia**
4 units, not given this year
- RELIGST 152. The Great Clarity Tradition in Early Medieval Daoism**
4 units, not given this year
- RELIGST 154. Buddhism Today: Responses to New Global Challenges**
4 units, not given this year
- RELIGST 210. Translating the *Daode Jing***
4 units, Win (Pregadio, F)
- RELIGST 212. *Chuang Tzu***
5 units, not given this year
- RELIGST 213. *Daode Jing***
4 units, not given this year
- RELIGST 217/317. Japanese Studies of Religion in China**
3 units, not given this year
- RELIGST 218/318. Buddhist Ethics: Nonviolence and Compassion**
4 units, not given this year
- RELIGST 228/328. Buddhist Sanskrit Texts on Ethics**
1-5 units, not given this year
- RELIGST 247. Chinese Buddhist Texts**
4 units, Win (Harrison, P)
- RELIGST 251/351. Readings in Indian Buddhist Texts**
1-5 units, Aut (Zimmermann, M)
- RELIGST 257. Readings in East Asian Religious Texts**
4 units, not given this year
- RELIGST 258. Japanese Buddhist Texts**
4 units, Win (Bielefeldt, C)
- RELIGST 308. Medieval Japanese Buddhism**
3-5 units, not given this year
- RELIGST 312. Buddhist Studies Proseminar**
1-5 units, Win (Zimmermann, M), Spr (Bielefeldt, C)
- RELIGST 358. Readings in Daoist Texts**
4 units, Spr (Pregadio, F)
- RELIGST 370. Comparative Religious Ethics**
4 units, not given this year
- SOC 111/211. State and Society in Korea**
5 units, Win (Shin, G)
- SOC 117A/217A. China Under Mao**
5 units, Spr (Walder, A)
- SOC 167A/267A. Asia-Pacific Transformation**
5 units, not given this year

ECONOMICS

Emeriti: (Professors) Takeshi Amemiya, Masahiko Aoki, Kenneth J. Arrow, Paul A. David, Victor R. Fuchs, John G. Gurley, Donald Harris, Bert G. Hickman, Lawrence J. Lau, Ronald I. McKinnon, Roger G. Noll, Nathan Rosenberg, Thomas Sargent, David A. Starrett, Joseph E. Stiglitz

Honorary Emeritus (Professor): Anne O. Krueger

Chair: Timothy F. Bresnahan

Professors: B. Douglas Bernheim, Michael J. Boskin, Timothy F. Bresnahan, Lawrence Goulder, Avner Greif, Robert E. Hall, Peter J. Hammond, Han Hong, Matthew O. Jackson, Peter Klenow, Mordecai Kurz, Thomas E. MaCurdy, Paul R. Milgrom, John H. Pencavel, Ilya Segal, John B. Shoven, Robert Staiger, John B. Taylor, Frank Wolak, Gavin Wright

Associate Professors: Jonathan Levin, Mark McClellan, Luigi Pistaferri

Assistant Professors: Ran Abramitzky, Manuel Amador, Nicholas A. Bloom, Giacomo DeGiorgi, Liran Einav, Doireann Fitzgerald, Peter Hansen, Nir Jaimovich, Seema Jayachandran, Jakub Kastl, Aprajit Mahajan, Petra Moser, Muriel Niederle, Michele Tertilt

Senior Lecturer: Geoffrey Rothwell

Lecturers: Doru Cojoc, Gregory Rosston, Derek Stimel

Courtesy Professors: David Baron, Jay Bhattacharya, John Ferejohn, Alan Garber, Ilan Guttman, Kenneth Judd, David Kreps, Rosamond Naylor, Bruce Owen, A. Mitchell Polinsky, Peter C. Reiss, D. John Roberts, James Strnad, Barry Weingast, Robert Wilson

Visiting Professors: Ove Granstrand, Jurgen Schroeder, T.N. Srinivasan

Acting Instructors: Alex Gould, Derek Gurney, Erik Snowberg, Mark Tendall

Mail Code: 94305-6072

Phone: (650) 725-3266

Web Site: <http://www-econ.stanford.edu/>

Courses given in Economics have the subject code ECON. For a complete list of subject codes, see Appendix B.

The department's purpose is to acquaint students with the economic aspects of modern society, to familiarize them with techniques for the analysis of contemporary economic problems, and to develop in them an ability to exercise judgment in evaluating public policy. There is training for the general student as well as for those who plan careers as economists in civil service, private enterprise, teaching, or research.

The undergraduate program provides an excellent background for those going on to graduate work in the professional schools (for example, business and law) and may also be structured to prepare students for a Ph.D. program in economics. The department's curriculum is an integral part of Stanford's programs in International Relations, Public Policy, and Urban Studies.

The primary objective of the graduate program is to educate students as research economists. In the process, students also acquire the background and skills necessary for careers as university teachers and as practitioners of economics. The curriculum includes a comprehensive treatment of modern theory and empirical techniques. Currently, 20 to 25 students are admitted each year.

The faculty represent a wide spectrum of interests and conduct research on a broad range of topics. Most fields of economics are covered, including behavioral economics, comparative institutional analysis, econometrics, economic development, economic history, experimental economics, industrial organization, international trade, labor, macro- and microeconomic theory, mathematical economics, and public finance.

UNDERGRADUATE PROGRAMS BACHELOR OF ARTS

The total number of units required for the major is 80. Students are encouraged to complete the core courses 1-5 below, as early as possible. Ideally, students should complete the core during the sophomore year, before taking upper division courses. Courses may not be taken before

the prerequisites are completed. The required number of field courses is four. There is great flexibility in the choice of electives, including upper-division math and statistics.

Of the 80 units required for the major, at least 55 must be taken at Stanford in California. Students cannot declare Economics as their major or minor until they have completed ECON 50 with a grade of 'B' or better.

REQUIREMENTS FOR THE ECONOMICS MAJOR (80 UNITS)

1. ECON 1A,B (10 units): elementary economics.
2. ECON 102A (5 units): introduction to statistical methods. It is recommended that students satisfy this basic statistics requirement before proceeding with the rest of the program. Prerequisite: MATH 41 or equivalent.
3. ECON 50 (5 units, grade of 'B' or better): basic price theory. Prerequisites: ECON 1A or 1, and MATH 51 (letter grade required).
4. ECON 51 and 52 (10 units): intermediate micro- and macroeconomics. Prerequisites: ECON 50 and 1A for 51; 1B for 52.
5. ECON 102B (5 units): econometrics. Prerequisites: ECON 50 and 102A. Material in ECON 102B is used in a number of field courses. Students are strongly advised to design their program of study so that ECON 102B is not taken in their senior year but early in their program.

Field Courses (must be taken at Stanford in California; 20 units)—Four courses must be chosen from among ECON 111, 118, 121, 126, 140,* 141, 145, 149, 150, 154, 157, 160, 165 (5 units each).

Writing in the Major Course (5 units)—This requirement is fulfilled by ECON 101. This course should be taken only after completing ECON 51 and 52, 102B, and at least two field courses.

Electives (20 units)—Choose from Economics courses numbered from 100 through 198, excluding 190 and 191. Up to 10 units may be satisfied by MATH 113, 114, 115, 136, 151, 171, 175; or STATS 200, 206, 207, 217, 218, 237.

A maximum of 10 units of transfer credit or of ECON 139D, Directed Reading, may be taken under this section. Suitable transfer credit must be approved in writing by the Associate Director of Undergraduate Studies. Advanced undergraduate majors with strong quantitative preparation may enroll in graduate (200-level) courses with permission of the Director of Undergraduate Studies and the course instructor. Some courses offered by Overseas Studies may be counted towards this requirement. The department does not give credit for internships.

* Students may not count units from both ECON 135 and 140 towards their major as the courses are too similar in content.

OTHER REQUIREMENTS

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit, and 55 of the 80 units required for the major must be taken at Stanford in California.

Advanced placement credit cannot be used to skip ECON 1A,B. Students who PLAN to declare Economics as a major or a minor can petition to the Director of Undergraduate Studies to waive the ECON 1A,B requirement for graduation and for prerequisites to other Economics courses.

A grade point average (GPA) of 2.0 (C) or better must be received for all units applied toward the preceding requirements.

To use transfer credit in partial satisfaction of the requirements, the student must obtain written consent from the department's Associate Director of Undergraduate Study, who establishes the amount of credit to be granted toward the department requirements (see the *Information Book for Economics Majors*). Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics major.

Course prerequisites are enforced. Students taking courses to satisfy prerequisites in another department or institution must petition for transfer credit approval in order to satisfy course prerequisites.

The time limit for satisfactory completion of a course is one year from the date an "incomplete" is given, although instructors may set a shorter time limit. Students are responsible for seeing that all grades of incomplete are cleared within the time limit.

SAMPLE PROGRAMS

Sample listings of upper-division economics electives may be examined in the department's *Information Book for Economics Majors*, available in the Economics Building, room 136. Sample programs are provided for the following areas of emphasis: (1) liberal arts, (2) pre-business, (3) quantitative, (4) international, (5) political economy and regulation, and (6) preparation for graduate school in economics.

MINORS (35 UNITS)

The minor in Economics has two main goals. The first is to acquaint students with the rudiments of micro- and macroeconomic theory that are required of all majors. The second is to allow students to build basic competence in the application of this theory to two fields of economics of their choosing, and the opportunity to specialize further in any one of these fields by taking one additional advanced course in the Department of Economics.

COURSE WORK

1. ECON 1A,B (formerly ECON 1) (10 units): principles of economics.
2. ECON 50 (5 units, grade of 'B'): basic price theory. Prerequisites: ECON 1A or 1, and MATH 51.
3. ECON 51 and 52 (10 units): intermediate micro- and macroeconomics. Prerequisite: ECON 50.
4. Two field courses (must be taken at Stanford in California; 10 units) may be chosen from the following list: ECON 102A, 102B, 111, 118, 121, 126, 140,* 141, 145, 149, 150, 154, 157, 160, 165.

* Students may not count units from both ECON 135 and 140 towards their minor as the courses are too similar in content.

OTHER REQUIREMENTS

If the candidate's major requires basic Economics courses (items 1 through 3), then only half of the units from those courses apply toward the economics minor. To attain the overall 35 units required by the minor, the student must take additional Economics courses under items 4 and 5.

At least 20 out of the 35 units for the minor must be taken at Stanford. Students must have completed all Stanford prerequisites for approved transfer credit courses in order to use those courses towards the Economics minor.

No courses receiving Department of Economics credit under the preceding requirements may be taken credit/no credit. A grade point average (GPA) of 2.0 or better must be received for all units applied toward the minor.

Students must complete their declaration of the minor no later than the last day of the preceding quarter before their degree conferral.

HONORS PROGRAM

The honors program offers an opportunity for independent research, creativity, and achievement. It is designed to encourage a more intensive study of economics than is required for the normal major, with course and research work of exceptional quality. Honors students may participate in an Honors Research Symposium during Spring Quarter, with those nominated for prizes making oral presentations. The honors program requires:

1. Completing all requirements for the major.
2. Achieving a grade point average (GPA) of at least 3.5 for the 80 units required of the Economics major. See details in the *Information Book for Economics Majors*.
3. Complete ECON 102B and at least two lecture courses most relevant for the proposed topic of the honors thesis by the end of the junior year. (These can be included in the basic 80 units.)
4. Candidates must write an honors thesis in their senior year for at least one unit and up to 10 units of credit (ECON 199D). The thesis must be of very high quality and written under the direction of a member of the department or its affiliated faculty. Units of 199D do not count toward the course work requirements for the basic economics major, or in the computation of the GPA requirement for honors. Students who take ECON 199D for 10 units may apply 5 of those units to meet the Writing in the Major (WIM) requirement. Such students complete the major with at least 85 units overall.

Juniors interested in the honors program should attend an informational meeting scheduled by the honors program director during the first week of each quarter. At this meeting, students receive information on organizing an honors project and are given details on honors programs. Prospective candidates for the honors program should submit an application to the director no later than the end of the first month of the third quarter before graduation (typically Autumn Quarter of the senior year). Also required, later in the same quarter, is a three-page thesis proposal that must be approved by the thesis adviser.

GRADUATE PROGRAMS

Graduate programs in economics are designed to ensure that students receive a thorough grounding in the methodology of theoretical and empirical economics, while at the same time providing specialized training in a wide variety of subfields and a broad understanding of associated institutional structures. Toward these ends, the program is arranged so that the student has little choice in the curriculum at the outset but considerable latitude later on.

Students admitted to graduate standing in the department are expected to have a strong background in college-level economics, mathematics, and statistics. Preparation ordinarily consists of a college major in economics, a year-long calculus sequence that includes multivariate analysis, a course in linear algebra, and a rigorous course in probability and statistics.

MASTER OF ARTS

University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin.

The department does not admit students who plan to terminate their graduate study with the M.A. degree. Students may (but need not) elect this degree in preparation for the Ph.D. degree. A master's option is also available to Ph.D. candidates from other departments.

Admission—Prospective students must have completed the Stanford requirements for a B.A. in Economics or approximately equivalent training. Since students are required to take some of the same courses as Ph.D. candidates, similar preparation in mathematics and statistics generally is expected. Prospective applicants should submit their credentials together with a plan of study to the Director of Graduate Study for approval.

Requirements—A master's program must satisfy these criteria:

1. Completing, at Stanford, at least 45 units of credit beyond those required for the bachelor's degree, of which at least 40 units must be in the Department of Economics. Students must complete ECON 202 and at least three other 200-level courses. They must receive a grade of 'B-' or better in ECON 202. Undergraduate courses must be numbered 105 or higher. No seminar courses numbered 300 or above can be counted.
2. Demonstrating competence in empirical methodology by receiving a grade of 'B-' or better in both ECON 270 and 271, or by receiving a grade of 'B-' or above in each of ECON 102A, B, and C.
3. Submitting two term papers (or a thesis of sufficient quality). At least one of these papers must be deemed to represent graduate-level work. Normally, this means that it is written in connection with a 200-level course. A maximum of 10 units of credit can be earned for a thesis toward the 45-unit degree requirement.
4. A grade point average (GPA) of 3.0 must be maintained for all master's level work. All courses must be taken for a letter grade.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

Admitted students must be adequately prepared in calculus, linear algebra, and statistics (see above). When deemed appropriate, a student may be required to complete the necessary background preparation at Stanford. All students take a common core curriculum at the outset and later branch out into the desired fields of specialization. Well-prepared students should anticipate spending, with some overlap, approximately two years in course work and another two years in seminars, independent

study, and dissertation research. The goal is to complete the program in four years, although some types of research programs may require at least five years to complete. The department has a strong commitment to guiding students through the program expeditiously.

Questions and petitions concerning the program and the admissions process should be addressed to the Director of Graduate Study, who has responsibility for administering the graduate program.

Specific requirements are best discussed in two stages, the first consisting of requirements for admission to candidacy and the second involving further requirements for earning the degree.

Admission to Candidacy for Ph.D. — A student may apply for admission to candidacy when the following minimal requirements are met:

1. Successful results on comprehensive examinations in core economics (the examinations based on material from ECON 202, 203, 204; and 210, 211, 212), and econometrics (the examination based on material from ECON 270, 271, 272).
2. Completing the requirements in two additional fields of specialization from the list below or, if approved in advance by the Director of Graduate Study, in one such field together with a substantial amount of work toward a second field taught in a related department. Advanced fields include econometrics, economic development, economic history, industrial organization, international economics, labor economics, microeconomic theory, monetary theory and advanced macroeconomics, and public finance.

Each field listed above can be satisfied by completing two courses, although students in some fields may be advised to add a third course, which can then be counted toward the distribution requirement discussed later. All courses (or comprehensive exams, when offered) must be passed with a grade ‘B’ or better.

3. Completing a candidacy paper, normally written in conjunction with one of the special fields selected above.

It is expected that the student will meet, and indeed exceed, the above standard by the beginning of the third year of residency. When this is not possible for any reason, the Director of Graduate Study should be consulted as early as possible during the second year. Once it is deemed that the above standards have been met, the student should complete the Application for Candidacy for Degree of Doctor of Philosophy. After approval, candidacy remains valid for five years (although it can be terminated earlier by the department if progress is deficient); it can be renewed or extended beyond this period only under unusual circumstances.

Further Requirements for the Ph.D. Degree —

1. *Distribution Requirement:* Students must complete four other graduate-level courses meeting the following requirements:
 - a) at least one course from the area of economic history, unless history is one of the two fields of specialization.
 - b) courses in at least two fields other than the two fields of specialization. Distribution courses cannot be crosslisted in those fields.
 - c) with advance approval of the Director of Graduate Study, some of these distribution courses may be drawn from related fields taught in other departments. However, including courses taken to meet either the specialization or distribution requirements, no more than two courses in total may be taken outside the Economics department.
2. *Teaching Experience:* each student must serve as a teaching assistant for at least one quarter. It is strongly recommended that this requirement be satisfied before the final year of residence.
3. *Seminar Participation:* each student is expected to participate in at least two all-year research seminars by the end of the fourth year of residence. Normally, participation in a seminar requires one or more oral presentations and the submission of a research paper (which, however, need not be completely separate from dissertation research).
4. *Ph.D. Dissertation:* the process involves selecting a topic, choosing an appropriate adviser, submitting a prospectus (signed by the adviser) outlining the proposed research, selecting a three-member reading committee (usually all from the Department of Economics, although exceptions can be made under certain circumstances), passing the University oral examination at which these three faculty (and two other

members of the Academic Council) ask questions about the completed research, and submitting a final draft of the work signed by all members of the reading committee. The student is advised to initiate this process as early as possible.

PH.D MINOR

To be recommended for the Ph.D. degree with Economics as a minor subject, a student must qualify in three fields of economics, at least one of which must be in the core economics sequence. The standard of achievement in these fields is the same for minor as for major candidates, including the department’s comprehensive examinations where appropriate.

JOINT DEGREE PROGRAMS WITH THE SCHOOL OF LAW

The Department of Economics and the School of Law offer a joint program leading to the Ph.D. in Economics and the J.D. degree in Law. See the Stanford University bulletin *Law School* for descriptions of its participation in the joint program.

To qualify, the student’s program objectives must clearly justify such a joint program. Decisions are made by the Director of Graduate Study. A student’s program in economics must satisfy the same standards as a Ph.D. degree in Economics taken with a minor in Law. It is expected that dissertation research will cross department lines and that members of the dissertation committee will be drawn from both faculties.

Students normally spend the first year full time either in Economics or in Law and the second year full-time in the other department. After the second year, courses in economics and law may be pursued simultaneously.

Other joint programs may be arranged; for example, the Ph.D. in Economics combined with one or two years of study in the School of Law, leading either to the nonprofessional Master of Legal Studies (M.L.S.) degree or the nonprofessional Master of Jurisprudence (J.M.). See the bulletin *Law School* for the requirements. Conversely, a student taking the J.D. in the School of Law may apply for an M.A. in Economics.

FELLOWSHIPS AND ASSISTANTSHIPS

The department awards a number of fellowships for graduate study. Many first-year and a few second- or third-year students are awarded full fellowships, including a stipend and tuition. All students whose records justify continuation in the program may be assured support for the second through fourth years in the form of employment as a teaching or research assistant. These half-time appointments provide a stipend and tuition allowance. Entering students are not normally eligible for research or teaching assistantships.

Applications should be submitted before January 1 to the department admissions committee.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

ECON 1A. Introductory Economics A — The economic way of thinking and the functioning of a market economy. The behavior of consumers and firms, markets for goods and inputs, and principles of international exchange. Applications and policy issues in economics. GER:DB-SocSci 5 units, Aut (Clerici-Arias, M), Win (Wright, G)

ECON 1B. Introductory Economics B — Aggregate economic relationships, including output, employment, inflation, interest rates, and exchange rates. Short-run fluctuations and long-run growth. Issues in monetary and fiscal policy. GER:DB-SocSci 5 units, Win, Spr (Johnson, P)

ECON 11N. Understanding the Welfare System — Stanford Introductory Seminar. Preference to freshmen. Welfare reform legislation and the devolution revolution. The transfer of responsibility for antipoverty programs to the states. How recent reforms change the welfare system and who is likely to be affected. Food stamps, AFDC, TANF, SSI, and Medicaid. Income transfer programs such as earned income tax credit and income taxes, and labor market regulations such as minimum wages and

overtime rules. Economic principles to understand the effectiveness of these programs and their consequences on the behavior of families. Pre- or corequisite: ECON 1. Recommended: basic understanding of labor markets, taxes, and transfers.

2 units, Aut (*MaCurdy, T*)

ECON 17N. Diagnosing the California Electricity Crisis—Did California's deregulation plan cause the crisis? How was the plan flawed? What was the role of federal regulators? What were the conditions in the California electricity supply industry that allowed such an economic disaster? What was the impact of political factors? What can be done to prevent another such crisis? Methods include quantitative economic analysis and qualitative political economy.

2 units, not given this year

ECON 50. Economic Analysis I—Individual consumer and firm behavior under perfect competition. The role of markets and prices in a decentralized economy. Monopoly in partial equilibrium. Economic tools developed from multivariable calculus using partial differentiation and techniques for constrained and unconstrained optimization. Prerequisites: 1 or 1A and MATH 51. GER:DB-Math

5 units, Aut (*Abramitzky, R*), Spr (*Tendall, M*)

ECON 51. Economic Analysis II—Neoclassical analysis of general equilibrium, welfare economics, imperfect competition, externalities and public goods, intertemporal choice and asset markets, risk and uncertainty, game theory, adverse selection, and moral hazard. Multivariable calculus is used. Prerequisite: 50.

5 units, Win (*Einav, L*), Sum (*Staff*)

ECON 52. Economic Analysis III—Growth and fluctuations in the economic system as a whole. National income accounts and aggregate relationships among stocks and flows in markets for goods, labor, and financial assets. Economic growth, inflation, and unemployment. The role of macroeconomic policies in the short and long run. Prerequisite: 50.

5 units, Aut (*Leeson, R*), Spr (*Klenow, P*), Sum (*Staff*)

ECON 90. Introduction to Financial Accounting—(Graduate students register for 190.) How to read, understand, and use corporate financial statements. Oriented towards the use of financial accounting information (rather than the preparer), and emphasizes the reconstruction of economic events from published accounting reports.

5 units, Aut (*Beyer, A*), Win (*Stanton, F*)

ECON 91. Introduction to Cost Accounting—(Graduate students register for 191.) The use of internal financial data for managerial decision making.

5 units, Spr (*Stanton, F*)

ECON 93Q. Global Capital Markets—Stanford Introductory Seminar. Preference to sophomores. Focus is on the operation of stock markets in the U.S.: the New York and American stock exchanges, and the over-the-counter NASDAQ market, on which high-tech companies are traded. Financial institutions in the U.S. (stock markets, mutual funds) and how they relate to international markets. Inflation, interest-rate trends, U.S. government agencies, and the impact of the Federal Reserve Bank on capital markets and capital flows. Macroeconomic factors that drive capital flows.

3 units, Win (*Marotta, G*)

ECON 101. Economic Policy Analysis—Economic policy analysis, writing, and oral presentation. Topics vary with instructor. Limited enrollment. Prerequisites: 51 and 52, 102B, and two field courses. Some sections require additional prerequisites. WIM

5 units, Aut (*Cojoc, D*; *Greif, A*), Win (*Cojoc, D*; *Gould, A*; *Rothwell, G*), Spr (*Clerici-Arias, M*; *Galetovic, A*; *Gurney, D*; *Hanson, W*)

ECON 102A. Introduction to Statistical Methods (Postcalculus) for Social Scientists—Description and examples of the use of statistical techniques relevant to economics. Basic rules of probability, conditional probability, discrete and continuous probability distributions. Point estimation, tests of hypotheses, confidence intervals, and linear regression model. Prerequisite: MATH 41 or equivalent. GER:DB-Math

5 units, Aut (*Tendall, M*), Win (*Gurney, D*)

ECON 102B. Introduction to Econometrics—Descriptive statistics. Regression analysis. Hypothesis testing. Analysis of variance. Heteroskedasticity, serial correlation, errors in variables, simultaneous equations. Prerequisites: 50, 102A or equivalent. Recommended: computer experience.

5 units, Win (*Mahajan, A*), Spr (*Johnson, P*)

ECON 102C. Advanced Topics in Econometrics—Identification and estimation of the effect of human capital variables on earnings (e.g., the return to education, tenure), and identification and estimation of labor supply models, focusing on microeconomic data. Topics: instrumental variable estimation, limited dependent variable models (probit, logit, and tobit models), and panel data techniques (fixed effect and random effect models, dynamic panel data models).

5 units, Spr (*Pistaferrri, L*)

ECON 103. Applied Econometrics—The construction and use of econometric models for analyzing economic phenomena. Students complete individual projects and core material. Topics vary with the instructor. Limited enrollment. Prerequisites: 52, 102B.

5 units, Win (*Bloom, N*)

ECON 106. World Food Economy—The interrelationships among food, populations, resources, and economic development. The role of agricultural and rural development in achieving economic and social progress in low-income nations. Emphasis is on the public sector decision making as it relates to food policy.

5 units, Win (*Falcon, W*; *Naylor R*)

ECON 111. Money and Banking—Money, interest rates, banks and other financial institutions at both micro and macro levels. Micro: alternative financial instruments, the determination of interest rates, the yield curve, and the role of banks and other capital market institutions in the intermediation process. Supply of money, regulation, and supervision. Macro: the choice of monetary policy by the central bank, the impact of monetary policy making institutions on this choice and the various channels through which monetary policy affects inflation and real variables in the economy. Emphasis is on the institutional structure of Federal Reserve System and the conduct of monetary policy in the U.S. Prerequisites: 50, 52.

5 units, Aut (*Gould, A*), Sum (*Staff*)

ECON 113. Technology and Economic Change—Economic causes and consequences of technological change. Historical experience of advanced industrial countries and more recent experience of less developed economies. Topics: origins of modern industry in the U.S. and Europe; technology and the growth of large-scale organizations; late-comers to industrialization such as Japan and newly industrializing countries; economic growth and slowdown in mature industrial countries; and present concerns and future prospects such as the influence of technology on employment, civilian spillover from military R&D, and coping with rapid technological change. Prerequisites: 51, 52, 102B.

5 units, Aut (*Moser, P*)

ECON 114. Economy and Economics of Ancient Greece—Introduction to the history of Greek civilization from the Mycenaean period to the 4th century B.C. The formalist-substantivist controversy: what behavioral assumptions should be made in order to understand the working of the Athenian economy. The economics and ethical thoughts of Plato and Aristotle in contrast to utilitarianism, which became a foundation of modern economics. Prerequisite: 1. GER:EC-GlobalCom

5 units, not given this year

ECON 115. European Economic History—Economic changes and growth in W. Europe from antiquity to the present. The transformation of Europe from an economically and culturally backward part of the world to the center of the world economy pre-WWI. Topics: the role of technics and sciences, variations of the extent of market activities, institutional changes, international politics, demography. GER:DB-SocSci

5 units, Win (*Chaudhary, L*)

ECON 116. American Economic History—From colonial times to the present. The application of economic analysis to historical issues, and the role of historical context in economics. Topics: American economic growth in international perspective; the economics of slavery and regional divergence; the origins and consequence of the American system of technology and business organization; recent U.S. economic performance in historical perspective. Prerequisite: 1. GER:DB-SocSci, EC-AmerCul
5 units, Spr (Wright, G)

ECON 117. Economic History and Modernization of the Islamic Middle East—From the rise of Islam to the present. Transformation of region from economically advanced to underdeveloped. Role of religion in economic successes and failures. Current obstacles to development. Topics: Islamic economic institutions; innovation and change; political economy of modernization; interactions with other regions; and economic consequences of Islamism.
5 units, not given this year

ECON 118. Development Economics—The economic problems and policy concerns of developing countries. Theories of growth and development; inequality and poverty; credit and labor markets; population growth and fertility choice; migration; sustainable development and globalization. Emphasis on economic models rather than case studies. Prerequisites: 50, 52, 102B. GER:EC-GlobalCom
5 units, Aut (Jayachandran, S)

ECON 120. Socialist Economies in Transition—Privatization, restructuring, and institutional change in E. Europe and the former Soviet Union. Analysis of property rights, corporate governance, incentives, and resource allocation in socialist and transitional economies. Emphasis is on liberalization and privatization policies (including mass and voucher programs) as the primary instruments to induce changes in behavior. Prerequisite: 50. Recommended: 51.
5 units, Win (Gathmann, C)

ECON 121. Development Economics, with Special Reference to East Asia—Macroeconomic aspects of economic development: structural transformation, resource utilization, mobilization, and allocation; the sources of economic growth; intersectoral transfers; the role of the external sector; money and finance in development; stabilization in closed and open economies; strategies for economic development; intangible capital; and endogenous technical progress. Illustrations from the economic development of E. Asia, including Japan, China, Hong Kong, S. Korea, Singapore, Taiwan, Indonesia, Malaysia, Philippines, Thailand. Prerequisite: 52. GER:EC-GlobalCom
5 units, not given this year

ECON 122. Economic Development of Latin America—The debt crisis in the early 80s. Trade liberalization and inflation stabilization experiences in the late 80s. Microeconomic structural reform efforts including privatization and regulation in the 90s. Recent financial and institutional reforms and future challenges.
5 units, Spr (Gil, F)

ECON 123. Regulation and Competition in Latin America—The economics and workings of public intervention and control of markets in Latin America. Topics: natural monopoly regulation; institutions and regulatory commitment; infrastructure concessions; regulation and competition in network industries such as telecoms and electricity; liberalization of markets and competition policy; and antitrust with a weak judiciary.
5 units, Win (Galetovic, A)

ECON 124. Contemporary Japanese Economy—Comparative and historical perspective. Micro and institutional aspects, such as firms, the employment system, corporate governance and financial institutions, and the macro economy. Elementary applications of macro- and microeconomics. Prerequisite: 50. GER:EC-GlobalCom
5 units, Aut (Staff)

ECON 126. Economics of Health and Medical Care—(Same as BIOMEDIN 156/256.) Graduate students with research interests should take ECON 248. Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: institutions in the health sector; measurement and valuation of health; nonmedical determinants of health; medical technology and technology assessment; demand for medical care and medical insurance; physicians, hospitals, and managed care; international comparisons. Prerequisite: ECON 50 and ECON 102A or equivalent statistics, or consent of instructor. Recommended: ECON 51.
5 units, Aut (Bhattacharya, J)

ECON 135. Finance I for Non-MBAs—(Same as FINANCE 221, MS&E 245G.) For graduate students and advanced undergraduates. The foundations of finance; applications in corporate finance and investment management. Financial decisions made by corporate managers and investors with focus on process valuation. Topics include criteria for investment decisions, valuation of financial assets and liabilities, relationships between risk and return, market efficiency, and the valuation of derivative securities. Major corporate financial instruments including debt, equity, and convertible securities. Equivalent to core MBA finance course, FINANCE 220. Prerequisites: 51, or ENGR 60, or equivalent; ability to use spreadsheets, and basic probability and statistics concepts including random variables, expected value, variance, covariance, and simple estimation and regression.
4 units, Win (Admati, A)

ECON 136. Auctions and Market Design—Competitive bidding for asset purchases and procurement of industrial needs; bidder entry decisions; design of mechanisms for complicated resource allocation problems. Prerequisites: 51, 160.
5 units, not given this year

ECON 137. Information and Incentives—Incentives in situations where one part has more information than another. A part may have better information about things that it controls (moral hazard), or about things that are outside of its control (adverse selection). The general structure of incentive problems and the design of contracts and institutions to deal with such problems. Applications: executive and employee compensation, sharecropping, financial contracts and credit rationing, insurance, markets with unobservable quality, monopolistic price discrimination, regulation of natural monopolies, income taxation and redistribution, the provision of public goods, and auctions.
5 units, Spr (Lara, Y)

ECON 138. Risk and Insurance—Nature of economic risk and its effect on allocation of resources. Preferences among risky prospects: expected utility theory and the theory of risk aversion. Subjective versus objective probabilities. Market allocation of risk and the role of insurance markets under complete information. Insurance under asymmetric information, moral hazard, and adverse selection. Can insurance markets function well in a competitive equilibrium? Role of asset markets in allocating risk. How some risks corporations face are associated with price fluctuations and can be hedged in financial markets. How to set up hedging strategies using futures markets. Hedging strategies using options and other derivative assets. Hedging credit risks. Prerequisites: 51, 102A.
5 units, not given this year

ECON 139D. Directed Reading
1-10 units, Aut, Win, Spr, Sum (Staff)

ECON 140. Introduction to Financial Economics—Modern portfolio theory and corporate finance. Topics: properties of various financial instruments including financial futures, mutual funds, the capital asset pricing model, and models for pricing options and other contingent claims. Prerequisites: 51, 102A.
5 units, Win (Kurz, M), Spr (Shoven, J), Sum (Gould, A)

ECON 141. Public Finance and Fiscal Policy—What role should and does government play in the economy? What are the effects of government expenditure, borrowing, and taxation? Policy topics: budget surpluses/deficits; tax reform; social security, public goods, and externalities; fiscal federalism; public investment; and cost-benefit analysis. Prerequisites: 51, 52.
5 units, Aut (Boskin, M), Spr (Cojoc, D)

ECON 142. Political Economics—Formal theories of collective choice and political institutions. Topics include social choice, the interaction between public institutions and the economy, the effects of lobbying and interest groups on politics, the role of information in determining legislative structure, and elections as a mechanism for controlling versus selecting politicians. Topics that may be covered include the role of political institutions in developing nations and campaign finance reform in the U.S. Prerequisites: ECON 51, MATH 51.

5 units, Spr (Snowberg, E; Daley, B)

ECON 143. Ethics in Economics Policy—Ethical decision theory from an economist's viewpoint. Formulating objectives for economic policy. The role of markets in an economic system. Concepts of equity, efficiency, and rights. Measuring economic performance. The benefits and costs of market liberalization. Prerequisites: 50, 51, and 102A.

5 units, Aut (Hammond, P)

ECON 145. Labor Economics—Analysis and description of labor markets. Determination of employment, unemployment, hours of work, wages. Welfare programs and work effort. Wage differentials by schooling, experience, gender, and race. Economics of discrimination. Earnings inequality and changes in inequality. Employment contracts, labor unions, and bargaining. International comparisons. Prerequisites: 50, 51, 102B. GER:EC-Gender

5 units, Win (Pencavel, J)

ECON 147. Economics of Human Resources—Investments in human capital including education, on-the-job training, government training, and health. The effects of human capital accumulation on wages and wage growth and on wage differentials by gender and race. Sample selections and experimental data. Poverty and inequality. Optional research project for public policy organization on labor market/human resources issues. Prerequisite: 51.

5 units, Spr (De Giorgi, G)

ECON 148. Urban Economics—The economics of urban areas. Costs and benefits of cities, city location, land rent and land use, suburbanization, zoning, poverty, housing and segregation, homelessness, local government finance, transportation, schools, and crime. Prerequisites: 50, 102A.

5 units, not given this year

ECON 149. Modern Firm in Theory and Practice—Theoretical and institutional analysis of modern corporate firms: industrial relational, motivational, financial, information structural, managerial, and legal. The role of various hybrid institutional forms between the market and the integrated firm: subcontracting, franchising, R&D cooperatives, and consortia. Practices in American, W. European, and Japanese firms. Prerequisite: 51.

5 units, not given this year

ECON 150. Economic Policy Analysis—(Same as PUBLPOL 104.) The relationship between microeconomic analysis and public policy making. How economic policy analysis is done and why political leaders regard it as useful but not definitive in making policy decisions. Economic rationales for policy interventions, methods of policy evaluation and the role of benefit-cost analysis, economic models of politics and their application to policy making, and the relationship of income distribution to policy choice. Theoretical foundations of policy making and analysis, and applications to program adoption and implementation. Prerequisites: ECON 51 and 102A.

5 units, Spr (Kessler, D)

ECON 153. Economics of the Internet—Applications of microeconomic theory to Internet businesses: auctions, online transactions, entry barriers, valuation, pricing of facilities, policy for broadband communications, network economics, standards, economics of information. Prerequisites: 51 and one of 102B, 103, 104, 113, 135, 137, 140, 149, 157, or 160.

5 units, Aut (Hanson, W)

ECON 154. Economics of Legal Rules and Institutions—(Same as PUBLPOL 106.) The design and consequences of legal rules. Common ideas that run through law including individual rationality, economic ef-

iciency, conventional and Coasian analyses of externalities, enforcement, costs, and market consequences of legal restrictions on contract terms. Private versus public enforcement of law; the tradeoff between certainty and severity of punishment; the choice between ex post and ex ante sanctions; and the choice between property and liability rules. Applications to property, intellectual property, contract, criminal, tort, family, and environmental law. Prerequisite: ECON 51.

5 units, Win (Owen, B)

ECON 155. Environmental Economics and Policy—(Same as EARTH-SYS 112.) Economic sources of environmental problems and alternative policies for dealing with them (technology standards, emissions taxes, and marketable pollution permits). Evaluation of policies addressing regional air pollution, global climate change, water allocation in the western U.S., and the use of renewable resources. Connections between population growth, economic output, environmental quality, and human welfare. Prerequisite: ECON 50. GER: DB-NatSci

5 units, Spr (Gurney, D)

ECON 157. Imperfect Competition—The interaction between firms and consumers in markets that fall outside the benchmark competitive model. How firms acquire and exploit market power. Game theory and information economics to analyze how firms interact strategically. Topics include monopoly, price discrimination, oligopoly, collusion and cartel behavior, anti-competitive practices, the role of information in markets, anti-trust policy, and e-commerce. Sources include theoretical models, real-world examples, and empirical papers. Prerequisite: 51.

5 units, Spr (Makler, C)

ECON 158. Antitrust and Regulation—The history, economics, and legal background of the institutions under which U.S. industry is subject to government control. Topics: antitrust law and economics; the economics and practice of public utility regulation in the communications, transportation, and energy sectors; and the effects of licensing. Emphasis is on the application of economic concepts in evaluating the performance and policies of government agencies. Prerequisite: 51.

5 units, Win (Rosston, G)

ECON 160. Game Theory and Economic Applications—Mathematical introduction to game theory and its applications to economics. Topics: strategic and extensive form games, Nash equilibrium, subgame-perfect equilibrium, Bayesian equilibrium, and perfect Bayesian equilibrium. The theory is applied to repeated games, auctions, and bargaining. Examples from economics and political science. Prerequisites: 51 and course in calculus, or consent of instructor.

5 units, Win (Hammond, P)

ECON 162. Monetary Economics—Dynamic analysis of the role of money and monetary policy in the macro economy, using calculus. Topics: the exchange process and the role of money; inside and outside money; inflation and the inflation tax; international monetary systems; the indeterminacy of floating exchange rates; policies to fix the exchange rate and inflationary incentives; currency crises and speculative attacks; money and interest-bearing government debt; the government's budget constraint and the coordination of monetary and fiscal policies; hyperinflation and stabilizations; the effect of the national debt on consumption, savings, investment and output; time consistency of government policies. Prerequisite: 52.

5 units, Aut (Leeson, R)

ECON 165. International Economics—Comparative advantage in production and trade among nations; trade policy; increasing returns, imperfect competition and trade; the international monetary mechanism; domestic monetary, fiscal, and exchange rate policies and their relationship to foreign trade; global financial crises and trade. Prerequisites: ECON 1A,B or 1, and 51, 52.

5 units, Aut (Fitzgerald, D), Win (Staiger, R), Sum (Staff)

ECON 167. European Monetary and Economic Integration—The economics of the European Community and the internal market. Analysis of current competition, transportation, and factor market policies, including the problems of agriculture and unemployment. Fiscal har-

monization and mercantilist rivalry. European Monetary Union (EMU): genesis, implementation, and consequences of a common currency and central bank. Foreign exchange and foreign trade. Prerequisites: 51, 52, or equivalents.

5 units, Win (Schroeder, J)

ECON 168. Path Dependence and Economic Analysis—Historically contingent change in the economy; theoretical and applied research on path-dependent phenomena and their implications for economic policy. Topics: self organization in economics; relationships between micro level irreversibilities, branching processes, positive feedback dynamics and the generation of emergent properties at the macroeconomic level; non convexities, lock-in to suboptimal equilibria, and the economics of QWERTY. Historical antecedents and modern formalizations of historical economics, applications of paradigmatic models of non-ergodic stochastic processes. Case studies. Research papers required. Prerequisites: two upper-level economics courses in applied fields. Limited enrollment.

5 units, not given this year

ECON 169. International Financial Markets and Monetary Institutions—(Graduate students register for 269.) How nations are linked financially through money, capital, and exchange markets, emphasizing policy issues including the role of the International Monetary Fund, monetary and exchange rate policy, prevention and resolution of financial crises in emerging markets, current account imbalances, and capital mobility. Development and use of macroeconomic models of international financial linkages and microeconomic models of hedging, optimal selection of currencies for invoice and trade credit, and parity relationships in futures, swaps, and options markets. Prerequisite: 165.

5 units, Spr (Taylor, J)

ECON 171. Intermediate Econometrics II—(Graduate students register for 271.) Linear regression model, relaxation of classical-regression assumptions, simultaneous equation models, linear time series analysis. Limited enrollment. Prerequisite: 270.

5 units, Aut (Hansen, P; Mahajan, A)

ECON 172. Intermediate Econometrics III—(Graduate students register for 272.) Continuation of 271. Nonlinear estimation, qualitative response models, limited dependent variable (Tobit) models. Limited enrollment. Prerequisite: 271.

2-5 units, Win (MaCurdy, T)

ECON 178. Neuroeconomics—(Graduate students register for 278; same as PSYCH 278.) Techniques from neuroscience and psychology to study how the brain makes economic decisions; implications for the social sciences, especially economics and political science. Topics include: brain processes related to reward, control, and attention; role of emotion in decision making; morality; emotion in social encounters; bargaining and strategic thinking; decision making and probability assessment in risky situations; intertemporal decision making; and addiction. Prerequisite: graduate background in neuroscience or economics, or consent of instructor.

5 units, not given this year

ECON 179. Experimental Economics—Methods and major subject areas that have been addressed by laboratory experiments. Focus is on a series of experiments that build on one another. Topics include decision making, two player games, auctions, and market institutions. How experiments are used to learn about preferences and behavior, trust, fairness, and learning. Final presentation of group projects. Prerequisites: 50, 51, 102A.

5 units, not given this year

ECON 181. Optimization and Economic Analysis—The development of optimization techniques, including calculus, linear and nonlinear programming, the calculus of variations, and control theory. Emphasis is on concepts and results rather than techniques and proofs. Examples: static and dynamic theories of the household and the firm, and problems in aggregative planning and control. Prerequisites: 51 and 102A, and MATH 51 or equivalent.

5 units, Aut (Lara, Y)

ECON 190. Introduction to Financial Accounting—(Same as 90; see 90.) 5 units, Aut (Beyer, A), Win (Stanton, F)

ECON 191. Introduction to Cost Accounting—(Same as 91; see 91.) 5 units, Spr (Stanton, F)

ECON 198. Junior Honors Seminar—(Same as PUBLPOL 197.) Primarily for students who expect to write an honors thesis. Weekly sessions discuss writing an honors thesis proposal (prospectus), submitting grant applications, and completing the honors thesis. Readings focus on writing skills and research design. Students select an adviser, outline a program of study for their senior year, and complete a prospectus by the end of the quarter. Seniors working on their theses also may enroll and present their research to the seminar participants. Seniors are required to make substantial progress on their thesis by the end of the quarter. Enrollment limited to 25.

5 units, Win, Spr (Rothwell, G)

ECON 199D. Honors Thesis Research—In-depth study of an appropriate question and completion of a thesis of very high quality. Normally written under the direction of a member of the Department of Economics (or some closely related department). See description of honors program. Register for at least 1 unit for at least one quarter. Meets first week of Autumn Quarter (see *Stanford Daily* for details).

1-10 units, Aut, Win, Spr, Sum (Rothwell, G)

PRIMARYLY FOR GRADUATE STUDENTS

ECON 239D. Directed Reading

1-10 units, Aut, Win, Spr, Sum (Staff)

ECON 299. Practical Training—Students obtain employment in a relevant research or industrial activity to enhance their professional experience consistent with their degree programs. At the start of the quarter, students must submit a one page statement showing the relevance of the employment to the degree program along with an offer letter. At the end of the quarter, a three page final report must be supplied documenting work done and relevance to degree program.

1-10 units, Aut, Win, Spr, Sum (Staff)

ECON 400. Ph.D. Dissertation

1-15 units, Aut, Win, Spr, Sum (Staff)

A. CORE ECONOMICS

ECON 202. Core Economics: Modules 1 and 2—(Non-Economics graduate students register for 202N.) Open to advanced undergraduates with consent of instructors. Theory of the consumer and the implications of constrained maximization; uses of indirect utility and expenditure functions; theory of the producer, profit maximization, and cost minimization; behavior under uncertainty; partial equilibrium analysis and introduction to models of general equilibrium. Limited enrollment. Prerequisite: thorough understanding of the elements of multivariate calculus and linear algebra.

2-5 units, Aut (Levin, J; Segal, I)

ECON 202N. 202 For Non-Economics Ph.D. Students—Core Economics modules 1 and 2 for non-Economics Ph.D. students.

2-5 units, not given this year

ECON 203. Core Economics: Modules 5 and 6—(Non-Economics graduate students register for 203N.) Non-cooperative game theory including normal and extensive forms, solution concepts, games with incomplete information, and repeated games. Externalities and public goods. The theory of imperfect competition: static Bertrand and Cournot competition, dynamic oligopoly, entry decisions, entry deterrence, strategic behavior to alter market conditions. Limited enrollment. Prerequisite: 202.

2-5 units, Win (Bernheim, D)

ECON 203N. 203 For Non-Economics Ph.D. Students

2-5 units, not given this year

ECON 204. Core Economics: Modules 9 and 10—The theory of contracts, emphasizing contractual incompleteness and the problem of moral hazard. Incentive regulation. Competition with imperfect information, including signaling and adverse selection. The theory of resource allocation over time, competitive equilibrium, and intertemporal efficiency. Limited enrollment. Prerequisite: 203.

2-5 units, Spr (Jackson, M)

ECON 210. Core Economics: Modules 3 and 7—Dynamic economics applied to aggregate economic fluctuations and economic growth. Solving dynamic, stochastic rational expectation models using discrete time dynamic programming. Growth theory (neoclassical models, growth accounting, technical change, endogenous growth) using optimal control theory. Limited enrollment.

2-5 units, Aut (Jaimovich, N)

ECON 211. Core Economics: Modules 11 and 12—Capital asset pricing models, equilibrium with securities, pricing of securities, and arbitrage. Overlapping generations models with incomplete market structure and sunspots. Foundations of Bayesian dynamic learning. Investment theory and empirics, including adjustment costs and the q theory; consumption theory and empirics, focusing on the life-cycle model; and the labor market. Limited enrollment. Prerequisite: 210.

2-5 units, Win (Amador, M)

ECON 212. Core Economics: Modules 4 and 8—Monetary theory: economic fluctuations, the role of money (overlapping generations, cash in advance, money in the utility function), dynamic impact of changes in money on the economy, natural rate of unemployment and job creation/destruction, exchange rate determination, international transmission of money, dynamic stochastic general equilibrium models. Macroeconomic policy: rationale for central bank independence, time inconsistency, the impact of public debt, rules versus discretion, interest rate versus money rules, international monetary policy coordination, rational expectations, economic policy evaluation. Limited enrollment. Prerequisites: 203, 211.

2-5 units, Spr (Taylor, J)

ECON 301. Microeconomic Workshop

1-10 units, Aut, Win, Spr (Hammond, P; Kurz, M)

ECON 305. Economic Applications Workshop

1-10 units, Aut, Win, Spr (MaCurdy, T; Pencavel, J; Pistaferri, L; Wolak, F; McClellan, M; Bloom, N)

ECON 310. Macroeconomic Workshop

1-10 units, Aut, Win, Spr (Hall, R; Klenow, P; Taylor, J; Tertilt, M; Kurz, M; Amador, M; Jaimovich, N)

B. ECONOMIC DEVELOPMENT

To receive credit for this field, students must complete 214 and 217, and submit a paper from one of these courses. Students wishing to do research in the field are advised to take courses in international economics, such as 266, and in comparative institutional analysis.

ECON 214. Development Economics: Microeconomic Issues—Microeconomic analysis of markets and institutions in developing countries. Topics: the role of the household; models of savings, credit, and risk; adjustment to aggregate shocks; occupational choice, credit constraints, and credit market imperfections; health and nutrition; new technology; and education. Emphasis is on empirical tests of and evidence for theoretical models.

2-5 units, Aut (Jayachandran, S)

ECON 216. Development Economics and Growth: Macroeconomics—The historical experience of economic development; patterns of economic growth; sources of economic growth; models of economic development (two-gap models, dual economy models, open economy models, new growth models), savings and capital accumulation; the role of money and finance; inflation; taxation; stabilization in closed and open economies with incomplete and/or imperfect markets; human and other forms of intangible capital; infrastructural capital and externalities; income distribution; numerical general equilibrium models.

2-5 units, Win (Mahajan, A, De Giorgi, G)

ECON 217. Development Economics: Money and Finance—Banking systems, interest rates, regulatory policies, and the productivity of capital in developing countries. Controlling inflation: fiscal and monetary policies for macroeconomic stability. Currency crises, exchange rates, and the liberalization of foreign trade. Further applications to transitional socialist economies in Asia and E. Europe.

2-5 units, not given this year

ECON 220. Political Economy I—Positive and normative theories of political economy. Positive topics include direct democracy, electoral competition, legislative policy making, agenda setting, lobbying, comparative constitutions, and intergenerational politics, with applications to income taxation, redistribution, and the size of government. Normative topics include social choice theory with and without interpersonal comparisons, Pareto efficiency with public goods, potential Pareto improvements, welfare measurement, cost benefit analysis, and analysis of economic policy reform.

2-5 units, Aut (Bernheim, D; Hammond, P)

ECON 221. Political Economy II—Continuation of 220. Positive and normative theories of political economy. Focus is on how the structure of political institutions affect societal welfare and economic outcomes. Topics include: measurement of the welfare of a society; constitutional design; models of strategic voting behavior; asymmetries of information and voting behavior; lobbying, vote buying, and political influence; the politics of federations of states; and political decision making regarding economic policies such as taxes, redistribution, and public good provision. Prerequisite: 220.

2-5 units, Win (Jackson, M)

ECON 267. Special Topics in International Economics—The level and growth effects of trade and trade liberalization in neoclassical and endogenous growth models. Empirical evidence (country specific and cross country) on the effects of trade liberalization on growth, poverty, and inequality within and between countries. Implications for national and international policies. Multilateral versus preferential trade liberalization including the Doha round of multilateral trade negotiations.

2-5 units, Spr (Fitzgerald, D)

ECON 315. Development Workshop

1-10 units, Aut, Win, Spr (Mahajan, A; Jayachandran, S; De Giorgi, G)

C. ECONOMIC HISTORY/INSTITUTIONS

The requirement for the field is one research paper on a subject approved by one of the faculty teaching any of the following courses.

ECON 224. Science, Technology, and Economic Growth—Upper-division undergraduates may enroll with consent of instructor. The roles played by the growth of scientific knowledge and technical progress in the development of industrial societies. Emphasis is on the interactions between science and technology, and the organizational factors which have influenced their effectiveness in contributing to productivity growth.

2-5 units, Win (David, P)

ECON 225. Economics of Technology and Innovation—The feedback structure of how technological change affects economic transformations and how scientific progress and economic change shape technological progress; conceptual and formal approaches for analyzing these relationships. Forecasting, economic history, and current techno-economic developments.

2-5 units, not given this year

ECON 226. U.S. Economic History—The American economy from colonial times to the present. The role of economic history as a distinctive intellectual approach to the study of economics. Topics: American growth record and its determinants, the origins and character of U.S. technology, slavery, the Great Depression, recent U.S. performance in historical perspective.

2-5 units, not given this year

ECON 227. European Economic History—Economic growth and development in W. Europe from the 11th-20th centuries, emphasizing the formative period up to the 19th century. Emphasis is on the experiences of Britain, France, Germany, and Italy. The interrelations between the growth and distribution of output, demographic trends, technological and organizational changes in trade and industry, and the changing formal and informal institutions governing political and economic activity.

2-5 units, *Win (Greif, A)*

ECON 228. Institutions and Organizations in Historical Perspective—Emphasis is on the formative period from the 11th to 18th centuries. Formation, function, and evolution of institutions; alternative conceptual frameworks such as neoclassical, transaction cost economics, institutionalism, and Marxism and neo-Marxism; game theory, mechanism design, and contract theory. Institutions related to trade organization, the organization of production, feudalism, mercantilism, and the state.

2-5 units, *Aut (Greif, A)*

ECON 229. Topics in Economic History—Emphasis is on institutions and organizations, such as risk-sharing organizations, and property rights, such as patent laws and their effects on technological change and economic growth. Topics include: competing hypotheses for cross-country differences in long-term growth; the importance of institutions to economic growth; formation, function, and persistence of institutions and organizations; role of patent laws in creating incentives for innovation; informal networks as a mechanism to trade property rights; causes and effects of institutional change; tests of contract theory in history; and long-term migration and its effect on economic development.

2-5 units, *Aut (Abramitzky, R; Moser, P)*

ECON 325A,B,C. Economic History Workshop

1-10 units, **A:** *Aut*, **B:** *Win*, **C:** *Spr (Greif, A; Wright, G; Abramitzky, R; David, P; Moser, P)*

D. MONETARY THEORY AND ADVANCED MACROECONOMICS

Requirements for this field are completion of 233 and 234.

ECON 233,234,235. Monetary Theory and Advanced Macroeconomics—Topics in the theory of fluctuations and growth.

2-5 units, **233:** *Aut (Amador, M; Jaimovich, N)*,
234: *Win (Klenow, P)*, **235:** *Spr (Bloom, N)*

E. PUBLIC FINANCE

To receive credit for the field, students must complete 241 and 242 by passing the final examinations, and submit an acceptable research paper on a topic approved by the instructor for either course. Students may take Public Finance as a field and still count 243 and/or 244 toward satisfying their distribution requirements.

ECON 241. Public Economics and Political Economy I: Public Policy—Welfare economics. Effects of tax policy, including incidence and efficiency costs. Design of tax systems. Externalities, public goods, and clubs. Cost-benefit analysis. Prerequisites: ECON 202-204, 210, 270, 271, or equivalent with consent of instructor.

2-5 units, *not given this year*

ECON 242. Public Economics and Political Economy II: Public Institutions—Social insurance, comparative political institutions, and federalism. Prerequisites: 202, 203, 204, 210, 270, 271, or equivalent with consent of instructor. Recommended: 241.

2-5 units, *not given this year*

ECON 243. Economics of Environment—Open to upper-division undergraduates with consent of instructor. Sources of environmental problems in market economies and policy options for addressing these problems. Topics: choice of policy instruments (taxes, standards, tradeable permits), environmental risk assessment, valuation of non-marketed commodities (environmental amenities, biodiversity), environmental policy making under uncertainty, the optimal mix of corrective and distortionary tax instruments, and the dynamics of economic growth in the presence of non-reproducible natural resources.

2-5 units, *Spr (Goulder, L)*

ECON 244. Psychology and Economics—Experimental and field evidence related to the psychological mechanisms behind static choice, intertemporal choice, choice under risk and uncertainty, choice in social situations, and hedonics. Models of economic choice based on these findings, and how they improve the explanatory and predictive value of standard theories. Prerequisites: 204, 271, or consent of instructor.

2-5 units, *not given this year*

ECON 341. Workshop on the Economics of the Public Sector—Issues in measuring and evaluating the economic performance of government tax, expenditure, debt, and other policies; their effects on private economic activity, saving, investment, labor supply; alternative policies and methods of evaluation. Workshop format combines student research, faculty presentations, and guest speakers. Prerequisite: 241 or consent of instructor.

1-10 units, *Aut, Win, Spr (Boskin, M; Shoven, J)*

ECON 343. Workshop in Environmental and Natural Resources Economics—Economic analyses of environmental and natural resource problems and policies. Presentations by faculty and graduate students.

1-10 units, *Aut, Win, Spr (Goulder, L)*

F. ECONOMICS OF LABOR

To receive credit for this field, students must complete two from 246, 247, and 248.

ECON 246. Labor Economics I—The demand for workers and hours of work, substitution among different types of labor in production, technological change, adjustment costs, restrictions on layoffs. The supply of labor, hours of work, participation, life-cycle models of behavior, welfare programs. Wage differentials by schooling, age, cohort, gender, and race. Changes in these wage differentials and differences across countries. Economics of discrimination. Employment contracts and turnover. Models of labor union behavior. Bargaining. Worker-owned enterprises. Unemployment and mobility. International comparisons.

2-5 units, *Aut (Pencavel, J)*

ECON 247. Labor Economics II—The economics and econometrics of program evaluation. The impact of public policies on labor demand, labor supply, human capital and wage determination. Social, natural, and quasi-experiments.

2-5 units, *Win (Pistaferrri, L)*

ECON 345. Applications Workshop

1-10 units, *Aut, Win, Spr (MacCurdy, T; Pencavel, J; Pistaferrri, L; Wolak, F; Bloom, N; McClellan, M)*

G. ECONOMICS OF INDUSTRY

To receive credit for the field, students must complete 257 and 258 and submit one research paper, the subject of which has been approved in advance by one of the faculty teaching 257, 258, or 260.

ECON 250A. Natural Resource and Energy Economics—First part of two course sequence. Issues in provision and management of non-renewable and renewable natural resources, and energy products and services. Theory and empirical methods related to: market structure, pricing, and performance of important energy and resource industries; sources of market failure in these industries; and alternative regulatory approaches. Prerequisites: 202, 203, 204, 270, 271, and 272, or equivalents with consent of instructor.

2-5 units, *not given this year*

ECON 250B. Environmental Economics—Second of two course sequence. Sources of environmental problems in market economies; policy options for addressing these problems. Topics include: alternative environmental policy instruments such as taxes, standards, and tradable permits; valuation of non-marketed commodities such as environmental amenities and biodiversity; and environmental policy making under uncertainty. Applications include global climate change and green tax reform. Prerequisites: 202, 203, 204, 270, and 271, or equivalents with consent of the instructor.

2-5 units, *not given this year*

ECON 257,258. The Economics of Industry, Regulation, and Firm Organizations—Theoretical and empirical analyses of the determinants of market structure; firm behavior and market efficiency in oligopolies; price discrimination; price dispersion and consumer search; differentiated products; the role of information in markets, including insurance and adverse selection; auctions; collusion and cartel behavior; advertising; entry and market structure; market dynamics; strategic behavior.

2-5 units, **257:** Aut (Einav, L; Levin, J), **258:** Win (Bresnahan, T)

ECON 260. Special Topics in Industrial Organization and Regulation—Current research and policy interest. Topics may include: empirical tests of oligopoly theories; non-price competition; entry and market structure; the role of information in markets; auctions; e-commerce; dynamics of change in regulatory policy; theory of economics institutions; antitrust status of joint ventures; and use of capacity, innovation, and product variety as a barrier to entry. Significant unresolved research issues and promising ways to attack them. Prerequisite: 257. Recommended: 258.

2-5 units, Spr (Einav, L; Levin, J)

ECON 355. Industrial Organization Workshop—Current research in the field by visitors, presentations by students, and discussion of recent papers. Students write an original research paper, make a formal presentation, and lead a structured discussion.

1-10 units, Aut, Win, Spr (Bresnahan, T; Einav, L, Kastl, J)

H. INTERNATIONAL ECONOMICS

To receive credit for this field, students must complete 266 and either 265 or 269, and submit a paper from one of these courses. All three courses are recommended. For students doing research in the field, further supporting courses are found in the fields of economic development, industrial organization, and public finance.

ECON 265. International Finance and Open Economy Macroeconomics—Monetary foundations of international exchange; the rules of the game. The world dollar standard. Hedging foreign exchange risk. International capital flows and the current account. Monetary and fiscal policies in open economies. Currency crises in developing economies and institutional reform; the IMF.

2-5 units, Aut (McKinnon, R)

ECON 266. International Trade—Determinants of trade and comparative advantage. Trade with imperfectly competitive markets. Income distribution and gains from trade. Commercial policies, tariffs, and quotas. Dynamic comparative advantage. Economic geography and trade. Political economy of trade.

2-5 units, Win (Staiger, R)

ECON 269. International Financial Markets and Monetary Institutions—(Same as 169; see 169.)

5 units, Spr (Taylor, J)

ECON 365. International Trade Workshop

1-10 units, Aut, Win, Spr (Lau, L; Fitzgerald, D; Wright, M; Staiger, R)

I. ECONOMETRICS

A student may satisfy the requirements for the econometrics field by completing the requirements of one of two subfields:

I-1: Theoretical Econometrics: To receive credit in the theoretical econometrics subfield, students must complete 273A and 273B.

I-2: Applied Econometrics: To receive credit in the applied econometrics subfield, students must complete 273A and either 274 or 275. Students must also complete a course or set of courses that is empirically oriented. The last requirements must be approved by the Director of Graduate Study in consultation with the instructor of 274 or 275.

ECON 271. Intermediate Econometrics II—(Same as 171; see 171.)

5 units, Aut (Hansen, P; Mahajan, A)

ECON 272. Intermediate Econometrics III—(Same as 172; see 172.)

2-5 units, Win (MaCurdy, T)

ECON 273A. Advanced Econometrics I—Parametric asymptotic theory. Large-sample properties of estimators defined as the solution to an optimization problem, under a variety of assumptions for the true data generation process. General large sample results for maximum likelihood, nonlinear least squares, nonlinear instrumental variables estimators, including the generalized method of moments estimator under general conditions. Asymptotic hypothesis testing procedures derived for each estimation framework.

2-5 units, not given this year

ECON 273B. Advanced Econometrics II—Simulations methods. Semi-parametric and nonparametric methods. Optimal rate of convergence and semiparametric efficiency bounds. Prerequisite: 273A.

2-5 units, Spr (Hong, H)

ECON 274. Limited Dependent Variables—Discrete choice models; Tobit models; Markov chain and duration models. Prerequisite: 273 or consent of instructor.

2-5 units, Win (Amemiya, T)

ECON 275. Time Series and Simultaneous Equation—Stochastic processes in the time and frequency domain. Time and frequency domain estimation. Unit roots, co-integration, time-varying conditional second moment models, instrumental variables estimation of dynamic models.

2-5 units, Win (Hansen, P)

ECON 370. Econometrics Workshop

1-10 units, Aut, Win, Spr (Hong, H; Hansen, P; Mahajan, A)

J. MICROECONOMIC THEORY

To receive credit for this field, students must complete two courses in one of the following two subfields:

J-1: General Theory: 280, 281, 284, 286, 287

J-2: Decisions, Contracts and Incentives: 282, 283, 286, 289

Note: taking one course from each track does not satisfy the microeconomic theory field requirement.

ECON 278. Neuroeconomics—(Same as 178; see 178)

5 units, not given this year

ECON 279. Experimental Economics—An introduction to experimental economics, its methods, and major subject areas that have been addressed by laboratory experiments. Focus is on a series of experiments that build on one another, and allow researchers with different theoretical dispositions to narrow the range of potential disagreement. Prerequisites: 202, 203, 204, or consent of instructor.

2-5 units, Win (Niederle, M)

ECON 280. Welfare Economics—Social choice theory with and without interpersonal comparisons; Pareto efficiency with public goods, externalities, and non-convexities; potential Pareto improvements. Private information, incentive constraints, and mechanism design. Welfare measurement, cost benefit analysis, and analysis of economic policy reform.

2-5 units, not given this year

ECON 281. Normative Decision Theory and Social Choice—Normative principles of behavior, especially in single-person decision trees. Objective and subjective expected utility. Savage, Anscombe-Aumann, and consequentialist axioms. State dependence. Multi-person extensions: social choice, ethics, opinion pooling, and rationalizability in non-cooperative games. Prerequisite: 202 or equivalent.

2-5 units, not given this year

ECON 282. Contracts, Information, and Incentives—General issues and recent developments in mechanism design and the theory of contracts. Topics include: hidden characteristics and hidden action models with one and many agents, role of commitment and renegotiation in long-term relationships, incomplete contracts and applications to the theory of the firm.

2-5 units, Win (Segal, I)

ECON 283. Advanced Topics in Contracts and Organization—Recent developments and promising research. Topics change from year to year, and may include: reputational concerns and implicit contracts in long-term relationships, property rights and the hold-up problem, multilateral contracting, communication requirements of allocation problems, communication without full commitment. Prerequisite: 282 or consent of instructor.

2-5 units, not given this year

ECON 284. Topics in Dynamic Financial Economics—Dynamic general equilibrium asset pricing and economic volatility. Characteristics of real and financial volatility, the equity risk premium, the term structure of interest rates, and the forward premium. The role of dynamic learning and diversity of beliefs in the propagation of economic volatility, and the relationship of such diversity to money non-neutrality, the real effect of monetary shocks, and real business cycles theories; implications for problems of time consistency in monetary policy, rules versus discretion and alternative monetary rules. Recent papers presented by students. Prerequisites: 204 or equivalent, basic probability theory, or consent of instructor.

2-5 units, not given this year

ECON 285. Market Design—(Same as MGTECON 602.) Analysis of rules that govern the operation of markets with and without the assistance of prices. Emphasis is on markets in which complicated preferences and constraints, limitations on the use of cash, or variations in contract details among bidders decisively impair the performance of simple market rules. Matching markets such as the National Resident Matching Program and airline slot exchanges, asset auctions such as the spectrum auctions, electricity markets, and Internet procurement services.

2-5 units, not given this year (Bulow, J; Skrzypacz, A)

ECON 286. Game Theory and Economic Application—Solution concepts for non-cooperative games, repeated games, games of incomplete information, reputation, and experiments. Standard results and current research topics. Prerequisite: 203 or consent of instructor.

2-5 units, Spr (Levin, J)

ECON 287. General Equilibrium Theory—Existence, efficiency, and Walrasian equilibrium in exchange economies. Production, financial markets, incomplete markets, sequence economies with infinitely-lived agents. Prerequisites: 204 or consent of instructor.

2-5 units, not given this year

ECON 288. Computational Economics—Computational approaches to solving economic problems. Overview of numerical analysis. Economic problems in computationally tractable forms, and the use of numerical analysis techniques to solve them. Examples of problems solved numerically (general equilibrium models, optimal taxation, dynamic programming, economic growth, life-cycle models, intervention in commodity markets, Bayesian econometrics, equilibria of dynamic and repeated games, and nonlinear rational expectations equilibria with asymmetric information). Prerequisite: equivalent of first-year graduate core economics sequence.

2-5 units, not given this year

ECON 290. Multiperson Decision Theory—(Same as MGTECON 608.) Recent research papers on economic applications of decision theory, game theory, and mechanism design. Applications include market design and analyses of incentives and strategic behavior in markets, and topics such as auctions, bargaining, contracting, and computation.

4 units, Spr (Wilson, R)

ECON 292. Comparative Analysis of Organizations and Institutions—Game theoretic; classic and evolutionary analysis of institutions as multiple equilibria. Norms, social embeddedness, organizations as conventions, contract enforcement and corporate governance mechanisms, and states. Institutional complementarities and diachronic institutional linkage.

5 units, not given this year

ECON 385. Mathematical Economics Workshop

1-10 units, Aut, Win, Spr (Hammond, P; Kurz, M)

ECON 391. Microeconomic Theory Seminar—Game theoretic (classic and evolutionary analysis of institutions as multiple equilibria). Norms, social embeddedness, organizations as conventions, contract enforcement and corporate governance mechanisms, and states. Institutional complementarities and diachronic institutional linkage. May be repeated for credit.

1-10 units, Aut, Win, Spr (Segal, I; Levin, J; Milgrom, P; Niederle, M; Bernheim, D; Hammond, P; Kurz, M; Jackson, M)

OVERSEAS STUDIES

Courses approved for the Economics major and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BERLIN

ECON 161X. The German Economy in the Age of Globalization—GER:DB-SocSci

Courses given in English have the subject code ENGLISH. For a complete list of subject codes, see Appendix.

The Department of English seeks to teach and promote an understanding of the significance and history of British and American literatures and to foster an appreciation of the richness and variety of texts in the language. In the undergraduate program, it offers rigorous training in interpretive thinking and precise expression, teaching students to invent ideas, organize them, draw deductions and make connections to new ideas, and articulate them in eloquent and convincing ways. The English graduate program features the study of imaginative language, rhetoric, and the poetic and narrative arts and it focuses on the roles that imaginative writing and representations play in almost every aspect of human experience. Completing the B.A., M.A., or Ph.D. curricula prepares students of English to adapt, to think, and communicate inventively, and to be cultured and humane in their approach to life.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The English Major is designed to provide students with both an understanding of the development of literatures in English and an appreciation of the variety and richness of literary texts. It offers a rigorous training in interpretive thinking and precise expression.

PREPARATION FOR THE MAJOR

The following departmental requirements are in addition to the University's basic requirements for the bachelor's degree. With the exception of the course in Poetry and Poetics or any other when taken to satisfy the Writing in the Major (WIM) requirement, any two of the requisite courses may be taken on a satisfactory/no credit basis at the discretion of the instructor.

MAJOR PROGRAMS OF STUDY

Because the Department of English recognizes that the needs and interests of literature students vary, it has approved several major programs of study. Each of these has different objectives and requirements; students should consider carefully which program of study corresponds most closely to their personal and intellectual objectives. Students who have declared a major before Autumn Quarter 2002 may choose to follow the department's previous guidelines for the major. Please consult the departmental web site or the undergraduate English coordinator for details about requirements for the major before Autumn 2002.

MAJOR IN ENGLISH LITERATURE

This program provides for the interests of students who wish to understand the range and historical development of British and American literatures and a variety of critical methods by which their texts can be interpreted. The major emphasizes the study of literary forms and genres and theories of textual analysis.

Students declaring a major in English Literature during Autumn Quarter 2002 and thereafter must choose a total of twelve 5-unit courses. At least one of these courses must be in American literature and at least one must be in British literature after 1750. The twelve courses must be chosen to fulfill the following six categories of requirements:

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
4. Poetry and Poetics (ENGLISH 160).
5. One course in Critical Methods.
6. Five additional elective courses, only one of which may be a creative writing course, chosen from among those offered by the Department of English. Students must select three of these courses from one of the following concentrations:
 - a) a specific genre: drama, film, lyric poetry, or prose fiction
 - b) a specific historical period: literature before 1750, literature between 1750 and 1900, or literature after 1900
 - c) one of the following areas of interest: gender and sexuality; language and rhetoric; literary theory; race and ethnicity; or single authors

Consult the English Department for a list of the courses under each of these concentrations for 2006-07. In lieu of one of these concentrations, students may take three courses from another well-defined area of interest with the approval of their adviser and the Director of Undergraduate Studies.

In place of one of these five elective courses, students may choose one upper-division course in a foreign literature read in the original language.

At least one of the courses satisfying the major must be a major's seminar, which is any of the 5-unit seminar courses offered in the English department or an English seminar offered in the Stanford in Oxford program at St. Catherine's College.

Students are urged not to postpone satisfying this requirement until late in their major career. Undue tardiness may result in a delay of degree conferral. Students are encouraged to take seminar format courses in both the junior and senior years.

Students may apply as many as four English courses taken at other approved universities towards the English major. Approval of such courses towards the major is at the discretion of the Director of Undergraduate Studies. Requests for transfer credit, including course syllabi and official transcript, should be submitted to the undergraduate student services coordinator, and to the Office of the University Registrar's external credit evaluation section.

Foreign Language Requirement—There is no foreign language requirement for English majors beyond the university requirement, but students who plan to study English at the graduate level should be aware that advanced reading skills in one or more foreign languages enhance their chances of admission to and success in most Ph.D. programs.

EMPHASIS IN THE ENGLISH MAJOR

English with a Creative Writing Emphasis—This program is designed for students who want a sound basic knowledge of the English literary tradition as a whole and at the same time want to develop skills in writing poetry or fiction. Students declaring an English major with a Creative Writing Emphasis during Autumn Quarter 2006 and thereafter must take a total of thirteen 5-unit courses offered through the Department of English and the Program in Creative Writing and fulfill the seminar requirement. The thirteen courses must be chosen to fulfill the following requirements:

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
4. Poetry and Poetics (ENGLISH 160).
5. One course in Critical Methods.
6. One course in 20th-century literature.
7. Majors with the Creative Writing Emphasis must take five courses designed for the fiction or the poetry concentration. Fiction writers must first take ENGLISH 90, Fiction Writing, then two quarters of 190, Intermediate Fiction Writing, or 290A, Advanced Fiction Writing. Fiction writers must also take ENGLISH 146, Development of the Short Story, and ENGLISH 92, Reading and Writing Poetry. Poetry writers must first take ENGLISH 92, Reading and Writing Poetry, then two quarters of 192, Intermediate Poetry Writing, or 292, Advanced Poetry Writing. In addition to the WIM course, ENGLISH 160, Poetry and Poetics, poetry writers must take one other course in poetry to be approved by a professor in the Creative Writing program, and English 90, Fiction Writing. Courses taken to satisfy one of the six requirements above cannot also satisfy a Creative Writing requirement. ENGLISH 198 or tutorials taken elsewhere (such as tutorials in the Overseas Studies Program) may not be substituted for required courses. Admission to ENGLISH 290A and 292 is by consent of the instructor and is based on the quality of the student's work.

English with Interdisciplinary Emphasis—This program is intended for students who wish to combine the study of one broadly defined literary topic, period, genre, theme or problem with an interdisciplinary program of courses relevant to that inquiry. Students are required to fulfill the language and seminar requirements listed under the major in English. Students declaring an English major with an interdisciplinary emphasis during Autumn Quarter 2002 and thereafter must choose a total of fourteen 5-unit courses. These courses must fulfill the following requirements:

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
4. Poetry and Poetics (ENGLISH 160).
5. One course in Critical Methods.
6. Three additional elective courses chosen from among those offered by the Department of English. Students must select two of these courses in relation to their interdisciplinary focus.
7. Four courses related to the area of inquiry from disciplines such as anthropology, the arts (including the practice of one of the arts), classics, comparative literature, European or other literature, feminist studies, history, modern thought and literature, political science, and African American studies. These courses should form a coherent program and must be relevant to the focus of the courses chosen by the student to meet the requirement. Each of these courses must be approved in advance by the interdisciplinary program director. In addition, students in the interdisciplinary program must write at least one interdisciplinary paper. This may be a senior honors essay (197), a senior independent essay (199), an individual research paper (194 or 198), or a paper integrating the material in two courses the student is taking in two different disciplines.

ENGLISH AND PHILOSOPHY

This new track is for students who wish to explore interdisciplinary studies at the intersection of literature and philosophy while acquiring knowledge of the English language literary tradition as a whole.

Students choosing the English and Philosophy track must complete sixteen courses for a minimum of 70 units, of which at least eight 5-unit courses must be within the English department. At least one course must be in each of American literature and British literature after 1750. At least one course must be an English department seminar. Students must fulfill the following requirements:

Literature—

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750-1900 or American literature before 1900.
3. One course in Shakespeare.
4. English Writing in the Major: ENGLISH 160, Poetry and Poetics.
5. One course in critical methods.

Philosophy—

1. Philosophy Writing in the Major: PHIL 80. Prerequisite: introductory philosophy course.
2. Aesthetics, Ethics, Political Philosophy: a course from PHIL 170 series.
3. Language, Mind, Metaphysics, and Epistemology: one course from PHIL 180 series.
4. History of Philosophy: two courses in the history of philosophy, numbered above PHIL 100.

Literature and Philosophy—

1. Gateway course in philosophy and literature (PHIL 81). This course should be taken as early as possible in the student's career, normally in the sophomore year.
2. Two upper division courses of special relevance to the study of philosophy and literature. A list of approved courses is available from the Director of Undergraduate Studies in English.
3. Capstone seminar of relevance to the study of philosophy and literature, drawn from a list approved by the Director of Undergraduate Studies in English.

MINORS

Both the Department of English and the Creative Writing program offer a distinct minor.

English Literature—The minor in English Literature offers some flexibility for those students who want to pursue specific interests within British and American literature, while still requiring certain courses that ensure coverage of a variety of periods, genres, and methods of studying literature. In order to graduate with a minor in English, students must complete the following program of seven 5-unit courses, at least one of which must be a seminar:

1. ENGLISH 160. Poetry and Poetics
2. One course from each of the following historical periods:
 - a) British literature to 1750
 - b) British literature from 1750 to 1900 or American literature before 1900
 - c) 20th-century British or American literature
3. One course in Shakespeare
4. Two elective courses

One of the two elective courses may be a course in Creative Writing.

Creative Writing—The minor in Creative Writing offers a structured environment in which students interested in writing fiction or poetry develop their skills while receiving an introduction to literary forms. Students choose a concentration in either fiction or poetry. All courses must be taken for a letter grade.

1. ENGLISH 94. Introduction to the Creative Writing Minor
2. Four writing workshops, three in the chosen concentration, one outside.
 - a) Fiction minors must first take ENGLISH 90, Fiction Writing, or ENGLISH 94A, Creative Nonfiction, then one or two quarters

of 190, Intermediate Fiction Writing, or 290A Advanced Fiction Writing. The fourth writing course must be ENGLISH 92, Poetry Writing.

- b) Poetry minors must first take ENGLISH 92, Poetry Writing, then one or two quarters of 192, Intermediate Poetry Writing, or 292, Advanced Poetry Writing. The fourth writing course must be ENGLISH 90, Fiction Writing.
3. One literature course: fiction minors must take ENGLISH 146, The Development of the Short Story; poetry minors must take ENGLISH 160, Poetry and Poetics.

INTERDEPARTMENTAL MAJORS

English and French Literatures—This major provides a focus in British and American literature with additional work in French literature. The program of each student must be approved by the Director of Undergraduate Studies in English and by the Department of French and Italian.

Students declaring a major in English and French during Autumn Quarter 2002 and thereafter must choose a total of thirteen 5-unit courses, at least one of which must be a seminar. In addition, at least one of the courses must be in American literature and at least one must be in British literature after 1750. These courses are to be selected from the following categories.

1. Two courses in British literature before 1750.
2. Two courses in British literature from 1750 to 1900 or American literature before 1900.
3. One course in Shakespeare.
4. Poetry and Poetics (ENGLISH 160).
5. One course in Critical Methods.
6. Two elective courses.
7. A coherent program of four courses in French literature, read in the original.

English and German Literatures—Candidates for the B.A. in this major who declare an English major after Autumn Quarter 2002 must complete a program exactly analogous to the preceding major, with nine courses in British and American literature, and a coherent program of four courses in German literature, read in the original, with approval by the departments involved as specified above.

English and Italian Literatures—Candidates for the B.A. in this major who declare an English major after Autumn Quarter 2002 must complete a program exactly analogous to the preceding major, with nine courses in British and American literature, and a coherent program of four courses in Italian literature, read in the original, with approval by the departments involved as specified above.

English and Spanish or Spanish American Literatures—Candidates for the B.A. in this major who declare an English major after Autumn Quarter 2002 must complete a program exactly analogous to the preceding major, with nine courses in British and American literature, and a coherent program of four courses in Spanish literature, read in the original, with approval by the departments involved as specified above.

ADVANCED WORK

INDIVIDUAL RESEARCH

Students taking 100- or 200-level courses may, with the consent of the instructor, write a follow-up 5-unit paper based on the course material and due no later than the end of the succeeding quarter (register for 194). The research paper is written under the direct supervision of the professor; it must be submitted first in a preliminary draft and subsequently in a final version.

INTEGRATED WORK

Students taking (either simultaneously or consecutively) two or three courses which have a clear thematic or historical relationship to each other may, with the consent of the relevant instructors, write one large-scale paper of 7,000-10,000 words integrating the material in the courses in question.

SENIOR INDEPENDENT STUDY

Independent study is open, on approval by the department, to seniors majoring in English literature who wish to work throughout the year on a critical or scholarly essay of about 10,000 words. In rare circumstances, advisers may nominate exceptional students for honors if the student's thesis is outstanding and the program of study has been approximately equivalent to that required of regular honors students.

HONORS PROGRAM

Students who wish to undertake a more extensive program in English literatures, including the Honors Seminar and independent research, are invited to apply for the honors program in the Winter Quarter of the junior year. All outstanding students are encouraged to engage in an honors thesis project.

Admission is selective. Provisional admission is announced in March. Permission to continue in the program is contingent upon submission, by May 15 of the junior year, of a Senior Honors Essay proposal with a bibliography.

In the Autumn Quarter of the senior year, students take a 5-unit honors seminar on critical approaches to literature. The senior-year seminar is designed to introduce students to the analysis and production of advanced literary scholarship. Students who are studying at Oxford or at other institutions may be exempted from this seminar on request and with the approval of the director of the honors program.

In Winter Quarter of the senior year, honors students take a 3-unit essay workshop focused on the process of researching and writing the essay.

In the senior year, honors students complete the senior honors essay for 10 units under supervision of a faculty adviser.

The deadline for submitting the honors essay is May 15.

Students in the honors program complete all the requirements of the major and the following:

Senior seminar and workshop, 8 units total

Senior Honors Essay, 10 units

Note—For other opportunities for extended essay projects, see Senior Independent Essay and ENGLISH 194 and 199.

HONORS PROGRAM IN HUMANITIES

An honors program in Humanities is available for English Literature majors who wish to supplement the major with a related and carefully guided program of studies. See the "Interdisciplinary Studies in Humanities" section of this bulletin for a description of the program. Students wishing to take the Comparative Literature option within the honors program in Humanities should see the "Comparative Literature" section of this bulletin.

THE ENGLISH MAJOR AND THE OVERSEAS CAMPUSES

The flexibility of the English major permits students to attend an overseas campus in any quarter, but it is advisable, and in some cases essential, that students spend their senior year at Stanford if they wish to participate in the Honors Program or a special in-depth reading course. For more information on Stanford overseas programs, see the "Overseas Studies" section of this bulletin.

Students should consult their advisers and the undergraduate program officer to make sure that they can fulfill the requirements before graduation. The Stanford Program in Oxford usually offers courses which apply toward both University requirements and area requirements for the English major. In either case, students should save the syllabi from their courses if they wish to apply to use them to fulfill an English major requirement.

VISITING STUDENTS

Students who do not wish to become candidates for a graduate degree, but who are qualified to meet the standards of admission to a master's or Ph.D. program, may apply to Graduate Admissions for admission as nonmatriculated students for a period of not more than three consecutive quarters. Each quarter, they may take up to three English courses numbered 101 to 299, or two such courses and (with the consent of the instructor) one English course numbered above 300.

GRADUATE PROGRAMS

For University regulations governing advanced degrees, see the “Graduate Degrees” section of this bulletin.

Eligibility—Students with a bachelor’s degree of acceptable quality may apply to pursue graduate work toward an advanced degree in English at Stanford. (Formal application for candidacy is a separate step taken somewhat later.) Students whose previous preparation is in a field other than English are expected to make up deficiencies. Credits for previous graduate work at Stanford or elsewhere more than five years old may be reevaluated or rejected.

Graduate students are admitted as candidates for only the Ph.D. or the M.A. in English and American Literature. The M.A. program is a terminal, one-year program without financial aid.

MASTER OF ARTS

Candidates may earn the master’s degree in English and American Literature by satisfying the following requirements:

1. Successful completion with a 3.0 (B) grade point average (GPA) of at least nine courses (a minimum of 45 units), two of which must be 300-level courses. Ordinarily, graduate students enroll in courses numbered 200 and above. They may take no more than two courses numbered 101-199 without the consent of the Director of Graduate Studies. The master’s student may take no more than 10 units of directed reading and research (ENGLISH 398). Interested students should consult their faculty adviser or the graduate program adviser for further details.

During the first two weeks of the first quarter, candidates for the master’s degree in English and American Literature should consult the adviser designated by the Director of Graduate Studies in order to draw up a three quarter study plan. The student’s program consists of five required courses: ENGLISH 296; two courses in literature before 1800 and two courses in literature after 1800; plus four elective courses representing a mixture of survey and specialized courses chosen to guarantee familiarity with a reasonable proportion of the works on the reading list for doctoral candidates. Students whose undergraduate transcripts do not show courses in the following areas should take courses in these areas as part of their M.A. program: Medieval, Renaissance, 18th century, 19th century, 20th century (the latter two in either British or American literature). Normally, no more than two courses taken outside the department may count toward the degree, but the graduate studies committee considers exceptions. No creative writing courses may be used to fulfill the requirements.

Candidates who can demonstrate unusually strong preparation in the history of English literature may undertake a 40 to 60-page master’s thesis. Such candidates may register for up to 10 units of ENGLISH 399 with the faculty member who supervises the thesis work. Candidates who write a master’s thesis may petition to be excused from up to 10 units of the requirements described above. The additional 35 units normally consist of the five required courses and two elective courses. These courses are chosen by the student and approved by the adviser and the Director of Graduate Studies.

2. Demonstration of a reading knowledge of one foreign language. (For ways of fulfilling this requirement, see the section below on language requirements for the Ph.D.)

COTERMINAL BACHELOR’S AND MASTER’S DEGREES IN ENGLISH LITERATURE

Students in the major who are interested in further postgraduate work in English may apply for Stanford’s coterminal master’s program. Candidates for a coterminal master’s degree must fulfill all requirements for the M.A. in English (including the language requirement), as well as general and major requirements for the B.A. in English. A minimum GPA of 3.7 in the major is required of those applying for the coterminal master’s degree. Students must also take the GRE exam in the year in which they apply. No

courses used to satisfy the B.A. requirements (either as General Education Requirements or department requirements) may be applied toward the M.A. No courses taken more than two quarters prior to admission to the coterminal master’s program may be used to meet the 45-unit University minimum requirement for the master’s degree.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

COTERMINAL PROGRAM WITH SCHOOL OF EDUCATION

Students interested in becoming middle school and high school teachers of English may apply for admission to the Coterminal Teaching Program (CTP) of the Stanford Teacher Education Program (STEP) in the School of Education. CTP students complete a special curriculum in English language, composition, and literature that combines a full English major with supplemental coursework in subjects commonly taught in California public schools and a core program of foundational courses in educational theory and practice. They are then admitted to STEP for a fifth year of pedagogical study and practice teaching. Students who successfully complete the curriculum requirements are able to enter STEP without the necessity of taking either the GRE or the usual subject matter assessment tests. At the end of five years, CTP students receive a B.A. in English, an M.A. in Education, and a California Secondary Teaching Credential. Students normally apply to the Coterminal Teaching Program at the end of their sophomore year or at the beginning of their junior year. For complete program details and for information on how to apply, consult the Director of Undergraduate Studies in English or the CTP coordinator in the School of Education.

DOCTOR OF PHILOSOPHY

University regulations regarding the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin.

The following department requirements, dealing with such matters as residence, dissertation, and examinations, are in addition to the University’s basic requirements for the doctorate. (Students should consult the most recent edition of *The Ph.D. Handbook*; copies are available in the English graduate studies office.)

A candidate for the Ph.D. degree must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the bachelor’s degree. Candidates are required to complete at least 135 units of graduate work in addition to the doctoral dissertation. At least three consecutive quarters of graduate work, and the final course work in the doctoral program, must be taken at Stanford.

A student may count no more than 65 units of non-graded courses toward the 135 course units required for the Ph.D., without the written consent of the Director of Graduate Studies. A student takes at least 70 graded units (normally fourteen courses) of the 135 required total units (396L, 397A, 398, and 399 do not count toward the 70 graded units). No more than 10 units (normally two courses) may come from 100-level courses.

This program is designed to be completed in five years. Five quarters of supervised teaching, two as a teaching assistant in a literature course, one as a teaching apprentice, and two as the instructor of a Program in Writing and Rhetoric (PWR) course, are a requirement of the Ph.D. program.

In the first quarter of their first year, students take a 2-unit seminar in pedagogy as preparation for their initial teaching assistantship. In the first quarter of their second year, students take a pedagogy seminar and an apprentice teaching program. The seminar and apprentice teaching constitute a 50-percent teaching appointment. Apprentice teachers attend the classes and conferences of a senior mentor/instructor for two to three weeks. While teaching during the second and third quarters of the second year, students continue to participate in a series of PWR pedagogy workshops and visit one another’s classrooms.

ENGLISH AND AMERICAN LITERATURE

All students are expected to do course work across the full range of English and American literature. Students would be required to fulfill the following requirements. Note: fulfillment of requirements 1, 2, and 3 must be through Stanford courses; students will not be excused from these three requirements or granted credit for course work done elsewhere.

1. ENGLISH 396, Introduction to Graduate Study for Ph.D. Students (5 units), a course that introduces students to the methods of literary study, and ENGLISH 396L, Pedagogy Seminar I, for first year students (2 units).
2. Graduate-level (i.e., at least 200-level) course work in English literature before 1700, and English and American literature after 1700 (at least 5 units of each).
3. Graduate-level (i.e., at least 200-level) course work in some aspect of literary theory (e.g., courses in literary theory itself, narrative theory, poetics, rhetoric, cultural studies, gender studies; at least 5 units).
4. Students concentrating in British literature are expected to take at least one course (5 units) in American literature; students concentrating in American literature are expected to take at least one course (5 units) in British literature.
5. Of all courses taken, a minimum of six courses for a letter grade must be graduate colloquia and seminars, of which at least three must be graduate seminars. The colloquia and seminars should be from different genres and periods, as approved by the adviser.
6. Completion, in Autumn Quarter of the second year, of a pedagogy seminar which includes the Apprentice Teaching Program described above, and a series of pedagogy workshops during Winter and Spring quarters. There are no units associated with this work.
7. The remaining units of graded, graduate-level courses and seminars should be distributed according to the adviser's judgment and the candidate's needs. A student may receive graduate credit for no more than two 100-level courses in the Department of English.
8. Consent of the adviser if courses taken outside the Department of English are to count toward the requirement of 70 graded units of course work.
9. An oral qualifying examination based on a reading guide, to be taken at the end of the summer after the first year of graduate work. The final decision as to qualification is made by the graduate studies committee in consideration of the student's overall record for the first year's work in conjunction with performance on the examination. *Note:* A student coming to the doctoral program who has done graduate work at another university must petition in the first year at Stanford for transfer credit for course work completed elsewhere. The petition should list the courses and grades, and describe the nature and scope of course work, as well as the content, contact hours, and writing requirements. A syllabus must be included. The Director of Graduate Studies considers the petition in conjunction with the student's overall performance.
10. A University Oral Examination to be taken no later than the Spring Quarter of the student's third year in the Ph.D. program. This examination covers the field of concentration as defined by the student and the student's adviser.

ENGLISH AND COMPARATIVE LITERATURE

The Ph.D. program in English and Comparative Literature is designed for students wishing an extensive knowledge of the literature, thought, and history of England and of at least one foreign country, for one period. Approximately half of the student's course work and reading is devoted to this period, with the remainder of the time given to other periods of English and American literature since 1350.

This degree, administered by the Department of English, is to be distinguished from the Ph.D. in Comparative Literature. The latter program is intended for students unusually well prepared in foreign languages and involves advanced work in three literatures, one of which may be English. Interested students should consult a Department of English adviser, but faculty from Comparative Literature may also provide useful supplementary information.

The requirements are as follows:

1. Qualifications: see item 9 under requirements of the Ph.D. program in English literature. For qualifications in the doctoral program in English and Comparative Literature, candidates are not held responsible for literature before 1350, but instead include on their reading list a selection of works from a foreign literature read in the original language.
2. A knowledge of the basic structure of the English language and of Chaucer. This requirement may be met by examination, or by taking 10 units of courses chosen from among those offered in linguistics, English philology, and early and middle English literature including Chaucer. No particular courses are required of all students.
3. A 5-unit course, ENGLISH 396, Introduction to Graduate Study, and a 2-unit course, ENGLISH 396L, Seminar in Pedagogy I.
4. Completion, in Autumn Quarter of the second year, of a pedagogy seminar, which includes the Apprentice Teaching Program described above, and a series of pedagogy workshops during winter and spring quarter. There are no units associated with this work.
5. A knowledge of one foreign language sufficient to take graduate-level literature courses in a foreign-language department and an advanced reading knowledge of a second language.
6. A minimum of 45 units in the history, thought, and literature of one period, in two or more languages, one of which must be English and one foreign. Students normally include at least two courses in a foreign literature read in the original language and two courses listed under Comparative Literature or Modern Thought and Literature. As many as 20 units of this requirement may be satisfied through courses in reading and research. A student may receive graduate credit for no more than two 100-level courses in the Department of English.
7. A minimum of six courses for a letter grade from graduate colloquia and graduate seminars, of which three must be graduate seminars and of which at least four must be in the Department of English. Among these courses, students should take one in literary theory or criticism. These colloquia and seminars should be in different genres and periods as approved by the adviser.
8. A University oral examination covering the field of concentration (as defined by the student and the student's adviser). This examination, based on a reading list established by the candidate in consultation with his or her adviser, is normally taken no later than the Spring Quarter of the third year of graduate study. However, those who spend the third year studying abroad may take this examination after their return early in the fourth year.

LANGUAGE REQUIREMENTS

All candidates for the Ph.D. degree (except those in English and Comparative Literature, for whom special language requirements prevail) must demonstrate a reading knowledge of two foreign languages. Candidates in the earlier periods must offer Latin and one of the following languages: French, German, Greek, Italian, or Spanish. In some instances, they may be required to offer a third language. Candidates in the later period (that is, after the Renaissance) must offer either French, German, or Latin as one language and may choose the second language from the following: Greek, Latin, French, German, Italian, Spanish, Russian, or another language relevant to the student's field of study. In all cases, the choice of languages offered must have the approval of the candidate's adviser. Any substitution of another language must be approved by the Director of Graduate Studies.

The graduate studies committee does not accept courses taken as an undergraduate in satisfaction of the language requirement for doctoral candidates. For students coming to doctoral work at Stanford from graduate work done elsewhere, satisfaction of a foreign language requirement is determined by the Director of Graduate Studies based on the contact hours, syllabus, reading list, etc. Transfer is not automatic.

The candidate must satisfy one language requirement by the end of the first year (that is, before registration in the following year), and the other by the end of the third year.

Foreign language requirements for the Ph.D. may be fulfilled in any of the following ways:

1. A reading examination given each quarter by the various language departments, except for Latin and Greek.
2. For Latin and Greek, an examination by the Department of English. The Latin examination is given before registration in the Autumn Quarter in order to permit those who need the course to register for Latin 3. It is also given in the eighth week of the Winter and Spring quarters, along with other department examinations for languages not tested by the Educational Testing Service.
3. Passage with a grade of 'B' or higher of a course in literature numbered 100 or higher in a foreign language department at Stanford. As an alternative for Latin, French, Italian, German, and Spanish, passage of CLASSLAT 51 and 52, FRENLANG 50, ITALLANG 50, GERLANG 52, and SPANLANG 50, respectively, with a grade of 'B' or higher.

CANDIDACY

Students are expected to file for candidacy after successful completion of qualifying procedures and, in any event, by the end of the second year of doctoral study. Candidacy is valid for five years, and may be extended, subject to satisfactory progress.

DISSERTATION

As early as possible during graduate study, a Ph.D. candidate is expected to find a topic requiring extensive original research and to seek out a member of the department as his or her adviser. The adviser works with the student to select a committee to supervise the dissertation. Candidates should take this crucial step as early in their graduate careers as possible. The committee may well advise extra preparation within or outside the department, and time should be allowed for such work.

Immediately after the dissertation topic has been approved by the adviser, the candidate should file a formal reading committee form as prescribed by the University.

The dissertation must be submitted to the adviser as a rough draft, but in substantially final form, at least four weeks before the University deadline in the quarter during which the candidate expects to receive the Ph.D. degree.

JOINT PH.D. IN ENGLISH AND HUMANITIES

The Department of English participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in English and Humanities. For a description of that program, see the "Interdisciplinary Studies in Humanities" section of this bulletin.

PH.D. IN MODERN THOUGHT AND LITERATURE

Stanford also offers a Ph.D. degree in Modern Thought and Literature. Under this program, students devote approximately half of their time to a modern literature from the Enlightenment to the present, and the other half to interdisciplinary studies. Interested students should see the "Modern Thought and Literature" section of this bulletin and consult the chair of the program.

CREATIVE WRITING FELLOWSHIPS

The Creative Writing Program each year offers five two-year fellowships in poetry and five two-year fellowships in fiction. These are not degree-granting fellowships. Information is available in the Creative Writing office, (650) 725-1208.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

NUMBERING SYSTEM

Pre-1750:

100-110 Lecture Courses
111-119 Seminar Courses

1750-1900:

120-129 Lecture Courses
130-139 Seminar Courses

Post-1900:

140-149 Lecture Courses
150-159 Seminar Courses

Required Courses:

160-169

Themes and Topics:

170-179 Lecture Courses
180-189 Seminar Courses

Courses for Advanced Undergraduates and Graduate Students:

200-289

Graduate Colloquia:

300-313

Graduate Seminars:

314-389

Writing Courses, Workshops, Individual Study:

90-99, 190-199, 290-299, 390-399

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by English department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the "Introduction to the Humanities" section of this bulletin for further information. Prospective majors in English are advised to consider satisfying their IHUM-2,3 requirements by registering for the following IHUM courses.

IHUM 37A,B. Literature into Life: Alternative Worlds—The genres of poetry, drama, and fiction from the Renaissance to the present day, focusing on the relationship between art and life. How does literature come alive on the page? What goes into a vivid representation of lived social experience? How do writers respond to historical crises? Parallel cases from art and music. GER:IHUM-2,3

IHUM 37A: 5 units, *Win (Steidle, E)*

IHUM 37B: 5 units, *Spr (Felstiner, J)*

INTRODUCTORY (FOR NON-MAJORS)

Classes for students whose major is undeclared, or who are not majoring in English.

ENGLISH 4B. Medieval Women: Faith, Love, and Learning—(English majors and others taking 5 units, register for 104B.) Writings of and about medieval women in connection with courtly love and Arthurian literature, religious and mystical writing, visual culture, and early debates about the roles of women. How women forged literary identities in the face of opposition. Readings from the courtly poets, Marie de France, Chrétien's *Lancelot*, Heloise and Abelard, male and female mystics, and Christine de Pisan. Readings in English. GER:DB-Hum

3 units, *Win (Summit, J)*

ENGLISH 9. Masterpieces of English Literature I: Chaucer, Shakespeare, Milton, and their Contemporaries—(English majors and others taking 5 units, register for 109.) Survey. Major and minor English works from the end of the Middle Ages through the end of the Renaissance. GER:DB-Hum

3 units, Spr (Evans, M)

ENGLISH 20. Masterpieces of English Literature II: From the Enlightenment to the Modern Period—(English majors and others taking 5 units, register for 120.) From the 18th to the 20th centuries. Topics include the rise of the novel, lyric and dramatic poetry, Romanticism, realism, Modernism, characterization, narrative voice, and the influence of history on literature. GER:DB-Hum

3 units, Aut (Horowitz, E)

ENGLISH 21. Masterpieces of American Literature—(English majors and others taking 5 units, register for 121.) From the Puritans to contemporary literature. Emphasis is on how Americans have defined their identity in relation to changing environments, including the wilderness encountered by first settlers, the 19th-century frontier, the early 20th-century metropolis, and the transnational and virtual spaces of the late 20th century. Readings include nonfiction by Edwards, Thoreau, and Emerson, poetry by Whitman, William Carlos Williams, and Denise Levertov, and novels by Willa Cather, John Dos Passos and Leslie Marmon Silko. GER:DB-Hum

3 units, Aut (Heise, U)

ENGLISH 22. Jane Austen into Film—(English majors and others taking 5 units, register for 122.) Jane Austen's six novels and their transformation into films from the 40s to the present. Historical motives and psychological imperatives for recreating Austen's work in cinematic form, emphasizing narrative techniques distinctive to prose and camera. Fundamentals of narrative theory and cinematic analysis. GER:DB-Hum

3 units, Win (Shloss, C)

ENGLISH 42B. The Films of Woody Allen—(English majors and others taking 5 units, register for English 142B.) Allen as one of the most influential, prolific, and controversial filmmakers. His comic vision, attitudes towards sex and gender relations, and cultural importance. The development of his career and work. GER:DB-Hum

3 units, Spr (Polhemus, R)

ENGLISH 45. Writings by Women of Color—(English majors and others taking 5 units, register for 145.) Novels, poems, and essays. Themes include family relations, identity formation, racism and colorism, gender and sexuality, spirituality, and globalization. Rhetorical and aesthetic strategies and the associated development of a method of cultural analysis. GER:DB-Hum, EC-Gender

3 units, Win (Moya, P)

ENGLISH 47. Masterpieces of Contemporary Literature—(English majors and others taking 5 units, register for 147.) British and American contemporary experimental and realist fiction. Focus is on fiction investigating love and war. GER:DB-Hum

3 units, Spr (Bourbon, B)

ENGLISH 60. Poetry and Poetics—(English majors and others taking 5 units, register for 160.) Introduction to the reading of poetry, with emphasis on how the sense of poems is shaped through diction, imagery, and technical elements of verse. GER:DB-Hum

3 units, Aut (Jenkins, N), Win (Lerer, S), Spr (Boland, E)

INTRODUCTORY SEMINARS

ENGLISH 52N. Top Ten Books—Stanford Introductory Seminar. Preference to freshmen. The books most frequently taught in U.S. English departments including classics by Nathaniel Hawthorne and F. Scott Fitzgerald and recent works by minority writers such as Toni Morrison and Maxine Hong Kingston. Cultural and historical contexts, and the aesthetic and social factors that canonize these literary supertexts. GER:DB-Hum

3 units, Win (Jones, G)

ENGLISH 53N. Winners of the Nobel Prize in Literature—Stanford Introductory Seminar. Preference to freshmen. The nature of meritorious contemporary fiction and the cultural politics and economics of prize winning. The actual process of selection; what should be taken into account in making judgments about an award such as the Nobel Prize. Writers such as John Coetzee, Günter Grass, Toni Morrison, Elfrieda Jelinek, V.S. Naipaul, Gao Xingjian, José Saramago, and Gabriel García Márquez. GER:DB-Hum

3 units, Win (Shloss, C)

ENGLISH 62N. Eros in Modern American Poetry—Stanford Introductory Seminar. Preference to freshmen. Anne Carson, treating love from Sappho to Socrates, shows how the Greeks derived their philosophy from the erotic poetic tradition. Readings include: Carson's own poetry, which locates erotic desire in the larger context of the desire for knowledge; classic Japanese haiku masters such as Basho; and William Carlos Williams, Louise Bogan, and C.K. Williams. GER:DB-Hum

3 units, Win (Fields, K)

ENGLISH 64N. Growing Up in America—Stanford Introductory Seminar. Preference to freshmen. How do race, class, gender, sexuality, and geography affect a person's experience of belonging to this country? The diversity of childhood and young adult experiences of people who have grown up in America. Fictional and autobiographical narratives and their rhetorical and aesthetic strategies. GER:DB-Hum

3 units, Aut (Moya, P)

ENGLISH 66N. Homage: The Art of Influence—Stanford Introductory Seminar. Preference to sophomores. Novels and short stories that illuminate the nature and significance of intertextuality. Emphasis is on playful and exploratory rather than theoretical representations of gender and sexual orientation. Works include Ian McEwan's *Saturday*, E. M. Forster's *Howard's End*, Zadie Smith's *On Beauty*, Virginia Woolf's *Mrs. Dalloway*, and Michael Cunningham's *The Hours*. No background in literary criticism required. GER:DB-Hum

3 units, Spr (Tallent, E)

ENGLISH 68N. Mark Twain and American Culture—(Same as AMSTUD 68N.) Stanford Introductory Seminar. Preference to freshmen. Mark Twain defined the rhythms of American prose, the contours of its moral map, and its promise, failures, foibles, and flaws. Focus is on how his work provides a window on his time and speaks to the present. Sources include his travel books, journalism, short stories, and novels. GER:DB-Hum

4 units, Aut (Fishkin, S)

ENGLISH 69Q. Sources of Global Challenges Today, Possibilities for Global Solutions: A Literary Exploration—Stanford Introductory Seminar. Preference to sophomores. Concerns central to literary study, comparative study in race and ethnicity, and African and African American Studies as expressed in fiction from Africa, the Caribbean, the U.S., and Hawai'i. Issues include: relations between the West and the Muslim world; class and race in the U.S.; the shift of world populations from rural society to the metropolis; international immigration and refugee situations; and how women's lives are impacted by society, and how they shape and change it. Opportunities for dialogue with members of local ethnic and religious communities. GER:DB-Hum

3-5 units, Aut (Drake, S)

ENGLISH 77N. Living in the Past: Italy in the Anglo-American Imagination—Stanford Introductory Seminar. Preference to freshmen. Italy as metaphor. English and American images of Italy, its people, and its culture from the Renaissance to the present. GER:DB-Hum

3 units, Aut (Evans, M)

ENGLISH 82Q. Shakespeare's Plays—Stanford Introductory Seminar. Preference to sophomores. Eight representative plays; sonnets. Student papers provide topics for discussion. Students direct and perform scenes from the plays studied. GER:DB-Hum

5 units, Win (Rebholz, R)

ENGLISH 83Q. Playwriting: A Workshop in Craft—Stanford Introductory Seminar. Preference to sophomores. The fundamentals of crafting a stage play, including genre, dialogue, characterization, and plot. Professional models for such craft elements, and newer approaches. Students develop a dramatic idea into a more polished version of a scene or short one-act play to demonstrate the elements of stagecraft.

4 units, Aut (DiPirro, K)

ENGLISH 84N. Workshop in Shakespeare and Performance—Stanford Introductory Seminar. Preference to sophomores. Textual and performance analysis and scene work of five major Shakespearean works. Film viewings reveal how different visions of a play emerge through the process of theatrical production and contrast Shakespeare's techniques with modern ones. No background in acting or theater required. GER:DB-Hum

3 units, Win (Friedlander, L)

PRE 1750

Lecture courses: 100-109

Seminar courses: 110-119

ENGLISH 102. Chaucer—Chaucer's verbal art in the context of medieval literary traditions, focusing on *The Canterbury Tales*. GER:DB-Hum

5 units, Spr (Lerer, S)

ENGLISH 104B. Medieval Women: Faith, Love, and Learning—(Same as 4B; see 4B.) GER:DB-Hum

5 units, Win (Summit, J)

ENGLISH 105. The Renaissance—Literature of 16th- and 17th-century England. Readings include More's *Utopia*, Sidney's *Defence of Poetry*, Donne's *Songs and Sonnets*, and Milton's *Paradise Lost*. GER:DB-Hum

5 units, Aut (Wyatt, M)

ENGLISH 107A. Eighteenth-Century Satire—Satire as a cultural universal. The commitment and intensity of 18th-century British satire, by turns funny, brutal, scabrous, and melancholy. How satire tends to focus on sex and power. The role of satire in contemporary American culture: when does speech become too hot to handle? Authors include Horace, Juvenal, Swift, Pope, Johnson, Burney, Voltaire, and Orwell. GER:DB-Hum

5 units, Win (Vermeule, B)

ENGLISH 109. Masterpieces of English Literature I: Chaucer, Shakespeare, Milton, and their Contemporaries—(Same as 9; see 9.) GER:DB-Hum

5 units, Spr (Evans, M)

ENGLISH 112A. Wicked Witches of the West: Dangerous Women in Greek and Shakespearean Tragedy—Workshop. Women who fascinate, control, and frighten men in classical and Elizabethan drama. The presentation of women in three pairs of Greek and Elizabethan plays and in two 20th-century works. Theatrical styles of each period through doing scenes, watching films, and the history of theater. No background in performing required. GER:DB-Hum

5 units, Aut (Friedlander, L)

ENGLISH 113C. The Two Elizabeths—Parallel issues in the reigns of Elizabeth I (1558-1603) and Elizabeth II (1953-present) through the written cultures of their periods, and critical essays from disciplines and sources including film and music. Themes include insularity, language, religion, politics, class, gender, the other, popular culture, and critics. GER:DB-Hum

5 units, Aut (Wyatt, M)

ENGLISH 115A. Shakespeare and Modern Critical Developments—Approaches include gender studies and feminism, race studies, Shakespeare's geographies in relation to the field of cultural geography, and the importance of religion in the period. GER:DB-Hum

5 units, Spr (Parker, P)

ENGLISH 116A. The Poetry of John Milton—Milton's major and minor poems including *Nativity Ode*, *Comus*, *Lycidas*, *Paradise Lost*, *Paradise Regained*, and *Samson Agonistes*, in the context of 17th-century social, political, religious, and intellectual history. GER:DB-Hum

5 units, Spr (Evans, M)

ENGLISH 116C. Restoration Literature—The 1660 return of the court after the Civil War and the flowering of literature and culture much of which focused on the king as charismatic and fascinating, yet embittered, lazy, dissolute, and promiscuous. The ambivalence provoked by the Stuart court. Literature that focuses on the figure of Satan, such as *Paradise Lost*. Why Satan becomes such a powerful figure in the culture's imagination. Issues such as transgression, sexuality, regicide, and heroism. GER:DB-Hum

5 units, Win (Vermeule, B)

1750-1900

Lecture courses: 120-129

Seminar courses: 130-139

ENGLISH 120. Masterpieces of English Literature II: From the Enlightenment to the Modern Period—(Same as 20; see 20.) GER:DB-Hum

5 units, Aut (Horowitz, E)

ENGLISH 121. Masterpieces of American Literature—(Same as 21; see 21.) GER:DB-Hum

5 units, Aut (Heise, U)

ENGLISH 122. Jane Austen into Film—(Same as 22; see 22.) GER:DB-Hum

5 units, Win (Shloss, C)

ENGLISH 123. American Literature and Culture to 1855—(Same as AMSTUD 150.) Major issues in early American cultural and literary history; developments in the fine and domestic arts; and methodological issues central to American Studies. Texts include Cotton Mather and Melville. GER:DB-Hum, EC-AmerCul

5 units, Win (Fliegelman, J)

ENGLISH 124. The Eighteenth-Century British Novel—Authors include Behn and Sterne. GER:DB-Hum

5 units, Aut (Castle, T)

ENGLISH 126F. Two Victorian Autobiographies: David Copperfield and Jane Eyre—How these female and male narratives of orphanhood make heroic selves of the authors' alter egos; how Brontë and Dickens tell the story of a cast-off child who journeys through writing toward an articulate authority. The novels as fictional autobiography, gendered versions of the 19th-century trope of orphanhood, and parts of the time in which they were written. GER:DB-Hum

5 units, Spr (Paulson, L)

ENGLISH 134A. Gothic and Historical Fiction in Nineteenth-Century Britain—Gothic templates and historical contexts in romance novels by authors including Scott, Austen, and Charlotte Brontë. GER:DB-Hum

5 units, Win (Dekker, G)

ENGLISH 134C. Detectives, Criminals, and Monsters—The role of monsters and criminals in 19th-century literature, and how the hero, often a detective, turns out to be the villain or tracks the monster to his own house. Detective stories by Edgar Allan Poe and Arthur Conan Doyle, gothic novels including *Frankenstein* to *Dracula*, and films including *Nosferatu* and *Apocalypse Now*. GER:DB-Hum

5 units, Aut (Horowitz, E)

ENGLISH 135. Victorian Poetry—Rhythms, stanzas, topics, words, and ideas produced by poets including Alfred Tennyson, Matthew Arnold, Christina and Dante Gabriel Rossetti, Robert Browning, Thomas Hardy, and Gerald Manley Hopkins. Social contexts including science, masculinity, religion, history, aestheticism, gender, and sexuality. GER:DB-Hum

5 units, Spr (Gigante, D)

ENGLISH 135E. William Blake: Poet and Painter—(Same as HUMNTIES 194G.) Introduction to the illuminated poetry of William Blake, romantic visionary, poet, artist, religious renegade, political revolutionary, philosopher, mythological historiographer, social misfit, and critic. GER:DB-Hum

5 units, Spr (*Gigante, D*)

ENGLISH 135G. The Brontes—The novels and lives of Charlotte, Anne, and Emily Bronte in the context of mid-Victorian culture. Readings include *Jane Eyre*, *Villette*, *Tenant of Wildfell Hall*, and *Wuthering Heights*. GER:DB-Hum

5 units, Spr (*Alfano, C*)

ENGLISH 136. Romantic Poetry and Poetics—Major Romantic writers including William Blake, William Wordsworth, Samuel Taylor Coleridge, Percy Bysshe Shelley, and John Keats. Focus is on form such as the lyrical ballad, ode, epic romance, and closet drama. GER:DB-Hum

5 units, Aut (*Gigante, D*)

ENGLISH 136A. The Lyric in 19th-Century Britain—Development of the lyric through the 19th century. Social, political, and economic pressures on lyric. How poetry expresses relations in society. Poems by Wordsworth, Keats, Shelley, Tennyson, Browning, D.G. Rossetti, C. Rossetti, Arnold, and Hopkins. GER:DB-Hum

5 units, Aut (*Rovee, C*)

ENGLISH 138C. Huckleberry Finn and American Culture—(Same as AMSTUD 138C.) From publication to the present, Mark Twain's *Adventures of Huckleberry Finn* has generated widespread disagreement over what it is, what it does, and why it should be valued. The literature, history, and popular culture that shaped the novel, and that it helped shape. Topics include vernacular traditions in American literature, the history of racism in American society, and the role of African American voices in shaping the text. GER:DB-Hum

5 units, Win (*Fishkin, S*)

POST 1900

Lecture courses: 140-149

Seminar courses: 150-159

ENGLISH 140A. Imagining the Holocaust—Literature, music, art, and photography that emerged from the European Jewish catastrophe. Sources include Elie Wiesel, Primo Levi, Dan Pagis, Paul Celan, Charlotte Salomon, Bernard Malamud, Philip Roth, and Cynthia Ozick. Guest lecture by Holocaust survivor. GER:DB-Hum

5 units, Spr (*Felstiner, J*)

ENGLISH 141. British Literature and Culture of the 1930s—A period shadowed by economic crisis and impending war. Sources include: novels by Woolf, Isherwood, Bowen, and Waugh; poetry by Auden, Spender, and Eliot; documentary and dramatic films; and painting and photography. GER:DB-Hum

5 units, Spr (*Jenkins, N*)

ENGLISH 142. American Film: The Western—The American western movie as a perennial force complementing American film noir. Films by classic directors such as Boetticher, Hawks, Ford, Altman. Representation of male roles in western movies. GER:DB-Hum

5 units, Aut (*Fields, K*)

ENGLISH 142B. The Films of Woody Allen—(Same as 42B; see 42B.) GER:DB-Hum

5 units, Spr (*Polhemus, R*)

ENGLISH 144. British Modernism—How modernist poems and novels attempt to link the grammar of sentences to the sense and nonsense of lives, minds, and social worlds. The complex and fantastic linguistic, psychological, and social worlds of modernist literature as revealing the sense of people's lives or as entrapments in aesthetic extravagance. GER:DB-Hum

5 units, Aut (*Bourbon, B*)

ENGLISH 145. Writings by Women of Color—(Same as 45; see 45.) GER:DB-Hum, EC-Gender

5 units, Win (*Moya, P*)

ENGLISH 145E. Golden States: California in Film and Fiction—Mythologies of California in the writings of authors such as Mark Twain, Nathaniel West, General Vallejo, Ambrose Bierce, John Steinbeck, Sui Sin Far, Walter Mosley, Robinson Jeffers, and Allen Ginsburg, and in movies such as *Sunset Boulevard*, *A Star is Born*, *The Maltese Falcon*, *Rebel Without a Cause*, *Chinatown*, *L.A. Confidential*, and *Pulp Fiction*. GER:DB-Hum

5 units, Spr (*Moser, J*)

ENGLISH 146. Development of the Short Story: Continuity and Innovation—Required for Creative Writing emphasis and minor. Writers include Gogol, Flaubert, Chekhov, Woolf, and Munro with the majority of texts Modernist or earlier. Emphasis is on the conversation among writers, how texts influence each other, and imaginative leaps resulting in innovations in form. Writers' rendering of gender and sexual orientation. No previous experience in English courses required. GER:DB-Hum

5 units, Win (*Tallent, E*)

ENGLISH 147. Masterpieces of Contemporary Literature—(Same as 47; see 47.) GER:DB-Hum

5 units, Spr (*Bourbon, B*)

ENGLISH 150. Modern Poetry and the Visual Arts—The relationship between photography, painting, and sculpture, and poetry in the 20th century. GER:DB-Hum

5 units, Win (*Di Piero, S*)

ENGLISH 150C. W.H. Auden—His plays, film scripts, opera libretti, essays, lyrics, and longer poems in the context of 20th-century poetic and cultural history. His impact on later writers, and redeployments of Auden and his writing at moments in British popular culture such as the Princess of Wales' funeral. GER:DB-Hum

5 units, Win (*Jenkins, N*)

ENGLISH 150E. Contemporary American Lyric Poetry—Why today's American poets often think that lyric genre, form, or modality enables access to and creation of a literary-aesthetic experience unique for its potential contributions to cognitive, ethical, and political agency. Poets include Hass, Graham, Ginsberg, Ashbery, Baraka, Guest, Palmer, Howe, and Mackey. Criticism and theory. Prerequisite: background in 19th-20th century poetry. GER:DB-Hum

5 units, Spr (*Kaufman, R*)

ENGLISH 151. American Imaginations—Major American poets of the modern period, emphasizing the pattern making idiosyncrasies of each poet. Poets may include: William Carlos Williams, Marianne Moore, Elizabeth Bishop, Lorine Niedecker, and Robert Hayden. GER:DB-Hum

5 units, Win (*Di Piero, S*)

ENGLISH 151A. Poetry after Postmodernism: Robert Duncan and his Legacies—Late modernist or postmodernist? Readings in Duncan's poetry and prose, and his fellow poets and critics, emphasizing how they understand their work in relation to earlier modernism and incipient postmodernism. How they influenced contemporary poetry and art in light of the question in current American culture of what comes after postmodernism. GER:DB-Hum

5 units, Win (*Kaufman, R*)

ENGLISH 152G. Harlem Renaissance—African American cultural and literary expression during the 20s and 30s concerning relationships between the talented tenth and the folk, the new Negro and modernity, art and politics, white patronage and black creativity, racial expression and class aspiration, American patriotism and black cultural nationalism, racial memory and Africa, passing and colorism, racial uplift and sexual transgression, and race pride and religious apostasy. Sources include poetry, prose, and aesthetic and political manifestos, graphic arts, and music. GER:DB-Hum

5 units, Spr (*Elam, M*)

ENGLISH 153G. Technology, Ecology, and the Imagination of the Future—(Same as STS 114.) Seminar. Literary visions of the future from the 60s to the present. How such texts imagine new and existing technologies in interrelation with the evolution of natural ecosystems. The development of wild habitats, alterations of the human body, and visions of the future city. The role of images and stories about globalization. Literary, scientific, and technical texts. GER:DB-Hum
5 units, Spr (Heise, U)

ENGLISH 154E. Twentieth-Century Irish Literature—Plays, poems, short stories, and novels. Writers include James Joyce, William Yeats, Mary Lavin, Kate O'Brien, William Trevor, Seamus Heaney, and Samuel Beckett. How the writer can sustain imaginative freedom and literary experiment in the face of a turbulent history. GER:DB-Hum
5 units, Spr (Boland, E)

REQUIRED COURSES

Lecture courses: 160-169; there are no required seminar courses.

ENGLISH 160. Poetry and Poetics—(Same as 60; see 60.) GER:DB-Hum, WIM
5 units, Aut (Jenkins, N), Win (Lerer, S), Spr (Boland, E)

ENGLISH 163. Shakespeare—Major plays emphasizing theatrical representation of extreme characters. GER:DB-Hum
5 units, Aut, Win (Orgel, S)

THEMES AND TOPICS

Lecture courses: 170-179
Seminar courses: 180-189

ENGLISH 170A. Introduction to Critical Theory: Literary Theory and Criticism Since Plato—(Graduate students register for 270A.) The history of attempts to define, locate, or engage the literary; to understand it in relation to philosophy, history, politics, sexuality, gender, race, psychology, and language; and to understand how literature, art, and the aesthetic realm contribute to objective knowledge and ethical and sociopolitical agency. GER:DB-Hum
5 units, Win (Kaufman, R)

ENGLISH 172E. The Literature of the Americas—(Same as COMPLIT 142.) Representations of the creation of an American new world experience, myths of America as utopia, and critiques of notions of the self and the nation to which such myths give rise in political, historical, literary, and mass media forms. Readings include Columbus, Bernal Díaz del Castillo, Aztec codices, Sor Juana, Tocqueville, Fenimore Cooper, Whitman, Machado de Assis, Mario de Andrade, Martí, Neruda, Williams, Rulfo, Faulkner, Morrison, and Sandra Cisneros. GER:DB-Hum, EC-AmerCul
5 units, Aut (Greene, R; Saldívar, R)

ENGLISH 173. American Comedy and Satire: Topics in Laughter and Ethics—Theories and history of American comedy and satire with focus on ethical dimensions. The ability of what Mark Twain called the assault of laughter to dethrone power, pretension, and social inequality. Theories of laughter by thinkers including Kant, Bakhtin, and Bergsons. Fiction, film and performance, including works by Mark Twain, Charlie Chaplin, and Kurt Vonnegut. GER:DB-Hum
5 units, Spr (Obenzinger, H)

ENGLISH 180D. Writing the Unhomely: The Afro-Caribbean Experience—The metaphorical yet tangible Afro-Caribbean experience of the unhomely: the forced uprooting of the middle passage, the sociopolitical and historical unrootedness in the New World, the voluntary uprooting of migration to Europe and the U.S. The idea of home and the homeland in fictional and theoretical texts of the Anglophone and Francophone Caribbean diaspora. GER:DB-Hum
5 units, Spr (Glover, K)

ENGLISH 181A. Adventures in Religious Poetry—(Same as RELIGST 181A.) Poetry manifesting religious themes from Western and Chinese traditions. GER:DB-Hum
5 units, Win (Yearley, L; Fields, K)

ENGLISH 182A. Global Literary Citizenship—The relationship between national literary traditions and transnational critical practices; changing markets for literature and the forces of globalization that shape them; cultural phenomena such as taste, book reviewing and literary prizes; the evolution of literary value and its production; and the intimate and personal experience of reading in a global public sphere. Sources include recent fiction. GER:DB-Hum
5 units, Aut (Gilmore, L)

ENGLISH 182E. Photography and Literature—(Same as HUMNTIES 194R.) How issues raised by birth of photography and photography's prehistory are manifested in 19th-century literature. Readings in photographic theory by Marx, Benjamin, Barthes, Sontag, and Batchen; poems by Wordsworth, Browning, and Tennyson; and novels by Shelley, Dickens, and Wilde. GER:DB-Hum
5 units, Spr (Rovee, C)

ENGLISH 183A. The Paranoid Imagination: Case Studies in Literature, Theory, and Film—Preference to majors. The idea of a paranoid aesthetic in postwar American culture and modernity in general. Novels by Himes, Pynchon, and DeLillo; theoretical texts about modernity, abstract systems, risk, technology, and environmental illness by cultural analysts such as Anthony Giddens, Fredric Jameson, Michel Foucault, Richard Hofstadter, Bruce Robbins, and Kathleen Woodward. GER:DB-Hum
5 units, Spr (Ngai, S)

ENGLISH 183B. Problems in Literature and Ethics—The study of literature as an education in how to picture and understand human situations. Because literary fictions represent persons, events, and actions, they concern what philosophy calls ethics. How fictions and poems can reveal the possibilities and troubles of people's lives and help them to think about how to live. How ways of reading can be modes of practical reasoning. GER:DB-Hum
5 units, Spr (Bourbon, B)

ENGLISH 183C. Feminist Theory and Twentieth-Century Culture—Major theoretical writings with a focus on internal debates within feminism. Writers include Laura Mulvey, Mary Ann Doane, Linda Williams, Susan Gubar, Denise Riley, Audre Lorde, Monique Wittig, Judith Butler, Rita Felski, Barbara Johnson, and Rey Chow. GER:DB-Hum
5 units, Spr (Ngai, S)

ENGLISH 183D. The Author as Problem—Preference to English majors. Changing concepts of the author in theories of literary interpretation including T.S. Eliot and Stanley Fish. Authorship as a lens for examining modern ideas about property, originality, reproducibility, anonymity, and personhood in works by or about writers perceived as controversial: Henry James, Sylvia Plath, Philip Roth, Araki Yasusada, J.M. Coetzee, and Richard Powers. GER:DB-Hum
5 units, Win (Ngai, S)

ENGLISH 183E. Wild Lives: British Autobiographers from James Boswell to Marianne Faithfull—Why personal writing occupies a controversial place in modern life and letters. Writers include: James Boswell, Mary Wollstonecraft, William Hazlitt, Samuel Butler, Robert Graves, Vera Brittain, Virginia Woolf, J.R. Ackerley, Cyril Connolly, Elizabeth Bowen, Nancy and Jessica Mitford, Janet Frame, Hilary Mantel, and Marianne Faithfull. GER:DB-Hum
5 units, Win (Castle, T)

ENGLISH 184C. Texts in History: Medieval to Early Modern—(Same as HUMNTIES 162.) Priority to students in the Humanities honors program. The impact of change from the Middle Ages to the early modern world; how historical pressures challenged conceptions of artistic form, self, divine, and the physical universe. Interdisciplinary methods of interpretation. Texts include: Aristotle, *On the Soul*; Attar, *The Conference of the Birds*; Dante, *Inferno*; Chaucer, *Canterbury Tales*; Christine de Pizan, *The Book of the City of Ladies*; Letters of Columbus; Machiavelli, *The Prince*; Luther, *The Bondage of the Will*; Montaigne, *Essays*; Marlowe, *Doctor Faustus*; poems by John Donne and Lady Mary Wroth; Shakespeare, *Othello*; and works of art. GER:DB-Hum

5 units, Win (Brooks, H)

ENGLISH 185A. Illness Narratives—(Same as HUMBIO 176.) Interdisciplinary. How the experience of illness is constituted at the intersection of biology and culture. The concept of narrative medicine as a context for examining fiction and nonfiction by patients including Virginia Woolf and William Styron, and by physicians including William Carlos Williams and Rafael Campo. Classic essays from medical journals or contemporary theorists. The intertwined perspectives of biology and culture in the context of unseen forces such as the healthcare expenditure and uneven access to it. GER:DB-Hum

3 units, Aut (Morris, D)

ENGLISH 186A. American Hauntings—Cultural, psychological, social, and political dynamics of haunting in American literature, from the early national period to the late 20th century. Sources include ghost stories and other instances of supernatural, emotional, or mental intervention. Authors include Charles Brockden Brown, Washington Irving, Edgar Allan Poe, Nathaniel Hawthorne, Louisa May Alcott, Charlotte Perkins Gilman, Charles Chesnutt, Henry James, Edith Wharton, Toni Morrison, and Stephen King. GER:DB-Hum

5 units, Spr (Richardson, J)

UNDERGRADUATE WORKSHOPS AND DIRECTED READING

ENGLISH 194. Individual Research—See section above on Undergraduate Programs, Opportunities for Advanced Work, Individual Research.

5 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 195. Ad Hoc Undergraduate Seminar—Undergraduates (at least three) who wish, in the following quarter, to study a subject or an area not covered by regular courses may plan an informal seminar and approach a member of the department to supervise it. A syllabus should be submitted to the director of undergraduate advising at least two weeks before the end of the quarter. No more than 5 units of credit are given for 195 and/or 198 in one quarter. 195 may not be used to fulfill departmental area or elective requirements without permission. May be repeated for credit.

1-5 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 196A. Honors Seminar: Critical Approaches to Literature—Required of students in the English honors program.

5 units, Aut (Summit, J)

ENGLISH 197. Seniors Honors Essay—In two quarters.

1-10 units, Aut, Win, Spr (Staff)

ENGLISH 198. Individual Work—Undergraduates who wish to study a subject or area not covered by regular courses may, with consent, enroll for individual work under the supervision of a member of the department. 198 may not be used to fulfill departmental area or elective requirements without consent. Group seminars are not appropriate for 198.

1-5 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 199. Senior Independent Study—Open, with department approval, to seniors majoring in English who wish to work throughout the year on a 10,000 word critical or scholarly essay; see note under “Honors Program” above. Applicants submit a sample of their expository prose, proposed topic, and bibliography to the Director of Undergraduate Studies before preregistration in May of the junior year. Each student accepted is responsible for finding a department faculty adviser.

1-10 units, Aut, Win, Spr (Staff)

CREATIVE WRITING

ENGLISH 28B. The Occasions of Poetry

5 units, Win (Pinsky, R)

ENGLISH 29. Reading for Writers

5 units, Spr (Staff)

ENGLISH 90. Fiction Writing—Problems of narrative and imaginative writing. Prerequisite: PWR 1.

5 units, Aut (Altschul, A; Brelinski, V; O’Keefe, J; Watrous, M),

Win (Altschul, A; Brelinski, V; O’Keefe, J), Spr (Altschul, A;

Brelinski, V; O’Keefe, J; Pierce, N)

ENGLISH 92. Reading and Writing Poetry—Issues of poetic craft. How elements of form, music, structure, and content work together to create meaning and experience in a poem. May be repeated for credit. Prerequisite: PWR 1.

5 units, Aut (Michas-Martin, S; Snider, B), Win (Snider, B),

Spr (Book, S; Michas-Martin, S)

ENGLISH 94. Introduction to the Creative Writing Minor—For minors in creative writing. The forms and conventions of the contemporary short story and poem. How form, technique, and content combine to make stories and poems organic. Prerequisite: 90 or 92.

5 units, Aut (Johnson, A), Spr (Snider, B)

ENGLISH 94A. Creative Nonfiction—Historical and contemporary as a broad genre including travel and nature writing, memoir, biography, journalism, and the personal essay. Students use creative means to express factual content.

5 units, Aut (Johnson, A), Spr (Kealey, T)

ENGLISH 95. Form and Theory of the Novel—Seminar. For writers. How form and technique reveal the writer’s world view. How writers connect detail, description, action, dialog, and thought to create scenes. How the balance of these elements creates an author’s voice. How scenes build tension, create empathy, propel story, reveal character, explore setting, and raise or contest ideas. Tradition, conventions, design, narrative strategy, research, and historical perspective. Guest instructors from Stanford’s Jones Lecturers in fiction.

5 units, Spr (Johnson, A; Kealey, T)

ENGLISH 96. New Media Writing—How technology is changing the conversation about creativity, including the writer in the new age, and changes in literary process and product. The Works Progress Administration Writers’ Project which foreshadowed new media. How technologies are changing the act of writing, and what is gained or lost with hypertext, voice-to-text, and shared author software. Do new media just change the surface of the literary process, or re-imagine the center of it?

5 units, Win (Johnson, A; Kealey, T)

ENGLISH 190. Intermediate Fiction Writing—May be taken twice. Lottery. Priority to last quarter/year in school, majors in English with Creative Writing emphasis, and Creative Writing minors. Prerequisite: 90.

5 units, Aut (Altschul, A; Brelinski, V), Win (O’Keefe, J; Watrous, M),

Spr (Altschul, A; MacDonald, D; Puchner, E)

ENGLISH 190F. Fiction Writing for Film—Workshop. For screenwriting students. Story craft, structure, and dialogue. Assignments include short scene creation, character development, and a long story. How fictional works are adapted to screenplays, and how each form uses elements of conflict, time, summary, and scene. Prerequisite: 90.

5 units, Win (Kealey, T)

ENGLISH 190P. Poetry and Prose in Conversation—Workshop. A dialogue between poets and prose writers. What do poetry and prose have in common? What can the understanding of one give to the practice of the other? Prerequisite: 90 or 92.

5 units, Win (Altschul, A; Michas-Martin, S)

ENGLISH 192. Intermediate Poetry Writing—May be taken twice. Lottery. Priority to last quarter/year in school, majors in English with Creative Writing emphasis, and Creative Writing minors. Prerequisite: 92.

5 units, Aut (Snider, B), Win, Spr (Michas-Martin, S)

ENGLISH 290A. Advanced Fiction Writing—Workshop critique of original short stories or novel. Prerequisites: manuscript, consent of instructor, and 190-level fiction workshop.

5 units, Aut (MacDonald, D), Spr (Tallent, E)

ENGLISH 292. Advanced Poetry Writing—Promising student poets write poetry in an atmosphere of mutual aid. Students chosen by instructor.

5 units, Spr (Snider, B)

ENGLISH 390. Graduate Fiction Workshop—For Stegner fellows in the writing program. May be repeated for credit. Prerequisite: consent of instructor.

3 units, Aut (L'Heureux, J), Win (Tallent, E), Spr (Wolff, T)

ENGLISH 392. Graduate Poetry Workshop—For Stegner fellows in the writing program. May be repeated for credit. Prerequisite: consent of instructor.

3 units, Aut (Fields, K), Win (Boland, E), Spr (Di Piero, S)

ADVANCED UNDERGRADUATE/GRADUATE

ENGLISH 200. Introduction to Old Norse—(Same as COMPLIT 240.) The literary language of medieval Scandinavia known as Old Norse or Old Icelandic. Goal is to gain a reading knowledge to explore poetry and prose. N. European mythology, historical and social change, and the narrative and imagistic artistry of medieval Scandinavian culture. Learned, courtly, and ecclesiastical contexts; narratives of violence, power, and moral argument. Texts to be read in Old Norse include *Hrafinkel's Saga*, *Gylfaginning*, and *Hamdismal*. Background reading in translation from major works of the tradition including Snorri Sturluson's *Edda* and *Njal's Saga*. Recommended: course work in German, Old English, or historical linguistics.

4-5 units, Win (Lerer, S)

ENGLISH 223E. Whitman and Dickinson

5 units, Aut (Fliegelman, J)

ENGLISH 230B. The Novel in Europe: The Bourgeois Age, 1848-1900—(Same as COMPLIT 230B.) New forms that make sense of historical novelties and address new segments of the reading public during the period when the industrial world consolidates in western Europe. Authors include Dickens, Flaubert, Dostoevsky, Zola, Doyle, and Stevenson.

5 units, Aut (Moretti, F)

ENGLISH 251. Donne and His Contemporaries—Donne's dramatic realism and poetic innovations in the context of contemporary poets, including Jonson, Herbert, and Marvell; his influence on modern poets such as Browning, Eliot, and Rich. How major intellectual and cultural changes in Donne's lifetime left their mark on his writing.

5 units, Aut (Brooks, H)

ENGLISH 252. English Renaissance Literature in the European Context—The impact of translation from classical and contemporary continental languages in the elaboration of England's native literary culture. Italian and French poetic models in English; Hoby/Castiglione, *The Courtier*; Golding/Ovid, *The Metamorphoses*; North/Plutarch, *The Lives of the Noble Grecians and Romans*; Harington/Ariosto, *Orlando Furioso*; Florio/Montaigne, *The Essayes*; Shelton/Cervantes, *Don Quixote*; The King James Bible. No knowledge of foreign languages required.

5 units, Win (Wyatt, M)

ENGLISH 260G. Century's End: Race, Gender, and Ethnicity at the Turn of the Century—How race, gender, and ethnicity were constructed in America from 1890-1914. Works by Anna Julia Cooper, Charlotte Perkins Gilman, Mark Twain, Ida B. Wells, Theodore Dreiser, Paul Laurence Dunbar, W.E.B. Du Bois, Abraham Cahan, and James Weldon Johnson. The cultural and historical context that shaped them through contemporary archival materials.

5 units, Spr (Fishkin, S)

ENGLISH 262. The Other America: Writing in and of the Caribbean—Socio-aesthetic concerns in the literature of the Caribbean. Focus is on novels of 20th-century Francophone and Anglophone Afro-Caribbean writers. Constructs such as pan-Africanism, postcolonialism, and tropicalizing discourses. The relationship between Caribbean writers and European literary culture with respect to social and cultural conceptions of the modern. How Caribbean writers represent their landscapes, histories, and themselves.

5 units, Spr (Glover, K)

ENGLISH 270A. Introduction to Critical Theory: Literary Theory and Criticism Since Plato—(For graduate students; see 170A.)

5 units, Win (Kaufman, R)

ENGLISH 277B. The Novels of Virginia Woolf—Six major novels of Virginia Woolf and her place in the modernist pantheon.

5 units, Win (Castle, T)

ENGLISH 279G. Joseph Conrad—Conrad's fictions as a way of asking what justifications are adequate for modern literature and for people's lives. The ethical crisis attending the modernist sense that nothing matters, and the countervailing sense that a peculiar attention to words can be the means of redeeming what people believe to matter.

5 units, Aut (Bourbon, B)

ENGLISH 293. Literary Translation—Seminar and workshop. For undergraduates and graduate students. The art and practice of literary translation; its tradition, principles, and questions. Final project is a translation and commentary on work of the student's choosing. Recommended: knowledge of a foreign language and experience in imaginative writing.

3-5 units, Win (Felstiner, J)

ENGLISH 296. Introduction to Critical Theory: Literary Theory and Criticism Since Plato—Required colloquium for incoming M.A. students. Contemporary theoretical movements. Topics such as the role of the intellectual in American life, the place of theory and politics in literary study, and what it means to be an academic writer. How different methodological approaches have been fruitful or not in analyzing specific texts.

5 units, Aut (Vermeule, B)

GRADUATE COLLOQUIA

ENGLISH 300B. The Bible and Literature—(Same as COMPLIT 343.) Readings from Genesis to Revelation; other texts include Dante, medieval drama, Shakespeare, Spenser, Renaissance lyric, Milton, 19th- and 20th-century poetry, and British, American, African American, and African novels. Topics: citations in radical and hegemonic political contexts; the influence on prototypes of race/gender difference; the relation between biblical eschatology and literary structures; and Song of Songs and the history of lyric.

5 units, Spr (Parker, P)

ENGLISH 304. The Great Age of the English Essay: Addison to DeQuincey—How this characteristic form of 18th-century literature was responsible for the making of the middle class and forging its taste and values through personal reflections, social critique, and a multiplicity of styles including the confessional and the parodic. The context of Enlightenment and Romantic culture including politics, print culture, social life, and manners.

5 units, Aut (Gigante, D)

ENGLISH 306. American Enlightenment—Major issues and texts, 1750-1815.

5 units, Spr (Fliegelman, J)

ENGLISH 308B. Gilded Age American Literature—American literature between the Civil War and WWI in relation to major cultural and literary developments such as regionalism, realism, and naturalism, and major political and social questions such as industrialism and economic inequality, race and black civil rights, the increased agitation for women's suffrage, and mass migration from southern and eastern Europe.

5 units, Win (Jones, G)

ENGLISH 309A. Novel of the Americas—(Same as COMPLIT 329.) The possibility of identifying aesthetic visions of an American imaginary in terms not defined by nationalist ideologies but open to the consequences of transnational forces. How America has been invented as a category in geographical and sociocultural terms. Readings include Willa Cather's *Death Comes for the Archbishop*, Faulkner's *Absalom, Absalom*, Mariano Azuela's *The Underdogs*, Toni Morrison's *Beloved*, Alejo Carpentier's *The Kingdom of this World*, and Silko's *Almanac of the Dead*.
5 units, Win (Saldívar, R)

ENGLISH 309N. Modern Poetry and Frankfurt School Aesthetics—The aesthetic theories and criticism of the Frankfurt School. How and why Benjamin and Adorno stress the centrality of Baudelairean experimental poetics for subsequent progressive or advanced art and critical theory. Later 20th-century poetic and critical materials in relation to previously established Frankfurt coordinates.
5 units, Spr (Kaufman, R)

ENGLISH 311A. The Literature of the First World War—British and American novels, poems, and stories written during or in the decade after WWI. Works by Robert Graves, Wilfred Owen, Siegfried Sassoon, Vera Brittain, Rebecca West, Edward Blunden, Ernest Hemingway, and Virginia Woolf. Films may include Renoir's *Grand Illusion*, Attenborough's *Oh What a Lovely War*, and Tavernier's *Life and Nothing But*.
5 units, Aut (Castle, T)

SEMINARS

ENGLISH 314. Epic and Empire—(Same as COMPLIT 320A.) Focus is on Virgil's *Aeneid* and its influence, tracing the European epic tradition (Ariosto, Tasso, Camoes, Spenser, and Milton) to New World discovery and mercantile expansion in the early modern period.
5 units, Win (Parker, P)

ENGLISH 334A. The Modern Tradition I—(Same as MTL334A.) Preference to first-year graduate students in Modern Thought and Literature and English. Kant's 18th-century development of the critique of reason; how it set the stage for the themes and problems that have preoccupied Western thinkers. Focus is on texts that extend and problematize the critique of reason. Writers include Kant, Hegel, Marx, Nietzsche, Weber, Freud, Lukács, and Heidegger.
5 units, Aut (Moya, P)

ENGLISH 344A,B. Shakespeare, Marlowe, Jonson—Two quarter sequence. The intersection of poetry and theater in the work of three major Elizabethan dramatists. First quarter includes finding a topic appropriate to a scholarly article or dissertation; second quarter focus is on how to write such a paper. Students are required to register for both quarters..
5 units, A: Aut, B: Win (Orgel, S)

ENGLISH 345. Eighteenth-Century Satire—Alexander Pope, Jonathan Swift, and Samuel Johnson, and their contemporaries and adversaries. Careers, biographies, poetic and authorial development, and the economic and cultural circumstances in which they wrote. Political opposition, censorship, misogyny, and misanthropy.
5 units, Aut (Vermeule, B)

ENGLISH 357F. Poetry and Culture in America: Postwar to Cold War—What happened to poetry in English in the wake of high modernism and in the aftermath of global war. Works and controversies from 1945-50 established the form and purview of Anglo-American poetry for the next 25 years. Writers include Eliot, Pound, Auden, Stevens, and Bishop.
5 units, Win (Jenkins, N)

ENGLISH 362. Writing Together: Collaboration Then and Now—The tradition of writing collaboratively, including medieval women collaborating with their scribes, collaborations in the 18th and 19th centuries, and the work of contemporary women writers. What forces worked to repress, silence, or erase such collaboration. Is the time now ripe for a renewed flowering of collaboratively produced works?
5 units, Aut (Lunsford, A)

ENGLISH 363. The Bourgeois—(Same as COMPLIT 330.) Interdisciplinary. Goal is to define the ruling class of modern times. Social history (Weber, Hirschmann, Marx); literary texts (Defoe, Goethe, Gaskell); and Henrik Ibsen who produced an intransigent criticism of the bourgeois ethos.

5 units, Aut (Moretti, F)

ENGLISH 365. American Women Writers in the Nineteenth Century—Historical contexts, cultural politics, and critical assessments. Possible authors include Lydia Maria Child, Susan Warner, Harriet Beecher Stowe, Harriet Wilson, Louisa May Alcott, Fanny Fern, Elizabeth Stoddard, Emily Dickinson, Sarah Orne Jewett, Kate Chopin, and Charlotte Perkins Gilman.

5 units, Spr (Richardson, J)

ENGLISH 366F. Media Theory—Theoretical approaches to media technologies, aesthetics, and literature in the 20th century including: debates about technology; Benjamin, Brecht, and Adorno on technique and politics; McLuhan, Debord, and Baudrillard on visual media and spectacle theory; and electronic textuality, hypertext, and the relationships among technology, ideology, and media. Sources include theoretical and literary readings in media including print, video, and electronic text.

5 units, Spr (Heise, U)

ENGLISH 370. Middle English Literature—Social, historical, and material contexts. Topics may include: the manuscript culture of the Middle Ages and its impact on the English book; the relationship between political and social conflict and the rise of literary genres such as lyric, romance, and dream vision; emerging vernacular self-consciousness in medieval England and development of a literary language in the context of regional dialect variety and the maintenance of Latin and French. Primary archival work and current literary criticism.

5 units, Spr (Lerer, S)

ENGLISH 372A. Sixteenth-Century Poetry and Poetics—16th-century English poetry in a continental context. Emphasis is on lyric poetry. Generic experimentation from standpoints such as: Petrarchism; the plain style; psalters, religious lyrics, and contrafacta; Puritan voices; and Ovidian narrative. Contemporaneous theories of poetics; elated questions of gender, politics, and religion.

5 units, Spr (Greene, R)

ENGLISH 375. Henry James—The late novels and novellas, emphasizing class, sexuality, aesthetics, and the relationship between form and reference in the representation of complex structures of feeling. Secondary readings include recent work in feminist and queer studies and narrative theory.

5 units, Win (Ngai, S)

ENGLISH 381B. Race Theory in the Post-Race Era—Theoretical contours, literary implications, and political stakes in the debate between renewed claims for the political and experiential saliency of race versus claims that race is over, what cultural critics term as post-race, against race, beyond race, or the raceless era. Why theorize about race in the moment of its eclipse?

5 units, Win (Elam, M)

ENGLISH 384G. Dickens and Eliot—Close readings of novels and critical historical, biographical, aesthetic, feminist, and psychological approaches.

5 units, Spr (Polhemus, R)

WORKSHOPS AND DIRECTED READING

ENGLISH 394. Independent Study—Preparation for qualifying examination and for the Ph.D. oral examination.

1-10 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 395. Ad Hoc Graduate Seminar—Three or more graduate students who wish in the following quarter to study a subject or an area not covered by regular courses and seminars may plan an informal seminar and approach a member of the department to supervise it.

1-5 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 396. Introduction to Graduate Study for Ph.D. Students—For incoming Ph.D. students. The major modes of research, criticism, and theory at work in the discipline of English studies.

5 units, Aut (Jones, G)

ENGLISH 396L. Pedagogy Seminar I—(Same as COMPLIT 396L.) Required for first-year Ph.D. students in English, Modern Thought and Literature, and Comparative Literature (except for Comparative Literature students teaching in a foreign language). Preparation for surviving as teaching assistants in undergraduate literature courses. Focus is on leading discussions and grading papers.

2 units, Aut (Jones, G)

ENGLISH 397A. Pedagogy Seminar II—Apprenticeship for second-year graduate students in English, Modern Thought and Literature, and Comparative Literature who teach in the Program in Writing and Rhetoric. Each student is assigned as an apprentice to an experienced teacher and sits in on classes, conferences, and tutorials, with eventual responsibility for conducting a class, grading papers, and holding conferences. Meetings explore rhetoric, theories and philosophies of composition, and the teaching of writing. Each student designs a syllabus in preparation for teaching PWR 1.

1 unit, Aut (Lunsford, A)

ENGLISH 398. Research Course—A special subject of investigation under supervision of a member of the department. Thesis work is not registered under this number.

1-18 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 398R. Revision and Development of a Paper—Students revise and develop a paper under the supervision of a faculty member with a view to possible publication.

5 units, Aut, Win, Spr, Sum (Staff)

ENGLISH 399. Thesis

1-10 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

ARTHIST 132/332. American Art and Culture, 1528-1860

4 units, Spr (Wolf, B)

ARTHIST 232. Rethinking American Art

5 units, Aut (Wolf, B)

COMPLIT 157. Imitation of Life

3-5 units, Spr (Gelder, A)

PHIL 81. Philosophy and Literature—(Same as FRENGEN 181, ITALGEN 81.)

4 units, Win (Anderson, L; Landy, J)

PWR 193. Writing the Honors Thesis

1-5 units, Win, Spr (Staff)

SLAVGEN 156/256. Nabokov and Modernism—(Same as COMPLIT 115/215.)

3-5 units, Spr (Greenleaf, M)

OVERSEAS STUDIES

Courses approved for the English major and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

OXFORD

ENGLISH 114Z. Close Readings in English Literature, 1509-1642—(Same as OSPOXFRD 114Z.) GER:DB-Hum

5 units, Aut (van Es, B)

ENGLISH 116Z. Close Readings in English Literature, 1642-1740—(Same as OSPOXFRD 116Z.) GER:DB-Hum

5 units, Win (Bullard, P)

ENGLISH 135Z. Jane Austen's England—(Same as OSPOXFRD 25.)

5 units, Win (Rovee, C)

ENGLISH 154Z. Romantic Literature, 1740-1832—(Same as OSPOXFRD 154Z.) GER:DB-Hum

5 units, Spr (Plaskitt, E)

ENGLISH 163X. Shakespeare: Critical Commentary—(Same as OSPOXFRD 163X.) GER:DB-Hum

5 units, Aut, Win (Groves, B)

ENGLISH 174X. The Rise of the Novel—(Same as OSPOXFRD 44.) GER:DB-Hum

5 units, Spr (Plaskitt, E)

ENGLISH 185Z. The Idea of the Museum: History, Theory, Politics—(Same as OSPOXFRD 33.)

5 units, Win (Rovee, C)

PROGRAM IN ETHICS IN SOCIETY

Director: Eamonn Callan (Education)

Steering Committee: Eamonn Callan (Education), Joshua Cohen (Philosophy, Political Science, Law), John Ferejohn (Political Science), Barbara Fried (Law School), Agnieszka Jaworska (Philosophy), Scotty McLennan (Dean of Religious Life), Josiah Ober (Classics, Political Science), Rob Reich (Political Science), Eric Roberts (Computer Science), Debra Satz (Philosophy, on leave), Brent Sockness (Religious Studies), Allen Wood (Philosophy), Lee Yearley (Religious Studies)

Affiliated Faculty: Kenneth Arrow (Economics, emeritus), Donald Barr (Sociology), Barton Bernstein (History), Michael Bratman (Philosophy), Albert Camarillo (History), Nadeem Hussain (Philosophy), David Kennedy (History), Tamar Schapiro (Philosophy), David K. Stevenson (Pediatrics), Sylvia Yanagisako (Cultural and Social Anthropology, on leave)

Mail Code: 94305-2155

Phone: (650) 723-0997

Email: joanberry@stanford.edu

Web Site: <http://ethicsinsociety.stanford.edu>

Courses given in Ethics in Society have the subject code ETHICSOC. For a complete list of subject codes, see Appendix B.

The Program in Ethics in Society is designed to foster scholarship, teaching, and moral reflection on fundamental issues in personal and public life. The program is grounded in moral and political philosophy, but it extends its concerns across a broad range of traditional disciplinary domains. The program is guided by the idea that ethical thought has application to current social questions and conflicts, and it seeks to encourage moral reflection and practice in areas such as business, international relations, law, medicine, politics, and science.

Current and planned initiatives of the program include:

1. Supporting and fostering ethics research.
2. Supporting innovative teaching focusing on the ethical dimensions relevant to the different disciplines across the curriculum.
3. Establishing a yearly faculty-graduate seminar focusing on topics in ethics and public life.
4. Ethics@Noon, a weekly discussion by faculty, students, and staff on topics of ethical concern.

The program also sponsors several annual public lecture series, including the Tanner Lectures in Human Values and the Wesson Lectures in Problems of Democracy.

Students interested in pursuing studies that bring moral and political theory to bear on issues in public life should consult the director. There are many course offerings at Stanford that address moral and political questions. Not all of these courses are crosslisted with the Program in Ethics in Society. Students should consult the director to determine whether such courses may be applied towards an Ethics in Society honors program or minor.

UNDERGRADUATE PROGRAM HONORS

The honors program in Ethics in Society is open to majors in every field and may be taken in addition to a department major. Students should apply for entry at the end of Spring Quarter of the sophomore year or no later than the beginning of the Autumn Quarter of the junior year. Applicants should have a cumulative grade point average (GPA) of 3.3 (B+) or higher. They should also maintain this minimum average in the courses taken to satisfy the requirements. Required courses must be taken for a letter grade.

Requirements—

1. Required courses (at least one of a or b must be taken at the 100 level):

- a) ETHICSOC 20. Introduction to Moral Theory; or ETHICSOC 170. Ethical Theory. Normally taken in the sophomore year.
 - b) ETHICSOC 30. Introduction to Political Philosophy; or ETHICSOC 171. Justice. Normally taken in sophomore year.
 - c) ETHICSOC 77. Methodology in Ethics: Translating Theory into Practice. Normally taken after the moral and political philosophy classes listed above.
2. One 4- or 5-unit undergraduate course on a subject approved by the honors adviser, designed to encourage students to explore those issues in Ethics in Society that are of particular interest to them. Courses of relevance to the Program in Ethics in Society are offered by members of the program committee and by other departments. Students may also take a course with the honors thesis in mind. To promote a broad interdisciplinary approach, this elective should normally be outside the Department of Philosophy. Students are not restricted to choosing from the cognate courses listed below.
 3. ETHICSOC 190. Honors Seminar.
 4. ETHICSOC 200A,B. Honors Thesis. On a subject approved by the honors adviser, with the work spread over two quarters. To receive honors in Ethics in Society, students must receive a grade of 'B+' on their thesis.

A typical student takes ETHICSOC 20 or 170 and 30 or 171 in the sophomore year. Upon admission to the honors program as a junior, he or she takes ETHICSOC 190 in the Winter Quarter, ETHICSOC 77 in the Spring Quarter, and requirement 2 (the optional subject) at any time during the junior year, or possibly Autumn Quarter of the senior year. The honors thesis is normally written during the Autumn and Winter quarters of the senior year. Courses taken to fulfill the Ethics in Society honors requirement may be double-counted for Philosophy and other majors; Ethics in Society minors may not double count courses.

MINORS

The Ethics in Society minor is open to students in any department who wish to explore moral issues in personal and public life. The minor also includes the possibility of pursuing classes around the theme of citizenship.

Students must declare the minor on Axxess no later than the last day of Autumn Quarter of their senior year, although they are strongly advised to declare sooner. The student should discuss the minor with an adviser chosen from the Ethics in Society faculty list, and prepare a draft proposal that includes a list of courses planned to fulfill the requirements and the name of the faculty adviser.

A minor in Ethics in Society requires six courses for a minimum of 25 and a maximum of 30. Required courses must be taken for a letter grade.

Requirements—

1. Three Ethics in Society courses:
 - a) ETHICSOC 20. Introduction to Moral Theory; or ETHICSOC 170. Ethical Theory
 - b) ETHICSOC 30. Introduction to Political Philosophy; or ETHICSOC 171. Justice
 - c) ETHICSOC 77. Methodology in Ethics: Translating Theory into Practice
2. Two courses at the 100 level or above that address some dimension of moral or political theory or practice.
3. One course at the 200 level or above that addresses a moral or political problem, in either theory or practice.

The 100-level and 200-level courses should be focused around a central theme such as biomedical ethics, ethics and economics, ethics and politics, or environmental ethics. The courses at the 100 and 200 level are normally taken after completion of ETHICSOC 20 or 170 and 30 or 171.

Subject to the approval of the Director of the Ethics in Society Program, a course covering similar subject matter in another department or program may be substituted for ETHICSOC 20/170 or 30/171. No course credited to the Ethics in Society minor may be double-counted toward major requirements.

CITIZENSHIP OPTION

The citizenship option for the minor introduces students to the theory, history, and practice of citizenship in democracies. When a student declares the minor in EIS on Axess, no notation is made of the citizenship option, and this notation does not appear on transcripts or the diploma. All students taking the citizenship option must take ETHICSOC 198, Community Engagement Internship. In addition to the courses listed in (1) above, students must take a total of three additional classes from two of the following categories. Students may petition to have other relevant courses counted towards the minor.

1. Citizenship and Government Action
 - a) ETHICSOC 133. Ethics and Politics of Public Service
 - b) POLISCI 142T. Social Protection Around the World
 - c) PUBLPOL 101. Politics and Public Policy
 - d) PUBLPOL 164. Comparative Public Policy
2. Citizenship and Entrepreneurship
 - a) ETHICSOC 108. Ethics and the Professions
 - b) ME 206A. Entrepreneurial Design to Extreme Affordability
 - c) PUBLPOL 180. Social Innovation
 - d) PUBLPOL 195. Business and Public Policy
 - e) URBANST 131. Social Innovation and the Social Entrepreneur
3. Citizenship and Education
 - a) EDUC 167. Educating for Equity and Democracy
 - b) EDUC 179B. Youth Empowerment and Civic Engagement
 - c) EDUC 220C. Education and Society
 - d) EDUC 247. Moral Education
 - e) EDUC 304. The Philosophical and Educational Thought of John Dewey
4. Global Citizenship and Nongovernmental Organizations
 - a) POLISCI 143. Nongovernmental Organizations and Development in Poor Countries
 - b) POLISCI 232. Civil Society and the Nonprofit Sector
 - c) PUBLPOL 183. Philanthropy and Social Innovation

GRADUATE STUDIES

The program's main provisions for graduate students are seminars on topics in applied ethics.

COURSES

ETHICSOC 20. Introduction to Moral Philosophy—(Same as PHIL 20.) What is the basis of moral judgment? What makes right actions right and wrong actions wrong? What makes a state of affairs good or worth promoting? What is it to have a good or virtuous character? Answers to classic questions in ethics through the works of traditional and contemporary authors. GER:DB-Hum, EC-EthicReas
5 units, Spr (Seidman, J)

ETHICSOC 30. Introduction to Political Philosophy—(Same as PHIL 30, POLISCI 3.) State authority, justice, liberty, and equality through major works in political philosophy. Topics include human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion, and politics. GER: DB-Hum, EC-EthicReas
5 units, Win (Stone, P)

ETHICSOC 77. Methodology in Ethics: Translating Theory into Practice—(Same as PHIL 77.) Ideally, social policies are informed by ethical thought and reflection, but doing good in the world requires the active translation of moral theory and political philosophy into action. What kinds of empirical data are relevant to social decision making, and how should they be collected, evaluated, and integrated into normative analysis? What assumptions about human nature are in play? How should diverse cultural values be addressed? Case studies from biomedical science, business, and government.
4 units, Spr (Staff)

ETHICSOC 78. Medical Ethics—(Same as PHIL 78.) Introduction to moral reasoning and its application to problems in medicine: informed consent, the requirements and limits of respect for patients' autonomy, surrogate decision making, euthanasia and physician-assisted suicide, and abortion. GER:DB-Hum, EC-EthicReas
4 units, Spr (Jaworska, A)

ETHICSOC 108. Ethics and the Professions—Ethical challenges facing professionals in society. Readings and case studies. Individual moral obligations in relation to obligations as professionals. Topics: conflict of interest, client/professional privilege, and use of confidential information. Focus is on medicine, law, engineering, and ethical issues common to all professions.
4 units, not given this year

ETHICSOC 133. Ethics and Politics of Public Service—(Same as POLISCI 133.) Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connects service activities and public service aspirations with academic experiences at Stanford. GER:DB-SocSci
5 units, not given this year

ETHICSOC 170. Ethical Theory—(Same as PHIL 170/270.) Major strands in contemporary ethical theory. Readings include Bentham, Mill, Kant, and contemporary authors. GER:DB-Hum, EC-EthicReas
4 units, Spr (Jaworska, A)

ETHICSOC 171. Justice—(Same as PHIL 171, PHIL 271, POLISCI 136S.) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas
5 units, Aut (Cohen, J)

ETHICSOC 190. Ethics in Society Honors Seminar—(Same as PHIL 178.) For students planning honors in Ethics in Society. Methods of research. Students present issues of public and personal morality; topics chosen with advice of instructor.
3 units, Win (Reich, R)

ETHICSOC 198. Community Engagement Internship—Opportunities for students to engage in community work via the Haas Center for Public Service. Students work with Haas Center staff to design an internship involving community-based research or supported by a Haas Center fellowship or community service work/study, or to serve for an academic year as a tutor in one of the Haas Center's several K-12 programs in East Palo Alto. May be repeated for credit.
3-5 units, Aut, Win, Spr, Sum (Staff)

ETHICSOC 199. Independent Studies in Ethics in Society—May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

ETHICSOC 200A,B. Ethics in Society Honors Thesis—Limited to Ethics in Society honors students, who must enroll once in A and once in B.
1-5 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

ANTHSCI 178. Contagion and Conflict
3-5 units, not given this year

- ANTHSCI 191B/291B. Conduct and Misconduct in Science**
3-5 units, not given this year
- CASA 90. Theory of Cultural and Social Anthropology**
5 units, Win (Ebron, P)
- CASA 108. History of Archaeological Thought**—(Same as ARCH-LGY 103.)
5 units, Aut (Meskell, L)
- CASA 174. Cultures of Disease: Cancer**
5 units, Win (Jain, S)
- CASA 185/285. Environmental Ethics**
3-5 units, Win (Gupta, A)
- COMM 131/231. Media Ethics and Responsibilities**
4-5 units, Win (Glasser, T)
- COMM 236G/336G. Democracy, Justice, and Deliberation**
1-5 units, not given this year
- COMM 238/338. Democratic Theory: Normative and Empirical Issues**
1-5 units, Win (Fishkin, J; Luskin, R)
- DRAMA 161/261. Performance and Politics**—(Same as CLASSGEN 161.)
5 units, Aut (Staff)
- ECON 143. Ethics in Economics Policy**
5 units, Aut (Hammond, P)
- ECON 224. Science, Technology, and Economic Growth**
2-5 units, Win (David, P)
- EDUC 167. Educating for Equity and Democracy**
3 units, Sum (McDermott, R)
- EDUC 179B/279B. Youth Empowerment and Civic Engagement**
2-4 units, not given this year
- EDUC 247. Moral Education**
3 units, Win (Damon, W)
- EDUC 304. The Philosophical and Educational Thought of John Dewey**—(Same as PHIL 242.)
4 units, Aut (Phillips, D)
- EDUC 320X. Social Justice in Education**
3 units, Win (Callan, E)
- ENGLISH 173. American Comedy and Satire: Topics in Laughter and Ethics**
5 units, Spr (Obenzinger, H)
- FRENGEN 258E. Foundations of Nanoethics: Toward a Rapprochement between Europe and the U.S.**—(Same as STS 211.)
3-5 units, alternate years, not given this year
- HISTORY 236. The Ethics of Imperialism**
5 units, not given this year
- HISTORY 243G/343G. Tobacco and Health in World History**
5 units, Aut (Proctor, R)
- HISTORY 259A,B. Poverty and Homelessness in America**
5 units, not given this year
- INTNLREL 205. Ethics, Technology, and International Relations**
5 units, not given this year
- OIT 333. Entrepreneurial Design for Extreme Affordability**—(Same as ME 206A.)
4 units, Win (Patell, J; Kelley, D)
- PHIL 174/274. Freedom and the Practical Standpoint**
4 units, Aut (Ferrero, L)
- POLISCI 1. Introduction to International Relations**
5 units, Aut (Schultz, K)
- POLISCI 114S. International Security in a Changing World**
5 units, Win (Sagan, S)
- POLISCI 123. Politics and Public Policy**
5 units, Spr (Sprague, M)
- POLISCI 130B/330B. History of Political Thought II: Early Modern Political Thought, 1500-1700**
5 units, not given this year
- POLISCI 130C/330C. History of Political Thought III: Freedom, Reason, and Power**
5 units, Spr (Stone, P)
- POLISCI 131. Children's Citizenship: Justice Across Generations**—(Same as EDUC 158.)
5 units, not given this year
- POLISCI 132. Ethics of Political Animals**—(Same as CLASSHIS 132.)
5 units, Spr (Staff)
- POLISCI 142T. Social Protection Around the World**
5 units, not given this year
- POLISCI 143. Nongovernmental Organizations and Development in Poor Countries**—(Same as INTNLREL 143.)
5 units, not given this year
- POLISCI 231S. Contemporary Theories of Justice**
5 units, Win (Reich, R)
- POLISCI 232. Civil Society and the Nonprofit Sector**—(Same as URBANST 121.)
2-4 units, not given this year
- POLISCI 236. Theories of Civil Society, Philanthropy, and the Non-profit Sector**
5 units, Spr (Reich, R; Sievers, B)
- PSYCH 179/270. The Psychology of Everyday Morality**
4 units, Spr (Monin, B)
- PUBLPOL 101. Politics and Public Policy**
5 units, Win (Brady, D)
- PUBLPOL 164. Comparative Public Policy**
3 units, not given this year
- PUBLPOL 180. Social Innovation**
4 units, not given this year
- PUBLPOL 183. Philanthropy and Social Innovation**
5 units, Spr (Arrillaga, L)
- SOC 130/230. Education and Society**—(Same as EDUC 220C.)
4-5 units, Aut (Suarez, D)
- SOC 141A. Social Class, Race, Ethnicity, Health**—(Same as SOC 241A.)
4-5 units, Win (Barr, D)
- STS 110. Ethics and Public Policy**—(Same as MS&E 197, PUBLPOL 103B.)
5 units, Win (McGinn, R)
- URBANST 131. Social Innovation and the Social Entrepreneur**
1 unit, Aut (Staff)

FEMINIST STUDIES

Director: Penelope Eckert

Program Committee: Benjamin Davidson (LGBT Community Resource Center), Penelope Eckert (Linguistics), Heather Hadlock (Music), Laura Harrison (Women's Community Center), Miyako Inoue (CASA), Andrea Lunsford (English), Londa Schiebinger (History), Elizabeth Tallent (English)

Resource Faculty and Staff:

Anthropological Sciences: Melissa Brown

Art and Art History: Wanda Corn, Pamela Lee, Melinda Takeuchi

Asian Languages: Yoshiko Matsumoto

Biological Sciences: Joan Roughgarden

Business: Joanne Martin

Classics: Maud Gleason, Susan Stephens

Comparative Literature: Patricia Parker

Cultural and Social Anthropology: Paulla Ebron, Akhil Gupta, Miyako Inoue, Sarah Jain, Matthew Kohrman, Purnima Mankekar, Barbara Voss, Sylvia Yanagisako

Developmental Biology: Ellen Porzig

Drama: Harry J. Elam, Cherríe Moraga, Peggy Phelan

Education: Jo Boaler, Susanna Loeb, Myra Strober, Joy Williamson

English: Eavan Boland, Terry Castle, Michele Elam, Andrea Lunsford, Paula Moya, Sianne Ngai, Stephen Orgel, Ramón Saldivar, Jennifer Summit, Elizabeth Tallent

Feminist Studies: Kathleen Coll, Susan Krieger, Valerie Miner

French and Italian: Carolyn Springer

German Studies: Russell Berman, Kathryn Strachota

History: Joel Beinin, Philippe Buc, Paula Findlen, Estelle Freedman, Katherine Jolluck, Nancy Kollmann, Carolyn Lougee Chappell, Paul Robinson, Londa Schiebinger, Kären Wigen

Human Biology: Anne Firth-Murray

Law: Deborah Rhode

Linguistics: Penelope Eckert

Medical School: Ann Arvin, Helen Blau, Roy King, Cheryl Koopman, Iris Litt

Music: Heather Hadlock

Philosophy: Agnieszka Jaworska, Helen Longino, Debra Satz

Political Science: Terry Karl, Carolyn Wong

Psychology: Albert Bandura, Laura Carstensen, Hazel Markus

Religious Studies: Charlotte Fonrobert, Hester Gelber, Linda Hess

Slavic Languages and Literatures: Monika Greenleaf

Sociology: Paula England, Cecilia Ridgeway

Spanish and Portuguese: Yvonne Yarbro-Bejarano

Program Office: Serra House, 589 Capistrano Way

Mail Code: 94305-8640

Phone: (650) 723-2412

Email: kristina.solheim@stanford.edu

Web Site: <http://feminist.stanford.edu>

The Program in Feminist Studies is an interdisciplinary undergraduate program offering students the opportunity to investigate the significance of gender and sexuality in all areas of human life from the study of women and medicine to the study of transgender issues. Feminist analysis assumes that gender is a central factor in the organization of society, and that definitions of gender, sex, and sexuality do not stem from nature but are social constructions. As such, they vary across time and place, have strong ideological underpinnings, and serve political ends. The courses offered by the program use feminist perspectives to expand and reevaluate the assumptions at work in traditional disciplines in the study of individuals, cultures, social institutions, policy, and other areas of scholarly inquiry.

The Program in Feminist Studies coordinates the courses offered on women, gender, sexuality, and feminism throughout the University and facilitates the undergraduate major and minor in Feminist Studies. In addition, it encourages feminist analysis and teaching at Stanford, both in courses within the program and those housed within departments.

The program committee awards the annual Michelle Z. Rosaldo and

Francisco Lopes prizes for the best undergraduate work on women, gender, or feminism. The prizes are awarded in two divisions: a thesis division for senior honors theses and master's papers written by undergraduates in coterminal degree programs, and an essay division. The Rosaldo prizes are awarded for the best work in the social sciences and the Lopes prizes for the best work in the humanities. Submissions are due in the Feminist Studies office April 2 for essays and May 14 for theses. Essays and theses completed later in Spring or Summer Quarter may be submitted for consideration the following year.

UNDERGRADUATE PROGRAMS

Curriculum guidelines and forms for the major, minor, and honors are available at the Feminist Studies office in Serra House or at <http://feminist.stanford.edu>. Students interested in majoring, minoring, or doing honors in Feminist Studies should consult the program administrator.

BACHELOR OF ARTS

The major in Feminist Studies may be taken as a single major, as one of multiple majors, or as a secondary major. If taken as one major of multiple majors, none of the 62 units counted toward the major in Feminist Studies may overlap with units counted toward the major in another department or program. If taken as a secondary major, up to 30 of the units counted toward the Feminist Studies major may also be counted as fulfilling the major requirements in another department or program if that department or program consents. A maximum of 10 of the 62 units for the major may be taken on a credit/no credit or satisfactory/no credit basis; a maximum of 10 may be taken as independent study or directed reading. FEMST core courses must be taken for a letter grade.

The major should normally be declared by the beginning of a student's junior year. Majors should choose two faculty advisers from the list of resource faculty, one of whom is usually the director of the Feminist Studies program. Faculty advisers work closely with the student in helping design an appropriate program of study. A proposal explaining the rationale for the plan of study and signed by both advisers must be submitted to the program office to declare the major.

CURRICULUM

The major in Feminist Studies includes a total of at least 12 courses at the 100 level or above for 62 units. The courses are divided among the core and the focus, plus electives (cognate courses for Feminist Studies) to reach the total course requirement.

THE CORE

1. FEMST 101. Introduction to Feminist Studies. This course must be taken before 102 and 103.
2. FEMST 102. Feminist Theory. There may be several offerings. Students should consult the Feminist Studies website to see which courses fulfill the theory requirement in a given year.
3. FEMST 103. Feminist Methodologies.
4. FEMST 104A, 104B Practicum
5. One Feminist Studies course in the social sciences. Courses that fulfill this requirement can be found among courses listed under Anthropological Sciences, Communication, Cultural and Social Anthropology, Education, History, Human Biology, Law, Medicine, Political Science, Psychology, and Sociology.
6. One Feminist Studies course in the humanities. Courses that fulfill this requirement can be found among courses listed in English, Linguistics, Philosophy, Religious Studies, the arts, and languages.

THE FOCUS

Every student designs a thematic focus consisting of at least five courses. These focuses are not declared on Axxess; they do not appear on the transcript or diploma.

1. At least three of the focus courses should be Feminist Studies courses or be selected from the list of interdepartmental offerings.
2. At least one course should be a major survey, methodology, or theory course offered by a department or interdepartmental program as an initiation into the practice of study in the field.

The focus should be designed in consultation with the student's advisers. The following are examples of common focuses, but students are also encouraged to develop new focuses:

Crosscultural Perspectives on Gender
 Feminism and the Arts
 Feminist Perspectives on Science, Technologies, and Health
 Gender and Education
 Gender and Popular Culture
 Gender in Language and Symbol
 Medieval Gender Studies
 Queer Studies
 Women and Health
 Women and Modernity
 Women and Religion
 Women and Work

WRITING IN THE MAJOR

Majors in Feminist Studies may satisfy the Writing in the Major (WIM) requirement 2006-07 by taking FEMST 253, *Women and the Creative Imagination* in Spring Quarter. Contact Professor Valerie Miner (vminer@stanford.edu) before enrolling in the course.

PRACTICUM

A practicum is required in order to bring together theory and practical experience. The practicum should involve field research, community service, or other relevant experience such as a public service internship. Students plan their practicum during Winter Quarter of the junior year in FEMST 104A, *Junior Seminar and Practicum* (1 unit). The practicum is normally done over the summer between junior and senior year, and may be taken for additional units. It is followed by FEMST 104B, *Senior Seminar and Practicum* (1 unit), in Autumn Quarter of the senior year.

MINORS

Students interested in minoring in Feminist Studies should consult the program administrator. The minor proposal should be drafted in discussion with a faculty adviser selected from the Feminist Studies resource faculty list.

The minor in Feminist Studies consists of at least six courses, for a minimum of 30 and a maximum of 36 units. None of the units for the minor may count towards the student's major. The minor in Feminist Studies should be declared by the Winter Quarter of a student's junior year.

Requirements—

1. FEMST 101. Introduction to Feminist Studies. This must be taken before 102 or 103.
2. FEMST 102. *Feminist Theory*, or FEMST 103. *Feminist Methodologies*

FOCUS

A four-course thematic focus may be designed by the student or may follow one of the suggested clusters listed above. One course within the thematic focus should address crosscultural issues.

HONORS CERTIFICATION

FEMINIST STUDIES MAJORS/MINORS

*Admission—*The honors program offers an opportunity to do independent research for a thesis of superior academic quality. It is open to students with a grade point average (GPA) of 3.3 or better in course work in Feminist Studies. Students must apply for honors certification by the end of the junior year. To apply, students should design a project in consultation with their proposed thesis adviser and the Feminist Studies honors tutor. A proposal describing the project and the number of units to be awarded must be submitted to the director of the program for final approval. See the Feminist Studies web site for details.

Requirements—

1. In addition to the normal requirements for the major, students enroll in FEMST 105 for 10-15 units towards the preparation of the honors thesis, and one unit of directed research with the director of the program (Autumn, Winter, and Spring quarters for a total of 3 units), which is

granted for satisfactory attendance at meetings conducted by the honors tutor throughout the year.

2. Throughout the senior year, students work with faculty advisers and the Feminist Studies honors tutor. The final thesis must be submitted by May 31 and be of acceptable quality to the student's faculty advisers. Creative projects of high intellectual caliber are eligible if they contain a section of scholarly analysis.

MAJORS IN OTHER DEPARTMENTS

Honors certification in Feminist Studies for majors in other departments or programs, as distinguished from honors for students pursuing a major in Feminist Studies, is intended to complement study in any major.

*Admission—*Honors certification is open to students majoring in any field with a GPA of 3.3 or better.

As a prerequisite, students must have completed the following courses with a grade of (B+) or better:

1. FEMST 101 and a core theory course
2. or three Feminist Studies courses related to the topic of their proposed honors research.

To apply, students must first consult the Director of the Program in Feminist Studies outlining the plan for course work, the rationale for the program, and an honors project. Students must apply for honors by the end of the junior year. The chair acts as one of the student's faculty advisers, along with the faculty member(s) who advise the thesis.

*Requirements—*Students enroll in FEMST 105 for 10-15 units, and 1 unit of directed research with the director of the program (Autumn, Winter, and Spring quarters for a total of 3 units), which is granted for satisfactory attendance at meetings conducted by the honors tutor throughout the year. The final thesis must be submitted by May 31, and must be of acceptable quality to the student's faculty advisers. Creative projects of high intellectual caliber are eligible if they contain a section of scholarly analysis. For more information, see the Feminist Studies web site.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Courses listed as cognate courses pay significant attention to gender difference, the situation of women in Western or non-Western cultures, or the role of sex/gender systems in social organization. Updated listings, including courses not offered 2006-07, are available at the Feminist Studies office and at <http://feminist.stanford.edu>.

FEMINIST STUDIES COURSES

FEMST 101. Introduction to Feminist Studies—(Same as HISTORY 107.) How gender inequality is created and perpetuated, and how feminist theory and movements respond to gender inequality. Topics: theories of inequality; history of feminism; international and multicultural perspectives on feminism; women's work, health, and sexuality; creativity; spirituality; and movements for social change. GER:DB-SocSci, EC-Gender
5 units, Aut (Freedman, E)

FEMST 103/203. Feminist Theories and Methods Across the Disciplines—(Graduate students register for 203; same as PHIL 153.) The interdisciplinary foundations of feminist thought, and the nature of disciplines and of interdisciplinary work. The challenges of feminism for scholarship and research, taught by a Feminist Studies resource faculty member from the discipline in question.
4-5 units, Aut (Longino, H)

FEMST 104A. Junior Seminar and Practicum—Restricted to and required of Feminist Studies majors. Preparation for practicum projects. How to identify goals, submit grant proposals, and negotiate ethical issues in feminist praxis. The relationship between potential projects and their academic focus in the major.
1 unit, Win (Coll, K)

FEMST 104B. Senior Seminar and Practicum—For Feminist Studies majors only. Students present oral reports on the relation of the practicum to their academic work, submit a draft and revised written analysis of the practicum, and discuss applications of feminist scholarship.

2 units, Aut (Coll, K)

FEMST 105. Honors Work

1-15 units, Aut, Win, Spr, Sum (Staff)

FEMST 108. Internship in Feminist Studies—For non-majors. Augments course work in Feminist Studies with a supervised field, community, or lab experience in law offices, medical research and labs, social service agencies, legislative and other public offices, or local and national women's organizations. One unit represents approximately three hours work per week during a 10-week quarter. Required paper. See application form on the Feminist Studies web site. Prerequisites: course in Feminist Studies, consent of program office, written consent of faculty sponsor.

1-15 units, Aut, Win, Spr, Sum (Staff)

FEMST 120. Introduction to Queer Studies—Gay, lesbian, bisexual, transgender, transsexual, and queer political movement and theory; sexual identities and feminism; sexual identities and cultural representation; alternative family practices; queer theory in academia. Film screenings, guest speakers, and community field trips. GER:EC-Gender

4-5 units, Win (Rivers, D)

FEMST 139. Rereading Judaism in Light of Feminism—During the past three decades, Jewish feminists have asked new questions of traditional rabbinic texts, Jewish law, history, and religious life and thought. Analysis of the legal and narrative texts, rituals, theology, and community to better understand contemporary Jewish life as influenced by feminism. GER:EC-Gender

4-5 units, Spr (Karlin-Neumann, P)

FEMST 140J. Lesbian, Gay, Bisexual, and Transgender History in the United States, 1945-2000—Changes in gay, lesbian, bisexual, and transgendered lives and experiences. The legal and cultural impact of sexual minority communities in the U.S. Historical and literary sources.

4-5 units, Spr (Rivers, D)

FEMST 140M. Race and Feminism in Contemporary American Visual Culture—The intersection of race and feminism in visual art and culture. How race and gender motivate artists and scholars. How images help understanding of race and gender; and how anti-racist and feminist discourses help understand of everyday images. Artists include sculptors, muralists, graffiti artists, knitters, filmmakers, craftspeople, painters, and photographers.

5 units, Aut (Niedzielski-Eichner, N)

FEMST 140P. Queer Diasporas: The Roots and Routes of Transnational Queer Studies—Queer theory rooted in the analytical frameworks produced at the intersections of postcolonial theory and U.S., third world, and transnational feminisms. Intersectional analysis in which gender, race, ethnicity, sexuality, language, and nation are understood relationally. Postcolonial feminist argument. Critiques of modern empire, its relationship to globalization, and the maneuverings of the hetero-patriarchal nation state.

3-5 units, Win (Zamora, M)

FEMST 140R. The Invention of Homosexuality: The Origins of Lesbian and Gay Identities, 1880-1940—The formation of modern gay and lesbian identities. How imaginative literature explored and helped to codify sexual identities otherwise configured in negative and pathological terms. Sources include fictional, medical, and legal texts.

3 units, Win (Hunter, M)

FEMST 147. Gender and Leadership—Are there male and female styles of leadership? Can women really have it all in terms of career, partnership, and children? Are femininity and success dichotomous terms? Is there still a glass ceiling, even for Stanford students? Are new modes of thinking required for a new generation of issues and challenges relevant to gender and leadership? Students' own leadership philosophies and capacities.

2 units, Aut (Harrison, L)

FEMST 166. Feminist Theories of Knowledge—(Same as PHIL 184F/284F.) Feminist critique of traditional approaches in epistemology and alternative feminist approaches to such topics as reason and rationality, objectivity, experience, truth, the knowing subject, knowledge and values, knowledge and power.

4 units, Spr (Longino, H)

FEMST 188N. Imagining Women: Writers in Print and in Person—Stanford Introductory Seminar. Preference to sophomores. Contemporary literature through recent texts and conversations with the authors including Stanford faculty and visiting writers. Analytical and creative writing. Writing experience not necessary.

4-5 units, Aut (Miner, V)

FEMST 195. Directed Reading—May be repeated for credit.

1-15 units, Aut, Win, Spr, Sum (Staff)

FEMST 208. Bernice Johnson Reagon and the Cultural Politics of Racial and Gender Justice—The musical and political career of the political activist, cultural scholar, and performer Bernice Johnson Reagon, in residence at Stanford, March 5-8. Her political and musical contributions to movements for racial and gender justice. Prerequisite: consent of instructor.

2 units, Win (Freedman, E)

FEMST 244. History of Women and Medicine in the United States—Women's bodies in sickness and health and encounters with lay and professional healers from the 18th century to the present. Historical construction of thought about women's bodies and physical limitations; sexuality; birth control and abortion; childbirth; adulthood and menopause and aging. Women as healers, including midwives, lay physicians, the medical profession, nursing.

5 units, Aut (Horn, M)

FEMST 253. Women and the Creative Imagination—Interdisciplinary. The lives of women artists in different cultures and generations. Students write about art forms, the role of artists in the academy, and their social responsibilities. Similarities and differences among artists. WIM

4-5 units, Spr (Miner, V)

FEMST 260/360. Seminar in Women's Health: Women and Disabilities—(Graduate students register for 360.) Topics include the diversity of women's experiences of disabilities, visible and invisible disabilities, women's strengths, women's psychological and physical health, and feminist approaches to the study of disabilities. Limited enrollment. Prerequisite: consent of instructor. GER:DB-SocSci, EC-Gender

5 units, Spr (Krieger, S)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

ANTHSCI 125B/225B. Late Imperial China

5 units, not given this year

CASA 113/213. Women in Islam: The Central Asian Case

5 units, Win (Kunanbaeva, A)

CASA 132. Science, Technology, and Gender

3-5 units, Spr (Jain, S)

CASA 146/246. Masculinity: Technologies and Cultures of Gender

5 units, not given this year

CASA 346A. Sexuality Studies in Anthropology

5 units, Spr (Mankekar, P; Voss, B)

- CLASSGEN 117. Gender, Violence, and the Body in Ancient Religion**
3-4 units, *Spr* (Gleason, M)
- COMM 146/246. Language and Discourse: Race, Class, and Gender**
4-5 units, *Spr* (Staff)
- DANCE 160. Performance, Dance History, and Gender** — (Same as DRAMA 160/260.)
4 units, *Win* (Ross, J)
- DRAMA 156F/256F. Female Performers**
4 units, *Win* (Arad, M)
- DRAMA 163/263. Performance and America**
5 units, *not given this year*
- DRAMA 164/264. Performance and Gender**
5 units, *not given this year*
- DRAMA 184Q. The Dancing Couple as a Lens on American Culture, 1890-1950**
4 units, *Spr* (Staff)
- DRAMA 189Q. Mapping and Wrapping the Body**
3 units, *Aut* (Eddelman, W)
- EDUC 197. Education and the Status of Women: Comparative Perspective**
4-5 units, *Aut* (Wotipka, C)
- EDUC 201. History of Education in the United States**
3-4 units, *Win* (Williamson, J)
- EDUC 201B. Education for Liberation**
3-4 units, *Aut* (Williamson, J)
- EDUC 273. Gender and Higher Education**
4 units, *not given this year*
- ENGLISH 4B/104B. Medieval Women: Faith, Love, and Learning**
3-5 units, *Win* (Summit, J)
- ENGLISH 22/122. Jane Austen into Film**
3-5 units, *Win* (Shloss, C)
- ENGLISH 45/145. Writings by Women of Color**
3-5 units, *Win* (Moya, P)
- ENGLISH 183C. Feminist Theory and Twentieth-Century Culture**
5 units, *Spr* (Ngai, S)
- ENGLISH 260G. Century's End: Race, Gender, and Ethnicity at the Turn of the Century**
5 units, *Spr* (Fishkin, S)
- ENGLISH 362. Writing Together: Collaboration Then and Now**
5 units, *Aut* (Lunsford, A)
- FRENGEN 192E. Images of Women in French Cinema: 1930-1990**
3-5 units, *alternate years, not given this year*
- HISTORY 161. U.S. Women's History, 1890s-1990s**
5 units, *not given this year*
- HISTORY 208. Private Lives, Public Stories: Autobiography in Women's History**
5 units, *not given this year*
- HISTORY 221B. The Woman Question in Modern Russia**
5 units, *Aut* (Jolluck, K)
- HISTORY 221C. Love, Marriage, and Family in Early Modern Europe and Russia**
5 units, *not given this year*
- HISTORY 221D/321D. Women's Activism in War and Peace**
5 units, *Spr* (Jolluck, K)
- HISTORY 227/327. East European Women and War in the 20th Century**
5 units, *not given this year*
- HISTORY 244C/444C. The History of the Body in Science, Medicine, and Culture**
5 units, *Spr* (Schiebinger, L)
- HISTORY 258/358. History of Sexuality in the U.S.**
5 units, *Spr* (Freedman, E)
- HISTORY 295J/395J. Chinese Women's History**
5 units, *not given this year*
- HISTORY 298A/398A. Modernizing Women in Japan**
5 units, *not given this year*
- HISTORY 353B. Special Topics in American History: Gender, Race, and Sexuality**
5 units, *Win* (Freedman, E)
- HUMBIO 129. Critical Issues in International Women's Health**
4 units, *Aut* (Murray, A)
- HUMBIO 142. Adolescent Development**
4 units, *Win* (Medoff, L)
- HUMBIO 143. Adolescent Sexuality**
3 units, *Spr* (Brown, N)
- HUMBIO 144. Boys' Psychosocial Development**
4 units, *Win* (Chu, J)
- INDE 245. Women and Health Care**
1-2 units, *Aut* (Staff)
- JAPANGEN 67/267. Masculinity Studies and Feminist Theory**
4 units, *Spr* (Mason, M)
- LAW 307. Gender, Law, and Public Policy**
3 semester units, *Aut semester* (Rhode)
- LINGUIST 156. Language and Gender**
4 units, *Win* (Eckert, P)
- POLISCI 141. The Global Politics of Human Rights**
5 units, *Win* (Staff)
- PSYCH 162. The Psychology of Gender**
4 units, *not given this year*
- RELIGST 112. Handmaids and Harlots: Biblical Women in Jewish and Christian Traditions**
4 units, *Aut* (Leveen, A; Pitkin, B)
- RELIGST 156/356. Goddesses and Gender in Indian Religion**
4 units, *Spr* (Hess, L)
- RELIGST 172. Sex, Body, and Gender in Medieval Religion**
4 units, *not given this year*
- RELIGST 207. Gender in Islamic Scripture**
4 units, *Spr* (McLarney, E)
- RELIGST 263. Judaism and the Body**
4 units, *Aut* (Fonrobert, C)
- SOC 123/223. Sex and Love in Modern Society**
5 units, *Aut* (England, P)
- SOC 142/242. Sociology of Gender**
5 units, *Win* (Staff)
- SPANLIT 193. The Cinema of Pedro Almodóvar**
3-5 units, *Spr* (Yarbro-Bejarano, Y)
- SPANLIT 194. Women in Film and Film by Women: A Different Gaze?**
3-5 units, *not given this year*

SPANLIT 289. The Body in Chicana/o Cultural Representations
5 units, Win (Yarbro-Bejarano, Y)

SPANLIT 389E. Race and Sex in Cultural Representations
3-5 units, Win (Yarbro-Bejarano, Y)

OVERSEAS STUDIES

Courses approved for the Feminist Studies major and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

FLORENCE

FEMST 135F. Women in Italian Cinema: Maternity, Sexuality, and the Image—(Same as ITALGEN 135F.) GER:DB-Hum, EC-Gender
4 units, Spr (Campani, E)

FINANCIAL MATHEMATICS

Director: Tze Leung Lai

Core Faculty:

Business: D. Duffie, J. M. Harrison, K. Singleton

Economics: T. Amemiya, P. Hansen, M. Kurz, J. Shoven

Electrical Engineering: T. Cover

Management Science and Engineering: K. Giesecke, D. Luenberger, J. Primbs

Mathematics: S. Brendle, A. Dembo, P. Diaconis, V. Durrleman, G. Papanicolaou

Statistics: T. Cover, A. Dembo, P. Diaconis, T. Lai, A. Owen

Steering Committee:

A. Dembo, V. Durrleman, K. Giesecke, T. Lai, A. Owen, G. Papanicolaou, J. Primbs, K. Singleton

This is an interdisciplinary program that aims to provide a master's level education in applied and computational mathematics, statistics, and financial applications to individuals with strong mathematical skills.

The departments of Mathematics and Statistics, in close cooperation with the departments of Economics, and Management Science and Engineering, as well as the Graduate School of Business, provide many of the basic courses.

GRADUATE PROGRAMS

MASTER OF SCIENCE

The program requires that the student take 45 units of work. Of these 45 units of work, 12 courses must be taken from the offerings provided on the lists of required and elective courses. These courses must be taken for a letter grade, but students may elect to take one of the 12 courses credit/no credit. An overall grade point average (GPA) of 2.75 is required. There is no thesis requirement.

Ordinarily, four quarters are needed to complete all requirements.

Admission—To be eligible for admission, students are expected to have taken the following courses or their equivalent:

1. Linear algebra at the level of MATH 103.
2. Advanced calculus (real analysis) at the level of MATH 115.
3. Basic ordinary and partial differential equations at the level of MATH 131 and 132 (basic partial differential equations).
4. Probability at the level of STATS 116; theory of statistics at the level of STATS 200; and stochastic processes at the level of STATS 217 or, preferably, MATH 136.
5. Computer programming at the level of CS 106A.

Some of these courses are offered as summer courses and may be taken by candidates lacking the required background.

Candidates for admission must take the general Graduate Record Examination and preferably the subject test in Mathematics. Information about this exam can be found at <http://www.gre.org>.

Requirements—For the M.S. degree in Financial Mathematics, students must fulfill six of the following required courses:

1. In stochastic processes and statistics:
 - a) MATH 236. Introduction to Stochastic Differential Equations
 - b) STATS 241. Statistical Modeling in Financial Markets
2. In differential equations, simulation, and computing:
 - a) MATH 220B. Partial Differential Equations of Applied Mathematics
 - b) MATH 239. Computation and Simulation in Finance
3. In finance and economics:
 - a) MATH 180. Introduction to Financial Mathematics *or* MS&E 242H. Investment Science Honors *or* FINANCE 620 (offered by GSB; contact GSB for description) Financial Markets I
 - b) MATH 238/STATS 250. Mathematical Finance

Courses that are equivalent to the above and have been taken previously may be waived by the adviser, in which case they must be replaced by elective courses in the same subject area.

In addition, students must take at least six approved elective courses from a list that can be found on the web site at <http://finmath.stanford.edu/>. With the approval of the instructor, credit can be obtained for practical training in industry. Students must sign up for STATS 297 and write a detailed report in order to receive credit.

A seminar in Financial Mathematics is an integral part of the program and an opportunity to interact with leading academic and industry speakers (for credit, enroll in STATS 239).

Any remaining units required to complete the 45 total must be taken from the following options:

1. Courses from the approved list of electives with emphasis on computation, information technology, or finance.
2. STATS 200, 217, 218; MATH 131, 132, 202; or ECON 140.
3. Additional practical CS courses.

The requirements must be met within two years of entering the program, or four academic quarters for those already at Stanford.

COURSES

The following are required core courses.

GRADUATE SCHOOL OF BUSINESS

FINANCE 620. Financial Markets I—Theoretical financial economics emphasizing asset pricing. Individual choices under uncertainty including expected utility theory, risk aversion, stochastic dominance, and two-period consumption-portfolio problems. Equilibrium pricing theories including implications of no arbitrage and stochastic discount factor, risk sharing, aggregation, and consumption-based pricing in complete markets, mean-variance efficiency and the capital asset pricing model, and the arbitrage pricing theory. Relationships among pricing theories.

4 units, Aut (Staff)

MANAGEMENT SCIENCE AND ENGINEERING

MS&E 242H. Investment Science Honors—Concepts of modern quantitative finance and investments. Basic concepts under certainty including arbitrage, term structure of interest rates, and bond portfolio immunization. A situation of uncertainty in one period. Topics: arbitrage; theorems of asset pricing; pricing measures; derivative securities; applications and estimating of financial risk measures; mean-variance portfolio analysis; and equilibrium and the capital asset pricing model. Group projects involving financial market data. Prerequisites: basic probability, statistics, and economics such as MS&E 120, 121, MATH 51, ENGR 60, or equivalents. No prior knowledge of finance required.

3 units, Aut (Giesecke, K)

MATHEMATICS

MATH 180. Introduction to Financial Mathematics—Financial derivatives: contracts and options. Hedging and risk management. Arbitrage, interest rate, and discounted value. Geometric random walk and Brownian motion as models of risky assets. Initial boundary value problems for the heat and related partial differential equations. Self-financing replicating

portfolio. Black-Scholes pricing of European options. Dividends. Implied volatility. Optimal stopping and American options. Prerequisite: 53. Corequisites: 131, 151 or STATS 116.

3 units, Aut (Brendle, S)

MATH 220B. Partial Differential Equations of Applied Mathematics—Parabolic and elliptic partial differential equations. Eigenvalue problems, Green's functions, properties of harmonic functions, potential theory, Fourier series and Fourier transform. Prerequisite: 220A or 131.

3 units, Win (Liu, T)

MATH 236. Introduction to Stochastic Differential Equations—Brownian motion, stochastic integrals, and diffusions as solutions of stochastic differential equations. Functionals of diffusions and their connection with partial differential equations. Random walk approximation of diffusions. Prerequisite: 136 or equivalent and differential equations.

3 units, Win (Papanicolaou, G)

MATH 238. Mathematical Finance—(Same as STATS 250.) Stochastic models of financial markets. Forward and futures contracts. European options and equivalent martingale measures. Hedging strategies and management of risk. Term structure models and interest rate derivatives. Optimal stopping and American options. Corequisites: MATH 236 and 220B or equivalent.

3 units, Win (Papanicolaou, G)

MATH 239. Computation and Simulation in Finance—Monte Carlo, finite difference, tree, and transform methods for the numerical solution of partial differential equations in finance. Emphasis is on derivative security pricing. Prerequisite: 238 or equivalent.

3 units, Spr (Durrleman, V)

STATISTICS

STATS 241. Statistical Modeling in Financial Markets—Nonparametric regression and yield curve smoothing. Advanced time series modeling and forecasting. Market risk measures. Substantive and empirical modeling approaches in financial markets. Statistical trading strategies. Prerequisite: 240 or equivalent.

3-4 units, Aut, Spr (Lai, T)

FRENCH AND ITALIAN

Emeriti: (Professors) John G. Barson, Marc Bertrand, Robert G. Cohn, John Freccero, René Girard, Ralph M. Hester, Pauline Newman-Gordon, Roberto B. Sangiorgi, Leo Weinstein

Chair: Joshua Landy

Directors of Graduate Studies: Hans U. Gumbrecht (French), Carolyn Springer (Italian)

Directors of Undergraduate Studies: to be announced (French), Carolyn Springer (Italian)

Professors: Jean-Marie Apostolidès, Margaret Cohen, Jean-Pierre Dupuy, Hans U. Gumbrecht, Robert Harrison, Elisabeth Mudimbe-Boyi, Jeffrey T. Schnapp, Michel Serres

Associate Professors: Joshua Landy, Carolyn Springer

Assistant Professors: Cécile Alduy, Dan Edelstein, Laura Wittman

Senior Lecturers: Maria Devine, Nelee Langmuir

Lecturers: John Mustain, Kathy Richman, Sarah Sussman

Courtesy Professors: Paula Findlen, Michael Marrinan

Visiting Professors: Karl Bohrer, Remo Ceserani

Department Offices: Building 260, Room 122-123

Mail Code: 94305-2010

Department Phone: (650) 723-4183

Email: fren-ital@stanford.edu

Web Site: <http://www.stanford.edu/dept/fren-ital/>

Courses given in French and Italian have the subject codes FRENGEN, FRENLIT, ITALGEN, and ITALLIT. For courses in French or Italian language instruction with the subject code FRENLANG or ITALLANG, see the "Language Center" section of this bulletin. For a complete list of subject codes, see Appendix B.

FRENCH SECTION

The French section provides students with the opportunity to pursue course work at all levels in French language, literature, cultural and intellectual history, theory, film, and Francophone studies. It understands the domain of "French Studies" in the broadest possible sense: as encompassing the complex of cultural, political, social, scientific, commercial, and intellectual phenomena associated with French-speaking parts of the world, from France and Belgium to Canada, Africa, and the Caribbean.

Three degree programs are available in French: a B.A. (with two concentrations), a terminal M.A., and a Ph.D. (with various possible minors and combined degrees).

A curator for Romance Languages oversees the extensive French collection at Green Library. The Hoover Institute on War, Revolution, and Peace also includes a wealth of materials on 20th-century France and on French social and political movements.

A distinguished group of visiting faculty and instructors contributes regularly to the life of the French section. The section maintains frequent contacts with the Ecole Normale Supérieure, the Institut d'Etudes Politiques, the Ecole Polytechnique, and other prestigious institutions.

France-Stanford Center for Interdisciplinary Studies—The France-Stanford Center for Interdisciplinary Studies, founded in partnership with the French Ministry of Foreign Affairs, aims to bridge the disciplines of the humanities, social sciences, sciences, engineering, business, and law, addressing historical and contemporary issues from a broad range of perspectives. Its programs bring faculty and students from across Stanford's departments and schools together and in contact with colleagues in France to explore issues of common intellectual concern. The center invites to campus French-speaking scholars who offer courses or give lectures or seminars in various University centers and programs. It currently facilitates internships for Stanford students in computer science and engineering in Sophia-Antipolis, France's new high-tech center near Nice.

Stanford in Paris—The Stanford Overseas Studies Program in Paris offers undergraduates the opportunity to study in France during the Autumn, Winter, and Spring quarters. It provides a wide range of academic options, including course work at the Stanford center and at the University of Paris, independent study projects, and internships. In addition, the program promotes a high degree of interaction with the local community through volunteer employment, homestays, and internships. The minimum language requirement for admission into Stanford in Paris is one year of French at the college level.

Courses offered in Paris may count toward fulfillment of the requirements of the French major or minor. Specialized offerings at the Stanford home campus and in Paris encourage engineering students to study abroad and to coordinate internships through the department to work in France. Students should consult with the Director of Undergraduate Studies before attending the program, and after returning, in order to ensure that course work and skills acquired abroad can be coordinated appropriately with their degree program. Detailed information, including program requirements and curricular offerings, may be obtained from the “Overseas Studies” section of this bulletin, the Stanford in Paris web site <http://osp.stanford.edu/program/paris>, or the Overseas Studies Program Office in Sweet Hall.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The French section offers a major and a minor in French. Students are encouraged to pursue a course of study tailored to their individual needs and interests. For some students, a degree in French serves as a stepping stone to entering international business or law; for others, it provides training as a translator or teacher; for others, it serves as preparation for graduate studies in French, History, or Comparative Literature.

The French literature, culture, and civilization specialization allows students to combine their work in French with work from another field such as African studies, linguistics, art history, music, economics, history, education, medicine, international relations, political science, or other foreign languages and literatures. The literature and philosophy specialization offers students the opportunity to pursue interdisciplinary studies at the intersection of literature and philosophy in a structured manner and alongside similarly interested students from a variety of humanistic disciplines.

Students who complete the department’s two quarter IHUM sequence are eligible for 5 units towards the French major or minor. Students enrolled in the French language discussion section of the IHUM sequence receive, in addition to these 5 units, an additional 4 units (2 per quarter), assuming that they complete the written work in French.

Prerequisites—Before declaring a French major, a student must be proficient in written and spoken French at a second-year college level. Such proficiency must be demonstrated either:

1. by having completed the entire language sequence up to and including FRENLANG 23;
2. by having scored a 5 or better on either the French language or the French literature Advanced Placement (AP) exams; *or*
3. by having demonstrated equivalent proficiency on the departmental placement exam offered at the beginning of each academic quarter.

Students not meeting at least one of these criteria are required to complete the portion of the language sequence as deemed necessary by the department before beginning to take courses toward the major.

REQUIREMENTS

The French major requires a minimum of 56 units, all courses of which must be taken for a letter grade and must be selected in accordance with the following requirements:

1. *Advanced language* (ca. 4 units): FRENLANG 126, Stylistics and Textual Analysis
2. *Introductory series on French and Francophone literature and culture* (ca. 12 units): three courses must be taken from the FRENLIT 130, 131, 132, 133 sequence. A 130-level course fulfills the Writing in the Major requirement.

3. *Research Seminar* (2 units): a majors-only seminar, DLCL 189, must be taken in the Autumn Quarter of the senior year. This course prepares and assists students as they undertake either their senior project (see below) or honors thesis. It also familiarizes them with research resources in the department and University and helps students think critically about their research topics. By the end of the course, students must have chosen an adviser, generally a faculty member in the department, who offers support and feedback throughout the development of the senior project or honors thesis.
4. *Ancien Régime courses* (ca. 8 units): at least two courses must concern the period before July 1789. Courses fulfilling this requirement within the department must be drawn from the 140 level or above. Courses chosen from outside the department must be preapproved by the Director of Undergraduate Studies.
5. *Upper-level French courses* (ca. 8 units): at least two additional courses must be taken with the department. In total, at least 32 units of course work must be taken within the department. No more than three courses numbered lower than 130 may be counted towards the major.
6. *Remaining courses* (ca. 22 units): the student is encouraged to use the remaining five or more courses to develop a specialized knowledge of a specific domain related to either the senior project or the honors thesis. These courses must show obvious internal consistency and relevance to the chosen focus, and must be approved by the Director of Undergraduate Studies. Where possible, students are encouraged to complete their written work in French.
7. *One course*, for a maximum of 4 units, may be drawn from individual work (199).

Senior Project—In order to demonstrate the quality of his or her scholarly work and command of written French, each major not writing an honors thesis (see “Honors Program” below) is required to submit a senior project to the project adviser before May 15 of the senior year. The project consists of a research paper with a target length of 20 pages and must be written in French.

The senior project is not graded and no credit is offered for it. However, acceptance of the senior project by the project adviser is a condition for graduation from the department. A paper deemed unsatisfactory by the project adviser is returned to the student for rework and resubmission by an agreed-upon date.

Students are advised to begin thinking about their senior projects as early as their junior year, even if they are in Paris. While in Paris, students should avail themselves of the unique resources the city has to offer for research on their chosen topic.

FRENCH AND PHILOSOPHY

The French and Philosophy major specialization requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. *Advanced language* (ca. 4 units): FRENLANG 126, Stylistics and Textual Analysis.
2. *Introductory Series on French and Francophone Literature and Culture* (ca. 12 units): three courses must be taken from the FRENLIT 130, 131, 132, 133 sequence.
3. *Philosophy Writing in the Major* (5 units): PHIL 80. Prerequisite: introductory philosophy class.
4. *Philosophy and Literature Gateway Course* (4 units): FRENGEN 181 (same as PHIL 81). This course should be taken as early as possible in the student’s career, normally in the sophomore year.
5. *Aesthetics, Ethics, Political Philosophy* (ca. 4 units): one course from the PHIL 170 series.
6. *Language, Mind, Metaphysics, and Epistemology* (ca. 4 units): one course from the PHIL 180 series.
7. *History of Philosophy* (ca. 8 units): two courses in the history of philosophy, numbered above PHIL 100.
8. *Upper Division French Courses* (ca. 12 units): at least three courses numbered FRENLIT/FRENGEN 140 or higher.
9. *Related Courses* (ca. 8 units): two upper division courses relevant to the student’s chosen area of specialization. One course (4 units) may be FRENLIT 199, Individual Work.

10. *Capstone Seminar* (ca. 4 units): chosen from a set of seminars chosen by the undergraduate adviser of the program in philosophical and literary thought. This course must be taken in the student's senior year.

The capstone seminar and the two related courses must be approved by both the undergraduate adviser of French and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. Substitutions, including transfer credit, will not normally be permitted for items 5, 6, and 7, and are not permitted under any circumstances for items 3, 4, and 10. Up to 10 units of courses taken in the Philosophy department may be taken CR/NC or S/NS; the remainder must be taken for a letter grade.

EXTENDED MAJORS

Requirements for both extended majors are essentially identical to those of the French major with a concentration in French literature.

French and English Literatures—In addition to the requirements for the B.A. in French, candidates complete four English literature courses numbered 100 and above related to their French program.

French and Italian Literatures—In addition to the requirements for the B.A. in French, students complete four Italian courses numbered 200 and above related to their concentration in French.

DIGITAL HUMANITIES MODULE

The French and Italian department, in collaboration with the Humanities Lab, also offers a digital humanities module that can be combined with any of the department's major programs. Students who are interested in digital humanities should contact the department's Director of Undergraduate Studies who facilitates coordination with the Humanities Lab. Students planning to combine the French major and the digital humanities module must fulfill the following requirements in addition to the general major requirements:

1. CS 105 or equivalent
2. Participate in the Humanities Lab Gateway core seminar (4 units)
3. Complete the Humanities Lab Practicum (2 units) in the junior year
4. Complete one digital project, in lieu of the course's main writing requirement, in a course offered in the department under the supervision of the course instructor and humanities lab adviser. This should usually be done in an upper-division course.

Students are encouraged to enroll in DLCL 99, Multimedia Course Lab, when working on the digital course project.

MINORS

Students considering a minor in French are encouraged to design a course of studies that fosters their understanding of the interaction between French and their major field of specialization. A minimum of 24 units of undergraduate work beyond the French 23 level must be completed. All courses must be taken for a letter grade.

Requirements for the minor include one advanced language course (at the 120 level); three of the introductory series on French and Francophone literature and culture (FRENLIT 130-133); and a minimum of two additional courses in language or literature numbered 121 and above. Of these, only one may be taught in English. All courses must be chosen in consultation with the Director of Undergraduate Studies.

Double-counting is not permitted; in other words, courses used to satisfy French minor requirements may not be counted toward a student's major or toward a second minor.

MINOR IN LITERATURE

An undergraduate minor in Literature is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Department of French and Italian and the Language Center. Students should consult the "Division of Literatures, Cultures, and Languages" section of this bulletin for further details about the minor and its requirements.

MINOR IN MODERN LANGUAGES

An undergraduate minor in Modern Languages is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Department of French and Italian and the Language Center. Students should consult the "Division of Literatures, Cultures, and Languages" section of this bulletin for further details about the minor and its requirements.

CROSSDISCIPLINARY STUDIES

FRENCH AND LINGUISTICS

Linguistics majors may elect to specialize in the French language. In addition to 50 units in Linguistics, of which two courses (LINGUIST 110 and 160) may be replaced by comparable courses in French, students opting for a French Language specialization must take three courses in the introductory series devoted to French and Francophone literature and culture (FRENLIT 130-133). For full details, contact the Department of Linguistics.

HONORS PROGRAM

Majors are eligible to apply to the honors program if they have maintained an average grade point average (GPA) of 3.5 in five upper-division French courses. The honors program candidate must fulfill all regular requirements for the major, save the senior project, from which he or she is exempt. Instead, the student undertakes the writing of a research paper no shorter than 50 pages in length, written in French or English, on a specialized topic. No later than the end of the Spring Quarter of the junior year, the student must submit to the Director of Undergraduate Studies an "Application for Honors in French," the central portion of which must contain an outline of the proposed honors essay. If it is in need of revisions, the Director of Undergraduate Studies helps the student through the revision process until the proposal is granted his or her approval. (The Director of Undergraduate Studies also helps the student identify an appropriate adviser for the essay.) Students may enroll for 2 units of credit in FRENLIT 198 for the drafting or revision of the thesis proposal in Spring Quarter of the junior year. In Autumn Quarter of the senior year, honors students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in FRENLIT 198 while composing the thesis during Winter Quarter. A total of 10-12 units are awarded for successful completion of honors course work, independent study, and the finished thesis. All honors essays are due to the thesis adviser no later than 5:00 p.m. on May 15 of the terminal year. If an essay is found deserving of grade of 'A-' or better by the thesis adviser, honors are granted at the time of graduation.

Honors College—The Department of French and Italian encourages all honors students to enroll in the honors college run by the Division of Literatures, Cultures, and Languages. The college meets at the end of every summer, during the weeks directly preceding the start of the academic year, and is designed to help students develop their honors thesis projects. Applications must be submitted by the Spring Quarter of the same calendar year. For more information, contact the undergraduate student services officer.

COTERMINAL BACHELOR'S AND MASTER'S PROGRAM

Each year the department admits a very small number of highly motivated undergraduates to its coterminal B.A. and M.A. degree in French. Applications must be submitted by January 31 of the senior year to the department chair and must include: a written statement of purpose, two letters of recommendation from faculty at Stanford, and a transcript. Students accepted into the coterminal program must have been undergraduate French majors and must meet all requirements that apply to both degrees.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

LA MAISON FRANÇAISE

La Maison Française, 610 Mayfield, is an undergraduate residence that serves as a campus French cultural center, hosting in-house seminars as well as social events, film series, readings, and lectures by distinguished representatives of French and Francophone intellectual, artistic, and political life.

GRADUATE PROGRAMS

Admission to the M.A. and Ph.D. Programs—Applications and admissions information may be obtained from Graduate Admissions in the Registrar's Office, or at <http://gradadmissions.stanford.edu>. Applicants should read the general regulations governing degrees in the "Graduate Degrees" section of this bulletin. They should have preparation equivalent to an undergraduate major in French and should also have reached a high level of speaking and writing proficiency in French. Previous study of a language other than French is also highly desirable. Recent Graduate Record Examination (GRE) results are required, as is a writing sample representative of the applicant's best undergraduate work.

MASTER OF ARTS

The terminal M.A. in French provides a flexible combination of language, literature, cultural history, and methodology course work designed to enhance the preparation of secondary school, junior college, or college teachers.

Candidates must complete a minimum of 45 units of graduate work, all courses being taken for a letter grade, with a grade point average (GPA) of 3.3, as well as pass the master's examination at the end of their training. To fulfill the requirements in a single year, enrollment must be for an average of 12 units per quarter.

Applications for admission to the Masters of Arts program must be received by March 29 of the prior academic year. Candidates for this degree are not eligible for financial aid or for teaching assistantships.

REQUIREMENTS

The basic program of 45 units requires the following course work:

1. One teaching methodology course, ordinarily APPLING 201, The Learning and Teaching of Second Languages, the second-language-pedagogy course offered by the Stanford Language Center.
2. A cultural history course (to be taken either inside or outside the Department of French and Italian).
3. All remaining units are to be taken in advanced French literature courses (200 level or above), three of which must be concerned with the prerevolutionary period of French cultural history.

EXAMINATION

The terminal M.A. examination is normally administered two weeks before the end of the Spring Quarter by the three members of the examination committee, selected each year by the Director of Graduate Studies. It consists of two parts:

1. The written exam (two hours) tests the candidate's general knowledge of French literature and is based on the same reading list as that for the Ph.D. qualifying exam (see below).

The exam requires that the candidate answer four questions (out of six) in a manner that demonstrates his/her ability to synthesize and draw parallels between periods, genres, and systems of representation on the basis of the standard reading list. At least one question must be answered in French and two in English. Use of a dictionary is allowed.

If the student's performance on the exam is deemed a "pass" by two out of three of the members of the examining committee, the student is then permitted to go on to the oral examination (which is ordinarily taken later the same week).

Should the candidate fail the M.A. written exam, he/she is given a second chance at the end of the Spring Quarter.

2. The oral exam (90 minutes) assumes as its point of departure the student's answers on the written exam. It examines the candidate's knowledge and understanding of French literary history on the basis of the standard reading list.

At the conclusion of the oral exam, the examination committee meets in closed session and discusses the student's performance on the written and the oral portions of the examination. If it is judged adequate, the M.A. degree is granted. In no event may the master's written and oral exams be taken more than twice.

DOCTOR OF PHILOSOPHY

The Department of French and Italian provides students with the opportunity to pursue advanced work in French language, literature, cultural history, theory, and Francophone studies within a uniquely flexible interdisciplinary framework. Unlike conventional Ph.D. programs, it encourages students to construct a highly individualized course of study, integrating specialization in a particular literary period or area with work in such fields as art history, classics, film studies, the history of science and technology, linguistics, literary theory, music, and philosophy. The program is founded on the belief that such a balance between period/area specialization and interdisciplinary breadth is not only desirable but essential in a field such as French Studies. Students in the Ph.D. program are normally admitted as French Fellows on a four- to five-year fellowship plan that integrates their financial support with rigorous training as scholars and as prospective university faculty.

Students admitted to the program work closely with the Director of Graduate Studies in structuring a plan consistent with their needs and interests. Aside from the benefits of the program's flexible structure, a number of unique resources are available to students. The French section's exchange program with the Ecole Normale Supérieure provides candidates (selected on a competitive basis) with the opportunity to pursue dissertation research in Paris.

ADVISING

Given the interdisciplinary nature of the Ph.D. program in French and the opportunity it affords each student to create an individualized program of study, regular consultation with an adviser is of the utmost importance. The adviser for all entering graduate students is the Director of Graduate Studies, whose responsibility it is to assist students with their course planning and to keep a running check on progress in completing the course, teaching, and language requirements. By the end of the first year of study, each student must choose a faculty adviser whose expertise is appropriate to his or her own area of research and interests.

Entering graduate students are also paired with a faculty mentor as a function of their stated research interests at the time of admission. The role of the mentor is to advise the student on an informal basis regarding the student's academic program and plans.

REQUIREMENTS

A candidate for the Ph.D. degree in French must complete at least 135 units of graduate-level study and teach five language courses in the section. 72 of the 135 units must be taken within the department.

Students entering with a master's degree or previous graduate work may receive credit as determined on a case-by-case basis, up to a maximum of 45 units. Fellowship funding, teaching, and other requirements are adjusted according to University regulations.

REQUIRED/RECOMMENDED COURSES

Three courses are required:

1. FRENGEN 369, Introduction to Graduate Studies: Fragments of a Material History of Literature, a 5-unit seminar offered in the Autumn Quarter of each year, designed to acquaint students with the theoretical and methodological concerns of literary study. This course must be taken in the first quarter of study.
2. Definition and Inquiry: FRENGEN 201E, New Methods and Sources in French and Italian Studies, a three-unit course designed to familiarize graduate students with research materials and techniques. This course must be taken no later than the end of the third year of study.
3. APPLING 201, The Learning and Teaching of Second Languages, the second-language pedagogy course offered by the Stanford Language Center in the Spring Quarter of each year in order to prepare entering graduate students for teaching in their second year.

Distribution of Elective Courses—Apart from these requirements, students are granted considerable freedom in structuring a course of study appropriate to their individual needs. Of the 135 minimum units of graduate course work required for the Ph.D., at least 72 units must be taken within the Department of French and Italian.

Language Requirements—Attaining a native or near-native fluency in French is the individual responsibility of all candidates in the Ph.D. program, and remedial course work needed to achieve such fluency cannot count towards the Ph.D. degree. In addition, candidates are required to achieve a high level of proficiency in one additional foreign language, with the language in question to be determined by the student and his or her adviser as a function of the student's area of specialization. Such proficiency may be demonstrated either by successfully completing a third-year level or above undergraduate course or, better, a graduate seminar in the language in question; or by passing an exam that establishes a third-year or above level of competence in writing, reading, and speaking. (In no case is passage of a standard reading competence exam considered sufficient.) In the case of ancient Greek and Latin, a high level of proficiency means a level superior to a second year collegiate level of proficiency in reading and writing.

The second foreign language requirement should be completed as soon as possible, but in any case not later than the end of the third year for students who entered the program without an M.A., and not later than the end of the second year for students who entered the program with a master's degree. Completion of the language requirements is a prerequisite for taking the University Oral Examination.

EXAMINATIONS

There are three examinations: the 90-minute qualifying exam, the special topic exam, and the University oral examination.

Qualifying Examination—The first oral examination, which normally takes place at the end of Spring Quarter of the first year of study, tests the student's knowledge of the French language and of French literature. The student is responsible for scheduling the exam one month in advance. The date and time chosen must be determined in consultation with the examining committee (see below).

The exam is based on a standard reading list covering major works from all periods of French literature, from the Middle Ages to the contemporary scene. The list may be expanded to reflect a student's particular interests, but not abridged.

Half of the exam takes place in English, half in French (with the student free to choose which portion transpires in which language).

The exam consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given either in English or in French and should engage, in a succinct and synthetic manner, an issue or set of issues of broad relevance to French literary history about which the student has been thinking as he or she has been preparing the exam. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggestive and not exhaustive, so as to provoke further discussion.
2. A 70-minute question and answer period in which the examining committee follows up on the candidate's presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in French. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit.

The examining committee consists of two faculty members selected by the student, as well as the Director of Graduate Studies.

Two weeks before the exam, the student must also submit a graduate seminar paper which he or she considers representative of the quality of his or her graduate work at Stanford.

On the basis of this paper, the results of the qualifying examination, and an evaluation of the student's overall progress, the members of the student's examining committee vote for or against admission to candidacy for the Ph.D. The terminal master's degree may be awarded to students

who have completed the qualifying procedure, but whose work is judged insufficient for admission to candidacy for the Ph.D. If the overall case for or against promotion to candidacy is deemed uncertain, students may be asked either to retake the qualifying exam, to submit a new paper, or they may be admitted to candidacy on a probationary basis. Subject to approval by the Director of Graduate Studies and department chair, students already holding an advanced degree in French Studies, when admitted to the French Ph.D. program, may be excused from the qualifying exam. However, they must present a formal request for a waiver to the Director of Graduate Studies upon their arrival at Stanford. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the qualifying exam would involve considerable repetition of already completed work is such a waiver likely to be granted.

Special Topic Examination—The second oral examination, which normally takes place at the end of Spring Quarter of the second year of study, concerns a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his or her adviser and the Director of Graduate Studies. Students should design this research project so that it has the breadth and focus of a book they might write or a seminar they might teach. The proposed topic should be discussed with the Director of Graduate Studies before the end of the quarter preceding the quarter in which they plan to take the exam. The student and the Director of Graduate Studies choose a committee of two faculty members with interests close to the proposed topic. (In most cases, one of these committee members is the student's adviser.) In addition to these two members, the examination committee includes the Director of Graduate Studies, who serves in an ex officio capacity as the third member of the examination committee.

At the beginning of the quarter in which he or she takes this examination, the student discusses research plans with committee members, who offer suggestions on the project and on the reading list. In general, the reading list should be between one and two single-spaced pages in length. In the course of the quarter, the student should regularly consult with committee members to discuss his or her progress. The actual examination lasts one hour. The candidate must present a tentative reading list to the members of the committee about twelve weeks before the examination and a final reading list at least one week before the examination. This list, to be headed by a title describing the topic of the examination, may be divided into two parts: core works that the student has found to be central to his or her topic, and works that fill out the periphery of the topic. Two copies of the final reading list must be given to the student services officer for the Division of Languages, Cultures, and Literatures: one for the student's file and one for a special file which subsequent students can consult. The examination assumes the form of an oral colloquy between the student and the examining committee. It concentrates on the conclusions to which the student's research has led him or her, and aims to determine the student's overall mastery of the research topic in question. At the beginning of the examination, the student presents a talk of no longer than 20 minutes (not to be written out, but to be presented from notes) reviewing the results of his or her reading and outlining the major features and implications of the chosen topic. The remainder of the hour is devoted to a discussion between the student and the committee regarding the problems the student raised in the talk and the reading list itself.

The following procedures are applicable to both the qualifying and special topic exams:

1. The committee meets briefly at the end of the exam and immediately informs the student as to whether he or she has passed the examination.
2. In the week after the examination, the student is expected to meet individually with members of the committee to discuss strengths and weaknesses revealed during the qualifying exam or colloquy.
3. The Director of Graduate Studies places a brief letter describing each one-hour oral exam in the student's file, a copy of which is also be furnished to the student.

The University Orals—The University Ph.D. examination follows most of the same procedures outlined above. Normally students put one, and at most two, full-time quarters of study into preparation for the exam. The University oral exam should virtually always be taken at the end of Spring Quarter of the third year of study. Students must complete minimum course requirements (as listed in this bulletin) and all language and course requirements before the quarter in which they take the University oral examination.

Early in the quarter before they intend to take the University Ph.D. examination, students must discuss the scope and nature of the period to be covered, as well as the dissertation proposal, with the Director of Graduate Studies. The reading list should include works in all genres relevant to the period covered. The amount of non-literary or crossdisciplinary material on the reading list varies according to the period and the research interests of the student. Students ordinarily cover about a century of writing in great depth. As with the preceding examinations, the Director of Graduate Studies and the student determine the committee's makeup.

The governing principle is that the University oral examination in French must be a period examination rather than one on the specific concerns of the dissertation proposal, which is dealt with separately in a later colloquium. It follows from this basic principle that the examination covers the major authors and genres in the student's period of choice. The lists may well include critical and scholarly works or texts from outside the traditional domain of French literary studies (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student's field.

The aim of the University oral is to establish the student's credentials as a specialist in the period of his or her choosing, so the core of the reading list must be made up of texts that are essential to any specialist. It follows that reading lists must not focus on the narrow area of the student's research interests. The tendency to bias reading lists toward the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work will prove relevant, but they should also remember that the examination is the central means of certifying their expertise in a literary period.

The exam committee consists of four members, in addition to a committee chair from outside the Department of French and Italian whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list. Students are required to discuss the reading list for the examination with the Director of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be in the hands of the committee and the student services officer for the Division of Literatures, Cultures, and Languages no later than two weeks preceding the examination. Students must submit the Request for University Oral Exam form to the student services officer at least three weeks before the proposed date of the exam. At the same time this form is submitted, students should also submit the Notice of Appointment of the Ph.D. dissertation reading committee. In addition, a Report on Ph.D. Foreign Language must be completed, certifying a reading knowledge of the foreign language the student presents to meet the language requirements. The two-hour examination consists of the following two parts:

1. Forty minutes: a 20-minute talk by the candidate followed by a 20-minute question and answer period concerning the talk.

Working with the committee members, the candidate's adviser will prepare three or more questions to be presented to the candidate at 8:00 a.m. on the day of the examination. These questions concern broad topics pertinent to the candidate's reading list and period of specialization, including concerns relevant, but by no means limited to, the student's projected dissertation. The candidate chooses one of the questions and develops a 20-minute talk in response. Students must not read from a prepared text, but rather must speak from notes. They are free to consult any necessary materials while preparing the

talk. The candidate is questioned for 20 minutes on the talk, with the dissertation adviser starting the questioning.

2. One hour, 20 minutes: questions on the area of concentration.

Each member of the committee, except for the chair, is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications.

The University oral examination is a formal University event. It represents the last occasion for the faculty to evaluate a student's overall preparation as a candidate for the Ph.D. After the University orals, only the colloquium on the dissertation prospectus and certification of the final dissertation by the student's reading committee stand in the way of conferral of the Ph.D. The examination, therefore, is a uniquely significant event and is designed to evaluate the student's preparation as a specialist in a given sector of French studies, but within a broader context than that provided by a single course, examination, or even the dissertation itself.

DISSERTATION

The doctoral dissertation should demonstrate the ability to carry out research, organize, and present the results in publishable form. The scope of the dissertation should be such that it could be completed in 12 to 18 months of full-time work.

Colloquium on the Dissertation Proposal—The colloquium normally takes place in the quarter following the University oral examination; in most cases this means early in Autumn Quarter of the student's fourth year of study. The colloquium lasts one hour, begins with a brief introduction to the dissertation prospectus by the student (lasting no more than ten minutes), and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium.

The prospectus must be prepared in close consultation with the dissertation director during the months preceding the colloquium. It must be submitted in its final form to the readers no later than one week before the colloquium. A prospectus should not exceed ten double-spaced pages, in addition to which it should include a working bibliography of primary and secondary sources. It should offer a synthetic overview of the dissertation, describe its methodology and the project's relation to prior scholarship on the topic, and lay out a complete chapter-by-chapter plan.

It is the student's responsibility to schedule the colloquium no later than the first half of the quarter subsequent to the quarter in which the student passed the University oral examination. The student should arrange the date and time in consultation with the student services officer and with the three examiners. The student services officer schedules an appropriate room for the colloquium.

Members of the dissertation reading committee ordinarily are drawn from the University oral examination committee, but need not be the same.

JOINT DEGREES AND MINORS

A candidate may also take a joint degree in French and Humanities, as described in the "Interdisciplinary Studies in Humanities" section of this bulletin. Minors are possible in Comparative Literature, Italian, Linguistics, Modern Thought and Literature, and other departments offering related courses such as Art and Art History, History, Music, Philosophy, and Spanish.

Students interested in a joint degree or a minor should design their course of study with their adviser(s). Joint degrees and minors usually require 24 additional units. With careful planning, students may complete course work for the Ph.D. and the minor in a total of nine quarters.

Ph.D. Minor in French Literature—The department offers a minor in French Literature. The requirement for a minor in French is successful completion of 24 units of graduate course work in the French section with a grade point average (GPA) of 3.0 or above. Interested students should consult the graduate adviser.

ITALIAN SECTION

The Italian section offers a variety of graduate and undergraduate programs in Italian language, literature, culture, and intellectual history. Course offerings range from small and highly specialized graduate seminars to general courses open to all students on authors such as Dante, Boccaccio, and Machiavelli.

On the undergraduate level, a number of options are available. In addition to the Italian major, students may choose from a minor in Italian, an honors program in the Humanities (see the “Interdisciplinary Studies in Humanities” section of this bulletin), an honors program in Italian, and two extended majors: one in Italian and French literature, and one in Italian and English literature.

On the graduate level, programs of study leading to the M.A. degree and the Ph.D. degree are offered in Italian literature. Joint programs for the Ph.D. degree with the graduate programs in Comparative Literature, Humanities, and Modern Thought and Literature are also available.

Special collections and facilities at Stanford offer the possibility for extensive research in Italian studies and related fields. These include the undergraduate and graduate libraries and the Hoover Institution for the Study of War, Revolution, and Peace. Collections in Green Research Library are especially strong in the Medieval, Renaissance, and contemporary periods; the Italian section is one of the larger constituents of the Western European collection at the Hoover Library; and the Music Library has excellent holdings in Italian opera.

Stanford in Italy—Stanford in Florence affords undergraduates with at least three quarters of Italian the opportunity to take advantage of the unique intellectual and visual resources of the city and to focus on two areas: Renaissance History and Art, and Contemporary Italian and European Studies. The program is structured to help integrate students as fully as possible into Italian culture through homestays, Florence University courses, the Language Partners Program, research, internship and public service opportunities, and by conducting some of the program’s classes completely in Italian. Many of the courses offered in Florence may count toward the fulfillment of requirements for the Italian major or minor. Students are encouraged to consult with the Italian undergraduate adviser before and after a sojourn in Florence to ensure that their course selections meet Italian section requirements. Information on the Florence program is available in the “Overseas Studies” section of this bulletin, the Stanford in Florence web site <http://osp.stanford.edu/program/florence>, or at the Overseas Studies office in Sweet Hall.

UNDERGRADUATE PROGRAMS BACHELOR OF ARTS

The Italian major offers students the opportunity to develop an in-depth knowledge of Italian literature, language, and civilization through a highly flexible program combining course work in Italian with work in such fields as art history, classics, comparative literature, economics, English, French, history, international relations, music, philosophy, and political science. All Italian majors are required to have completed three second-year language courses (or the equivalent taken at the Florence campus):

- ITALLANG 21. Second-Year Italian, First Quarter
- ITALLANG 22. Second-Year Italian, Second Quarter
- ITALLANG 23. Second-Year Italian, Third Quarter

Completion of the department’s two quarter Great Works IHUM sequence (see above) entitles a student to 5 units towards the Italian major or minor. Students considering an Italian major should consult with the Italian undergraduate adviser as early as possible (even before completing the language requirement) in order to ensure a maximum of flexibility in designing a course of study suited to individual needs and cultural interests.

Italian majors must complete 60 units of course work above the 100 level.

The remaining requirements for the major are:

1. A minimum of 32 units of Italian courses (selected from courses numbered 100 and above).

2. Of these courses, at least one on Dante is required, as well as at least one in each of the following areas: (a) the Middle Ages; (b) the early modern period; and (c) the modern period. A Dante course may fulfill the Middle Ages requirement.
3. The intermediate-level survey sequence (ITALLIT 127, 128, 129).
4. One advanced language course beyond the level of ITALLANG 114.

Of the 60 units required for the major, up to 28 units of course work in related fields may be taken outside the department.

ITALIAN AND PHILOSOPHY

A second option is now possible within the Italian major, offering students the opportunity to combine studies in literature and philosophy. Students take most of their courses alongside students from departments specializing in the intersection of literature and philosophy.

The Italian and Philosophy major track requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

1. *Italian Survey Sequence* (ca. 12 units): ITALLIT 127, 128, 129.
2. *Advanced Language Course* (ca. 4 units): ITALLANG 114 and above.
3. *Philosophy Writing in the Major* (5 units): PHIL 80. Prerequisite: introductory philosophy class.
4. *Philosophy and Literature Gateway Course* (4 units): ITALGEN 181 (same as PHIL 81). This course should be taken as early as possible in the student’s career, normally in the sophomore year.
5. *Aesthetics, Ethics, Political Philosophy* (ca. 4 units): one course from the PHIL 170 series.
6. *Language, Mind, Metaphysics, and Epistemology* (ca. 4 units): one course from the PHIL 180 series.
7. *History of Philosophy* (ca. 8 units): two courses in the history of philosophy, numbered above PHIL 100.
8. *Upper Division Italian Courses* (ca. 12 units): at least three courses numbered ITALLIT/ITALGEN 100 or higher.
9. *Related Courses* (ca. 8 units): two upper division courses relevant to the student’s chosen area of specialization.
10. *Capstone Seminar* (ca. 4 units): to be selected from a set of seminars chosen by the undergraduate adviser of the program in philosophical and literary thought. This course must be taken in the student’s senior year.

The capstone seminar and the two related courses must be approved by both the undergraduate adviser of Italian and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. No more than 24 units may be drawn from courses offered overseas. Substitutions, including transfer credit, will not normally be permitted for items 5, 6, and 7, and are not permitted under any circumstances for items 3, 4, and 10. Up to 10 units of courses taken in the Philosophy department may be taken CR/NC or S/NS; the remainder must be taken for a letter grade.

EXTENDED MAJORS

Requirements for both extended majors are essentially identical to those of the Italian major with a concentration in Italian literature.

Italian and English Literatures—In addition to the 32 units required for the B.A. in Italian, candidates must complete four English literature courses numbered 100 and above related to the field of concentration in Italian Studies.

Italian and French Literatures—In addition to the 32 units required for the B.A. in Italian, candidates must complete four French literature courses numbered 100 and above related to the field of concentration in Italian Studies.

DIGITAL HUMANITIES MODULE

The French and Italian department, in collaboration with the Humanities Lab, also offers a digital humanities module that can be combined with any of the department’s major programs. Students who are interested in digital humanities should contact the department’s Director of Undergraduate Studies who facilitates coordination with the Humanities Lab. Students planning to combine the Italian major and the digital humanities module must fulfill the following requirements in addition to the general major requirements:

1. CS 105 or equivalent
2. Participate in the Humanities Lab Gateway core seminar (4 units)
3. Complete the Humanities Lab Practicum (2 units) in the junior year
4. Complete one digital project, in lieu of the course's main writing requirement, in a course offered in the department under the supervision of the course instructor and humanities lab adviser. This should usually be done in an upper-division course.

Students are encouraged to enroll in DLCL 99, Multimedia Course Lab, when working on the digital course project.

MINORS

Students considering a minor in Italian are encouraged to design a course of studies that fosters their understanding of the interaction between Italian and their second area of expertise. A minimum of 24 units of undergraduate work beyond the Italian 3 level must be completed.

Requirements for the minor include two intermediate language courses (chosen from ITALLANG 21, 22, and 23); all three of the introductory series on Italian literature and culture (ITALLIT 127, 128, 129); and a minimum of one advanced course in language or literature numbered 114 and above. All courses must be chosen in consultation with the Director of Undergraduate Studies, who is responsible for evaluating all requests and individual study plans for the minor.

MINOR IN LITERATURE

An undergraduate minor in Literature is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Department of French and Italian and the Language Center. Students should consult the "Division of Literatures, Cultures, and Languages" section of this bulletin for further details about the minor and its requirements.

MINOR IN MODERN LANGUAGES

An undergraduate minor in Modern Languages is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Department of French and Italian and the Language Center. Students should consult the "Division of Literatures, Cultures, and Languages" section of this bulletin for further details about the minor and its requirements.

HONORS PROGRAMS ITALIAN

Italian majors with a grade point average (GPA) of 3.3 (B+) or better in all Italian courses are eligible for department honors. Students interested in the honors program should consult the Italian undergraduate adviser early in their junior year. In addition to the requirements listed above, the student must submit to the Italian faculty a proposal for the honors essay by the end of Spring Quarter of the junior year. During the quarter, students may enroll in ITALLIT 198 while drafting and revising the proposal and conducting preliminary research. In Autumn Quarter of the senior year, honors students must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in ITALLIT 198 while composing the thesis during Winter Quarter. A total of 10-12 units are awarded for successful completion of honors course work, independent study, and the finished thesis.

HUMANITIES

An honors program in the Humanities is available for Italian majors who wish to supplement their studies with a carefully structured program of humanistic studies. See the "Interdisciplinary Studies in Humanities" section of this bulletin for further information.

COTERMINAL BACHELOR'S AND MASTER'S PROGRAM

Each year the department admits a small number of highly motivated undergraduates to its coterminal B.A. and M.A. degree in Italian. Applications must be submitted by January 31 of the senior year to the department chair and must include: a written statement of purpose, two letters of rec-

ommendation from faculty at Stanford, and a transcript. Students accepted into the coterminal program must have been undergraduate Italian majors and must meet all requirements that apply to both degrees.

LA CASA ITALIANA

La Casa Italiana, 562 Mayfield, is an undergraduate residence devoted to developing an awareness of Italian language and culture. It works closely with the Italian Cultural Institute in San Francisco and with other local cultural organizations. It often hosts visiting representatives of Italian intellectual, artistic, and political life. A number of departmental courses are regularly taught at the Casa, which also offers in-house seminars. Assignment is made through the regular undergraduate housing draw.

GRADUATE PROGRAMS

Admission to the Program—Candidates are expected to be proficient in the Italian language and to have done significant course work in Italian literature and/or Italian studies on the undergraduate level. Candidates with a broad humanistic and linguistic background are especially encouraged to apply. Contact Graduate Admissions in the Registrar's Office, 630 Serra Street, Suite 120, or see <http://gradadmissions.stanford.edu>, for application information. Recent Graduate Record Examination (GRE) results are required.

MASTER OF ARTS TERMINAL PROGRAM

The M.A. in Italian provides a combination of language, literature, civilization, and general courses designed to prepare secondary school, junior college, or college teachers. It is preferred that applicants have an undergraduate degree in Italian or in a related field. Knowledge of a second Romance language is desirable.

Candidates must complete a minimum of 45 units of graduate work, all courses being taken for a letter grade, with a GPA of 3.3 (B+), and pass a comprehensive oral examination (see "Qualifying Examination" section below for the Ph.D.). To fulfill the requirements in one year (four quarters), students should enroll for an average of 12 units per quarter.

The basic course program (45 units) is nine graduate courses in Italian, one of which may be in a related field. The option of substituting a master's thesis for two literature courses is available.

Reading knowledge of a second Romance language is required. French is recommended.

Requirements for the completion of the M.A. include a comprehensive literature and language oral examination, which is given before the end of Spring Quarter or at the beginning of the following Autumn Quarter. Before taking the exam, a candidate for the degree must submit to the Italian faculty a sample graduate seminar paper representative of the quality of his or her graduate work. On the basis of this paper, the results of the comprehensive examination, and the student's overall progress, members of the department vote for or against awarding of the M.A. degree.

Applications for admission must be received by May 31. Candidates for this degree are not eligible for financial aid or teaching assistantships.

DOCTOR OF PHILOSOPHY

Stanford's Ph.D. program in Italian offers the opportunity for advanced work in Italian literature and studies within a flexible interdisciplinary framework. It is independent of the Ph.D. program in French and aims to encourage students to bring broad methodological and interdisciplinary concerns to bear on the study of Italian literature. While it places primary emphasis on developing a command of Italian literature as a whole, it allows students to construct a highly individualized course of study, integrating specialization in a particular literary period with work in such fields as art history, classics, comparative literature, feminist studies, film, French, history, history of science, linguistics, literary theory, Medieval or Renaissance studies, philosophy, and religion. The program is founded on the belief that balance between period specialization and interdisciplinary breadth is essential in a small field such as Italian studies, particularly given the diversity of the Italian literary canon which extends over many disciplines.

Students admitted into the Ph.D. program in Italian work closely with the adviser in structuring a plan of study appropriate to needs and interests. Such a plan usually involves a mix of teaching and courses taken within the Italian program, courses taken in other departments, and independent work under supervision of a member of the Italian faculty, thus integrating financial support with training as scholars and prospective university teachers. Assuming satisfactory academic progress, fellowships are typically offered for three or four years. Graduate-level work completed elsewhere may be counted as fulfilling part of the requirements for the degree. Students in the fifth year normally apply for outside fellowships or part-time teaching positions in the department.

Aside from the benefits of the program's structure and fellowship plan, a number of unique resources are available to Ph.D. students in Italian at Stanford. During their years of study, students may be permitted to take courses, pursue dissertation research, and do independent work at the Stanford campus in Florence under supervision of a member of the Italian faculty. The Florence center, located in a palazzo along the Arno, is near important Florentine libraries and archives and the University of Florence. Graduate students also have at their disposal the resources of La Casa Italiana, a residential theme house which serves as an Italian cultural center and hosts such events as colloquia, lectures, and film series.

REQUIREMENTS

A candidate for the Ph.D. degree in Italian must complete at least 135 units of graduate-level study and teach five language courses in the section. 72 of the 135 units must be taken within the department.

Students entering with a master's degree or previous graduate work may receive credit as determined on a case-by-case basis, up to a maximum of 45 units. Fellowship funding, teaching, and other requirements are adjusted according to University regulations.

Required/Recommended Courses—Three courses are required:

1. ITALGEN 369, Introduction to Graduate Studies: Fragments of a Material History of Literature, a 5-unit seminar, offered in Autumn Quarter of each year, designed to acquaint students with the theoretical and methodological concerns of literary study. This course must be taken in the first quarter of study.
2. Definition and Inquiry: ITALGEN 201E, New Methods and Sources in French and Italian Studies, a 3-unit course designed to familiarize graduate students with research materials and techniques. This course must be taken no later than the end of the third year of study.
3. APPLING 201, The Learning and Teaching of Second Languages, the second-language pedagogy course offered by the Stanford Language Center in the Spring Quarter of each year in order to prepare entering graduate students for teaching in their second year.

Apart from the above requirements, students are granted considerable freedom in structuring a course of study appropriate to individual needs. During the first year, most course work is usually done within the Italian section in order to ensure an adequate preparation for the qualifying examination. In the second and third years, the students' programs normally consist of a combination of course work done inside and outside the Italian section, supplemented by tutorials and independent work pursued under supervision of the Italian faculty.

Language Requirements—As soon as possible, but not later than the end of the third year, the candidate must have passed reading examinations in two additional foreign languages. If the candidate's period of concentration is earlier than the Romantic period, one of these must be Latin; if Romantic or later, French. Completion of the language requirement is a prerequisite for taking the University oral examination.

EXAMINATIONS

There are three examinations: the 90-minute qualifying exam, the special topic exam, and the University oral examination.

Qualifying Examination—The first oral examination, which normally takes place at the end of Spring Quarter of the first year of study, tests the student's knowledge of the Italian language and of Italian literature. The student is responsible for scheduling the exam one month in advance. The date and time chosen must be determined in consultation with the

examining committee (see below).

The exam is based on a standard reading list covering major works from all periods of Italian literature, from the Middle Ages to the late 20th-century. The list may be expanded to reflect a student's particular interests, but not abridged.

Half of the exam takes place in English, half in Italian (with the student free to choose which portion transpires in which language).

The exam consists of two parts:

1. A 20-minute presentation by the candidate on a topic to be determined by the student. This presentation may be given either in English or in Italian and should engage, in a succinct and synthetic manner, an issue or set of issues of broad relevance to Italian literary history which the student has been thinking about as he or she has been preparing the exam. The presentation must not simply be a text read aloud, but rather must be given from notes. It is meant to be suggestive and not exhaustive, so as to provoke further discussion.
2. A 70-minute question and answer period in which the examining committee follows up on the candidate's presentation and discusses the reading list with the student. At least part of this portion of the exam takes place in Italian. The student is expected to demonstrate a solid knowledge of the texts on the reading list and of the basic issues which they raise, as well as a broader sense of the cultural/literary context into which they fit. The examination committee for the qualifying examination is made up of the members of the Italian faculty, including the student's faculty adviser who chairs the examination.

Two weeks before the exam, the student must also submit a graduate seminar paper which the student considers representative of the quality of his or her graduate work at Stanford.

On the basis of this paper, the results of the qualifying examination, and an evaluation of the student's overall progress, the members of the student's examining committee vote for or against admission to candidacy for the Ph.D. The terminal master's degree may be awarded to students who have completed the qualifying procedure, but whose work is judged insufficient for admission to candidacy for the Ph.D. If the overall case for or against promotion to candidacy is deemed uncertain, students may be asked either to retake the qualifying exam, to submit a new paper, or they may be admitted to candidacy on a probationary basis. Subject to approval by the Director of Graduate Studies and department Chair, students already holding an advanced degree in Italian Studies, when admitted to the Italian Ph.D. program, may be excused from the qualifying exam. However, they must present a formal request for a waiver to the Director of Graduate Studies upon their arrival at Stanford. Such a request must document the course work completed elsewhere and include all relevant reading lists. Only in cases where taking the qualifying exam would involve considerable repetition of already completed work is such a waiver likely to be granted.

Special Topic Examination—The second oral examination, which normally takes place at the end of Spring Quarter of the second year of study, concerns a topic (a particular literary genre or a broad theoretical, historical, or interdisciplinary question) freely chosen and developed by the individual student working in collaboration with his or her adviser and the Director of Graduate Studies. Students should design this research project so that it has the breadth and focus of a book they might write or a seminar they might teach. The proposed topic should be discussed with the Director of Graduate Studies before the end of the quarter preceding the quarter in which they plan to take the exam. The student and the Director of Graduate Studies choose a committee of two faculty members with interests close to the proposed topic. (In most cases, one of these committee members is the student's adviser.) In addition to these two members, the examination committee includes the Director of Graduate Studies, who serves in an ex officio capacity as the third member of the examination committee.

At the beginning of the quarter in which he or she takes this examination, the student discusses plans for the section with committee members, who offer suggestions on the project and on the reading list. In general, the reading list should be between one and two single-spaced pages in length. In the course of the quarter, the student should regularly consult with committee members to discuss his or her progress. The actual examination

lasts one hour. The candidate must present a tentative reading list to the members of the committee about twelve weeks before the examination and a final reading list at least one week before the examination. This list, to be headed by a title describing the topic of the examination, may be divided into two parts: core works that the student has found to be central to his or her topic, and works that fill out the periphery of the topic. Two copies of the final reading list must be given to the student services officer for the Division of Literatures, Cultures, and Languages: one for the student's file and one for a special file which subsequent students can consult. The examination assumes the form of an oral colloquy between the student and the examining committee. It concentrates on the conclusions to which the student's research has led him or her, and aims to determine the student's overall mastery of the research topic in question. At the beginning of the examination, the student presents a talk of no longer than 20 minutes (not to be written out, but to be presented from notes) reviewing the results of his or her reading and outlining the major features and implications of the chosen topic. The remainder of the hour is devoted to a discussion between the student and the committee regarding the problems the student raised in the talk and the reading list itself.

The following procedures are applicable to both the qualifying and special topic exams:

1. The committee meets briefly at the end of the exam and immediately informs the student whether he or she has passed the examination.
2. In the week after the examination, the student is expected to meet individually with members of the committee to discuss strengths and weaknesses revealed during the qualifying exam or colloquy.
3. The Director of Graduate Studies places a brief letter describing each one-hour oral exam in the student's file, a copy of which is also be furnished to the student.

The University Orals—The University Ph.D. examination follows most of the same procedures outlined above. Normally students put one, and at most two, full-time quarters of study into preparation for the exam. The University oral exam should virtually always be taken at the end of Spring Quarter of the third year of study. Students must complete minimum course requirements (as listed in this bulletin) and all language and course requirements before the quarter in which they take the University oral examination.

Early in the quarter before they intend to take the University Ph.D. examination, students must discuss the scope and nature of the period to be covered, as well as the dissertation proposal, with the Director of Graduate Studies. The reading list should include works in all genres relevant to the period covered. The amount of "non-literary" or cross-disciplinary material on the reading list varies according to the period and the research interests of the student. Students ordinarily cover about a century of writing in great depth. As with the preceding examinations, the Director of Graduate Studies and the student determine the committee's makeup.

The governing principle is that the University oral examination in Italian must be a period examination rather than one on the specific concerns of the dissertation proposal, which is dealt with separately in a later colloquium. It follows from this basic principle that the examination covers the major authors and genres in the student's period of choice. The lists may well include critical and scholarly works or texts from outside the traditional domain of Italian literary studies (such as film, philosophy, other literary traditions), but such coverage should be regarded as supplemental except in rare instances where the chair and faculty advisers have agreed to define these materials as the student's field.

The aim of the University oral is to establish the student's credentials as a specialist in the period of his or her choosing, so the core of the reading list must be made up of texts that are essential to any specialist. It follows that reading lists must not focus on the narrow area of the student's research interests. The tendency to bias reading lists toward the dissertation topic, be it an author or a genre, does not cancel the obligation to cover the major figures and major genres. It is understandable that some students, by their third year, have become so deeply committed to their work toward the dissertation that they wish to use the preparation period for the examination as part of their dissertation research. Certainly, some of the exam work will prove relevant, but they should also remember that the examination is the central means of certifying their expertise in a literary period.

The exam committee consists of four members, in addition to a committee chair from outside the Department of French and Italian whose principal functions are to keep track of time and to call on the four members of the committee who question the candidate on the talk and on the reading list. Students are required to discuss the reading list for the examination with the Director of Graduate Studies and with members of their committee during the quarter preceding the examination. A final reading list must be in the hands of the committee and the student services officer for the Division of Literatures, Cultures, and Languages no later than two weeks preceding the examination. Students must submit the Request for University Oral Exam form to the student services officer at least three weeks before the proposed date of the exam. At the same time this form is submitted, students should also submit the Notice of Appointment of the Ph.D. dissertation reading committee. In addition, a Report on Ph.D. Foreign Language must be completed, certifying a reading knowledge of the two foreign languages the student presents to meet the language requirements. The two-hour examination consists of the following two parts:

1. Forty minutes: a 20-minute talk by the candidate followed by a 20-minute question and answer period concerning the talk.

Working with the committee members, the candidate's adviser prepares three or more questions to be presented to the candidate at 8:00 a.m. on the day of the examination. These questions concern broad topics pertinent to the candidate's reading list and period of specialization, including concerns relevant, but by no means limited to, the student's projected dissertation. The candidate chooses one of the questions and develops a 20-minute talk in response. Students must not read from a prepared text, but rather must speak from notes. They are free to consult any necessary materials while preparing the talk. The candidate is questioned for 20 minutes on the talk, with the dissertation adviser starting the questioning.

2. One hour, 20 minutes: questions on the area of concentration.

Each member of the committee, except for the chair, is assigned a 20-minute period to question the candidate on the reading list and its intellectual-historical implications.

The University oral examination is a formal University event. It represents the last occasion for the faculty to evaluate a student's overall preparation as a candidate for the Ph.D. After the University orals, only the colloquium on the dissertation prospectus and certification of the final dissertation by the student's reading committee stand in the way of conferral of the Ph.D. The examination, therefore, is a uniquely significant event and is designed to evaluate the student's preparation as a specialist in a given sector of Italian studies, but within a broader context than that provided by a single course, hour examination, or even the dissertation itself.

DISSERTATION

The fourth and (if necessary) fifth years of graduate study are devoted to writing and researching the doctoral dissertation. The dissertation should demonstrate the ability to carry out research, organize, and present the results in publishable form. The scope of the dissertation should be such that it could be completed in 12 to 18 months of full-time work.

Colloquium on the Dissertation Proposal—The colloquium normally takes place in the quarter following the University oral examination; in most cases this means early in Autumn Quarter of the student's fourth year of study. The colloquium lasts one hour, begins with a brief introduction to the dissertation prospectus by the student (lasting no more than ten minutes), and consists of a discussion of the prospectus by the student and the three readers of the dissertation. At the end of the hour, the faculty readers vote on the outcome of the colloquium. If the outcome is favorable (by majority vote), the student is free to proceed with work on the dissertation. If the proposal is found to be unsatisfactory (by majority vote), the dissertation readers may ask the student to revise and resubmit the dissertation prospectus and to schedule a second colloquium.

The prospectus must be prepared in close consultation with the dissertation director during the months preceding the colloquium. It must be submitted in its final form to the readers no later than one week before the colloquium. A prospectus should not exceed ten double-spaced pages, in addition to which it should include a working bibliography of primary and secondary sources. It should offer a synthetic overview of the dissertation,

describe its methodology and the project's relation to prior scholarship on the topic, and lay out a complete chapter-by-chapter plan.

It is the student's responsibility to schedule the colloquium no later than the first half of the quarter subsequent to the quarter in which the student passed the University oral examination. The student should arrange the date and time in consultation with the student services officer and with the three examiners. The student services officer schedules an appropriate room for the colloquium.

Members of the dissertation reading committee ordinarily are drawn from the University oral examination committee, but need not be the same.

JOINT DEGREES AND MINORS

A joint degree program in Humanities and Italian Literature is described in the "Interdisciplinary Studies in Humanities" section of this bulletin. Minors are possible in a wide variety of related fields. Joint degree programs and minors frequently require 24 additional units of work, making completion of all course requirements in nine quarters difficult if careful advance planning is not done.

Ph.D. Minor in Italian Literature—The section offers a minor in Italian Literature. The requirement for a Ph.D. minor is a minimum of 24 units of graduate course work in Italian literature. Students interested in a minor in Italian should consult the graduate adviser.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

FRENCH SECTION

Note—Changes in course offerings after this bulletin has gone to print are sometimes necessary. Students are advised to consult the department bulletin board regularly.

Undergraduate courses in Literature and Culture (130-199)
Courses for Advanced Undergraduates and Graduates (200-299)
Graduate Seminars (300-399)

FRENCH LANGUAGE COURSES

The following courses in French language instruction represent a typical sequence for three years of French language study. Majors and prospective majors should consult the requirements for a B.A. in French above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at La Maison Française, see the "Language Center" section of this bulletin.

FRENLANG 1,2,3. First-Year French

5 units, Aut, Win, Spr (Ashaolu, O; Howard, H; Shashko, T; Tsethlikai, K; Wampole, C; Staff)

FRENLANG 22,23. Second-Year French

4-5 units, Aut, Win, Spr (Howard, H; Le Teuff, B; Shashko, T; Tsethlikai, K; Staff)

FRENLANG 120. Advanced French Oral Communication

3 units, Aut, Win, Spr (Staff)

FRENLANG 121. Introduction to French Texts

3-4 units, Aut (Palumbo-Liu, S)

FRENLANG 124. Advanced French Grammar

3-4 units, Aut, Win (Tsethlikai, K)

FRENLANG 125. French Phonetics

3-4 units, Spr (Palumbo-Liu, S)

FRENLANG 126. French Stylistics and Textual Analysis

3-4 units, Spr (Blanchard, M)

INTRODUCTION TO THE HUMANITIES (IHUM)

The following Introduction to the Humanities courses are taught by French and Italian department faculty members. IHUM courses are typically available only to freshmen seeking to fulfill IHUM requirements; see the "Introduction to the Humanities" section of this bulletin for further information. Prospective majors in French or Italian are advised to consider satisfying their IHUM requirements by registering for the following IHUM courses.

IHUM 2,3. Epic Journeys, Modern Quests—Great religious, philosophical, and literary texts that have addressed timeless questions about human identity and the meaning of human life. Focus is on the epic tradition in the ancient and classical worlds and its transformations or abandonment in modernity. Compares conceptions of the afterlife. How traditions about the afterlife are created and appropriated. The diminished importance of the dead and increased emphasis on the power of the living in literary genres. GER:IHUM-2,3

IHUM 2: 5 units, Win (Harrison, R; Edelstein, D)

IHUM 3: 5 units, Spr (Landy, J; Edelstein, D)

GENERAL (IN ENGLISH)

These courses, with the subject code FRENGEN, do not require knowledge of French and are open to all students.

FRENGEN 48N. Machiavelli and Sons—Stanford Introductory Seminar. Preference to freshmen. The apparent paradox between Machiavelli's ambiguous masterpiece *The Prince*, and his *Discourses on Livy* which lie at the origin of the modern republican tradition in Europe. Resituating Machiavelli within his time; what makes a republic. The history of Machiavelli's reception and latter-day emulators including Harrington, Rousseau, and Madison.

5 units, Aut (Edelstein, D)

FRENGEN 181. Philosophy and Literature—(Same as ITALGEN 181, PHIL 81.) Required gateway course for Philosophical and Literary Thought track offered through Philosophy and DLCL. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4 units, Win (Anderson, L; Landy, J)

FRENGEN 190Q. Parisian Cultures of the 19th and Early 20th Centuries—Stanford Introductory Seminar. Preference to sophomores. Political, social, and cultural events in Paris from the Napoleonic era and the Romantic revolution to the 30s. The arts and letters of bourgeois, popular, and avant garde cultures. Illustrated with slides. GER:DB-Hum

4 units, Spr (Bertrand, M)

FRENGEN 192E. Images of Women in French Cinema: 1930-1990—The myth of the feminine idol in French films in historical and cultural context. The mythology of stars as the imaginary vehicle that helped France to change from traditional society to modern nation after 1945. Filmmakers include Renoir, Truffaut, and Nelly Kaplan. The evolution of the role of women in France over 60 years. Lectures in English; films in French with English subtitles. GER:DB-Hum, EC-Gender

3-5 units, alternate years, not given this year

FRENGEN 201E. New Methods and Sources in French and Italian Studies—(Same as ITALGEN 201E.) Based on student interest. Changes in research methods: the use of digitized texts, resources, and databases available through Stanford Library's gateways. Emphasis is on strategies for exploration of broad and specialized topics through new and traditional methods. Using a flexible schedule based on enrollment and the level of

students' knowledge, may be offered in forms including a shortened version on the basics, independent study, or a syllabus split over two quarters. Unit levels adjusted accordingly.

1-4 units, not given this year

FRENGEN 205. Chrétien de Troyes—(Same as COMPLIT 222.) Verse romances seen as the origin of the modern Western novel, including *Yvain*, *Lancelot*, and *Perceval*. Historical analysis, courtly culture, and the literary tradition that they produced. Source is a bilingual edition of Chrétien's complete works in medieval and modern French.

3-5 units, Aut (Gumbrecht, H)

FRENGEN 221. The History of the Book in Europe—(Same as ITALGEN 221.) From 1450 to present. The printed book from its invention to the 20th century; focus is on France, Italy, and England. Topics include: the manuscript tradition; printing and typography; the scholar-printers of the Renaissance; illustration; readers and reading; marginalia; newspapers, pamphlets, and ephemera; the emergence of the novel; Modernism; and Futurism. Course held in Stanford Libraries' Special Collections.

3-5 units, Win (Mustain, J; Sussman, S)

FRENGEN 231. Space and the Modern Sublime—(Same as COMPLIT 251.) The power of space in producing modern notions of the sublime in philosophy, literature, and art. The role of global exploration in producing terrifying European encounters with nature and unknown peoples that the sublime transforms into art. Sublime spaces such as sea, desert, mountains, and city; the Romantic interiorization of the sublime into the psyche; mimesis, memory, and technology. Sources may include explorer writings; Burke, Kant, Lyotard, Deleuze and Guattari, Freud, the Shelleys, Coleridge, Hugo, Baudelaire, Rimbaud, and Irigaray; and artists such as Gericault, Turner, Delacroix, and Friedrich.

3-5 units, Win (Cohen, M)

FRENGEN 253E. French Social Thought from Durkheim to Bourdieu—The originality, importance, and relevance of distinctive features of French social thought: reflexive French human sciences where the focus is on the social conditions in which such sciences are possible; epistemological and ontological issues as opposed to empirical realities and the notions of collective representations, social hypocrisy, the collective unconscious, and collective self-deception; and the indispensable role of religious mental structures for the understanding of social cohesion. Readings of Bourdieu, Durkheim, Mauss, Lacan, Lévi-Strauss.

3-5 units, not given this year

FRENGEN 256E. Political Anthropology from Rousseau to Freud—A confrontation between ways of accounting for society in an individualistic framework: the social contract; political economy; individualistic sociology; society as crowd; mass psychology; and sociopolitical institutions. Creating a typology of the ways in which a given anthropology constrains conceptions of the social and political order. Writers include Rousseau, Hume, Smith, Constant, Tocqueville, Marx, Durkheim, Weber, and Freud.

3-5 units, Spr (Dupuy, J)

FRENGEN 258E. Foundations of Nanoethics: Toward a Rapprochement between Europe and the U.S.—(Same as STS 211.) Nanoethics as a new discipline that accompanies the rise of nanotechnology research in the U.S. and Europe. Differing approaches to the ethics of science and technology in the case of a fledgling technology.

3-5 units, alternate years, not given this year

FRENGEN 259. Self-Reflexivity Historicized, or the Emergence of the Second-Order Observer—(Same as COMPLIT 259.) The origin of self-reflexivity as a habit and institution typical of intellectuals. Focus is on historical case studies from Western literatures and cultures since the Renaissance, based on a conceptual apparatus concerning the second-order observer, mainly derived from the work of Niklas Luhmann. Readings in original and translation include Descartes, Rousseau, Schlegel, Hegel, Gracián, and de Goya.

3-5 units, Win (Gumbrecht, H)

FRENGEN 263. Love Books of the Middle Ages—(Same as ITALGEN 263.) Love as a central theme in the Middle Ages of literature, natural philosophy, theology, and psychology. Literary works that probe the nature of love. Abelard and Heloise, *History of His Calamities and Personal Letters*; Andreas Capellanus, *The Art of Courtly Love*; Christine de Pizan, *The Book of the Duke of True Lovers*; Dante, *Vita Nuova*; Chaucer, *Troilus and Criseyde*; Boccaccio, *The Decameron*; and Shakespeare, *Anthony and Cleopatra*.

3-5 units, Win (Harrison, R)

FRENGEN 282. Heidegger and Poetry in an Age of Technology: Rilke, Trakl, and Char—(Same as COMPLIT 256, GERGEN 282.) Heidegger's thinking on language and poetry. The technological transformation of language into univocal information and the resources of poetry for an ambiguous resistance. Parallel consideration of philosophy's relation to poetry. Readings from Rilke, Trakl, and Char.

3-5 units, Spr (Mitchell, A)

FRENGEN 288. Decadence and Modernism from Mallarmé to Marinetti—(Same as ITALGEN 288.) How the notion of decadence, initially a term of derision, shapes and underlies the positive terms of Symbolism and Modernism. Readings include theories of decadence and examples of Symbolist and Modernist texts that attempt to exorcise decadent demons, such as lust, mysticism, and the retreat into artificiality. Authors include Huysmans, Poe, Mallarmé, Nietzsche, Nordau, d'Annunzio, Valry, Ungaretti, Marinetti, and Breton.

3-5 units, not given this year

FRENGEN 326. Continental Philosophy and the Human Sciences: The Self and the Oppressive Other—(Same as CASA 326.) Research seminar. Students work on papers for other classes, theses, and individual projects. Approaches to the self and the other; how to draw on and combine approaches for analyzing students' own research materials. Students choose an epistemology and integrate approaches according to intellectual goals and field of study.

5 units, Spr (Domanska, E)

FRENGEN 345. Digital Encyclopedia—(Same as HISTORY 435.) The *Encyclopédie* of Diderot and d'Alembert as a monument of the Enlightenment that is rarely read or studied. Its social and political history. The online, digitized version of the *Encyclopédie*, its complex network of entries and ideas, and new research possibilities in the humanities made available by digitization.

5 units, Spr (Baker, K; Edelstein, D)

FRENGEN 353. Realism in France, 1830-34—Practices of the novel in the first years of modern French realism; the realist novel as part of a historically located generic system. The usefulness of genre as a category of literary analysis, the semi-autonomy of literature as part of a social formation, how to make sense of forgotten literature including its challenge to norms of literary value, and materialist models for understanding literary production. Authors may include Stendhal, Balzac, Hugo, Sand, Paul de Kock, Eugène Sue, Edouard Corbière, Madame Charles Reybaud, and Théophile Gautier. Critical readings include Bourdieu, Jameson, Macherey, and Moretti.

3-5 units, not given this year

FRENGEN 357. Surrealism to Structuralism—(Same as COMPLIT 357.) Authors such as Saussure, Breton, Bataille, Artaud, Lacan, Jakobson, Sartre, Merleau-Ponty, Beauvoir, Fanon, Foucault, Althusser, Cixous, Irigaray, and Barthes. Background reading in Hegel, Marx, and Freud, if necessary.

3-5 units, Aut (Cohen, M)

FRENGEN 395. Philosophical Reading Group—(Same as COMPLIT 359A, ITALGEN 395.) Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht is required. May be repeated for credit.

1 unit, Aut, Win, Spr (Gumbrecht, H; Harrison, R)

LITERATURE, THOUGHT, AND CULTURE

Courses in this section have the subject code FRENLIT.

UNDERGRADUATE

FRENLIT 130. Authorship, Book Culture, and National Identity in Medieval and Renaissance France—Readings: epics (*La Chanson de Roland*), medieval romances (*Tristan*; Chrétien de Troyes' *Yvain*), post-Petrarchan poetics (Du Bellay, Ronsard, Labé), and prose humanists (Rabelais, Montaigne). Prerequisite: FRENLANG 126 or consent of instructor. WIM

4 units, not given this year

FRENLIT 131. Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France—The literature, culture, and politics of France from Louis XIV to Rousseau. How this period produced the political and philosophical foundations of modernity. Readings include Bodin, Hobbes, Racine, Lafayette, Locke, Voltaire, Diderot, Rousseau, and Beaumarchais. Prerequisite: FRENLANG 126 or consent of instructor. GER:DB-Hum, WIM

4 units, Win (*Apostolidès, J*)

FRENLIT 132. Introduction to 19th- and 20th-Century French Literature: Literary and Social Movements—Romanticism; the experimental novel within the context of changes in French society. The development of literary classification and the position of the engaged intellectual. Authors include Balzac, Hugo, Sand, Baudelaire, Colette, Sartre, Duras, and Queneau. Prerequisite: FRENLANG 126 or consent of instructor. GER:DB-Hum, WIM

4 units, Aut (*Richman, K*)

FRENLIT 133. Literature and Society: Introduction to Francophone Literature from Africa and the Caribbean—(Same as COMPLIT 141.) Major African and Caribbean writers. The issues raised in literary works which reflect changing aspects of the societies and cultures of Francophone Africa and the French Caribbean: meeting the challenge of acculturation and the search for identity; tradition competing with modernity; the use of oral tradition and writing; women's role and status; writers' social responsibility. Visual material; readings from fiction, poetry, plays, and criticism. In French. Prerequisite: FRENLANG 126 or consent of instructor. GER:DB-Hum, EC-GlobalCom, WIM

3-5 units, Spr (*Boyi, E*)

FRENLIT 135. Contemporary France: Immigration, Culture, and Politics—(Same as COMPLIT 143.) France as a place of migration or exile for people from all over the world: workers, writers, artists, political exiled, and students. Focus is on N. African immigration and its impact on literature, politics, and culture in contemporary France. Topics include: secularism and religion, insertion and integration, and nationality and citizenship. Films and readings include Azouz Begag, Yasmina Benguigui, Nina Bouraoui, Paul Smaïl, Dominique Schnapper, Michèle Winock, and Benjamin Stora. GER:EC-GlobalCom

4 units, Aut (*Boyi, E*)

FRENLIT 198. Honors—Open to juniors with consent of adviser; 10-12 units total credit for completion of honors essay and associated course work. May be repeated for credit.

3-12 units, Aut, Win, Spr (*Staff*)

FRENLIT 199. Individual Work—Restricted to French majors with consent of department. Normally limited to 4-unit credit toward the major. May be repeated for credit.

1-12 units, Aut, Win, Spr (*Staff*)

ADVANCED UNDERGRADUATE AND GRADUATE

Note—The prerequisite for the following courses taught in French is one course from the 130 series or equivalent.

FRENLIT 221. Give Me *Libertinage* or Death: The Politics of Pleasure—How revolutionary was the pursuit of happiness, or *libertinage*, a current in early modern culture illustrated by the phrase from the Declaration of Independence? This concept and practice from the perspectives of political context and cultural history; the revolutionary quality of libertine texts from the late-17th century to the French Revolution. French revolutionary culture: was Baudelaire correct in stating that the revolution was made by the voluptuous?

3-5 units, not given this year

FRENLIT 222. The Political Unconscious of the Ancien Régime—The lasting influence in Europe of absolutism. Topics include political theories, the importance of court life, art as a political tool, modifications in human sensibility, literature, and social transformations.

3-5 units, Win (*Apostolidès, J*)

FRENLIT 253. Literature of Commitment: French Novels of the 19th and 20th Centuries—Sartre's idea of *la littérature engagée* as a starting point. The interplay of aesthetic and political aspects of the novel; the literary categories of realism, idealism, and the *roman à thèse*. Novels including by Sand, Tristan, Zola, Vallès, Nizan, Roumain, Sartre, and Wittig; and critical readings on the novel.

3-5 units, Spr (*Richman, K*)

FRENLIT 255. Céline: The Most Revolting Rebel—The novels of Louis-Ferdinand Céline. Céline as social critic, literary innovator, visionary, mystic, and pariah. Readings include *Voyage au bout de la nuit*, *Mort à crédit*, *Guignol's band*, and *D'un château l'autre*. In French.

3-5 units, Win (*Picherit, H*)

FRENLIT 256. Mind and Body in 20th-Century French Fiction—How fiction articulates the tensions among the sensuous, the sensual, the embodied, and the aspiration to purity, abstraction, and transcendence. Focus is on questioning dichotomies such as nature/culture, masculine/feminine, sacred/profane, and written word/voice. Authors include Gide, Camus, Butor, Duras, and Tournier.

3-5 units, not given this year

FRENLIT 278. Rethinking Identities in the Era of Globalization—(Same as COMPLIT 246.) Cultural issues faced by postcolonial societies and new visions proposed by writers and thinkers to meet the challenge of globalization and preserve the local. Emphasis is on questions of difference, language, nation and identities, and identity construction. Theoretical and fictional readings include Derrida, Glissant, Kristeva, Malouf, Morejon, Senghor, and Serres. May be repeated for credit.

3-5 units, alternate years, not given this year

FRENLIT 293A. Topics in French Literature and Philosophy—Five-week course. May be repeated for credit.

2 units, Aut (*Serres, M*)

FRENLIT 293B. Topics in French Literature and Philosophy—Five-week course. May be repeated for credit.

2 units, Spr (*Serres, M*)

FRENLIT 299. Individual Work—May be repeated for credit.

1-12 units, Aut, Win, Spr, Sum (*Staff*)

FRENLIT 341. Algeria, My Mother—(Same as COMPLIT 341.) The representation of Algeria through authors from both shores of the Mediterranean. Literature and Algerianism. Politics and the Algerian war. Memory and mourning. Readings include Louis Bertrand, Frantz Fanon, Pierre Bourdieu, Benjamin Stora, Assia Djebar, Jean Pélégri, Albert Camus, Jacques Derrida, and Nina Bouraoui.

3-5 units, Spr (*Boyi, E*)

GRADUATE

FRENLIT 399. Individual Work—For students in French working on special projects or engaged in predissertation research.

1-12 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

French majors are advised to consult the “Division of Literature, Culture, and Languages” section of this bulletin for additional cognate offerings. See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

DLCL 189. Honors Thesis Seminar

5 units, Aut (Reichert, J)

DLCL 377. Topics in Literature and Culture

3-4 units, Aut (Bohrer, K)

PHIL 195F. Shared Experience and the Experimental Actor

4 units, Spr (Scotland-Stewart, L)

ITALIAN SECTION

Note—Changes in course offerings are sometimes necessary after this bulletin has gone to print. Students are advised to consult the department bulletin board on a regular basis.

Undergraduate courses in Literature and Culture (130-199)

Courses for Advanced Undergraduates and Graduates (200-299)

Graduate Seminars (300-399)

ITALIAN LANGUAGE COURSES

The following courses in Italian language instruction represent a typical sequence for three years of Italian language study. Majors and prospective majors should consult the requirements for a B.A. in Italian above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at La Casa Italiana, see the “Language Center” section of this bulletin.

ITALLANG 1,2,3. First-Year Italian

5 units, Aut, Win, Spr (Cellinese, A; Feinsod, H; Green, D; Staff)

ITALLANG 21,22,23. Second Year Italian

3-4 units, 21: Aut, 22: Win (Cellinese, A), 23: Spr (Staff)

ITALLANG 114. Advanced Stylistics and Composition—WIM

3-4 units, Win (Baldocchi, M)

ITALLANG 115. Academic and Creative Writing—WIM

3-4 units, Spr (Baldocchi, M)

GENERAL (IN ENGLISH)

These courses, with the subject code ITALGEN, do not require knowledge of Italian and are open to all students.

ITALGEN 181. Philosophy and Literature—(Same as FRENGEN 181, PHIL 81.) Required gateway course for Philosophical and Literary Thought track offered through Philosophy and DLCL. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4 units, Win (Anderson, L; Landy, J)

ITALGEN 201E. New Methods and Sources in French and Italian Studies—(Same as FRENGEN 201E.) Based on student interest. Changes in research methods: the use of digitized texts, resources, and databases available through Stanford Library’s gateways. Emphasis is on strategies

for exploration of broad and specialized topics through new and traditional methods. Using a flexible schedule based on enrollment and the level of students’ knowledge, may be offered in forms including a shortened version on the basics, independent study, or a syllabus split over two quarters. Unit levels adjusted accordingly.

1-4 units, not given this year

ITALGEN 221. The History of the Book in Europe—(Same as FRENGEN 221.) From 1450 to present. The printed book from its invention to the 20th century; focus is on France, Italy, and England. Topics include: the manuscript tradition; printing and typography; the scholar-printers of the Renaissance; illustration; readers and reading; marginalia; newspapers, pamphlets, and ephemera; the emergence of the novel; Modernism; and Futurism. Course held in Stanford Libraries’ Special Collections.

3-5 units, Win (Mustain, J; Sussman, S)

ITALGEN 247. Petrarch and Boccaccio—Their respective roles as founders of European Petrarchism and modern Italian prose. Petrarch’s *Canzoniere* and *My Secret Life* and Boccaccio’s *Decameron*. Readings in Italian and translation.

3-5 units, not given this year

ITALGEN 260. The Fantastic Mode—Narratives of the haunted house in exemplary texts from the European tradition of the 19th century including Hoffmann, Gautier, Maupassant, Arrigo Boito, Dickens, and James). More recent implementations of the mode in the texts of Cortázar, Tabucchi, and Byatt. In English.

3-5 units, Spr (Ceserani, R)

ITALGEN 263. Love Books of the Middle Ages—(Same as FRENGEN 263.) Love as a central theme in the Middle Ages of literature, natural philosophy, theology, and psychology. Literary works that probe the nature of love. Abelard and Heloise, *History of His Calamities and Personal Letters*; Andreas Capellanus, *The Art of Courtly Love*; Christine de Pizan, *The Book of the Duke of True Lovers*; Dante, *Vita Nuova*; Chaucer, *Troilus and Criseyde*; Boccaccio, *The Decameron*; and Shakespeare, *Anthony and Cleopatra*.

3-5 units, Win (Harrison, R)

ITALGEN 288. Decadence and Modernism from Mallarmé to Marinetti—(Same as FRENGEN 288.) How the notion of decadence, initially a term of derision, shapes and underlies the positive terms of Symbolism and Modernism. Readings include theories of decadence and examples of Symbolist and Modernist texts that attempt to exorcise decadent demons, such as lust, mysticism, and the retreat into artificiality. Authors include Huysmans, Poe, Mallarmé, Nietzsche, Nordau, d’Annunzio, Valry, Ungaretti, Marinetti, and Breton.

3-5 units, not given this year

ITALGEN 395. Philosophical Reading Group—(Same as COMPLIT 359A, FRENGEN 395.) Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht is required. May be repeated for credit.

1 unit, Aut, Win, Spr (Gumbrecht, H; Harrison, R)

LITERATURE, THOUGHT, AND CULTURE

Courses in this section have the subject code ITALLIT.

UNDERGRADUATE

ITALLIT 127. Inventing Italian Literature: Dante, Boccaccio, Petrarca—The origins of Italian literature. Poetry such as 13th-century love lyrics, Dante’s *Vita Nuova*, and Petrarca’s *Canzoniere*; prose such as stories from Boccaccio’s *Decameron*. GER:DB-Hum

4 units, Aut (Lummus, D)

ITALLIT 128. The Italian Renaissance and the Path to Modernity—The literature, art, and history of the Renaissance and beyond. Readings from the 15th through 18th centuries include Moderata Fonte, Machiavelli, Ariosto, Tasso, Galileo, and Goldoni. Prerequisite: 21 or equivalent. GER:DB-Hum

4 units, Win (Springer, C)

ITALLIT 129. Modern Italian History and Literature—The history of the Italian nation and national literary identity in the 19th and 20th centuries. Focus is on the Risorgimento and the romantic lyric, futurism, feminism, fascism, and resistance. Authors include Foscolo, Leopardi, Verga, D'Annunzio, Aleramo, Marinetti, Pirandello, Ungaretti, and Montale. Prerequisite: 21 or equivalent. GER:DB-Hum

4 units, Spr (Springer, C)

ITALLIT 198. Honors—Open to juniors and seniors with consent of adviser; 9-12 total units for completion of honors essay.

3-12 units, Aut, Win, Spr (Staff)

ITALLIT 199. Individual Work

1-12 units, Aut, Win, Spr (Staff)

ADVANCED LITERATURE

ITALLIT 249. Love and Death in the *Decameron*—The Black Death as the greatest natural disaster in European history, killing more than a quarter of Europe's population in four years. How the plague occasioned one of the masterpieces of western literature, Boccaccio's *Decameron*, which explores a parallel universe ruled not by death, but by love, a physical, sensual force that subverted the idealized conventions of medieval courtly love.

4 units, Spr (Springer, C)

ITALLIT 289. Italian Postmodernism—Was there an epochal change in the history of Italian society as in other countries in the course of the 20th century? How should scholars name and describe this new cultural landscape? Multidisciplinary perspective with readings in the history of culture, sociology, and literary and art history. Writers include Eco, Calvino, and Tabucchi. In Italian.

3-5 units, Spr (Ceserani, R)

ITALLIT 299. Individual Work

1-12 units, Aut, Win, Spr, Sum (Staff)

GRADUATE

ITALLIT 365. Italian Romanticism—The complexities and contradictions of Italian Romanticism as reflected in the major works of Foscolo (*Sonetti, Sepolcri, Ultime lettere di Jacopo Ortis*) and Leopardi (*Canti, Operette morali*). Prerequisite: advanced reading knowledge of Italian.

3-5 units, Aut (Springer, C)

ITALLIT 399. Individual Work—For graduate students working on a special project or predissertation research. May be repeated for credit.

1-15 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

Italian majors are advised to consult the "Division of Literature, Culture, and Languages" section of this bulletin for additional cognate offerings. See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

DLCL 189. Honors Thesis Seminar

5 units, Aut (Reichert, J)

DLCL 377. Topics in Literature and Culture

3-4 units, Aut (Bohrer, K)

PHIL 195F. Shared Experience and the Experimental Actor

4 units, Spr (Scotland-Stewart, L)

OVERSEAS STUDIES

Courses approved for the French or Italian major and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

PARIS

FRENLIT 186F. Contemporary African Literature in French—(Same as AFRICAAM 186F, OSPPARIS 186F.) GER:DB-Hum, EC-Global-Com

4 units, Win (Diop, P)

FLORENCE

ITALGEN 134F. Modernist Italian Cinema—(Same as ARTHIST 161Y, STS 125V, OSPFLOR 134F.) GER:DB-Hum

5 units, Aut (Campani, E)

ITALGEN 135F. Women in Italian Cinema: Maternity, Sexuality, and the Image—(Same as FEMST 135F, OSPFLOR 67.) GER:DB-Hum, EC-Gender

4 units, Spr (Campani, E)

ITALGEN 150F. High Renaissance and Maniera—(Same as ARTHIST 112Y, OSPFLOR 54.) GER:DB-Hum

5 units, Spr (Verdon, T)

ITALGEN 191F. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema—(Same as ARTHIST 160Y, COMM 53, HISTORY 235V,+ OSPFLOR 49.) GER:DB-Hum

5 units, Win (Campani, E)

ITALLIT 246F. Is the Hero Serious or Facetious? Romances of Chivalry in Sixteenth-Century Europe—(Same as OSPFLOR 15.)

5 units, Aut (Sberlati, F)

GERMAN STUDIES

Emeriti: (Professors) Theodore M. Andersson, Gerald Gillespie, Walter F. W. Lohnes, Katharina Mommsen, Kurt Müller-Vollmer

Chair: to be announced

Professors: Russell A. Berman, Elizabeth Bernhardt, Amir Eshel, Orrin W. Robinson III

Assistant Professor: Charitini Douvaldzi

Senior Lecturers: William E. Petig, Kathryn Strachota

Acting Assistant Professor: Marton Dornbach

Affiliated Academic Staff: Henry Lowood (Curator, Germanic Collections)

Director of Graduate Studies: Russell A. Berman

Director of Undergraduate Studies: Charitini Douvaldzi

Visiting Lecturers: Lorenz Jäger, Sean McIntyre, Andrew Mitchell

Department Office: Building 260, Room 211

Mail Code: 94305-2030

Phone: (650) 723-3266

Email: germanstudies@stanford.edu

Web Site: <http://www.stanford.edu/dept/german/>

Courses given in German Studies have the subject code GERGEN and GERLIT. For courses in German language instruction with the subject code GERLANG, see the "Language Center" section of this bulletin. For a complete list of subject codes, see Appendix.

The department's goal is to provide students with the linguistic and analytic facility to explore the significance of the cultural traditions and political histories of the German-speaking countries of Central Europe. At the same time, the interdisciplinary study of German culture, which can include art, history, literature, media theory, philosophy, and political science, encourages students to evaluate broader and contradictory legacies of modernity, such as how the literary, artistic, and cultural responses to the belated and rapid modernization of Germany allow for reflection on the modern condition in general.

Similarly, the German experience of national identity and political unification sheds light on wider issues of cultural cohesion and difference, as well as on the causes and meaning of phenomena such as racial prejudice, anti-Semitism, and the Holocaust. In general, an education in German Studies not only encourages the student to consider the effects of German-speaking thinkers and artists on the modern world, but also provides a lens through which the contours of the present and past can be evaluated.

The department offers students the opportunity to pursue course work at all levels in the languages, cultures, literatures, and intellectual histories of the German language traditions. Whether interested in German literature, or the influence of German thought on other fields in the humanities, students find a broad range of courses covering language acquisition and refinement, literary history and criticism, cultural history and theory, history of thought, continental philosophy, and linguistics.

By carefully planning their programs, students may fulfill the B.A. requirements for a double major in German Studies and another subject. An extended undergraduate major in English and German literature is available, as are coterminal programs for the B.A. and M.A. degrees in German Studies, and joint programs for the Ph.D. degree with Comparative Literature, Interdisciplinary Studies in Humanities, Linguistics, and Modern Thought and Literature.

Special collections and facilities at Stanford offer possibilities for extensive research in German Studies and related fields pertaining to Central Europe. Facilities include the Stanford University Libraries and the Hoover Institution on War, Revolution, and Peace. Special collections include the Hildebrand Collection (texts and early editions from the 16th to the 19th century), the Austrian Collection (with emphasis on source material of the time of Maria Theresa and Joseph II, the Napoleonic wars, and the Revolution of 1848), and the Stanford Collection of German, Austrian, and Swiss Culture. New collections emphasize culture and cultural politics in the former German Democratic Republic. The Hoover Institution has a unique collection of historical and political documents pertaining to Germany and Central Europe from 1870 to the present. The

department also has its own reference library. Extensive use is made of the language lab as well as the department's own audio-visual equipment, films, tapes, and slides.

The Republic of Austria has endowed the Distinguished Visiting Professorship in Austrian Studies. The professorship rotates on a yearly basis through several departments.

Haus Mitteleuropa, the German theme house at 620 Mayfield, is an undergraduate residence devoted to developing an awareness of the culture of Central Europe. A number of department courses are regularly taught at the house, and there are in-house seminars and conversation courses. Assignment is made through the regular undergraduate housing draw.

UNDERGRADUATE PROGRAMS BACHELOR OF ARTS

Majors must demonstrate basic language skills, either by completing GERLANG 1, 2, 3, First-Year German, or the equivalent such as an appropriate course of study at the Stanford in Berlin Center. Students then enroll in intermediate and advanced courses on literature, culture, thought, and language. Requirements for the B.A. include at least three courses at the 130-139 level (introductory surveys on topics in German literature, thought, linguistics, and culture). Every major is expected to complete at least one Writing in the Major (WIM) course. Including GERLANG 1, 2, 3, the total requirement for the B.A. is a minimum of 60 units of work; the German and Philosophy option requires 65 units. With the approval of the Director of Undergraduate Studies, appropriate courses offered by other departments can be accepted toward this total, up to a maximum of 25 units.

Internships—Internships in Germany are arranged through the Overseas Studies program. In addition, students may consult with the department to arrange local internships involving German language use or issues pertaining to Germany or Central Europe. Interns who prepare papers based on their experience enroll in GERLIT 298.

Extended Major in English and German Literatures—Students may enter this program with the consent of the chairs of both departments. See the "English" section of this bulletin.

Multiple Majors—Students can combine a major in German Studies with a major in any other field. By carefully selecting courses in such disciplines as history, international relations, or economics, students can prepare themselves exceptionally well in the area of Central Europe. Multiple majors are especially recommended for students spending one or more quarters at the Stanford in Berlin Center.

GERMAN AND PHILOSOPHY

The German and Philosophy major option offers students the opportunity to combine studies in literature and philosophy. Students take most of their courses from departments specializing in the intersection of literature and philosophy. This option is not declared in Axess; it does not appear on the transcript or diploma.

The German and Philosophy major option requires a minimum of 16 courses, for a minimum total of 65 units, distributed as follows:

- 35 units in German Studies, including:
 - three courses at the 130 level
 - a WIM course
- PHIL 81, the gateway course in philosophy and literature, preferably in the sophomore year.
- Requirements in Philosophy:
 - PHIL 80. Prerequisite: introductory philosophy class
 - a course in the PHIL 180 series
 - a course in the PHIL 170 series
 - two courses in the history of philosophy numbered above 100
- Two additional elective courses of special relevance to the study of philosophy and literature as identified by the committee in charge of the program. In German, these courses include the GERLIT 241-243 series, *Deutsches Geistesgeschichte*, and other advanced seminars in German thought and literature. Students must consult with their advisers, the Director of Undergraduate Studies, and undergraduate adviser of the program in philosophical and literary thought.

5. *Capstone*: in place of a standard capstone course in the major, students take a capstone seminar approved through the program in philosophical and literary thought. The student's choice of capstone seminar must be approved in writing by the Director of Undergraduate Studies and undergraduate adviser of the program in philosophical and literary thought.
6. Units devoted to meeting the department's language requirement are not counted toward the 65-unit requirement.

The capstone seminar and the two related courses must be approved by both the German Studies Director of Undergraduate Studies and the undergraduate adviser of the program in philosophical and literary thought administered through the DLCL. Substitutions, including transfer credit, are not normally permitted for items 3b, 3c, and 3d, and are not permitted under any circumstances for items 2, 3a, and 5. Up to 10 units taken in the Philosophy Department may be taken CR/NC or S/NC; the remainder must be taken for a letter grade.

MINORS

The department offers two minor options.

German Language and Culture—Students may choose to minor in German Language and Culture if they are particularly interested in developing a strong ability in the German language, or in pursuing linguistic issues pertinent to German. Students satisfy the requirements for the minor in German Language and Culture by completing 35 units of course work, including at least three courses at the 100-129 level in either GERLANG or GERLIT, taught in German. Study at the Stanford in Berlin Center for at least one quarter is highly recommended.

German Cultural Studies—Students who wish to study German literature, culture, or thought, without necessarily acquiring facility in the German language, may pursue a minor in German Cultural Studies. Students meet the requirements for the minor in German Cultural Studies by completing 35 units of course work in German literature, culture, and thought in translation, including at least three courses at the 130 or 140 level.

MINOR IN LITERATURE

An undergraduate minor in Literature is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Department of Spanish and Portuguese and the Language Center. Students should consult the "Division of Literatures, Cultures, and Languages" section of this bulletin for further details about the minor and its requirements.

MINOR IN MODERN LANGUAGES

An undergraduate minor in Modern Languages is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Department of Spanish and Portuguese and the Language Center. Students should consult the "Division of Literatures, Cultures, and Languages" section of this bulletin for further details about the minor and its requirements.

HONORS

Majors with a minimum grade point average (GPA) of 3.3 in German courses are eligible for departmental honors. Students interested in the honors program should consult the undergraduate adviser early in their junior year. The essay topic is chosen in consultation with a faculty member of the department and opportunities to start research projects are offered at the Stanford in Berlin Center. In addition to the requirements listed above, the student must submit a proposal for the honors essay to the German faculty by the end of Spring Quarter of the junior year. During this quarter, students may enroll for 2 units of credit in GERLIT 298 for the drafting or revision of the thesis proposal. In Autumn Quarter of the senior year, the student must enroll in DLCL 189, a 5-unit seminar that focuses on researching and writing the honors thesis. Students then enroll for 5 units of credit in GERLIT 298 while composing the thesis during Winter Quarter. A total of 10-12 units are awarded for completion of honors course work, independent study, and the finished thesis.

STANFORD IN BERLIN

All undergraduates interested in Germany are urged to enroll in the Berlin program, which is open for academic study during the Autumn, Winter, and Spring quarters. The program also offers internships in German industry, government, and cultural organizations year round. Through the Center, students with at least two years of college-level German can also take courses at the Freie Universität, Technische Universität, or Humboldt Universität. Most students live in homes with German hosts.

Most credits earned in Berlin can be applied to the undergraduate major in German Studies. All students who are planning to study at Stanford in Berlin or engage in an internship are encouraged to consult with their major Director of Undergraduate Studies and the Overseas Studies office about integrating work done abroad into their degree program. Returning interns who wish to develop a paper based on their experience should enroll in GERLIT 298. More detailed information is available at the Overseas Studies Program in Sweet Hall or with the faculty adviser in the department.

COTERMINAL PROGRAMS

Students may elect to combine programs for the B.A. and M.A. degrees in German Studies. For details, see the "Undergraduate Degrees" section of this bulletin.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

GRADUATE PROGRAMS

The University requirements for the M.A. and Ph.D. degrees are described in the "Graduate Degrees" section of this bulletin.

MASTER OF ARTS

This program is designed for those who do not intend to continue studies through the Ph.D. degree. Students desiring the M.A. degree must complete a minimum of 45 units of graduate work. If students enroll for three quarters for a minimum of 15 units per quarter, they can fulfill the M.A. requirements in one year. The program normally includes at least one course in each of the three areas of concentration: language and linguistics, literature, and thought.

In addition, students must take graduate-level courses in German and/or approved courses in related fields such as art history, comparative literature, linguistics, history, or philosophy.

M.A. candidates must take an oral examination toward the end of their last quarter.

DOCTOR OF PHILOSOPHY

The requirements for the Ph.D. include: (1) a minimum of 36 graduate units during the first year of graduate study and a minimum of 9 units per quarter during the six quarters following the first year; (2) a reading knowledge of one language other than English and German, normally French; (3) a master's oral examination, unless the student already has an M.A. upon entering the program; (4) a qualifying paper; (5) a qualifying examination; (6) the University oral examination; and (7) a dissertation. Students in Medieval Studies must also have a reading knowledge of Latin.

During the first year of work, the student should select courses that provide an introduction to the major areas of the discipline. During Spring Quarter of the first year, all students, except those admitted with a master's degree, must take an oral M.A. examination. During the one-hour examination, the student is questioned by three faculty members from German Studies, chosen by the student, on work undertaken in specific graduate courses.

By July 1 of the summer following the first year of graduate study, students should present as a qualifying paper an example of their course work. Although ordinarily not meant to represent an original contribution to scholarship, it should demonstrate the candidate's ability to grasp complex subject matter with sufficient competence to organize materials and to present arguments in a clear and concise manner commensurate

with scholarly standards. The paper is submitted to the department chair, who passes it on for approval by the student's faculty adviser and a second reader appointed by the chair in consultation with the Director of Graduate Studies.

Students who enter the program with a master's degree from another institution must submit, in lieu of a qualifying paper, a master's thesis or a major research paper as evidence of ability to pursue advanced scholarly work.

At the end of the sixth quarter of study (and only if the qualifying paper has been accepted), the student takes a one-hour oral qualifying exam with two faculty members from German Studies, the student's chosen adviser, and another faculty member appointed by the chair. The purpose of this examination is to demonstrate a broad familiarity with the literature of the major periods, movements, and some major figures. Only after completion of the qualifying procedure will the department approve the student's admission to candidacy. A student who fails the qualifying examination may retake it once at the beginning of the seventh quarter.

After passing the qualifying exam, the student should consult with appropriate faculty members in order to develop a dissertation topic. It is important to consider scholarly significance, access to resources, and feasibility of completion within a reasonable period. The student then prepares a preliminary statement describing the topic (no more than five pages), which is circulated to prospective committee members for discussion at a meeting normally held during the eighth quarter. The purpose of this meeting is to provide the student with feedback and guidance in the preparation of the formal prospectus.

The University oral examination in the Department of German Studies is based on the dissertation prospectus. The prospectus, normally 25 pages plus bibliography, elaborates on the topic, the proposed argument, and the organization of the dissertation. It must be distributed to the committee members and the outside chair at least two weeks before the formal University oral examination. Students should plan this examination for the end of the third year or the end of the subsequent summer. The examination lasts approximately two hours, permitting each of the four examiners a 25-minute question period and reserving an optional ten minutes for questions from the chair of the examination.

Students, regardless of their future fields of concentration, are expected to acquire excellence in German and thorough knowledge of the grammatical structure of German. The department expects Ph.D. candidates to demonstrate teaching proficiency in German; GERLIT 200, Teaching of Second Language Literatures (not given 2005-06), is required. The teaching requirement is five quarters during the second and third years of study. The fifth and final quarter of teaching may be postponed until the student has worked extensively on the dissertation and may be devoted to a literary topic related to the dissertation. Such courses are subject to departmental review procedures.

The department expects candidates to demonstrate research skills appropriate to their special areas of study. The requirement can be fulfilled in the capacity of either a University Fellow or a Research Assistant.

Graduate students are also advised to start developing skills in the teaching of literature by participating in the teaching of undergraduate literature courses. Students can earn up to 3 units of graduate credit for practice teaching in literature.

Regular attendance at the departmental colloquium is mandatory. Each student is expected to make a formal presentation at the colloquium for public discussion.

INTERDISCIPLINARY PROGRAMS

The department participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in German Studies and Humanities. For a description of that program, see the "Interdisciplinary Studies in Humanities" section of this bulletin.

Students may work toward a Ph.D. in German Studies with minors in such areas as comparative literature, modern thought and literature, linguistics, or history. Students obtaining a Ph.D. in such combinations may require additional training.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. (AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, Slavic Languages and Literatures, and Spanish and Portuguese, in the Program in Modern Thought and Literature, and in the Division of Literatures, Cultures, and Languages.

GERMAN LANGUAGE COURSES

The following courses in German language instruction represent a typical sequence for three years of German language study. Majors and prospective majors should consult the requirements for a B.A. in German Studies above. For descriptions, other information, and additional courses including special emphasis, intensive, summer, and activity courses at the Haus Mitteleuropa, see the "Language Center" section of this bulletin.

GERLANG 1,2,3. First-Year German

5 units, Aut, Win, Spr (Engel, A; Goppelsroder, F; Petig, W; Utter, A; Zhang, X; Staff)

GERLANG 21,22. Intermediate German

4 units, 21: Aut (Petig, W), 22: Win (Petig, W)

GERLANG 100. *Hundert Deutsche Jahre: One Hundred German Years*

3-4 units, Spr (Strachota, K)

GERLANG 101,102. Advanced Language Study

3-4 units, 101: Aut (McQueen, K), 102: Spr (Staff)

GENERAL (IN ENGLISH)

These courses, with the subject code GERGEN, do not require knowledge of German and are open to all students.

UNDERGRADUATE

GERGEN 18N. Thomas Mann's *Death in Venice*—(Same as COMPLIT 18N.) Stanford Introductory Seminar. Preference to freshmen. The philosophical treatment of the problem of authorship and the relationship between knowledge and passion in a work of art. Mann's novella contrasted as a document of modernism with Nietzsche's *Birth of Tragedy* and Plato's *Phaedrus*. The relevance of the text's questioning of the proximity of writing and democracy on the eve of WWI. In English.

4 units, Aut (Berman, R)

GERGEN 38A. Introduction to Germanic Languages—(Same as GERLIT 138.) The oldest attested stages of the Germanic language family, including Gothic, Old Norse, Old Saxon, Old English, Old Frisian, Old Low Franconian (Old Dutch), and Old High German. The linguistic interrelationships, prehistory, Germanic tribal groupings, and literature. GER:DB-Hum

3 units, Win (Robinson, O)

GERGEN 104Q. Resistance Writings in Nazi Germany—Stanford Introductory Seminar. Preference to freshmen. The letters and diaries of individuals who resisted Nazi oppression and paid with their lives. Readings include the Scholl diaries, Bonhoeffer's letters and his *Ethics*, and letter exchanges from other crucial figures. No knowledge of German required; students may read texts in original if able. GER:DB-Hum

3 units, Aut (Bernhardt, E)

GERGEN 123. Modern Tyranny in Culture and Political Thought—A comparative and literary approach to individual experiences of totalitarian regimes in the 20th century. Artistic and philosophical reflections from Germany, E. Europe, Russia, and the Middle East including by Franz Kafka, Primo Levi, Hannah Arendt, Czeslaw Milosz, Aleksandr Solzhenitsyn, and Milan Kundera. Issues of dissent, personal freedom, political responsibility, and the ambiguous position of free art and thought in a coercive and violent regime.

3-5 units, Spr (McIntyre, S)

GERGEN 140Q. Liberty, Values, and Virtues—Stanford Introductory Seminar. Preference to sophomores. Sources of contemporary neoliberal and conservative thought. The question of freedom and the viability of democracy in light of 20th-century totalitarianisms. Cultural values in democracy, virtues of citizens. Readings by Friedrich Hayek and Leo Strauss. GER:DB-Hum

4 units, Spr (Berman, R)

GERGEN 141. Fables of Retreat—Modern anti-heroes who assert themselves through feats of reduction and retreat. Writers include Rousseau, Tieck, Emerson, Thoreau, Melville, Dostoevsky, and Kafka.

3-5 units, Spr (Dornbach, M)

GERGEN 164. Between War and Revolution: Twentieth-Century Berlin—Berlin as a microcosm of German culture, from the metropolis of the roaring 20s to the fall of the Wall. Topics: war, revolution, modernization, americanization, culture versus civilization, National Socialism, democracy and Communism, terrorism, and reunification. Sources include literary and cinematic works which capture cultural and historical turning points of German history. Texts include Theodor Fontane, Thomas Mann, Alfred Döblin, Bertold Brecht, Anna Seghers, Heinrich Böll, and Ulrich Plenzdorf. In English.

3-5 units, Win (Sieg, C)

ADVANCED UNDERGRADUATE AND GRADUATE

GERGEN 168A/268A. Freud and the Enterprise of Psychoanalysis—Psychoanalysis at the juncture of its multiple meanings as a therapeutic practice, a theory of the functioning of the human mind, a method of textual interpretation, a cultural critique, and a genealogy that accounts for the origins of morality, religion, art, and other social institutions. Readings include Freud's major works, and Nietzsche, Ferenczi, Lacan, Laplanche, de Certeau, Kristeva, and Irigaray. GER:DB-Hum

3-5 units, Win (Douvaldzi, C)

GERGEN 191A/291A. Oedipus, Hamlet, Moses: Archetypes of the Hero—Texts that provided psychoanalysis with its foundational myths. Oedipus, Moses, and Hamlet as archetypes of the hero related to moments of emerging modernity: from mythos to logos, polytheism to monotheism, and action to thought. The interplay among knowledge, recognition, and desire; the role of sameness and alterity in the constitution of personal, familial, and national identities; and the relation between violence and the construction of history. Readings include: Exodus, Sophocles, Shakespeare, Freud, Aeschylus, Euripides, Cavafy, Hofmannsthal, and Wolf; theoretical and critical essays by Laplanche, Lyotard, Lacan, de Certeau, Kofman, Assmann, Said, and Cavell. GER:DB-Hum

3-5 units, Spr (Douvaldzi, C)

GERGEN 206/306. Narrative, Visuality, Memory—Moments in the history of the relationship between the verbal and the visual: the classical *ars memoriae*; the ekphrasis debates of the 18th century; the emergence of a new visuality and mnemonic art as structuring principles for modernist narrative. Authors include Plato, Aristotle, Cicero, Augustine, Winckelmann, Lessing, Diderot, Goethe, Moritz, Flaubert, Rilke, Joyce, and Proust.

3-5 units, Spr (Douvaldzi, C)

GERGEN 249/349. Cultural Conflict in Contemporary Europe—(Same as COMPLIT 249A/349A.) Conflicting values and traditions in the context of European modernity and its encounter with Islam. Problems of secularization and definitions of European identity. Responses to Salman Rushdie's *Satanic Verses*; the hypothesis of a clash of civilizations as the competition between civil society and communitarian loyalties. The Danish cartoon controversy. Alienation and terrorism. Modernity and the transformation of gender roles. Readings include literary fictions, journalism, and documents of public debate. In English.

3-5 units, Win (Berman, R)

GERGEN 282. Heidegger and Poetry in an Age of Technology: Rilke, Trakl, and Char—(Same as COMPLIT 256, FRENGEN 282.) Heidegger's thinking on language and poetry. The technological transformation of language into univocal information and the resources of poetry for an ambiguous resistance. Parallel consideration of philosophy's relation to poetry. Readings from Rilke, Trakl, and Char.

3-5 units, Spr (Mitchell, A)

GERGEN 290A/390A. The Contemporary Novel—(Same as COMPLIT 224/324.) Anglo-American and European novels; how they address central aspects of the contemporary condition: memory, ethnicity, and political violence. Theoretical contributions on the intersection of the arts and literature, and politics. Readings include Kadare, Pamuk, Houellebecq, Smith, Barthes, Fish, Rorty, Jameson, Butler, White, Appiah, Bhabha, and Zizek.

3-5 units, Win (Eshel, A)

GRADUATE

GERGEN 353. Terrorism—(Same as COMPLIT 356, LAW 360.) Interdisciplinary seminar. How to define terrorism and distinguish it from legitimate forms of political resistance. Is terrorism political or criminal? How has terrorism altered the perception of permissible restriction of civil liberties? How does terrorism affect societies?

3-5 units, Aut (Eshel, A; Weiner, A)

LITERATURE, THOUGHT, AND CULTURE

Courses in this section have the subject code GERLIT.

UNDERGRADUATE

At this level, students have several options depending on their interests. After completing GERLANG 3 or the equivalent, students may register for courses at the GERLIT 120-level, which consider special topics in German culture while advancing language learning. Alternatively, GERLANG 21, 22, and 101 emphasize a systematic review of the language, while GERLANG 21W, 22W, and 105 study the language of business and international relations. GERLANG 100, 110, and 111 develop German language skills in the context of media such as film, television, and newspapers. Language instruction courses with the subject code GERLANG are listed in the "Language Center" section of this bulletin.

GERLIT 123N. The Brothers Grimm and Their Fairy Tales—Stanford Introductory Seminar. Preference to freshmen. Historical, biographical, linguistic, and literary look at the *Kinder-* and *Hausmärchen* of Jacob and Wilhelm Grimm. Readings from the fairy tales, plus materials in other media such as film and the visual arts. Small group performances of dramatized fairy tales. In German. Prerequisite: GERLANG 3 or equivalent. GER:DB-Hum, WIM

4 units, Spr (Robinson, O)

GERLIT 135. Literature and the Limits of Self-Determination: Introduction to 19th-Century German Prose—Works registering a heightened sense of the precarious position of the modern individual including Goethe, Kleist, Buechner, Nietzsche, Freud, Mann, and Kafka. In German; attention to improvement of linguistic skills. WIM

4 units, Win (Dornbach, M)

GERLIT 137. Between Yesterday and Tomorrow: German Postwar Film and the Culture of Defeat—(Same as 237.) Postwar Germany as an example of a culture of defeat. Is it a coincidence that the three most successful German films of the postwar years are about political corruption, prostitution, and juvenile crime? Focus is on commercial films: against the myth-making *Heimat-* and *Wirtschaftswunderfilmen* in favor of those concerning generational conflict, masculinity, and longing for decadence in an arrested society. Emphasis is on oral proficiency and advanced writing skills. In German. WIM

3-5 units, Win (Bach, U)

GERLIT 139. Love, Marriage and Passion in German Literature of the 19th and 20th Centuries—(Same as 339.) The thesis that love relationships, in shifting social, cultural, and communication contexts, reflect and determine the dominant value system of a society. How the concepts of romantic, passionate, and pragmatic love evolved and competed with one another in texts by Goethe, Schlegel, Keller, Sacher-Masoch, Fontane, and Böll. In German.

3-5 units, Aut (*Bach, U*)

GERLIT 196. Idealist and Romantic Aesthetics—(Same as 296.) The emergence of the modern idea of art as an autonomous domain. The systematic aspirations of German idealism and the anti-systematic spin-offs in the literary avant garde of the Romantic movement. Writings by Kant, Schiller, Schlegel, Novalis, Schelling, and Hegel. In English.

3-5 units, Aut (*Dornbach, M*)

GERLIT 197. Theories of Art after Idealism—(Same as 297.) Key responses to the failure of idealism to integrate artistic creation and aesthetic experience into a philosophical system. Works by Schopenhauer, Kierkegaard, Nietzsche, Dilthey, and Lukács.

3-5 units, Win (*Dornbach, M*)

GERLIT 199. Independent Reading—36 hours of reading per unit, weekly conference with instructor. May be repeated for credit. Prerequisite: consent of instructor.

1-10 units, Aut, Win, Spr, Sum (*Staff*)

ADVANCED UNDERGRADUATE AND GRADUATE

GERLIT 237. Between Yesterday and Tomorrow: German Postwar Film and the Culture of Defeat—(Same as 137; see 137.)

3-5 units, Win (*Bach, U*)

GERLIT 257. Gothic—Introduction to the grammar, texts, and history of this earliest extensively-documented Germanic language, a relative of German and English. Issues surrounding the Germanic parent language.

4 units, Spr (*Robinson, O*)

GERLIT 278. Modernity as Succession: Imitation, Emulation, Influence—(Same as 378.) Is originality compatible with the capacity to be inspired by precursor authors? How writers from the 18th century to the present attempted to resolve this problem by distinguishing creative emulation from literalistic imitation. Writings by Edward Young, Winckelmann, Kant, Hölderlin, Schelling, Nietzsche, Gadamer, and Harold Bloom. In English.

3-5 units, Spr (*Dornbach, M*)

GERLIT 290. Present Pasts: History and Memory in Culture and Politics—(Same as INTNLREL 106.) Theoretical, comparative, and interdisciplinary approach to historical representation and remembrance. Focus is on the uses and abuses of remembering and historiographic accounting for the recent past in culture and politics. Examples include post-WW II Germany and post-1948 Israel. How the memory of 9/11 is played out in contemporary American discourse, including political debates, literature, and popular culture.

5 units, Win (*Eshel, A*)

GERLIT 296. Idealist and Romantic Aesthetics—(Same as 196; see 196.)

3-5 units, Aut (*Dornbach, M*)

GERLIT 297. Theories of Art after Idealism—(Same as 197; see 197.)

3-5 units, Win (*Dornbach, M*)

GERLIT 298. Individual Work—Open only to German majors and to students working on special projects, including written reports for internships. Honors students use this number for the honors essay. May be repeated for credit.

1-15 units, Aut, Win, Spr, Sum (*Staff*)

GRADUATE

GERLIT 339. Love, Marriage and Passion in German Literature of the 19th and 20th Centuries—(Same as 139; see 139.)

3-5 units, Aut (*Bach, U*)

GERLIT 369. Introduction to Graduate Studies: Criticism as Profession—(Same as COMPLIT 369.) Major texts of modern literary criticism in the context of professional scholarship today. Readings of critics such as Lukács, Auerbach, Frye, Ong, Benjamin, Adorno, Szondi, de Man, Abrams, Bourdieu, Vendler, and Said. Contemporary professional issues including scholarly associations, journals, national and comparative literatures, university structures, and career paths.

5 units, Aut (*Berman, R*)

GERLIT 378. Modernity as Succession: Imitation, Emulation, Influence—(Same as 278; see 278.)

3-5 units, Spr (*Dornbach, M*)

GERLIT 399. Independent Study

1-15 units, Aut, Win, Spr, Sum (*Staff*)

GERLIT 400. Dissertation Research—For graduate students in German working on dissertations only.

1-12 units, Aut, Win, Spr, Sum (*Staff*)

COGNATE COURSES

German majors are advised to consult the “Division of Literature, Culture, and Languages” section of this bulletin for additional offerings. See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program’s student services office for applicability of these courses to a major or minor program.

COMPLIT 219A. Henrich von Kleist

3-5 units, Win (*Gumbrecht, H*)

COMPLIT 240. Introduction to Old Norse—(Same as ENGLISH 200.)

4-5 units, Win (*Lerer, S*)

DLCL 377. Topics in Literature and Culture

3-4 units, Aut (*Bohrer, K*)

DRAMA 12N. Antigone: From Ancient Democracy to Contemporary Dissent—(Same as CLASSGEN 6N.)

4 units, Aut (*Rehm, R*)

DRAMA 161/261. Performance and Politics—(Same as CLASSGEN 161.)

5 units, Aut (*Staff*)

DRAMA 188Q. From Brecht to Müller: German Theater and Performance since World War II

3-5 units, Aut (*Weber, C*)

ENGLISH 140A. Imagining the Holocaust

5 units, Spr (*Felstiner, J*)

ENGLISH 170A. Introduction to Critical Theory: Literary Theory and Criticism Since Plato—(Same as ENGLISH 270A.)

5 units, Win (*Kaufman, R*)

ENGLISH 309N. Modern Poetry and Frankfurt School Aesthetics

5 units, Spr (*Kaufman, R*)

FRENGEN 181. Philosophy and Literature—(Same as ITALGEN 181, PHIL 81.)

4 units, Win (*Anderson, L; Landy, J*)

FRENGEN 259. Self-Reflexivity Historicized, or the Emergence of the Second-Order Observer—(Same as COMPLIT 259.)

3-5 units, Win (*Gumbrecht, H*)

HISTORY 136B. European Thought and Culture in the 20th Century

5 units, Spr (*Robinson, P*)

MUSIC 16N. Music, Myth, and Modernity: Wagner's Ring Cycle and Tolkien's *Lord of the Rings**3 units, Spr (Grey, T)***MUSIC 17N. The Operas of Mozart***3 units, Win (Berger, K)***MUSIC 312A. Courses given in History have the subject code HISTORY. For a complete list of subject codes, see Appendix.

History courses teach the analytical, interpretive, writing knowledge and skills necessary for understanding the connections between past and present. History is a pragmatic discipline in which the analysis of change over time involves sifting the influences and perspectives that affect the course of events, and evaluating the different forms of evidence historians exploit to make sense of them. Teaching students how to weigh these sources and convert the findings into persuasive analysis lies at the heart of the department's teaching. Graduates with a history major pursue careers and graduate study in law, public service, business, writing, and education.

UNDERGRADUATE PROGRAMS**BACHELOR OF ARTS**

The Department of History offers several tracks to the B.A. in History. These tracks are not declared on Axxess; they do not appear on the transcript or the diploma.

The General History track emphasizes breadth of study among historical areas and periods as well as concentration in one selected field. The two tracks with interdisciplinary emphasis (Literature and the Arts, and History of Science and Medicine) combine the study of history with the methods and approaches of other disciplines, and involve substantial course work outside of History. Two new tracks with interdisciplinary emphasis are being introduced this year: History and Law, and Public History/Public Service.

All History majors require the following:

1. Completion of a minimum of 58 units and at least 12 courses of at least 3 units each, to include:
 - a) one Sources and Methods seminar
 - b) two 200-level undergraduate colloquia
 - c) at least one other small group course, to be chosen among the department's undergraduate colloquia, research seminars, or Stanford Introductory Seminars.
2. Courses comprising the 58 units must be taken for a letter grade, and the student must maintain a grade point average (GPA) in History courses of 2.0 or higher.

3. At least six courses must be taken from regular faculty members of the Department of History.
4. History's Writing in the Major requirement is satisfied by completing one of the following: a WIM-option colloquium or seminar; an Honors thesis in History; or a 15-page research paper in History written under faculty direction (HISTORY 299W). Work on the research paper must begin no later than Winter Quarter of the senior year (at least two quarters prior to graduation).
5. At least six quarters of enrollment in the major. Each candidate for the B.A. in History should declare a major by the Autumn Quarter of the third year of study (earlier, if possible).

One Directed Writing (299W) or Directed Research (299S) taken for 3-5 units and for a letter grade may be applied toward the twelve courses required for the B.A. in History. A maximum of five transfer courses may be applied toward the major. Advanced placement credits do not fulfill any major requirements.

Completion of the major requires planning. In Spring Quarter of the junior year, following consultation with faculty advisers, History majors are required to complete a departmental Degree Progress Review and submit it to the History office.

The department also encourages students to acquire proficiency in foreign languages and study at one of Stanford's overseas programs. Such studies are not only valuable in themselves; they can provide an opportunity for independent research and a foundation for honors essays and graduate study.

For information on specific History courses' satisfaction of major requirements, refer to the Department of History course information web site at <http://history-db.stanford.edu/courses/>.

THE GENERAL HISTORY TRACK

In pursuing the above requirements for all History majors, the student in the General History track is required to satisfy breadth and concentration requirements.

1. *Breadth*: to ensure chronological and geographical breadth, at least two courses must be completed in a premodern chronological period and in each of three geographical fields: Field I (Africa, Asia, and Middle East); Field II (the Americas); and Field III (Europe, including Western Europe, Eastern Europe, and Russia). Courses fulfilling the premodern chronological period may also count for Fields I-III.
2. *Concentration*: to develop some measure of expertise, students must complete four courses in one of the following fields of concentration: Africa, Asia, Eastern Europe and Russia, Europe before 1700, Europe since 1700, Jewish history, Latin America, science and technology, the United States, the Middle East, international history, comparative empires and cultures; or a thematic subject treated comparatively, such as war and revolution, work, gender, family history, popular culture, or high culture. The proposed concentration must be approved by the major adviser; a proposal for a thematic concentration must have the approval of both the adviser and the department's undergraduate studies committee. At least one and preferably two of these four courses should be an undergraduate colloquium or seminar.

Certain Introduction to the Humanities (IHUM) courses taught by History faculty in a Winter-Spring sequence count toward the General History major.

HISTORY TRACKS WITH INTERDISCIPLINARY EMPHASIS (HMIE)

These tracks are designed for several types of students: students interested in other disciplines who want to focus on the historical aspects of the subject matter covered by that discipline; students in History who want to understand how interdisciplinary approaches can deepen their understanding of history; and students primarily interested in developing interdisciplinary approaches to historical scholarship by combining the careful attention to evidence and context that motivates historical research with the analytic and methodological tools of science and the humanities. In pursuing the above requirements for all History majors, students in HMIE are required to complete their twelve courses for the major as follows:

Gateway Course (one course)—Students are required to take the appropriate gateway course for their interdisciplinary track. This introduces students to the application of particular interdisciplinary methods to the study of history. See the section on each HMIE for the gateway course appropriate to that major.

Methodological Cluster (three courses)—This cluster is designed to acquaint students with the ways in which interdisciplinary methods are employed in historical scholarship, by practicing historians and scholars in other disciplines whose work is historical. This program of study must provide methodological coherence and must be approved in advance by the student's adviser. See the section on each HMIE for the appropriate historical methods courses.

Geographic Cluster (four courses)—History is embedded in time and place. This cluster is designed to emphasize that the purpose of studying methodology is to more fully understand the history of a particular region of the world. Students select a particular geographic region, as specified in the History major, and complete four courses in that area.

Interdisciplinary Cluster (four courses)—These courses, taken outside the Department of History, acquaint students with the methods and approaches of another discipline appropriate for the interdisciplinary study of history. This program of study must provide methodological coherence and must be approved in advance by the student's adviser. See the section on each HMIE for appropriate interdisciplinary courses.

HMIE track do not mandate the breadth or concentration requirements of the General History track. Introduction to the Humanities courses taught by History faculty may apply to HMIEs only insofar as their content is specifically appropriate to the particular methodological or geographic cluster. Courses preapproved for the clusters in interdisciplinary tracks are listed on the History advising web site.

HISTORY, LITERATURE, AND THE ARTS

The History, Literature, and the Arts track is designed for the student who wishes to complement his or her work in History with study in literature, particularly in a foreign language. For the purposes of this major, literature is defined broadly, including art, drama, films and poetry, memoirs and autobiography, novels, as well as canonical works of philosophy and political science. It appeals to students who are interested in studying literature primarily in its historical context, or who want to focus on both the literature and history of a specific geographical area while also learning the language of that area.

Gateway Course—HISTORY 239E, History, Literature, and Arts in Great Britain (Autumn Quarter), gives students a broad introduction to the study of literary texts in history.

Methodological Cluster—This cluster teaches students how historians, in particular, analyze literary texts as documentary sources. Students choose three courses from among the preapproved HLA Methodology curriculum; other courses must be approved by the HLA coordinator. These courses need not be in the student's geographic concentration.

Geographic Cluster—Students select four History courses in one geographic area. Examples include: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East, or Africa. These four courses must be taken in addition to the three methodological courses required above.

Interdisciplinary Cluster—Four courses, taken outside the Department of History, must address the literature and arts, broadly defined, of the area chosen for the geographic concentration. The student's adviser must pre-approve all courses in this cluster; these courses may not be double-counted towards a minor or major other than History.

General Requirements—Among the history courses taken, students must include a Sources and Methods seminar, two 200-level courses, and one other small group class. In addition, the Writing in the Major (WIM) requirement must be completed.

HISTORY, SCIENCE, AND MEDICINE

The History, Science, and Medicine (HS&M) track is a collaborative program of the Department of History, the Program in the History and Philosophy of Science, and the Stanford School of Medicine. The major is designed for: (1) students who wish to complement their work in science and/or premedical study with a History track that focuses on science and medicine; (2) students in the humanities and social sciences whose interest in science and medicine is primarily historical and contextual. This major allows students who are contemplating medical school to study the history of medicine and the medical humanities while fulfilling the premedical curriculum.

Gateway Course (1 course)—Students fulfill this requirement by taking the gateway course for HS&M that is offered annually: HISTORY 232G, *When Worlds Collide: The Trial of Galileo* (Spring Quarter).

Methodological Cluster (3 courses)—These History courses focus on the history of science, technology, and medicine. Courses must be approved by the student's adviser. The choice of courses depends on the student's particular interests (for example, premodern science, medical history and literature, history of technology, medical anthropology).

Geographic Cluster (4 courses)—Students select four History courses in one geographic area. Examples include: Europe, Britain and the countries of the former British Empire, Asia, North America, Latin America, the Middle East or Africa. These four courses must be taken in addition to the three methodological cluster courses. Courses in the history of science, technology, and medicine that have a geographic focus may be used to fulfill this requirement, but cannot be double-counted in the methodological cluster.

Interdisciplinary Cluster (4 courses)—These courses are taken outside the Department of History. The cluster can be defined in any of four ways:

1. two medical humanities courses plus two complementary science courses
2. two courses about science (e.g., anthropology of science, sociology of science, philosophy of science) plus two complementary science courses
3. four courses in medical humanities
4. two courses in medical humanities and two about science. In all instances, the Interdisciplinary Cluster must be approved in advance by the student's adviser.

Medical Humanities Course in the Medical School—Majors in the Medical Humanities field of the track in History, Science, and Medicine are expected to take at least one course in the School of Medicine.

General Requirements—Among history courses taken, students must include a Sources and Methods seminar, two 200-level courses, and one other small group class. In addition, the Writing in the Major (WIM) requirement must be completed.

HISTORY AND LAW

The History and Law (HL) interdisciplinary track is for students who wish to explore the intersections between historical and legal studies. The HL curriculum focuses on the role of legal institutions, policies, and structures in various societies. HL track majors enroll in at least three History department courses that focus on issues of law in civil societies and four courses that provide a geographic concentration. In addition, students enroll in four courses outside History that provide disciplinary or interdisciplinary perspectives on the role of law in shaping societies.

Core Courses (3 courses)—Students enroll in at least three History department courses, including courses outside History taught by faculty affiliated with the department, that focus on how law, policies, constitutions, and legal structures affect the development of various societies. These courses include, but are not limited to, the following: HISTORY 57, *The Constitution: A Short History*; HISTORY 135, *History of European Law*; HISTORY 222, *Honor, Law, and Modernity*; HISTORY 245G, *Law and Colonialism in Africa*; HISTORY 251G, *Topics in Constitutional History*; HISTORY 293, *Law and Society in Late Imperial China*; and HISTORY 352B, *History of American Law* (same as LAW 318; open to undergraduates with consent of instructor; semester-long).

Geographical Cluster (5 courses)—Students choose five History courses in one geographic area, such as the United States, Europe, Latin America, Asia, Middle East, or Africa. The faculty coordinator must pre-approve all courses in this cluster.

Interdisciplinary Cluster (4 courses)—Students choose four courses from outside the History department including courses offered in the School of Law and the School of Education. The faculty coordinator must pre-approve all courses in this cluster.

Small Group Requirements—Students must enroll in one sources and methods course and at least two 200-level small group courses while completing the three core courses and the five-course geographical cluster. The Writing in the Major (WIM) requirement must be completed in a History department WIM-designated course.

PUBLIC HISTORY/PUBLIC SERVICE

The Public History/Public Service (PH/PS) interdisciplinary history track is designed for students who wish to include in their course of studies the application of historical study in:

1. public settings such as museums and heritage sites, national and state parks, public agencies, and private foundations, and
2. public service settings in nonprofit organizations, public agencies, and educational institutions.

PH/PS majors enroll in a gateway course on public history and public service and in History department courses that provide a geographic concentration. In addition, students consult with the PH/PS faculty coordinator to select a cluster of service-learning courses, listed annually by the Hass Center for Public Service, that provide interdisciplinary and methodological perspectives on public service. PH/PS majors must also complete an internship through a regularly offered service-learning course or through a summer internship or fellowship.

Gateway Course (1 course)—HISTORY 201, *Introduction to Public History and Public Service*, provides grounding in the theory and practice of public service and exposure to the types of public history practiced in venues such as museums, historical sites, parks, and nonprofit organizations including local historical societies.

Geographical Cluster (4 courses)—Students select four History courses in one geographic area, such as the United States, Europe, Latin America, Asia, Middle East, or Africa. The faculty coordinator must pre-approve all courses in this cluster.

Interdisciplinary Cluster (4 courses)—Students select four courses from outside the History department drawn from the annual listing of service-learning and theory/practice courses provided by the Haas Center for Public Service. The faculty coordinator must pre-approve all courses in this cluster.

Methodological Cluster (2 courses)—Students must enroll in one Sources and Methods course and one additional 200-level small group course. The Writing in the Major (WIM) requirement must be completed in a History department WIM-designated course.

Public Service/Service-learning Internship (1 course)—Students must engage in at least a one quarter internship through a service-learning course or through a full-time public service or public history summer internship or fellowship. This internship must be pre-approved by the faculty coordinator.

MINORS

Candidates for the minor in History must complete six courses, at least three of which must have a field or thematic focus. The department ordinarily defines fields in terms of geography or chronology, but it also invites students to pursue thematic topics that can be examined in broadly comparative terms. Students completing the minor may choose to concentrate in such fields as African, American, British, Asian, European (medieval, early modern, or modern), Russian and East European history, comparative empires and cultures, or such thematic topics as the history of gender, the family, religion, technology, or revolution. Students may also petition to have a concentration of their own design count toward the minor.

All six courses must be of at least 3 units each and must be taken for a letter grade. The student must maintain a grade point average (GPA) in History courses of 2.0 (C) or higher. Two of the six courses must be small-group in format (Stanford Introductory Seminars, Sources and Methods Seminars, departmental colloquia, and research seminars). History courses taken at overseas campuses may count toward the minor, but at least three of the six courses must be taken from Stanford faculty. One History course from Introduction to the Humanities may count toward the six-course requirement, but not for the field concentration. One directed writing (299W) or directed research (299S) course may count towards the minor, if taken for 3-5 units and for a letter grade. A maximum of three transfer courses may be used toward the minor. Advanced placement credits do not fulfill any minor requirements.

Students must declare the minor in History no later than the Autumn Quarter of the senior year. They do so via Axess under Declare Major/Minor. Minor declarations are then approved by the Department of History and confirmation is sent via email to the student.

HONORS PROGRAM

For a limited number of majors, the department offers a special program leading to honors in History. Students accepted for this program, in addition to fulfilling the general requirements stated above, begin work on an essay in Spring Quarter of the junior year and complete the essay by mid-May of the senior year. In addition to the Junior Honors Colloquium, 299H, students normally take 11 to 15 units of Senior Research, to be distributed as best fits their specific project. For students in the honors program, Senior Research units (299A,B,C) are taken in addition to the twelve required courses in History.

To enter this program, the student must be accepted by a member of the department who agrees to advise the research and writing of the essay, and must complete the Junior Honors Colloquium (299H). An exception to the latter requirement may be made for those studying overseas Winter Quarter of the junior year, but such students should consult with the director of the honors program, if possible, prior to going overseas. Under exceptional circumstances, students are admitted to the program in the Autumn Quarter of the senior year.

In considering an applicant for such a project, the adviser and director of the honors program take into account general preparation in the field of the project and expect a GPA of at least 3.3 (B+) in the student's previous work in history and in the University. Students completing the thesis with a grade of 'B+' or higher are eligible for honors in History. To enter the honors program, apply at the Department of History office.

Outstanding honors essays may be considered for the University's Golden Medals, as well as for departmental James Birdsall Weter prizes.

SECONDARY (HISTORY) TEACHER'S CREDENTIAL

Applicants for the Single Subject Teaching Credential (Secondary) in the social studies may obtain information regarding this program from the Credential Administrator, School of Education.

COTERMINAL B.A. AND M.A. PROGRAM

The department each year admits a limited number of undergraduates for coterminal B.A. and M.A. degrees in History. Coterminal applications are accepted during Autumn Quarter for admission in Spring Quarter; check with the History office for the application deadline. Applicants are responsible for checking their compliance with University coterminal requirements listed in the "Undergraduate Degrees and Programs" section of the this bulletin. Applicants must meet the same general standards as those seeking admission to the M.A. program; they must submit a written statement of purpose, a transcript, GRE test scores, and three letters of recommendation, at least two of which should be from members of the Department of History faculty. To be competitive, coterminal applicants should have a 3.75 GPA in their undergraduate history major (or equivalent if they are entering without a History major.) The decision on admission rests with the department faculty upon recommendation by the Graduate Admissions Committee. Students must meet all requirements for both degrees. They must complete 15 full-time quarters (or the equivalent), or

three full-time quarters after completing 180 units, for a total of 225 units. During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three courses that fall within a single Ph.D. field.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

GRADUATE PROGRAMS ADMISSION

Applicants for admission to graduate work must take the General Test of the Graduate Record Examination. It may be taken at most American colleges and in nearly all foreign countries. For details, see the *Guide to Graduate Admission*, available from Graduate Admissions, the Registrar's Office, 630 Serra Street, Suite 120, or at <http://gradadmissions.stanford.edu>.

Students admitted to graduate standing do not automatically become candidates for a graduate degree. With the exception of students in the terminal M.A. program, they are admitted with the expectation that they will be working toward the Ph.D. degree and may become candidates to receive the M.A. degree after completing three quarters of work.

MASTER OF ARTS

University requirements for the M.A. degree are described in the "Graduate Degrees" section of this bulletin.

The department requires the completion of nine courses (totaling not less than 45 units) of graduate work; seven courses of this work must be Department of History courses. Of the seven, one must be a seminar and four must be either graduate colloquia or graduate seminars. Directed reading may be counted for a maximum of 10 units. A candidate whose undergraduate training in history is deemed inadequate must complete nine courses of graduate work in the department. The department does not recognize for credit toward the M.A. degree any work that has not received the grade of 'A' or 'B.'

Terminal M.A. Program—Applicants who do not wish to continue beyond the M.A. degree are admitted to this program at the discretion of the faculty in individual fields (U.S., modern Europe, and so on). Students admitted may not apply to enter the Ph.D. program in History during the course of work for the M.A. degree.

M.A. in Teaching (History) The department cooperates with the School of Education in offering the Master of Arts in Teaching degree. For the general requirements, see the "School of Education" section of this bulletin. For certain additional requirements made by the Department of History, contact the department office. Candidates must possess a teaching credential or relevant teaching experience.

DOCTOR OF PHILOSOPHY

Students planning to work for the doctorate in history should be familiar with the general degree requirements of the University outlined in the "Graduate Degrees" section of this bulletin. Those interested in applying for admission to the M.A. and Ph.D. programs should contact the graduate program coordinator in the History department. Online applications are available in September of the year prior to intended enrollment. The application filing deadline is December 5, 2006. Applicants must file a report of their general scores on the Graduate Record Examination and submit a writing sample of 10-25 pages on a historical topic. Successful applicants for the M.A. and Ph.D. programs may enter only in Autumn Quarter.

Upon enrollment in the graduate program in History, the student has a member of the department designated as an adviser with whom to plan the Ph.D. program. Much of the first two years of graduate study is spent taking courses, and, from the outset, the student should be aware that the ultimate objective is not merely the completion of courses but preparation for general examinations and for writing a dissertation.

Admission to the Department of History in the graduate division does not establish any rights respecting candidacy for an advanced degree. At the end of the first year of graduate study, students are evaluated by the faculty and given a progress report. A decision as to whether the student

is admitted to candidacy for the Ph.D. is normally made by the start of the student's third year.

After the completion of certain further requirements, students must apply for acceptance for candidacy for the doctorate in the graduate division of the University.

REQUIREMENTS

1. In consultation with the adviser, students select an area of study from the list below in which to concentrate their study and later take the University oral examination. The major concentrations are:
 - Europe, 300-1500
 - Europe, 1400-1800
 - Europe since 1700
 - Jewish History
 - Russia
 - Eastern Europe
 - Middle East
 - East Asia before 1600
 - China since 1600
 - Japan since 1600
 - Africa
 - Britain and the British Empire since 1460
 - Latin America
 - The United States (including colonial America)
 - History of Science, Medicine, and Technology
2. The department seeks to provide a core colloquium in every major concentration. Students normally enroll in this colloquium during the first year of graduate study.
3. Students are required to take two research seminars, at least one in the major concentration. Normally, research seminars are taken in the first and second years.
4. Each student, in consultation with the adviser, defines a secondary concentration. This concentration should represent a total of four graduate courses or their equivalents, and it may be fulfilled by working in a historical concentration or an interdisciplinary concentration. The historical concentrations include:
 - a) One of the concentrations listed above (other than the student's major concentration).
 - b) One of the concentrations listed below, which falls largely outside the student's major concentration:
 - The Ancient Greek World
 - The Roman World
 - Europe, 300-1000
 - Europe, 1000-1400
 - Europe, 1400-1600
 - Europe, 1600-1789
 - Europe, 1700-1871
 - Europe since 1848
 - England, 450-1460
 - Britain and the British Empire, 1460-1714
 - Britain and the British Empire since 1714
 - Russia to 1800
 - Russia since 1800
 - Eastern Europe to 1800
 - Eastern Europe since 1800
 - Jewish History
 - Middle East to 1800
 - Middle East since 1800
 - Africa
 - China before 1600
 - China since 1600
 - Japan before 1600
 - Japan since 1600
 - Latin America to 1825
 - Latin America since 1810
 - The United States (including Colonial America) to 1865
 - The United States since 1850
 - The History of Science, Medicine, and Technology

- c) Work in a national history of sufficiently long time to span chronologically two or more major concentrations. For example, a student with Europe since 1700 as a major concentration may take France from 1000 to the present as a secondary concentration.
 - d) A comparative study of a substantial subject across countries or periods. The secondary concentration requirement may also be satisfied in an interdisciplinary concentration. Students plan these concentrations in consultation with their advisers. Interdisciplinary concentrations require course work outside the Department of History which is related to the student's training as a historian. Interdisciplinary course work can either add to a student's technical competence or broaden his or her approach to the problems of the research concentration.
5. Each student, before conferral of the Ph.D., is required to satisfy the department's teaching requirement.
 6. There is no University or department foreign language requirement for the Ph.D. degree. A reading knowledge of one or more foreign languages is required in concentrations where appropriate. The faculty in the major concentration prescribes the necessary languages. In no concentration is a student required to take examinations in more than two foreign languages. Certification of competence in commonly taught languages (that is, French, German, Italian, Portuguese, Russian, and Spanish) for candidates seeking to fulfill the language requirement in this fashion is done by the appropriate language department of the University. Certification of competence in other languages is determined in a manner decided on by faculty in the major concentration. In either case, certification of language competence must be accomplished before a student takes the University oral examination.
 7. The student is expected to take the University oral examination in the major concentration in the third graduate year.
 8. The student must complete and submit a dissertation which is the result of independent work and is a contribution to knowledge. It should evidence the command of approved techniques of research, ability to organize findings, and competence in expression. For details and procedural information, inquire in the department.

JOINT PH.D. IN HISTORY AND HUMANITIES

The Department of History participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in History and Humanities. See the "Interdisciplinary Studies in Humanities" section of this bulletin.

FINANCIAL SUPPORT

Students who are admitted with financial support are provided multiple years of support through fellowships, teaching and research assistantships, and tuition grants. Applicants should indicate on the admissions application whether they wish to be considered for such support. No separate application for financial aid is required.

U.S. citizens and permanent resident aliens who are interested in area language studies in East Asia, Africa, and the republics of the former Soviet Union may request a Foreign Language and Area Studies (FLAS) fellowship application from the FLAS coordinator of the respective programs offering the FLAS (CEAS, CAS, CREEES). The FLAS application deadlines are in January.

RESOURCES

The above section relates to formal requirements, but the success of a student's graduate program depends in large part on the quality of the guidance received from faculty and on the library resources available. Prospective graduate applicants are advised to study the list of History faculty and the courses this faculty offers. As to library resources, no detailed statement is possible in this bulletin, but areas in which library resources are unusually strong are described following.

The University Library maintains strong general collections in almost all fields of history. It has a very large microtext collection, including, for instance, all items listed in Charles Evans' *American Bibliography*, and in the *Short-Title Catalogues* of English publications, 1474-1700, and virtually complete microfilmed documents of the Department of State to 1906. It also has a number of valuable special collections including the

Borel Collection on the History of California; many rare items on early American and early modern European history; the Brasch Collection on Sir Isaac Newton and scientific thought during his time; the Gimon Collection on French political economy, and other such materials.

The rich collection of the Hoover Institution on the causes, conduct, and results of WW I and WW II are being augmented for the post-1945 period. The materials include government documents, newspaper and serial files, and organization and party publications (especially the British and German Socialist parties). There are also important manuscript collections, including unpublished records of the Paris Peace Conference of 1919 and the Herbert Hoover archives, which contain the records of the Commission for Relief in Belgium, the American Relief Administration, the various technical commissions established at the close of WW I for reconstruction in Central and Eastern Europe, the personal papers of Herbert Hoover as United States Food Administrator, and other important personal papers. Other materials for the period since 1914 relate to revolutions and political ideologies of international importance; colonial and minority problems; propaganda and public opinion; military occupation; peace plans and movements; international relations; international organizations and administration including the publications of the United Nations, as well as principal international conferences. The Hoover Institution also possesses some of the richest collections available anywhere on the British labor movement; Eastern Europe, including the Soviet Union; East Asia (runs of important newspapers and serials and extensive documentary collections, especially for the period of WW II); and Africa since 1860, especially French-speaking Africa, the former British colonies, and South Africa.

COURSES

See the *Time Schedule* and <http://history.stanford.edu/courses/> for updated information.

Courses are listed in the following order:

- Introductory Undergraduate
- Undergraduate (by Area or Theme)
- Graduate (by Area or Theme)
- Overseas Studies Program Courses in History

INTRODUCTORY UNDERGRADUATE

Introductory undergraduate History courses are listed in the following subsection order:

- Introduction to the Humanities (IHUM)
- Introductory Lectures: 1-99
- Stanford Introductory Seminars: 1N-99N, 1Q-99Q
- Sources and Methods Seminars: 1S-99S

IHUM (INTRODUCTION TO THE HUMANITIES)

The following Introduction to the Humanities courses are taught by History faculty members. IHUM courses are typically available only to freshmen seeking to fulfill GER:I-HUM requirements; see the "Introduction to the Humanities" section of this bulletin for further information. Prospective majors in History are advised to consider satisfying their IHUM requirements by registering for the following courses.

IHUM 4A,B. Mass Violence from Crusades to Genocide—The evolution, varieties, causes, and logic of mass violence in premodern and modern history; how mass violence shaped historical trends. What accounts for the persistence of mass violence in history? Do religions, ethnicity, and modernity foment or restrain mass violence? Is there a common pattern of mass violence throughout the centuries? Geographic focus is Europe; comparisons with societies which the Europeans encountered such as the Aztec empire, the Islamic world, and the African colonies. GER: IHUM-2,3

IHUM 4A: 5 units, Win (Buc, P)

IHUM 4B: 5 units, Spr (Weiner, A)

IHUM 5A,B. Worlds of Islam: Global History and Muslim Societies—Chronological and geographical overview of times and places in which Islam has been the dominant cultural framework. Elements of the Muslim faith and its related political, social, and cultural practices from the 7th-century rise of Islam to the recent past. Geographic range includes the historic Arab heartland of Islam, Africa, Persia, the Ottoman Empire, and Central Asia. GER: IHUM-2,3

IHUM 5A: 5 units, Win (Beinin, J; Rodrigue, A; Hanretta, S; Crews, R)

IHUM 5B: 5 units, Spr (Rodrigue, A; Hanretta, S; Crews, R; Satia, P)

IHUM 6A,B. World History of Science—The broad sweep of global science, from the prehistoric roots of the oldest known technologies, the events of the Scientific Revolution, through recent triumphs in the physical and life sciences. History as unavoidably selective. How science transforms and is transformed by human engagements with technology, religion, art, politics, and moral values. GER: IHUM-2,3

IHUM 6A: 5 units, Win (Proctor, R)

IHUM 6B: 5 units, Spr (Proctor, R)

INTRODUCTORY LECTURES

HISTORY 31. Science, Technology, and Art: The Worlds of Leonardo—(Same as STS 125/225.) The intersections among science, technology, and society, and an interdisciplinary introduction to Renaissance studies. Why does this 15th-century artist, engineer, and inventor continue to fascinate and inspire innovative, interdisciplinary work? The world of the historical Leonardo, looking at his range of interests and accomplishments (including Mona Lisa, human anatomies, flying machines), and the culture of invention that shaped him. Students think with Leonardo, reconstructing some of his projects. The persistence of the Renaissance as a touchstone for innovation in the 21st century, examining the myth of Leonardo. GER: DB-Hum

5 units, Win (Findlen, P)

HISTORY 59. Introduction to Asian American History—The historical experience of people of Asian ancestry in the U.S. Immigration, labor, community formation, family, culture and identity, and contemporary social and political controversies. Readings: interpretative texts, primary material, and historical fiction. GER:DB-SocSci, EC-AmerCul

5 units, Aut (*Chang, G*)

HISTORY 62. Introduction to African American History—Central themes in African American culture and history related to race as a definitive American phenomenon. Possible topics: African survivals and interpretations of slavery in the New World; the Black family; and literature and art. Possible readings: Frederick Douglass, Harriet Jacobs, Booker T. Washington, W.E.B. DuBois, Richard Wright, Maya Angelou, James Baldwin, Malcom X, Alice Walker, and Bell Hooks. Focus may vary each year. GER:EC-AmerCul

5 units, not given this year (*Carson, C*)

HISTORY 70. Culture, Politics, and Society in Latin America—Introduction to the political and social history of Latin America. Emphasis is on interactions among institutional change, social structure, and political movements, emphasizing the environment and cultural values. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (*Frank, Z*)

HISTORY 92A. The Historical Roots of Modern East Asia—China and Japan before and during the transition to modernity. From the 17th century when E. Asia was populous, urbanized, economically advanced, and culturally sophisticated to the early 20th century when European and America dominated the Pacific, while China was in social and political upheaval and Japan had begun its march to empire. Films; mandatory discussions. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (*Miller, L*)

STANFORD INTRODUCTORY SEMINARS

See <http://introsems.stanford.edu/> for applications and information.

HISTORY 20N. Russia in the Early Modern European Imagination—Stanford Introductory Seminar. Preference to freshmen. The contrast between the early modern image of Europe as free, civilized, democratic, rational, and clean against the notion of New World Indians, Turks, and Chinese as savage. The more difficult, contemporary problem regarding E. Europe and Russia which seemed both European and exotic. Readings concerning E. Europe and Russia from the Renaissance to the Enlightenment; how they construct a positive image of Europe and conversely a negative stereotype of E. Europe. GER:DB-Hum, EC-GlobalCom, WRITE-2

5 units, Spr (*Kollmann, N*)

HISTORY 30N. Fiction and English Society—Stanford Introductory Seminar. Preference to freshmen. The nature of English society from the mid-18th to mid-20th century through novels. Texts include Henry Fielding's *Joseph Andrews*, Jane Austen's *Mansfield Park*, George Eliot's *Middlemarch*, Charles Dickens' *Hard Times*, E.M. Forster's *Howards End*, Virginia Woolf's *Mrs Dalloway*, Evelyn Waugh's *A Handful of Dust*. The novels themselves, and how they illuminate the English society.

4 units, Aut (*Stansky, P*)

HISTORY 32N. The English Revolution—Stanford Introductory Seminar. Preference to freshmen. The English Civil War and the 11-year period in which it became a republic ruled not by a hereditary king but by a lord protector. During this revolutionary period, English men and women wrote about freedom and liberty in terms of the individual and the state, and of religion and society. The meaning of these writings which sketched for the first time in premodern Europe what democracy and a democratic republic might entail. GER:DB-Hum

4-5 units, Spr (*Como, D*)

HISTORY 33N. The French Revolution—Stanford Introductory Seminar. Preference to freshmen. The political culture of the pre-Revolutionary period. The course of the Revolution from the 1789 Declaration of the Rights of Man and of the Citizen through the 1793 Reign of Terror. Efforts to found a democratic order, and the political dynamic that led from the proclamation of liberty to the exercise of despotism in its name. The political culture of the Revolution in terms of relationships among language, political action, and violence. Its significance for modern history.

5 units, Win (*Baker, K*)

HISTORY 33Q. Shakespeare's London: The Politics and Culture of Growth—Stanford Introductory Seminar. Preference to sophomores. Shakespeare's London: The Politics and Culture of Growth

5 units, Win (*Seaver, P*)

HISTORY 36N. Gay Autobiography—Stanford Introductory Seminar. Preference to freshmen. Gender, identity, and solidarity as represented in nine autobiographies: Isherwood, Ackerley, Duberman, Monette, Louganis, Barbin, Cammermeyer, Gingrich, and Lorde. To what degree do these writers view sexual orientation as a defining feature of their selves? Is there a difference between the way men and women view identity? What politics follow from these writers' experiences? GER:DB-Hum, EC-Gender

4 units, Win (*Robinson, P*)

HISTORY 37N. The Second World War as Experience and Memory—Stanford Introductory Seminar. Preference to freshmen. The impact of WW II on soldiers and civilians as recorded in memoirs, letters, and novels.

5 units, Aut (*Sheehan, J*)

HISTORY 38N. The Body—Stanford Introductory Seminar. Preference to freshmen. Cultural and social meanings of the body. How medicine, media, law, and culture construct changing ideals of the body. How to apply historical and feminist analyses to understand change and the difference that gender makes in the social and cultural construction of the body. Emphasis is on shifting historical ideals for female and male bodies, and the changing importance of body image in popular culture. Readings include girls' diaries, women's sports, masculinity in the media, sexual violence, and performing the body. GER:DB-Hum, EC-Gender

5 units, Spr (*Freedman, E*)

HISTORY 44N. The History of Women and Gender in Science, Medicine, and Engineering—Stanford Introductory Seminar. Preference to freshmen. Women's participation in science; women as objects of scientific research; gender in the culture of the sciences; and how gender analysis has changed science theory and practice. GER:DB-Hum, EC-Gender

4 units, Win (*Schiebinger, L*)

HISTORY 48Q. South Africa: Contested Transitions—Stanford Introductory Seminar. Preference to sophomores. The inauguration of Nelson Mandela as president in May 1994 marked the end of an era and a way of life for S. Africa. The changes have been dramatic, yet the legacies of racism and inequality persist. Focus: overlapping and sharply contested transitions. Who advocates and opposes change? Why? What are their historical and social roots and strategies? How do people reconstruct their society? Historical and current sources, including films, novels, and the Internet. GER:DB-Hum

3 units, Win (*Samoff, J*)

HISTORY 62N. The Atomic Bomb in Policy and History—Preference to freshmen. Emphasis is on declassified files from WW II and recent interpretations. Why did the U.S. drop A-bombs on Japan? Were there viable alternatives, and, if so, why were they not pursued? What did the use of the A-bombs mean then and later? How have postwar interpreters explained, and justified or criticized, the A-bombings? Approaches from history, international relations, American studies, political science, and ethics address the underlying conceptions, the roles of evidence, the logic and models of explanation, ethical values, and cultural/social influences. GER:DB-SocSci

4-5 units, Spr (*Bernstein, B*)

HISTORY 90Q. Buddhist Political and Social Theory—Stanford Introductory Seminar. Preference to sophomores. Contemporary Buddhist political theory and its historical and textual roots, emphasizing Tibetan, Thai, and Sri Lankan Buddhism. Topics: society and polity in Buddhist thought, Buddhist spiritual practice as social and political practice, sovereignty, the individual and society, Buddhist economic theory and practice, Buddhism and the state, Buddhist political and social theory in practice, differences between Vajrayana (Tibetan) and Theravada (S.E. Asian) Buddhist social theory. GER:DB-SocSci, EC-GlobalCom

4-5 units, Aut (Mancall, M)

HISTORY 92N. Comparative Colonialism—Stanford Introductory Seminar. Preference to freshmen. The history of colonialism including the age of exploration, high imperialism, and decolonization. Focus is on encounters between colonizers and colonized in Asia, Africa, and Latin America. Topics include: early exploration and missionary activity; role of science, cartography, and medicine; processes of assimilation and discrimination; impact of exploitation and development; resistance and collaboration; relationship between colonial men and indigenous women; and decolonization and legacies of colonialism. GER:DB-Hum, EC-GlobalCom

5 units, Aut (Uchida, J)

COGNATE COURSES

CLASSGEN 20N. Mapping the Mediterranean

4-5 units, Aut (Parker, G)

CLASSHIS 22N. Ancient and Modern Slavery

3-5 units, Spr (Scheidt, W)

EDUC 94Q. Catastrophe as Curriculum: Teaching and Representing the Holocaust—(S,Dial)

1-2 units, Spr (Wineburg, S)

SOURCES AND METHODS SEMINARS

Sources and methods seminars introduce the processes of historical investigation and interpretation by providing experience in interpreting documents, constructing a coherent story from them, interpreting their implications, and discovering how it is possible to agree on facts while disagreeing on meaning.

HISTORY 22S. Pogroms: Ethnic Violence in Eastern Europe—What causes ethnic riots? Why did attempts to overthrow the Tsarist government lead to outbursts of antisemitic violence? The history of anti-Jewish violence in E. Europe, 1648-1945. Topics include the development of urban pogroms, antisemitism, Western perceptions, historical memory, Jewish responses, and the origins of Zionism. Memoirs, essays, short stories, and poems as historical sources.

5 units, Win (Koss, A)

HISTORY 31S. The Awful and Awesome Clock: The French and Time in the Nineteenth Century—French modifications in their relations to time including scientists embracing theories of evolution and relativity, politicians promising progress, and individuals entering a world of speed, efficiency, and anticipation. How the new outlooks on and organizations of time liberated and constrained people's lives and elicited mixed feelings toward modernity. Sources include scientific and political treatises, pamphlets, memoirs, tourist guides, advertisements, and literary and artistic media.

5 units, Spr (Chapin, E)

HISTORY 33S. Resistance in Hitler's Europe: History, Memory, Gender—What resistance entailed in Nazi-occupied Europe? What prompted some to resist while others accommodated the occupiers? What were the consequences of women's mass participation in underground activities and guerilla warfare? Europe's resistance movements and their postwar memorialization. Emphasis is on France, and S. and E. Europe. Sources include memoirs, diaries, speeches, newspaper articles, resistance circulars, propaganda, photographs, and film.

5 units, Win (Batinic, J)

HISTORY 36S. Representations of Violence in Europe, 1914-1962—How does war affect art and art affect war? How visual art, literature, and music function as observer or participant, critic or supporter, propaganda or resistance in conflicts from WW I to wars of decolonization. What genres and media reveal about politics, society, culture, ideas, and gender in war? Sources include fiction, memoirs, poetry, film, paintings, posters, and music. Artists include Wilfred Owen, George Orwell, Pablo Picasso, Dmitri Shostakovich, and Primo Levi.

5 units, Spr (Vanderpool, D)

HISTORY 37S. Alcohol, Drugs, and Sex in the British and French Empires, 1823 to the Present—The history of bodily pleasure in European empires. Why Europeans often linked their colonies with sensuality and excess and what this reveals about European cultures and societies. Sources include journals, novels, Parliamentary papers, official colonial legislative documents, paintings, films, and French hip-hop music, which feature alcohol, drugs, and non-Victorian sexual encounters.

5 units, Win (Zientek, A)

HISTORY 40S. Dinosaurs, Sea Serpents, and Abominable Snowmen: Unknown Animals in Modern History—What determines the certainty that dinosaurs once existed while lake monsters do not, and who determines this certainty? Focus is on case studies, including mastodons, sea serpents, the mountain gorilla, the Loch Ness monster, the yeti, and the Flores hobbit people. How studying these controversies helps historians to understand wider social and cultural patterns, and how people's perceptions of the animals are affected by historical circumstances.

5 units, Aut (Roberts, P)

HISTORY 42S. Climate Science in the 20th Century: A History—The scientific and political history of climate change from its 19th-century scientific origins to its 21st-century political complexities. Why, despite consensus among the scientific community that human activities are causing global warming, few measures have been taken to confront the problem. What enables climate change contrarians to keep the climate debate open?

5 units, Spr (Howe, J)

HISTORY 52S. The Ku Klux Klan and the Anti-Coolie League: Racist Movements in 19th-Century America—Anti-Black and anti-Chinese movements in the South and West. Why these movements arose; who participated; and how they affected the lives of Blacks and Chinese. Topics include racial anxieties, sexual fears, labor competition, legal and extra-legal violence, and unexpected intersections between the movements. Sources such as historical documents including congressional hearings transcripts, literature, political cartoons, newspapers, and court documents.

5 units, Spr (Lew, E)

HISTORY 53S. What Went Down on the Farm: Stanford Campus as a Laboratory for Environmental History—Environmental history is made from earth and trees, maps and dreams, plans and problems, and a world made and a world that might have been. The 8,400-acre Stanford campus and surrounding community from foothills to bay as laboratory, archives and venue for hands-on techniques to uncover the past, understand the present, and think about the future anywhere. Sources include archaeology, ecology, University business files, letters, photographs, trees, buildings, and the land.

5 units, Win (Christensen, J)

HISTORY 71S. Gender and Slavery in the Americas—How 18th- and 19th-century African slavery differed across the Americas and between men and women. How geographic location and gender norms impacted occupational classification, kinship networks, cultural expression, and acts of rebellion. Variation among the slave systems of N. America, the Caribbean, and Brazil. Gendered analysis.

5 units, Spr (Zimmerman, K)

HISTORY 86S. The Jews of Islam in Modern Times— Jewish communities of N. Africa, the Middle East, and S.E. Europe. Topics include culture, language, and identity, and their encounter with empire, westernization, and nationalism. Sources include memoirs, diaries, films, travelogues, press, correspondence, and contemporary histories.

5 units, Aut (*Danon, D*)

HISTORY 92S. Lives of the Samurai— The evolution of a military society in Japan. Focus is on the social institutions necessary to field a premodern army. Tactics and strategy, tools of warfare, social organization, status of women, and supporting economy. Interpretation of paintings, artifacts, maps, and translated excerpts from epic poems and legal documents. GER:DB-Hum

5 units, Aut (*Goldsmith, B*)

HISTORY 93S. Silk Road or Great Wall: Early Imperial China in Eurasia— Interactions between ancient Chinese empires and their neighboring peoples since the establishment of the first Chinese empire in 221 B.C.E. to the 9th century C.E. Themes include the imperial ideology of world order, imperial expansion and defense, diplomacy, transcontinental trade along the Silk Road, and the introduction of foreign religions such as Buddhism. Readings in English.

5 units, Win (*Hsieh, M*)

UNDERGRADUATE

Lecture courses (100-199) are surveys of geographical regions and time periods.

Colloquia (200-299) are small-group courses on historical themes, primarily for juniors and seniors majoring in history. Admission is by consent of the instructor. Courses with a suffix 'H' are for honors students only.

Undergraduate research seminars (200S-299S) provide opportunities to research and write a paper using primary sources.

Suffixes A,B,C,D indicate a course sequence. Unless otherwise stated, earlier courses are not prerequisites to later courses, and students need not take an entire sequence. Other letter suffixes, and numbers without suffixes, denote stand-alone courses

Undergraduate courses are listed in the following subsection order:

International, Global, and Thematic: 100-109, 200-209

Europe Survey: 110A,B,C

Ancient and Medieval Europe: 111-119, 211-219

Eastern Europe, Russia, and Eurasia: 120-129, 220-229

Early Modern and Modern Europe: 130-139, 230-239

History of Science and Technology: 140-144, 240-244

Africa: 145-149, 245-249

United States Survey: 150A,B,C

United States: 151-169, 251-269

Latin America: 170-179, 270-279

Middle East: 180-184, 280-284

Jewish History: 185-189, 285-289

Asia: 190-198, 290-298

Individual Work: 299

INTERNATIONAL, GLOBAL, AND THEMATIC

HISTORY 102. The History of the International System— World politics and international relations from the dominance of empires and nation states at the turn of the century to the present. The influence of communism, fascism, and anti-imperialism, and the emergence of society as a factor in international relations. Questions of sovereignty versus the new world order. GER:DB-SocSci, EC-GlobalCom, WIM

5 units, Spr (*Sheehan, J*)

HISTORY 103E. History of Nuclear Weapons— (Same as POLISCI 116.) The development of nuclear weapons and policies. How existing nuclear powers have managed their relations with each other. How nuclear war has been avoided so far and whether it can be avoided in the future. GER:DB-SocSci

5 units, Spr (*Holloway, D*)

HISTORY 106A. Global Human Geography: Asia and Africa— (Same as INTNLREL 161A.) Global patterns of demography, economic and social development, geopolitics, and cultural differentiation, covering E. Asia, S. Asia, S.E. Asia, Central Asia, N. Africa, and sub-Saharan Africa. Use of maps to depict geographical patterns and processes. GER:DB-SocSci

5 units, Aut (*Lewis, M*)

HISTORY 106B. Global Human Geography: Europe and Americas— (Same as INTNLREL 161B.) Patterns of demography, economic and social development, geopolitics, and cultural differentiation. Use of maps to depict geographical patterns and processes.

5 units, Win (*Lewis, M*)

HISTORY 107. Introduction to Feminist Studies— (Same as FEMST 101.) How gender inequality is created and perpetuated, and how feminist theory and movements respond to gender inequality. Topics: theories of inequality; history of feminism; international and multicultural perspectives on feminism; women's work, health, and sexuality; creativity; spirituality; and movements for social change. GER:DB-SocSci, EC-Gender

5 units, Aut (*Freedman, E*)

HISTORY 201. Public Service and History— Gateway course for the History and Public Service interdisciplinary track. How public service and the study of history are connected. Opportunities available to students in applying history to public service. Theory and practice of public service.

5 units, Win (*Camarillo, A*)

HISTORY 202. International History and International Relations Theory— (Same as 306E, POLISCI 316.) The relationship between history and political science as disciplines. Sources include studies by historians and political scientists on topics such as the origins of WW I, the role of nuclear weapons in international politics, the end of the Cold War, nongovernmental organizations in international relations, and change and continuity in the international system. GER:DB-SocSci

5 units, Win (*Holloway, D*)

HISTORY 203A. Theories of the State from the Ancient World to the Present— (Same as 303A.) The development and contemporary condition of thinking about the state. Philosophic, rhetorical, and historical contexts. Aristotle's Politics; early modern theorists such as Machiavelli, Hobbes, and Rousseau; transformations of the idea through the French Revolution by Sieyes and Hegel; and problematizations of the ideas in the last century by Schmidt and Foucault.

5 units, Win (*Baker, K; Sheehan, J*)

HISTORY 204E. Origins of Totalitarianism— Modern revolutionary and totalitarian politics. Sources include monographs on the medieval, Reformation, French Revolutionary, and Great War eras. Topics: the essence of modern ideology, the concept of the body national, state terror, charismatic leadership, gender assignments, private and public spheres, and identities. GER:DB-SocSci

5 units, not given this year (*Weiner, A*)

HISTORY 204G. War, Culture, and Society in the Modern Age

5 units, Aut (*Weiner, A*)

HISTORY 205. Historical Geography: Maps in the Early Modern World— (Same as 309F.) Historians have recently generated a body of spatially attuned work, probing territorial identities, human-environmental interaction, the use and misuse of maps, and the spatial patterning of social life. Focus is on cartography in the early modern period, and recent studies from Asian, European, and N. American contexts that highlight cartography's role in exploration, empire building, and boundary making in the early modern world. GER:DB-Hum

5 units, not given this year (*Wigen, K*)

HISTORY 205B. Quantitative Methods in Historical Research— (Same as 305B.) Latest techniques applied to research issues in current historical debates. Preparation of data, processing, statistical procedures to examine theoretical historical issues, and how to present quantitative materials in historical writing. Mathematical or statistical training not required.

5 units, Win (*Klein, H*)

HISTORY 206. History and Geography of Contemporary Global Issues—(Same as INTNLREL 163.) The historical background and geographical context of contemporary global issues and events. Texts are a world atlas and regular reading of *The New York Times* and *The Economist*. Topics vary according to what is happening in the world. Student presentations. GER:DB-SocSci, WIM
5 units, Spr (Lewis, M)

HISTORY 207. Biography and History—(Same as 308.) The relationship between biographical and historical writing, primarily in Europe and America. Problems of methodology, evidence, dispassion, and empathy. Texts: biographies, critical literature on biographical work, and novels (A. S. Byatt's *Possession*, Bernard Malamud's *Dubin's Lives*) that illuminate the intellectual underpinnings of biographical labor. GER:DB-Hum
5 units, not given this year (Zipperstein, S)

HISTORY 208. Private Lives, Public Stories: Autobiography in Women's History—Changing contexts of women's lives and how women's actions have shaped and responded to those contexts. GER:DB-Hum, EC-Gender
5 units, not given this year (Lougee Chappell, C)

HISTORY 209. Identify Yourself: Practices of Individual and Collective Identification in the Modern World—Transnational perspective. Changes in how modern states register the individual and collective identities of their people. Censuses, passports, national ID cards, and other demographic technologies as deployed by modern states to emancipatory ends such as political representation, and coercive end such as taxation, surveillance, and state-sanctioned genocide.
5 units, Win (Mullaney, T)

COGNATE COURSES

CLASSHIS 150. Ancient Greece in the Modern West: History, Politics, and Classics
3-5 units, Aut (Ceserani, G)

POLISCI 130A. History of Political Thought I—(Same as CLASSHIS 133/333, POLISCI 330A.)
5 units, Win (Staff)

POLISCI 130B. History of Political Thought II: Early Modern Political Thought, 1500-1700—(Same as POLISCI 330B.)
5 units, not given this year

POLISCI 130C. History of Political Thought III: Freedom, Reason, and Power—(Same as POLISCI 330C.)
5 units, Spr (Stone, P)

EUROPE SURVEY

HISTORY 110A. Europe from Late Antiquity to 1500—Focus is on religion and politics. Issues include: the rise of Christianity and its impact on Rome; transformations of Catholicism and its institutions including the impact of barbarian tribes and the struggle between church and state; antisemitism, heresy, Crusades, and inquisition; courtly love; and scholasticism. GER:DB-Hum, WIM
5 units, Aut (Buc, P)

HISTORY 110B. Machiavellian Moments: Europe's History, 1492-1793—Survey of the intellectual and social currents from the voyages of Columbus to the French Revolution. GER:DB-SocSci, EC-GlobalCom
5 units, not given this year

HISTORY 110C. Introduction to Modern Europe—The main lines of European history from the French Revolution through the post-WW II era. How Europeans coped with an increasingly democratic politics and technological and economic changes. Readings focus on writers from the period such as Tocqueville, Nietzsche, Gosse, and de Beauvoir. Cultural resources that Europeans had for responding to social changes. GER:DB-Hum
5 units, Aut (Daughton, J)

ANCIENT AND MEDIEVAL EUROPE

HISTORY 117. Crescent or Cross? Christianity and Islam in the Medieval Mediterranean—GER:DB-Hum
5 units, not given this year (Miller, K)

HISTORY 212. Holy Wars: Medieval Perspectives—(Same as 312.) Cultural and societal factors at play in Christian holy war from Late Antiquity to the Early Modern Era. Topics include: the Crusades and their meanings; armed struggle against heresy; and the wars of religion. Prerequisite: consent of instructor
5 units, Spr (Buc, P)

HISTORY 216. Medieval Antisemitism—(Same as 316.) The religions based on the New Testament, by virtue of having an old to which to refer the new, entertain a complicated relationship with Judaism. Focus is on the relationship of Christianity to Judaism and Jews under Christian rule during the formative medieval centuries. The formation of anti-Semitism as a factor both in this interaction and the self-identity of Christian communities. The connections between medieval anti-Semitism and modern forms of racism. GER:DB-SocSci
5 units, not given this year (Buc, P)

HISTORY 217B. Spain in the Middle Ages: Islam, Judaism, and Christianity in Coexistence and Conflict—(Same as 317B.) The history of the Iberian peninsula from the Visigothic rulers of the 6th century to the unification of Castile and Aragon under the Catholic Monarchs in the 15th. The dynamics of Christianity-Muslim-Jewish interrelations. Topics include identity and cultural definition, religious violence, tolerance and intolerance, political structures, and gender and sexuality.
5 units, Win (Staff)

COGNATE COURSES

CLASSGEN 102. The River Nile: Ancient Representations of the River

EASTERN EUROPE, RUSSIA, AND EURASIA

See also 20N, 22S, and 204G.

HISTORY 120A. Russia, 988-1762—Culture, politics, and society from the beginnings to Catherine the Great. Orthodox Christianity; Vikings in Kievan Rus; the principality of Moscow and the Muscovite political system; church-state relations; the 15th-16th century Muscovite cultural synthesis in art and architecture and the shattering of that synthesis in the 17th century; the 17th-century schism in the church; cultural revolution and W. European elements under Peter the Great; Moscow versus St. Petersburg, or traditional versus westernized Russia; rise of serfdom; Catherine the Great as enlightened despot. GER:DB-Hum, EC-GlobalCom

4-5 units, not given this year

HISTORY 120B. History of Imperial Russia—From the reign of Catherine the Great to the collapse of the monarchy in war and revolution in 1917. Themes include the ruling strategies of the Romanov dynasty, noble culture, serfdom, the expansion of the empire into Europe and Asia, the intelligentsia and radical movements, industrialization and urbanization, the geopolitics of Eurasia, and the challenges of nationalism and other revolutionary ideologies to autocratic Russia as a multi-religious and multi-ethnic empire. Novels, memoirs, visual images, music, architecture, and other primary sources. GER:DB-Hum

5 units, not given this year (Crews, R)

HISTORY 120C. 20th-Century Russian and Soviet History—The Soviet polity from the 1917 Revolution to its collapse in 1991. Essentials of Marxist ideology; the Russian Empire in 1917. Causation in history; interpretations of the Revolution; state building in a socialist polity; social engineering through collectivization of agriculture, force-paced industrialization, and cultural revolution; terror as concept and practice; nationality policies in a multiethnic socialist empire; the routinization, decline, and collapse of the revolutionary ethos; and the legacy of the Soviet experiment in the new Russia. GER:DB-Hum

5 units, Aut (Patenaude, B)

HISTORY 122. Aristocracies and Absolutism: Early Modern Eastern Europe, 1400-1800—The societies and culture of E. Europe (Belarusia, Bohemia, Hungary, Poland, Ukraine) in the late medieval and early modern periods. The conflict of aristocratic parliamentary governments with absolutist states (Austria-Hungary, Prussia, Russia). E. Europe's development is contrasted to the Russian historical experience. GER:DB-SocSci

5 units, Aut (Kollmann, N)

HISTORY 125. 20th-Century Eastern Europe—Major historical trends in 20th-century E. European history. Empires and national movements. The creation of independent Eastern Europe after WWI; social movements and the emergence of dictatorships and fascism in the inter-war period. WW II, Stalinism, and destalinization in contemporary E. Europe. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Jolluck, K)

HISTORY 126. History of the Balkans, 1804 to the Present—Topics include: the central role of nationalism in shaping relations among Balkan peoples and with foreign powers; struggles for independence from Ottoman and Habsburg imperial rule, culminating in the Balkan Wars of 1912-13; WWI; interwar fascist movements; the civil war between collaboration and resistance movements and genocide during WWII; communist period; and post-communist transition. Focus is on war, emphasizing war against civilians through ethnic cleansing and genocide, and women in warfare. Sources include historical and imaginative literature and film.

5 units, Spr (Knezevic, J)

HISTORY 220G. Demons, Witches, and Priests: Religion and Popular Culture in Russia—(Same as 320G.) 19th and early 20th centuries. Peasants, parish priests, witches, possessed persons, cults and sects, old believers, saints, and women's religious communities. Nominally Christian, and members of the Orthodox Church, Russians embraced beliefs and customs that combined teaching from Church and folk traditions.

5 units, Aut (Kollmann, J)

HISTORY 221A. Men, Women, and Power in Early Modern Russia, 1500-1800—Social values, gender relations, and social change in an era of rapid change; challenges to established norms by new constructions of deviance (witchcraft, religious reform, and revolt) and standards of civility; encounters with non-Russians and the construction of national consciousness. Social values as political ethos: patrimonial autocracy and the reality of female rule in the late 17th and 18th century. GER:DB-Hum, EC-Gender, WIM

5 units, Win (Kollmann, N)

HISTORY 221B. The Woman Question in Modern Russia—Russian radicals believed that the status of women provided the measure of freedom in a society and argued for the extension of rights to women as a basic principle of social progress. The social status and cultural representations of Russian women from the mid-19th century to the present. The arguments and actions of those who fought for women's emancipation in the 19th century, theories and policies of the Bolsheviks, and the reality of women's lives under them. How the status of women today reflects on the measure of freedom in post-Communist Russia. GER:DB-SocSci, EC-Gender

5 units, Aut (Jolluck, K)

HISTORY 221C. Love, Marriage, and Family in Early Modern Europe and Russia—Family structures, marriage customs, and the place of love in life and marriage in the early modern period. Sources include W. Europe (France, England, Germany, Italy), central Europe (Poland) and Russia, providing for sharp contrasts in the status of women, the nature of marriage, and emergence of private life. Readings include historical monographs and primary sources including dowry agreements, litigations, Reformation tracts, and memoirs. GER:DB-Hum, EC-Gender

5 units, not given this year (Kollmann, N)

HISTORY 221D. Women's Activism in War and Peace—(Same as 321D.) Theoretical issues, historical origins, changing forms of women's activism in response to war throughout the 20th century, and contemporary cases, such as the Russian Committee of Soldiers Mothers, Bosnian Mothers of Srebrenica, Serbian Women in Black, and the American Cindy Sheehan. Focus is on the U.S. and Eastern Europe, with attention to Israel, England, and Argentina.

5 units, Spr (Jolluck, K)

HISTORY 222. Honor, Law, and Modernity—How Europe evolved from medieval to modern; focus is on standards for conflict resolution emphasizing insults to honor. How attitudes towards the self and society, and the state's relationship to individuals, changed from the 16th to 18th centuries in Europe and Russia. Traditional concepts of honor and patterns of settling disputes contrasted to early modern concepts of honor, private life, civility, and crime and punishment. GER:DB-Hum

5 units, not given this year (Kollmann, N)

HISTORY 223. Art and Ideas in 19th-Century Russia—(Same as 323.) Why did so many artistic, intellectual, and revolutionary figures including Pushkin, Tolstoy, Dostoevsky, Mussorgsky, Tchaikovsky, and Lenin emerge from autocratic imperial Russia? How did the czarist state and society shape their work? Focus is on Russia's cultural engagement with Europe and Asia through literature, music, painting, architecture, and political thought. Controversies in 19th-century thought and culture surrounding conservatism, Westernization, Slavophilism, socialism, nihilism, populism, revolutionary terrorism, empire, anti-Semitism, national identity, and revolutionary change. GER:DB-Hum

5 units, not given this year (Crews, R)

HISTORY 224. Violence, Islam, and the State in Central Asia—(Same as 324.) The uses of violence in projects of empire and national state formation that have competed with Islamic and other political alternatives to shape modern Central Asia from the British and Russian imperial eras through the flight of the Taliban. Shared experiences and geopolitics of the former Soviet republics and Afghanistan. Themes include colonial wars and imperial competition, state formation, mass mobilization, women's emancipation, cultural revolution, developmentalism, anti-Soviet jihad, the Taliban movement, and contemporary Islamist, nationalist, and regionalist contests for the state. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year (Crews, R)

HISTORY 224A. Modern Russia, Iran, and Afghanistan—1800 to the present. The history of interactions between Russia and its Muslim neighbors, and how events in Iran and Afghanistan shaped Russia and the surrounding region. Russian expansion, competition for the Caucasus and the Caspian regions, state modernization, socialist revolutions, the Islamic Republic, the Taliban, and the post-9/11 contest for hegemony in the Caucasus, the Middle East, and Central Asia.

5 units, Aut (Crews, R)

HISTORY 225. Class and Ethnicity in Modern Eurasia—(Same as 325.) Class and ethnicity in the shaping of the political, social, religious and cultural landscape. The decline and collapse of the Habsburg and Russian Empires; the emergence of national states and multinational unions such as the USSR, the EU, and the CIS; contested borderlands and sovereignty; and the impact of revolutionary regimes and movements.

5 units, Spr (Weiner, A; Crews, R)

HISTORY 226E. The Creation and Destruction of Yugoslavia—From the genesis of the Yugoslav idea in the 19th century to the Balkan wars of the 90s: formation of the Yugoslav kingdom during WW I, Yugoslavism, disintegration during WW II occupation, collaboration and resistance movements, the Communist revolution, the Tito-Stalin split, life in socialist Yugoslavia, dissent within Tito's regime, the rise of nationalism in socialist Yugoslavia, and the disintegration of Yugoslavia and ethnic cleansing and genocide in the Balkan Wars of the 90s.

5 units, Aut (Knezevic, J)

HISTORY 226G. Civilians and War in Modern Europe—(Same as 326G.) From the French Revolution to the present, including the French Revolutionary wars, the Franco-Prussian War, the Balkan wars of 1912-13, WW I and II, the Spanish Civil War, fascist and communist totalitarian regimes, and the Balkan wars of the 90s. Civilians as participants, victims, and bystanders under various conditions of war, including the mobilization of society for total war, occupation, siege, collaboration and resistance, ethnic cleansing, and genocide.

5 units, Win (Knezevic, J)

HISTORY 226H. Nationalism in the Habsburg Empire, 1848-1918—(Same as 326H.) Was nationalism responsible for the demise of the Habsburg Empire? Works on nationalism by Benedict Anderson, Miroslav Hroch, Ernst Gellner, and Rogers Brubaker. The genesis and growth of national movements in the Empire, especially the Czechs, Hungarians, Romanians, and South Slavs, and the challenges they posed to Habsburg rule. Effects of national movements on German minorities and Jews. How the Habsburg monarchy adapted to preserve itself in the face of the nationalist challenge.

5 units, Spr (Knezevic, J)

HISTORY 227. East European Women and War in the 20th Century—(Same as 327.) Thematic chronological approach through conflicts in the region: the Balkan Wars, WW I, WW II, and the recent wars in the former Yugoslavia. The way women in E. Europe have been involved in and affected by these wars compared to women in W. Europe in the two world wars. Women's involvement in war as members of the military services, the backbone of underground movements, workers in war industries, mothers of soldiers, subjects and supporters of war aims and propaganda, activists in peace movements, and objects of wartime destruction, dislocation, and sexual violation. GER:DB-SocSci, EC-Gender

5 units, not given this year (Jolluck, K)

HISTORY 228. Circles of Hell: Poland in World War II—(Same as 328.) The experience and representation of Poland's wartime history from the Nazi-Soviet Pact of 1939 to the aftermath of Yalta in 1945. Nazi and Soviet ideology and practice regarding the Poles and the ways Poles responded, resisted, and survived. The self-characterization of Poles as innocent victims, and their involvement or complicity in the Holocaust, thus engaging in a current debate in Polish society. GER:DB-SocSci

5 units, not given this year (Jolluck, K)

HISTORY 229. Poles and Jews—(Same as 329.) Focus is on the period since WW I. The place of the Jews in interwar Poland, WW II, surviving Jews after the war, Polish memorialization of the Holocaust, the reality and mythology of Jews in the communist apparatus, the manipulation of anti-Semitism by the communist government, and post-communist movement toward reconciliation. Memory and national mythology emphasizing Polish wartime behavior and the relationship of Jews to communism. The sources and uses of stereotypes, and the state of Polish-Jewish relations today. GER:DB-Hum

HISTORY 133A. Yorkist and Tudor England—English society and state from the Wars of the Roses to the death of Elizabeth. Political, social, and cultural upheavals of the Tudor period and the changes wrought by the Reformation. The establishment of the Tudor monarchy; destruction of the Catholic church; rise of Puritanism; and 16th-century social and economic changes. GER:DB-Hum

5 units, Aut (Como, D)

HISTORY 133B. Revolutionary England: The Stuart Age—From the accession of King James I in 1603 to the death of Queen Anne in 1714: a brutal civil war, the execution of one anointed king, and the deposition of another. Topics include the causes and consequences of the English Revolution, the origins of Anglo-American democratic thought, the rise and decline of Puritanism, and the emergence of England as an economic and colonial power. GER:DB-Hum

5 units, not given this year (Como, D)

HISTORY 135. History of European Law, Medieval to Contemporary—(Same as HISTORY 335.) From the fall of the Roman Empire to the establishment of the EU. How law changed over time. Sources and nature of law, organization of legal systems, and relationships between law and society, law and lawmaker, law and the legal professions.

5 units, Win (Herzog, T)

HISTORY 136A. European Thought and Culture in the 19th Century—Major European thinkers and intellectual movements from the Enlightenment to Modernism. Readings include Matthew Arnold, Jane Austen, Karl Marx, John Stuart Mill, Friedrich Nietzsche, Emile Zola. GER:DB-Hum, EC-GlobalCom

5 units, not given this year (Robinson, P)

HISTORY 136B. European Thought and Culture in the 20th Century—European thinkers and intellectual movements from Freud to Foucault. GER:DB-Hum

5 units, Spr (Robinson, P)

HISTORY 136D. European Intellectual History: Culture and Society, 1750-1860—The principal intellectual and cultural movements of the Enlightenment, Romantic, and liberal-bourgeois periods in Western European society. The interplay of political and economic thought, literature and art, and philosophy and social critique in the shaping of the modern concepts of individualism, the state, artistic expression, and social order. Authors include Voltaire, Rousseau, Stendhal, Kant, Goethe, Hegel, Marx, Mill, and Flaubert.

5 units, Aut (Oberle, E)

HISTORY 137. The Holocaust—The emergence of modern racism and radical anti-Semitism. The Nazi rise to power and the Jews. Anti-Semitic legislation in the 30s. WW II and the beginning of mass killings in the East. Deportations and ghettos. The mass extermination of European Jewry. GER:DB-Hum

5 units, Win (Staff)

HISTORY 139. Modern Britain and the Empire—From American Independence to the latest war in Iraq. Topics include: the rise of the modern British state and economy; imperial expansion and contraction; the formation of class, gender, and national identities; mass culture and politics; the world wars; and contemporary racial politics. Focus is on questions of decline, the fortunes and contradictions of British liberalism in an era of imperialism, and the weight of the past in contemporary Britain. GER:DB-Hum

5 units, Win (*Satia, P*)

HISTORY 213D. British Cultural History, 1851-1951—Colloquium. How Britain redefined itself as a nation and empire during a century that began with a promise of plenty, saw the growth of mass consumption, and ended in an age of austerity. Material, literary, and visual culture; gender; violence; crime; consumption; and the transformations of total war. GER:DB-Hum

5 units, not given this year (*Satia, P*)

HISTORY 232F. The Scientific Revolution—What do people know and how do they know it? What counts as scientific knowledge? In the 16th and 17th centuries, understanding the nature of knowledge engaged the attention of individuals and institutions including Copernicus, Galileo, Descartes and Newton, the early Royal Society, and less well-known contemporaries. The new meanings in this period of observing, collecting, experimenting, and philosophizing and the ramifications in relationship to the political, religious, and cultural events of early modern Europe. GER:DB-Hum

5 units, not given this year (*Findlen, P*)

HISTORY 232G. When Worlds Collide: The Trial of Galileo—(Same as 332G.) Gateway course for History of Science and Medicine track. The 1633 condemnation by the Catholic Church of Galileo for believing the sun to be the center of the universe, and its 1992 admission that Galileo was right. What do these events reveal about the relationship between science and religion? Why has the Galileo affair been one of the most discussed episodes in Italian history and the history of science? Documents from Galileo's life and trial and related literature on Renaissance Italy. Historians' interpretations of the trial in relation to its documentation. GER:DB-Hum, WIM

5 units, Spr (*Findlen, P*)

HISTORY 233C. Two British Revolutions—(Same as 333C.) Current scholarship on Britain, 1640-1700, focusing on political and religious history. Topics include: causes and consequences of the English civil war and revolution; rise and fall of revolutionary Puritanism; the Restoration; popular politics in the late 17th century; changing contours of religious life; the crisis leading to the Glorious Revolution; and the new order that emerged after the deposing of James II.

5 units, Win (*Como, D*)

HISTORY 233F. Political Thought in Early Modern Britain—1500 to 1700. Theorists include Hobbes, Locke, Harrington, the Levellers, and lesser known writers and schools. Foundational ideas and problems underlying modern British and American political thought and life. GER:DB-Hum

5 units, Spr (*Como, D*)

HISTORY 234. Paris and Politics, 1600-2006—The emergence of the modern city of lights. Paris as a mirror of French politics: top down, capital to country, center to periphery, noble to bourgeois to people. Sources include maps, art, music, essays, and memoirs.

5 units, not given this year (*Lougee Chappell, C*)

HISTORY 236. The Ethics of Imperialism—How the 19th century, defined by liberty, equality, progress, and universal human ideals, also witnessed Europe's colonial expansion; how Europeans justified the acquisition of territories and colonial subjects. The ethical underpinnings of empire. Focus is on primary source material. Case study on the settlement of Australia; how European ideals justified inequality, violence, and genocide. The breakdown of liberal justifications of imperialism and shifts in support for empire. The modern human rights movement and the legacy of imperialism. The ethics of contemporary globalization and American imperialism. GER:DB-Hum

5 units, not given this year (*Daughton, J*)

HISTORY 236E. Cultures of Violence in Twentieth-Century Europe—(Same as 336E.) Political, social, and cultural factors that made the 20th century the most violent in history; the triumph of European civilization and an age of catastrophe. The social and political uses of and intellectual and cultural responses to violence. How people witnessed, coped with, survived, and remembered violent episodes. State violence, and political, ethnic, and religious conflict. Topics include: colonialist violence, the WW I and II, the Holocaust, the Russian Revolution and Stalinism, decolonization, the IRA, and the former Yugoslavia. GER:DB-SocSci

5 units, not given this year (*Daughton, J*)

HISTORY 239D. Capital and Empire—(Same as 339D, HUMNTIES 191S.) Can empire be justified with balance sheets of imperial crimes and boons, a calculus of racism versus railroads? The political economy of empire through its intellectual history from Adam Smith to the present; the history of imperial corporations from the East India Company to Walmart; the role of consumerism; the formation of the global economy; and the relationship between empire and the theory and practice of development.

5 units, Spr (*Satia, P*)

HISTORY 239E. History and the Arts in 20th-Century Britain—Novels, poetry, buildings, images, and music. The works in themselves and what they reveal about the society that produced them. Emphasis is on Bill Brandt's photographs. GER:DB-Hum, WIM

5 units, Aut (*Stansky, P*)

HISTORY 239F. Empire and Information—(Same as 339F.) How do states see? How do they know what they know about their subjects, citizens, economies, and geographies? How does that knowledge shape society, politics, identity, freedom, and modernity? Focus is on the British imperial state activities in S. Asia and Britain: surveillance technologies and information-gathering systems, including mapping, statistics, cultural schemata, and intelligence systems, to render geographies and social bodies legible, visible, and governable. GER:DB-Hum, EC-GlobalCom

5 units, not given this year (Bernstein, B)

HISTORY 252G. Environmental History of Urban America—(Same as 352G.) The American city's roots in nature; how environment, ideas of nature, and cities have shaped each other. Topics include: early reactions to urbanization and industrialization; relationships between cities and hinterlands; creation of parks and suburbs; challenges posed by pollution, public health, and environmental justice; and consequences of contemporary urban sprawl. GER:DB-Hum
5 units, Aut (Rawson, M)

HISTORY 254. Popular Culture and American Nature—Despite John Muir, Aldo Leopold, and Rachel Carson, it is arguable that the Disney studios have more to do with molding popular attitudes toward the natural world than politicians, ecologists, and activists. Disney as the central figure in the 20th-century American creation of nature. How Disney, the products of his studio, and other primary and secondary texts see environmentalism, science, popular culture, and their interrelationships. GER:DB-Hum
5 units, not given this year (White, R)

HISTORY 255. Martin Luther King, Jr.: The Social Gospel and the Struggle for Justice—The religious and political thought of Martin Luther King, Jr., using the documentary resources of the King Institute at Stanford. His social gospel Christianity and prophetic message of radical social transformation. Readings include the forthcoming *The Papers of Martin Luther King, Jr., Volume VI: Advocate of the Social Gospel*.
5 units, Aut (Carson, C)

HISTORY 256. U.S.-China Relations: From the Opium War to Tiananmen—(Same as 356.) The history of turbulent relations, military conflict, and cultural clashes between the U.S. and China, and the implications for the domestic lives of these increasingly interconnected countries. Diplomatic, political, social, cultural, and military themes from early contact to the recent past. GER:DB-SocSci, EC-GlobalCom, WIM
5 units, Win (Chang, G)

HISTORY 257. The Politics and Ethics of Modern Science and Technology—The WW II decision to build and use the atomic bomb. The controversy over the H-bomb. The Oppenheimer loyalty-security case and the relationship of scientist to the state. Medical experimentation on humans and pitfalls of technology. Relations among science, technology, and university. GER:DB-Hum
5 units, not given this year (Bernstein, B)

HISTORY 258. History of Sexuality in the U.S.—(Formerly 265A; same as 358.) Priority to History and Feminist Studies majors; a limited number of graduate students may be admitted. Readings on the social construction of sexuality, primarily U.S., in the 19th and 20th centuries. Topics: reproduction, sexual identities, and race and sexuality. Prerequisite: consent of instructor. GER:DB-SocSci, EC-Gender
5 units, Spr (Freedman, E)

HISTORY 259A,B. Poverty and Homelessness in America—Student internship with the Emergency Housing Consortium, the primary agency providing shelter for homeless people in Santa Clara and San Mateo counties. Prerequisite: interview with instructor. GER:DB-SocSci
A: 5 units, B: 3 units, not given this year (Camarillo, A)

HISTORY 260. Race and Ethnicity in the American Metropolis: A Case Study of Los Angeles—Contemporary history of ethnic and racial groups in urban America. Historical and social science literature focusing on groups in the Los Angeles area. Topics include immigration, poverty, education, demographic changes, political participation, conflict and cooperation, and cultural life in the modern, multicultural metropolis. GER:DB-SocSci, EC-AmerCul, WIM
5 units, Spr (Camarillo, A)

HISTORY 264. California History—The myths and realities about California's past, focusing on the 20th century. The origins of California's diverse society. Social, political, economic, demographic, and cultural dimensions of the state's history. GER:DB-SocSci

5 units, not given this year (*Camarillo, A*)

HISTORY 265. New Research in Asian American History—(Same as 365.) Narrative material and methodologies. Newly published studies in history and related disciplines. Possible research work. Recommended: exposure to Asian American studies. GER:DB-SocSci, EC-AmerCul

5 units, not given this year (*Chang, G*)

HISTORY 267E. The Suburban West—(Same as 367F.) How and why the Western U.S. suburbanized after WW II. The political, technological, cultural, and environmental effects of this transformation. Topics include the role of the Cold War defense complex, construction of the highway system and the rise of automobile culture, water and land use policy, architecture and planning of suburbs, and the effect of suburbanization on national politics. GER:DB-SocSci

5 units, not given this year (*O'Mara, M*)

HISTORY 267F. Cities in the North American West, 1840-1940—Political, social, economic, and environmental forces shaping development of the major metropolitan areas of the Rocky Mountain and Pacific from Mexican pueblos to Gold Rush boomtowns to shipping capitals and military metropolises. Comparison with cities in other regions of the U.S. Topics include immigration and migration patterns, local politics, architecture and city planning, urban infrastructure, and relationships to the natural environment. GER:DB-SocSci

4-5 units, not given this year (*O'Mara, M*)

HISTORY 268. The Other Wests—GER:DB-Hum

5 units, not given this year (*White, R*)

HISTORY 268D. The American West in Fiction and Film—(Same as 368D.) The American West as an enduring myth that continues to shape American identity today. The evolution of the imagined West through classic fiction and film that helped to create and popularize the myth. Topics include: the significance of the frontier; the western hero; the landscape of the West; and the construction of gender and race.

5 units, Aut (*Rawson, M*)

HISTORY 268E. Politics and Politicians in the American West—(Same as 367G.) Elected officials from Western states including Leland Stanford, Lyndon Johnson, Barry Goldwater, and Arnold Schwarzenegger as dominant figures on the national political stage. Political biography as a tool to survey the political history of the West from the Gilded Age to the present. The social, economic, and environmental characteristics of the West that shaped the careers of these politicians, and the effect of Western political culture upon national electoral politics and policy.

5 units, not given this year (*O'Mara, M*)

HISTORY 268F. U.S. National Parks: History, Policy, and Context

4 units, Win (*Kennedy, R*)

HISTORY 269G. History of the Native American West—From pre-contact to the present. The diversity of native communities, their histories prior to contact, and their economic and cultural exchanges with newcomers. Challenges and questions associated with researching and writing ethnohistory. Topics include the impact of disease, the fur trade, intermarriage, violence, urban migrations, museum displays, the American Indian Movement, and contemporary issues confronting native peoples.

4-5 units, Win (*Wadewitz, L*)

HISTORY 269H. Burgers, Fries, and Fruit Pies: How the West Fed America—Types of foods produced in the West and related social, economic, cultural, and environmental issues. Changing production processes and the workforces involved, work conditions, trade issues, and the evolution of regulatory controls. Cattle ranching, meat packing, agriculture, fishing, and fish farms.

4-5 units, Spr (*Wadewitz, L*)

HISTORY 276G. Demographic History of the U.S.—(Same as 376G.) From the pre-Colombian period to the present. Trends in fertility, mortality, migration, marriage, family, and racial and ethnic composition. Urbanization, suburbanization, and internal and international migration. The influence of class, race, gender, and ethnicity. GER:DB-SocSci

5 units, not given this year (*Klein, H*)

LATIN AMERICA

See also 70 and 71S.

HISTORY 273. The European Expansion—The relationship between European monarchies and their colonial domains from the 16th-18th centuries. Reasons for expansion, methods, and results. Case studies include the Spanish, Portuguese, Dutch, French, and English domains in Africa, Asia, and the Americas. Readings include primary and secondary sources.

5 units, not given this year (*Herzog, T*)

HISTORY 273A. The Comparative Histories of the Hispanic Caribbean—(Same as 373A.) Cuba, the Dominican Republic, and Puerto Rico from the colonial period through the present. Social, economic, political, cultural, and demographic transformations in comparative perspective.

5 units, Aut (*Staff*)

HISTORY 275. Slavery in the Americas—(Same as 375.) Recent research and debate on the economy and demography of slavery, and the nature of slave life and culture. Focus is on Brazil, Cuba, and the U.S. in the 19th century. Readings from principal scholars in the field.

5 units, Aut (*Staff*)

HISTORY 275F. Social Change in Latin America Since 1900—(Same as 375F, LATINAM 201/301.) Changes in the social and demographic characteristics of Latin American populations since 1900 and the response of national governments in terms of the evolution of social welfare, health, and educational systems. Fulfills requirement for Latin American Studies honors seminar. Required core course for Latin American Studies master's students. GER:DB-SocSci

5 units, Win (*Klein, H*)

HISTORY 276. Modern Brazil—(Same as 376.) From independence in 1822 to the present. Social and cultural history. Literary and historical sources.

5 units, Win (Frank, Z)

HISTORY 277F. Marranos, Conversos, and Crypto-Jews in Latin America, 16th-20th Centuries—(Same as 377F.) Sources include cases brought before the Spanish and Portuguese inquisitions in the Old and New World from the 16th-18th centuries, and results of field work conducted in contemporary Brazil among present-day Marranos. Marranism and the emergence of modernity in the West. The roles of history in anthropology and anthropology in history.

5 units, Win (Staff)

HISTORY 277H. Political Citizenship and the Formation of the Latin American Republics—(Same as 377H.) Construction of public opinion; development of public spheres; debates on education, ethnicity, and taxation; and the figure of the citizen in arms and role of militias in the polity. Comparisons with other areas of the world.

5 units, Spr (Staff)

HISTORY 278. Problems of Governance and Economic Growth in Mexico: From the Aztecs to NAFTA—Political and economic institutions of Mexico. Emphasis is on the origins and economic consequences of authoritarianism. GER:DB-SocSci

5 units, not given this year (Haber, S)

HISTORY 278A. Logic of Authoritarian Government—(Same as 378A, POLISCI 346S.) If authoritarianism is less economically efficient than democracy, and if authoritarianism is a less stable form of political organization than democracy, then why are there more authoritarian governments than democracies? To address this paradox, focus is on theoretical and empirical literature on authoritarian governments, and related literatures on the microeconomic analysis of property rights and credible commitments.

5 units, Win (Haber, S)

HISTORY 279. Latin American Development: Economy and Society, 1800-2000—(Same as 379.) The newly independent nations of Latin America began the 19th century with economies roughly equal to, or even ahead of, the U.S. and Canada. What explains the economic gap that developed since 1900? Why are some Latin American nations rich and others poor? Marxist, dependency, neoclassical, and institutionalist interpretive frameworks. The effects of globalization on Latin American economic growth, autonomy, and potential for social justice. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year (Frank, Z)

MIDDLE EAST

See also 224A and IHUM 5A,B.

HISTORY 181B. The Middle East in the 20th Century—Formerly 187B.) The history of the Middle East since WWI, focusing on the eastern Arab world, Egypt, the Fertile Crescent, and the Arabian Peninsula (the *mashriq*), with some attention to Turkey, Iran, and Israel. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Weiss, M)

HISTORY 181C. Social and Cultural History of Modern Shi'ism—The influence of Shi'ism in colonial and postcolonial Middle Eastern countries such as Iran, Iraq, Lebanon, and Saudi Arabia. Survey of Islamic history and the doctrinal differences among Muslim sects.

5 units, Win (Staff)

HISTORY 281. Economic and Social History of the Modern Middle East—(Same as 381.) The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market are combined with possible case studies of Egypt, Iraq, and Palestine. GER:DB-SocSci

4-5 units, not given this year (Beinin, J)

HISTORY 284G. Crisis, Reform, and Statebuilding in the 19th-Century Ottoman Empire—Central moments and processes. Established views of the sick man of Europe, and recent studies of how 18th-century crises did not lead to terminal decline but to reforms that strengthened key realms of Ottoman state and society and paved the way for post-WWI changes in emerging Middle Eastern and Balkans states. Sources include historical monographs, primary sources, and historical fiction.

5 units, Aut (Downes, B)

JEWISH HISTORY

See also 22S, 86S, 137, 229, and 277F.

HISTORY 185B. Jews in the Modern World—Possible themes: the restructuring of Jewish existence during the Enlightenment and legal emancipation at the end of the 18th century in W. Europe, the transformation of Jewish life in E. Europe under the authoritarian Russian regime, colonialism in the Sephardic world, new ideologies (Reform Judaism and Jewish nationalisms), the persistence and renewal of anti-semitism, the destruction of European Jewry under the Nazis, new Jewish centers in the U.S., and the State of Israel. GER:DB-Hum, EC-GlobalCom

5 units, Spr (Zipperstein, S)

HISTORY 285E. Tradition in Crisis: Orthodox Judaism in Modern Times—(Same as 385E.) The recent resurgence of Orthodoxy, once thought to be a dying trend in Judaism. How Orthodoxy developed new ways to meet the challenge of modern times. Mid-18th century to the present.

5 units, Aut (Staff)

HISTORY 286. Jews and Muslims—(Same as 386.) The history of Jewish communities in the lands of Islam and their relations with the surrounding Muslim populations from the time of Muhammad to the 20th century. Topics: the place of Jews in Muslim societies, Jewish communal life, variation in the experience of communities in different Muslim lands, the impact of the West in the Modern period, the rise of nationalisms, and the end of Jewish life in Muslim countries. GER:DB-Hum

5 units, not given this year (Rodrigue, A)

HISTORY 287E. The Transformation of Central European Jewry: Germany and Austria-Hungary, 1700-1880—(Same as 387E.) The history of the Jews of the Habsburg Empire who constituted the second largest Jewish community in Europe in the modern era. Topics include: Habsburg Jewish modernization that distinguished it from its neighbors to the west such as Germany and France and to the east such as the Russian Empire; political, social, and cultural problems; court Jews; the enlightened absolutism of Joseph II; unique aspects of Habsburg Haskala, Reform, and Orthodoxy; the revolutions of 1848; religious schisms; the economic rise of Habsburg Jewry; and the metropolitan Jewries of Vienna and Budapest.

5 units, Aut (Staff)

COGNATE COURSES

RELIGST 264. Hasidism and Modernity

4 units, Win (Staff)

ASIA

See also 92A,B, 92S, and 93S.

HISTORY 191. East Asia in the Early Buddhist Age—Evolution of cities in imperial China through early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative examination of cases from European history. GER:DB-Hum, EC-GlobalCom

5 units, Win (Lewis, ME)

HISTORY 193. Late Imperial China—From the Tang-Song transition until the collapse of imperial order. The rise of absolutism and gentry society, and concomitant shifts in culture, gender relations, and the economy. The threat of steppe nomadism which produced the Mongol and Manchu

conquest dynasties. The last imperial dynasty, the Qing, which solved traditional problems but was confronted by new ones. How simultaneous disasters of internal rebellion and Western imperialist invasion destroyed the old order. GER:DB-Hum

5 units, not given this year (Sommer, M)

HISTORY 194B. Japan in the Age of the Samurai—From the Warring States Period to the Meiji Restoration. Topics include the three great unifiers, Tokugawa hegemony, the samurai class, Neoconfucian ideologies, suppression of Christianity, structures of social and economic control, frontiers, the other and otherness, castle-town culture, peasant rebellion, black marketing, print culture, the floating world, National Studies, food culture, samurai activism, black ships, unequal treaties, anti-foreign terrorism, restorationism, millenarianism, modernization as westernization, Japan as imagined community. GER:DB-Hum

5 units, not given this year (Wigen, K)

HISTORY 195. Introduction to Korean History and Culture—Ancient kingdoms to early modern dynasties; challenges of the modern transition, 1700s to mid-1900s; and contemporary issues. Topics include archeological records, philosophical and religious traditions, literature and the performing arts, international relations, socioeconomic change, immigration and Asian American experiences, gender issues, and popular and youth cultures. GER:DB-Hum, EC-GlobalCom

5 units, not given this year

HISTORY 195C. Modern Japanese History—Japan's modern transformation from the late 19th century to the present. Topics include: the Meiji revolution; industrialization and social dislocation; the rise of democracy and empire; total war and US occupation; economic miracle and malaise; Japan as soft power; and politics of memory. Readings and films focus on the lived experience of ordinary men and women across social classes and regions. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Staff)

HISTORY 197. Southeast Asia: From Antiquity to the Modern Era—The history of SE Asia, comprising Indonesia, the Philippines, Malaysia, Singapore, Thailand, Vietnam, Burma, Cambodia, and Laos, from antiquity to the present. The spread of Indian cultural influences, the rise of indigenous states, and the emergence of globally linked trade networks. European colonization, economic transformation, the rise of nationalism, the development of the modern state, and the impact of globalization.

5 units, Win (Lewis, ME)

HISTORY 198. The History of Chinese Modernity—Major historical transformations in 20th-century China. Key temporal, spatial, and categorical concepts through which historical agents in China framed their actions and imbued them with meaning including nationhood, citizenship, gender, ethnicity, and revolution.

5 units, Aut (Mullaney, T)

HISTORY 291A. Archaeology and Modernity in Asia: The Excavation of Ancient Civilizations in Modern Times—(Same as 391A.) The interplay in Asia between antiquity and modernity, civilization and nation state, and national versus colonial science. The recent excavation of artifacts and places associated with Asian civilization such as the terracotta warriors in China and Angkor Wat in Cambodia. How Asian states have grappled with modernity and colonialism as they simultaneously dug up their ancient pasts.

5 units, Spr (Mullaney, T)

HISTORY 291E. Maps, Borders, and Conflict in East Asia—(Same as 391E.) The nature of borders and border conflicts in N.E. Asia from the 17th to the early 20th century. Focus is on contact zones between China, Russia, Korea, and Japan. The geopolitical imperatives that drove states to map their terrain in variable ways. Cultural, diplomatic, and imperial contexts. European pressures and contributions to E. Asian cartography; the uses of maps in surveillance, diplomacy, identity, and war. Student projects focus on a contested border zone. GER:DB-SocSci

5 units, not given this year (Wigen, K)

HISTORY 292D. Japan in Asia, Asia in Japan—(Same as 392D.) How Japan and Asia mutually shaped each other in the late 19th and 20th centuries. Focus is on Japanese imperialism in Asia and its postwar legacies. Topics include: pan-Asianism and orientalism; colonial modernization in Korea and Taiwan; collaboration and resistance; popular imperialism in Manchuria; total war and empire; comfort women and the politics of apology; the issue of resident Koreans; and economic and cultural integration of postwar Asia. GER:DB-SocSci

5 units, Spr (Staff)

HISTORY 293. Law and Society in Late Imperial China—(Same as 392B.) Connections between legal and social history. Ideology and practice, center and periphery, and state-society tensions and interactions. Readings introduce the work of major historians on concepts and problems in Ming-Qing history. GER:DB-Hum

5 units, not given this year (Sommer, M)

HISTORY 293J. Korean History and Culture through Film—Focus is on S. Korea in the postcolonial era, 1945-present, including seminal political events, family/communal structures, educational institutions, gender norms, socioeconomic and cultural change. Analytical approaches include aesthetics, formalist readings of cinematic and literary texts, and media/cultural studies approaches that underscore political-economic issues of representation. Films and videos have English subtitles; readings in English translation. GER:DB-Hum, EC-GlobalCom

5 units, not given this year

HISTORY 295J. Chinese Women's History—(Same as 395J.) The lives of women in the last 1,000 years of Chinese history. Focus is on theoretical questions fundamental to women's studies. How has the category of woman been shaped by culture and history? How has gender performance interacted with bodily disciplines and constraints such as medical, reproductive, and cosmetic technologies? How relevant is the experience of Western women to women elsewhere? By what standards should liberation be defined? Readings include primary sources in translation including fiction, memoirs, and oral histories of the Maoist era. GER:DB-Hum, EC-Gender

5 units, not given this year (Sommer, M)

HISTORY 297E. Meiji Japan—(Same as 397E.) Foundations of modern Japan. Transformations in the 19th century and their consequences at the beginning of the 20th century. The Meiji Restoration; founding of the state; economy; modernization as westernization; rendering of traditions; the role of the imperial institution; popular rebellions; transformations of the samurai class and consciousness; religious movements; political dissent and repressions; gender; social problems; autobiographies; the births of cultural, historical consciousness, and modern sciences; Sino-Japanese and Russo-Japanese wars, and imperialist transformations in the late Meiji. Primary and secondary source material.

5 units, Win (Staff)

HISTORY 298A. Modernizing Women in Japan—(Same as 398A.) Women as objects and agents of experiments in social change in the modern world. Focus is on issues raised by modernizing Japanese women from the late 19th- to the 20th-centuries. Sources include film, fiction, journalism, essays, diaries, and secondary works. Research paper using primary sources. Recommended: coursework on Japan or gender. GER:DB-Hum, EC-Gender

5 units, not given this year (Wigen, K)

INDIVIDUAL WORK

HISTORY 299A,B,C. Senior Research—WIM
1-5 units, Aut, Win, Spr (Staff)

HISTORY 299H. Junior Honors Colloquium
5 units, Win (Winterer, C)

HISTORY 299M. Undergraduate Directed Research: Martin Luther King, Jr., Research and Education Institute—May be repeated for credit.

1-4 units, Aut, Win, Spr (Staff)

1 unit, Spr (Kollmann, N; Roberts, R)

GRADUATE

Graduate History courses are listed in the following subsection order:

Required Colloquia, Workshops, and Seminars: 300-305, 400-405

International, Global, and Thematic: 306-310, 406-410

Ancient and Medieval Europe: 311-319, 411-419

Eastern Europe, Russia, and Eurasia: 320-329, 320-329

Early Modern and Modern Europe: 330-339

History of Science and Technology: 340-344, 440-444

Africa: 345-349, 445-449

United States: 351-369, 451-469

Latin America: 370-379, 470-479

Middle East: 380-384, 480-484

Jewish History: 385-389, 485-489

Asia: 390-398, 490-498

Individual Study: 399, 499

REQUIRED COLLOQUIA, WORKSHOPS, SEMINARS

HISTORY 304. Approaches to History— Required of first-year History Ph.D. students.

5 units, Aut (Baker, K)

HISTORY 305. Graduate Workshop in Teaching— Teaching, lecturing, and curriculum development.

1 unit, Spr (Kollmann, N; Roberts, R)

INTERNATIONAL, GLOBAL, AND THEMATIC

See also 399A.

HISTORY 303A. Theories of the State from the Ancient World to the Present—(Same as 203A.)

5 units, Win (Baker, K; Sheehan, J)

HISTORY 305B. Quantitative Methods in Historical Research—(Same as 205B.)

5 units, Win (Klein, H)

HISTORY 306E. International History and International Relations Theory—(Same as 202, POLISCI 316.)

5 units, Win (Holloway, D)

HISTORY 307A. Legal History Workshop—(Same as LAW 372.) Faculty and students from the Law School and the History Department discuss research in the field of legal history. Guest speakers. Secondary literature relevant to the speaker's research.

5 units, Win (Herzog, T; Kessler, A)

HISTORY 307E. Origins of Totalitarianism— Modern revolutionary and totalitarian politics. Sources include monographs on the medieval, Reformation, French Revolutionary, and Great War eras. Topics: the essence of modern ideology, the concept of the body national, state terror, charismatic leadership, gender assignments, private and public spheres, and identities.

5 units, not given this year (Weiner, A)

HISTORY 308. Biography and History—(Same as 207.)

5 units, not given this year (Zipperstein, S)

HISTORY 309E. History Meets Geography— Focus is on developing competence in GIS computer applications and applying it to historical problems. Previous experience with GIS not required. Recommended: complete the GIS tutorial in Branner Library before the course starts.

5 units, Spr (Frank, Z)

HISTORY 309F. Historical Geography: Maps in the Early Modern World—(Same as 205.)

5 units, not given this year (Wigen, K)

ANCIENT AND MEDIEVAL EUROPE

HISTORY 311. Homer and Greek Religion—(Same as CLASSGEN 216.) The relationship between poetic representation and archaeological record; development of polis ideology; ritual, topography, and language as religious expressions; and the meaning of religion as a cultural category.

The world of Leonardo, Machiavelli, and Michelangelo. The intersections of history, politics, art, and literature in the 15th and 16th centuries. The relationship between the Renaissance and the Reformation.

5 units, Win (Findlen, P)

HISTORY 332F. The Scientific Revolution—(Same as 2132F.)

5 units, not given this year (Findlen, P)

HISTORY 332G. When Worlds Collide: The Trial of Galileo—(Same as 232G.)

5 units, Spr (Findlen, P)

HISTORY 333. Religion and Politics in Early Modern England—English political and religious culture from the end of the Wars of the Roses to the Civil Wars of the 1640s. Themes include the growth of the size and power of the state, Reformation, creation of a Protestant regime, transformation of the political culture of the ruling elite, emergence of Puritanism, and causes of the civil war.

5 units, not given this year (Como, D)

HISTORY 333C. Two British Revolutions—(Same as 233C.)

5 units, Win (Como, D)

HISTORY 334. Enlightenment Seminar—(Same as HUMNTIES 324.)

The Enlightenment as a philosophical, literary, and political movement. Themes include the origins and limits of knowledge and moral sentiment, the basis of citizenship, social engagement and political legitimacy, and relationships among religion, secularism, and the natural sciences. May be repeated for credit.

3-5 units, Aut (Riskin, J)

HISTORY 335. History of European Law, Medieval to Contemporary—(Same as 135.)

5 units, Win (Herzog, T)

HISTORY 335F. Europe and the Colonial Experience

5 units, not given this year (Daughton, J)

HISTORY 336. Modern France

5 units, not given this year (Daughton, J)

HISTORY 336E. Cultures of Violence in Twentieth-Century Europe—(Same as 236E.)

5 units, not given this year (Daughton, J)

HISTORY 338A. Modern Britain: Facing Europe and Empire, Part I—

Influential approaches to problems in British, European, and imperial history. The 19th-century British experience and its relationship to Europe and empire. National identity, the industrial revolution, class formation, gender, liberalism, and state building. Goal is to prepare specialists and non-specialists for oral exams.

5 units, not given this year (Satia, P)

HISTORY 338B. Modern Britain: Facing Europe and Empire, Part II—

Themes include empire and racism, the crisis of liberalism, the rise of the welfare state, national identity, the experience of total war, the politics of decline, and modernity and British culture.

5 units, Aut (Satia, P)

HISTORY 339D. Capital and Empire—(Same as 239D, HUMNTIES 191S.)

5 units, Spr (Satia, P)

HISTORY 339F. Empire and Information—(Same as 239F.)

5 units, not given this year (Satia, P)

HISTORY 430. Graduate Research Seminar: Early Modern Europe

4-5 units, Spr (Findlen, P)

HISTORY 432A. Graduate Research Seminar: The French Revolution

4-5 units, not given this year (Baker, K)

HISTORY 433A,B. European History

4-5 units, Win, Spr (Sheehan, J)

HISTORY 434A,B. Modern European History

4-5 units, not given this year (Robinson, P)

HISTORY 435. Digital Encyclopedia—(Same as FRENGEN 345.)

The Encyclopédie of Diderot and d'Alembert as a monument of the Enlightenment that is rarely read or studied. Its social and political history. The online, digitized version of the *Encyclopédie*, its complex network of entries and ideas, and new research possibilities in the humanities made available by digitization.

5 units, Spr (Baker, K)

HISTORY 438. European History Workshop—All European history graduate students in residence register for this weekly workshop, at which dissertation chapters and prospectuses, papers, and grant proposals by students and faculty are read and discussed.

1 unit, Spr (Robinson, P)

HISTORY OF SCIENCE AND TECHNOLOGY

See also 332F and 334.

HISTORY 341G. History of the Senses—(Same as 241G, STS 134, STS 234.)

5 units, Spr (Riskin, J)

HISTORY 343G. Tobacco and Health in World History—(Same as 243G.)

5 units, Aut (Proctor, R)

HISTORY 344L. Theory and Practice of Feminism in Science—(Same as 244L.)

5 units, not given this year (Schiebinger, L)

HISTORY 443A. Human Origins: History, Evidence, and Controversy—(Same as 243S.)

5 units, not given this year (Proctor, R)

HISTORY 444C. The History of the Body in Science, Medicine, and Culture—(Same as 244C.)

5 units, Spr (Schiebinger, L)

AFRICA

HISTORY 345A. Core Colloquium: Precolonial Africa

4-5 units, Aut (Roberts, R)

HISTORY 345B. Core Colloquium African History: The Colonial Period

4-5 units, not given this year (Roberts, R)

HISTORY 347E. Health and Society in Africa—(Same as 245E.)

5 units, not given this year (Roberts, R)

HISTORY 348. Islam in Africa—(Same as 248.)

4-5 units, not given this year (Hanretta, S)

HISTORY 348D. Law and Colonialism in Africa—(Same as 245G.)

4-5 units, Win (Roberts, R)

HISTORY 349. History without Documents—(Same as 249.)

5 units, Spr (Hanretta, S)

HISTORY 445A,B. Research Seminar in African History—Primary sources such as government records and missionary archives. Students present work in progress. Prerequisite: consent of instructor.

4-5 units, not given this year

HISTORY 447A,B. Intellectual and Cultural History in Modern Africa—(Same as 247S.)

4-5 units, not given this year (Hanretta, S)

HISTORY 448A,B. African Societies and Colonial States—(Same as 248S.)

5 units, A: Win, B: Spr (Roberts, R)

THE UNITED STATES

HISTORY 347. The Politics and Ethics of Modern Science and Technology—The WW II decision to build and use the atomic bomb. The controversy over the H-bomb. The Oppenheimer loyalty-security case and the relationship of scientist to the state. Medical experimentation on humans and pitfalls of technology. Relations among science, technology, and university.

5 units, not given this year (Bernstein, B)

HISTORY 352. Creating the American Republic—(Same as 251.)

5 units, not given this year (Rakove, J)

HISTORY 352B. History of American Law—(Same as LAW 318.) From the colonial period to the present. Topics include: slavery and race relations; the evolution of criminal justice and correctional systems; the growth of the legal profession; and the role of the legal system in the development of the economy. The relationship between developments in law and in the larger society. Undergraduates by consent of instructor.

5 units, Win (Friedman, L)

HISTORY 352G. Environmental History of Urban America—(Same as 252G.)

5 units, Aut (Rawson, M)

HISTORY 353A. Special Topics in American History: Comparative Colonialism, North and South America—Comparative methodologies in the study of history. May be repeated for credit.

5 units, Aut (Herzog, T; Winterer, C)

HISTORY 353B. Special Topics in American History: Gender, Race, and Sexuality—Historical writing about intersections of gender, race, and sexuality from late 18th to mid-20th century. Topics include the social construction of masculinities, racialization of sexual violence and disease, symbolic role of gender during the Cold War, and emergence of categories of identity such as homosexuality and transexuality. May be repeated for credit.

5 units, Win (Freedman, E)

HISTORY 353C. Special Topics in American History: U.S. Foreign Policy from the Atlantic Charter to the Neocons—May be repeated for credit.

5 units, Spr (Bernstein, B)

HISTORY 355. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis—(Same as 252.)

5 units, not given this year (Bernstein, B)

HISTORY 356. U.S.-China Relations: From the Opium War to Tiananmen—(Same as 256.)

5 units, Win (Chang, G)

HISTORY 358. History of Sexuality in the U.S.—(Formerly 265A; same as 258.)

5 units, Spr (Freedman, E)

HISTORY 365. New Research in Asian American History—(Same as 265.)

5 units, not given this year (Chang, G)

HISTORY 367F. The Suburban West—(Same as 267E.)

5 units, not given this year (O'Mara, M)

HISTORY 367G. Politics and Politicians in the American West—(Same as 268E.)

5 units, not given this year (O'Mara, M)

HISTORY 368D. The American West in Fiction and Film—(Same as 268D.)

5 units, Aut (Rawson, M)

HISTORY 376G. Demographic History of the U.S.—(Same as 276G.)

5 units, not given this year (Klein, H)

HISTORY 452A,B. U.S. Cultural and Intellectual History: 1750-1900—Major methods and issues. Goal is to produce a research paper based on primary sources suitable for inclusion in a doctoral dissertation or submission to a peer-reviewed scholarly journal. Topics include: compiling primary and secondary source bibliographies; primary and secondary source issues; and how to articulate an argument. Students produce a prospectus by the end of Winter Quarter. Spring Quarter meetings to discuss outlines, drafts, and problems, culminating in presentation of papers in scholarly conference format.

4-5 units, not given this year (Winterer, C)

HISTORY 455A,B. The Pacific World—Graduate research seminar. Focus is on movements across borders. Students produce a scholarly essay or dissertation chapter of publishable quality.

4-5 units, not given this year

HISTORY 457A,B. American Wests: Studies in Culture and the Environment

5 units, not given this year (White, R)

HISTORY 460. America in the World—Ways to place American history in an international context. Comparative, transnational, diplomatic, and world systems are approaches to complete a research paper based on research into primary materials. Historical methodologies, research strategies, and essay projects.

5 units, Win (Chang, G)

HISTORY 461A,B. U.S. Women's Family and Sexual History

4-5 units, not given this year (Freedman, E)

HISTORY 463A,B. Race, Ethnicity, and Class in the 20th Century

4-5 units, not given this year (Camarillo, A)

LATIN AMERICA

See also 309E.

HISTORY 373A. The Comparative Histories of the Hispanic Caribbean—(Same as 273A.)

5 units, Aut (Staff)

HISTORY 375. Slavery in the Americas—(Same as 275.)

5 units, Aut (Staff)

HISTORY 375F. Social Change in Latin America Since 1900—(Same as 275F, LATINAM 201/301.)

5 units, Win (Klein, H)

HISTORY 376. Modern Brazil—(Same as 276.)

5 units, Win (Frank, Z)

HISTORY 377F. Marranos, Conversos, and Crypto-Jews in Latin America, 16th-20th Centuries—(Same as 277F.)

5 units, Win (Staff)

HISTORY 377H. Political Citizenship and the Formation of the Latin American Republics—(Same as 277H.)

5 units, Spr (Staff)

HISTORY 378A. Logic of Authoritarian Government—(Same as 278A.)

5 units, Win (Haber, S)

HISTORY 378E. Political Economy of Development—(Same as POLISCI 440B.) Required of Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of the instructor. The origins of political and economic institutions and their impact on long run outcomes for growth and democracy. Emphasis is on the analysis of causal models, hypothesis testing, and the quality of evidence.

5 units, Win (Haber, S)

HISTORY 379. Latin American Development: Economy and Society, 1800-2000—(Same as 279.)

5 units, not given this year (Frank, Z)

MIDDLE EAST

HISTORY 381. Economic and Social History of the Modern Middle East—(Same as 281.)

4-5 units, not given this year (Beinin, J)

HISTORY 383. The New Global Economy, Oil, and Islamic Movements in the Middle East—The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market combined with case studies of Egypt, Iraq, and Palestine.

5 units, Win (Beinin)

HISTORY 481. Research Seminar on the Modern Middle East

3-5 units, not given this year (Beinin, J)

HISTORY 484. Ottoman/Turkish History

4-5 units, not given this year (Rodrigue, A)

JEWISH HISTORY

See also 329 and 377F.

HISTORY 385A. Core in Jewish History, 17th-19th Centuries

4-5 units, Aut (Rodrigue, A)

HISTORY 385B. Core in Jewish History, 20th Century

4-5 units, Win (Zipperstein, S)

HISTORY 385E. Tradition in Crisis: Orthodox Judaism in Modern Times—(Same as 285E.)

5 units, Aut (Staff)

HISTORY 386. Jews and Muslims—(Same as 286.)

5 units, not given this year (Rodrigue, A)

HISTORY 387. Research Methods in Jewish Studies—Reference sources in Jewish Studies including: the Hebrew Bible, Talmud, religious studies, Jewish philosophy and history, Hebrew and Yiddish language and literature, Zionism and Israel, Sephardic Jewry, women, and Holocaust. Hebrew, Yiddish, and Ladino transliteration. Electronic resources in the library including restricted databases, e-journals, CD-ROMs, and the web.

4-5 units, not given this year

HISTORY 387E. The Transformation of Central European Jewry: Germany and Austria-Hungary, 1700-1880—(Same as 287E.)

5 units, Aut (Staff)

HISTORY 486A. Graduate Research Seminar in Jewish History

4-5 units, Spr (Zipperstein, S)

ASIA

HISTORY 390. Han Chinese and the Global White: The Production of Ethnoracial Majorities, East and West

5 units, Win (Mullaney, T)

HISTORY 391A. Archaeology and Modernity in Asia: The Excavation of Ancient Civilizations in Modern Times—(Same as 291A.)

5 units, Spr (Mullaney, T)

HISTORY 391E. Maps, Borders, and Conflict in East Asia—(Same as 291E.)

5 units, not given this year (Wigen, K)

HISTORY 392B. Law and Society in Late Imperial China—(Same as 293.)

5 units, not given this year (Sommer, M)

HISTORY 392C. Key Topics in Qing History—Graduate colloquium. Goal is to provide the foundation of a field in Qing history for Ph.D. oral examinations; M.A. students also welcome. Issues include: the ethnic dimension of Qing imperialism; the imperial state's relationship with the peasantry; economic and demographic dynamics; and the impact of Western imperialism.

5 units, not given this year (Sommer, M)

HISTORY 392D. Japan in Asia, Asia in Japan—(Same as 292D.)

5 units, Spr (Staff)

HISTORY 395J. Chinese Women's History—(Same as 295J.)

5 units, not given this year (Sommer, M)

HISTORY 396D. Modern Japan—Fourth in a four-part core colloquium series for graduate students. Major historical problems and historiographic trends in from the Meiji period to the present. Themes include late Meiji culture and politics, the formation of imperial subjects and citizens, agrarian society and politics, gender in modern Japan, empire and modernity, total war and transwar state and society, U.S. occupation, and postwar Japan.

5 units, Spr (Staff)

HISTORY 397E. Meiji Japan—(Same as 297E.)

5 units, Win (Staff)

HISTORY 398A. Modernizing Women in Japan—(Same as 298A.)
5 units, not given this year (Wigen, K)

HISTORY 492. Society in Ancient and Medieval China—Proseminar on conducting research in ancient or medieval China. Focus is on the theme of the emotions of the period. Sources include theoretical and comparative materials in secondary literature and primary sources. Students present research paper to class.

5 units, not given this year (Lewis, ME)

HISTORY 492A. The Family in Early China—Proseminar on conducting research.

4-5 units, not given this year (Lewis, ME)

HISTORY 492B. Proseminar on Research in Early China: Origins of Technical Medicine in the Han Dynasty—How medicine as a technical, text-based art monopolized by specialists was established under the Han Dynasty in competition with practices aimed at nourishing life and securing longevity.

4-5 units, Spr (Lewis, ME)

HISTORY 494. The Body in Early China

5 units, not given this year (Lewis, ME)

HISTORY 495A.B. Qing Legal Documents—How to use Qing legal documents for research. Winter: sample documents that introduce the main genres including: the Qing code and commentaries; magistrates' handbooks and published case collections; and case records from Chinese archives. Spring: class meets occasionally; students complete research papers. Prerequisite: advanced reading ability in Chinese.

4-5 units, not given this year (Sommer, M)

HISTORY 496A. Research Seminar in Modern China: Shanghai through Visual and Textual Records—The use of historical sources such as guide books, photographs, maps, novels, and movies from the Republican era to examine Shanghai. Issues of methodology, interpretation, and historical narrative. Primary sources in English and Chinese.

4-5 units, not given this year

INDIVIDUAL STUDY

HISTORY 399A. Design and Methodology for International Field Research—(Same as 299X.)

1 unit, Spr (Kollmann, N; Roberts, R)

HISTORY 399W. Graduate Directed Reading

1-10 units, Aut, Win, Spr, Sum (Staff)

HISTORY 499X. Graduate Research—Units by arrangement. May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

OVERSEAS STUDIES

These courses are approved for the History major and taught overseas at the campus indicated. Students should discuss with their major advisers which courses would best meet individual needs. Descriptions are in the "Overseas Studies" section of this bulletin or at the Overseas Studies office, 126 Sweet Hall.

BEIJING

HISTORY 194V. Discovering Modern Chinese History in Beijing—(Same as OSPBEIJ 44.)

4 units, Spr (Zhao, D)

HISTORY 198V. Wartime China: Chinese Nationalism and the Anti-Japanese War—(Same as OSPBEIJ 45.)

5 units, Spr (Plum, M)

BERLIN

HISTORY 105V. Industry, Technology, and Culture, 1780-1945—(Same as STS 120V, OSPBER 105V.) GER:DB-Hum

4 units, Win (Neckenig, F)

HISTORY 229V. Architecture and the City, 1871-1990: Berlin as a Nucleus of Modernity—(Same as ARTHIST 110Y, STS 119V, OSPBER 110Y, URBANST 143U.) GER:DB-Hum

4 units, Spr (Neckenig, F)

FLORENCE

HISTORY 106V. Italy: From Agrarian to Postindustrial Society—(Same as POLISCI 145P, OSPFLOR 106V.) GER:DB-SocSci

4 units, Aut (Mammarella, G)

HISTORY 235V. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema—(Same as ARTHIST 160Y, COMM 53, ITALGEN 191F, OSPFLOR 49.)

5 units, Win (Campani, E)

HISTORY 238V. The Americanization of Italy—(Same as OSPFLOR 33.)

4 units, Win (Scarpellini, E)

MOSCOW

HISTORY 122V. Introduction to 20th-Century Russian History: Patterns and Key Events—(Same as OSPMOSC 65.)

5 units, Aut (Kozlov, V)

OXFORD

HISTORY 112V. The Making of the English Nation, 400-1066—(Same as OSPOXFRD 21.)

3 units, Win (Rowley, T)

HISTORY 132V. British Architecture and the Renaissance: 1500-1850—(Same as OSPOXFRD 15.)

4-5 units, Win (Tyack, G)

HISTORY 138V. The History of London—(Same as OSPOXFRD 70.) GER:DB-SocSci

5 units, Spr (Tyack, G)

HISTORY 141V. European Imperialism and the Third World, 1870-1970—(Same as POLISCI 148P, OSPOXFRD 141V.) GER:DB-SocSci

5 units, Spr (Darwin, J)

PROGRAM IN HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY

Co-chairs: Michael Friedman (Philosophy), Paula Findlen (History)
Committee-in-Charge: Barton Bernstein (History), Joe Corn (History), Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History)
Program Committee: Paula Findlen (History), Michael Friedman (Philosophy), Helen Longino (Philosophy), Reviel Netz (Classics), Robert Proctor (History), Jessica Riskin (History), Londa Schiebinger (History)
Professors: Keith Baker (History), Barton Bernstein (History), Paula Findlen (History), Michael Friedman (Philosophy), David Holloway (History, Institute for International Studies, Political Science), Reviel Netz (Classics), Robert Proctor (History), Londa Schiebinger (History, Clayman Institute for Gender Research), Richard White (History), Helen Longino (Philosophy)
Associate Professors: Jessica Riskin (History)
Assistant Professors: Sarah Jain (Cultural and Social Anthropology), Caroline Winterer (History)
Professor (Research): Rega Wood (Philosophy)
Senior Lecturer: Joseph Corn (History)
Lecturer: Tom Ryckman (Philosophy), Margo Horn (Feminist Studies)
Other Affiliation: Henry Lowood (Stanford University Libraries), Audrey Shafer (Anesthesiology), Larry Zaroff (Anesthesiology)
Fellow: Claudia Brosseder
Mail Code: 94305-2024
Email: rrogers@stanford.edu
Web Site: <http://HPST.stanford.edu>

Courses in History and Philosophy of Science and Technology have the subject code HPS. For a complete list of subject codes, see Appendix.

The Program in History and Philosophy of Science and Technology (HPST) is an interdisciplinary program focusing on historical and contemporary aspects of science, medicine, and technology. Graduate degrees at the doctoral level are offered through the departments of History and Philosophy; master's degrees are offered through affiliated departments and programs, principally Classics, Cultural and Social Anthropology, English, and Modern Thought and Literature. The program's courses span the period from antiquity to the late 20th century, with emphasis on: ancient science; Renaissance science; the scientific revolution; Enlightenment and transatlantic science; history of medicine and the body; history and philosophy of biology; history and philosophy of modern physics; history of the philosophy of science in the modern period; and gender, science, and technology. These courses are designed for students looking for a humanistic perspective on the sciences and for those trying to understand the relationship of the sciences to humanistic knowledge.

Stanford has unique resources for the history and philosophy of science. Situated in the heart of Silicon Valley at an institution with a long and distinguished tradition in many sciences, the University is surrounded by archives for the recent history of science and technology. Stanford University Libraries has rich holdings in Special Collections for the Scientific Revolution, as well as the modern and contemporary study of science and technology. The University is in close proximity to the California Academy of Sciences, the Exploratorium, the Computer History Museum, and the Tech Museum. Graduate students can take advantage of faculty, classes, and archives at UC Berkeley through Stanford's exchange program.

The core of the community is the colloquium series which brings together faculty and students several times a quarter to discuss the work of invited speakers on topics of broad concerns to science and technology studies.

UNDERGRADUATE DEGREES

Students who wish to pursue the history and philosophy of science and technology should consider a major in one of the following: the Department of History which offers an interdisciplinary track in History, Science, and Medicine; the Department of Philosophy which offers a degree field in History and Philosophy of Science; or the Program in Human Biology where a student can craft their own area of concentration in the History of Science and Medicine. Course work in science, technology, and medicine or in ancient science and philosophy can be arranged with the departments of Cultural and Social Anthropology and Classics respectively. Alternatively, students may consult with a member of the committee-in-charge to construct an Individually Designed Major. The major must conform to the requirements for Individually Designed Majors; see the "Individually Designed Majors" section of the bulletin.

GRADUATE DEGREES

Students can pursue a Ph.D. specializing in the history and philosophy of science and technology through the departments of History and Philosophy. Students can pursue an M.A. specializing in the history and philosophy of science and technology through any of the participating departments and programs. In addition, students may also participate in the HPST program on a non-degree basis. Students should consult departmental descriptions for the details of graduate degree requirements specific to their main department. They are also encouraged to design an interdisciplinary component in their program of studies, drawing on the most relevant classes across the humanities, sciences, and engineering which allow them to connect their discipline-specific work to a broader understanding of science and technology as historical and contemporary phenomena. Prospective students should work closely with their advisers in developing this aspect of their program of studies.

COURSES

INTRODUCTORY

HPS 60. Introduction to Philosophy of Science—(Same as PHIL 60.) 20th-century views on the nature of scientific knowledge. Logical positivism and Popper; the problem of induction; Kuhn, Feyerabend, and radical philosophies of science; subsequent attempts to rebuild moderate empiricist and realist positions. GER:DB-Hum

5 units, Aut (Longino, H)

HPS 61. Philosophy and the Scientific Revolution—(Same as PHIL 61.) The relationship between the scientific revolution of the 17th century that resulted in the birth of modern science and the contemporaneous intellectual developments constituting the birth of modern philosophy. Readings focus on Galileo and Descartes. GER:DB-Hum

5 units, not given this year (Friedman, M)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

HISTORY 44N. The History of Women and Gender in Science, Medicine, and Engineering

4 units, Win (Schiebinger, L)

PHIL 16N. Values and Objectivity

3 units, Aut (Ryckman, T)

CLASSGEN 16. Eureka! Archimedes and his Science

3-5 units, Win (Netz, R)

SCIENCE IN HISTORY

This sequence is designed to introduce students to fundamental aspects of the history of science from antiquity to the 20th century. Students concentrating in the history of science are advised to take most or all of this sequence as a core foundation.

COGNATE COURSES

HISTORY 40S. Dinosaurs, Sea Serpents, and Abominable Snowmen: Unknown Animals in Modern History
5 units, Aut (Roberts, P)

HISTORY 42S. Climate Science in the 20th Century: A History
5 units, Spr (Howe, J)

CLASSGEN 133. Invention of Science
3-5 units, Aut (Netz, R)

HISTORY 232F/332F. The Scientific Revolution
5 units, not given this year (Findlen, P)

MEDICINE IN HISTORY

This sequence is designed to introduce students to fundamental aspects of the history of medicine from antiquity to the 20th century. Students concentrating in the history of medicine are advised to take most or all of this sequence as a core foundation.

COGNATE COURSES

HISTORY 243G/343G. Tobacco and Health in World History
5 units, Aut (Proctor, R)

PHILOSOPHICAL PERSPECTIVES ON SCIENCE, MEDICINE, AND TECHNOLOGY

This sequence is designed to introduce students to fundamental aspects of the philosophy of science. Students concentrating in the philosophy of science are advised to take HPS 60 above as a starting point, and combine a number of the electives listed below in conjunction with courses in the other concentrations that address their specific interests.

COGNATE COURSES

PHIL 107/207. Plato and Heraclitus
3 units, Spr (Moravcsik, J)

PHIL 115/215. Foundations of Medieval Psychology
3-5 units, Aut (Wood, R)

PHIL 163/263. Significant Figures in Philosophy of Science
4 units, Win (Ryckman, T)

PHIL 164/264. Central Topics in the Philosophy of Science: Theory and Evidence
4 units, not given this year

PHIL 165/265. Philosophy of Physics
4 units, Aut (Ryckman, T)

PHIL 167A/267A. Philosophy of Biology
4 units, not given this year

PHIL 167B/267B. Philosophy, Biology, and Behavior
4 units, not given this year

PHIL 184F/284F. Feminist Theories of Knowledge—(Same as FEMST 166.)
4 units, Spr (Longino, H)

PHIL 189. Philosophical Applications of Cognitive Science
4 units, not given this year

PHIL 224. Kant's Philosophy of Physical Science
4 units, not given this year (Friedman, M)

PHIL 360. Core Seminar in Philosophy of Science
4 units, Spr (Longino, H)

PHIL 365. Seminar in Philosophy of Science: Structural Realism
4 units, not given this year (Ryckman, T)

ADVANCED**HISTORICAL PERSPECTIVES ON SCIENCE**

The following courses focus on specific episodes in or approaches to the history of science.

HPS 152. Witchcraft, Magic and the Occult in Early Modern Europe and the Americas—What was the witch craze about, and how was it related to magic? Farmers and townspeople, and prominent European intellectuals of the age, who wrote about magic and witchcraft. How Old World ideas translated to Spanish Latin America and New England. How and why European concepts of magic and witchcraft reshaped in the New World.
5 units, Spr (Brosseder, C)

COGNATE COURSES

CLASSGEN 213. The Poetics of Ancient Science
3-5 units, Aut (Netz, R)

HISTORY 232G/332G. When Worlds Collide: The Trial of Galileo
5 units, Spr (Findlen, P)

HISTORY 241G/341G. History of the Senses—(Same as STS 134/234.)
5 units, Spr (Riskin, J)

STS 125/225. Science, Technology, and Art: The Worlds of Leonardo—(Same as HISTORY 31.)
5 units, Win (Findlen, P)

HISTORY 243S/443A. Human Origins: History, Evidence, and Controversy
5 units, not given this year (Proctor, R)

CONTEMPORARY PERSPECTIVES ON SCIENCE, MEDICINE, AND TECHNOLOGY

The following courses focus on contemporary cultural and social science approaches to science, technology, and medicine.

HPS 199. Directed Reading
1-15 units, Aut, Win, Spr, Sum (Staff)

HPS 201. HPST Colloquium—Several meetings per quarter to discuss the work of speakers on topics of broad concerns to science and technology studies. Required of students in the program. See <http://hpst.stanford.edu/colloquia.html> for times and locations. May be repeated for credit.
1 unit, Aut, Win, Spr (Staff)

HPS 299. Graduate Individual Work—May be repeated for credit.
1-15 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

CASA 132. Science, Technology, and Gender
3-5 units, Spr (Jain, S)

FEMST 244. History of Women and Medicine in the United States
5 units, Aut (Horn, M)

HISTORY 141. Minds and Worlds from Aristotle to Newton to Einstein
5 units, Spr (Riskin, J)

HISTORY 241S. Science and Culture Wars
5 units, Win (Riskin, J)

HISTORY 244C/444C. The History of the Body in Science, Medicine, and Culture
5 units, Spr (Schiebinger, L)

HISTORY 244L/344L. Theory and Practice of Feminism in Science
5 units, not given this year (Schiebinger, L)

HUMBIO 175. Health Care as Seen Through Medical History, Literature, and the Arts
4 units, Aut (Zaroff, L)

STS 145. History of Computer Game Design: Technology, Culture, and Business
4 units, not given this year (Lowood, H)

PROGRAM IN HUMAN BIOLOGY

Emeriti: (Professors) Clifford Barnett (Anthropological Sciences), Luigi Cavalli-Sforza (Genetics), Carl Djerassi (Chemistry), Sanford Dornbusch (Sociology), Albert H. Hastorf (Psychology), Dale Kaiser (Biochemistry), Herant Katchadourian (Human Biology), Donald Kennedy (Biological Sciences), Carol Winograd (Medicine)

Director: Carol Boggs (Biological Sciences)

Associate Director: Shirley Feldman (Psychiatry)

Professors: William H. Durham (Anthropological Sciences), Russell D. Fernald (Biological Sciences), James Ferrell (Molecular Pharmacology), Margaret Fuller (Developmental Biology), Deborah Gordon (Biological Sciences), Larry Goulder (Economics), H. Craig Heller (Biological Sciences), Richard Klein (Anthropological Sciences), Michael Marmor (Ophthalmology), Gordon Matheson (Orthopedic Surgery), Roeland Nusse (Developmental Biology), Robert Sapolsky (Biological Sciences), Stephen Schneider (Biological Sciences), Matthew Scott (Developmental Biology), Marcia Stefanick (Medicine), Shripad Tuljapurkar (Biological Sciences), Irving Weissman (Pathology), Jeffrey Wine (Psychology), Arthur B. Wolf (Anthropological Sciences)

Associate Professors: Anne Fernald (Psychology), Paul Fisher (Neurology and Neurological Sciences), James Fox (Anthropological Sciences, on leave), Carolyn Patten (Orthopedic Surgery), John Rick (Anthropological Sciences), Deborah Satz (Philosophy), William Talbot (Developmental Biology)

Assistant Professors: Ronald Barrett (Anthropological Sciences), Melissa Brown (Anthropological Sciences, on leave), David DeGusta (Anthropological Sciences), Jamie Jones (Anthropological Sciences), Norman G. Miller (Medicine)

Associate Professors (Research): David Katzenstein (Medicine), David Lyons (Psychiatry and Behavioral Sciences)

Assistant Professor (Research): Christopher Gardner (Medicine)

Professors (Teaching): Carol Boggs (Biological Sciences), Ellen Porzig (Developmental Biology, Molecular Pharmacology)

Associate Professors (Teaching): Donald Barr (Sociology), Catherine Heaney (Psychology, Medicine), Robert Siegel (Microbiology and Immunology)

Other Teaching Faculty and Staff: William Abrams, Wesley F. Alles (Medicine), Nancy Brown (Education), Judy Chu (Education), Gerda Endemann (Biological Sciences), Anne Firth-Murray, Anne Friedlander, Daniel Garza (Orthopedic Surgery), Geoffrey Heller, Renua Heller, Judy Illes Van Der Loos (Biomedical Ethics), Mary Therese Jacobson (Obstetrics and Gynecology), Philip Lee, Michael Mastrandrea (Earth Sciences), Lisa Medoff (Education), David Morris (English, Human Biology), Lynn Rothschild, Merritt Ruhlen (Anthropological Sciences), Darwin Scott Smith, Jennifer Wolf (Education), Larry Zaroff (Anesthesia, Biomedical Ethics)

Course Associates: David Berg, Anne Holland, Amanda Johnson, Stephanie Mika, Joe Sanford, Alison Silvis, Mary Lyn Stein, Veronica Sudekum

Student Advisers: Jennifer Bass, Sara Kaiser, Ani Kardashian, Sonia Nagala, Lauren Rimoin, Anna Strohl

Advising Chairs: Catherine Heaney, Robert Siegel

Honors Chair: Shirley Feldman

Program Offices: Building 80 and Building 100

Mail Code: 94305-2160

Phone: (650) 725-0336

Email: cacciari@stanford.edu (Student Services)

Web Site: <http://humbio.stanford.edu/>

Courses given in Program in Human Biology have the subject code HUMBIO. For a complete list of subject codes, see Appendix.

The Program in Human Biology is an interschool, interdepartmental, undergraduate major. The program's mission is to provide an interdisciplinary approach to understanding the human being from biological, behavioral, social, and cultural perspectives.

The program seeks: (a) to provide a broad and rigorous introduction to the biological and behavioral sciences and their interrelationships, and (b) to explore how this knowledge, in conjunction with studies in other fields, can be applied to analyze and formulate health, environmental, and other public policies that influence human welfare. To achieve these goals, all students complete a 30-unit core sequence, normally in the sophomore year, that provides the foundation for the major. Also during the sophomore year, students consult with student advisers to choose a faculty adviser and complete the declaration process. Together they plan a roadmap of course work designed to help each student focus on an area of interest within Human Biology. Early planning and subsequent refining of an individualized course of study, in consultation with student and faculty advisers, is a strength and requirement of the program. The curriculum draws on faculty from across the University. To complete a B.A. in Human Biology, students must take courses from within the program and from other University departments. Most Human Biology majors go on to advanced training in professional schools, or graduate programs in the behavioral, natural, and social sciences, including coterminal master's degree programs in other University departments. Additional information about the major may be obtained from the program's offices or at <http://humbio.stanford.edu/>.

UNDERGRADUATE PROGRAMS BACHELOR OF ARTS

The B.A. in Human Biology (HUMBIO) requires a minimum of 84 units in the major divided among four levels of courses:

- 1. Fundamental Program:** at least 38 units, to include
Human Biology Core (30 units)
Statistics (4-5 units)
Internship (HUMBIO 197; 4 units)
The Human Biology Core refers to HUMBIO 2A and 2B, 3A and 3B, and 4A and 4B. See "Required Core" below for more information. HUMBIO 4B fulfills the policy requirement of the major. Statistics may be selected from courses such as STATS 60 or 141, PSYCH 10, SOC 181B, and BIOSCI 141. For questions about other statistics courses that might fulfill this requirement, see the program office. The core and statistics courses must be taken for a letter grade by majors. The internship requirement, an independent field experience project, is graded satisfactory/no credit only.
- 2. Foundation Courses:** 20-unit minimum. Total units vary, depending on the focus of study selected by the student for the area of concentration. They may include introductory-level courses from across the University and lab courses. A maximum of 10 premed units (from the chemistry, physics, and calculus series, and biology lab courses) are allowed.
- 3. Area of Concentration:** a minimum of five courses totaling at least 20 units. This in-depth area of study enables the student to focus on educational and post-baccalaureate goals. Courses are non-introductory, theory-based, and are usually numbered over 100. Three or more departments must be represented in the concentration. Each course must be taken for a minimum of 3 units. Final approval of the concentration rests with the student advisers and faculty adviser. All area of concentration courses must be taken for a letter grade. Examples of numerous possible areas of concentration are available in the program's student advisers' office or at http://humbio.stanford.edu/student_areas.html.
- 4. Upper-Division Courses:** students must take three Human Biology upper-division courses numbered 100 to 189. These courses should be used to explore subjects outside the area of concentration. One upper-division course may be taken satisfactory/no credit. Each course must be taken for a minimum of 3 units. All non-laboratory advanced HUMBIO courses (those numbered 100 to 189) fulfill the Human Biology upper-division requirement, including those listed as cognate courses from another department.

A prospective major must consult with the student and faculty advisers to obtain detailed information about the program and guidance in the development of an individual course of study. At the time the major

is declared, the student must submit a written statement (3-5 pages) of academic and long-term goals and the proposed list of courses satisfying the requirements for the major. The proposal is then reviewed by the student advisers who help identify an appropriate faculty adviser. Final approval of the proposed course of study rests with the faculty adviser. It is important to declare early, preferably by the end of Spring Quarter of the sophomore year, but not later than the end of Autumn Quarter of the junior year; students must petition the director to declare later than Autumn Quarter of the junior year. Petitions to declare late require additional documentation and are less likely to be approved.

Students who plan to pursue graduate work should be aware of the admission requirements of the schools to which they intend to apply. Early planning is advisable to guarantee completion of major and graduate school requirements.

MINORS

A minor in Human Biology provides an introductory background to the relationship between the biological and social aspects of humanity's origin, development, and prospects. Many of the major problems facing human civilization today involve both biological and social aspects. Scientific approaches to these problems are essential, but they must be broadly conceived, integrating what we know of the biological with an understanding of the social and cultural setting in which they exist. Students with a minor in Human Biology will have a strong background in the integration between the biological and social aspects of humans. To minor in Human Biology, students must take the core curriculum (HUMBIO 2A, 2B, 3A, 3B, 4A, and 4B) and one additional upper-division course (for example, any course offering by Human Biology numbered 100-189). These must be taken for a minimum letter grade of 'C-'. Courses that count towards the fulfillment of major requirements may not be counted towards the minor. Students declaring a minor in Human Biology must do so no later than two quarters prior to their intended quarter of degree conferral (for example, a student must declare a minor before the end of the Autumn Quarter to graduate the following Spring Quarter).

HONORS PROGRAM

The honors program in Human Biology affords qualified majors the opportunity to work closely with faculty on an individual research project, culminating in an honors thesis. Students may begin honors research from a number of starting points including: topics introduced in the core or upper-division courses; independent interests stemming from an internship experience; or collaborating with faculty from the natural, social, or behavioral sciences. Students may apply to the honors program once they have completed the Human Biology core, have an overall Stanford grade point average (GPA) of 3.2, and meet other requirements detailed in the honors handbook. Interested students should consult resources in the Human Biology office including the *Human Biology Honors Handbook*, the honors program application available from the student services office, and appointments during office hours with the Human Biology honors chair. Courses of interest to honors students include: HUMBIO 193, Research in Human Biology, and HUMBIO 194, Honors. Most honors projects involve a total of 10-15 units of course work in HUMBIO 193 and 194. Admission to the honors program is by application in April of the junior year. Students planning to undertake honors begin research or preparation as early as completion of the sophomore year. The honors thesis is normally completed by the middle of Spring Quarter of the senior year. Each honors student then presents a brief summary of honors research at the Human Biology Honors Symposium in May. Human Biology also holds a Summer Honors College just prior to Autumn Quarter each year for students who have applied to the honors program. Students apply to Summer Honors College in April of the junior year. For applications, contact the program office.

STOREY HOUSE

Storey House, 544 Lasuen Mall, is an undergraduate residence for the Human Biology Academic Theme House, devoted to developing an intellectual community among Human Biology majors at Stanford, and allowing faculty and students to become acquainted and share their Human Biology interests and research. Its goals are to foster intellectual discussion in the residential lives of the students living in Storey House, mentoring relationships between upperclassmen and core students in the house, and stimulating events for all Human Biology majors facilitated by academic theme associates. Assignment is made through the regular undergraduate housing draw.

STUDENT ADVISERS

Human Biology has an advising program comprising faculty and student advisers. Before declaring Human Biology as their undergraduate major, each student must meet with one of six student advisers who assist them in developing a coherent study plan based on an individualized area of concentration, and the selection of foundation, concentration, and upper-division courses. They also assist students in selecting an appropriate faculty adviser and a suitable internship for their area of concentration and career goals. Student advisers offer drop-in services during scheduled office hours every weekday and some evenings. The student advisers also sponsor events including the Internship Faire, the Advising Extravaganza, and Beyond Hum Bio. To maintain high standards of advising that respond to the needs of individual students, student advisers meet weekly with the program's faculty advising chairs and the student services coordinator to review the program's policies and specific student inquiries and petitions concerning the program.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. AU indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

The faculty and staff of Human Biology prepare a student handbook, on the web at <http://humbio.stanford.edu/>, that provides a detailed description of the Human Biology major and outlines possible areas of concentration. It reflects the most up-to-date information for the academic year and is the definitive guide for Human Biology majors.

REQUIRED CORE

Required core sequences (2A,B, 3A,B, and 4A,B) introduce the biological and social sciences, and most importantly, relationships between the two. Classes meet throughout the academic year. Students must register concurrently for the A and B series and take the core in sequence. Students should initiate the core in Autumn Quarter of the sophomore year. Freshmen are not permitted to enroll. Majors must earn a minimum letter grade of 'C-' in core courses.

HUMBIO 2A,B. Genetics, Evolution, and Ecology: Culture, Evolution, and Society

HUMBIO 2A. Genetics, Evolution, and Ecology—Introduction to the principles of classical and modern genetics, evolutionary theory, and population biology. Topics: micro- and macro-evolution, population and molecular genetics, population dynamics, and community ecology, emphasizing the genetics of the evolutionary process and applications to human populations. GER: DB-NatSci
5 units, Aut (Boggs, C; Durham, W)

HUMBIO 2B. Culture, Evolution, and Society—Introduction to the evolutionary study of human diversity. Hominid evolution, the origins of social complexity, social theory, and the emergence of the modern world system, emphasizing the concept of culture and its influence on human differences. GER:DB-SocSci
5 units, Aut (Klein, R; Wolf, A)

HUMBIO 3A,B. Cell and Developmental Biology: Behavior and Its Development

HUMBIO 3A. Cell and Developmental Biology—The principles of the biology of cells: principles of human developmental biology, biochemistry of energetics and metabolism, the nature of membranes and organelles, hormone action and signal transduction in normal and diseased states (diabetes, cancer, auto-immune diseases), drug discovery, immunology, and drug addiction. GER: DB-NatSci

5 units, Win (Fuller, M; Kaiser, D; Nusse, R; Scott, M; Talbot, W)

HUMBIO 3B. Behavior and Its Development—(Formerly 4B.) Research and theory on human behavior and life span development. How biological factors and cultural practices influence cognition, emotion, motivation, personality, and psychopathological disorders in childhood, adolescence, and adulthood. GER:DB-SocSci

5 units, Win (Lyons, D; Fernald, A)

HUMBIO 4A,B. The Human Organism: Environmental and Health Policy Analysis

HUMBIO 4A. The Human Organism—Organ system physiology: the principles of neurobiology and endocrinology, and the functions of body organs. The mechanisms of control, regulation, and integration of organ systems function. GER: DB-NatSci

5 units, Spr (Heller, C; Fernald, R)

HUMBIO 4B. Environmental and Health Policy Analysis—(Formerly 3B.) Connections among the life sciences, social sciences, public health, and public policy. The economic, social, and institutional factors that underlie environmental degradation, the incidence of disease, and inequalities in health status and access to health care. Public policies to address these problems. Topics include pollution regulation, climate change policy, biodiversity protection, health care reform, health disparities, and women's health policy. WIM

5 units, Spr (Goulder, L; Barr, D)

ADDITIONAL INTRODUCTORY OFFERINGS

HUMBIO 2C. Introductory Chemistry Seminar—For students who need a refresher course in basic chemistry and biochemistry, who have not previously enrolled in chemistry classes, or who do not have an extensive chemistry background. Preparation for biochemistry in the Human Biology core.

1 unit, Aut (Siegel, R)

HUMBIO 3Y. Practicum in Child Development—Practical experience at Bing Nursery School for 3.5 hours per week. Pre- or corequisite: 3B. (AU)

1 unit, Win (Fernald, A)

HUMBIO 6. Human Origins—(Same as ANTHSCI 6/206.) The human fossil record from the first non-human primates in the late Cretaceous or early Paleocene, 80-65 million years ago, to the anatomically modern people in the late Pleistocene, between 100,000 to 50,000 B.C.E. Emphasis is on broad evolutionary trends and the natural selective forces behind them. GER: DB-NatSci

5 units, Win (Klein, R)

HUMBIO 14. Introduction to Anthropological Genetics—(Same as ANTHSCI 14.) How genetic methods address anthropological questions. Examples include the evolutionary relationships between humans and the apes, the place of the Neanderthals in human evolution, the peopling of the New World, ancient DNA, the genetics of ethnicity, forensic genetics, genomics, behavioral genetics, and hereditary diseases. GER: DB-NatSci

3-5 units, Spr (DeGusta, D)

HUMBIO 21. Introduction to Brain and Behavior—(Same as BIOSCI 20.) Evolutionary principles to understand how the brain regulates behavior, described in physiological terms, and is influenced by behavioral interactions. Topics include neuron structure and function, transmission of neural information, anatomy and physiology of sensory and motor systems, regulation of body states, the biological basis of learning and memory, and behavioral abnormalities. GER: DB-NatSci

3 units, Aut (Fernald, R), alternate years, not given next year

HUMBIO 25. Human Ecology of the Amazon—(Same as ANTHSCI 25.) The diversity of peoples and cultures in the Amazon Basin and the ecosystems in which they live. Themes in ecological anthropology of Amazonia including limiting factors, the protein debate, indigenous knowledge and resource management, and anthropogenic modification. Ethnographic, historical, and archeological evidence. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year

HUMBIO 27. Traditional Chinese Medicine—The philosophy and history behind traditional Chinese medicine. Concepts such as Qi, Yin/Yang, meridians, Chinese organs, and the 5 elements. How these concepts are applied through techniques such as acupuncture, herbal medicine, Qi gong, and massage. How traditional Chinese medicine is understood from a scientific standpoint. Political and socioeconomic implications. Observation of an acupuncturist. Readings on the integration of Eastern and Western medicine and on traditional Chinese medicine.

1 unit, Spr (Golianu, B)

HUMBIO 42C. Alternative Spring Break: AIDS and HIV in San Francisco—(Formerly 142C.) Preparation for the alternative Spring Break trip in which students visit and volunteer at HIV support organizations. Background on HIV and its impact on the San Francisco community.

1 unit, not given this year (Siegel, R)

HUMBIO 42G. Post-Field Seminar: A Practical Next Step for Students Returning from Abroad—(Formerly 142G.) Forum for students who have recently worked abroad for two months or longer to share what they learned through international research, internship, or volunteer work. Lecture component connects international experiences with at-home activism and helps students explore directions for future work, either domestically or internationally, that builds on their experiences abroad. Students create a final product to benefit the community in which they worked and/or be used as an educational tool locally. Focus is on a practical next step for students interested in international development and related fields.

1 unit, Aut (Siegel, R)

HUMBIO 82A. Qualitative Research Methodology—Goal is to develop knowledge and skills for designing and conducting qualitative research studies including purposes, conceptual contexts, research questions, methods, validity issues, and interactions among these facets. Each student designs a qualitative research study.

3 units, Win (Wolf, J)

HUMBIO 82B. Advanced Data Analysis in Qualitative Research—For students writing up their own qualitative research. Students prepare a complete draft presenting their own qualitative research study including results, with reports drafted section by section, week by week. Class provides feedback, guidance, support.

1-3 units, Aut (Wolf, J)

STANFORD INTRODUCTORY SEMINARS

HUMBIO 84Q. Social Justice, Responsibility, Health—Stanford Introductory Seminar. Preference to sophomores. Reducing health disparities among segments of the US population is an over-arching goal of the Centers for Disease Control and Prevention (CDC). Evidence for and cause of existing health disparities; criteria for calling a health disparity unjust; and assignment of responsibility for maintaining or recovering good health.

4 units, Aut (Heaney, C)

HUMBIO 86Q. Love: An Exploration—Stanford Introductory Seminar. Preference to sophomores. Biological, psychological, religious, social and cultural perspectives on the concept of love. How love is conceptualized across cultures; love as the basis of many religions; different kinds of love; the biology of love; love as sickness; love and sex; the languages of love including art, literature, music, and poetry. Emphasis is on writing. Oral presentation.

3 units, Spr (Murray, A)

HUMBIO 87Q. Women and Aging—(Same as MED 87Q.) Stanford Introductory Seminar. Preference to sophomores. Biology, clinical issues, social and health policies of aging; relationships, lifestyles, and sexuality; wise women and grandmothers. Sources include scientific articles, essays, poetry, art, and film. Service-learning experience with older women. GER:EC-Gender

5 units, Win (*Winograd, C*)

HUMBIO 88Q. Neuroethics: Neurotechnology, Free Will, and the Privacy of Human Thought—Stanford Introductory Seminar. Preference to sophomores. Focus is on neurotechnology and pharmacology for imaging and manipulating the brain. Free will, moral responsibility, and the privacy of human thought. What can be done versus what should be done with pioneering neurotechnologies in research, clinical medicine, and in the public arena including education, athletics, and law.

3 units, Spr (*Illes Van Der Loos, J*)

HUMBIO 91Q. Neuroethology: The Neural Control of Behavior—Stanford Introductory Seminar. Preference to sophomores. Animal behavior offers insights about evolutionary adaptations. The origins of the study of animal behavior and its development to the present. Discussion of original research papers. The use and misuse of parallels between animal and human behavior. Possible field trip to observe animals in their natural habitat. GER: DB-NatSci

3 units, Aut (*Fernald, R*)

HUMBIO 94Q. The Nation's Health—Stanford Introductory Seminar. Preference to sophomores. Issues, policies, controversies, and proposed solutions that surround health policy, public health, and health care in the U.S. Factors affecting the health of Americans and the roles of medical care and public health organizations and financing. Weekly student presentations and final research paper.

3 units, Aut (*Heller, G*)

HUMBIO 95Q. Gender, Culture, and HIV/AIDS—Stanford Introductory Seminar. Preference to sophomores. Issues include biological, social, cultural, psychological, economic, and political aspects of HIV/AIDS. Introduction to research methods and grant-proposal writing skills. Student presentations. Prerequisite: PWR 1. GER:EC-Gender, WRITE-2

4 units, Win (*Brown, N*)

HUMBIO 96Q. The Death Penalty: Policy, Philosophy, and Controversy—Stanford Introductory Seminar. Preference to sophomores. Students participate in forensic research and case investigation, including DNA evidence, psychological and physiological development, mental and physical disabilities, and witness interviews. The philosophy, structure, and application of capital punishment in the U.S. Goal is to examine, understand, and challenge the issues involved in the death penalty from the perspective of involvement in a real case. Course not taught from a preconceived belief or political or philosophical agenda except to involve students in an intellectual challenge of policy and philosophy.

3-4 units, Spr (*Abrams, W*)

HUMBIO 97Q. Sport, Exercise, and Health: Exploring Sports Medicine—(Same as ORTHO 97Q.) Stanford Introductory Seminar. Preference to sophomores. Sports medicine is the practice of clinical medicine at the interface between health and performance, competition and well-being. While sports medicine had its origins in providing care to athletes, medical advances developed in care of athletes exerted a great effect on the nature and quality of care to the broader community. Topics include sports injuries, medical conditions associated with sport and exercise, ethics, coaching, women's issues, fitness and health, and sports science. Case studies.

3 units, Spr (*Matheson, G*)

HUMBIO 99Q. Becoming a Doctor: Readings from Medical School, Medical Training, Medical Practice—Stanford Introductory Seminar. For students considering medicine as a career. Goal is to acquaint students with medical school, training in medicine and surgery, and the practice of medicine and surgery. Topics include: how to pick a medical school and a residency; how medicine affects family life, especially children; the differences between surgical and medical specialties; the advantages

and disadvantages among academic/teaching, pure research, group practice, HMO, hospital staff, or private practice; malpractice concerns; and financial considerations.

4 units, Aut (*Zaroff, L*)

ADVANCED

Open to non-majors with the proper prerequisites. Human Biology majors have preference when enrollment is restricted. Courses numbered 100 through 189 fulfill the Human Biology upper-division requirement.

HUMBIO 112. Conservation Biology—(Formerly 119; same as BIOSCI 144.) Principles and application of the science of preserving biological diversity. Topics: sources of endangerment of diversity; the Endangered Species Act; conservation concepts and techniques at the population, community, and landscape levels; reserve design and management; conflict mediation. Case studies and local field trips. 3 units if taken without field trips. Prerequisites: BIOSCI 101, or HUMBIO 2A with consent of instructor. GER: DB-NatSci

3-4 units, Win (*Boggs, C; Launer, A*)

HUMBIO 114. Environmental Change and Emerging Infectious Diseases—(Formerly 179; same as ANTHSCI 179/279.) The changing epidemiological environment. How human-induced environmental changes, such as global warming, deforestation and land-use conversion, urbanization, international commerce, and human migration, are altering the ecology of infectious disease transmission, and promoting their re-emergence as a global public health threat. Case studies of malaria, cholera, hantavirus, plague, and HIV. GER:DB-SocSci

3-5 units, not given this year

HUMBIO 116. Controlling Climate Change in the 21st Century—(Same as BIOSCI 147/247, EARTHSYS 147/247.) The science, economics, and environmental diplomacy of global climate change. Topics: the science of climate change, climate change and global environmental law; global economic approaches to carbon abatement, taxes, and tradable permits; joint implementation, consensus, and division in the EU; gaining the support of China, other developing countries, and U.S. corporations; alternative energy and energy efficiencies for less carbon-intensive electric power and transport. GER: DB-NatSci

3 units, Win (*Schneider, S; Mastrandrea, M*)

HUMBIO 117. Human Behavioral Ecology—(Formerly 161; same as ANTHSCI 163/263.) Theory, method, and application in anthropology. How theory in animal behavioral ecology is applied to questions about human economic decision making in ecological and evolutionary contexts. Topics include decisions about foraging and subsistence, competition and cooperation, mating, and reproduction and parenting. GER:DB-SocSci

3-5 units, not given this year

HUMBIO 118. Ecological Anthropology—(Formerly 134; same as ANTHSCI 164/264.) Dynamics of culturally inherited human behavior and its relationship to social and physical environments. Topics include a history of ecological approaches in anthropology, subsistence ecology, sharing, risk management, territoriality, warfare, and resource conservation and management. Case studies from Australia, Melanesia, Africa, and S. America. GER:DB-SocSci

3-5 units, Win (*Bird, R*)

HUMBIO 119. Demography: Health, Development, Environment—(Formerly 137; same as BIOSCI 102.) Demographic methods and their application to understanding and projecting changes in human infant, child, and adult mortality and health, fertility, population, sex ratios, and demographic transitions. Progress in human development, capabilities, and freedoms. Relationships between population and environment. Prerequisites: numeracy and basic statistics. GER:DB-SocSci

3 units, Spr (*Tuljapurkar, S*)

HUMBIO 120. Health Care in America: The Organizations and Institutions that Shape the Health Care System—(Formerly 160.) Focus is on key organizations and institutions that shape U.S. health policy and health care delivery. How to assess options for health care reform.

4 units, Aut (*Barr, D*)

HUMBIO 120A. American Health Policy—(Formerly 160A.) Issues in health care policy making, the evolution of current systems, and theories underlying efforts for change. The national search for solutions to the problems of the uninsured, and the feasibility, options, and ramifications of universal health insurance in light of past experience and stakeholder views. Student presentations. Prerequisites: 120 (formerly 160) or consent of instructor. GER:DB-SocSci

3 units, Spr (Heller, G; Lee, P)

HUMBIO 120W. Federal Health and Environmental Programs—(Formerly 160W.) Priority to students going to Stanford in Washington during Winter Quarter. The role of federal agencies and Congress in health policy making, and the agencies' role in implementation of health and environmental policies. Emphasis is on federal policies, but includes federal-state relations. Enrollment limited to 25.

3 units, Aut (Lee, P)

HUMBIO 121. Economics of Health Improvement in Developing Countries—(Same as MED 262.) Application of economic paradigms and empirical methods to health improvement in developing countries. Emphasis is on unifying analytic frameworks and evaluation of empirical evidence. How economic views differ from public health, medicine, and epidemiology; analytic paradigms for health and population change; the demand for health; the role of health in international development. Prerequisites: background in economics and statistics, and consent of instructor.

5 units, Win (Miller, N)

HUMBIO 122. International Health Policy: Comparative National Health Care Systems—The structure and policies of national health care systems in Europe, Canada, China, and Japan. How other countries have addressed issues of organization, finance, and allocation of scarce health care resources. Limited enrollment. Prerequisites: 120 (formerly 160) or consent of instructor.

4 units, Win (Lee, P; Heller, G)

HUMBIO 123. Obesity in America: Clinical and Public Health Implications—(Formerly 133.) Interdisciplinary clinical, research, and policy approaches. The prevalence, predictors, and consequences of obesity and diabetes; biological and physiological mechanisms; clinical treatments including medications and surgery; and the relevance of behavioral, environmental, economic, and policy approaches to obesity prevention and control. Case studies.

3 units, Win (Kiernan, M; Stafford, R)

HUMBIO 124. Fat Nutrition and Current Health Concerns—(Formerly 139.) Relationships between dietary fats and heart disease, cancer, obesity, diabetes, and fitness. Proposed benefits of omega-3 fats and antioxidants. Historical and economic influences on fat nutrition. Prerequisites 3A and 4A, or equivalents.

3 units, Spr (Endemann, G)

HUMBIO 125. Current Topics and Controversies in Women's Health—(Formerly 150.) Interdisciplinary. Focus is on the U.S. Topics include: health research; bioethical, legal, and policy issues; sex and gender differences; scientific and cultural perspectives; social influences; environmental and lifestyle effects on health; and issues related to special populations.

3 units, Spr (Jacobson, M)

HUMBIO 126. Promoting Health Over the Life Course: Multidisciplinary Perspectives—(Formerly 148.) Disease prevention and health promotion topics pertinent to different stages of the life span with focus on nutrition, physical activity, obesity, and other risk factors. Focus is on scientific investigation, the application of behavioral science to risk reduction strategies, and the importance of health promotion as a social and economic imperative.

3 units, Aut (Alles, W; Stefanick, M)

HUMBIO 127A. Community Health: Assessment and Planning I—Major determinants of health in a community. Working with community partners to identify health issues and plan programs and policies to prevent disease and promote health. Service learning component involving students in community health assessment techniques.

4 units, Win (Heaney, C)

HUMBIO 127B. Community Health: Assessment and Planning II—(Formerly 117B.) Continuation of 127A. Service learning course with emphasis on conducting community health assessment and planning projects in collaboration with community-based organizations. Prerequisite: 127A.

4 units, Spr (Heaney, C)

HUMBIO 128. Community Health Psychology—(Formerly 178; same as PSYCH 101.) Social ecological perspective on health emphasizing how individual health behavior is shaped by social forces. Topics include: biobehavioral factors in health; health behavior change; community health promotion; and psychological aspects of illness, patient care, and chronic disease management.

4 units, Spr (Heaney, C)

HUMBIO 129. Critical Issues in International Women's Health—(Formerly 169.) Women's lives, from childhood through adolescence, reproductive years, and aging. Economic, social, and human rights factors, and the importance of women's capacities to have good health and manage their lives in the face of societal pressures and obstacles. Emphasis is on life or death issues of women's health that depend on their capacity to negotiate or feel empowered, including maternal mortality, violence, HIV/AIDS, reproductive health, and sex trafficking. Organizations addressing these issues.

4 units, Aut (Murray, A)

HUMBIO 129S. International Health—(Formerly 167.) Concepts of health and wellness and major descriptors and determinants of health status. International organizations and control programs, disease-related problems within population groups from an epidemiologic viewpoint, health care delivery methods, efforts to improve health through examination of current and previous programs and projects. Cultural, economic, and political contexts in international health. Prerequisites: Human Biology core or consent of instructor.

4 units, Win (Staff)

HUMBIO 130. Human Nutrition—(Formerly 120.) The study of food, and the nutrients and substances therein. Their action, interaction, and balance in relation to health and disease. Emphasis is on the biological, chemical, and physiological processes by which humans ingest, digest, absorb, transport, utilize, and excrete food. Dietary composition and individual choices are discussed in relationship to the food supply, and to population and cultural, race, ethnic, religious, and social economic diversity. The relationships between nutrition and disease; eating disorders; ethnic diets; vegetarianism; nutritional deficiencies; nutritional supplementation; phytochemicals; and food safety. Prerequisite: Human Biology core or consent of instructor.

4 units, Spr (Gardner, C)

HUMBIO 132. Functional Anatomy of Exercise—(Formerly 112; same as ORTHO 132.) Interdisciplinary approach. Anatomy of the body's major joints in the context of exercise and movement. Emphasis is on adaptations that occur with intensity and nature of exercise, age, and disease. Histology and properties of bone, muscle, tendons, ligaments, and other connective tissue. Physiology, pathology, and biomechanics. Enrollment limited to 40.

4 units, Spr (Garza, D)

HUMBIO 133. Human Physiology—(Same as BIOSCI 112/212.) The functioning of organ systems emphasizing mechanisms of control and regulation. Topics: structure and function of endocrine and central nervous systems, cardiovascular physiology, respiration, salt and water balance, exercise, and gastrointestinal physiology. Prerequisite: Biological Sciences or Human Biology core. GER: DB-NatSci

4 units, Win (Garza, D)

HUMBIO 135. Exercise Physiology—(Formerly 155.) How body systems respond to the stress of acute exercise and adapt to chronic exercise training. How the cardiovascular system adapts to optimize oxygen delivery and utilization, how muscles generate force and hypertrophy in response to training, how metabolic/biochemical pathways are regulated to support the increased energy demand of exercise. Theories on the causes of fatigue and muscle soreness, and on what limits human performance. Applied topics such as the effects of aging, gender, and environmental conditions (high altitude, heat, cold) on exercise capacity will also be discussed. Prerequisite: Human Biology Core, Biology Core, or equivalent; or consent of instructor.

4 units, Aut (Friedlander, A)

HUMBIO 135S. Applied Topics in Exercise Physiology and Metabolism—(Formerly 155S.) Reading and discussion of scientific research on student-selected topics. Emphasis is on study design. Student presentations. Summary paper. Enrollment limited to 12. Prerequisites: 135 and consent of instructor.

3 units, Spr (Friedlander, A)

HUMBIO 136. Neural Basis of Human Movement—How the central nervous system transforms planned movements into muscle activations, how these processes adapt through experience and learning, and how they are affected in health and disease. Focus is on how to read and critique the classical and current research literature and to contextualize findings in relation to human behaviors such as posture, reaching, and locomotion. The relevance of motor control issues in relation to enhancing sports performance, human factors, ergonomics, and medical rehabilitation.

3 units, Spr (Patten, C)

HUMBIO 139. Sports Medicine—(Formerly 159; same as ORTHO 239.) Sports, exercise, health, and medicine throughout the human performance continuum. Exercise as therapy; injuries and illnesses that result from sports and exercise. Sources include physiology, nutrition, psychology, and biomechanics. Medical problems exacerbated or caused by exercise and sport; maximizing performance in elite athletes; and population-based issues such as exercise and its relationship to health, women's issues, drugs in sport, and aging. Prerequisite: medical school enrollment, upper-division Human Biology standing, or consent of instructor.

4 units, Win (Garza, D; Matheson, G)

HUMBIO 141. Human Developmental Biology and Medicine—(Formerly 156; same as DBIO 156.) The biological, medical, and social aspects of normal and abnormal human development. Topics: in vitro fertilization and embryo transfer; gene and cell therapy; gametogenesis; pattern formation in the nervous system and limb development; gene and grand multiple pregnancies; prematurity, in utero effects of teratogens; sex determination and differentiation; growth control; gigantism and dwarfism; neural tube defects; cardiac morphogenesis; progress in the developmental biology of humans. Limited enrollment. Prerequisites: Human Biology or Biological Sciences core, or consent of instructor.

4 units, not given this year

HUMBIO 142. Adolescent Development—(Formerly 126.) Adolescence from sociological, psychological, and psychiatric perspectives. Topics: physical, physiological, and cognitive development; identity; peer group; parent/child relations; impact of school; vocational development; and problem outcomes (eating disorders, violence, and teen pregnancy). Prerequisite: 3B or PSYCH 1, or consent of instructor.

4 units, Win (Medoff, L)

HUMBIO 142A. Seminar on Problem Behavior in Adolescence—(Formerly 132.) Risk, protective factors, treatments, and intervention programs designed to ameliorate or prevent these problems. Externalizing behaviors (violence, delinquency, drug abuse, risk taking), internalizing problems (depression, eating disorders, suicide), and sexuality-related problems (teen pregnancy, date violence, STDs/HIV). Enrollment limited to 20. Prerequisite: 126 or consent of instructor.

4 units, Spr (Feldman, S)

HUMBIO 143. Adolescent Sexuality—(Formerly 123.) Developmental perspective. Issues related to scientific, historical, and cultural perceptions; social influences on sexual development; sexual risk; and the limitations and future directions of research. Sexual identity and behavior, sexually transmitted diseases including HIV, pregnancy, abortion, gay and lesbian youth, sex education and condom availability in schools, mass media, exploitative sexual activity, and difficulties and limitations in studying adolescent sexuality. Legal and policy issues, gender differences, and international and historical trends. Research project, including original data collection. Limited enrollment. GER:EC-Gender

3 units, Spr (Brown, N)

HUMBIO 144. Boys' Psychosocial Development—(Formerly 108.) From early childhood through adolescence. Emphasis is on how boys' lives and experiences are embedded within their interpersonal relationships and social and cultural contexts. Interdisciplinary approach including perspectives from fields such as psychology, sociology, anthropology, family studies, and education. GER:EC-Gender

4 units, Win (Chu, J)

HUMBIO 145. Birds to Words: Cognition, Communication, and Language—(Same as PSYCH 137/239A.) Although the communicative abilities of animals are determined by their genetic endowment, and human communicative skills dwarf those of other species, the relation between language and genetics remains the subject of debate. Is human language genetically specified? Or are human communicative powers just one facet of human cognitive advantage? Focus is on the nature and origins of language, using evidence from studies of animals, children, and adults. GER:DB-SocSci

3 units, Win (Fernald, A)

HUMBIO 146. The Anthropology of Death and Dying—(Formerly 106; same as ANTHSCI 175/275.) Death as a biocultural process. Funerary practices and attitudes toward dying in different societies. Issues include hospice care, palliative care, and euthanasia. Instructor is an anthropologist and registered nurse with hospice experience. GER:DB-SocSci

5 units, not given this year

HUMBIO 149. Aging: From Biology to Social Policy—(Same as ANTHSCI 171.) What people can expect when they join the ranks of the elderly. Issues include social security, medical care, lifespan, and the cultural, social, and economic consequences of a large elderly population in the U.S. and other countries. Films, service learning component. GER:DB-SocSci

5 units, Spr (Barnett, C)

HUMBIO 152P. HIV Prevention in East Africa Prefield Seminar—(Formerly 142P.) HIV risk reduction in Swahili-speaking Africa. Practical aspects of the biology of HIV, cultural issues, language, international field work, and educational and research methodologies. Open to students planning to travel in the region to work on service or other projects.

3 units, Spr (Siegel, R)

HUMBIO 153. Parasites and Pestilence: Infectious Public Health Challenges—(Formerly 103; same as MI 103.) Parasitic and other pestilence of public health importance. Pathogenesis, clinical syndromes, complex life cycles, and the interplay among environment, vectors, hosts, and reservoirs in historical context to understand public health policy initiatives aimed at halting disease transmission. Focus is on World Health Organization tropical disease targets including: river blindness, sleeping sickness, leishmaniasis, schistosomiasis, mycobacterial disease (tuberculosis and leprosy), malaria, toxoplasmosis, dracunculiasis, and intestinal helminthes. Guest lecturers with expertise in disease control.

4 units, Spr (Smith, D)

HUMBIO 154. Cancer Epidemiology—Epidemiological methods relevant to human research in cancer. The concepts of risk; case-control, cohort, and cross-sectional studies; clinical trials; bias; confounding; interaction; screening; and causal inference. Social, political, economic, and ethical controversies surrounding cancer screening, prevention, and research.

4 units, Win (Fisher, P)

HUMBIO 155A. Humans and Viruses—(Formerly 115A; same as MI 115A.) Concepts in biology and the social sciences, focusing on emerging infections, viral classification, transmission and prevention, vaccination and treatment, eradication of disease, viral pathogenesis, mechanisms of virally-induced cancer, and viral evolution. Topics: molecular biology of genetic shift and drift in influenza virus, cellular tropism of HIV, developmental biology of virally-induced birth defects, clinical aspects of infantile diarrhea, social aspects of the common cold, policy issues of blood antibody tests, factors in pathogenesis and transmission of prions. Prerequisites: Human Biology core or consent of instructor.

6 units, alternate years, not given this year

HUMBIO 155B. The Vaccine Revolution—(Formerly 115B; same as MI 115B.) Advanced seminar. Human aspects of viral disease, focusing on recent discoveries in the area of vaccine development and emerging infections. Journal club format: students select articles from primary scientific literature, write formal summaries, and synthesize it into a literature review on a specific topic. Emphasis is on analysis, experimental design, and interpretation of data. Oral presentations. Enrollment limited to 10. Prerequisite: 115A.

6 units, Win (Siegel, R)

HUMBIO 157. The Stem Cell: Science, Ethics, and Politics—The biology of stem cells. Their role in human development and potential for treating disease. Guest lectures by biologists, ethicists, and legal scholars. Prerequisite: Biology or Human Biology Core or consent of instructor.

3 units, Win (Nusse, R; Weissman, I; Scott, C)

HUMBIO 158. The Human Genome and Disease—(Formerly 114; same as BIOSCI 109A/209A.) The variability of the human genome and the role of genomic information in research, drug discovery, and human health. Concepts and interpretations of genomic markers in medical research and real life applications. Human genomes in diverse populations. Original contributions from thought leaders in academia and industry and interaction between students and guest lecturers. GER: DB-NatSci

3 units, Win (Heller, R)

HUMBIO 160. Human Behavioral Biology—(Same as BIOSCI 150/250.) Multidisciplinary. How to approach complex normal and abnormal behaviors through biology. How to integrate disciplines including sociobiology, ethology, neuroscience, and endocrinology to examine behaviors such as aggression, sexual behavior, language use, and mental illness. GER: DB-NatSci

6 units, alternate years, not given this year

HUMBIO 163. Neural Systems and Behavior—(Same as BIOSCI 163/263.) The field of neuroethology and its vertebrate and invertebrate model systems. Research-oriented. Readings include reviews and original papers. How animal brains compare; how neural circuits are adapted to species-typical behavior; and how the sensory worlds of different species represent the world. Prerequisites: BIOSCI 42, HUMBIO 4A, or equivalents. GER: DB-NatSci

4 units, alternate years, not given this year

HUMBIO 171. The Death Penalty: Human Biology, Law, and Policy—(Formerly 166.) Combines academic study with direct student involvement. Students participate in forensic research and case investigation, including DNA evidence, psychological and physiological development, mental and physical disabilities, and witness interviews. The philosophy, structure, and application of capital punishment in the U.S. Goal is to examine, understand, and challenge the issues involved in the death penalty from the perspective of involvement in a real case. Course not taught from a preconceived belief or political or philosophical agenda except to involve students in an intellectual challenge of policy and philosophy. May be repeated for credit.

3 units, Spr (Abrams, W)

HUMBIO 172A. Children, Youth, and the Law—(Formerly 102A.) The legal rights of children and adolescents in the U.S. and how those rights are defined, protected, and enforced through the legal process within the context of the developmental needs of children and youth and competing societal interests. Topics: the origins and definitions of children's rights; adoption; custody; the juvenile justice system (abused, neglected, and dependent children, status offenders such as runaways and truants, and minors accused of crimes); education; informed consent; health care; protection from harm and child welfare; due process; privacy, freedom of expression, and exercise of First Amendment rights. Interactive, using hypotheticals for discussion and analysis. A and B alternate annually; students may take one or both.

5 units, Win (Abrams, W)

HUMBIO 172B. Children, Youth, and the Law—(Formerly 102B.) How the legal rights of children and adolescents in America are defined, protected, and enforced through the legal process within the context of their developmental needs and competing societal interests. Topics: origins and definitions of children's rights; adoption; custody; the juvenile justice system; education; informed consent; health care; protection from harm and child welfare; due process; and privacy and freedom of expression. Interactive, using hypotheticals for discussion and analysis. A and B alternate annually; students may take one or both.

5 units, alternate years, not given this year

HUMBIO 173. Science, Business, Law: How Scientific Discovery and Innovation are Protected and Brought to Market—The interaction of science, business and law: how scientific ideas are protected by law; the rights of those who invent, develop, and finance scientific discovery; and how ideas are commercialized and brought to market. What kinds of research, discovery, and innovation are protected; who has rights that can be protected; what kinds of rights can be protected, and the kinds of protections that apply; how inventions are commercialized; and the success and failure of businesses based on scientific discovery.

3 units, Aut (Abrams, W)

HUMBIO 175. Health Care as Seen Through Medical History, Literature, and the Arts—The differences between disease as pathology and as the patient's experience. Topics include: patient-doctor relationships; medical technology; the changing focus on illness; gender issues; love, sex, and illness; mental illness; sick children; and death and dying.

4 units, Aut (Zaroff, L)

HUMBIO 175S. The Literature of Health Care: Novels and Theater of Illness—Illness and disease through novels and plays by authors including Shakespeare, Miller, Sophocles, Hemingway, and Camus. How sickness involves the patient, family, community, and state.

4 units, Spr (Zaroff, L)

HUMBIO 176. Illness Narratives—(Same as ENGLISH 185A.) Interdisciplinary. How the experience of illness is constituted at the intersection of biology and culture. The concept of narrative medicine as a context for examining fiction and nonfiction by patients including Virginia Woolf and William Styron, and by physicians including William Carlos Williams and Rafael Campo. Classic essays from medical journals or contemporary theorists. The intertwined perspectives of biology and culture in the context of unseen forces such as the healthcare expenditure and uneven access to it. GER:DB-Hum

3 units, Aut (Morris, D)

HUMBIO 178. Medical Anthropology—(Formerly 168; same as ANTHSCI 170.) The crosscultural study of the health beliefs and healing systems around the world. How social processes shape human health. GER:DB-SocSci, EC-GlobalCom

3 units, not given this year

HUMBIO 180. Human Osteology—(Same as ANTHSCI 133A/233A.) The human skeleton. Focus is on identification of fragmentary human skeletal remains. Analytical methods include forensic techniques, archaeological analysis, paleopathology, and age/sex estimation. Students work independently in the laboratory with the skeletal collection. GER: DB-NatSci

5 units, Win (*DeGusta, D*)

HUMBIO 181. The Evolution of Human Diet—(Same as ANTHSCI 173A/273A.) Human dietary choices and their consequences from ecological, epidemiological, and evolutionary perspectives. Topics include foraging theory, human community ecology, evidence for evolutionary design in physiological and motivational systems relating to feeding and nutrition, epidemiology of nutritional disorders, subsistence economies and modes of production, reduction diets, and health diets. GER:DB-SocSci

5 units, not given this year

HUMBIO 182. Evolution of Human Disease—(Same as ANTHSCI 172/272.) Seminar. Understanding human health and disease from an evolutionary perspective. Topics: Darwinian medicine, genes and disease, aging, infectious diseases, mental illness, and cancer. Prerequisites: 2A,B, upper division standing, or consent of the instructor. GER:DB-SocSci

5 units, not given this year

HUMBIO 183. Astrobiology and Space Exploration—(Formerly 107.) Evolution in the context of space and time, focusing on the emergence of life, intelligence, and civilization on Earth and possibly elsewhere. The biological, psychological, sociological, and philosophical issues of human space exploration. Integrates information from astrophysics, biochemistry, chemistry, evolutionary biology, geology, paleontology, physiology, psychology, and sociology. Guest lectures by scientists and astronauts from NASA Ames Research Center, Stanford, SETI, and Bay Area universities. Enrollment limited to 30. Prerequisite: one year college-level mathematics, physics, chemistry, biology, or psychology; or consent of instructor.

3-4 units, Win (*Rothschild, L*)

HUMBIO 186. Biological Clocks—(Formerly 182; same as BIOSCI 135.) The biological basis for endogenous timekeeping in organisms from flies to human beings. How biological clocks are constructed at the molecular, tissue, and behavioral levels; how these clocks interact with other physiological systems and allow animals to anticipate changes in their environment. Applications of circadian rhythm principles to treating human disorders and diseases such as cancer. Prerequisite: Biological Sciences or Human Biology core, or consent of instructor. GER: DB-NatSci

3 units, Spr (*Staff*)

HUMBIO 187. Human Diversity: A Linguistic Perspective—(Same as ANTHSCI 112.) The diversity and distribution of human language and its implications for the origin and evolution of the human species. The origin of existing languages and the people who speak them. Where did current world languages come from and how can this diversity be used to study human prehistory? Evidence from related fields such as archaeology and human genetics. Topics: the origin of the Indo-European languages, the peopling of the Americas, and evidence that all human languages share a common origin. GER:DB-SocSci, EC-GlobalCom

3 units, Spr (*Ruhlen, M*)

HUMBIO 189. Darwin Inquiry Project—(Formerly 115D.) Topics related to Darwin's life including his time in South America and his mystery illness. The intellectual foundations and individual characteristics associated with the development of the theory of evolution. Student presentations. Limited enrollment. Prerequisites: application; consent of instructor. Recommended: prior knowledge of the subject.

3-5 units, Aut (*Siegel, R*)

HUMBIO 193. Research in Human Biology—Independent research conducted under faculty supervision, in junior or senior year, normally but not necessarily in pursuit of an honors project. May be repeated for credit. Prerequisite: application available in student services office.

1-5 units, Aut, Win, Spr (*Staff*)

HUMBIO 194. Honors—Completion of the honors project, normally taken in the student's final quarter. First component: the honors thesis, a final paper providing evidence of rigorous research, fully referenced, and written in an accepted scientific style. Second component: participation in the honors symposium, including a 10-minute oral presentation followed by a brief question and answer session. Prerequisites: 193 or 199, and acceptance into the honors program.

1-10 units, Aut, Win, Spr (*Staff*)

HUMBIO 197. Human Biology Internship—Limited to and required of Human Biology majors. The internship is a supervised field, community, or lab experience of student's choosing, pre-approved by Human Biology faculty and student advisers, and initiated at least three quarters prior to graduation. May be repeated for credit. Prerequisite: Human Biology Core.

1-4 units, Aut, Win, Spr (*Staff*)

HUMBIO 198. Senior Tutorial in Human Biology—Reading for Human Biology majors in exceptional circumstances and under sponsorship of Human Biology associated faculty. Students must apply through Human Biology student services before registering. Reading list, paper, and evaluation required.

1-5 units, Aut, Win, Spr (*Staff*)

HUMBIO 199. Directed Reading/Special Projects—Human Biology majors must obtain a sponsor from the Human Biology associated faculty or the Academic Council. Non-majors and students who have not declared must obtain a sponsor only from the Human Biology associated faculty. Students must complete application in student services office.

1-4 units, Aut, Win, Spr (*Staff*)

HUMBIO 200. Teaching of Human Biology—For upper division undergraduates and graduate students. Practical experience in teaching Human Biology or serving as an assistant in a lecture course.

1-5 units, Aut, Win, Spr (*Staff*)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

BIOSCI 146. Population Studies

1 unit, Win (*Feldman, M*)

BIOSCI 149/249. Principles of Sleep Research

4 units, Win (*Heller, C*)

DBIO 202. Assisted Reproductive Technologies—(Same as OBGYN 202.)

1-3 units, Win (*Porzig, E*)

EDUC 369. Human Cognitive Abilities—(Same as PSYCH 133.)

3-4 units, Win (*Shavelson, R*)

ME 280. Skeletal Development and Evolution

3 units, Spr (*Carter, D*)

PHIL 60. Introduction to Philosophy of Science—(Same as HPS 60.)

5 units, Aut (*Longino, H*)

PHIL 78. Medical Ethics—(Same as ETHICSOC 78.)

4 units, Spr (*Jaworska, A*)

POLISCI 131. Children's Citizenship: Justice Across Generations—(Same as EDUC 158.)

5 units, not given this year

POLISCI 133. Ethics and Politics of Public Service—(Same as ETHICSOC 133.)

5 units, alternate years, not given this year

SOC 141A/241A. Social Class, Race, Ethnicity, Health

4-5 units, Win (*Barr, D*)

OVERSEAS STUDIES

Descriptions of these courses are in the “Overseas Studies” section of this bulletin or at the Overseas Studies office, 126 Sweet Hall. Students overseas are encouraged to participate in a wide range of internships and independent research as well.

AUSTRALIA

HUMBIO 111X. Coral Reef Ecosystems—(Same as BIOSCI 109Z, CEE 168X, EARTHSYS 120X.) GER:DB-EngrAppSci
3 units, Aut (*Ward, S; Fine, M; Anthony, K*)

HUMBIO 112X. Coastal Resource Management—(Same as BIOSCI 110Z, CEE 168Y, EARTHSYS 121X.) GER:DB-EngrAppSci
3 units, Aut (*Johnstone, R; Chiffings, T*)

HUMBIO 113X. Coastal Forest Ecosystems—(Same as BIOSCI 111Z, CEE 168Z, EARTHSYS 122X.) GER:DB-EngrAppSci
3 units, Aut (*Pole, M; Duke, N*)

OXFORD

HUMBIO 122X. Comparative Health Care Systems: UK and U.S.—GER:DB-SocSci
4 units, Win (*Senior, J*)

PARIS

HUMBIO 120X. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time—(Same as PUBLPOL 111P.) GER:DB-SocSci
4-5 units, Win (*Fessler, J*)

HUMBIO 177X. Erotic Art and Literature in 18th-Century France
3 units, Spr (*Katchadourian, H*)

PROGRAM FOR INDIVIDUALLY DESIGNED MAJORS

The Individually Designed Major program (IDM) is overseen by the School of Humanities and Sciences, located in Building 1. See also the “School of Earth Sciences” and the “School of Engineering” sections of this bulletin for IDMs in these curriculum areas.

This program is intended for currently registered undergraduates in good academic standing interested in pursuing an area of scholarly inquiry that falls outside the purview of an established academic department or program of the University. Students submit proposals for consideration by the Curriculum Committee. These should be intellectually coherent majors designed by the students themselves, with the assistance of faculty members of their choice. IDM students are required to complete a capstone requirement either as an honors project or a senior project. Information about proposal procedures, and the procedure for an honors project, is available at the Undergraduate Advising and Research, Sweet Hall, first floor, and the School of Humanities and Sciences (Building 1).

In designing a major, the student consults with three faculty members (all must be Academic Council members and be from three separate departments); one of the faculty members is selected as the student’s primary adviser. In helping the student design the major and in signing the proposal requesting approval from the Curriculum Committee, the faculty members are committing themselves to act as a regular academic advisory group for the student until graduation. The committee does not consider proposals without the approval of the faculty advisory group.

APPLICATION PROCEDURE AND CURRICULUM COMMITTEE REVIEW

The program is administered by the curriculum committee and the dean’s office in the School of Humanities and Sciences. Applications are due by the fifth week of the Spring Quarter of the sophomore year.

The committee acts in lieu of a regular department of the University.

This role involves certifying the scholarly merit of the program and includes the obligation to consider, approve, and recommend changes in each proposed major.

In carrying out its role, the committee reserves the right to reject proposals that, in its opinion, lack scholarly merit or are not clearly interdisciplinary. Occasionally, the committee must reject a proposal that, though of considerable academic merit, requires resources not available at Stanford. The committee also reserves the right to recommend additions to a student’s faculty advisory group.

ADVISING AND PROPOSAL

Students who are interested in the program and have met with an adviser at Undergraduate Advising and Research, are directed to the dean’s office in the School of Humanities and Sciences to speak with the Assistant Dean for Student Affairs. The final stage of the process is the application review by the Curriculum Committee.

The proposal should begin with a statement that describes the major, articulates the motivation for and the justification and ultimate goal of the major, and shows how the courses listed relate to and fulfill the major’s goal. This statement should be followed by a list of the proposed core courses to be counted toward the major and, as far as possible, the sequence in which they are to be taken. The proposal must be signed by the selected faculty advisory group; their signatures certify that they endorse the major as described in the proposal and agree to serve as the student’s permanent advisory group. The proposal must be accompanied by a letter of recommendation from each of the three advisers giving separate appraisals of the academic viability of the proposed major. The proposal must also include a current copy of the student’s unofficial transcript.

These requirements are in addition to the general guidelines discussed under “The Major” section of this bulletin. The monitoring of the requirements and subsequent changes to the original proposal must be approved by the Senior Associate Dean for Graduate and Undergraduate Studies.

THE GUIDELINES

To establish the IDM program as being fully equivalent to a Stanford B.A. or B.S. degree in an established department or program, the Senate of the Academic Council has approved specific requirements. The criteria for approval of proposals submitted include:

1. Each major shall consist of at least 75 units, all in courses at or above the 100 level (or their equivalent).
2. A maximum of 5 units of these 75 units may be taken on a credit/no credit basis.
3. A maximum of 8 units of these 75 units may be taken in practical or directed reading.
4. None of the 75 units can count towards another major or other special program.
5. Students are required to take a core sequence and WIM course in the department of one of their advisers.
6. There is a grade point requirement of 3.5.
7. The proposed major must constitute a coherent academic program that fulfills the student’s objectives and achieves a clear academic goal.
8. The proposed major must be comparable in quality and in academic rigor to degrees obtained by students in other degree-granting programs offered at Stanford.
9. The proposed major must achieve both breadth and depth within the academic discipline(s), involve interdisciplinary study, and be compatible with a liberal arts education.
10. The proposed major must not duplicate or be achievable through a major already offered by another degree-granting program or department.
11. Students must present evidence that demonstrates their ability to do independent work.
12. Students proposing individually designed majors must have at least three full quarters of undergraduate work remaining at Stanford after the date on which the proposal is approved by the committee.

INTERDISCIPLINARY STUDIES IN HUMANITIES

Director: Gregory Freidin (on leave Autumn, Winter)

Acting Director: Helen Brooks (Autumn, Winter)

Associate Director: Helen Brooks (Spring)

Steering Committee: (Chair, Autumn, Winter) Helen Brooks (English, Interdisciplinary Studies in Humanities); (Chair, Spring) Gregory Freidin (Slavic Languages and Literatures), Lanier Anderson (Philosophy), Cailin Creighton (Humanities Honors Program student representative), Dan Edelstein (French and Italian), Colin Garretson (Graduate Program in Humanities student representative), Heather Hadlock (Music), Liisa Malkki (Cultural and Social Anthropology), Hilton Obenzinger (English, VPUE), Fabrice Palumbo-Liu (Humanities Honors Program student representative), Linda Paulson (English), Rush Rehm (Drama), Jessica Riskin (History), Stephanie Schmidt (Graduate Program in Humanities student representative), James Sheehan (History), Brent Sockness (Religious Studies), Rega Wood (Philosophy)

Department Offices: Building 250, Room 251F

Mail Code: 94305-2020

Department Phone: (650) 723-3413

Email: idstudies.moore@stanford.edu

Web Site: <http://www.stanford.edu/group/HSP/GPH/>

Courses given in Interdisciplinary Studies in Humanities have the subject code HUMNTIES. For a complete list of subject codes, see Appendix.

The office of Interdisciplinary Studies in Humanities administers the following programs:

1. Honors Program in Humanities
2. Interdisciplinary Major in Humanities
 - a) Interdisciplinary Major
 - b) Interdisciplinary Major for Premeds
 - c) Interdisciplinary Major in Digital Humanities
 - d) Interdisciplinary Major in Philosophical and Literary Thought
3. Graduate Program in Humanities
 - a) Master of Arts
 - b) Joint Ph.D.
4. American Studies (see the "American Studies" section of this bulletin)
5. Medieval Studies (see the "Medieval Studies" section of this bulletin)
6. Program in Modern Thought and Literature (see the "Modern Thought and Literature" section of this bulletin)

UNDERGRADUATE PROGRAMS

To declare the major in Humanities, a student must first have been accepted into the Humanities Honors Program. See the "Honors Program" section below.

BACHELOR OF ARTS

THE MAJOR IN INTERDISCIPLINARY STUDIES IN HUMANITIES

A student who is a member of the Humanities Honors Program may choose to pursue the B.A. degree in Humanities through one of four concentration options: (1) the standard student designed thematic concentration; (2) the concentration designed for students who also plan to complete the established premedical curriculum for careers in the health sciences; (3) the concentration in digital humanities; or (4) the concentration in philosophical and literary thought. For all options, the B.A. degree conferred is in Humanities. Each student chooses a field that reflects the focus of study, which is noted on the transcript after degree conferral. Students who complete a thesis with a grade of 'B' or higher receive Honors in Humanities which is noted on the transcript and on the diploma. More detailed information may be found in the Procedures and Guidelines documents, available at the program office. Admission information and

recommended academic schedule follow below.

Unlike science disciplines, the humanities focus on the formation of ideas in the world of arts and letters, including literature, philosophy, history, and social thought. The goal of the program is to introduce students to disciplinary approaches and their intersections. Students who choose to major in Interdisciplinary Studies in Humanities have the opportunity to arrange their courses by thematic subject matter, genre, or historical period.

Each applicant to the major submits a study plan and statement of purpose which outlines the rationale for a particular field of study. The study plan should be worked out in consultation with the student's faculty mentor. Students who wish to major in Humanities should receive approval of their fields from the program before the end of the junior year.

Students may complete fields in the following; these fields are declared on Axxess and appear on the transcript but not on the diploma.

1. Culture and Politics
2. Digital Humanities (see below)
3. Early Modern Studies
4. Ecology, Philosophy, and Literature
5. Film, Literature, and Society
6. Medieval Studies
7. Modern Thought and Literature
8. Performance, Culture, and Society
9. Philosophical and Literary Thought (see below)
10. Philosophy and the Visual Arts

REQUIREMENTS FOR THE MAJOR

With the exception of the premed option, each program of study must include at least 12 courses for a minimum of 60 units over and above the requirements of the Humanities honors program (30 units). However, students may count one of the core seminars taken for the honors program (see below) as one of the courses toward the major if appropriate to the area of concentration.

INTERDISCIPLINARY MAJOR AND RECOMMENDED ACADEMIC SCHEDULE

The program of study for the thematic concentration includes:

1. A statement of purpose designating the field and outlining the rationale for the program of study.
2. Six courses in one of the three areas: literary, historical, or philosophical study.
3. Three courses in each of the other two areas above.
4. The requirements for the Humanities honors program.

If additional courses are needed to make up the 60 unit minimum, the student may take those courses in any of the three categories. Each program of study must be signed by a Stanford faculty member who has agreed to act as the student's academic adviser; the proposed program must then be approved by the director. Changes in the study plan must be approved by the student's adviser and kept on file in the program office.

For some fields, such as film studies or modern thought and literature, specific courses or types of courses may be strongly recommended. Consult the student handbook for such recommendations.

INTERDISCIPLINARY MAJOR FOR PREMEDS

The Interdisciplinary Major in Humanities offers an option for students who are preparing to attend medical school, but who wish to focus their studies in the humanities. This program of study gives students a coherent way to organize interdisciplinary interests by theme, nationality, or historical period. In addition, students choosing this track take all the courses usually required by medical schools (two years of organic and inorganic chemistry with labs, one year of physics, one year of biology with labs, and one or two courses to provide proficiency in quantitative skills as determined by a premed adviser), as well as course work in various humanities disciplines (eight courses and a minimum of 40 units) distributed as follows:

1. A statement of purpose choosing one of the fields listed above.
2. Four courses in the student's chosen field. Generally these four courses address different aspects of literature, history, and philosophy.

3. Three courses in medical ethics, history or philosophy of science, science, and the humanities.
4. One course in the arts.
5. The courses recommended by Undergraduate Advising and Research to fulfill medical school entrance requirements.
6. The requirements for the Humanities honors program.

INTERDISCIPLINARY MAJOR IN DIGITAL HUMANITIES

The development of new technologies has produced new topics for scholarly discussion in the humanities as well as new forms of cultural expression. The Interdisciplinary Major in Humanities offers a track for students who wish to concentrate study in the new field of Digital Humanities with the following course requirements:

1. A statement of purpose outlining a narrowly defined field of study and approved by a digital humanities adviser.
2. HUMNTIES 198 as one of the core seminars for the Humanities honors program.
3. CS 105, Introduction to Computers, or CS 106A, Programming Methodology, or equivalent.
4. Seven humanities courses relevant to the student's focus as articulated in the statement of purpose.
5. Three computer science or technology courses relevant to the student's focus; one course should have a technical focus, and one should deal with societal issues.
6. HUMNTIES 201, Digital Humanities Practicum, in preparation for the student's honors project.
7. The requirements for the Humanities honors program.

INTERDISCIPLINARY MAJOR IN PHILOSOPHICAL AND LITERARY THOUGHT

The concentration in philosophical and literary thought is available in association with the crossdisciplinary Program for the Study of Philosophical and Literary Thought. Students wishing to major in Humanities with this focus must consult with the director of that program, as well as the director or associate director of Interdisciplinary Studies in Humanities. Students prepare a program of study including at least 12 courses in literary, philosophical, and historical study, of which six courses are in philosophical or literary thought, and three in each of the other two categories. Requirements:

1. A statement of purpose defining a focus in philosophical or literary thought.
2. PHIL 81, Philosophy and Literature Gateway, which can be counted toward the course requirements for philosophical study or toward the requirements for literary study.
3. PHIL 80, Mind, Matter, and Meaning
4. Courses in philosophical study normally include at least one course from the PHIL 170 sequence and one course from the PHIL 180 sequence.
5. Courses in literary study should focus on one national literature.
6. Courses in historical study should include at least one course in the history of philosophy.
7. The requirements of the Humanities honors program.
8. Students in this track are strongly encouraged, where possible, to select one or two Interdisciplinary Core Seminars which are approved as courses of special relevance for philosophical and literary thought.

Interested students should consult the director of undergraduate studies in the Program for the Study of Philosophical and Literary Thought for a listing of courses of special relevance to the study of philosophy and literature (which includes some of the HUMNTIES interdisciplinary core seminars).

HONORS PROGRAM

The Honors Program in Humanities aims to heighten a sense of the relations among various humanistic disciplines, and to study issues in intellectual and cultural history through aesthetic, literary, historical, religious, social, and ethical perspectives.

ADMISSION

As an extradepartmental honors program, the Humanities Honors Program is open to any qualified undergraduate at Stanford, regardless of major. Interested students may obtain information from the program office. Students are encouraged to register for the program at the earliest opportunity and to take the Core Colloquium in the sophomore year. However, students may join the program as late as the junior year under certain circumstances (e.g., transfer students). Students enrolled in the crossdisciplinary majors affiliated with the Program for the Study of Philosophical and Literary Thought, whether through the Philosophy major or one of the literature majors, are encouraged to write their honors essays through the Humanities honors program. Students must meet the following entrance requirements before being admitted to the program:

1. Completion of at least two quarters of the Area One requirement, except in the case of transfer students, who will be granted exception.
2. A grade point average (GPA) of at least 3.3 (B+) in all course work in the humanities. Such course work includes any Area One sequence and all Program in Writing and Rhetoric sections; all courses in the departments of Art and Art History, Drama, and Music (except studio or performance courses); all courses in the departments of Asian Languages, Classics, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese (except first-year language courses); all courses in the departments of Comparative Literature, History, Philosophy, and Religious Studies; and all courses in the programs in Feminist Studies and Modern Thought and Literature.

REQUIREMENTS

1. Completion of HUMNTIES 100, Honors Core Colloquium: Humanities, 3 units, preferably in the sophomore year.
2. Two different seminars in the series 160-163 or 190-198: 8-10 units, sophomore or junior year. Both seminars must be completed by the end of the tenth quarter of undergraduate study in order for students to remain members in good standing.
3. At least one survey course in intellectual or cultural history, 4-5 units, in a field relevant to the anticipated topic of the senior essay, choosing from the 160-163 series or among courses in history, philosophy, religious studies, literature, and the arts. Students should consult the course list in the program office.
4. In order to develop the requisite knowledge and methodological background to write a Humanities honors essay, students must take, during their sophomore and junior years, the required Humanities honors courses and additional humanities courses in disciplines germane to their honors essays.
5. Enrollment in 200A, one unit each, Winter and Spring quarters of the junior year.
6. An honors essay on a topic approved by the Steering Committee (usually 5 units Autumn Quarter and 5 units Winter Quarter, senior year).
7. A minimum GPA of 3.3 (B+) in all courses taken for the Honors Program, as well as an overall minimum GPA of 3.0 (B) in all course work in order to remain in the program.

GRADUATE PROGRAMS

University requirements for the M.A. and Ph.D. degrees are described in the "Graduate Degrees" section of this bulletin.

MASTER OF ARTS

The Master of Arts program within the Graduate Program in Humanities is designed to broaden the student's academic background and cultural knowledge through a series of seminars that study intellectual history from the classical period to the modern era. Students gain added depth by taking four advanced courses within a defined field of study.

Application is made through the Interdisciplinary Studies in Humanities office. Application procedures and deadlines are available on the web at <http://gradadmissions.stanford.edu>. The M.A. program in Humanities is ideally completed as a half-time, two-year program, but under some circumstances it may be completed in one year as a full-time program. The department does not offer financial aid for the master's program.

REQUIREMENTS

1. Complete the five Interdisciplinary Studies in Humanities seminars (321-325).
2. Complete four graduate-level courses in an approved concentration to be determined in consultation with the director. At least one of these must be a graduate-level research seminar for which a research paper is required. Under "Statement of Purpose" on the application form, the candidate must indicate the field of study (for example, art history, early modern studies, philosophy, etc.) from which the graduate-level courses are drawn. The candidate must also note his or her qualifications for undertaking graduate study in that designated field. Once admitted, the student submits a proposed program of study to the director, specifying the particular courses to be taken. The proposed program is approved on its own merits to ensure that the chosen graduate courses are suited to the M.A. in Humanities.
3. Satisfactory completion of 298, the (Spring Quarter) Graduate Program in Humanities Symposium, or prior completion of the Symposium Paper by special permission.

The minimum number of units for the M.A. degree is 45. Additional elective units may be taken at the option of the student.

Undergraduates wishing to pursue the M.A. as part of a coterminal program should speak with the program administrator about the application procedures for coterminal students.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

JOINT PH.D.

The Graduate Program in Humanities (GPH) provides graduate students in different disciplines an opportunity to broaden their knowledge of intellectual and cultural history by focusing on texts and ideas which have been central to all humanistic disciplines from the ancient world to the present. The program's seminars usually focus on specific topics or issues in the context of historical, literary, philosophical, religious, and other disciplinary and theoretical orientations. The program provides a unique opportunity to study highly influential texts with a view to their relevance to the student's own disciplinary field.

GPH members must be students earning the Ph.D. in an academic department at Stanford. Doctoral students who complete the requirements for their departments and the GPH are awarded joint doctoral degrees.

Students may register for the program at any time, usually during the first quarter of graduate study. Members of the program are given first preference in registration for all of its offerings. Students complete the five GPH seminars (321-325). The course of study culminates in the GPH student symposium, which is developed and organized by the students in the program.

Although students in the GPH generally complete the program course work in their first two years of graduate study, requirements of some participating departments may necessitate completion of the GPH over three years. In some instances, one or more of the GPH seminars may fit within the requirements of the student's home department.

The following are participating departments in the program: Art and Art History, Classics, Comparative Literature, Drama, Education, English, French and Italian, German Studies, History, Modern Thought and Literature, Music, Philosophy, Religious Studies, Slavic Languages and Literatures, and Spanish and Portuguese. Doctoral students from other departments may participate with permission of their home departments and approval of the Director of Interdisciplinary Studies in Humanities.

REQUIREMENTS

1. Continue satisfactory work in the student's major field, in accordance with department requirements.
2. Complete the five GPH seminars. To qualify for candidacy, students should complete at least three seminars in the first two years of graduate residence. Exemption from, or permission to audit, a seminar may be secured by petition if the student can show coverage of the material at an advanced level.

3. Participate in the GPH student symposium, usually at the end of the second year of GPH course work (298; registration for units is optional).
4. One quarter of interdisciplinary teaching. Students may apply to TA an undergraduate Humanities course, or may petition to count a departmental teaching assistantship if the course reaches beyond the scope of a single discipline.
5. Reading knowledge of at least one foreign language, ancient or modern, to be certified in the first two years of graduate work.
6. Passing the University oral examination according to the schedule prescribed by the major department with one GPH representative, approved by the director, as a member of the examining committee.
7. Submission of a Ph.D. dissertation acceptable to a committee which includes one representative of the GPH, approved by the director.

COURSES

See quarterly *Time Schedule* for changes in listings.

HUMNTIES 100. Honors Core Colloquium: Humanities—Required of all students in the Humanities Honors Program. Introduction to Interdisciplinary Studies in Humanities through the study and application of a range of theoretical approaches to a major literary text. This year, the course focuses on *Hamlet*, including film adaptations. Experience in both disciplinary and interdisciplinary analysis and writing is designed to help prepare students to write their honors essays in Humanities. GER: DB-Hum

3 units, Win (Brooks, H)

HUMNTIES 161-163. Interdisciplinary Seminars: Texts in History—Students in the Humanities honors program may count any of these seminars toward the core seminar requirement or toward the requirement to complete one survey course in intellectual or cultural history.

HUMNTIES 161. Texts in History: Classics from Greece to Rome—(Same as CLASSGEN 163, DRAMA 161R.) Priority to students in the Humanities honors program. Ancient texts situated in their intellectual and cultural contexts. Readings include Homer's *Iliad* and *Odyssey*, plays of Aeschylus, Sophocles' *Antigone*, Euripides' *Medea*, Thucydides' *Peloponnesian War*, Plato's *Symposium*, Aristotle's *Poetics*, Virgil's *Aeneid*, Seneca's *Trojan Women* and *Agamemnon*, and Augustine's *On Christian Doctrine*. GER:DB-Hum

5 units, Aut (Rehm, R)

HUMNTIES 162. Texts in History: Medieval to Early Modern—(Same as ENGLISH 184C.) Priority to students in the Humanities honors program. The impact of change from the Middle Ages to the early modern world; how historical pressures challenged conceptions of artistic form, the self, the divine, and the physical universe, fostering interdisciplinary methods of interpretation. Texts include: Aristotle, *On the Soul*; Attar, *The Conference of the Birds*; Dante, *Inferno*; Chaucer, *Canterbury Tales*; Christine de Pizan, *The Book of the City of Ladies*; Letters of Columbus; Machiavelli, *The Prince*; Luther, *The Bondage of the Will*; Montaigne, *Essays*; Marlowe, *Doctor Faustus*; poems by John Donne and Lady Mary Wroth; Shakespeare, *Othello*; and works of art. GER:DB-Hum

5 units, Win (Brooks, H)

HUMNTIES 163. Texts in History: Enlightenment to the Present—Priority to students in the Humanities honors program. The relationship between intellectual history and literary creativity in the modern period. Texts include: Kant, *What is Enlightenment?*; Gibbon, *Decline and Fall of the Roman Empire*; Diderot, *Rameau's Nephew*; Scott, *The Highland Widow* and *The Two Drovers*; Dostoevsky, *Notes from Underground*; Tolstoy, *Hadji Murat*; Turgenev, *First Love*; Nietzsche, *On Truth and Lie*; Ibsen, *A Doll's House* and *Ghosts*; Joyce, *Dubliners*; Woolf, *Mrs Dalloway*; Kafka, *The Metamorphosis*; Freud, *Civilization and Its Discontents*; Beckett, *Waiting for Godot*; Wilson, *Ma Rainey's Black Bottom* and *Joe Turner's Come and Gone*; Goldstein, *Mazel*; and poetry. GER:DB-Hum

5 units, Spr (Thompson, B)

HUMNTIES 170. Media Studies Internship—Practical experience working with a film or media company for six to eight weeks. Students make arrangements with companies individually and receive the consent of the director of the Humanities honors program. Credit awarded for submitting a paper after completing the internship, focused on a topic relevant to the student's studies.

2-3 units, Aut, Win, Spr, Sum (Staff)

HUMNTIES 175. Individual Work

1-5 units, Aut, Win, Spr, Sum (Staff)

HUMNTIES 191-198. Interdisciplinary Core Seminars in Humanities—Students in the Humanities honors program must complete two different seminars from different areas before the end of the tenth quarter of undergraduate study. Other students may enroll if space allows and with the instructor's consent.

HUMNTIES 191S. Capital and Empire—(Graduate students register for HISTORY 339D; same as HISTORY 239D/339D.) Can empire be justified with balance sheets of imperial crimes and boons, a calculus of racism versus railroads? The political economy of empire through its intellectual history from Adam Smith to the present; the history of imperial corporations from the East India Company to Walmart; the role of consumerism; the formation of the global economy; and the relationship between empire and the theory and practice of development.

5 units, Spr (Satia, P)

HUMNTIES 193H. The Art of the Movies: Story, Drama, and Image—(Same as PHIL 193H.) A philosophical study of how movies coordinate and transform elements they borrow from older arts of literary narrative, live theater, and graphic illustration. Examples from the career of Alfred Hitchcock. GER:DB-Hum

4 units, Aut (Hills, D)

HUMNTIES 193Y. The Moral Status of Human Beings—(Same as PHIL 193Y.) The conviction that human beings have a unique moral status among animals, plants, and things, and that all humans have equal moral status is at the heart of ethics. Views which question these beliefs, attempts to defend them, and their implications for practical ethical issues such as abortion, euthanasia, new reproductive technologies, and the treatment of animals. GER:DB-Hum

5 units, Win (Jaworska, A)

HUMNTIES 194G. William Blake: Poet and Painter—(Same as ENGLISH 135E.) Introduction to the illuminated poetry of William Blake, romantic visionary, poet, artist, religious renegade, political revolutionary, philosopher, mythological historiographer, social misfit, and critic. GER:DB-Hum

5 units, Spr (Gigante, D)

HUMNTIES 194R. Photography and Literature—(Same as ENGLISH 182E.) How issues raised by birth of photography and photography's prehistory are manifested in 19th-century literature. Readings in photographic theory by Marx, Benjamin, Barthes, Sontag, and Batchen; poems by Wordsworth, Browning, and Tennyson; and novels by Shelley, Dickens, and Wilde. GER:DB-Hum

5 units, Spr (Rovee, C)

HUMNTIES 196Z. The Young Augustine—(Same as RELIGST 244.) Did the Middle Ages begin in Milan because of the conversion of the emperor's court orator, Aurelius Augustinus, to neo-Platonic philosophy? Or was it to Christianity? Sources include *The Confessions*, and the dialogues he wrote in the months following his conversion. GER:DB-Hum

5 units, Win (Sheehan, T)

HUMNTIES 197B. Camera as Witness: International Human Rights Documentaries—(Same as INTNLREL 141B, SLAVGEN 197B.) Rarely screened documentary films, focusing on global problems, human rights issues, and aesthetic challenges in making documentaries on international topics. Meetings with filmmakers. GER:DB-Hum

5 units, Aut (Bojic, J)

HUMNTIES 197C. Camera as Witness: A Forum for Global Dialogue—(Same as INTNLREL 141C, SLAVGEN 197C.) Challenges facing filmmakers documenting the struggle for human rights including communication of complex situations to an international audience, interpreting foreign cultures and politics, and filmmaker roles as artists, activists, and journalists. Meetings with filmmakers. GER:DB-Hum

5 units, Win (Bojic, J)

HUMNTIES 198S. Digital Humanities—(Same as CLASSART 198S.) How digital technologies are implicated in rethinking research and learning in the arts and humanities. Topics include: visualization, simulation and gaming, authoring, collaborative research, publication and dissemination, interactivity, and information management. Examples of cutting-edge research. Project-based. GER:DB-Hum

4-5 units, Spr (Shanks, M)

HUMNTIES 200A,B,C. Senior Research—Limited to Humanities honors students. A critical essay of about 15,000 words. Students develop a proposal beginning in Winter Quarter of the junior year, and research a topic and write the essay during senior year with the guidance of a faculty member, taking a total of 5 units each of 200B and 200C, spread out during senior year as best suits their schedules. Deadline for submitting essays is the first working day on or after May 15.

HUMNTIES 200A. Research Proposal—Preliminary planning and study. Student drafts a proposal in Winter Quarter of the junior year to submit to the committee in charge for suggestions regarding focus and bibliography. After revisions, the student resubmits a fully developed proposal to the committee for additional comment and/or final approval. 60 hours over two quarters are expected of students developing their essay proposals for 2 units, usually 1 unit each in Winter and Spring of the junior year. Students usually make revisions of some kind in either scope or formulation of the topic. Students overseas submit proposals and receive feedback by fax or email. WIM

1-2 units, Aut, Win, Spr (Staff)

HUMNTIES 200B. Senior Research—Regular meetings with tutor (thesis adviser). Prerequisite: 200A. WIM

1-5 units, Aut, Win, Spr (Staff)

HUMNTIES 200C. Senior Research—Regular meetings with tutor; submission of complete first draft at least two weeks before final deadline. Prerequisite: 200B. WIM

1-5 units, Aut, Win, Spr, Sum (Staff)

HUMNTIES 201. Digital Humanities Practicum—For Humanities majors concentrating in digital humanities. Work related to the honors thesis under the supervision of a Stanford faculty or staff member usually affiliated with the Stanford Humanities Lab. Must be approved by the Director of Interdisciplinary Studies in Humanities.

2-5 units, Aut, Win, Spr (Staff)

HUMNTIES 203-205. Seminars in Digital Humanities—These seminars were developed for students interested in digital humanities but are not counted as core seminars for the Humanities honors program.

HUMNTIES 203. Introduction to Critical Foresight—The development of critical foresight for use in society, business, and personal life. Concepts, tools, and experiences for leading the development of viable futures. How to describe and manage coming changes. Topics include: assessing historical visions of the future; the development of foresight methods; modern purveyors of foresight; building viable futures that can be analytically supported; and how to develop more complex futures by mixing methods.

3-5 units, Aut (Cockayne, W)

HUMNTIES 204. Redesigning the Future—(Same as ME 209.) Project-based. Futures and foresight methods; how the future can be envisioned, designed, and communicated. Integration of analysis with experience, foresight with design thinking, and building prototypes for the future. The role of future human needs. In previous years, students have designed the future of the university experience. Student teams of three or four. Design experience or fabrication skills not required.

3 units, Win (Cockayne, W; Leifer, L)

HUMNTIES 205. Innovation and Critical Foresight—Tools required to analyze and develop far future innovations. Commonly applied critical foresight methods and tools; current predictions of future innovations. Topics include: S-curves, trends, markers, and triggers; examples of currently perceived future innovations and their foundations; leading thinkers; and exercises to develop high probability future innovations that can be analytically supported.

3-5 units, Spr (Cockayne, W)

GRADUATE

HUMNTIES 275. Individual Work

1-5 units, Aut, Win, Spr, Sum (Staff)

HUMNTIES 298. Graduate Program in Humanities Symposium—Required of GPH doctoral and master's students. Participation in the student-organized symposium; presentation of a paper informed by texts addressed in GPH seminars.

1-3 units, Spr (Brooks, H)

HUMNTIES 299. Interdisciplinary Teaching—For doctoral students in the GPH. Supervised teaching to satisfy the program teaching requirement.

1-2 units, Aut, Win, Spr (Brooks, H)

HUMNTIES 321. Classical Seminar—(Same as CLASSGEN 321.) The dialogue between literature and philosophy in Greek and Roman cultures. Homer, Greek tragedy, Plato, Aristotle, Lucretius, Virgil, Augustine, Nietzsche's *Birth of Tragedy*, and Walcott's *Omeros*.

3-5 units, Aut (Nightingale, A)

HUMNTIES 322. Medieval Seminar—(Same as MEDVLST 322, RELIGST 338.) Medieval culture and ethical ideals extolled by medieval authors explicitly in philosophical and theological texts and implicitly in literary ones. Connections among ethics, cosmology, sacred history, anthropology, and soteriology in the medieval worldview. Medieval ethical beliefs as a window on medieval intellectual culture.

3-5 units, Win (Gelber, H)

HUMNTIES 323. Renaissance/Early Modern Seminar—Focus is on this period as it records the impact of major historical forces: the advent of printing; the reappropriation of classical thought; the expansion of trade; revolutions in religion; the exploration of uncharted realms of the self, the world, and the heavens; and the rise of historiography. Authors: Attar, de Pizan, Pico della Mirandola, Columbus, De Las Casas, Machiavelli, Luther, Montaigne, Marlowe, Donne, Shakespeare, and Galileo.

3-5 units, Spr (Brooks, H)

HUMNTIES 324. Enlightenment Seminar—(Same as HISTORY 334.) The Enlightenment as a philosophical, literary, and political movement. Themes include the origins and limits of knowledge and moral sentiment, the basis of citizenship, social engagement and political legitimacy, and relationships among religion, secularism, and the natural sciences. May be repeated for credit.

3-5 units, Aut (Riskin, J)

HUMNTIES 325. Modern Seminar—(Same as MUSIC 310H.) How the romantics saw aesthetic experience, especially music, as a means of reading the self and defining community and nation. These complementary functions of music, drama, and myth in modern culture epitomized in Wagner's *Tristan und Isolde* and *Die Meistersinger*. Nietzsche and Mann's notion that the conflicting claims of subjective and collective identity generate tensions that threaten the survival of culture. Primary readings include: stories and criticism of E.T.A. Hoffmann; Wagner's music dramas; poetry and essays of Charles Baudelaire; Nietzsche's *Birth of Tragedy*, *Beyond Good and Evil*, and *The Case of Wagner*; Mann's *Death in Venice* and *Doctor Faustus*; and Adorno's criticism.

3-5 units, Win (Grey, T)

DIVISION OF INTERNATIONAL COMPARATIVE AND AREA STUDIES

Director: Judith Goldstein

Executive Director: Tanya Boysen

Advisory Committee: Carl Bielefeldt (Religious Studies), Judith Goldstein (Political Science), Robert Gregg (Religious Studies), Stephen Haber (Political Science), Herbert Klein (History), Ian Morris (Classics)

Directors' Committee: Keith Baker (History), Carl Bielefeldt (Religious Studies), Judith Goldstein (Political Science), Robert Gregg (Religious Studies), Linda Hess (Religious Studies), Herbert Klein (History), Nancy Kollmann (History), Abbas Milani (Hoover), Richard Roberts (History), Aron Rodrigue (History), Kenneth Schultz (Political Science), Stephen Stedman (Freeman Spogli Institute for International Studies), Chao Fen Sun (Asian Languages), Michael Zimmerman (Religious Studies), Steven Zipperstein (History)

Division Office: Encina Hall West, Room 216

Mail Code: 94305-6045

Web Site: <http://ica.stanford.edu>

The Division of International Comparative and Area Studies (ICA) supports research and teaching in the cultures and societies of the world, and studies the problems facing developing societies as they seek to end their poverty and social and economic inequalities. ICA promotes new centers of teaching excellence in traditional areas of historical and cultural concerns, as well as promoting interdisciplinary activities related to developing new ideas for dealing with fundamental issues of justice, equality, and growth within nation states, cultures, and regions.

The Division of International Comparative and Area Studies is comprised of research centers, degree granting programs, and religion and cultural centers: Center for African Studies*; Center for East Asian Studies*; Center for Latin American Studies*; France-Stanford Center for Interdisciplinary Studies; Center for Russian, East European and Eurasian Studies*; Ford Dorsey Program in International Policy Studies*; International Relations*; Mediterranean Studies Forum; Moghadam Program in Iranian Studies; Asian Religions and Cultures; Stanford Center for Buddhist Studies; Abbasi Program in Islamic Studies; Taube Center for Jewish Studies*; Center for Modern and Contemporary European Studies; and the Center for South Asian Studies. Degree granting programs are denoted with an asterisk (*).

CENTER FOR AFRICAN STUDIES

Director: Richard Roberts

Web Site: <http://africanstudies.stanford.edu>

The Center for African Studies (CAS) coordinates an interdisciplinary program for undergraduates and graduate students. For further information, see the "Center for African Studies" section of this bulletin.

ASIAN RELIGIONS AND CULTURES

Director: Carl Bielefeldt

Office: Encina Hall West, Room 212

Phone: (650) 725-6025

Mail Code: 94305-6045

Web Site: <http://ica.stanford.edu/?q=arc>

Asian Religions and Cultures (ARC) is an interdisciplinary initiative dedicated to the enhancement of Stanford's resources in Asian humanities. ARC consists of research, curricular support, and academic and public events. ARC seeks to involve many University constituencies, including some not specifically concerned with Asian studies, in the integration of Asian humanities into research and teaching. The initiative also looks beyond the University to develop programs of more general interest.

CENTER FOR BUDDHIST STUDIES

Director: Michael Zimmermann
Office: Building 70, Room 71E
Phone: (650) 736-1301
Mail Code: 94305-2165
Web Site: <http://ica.stanford.edu/?q=scbs>

The Stanford Center for Buddhist Studies (SCBS) serves to coordinate, support, and develop the University's resources for Buddhist Studies in scholarly research, academic communication, teaching, and public outreach. The center supports individual and team research projects for faculty, students, and visiting fellows. It houses a reference collection and reading room and sponsors lectures, conferences, symposia, workshops, and seminars. The center works closely with the Department of Religious Studies, the Asian Religions and Cultures initiative, the Buddhism in the Modern World Program, and the Group in Buddhist Studies at UC Berkeley.

CENTER FOR EAST ASIAN STUDIES

Director: Chao Fen Sun
Web Site: <http://ceas.stanford.edu>

The Center for East Asian Studies (CEAS) seeks to increase interdisciplinary communication among scholars whose research, teaching, or study focuses on East Asia. CEAS offers bachelor's and master's degree programs. It sponsors programs that link the University's East Asia resources with civic groups, secondary schools, local colleges, and the public.

For further information, see the "Center for East Asian Studies" section of this bulletin.

FRANCE-STANFORD CENTER FOR INTERDISCIPLINARY STUDIES

Director: Keith Baker
Office: Building 260, Room 105
Phone: (650) 725-3029
Mail Code: 94305-2010
Web Site: <http://ica.stanford.edu/?q=francestanford>

The France-Stanford Center for Interdisciplinary Studies, founded in partnership with the French Ministry of Foreign Affairs, aims to bridge the disciplines of the humanities, social sciences, sciences, engineering, business, and law, addressing historical and contemporary issues of significance for France and the United States. The center brings together Stanford faculty and students and academics in France to advance collaborative research and foster interdisciplinary inquiry. Its programs include conferences, support for collaborative research projects, internships, exchanges, lectures, and seminars.

INTERNATIONAL POLICY STUDIES

Director: Stephen J. Stedman
Web Site: <http://ica.stanford.edu/?q=ips>

Ford Dorsey International Policy Studies (IPS) is a master's program that seeks to train the next generation of policy analysts in analytical and policy skills and the substantive issues that face the world today.

For further information, see the "International Policy Studies" section of this bulletin.

INTERNATIONAL RELATIONS

Director: Kenneth Schultz
Web Site: <http://ica.stanford.edu/?q=internationalrelations>

International Relations (IR) is an interdisciplinary undergraduate major focusing on changing political, economic, and cultural relations within the international system in the modern era.

For further information, see the "International Relations" section of this bulletin.

PROGRAM IN IRANIAN STUDIES

Director: Abbas Milani
Office: Encina Hall West, Room 206
Phone: (650) 736-0501
Mail Code: 94305-6045
Web Site: <http://ica.stanford.edu/?q=iranianstudies>

The Hamid and Christina Moghadam Program in Iranian Studies at Stanford fosters the interdisciplinary study of Iran as a civilization, one of the oldest in the world. The program combines pedagogy, policy analysis, and research on all aspects of Iran's past, present, and future. The program organizes lectures and student research conferences on Iran.

PROGRAM IN ISLAMIC STUDIES

Director: Robert Gregg
Office: Encina Hall West, Room 214
Phone: (650) 736-8169
Mail Code: 94305-6045
Web Site: http://www.stanford.edu/dept/islamic_studies/

The mission of the Sohaib and Sara Abbasi Program in Islamic Studies is to serve as a forum for interdisciplinary research and teaching in Islamic studies, complemented by seminars, colloquia and public lectures. The program seeks to illuminate Islamic history from its beginnings to the 21st century, the religion of Islam in its many aspects, and the diversity of Muslim cultures and societies, past and present, not only in the Middle East but also including South and Southeast Asia, Africa, Europe, and America. In addition to geographical breadth, the program promotes the use of scholarly resources from both the humanities and the social sciences. Participating faculty and students bring perspectives and methods from academic fields, including anthropology, art, economics, history, international relations, languages, law, literature, philosophy, political science, and religious studies.

CENTER FOR JEWISH STUDIES

Director: Steven Zipperstein
Web Site: <http://www.stanford.edu/dept/jewishstudies/>

The interdisciplinary Taube Center for Jewish Studies coordinates and promotes the study of all aspects of Jewish life. The center offers an undergraduate minor.

For further information, see the "Taube Center for Jewish Studies" section of this bulletin.

CENTER FOR LATIN AMERICAN STUDIES

Director: Herbert S. Klein
Web Site: <http://las.stanford.edu/>

The Center for Latin American Studies at Stanford University (CLAS) offers academic programs for students, coordinates academic conferences and lectures, and fosters interdisciplinary research for students and faculty through fellowships and funding opportunities. The center offers an undergraduate minor, an interdisciplinary honors certification for undergraduates, and a master's degree.

For further information, see the "Center for Latin American Studies" section of this bulletin.

MEDITERRANEAN STUDIES FORUM

Director: Aron Rodrigue
Office: Encina Hall West, Room 206
Phone: (650) 736-0501
Mail Code: 94305-6045
Web Site: <http://ica.stanford.edu/?q=mediterraneanstudies>

The Mediterranean Studies Forum encourages scholars to explore the interplay among societies, cultures, and communities around the Mediterranean Basin from the Middle Ages to the present. Its focus is on all aspects of co-existence and conflict that have marked these encounters in the empires, port cities, nation states, and transregional and transnational social, religious, cultural, and economic contexts of N. Africa, the Levant, the Balkans, and southern Europe. It is also interested in the relations of the Mediterranean with other regions and areas of the world. The central goal

of the forum is to contribute to interfield and interdisciplinary dialogue among scholars of these areas through lectures, colloquia, workshops, conferences, and publications.

CENTER FOR MODERN AND CONTEMPORARY EUROPEAN STUDIES

Director: Aron Rodrigue
Office: Encina Hall West, Room 206
Phone: (650) 736-0501
Mail Code: 94305-6045

The Center for Modern and Contemporary European Studies is a multidisciplinary institute committed to the examination of European society, culture, politics, diplomacy, and security. The center's goal is to develop Stanford's contribution to the study of Europe's history and contemporary position as a global power by bringing together students and scholars from the humanities and the social sciences, policy makers, diplomats, and journalists. The center sponsors visiting professors, intellectuals, and dignitaries from Europe to teach undergraduate and graduate courses at Stanford on themes related to European history, culture, and current events.

CENTER FOR RUSSIAN, EAST EUROPEAN AND EURASIAN STUDIES

Director: Nancy S. Kollmann
Web Site: <http://CREEES.stanford.edu>

The Center for Russian, East European and Eurasian Studies (CREEES) offers an undergraduate minor and a one-year master's program in interdisciplinary area studies

For further information, see the "Center for Russian, East European and Eurasian Studies" section of this bulletin.

CENTER FOR SOUTH ASIAN STUDIES

Co-Directors: Carl Bielefeldt, Linda Hess
Center Office: Encina Hall West, Room 212
Phone: (650) 725-6025
Mail Code: 94305-6045

The Center for South Asian Studies serves to coordinate and develop Stanford's resources for the study of South Asia across all the disciplines in the School of Humanities and Sciences. It works closely with departments and other units of the University to increase faculty strength, support research, enhance the curriculum, build the library collection, and sponsor programs and events.

COURSES

ICA 100. Current International Comparative and Area Issues — Seminar series. Scholars present current methodological and substantive issues from different part of the world in an international and comparative context. May be repeated for credit.

1-2 units, Aut, Win, Spr (Staff)

INTERNATIONAL POLICY STUDIES

Director: Stephen Stedman (Freeman Spogli Institute for International Studies)

Associate Director: Martin W. Lewis (International Policy Studies)

Executive Committee Co-chairs: Coit D. Blacker (Freeman Spogli Institute for International Studies), Judith L. Goldstein (Political Science)

Lecturers: Chonira Aturupane, Gili Drori, John Dunlop, Keith Hansen, Moonhawk Kim, Peter Lorentzen, Kenneth Mcelwain

Affiliated Faculty: Jonathan Bendor (Business), Gordon Chang (History), Larry Diamond (Hoover Institution), Lynn Eden (Sociology), Walter P. Falcon (Freeman Spogli Institute for International Studies), James Fearon (Political Science), Larry Goulder (Economics), Stephen H. Haber (Political Science), David J. Holloway (History, Political Science), Simon Jackman (Political Science), Timothy Josling (Freeman Spogli Institute for International Studies), Terry Karl (Political Science), Stephen D. Krasner (Political Science), Gail Lapidus (Freeman Spogli Institute for International Studies), Beatriz Magaloni (Political Science), Isabela Mares (Political Science), Michael McFaul (Political Science), Ronald I. McKinnon (Economics), Norman Naimark (History), Rosamond Naylor (Freeman Spogli Institute for International Studies), Roger G. Noll (Economics, emeritus), Jean Oi (Political Science), Daniel Okimoto (Political Science), Robert A. Packenham (Political Science), William Perry (Management Science and Engineering), Douglas Rivers (Political Science), Richard Roberts (History), Scott D. Sagan (Political Science), Michael Tomz (Political Science), Andrew Walder (Sociology), Jeremy Weinstein (Political Science), Ann Wren (Political Science)

Visiting Professor: Richard Steinberg

Visiting Associate Professor: Allison Danner

Other Affiliation: Christophe Crombez (Freeman Spogli Institute for International Studies), Jonathan Greenberg (Law), Katherine Jolluck (History), Kathryn Stoner-Weiss (Freeman Spogli Institute for International Studies)

Program Office: Encina Hall West, Room 216

Mail Code: 94305-6045

Phone: (650) 723-4547

Web Site: <http://ica.stanford.edu/?q=ips>

Courses given in International Policy Studies have the subject code IPS. For a complete list of subject codes, see Appendix.

GRADUATE PROGRAM MASTER OF ARTS

International Policy Studies (IPS) is an analytical interdisciplinary program focusing on international policy analysis. Its goal is to provide students with exposure to issues that they face in international business and public policy, and to develop skills and knowledge to address those issues. Students may focus on: the international economic system; developing and transition societies; security issues; or the world environment.

IPS requires completion of the core and cognate requirements which normally amount to 48 units of credit. Additional units are required for students who have not fulfilled prerequisites for these requirements.

University requirements for the M.A. degree are described in the "Graduate Degrees" section of this bulletin.

ADMISSION

IPS is designed for students who have a strong undergraduate background in economics and political science. To enroll in the program, students must have taken at least one undergraduate course in international relations, as well as calculus-based undergraduate courses in statistics, microeconomics, and macroeconomics. Stanford courses satisfying these

requirements are POLISCI 1 or IPS 204, and ECON 51, 52, and 102A. In addition, to fulfill the program requirements in one year, students must have completed one advanced undergraduate course in international economics, and one in either security studies or international political economy. Stanford courses that meet these requirements are ECON 165 and POLISCI 110A,B,C, or D.

Applicants from schools other than Stanford or applicants from Stanford who did not apply in their senior year should submit a graduate admission application including a statement setting forth relevant personal, academic, and career plans and goals; official transcripts; three letters of recommendation; Graduate Record Examination (GRE) scores; and a writing sample of at least ten pages. TOEFL scores are required of applicants for whom English is not their first language or who did not attend an undergraduate institution where English is the language of instruction. To apply or for information on graduate admission, see <http://gradadmissions.stanford.edu>. Applicants are expected to have a B.A. or B.S. degree from an accredited school. Applications for admission in Autumn Quarter must be filed with supporting credentials by January 9, 2007.

Undergraduates at Stanford may apply for admission to the coterminal master's program in IPS when they have earned a minimum of 120 units toward graduation, including AP and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. The coterminal application requires the following supporting materials: two letters of recommendation from University faculty, a writing sample of at least ten pages, and a statement of relevant personal, academic, and career plans and goals. Applications must be filed together with supporting materials by January 9.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

DEGREE REQUIREMENTS

To receive the M.A. degree in International Policy Studies, students must complete the items below. These requirements entail 23 units of core courses and an additional 25 units from the cognate curriculum. These courses have the following prerequisites: ECON 51, 52, 102A or POLISCI 350A, and ECON 165; POLISCI 1 or IPS 204 and POLISCI 110A,B,C, or D.

Core—

1. Seminar requirement: IPS 200, Issues in International Policies (3 units)
2. Skills requirement: any three of the following courses (15 units)— IPS 205; POLISCI 350A,B,C, 352
3. International economics requirement (5 units): IPS 202, Topics in International Macroeconomics; or IPS 203, Issues in International Economics

Cognate Curriculum—Students must take 25 units of other IPS approved courses for their cognate. All students must take IPS 204 as part of the cognate curriculum. At least 15 units must be in one of the following areas of specialization and 10 units must be in two other areas of specializations (a complete list of the courses in these areas is available in the IPS program office):

International Political Economy
 Conflict/Security Studies
 Political and Economic Development
 Public Organizations and Policy Implementation
 World Environmental Policy

Area Specialization—Students may earn an area specialization certificate by completing 15 additional units of coursework focusing on one region. Options include Asia, Eastern Europe/Russia, Latin America, and Western Europe. Area specialization units may not be counted toward the cognate curriculum requirement.

Master's Thesis—Students are not required to write a master's thesis; however, students may register for 10 units of thesis research under the guidance of a faculty member. Thesis proposals must be approved by the program director. Thesis units may not be counted toward the cognate curriculum requirement. Students should register for IPS 290.

In addition, students must meet the following deadlines:

1. Complete and file the IPS Program Proposal, available in the IPS office, no later than the second week of Autumn Quarter. Students should list all courses to be used to fulfill the IPS requirements, including the required IPS 200 course. Coterminal students must list unduplicated courses, that is, courses not counted toward an undergraduate degree.
2. Use Axxess to file an Application to Graduate by the appropriate deadline.

Grade Requirements—All courses to be counted toward the degree, except for the core seminar, must be taken for a letter grade and receive a grade of 'B-' or higher.

Financial Aid—Undergraduates may petition for a fifth year of financial aid as coterminal students. Note that these petitions can only be made if the undergraduate degree has not been conferred. University-based financial aid is not normally available for graduate students entering the IPS program.

COURSES

See the IPS degree requirements in the IPS program office or at <http://ica.stanford.edu/q/?=ips> for updated information on additional courses.

IPS 200. Contemporary Issues in International Policies—For IPS students only. Lecture series. Scholars present their analysis of major international public policy issues. May be repeated for credit.

1 unit, Aut, Win, Spr (Stedman, S)

IPS 202. Topics in International Macroeconomics—Topics: standard theories of open economy macroeconomics, exchange rate and stabilization policies, the economics of monetary unification and the European Monetary Union, and emerging markets financial and currency crises.

5 units, Aut (Aturupane, C)

IPS 203. Issues in International Economics—Topics in international trade and international trade policy: trade and growth, regionalism versus multilateralism, the political economy of trade policy, strategic trade policy, trade and labor, and trade and the environment.

5 units, Win (Aturupane, C)

IPS 204. Theories and Concepts in International Relations—Seminar. Theoretical approaches and empirical issues in the study of world affairs. Applications to problems of cooperation and conflict. Issues include violent conflicts, trade and finance, the environment and human rights, and normative theories of international relations surrounding these issues.

5 units, Aut (Kim, M)

IPS 205. Applied Game Theory for Political Economy—Solution concepts from non-cooperative game theory with applications in economics and political science. Imperfect information and signaling, off equilibrium path beliefs, and mechanism design. Emphasis is on application over formal proof. Prerequisite: background in non-cooperative game theory.

5 units, not given this year

IPS 207. Governance, Growth, and Development—The concept of governance and the economics of corruption. Neoclassical and endogenous growth theory and development. The relationship between governance and growth, and development; the resultant policy implications through theoretical and empirical research, and country case studies.

5 units, Spr (Aturupane, C)

IPS 219. The Role of Intelligence in U.S. Foreign Policy—How intelligence supports U.S. national security and foreign policies. How it has been used by U.S. presidents to become what it is today; organizational strengths and weaknesses; how it is monitored and held accountable to the goals of a democratic society; and successes and failures. Current intelligence analyses and national intelligence estimates are produced in support of simulated policy deliberations.

5 units, Spr (Hansen, K.)

IPS 220. Comparative Political Institutions—How the rules of the game affect political competition and policy output. How formal political institutions determine who gets into power and how much authority they have; how these institutions arise, what they do, and how they can be manipulated. Topics include the influence of electoral rules on partisan competition, why the difference between parliamentary and presidential systems matter, the costs and benefits of federalism, and principal-agent relationships among voters, elected representatives, and bureaucrats. Prerequisite: familiarity with statistical analysis.

5 units, Win (Mcelwain, K)

IPS 222A. The Political Economy of the European Union—EU institutions, the legislative process, policies, relations with the U.S., and enlargement and the future of the EU. History and theories of EU integration. Democratic accountability of the institutions, and the emerging party system. Principal policies in agriculture, regional development, the internal market, single currency, and competition. Emphasis is on policies that affect the relations with the U.S. including trade and security. Results of the EU's constitutional convention.

5 units, Win (Crombez, C.)

IPS 225. Japanese Politics and Political Economy—How the postwar Japanese experience confirms or defies accepted wisdom in comparative and international politics. Why has a once-robust economy been flat for over a decade; is political mismanagement to blame? What are the causes and consequences of the LDP's single-party dominance? Why has Japan not leveraged its economic weight into political power? Prerequisites: course in each of comparative politics and international relations.

5 units, Aut (Mcelwain, K)

IPS 230. Science, Technology, and Development—(Same as INTNLREL 130.) Global and sociological perspectives on science and technology expansion, comparing nations and regions. Social features such as gender equity; and social impact economic development strategies such as tech incubators, the triple helix model, and UN initiatives. Democratization, human rights, welfare of local populations, and national security. Policy issues, the digital divide, development debates, commodification of the public good, and notions of social change.

5 units, Aut (Drori, G)

IPS 231. Globalization and Organizations—(Same as INTNLREL 131.) How organizations act as the carriers of globalization processes by expanding worldwide, proliferating social procedures, establishing isomorphic structures, and diffusing cultural patterns. Political structures, international relations, commercial organizations, cultural institutions. Global organizational expansion, forms of organizational adaptation, notions of national sovereignty under global organizational expansion, and forms of national and international governance. Studies of global organizational fields including science, rights, environment, development, combining theoretical, comparative, and case study pieces.

5 units, Spr (Drori, G)

IPS 233. Introduction to Comparative and International Political Economy—Major theoretical approaches and empirical issues in international economic policies and outcomes. Review of economic theories underlying political conflicts. Topics include trade, monetary relations, sovereign debt, investment, migration and development. Comparison of developed and developing countries.

5 units, Spr (Mcelwain, K)

IPS 236. The Chinese Economy—China's ongoing economic transformation. Microeconomic issues such as agricultural reform, rural enterprises, privatization, development of financial and goods markets, social welfare, role of foreign investment, and legal and institutional environment. Macroeconomic issues such as trade, financial openness, and inflation. Political economy considerations in policy formulation. Prerequisites: ECON 51, 52, 102B, or equivalents.

5 units, Spr (Lorentzen, P)

IPS 241A. Theories of International Law—Competing theories of international law, including approaches based on natural law, positivism, the Grotian tradition, realism, rational institutionalism, liberalism, social

construction, and critical theory; evaluations based upon explanatory power, parsimony, and prescriptive implications. How international legal arguments are made through each theoretical perspective. Primary and secondary materials by international law theorists and political scientists. Term paper.

5 units, Win (Steinberg, R)

IPS 241B. International Criminal Justice—Focus is on the International Criminal Court, international criminal tribunals conducted at Nuremberg and Tokyo, and tribunals for the former Yugoslavia and Rwanda. Legal and political dimensions of the developing system of international criminal law. Policy questions surrounding international prosecutions and alternatives to prosecution.

5 units, Spr (Danner, A.)

IPS 249. The Economics and Political Economy of the Multilateral Trade System—The historical development of the multilateral trade system, the current agenda of the World Trade Organization, and prospects for trade liberalization. Emphasis is on the economic rationale for multilateral trade rules, the political problems facing countries in supporting further liberalization, and the challenges to the legitimacy of WTO procedures and practices. Issues include the greater participation of developing countries, the impact of new members, and the relationship between the WTO and other multilateral bodies. Guest speakers; student research paper presentations.

5 units, Win (Josling, T.)

IPS 266. Russia and Islam—Seminar. Focus is on 1985 to the present. The policies of Gorbachev toward the Muslim populace of the Soviet Union; how post-communist Russia under Yeltsin and Putin has dealt with its Muslim minorities; and the relationship of Russia to the newly independent states of Central Asia and the South Caucasus after the breakup of the USSR in 1991. The two major wars which Russia has fought with the secessionist Russian autonomous republic of Chechnya.

5 units, Win (Dunlop, J.)

IPS 290. Master's Thesis—IPS students only. May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

IPS 299. Directed Reading—IPS students only. May be repeated for credit.

1-5 units, Aut, Win, Spr, Sum (Staff)

IPS 314S. Decision Making in U.S. Foreign Policy—(Same as POLISCI 314S.) Priority to IPS students. Formal and informal processes involved in U.S. foreign policy decision making. The formation, conduct, and implementation of policy, emphasizing the role of the President and executive branch agencies. Theoretical and analytical perspectives; case studies.

5 units, Spr (Blacker, C)

COGNATE COURSES

See respective department listings for course descriptions. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

CEE 171. Environmental Planning Methods

3 units, Win (Ortolano, L)

ECON 106. World Food Economy

5 units, Win (Falcon, W; Naylor R)

ECON 155. Environmental Economics and Policy—(Same as EARTH-SYS 112.)

5 units, Spr (Gurney, D)

ECON 169/269. International Financial Markets and Monetary Institutions

5 units, Spr (Taylor, J)

ECON 214. Development Economics: Microeconomic Issues

2-5 units, Aut (Jayachandran, S)

ECON 216. Development Economics and Growth: Macroeconomics

2-5 units, Win (Mahajan, A)

INTERNATIONAL RELATIONS

Director: Kenneth Schultz (Political Science)

Faculty Committee: Coit D. Blacker (Freeman Spogli Institute for International Studies), James Fearon (Political Science), Judith L. Goldstein (Political Science), Stephen H. Haber (Political Science), Timothy Josling (Freeman Spogli Institute for International Studies), Michael McFaul (Political Science), Ronald I. McKinnon (Economics), Michael Tomz (Political Science)

Affiliated Faculty: Barton Bernstein (History), Gordon Chang (History), Larry J. Diamond (Hoover Institution), Peter Duus (History), Amir Eshel (German Studies), Walter P. Falcon (Freeman Spogli Institute for International Studies), Zephyr Frank (History), Lawrence H. Goulder (Economics), David J. Holloway (History, Political Science), Terry L. Karl (Political Science), David M. Kennedy (History), Stephen D. Krasner (Political Science), Gail Lapidus (Freeman Spogli Institute for International Studies), Beatriz Magaloni (Political Science), Mark I. Mancall (History), Isabela Mares (Political Science), Robert McGinn (Management Science and Engineering), Norman Naimark (History), Rosamond Naylor (Freeman Spogli Institute for International Studies), Jean C. Oi (Political Science), Daniel I. Okimoto (Political Science), Robert Packenham (Political Science), William J. Perry (Freeman Spogli Institute for International Studies, Management Science and Engineering), Richard Roberts (History), Scott Sagan (Political Science), Debra M. Satz (Philosophy), James J. Sheehan (History), Andrew Walder (Sociology), Amir Weiner (History), Jeremy Weinstein (Political Science), Ann Wren (Political Science)

Other Affiliation: Gili S. Drori (International Relations), Katherine Jolluck (History), Pawel Lutomski (International Relations), H. Lyman Miller (Hoover Institution), Bertrand Patenaude (Hoover Institution), Stephen Stedman (Political Science), Kathryn Stoner-Weiss (Freeman Spogli Institute for International Studies)

Program Office: Encina Hall West, Room 216

Mail Code: 94305-6045

Phone: (650) 723-4547

Web Site: <http://ica.stanford.edu/?q=internationalrelations>

Courses in International Relations have the subject code INTNLREL. For a complete list of subject codes, see Appendix.

International Relations (IR) is an interdisciplinary undergraduate major focusing on the changing political, economic, and cultural relations within the international system in the modern era. The program explores how global, regional, and domestic factors influence relations among actors on the world stage. Students are equipped with the foundational skills and knowledge necessary to analyze the choices and challenges that arise in this arena. IR majors pursue a course of study in world politics that includes courses in political science, economics, history, and languages, focusing on issues such as international security, international political economy, political and economic development, and democratization. As an integral part of the major, students must spend at least one quarter overseas and show two-year proficiency in a foreign language. Many IR students pursue careers in government, nongovernmental organizations, and business, or go on to graduate school in law, business, economics, or political science.

UNDERGRADUATE PROGRAMS BACHELOR OF ARTS

Requirements for the major (70 units) are:

IR core courses (numbers 1-5):

1. POLISCI 1
2. POLISCI 110A or 110B or 110C or 110D or HISTORY 158
3. ECON (10 units), two of these five courses: ECON 1A, 1B, 50, 51, 52
4. Two additional upper-division Economics courses from the IR approved course offerings list
5. At least one of the following skills classes: ECON 102A, POLISCI 150A, STATS 60

ECON 224. Science, Technology, and Economic Growth

2-5 units, Win (David, P)

ECON 243. Economics of Environment

2-5 units, Spr (Goulder, L)

ECON 265. International Finance and Open Economy Macroeconomics

2-5 units, Aut (McKinnon, R)

ECON 266. International Trade

2-5 units, Win (Staiger, R)

HISTORY 256/356. U.S.-China Relations: From the Opium War to Tiananmen

5 units, Win (Chang, G)

MS&E 193/193W/293. Technology and National Security

3 units, Aut (Perry, W; Hecker, S)

MS&E 134/234. Organizations and Information Systems

4 units, Win (Tabrizi, B)

MS&E 249. Growth and Development

3 units, Sum (De La Grandville, O)

MS&E 250A. Engineering Risk Analysis

2-3 units, Win (Paté-Cornell, E)

MS&E 254. The Ethical Analyst

1-3 units, Spr (Howard, R)

MS&E 271. Global Entrepreneurial Marketing

4 units, Win, Spr (Kosnik, T; Novitsky, D; Ramfelt, L; Smith, L)

POLISCI 114S. International Security in a Changing World

5 units, Win (Sagan, S)

POLISCI 141. The Global Politics of Human Rights

5 units, not given this year

POLISCI 340S. Political Economy of Post-Communism

5 units, Win (McFaul, M)

POLISCI 346S. The Logic of Authoritarian Government—(Same as HISTORY 278A/378A.)

5 units, Win (Haber, S)

POLISCI 348. Chinese Politics: The Transformation and the Era of Reform

5 units, Aut (Miller, L)

POLISCI 350A,B,C. Political Methodology

A: 5 units, Aut (Rivers, D), B: 5 units, Win (Jackman, S),

C: 3-5 units, Spr (Jackman, S)

POLISCI 352. Introduction to Game Theoretic Methods in Political Science

3-5 units, Win (Fearon, J)

POLISCI 362. New Economics of Organization—(Same as OB 686.)

5 units, Spr (Weingast, B)

POLISCI 364. Politics and Organization

4 units, Win (Moe, T)

POLISCI 365. Organizational Decision Making

5 units, Win (Bendor, J)

SOC 111/211. State and Society in Korea

5 units, Win (Shin, G)

SOC 114/214. Economic Sociology

5 units, Aut (Granovetter, M)

SOC 117A/217A. China Under Mao

5 units, Spr (Walder, A)

SOC 160/260. Formal Organizations

5 units, Spr (Zhou, X)

- Complete either a functional specialization or an area specialization (see below for descriptions of specializations). Courses that are used in the core area (1-5 above) cannot also be counted for the specialization.
- At least one course must be an upper-division seminar or colloquium.
- At least one course designated as writing intensive (WIM) for International Relations.
- No more than 20 units can be lower-division courses.
- A minimum grade of 'C' is required for courses to count towards major requirements.
- Completion of one quarter study overseas either through the Stanford Overseas Studies Program or an approved non-Stanford program.
- Proficiency in a foreign language through two years of course work (second-year, third-quarter) or a proficiency exam.

FUNCTIONAL SPECIALIZATION

The three functional specializations are:

- Comparative Political and Historical Analysis (CPHA)
- Comparative Culture and Society (CCAS)
- Comparative and International Political Economy (CIPE)

Students must complete a total of seven courses (35 units) for their functional specialization. Four courses must be from the student's functional area (CPHA, CCAS, CIPE); two courses from a second track; and the final course from the third track (4-2-1). Consult the updated course offering lists available in the International Relations office or on the web site for IR approved courses in each track.

AREA SPECIALIZATION

The area specializations are: Africa, Europe, Latin America, and Russia/East Europe. Students must complete a total of seven courses (35 units) with five courses directly related to their area specialization. Three of these five courses must be in one of the three tracks (CPHA, CCAS, CIPE), one course in a second track, and the final course in the third track. The ten remaining units must be fulfilled by comparative or further area course work.

Students must also demonstrate proficiency in a language, other than English, commonly spoken in the area chosen by completing two years of language study or by passing a second-year, third-quarter proficiency exam. Students can fulfill the overseas studies requirement by participating in an IR-approved Overseas Studies Program in the area of specialization.

Check the IR office for updated information about the area specialization requirements.

DECLARING THE MAJOR

The International Relations major must be declared no earlier than the beginning of sophomore year and no later than the end of the second quarter of the junior year. Students must submit an acceptable proposal to the director of the program and declare IR on Axess. Students completing a double major, or fulfilling International Relations as a secondary major, are also required to file a proposal by the end of the second quarter of the junior year.

MINORS

A minor in International Relations is intended to provide an interdisciplinary background allowing a deeper understanding of contemporary international issues. Declaration of the minor must take place no later than the end of the second quarter of the junior year. To declare, complete the application for a minor on Axess.

Students complete the minor by taking seven unduplicated courses (35 units) from the IR curriculum, including the following:

- POLISCI 1
- Two of these four courses: POLISCI 110A,B,C,D
- Four courses from one of the three tracks (CPHA, CCAS, CIPE), or four courses relating to the same geographic region (Africa, Europe, Latin America, and Russia/East Europe). Consult the updated course offering lists available in the International Relations office or on the web site.

HONORS PROGRAM

The International Relations honors program offers qualified students the opportunity to conduct a major independent research project under faculty guidance. Such a project requires a high degree of initiative and dedication, significant amounts of time and energy, and demonstrated skills in research and writing.

In their junior year, students should consult with prospective honors advisers, choose the courses that provide academic background in their areas of inquiry, and demonstrate an ability to conduct independent research. Students can select from the IR honors option or the CDDRL (Center on Democracy, Development, and the Rule of Law) option which focuses on issues of democracy, development, and the rule of law; for information on the CDDRL, see <http://cddrl.stanford.edu/>.

Students should submit their honors thesis proposal in the Spring Quarter of their junior year; check with IR office for the exact deadline.

Prerequisites for participation include a 3.5 grade point average (GPA), a strong overall academic record, good academic standing, successful experience in writing a research paper, and submission of an acceptable thesis proposal. Students are required to enroll in INTNLREL 200A, International Relations Honors Field Research, in Spring Quarter of their junior year and consider participating in Honors College. CDDRL option students should enroll in INTNLREL 199, Honors Research: Democracy, Development, and the Rule of Law in Developing Countries. In their senior year, honors students must enroll in INTNLREL 200B in Autumn Quarter and in research units each quarter with their faculty adviser. Honors students present a formal defense of their theses in mid-May. Students must receive at least a grade of 'B+' in order to graduate with honors in International Relations.

GRADUATE PROGRAM MASTER OF ARTS

It is possible for students majoring in International Relations to work simultaneously for a coterminal master's degree in a number of related fields. Coterminal students should consult advisers in both departments or programs to ensure that they fulfill the degree requirements in both fields. For information on the M.A. program in International Policy Studies, see the "International Policy Studies" section in this bulletin.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement for International Relations.

CORE

ECONOMICS

ECON 1A. Introductory Economics A

5 units, Aut (Clerici-Arias, M), Win (Wright, G)

ECON 1B. Introductory Economics B

5 units, Win, Spr (Staff)

ECON 50. Economic Analysis I

5 units, Aut (Abramitzky, R), Spr (Tendall, M)

ECON 51. Economic Analysis II

5 units, Win (Einav, L), Sum (Staff)

ECON 52. Economic Analysis III

5 units, Aut (Leeson, R), Spr (Klenow, P), Sum (Desmet, K)

ECON 102A. Introduction to Statistical Methods (Postcalculus) for Social Scientists—GER:DB-Math

5 units, Aut (Tendall, M), Win (Gurney, D)

HISTORY

HISTORY 158. The United States Since 1945

4-5 units, Win (Bernstein, B)

POLITICAL SCIENCE

POLISCI 1. Introduction to International Relations—GER:DB-SocSci
5 units, Aut (Schultz, K)

POLISCI 110B. Strategy, War, and Politics— GER:DB-SocSci
5 units, not given this year

POLISCI 110C/110X. America and the World Economy
5 units, Win (Goldstein, J)

POLISCI 110D/110Y. War and Peace in American Foreign Policy
5 units, Spr (Schultz, K)

POLISCI 150A/350A. Political Methodology I
5 units, Aut (Rivers, D)

STATISTICS

STATS 60/160. Introduction to Statistical Methods: Precalculus—
(Same as PSYCH 10.) GER:DB-Math
5 units, Aut (Walther, G), Win (Thomas, E), Spr (Switzer, P),
Sum (Richards, W)

ADDITIONAL OFFERINGS

The courses listed below fulfill the IR functional specialization track requirements in CPHA, CCAS, and CIPE, and can fulfill the area specialization option in Africa, Europe, Latin America, or Russia/East Europe. See <http://ica.stanford.edu/?q=internationalrelations> or the International Relations program office for specific course designations. For course descriptions and General Education Requirement (GER) information, see the respective department listings. Additional relevant courses may be offered; for updated information, visit the office or the web site.

COMPARATIVE POLITICAL AND HISTORICAL ANALYSIS (CPHA)

INTNLREL 114D. Democracy, Development, and the Rule of Law—
(Same as POLISCI 114D.) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts.
5 units, Aut (Stoner-Weiss, K; McFaul, M)

INTNLREL 131. Globalization and Organizations—(Same as IPS 231.) How organizations act as the carriers of globalization processes by expanding worldwide, proliferating social procedures, establishing isomorphic structures, and diffusing cultural patterns. Political structures, international relations, commercial organizations, cultural institutions. Global organizational expansion, forms of organizational adaptation, notions of national sovereignty under global organizational expansion, and forms of national and international governance. Studies of global organizational fields including science, rights, environment, development, combining theoretical, comparative, and case study pieces. WIM
5 units, Spr (Drori, G)

INTNLREL 140A. International Law and International Relations—What is the character of international legal rules? Do they matter in international politics, and if so, to what degree? The foundational theories, principles, and sources of public international law. Prominent theories of international relations and how they address the role of law in international politics. Practical problems such as human rights, humanitarian intervention, and enforcement of criminal law. International law as a dynamic set of rules, at times influenced by power, at other times constraining it, but always essential to studying international relations. WIM
5 units, Aut (Lutomski, P)

INTNLREL 163. History and Geography of Contemporary Global Issues—(Same as HISTORY 206.) The historical background and geographical context of contemporary global issues and events. Texts are a world atlas and regular reading of *The New York Times* and *The Economist*.

Topics vary according to what is happening in the world. Student presentations. GER:DB-SocSci, WIM
5 units, Spr (Lewis, M)

INTNLREL 167. Political and Economic Change in the Former Soviet Union— From Gorbachev to the present. The main institutions of the Soviet system and theories of its collapse. Reforms and the social impact of rapid systemic change. Topics include shock therapy such as privatization and economic liberalization, nationalism, crime, democratization and authoritarianism, and legislative reform. Comparison of the process of change in the former Soviet Union with democratic and market transitions in Latin America and elsewhere.
5 units, Win (Stoner-Weiss, K)

INTNLREL 205. Ethics, Technology, and International Relations— Applicability of ethical principles to the analysis of international affairs including border control, intervention, transborder diffusion of national cultural products, foreign aid, national and international cultural patrimony, and war and terrorism. The role of technology in challenging traditional thinking about ethical issues in international affairs. Emphasis is on the interplay of theory and practice. Case studies. Limited enrollment.
5 units, not given this year (McGinn, R)

HISTORY

HISTORY 102. The History of the International System— WIM
5 units, Spr (Sheehan, J)

HISTORY 103E. History of Nuclear Weapons—(Same as POLISCI 116.) GER:DB-SocSci
5 units, Spr (Holloway, D)

HISTORY 120C. 20th-Century Russian and Soviet History
5 units, Aut (Patenaude, B)

HISTORY 125. 20th-Century Eastern Europe
5 units, Win (Jolluck, K)

HISTORY 137. The Holocaust
5 units, Win (Staff)

HISTORY 145B. Africa in the 20th Century
5 units, Spr (Roberts, R)

HISTORY 150C. The United States in the Twentieth Century
5 units, Spr (Camarillo, A; Chang, G)

HISTORY 158. The United States Since 1945
4-5 units, Win (Bernstein, B)

HISTORY 181B. The Middle East in the 20th Century
5 units, Spr (Weiss, M)

HISTORY 195C. Modern Japanese History
5 units, Win (Staff)

HISTORY 197. Southeast Asia: From Antiquity to the Modern Era
5 units, Win (Lewis, M)

HISTORY 202/306E. International History and International Relations Theory—(Same as POLISCI 316.)
5 units, Win (Holloway, D)

HISTORY 224A. Modern Russia, Iran, and Afghanistan
5 units, Aut (Crews, R)

HISTORY 228/328. Circles of Hell: Poland in World War II—GER:DB-SocSci
5 units, not given this year

HISTORY 252/355. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis—GER:DB-SocSci
5 units, not given this year

HISTORY 256/356. U.S.-China Relations: From the Opium War to Tiananmen
5 units, Win (Chang, G)

INTERNATIONAL POLICY STUDIES

IPS 219. The Role of Intelligence in U.S. Foreign Policy
5 units, Spr (Hansen, K)

IPS 220. Comparative Political Institutions
5 units, Win (Mcelwain, K)

IPS 241A. Theories of International Law
5 units, Win (Steinberg, R)

MANAGEMENT SCIENCE AND ENGINEERING

MS&E 193/193W/293. Technology and National Security
3 units, Aut (Perry, W; Hecker, S)

POLITICAL SCIENCE

POLISCI 110B. Strategy, War, and Politics—GER:DB-SocSci
5 units, not given this year

POLISCI 110D/110Y. War and Peace in American Foreign Policy—
110D fulfills WIM.
5 units, Spr (Schultz, K)

POLISCI 111D. British Politics
5 units, Spr (Dorfman, G)

POLISCI 112/312. Japanese Foreign Policy—GER:DB-SocSci, EC-
GlobalCom
5 units, not given this year

POLISCI 112D. International Organization
5 units, Aut (Major, S)

POLISCI 113F. The United Nations and Global Governance
5 units, Spr (Stedman, S)

POLISCI 114S. International Security in a Changing World
5 units, Win (Sagan, S)

POLISCI 140L. China in World Politics
5 units, Spr (Miller, L)

POLISCI 142F. Politics of Central Asia in Comparative Perspective
5 units, Aut (Erdem, E)

POLISCI 142R. Representative Government in Europe—GER:
DB-SocSci
5 units, not given this year

POLISCI 147. Comparative Democratic Development—GER:DB-
SocSci, EC-GlobalCom
5 units, not given this year

**POLISCI 148/348. Chinese Politics: The Transformation and the
Era of Reform**
5 units, Aut (Miller, L)

POLISCI 148S. The U.S. and Asia During the Cold War
5 units, Win (Miller, L)

POLISCI 149S. Islam and the West
5 units, Spr (Milani, A)

POLISCI 218. U.S. Relations in Iran
5 units, Aut (Milani, A)

POLISCI 245D. The European Union
5 units, Aut (Gates, A)

POLISCI 245F. Latin American Political Development
5 units, Win (Etchemendy, S)

POLISCI 245R. Politics in Modern Iran
5 units, Win (Milani, A)

POLISCI 346S. Logic of Authoritarian Government—(Same as HIS-
TORY 278A/378A)
5 units, Win (Haber, S)

**COMPARATIVE CULTURE AND SOCIETY
(CCAS)**

**INTNLREL 106. Present Pasts: History and Memory in Culture and
Politics**—(Same as GERLIT 290.) Theoretical, comparative, and interdis-
ciplinary approach to historical representation and remembrance. Focus
is on the uses and abuses of remembering and historiographic accounting
for the recent past in culture and politics. Examples include post-WW II
Germany and post-1948 Israel. How the memory of 9/11 is played out in
contemporary American discourse, including political debates, literature,
and popular culture.

5 units, Win (Eshel, A)

INTNLREL 114D. Democracy, Development, and the Rule of Law—
(Same as POLISCI 114D.) For description, see “Comparative Political
and Historical Analysis” subsection above.

5 units, Aut (Stoner-Weiss, K; McFaul, M)

**INTNLREL 140C. The U.S., UN Peacekeeping, and Humanitarian
War**—The involvement of the U.S. and UN in major wars and international
interventions since the 1991 Gulf War. The UN Charter’s provisions on
the use of force, the origins and evolution of peacekeeping, the reasons
for the breakthrough to peacemaking and peace enforcement in the 90s,
and the ongoing debates over the legality and wisdom of humanitarian
intervention. Case studies include Croatia and Bosnia, Somalia, Rwanda,
Kosovo, East Timor, and Afghanistan.

5 units, Spr (Patenaude, B)

**INTNLREL 141B. Camera as Witness: International Human Rights
Documentaries**—(Same as HUMNTIES 197B, SLAVGEN 197B.)
Rarely screened documentary films, focusing on global problems, hu-
man rights issues, and aesthetic challenges in making documentaries on
international topics. Meetings with filmmakers. GER:DB-Hum

5 units, Aut (Bojic, J)

**INTNLREL 141C. Camera as Witness: A Forum for Global Dia-
logue**—(Same as HUMNTIES 197C, SLAVGEN 197C.) Challenges
facing filmmakers documenting the struggle for human rights includ-
ing communication of complex situations to an international audience,
interpreting foreign cultures and politics, and filmmaker roles as artists,
activists, and journalists. Meetings with filmmakers. GER:DB-Hum

5 units, Win (Bojic, J)

INTNLREL 161A. Global Human Geography: Asia and Africa—
(Same as HISTORY 106A.) Global patterns of demography, economic
and social development, geopolitics, and cultural differentiation, cover-
ing E. Asia, S. Asia, S.E. Asia, Central Asia, N. Africa, and sub-Saharan
Africa. Use of maps to depict geographical patterns and processes. GER:
DB-SocSci

5 units, Aut (Lewis, M)

**INTNLREL 161B. Global Human Geography: Europe and Ameri-
cas**—(Same as HISTORY 106B.) Patterns of demography, economic and
social development, geopolitics, and cultural differentiation. Use of maps
to depict geographical patterns and processes.

5 units, Win (Lewis, M)

INTNLREL 205. Ethics, Technology, and International Relations—
For description, see “Comparative Political and Historical Analysis”
subsection above.

5 units, not given this year (McGinn, R)

AFRICAN STUDIES

**AFRICAST 211. Education for All? The Global and Local in Public
Policy Making in Africa**

SCIENCE, TECHNOLOGY, AND SOCIETY

STS 279. Technology, Policy, and Management in Newly-Industrializing Countries
2-4 units, Spr (Forbes, N)

1- AND 2-UNIT OPTIONS

INTNLREL 110. South Asia: Politics, Economics, Culture, and Society—Lectures by Stanford faculty and guest speakers. May be repeated for credit.
5 units, Aut (Staff)

INTNLREL 191. IR Journal
1 unit, Aut, Win, Spr (Schultz, K)

INDEPENDENT STUDY/HONORS

INTNLREL 197. Directed Reading in International Relations—Open only to declared International Relations majors.
3-5 units, Aut, Win, Spr, Sum (Staff)

INTNLREL 198. Senior Thesis—Open only to declared International Relations majors with approved senior thesis proposals.
2-5 units, Aut, Win, Spr, Sum (Staff)

INTNLREL 199. Honors Research: Democracy, Development, and the Rule of Law in Developing Countries—Restricted to students in the CDDRL option of the International Relations honors program. Goal is to prepare students to do research and/or fieldwork to complete their thesis research. Main currents in democracy and development literature concerning how economic growth and democratization are related; how the rule of law supports these processes in countries undergoing change. Student presentations of thesis questions; student groups develop research problems and designs. May be repeated for credit.
3-5 units, Spr (Stoner-Weiss, K)

INTNLREL 200A. International Relations Honors Field Research—For juniors planning to write an honors thesis during senior year. Initial steps to prepare for independent research. Professional tools for conceptualizing a research agenda and developing a research strategy. Preparation for field research through skills such as data management and statistics, references and library searches, and fellowship and grant writing. Creating a work schedule for the summer break and first steps in writing. Prerequisite: acceptance to IR honors program.
3-5 units, Spr (Drori, G)

INTNLREL 200B. International Relations Honors Seminar—Second of two-part sequence. For seniors working on their honors theses. Professional tools, analysis of research findings, and initial steps in writing of thesis. How to write a literature review, formulate a chapter structure, and set a timeline and work schedule for the senior year. Skills such as data analysis and presentation, and writing strategies. Prerequisites: acceptance to IR honors program, and 199 or 200A.
3 units, Aut (Drori, G; Stoner-Weiss, K)

OVERSEAS STUDIES

The following courses taught overseas are approved for the International Relations major; consult the updated course offering lists available in the International Relations office or on the IR website for track information. For course descriptions and additional information, see the "Overseas Studies" section of this bulletin.

BEIJING

OSPBEIJ 11. Chinese Society in the Post-Mao Era—(Same as SOC 118S.)

Courses given in Introduction to the Humanities Program have the subject code IHUM. For a complete list of subject codes, see Appendix.

Introduction to the Humanities offers courses which satisfy a three quarter General Education Requirement (GER) for first-year students. The purpose of the Introduction to the Humanities (IHUM) requirement is to build an intellectual foundation in the study of human thought, values, beliefs, creativity, and culture. Introduction to the Humanities courses enhance skills in analysis, reasoning, argumentation, and oral and written expression, thus helping to prepare students for more advanced work in the humanities, and for work in other areas.

The IHUM requirement may be satisfied in two ways:

Introduction to the Humanities courses—a one quarter, interdisciplinary course followed by a two quarter, course sequence.

The Program in Structured Liberal Education—a three quarter, residence-based program; see below or see the “Structured Liberal Education” section of this bulletin.

COURSES

Students enrolled in Introduction to the Humanities courses satisfy the first-year requirement by pairing a one quarter interdisciplinary course in Autumn Quarter with a two quarter sequence in Winter and Spring quarters. The Autumn Quarter courses develop skills in humanistic disciplines through close reading and critical investigation of a limited number of works as preparation for further work in the humanities and, specifically, for any one of the Winter-Spring sequences.

AUTUMN

IHUM 46. Visions of Mortality—Anyone reading this is alive, and so will someday die. Issues arising from these facts of life and death beginning with the most fundamental questions arising from first-person confrontation with thoughts of one's own mortality. Is death bad for a person, and if so, why? What can the badness or the indifference of death tell us about what makes life good? If death is the permanent end of existence, does this make human choices arbitrary, and life meaningless? GER:IHUM-1

5 units, Aut (Bobonich, C; Barrett, R)

IHUM 48. The Art of Living—The fundamental choice of deciding what is valuable to a person, and how to live one's life: a life of reason and knowledge, of faith and discipline, of nature and freedom, of community and altruism, or of originality and style. How it is possible to live well and beautifully, what it takes to implement these ways of living, and what happens when they come under pressure from inside and out. GER:IHUM-1

5 units, Aut (Douvaldci, C; Landy, J; Taylor, K)

IHUM 55. The Literature of Crisis—Most human lives contain major turning points or crises that transform an individual's development. Classical, medieval, and Renaissance texts illustrating crises in the lives of authors and characters, and cultural crises that have altered the course of human history. Emphasis is on the conceptual framework to understand and cope with crisis. GER:IHUM-1

5 units, Aut (McCall, M; Evans, M)

IHUM 57. The Human and The Machine—Shifting boundaries between the mechanical and the human: how humans connect and interact with machines, and how they may be conceived, designed, and manipulated as machines. This history of thinking about people, society, and machines from Plato and his antecedents to contemporary dilemmas over biotechnology. Paradigms include ethical issues concerning biological and social engineering and creationist arguments for intelligent design that reveal the work of God. GER:IHUM-1

5 units, Aut (Shanks, M; Lowood, H)

IHUM 58. Technological Visions of Utopia—How changes since Thomas More's *Utopia* was written, including advances in science and technology, have opened new possibilities for the good society. Focus is on works that consider how literary visions of society have evolved with the progress of science and technology. Readings include More and technologically determined visions of the late 20th century. GER:IHUM-1

5 units, Aut (Roberts, E; Heise, U)

IHUM 61. Race, Gender, and the Arts of Survival—How do men and women survive physically, intellectually, creatively, and spiritually? Survival as represented in works that model strategies to overcome physical deprivation including enslavement, castration, religious persecution, and gender discrimination. How to survive the constraints of gender, race, nation, and history: for what purpose and at what cost does one survive? Possibilities for effecting social and personal change. Genres include drama, fiction, epistolaries, and a slave narrative. GER:IHUM-1

5 units, Aut (Elam, H; Elam, M)

IHUM 63. Freedom, Equality, Difference—Which freedoms should a just society promote and which should be curtailed for the sake of justice? What equalities properly concern government and how can the achievement of equality be reconciled with respect for freedom? What roles should social and political institutions take in guaranteeing freedom and equality? Focus is on interdisciplinary inquiry including political philosophy, education, literature, history, and law. Abstract ideas and case histories, using one to shed light on the other. GER:IHUM-1

5 units, Aut (Callan, E; Palumbo-Liu, D; Perry, J)

IHUM 64. Journeys—Works spanning 2,300 years, diverse cultural and historical situations, and different forms and genres, which present essential aspects of the journey from birth to death. These texts trace moral, spiritual, and emotional passages within that one great journey, passages that challenge and transform people as they advance toward what poet Thomas Gray called the inevitable hour. GER:IHUM-1

5 units, Aut (Wolff, T; Yearley, L)

WINTER-SPRING SEQUENCES

IHUM 2,3. Epic Journeys, Modern Quests—Great religious, philosophical, and literary texts that have addressed timeless questions about human identity and the meaning of human life. Focus is on the epic tradition in the ancient and classical worlds and its transformations or abandonment in modernity. Compares conceptions of the afterlife. How traditions about the afterlife are created and appropriated. The diminished importance of the dead and increased emphasis on the power of the living in literary genres. GER:IHUM-2,3

IHUM 2: 5 units, Win (Harrison, R)

IHUM 3: 5 units, Spr (Landy, J; Edelstein, D)

IHUM 4A,B. Mass Violence from Crusades to Genocide—The evolution, varieties, causes, and logic of mass violence in premodern and modern history; how mass violence shaped historical trends. What accounts for the persistence of mass violence in history? Do religions, ethnicity, and modernity foment or restrain mass violence? Is there a common pattern of mass violence throughout the centuries? Geographic focus is Europe; comparisons with societies which the Europeans encountered such as the Aztec empire, the Islamic world, and the African colonies. GER:IHUM-2,3

IHUM 4A: 5 units, Win (Buc, P)

IHUM 4B: 5 units, Spr (Weiner, A)

IHUM 5A,B. Worlds of Islam: Global History and Muslim Societies—Chronological and geographical overview of times and places in which Islam has been the dominant cultural framework. Elements of the Muslim faith and its related political, social, and cultural practices from the 7th-century rise of Islam to the recent past. Geographic range includes the historic Arab heartland of Islam, Africa, Persia, the Ottoman Empire, and Central Asia. GER:IHUM-2,3

IHUM 5A: 5 units, Win (Beinin, J; Rodrigue, A; Hanretta, S; Crews, R)

IHUM 5B: 5 units, Spr (Rodrigue, A; Hanretta, S; Crews, R; Satia, P)

IHUM 6A,B. World History of Science—The broad sweep of global science, from the prehistoric roots of the oldest known technologies, the events of the Scientific Revolution, through recent triumphs in the physical and life sciences. History as unavoidably selective. How science transforms and is transformed by human engagements with technology, religion, art, politics, and moral values. GER:IHUM-2,3

IHUM 6A: 5 units, Win (Proctor, R)

IHUM 6B: 5 units, Spr (Proctor, R)

IHUM 23A,B. The Fate of Reason—The historical fate of Socrates' proposal that only reason can provide answers to questions of what to believe and how to act. The fate of reason in cultural contexts including medieval Christian, Islamic, and Jewish. Themes include free will, personal identity, the authority of morality, and the tension between reason as power for improving life and as insufficient means for reaching important truths. GER:IHUM-2,3

IHUM 23A: 5 units, Win (Bobonich, C)

IHUM 23B: 5 units, Spr (Anderson, L)

IHUM 25A,B. Art and Ideas: Performance and Practice—Issues in aesthetics and performance through examples from the classical age to the present. Concepts of art and practice intersecting with topics such as imitation, instruction through pleasure, the creative process, perception, social analysis, and embodiment as a form of knowledge. Texts and performances from drama, dance, music, visual arts, and performance art practices that reflect aesthetic ideas. GER:IHUM-2,3

IHUM 25A: 5 units, Win (Ross, J)

IHUM 25B: 5 units, Spr (Rayner, A)

IHUM 27A,B. Encounters and Identities—The formation of ideas about individual and collective identities in S. Africa, W. Europe, and the U.S. Contemporary ideas about identity, including national, racial, ethnic, and gender identity; historical encounters and social transformations linking these areas. Challenging popular assumptions about the origins of identities through similarities and differences among ideas of individual and collective identity in different regions of the world. GER:IHUM-2,3

IHUM 27A: 5 units, Win (Ferguson, J)

IHUM 27B: 5 units, Spr (Burce, A)

IHUM 28A,B. Poetic Justice: Order and Imagination in Russia—The difference between justice and law in 19th- and 20th-century Russian writers. Focus is on the notion of poetic justice: the artistic representation of order, whether divine, natural, or human. Goal is to heighten awareness of familiar narratives, mythologies, ideas, and images, and to convey a sense of a long-established national culture with its own dynamic vision. GER:IHUM-2,3

IHUM 28A: 5 units, Win (Safran, G)

IHUM 28B: 5 units, Spr (Freidin, G)

IHUM 31A,B. Ancient Empires—A decisive place and period in world history: the Mediterranean basin from 800 B.C. to 400 A.D. Great empires (Assyria, Persia, Macedonia, and Rome) were carved out in war and changed the course of human development. Why did these empires arise when and where they did, how did they work, and what is their legacy? Their economic, religious, and artistic achievements balanced against genocide, enslavement, and warfare using evidence from ancient literature and archaeology, and tracing the roles of religion, property, and freedom. What they mean for the world today. GER:IHUM-2,3

IHUM 31A: 5 units, Win (Morris, J)

IHUM 31B: 5 units, Spr (Scheidel, W)

IHUM 37A,B. Literature into Life: Alternative Worlds—The genres of poetry, drama, and fiction from the Renaissance to the present day, focusing on the relationship between art and life. How does literature come alive on the page? What goes into a vivid representation of lived social experience? How do writers respond to historical crises? Parallel cases from art and music. GER:IHUM-2,3

IHUM 37A: 5 units, Win (Steidle, E)

IHUM 37B: 5 units, Spr (Felstiner, J)

IHUM 68A,B. Approaching Religion: Tradition, Transformation, and the Challenge of the Present—Challenges facing the world's religions in responding to issues such as globalization, feminism, science, pluralism, and individualism. How Christianity, Islam, and Hinduism underwent transformations, struggling with the tension between making necessary changes and preserving tradition. Encounters between these religious traditions and the forces of contemporary social change. GER:IHUM-2,3

IHUM 68A: 5 units, Win (Gregg, R; Sadeki, B)

IHUM 68B: 5 units, Spr (Eisen, A; Hess, L)

PROGRAM IN STRUCTURED LIBERAL EDUCATION

Track Chair: Mark Mancall (History)

Structured Liberal Education (SLE) offers students an intensive, three quarter, residence-based learning experience, which satisfies the IHUM requirement, both of the University Writing and Rhetoric requirements, and the General Education Requirement in the Humanities (GER:DB-Hum).

SLE encourages students to live a life of ideas in an atmosphere that stresses critical thinking and a tolerance for ambiguity. The residence hall is the informal setting for lectures and small-group discussions. SLE instructors work closely with students and participate in dorm life. SLE enhances the classroom experience with other residence-based educational activities: a weekly film series throughout the year and a student-produced play each quarter.

SLE students receive intensive and individualized writing instruction from a team of instructors and peer writing tutors. See the "Structured Liberal Education" section of this bulletin.

9 units, Aut, Win, 10 units, Spr (Mancall, M; Staff)

TAUBE CENTER FOR JEWISH STUDIES

Director: Steven Zipperstein

Associate Director: Vered Shemtov

Academic Advisory Committee: Zachary Baker (Stanford University Libraries), Joel Bein (History), Arnold Eisen (Religious Studies), Amir Eshel (German Studies), John Felstiner (English), Charlotte Fonrobert (Religious Studies), Adriane Leveen (Religious Studies), Mark Mancall (History), Norman Naimark (History), Jack Rakove (History), Aron Rodrigue (History), David Rosenhan (Law, Psychology, emeritus), Gabriella Safran (Slavic Languages and Literatures), Vered Shemtov (African and Middle Eastern Languages and Literatures), Peter Stansky (History), Sam Wineburg (Education), Amir Weiner (History), Steven Zipperstein (History)

Offices: Building 240, Room 203

Mail Code: 94305-2190

Phone: (650) 723-7589

Email: jewish.studies@stanford.edu

Web Site: <http://www.stanford.edu/dept/jewishstudies/>

The Taube Center for Jewish Studies investigates all aspects of Jewish life in history, religion, literature, language, education and culture from biblical times to the present. Courses are offered on the undergraduate and graduate levels in a program complemented by a full range of guest lectures, conferences, and symposia. The Center annually sponsors the Donald and Robin Kennedy Undergraduate Award for the best undergraduate essay on any theme in Jewish Studies, the Dr. Bernard Kaufman Undergraduate Research Award in Jewish Studies to an undergraduate engaged in research on Jews in modernity, and it coordinates the annual Dorot Travel Grants for summer study in Israel.

Graduate students enroll in the program through the departments of English, History, Comparative Literature, or Religious Studies, or the School of Education, and must meet the requirements of those departments.

UNDERGRADUATE PROGRAMS INDIVIDUALLY DESIGNED MAJOR

The Individually Designed Major in Jewish Studies permits interested students to focus their attention on the broad field of Jewish Studies and, at the same time, to expand their knowledge of one or another related fields.

Each major should complete at least 75 units, all in courses at or above the 100 level (or their equivalent). A maximum of 15 of these 75 units may be taken on a credit/no credit basis. A maximum of 5 of these 75 units may be taken in individual study or directed reading. Students must present evidence that demonstrates their ability to do independent work and have at least three full quarters of undergraduate work remaining at Stanford after the date on which the proposal is approved by the committee. Each major must obtain sponsorship from three faculty members, one of whom is the student's primary adviser, and from one of the Directors of the Taube Center for Jewish Studies. Details about the written procedures and documents necessary for application for an individually designed major can be obtained at Undergraduate Advising and Research, Sweet Hall, first floor, (650) 723-2426.

REQUIREMENTS

The faculty members in Jewish Studies have designed the following structure for the major:

<i>Category</i>	<i>Units</i>
History and Society: Students must take one course in each of the three periods: biblical and ancient, medieval and modern, and contemporary	20
Religion: Biblical, rabbinic, medieval, modern	20
Literature: Hebrew, Holocaust, American Jewish, Yiddish, German Jewish, Russian Jewish	15

Hebrew Language (second year or beyond):

Students who demonstrate by examination that they have completed the equivalent of at least two years of university-level Modern Hebrew may apply the 12 units required in this category to more work in one or the other categories required by the major, with the approval of their primary adviser.

12

Ancillary Courses:

Ancient history, medieval history, modern European history, history of philosophy, Islam, Christianity

8-10

Total number of units required..... 75-77

Students planning an Individually Designed Major in Jewish Studies are also urged to write an honors thesis. Students interested in majoring in Jewish Studies should discuss this with their adviser(s) when discussing the major itself. Up to 10 honors thesis units may be included in the major.

No course proposed for the major may be counted as fulfilling more than one required category in the proposed major. Transfer credits from other universities must be approved by the appropriate Stanford authorities.

MINORS

The Jewish Studies minor is open to students in any department who wish to enrich their studies through acquiring knowledge in Jewish history, thought, religion, literature, and society. Students must complete their declaration of the minor no later than the last day of the quarter four quarters before degree conferral. For example, a student graduating in Spring Quarter must declare the minor no later than the last day of Spring quarter of the junior year.

Students must complete six courses for a maximum of 36 units toward the minor. Courses of study should be discussed and approved by a Jewish Studies faculty member in the departments of English, History, or Religious Studies, or the Division of Literatures, Cultures, and Languages and by the center directors. In addition to suggested introductory courses, students are also encouraged to take courses in Hebrew language as part of their Jewish studies minor, and are granted credit toward the minor for up to 5 units of language study. Any variations on the minor requirements must be approved in advance by one of the directors of the center.

Courses credited toward the minor must be distributed as follows:

1. Three introductory courses at the 100 level or below in the fields of history, religious studies, literature, or Hebrew language (for a maximum of 5 units) or one of the designated introductory courses offered through the Program in Comparative Studies in Race and Ethnicity.
 2. Two courses at the 100 level or above from two of three areas of concentration (history, religious studies, or literature).
 3. One seminar or undergraduate colloquium at the 200 level or above in one area of concentration (history, religious studies, or literature.)
- No course credited toward the Jewish Studies minor may be double counted toward major requirements.

COURSES**JEWISH LANGUAGE COURSES**

Modern Hebrew, Biblical Hebrew and Yiddish language courses are offered by the Language Center. For descriptions, course numbers and additional information, see the African, Jewish, and Middle Eastern language offerings in the "Language Center" section of this bulletin.

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

AMELANG 170A. Biblical Hebrew

2-4 units, Aut (Wang, T; Porat, G)

AMELANG 171. The Bible in Modern Hebrew Literature

3-4 units, Spr (Shemtov, V)

AMELANG 173. Politics and Poetics in Israeli Literature

4-5 units, Win (Shemtov, V)

AMELANG 174. East West East in Israeli Literature: The Novels of Yoel Hoffman

2-4 units, Aut (Albeck-Gidron, R)

COMPLIT 243. Literature and History in the Israeli Novel

3-5 units, Spr (Eshel, A)

DRAMA 156M/256M. Israeli Film and Theater, 1948-2006

5 units, Aut (Arad, M)

ENGLISH 140A. Imagining the Holocaust

5 units, Spr (Felstiner, J)

FEMST 139. Rereading Judaism in Light of Feminism

4-5 units, Spr (Karlin-Neumann, P)

GERLIT 290. Present Pasts: History and Memory in Culture and Politics—(Same as INTNLREL 106.)

5 units, Win (Eshel, A)

GERGEN 104Q. Resistance Writings in Nazi Germany

3 units, Aut (Bernhardt, E)

HISTORY 86S. The Jews of Islam in Modern Times

5 units, Aut (Danon, D)

HISTORY 137. The Holocaust

5 units, Win (Staff)

HISTORY 185B. Jews in the Modern World

5 units, Spr (Zipperstein, S)

HISTORY 229/329. Poles and Jews

5 units, Win (Jolluck, K)

HISTORY 277F/377F. Marranos, Conversos, and Crypto-Jews in Latin America, 16th-20th Centuries

5 units, Win (Staff)

HISTORY 285E/385E. Tradition in Crisis: Orthodox Judaism in Modern Times

5 units, Aut (Staff)

HISTORY 287E/387E. The Transformation of Central European Jewry: Germany and Austria-Hungary, 1700-1880

5 units, Aut (Staff)

HISTORY 385A. Core in Jewish History, 17th-19th Centuries

4-5 units, Aut (Rodrigue, A)

HISTORY 385B. Core in Jewish History, 20th Century

4-5 units, Win (Zipperstein, S)

HISTORY 486A. Graduate Research Seminar in Jewish History

4-5 units, Spr (Zipperstein, S)

INTNLREL 106. Present Pasts: History and Memory in Culture and Politics—(Same as GERLIT 290.)

5 units, Win (Eshel, A)

RELIGST 4N. The Creation of Woman

3 units, Aut (Fonrobert, C)

RELIGST 112. Handmaids and Harlots: Biblical Women in Jewish and Christian Traditions

4 units, Aut (Leveen, A; Pitkin, B)

RELIGST 185. Prophetic Voices of Social Critique

4 units, Spr (Leveen, A)

RELIGST 221/321. The Talmud

4 units, Win (Fonrobert, C)

RELIGST 263. Judaism and the Body

4 units, Aut (Fonrobert, C)

RELIGST 264. Hasidism and Modernity

4 units, Win (Deutsch, N)

RELIGST 282. King David in the Bible and Beyond

4 units, Aut (Leveen, A)

SLAVGEN 122/222. Yiddish Story

5 units, Aut (Safran, G)

LANGUAGE CENTER

Director: Elizabeth Bernhardt

Associate Director: Joan Molitoris

Assistant Director: Patricia de Castries

African and Middle Eastern Languages

Senior Lecturers: Khalil Barhoum (*Coordinator, and Minor Adviser:* Arabic Language and Literature), Vered Shemtov (Jewish Language and Literature).

Lecturers: Narges Amini (*Fulbright Scholar*), Salem Aweiss, Noura Bellali (*Fulbright Scholar*), Estee Greif, Jon Levitow, Sangai Mohochi, Gallia Porat, Ramzi Salti, Michael Wairungu (*Fulbright Scholar*), Ting Wang

Chinese Language

Coordinator: Chao Fen Sun (*Associate Professor, Asian Languages*)

Lecturers: Marina Chung, Michelle DiBello, Sik Lee Dennig, Nina Lin, Yu-hwa Liao Rozelle, Huazhi Wang, Yan Wang, Yan Yi (*Fulbright Scholar*), Hong Zeng, Youping Zhang, Qi Zhu

English for Foreign Students

Director and Senior Lecturer: Philip Hubbard (*Linguistics*)

Lecturers: Robert Elliott, Carole Mawson, Kenneth Romeo, Constance Rylance, Carol Shabrami, Keli Yerian

French Language

Lecturers: Olubunmi Ashaolu, Marianne Blanchard, Jane Dozer-Rabedeau, Heather Howard, Sylvie Palumbo-Liu, Tanya Shashko, Kenric Tsethlikai (*Coordinator*)

German Language

Coordinator: Elizabeth Bernhardt (*Director, Language Center*)

Senior Lecturers: William E. Petig, Kathryn Strachota

Italian Language

Senior Lecturer: Maria Devine (on leave Autumn, Winter)

Lecturers: Marta Baldocchi, Anna Cellinese, Sara Gelmetti (*Coordinator*), Dawn Green, Alessandra McCarty, Giovanni Tempesta

Japanese Language

Coordinator: Yoshiko Matsumoto (*Associate Professor, Asian Languages*)

Senior Lecturer: Kazuko M. Busbin

Lecturers: Fumiko Arao, Momoe Saito Fu, Hisayo O. Lipton, Momoyo K. Lowdermilk, Kiyomi Nakamura, Yoshiko Tomiyama

Korean Language

Lecturer and Coordinator: Hee-Sun Kim

Portuguese Language

Senior Lecturer: Lyris Wiedemann (*Coordinator*)

Lecturers: Ana Isabel Delgado, Sean McIntyre

Slavic Language

Senior Lecturer: Rima Greenhill

Lecturer and Coordinator: Eugenia Khassina

Spanish Language

Senior Lecturer: Irene Corso

Lecturers: Amy Alexander, Vivian Brates, Loreto Catoira, Candy Guzmán, Caridad Kenna, Alice Miano (*Coordinator*), Joan Molitoris (*Associate Director, Language Center*), Paul Nissler, Carimer Ortiz Cuevas, Consuelo Perales, Veronika Reinhold, Kara Sanchez, Ana M. Sierra, María Cristina Urruela, Hae-Joon Won, Ana Zaragoza

Special Language Program

Lecturers: Eisa Ayoobi (*Fulbright Scholar*), Cathy Haas, Qudsia Irshad (*Fulbright Scholar*), Aysha Pervaiz (*Fulbright Scholar*), Eva Prionas (*Coordinator*), Noor Rachmawaty (*Fulbright Scholar*)

Tibetan Language Program

Lecturer and Coordinator: Robert W. Clark

Language Center Offices: Building 30

Mail Code: 94305-2015

Department Phone: (650) 725-9222

Email: patricia@stanford.edu

Web Site: <http://language.stanford.edu>

Courses given in the Language Center have one of the following subject codes: AMELANG, APPLING, CHINLANG, EFSLANG, FRENLANG, GERLANG, ITALLANG, JAPANLNG, KORLANG, PORTLANG, SLAVLANG, SPANLANG, SPECLANG, and TIBETLNG. For a complete list of subject codes, see Appendix.

The Stanford Language Center was created to oversee all language instruction at Stanford. The center's charge is to guarantee that Stanford language programs are of the highest quality; to develop and administer achievement and proficiency tests needed to implement the language requirement; to provide technical assistance and support to the graduate students, lecturers, and faculty who deliver Stanford's language instruction; and to take leadership in research and development efforts in language learning. The Language Center is a unit within the Division of Literatures, Cultures, and Languages.

PROFICIENCY IN FOREIGN LANGUAGE NOTATION

A student who demonstrates levels of achievement equivalent to those expected at the end of the third quarter of the third year of study in a language may be awarded the notation "proficiency in" that language on the official transcript.

In order for a student to have the proficiency notation appear on the official transcript, the student must:

1. Inform the Language Center at least two quarters prior to graduation that he/she is requesting such a notation.
2. Schedule an Oral Proficiency Interview (OPI) through the Language Center. Since this is a formal oral proficiency interview, at least two quarters of lead time are essential for scheduling this interview. The interview will be conducted by a certified OPI rater. The formal interview lasts approximately one-half hour.
3. Submit to the Language Center an academic paper written in the foreign language in question of at least five pages (two pages in the Asian languages and Russian).
4. Ask one Stanford University Academic Council faculty member to write a letter on the student's behalf, attesting to a high level of academic writing and composition skill in the foreign language.
5. Receive a rating of 'advanced low' on the Foreign Service Institute/American Council on the Teaching of Foreign Languages (FSI/ACT-FL) oral proficiency scale, except in the Asian Languages and Russian which require an 'intermediate high' rating.

UNDERGRADUATE PROGRAM MINOR IN MIDDLE EASTERN LANGUAGES, LITERATURES, AND CULTURES

The undergraduate minor in Middle Eastern Languages, Literatures, and Cultures has been designed to give students majoring in other departments an opportunity to gain a substantial introduction to the Arabic and Hebrew languages, and to the cultures and civilizations of the Middle East. Contact the minors adviser before declaring at khalil@stanford.edu.

Students declaring a minor must do so no later than the last day of the fourth quarter before degree conferral. For example, students graduating in June (Spring Quarter) must declare the minor no later than the last day of Spring Quarter of their junior year. If a student is not able to meet this deadline, he or she may petition the Language Center director and request a revised declaration date, which may be granted at the director's discretion.

The requirements for a minor in Middle Eastern Languages, Literatures, and Cultures are:

1. Completion of six courses in either Track A, Cultural Studies, or Track B, Language Studies.
2. Courses for the minor must be taken for a letter grade unless only offered for faculty-elected satisfactory/no credit.
3. All courses must be completed with a letter grade of 'C' or better.
4. Courses may not overlap with those taken for a major course of study.
5. Courses taken which also fulfill a GER count toward fulfilling both minor and GER requirements.

- Students pursuing Track B, Cultural Studies, must complete the prerequisite of Beginning Arabic or Hebrew, or demonstrate equivalent competence.

CULTURAL STUDIES TRACK

Requirements are:

- Successful completion of the prerequisite, Beginning Arabic or Hebrew, or a demonstrated equivalent competence.
- Completion of three non-language AME program courses.
- Completion of three non-language related courses. Consult minor adviser for course options.
- Course work from GER courses may be used to fulfill the unit requirements for the minor.

LANGUAGE TRACK

Requirements are:

- Successful completion of the prerequisite, Beginning Arabic or Hebrew, or a demonstrated equivalent competence.
- Completion of one year of language study at the intermediate level (AMELANG 121A,B,C for Arabic, or AMELANG 129A,B,C for Hebrew).
- Completion of three non-language related courses, including one AMELANG course. Consult the minor adviser for course options.

MINOR IN LITERATURE

An undergraduate minor in Literature is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Language Center. Students should consult the "Division of Literatures, Cultures, and Languages" section of this bulletin for further details about the minor and its requirements.

MINOR IN MODERN LANGUAGES

An undergraduate minor in Modern Languages is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Language Center. Students should consult the "Division of Literatures, Cultures, and Languages" section of this bulletin for further details about the minor and its requirements.

GRADUATE PROGRAM

Ph.D. MINOR IN APPLIED LINGUISTICS

The Ph.D. minor in Applied Linguistics has been designed to give students the opportunity to examine and explore language as it pertains to teaching, learning, translation, education, and language policies.

The Ph.D. minor requires the completion of no less than 30 units of unduplicated course work. Course work must include LINGUIST 201 (Foundations of Linguistic Analysis, 4 units). At least one additional Linguistics course must also be taken. Courses taken for the minor must be incremental units beyond those used to satisfy the major (with the exception of Linguistics 201 for Linguistics students). At least 20 of the 30 units must be at the 200 level or above. Students may also supplement their Applied Linguistics training with an array of courses from the departments of Cultural and Social Anthropology, Linguistics, and Spanish and Portuguese.

Overlapping applied linguistics concentrations are available in Learning, Teaching, and Translation of Second Languages; and in Educational and Policy Applications of Linguistics.

Some suggested courses relevant to each track are listed below the track description; a more complete listing of courses which are appropriate for the minor can be found on the Language Center's web site at <http://language.stanford.edu/>.

Students in either track should develop a program of study in consultation with an academic adviser and submit the proposed program of study for approval by the Applied Linguistics Steering Committee.

THE LEARNING, TEACHING, AND TRANSLATION OF SECOND LANGUAGES TRACK

This overall program concentration requires general reading in second language acquisition (SLA) and/or translation while offering students course work in the following areas:

- Second language acquisition in instructed contexts
- Elements of curricular design for university and college settings
- The acquisition of second language literacy
- The use of technology to enhance student performance
- Linguistics and the teaching of foreign languages
- Theoretical foundations in the translation of various languages

<i>Subject and Catalog Number</i>	<i>Units</i>
APPLING 201. The Learning and Teaching of Second Languages	3
APPLING 202. Workshop in Technology	3
APPLING 203/SPANLIT 300. Issues and Methods in the Teaching of Heritage Languages	3-5
LINGUIST 191/291. Linguistics and the Teaching of English as a Foreign Language	4-5
LINGUIST 140/240. Language Acquisition I	4

EDUCATIONAL AND POLICY APPLICATIONS OF LINGUISTICS TRACK

This concentration is oriented toward a combination of conceptual and research foci regarding language minority populations and their educational welfare. The education of women, low-income, and language minority populations receive primary attention within this concentration.

<i>Subject and Catalog Number</i>	<i>Units</i>
EDUC 249. Theory and Issues in the Study of Bilingualism	3-4
EDUC 277. Education of Immigrant Students: Psychological Perspectives	4
EDUC 335X. Language Policy and Planning	3
EDUC 435X. Research Seminar in Applied Linguistics	2-4
LINGUIST 73/273. African American Vernacular English	4
LINGUIST 150. Language in Society	4-5
LINGUIST 159. Language in the U.S.	3-5
LINGUIST 250. Sociolinguistic Theory and Analysis	4-6

COURSES

Offerings in this section are ordered as follows:

Applied Linguistics (APPLING)
 African and Middle Eastern Languages (AMELANG)
 Chinese (CHINLANG)
 English for Foreign Students (EFSLANG)
 French (FRENLANG)
 German (GERLANG)
 Italian (ITALLANG)
 Japanese (JAPANLNG)
 Korean (KORLANG)
 Portuguese (PORTLANG)
 Russian (SLAVLANG)
 Spanish (SPANLANG)
 Special Languages (SPECLANG)
 Tibetan (TIBETLNG)

Students interested in general courses concerning languages, cultures, and literatures, or in advanced study of language and literature should consult the following departments and subject codes:

Asian Languages (CHINGEN, CHINLIT, JAPANGEN, JAPANLIT, KORGEN)
 French and Italian (FRENGEN, FRENLIT, ITALGEN, ITALLIT)
 German Studies (GERGEN, GERLIT)
 Spanish and Portuguese (SPANLIT, PORTLIT)
 Slavic Languages and Literatures (SLAVGEN, SLAVLIT)

APPLIED LINGUISTICS (APPLING)

APPLING 201. The Learning and Teaching of Second Languages— Learning perspective rather than traditional teaching methods. Focus is on instructional decision making within the context of student intellectual and linguistic development in university settings to different populations. Readings in second-language acquisition.

3 units, Spr (Bernhardt, E)

APPLING 202. Workshop in Technology—Technology-based applications for enhancing language learning. Developments in digital language assessment and the implications of word processing and Internet technologies across multiple languages and character systems. Hands-on, project-based.

3 units, Win (Kautz, J)

APPLING 203. Issues and Methods in the Teaching of Heritage Languages—(Same as SPANLIT 300) Teaching Spanish to students raised in Spanish-speaking homes. Issues include language variation in the Spanish-speaking world, English/Spanish bilingualism in the U.S., and second dialect acquisition. Techniques for developing the academic Spanish language skills of heritage students.

3-5 units, not given this year

APPLING 297. Directed Reading—Search for instructor on Axess. May be repeated for credit. Prerequisite: consent of instructor. (Staff)

1-4 units, Aut, Win, Spr (Staff)

AFRICAN AND MIDDLE EASTERN LANGUAGES AND LITERATURES (AMELANG)

The African and Middle Eastern Languages and Literatures Program offers classes in Arabic, Hebrew, Swahili, and African languages not regularly taught at Stanford. Based on current funding and student requests, the courses planned for 2006-07 are listed below. Additional languages may still be offered upon request, provided funding is available. Requests for the 2007-08 academic year should be made by Spring Quarter of this year at the AME program office, Building 40, Room 42B.

All beginning-level, three-unit courses are offered on a S/NC basis only. Intermediate-level and four-unit courses are offered with a grading option. Beginning and intermediate each refer to an academic year's sequence of language study. Most three-unit language courses are offered for a two-year, three quarter sequence:

All 'A' suffix courses are taught Autumn.

All 'B' suffix courses are taught Winter.

All 'C' suffix courses are taught Spring.

All beginning, intermediate, and advanced courses are 3 units except Arabic, Hebrew, and Swahili. In some circumstances, a beginning or intermediate course may be offered in alternate years.

Fulfilling the language requirement

Students can fulfill the language requirement by taking an African or Middle Eastern language. At least 12 units are needed to complete the requirement. Normally, the requirement is completed after the first quarter of intermediate-level language. In the case of African or Middle Eastern languages taught only at the beginning level, students may petition the Language Center to fulfill the requirement by taking a directed reading course in the fourth quarter. Contact patricia@stanford.edu for more information.

Those who have taken courses in the relevant language at another institution, or have previous knowledge of the language, can request to be tested. Tests are comprised of two parts, written and oral. Students must display first-year proficiency in the requested language to fulfill the requirement. Testing is guaranteed only for languages currently offered. Students planning to take a test must contact the AME program no later than the Spring Quarter of their sophomore year. To submit a request for language testing or to request that a language be taught, and for further information on the program, see <http://www.stanford.edu/dept/lc/MEL/>.

AFRICAN LANGUAGES COURSES

AMELANG 100A,B,C. Beginning Amharic, First Quarter

3 units, A: Aut, B: Win, C: Spr (Tefamariam, I)

AMELANG 101A,B,C. Intermediate Amharic

3 units, A: Aut, B: Win, C: Spr (Tefamariam, I)

AMELANG 103A,B,C. Beginning Hausa

3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 106A,B,C. Beginning Swahili

4 units, A: Aut, B: Win, C: Spr (Mohochi, S)

AMELANG 107A,B,C. Intermediate Swahili

2-4 units, A: Aut, B: Win, C: Spr (Mohochi, S)

AMELANG 108A,B,C. Advanced Swahili

2-4 units, A: Aut, B: Win, C: Spr (Mohochi, S)

AMELANG 133A,B,C. The African Forum

1 unit, A: Aut, B: Win, C: Spr (Mohochi, S)

AMELANG 134A,B,C. Beginning Igbo

3 units, A: Aut, B: Win, C: Spr (Ajaelo, G)

AMELANG 135A,B,C. Intermediate Igbo

3 units, A: Aut, B: Win, C: Spr (Ajaelo, G)

AMELANG 137A,B,C. Intermediate Xhosa

3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 147A,B,C. Beginning Bambara

3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 153A,B,C. Beginning Twi

3 units, A: Aut, B: Win, C: Spr (Nyam, K)

AMELANG 156A,B,C. Beginning Zulu

3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 157A,B,C. Intermediate Zulu

3 units, A: Aut, B: Win, C: Spr (Staff)

AMELANG 182A,B,C. Intermediate Fulani

3 units, A: Aut, B: Win, C: Spr (Camara, D)

AMELANG 186A,B,C. Beginning Yoruba

3 units, A: Aut, B: Win, C: Spr (Ashaolu, O)

AMELANG 187A,B,C. Intermediate Yoruba

3 units, A: Aut, B: Win, C: Spr (Ashaolu, O)

MIDDLE EASTERN LANGUAGE COURSES

AMELANG 144A,B,C. Beginning Persian

3 units, A: Aut, B: Win, C: Spr (Mohammadi, S)

AMELANG 184A,B,C. Beginning Turkish

3 units, A: Aut, B: Win, C: Spr (Ozirik, N)

AMELANG 185A,B,C. Intermediate Turkish

3 units, A: Aut, B: Win, C: Spr (Ozirik, N)

AMELANG 216A,B,C. Contemporary Language of Iran

3 units, A: Aut, B: Win, C: Spring (Amini, N)

ARABIC LANGUAGE AND LITERATURE COURSES

AMELANG 120A,B,C. Beginning Arabic—One-year sequence. Emphasis is on reading and writing standard Arabic (fusha).

5 units, A: Aut, B: Win, C: Spr (Aweiss, S; Barhoum, K; Salti, R)

AMELANG 121A,B,C. Intermediate Arabic—Grammar and syntax. Arabic texts from popular media outlets. Oral presentations.

2-3 units, A: Aut, B: Win, C: Spr (Aweiss, S; Salti, R)

AMELANG 122A,B,C. Advanced Arabic, First Quarter—Grammar and syntax. Complex texts and articles from the Arabic press. Oral reports, written assignments, and audiovisual aids including the Arabic Internet. Films and cultural productions.

2-3 units, A: Aut, B: Win, C: Spr (Bellali, N.)

AMELANG 143A,B,C. Advanced Arabic Conversation—May be repeated once for credit. Prerequisite: second-year year Arabic or consent of instructor.

2 units, A: Aut, B: Win, C: Spr (Salti, R)

AMELANG 161. The Contemporary Arab World and Culture through Literature—Readings from prominent authors dealing with topics such as gender and women, kinship and social concepts, nationalism, and religion. Texts delineating the cultural uniqueness of the Arab world include works by Naguib Mahfouz, Nawal El-Saadawi, Ghassan Kanafani, Tayyeb Salih, Etel Adnan, and short stories and poetry. No knowledge of Arabic required; extra unit for readings in Arabic. Limited enrollment. GER:DB-Hum, EC-GlobalCom
4 units, Aut (Barhoum, K)

AMELANG 162. Arab Women Writers and Issues—Fiction and non-fiction work. The major cultural factors shaping their feminist attitudes. Readings: Fatima Mernissi, Nawal El-Saadawi, Etel Adnan, Fadia Faqir, Alifa Rifaat, and Sahar Khalifeh. No knowledge of Arabic required; extra unit for readings in Arabic. Limited enrollment. GER:DB-Hum, EC-Gender
4 units, Win (Barhoum, K)

AMELANG 163. The Arab World through Travel Literature—Popular colonialist and postcolonialist portrayals of Arab culture and Islam. Recent Western depictions of Arabs and Muslims in travel literature. Readings include *Flaubert in Egypt*, *Guests of the Sheik*, *Justine*, *Covering Islam*, *Nine Parts of Desire*, and *Motoring with Mohammed*. No knowledge of Arabic required; extra unit for readings in Arabic. Limited enrollment. GER:DB-Hum, EC-GlobalCom
4 units, Spr (Barhoum, K)

AMELANG 195A,B,C. Readings in Arabic Literature—Short stories, poetry, literary criticism, Islamic texts, essays, and prose by notable Arab writers. Readings in Arabic. Prerequisite: two years of Arabic, native speaker, or equivalent.
2-4 units, not given this year

AMELANG 196A,B,C. Reading Arabic—For seniors and graduate students who need to acquire reading ability in Arabic for the Ph.D. or for advanced research in their own field.
2-3 units, A: Aut, B: Win, C: Spr (Bellali, N)

AMELANG 197A,B,C. Egyptian Colloquial Arabic—Prerequisite: first-year Arabic.
2-3 units, not given this year

AMELANG 213A,B,C. Beginning Arabic: From Basic Script to Islamic Text
4 units, A: Aut, B: Win, C: Spr (Aweiss, S)

JEWISH LANGUAGE AND LITERATURE COURSES

AMELANG 50A,B,C. Reading Hebrew—Introduction to Hebrew literature through short stories and poetry by notable Israeli writers. In Hebrew. Prerequisite: one year of Hebrew or equivalent.
2-4 units, not given this year

AMELANG 126. Reflection on the Other: The Jew in Arabic Literature, the Arab in Hebrew Literature—How literary works outside the realm of western culture struggle with questions such as identity, minority, and the issue of the other. How the Arab is viewed in Hebrew literature and how the Jew is viewed in Arabic literature. Historical, political, and sociological forces that have contributed to the shaping of the writer's views. Arab and Jewish (Israeli) culture. GER:DB-Hum, EC-GlobalCom
4 units, not given this year

AMELANG 127. Land and Literature—Israel has captured the imagination of writers throughout the generations. It has been portrayed as promised land, holy land, homeland, empty land, occupied land, and land of dreams. Ideological views and political events have shaped writers' conception of Israel. Readings include poems and prose by Hebrew/Israeli authors in translation, and theoretical texts about place and literature. No knowledge of Hebrew required. GER:DB-Hum, EC-GlobalCom
4 units, not given this year

AMELANG 128A,B,C. Beginning Hebrew
5 units, A: Aut (Porat, G; Greif, E), B: Win (Shemtov, V; Greif, E), C: Spr (Shemtov, V)

AMELANG 129A,B,C. Intermediate Hebrew
2-4 units, A: Aut (Porat, G), B: Win, C: Spr (Engel, A)

AMELANG 130A,B,C. Advanced Hebrew
1-4 units, not given this year

AMELANG 140A,B,C. Beginning Yiddish
2-4 units, A: Aut, B: Win, C: Spr (Levitov, J)

AMELANG 170A,B. Biblical Hebrew—The basic lexicon and grammar of Hebrew of the Tanakh or Old Testament. See RELIGST 170C for third part of this sequence (not given this year).
A: 2-4 units, Aut (Wang, T; Porat, G), B: not given this year

AMELANG 171. The Bible in Modern Hebrew Literature—The role of biblical myths in shaping Israeli identity and the development of a secular Hebrew literature. Readings include modern Hebrew poems and novels which offer new meanings to the stories of Genesis, Exodus, David, and the Song of Songs and make them relevant to the context of modern and postmodern Israeli culture. Readings in Hebrew and English. Prerequisite: intermediate Hebrew.
3-4 units, Spr (Shemtov, V)

AMELANG 173. Politics and Poetics in Israeli Literature: Politics and Poetics in Israeli Literature: Amos Oz and other Contemporary Hebrew Writers—Offered in conjunction with Amos Oz's visit as Stanford's Writer in Residence. Literature and political essays by Oz and contemporary Hebrew authors who address the Israeli-Palestinian conflict. Approaches that deal with the intersection of theory and practice and politics and poetics in Israeli literature. No knowledge of Hebrew required. GER EC-GlobalCom
4-5 units, Win (Shemtov)

AMELANG 174. East West East in Israeli Literature: The Novels of Yoel Hoffman—Influence of Eastern and Western philosophies and Jewish writings on Israeli literature. Focus is on the works of Yoel Hoffman and other contemporary writers. Texts in Hebrew and English. Prerequisite: advanced Hebrew.
2-4 units, Aut (Albeck-Gidron)

AMELANG 297. Directed Reading in African and Middle Eastern Languages—May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

AMELANG 395. Graduate Studies in African and Middle Eastern Languages—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

CHINESE LANGUAGE COURSES FIRST- AND SECOND-YEAR LANGUAGE

Students registering for the first time in a first- or second-year course must take a placement test if they have had any training in Chinese before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 20, 2006. Consult the Language Center or <http://language.stanford.edu/> for further information.

CHINLANG 1,2,3. First-Year Modern Chinese—Conversation, grammar, reading, elementary composition. Daily sections may be set at the beginning of the quarter to suit schedule requirements.
5 units, 1: Aut, 2: Win, 3: Spr (Zeng, H; Yi, Y; Zhang, Y)

CHINLANG 1B. First-Year Modern Chinese for Bilingual Students—For students with elementary comprehension and speaking skills who need work on conversation, grammar, reading, and composition.
3 units, 1B: Aut, 2B: Win, 3B: Sp (Rozelle, Y; Lin, N)

CHINLANG 5. Intensive First-Year Modern Chinese—Equivalent to 1,2,3 combined. Five weeks at Stanford and four weeks at Peking University.
7-8 units, Sum (Staff)

CHINLANG 6,7,8. Beginning Conversational Chinese—Three quarter sequence. Basic language skills in Mandarin to function abroad.

2 units, 6: Aut, 7: Win, 8: Spr (Rozelle, Y)

CHINLANG 10,11,12. Beginning Southern Min (Taiwanese) Conversation—Three quarter sequence. Basic language skills for everyday life situations. 10: Aut, 11: Win, 12: Spr

2 units, 10: Aut, 11: Win, 12: Spr (Lin, N)

CHINLANG 13A,B,C. Intermediate Southern Min (Taiwanese) Conversation—Vocabulary including business-related terms, grammatical structures, and spontaneous conversations. Prerequisite: 12 or consent of instructor.

2 units, A: Aut, B: Win, C: Spr (Lin, N)

CHINLANG 15,16,17. Beginning Cantonese Conversation—Three quarter sequence. Language skills for everyday life situations.

2 units, 15: Aut, 16: Win, 17: Spr (Dennig, S)

CHINLANG 18,19,20. Intermediate Cantonese Conversation—Continuation of CHINLANG 17.

2 units, 18: Aut, 19: Win, 20: Spr (Dennig, S)

CHINLANG 20A,B,C. Advanced Cantonese Conversation, First Quarter—Improving Cantonese through Hong Kong movies.

2 units, A: Aut, B: Win, C: Spr (Dennig, S)

CHINLANG 21,22,23. Second-Year Modern Chinese—Grammar, reading, conversation, composition. Daily sections may be set at the beginning of the quarter to suit schedule requirements. Prerequisite: 3 or equivalent.

5 units, 21: Aut, 22: Win, 23: Spr (Chung, M)

CHINLANG 21B,22B,23B. Second-Year Modern Chinese for Bilingual Students, First Quarter—For students with advanced comprehension and speaking skills, but lacking equivalent knowledge of grammar, reading, and writing Chinese characters. Equivalent to 21,22,23.

3 units, 21B: Aut, 22B: Win, 23B: Spr (Zhu, Q)

CHINLANG 25. Intensive Second-Year Modern Chinese—Equivalent to 21,22,23 combined. Five weeks at Stanford and four weeks at Peking University. Prerequisite: 3 or equivalent.

7-8 units, Sum (Staff)

CHINLANG 27,28,29. Intermediate Chinese Conversation—Prerequisite: 3 or consent of instructor.

2 units, 27: Aut (Fang, J), 28: Win, 29: Spr (Zhang, Y)

CHINLANG 99. Language Specials—Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr (Staff)

CHINLANG 101,102,103. Third-Year Modern Chinese—Written and spoken styles of modern Chinese. Reading and discussion of authentic writings on cultural topics; newspaper reports, radio, and TV broadcasts and films; online Chinese software and email network to facilitate study. Prerequisite: 23 or equivalent.

5 units, 101: Aut, 102: Win, 103: Spr (Wang, H)

CHINLANG 101B,102B,103B. Third-Year Modern Chinese for Bilingual Students—For students with advanced listening and speaking abilities, but lacking equivalent knowledge in reading and writing. Equivalent to 101,102,103.

3 units, 101B: Aut, 102B: Win, 103B: Spr (Wang, H)

CHINLANG 105. Intensive Third-Year Modern Chinese—Equivalent to 101,102,103 combined. Five weeks at Stanford and four weeks at Peking University. Prerequisite: 23 or equivalent.

7-8 units, Sum (Staff)

CHINLANG 121,122,123. Advanced Chinese Conversation—Prerequisite: 23 or equivalent.

2 units, 121: Aut, 122: Win, 123: Spr (Chung, M)

CHINLANG 131,132,133. Business Chinese—Commercial, economic, and business-related vocabulary. Materials include formal business conversations, newspaper and journal articles, and TV news on trade and economic. Technical language and business etiquette. Student oral and written reports on their own research regarding recent economic developments, using sources in China. Prerequisite: 23 or equivalent.

3-4 units, 131: Aut, 132: Win, 133: Spr (Wang, H)

CHINLANG 200. Directed Reading—May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr (Staff)

CHINLANG 211,212,213. Advanced Modern Chinese—Year-long sequence. Goal is to become functional speakers, readers, and writers of modern Chinese through articles and essays from newspapers, magazines, scholarly journals, and the Internet. Cultural and social science themes: students may take both themes for 5 units or one theme for reduced units. Prerequisite: three years of Chinese language.

2-5 units, 211: Aut (Zhu, Q), 212: Win, 213: Spr (Zhu, Q; Wang, Y)

CHINLANG 221,222,223. Advanced Modern Chinese for Social Sciences Students—Goal is to become functional speakers, readers, and writers of modern Chinese through articles, essays, newspapers, magazines, and scholarly journals in social sciences. Prerequisite: three years of Chinese. 221: Aut, 222: Win, 223: Spr

3 units, 221: Aut (Zhu, Q), 222: Win, 223: Spr (Zhu, Q; Wang, Y)

CHINLANG 394. Graduate Studies in Chinese Conversation—Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr (Staff)

CHINLANG 395. Graduate Studies in Chinese—Prerequisite: consent of instructor.

2-5 units, Aut, Win, Spr (Staff)

ENGLISH FOR FOREIGN STUDENTS

These courses, numbered from 690-698, represent offerings for non-native English-speaking graduate students in Autumn, Winter, and Spring quarters. Enrollment in one or more courses may be required of, or recommended to, current graduate students from other countries after they have taken the English placement examination. To enroll, students must go to <http://www.stanford.edu/group/efs> for directions on or before the first day of each quarter. Some courses are open to undergraduates by consent of the program: see <http://www.stanford.edu/group/efs> for a list.

During the Summer Session, courses in spoken and written English are offered. Two six-week intensive courses are also offered during the summer. Summer visitors must apply directly to the EFS program.

EFSLANG 690A. Interacting in English—Strategies for communicating effectively in social and academic settings. Informal and formal language used in campus settings, including starting and maintaining conversations, asking questions, making complaints, and contributing ideas and opinions. Simulations and discussions, with feedback on pronunciation, grammar, and usage. Enrollment limited to 14.

1-3 units, Aut (Elliott, R), Win (Yerian, K), Spr (Elliott, R)

EFSLANG 690B. Academic Discussion—Skills for effective participation in classroom settings, seminars, and research group meetings. Pronunciation, grammar, and appropriateness for specific tasks. Feedback on language and communication style. Prerequisite: 690A or consent of instructor. Enrollment limited to 14.

1-3 units, Aut (Yerian, K), Win (Rylance, C), Spr (Yerian, K)

EFSLANG 690C. Advanced Interacting in English—Communication skills for extended discourse such as storytelling and presenting supported arguments. Development of interactive listening facility and overall intelligibility and accuracy. Goal is advanced fluency in classroom, professional and social settings. Identification of and attention to individual patterned errors. Prerequisite: 690A or B or consent of instructor. Enrollment limited to 14.

1-3 units, Aut, Win, Spr (Yerian, K)

EFSLANG 691. Oral Presentation—For advanced graduate students. Practice in academic presentation skills; strategy, design, organization, and use of visual aids. Focus is on improving fluency and delivery style, with videotaping for feedback on language accuracy and usage. Prerequisite: 695A or consent of instructor. Enrollment limited to 14.

3 units, Aut, Win (Elliott, R), Spr (Romeo, K), Sum (Yerian, K)

EFSLANG 692. Speaking and Teaching in English—For non-native speakers who must teach in English. Focus is on developing clarity, intelligibility, and effectiveness through weekly presentations simulating actual teaching assistant responsibilities. Enrollment limited to 14.

1-3 units, Aut (Mawson, C), Win (Rylance, C), Spr (Yerian, K), Sum (Shabrami, C)

EFSLANG 693A. Listening Comprehension—Strategies for effective listening in an academic setting, focusing on identifying key ideas in lectures. Practice in understanding words and phrases commonly encountered in classroom settings. Computer-based exercises for comprehension of rapid, natural speech. Enrollment limited to 14.

1-3 units, Aut (Rylance, C, Shabrami, C)

EFSLANG 693B. Listening and Communication—Listening strategies and vocabulary for understanding English in academic and non-academic contexts. Discussion and interpretation improve comprehension of communicative intent. Computer-based and video exercises; individual project. Prerequisite: 693A or consent of instructor. Enrollment limited to 14.

1-3 units, Aut (Romeo, K; Rylance, C), Win (Shabrami, C), Spr (Rylance, C; Romeo, K)

EFSLANG 694. Communication Strategies in Professional Life—For advanced graduate students. Task-based practice of language appropriate for professional settings in industry and related teamwork. Simulation of the roles of manager, applicant, subordinate, and coworker. Prerequisite: 693A, or consent of instructor. Enrollment limited to 14.

1-3 units, Win, Spr (Shabrami, C)

EFSLANG 695A. Pronunciation and Intonation—Recognition and practice of American English sounds, stress, and intonation patterns for greater comprehension and intelligibility. Analysis of problem areas. Biweekly tape assignments and tutorials. Enrollment limited to 14.

1-3 units, Aut (Elliott, R; Mawson, C), Win (Elliott, R), Spr (Elliott, R; Mawson, C), Sum (Elliott, R)

EFSLANG 695B. Advanced Pronunciation and Intonation—Continuation of 695A, focusing on American English sounds, stress, rhythm, and intonation patterns. Emphasis is on self-monitoring, integrated with short presentations. Biweekly tape assignments and tutorials. Prerequisite: 695A. Enrollment limited to 14.

1-3 units, Aut, Win (Mawson, C), Spr (Elliott, R; Mawson, C)

EFSLANG 696. Understanding American Humor—Recognizing rhetorical devices, jokes, and character types common to spoken humor in the U.S. Listening practice with audio and video materials and colloquial spoken English, analysis of film and television transcripts, and crosscultural discussion. Prerequisites: 690B, 693B or consent of the instructor. Enrollment limited to 14.

1-3 units, Win, Spr (Rylance, C)

EFSLANG 697. Writing Fundamentals—Focus is on improving grammatical accuracy and vocabulary, building fluency, and learning the structure and conventions of English correspondence, reports, and short academic papers. Enrollment limited to 14.

1-3 units, Aut, Win (Romeo, K), Spr (Rylance, C)

EFSLANG 698A. Writing Academic English—Preparation of graduate students to write academic papers; emphasis is on fluency, organization, documentation, and appropriateness for specific writing tasks required in course work. Enrollment limited to 14.

1-3 units, Aut (Rylance, C), Win (Elliott, R), Spr, Sum (Shabrami, C)

EFSLANG 698B. Advanced Graduate Writing—For graduate students experienced in English writing and currently required to write for courses

and research. Class meetings and individual conferences. Prerequisite: 698A. Enrollment limited to 14.

1-3 units, Aut, Win (Yerian, K), Spr, Sum (Hubbard, P)

EFSLANG 698C. Writing and Presenting Research—For graduate students completing major research projects. Revising and editing strategies for preparing papers, conference abstracts, and poster presentations. Adapting content and style to different audiences. Students present their research with participant feedback. Prerequisites: 698B and 691 or consent of instructor. Enrollment limited to 14.

1-3 units, Aut, Win, Spr (Shabrami, C)

FRENCH LANGUAGE COURSES

FIRST- AND SECOND-YEAR FRENCH

Students who have never studied French before should enroll in FRENLANG 1. Students with previous training in French must take a placement test. All entering students must take Part I (written) of the online placement test during the summer, followed by Part II (oral) to be administered on campus September 20, 2006, in order to be placed in an appropriate course for Autumn Quarter. Consult the Language Center or <http://language.stanford.edu/> for further information.

FRENLANG 3, 5B, and 41B, prepare students for intermediate-level proficiency in listening comprehension, speaking, reading, and writing in satisfaction of the University foreign language requirement. Students may continue with second-year French language courses (22 or 23) or higher-level courses upon completion of the first-year sequence and recommendation of the coordinator.

A grade of 'C' or better is required to enter the next course in a language sequence. Language courses may not be repeated for credit, and must be taken in sequence.

FRENLANG 1,2,3. First-Year French—Authentic discourse appropriate to French and Francophone contexts.

5 units, Aut, Win, Spr (Ashaolu, O; Dozer-Rabedeau, J; Howard, H; Shashko, T; Tsethlikai, K; Wampole, C; Staff)

FRENLANG 5A,B. Intensive First-Year French—Completes first-year language sequence in two rather than three quarters. Recommended for students with previous knowledge of French who place into 5A on the placement test. 5B fulfills the University foreign language requirement. Prerequisite: French placement test and consent of instructor.

5A: *5 units, Aut (Howard, H), Win (Ashaolu, O)*

5B: *5 units, Win (Howard, H), Spr (Ashaolu, O)*

FRENLANG 10. Beginning French Oral Communication—For students who have completed 2 or equivalent. Emphasis is on speaking skills, vocabulary, and pronunciation. May be repeated once for credit.

2 units, Aut (Dozer-Rabedeau, J), Win (Howard, H), Spr (Tsethlikai, K)

FRENLANG 15. Intermediate French Oral Communication—For students who have completed the first-year language requirement. May be repeated once for credit.

2 units, Aut (Dozer-Rabedeau, J), Win (Howard, H), Spr (Tsethlikai, K)

FRENLANG 15S. Intermediate Conversation: French in Everyday Life—Same content as 15. May be repeated once for credit. Prerequisite: one year of college French or equivalent.

2 units, Sum (Staff)

FRENLANG 20A. France and Francophonie—Second-year French conversation based on themes from the regions of France and the Francophone world. Topics include travel, food, and crosscultural comparisons. Students returning from study abroad programs are encouraged to enroll. May be repeated once for credit. Prerequisite: 22 or equivalent.

2 units, Aut (Blanchard, M)

FRENLANG 20B. French Cinema—Second-year French conversation based on films. Intermediate-level speaking skills and advanced-level functions. Themes include: French filmmakers, stars, and trends. Film viewing in and outside the class in French. May be repeated once for credit. Prerequisite: 22 or equivalent.

2 units, Aut, Win (Blanchard, M)

FRENLANG 20C. Contemporary French Language—Second-year French conversation. Intermediate-level speaking skills and advanced-level functions for formal and informal situations. Useful for students planning to travel or study abroad. May be repeated once for credit. Prerequisite: 22 or equivalent.

2 units, not given this year

FRENLANG 22,23. Second-Year French—Two quarter sequence. Proficiency-based. Advanced-level skills including past, present, and future narration, description, and defending points of view on social and cultural issues. Topics from cultural comparisons with French and Francophone contexts. Prerequisite: 3 or consent of coordinator.

4-5 units, Aut, Win, Spr (Dozer-Rabedeau, J; Howard, H; Shashko, T; Wampole, C; Tsethlikai, K; Staff)

FRENLANG 24. Second-Year French: International Relations, Political Science, and Economics Emphasis—Proficiency-based. Discussion, writing, reading, and listening comprehension based on political, economic, and social topics. Prerequisite: 23.

3-4 units, not given this year

FRENLANG 41A,B. Intensive First-Year French—Accelerated. Written exercises, compositions, conversational practice, and daily work. Stanford graduate students restricted to 9 units register for 241A,B.

5 units, Sum (Staff)

FRENLANG 50. Reading French—For seniors or graduate students seeking to meet the University reading requirement for advanced degrees. Reading strategies for comprehension of secondary literature for academic research. Fulfills the University foreign language requirement for advanced degrees if student earns a grade of 'B.' Prerequisite: one year or reading proficiency in another Romance language.

4 units, Aut (Tsethlikai, K)

FRENLANG 50S. Reading French—Same content as 50.

2-4 units, Sum (Staff)

ADVANCED FRENCH

FRENLANG 120. Advanced French Oral Communication—Speaking skills and functions including narration, description, supporting opinions, and hypothesizing about current events and issues in France. May be repeated for credit after two quarters. Prerequisites: 23 or equivalent, and consent of the instructor.

3 units, Aut, Win, Spr (Blanchard, M)

FRENLANG 121. Introduction to French Texts—Readings of major literary figures and themes from medieval times to the present. Prerequisite: 23 or consent of coordinator. Recommended: 124.

3-4 units, Aut (Palumbo-Liu, S)

FRENLANG 122. Introduction to French Culture and Civilization—Discussion of French art, geography, history, political change, and social institutions. Prerequisite: 23 or equivalent.

3-4 units, alternate years, not given this year

FRENLANG 123. French Creative Writing—Advanced. Model texts introduce students to genres and styles; review of grammar and vocabulary. Discussion of original writing by students. Prerequisite: 23 or equivalent.

3-4 units, not given this year

FRENLANG 124. Advanced French Grammar—Required for students majoring or minoring in French. Recommended for students planning to take literature courses. Prerequisite: 23 or equivalent.

3-4 units, Aut, Win (Tsethlikai, K)

FRENLANG 125. French Phonetics—For majors and other students who plan to enroll in advanced courses. Study and practice of the French language sound system. Language lab. Prerequisite: 23 or equivalent.

3-4 units, Spr (Palumbo-Liu, S)

FRENLANG 126. French Stylistics and Textual Analysis—For majors and minors. Writing-intensive. Control of grammar and syntax in research and argumentative papers. Prerequisite 124.

3-4 units, Spr (Blanchard, M)

FRENLANG 199. Language Specials—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

FRENLANG 394. Graduate Studies in French Conversation—Prerequisite: consent of the instructor.

1-3 units, Aut, Win, Spr (Staff)

FRENLANG 395. Graduate Studies in French—Prerequisite: consent of instructor.

2-5 units, Aut, Win, Spr (Staff)

MAISON FRANÇAISE

Other in-house courses may be announced.

FRENLANG 60A. Beginning French Conversation—(AU)

1 unit, Aut, Win, Spr (de Castris, P)

FRENLANG 60B. Intermediate French Conversation—(AU)

1 unit, Aut, Win, Spr (de Castris, P)

FRENLANG 60C. Advanced French Conversation—(AU)

1 unit, Aut, Win, Spr (de Castris, P)

FRENLANG 60D. French Viticulture—See <http://www.stanford.edu/class/frenlang60d/>. Prerequisite: 21 or older. (AU)

1 unit, Aut, Win, Spr (de Castris, P)

FRENLANG 60E. French Cooking—(AU)

1 unit, Aut (Staff), Win, Spr (de Castris, P)

FRENLANG 60F. Filmmaking—(AU)

1 unit, Win (de Castris, P)

FRENLANG 60P. French House Projects—Prerequisite: consent of instructor. (AU)

1 unit, Aut, Win, Spr (de Castris, P)

FRENLANG 60T. Teaching French Conversation—(AU)

1 unit, Aut, Win, Spr (de Castris, P)

GERMAN LANGUAGE COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in German before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 20, 2006. Consult the Language Center or <http://language.stanford.edu/> for further information.

FIRST-YEAR GERMAN

GERLANG 1,2,3. First-Year German—Speaking, reading, writing, and listening. Authentic materials. Interactive approach with emphasis on developing communicative expression. The cultural context in which German is spoken.

5 units, Aut, Win, Spr (Engel, A; Goppelsroder, F; Petig, W; Utter, A; Zhang, X; Staff)

GERLANG 5A,B. Intensive First-Year German—Equivalent of 1,2,3 combined. Stanford graduate students restricted to 9 units register for 205A,B.

5 units, Sum (Staff)

GERLANG 10. Elementary German for Seniors and Graduate Students—Intensive. For students who need to acquire reading ability in German for the Ph.D. or for advanced research in their own field. 52 fulfills Ph.D. reading exam.

4 units, Win, Sum (Petig, W)

GERLANG 11P. Individually Programmed Beginning German—For those who wish to complete more or fewer than 5 units a quarter, have scheduling conflicts, or prefer to work independently. Self-paced work with text and tapes; instructor available for consultation on a regular basis. 3-unit minimum for beginners. Conversational practice available for additional unit.

1-12 units, Aut, Win (Strachota, K), Spr (Petig, W)

INTERMEDIATE GERMAN

At this level, students have several options depending on their interests. After completing 3 or equivalent, students may enroll in 120-level courses which consider topics in German culture while encouraging additional language learning. Alternatively, 21,22 emphasize a systematic review of the language, 21W,22W study the language of business and international relations, and 100-level courses develop advanced language skills along with cultural awareness.

GERLANG 21. Intermediate German I—Reading short stories; review of German structure. Discussions in German, short compositions, videos.
4 units, Aut (Petig, W)

GERLANG 22. Intermediate German II—Continuation of 21, with greater emphasis on reading and writing skills. Literary texts of major 20th-century writers in historical context.
4 units, Win (Petig, W)

GERLANG 21S. Intermediate German—Reading short stories, and review of German structure. Discussions in German, short compositions, videos. Prerequisite: one year of college German; or two years high school German; or equivalent of GERLANG 4; or AP German.
4 units, Sum (Staff)

GERLANG 21W. Intermediate German I: German for Business and International Relations—Equivalent to 21, but focus is on business and the political and economic geography of Germany. Audiotapes and videos. For students planning to do a business internship in a German-speaking country. Prerequisite: 3.
4 units, Aut (Petig, W)

GERLANG 22W. Intermediate German II: German for Business and International Relations—Equivalent to 22, but continuation of 21W. Recommended for students planning to do a business internship in a German-speaking country. Prerequisite: 21 or 21W.
4 units, alternate years, not given this year

GERLANG 52. Readings in Humanities—For undergraduates and graduate students with a knowledge of German who want to acquire reading proficiency. Readings from scholarly works and professional journals. Recommended for students who need to pass the Ph.D. reading exam. Prerequisite: one year of German, or 10, or equivalent.
4 units, Spr (Petig, W)

GERLANG 99. Language Specials—Prerequisite: consent of instructor.
1-12 units, Aut, Win, Spr, Sum (Staff)

GERLANG 100. Hundert Deutsche Jahre: One Hundred German Years—Hones German language skills while introducing the history and culture of Germany as experienced by ordinary people over the course of the 20th century. Themes include Germans and democracy, money, Hitler, books, the Wall, and food. Video series, parallel readings, discussion in German. Extra listening, reading, or speaking for fourth unit.
3-4 units, Spr (Strachota, K)

GERLANG 101,102. Advanced Language Study—Short fictional and expository readings, discussions, compositions. Review of grammatical structures. Vocabulary building with emphasis on common idiomatic expressions and troublesome lexical distinctions.
3-4 units, 101: Aut (McQueen, K), 102: Spr (Staff)

GERLANG 105. Advanced Business German—For students planning to work in a German-speaking country and for preparation of the International Business German exams. Case studies of typical business situations with accompanying videos, listening comprehension exercises, and class simulations. Business correspondence and reports in German. Prerequisite: 22 or equivalent.
4 units, Spr (Petig, W)

GERLANG 110. German Newspapers—For intermediate and advanced students. Articles from current newspapers and magazines, reading comprehension strategies with online news updates, and vocabulary. Writing practice if desired. May be repeated once for credit.
3-4 units, Win (Strachota, K)

GERLANG 111. Television News from Germany—For intermediate and advanced students. Current news reports and features for listening comprehension and vocabulary. Extra listening, speaking, or writing practice for fourth unit.
3-4 units, Aut (Strachota, K)

GERLANG 199. Individual Reading—Prerequisite: consent of instructor.
1-12 units, Aut, Win, Spr, Sum (Staff)

GERLANG 395. Graduate Studies in German—Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (Staff)

GERLANG 399. Independent Study—Prerequisite: consent of instructor.
1-6 units, Aut, Win, Spr, Sum (Staff)

HAUS MITTELEUROPA

Other in-house courses may be announced.

GERLANG 20A. Beginning German Conversation—(AU)
1 unit, Aut, Win, Spr (Robinson, O)

GERLANG 20B. Intermediate German Conversation—(AU)
1 unit, Aut, Win, Spr (Robinson, O)

GERLANG 20C. Advanced German Conversation—(AU)
1 unit, Aut, Win, Spr (Robinson, O)

GERLANG 20K. Küche Mitt (German Cooking Class)—(AU)
1 unit, Aut, Win, Spr (Robinson, O)

GERLANG 20M. Mitt Movie Series—(AU)
1 unit, Aut, Win, Spr (Robinson, O)

GERLANG 20P. Theme Projects—(AU)
1 unit, Aut, Win, Spr (Robinson, O)

GERLANG 20T. Teaching German Conversation—(AU)
1 unit, Aut, Win, Spr (Robinson, O)

ITALIAN LANGUAGE COURSES

Students who have never studied Italian before should enroll in ITAL- LANG 1. Students who have had some training in Italian before entering Stanford must take a placement test. Part I (written) of the placement test must be taken online during the summer, followed by Part II (oral), to be administered on campus September 20, 2006. Consult the Language Center or <http://language.stanford.edu/> for further information.

Completion of ITALLANG 2A, 3, or 41C fulfills the University foreign language requirement. Students may continue with second-year Italian (21 or 21A) or other higher level courses upon recommendation of the coordinator.

A grade of 'C' or better is required to enter the next course in a language sequence. Language courses may not be repeated for credit, and must be taken in sequence.

FIRST- AND SECOND-YEAR ITALIAN

ITALLANG 1,2,3. First-Year Italian—All-in-Italian communicative and interactive approach. Emphasis is on the development of authentic discourse in appropriate cultural contexts. Reading and listening to authentic materials, written and oral presentations, and conversational practice. Language lab, multimedia, and online activities. 3 fulfills the University language requirement.

5 units, Aut, Win, Spr (Baldocchi, M; Cellinese, A; Green, D; McCarty, A; Tempesta, G; Staff)

ITALLANG 1A,2A. Accelerated First-Year Italian, Part A—Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Italian or with a strong background in another Romance language. 2A fulfills the University language requirement. Prerequisite: placement tests and consent of instructor.

1A: *5 units, Aut, Win (Baldocchi, M; Gelmetti, S)*

2A: *5 units, Win, Spr (Baldocchi, M; Gelmetti, S)*

ITALLANG 20A,B. Intermediate Oral Communication: Italy Today—Second-year conversation based on movie clips, slide shows, and other authentic materials. Guest lectures on Italian culture including opera, pop music, wine, and food culture. Preview of the Florentine experience with Florence returnees sharing their experiences in Italy. Prerequisite: first-year Italian or consent of coordinator.

3 units, **20A:** Aut, **20B:** Win (*Tempesta, G*)

ITALLANG 41A,B,C. Intensive First-Year Italian—Accelerated. Covers 1-3 quarters of Italian. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials. Stanford graduate students restricted to 9 units register for 241A,B,C.

5 units, *Sum, (Staff)*

ITALLANG 20C. Intermediate Oral Communication: Modern Short Stories—Second-year conversation. Sources also include clips of Italian TV news and conversation about current affairs. Prerequisite: first-year Italian or consent of coordinator.

3 units, *Spr (Tempesta, G)*

ITALLANG 21,22,23. Second Year Italian—Content-based, integrating culture and language in the development of authentic discourse. Sources include news and film clips, music and audio files, and literary texts. Reading, writing, listening, and speaking competence based on crosscultural understanding. Prerequisite for 21: 2A, 3, 41C, or consent of coordinator.

3-4 units, **21:** Aut, **22:** Win (*Cellinese, A; Gelmetti, S*), **23:** *Spr (Gelmetti, S)*

ITALLANG 21A,22A. Accelerated Second-Year Italian—Completes second-year sequence in two rather than three quarters. Satisfies the foreign language requirement for students majoring in International Relations. Prerequisite: 2A, 3, or consent of coordinator.

21A: 4-5 units, *Win (Alberti, G), Spr (Devine, M)*

22A: 4-5 units, *Aut (Baldocchi, M), Spr (Cellinese, A)*

ITALLANG 24. Italian Language Through Cinema—Use of film sequences to improve communication skills and review language functions. Movie clips from new Italian cinema directors such as Benigni, Moretti, Salvatores, Soldini, and Tornatore. Emphasis is on speaking, conversation, debate, and essay writing. Prerequisite: 22A, 23 or equivalent, or consent of coordinator.

4 units, *Spr (Gelmetti, S)*

ITALLANG 50. Reading Italian—Accelerated. For graduate students seeking to meet the University reading requirement for advanced degrees; seniors require consent of instructor. Fulfills the University foreign language requirement for advanced degrees if student earns a grade of 'B.' Prerequisite: one year of Italian or reading proficiency in another Romance language.

3 units, *Spr (Devine, M)*

THIRD-YEAR ITALIAN

ITALLANG 114. Advanced Stylistics and Composition—Goal is proficiency in written and spoken Italian. Literary and non-literary texts with textual and grammatical analysis, oral reports, translations, and weekly writing assignments. Prerequisite: 22A or 23 or consent of instructor. WIM

3-4 units, *Win (Baldocchi, M)*

ITALLANG 115. Academic and Creative Writing—Continuation of 114. Academic prose: formal structures and academic terminology. Creative prose: short stories, expressive language, and when and how to break the rules for effect. Prerequisite: 114 or consent of coordinator. WIM

3-4 units, *Spr (Baldocchi, M)*

ITALLANG 99. Language Specials—Prerequisite: consent of instructor.

1-5 units, *Aut, Win, Spr, Sum (Staff)*

ITALLANG 394. Graduate Studies in Italian Conversation—Prerequisite: consent of instructor.

1-3 units, *Aut, Win, Spr (Staff)*

ITALLANG 395. Graduate Studies in Italian—Prerequisite: consent of instructor.

2-5 units, *Aut, Win, Spr (Staff)*

CASA ITALIANA

ITALLANG 126. La Casa Italiana Lounge—May be repeated for credit.

2 units, *Aut, Win, Spr (Lummus, D)*

JAPANESE LANGUAGE COURSES

Students registering for the first time in a course must take a placement test if they have had any training in Japanese before entering Stanford. All entering students must take Part I (written and listening) of the placement test online during the summer, followed by Part II (oral and written), to be administered on campus September 20, 2006 Consult the Language Center or <http://language.stanford.edu/> for further information.

FIRST- AND SECOND-YEAR JAPANESE

JAPANLNG 1,2,3. First-Year Modern Japanese—Foundation in grammar, reading, and composition. 150 Kanji characters introduced.

5 units, **1:** Aut, **2:** Win, **3:** *Spr (Busbin, K)*

JAPANLNG 7A,8A,9A. First-Year Japanese Language, Culture, and Communication A—For students who want to build communication skills in limited time. Online listening exercises, audiovisual materials. See <http://www.stanford.edu/group/japanese/jlcca.htm>.

3 units, **7A:** Aut, **8A:** Win, **9A:** *Spr (Fu, M)*

JAPANLNG 7B,8B,9B. First-Year Japanese Language, Culture, and Communication B—First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. 300 *kanji* characters. See <http://www.stanford.edu/group/japanese/1stB.htm>.

5 units, **7B:** Aut, **8B:** Win, **9B:** *Spr (Lipton, H; Staff)*

JAPANLNG 10. Intensive First-Year Japanese Language—Equivalent to 7B, 8B, and 9B combined. See <http://www.stanford.edu/group/japanese/summer>.

7-8 units, *Sum (Staff)*

JAPANLNG 17A,18A,19A. Second-Year Japanese Language, Culture, and Communication A—For students interested in studying or working in Japan. Continuation of 9A; Japanese language, culture, and communication.

3 units, **17A:** Aut (*Tomiyama, Y*), **18A:** Win, **19A:** *Spr (Arao, F)*

JAPANLNG 17B,18B,19B. Second-Year Japanese Language, Culture, and Communication B—Goal is to express in spoken and written Japanese advanced concepts such as comparisons and contrasts of the two cultures, descriptions of incidents, and social issues. 800 *kanji*, 1,400 new words, and higher-level grammatical constructions. Readings include newspapers, essays, and novellas. Prerequisite: 9B. See <http://www.stanford.edu/group/japanese/2ndB2.htm>.

5 units, **17B:** Aut, **18B:** Win (*Lowdermilk, M; Nakamura, K*),

19B: *Spr (Lowdermilk, M)*

JAPANLNG 20. Intensive Second-Year Japanese—Equivalent to 17B,18B,19B combined. Prerequisite 9B or equivalent. See <http://www.stanford.edu/group/japanese/summer>.

7-8 units, *Sum (Staff)*

JAPANLNG 21,22,23. Second-Year Modern Japanese, First Quarter—Continuation of 3. Expression of ideas, advanced grammatical patterns, 600 *kanji* characters, simple compositions, and enhanced understanding of Japanese culture. Goal is to read original source material. Prerequisite: 3 or equivalent.

5 units, **21:** Aut, **22:** Win, **23:** *Spr (Arao, F)*

JAPANLNG 27,28,29. Intermediate Japanese Conversation—Develops oral proficiency through simple sentence patterns, audio tapes, and oral presentations. For the practical use of Japanese. Prerequisite: 3, 9B, or consent of instructor.

2 units, **27:** Aut, **28:** Win, **29:** *Spr (Busbin, K)*

JAPANLNG99. Language Specials—Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr, Sum (Staff)

THIRD-YEAR ADVANCED JAPANESE

JAPANLNG 101,102,103. Third-Year Modern Japanese—Beyond fundamental grammatical forms to reading and discussion of more complex material. Emphasis is on Japanese sentence structure in newspaper and journal articles, and readings from fiction, poetry, and essays. Polite language (*keigo*) skills. Videos of everyday Japanese spoken at normal speed develop listening skills. Prerequisite: 23 or equivalent.

5 units, 101: Aut, 102: Win, 103: Spr (Arao, F)

JAPANLNG 111,112,113. Business Japanese—Topics include cultural attitudes and approaches, work ethic, the stock market, import-export trade. Business letters, job interviews, and resume writing. May be repeated for credit. In Japanese. Prerequisite: 23, 29, or 19B, or consent of instructor.

3 units, 111: Aut, 112: Win (Staff), 113: not given this year

JAPANLNG 114,115,116. Japanese for Bilingual Students—For students with advanced-level comprehension and speaking skills who in need of supplemental study. Emphasis is on reading, writing Chinese (*kanji*) characters, and formal Japanese.

3 units, not given this year.

JAPANLNG 121,122,123. Advanced Japanese Conversation—Focus is on fine tuning grammatical points, explaining things in Japanese, and fluency. Audiovisual material and oral presentations. Prerequisite: 23, 29, 19B, or consent of instructor.

2 units, 121: Aut, 122: Win, 123: Spr (Lipton, H)

JAPANLNG 127B,128B,129B. Third-Year Japanese Language, Culture, and Communication B—Emphasis is on spontaneous conversations and expressing abstract thoughts. Materials include Japanese media, literature, and TV. Cultural and social topics related to Japan and its people. Prerequisite: 19B. See <http://www.stanford.edu/group/japanese/3rdB.htm>.

5 units, 127B: Aut, 128B: Win, 129B: Spr (Tomiyama, Y; Staff)

JAPANLNG 130. Intensive Third-Year Japanese—Equivalent to 127B,128B,129B combined. Prerequisite: 19B or equivalent. See <http://www.stanford.edu/group/japanese/summer>.

7-8 units, Sum (Staff)

JAPANLNG 200. Directed Reading—Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr (Staff)

JAPANLNG 211,212,213. Advanced Japanese—Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: 103, 129B, or equivalent.

3-5 units, 211: Aut, 212: Win, 213: Spr (Nakamura, K)

JAPANLNG 394. Graduate Studies in Japanese Conversation—Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr (Staff)

JAPANLNG 395. Graduate Studies in Japanese—Prerequisite: consent of instructor.

2-5 units, Aut, Win, Spr (Staff)

KOREAN LANGUAGE COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Korean before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral and written), to be administered on campus September 20, 2006. Consult the Language Center or <http://language.stanford.edu/> for further information.

FIRST- AND SECOND-YEAR KOREAN

KORLANG 1,2,3. Beginning Korean—Communication skills, vocabulary, and grammar patterns. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language.

5 units, 1: Aut, 2: Win, 3: Spr (Kim, H)

KORLANG 21,22,23. Intermediate Korean—More complex sentences and grammatical patterns. Conversation in daily situations such as making a polite request or suggestion, reading simple texts, and Korean culture. Prerequisite: 3 or consent of instructor.

3-5 units, 21: Aut, 22: Win, 23: Spr (Kim, H)

ADVANCED

KORLANG 101,102,103. Advanced Intermediate Korean—Materials about Korean culture and society. Proficiency in interpersonal, interpretive, and presentational communication. Vocabulary, reading, and aural/oral skills. Prerequisite: 23 or consent of instructor.

2-3 units, 101: Aut, 102: Win, 103: Spr (Kim, H)

KORLANG 111,112. Medical Korean—Medical vocabulary; cultural attitude. Video clips, technical journal and prescription reading, and class simulations. Prerequisite: 23 or consent of instructor.

2-3 units, 111: Aut, 112: Spr (Kim, H)

KORLANG 130K. Korean Pronunciation and Intonation—Intelligibility and fluency. Lab assignments. Prerequisite: 3 or consent of instructor.

2-3 units, not given this year

KORLANG 141. Business Korean—Business-related vocabulary, cultural etiquette, and work ethics. Business letters, mock interviews, and resumes. Prerequisite: 23 or consent of instructor.

2-3 units, Win (Kim, H)

KORLANG 200. Directed Reading in Korean—Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr, Sum (Staff)

KORLANG 301,302,303. Advanced Korean—Advanced and intellectual speaking and writing skills. Vocabulary, discussion, and presentation based on readings on topics such as Korean culture, history, economy, politics, multimedia, newspaper articles, and magazines. Prerequisite: 103 or consent of instructor.

3-5 units, not given this year

KORLANG 395. Graduate Studies in Korean—Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr (Staff)

PORTUGUESE LANGUAGE COURSES

Because the Portuguese Language Program does not have a formal placement test, students registering for the first time in a first- or second-year course must see the coordinator for proper placement if they have had any prior training in Portuguese. Portuguese classes count towards a major or minor in Spanish, or a minor in Portuguese. Consult the Language Center or <http://language.stanford.edu/> for further information.

FIRST- AND SECOND-YEAR PORTUGUESE

PORTLANG 1,2,3. First-Year Portuguese—Oral comprehension and proficiency in speaking. Students learn the language as they contrast Brazilian culture with their own. Lab. Completion of 3 fulfills the University Foreign Language Requirement.

5 units, 1: Aut (McIntyre, S) 2: Win, (Delgado, A) 3: Spr (Staff)

PORTLANG 1A,2A. Accelerated First-Year Portuguese—For students with two years of formal study of a Romance language, preferably Spanish. Goal is to use socially and culturally appropriate forms in conversations, providing and obtaining information, and expressing feelings, emotions, and opinions. Students learn the language as they contrast Brazilian culture with their own. Lab. Completion of 2A fulfills the University's foreign language requirement.

3-5 units, Aut (McIntyre, S; Wiedemann, L), Win (Delgado, A; McIntyre, S), Spr (McIntyre, S; Wiedemann, L)

PORTLANG 11A,12A. Accelerated Second-Year Portuguese—Goal is to use socially and culturally appropriate forms in narrations, descriptions, and expression of ideas and opinions. Prerequisite: first-year sequence, equivalent, or consent of instructor.

11A: 3-5 units, Aut (Wiedemann, L), Win, Spr (Delgado, A)

12A: 3-5 units, Aut (McIntyre, S), Win, Spr (Delgado, A)

PORTLANG 50. Reading in Portuguese—For students with superior reading proficiency in Spanish or another Romance Language. Reading competence for research and courses in Luso-Brazilian studies. Literary, journalistic, and academic readings. Fulfills University reading requirement for advanced degrees.

3-4 units, Spr (Wiedemann, L)

PORTLANG 99. Language Specials—Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr (Staff)

ADVANCED PORTUGUESE

PORTLANG 101. Reading and Writing in Portuguese—Further development of reading comprehension and vocabulary. The distinction between formal and informal Portuguese. Prerequisite: 12A or consent of instructor.

3-4 units, Aut (Wiedemann, L)

PORTLANG 102. Composition and Writing Workshop—Further development of academic writing. May be used as workshop to write papers for another course. Prerequisite: 12A or consent of instructor.

3-4 units, Win (Wiedemann, L)

PORTLANG 103. Advanced Conversation: Brazil Today—Emphasis is on formal presentations and discussions. Contemporary issues in Brazil based on Brazilian newspaper and magazine articles, TV and online news, films, art exhibits, and scientific advances. Students prepare short presentations and lead subsequent discussions. May be repeated once for credit. Prerequisite: 12A or consent of instructor.

3 units, Spr (Wiedemann, L)

PORTLANG 297. Directed Reading—Prerequisite: consent of instructor.

1-4 units, Aut, Win, Spr (Staff)

PORTLANG 394. Graduate Studies in Portuguese Conversation—Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr (Staff)

PORTLANG 395. Graduate Studies in Portuguese—Prerequisite: consent of instructor.

2-5 units, Aut, Win, Spr (Staff)

SLAVIC LANGUAGE COURSES

Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Russian before entering Stanford. All entering students must take Part I (written) of the placement test online during the summer, followed by Part II (oral), to be administered on campus September 20, 2006. Consult the Language Center or <http://language.stanford.edu/> for further information.

FIRST- AND SECOND-YEAR RUSSIAN

SLAVLANG 1,2,3. First-Year Russian—Functionally-based communicative approach, including essential Russian grammar. Discussions of Russian culture and the Russian view of reality.

5 units, 1: Aut, 2: Win (Gruen, I; Khassina, E),

3: Spr (Khassina, E; Rouland, N)

SLAVLANG 5,6,7. Russian for Native Speakers—Self-paced. Reading and writing skills and communicating in formal and informal settings. Does not fulfill the University foreign language requirement.

2 units, 5: Aut, 6: Win (Khassina, E), 7: not given this year

SLAVLANG 51,52,53. Second-Year Russian—More difficult grammar such as numbers, verb conjugation, and aspect. Vocabulary, speaking skills.

5 units, 51: Aut, 52: Win (Khassina, E; Schupbach, R),

53: Spr (Khassina, E; Nekliudova, K)

SLAVLANG 55. Intermediate Russian Conversation—May be repeated for credit. Prerequisite: first-year Russian or equivalent placement.

2 units, Aut, Win, Spr (Greenhill, R)

SLAVLANG 99. Language Specials—Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr (Staff)

THIRD-YEAR AND ADVANCED RUSSIAN

SLAVLANG 111,112,113. Third-Year Russian—A snapshot of Russian life. Reading comprehension, conversational competence, grammatical accuracy, and cultural sophistication.

4 units, 111: Aut, 112: Win, 113: Spr (Greenhill, R)

SLAVLANG 177,178,179. Fourth-Year Russian—Culture, history, and current events. Films, classical and contemporary writers, newspaper articles, documentaries, radio and TV programs, and music. Review and fine-tuning of grammar and idiomatic usage. Prerequisite: 113 or equivalent.

3 units, 177: Aut, 178: Win, 179: Spr (Greenhill, R)

SLAVLANG 181,182,183. Fifth-Year Russian—Language proficiency maintenance; appropriate for majors and non-majors with significant language experience overseas. Discussions, oral presentations, and writing essays on contemporary Russia.

3 units, 181: Aut, 182: Win (Greenhill, R) 183: Spr (Schupbach, R)

SLAVLANG 199. Individual Work—Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr, Sum (Staff)

SLAVLANG 299. Independent Study

1-5 units, Aut, Win, Spr, Sum (Staff)

SLAVLANG 395. Graduate Studies in Russian—Prerequisite: consent of instructor.

2-5 units, Aut, Win, Spr (Staff)

SLAVIANSKII DOM

Other in-house courses may be announced.

SLAVLANG 60A. Beginning Russian Conversation—(AU)

1 unit, Aut (Safran, G)

SLAVLANG 60B. Intermediate Russian Conversation—(AU)

1 unit, Win (Safran, G)

SLAVLANG 60C. Advanced Russian Conversation—(AU)

1 unit, Spr (Safran, G)

SLAVLANG 60D. East European Breweries and Brewing—(AU)

1 unit, Win, Spr (Safran, G)

SLAVLANG 60E. Slavic Films Series—(AU)

1 unit, Win (Safran, G)

SLAVLANG 60P. Slav Dom Theme Projects—(AU)

1 unit, Aut, Win, Spr (Safran, G)

SLAVLANG 60T. Teaching Slavic Conversation—(AU)

1 unit, Aut, Win, Spr (Safran, G)

SPANISH LANGUAGE COURSES

Students who have never studied Spanish before should enroll in SPANLANG 1. Students registering for the first time in a first- or second-year course must take a placement test if they had any training in Spanish before entering Stanford. All entering students who have not taken the Spanish Language Advanced Placement (AP) Exam and received a score of 4 or 5, or who have not taken the SAT II with a score of 630 or above, must take Part I (written) of the placement test online during the summer at <http://language.stanford.edu/SPANISH>, followed by Part II (oral), to be administered on campus September 20, 2006. Students who have passed the language AP exam with a 4 or 5 or the SAT II with a 630 or above are exempted from the written test, but must take the oral on September 20, 2006 in order to determine their correct placement. Students who have taken the Spanish Language Advanced Placement (AP) and received a score of 5 are eligible for 10 units of credit in Spanish. Consult the Language Center or <http://language.stanford.edu/> for further information.

Completion of SPANLANG 2A, 3, or 41C fulfills the University language requirement.

Students who grew up in homes where Spanish is spoken should take the placement assessment for the special series of courses (21B, 22B, 23B) designed for these speakers. The bilingual series fulfills the language requirement at Stanford. Potential home-background speakers should complete the questionnaire found at <http://language.stanford.edu/HOMEBACKGROUND>, and attend the assessment for potential home-background speakers administered on September 20, 2006.

A grade of 'C' or better is required to enter the next course in a language sequence. Language courses may not be repeated for credit and must be taken in sequence. Second-year students may alternate between the cultural emphasis (11C, 12C, 13C) and international relations (11R, 12R, 13R) series if done so in sequence (11, 12, 13); however, a student may only take one of each level in these series.

FIRST- AND SECOND-YEAR SPANISH

SPANLANG 1,2,3. First-Year Spanish—Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Influences shaping the production of oral and written texts in the Spanish- and English-speaking world.

5 units, Aut, Win, Spr (Alexander, A; Brates, V; Catoira, L; Guzmán, C; Miano, A; Nissler, P; Reinhold, V; Sanchez, K; Urruela, M; Zaragoza, A; Staff)

SPANLANG 1A,2A. Accelerated First-Year Spanish—Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Spanish, or those with a strong background in another Romance language. 2A fulfills the University language requirement. Prerequisite: written and oral placement tests.

*1A: 5 units, Aut, Win (Brates, V; Nissler, P; Reinhold, V; Won, H)
2A: 5 units, Win, Spr (Brates, V; Nissler, P; Reinhold, V; Won, H)*

SPANLANG 10. Beginning Oral Communication—For students who have completed or are currently taking 2 and who wish to devote additional class time to developing pronunciation, usable vocabulary, and speaking skills. May be repeated once for credit.

2 units, Aut, Win, Spr (Cano Brito, V; Corso, I)

SPANLANG 11C,12C,13C. Second-Year Spanish: Cultural Emphasis—Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socioculturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: one year of college Spanish or equivalent.

4-5 units, Aut, Win, Spr (Alexander, A; Fernandez-Medina, N; Guzman, C; Kenna, C; Perales, O; Urruela, M; Zaragoza, A; Molitoris, J; Staff)

SPANLANG 11R,12R,13R. Second-Year Spanish: Emphasis on International Relations—Sequence integrating geopolitics and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language, international relations, and

socioeconomics of the Spanish-speaking world. Prerequisite: one year of college Spanish or equivalent.

4-5 units, 11R: Aut (Brates, V; Sierra, A), 12R: Win, 13R: Spr (Perales, O; Sierra, A; Staff)

SPANLANG 15. Intermediate Oral Communication—Emphasis is on interaction in Spanish locally and globally. Regional vocabularies and cultures at home and abroad. Interaction with local native Spanish speakers and communities globally via the Internet. May be repeated once for credit.

3 units, Aut (Staff), Win (Cano Brito, V; Fernandez-Medina, N), Spr (Perales, O)

SPANLANG 19M. Spanish for Heritage and Foreign Language Pre-Med and Public Health Students—For students who grew up in homes where Spanish is spoken or who possess a considerable command of Spanish. Focus is on developing the ability to provide information on health-related topics to Spanish speakers in the U.S. Students participate in the organization and delivery of information on preventive health care in a workshop setting to a Spanish-speaking community.

3-4 units, Spr (Sierra, A)

SPANLANG 21B,22B,23B. Second-Year Spanish for Heritage Language Students, First Quarter—Emphasis is on ability to communicate orally and in writing. Spelling and the written accent. Goal is to understand, interpret, and analyze texts, movies, radio, and television. Written language skills include rules for editing written language. Third quarter focus is on the development of written and oral styles and registers used in more formal settings.

3-5 units, 21B: Aut, 22B: Win (Weikel, K), 23B: Spr (Cano Brito, V)

SPANLANG 41A,B,C. Intensive First-Year Spanish—Goal is to engage in interactions with Spanish speakers in socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Stanford graduate students restricted to 9 units register for 241A,B,C.

5 units, Sum (Staff)

SPANLANG 50. Reading Spanish—For students who have taken Spanish for at least one year or have superior reading proficiency in another Romance language. Emphasis is on academic texts. Fulfills University reading requirements for advanced degrees if students earn a grade of 'B.'

3 units, Spr (Sierra, A)

SPANLANG 99. Language Specials—May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr, Sum (Staff)

ADVANCED COURSES

SPANLANG 100. Advanced Oral Communication—For students who have completed second-year Spanish or who have oral skills above the intermediate level. Interactive activities require students to persuade, analyze, support opinions, and gather and interpret others' points of view. Focus is on vocabulary enrichment and idiomatic expressions. Cultural, literary, political, and journalistic readings. May be repeated once for credit. Prerequisite: 13 or equivalent.

3 units, Aut, Win, Spr (Rondinel, S)

SPANLANG 101. The Structure of Spanish—Criteria and skills to analyze Spanish grammatical structure. Identification of word functions in sentences and texts, types of sentences, and terminology. Structure of nouns, adjectives, and verbs, and their relationship with meaning. The differences between Spanish grammar as a formal system and in everyday life. Prerequisite: 13C, 13R, 23B, or equivalent.

3-5 units, Aut, Win (Sierra, A)

SPANLANG 102. Composition and Writing Workshop—Individual development of the ability to write in Spanish. Emphasis is on style and diction, and on preparing and writing essays on literary topics. Non-Spanish majors or minors may choose topics more closely related to their studies for projects. Prerequisite: two years of college Spanish or equivalent. WIM

3-5 units, Win (Kenna, C)

SPANLANG 102B. Composition and Writing Workshop for Heritage Language Students—For students with a good understanding of written accents, spelling, and syntax. Focus is on the craft of writing with emphasis on brainstorming, planning, outlining, drafting, revising, style, diction, and editing. Writing essays on literary topics. Non-Spanish majors or minors may choose topics related to their studies. Prerequisite: 23B or equivalent.

3-5 units, Win (*Miano, A*)

SPANLANG 121M, 122M, 123M. Spanish for Medical Students—Goal is a practical and rapid command of spoken Spanish. Topics: the human body, hospital procedures, diagnostics, food, and essential phrases for on-the-spot reference when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.

3 units, 121M: Aut, 122M: Win, 123M: Spr (*Corso, I*)

SPANLANG 199. Individual Reading—May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut, Win, Spr, Sum (*Staff*)

SPANLANG 394. Graduate Studies in Spanish Conversation—Prerequisite: consent of instructor.

1-3 units, Aut, Win, Spr (*Staff*)

SPANLANG 395. Graduate Studies in Spanish—Prerequisite: consent of instructor.

2-5 units, Aut, Win, Spr (*Staff*)

YOST HOUSE

Other in-house courses may be announced.

SPANLANG 60A. Beginning Spanish Conversation—(AU)

1 unit, Aut (*Urruela, M*)

SPANLANG 60B. Intermediate Spanish Conversation—(AU)

1 unit, Win (*Urruela, M*)

SPANLANG 60C. Advanced Spanish Conversation—(AU)

1 unit, Spr (*Urruela, M*)

SPANLANG 60K. Cooking Class—(AU)

1 unit, Win, Spr (*Urruela, M*)

SPANLANG 60M. Movie Series—(AU)

1 unit, Win (*Urruela, M*)

SPANLANG 60P. Yost Lecture Series—(AU)

1 unit, Aut, Win, Spr (*Urruela, M*)

SPANLANG 60T. Teaching Spanish Conversation—(AU)

1 unit, Aut, Win, Spr (*Urruela, M*)

SPECIAL LANGUAGE PROGRAM

The Special Language Program (SLP) offers foreign languages not otherwise taught at Stanford. Based on current funding and student requests, the courses planned for 2006-07 are listed below; however, not every course listed is taught. Additional languages may still be offered upon request, provided funding is available. Requests for the 2007-08 academic year should be made by Spring Quarter of this year at the Special Language Program office.

All beginning-level 3-unit courses are offered on a satisfactory/no credit basis only. Intermediate-level and 4-unit courses are offered with a grading option. Beginning and intermediate each refer to an academic year's sequence of language study. Most 3-unit language courses are offered for a two-year, three quarter sequence:

'A' suffix courses are typically taught Autumn.

'B' suffix courses are typically taught Winter.

'C' suffix courses are typically taught Spring.

All beginning, intermediate, and advanced courses are 3 units except modern Greek and ASL. In some circumstances, a beginning or intermediate course may be offered in alternate years.

FULFILLING THE LANGUAGE REQUIREMENT

Students who have already taken courses in the relevant language at another institution, or who have previous knowledge of the language, can request to be tested. Tests are comprised of written and oral parts. A student must display first-year level proficiency in the requested language in order to fulfill the requirement. Testing is guaranteed only for these languages currently offered. Students planning to take a test must contact the Special Language Program no later than the Spring Quarter of sophomore year. To submit a request for language testing, or to request a language, apply via the web at <http://www.stanford.edu/dept/SLP>.

BEGINNING-LEVEL, FIRST-YEAR COURSES

Beginning-level, first-year language courses require no previous knowledge of the language. The beginning-level sequence emphasizes development of the full range of language skills, reading, listening comprehension, the use of grammatical structures, and oral and written communication, through a variety of learning themes. Individual, small group, interactive work and multimedia-based activities reinforce language skills and provide the platform for adapting the curriculum to specific student learning goals. Cultural awareness is a strong component of the curriculum.

INTERMEDIATE-LEVEL, SECOND-YEAR COURSES

Intermediate-level, second-year language courses require completion of the beginning sequence, or consent of instructor. The intermediate-level sequence focuses on continuous mastery and development of learning skills that help students to converse accurately and more fluently, incorporate more advanced grammatical structures in their oral and written work, use idiomatic expressions in the right context, and write simple compositions. Curricular objectives and enhanced understanding of the culture are built into the courses through a multimodal approach.

ADVANCED-LEVEL, THIRD-YEAR COURSES

Advanced-level, third-year language courses require completion of the intermediate-year sequence and consent of the program coordinator. The advanced-level sequence focuses on accurate understanding and use of structures through authentic texts and multimedia materials, and readings from various genres. Individual learning goals and student proficiency are taken into account to provide a learning environment that helps students become more autonomous learners.

For further information, consult the Special Language Program in Building 40, Room 41B.

AMERICAN SIGN LANGUAGE COURSES

SPECLANG 178A,B,C. Beginning Sign Language—Comprehension and production skills. Culture of deaf people. Limited enrollment.

4 units, A: Aut, B: Win, C: Spr (*Haas, C*)

SPECLANG 179A,B,C. Intermediate Sign Language—Additional functional structures, lexical items, and history. Limited enrollment.

4 units, A: Aut, B: Win, C: Spr (*Haas, C*)

CENTRAL ASIAN LANGUAGE COURSES

SPECLANG 115A,B,C. Beginning Uighur

3 units, A: Aut, B: Win, C: Spr (*Atawulla, K*)

SPECLANG 116A,B,C. Intermediate Uighur

3 units, A: Aut, B: Win, C: Spr (*Atawulla, K*)

SPECLANG 192A,B,C. Beginning Kazakh

3 units, A: Aut, B: Win, C: Spr (*Kunanbaeva, A*)

SPECLANG 193A,B,C. Intermediate Kazakh

3 units, A: Aut, B: Win, C: Spr (*Kunanbaeva, A*)

SPECLANG 229A,B,C. Beginning Pashto

3 units, A: Aut, B: Win, C: Spr (*Irshad, Q*)

SPECLANG 232A,B,C. Beginning Dari

3 units, A: Aut, B: Win, C: Spr (*Ayoobi, E*)

SPECLANG 238A,B,C. Beginning Uzbek
3 units, A: Aut, B: Win, C: Spr (*Kunanbaeva, A*)

EAST ASIAN LANGUAGE COURSES

SPECLANG 144A,B,C. Beginning Tagalog
3 units, A: Aut, B: Win, C: Spr (*Penaranda, M*)

SPECLANG 145A,B,C. Intermediate Tagalog
3 units, A: Aut, B: Win, C: Spr (*Penaranda, M*)

SPECLANG 150A,B,C. Beginning Vietnamese
3 units, not given this year (*Ha, P*)

SPECLANG 151A,B,C. Intermediate Vietnamese
3 units, A: Aut, B: Win, C: Spr (*Ha, P*)

SPECLANG 156A,B,C. Beginning Indonesian
3 units, A: Aut, B: Win, C: Spr (*Rachmawaty, N*)

SPECLANG 176A,B,C. Beginning Thai
3 units, A: Aut, B: Win, C: Spr (*Moore, R*)

SPECLANG 177A,B,C. Intermediate Thai
3 units, A: Aut, B: Win, C: Spr (*Moore, R*)

SPECLANG 224A,B,C. Advanced Vietnamese
3 units, A: Aut, B: Win, C: Spr (*Ha, P*)

SPECLANG 226A,B,C. Beginning Khmer
3 units, A: Aut, B: Win, C: Spr (*Staff*)

SOUTH ASIAN LANGUAGE COURSES

SPECLANG 152A,B,C. Beginning Hindi
3 units, A: Aut, B: Win, C: Spr (*Malhotra, P*)

SPECLANG 153A,B,C. Intermediate Hindi
3 units, A: Aut, B: Win, C: Spr (*Malhotra, P*)

SPECLANG 159A,B,C. Beginning Punjabi
3 units, A: Aut, B: Win, C: Spr (*Dhillon, R*)

SPECLANG 160A,B,C. Intermediate Punjabi
3 units, A: Aut, B: Win, C: Spr (*Dhillon, R*)

SPECLANG 162A,B,C. Beginning Tamil
3 units, A: Aut, B: Win, C: Spr (*Staff*)

SPECLANG 183A,B,C. Beginning Sanskrit
3 units, A: Aut, B: Win, C: Spr (*Porta, F*)

SPECLANG 218A,B,C. Beginning Urdu
3 units, A: Aut, B: Win, C: Spr (*Pervaiz, A*)

CREOLE LANGUAGE COURSES

SPECLANG 134A. Beginning Haitian Creole
3 units, Spr (*Staff*)

EUROPEAN LANGUAGE COURSES

SPECLANG 75. Greek Culture, Ideals, and Themes—Introduction to Greek culture and its global influence in a social historical context, through images from its past and institutions in contemporary Greek society. Limited enrollment. GER:DB-Hum, EC-GlobalCom
3 units, Spr (*Prionas, E*)

SPECLANG 123A,B,C. Beginning Armenian
3 units, A: Aut, B: Win, C: Spr (*Staff*)

SPECLANG 129A,B,C. Beginning Ukrainian
3 units, A: Aut, B: Win, C: Spr (*Jarboe, L*)

SPECLANG 164A,B,C. Beginning Czech
3 units, A: Aut, B: Win, C: Spr (*Dusatko, J*)

SPECLANG 165A,B,C. Intermediate Czech
3 units, A: Aut, B: Win, C: Spr (*Dusatko, J*)

SPECLANG 167A,B,C. Beginning Polish
3 units, A: Aut, B: Win, C: Spr (*Kieturakis, A*)

SPECLANG 168A,B,C. Intermediate Polish
3 units, A: Aut, B: Win, C: Spr (*Kieturakis, A*)

SPECLANG 170A,B,C. Beginning Modern Greek
4 units, A: Aut, B: Win, C: Spr (*Prionas, E*)

SPECLANG 171A,B,C. Intermediate Modern Greek
4 units, not given this year (*Prionas, E*)

SPECLANG 172A,B,C. Modern Greek Language and Culture through Literature and Film—Accelerated acquisition of language skills through text and media. Vocabulary enrichment through multimedia, online materials. Alternates with 171A,B,C.

4 units, A: Aut, B: Win, C: Spr (*Prionas, E*)

SPECLANG 173A,B,C. Beginning Hungarian
3 units, A: Aut, B: Win, C: Spr (*Mihalik, A*)

SPECLANG 186A,B,C. Beginning Serbo-Croatian
3 units, A: Aut, B: Win, C: Spr (*Medic, S*)

SPECLANG 198Q. Modern Greece in Film and Literature—Stanford Introductory Seminar. Preference to sophomores. Cultural and literary highlights. Filmmakers include Kakoyannis, Dassen, Boulmetis, Angelopoulos, and Scorsese; readings from Eugenides, Gage, Kavafis, Kazantzakis, Samarakis, Seferis, and Elytis. GER:DB-Hum, EC-GlobalCom
3-5 units, Aut (*Prionas, E*)

SPECLANG 215A,B,C. Modern Greek for Heritage Language Learners
4 units, not given this year (*Prionas, E*)

SPECLANG 221A,B,C. Beginning Norwegian
3 units, A: Aut, B: Win, C: Spr (*Staff*)

SPECLANG 235A,B,C. Beginning Basque
3 units, A: Aut, B: Win, C: Spr (*Staff*)

NATIVE AMERICAN LANGUAGE COURSES

SPECLANG 138A,B,C. Beginning Navajo
3 units, A: Aut, B: Win, C: Spr (*Staff*)

SPECLANG 174A,B,C. Beginning Quechua
3 units, A: Aut, B: Win, C: Spr (*Fajardo, J*)

DIRECTED READING AND GRADUATE STUDIES

SPECLANG 297. Directed Reading—Prerequisite: consent of instructor.
1-4 units, Aut, Win, Spr, Sum (*Staff*)

SPECLANG 395. Graduate Studies in Special Language—Prerequisite: consent of instructor.
1-4 units, Aut, Win, Spr (*Staff*)

TIBETAN LANGUAGE PROGRAM

Because the Tibetan Language Program does not have a formal placement test, students registering for the first time must see the coordinator for proper placement if they have had any prior training in Tibetan. Completion of TIBETLNG 3 fulfills the University Foreign Language Requirement. Consult the Language Center or <http://language.stanford.edu/> for further information.

TIBETLNG 1,2,3. First-Year Tibetan, First Quarter—Grammar, reading, and composition. Tibetan culture and the Tibetan view of reality.
5 units, 1: Aut, 2: Win, 3: Spr (*Clark, R*)

TIBETLNG 199. Individual Work—May be repeated for credit. Prerequisite: consent of instructor.
1-5 units, Aut, Win, Spr (*Staff*)

TIBETLNG 395. Graduate Studies in Tibetan—May be repeated for credit. Prerequisite: consent of instructor.
2-5 units, Aut, Win, Spr (*Staff*)

CENTER FOR LATIN AMERICAN STUDIES

Director of the Center: Herbert S. Klein

Associate Director: Megan Gorman

Visiting Professors: Laird Bergad, Sebastian Etchemendy, Francisco Gil Díaz, Milton Hatoum, Hilda Sabato, Nathan Wachtel

Affiliated Faculty and Staff:

Anthropological Sciences: Clifford R. Barnett (emeritus), William H. Durham, James A. Fox, Dominique Irvine, John W. Rick, Ian Robertson

Art and Art History: Barbaro Martinez-Ruiz

Biological Sciences: Gretchen Daily, Rodolfo Dirzo, Harold Mooney, Peter Vitousek, Virginia Walbot

Business, School of: Gerard Padró i Miquel

Cantor Arts Center: Manuel Jordán

Comparative Literature: Roland Greene, Hans U. Gumbrecht

Cultural and Social Anthropology: George Collier (emeritus)

Dance: Susan Cashion

Earth Sciences, School of: Pamela Matson

Economics: Roger Noll (emeritus), Clark Reynolds (emeritus), Esteban Rossi-Hansberg

Education, School of: Martin Carnoy, Amado Padilla

Engineering, School of: Adrian Lew, Leonard Ortolano

English: Ramón Saldívar (also Comparative Literature)

Freeman Spogli Institute for International Studies: Rosamond Naylor, David Victor

History: Zephyr Frank, Tamar Herzog, Herbert S. Klein

Hoover Institute: William Ratliff

Human Biology: Anne Firth Murray

Language Center, Special Languages Program: José Carlos Fajardo

Law, School of: Thomas C. Heller

Linguistics: John Rickford

Medicine, School of: Victor F. Froelicher, Evaleen K. Jones, Samuel LeBaron, Grant Miller, Julie Parsonnet, Paul Wise

Political Science: Alberto Diaz-Cayeros, Terry Karl, Beatriz Magaloni, Robert Packenham (emeritus), Michael Tomz

Web Site: <http://las.stanford.edu/>

The Center for Latin American Studies (CLAS) supports research and teaching on Latin America by the faculty and students of Stanford in all fields of study. Field research, language training, and interdisciplinary approaches are stressed in the Latin American Studies program, which draws on the strength and diversity of its nationally recognized faculty affiliates and substantial library holdings on Latin America. These resources are enhanced by the Tinker Visiting Professorship in Latin American Studies and the Nabuco Visiting Chair in Brazilian Studies, which bring distinguished Latin American scholars to teach at Stanford each year.

The center's resources include funds used in support of student and faculty activities and classes in and about Latin America, visiting professors and scholars, and various forms of public outreach. CLAS also devotes resources to Iberian and Caribbean studies. The center offers a master's degree in Latin American Studies, an undergraduate honors program, and an undergraduate minor in Latin American Studies.

UNDERGRADUATE PROGRAMS

Although the University does not offer a B.A. in Latin American Studies, it does offer a minor and an honors program. Stanford also has departmental and interdisciplinary degree programs in which a student may concentrate on Latin America. These include Anthropological Sciences, Cultural and Social Anthropology, History, Political Science, Spanish and Portuguese, and International Relations. Contact the respective departments for further information.

MINORS

The minor in Latin American Studies is offered to students in any major who wish to develop a complementary concentration on the region. To pursue the minor, students must submit for approval an online proposal of course work no later than the second quarter of their junior year. The minor must be completed by the second quarter of the senior year. Requirements for the minor include:

1. Completion of 25 units as follows: a 5-unit course surveying Latin America such as HISTORY 70 or an approved substitute; 20 additional units at the 100 level or higher which together comprise a coherent focus on a theoretical problem or issue of the region such as culture and identity, political economy, or sustainable development. At least 10 of the 25 units must be completed at Stanford.
2. Demonstration of proficiency in either Spanish or Portuguese, equivalent to the requirement for the honors program.
3. Field experience in Latin America such as study abroad, summer research, or internship is recommended.

Units for a student's major cannot be double-counted towards the minor.

Upon satisfactory completion of all requirements, the center's subcommittee on undergraduate programs authorizes the designation of the Minor in Latin American Studies on the student's transcript.

HONORS PROGRAM

The Honors Program in Latin American Studies is open to majors in any field. The aim of the honors program is to prepare students to pursue individualized research on Latin America, culminating in the preparation of an honors thesis written under the supervision of a faculty adviser. The honors program is particularly suited to the student who wishes to go on to graduate school or pursue employment in an institution emphasizing research and independent work. Although not required, students are encouraged to undertake independent field research in Latin America for their thesis. It is strongly recommended that students enroll in HISTORY 299X, Design and Methodology for International Field Research (1 unit), in the sophomore or junior year for an overview of research design and methods for international field research.

Admission to the honors program is by application by the end of the second quarter of the junior year. Applications are reviewed and approved by the CLAS director and associate director. Applicants must have a cumulative grade point average (GPA) of 3.3 (B+) or higher, and maintain this average in courses taken to satisfy the requirements. Courses must be taken for a letter grade where that option is available. Courses credited toward LAS honors may be double-counted toward the student's major requirements.

To graduate with interdisciplinary honors in Latin American Studies a student must:

1. Complete a total of 35 units in courses certified for honors by the Center for Latin American Studies, distributed as follows:
 - a) *A survey course:* HISTORY 70, Culture, Politics, and Society in Latin America. This is normally taken in the sophomore year.
 - b) *For breadth:* two 4-5-unit courses at the 100 level or higher with a focus on the region. These courses are normally taken during the sophomore and junior years.
 - c) *For depth:* one 4-5-unit course at the 100 level or higher with a focus on the region that explores an issue in depth of particular interest to the student, approved by the honors adviser.
 - d) LATINAM 198, Honors Thesis (1-10 units), under the supervision of the student's faculty honors adviser. Normally these units are spread over two or three quarters of the senior year and are devoted to the completion of the honors thesis.

- e) LATINAM 201 (same as HISTORY 275F), Social Change in Latin America Since 1900 (5 units). This Winter Quarter honors seminar must be taken in the senior year.
 - f) Enough additional courses focusing on Latin America to bring the total to 35 units. These must be at the 100 level or higher, except that up to 5 units may also come from study of Spanish or Portuguese beyond the seventh quarter.
 - g) Of the courses applied to 'b' and 'c' above, 10 units may be completed in Overseas Studies and 5 units may be taken as directed individual study.
2. Fulfill the Foreign Language Requirement (see below).
 3. Submit an honors thesis which meets standards of scholarly excellence and is approved by the thesis adviser. If graduating in June, participate in the LAS honors symposium at the end of May.

More information about the honors program is available at http://las.stanford.edu/programs/honors_detailed.html.

FOREIGN LANGUAGE REQUIREMENT

The minimum requirement for completion of either the minor or honors program is advanced proficiency in Spanish or Portuguese by any one of the following means:

1. Completion of seven quarters of college-level study of Spanish or Portuguese.
2. Completion of a course on Spanish or Portuguese language or literature, or on some other subject but taught in Spanish or Portuguese, at the 100-level or higher, with a letter grade of 'B' (3.0).
3. Achievement of the advanced proficiency level on the ACTFL scale in a test administered by the Department of Spanish and Portuguese.

HONORS COLLEGE

The LAS honors college, sponsored along with many other departmental and interdisciplinary honors colleges by the Vice Provost for Undergraduate Education, is an intensive three-week residential program offered directly preceding Autumn Quarter. It affords returning LAS honors students who have completed field work a debriefing and a focused series of presentations by a member of the CLAS-affiliated faculty and other Stanford instructors on adviser interaction, data preservation, bibliographic resources, writing strategies, statistical analysis, organizational techniques for completing the thesis process, and opportunities to socialize with other honors students in the college, all without cost to the students. Ample time is provided for library research, individual faculty consultations, and data analysis. Applications for honors colleges are available in Spring Quarter prior to the senior year.

COTERMINAL BACHELOR'S AND MASTER'S DEGREES

Undergraduates at Stanford may apply for admission to the coterminal master's program in Latin American Studies when they have earned a minimum of 120 units toward graduation, including advanced placement and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. The annual deadline for coterminal applications is January 9.

Coterminal applicants must submit: a 500-word statement of purpose; resume; 10-15 page double-spaced academic writing sample; three letters of recommendation; a Stanford transcript; and scores from the General Test of the Graduate Record Exam. Stanford coterminal applicants must have a minimum GPA of 3.5 and a working knowledge of Spanish or Portuguese at the third-year level.

For University coterminal degree program rules and application forms, see <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

Requirements for the master's degree are summarized below.

SUMMER INTERNSHIP GRANT

Each summer, the center awards grants to a small number of undergraduates to undertake internships in Latin America. Applications include a proposal, academic transcript, and recommendations from a faculty sponsor and one other person knowledgeable about the applicant's abilities. Students from all departments are eligible to apply.

GRADUATE PROGRAMS

MASTER OF ARTS

The Master of Arts in Latin American Studies is an interdisciplinary program. The curriculum consists of a core set of courses surveying the history, politics, society, and culture of the region, advanced language training, and in-depth course work. In consultation with a faculty adviser, students select a course of study suited to their individual interests. Students may obtain a dual professional degree concurrently with the M.A.

ADMISSION

The one-year master's program in Latin American Studies is designed for students who have experience working, living, or studying in Latin America or Iberia and little prior course work on the region.

The application deadline is January 9. Applicants submit an online application, including a 500-word statement of purpose, resume, 10-15 page double-spaced academic writing sample, and three letters of recommendation; official transcripts; and Graduate Record Examination scores. TOEFL scores are required of applicants for whom English is not their first language or who did not attend an undergraduate institution where English is the language of instruction. To apply online or for information on graduate admissions, go to <http://gradadmissions.stanford.edu>.

To be eligible for a dual degree program with the Graduate School of Business (M.B.A.), School of Law (J.D.), School of Medicine (M.D.), or School of Education (M.A. or STEP - teaching credential), candidates must apply and be accepted independently to both programs.

Applicants must meet the University admission requirements, have a working knowledge of Spanish or Portuguese at the third-year level, and have experience working, living, or studying in Latin America or Iberia prior to admission.

CLAS takes a broad approach to evaluating applications for admission. As important as GRE scores and grades are the applicant's essay, letters of recommendation, academic writing sample, and the experiences and goals conveyed through the personal statement and resume.

DEGREE REQUIREMENTS

University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin.

A description of the M.A. program is also available online at <http://www.stanford.edu/group/las/programs/ma.html>.

The program requires completion of a minimum of 45 graduate units. Upon entering, each student is assigned a faculty adviser who works with the student to develop a customized program of study.

To receive the M.A. degree in Latin American Studies, students must complete the items below.

1. *Core courses* (15 units): one core five-unit course in each of three fields of specialization:
 - a) Culture and Society CulSoc—LATINAM 301, Social Change in Latin America Since 1900
 - b) Environment and Ecology Eco—ANTHSCI 262, Indigenous Peoples and Environmental Problems
 - c) Political Economy PolEcon—POLISCI 245F, Latin American Political Development.

These fields (CulSoc, Eco, and PolEcon) are not declared on Axxes; they do not appear on the transcript or the diploma.
2. *Cognate courses* (15 units): three courses, one from each of the three fields of specialization listed in '1' above. See <http://www.stanford.edu/group/las/programs/macognatecurriculum.html> for more information. Cognate courses which fulfill this requirement are indicated in the cognate courses list below with the abbreviations CulSoc, Eco, and PolEcon.
3. *Elective courses* (10-15 units): three elective courses in one of the three fields of specialization (see '1' above) from across the University's offerings.
4. *Language requirement*: at least 3 units of course work on a second Latin American language. Students must take either an advanced third-year language course if they have both Spanish and Portuguese, or take a basic course in the language in which they do not possess competence.

5. *Seminar requirement:* enroll each quarter in LATINAM 200, a 1-unit seminar on Contemporary Issues in Latin American Studies, where invited scholars present lectures on major Latin American themes and topics, followed by questions and discussion.
6. *Thesis option:* students may elect to write a master's thesis; they may register for up to 10 units of thesis research under the guidance of an Academic Council faculty member. Thesis units may be counted toward the elective field unit requirements.
7. *Grade requirements:* all courses to be counted toward the degree, except for LATINAM 200, must be taken for a letter grade and receive a grade of 'B' or higher.

FINANCIAL AID

The Center for Latin American Studies has several graduate fellowships as well as limited research and course assistantship positions with the Tinker Visiting Professors each quarter.

DOCTORAL PROGRAMS

Although the University does not offer a Ph.D. in Latin American Studies, Stanford has several departmental programs through which a student may concentrate on Latin America. These include Anthropological Sciences, Cultural and Social Anthropology, History, Political Science, and Spanish and Portuguese. Contact the respective departments for admission information.

COURSES

LATINAM 197. Directed Individual Research—For students engaged in special interdisciplinary work that cannot be arranged by department.
1-10 units, Aut, Win, Spr (Staff)

LATINAM 198. Honors Thesis—Restricted to those writing an honors thesis in Latin American Studies.
1-10 units, Aut, Win, Spr (Staff)

LATINAM 200. Seminar on Contemporary Issues in Latin American Studies—Required of Latin American Studies master's students each quarter. Guest scholars present analyses of major Latin American themes and topics. May be repeated for credit.
1 unit, Aut, Win, Spr (Klein, H)

LATINAM 201/301. Social Change in Latin America Since 1900—(Same as HISTORY 275F/375F.) Changes in the social and demographic characteristics of Latin American populations since 1900 and the response of national governments in terms of the evolution of social welfare, health, and educational systems. Fulfills requirement for Latin American Studies honors seminar. Required core course for Latin American Studies master's students. GER:DB-SocSci
5 units, Win (Klein, H)

LATINAM 398. Master's Thesis—Restricted to students writing a master's thesis in Latin American Studies. May be repeated for credit.
1-10 units, Aut, Win, Spr (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a minor or honors program. See "Degree Requirements" above for an explanation of the field codes CulSoc, Eco, and PolEcon.

ANTHSCI 142. Incas and their Ancestors: Peruvian Archaeology—CulSoc

Chair: Beth Levin

Professors: Joan Bresnan, Eve V. Clark, Penelope Eckert, Martin Kay (on leave), Paul Kiparsky, Beth Levin, Stanley Peters (on leave), John R. Rickford, Ivan A. Sag, Peter Sells, Thomas A. Wasow

Associate Professors: David Beaver (on leave), Daniel Jurafsky (Autumn, Winter), Christopher Manning

Assistant Professor: Arto Anttila

Senior Lecturers: Philip L. Hubbard, Beverley J. McChesney

Consulting Professors: Ronald Kaplan, Lauri Karttunen, Geoffrey Nunberg, Annie Zaenen

Consulting Associate Professors: Jared Bernstein, Cleo Condoravdi

Lecturers: Heriberto Avelino, Vivienne Fong, Graham Katz

Visiting Professor: Arnold Zwicky

Affiliated Faculty: Herbert H. Clark, James A. Fox, Kenji Hakuta, Miyako Inoue, Yoshiko Matsumoto, Orrin W. Robinson III, Richard D. Schupbach, Chao Fen Sun

Department Offices: Margaret Jacks Hall, Building 460

Mail Code: 94305-2150

Phone: (650) 723-4284

Email: linguistics@csli.stanford.edu

Web site: <http://www-linguistics.stanford.edu>

Courses given in Linguistics have the subject code LINGUIST. For a complete list of subject codes, see Appendix.

Linguistics concerns itself with the fundamental questions of what language is and how it is related to the other human faculties. In answering these questions, linguists consider language as a cultural, social, and psychological phenomenon and seek to determine what is unique in languages, what is universal, how language is acquired, and how it changes. Linguistics is, therefore, one of the cognitive sciences; it provides a link between the humanities and the social sciences, as well as education, and hearing and speech sciences.

The department offers courses at the undergraduate and graduate levels in the areas central to linguistic theory and analysis. Many of them deal with the analysis of structural patterns in the different components that make up language, including sounds (phonetics and phonology), meanings (semantics), words (morphology), sentences (syntax), and the way they vary and change over time. Other courses integrate the analysis of linguistic structure with phenomena that directly concern other disciplines. These include courses in computational linguistics, language acquisition, the philosophy of language, and sociolinguistics.

A variety of open forums provide for the discussion of linguistic issues,

including colloquia and regularly scheduled workshops in child language, computational linguistics, phonology, semantics, sociolinguistics, and syntax. Faculty and visiting scholars in the department and the Center for the Study of Language and Information (CSLI), whose members are computer scientists, linguists, philosophers, and psychologists, participate extensively in the activities of the department.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

The undergraduate major stresses the study of language both as a fundamental human faculty and as a changing social institution. At the core of the program is a set of departmental courses on the nature of human language; the major also draws on courses offered by other departments and programs.

The Linguistics major cuts across the humanities and the social and physical sciences. It provides a solid general education as a background for advanced studies in such disciplines as Anthropology, Communication, Computer Science, Education (Language, Literacy, and Culture), hearing and speech sciences, languages, Law, Linguistics, Philosophy, and Psychology.

REQUIREMENTS

Requirements for the B.A. include at least 50 units of course work in Linguistics and approved courses in related fields. Of the 50 units required for the major, no more than 12 may be below the 100 level. No more than two courses, neither of which can be a core course, may be taken on a credit/no credit basis.

Core Courses—The core courses are:

LINGUIST 1. Introduction to Linguistics

LINGUIST 110. Introduction to Phonetics and Phonology

LINGUIST 120. Introduction to Syntax

LINGUIST 130A. Introduction to Linguistic Meaning, *or* 130B.

Introduction to Lexical Semantics

LINGUIST 150. Language in Society, which fulfills the Writing in the Major requirement (WIM)

LINGUIST 160. Introduction to Language Change, *or*, in advance consultation with the Linguistics undergraduate studies chair, a course in historical linguistics or the history of a language

All majors must complete at least five core courses, including LINGUIST 150, Language and Society, which fulfills the Writing in the Major requirement (WIM).

Other Courses—Other courses counting toward the unit requirement should form a coherent program with emphases from among the areas of concentration listed below. Students should consult with the Linguistics undergraduate studies chair when declaring the major, and maintain regular contact during the remainder of their Stanford career. Each student's major program must be approved by the Linguistics undergraduate studies chair, or approved department adviser.

Students in the major must also take:

1. At least two 200-level Linguistics courses, typically in their area of concentration.
2. LINGUIST 197, Undergraduate Research Seminar, in the junior year. (Special arrangements can be made for transfer students and others who start the major late.)

Other Requirements—

1. *Foreign language:* majors must have competence in at least one language other than English as part of their understanding of the field of linguistics and its study. This is usually demonstrated by the completion of six quarters of language study at Stanford or equivalent; level of proficiency is determined by the Language Center or the relevant language department.

Students may petition to be exempted from the Language Requirement if they have grown up speaking a language other than English and can use it for everyday purposes and for linguistic analysis.

2. *Junior research paper:* this requirement is typically fulfilled by providing an additional stage of revision on a research paper previously

submitted in a Linguistics course. It must be approved by both the instructor of the course and the Linguistics undergraduate studies chair.

AREAS OF CONCENTRATION

Students select one of the following areas of concentration or develop one themselves in advance consultation with the Linguistics undergraduate studies chair. These areas of concentration are not declared on Axess, and they do not appear on the transcript or diploma.

General Linguistics—This concentration provides a broad education in Linguistics and is advisable for students interested in advanced degrees in Linguistics. All five core courses are required.

Language and Society—This concentration focuses on the social dimensions of language.

Language Structures—This concentration focuses on the cognitive aspects of language.

Language Specialization—This concentration focuses on linguistics as it pertains to a particular language. To date, Chinese, Japanese, and Spanish language specializations have been pre-approved. Other language specializations can be arranged on an ad hoc basis if appropriate courses are available in the relevant departments.

MINORS

Requirements for the minor include at least 28 units of course work (typically seven courses) in Linguistics and related fields, approved in advance by the Linguistics undergraduate studies chair. No more than two courses, neither of which can be a core course, may be taken on a credit/no credit basis. The courses counting towards the minor must be incremental units beyond those needed to satisfy the student's major course of study. The minor consists of:

1. LINGUIST 1. Introduction to Linguistics
2. Two out of the following five Linguistics core courses:
 - LINGUIST 110. Introduction to Phonetics and Phonology
 - LINGUIST 120. Introduction Syntax
 - LINGUIST 130A. Introduction to Linguistic Meaning,
or LINGUIST 130B. Introduction to Lexical Semantics
 - LINGUIST 160. Introduction to Language Change,
or, in advance consultation with the Linguistics undergraduate studies chair, a course in historical linguistics or the history of a language.
3. At least four other courses determined in advance consultation with the Linguistics undergraduate studies chair. Students are encouraged to take at least one 200-level Linguistics course. Students may also choose to do independent work with a faculty member of their choice.

HONORS PROGRAM

Students who wish to undertake a more intensive program of study, including independent research, should seek departmental honors. An application to pursue honors work should be presented to a Linguistics undergraduate adviser before the end of the junior year. Approval is given only to students who have maintained a grade point average (GPA) of 3.3 (B+) or better in the courses required for the major.

Honors students take a total of 60 units. These must include the 50 units for the major, 10 additional units of independent study and Honors Research and an honors thesis based on research conducted with a principal adviser who must be a member of the Linguistics faculty, and a secondary faculty adviser who may, with the approval of the Undergraduate Studies Committee, be a member of another department. In the Autumn Quarter of the senior year, honors students enroll in LINGUIST 199, Independent Study, to work closely with one of the advisers on the research project. In Winter and Spring quarters, honors students register in LINGUIST 198, Honors Research, with the principal adviser for close supervision of the honors thesis. The thesis must be submitted in final, acceptable, form by May 15. The thesis topic is presented orally at a department Honors Colloquium late in Spring Quarter.

COTERMINAL PROGRAM

The Department of Linguistics admits a very limited number of undergraduates to work for their coterminal degree in Linguistics.

Students are required to submit to the department a complete application, which includes a statement of purpose, a Stanford transcript, three letters of recommendation (at least one of which must be from a faculty member in Linguistics), and a proposed course of study (worked out in advance with a Linguistics adviser). Applicants for the coterminal degree may apply as early as their eighth quarter and no later than early in the eleventh quarter of undergraduate study. Decisions on admission to the coterminal degree rest with the Graduate Admissions Committee of the Department of Linguistics. For further application information, see the department's web pages.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

GRADUATE PROGRAMS

MASTER OF ARTS

The University's basic requirements for the master's degree are discussed in the "Graduate Degrees" section of this bulletin. The following are additional departmental requirements. Candidates should review the department's "Guidelines for the M.A. and Ph.D. Degrees" for further particulars concerning these requirements.

1. *Courses*: candidates must complete a minimum of 45 units of graduate work in linguistics, including at least four courses in the student's area of specialization. No more than two courses should be at the 100 level.

Individual programs should be worked out in advance with an adviser who should ascertain that the necessary courses in the area of specialization are offered over the course of the year of anticipated enrollment. The overall grade point average (GPA) must be at least 3.0 (B) for all degree program coursework.

2. *Language*: reading knowledge of a non-native language in which a substantial linguistic literature is written, with sufficient facility to understand and interpret linguistic research published in that language, or in-depth research on the structure of a non-native language.
3. *Thesis or Thesis Project*: a research paper supervised by a committee of three faculty (normally fulfilled by up to 6 units of LINGUIST 398, Directed Research).

DOCTOR OF PHILOSOPHY

The following requirements are in addition to the basic University requirements for the degree sought; see the "Graduate Degrees" section of this bulletin. Candidates should review the department's "Guidelines for the M.A. and Ph.D. Degrees" for further particulars concerning these requirements.

1. *Language*: candidates must demonstrate the ability to read at least one foreign language in which a substantial linguistic literature is written, with sufficient facility to understand and to interpret linguistic research published in that language. (Particular areas of specialization may require additional research languages.)

In addition, each candidate must demonstrate an explicit in-depth knowledge of the structure of at least one language (normally neither the candidate's native language nor the language used for the reading exam). This requirement is fulfilled by writing an original research paper on a language.

2. *Courses*: a minimum of 135 units of graduate work beyond the B.A. or B.S. exclusive of dissertation units or, beyond the M.A., 90 units exclusive of dissertation units. A basic course requirement detailed in the Ph.D. guidelines guarantees that each student covers a sufficient set of subareas within the field.

Candidates must maintain a satisfactory record in the number and distribution of units completed. The overall course work GPA must be at least 3.0 (B) and all of the basic courses should be completed with at least a 'B.'

3. *Research*: the prospective Ph.D. candidate is expected to complete two substantial qualifying papers. The deadline for completion of the first qualifying paper is the end of the Autumn Quarter of the second year; the deadline for completion of the second qualifying paper is the end

of Spring Quarter of the second year. The subject matter of the two papers, although it may be related (for example, same language), must be clearly distinct. The requirement is fulfilled by LINGUIST 395A, B, Research Workshop (1-2 units each), and by oral discussion with a committee of at least three faculty members selected by the student and the faculty.

4. *Candidacy*: students must complete a prescribed portion of the basic course requirement (see item 2 above), one foreign language requirement (see item 1 above), and one qualifying paper (see item 3 above) by the end of their second year.
5. *Teaching*: at least three quarters serving as teaching assistant in a linguistics course.
6. *Colloquia*: two oral presentations exclusive of the oral presentation of the dissertation proposal (see item 7b below). This requirement is satisfied by class presentations, conference papers, or colloquium talks. Normally, both should be given during the first four years of study.
7. *Dissertation*:
 - a) a written dissertation proposal is required by the end of the third year.
 - b) oral presentation of the dissertation proposal, preferably as a colloquium.
 - c) approval of the dissertation topic and appointment of a dissertation committee.
 - d) passing a University oral examination on the dissertation and related areas.
 - e) dissertation (up to 15 units of LINGUIST 399).

PH.D. MINOR

1. *Courses*: the candidate must complete 30 units of course work in linguistics at the 100 level or above, including LINGUIST 110, 120, and either 130A or 130B (100-level courses are waived if 200-level courses in the same area are taken), and at least three courses related to the area of specialization. Courses submitted for the minor must be incremental units beyond those used to satisfy the major. Individual programs should be worked out in advance with the student's Ph.D. minor adviser in linguistics.
2. *Research Project* (optional): the candidate may elect to present a paper which integrates the subject matter of linguistics into the field of specialization of the candidate.
3. The linguistics adviser or designee serves on the candidate's University oral examination committee and may request that up to one-third of the examination be devoted to the minor subject.

Ph.D. Minor in Applied Linguistics—The Department of Linguistics participates in the Applied Linguistics Minor. See the "Language Center" section of this bulletin for full details.

COGNITIVE SCIENCE

Linguistics is participating with the departments of Computer Science, Philosophy, and Psychology in an interdisciplinary program in Cognitive Science for doctoral students. The program is intended to provide an interdisciplinary education as well as a deeper concentration in linguistics. Students who complete the Linguistics and Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Linguistics. To receive this field designation, students must complete 30 units of approved courses, to be determined in consultation with the graduate studies adviser.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement.

Courses numbered under 100 are designed primarily for pre-majors. Courses with 100-level numbers are designed for majors, minors, and M.A. and Ph.D. minor candidates in Linguistics. Those with numbers 200 and above are primarily for graduate students, but with consent of instructor some of them may be taken for credit by qualified undergraduates. At all levels, the course numberings indicate a special area, as follows:

- 01-04 General
- 05-09 Phonetics
- 10-14 Phonology
- 15-19 Morphology
- 20-29 Syntax
- 30-39 Semantics, Pragmatics, Discourse
- 40-49 Language Acquisition, Psycholinguistics
- 50-61 Sociolinguistics, Language Variation, Change
- 62-73 Language and Culture, Structure of a Language
- 74-79 Methods, Mathematical Linguistics, Statistics
- 80-89 Computational Linguistics
- 90-93 Applied Linguistics
- 94-99 Directed Work, Theses, Dissertations

LINGUIST 1. Introduction to Linguistics—The cognitive organization of linguistic structure and the social nature of language use. Why language learning is difficult. Why computers have trouble understanding human languages. How languages differ from one another. How and why speakers of the same language speak differently. How language is used strategically. GER:DB-SocSci

4 units, Aut (Eckert, P; Sag, I)

LINGUIST 44N. Living with Two Languages—Stanford Introductory Seminar. Preference to freshmen. The nature of bi- and multilingualism with emphasis on the social and educational effects in the U.S. and worldwide, in individual versus society, and in child and adult. The social, cognitive, psycholinguistic, and neurological consequences of bilingualism. Participation in planning and carrying out a research project in language use and bilingualism. GER:DB-SocSci

3 units, Spr (Clark, E)

LINGUIST 47N. Languages, Dialects, Speakers—Stanford Introductory Seminar. Preference to freshmen. Variation and change in languages from around the world. The roots, historical development, and linguistic and social structures of variation. How languages differ from each other, and how issues in linguistics connect to other social and cultural issues. The systematic study of language. GER:DB-SocSci

3 units, Aut (Anttila, A)

LINGUIST 56Q. What is the Opposite of Masculine? Gay Men and Masculinity—Stanford Introductory Seminar. Preference to sophomores. The linguistic and social worlds of gay men, and artistic representations of or for gay men. Relationships in American culture between the oppositions masculine/ feminine, manly/unmanly, masculine/effeminate, and straight/gay. Course includes frank language and sexual images.

3 units, Spr (Zwicky, A)

LINGUIST 58Q. The Changing Practices of Letter Writing—Stanford Introductory Seminar. Preference to sophomores. The role of letter writing in negotiating the boundaries between public and private interaction. Focus is on how the role of letters has changed since the Middle Ages. How letters have shaped communities and cultural ideologies; effects of changing technologies such as printing and email, and of increases in literacy.

2 units, Win (Traugott, E)

LINGUIST 59N. Language in the U.S.A.—Stanford Introductory Seminar. Preference to freshmen. The nature of language variation in the U.S.; its social, historical, and political significance. Language attitudes and prejudices, including whether English should be the official language; rap and hip hop; the language of doctors and patients; and the Ebonics controversies. Social, regional, and ethnic varieties of American English such as Appalachian, and the nature and status of other languages including Spanish, Native and Asian American voices, and American Sign Language.

3 units, Win (Rickford, J)

LINGUIST 65/265. African American Vernacular English—(Graduate students register for 265.) The English vernacular spoken by African Americans in big city settings, and its relation to Creole English dialects spoken on the S. Carolina Sea Islands (Gullah), in the Caribbean, and in W. Africa. The history of expressive uses of African American English (in soundin' and rappin'), and its educational implications. GER:DB-SocSci
3-5 units, Spr (Rickford, J)

LINGUIST 90. Teaching Spoken English—Practical approach to teaching English to non-native speakers. Teaching principles and the features of English which present difficulties. Preparation of lessons, practice teaching in class, and tutoring of non-native speaker.
3-4 units, Spr (Mawson, C)

LINGUIST 105/205A. Phonetics—(Graduate students register for 205A.) The study of speech sounds: how to produce them, how to perceive them, and their acoustic properties. The influence of production and perception systems on sound change and phonological patterns. Acoustic analysis and experimental techniques. Lab exercises. Prerequisite: 110 or equivalent, or consent of instructor. GER:DB-SocSci
4 units, Win (Avelino, H)

LINGUIST 110. Introduction to Phonetics and Phonology—Differences in the sounds of the world's languages and how these sounds are made by the human vocal tract. Theories that account for cross-linguistic similarities in the face of differences. GER:DB-SocSci
4 units, Spr (Scarborough, R)

LINGUIST 120. Introduction to Syntax—Grammatical constructions, primarily English, and their consequences for a general theory of language. Practical experience in forming and testing linguistic hypotheses, reading, and constructing rules. GER:DB-SocSci
4 units, Aut (Wasow, T)

LINGUIST 124A/224A. Introduction to Formal Universal Grammar—(Graduate students register for 224A.) A formal model of universal grammar designed to explain crosslinguistic variation in syntactic structure: nonconfigurationality in Australian aboriginal languages, incorporation in native American languages and the Bantu languages of Africa, scrambling and head movement in European languages. Issues such as universal grammar design, and analytic problems from a variety of natural languages. Prerequisites: introduction to syntax and familiarity with logic or other symbolic systems, or consent of instructor. GER:DB-SocSci
4 units, not given this year

LINGUIST 125/225. Seminar in Syntax: Choosing a Variant—(Graduate students register for 225.) Cases where two or more expressions serving as alternatives seem to be in free variation, differing at most in stylistic value. The semantic, discourse function, syntactic, prosodic, and processing factors that favor the choice of one variant over the other. May be repeated for credit.
2-4 units, Aut (Zwicky, A)

LINGUIST 130A. Introduction to Linguistic Meaning—Linguistic meaning and its role in communication. How diagnostic tests can be used to categorize and separate semantic phenomena such as ambiguity and vagueness, entailment, and presupposition. How basic set theory and logic can be used to specify meanings and explain semantic phenomena. Pragmatic complications involving the assumptions and intentions of language users. Those who have not taken logic, such as PHIL 150 or 151, should also enroll in 130C. Pre- or corequisite: 120, or consent of instructor. GER:DB-SocSci
4 units, Spr (Katz, G)

LINGUIST 130B. Introduction to Lexical Semantics—Issues in the study of word meaning. Focus is on the core semantic properties and internal organization of the four major word categories in natural languages: nouns, verbs, adjectives, and prepositions. GER:DB-SocSci
4 units, Win (Fong, V)

LINGUIST 130C. Logic Laboratory—Typically taken in conjunction with 130A/230A.
1 unit, Spr (Katz, G)

LINGUIST 133/233. Seminar in Semantics: Language and Space—(Graduate students register for 233.) How spatial notions are encoded in language, and how languages differ in their description of space. Focus is on the semantics of locative expressions, taking into account findings in language acquisition and linguistic anthropology. May be repeated for credit.
1-4 units, Spr (Fong, V)

LINGUIST 140/240. Language Acquisition I—(Graduate students register for 240.) Processes of language acquisition in early childhood; stages in development; theoretical issues and research questions. Practical experience in data collection. GER:DB-SocSci
4 units, Aut (Clark, E)

LINGUIST 144. Introduction to Cognitive Science—(Same as PHIL 190, PSYCH 130, SYMBSYS 100.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci
4 units, Spr (Bresnan, J)

LINGUIST 150. Language in Society—How language and society affect each other. Class, age, ethnic, and gender differences in speech. Prestige and stigma associated with different ways of speaking and the politics of language. The strategic use of language. Stylistic practice; how speakers use language to construct styles and adapt their language to different audiences and social contexts. GER:DB-SocSci, WIM
4 units, Spr (Eckert, P)

LINGUIST 152/252. Pidgin and Creole Sociolinguistics—(Graduate students register for 252.) Introduction to pidgins and creoles, organized around the main stages in the pidgin-creole life cycle: pidginization, creolization, and decreolization. Focus is on transformations in the English language as it was transported from Britain to Africa, Asia, the Caribbean, and the Pacific. Resultant pidginized and creolized varieties such as Nigerian Pidgin English, Chinese Pidgin English, New Guinea Tok Pisin, Suriname Sranan, and the creole continua of Guyana, Jamaica, and Hawaii. Also French, Dutch, Portuguese, Chinook, Motu, and Sango.
2-4 units, not given this year (Rickford, J)

LINGUIST 156. Language and Gender—The role of language in the construction of gender, the maintenance of the gender order, and social change. Field projects explore hypotheses about the interaction of language and gender. No knowledge of linguistics required. GER:DB-SocSci, EC-Gender
4 units, Win (Eckert, P)

LINGUIST 157. Innovations: Variation and Change—How do new types of expressions, vocabulary items, morphological forms, idioms, formulae, and syntactic constructions arise? How do they spread from person to person? What is their history as they compete with other expressions? Case studies of innovations as group projects. Prerequisite: 197 or consent of instructor.
3-4 units, Win (Zwicky, A)

LINGUIST 160. Introduction to Language Change—(Same as ANTH-SCI 110.) Variation and change as the natural state of language. Differentiation of dialects and languages over time. Determination and classification of historical relationships among languages, and reconstruction of ancestral stages. Types, rates, and explanations of change. Parallels with cultural and genetic evolutionary theory. Implications for the description and explanation of language in general. GER:DB-SocSci
4-5 units, not given this year

LINGUIST 171/271. Structure of Japanese—(Graduate students register for 271; same as JAPANLIT 177/277.) Linguistic analysis of the major grammatical structures of Japanese. Prerequisites: two years of Japanese. Recommended: course in linguistics.
2-4 units, not given this year (Sells, P)

LINGUIST 172/273. Structure of Korean—(Graduate students register for 273; same as KORGEN 172/273.) The major grammatical structures of Korean including noun phrases, verb phrases, and simple and complex sentences. Prerequisite: first-year Korean.

3-4 units, Spr (Sells, P)

LINGUIST 174/274A. Field Methods I—(Graduate students register for 274A.) Hands-on. The methods by which linguists gather raw linguistic data about a language and begin analyzing its structure. Working with a speaker of a language not previously studied by class participants, students develop a description of key aspects of its grammar and examine methodologies for obtaining, storing, and manipulating data.

2-4 units, Win (Avelino, H)

LINGUIST 180. Introduction to Computer Speech and Language Processing—Machine translation, web-based question answering, conversational agents, speech recognition and synthesis, parsing, computational semantics and pragmatics. Foundation for other language processing courses; focus is on using available online implementations of algorithms. Prerequisite: CS 106B or X. GER:DB-EngrAppSci

4 units, Aut (Jurafsky, D)

LINGUIST 182/282. Human and Machine Translation—(Graduate students register for 282.) The process of translation by professional and amateur translators, and by existing and proposed machine-translation systems; what each might learn from the others. Prerequisite: advanced knowledge of a foreign language. GER:DB-EngrAppSci

4 units, not given this year (Kay, M)

LINGUIST 183/283. Programming and Algorithms for Natural Language Processing—(Graduate students register for 283.) Construction of computer programs for linguistic processes such as string search, morphological, syntactic, and semantic analysis and generation, and simple machine translation. Emphasis is on the algorithms that have proved most useful for solving such problems. GER:DB-EngrAppSci

3-4 units, not given this year (Kay, M)

LINGUIST 187/287. Grammar Engineering—(Graduate students register for 287.) Hands-on. Techniques for implementation of linguistic grammars, drawing on grammatical theory and engineering skills. The implementation of constraints in morphology, syntax, and semantics, working within a unification-based lexicalist framework. Focus is on developing small grammars for English and at least one other language. Prerequisite: basic syntactic theory or 120. No programming skills required.

1-4 units, Win (Flickinger, D; Oepen, S)

LINGUIST 191/291. Linguistics and the Teaching of English as a Second/Foreign Language—(Graduate students register for 291.) Methods and techniques for teaching languages, using concepts from modern linguistics and language acquisition theory. Focus is on teaching English, but the principles, methods, and techniques are applicable to any language. Optional 1-unit seminar in computer-assisted language learning. GER:DB-SocSci

4-5 units, Win (Hubbard, P)

LINGUIST 197. Undergraduate Research Seminar—Research goals and methods in linguistics and related disciplines. Students work on a small project to define a focus for their linguistic studies and prepare for honors research. Presentations; final paper.

2 units, Win (Levin, B)

LINGUIST 198. Honors Research

1-15 units, Win, Spr (Staff)

LINGUIST 199. Independent Study

1-15 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 200. Foundations of Linguistic Theory—Theories that have shaped 20th-century linguistics; recurrent themes and descriptive practice.

4 units, Aut (Kiparsky, P)

LINGUIST 201. Advanced Introduction to Linguistics—Primarily for graduate students. The leading ideas of linguistic description and argumentation. Fundamental representational notions in phonology, syntax, and semantics, and the place of these notions in wider linguistic analysis.

4 units, not given this year (Zwicky, A)

LINGUIST 205A. Phonetics—(Graduate section; see 105.)

4 units, Win (Avelino, H)

LINGUIST 205B. Advanced Phonetics—Prerequisite: 205A.

2-4 units, Aut (Avelino, H)

LINGUIST 210A. Phonology—Introduction to phonological theory and analysis based on cross-linguistic evidence. Topics: phonological representations including features, syllables, metrical structure; phonological processes including assimilation and dissimilation; and phonological typology and universals.

4 units, Aut (Kiparsky, P)

LINGUIST 210B. Advanced Phonology—The phonological organization of the lexicon. Topics include lexical phonology, phonological subregularities, gradient phonotactics, and lexical frequency effects.

4 units, Spr (Anttila, A)

LINGUIST 211. Metrics—Principles of versification from a linguistic point of view. Traditional and optimality-theoretic approaches. The canonical system of English metrics, and its varieties and offshoots. The typology of metrical systems and its linguistic basis. The ideology of normative prosodic discourse in relation to changing poetic practice.

1-4 units, Win (Kiparsky, P)

LINGUIST 212. Seminar in Phonology—May be repeated for credit.

1-4 units, not given this year

LINGUIST 214. Phonology Workshop—May be repeated for credit.

1-2 units, Aut (Anttila, A), Win (Kiparsky, P), Spr (Anttila, A)

LINGUIST 216. Morphology—How morphology fits into the lexicon and how the lexicon fits into grammar. Inflection and word-formation: blocking, productivity, analogy. Morphological categories. The interaction of morphology with phonology within the lexicon: level-ordering, prosodic morphology. Review of English morphology and analysis of representative material from languages with richer morphologies.

2-4 units, Win (Anttila, A)

LINGUIST 217. Morphosyntax—The role of morphology in grammar: how word structure serves syntax in the expression of meaning. Universal properties and typology of morphological categories; proposals towards their principled explanation in a restrictive theory of language.

2-4 units, not given this year (Kiparsky, P)

LINGUIST 218. Seminar in Morphosyntax—May be repeated for credit.

2-4 units, not given this year

LINGUIST 221A. Foundations of English Grammar—A systematic introduction to the formal analysis of English grammar using the framework of head-driven phrase structure grammar (HPSG). Topics: feature structure modeling, lexical and phrasal organization in terms of type hierarchies and constraint inheritance, clausal types, patterns of complementation, the auxiliary system, extraction dependencies, wh-constructions, and the syntax-semantics interface.

1-4 units, Spr (Sag, I)

LINGUIST 221B. Studies in Universal Grammar—Focus is on grammatical analysis of individual languages. Builds directly on the theoretical foundations presented in 221A. Topics vary each year.

1-4 units, not given this year (Sag, I)

LINGUIST 222A. Foundations of Syntactic Theory I— Focus is on the role of the verb and the lexicon in the determination of sentence syntax. Topics: the argument/adjunct distinction, subcategorization and argument structure, motivation for a lexicalist approach, principles governing argument expression, operations on argument structure and grammatical function changing rules, unbounded dependencies, and the approach to unbounded dependencies rooted in principles of lexical expression and subcategorization satisfaction.

2-4 units, Aut (Levin, B; Sells, P)

LINGUIST 222B. Foundations of Syntactic Theory II—The nature of unbounded dependency constructions and their treatment in modern grammatical theories. Filler-gap dependencies, island constraints, and the relation between grammar and processing. Prerequisite: 222A.

2-4 units, Win (Sag, I)

LINGUIST 223B. Reading Principles and Parameters Syntax—Reading seminar. Focus is on papers and books written in government-binding theory and the minimalist program. Mechanisms proposed and their significance in the research agendas of syntax of the past 25 years.

2-3 units, Win (Sells, P)

LINGUIST 224B. Advanced Topics in Lexical Functional Grammar—May be repeated for credit.

1-4 units, not given this year

LINGUIST 229A. Laboratory Syntax I—Hands-on use of methods for analyzing quantitative syntactic data, including clustering and classification, regression, and mixed models. Offered jointly by the syntax faculty. May be repeated for credit.

1-4 units, Aut (Bresnan, J)

LINGUIST 229B. Laboratory Syntax II—Hands-on use of methods for handling syntactic data, including corpus work on ecologically natural data and controlled experimental paradigms. Explanatory models of syntactic processing and their relation to theories of grammar. Offered jointly by the syntax faculty. May be repeated for credit.

1-4 units, Win (Wasow, T)

LINGUIST 229C. Laboratory Syntax III—Hands-on use of methods for handling syntactic data, including corpus work on ecologically natural data and controlled experimental paradigms. Explanatory models of syntactic processing and their relation to theories of grammar. Offered jointly by the syntax faculty. May be repeated for credit.

1-4 units, not given this year

LINGUIST 229D. Empirical Syntax Research Seminar—Recent work in syntax that employs data-rich methods like corpora and laboratory studies, emphasizing research by seminar participants. May be repeated for credit.

1-4 units, Aut (Bresnan, J), Win (Wasow, T), Spr (Bresnan, J)

LINGUIST 230A. Introduction to Semantics and Pragmatics—Meaning in natural language. Topics: elementary set theory; propositional logic, predicate logic, and lambda calculus, and their relation to semantic analysis; model theoretic characterizations of meaning and semantic properties of English conjunctions and determiners. Grice's theory of implicature, speech acts, Davidson's theories of logical form, and Montague grammar. Recommended: elementary logic and set theory.

2-4 units, Aut (Katz, G)

LINGUIST 230B. Semantics and Pragmatics—Expands on 230A. Standard approaches to formal semantics (Montague grammar, DRT, and basic dynamic semantics). Analyses of semantic phenomena in these frameworks. Prerequisites: 230A; or combination of 130 and PHIL 150 and 160.

2-4 units, Win (Katz, G)

LINGUIST 232A. Lexical Semantics—Introduction to issues in word meaning, focused primarily around verbs. Overview of the core semantic properties of verbs and the organization of the verb lexicon. Approaches to lexical semantic representation, including semantic role lists, proto-roles, and causal and aspectual theories of event conceptualization.

2-4 units, Spr (Levin, B)

LINGUIST 232B. Seminar in Lexical Semantics: Lexical Categories—Recent research. Topics include: the semantic underpinnings of lexical categories; criteria for recognizing lexical categories; and methodological issues facing investigations of lexical categories. Case studies of languages lacking full lexical category inventories. May be repeated for credit.

1-4 units, Win (Levin, B)

LINGUIST 232C. Lexical Semantics Research Seminar—May be repeated for credit. By arrangement.

1-2 units, Aut, Win, Spr (Levin, B)

LINGUIST 234. Discourse Analysis—The organization of language above the sentence level, and the manifestation of language in context. Practical experience in working with discourse data.

4 units, not given this year

LINGUIST 237. Seminar in Semantics: Events and Other Implicit Arguments—Reference to events and other abstract objects, such as degrees and times, which serve as implicit predicate arguments as the basis for semantic analysis of phenomena such as adverbial modification and anaphora, and temporal and aspectual interpretation and pluractionality. The status of such objects in the grammar. Trends in the field. May be repeated for credit.

1-4 units, Aut (Katz, G)

LINGUIST 241. Language Acquisition II: Pragmatics and Language Acquisition—May be repeated for credit.

1-4 units, Win (Clark, E)

LINGUIST 242. Methods for Research in Language Acquisition—Research methods in developmental psycholinguistics.

4 units, Spr (Clark, E)

LINGUIST 247. Seminar in Psycholinguistics: Models of Human and Machine Speech and Language Processing—(Same as PSYCH 227.) Recent research emphasizing probabilistic models. Focus is on the relationship between human and machine models.

2-4 units, Win (Jurafsky, D)

LINGUIST 250. Sociolinguistic Theory and Analysis—Methods of modelling the patterned variation of language in society. Emphasis is on variation, its relation to social structure and practice, and its role in linguistic change. Intersection between quantitative and qualitative analysis, combining insights of sociology and linguistic anthropology with quantitative linguistic data. Prerequisite: graduate standing in Linguistics or consent of instructor.

4 units, not given this year (Eckert, P)

LINGUIST 251. Sociolinguistic Field Methods—Strengths and weaknesses of the principal methods of data collection in sociolinguistics.

4 units, Aut (Rickford, J)

LINGUIST 255. Seminar in Sociolinguistics: Experimental Sociolinguistics—Application of experimental techniques to sociolinguistic questions, emphasizing questions of variation. May be repeated for credit.

2-4 units, Aut (Eckert, P)

LINGUIST 256. Seminar in Sociolinguistics: Language and Identity—May be repeated for credit.

1-4 units, Win (Rickford, J)

LINGUIST 258. Analysis of Variation—The quantitative study of linguistic variability in time, space, and society emphasizing social constraints in variation. Hands-on work with variable data. Prerequisites: 105/205 and 250, or consent of instructor.

4 units, not given this year (Eckert, P)

LINGUIST 260A. Historical Morphology and Phonology—Sound change and analogical change in the perspective of linguistic theory. Internal and comparative reconstruction.

4 units, not given this year (Kiparsky, P)

LINGUIST 260B. Historical Morphosyntax—Morphological and syntactic variation and change. Reanalysis, grammaticalization. The use of corpora and quantitative evidence.

2-4 units, Spr (Kiparsky, P)

LINGUIST 274A. Field Methods I—(Graduate section; see 174.)

2-4 units, Win (Avelino, H)

LINGUIST 274B. Field Methods II—Continuation of 274A, with a focus on phonetic topics in a targeted language. Prerequisite: 274A or consent of instructor.

2-4 units, Spr (Avelino, H)

LINGUIST 279. Quantitative and Probabilistic Explanation in Linguistics—Capturing the soft constraints inherent in linguistic systems, based on quantitative evidence obtained from linguistic corpora. Computer tools for collecting and modeling data. Emphasis is on syntax.

3-4 units, not given this year (Manning, C)

LINGUIST 280. Natural Language Processing—(Same as CS 224N.) Methods for processing linguistic information and the underlying computational properties of natural languages. Syntactic and semantic processing from a linguistic and an algorithmic perspective. Focus is on modern quantitative techniques in NLP: using large corpora, statistical models for acquisition and interpretation, and representative systems. Prerequisites: CS 121/221 or LINGUIST 180, programming experience, familiarity with logic and probability.

3-4 units, Spr (Manning, C)

LINGUIST 281. Speech Recognition and Synthesis—(Same as CS 224S.) Automatic speech recognition, speech synthesis, and dialogue systems. Focus is on key algorithms including noisy channel model, hidden Markov models (HMMs), Viterbi decoding, N-gram language modeling, unit selection synthesis, and roles of linguistic knowledge. Prerequisite: programming experience. Recommended: CS 221 or 229.

2-4 units, Win (Jurafsky, D)

LINGUIST 285. Finite State Methods in Natural Language Processing—Theory and available technology for finite state language processing. Applications include tokenization, phonological and morphological analysis, disambiguation, and shallow parsing.

3-4 units, not given this year (Karttunen, L)

LINGUIST 390. M.A. Project

1-3 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 394. TA Training Workshop—For second-year graduate students in Linguistics

1 unit, Aut (Sells, P)

LINGUIST 395A,B,C. Research Workshop—Restricted to students in the doctoral program. Student presentations of research toward qualifying papers. A: Spr, B: Spr, C: Sum

1-2 units, A: Spr (Anttila, A), B: Spr (Wasow, T), C: Sum (Staff)

LINGUIST 396. Research Projects in Linguistics—Mentored research project for first-year graduate students in linguistics.

2-3 units, Win (Staff)

LINGUIST 397. Directed Reading

1-15 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 398. Directed Research

1-15 units, Aut, Win, Spr, Sum (Staff)

LINGUIST 399. Dissertation Research

1-15 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

CS 276. Text Retrieval and Web Search

3 units, Aut (Manning, C; Prabhakar, R)

PSYCH 131/262. Language and Thought

4 units, Aut (Clark, H)

OVERSEAS STUDIES

Courses taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BEIJING

LINGUIST 165. Language, Culture, and Meaning: Understanding Human Cognition in a Crosscultural Context—(Same as OSPBEJ 22.) GER:DB-SocSci

4 units, Aut (Patent, J)

LINGUIST 167. Language, Culture and Thought—(Same as OSPBEJ 25.)

4 units, Spr (Patent, J)

DIVISION OF LITERATURES, CULTURES, AND LANGUAGES

Division Head: Roland Greene

Division Offices: Building 260, Rooms 114-119

Mail Code: 94305-2005

Phone: (650) 724-1333; *Fax:* (650) 725-9306

Email: dlcl@stanford.edu

Web Site: <http://dlcl.stanford.edu>

The Division of Literatures, Cultures, and Languages consists of six academic departments (Asian Languages, Comparative Literature, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese) as well as the Language Center, which oversees language instruction at Stanford. All the departments of the division offer academic programs leading to B.A., M.A., and Ph.D. degrees. The division brings together scholars and teachers dedicated to the study of literatures, cultures, and languages from humanistic and interdisciplinary perspectives. The departments in the division are distinguished by the quality and versatility of their faculty, a wide variety of approaches to cultural tradition and expression, and the intense focus on the mastery of languages. This wealth of academic resources, together with small classes and the emphasis on individual advising, creates a superior opportunity for students who wish to be introduced to or develop a deeper understanding of non-English speaking cultures.

The division's departments and the Language Center offer instruction at all levels, including introductory and general courses that do not require knowledge of a language other than English. These courses satisfy a variety of undergraduate requirements and can serve as a basis for developing a minor or a major program in the member departments. The more advanced and specialized courses requiring skills in a particular language are listed under the relevant departments, as are descriptions of the minor and major programs.

MINORS

The Division of Literatures, Cultures, and Languages offers two minors that draw upon courses in literature and language within the division's departments and elsewhere in the University.

Course work in these minors may not duplicate work counted toward language majors or other minors. Advanced Placement credit and transfer credit do not apply to the minors. All courses must be taken for a letter grade. By University policy, no more than 36 units may be awarded in these minors.

Prospective minors should obtain a Minor Declaration form from the DLCL office of undergraduate student services.

MINOR IN LITERATURE

The minor in Literature allows students from any major to develop skills in the interpretation and criticism of literature, while acquiring a familiarity with types of literature from different national traditions and periods. Students must complete 30 units of course work on literature or literary theory. Courses may be in the original language or in translation.

The courses must include a minimum of:

1. One course on literary theory or the history of criticism.
2. One course on literature prior to the eighteenth century.
3. One course on literature reflecting perspectives outside of the European traditions.
4. One course from each of three distinct national or linguistic traditions from among Arabic, Chinese, English (including Anglophone literatures broadly conceived), French, German, Greek, Hebrew, Italian, Japanese, Korean, Latin, Persian, Portuguese, Russian, Spanish, Yiddish, and other national or linguistic traditions when appropriate courses are available. The pre-eighteenth-century course and the non-European course may be counted toward fulfilling this requirement.

5. Courses from two different genres such as poetry, drama, and prose fiction. Theory does not count as a genre.
6. One course requiring a research paper.

Students must consult with the minor adviser for approval of courses to meet these requirements. Second-year foreign language courses are not normally counted unless the syllabus reflects a primary emphasis on the reading of literature. Students are encouraged to acquire second-language skills and to explore courses in related disciplines; such courses, however, are not counted toward the 30 units required for the minor in Literature.

Course work in the minor may not duplicate work counted toward specific language majors or minors. Neither Advanced Placement credit nor transfer credit may be applied to the minor. All courses applied to the minor must be Stanford courses. At least 25 units of the course work must be taken for a letter grade.

The DLCL office of undergraduate student services verifies course work for the minor. The minor in Literature must be approved by a divisional faculty member designated by the Division of Literatures, Cultures, and Languages.

MINOR IN MODERN LANGUAGES

The minor in Modern Languages is offered to students who want to supplement the course work in their major with course work in modern languages and literatures. The minor must be approved by the directors of undergraduate studies of the respective language departments. Students in any field qualify for the minor by meeting the following requirements:

1. A minimum of 20 units at the intermediate level (second year) or beyond in at least two languages other than English offered by the DLCL. Normally, this involves 12 units in each language.
2. At least one additional course whose subject code ends in -LIT or -GEN in each modern language in '1' above. These courses should be taught by Academic Council members or other senior members of the faculty. In the case of Slavic or Asian languages, the course should be marked as advanced.

Students are recommended to study, work, or intern abroad for at least eight weeks at a location where one of the languages is spoken.

COURSES

DLCL 99. Multimedia Course Lab—Designed to supplement the literature curriculum of existing undergraduate courses in DLCL departments in which a multimedia component may benefit collaborative or individual research projects. Taken for credit at the discretion of the instructor of the departmental literature course.

1 unit, Aut, Win, Spr (Chandler, Z)

DLCL 189. Honors Thesis Seminar—Prepares undergraduate majors in the division's departments for planning, researching, and writing an honors thesis. Oral presentations and peer workshops. Research and writing methodologies, and larger critical issues in literary studies.

5 units, Aut (Reichert, J)

DLCL 308. Comparative Literature Colloquium—Participants discuss and critique work presented by graduate students and faculty in the DLCL. Work may include conference or seminar papers, thesis chapters, or works-in-progress. Feedback focuses on writing and argumentation, and more general responses to the subject matter. Meetings open to the public. May be repeated for credit.

2 units, Aut, Win, Spr (Berman, R)

DLCL 309. The Teaching of Literature—Prepares graduate students in DLCL departments to teach literature at the undergraduate level. Topics include: the opportunities and problems of transposing a research project into a feasible course; the logic of syllabi and reading lists; the structuring of a course from week to week; and other matters relevant to first-time teachers of literature. Supervised by the graduate affairs committee of the DLCL.

2 units, Win (Levy, I), Spr (Carter, S)

DLCL 310. The Development of a Dissertation from Prospectus to Defense—Meets regularly throughout the year to advise and support dissertation-level students as they prepare a prospectus, begin writing, submit chapters, and complete their projects. Focus of the workshop shifts from term to term as appropriate to the participants. Supervised by the graduate affairs committee of the DLCL.

2 units, Aut (Safran, G), Win (Douvaldzi, C), Spr (Palumbo-Liu, D)

DLCL 311. Professional Workshop—Meets regularly throughout the year to discuss issues in the professional study of literature. Topics include the academic job market and the challenges of research and teaching at different types of institutions. Supervised by the graduate affairs committee of the DLCL.

2 units, Aut, Win, Spr (Staff)

DLCL 377. Topics in Literature and Culture—Topic this year is the aesthetics of evil, and its manifestations in literature and the arts as content and style. Works include: Aeschylus' *Oresteia*; Euripides' *Bacchae*; Poe's *The Imp of the Perverse*; Kierkegaard's *Either/Or*; Flaubert's *Salammô*; Baudelaire's *Les Fleurs du mal*; Kafka's *Penal Colony*; Bataille's *La littérature et le mal*; and films of David Lynch, Val Lewton, and Jacques Tourneur.

3-4 units, Aut (Bohrer, K)

MATHEMATICAL AND COMPUTATIONAL SCIENCE

Director: Bradley Efron

Associate Director: Susan Holmes

Committee in Charge: Takeshi Amemiya (Economics), Gunnar Carlsson (Mathematics), Richard Cottle (Management Science and Engineering), Thomas M. Cover (Electrical Engineering, Statistics), Bradley Efron (Statistics), Peter W. Glynn (Management Science and Engineering), Gene Golub (Computer Science), J. Michael Harrison (Graduate School of Business), Susan Holmes (Statistics), Doron Levy (Mathematics), Parviz Moin (Engineering), Art Owen (Statistics), George Papanicolaou (Mathematics), Eric Roberts (Computer Science), David Rogosa (Education), Tim Roughgarden (Computer Science), David Siegmund (Statistics), Arthur F. Veinott Jr. (Management Science and Engineering)

Program Administrator: Helen Tombropoulos

Program Offices: Sequoia Hall, 390 Serra Mall

Mail Code: 94305-4065

Phone: (650) 723-2620

Email: helen@stat.stanford.edu

Web Site: <http://www.stanford.edu/group/mathcompsci>

Courses given in Mathematical and Computational Science have the subject code MCS. For a complete list of subject codes, see Appendix.

This interdepartmental interschool undergraduate program provides a major for students interested in the mathematical and computational sciences, or in the use of mathematical ideas and analysis in problems in the social or management sciences. It provides a core of mathematics basic to all the mathematical sciences and an introduction to concepts and techniques of automatic computation, optimal decision making, probabilistic modeling, and statistical inference. It also provides an opportunity for elective work in any of Stanford's mathematical science disciplines.

The program uses the faculty and courses of the departments of Computer Science, Management Science and Engineering, Mathematics, and Statistics. It prepares students for graduate study or employment in the mathematical and computational sciences or in those areas of applied mathematics which center around the use of computers and are concerned with the problems of the social and management sciences.

A biology option is offered for students interested in applications of mathematics, statistics, and computer science to the biological sciences (bioinformatics, computational biology, statistical genetics, neurosciences); and in a similar spirit, an engineering option.

UNDERGRADUATE PROGRAMS BACHELOR OF SCIENCE

The requirement for the bachelor's degree, beyond the University's basic requirements, is an approved course program of 72-77 units, distributed as follows:

	<i>Qtr. and Units</i>	
Mathematics (MATH): 29-31 units		
MATH 41. Calculus	A	5
and MATH 42. Calculus	A,W	5
MATH 51. Linear Algebra and Differential Calculus of Several Variables	A,W,S	5
or MATH 51H. Honors Advanced Calculus	A	5
MATH 52. Integral Calculus of Several Variables	A,W,S	5
or MATH 52H. Honors Advanced Calculus	W	5
MATH 53. Ordinary Differential Equations with Linear Algebra	A,W,S	5
or MATH 53H. Honors Advanced Calculus	S	5
MATH 109. Applied Group Theory (WIM)	A	3
or MATH 110. Applied Number Theory and Field Theory (WIM)	W	3
or MATH 120. Modern Algebra (WIM)	A,S	3
MATH 113. Linear Algebra and Matrix Theory	A,W	3
Computer Science (CS): 16-18 units		
CS 103X. Discrete Structures (Accelerated)	W	3-4
or CS 103A. Discrete Mathematics for Computer Science	A,W	3
and CS 103B. Discrete Structures	W,S	3
CS 106X. Programming Methodology and Abstractions (Accel.)	A,W	3-5
or CS 106A. Programming Methodology	A,W,S	3-5
and CS 106B. Programming Abstractions	W,S	3-5

And two of the following (CS or CME):

CME 108. Introduction to Scientific Computing	W	3-4
CS 107. Programming Paradigms	A,S	3-5
CS 154. Introduction to Automata and Complexity Theory	A,S	3-4
CS 161. Design and Analysis of Algorithms	A,W	3-4

Management Science and Engineering (MS&E): 8-9 units

Both:

MS&E 111. Introduction to Optimization (same as ENGR 62)	A,S	3-4
MS&E 121. Introduction to Stochastic Modeling	W	4

or three of the following:

MS&E 211. Linear and Nonlinear Optimization	A	3-4
MS&E 212. Mathematical Programming and Combinatorial Optimization	S	3
MS&E 221. Stochastic Modeling	W	3
MS&E 251. Stochastic Decision Models	W	3

Statistics (STATS): (11 units)

STATS 116. Theory of Probability	A,S	3-5
STATS 191. Introduction to Applied Statistics	W	3-4
or STATS 203. Introduction to Regression Models and Analysis of Variance	S	3
STATS 200. Introduction to Statistical Inference	W	3

ELECTIVES (9 UNITS)

Three courses in mathematical and computational science, 100-level or above, at least 3 units each. At least one must be chosen from the following:

	<i>Qtr. and Units</i>	
ECON 102C. Advanced Topics in Econometrics	S	5
ECON 140. Introduction to Financial Economics	S	5
ECON 160. Game Theory and Economic Applications (prerequisite ECON 51)	S	5
ECON 179. Experimental Economics (not given 2006-07)		5
EE 261. The Fourier Transform and its Applications	A,S	3
MS&E 211. Linear and Nonlinear Optimization	A	3-4
MS&E 212. Mathematical Programming and Combinatorial Optimization	S	3
MS&E 221. Stochastic Modeling	W	3
MS&E 251. Stochastic Decision Models	W	3
MCS 100. Mathematics of Sports (same as STATS 50)	S	3
MATH 106. Functions of a Complex Variable	A	3
MATH 108. Introduction to Combinatorics and its Applications	A	3
MATH 111. Computational Commutative Algebra (not given 2006-07)		3
MATH 115. Functions of a Real Variable	A,W	3
MATH 116. Complex Analysis	W	3
MATH 118. Numerical Analysis (not given 2006-07)		3
MATH 131. Partial Differential Equations I	A,W	3
MATH 132. Partial Differential Equations II	S	3
MATH 135. Nonlinear Dynamics and Chaos	S	3
MATH 136. Stochastic Processes	W	3
PHIL 151. First-Order Logic	W	4
STATS 202. Data Analysis	A	3
STATS 217. Introduction to Stochastic Processes	W	3

For Computer Science (CS), electives can include courses not taken as units under the CS list above and the following:

CME 302. Numerical Linear Algebra	A	3
CS 108. Object-Oriented Systems Design	A,W	3-4
CS 140. Operating Systems and Systems Programming	A,W	3-4
CS 143. Compilers	A,W	3-4
CS 157. Logic and Automated Reasoning	A	3-4
CS 161. Design and Analysis of Algorithms	A,W	3-4
CS 194. Software Project (prerequisite CS 108)	S	3
CS 221. Artificial Intelligence: Principles and Techniques	A	3-4
CS 223A. Introduction to Robotics	W	3
CS 223B. Introduction to Computer Vision	W	3
CS 225A. Experimental Robotics	S	3
CS 228. Probabilistic Models in Artificial Intelligence	W	3
CS 229. Machine Learning	A	3
CS 243. Advanced Compiling Techniques	W	3-4
EE 275. Logic Design (not given 2006-07)		3
EE 282. Computer Architecture and Organization	S	3

With the adviser's approval, courses other than those offered by the sponsoring departments may be used to fulfill part of the elective requirement. These may be in fields such as biology, economics, electrical engineering, industrial engineering, and medicine, that might be relevant to a mathematical sciences major, depending on a students's interests.

1. At least three quarters before graduation, majors must file with their advisers a plan for completing degree requirements.
2. All courses used to fulfill major requirements must be taken for a letter grade with the exception of courses offered satisfactory/no credit only.
3. A course used to fulfill the requirements of one section of the program may not be applied toward the fulfillment of the requirements of another section.
4. The student must have a grade point average (GPA) of 2.0 or better in all course work used to fulfill the major requirement.

MATHEMATICAL AND COMPUTATIONAL BIOLOGY OPTION

Replace MATH 109/110 with either:

	<i>Qtr. and Units</i>	
BIOSCI 221. Methods of Theoretical Population Biology or MATH 135. Nonlinear Dynamic Systems	S	4
	S	3

Replace STATS 191/203 by

STATS/BIOSCI 141. Biostatistics	A, W	3-5
---------------------------------	------	-----

Take at least 2 courses from the Biological Sciences core:

BIOSCI 41. Genetics and Biochemistry	A	5
BIOSCI 42. Cell Biology and Animal Physiology	W	5
BIOSCI 43. Plant Biology, Evolution, and Ecology	S	5

Take a third course either from the core or

STATS 166. Statistical Methods in Computational Genetics (WIM)	A	3
BIOSCI 133. Genetics of Prokaryotes	A	3
BIOSCI 134. Replication of DNA	W	3
BIOSCI 136. Evolutionary Paleobiology (not given 2006-07) or BIOSCI 203. Advanced Genetics	A	4

Honors students should take 3 of the following:

STATS 166. Statistical Methods in Computational Genetics (WIM)	A	3
ANTHSCI 180. Intro. to Anthropological Genetics (not given 2006-07)		5
ANTHSCI 187. The Genetic Structure of Populations (not given 2006-07)		5
ANTHSCI 188. Research in Anthropological Genetics	A,W	5
BIOSCI 113. Fundamentals of Molecular Evolution	W	4
BIOSCI 146. Population Studies	W	1
BIOSCI 221. Methods of Theoretical Population Biology	S	4
BIOSCI 183A/283A. Population Genetic Theory and Evolution I (not given 2006-07)		4
BIOSCI 183B/283B. Population Genetic Theory and Evolution II (not given 2006-07)		4

MATHEMATICAL AND COMPUTATIONAL SCIENCE ENGINEERING OPTION

Students in the Engineering option take the introductory courses for the Mathematics and Computational Sciences major with the following allowable substitutions.

The MATH 51-53 series may be replaced by:

	<i>Qtr. and Units</i>	
CME 100/ENGR 154. Vector Calculus for Engineers	A	5
CME 102/ENGR 155A. Ordinary Differential Equations for Engineers	W	5
CME 104/ENGR 155B. Linear Algebra and Partial Differential Equations for Engineers	S	5
MATH 115. Functions of a Real Variable	A,W	3

STATS 116 may be replaced by either one of the following:

STATS 110. Statistical Methods in Engineering and Physical Sciences or CME 106/ENGR 155C. Introduction to Probability and Statistics for Engineers	A	4-5
	W	3-4

STATS 191/STATS 203 may be replaced by:

STATS 202. Data Analysis	A	3
--------------------------	---	---

Electives; take at least one course from the following list:

MATH 106. Intro to Theory of Functions of a Complex Variable	A	3
MATH 108. Intro to Combinatorics Applications	A	3
MATH 116. Complex Analysis	W	3
MATH 118. Numerical Analysis (not given 2006-07)		3
MATH 132. Partial Differential Equations II	S	3
MATH 135. Nonlinear Dynamics and Chaos	S	3
MATH 139. Intro to the Mathematics of Medical Imaging (not given 2006-07)		3
PHIL 151. First-Order Logic	A,W	4

Take at least two courses from the following list:

ENGR 15. Dynamics	A,S	3
ENGR 20. Introduction to Chemical Engineering	S	3
ENGR 25. Biotechnology	S	3
ENGR 30. Engineering Thermodynamics	A,W	3
ENGR 40. Introductory Electronics	A, S	5
ENGR 50. Introductory Science Materials	W, S	4
ENGR 105. Feedback Control Design	W	3

Take three additional courses from a single engineering department, and two additional courses from any engineering department(s).

MINORS

The minor in Mathematical and Computational Science is intended to provide an experience of the four constituent areas: Computer Science, Mathematics, Management Science and Engineering, and Statistics. Four basic courses are required:

CS 106X. Programming Methodology and Abstractions (Accelerated) or CS 106A,B. Programming Methodology
MATH 51. Linear Algebra and Differential Calculus of Several Variables or MATH 103. Matrix Theory and its Applications
ENGR 62. Introduction to Optimization or MS&E 121. Introduction to Stochastic Modeling
STATS 116. Theory of Probability or STATS 191. Introduction to Applied Statistics

In addition to the above, the minor requires three courses from the following, two of which must be in different departments:

CME 108. Introduction to Scientific Computing
CS 107. Programming Paradigms
CS 138. MATLAB and MAPLE for Science and Engineering Applications
CS 154. Introduction to Automata and Complexity Theory
EE 261. The Fourier Transform and its Applications
ECON 102C. Advanced Topics in Econometrics
ECON 160. Game Theory and Economic Applications (prerequisite ECON 51)
MS&E 211. Linear and Nonlinear Optimization
MS&E 212. Mathematical Programming and Combinatorial Optimization
MS&E 221. Stochastic Modeling
MS&E 251. Stochastic Decision Models

STATS 202. Data Analysis
STATS 203. Introduction to Regression Models and Analysis of Variance
STATS 217. Introduction to Stochastic Processes

Other upper-division courses appropriate to the program major may be substituted with consent of the program director. Undergraduate majors in the constituent programs may not count courses in their own departments.

HONORS PROGRAM

The honors program is designed to encourage a more intensive study of mathematical sciences than the B.S. program. In addition to meeting all requirements for the B.S., the student must:

1. Maintain an average letter grade equivalent in mathematical sciences courses of at least a 3.4.
2. Complete at least 15 units in mathematical sciences in addition to the requirements for the major listed above. These courses should form a sustained effort in one area and constitute a program approved by the committee in charge of the Mathematical and Computational Science Program.
3. Include in the above 15 units at least one of the following:
 - a) an approved higher-level graduate course
 - b) participation in a small group seminar
 - c) at least 3 units of directed reading

Students interested in doing honors work should consult with their advisers by the last quarter of the junior year to prepare a program of study for submission to the committee in charge for approval. Honors work may be concentrated in fields outside the Mathematical and Computational Science programs such as biological sciences, medicine, physics.

COURSES

MCS 100. Mathematics of Sports—(Same as STATS 50.) The use of mathematics, statistics, and probability in the analysis of sports performance, sports records, and strategy. Topics include mathematical analysis of the physics of sports and determinations of optimal strategies. New diagnostic statistics and strategies for each sport. Corequisite: STATS 116.
3 units, Spr (Cover)

MATHEMATICS

Emeriti: (Professors) Kai Lai Chung, Paul Cohen, Solomon Feferman, Robert Finn, Samuel Karlin, Joseph Keller, Georg Kreisel, Harold Levine, R. James Milgram, Donald Ornstein, Robert Osserman

Chair: Yakov Eliashberg

Professors: Gregory Brumfiel, Daniel Bump, Gunnar Carlsson, Ralph L. Cohen, Amir Dembo, Persi Diaconis, Yakov Eliashberg, Eleny Ionel, Yitzhak Katznelson, Steven Kerckhoff, Jun Li, Tai-Ping Liu, Rafe Mazzeo, George Papanicolaou, Richard Schoen, Leon Simon, Kannan Soundararajan, Brian White

Associate Professors: Ravi Vakil, Andras Vasy

Assistant Professors: Simon Brendle, Doron Levy

Szegö Assistant Professors: Laurent Demanet, Valdo Durrleman, Soren Galatius, Larry Guth, Gautam Iyer, Todor Milanov, Dragos Oprea, Mihran Papikian, Peter Storm, Nathaniel Thieme

Lecturers: Andrew Blumberg, Joseph Coffey, Christopher Douglas, Elizabeth Klodginski, Benjamin Lee, Mark Lucianovic, Liping Ma, Laurence Nedelec, Richard Siefring, Wojciech Wieczorek

Acting Assistant Professor: Brian Munson

Courtesy Professors: Renata Kallosh, Grigori Mints

Consulting Professors: Brian Conrey, Keith Devlin, David Hoffman, Wu-chung Hsiang

Visiting Professor: Igor Rivin

Samuelson Fellows: Samuel Payne, Alexandra Pettet

Web site: <http://math.stanford.edu>

Courses given in Mathematics have the subject code MATH. For a complete list of subject codes, see Appendix.

The Department of Mathematics offers programs leading to the degrees of Bachelor of Science, Master of Science, and Doctor of Philosophy in Mathematics, and participates in the program leading to the B.S. in Mathematical and Computational Science. The department also participates in the M.S. and Ph.D. degree programs in Scientific Computing and Computational Mathematics and the M.S. degree program in Financial Mathematics.

ADVANCED PLACEMENT FOR FRESHMEN

Students of unusual ability in mathematics often take one or more semesters of college-equivalent courses in mathematics while they are still in high school. Under certain circumstances, it is possible for such students to secure both advanced placement and credit toward the bachelor's degree. A decision as to placement and credit is made by the department after consideration of the student's performance on the Advanced Placement Examination in Mathematics (forms AB or BC) of the College Entrance Examination Board, and also after consideration of transfer credit in mathematics from other colleges and universities.

The department does not give its own advanced placement examination. Students can receive either 5 or 10 units of advanced placement credit, depending on their scores on the CEEB Advanced Placement Examination. Entering students who have credit for two quarters of single variable calculus (10 units) are encouraged to enroll in MATH 51-53 in multivariable mathematics, or the honors version 51H-53H. These three-course sequences, which can be completed during the freshman year, supply the necessary mathematics background for most majors in science and engineering. They also serve as excellent background for the major or minor in Mathematics, or in Mathematical and Computational Science. Students who have credit for one quarter of single variable calculus (5 units) should take MATH 42 in the Autumn Quarter and 51 in Winter Quarter. Options available in the Spring Quarter include MATH 52, 53, or 103. For proper placement, contact the Department of Mathematics.

UNDERGRADUATE PROGRAMS BACHELOR OF SCIENCE

The following department requirements are in addition to the University's basic requirements for the bachelor's degree:

MAJORS

Students wishing to major in Mathematics must satisfy the following requirements:

1. Department of Mathematics courses (other than MATH 100) totaling at least 49 units credit; such courses must be taken for a letter grade. For the purposes of this requirement, STATS 116, PHIL 151, and PHIL 152 count as Department of Mathematics courses.
2. Additional courses taken from Department of Mathematics courses numbered 101 and above or from approved courses in other disciplines with significant mathematical content, totaling at least 15 units credit. At least 9 of these units must be taken for a letter grade.
3. A Department of Mathematics adviser must be selected, and the courses selected under items '1' and '2' above must be approved by the department's director of undergraduate study, acting under guidelines laid down by the department's Committee for Undergraduate Affairs. The Department of Mathematics adviser can be any member of the department's faculty.
4. To receive the department's recommendation for graduation, a student must have been enrolled as a major in the Department of Mathematics for a minimum of two full quarters, including the quarter immediately before graduation. In any case, students are strongly encouraged to declare as early as possible, preferably by the end of the sophomore year.

Students are normally expected to complete either the sequence 19, 20, 21 or the sequence 41, 42 (but not both). Students with an Advanced Placement score of at least 4 in BC math or 5 in AB math may receive 10 units credit and fulfill requirement '1' by taking at least 39 units of Department of Mathematics courses numbered 51 and above. Students with an Advanced Placement score of at least 3 in BC math or at least 4 in AB math may receive 5 units credit and fulfill requirement '1' by taking at least 44 units of Department of Mathematics courses numbered 42 and above.

Sophomore seminar courses may be counted among the choice of courses under item '1'. Other variations of the course requirements laid down above (under items '1' and '2') may, in some circumstances, be allowed. For example, students transferring from other universities may be allowed credit for some courses completed before their arrival at Stanford. However, at least 24 units of the 49 units under item '1' above and 9 of the units under item '2' above must be taken at Stanford. In all cases, approval for variations in the degree requirements must be obtained from the department's Committee for Undergraduate Affairs. Application for such approval should be made through the department's director of undergraduate study.

It is to be emphasized that the above regulations are minimum requirements for the major; students contemplating graduate work in mathematics are strongly encouraged to include the courses 116, 120, 121, 147 or 148, and 171 in their selection of courses, and in addition, take at least three Department of Mathematics courses over and above the minimum requirements laid out under items '1' and '2' above, including at least one 200-level course. Such students are also encouraged to consider the possibility of taking the honors program, discussed below.

To help develop a sense of the type of course selection (under items '1' and '2' above) which would be recommended for math majors with various backgrounds and interests, see the following examples. These represent only a few of a very large number of possible combinations of courses that could be taken in fulfillment of the Mathematics major requirements:

Example 1 — A general program (a balanced program of both pure and applied components, without any particular emphasis on any one field of mathematics or applications) as follows:

- a) either MATH 19, 20, and 21, or 41 and 42 (or satisfactory Advanced Placement credit); 51, 52, 53; 103; 106; 109; 110; 111; 115
- b) plus any selection of at least eight of the following courses, including three Department of Mathematics courses: MATH 108, 131, 132, 143, 146, 147, 148, 152, 161; CS 137; ECON 50; PHYSICS 41, 43, 45; STATS 115. These courses from other departments are only meant as examples; there are many suitable courses in several departments which can be taken to fulfill part or all of requirement 2.

Example 2 — A theoretical program (recommended for those contemplating possible later graduate work (see, also, the discussion of the honors program below), providing an introduction to the main areas of mathematics both broader and deeper than the general program outlined above):

- a) either MATH 19, 20 and 21, or 41 and 42 (or satisfactory Advanced Placement credit)
- b) either the sequence 51, 52, 53, or the sequence 51H, 52H, 53H; 106 or 116; 113; 120; 171
- c) plus nine or more of the following courses, including at least one from each group: algebra sequence 114, 121, 152, 156; analysis sequence 131, 132, 135, 151, 174A,B, 175; geometry/topology sequence 143, 145, 146, 147, 148; logic and set theory sequence PHIL 151, 152; MATH 161.

In addition, those contemplating eventual graduate work in Mathematics should consider including at least one graduate-level math course such as MATH 205A, 210A, or 215A or B. Such students should also consider the possibility of entering the honors program.

*Example 3** — An applied mathematics program:

- a) either MATH 19, 20, and 21; or 41 and 42 (or satisfactory Advanced Placement credit); 51, 52, 53; 103; 106; 108; 109; 110; 111; 115; 131; STATS 116
- b) plus at least 15 units of additional courses in Applied Mathematics, including, for example, suitable courses from the departments of Physics, Computer Science, Economics, Engineering, and Statistics.

* Students with interests in applied mathematics, but desiring a broader-based program than the type of program suggested in Example 3, including significant computational and/or financial and/or statistical components, are encouraged to also consider the Mathematics and Computational Science program.

MINORS

To qualify for the minor in Mathematics, a student should complete, for a letter grade, at least six Department of Mathematics courses (other than MATH 100) numbered 51 or higher, totaling a minimum of 24 units. It is recommended that these courses include either the sequence 51, 52, 53 or the sequence 51H, 52H, 53H. At least 12 of the units applied toward the minor in Mathematics must be taken at Stanford. The policy of the Mathematics Department is that no courses other than the MATH 50 series and below may be double-counted toward any other University major or minor.

HONORS PROGRAM

The honors program is intended for students who have strong theoretical interests and abilities in mathematics. The goal of the program is to give students a thorough introduction to the main branches of mathematics, especially analysis, algebra, and geometry. Through the honors thesis, students may be introduced to a current or recent research topic, although occasionally more classical projects are encouraged. The program provides an excellent background with which to enter a master's or Ph.D. program in Mathematics. Students completing the program are awarded a B.S. in Mathematics with Honors.

It is recommended that the sequence 51H, 52H, 53H be taken in the freshman year. Students who have instead taken the sequence 51, 52, 53 in their freshman year may be permitted to enter the honors program, but such entry must be approved by the Department of Mathematics Committee for Undergraduate Affairs.

To graduate with a B.S. in Mathematics with Honors, the following conditions apply in addition to the usual requirements for math majors:

1. The selection of courses under items '1' and '2' above must include all the math courses 106 or 116, 120, 171 and also must include seven or more additional courses, with at least one from each of the groups: algebra sequence 114, 121, 152, 153, 156; analysis sequence 131, 132, 135, 136, 151, 174A, 174B, 175, 176; geometry/topology sequence 143, 145, 146, 147, 148; logic and set theory sequence PHIL 151, PHIL 152, and MATH 161.
2. Students in the honors program must write a senior thesis. In order to facilitate this, the student must, by the end of the junior year, choose an undergraduate thesis adviser from the Department of Mathematics

faculty, and map out a concentrated reading program under the direction and guidance of the adviser. During the senior year, the student must enroll in MATH 197 for a total of 6 units (typically spread over two quarters), and work toward completion of the thesis under the direction and guidance of the thesis adviser. The thesis may contain original material, or be a synthesis of work in current or recent research literature. The 6 units of credit for MATH 197 are required in addition to the course requirements laid out under items '1' and '2' above and in addition to all other requirements for math majors.

In addition to the minimum requirements laid out above, it is strongly recommended that students take at least one graduate-level course (that is, at least one course in the 200 plus range). MATH 205A, 210A, and 215A or B are especially recommended in this context.

Students with questions about the honors program should see the director of undergraduate advising.

BACHELOR OF SCIENCE IN MATHEMATICAL AND COMPUTATIONAL SCIENCE

The Department of Mathematics participates with the departments of Computer Science, Management Science and Engineering, and Statistics in a program leading to a B.S. in Mathematical and Computational Science. See the "Mathematical and Computational Science" section of this bulletin.

GRADUATE PROGRAMS

MASTER OF SCIENCE

The University's basic requirements for the master's degree are discussed in the "Graduate Degrees" section of this bulletin. Students entering Stanford in 2001 or later should pay particular attention to the University's course requirements for graduate degrees. The following are specific departmental requirements:

Candidates must complete an approved course program of 45 units of courses beyond the department requirements for the B.S. degree, of which at least 36 units must be Mathematics Department courses, taken for a letter grade. The Mathematics courses must include at least 18 units numbered 200 or above. The candidate must have a grade point average (GPA) of 3.0 (B) over all course work taken in Mathematics, and a GPA of 3.0 (B) in the 200-level courses considered separately. Course work for the M.S. degree must be approved during the first quarter of enrollment in the program by the department's Director of Graduate Studies.

For the M.S. degree in Financial Mathematics, see the "Financial Mathematics" section of this bulletin.

TEACHING CREDENTIALS

For information concerning the requirements for teaching credentials, see the "School of Education" section of this bulletin or address inquiries to Credential Secretary, School of Education.

DOCTOR OF PHILOSOPHY

The University's basic requirements for the doctorate (residence, dissertation, examinations, etc.) are discussed in the "Graduate Degrees" section of this bulletin. The following are specific departmental requirements.

To be admitted to candidacy, the student must have successfully completed 27 units of graduate courses (that is, courses numbered 200 and above). In addition, the student must pass qualifying examinations given by the department.

Beyond the requirements for candidacy, the student must complete a course of study approved by the Graduate Affairs Committee of the Department of Mathematics and submit an acceptable dissertation. In accordance with University requirements, Ph.D. students must complete a total of 135 course units beyond the bachelor's degree. These courses should be Department of Mathematics courses or approved courses from other departments. The course program should display substantial breadth in mathematics outside the student's field of application. The student must receive a grade point average (GPA) of 3.0 (B) or better in courses used to satisfy the Ph.D. requirement. In addition, the student must pass the

Department area examination and the University oral examination and pass a reading examination in one foreign language, chosen from French, German, or Russian.

Experience in teaching is emphasized in the Ph.D. program. Each student is required to complete nine quarters of such experience. The nature of the teaching assignment for each of those quarters is determined by the department in consultation with the student. Typical assignments include teaching or assisting in teaching an undergraduate course or lecturing in an advanced seminar.

For further information concerning degree programs, fellowships, and assistantships, inquire of the academic associate of the department.

PH.D. MINOR

The student should complete both of the following:*

1. MATH 106 or 116, 131, 132
2. MATH 113, 114, 120 or 152

These courses may have been completed during undergraduate study, and their equivalents from other universities are acceptable.

In addition, the student should complete 21 units of 200-level courses in Mathematics. These must be taken at Stanford and approved by the Department of Mathematics' Ph.D. minor adviser.

* A third coherent sequence designed by the student, subject to the approval of the graduate committee, may be considered as a substitute for items '1' or '2'.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

INTRODUCTORY AND UNDERGRADUATE

The department offers two sequences of introductory courses in single variable calculus.

1. MATH 41, 42 present single variable calculus. Differential calculus is covered in the first quarter, integral calculus in the second.
2. MATH 19, 20, 21 cover the material in 41, 42 in three quarters instead of two.

There are options for studying multivariable mathematics:

1. MATH 51, 52, 53 cover differential and integral calculus in several variables, linear algebra, and ordinary differential equations. These topics are taught in an integrated fashion and emphasize application. MATH 51 covers differential calculus in several variables and introduces matrix theory and linear algebra. 52 covers integral calculus in several variables and vector analysis, 53 studies further topics in linear algebra and applies them to the study of ordinary differential equations. This sequence is strongly recommended for incoming freshmen with 10 units of advanced placement credit.
2. MATH 51H, 52H, 53H cover the same material as 51, 52, 53, but with more emphasis on theory and rigor.

The introductory course in linear algebra is 103 or 113. There are no formal prerequisites for these courses, but appropriate mathematical maturity is expected. Much of the material in 103 is covered in the sequence 51, 52, 53.

MATH 15. Overview of Mathematics—Broad survey of mathematics; its nature and role in society. GER:DB-Math

3 units, Win (Devlin, K)

MATH 19. Calculus—The content of MATH 19, 20, 21 is the same as the sequence MATH 41, 42 described below, but covered in three quarters, rather than two. GER:DB-Math

3 units, Aut (Lee, B), Win, Sum (Staff)

MATH 20. Calculus—Continuation of 19. Prerequisite: 19. GER:DB-Math

3 units, Win (Lee, B), Spr (Staff)

MATH 21. Calculus—Continuation of 20. Prerequisite: 20. GER:DB-Math

4 units, Spr (Lee, B)

MATH 41. Calculus—Introduction to differential and integral calculus of functions of one variable. Topics: review of elementary functions including exponentials and logarithms, rates of change, and the derivative. Introduction to the definite integral and integration. Prerequisites: algebra, trigonometry. GER:DB-Math

5 units, Aut (Lucianovic, M)

MATH 41A. Calculus ACE—Students attend MATH 41 lectures with different recitation sessions, four hours instead of two, emphasizing engineering applications. Prerequisite: application; see <http://soe.stanford.edu/edp/programs/ace.html>. GER:DB-Math

6 units, Aut (Lucianovic, M)

MATH 42. Calculus—Continuation of 41. Methods of symbolic and numerical integration, applications of the definite integral, introduction to differential equations. Infinite series. Prerequisite: 41 or equivalent. GER:DB-Math

5 units, Aut (Thiem, F), Win (Lucianovic, M)

MATH 42A. Calculus ACE—Students attend MATH 41 lectures with different recitation sessions, four hours instead of two, emphasizing engineering applications. Prerequisite: application; see <http://soe.stanford.edu/edp/programs/ace.html>. GER:DB-Math

6 units, Aut (Thiem, F), Win (Lucianovic, M)

MATH 51. Linear Algebra and Differential Calculus of Several Variables—Geometry and algebra of vectors, systems of linear equations, matrices, vector valued functions and functions of several variables, partial derivatives, gradients, chain rule in several variables, vector fields, optimization. Prerequisite: 21, 42, or a score of 4 on the BC Advanced Placement exam or 5 on the AB Advanced Placement exam, or consent of instructor. GER:DB-Math

5 units, Aut (Brumfiel, G; Levy, D; Milanov, T; Pettet, A; Siefring, R), Win (Mazzeo, R; Milanov, T; Oprea, D; Shirokova, N), Spr (Klodzinski, E; Lucianovic, M), Sum (Staff)

MATH 51A. Linear Algebra and Differential Calculus of Several Variables, ACE—Students attend MATH 51 lectures with different recitation sessions: four hours per week instead of two, emphasizing engineering applications. Prerequisite: application; see <http://soe.stanford.edu/edp/programs/ace.html>. GER:DB-Math

6 units, Aut (Levy, D), Win (Mazzeo, R), Spr (Lucianovic, M)

MATH 51H. Honors Multivariable Mathematics—For prospective Mathematics majors in the honors program and students from other areas of science or engineering who have a strong mathematics background. Three quarter sequence covers the material of 51, 52, 53, and additional advanced calculus and ordinary and partial differential equations. Unified treatment of multivariable calculus, linear algebra, and differential equations with a different order of topics and emphasis from standard courses. Students should know one-variable calculus and have an interest in a theoretical approach to the subject. Prerequisite: score of 5 on BC Advanced Placement exam, or consent of instructor. GER:DB-Math

5 units, Aut (Simon, L)

MATH 52. Integral Calculus of Several Variables—Iterated integrals, line and surface integrals, vector analysis with applications to vector potentials and conservative vector fields, physical interpretations. Divergence theorem and the theorems of Green, Gauss, and Stokes. Prerequisite: 51. GER:DB-Math

5 units, Aut (Wieczorek, W), Win (Demagnet, L; Wieczorek, W), Spr (Li, J)

MATH 52H. Honors Multivariable Mathematics—Continuation of 51H. Prerequisite: 51H. GER:DB-Math

5 units, Win (Simon, L)

MATH 53. Ordinary Differential Equations with Linear Algebra—Linear ordinary differential equations, applications to oscillations, matrix methods including determinants, eigenvalues and eigenvectors, matrix exponentials, systems of linear differential equations with constant coef-

ficients, stability of non-linear systems and phase plane analysis, numerical methods, Laplace transforms. Integrated with topics from linear algebra (103). Prerequisite: 51. GER:DB-Math

5 units, Aut (Storm, P), Win (Cohen, R), Spr (Ionel, E; Galatius, S), Sum (Staff)

MATH 53H. Honors Multivariable Mathematics—Continuation of 52H. Prerequisite: 52H. GER:DB-Math

5 units, Spr (Brendle, S)

MATH 80Q. Capillary Surfaces: Explored and Unexplored Territory—Stanford Introductory Seminar. Preference to sophomores. Capillary surfaces: the interfaces between fluids that are adjacent to each other and do not mix. Recently discovered phenomena, predicted mathematically and subsequently confirmed by experiments, some done in space shuttles. Interested students may participate in ongoing investigations with affinity between mathematics and physics.

3 units, Win (Finn, R)

MATH 88Q. The Mathematics of the Rubik's Cube—Stanford Introductory Seminar. Preference to sophomores. Group theory through topics that can be illustrated with the Rubik's cube: subgroups, homomorphisms and quotient groups, the symmetric and alternating groups, conjugation, commutators, and Sylow subgroups.

3 units, Spr (Bump, D)

UNDERGRADUATE AND GRADUATE

Unless stated, there are no prerequisites for the courses listed below. Where a prerequisite is stated, it may be waived by the instructor.

MATH 100. Mathematics for Elementary School Teachers—Mathematics and pedagogical strategies. Core mathematical content in grades K-6, classroom presentation, how to handle student errors, and mathematical issues that come up during instruction.

4 units, Spr (Milgram, R; Ma, L)

MATH 103. Matrix Theory and Its Applications—Linear algebra and matrices, emphasizing the computational and algorithmic aspects and the scientific problems in which matrix theory is applied. Solution of linear equations. Linear spaces and matrices. Orthogonal projection and least squares. Determinants, eigenvalues, and eigenvectors. GER:DB-Math

3 units, Aut (Nedelec, L), Win, Spr (Iyer, G), Sum (Staff)

MATH 106. Functions of a Complex Variable—Complex numbers, analytic functions, Cauchy-Riemann equations, complex integration, Cauchy integral formula, residues, elementary conformal mappings. Prerequisite: 52. GER:DB-Math

3 units, Aut (Oprea, D), Sum (Brumfiel, G)

MATH 108. Introduction to Combinatorics and Its Applications—Topics: graphs, trees (Cayley's Theorem, application to phylogony), eigenvalues, basic enumeration (permutations, Stirling and Bell numbers), recurrences, generating functions, basic asymptotics. Prerequisites: 51 or 103 or equivalent. GER:DB-Math

3 units, Spr (Thiem, F)

MATH 109. Applied Group Theory—Applications of the theory of groups. Topics: elements of group theory, groups of symmetries, matrix groups, group actions, and applications to combinatorics and computing. Applications: rotational symmetry groups, the study of the Platonic solids, crystallographic groups and their applications in chemistry and physics. GER:DB-Math, WIM

3 units, Aut (Papikian, M)

MATH 110. Applied Number Theory and Field Theory—Number theory and its applications to modern cryptography. Topics: congruences, finite fields, primality testing and factorization, public key cryptography, error correcting codes, and elliptic curves, emphasizing algorithms. GER:DB-Math, WIM

3 units, Win (Carlsson, G)

MATH 111. Computational Commutative Algebra—Introduction to the theory of commutative rings, ideals, and modules. Systems of polynomial equations in several variables from the algorithmic viewpoint. Groebner bases, Buchberger’s algorithm, elimination theory. Applications to algebraic geometry and to geometric problems. GER:DB-Math
3 units, not given this year

MATH 113. Linear Algebra and Matrix Theory—Algebraic properties of matrices and their interpretation in geometric terms. The relationship between the algebraic and geometric points of view and matters fundamental to the study and solution of linear equations. Topics: linear equations, vector spaces, linear dependence, bases and coordinate systems; linear transformations and matrices; similarity; eigenvectors and eigenvalues; diagonalization. GER:DB-Math
3 units, Aut (Vasy, A), Win (Coffey, J)

MATH 114. Linear Algebra and Matrix Theory II—Advanced topics in linear algebra such as: invariant subspaces; canonical forms of matrices; minimal polynomials and elementary divisors; vector spaces over arbitrary fields; inner products; Jordan normal forms; Hermitian and unitary matrices; multilinear algebra; and applications. Prerequisite: 51H or 113. GER:DB-Math
3 units, Spr (Papikian, M)

MATH 115. Functions of a Real Variable—The development of real analysis in Euclidean space: sequences and series, limits, continuous functions, derivatives, integrals. Basic point set topology. Honors math majors and students who intend to do graduate work in mathematics should take 171. Prerequisite: 51. GER:DB-Math
3 units, Aut (Iyer, G), Win (Ornstein, D), Sum (Brumfiel, G)

MATH 116. Complex Analysis—Analytic functions, Cauchy integral formula, power series and Laurent series, calculus of residues and applications, conformal mapping, analytic continuation, introduction to Riemann surfaces, Fourier series and integrals. Applications of complex analysis to electrostatics, hydrodynamics, and theoretical physics. Prerequisites: 52, and 115 or 171. GER:DB-Math
3 units, Win (Kerckhoff, S)

MATH 118. Numerical Analysis—Topics: iterative methods for nonlinear equations, topics from numerical linear algebra, interpolation theory, splines, approximation of functions, and numerical differentiation and integration. GER:DB-Math
3 units, not given this year

MATH 120. Modern Algebra—Basic structures in algebra: groups, rings, and fields. Elements of group theory: permutation groups, finite Abelian groups, p-groups, Sylow theorems. Polynomial rings, principal ideal domains, unique factorization domains. GER:DB-Math, WIM
3 units, Aut (Young, M), Spr (Cohen, R)

MATH 121. Modern Algebra II—Continuation of 120. Fields of fractions. Solvable and simple groups. Elements of field theory and Galois theory. Prerequisite: 120. GER:DB-Math
3 units, Win (Vakil, R)

MATH 131. Partial Differential Equations I—First-order equations, classification of second-order equations. Initial-boundary value problems for heat, wave, and related equations. Separation of variables, eigenvalue problems, Fourier series, existence and uniqueness questions. Prerequisite: 53 or equivalent. GER:DB-Math
3 units, Aut (Nedelec, L), Win (Schoen, R)

MATH 132. Partial Differential Equations II—Laplace’s equation and properties of harmonic functions. Green’s functions. Distributions and Fourier transforms. Eigenvalue problems and generalized Fourier series. Numerical solutions. Prerequisite: 131. GER:DB-Math
3 units, Spr (Schoen, R)

MATH 135. Nonlinear Dynamics and Chaos—Topics: one- and two-dimensional flows, bifurcations, phase plane analysis, limit cycles and their bifurcations. Lorenz equations, fractals and strange attractors. Prerequisite: 51 and 53 or equivalent. GER:DB-Math
3 units, Spr (Demanet, L)

MATH 136. Stochastic Processes—(Same as STATS 219.) Introduction to measure theory, Lp spaces and Hilbert spaces. Random variables, expectation, conditional expectation, conditional distribution. Uniform integrability, almost sure and Lp convergence. Stochastic processes: definition, stationarity, sample path continuity. Examples: random walk, Markov chains, Gaussian processes, Poisson processes, Martingales. Construction and basic properties of Brownian motion. Prerequisite: STATS 116 or MATH 151 or equivalent. Recommended: MATH 115 or equivalent. GER:DB-Math
3 units, Aut (Ross, K), Win (Dembo, A)

MATH 138. Celestial Mechanics—Mathematically rigorous introduction to the classical N-body problem: the motion of N particles evolving according to Newton’s law. Topics include: the Kepler problem and its symmetries; other central force problems; conservation theorems; variational methods; Hamilton-Jacobi theory; the role of equilibrium points and stability; and symplectic methods. Prerequisites: 53, and 115 or 171. GER:DB-Math
3 units, Aut (Mazzeo, R)

MATH 143. Differential Geometry—Geometry of curves and surfaces in three-space and higher dimensional manifolds. Parallel transport, curvature, and geodesics. Surfaces with constant curvature. Minimal surfaces. GER:DB-Math
3 units, Win (Cohen, P)

MATH 145. Algebraic Geometry—Real algebraic curves, Hilbert’s nullstellensatz, complex affine and projective curves, Bezout’s theorem, the degree/genus formula, Riemann surfaces, Riemann-Roch theorem. Prerequisites: 106 or 116, and 109 or 120. Recommended: familiarity with surfaces equivalent to 143, 146, 147, or 148. GER:DB-Math
3 units, not given this year

MATH 146. Analysis on Manifolds—Differentiable manifolds, tangent space, submanifolds, implicit function theorem, differential forms, vector and tensor fields. Frobenius’ theorem, DeRham theory. Prerequisite: 52 or 52H. GER:DB-Math
3 units, Aut (Galatius, S)

MATH 147. Differential Topology—Smooth manifolds, transversality, Sard’s theorem, embeddings, degree of a map, Borsuk-Ulam theorem, Hopf degree theorem, Jordan curve theorem. Prerequisite: 115 or 171. GER:DB-Math
3 units, alternate years, not given this year

MATH 148. Algebraic Topology—Fundamental group, covering spaces, Euler characteristic, homology, classification of surfaces, knots. Prerequisite: 109 or 120. GER:DB-Math
3 units, Win (Douglas, C)

MATH 151. Introduction to Probability Theory—Counting; axioms of probability; conditioning and independence; expectation and variance; discrete and continuous random variables and distributions; joint distributions and dependence; central limit theorem and laws of large numbers. Prerequisite: 52 or consent of instructor. GER:DB-Math
3 units, Win (Liu, T)

MATH 152. Elementary Theory of Numbers—Euclid’s algorithm, fundamental theorems on divisibility; prime numbers, congruence of numbers; theorems of Fermat, Euler, Wilson; congruences of first and higher degrees; Lagrange’s theorem and its applications; quadratic residues; introduction to the theory of binary quadratic forms. GER:DB-Math
3 units, Spr (Soundararajan, K)

MATH 156. Group Representations—Group representations and their characters, classification of permutation group representations using partitions and Young tableaux, group actions on sets and the Burnside ring, and spherical space forms. Applications to geometric group actions and to combinatorics. Prerequisites: linear algebra (51 and 53, or 103 or 113) and group theory (109 or 120). GER:DB-Math

3 units, Spr (Thiem, F)

MATH 161. Set Theory—Informal and axiomatic set theory: sets, relations, functions, and set-theoretical operations. The Zermelo-Fraenkel axiom system and the special role of the axiom of choice and its various equivalents. Well-orderings and ordinal numbers; transfinite induction and transfinite recursion. Equinumerosity and cardinal numbers; Cantor's Alephs and cardinal arithmetic. Open problems in set theory. GER:DB-Math

3 units, Win (Young, M)

MATH 171. Fundamental Concepts of Analysis—Recommended for Mathematics majors and required of honors Mathematics majors. Similar to 115 but altered content and more theoretical orientation. Properties of Riemann integrals, continuous functions and convergence in metric spaces; compact metric spaces, basic point set topology. Prerequisites: 51 and 52, or 51H and 52H. GER:DB-Math, WIM

3 units, Aut (Kerckhoff, S), Spr (Storm, P)

MATH 174A. Topics in Analysis and Differential Equations with Applications—For students planning graduate work in mathematics or physics, and for honors math majors and other students at ease with rigorous proofs and qualitative discussion. 174A topics may include: geometric theory of ODE's with applications to dynamics; mathematical foundations of classical mechanics including variational principles, Lagrangian and Hamiltonian formalisms, theory of integrable systems; theorems of existence and uniqueness; Sturm-Liouville theory. 174B topics may include: introduction to PDEs including transport equations, Laplace, wave, and heat equations; techniques of solution including separation of variables and Green's functions; Fourier series and integrals; introduction to the theory of distributions; mathematical foundations of quantum mechanics. Prerequisite: 53H or 171, or consent of instructor. GER:DB-Math

3 units, Win (Vasy, A)

MATH 174B. Honors Analysis—Continuation of 174A. Prerequisite: 174A.

3 units, not given this year

MATH 175. Elementary Functional Analysis—Linear operators on Hilbert space. Spectral theory of compact operators; applications to integral equations. Elements of Banach space theory. Prerequisite: 115 or 171. GER:DB-Math

3 units, Spr (Iyer, G)

MATH 180. Introduction to Financial Mathematics—Financial derivatives: contracts and options. Hedging and risk management. Arbitrage, interest rate, and discounted value. Geometric random walk and Brownian motion as models of risky assets. Initial boundary value problems for the heat and related partial differential equations. Self-financing replicating portfolio. Black-Scholes pricing of European options. Dividends. Implied volatility. Optimal stopping and American options. Prerequisite: 53. Corequisites: 131, 151 or STATS 116. GER:DB-Math

3 units, Aut (Brendle, S)

MATH 197. Senior Honors Thesis

1-6 units, Aut, Win, Spr (Staff)

MATH 199. Independent Work—Undergraduates pursue a reading program; topics limited to those not in regular department course offerings. Credit can fulfill the elective requirement for math majors. Approval of Undergraduate Affairs Committee is required to use credit for honors majors area requirement.

1-3 units, Aut, Win, Spr (Staff)

PRIMARILY FOR GRADUATE STUDENTS

MATH 205A. Real Analysis—Basic measure theory and the theory of Lebesgue integration. Prerequisite: 171 or equivalent.

3 units, Aut (White, B)

MATH 205B. Real Analysis—Point set topology, basic functional analysis, Fourier series, and Fourier transform. Prerequisites: 171 and 205A or equivalent.

3 units, Win (Vasy, A)

MATH 205C. Real Analysis—Continuation of 205B.

3 units, Spr (Cohen, P)

MATH 210A. Modern Algebra—Groups, rings, and fields; introduction to Galois theory. Prerequisite: 120 or equivalent.

3 units, Aut (Bump, D)

MATH 210B. Modern Algebra—Galois theory. Ideal theory, introduction to algebraic geometry and algebraic number theory. Prerequisite: 210A.

3 units, Win (Vakil, R)

MATH 210C. Modern Algebra—Continuation of 210B. Representations of groups and noncommutative algebras, multilinear algebra.

3 units, Spr (Milgram, R)

MATH 215A. Complex Analysis, Geometry, and Topology—Analytic functions, complex integration, Cauchy's theorem, residue theorem, argument principle, conformal mappings, Riemann mapping theorem, Picard's theorem, elliptic functions, analytic continuation and Riemann surfaces.

3 units, Aut (Li, J)

MATH 215B. Complex Analysis, Geometry, and Topology—Topics: fundamental group and covering spaces, homology, cohomology, products, basic homotopy theory, and applications. Prerequisites: 113, 120, and 171, or equivalent; 215A is not a prerequisite for 215B.

3 units, Win (Brumfiel, G)

MATH 215C. Complex Analysis, Geometry, and Topology—Differentiable manifolds, transversality, degree of a mapping, vector fields, intersection theory, and Poincaré duality. Differential forms and the DeRham theorem. Prerequisite: 215B or equivalent.

3 units, Spr (Cohen, R)

MATH 216A,B,C. Introduction to Algebraic Geometry—Algebraic curves, algebraic varieties, sheaves, cohomology, Riemann-Roch theorem. Classification of algebraic surfaces, moduli spaces, deformation theory and obstruction theory, the notion of schemes. May be repeated for credit.

3 units, not given this year

MATH 217A. Differential Geometry—Smooth manifolds and submanifolds, tensors and forms, Lie and exterior derivative, DeRham cohomology, distributions and the Frobenius theorem, vector bundles, connection theory, parallel transport and curvature, affine connections, geodesics and the exponential map, connections on the principal frame bundle. Prerequisite: 173 or equivalent.

3 units, Aut (Coffey, J)

MATH 217B. Differential Geometry—Riemannian manifolds, Levi-Civita connection, Riemann curvature tensor, Riemannian exponential map and geodesic normal coordinates, Jacobi fields, completeness, spaces of constant curvature, bi-invariant metrics on compact Lie groups, symmetric and locally symmetric spaces, equations for Riemannian submanifolds and Riemannian submersions. Prerequisite: 217A.

3 units, Win (Brendle, S)

MATH 220A. Partial Differential Equations of Applied Mathematics—First-order partial differential equations, method of characteristics, weak solutions, conservation laws, hyperbolic equations, separation of variables, Fourier series, Kirchoff's formula, Huygen's principle, and hyperbolic systems. Prerequisite: foundation in multivariable calculus and ordinary differential equations.

3 units, Aut (Vasy, A)

MATH 220B. Partial Differential Equations of Applied Mathematics—Parabolic and elliptic partial differential equations. Eigenvalue problems, Green’s functions, properties of harmonic functions, potential theory, Fourier series and Fourier transform. Prerequisite: 220A or 131.
3 units, Win (Liu, T)

MATH 220C. Asymptotic Methods—Asymptotics for integrals, Rayleigh-Schrodinger perturbation theory, boundary layers, multiple scales for oscillations, multiple scales and homogenization, and high frequency asymptotics (geometrical optics). Prerequisites: 220A and B.
3 units, not given this year

MATH 221. Mathematical Methods of Imaging—Mathematical methods of imaging: array imaging using Kirchhoff migration and beamforming, resolution theory for broad and narrow band array imaging in homogeneous media, topics in high-frequency, variable background imaging with velocity estimation, interferometric imaging methods, the role of noise and inhomogeneities, and variational problems that arise in optimizing the performance of imaging algorithms and the deblurring of images. Prerequisites: 220A and B.
3 units, Spr (Papanicolaou, G)

MATH 222. Computational Methods for Fronts, Interfaces, and Waves—High-order methods for multidimensional systems of conservation laws and Hamilton-Jacobi equations (central schemes, discontinuous Galerkin methods, relaxation methods). Level set methods and fast marching methods. Computation of multi-valued solutions. Multi-scale analysis, including wavelet-based methods. Boundary schemes (perfectly matched layers). Examples from (but not limited to) geometrical optics, transport equations, reaction-diffusion equations, imaging, and signal processing.
3 units, Win (Levy, D)

MATH 224. Topics in Mathematical Biology—Mathematical models for biological processes based on ordinary and partial differential equations. Topics: population and infectious diseases dynamics, biological oscillators, reaction diffusion models, biological waves, and pattern formation. Prerequisites: 53 and 131, or equivalents.
3 units, not given this year

MATH 228A,B. Ergodic Theory—Measure preserving transformations and flows, ergodic theorems, mixing properties, spectrum, Kolmogorov automorphisms, entropy theory. Examples. Classical dynamical systems, mostly geodesic and horocycle forms on homogeneous spaces of $SL(2, \mathbb{R})$. May be repeated for credit. Prerequisites: 205A,B.
3 units, not given this year

MATH 232. Topics in Probability: Geometry and Markov Chains—Dirichlet forms; Nash, Sobolev, and log-Sobolev inequalities; and applications to card shuffling and random walk on graphs. May be repeated for credit.
3 units, not given this year

MATH 234. Large Deviations—(Same as STATS 374.) Combinatorial estimates and the method of types. Large deviation probabilities for partial sums and for empirical distributions, Cramer’s and Sanov’s theorems and their Markov extensions. Applications in statistics, information theory, and statistical mechanics. Prerequisite: MATH 230A or STATS 310.
3 units, Win (Dembo, A)

MATH 235. Topics in Ergodic Theory—May be repeated for credit.
3 units, Win, Spr (Ornstein, D)

MATH 236. Introduction to Stochastic Differential Equations—Brownian motion, stochastic integrals, and diffusions as solutions of stochastic differential equations. Functionals of diffusions and their connection with partial differential equations. Random walk approximation of diffusions. Prerequisite: 136 or equivalent and differential equations.
3 units, Win (Papanicolaou, G)

MATH 237. Stochastic Equations and Random Media—Topics in stochastic differential equations relevant for the analysis of processes in random environments emphasizing asymptotic methods and estimation methods. Examples from financial mathematics including stochastic volatility models, credit default models, and interest rate models that deal with the whole yield curve. Prerequisite: 236 or equivalent. Recommended: knowledge of financial mathematics.
3 units, Spr (Papanicolaou, G)

MATH 238. Mathematical Finance—(Same as STATS 250.) Stochastic models of financial markets. Forward and futures contracts. European options and equivalent martingale measures. Hedging strategies and management of risk. Term structure models and interest rate derivatives. Optimal stopping and American options. Corequisites: MATH 236 and 220B or equivalent.
3 units, Win (Papanicolaou, G)

MATH 239. Computation and Simulation in Finance—Monte Carlo, finite difference, tree, and transform methods for the numerical solution of partial differential equations in finance. Emphasis is on derivative security pricing. Prerequisite: 238 or equivalent.
3 units, Spr (Durrleman, V)

MATH 240. Topics in Financial Mathematics: Fixed Income Models—Introduction to continuous time models for arbitrage-free pricing of interest rate derivatives. Bonds, yields, and the construction of yield curves. Caps, floors, swaps, swaptions, and bond options. Short rate models. Yield curve models. Forward measures. Forward and futures. LIBOR and swap market models. Prerequisite: MATH 238.
3 units, Spr (Durrleman, V)

MATH 244. Riemann Surfaces—Compact Riemann surfaces: topological classifications, Hurwitz’ formula, Riemann-Roch formula, uniformization theorem. Abel’s theorem, Jacobian varieties. Some elements of harmonic analysis are developed with applications. Emphasis is on methods generally applicable to algebraic curves. May be repeated for credit.
3 units, not given this year

MATH 245A. Topics in Algebraic Geometry: Moduli Theory—Intersection theory on the moduli spaces of stable curves, stable maps, and stable vector bundles. May be repeated for credit.
3 units, Aut (Oprea, D)

MATH 245B. Topics in Algebraic Geometry: Dessin d’Enfants—Grothendieck’s theory of dessin d’enfants, a study of graphs on surfaces and their connection with the absolute Galois group of the rational numbers. Belyi’s theorem, representations of the absolute Galois group as automorphisms of profinite groups, Grothendieck-Teichmuller theory, quadratic differentials, and the combinatorics of moduli spaces of surfaces. May be repeated for credit.
3 units, Win (Brumfiel, G)

MATH 246. Symmetric Functions and Algebraic Combinatorics—Unified treatment of topics in classical enumeration via the study of symmetric polynomials. Classical symmetric functions, Schur functions, Young tableaux, Schensted correspondence, character theory of the symmetric group, introduction to random matrix theory. Prerequisite: 210 or equivalent.
3 units, not given this year

MATH 247. Topics in Group Theory—Topics include the Burnside basis theorem, classification of p-groups, regular and powerful groups, Sylow theorems, the Frattini argument, nilpotent groups, solvable groups, theorems of P. Hall, group cohomology, and the Schur-Zassenhaus theorem. The classical groups and introduction to the classification of finite simple groups and its applications. May be repeated for credit.
3 units, not given this year

MATH 248. Algebraic Number Theory—Introduction to modular forms and L-functions. May be repeated for credit.
1-3 units, not given this year

MATH 249A. Topics in Number Theory: Drinfeld Modules—Drinfeld modules and their modular varieties, and their role in the proof of the Langlands conjecture over function fields. May be repeated for credit.

3 units, Aut (Papikian, M)

MATH 249B. Topics in Number Theory: Additive Problems in Number Theory—For graduate students and advanced undergraduates. Results and techniques in additive number theory. Topics may include: the Freiman-Ruzsa theorem; Roth's theorem on three term arithmetic progressions; Weyl's equidistribution theorem; Vinogradov's three primes theorem; Gowers's recent proof of Szemerédi's theorem; and sum-product theorems. May be repeated for credit. Prerequisites: analysis at the level of 171. Recommended: knowledge of Fourier series.

3 units, Win (Soundararajan, K)

MATH 249C. Topics in Number Theory: P-adic Analysis and Zeta Functions—For graduate students and advanced undergraduates. Dwork's proof of the rationality of zeta functions of projective varieties over finite fields using analytic methods over p-adic numbers. Prerequisites: basic algebra and complex analysis (106, 113, 120, and 121).

3 units, Spr (Papikian, M)

MATH 254. Geometric Methods in the Theory of Ordinary Differential Equations—Topics may include: structural stability and perturbation theory of dynamical systems; hyperbolic theory; first order PDE; normal forms, bifurcation theory; Hamiltonian systems, their geometry and applications. May be repeated for credit.

3 units, Aut (Eliashberg, Y)

MATH 256A. Partial Differential Equations—The theory of linear and nonlinear partial differential equations, beginning with linear theory involving use of Fourier transform and Sobolev spaces. Topics: Schauder and L2 estimates for elliptic and parabolic equations; De Giorgi-Nash-Moser theory for elliptic equations; nonlinear equations such as the minimal surface equation, geometric flow problems, and nonlinear hyperbolic equations.

3 units, Aut (Guth, L)

MATH 256B. Partial Differential Equations—Continuation of 256A.

3 units, Win (Guth, L)

MATH 257A. Symplectic Geometry and Topology—Linear symplectic geometry and linear Hamiltonian systems. Symplectic manifolds and their Lagrangian submanifolds, local properties. Symplectic geometry and mechanics. Contact geometry and contact manifolds. Relations between symplectic and contact manifolds. Hamiltonian systems with symmetries. Momentum map and its properties. May be repeated for credit.

3 units, Aut (Ionel, E)

MATH 257B. Symplectic Geometry and Topology—Continuation of 257A. May be repeated for credit.

3 units, Win (Ionel, E)

MATH 258. Topics in Geometric Analysis—May be repeated for credit.

3 units, Aut (Simon, L)

MATH 260. Topics in Analysis—May be repeated for credit.

3 units, Win (White, B)

MATH 261A,B. Functional Analysis—Geometry of linear topological spaces. Linear operators and functionals. Spectral theory. Calculus for vector-valued functions. Operational calculus. Banach algebras. Special topics in functional analysis. May be repeated for credit.

3 units, not given this year

MATH 263A,B. Lie Groups and Lie Algebras—Definitions, examples, properties. Semi-simple Lie algebras, their structure and classification. Cartan decomposition: real Lie algebras. Representation theory: Cartan-Stiefel diagram, weights. Weyl character formula. Orthogonal and symplectic representations. May be repeated for credit. Prerequisite: 210 or equivalent.

3 units, A: Win, B: Spr (Bump, D)

MATH 266. Computational Signal Processing and Wavelets—Theoretical and computational aspects of signal processing. Topics: time-frequency transforms; wavelet bases and wavelet packets; linear and nonlinear multiresolution approximations; estimation and restoration of signals; signal compression. May be repeated for credit.

3 units, Win (Levy, D)

MATH 270. Geometry and Topology of Complex Manifolds—Complex manifolds, Kahler manifolds, curvature, Hodge theory, Lefschetz theorem, Kahler-Einstein equation, Hermitian-Einstein equations, deformation of complex structures. May be repeated for credit.

3 units, Aut (Li, J)

MATH 272A. Topics in Partial Differential Equations

3 units, Win (Staff)

MATH 275. Topics in Singularity Theory—Topics may include: Jet spaces; Thom transversality theorem; h-principle type results in singularity theory with applications to topology; Thom-Boardman singularities; local classification problems and results in singularity theory; Picard-Lefschetz theory; theory of oscillating integrals; Frobenius manifolds.

3 units, not given this year

MATH 282A. Low Dimensional Topology—The theory of surfaces and 3-manifolds. Curves on surfaces, the classification of diffeomorphisms of surfaces, and Teichmüller space. The mapping class group and the braid group. Knot theory, including knot invariants. Decomposition of 3-manifolds: triangulations, Heegaard splittings, Dehn surgery. Loop theorem, sphere theorem, incompressible surfaces. Geometric structures, particularly hyperbolic structures on surfaces and 3-manifolds.

3 units, Aut (Kerckhoff, S)

MATH 282B. Homotopy Theory—Homotopy groups, fibrations, spectral sequences, simplicial methods, Dold-Thom theorem, models for loop spaces, homotopy limits and colimits, stable homotopy theory.

3 units, Win (Carlsson, G)

MATH 282C. Fiber Bundles and Cobordism—Possible topics: principal bundles, vector bundles, classifying spaces. Connections on bundles, curvature. Topology of gauge groups and gauge equivalence classes of connections. Characteristic classes and K-theory, including Bott periodicity, algebraic K-theory, and indices of elliptic operators. Spectral sequences of Atiyah-Hirzebruch, Serre, and Adams. Cobordism theory, Pontryagin-Thom theorem, calculation of unoriented and complex cobordism. May be repeated for credit.

3 units, Spr (Milgram, R)

MATH 283. Topics in Algebraic and Geometric Topology—May be repeated for credit.

3 units, Aut (Galatius, S), Win (Kerckhoff, S), Spr (Rivin, I)

MATH 286. Topics in Differential Geometry—May be repeated for credit.

3 units, Win, Spr (Schoen, R)

MATH 290B. Finite Model Theory—(Same as PHIL 350B.) Classical model theory deals with the relationship between formal languages and their interpretation in finite or infinite structures; its applications to mathematics using first-order languages. The recent development of the model theory of finite structures in connection with complexity classes as measures of computational difficulty; how these classes are defined within certain languages that go beyond first-order logic in expressiveness, such as fragments of higher order or infinitary languages, rather than in terms of models of computation.

3 units, Win (Feferman, S)

MATH 292A,B. Set Theory—(Same as PHIL 352A,B.) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL 160A,B, and MATH 161, or equivalents.

3 units, not given this year

MATH 295. Computation and Algorithms in Mathematics—Use of computer and algorithmic techniques in various areas of mathematics. Computational experiments. Topics may include polynomial manipulation, Groebner bases, computational geometry, and randomness. May be repeated for credit.

3 units, Win (Rivin, I)

MATH 355. Graduate Teaching Seminar—Required of and limited to first-year Mathematics graduate students.

1 unit, Win (Staff)

MATH 360. Advanced Reading and Research

1-9 units, Aut, Win, Spr, Sum (Staff)

MATH 361. Research Seminar Participation—Participation in a faculty-led seminar which has no specific course number.

1-3 units, Aut, Win, Spr, Sum (Staff)

MATH 380-391. Graduate Seminars—By arrangement. May be repeated for credit.

MATH 380. Seminar in Applied Mathematics

1-3 units, Aut, Win, Spr (Staff)

MATH 381. Seminar in Analysis

1-3 units, Aut, Win, Spr (Staff)

MATH 384. Seminar in Geometry

1-3 units, Aut, Win, Spr (Staff)

MATH 385. Seminar in Topology

1-3 units, Aut, Win, Spr (Staff)

MATH 386. Seminar in Algebra

1-3 units, Aut, Win, Spr (Staff)

MATH 387. Seminar in Number Theory

1-3 units, Aut, Win, Spr (Staff)

MATH 388. Seminar in Probability and Stochastic Processes

1-3 units, Aut, Win, Spr (Staff)

MATH 389. Seminar in Mathematical Biology

1-3 units, Aut, Win, Spr (Staff)

MATH 391. Seminar in Logic and the Foundations of Mathematics

1-3 units, Aut, Win, Spr (Staff)

MATH 395. Classics in Geometry and Topology—Original papers in geometry and in algebraic and geometric topology. May be repeated for credit.

3 units, Win (Douglas, C), Spr (Staff)

MATH 396. Graduate Progress—Results and current research of graduate and postdoctoral students. May be repeated for credit.

1 unit, Aut, Win, Spr (Staff)

MATH 397. Physics for Mathematicians—Topics from physics essential for students studying geometry and topology. Topics may include quantum mechanics, quantum field theory, path integral approach and renormalization, statistical mechanics, and string theory. May be repeated for credit.

1 unit, Aut, Win (Staff)

COGNATE COURSES

PHIL 151/251. First-Order Logic

4 units, Win (Pauly, M)

PHIL 152/252. Computability and Logic

4 units, Spr (Pauly, M)

PHIL 162/262. Philosophy of Mathematics

4 units, Spr (Mancosu, P)

STATS 116. Theory of Probability

3-5 units, Aut, Spr, Sum (Staff)

STATS 310A,B,C. Theory of Probability

2-4 units, **A:** Aut (Siegmund, D), **B:** Win (Dembo, A), **C:** Spr (Lai, T)

MEDIEVAL STUDIES

Director: Jennifer Summit

Committee in Charge: Philippe Buc, Hester Gelber, Hans Ulrich Gumbrecht, Robert P. Harrison, Nancy S. Kollmann, Seth Lerer, William Mahrt, Bissera Pentcheva, Jennifer Summit, Rega Wood

Affiliated Faculty: George H. Brown (English), Philippe Buc (History), Charlotte Fonrobert (Religious Studies), Hester Gelber (Religious Studies), Hans Ulrich Gumbrecht (French and Italian), Robert Harrison (French and Italian), Nancy S. Kollmann (History), Seth Lerer (English, Comparative Literature), Mark E. Lewis (History), William Mahrt (Music), Kathryn Miller (History, on leave), Bissera Pentcheva (Art and Art History), Orrin W. Robinson (German Studies), Jeffrey Schnapp (French and Italian), Jennifer Summit (English), Rega Wood (Philosophy)

Program Offices: Building 250, Room 251F

Mail Code: 94305-2020

Department Phone: (650) 723-3413

Email: idstudies.moore@stanford.edu

Web Site: <http://www.stanford.edu/dept/medieval/>

Courses given in Medieval Studies have the subject code MEDVLST. For a complete list of subject codes, see Appendix.

The Medieval Studies Program is administered through Interdisciplinary Studies in Humanities, but the degree is conferred by the Dean of Undergraduate Studies Advisory Committee on Individually Designed Majors. The committee has approved the program as listed below. Students interested in pursuing the Medieval Studies major or minor should consult the Director of Medieval Studies. Students who are members of the Humanities Honors Program may petition to major in Medieval Studies; see the “Interdisciplinary Studies in Humanities” section of this bulletin. The major is normally declared by the beginning of the student’s third year.

The major combines interdisciplinary breadth with a disciplinary focus. The interdisciplinary emphasis is provided by MEDVLST 165, Introduction to Medieval Culture (not given 2006-07), by upper-division interdisciplinary colloquia, and by the requirement that students take courses in three different areas. Depth is ensured by the requirement that students take at least four courses in one area. A faculty adviser helps each student choose courses that integrate the requirements of breadth and depth. To that end, the following guidelines are provided.

The student should take a minimum of 60 units of course work from the list of Medieval Studies courses or appropriate alternatives approved by the director, including ten courses as follows:

1. The introductory course, MEDVLST 165, Introduction to Medieval Culture. Because 165 is not given in 2006-07, students may petition to take a substitute course. Petitions should be directed to the Director of Medieval Studies, Jennifer Summit, at summit@stanford.edu.
2. Two upper-division courses, ideally with an interdisciplinary component, in any field dealing with the Middle Ages.
3. Four courses in one of the following categories:
 - a) Literature: English, French, German and Scandinavian, Italian, Latin, Slavic, Spanish
 - b) History
 - c) Art History, Drama, Music
 - d) Humanities, Philosophy, Religious Studies (certain Humanities courses may fulfill requirements within other categories)
4. Two courses in a second category from the above list.
5. One course in a third category from the above list.

Students doing the Medieval Studies concentration for the Humanities major should use these requirements as guidelines for developing their programs of study.

In addition to the ten courses, a language proficiency equal to two years of college-level study is suggested in Latin or one of the following: French, German, Italian, or Spanish.

Medieval Studies has a Writing in the Major (WIM) requirement. It can be fulfilled in one of three ways:

1. Through a course designated as WIM by a department contributing to the Medieval Studies major.
2. Through a paper in a Medieval Studies course.
3. Through an independent paper with a member of the Medieval Studies faculty.

Check with the program office regarding specific requirements for each of these options.

MINORS

An undergraduate minor in Medieval Studies is available through the program. Students interested in completing the minor should inquire about enrollment procedures at the office of Interdisciplinary Studies in Humanities.

Requirements are as follows:

1. *Language*: in addition to the University foreign language requirement, at least a one quarter course in a classical and/or medieval vernacular language is recommended, which may count as one of the five required courses for the minor listed under item 2b.
2. The minor consists of six courses, which include:
 - a) Medieval Studies 165, Introduction to Medieval Culture (core course). If 165 is not offered in a given year, students may petition to take a substitute course if necessary. Petitions should be directed to the Director of Medieval Studies.
 - b) an additional five courses dealing directly with the Middle Ages. If the student's major department or program offers medieval courses, he/she should take two of them for the Medieval Studies minor, but those courses may not also count for the major. At least three courses must be taken outside the student's major, selected from two or more of the following categories:
 - 1) Language and Literature
 - 2) History
 - 3) Art History, Drama, Music
 - 4) Humanities, Philosophy, Religious Studies
 - 5) From among the Medieval Studies faculty listed above, the student chooses an adviser, who assists in the selection of courses and the design of the program.

Courses applied to the minor in Medieval Studies must be taken for a letter grade. Courses applied to the minor cannot also be applied to a student's major or another minor.

COURSES

MEDVLST 322. Medieval Seminar — (Same as HUMNTIES 322, RELIGST 338.) Medieval culture and ethical ideals extolled by medieval authors explicitly in philosophical and theological texts and implicitly in literary ones. Connections among ethics, cosmology, sacred history, anthropology, and soteriology in the medieval worldview. Medieval ethical beliefs as a window on medieval intellectual culture.

3-5 units, Win (Gelber, H)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

ARTHIST 105A/305A. Islamic Art around the Mediterranean

4 units, Win (Fetvacı, E)

ARTHIST 106/306. Byzantine Art and Architecture, 300-1453 C.E.

4 units, Win (Pentcheva, B)

ARTHIST 107/307. Age of Cathedrals

4 units, Aut (Pentcheva, B)

ARTHIST 108/308. Virginity and Power: Mary in the Middle Ages

4 units, not given this year

ARTHIST 187/387. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868 — (Same as JAPANGEN 87.)

4 units, Spr (Takeuchi, M)

ARTHIST 206A. Visualizing History in the Islamic World

5 units, Spr (Fetvacı, E)

ENGLISH 4B/104B. Medieval Women: Faith, Love, and Learning — (Same as ENGLISH 104B.)

3-5 units, Win (Summit, J)

ENGLISH 102. Chaucer

5 units, Spr (Lerer, S)

FRENLIT 130. Authorship, Book Culture, and National Identity in Medieval and Renaissance France

4 units, not given this year

GERGEN 38A. Introduction to Germanic Languages — (Same as GERLIT 138.)

3 units, Win (Robinson, O)

GERLIT 257. Gothic

4 units, Spr (Robinson, O)

HISTORY 110A. Europe from Late Antiquity to 1500

5 units, Aut (Buc, P)

HISTORY 133A. Yorkist and Tudor England

5 units, Aut (Como, D)

HISTORY 135/335. History of European Law, Medieval to Contemporary

5 units, Win (Herzog, T)

HISTORY 216/316. Medieval Antisemitism

5 units, not given this year

HISTORY 232G/332G. When Worlds Collide: The Trial of Galileo

5 units, Spr (Findlen, P)

MUSIC 40. Music History to 1600

4 units, Aut (Markham, M)

MUSIC 140/240. Studies in Medieval Music

3-4 units, alternate years, not given this year

MUSIC 141/241. Studies in Renaissance Music

3-4 units, alternate years, not given this year

MUSIC 221A. History of Music Theory: Ancient Through Baroque

4 units, alternate years, not given this year

MUSIC 301A. Analysis of Music: Modal

4 units, Win (Mahrt, W)

PHIL 115/215. Foundations of Medieval Psychology

3-5 units, Aut (Wood, R)

PHIL 248. Medieval Latin Paleography

3-5 units, not given this year

RELIGST 84. Mystics, Pilgrims, Monks, and Scholars: Religious Devotion in Medieval Christianity

4 units, Spr (Pitkin, B)

RELIGST 172. Sex, Body, and Gender in Medieval Religion

4 units, not given this year

RELIGST 263. Judaism and the Body

4 units, Aut (Fonrobert, C)

RELIGST 271A. Dante's Spiritual Vision

4-5 units, Aut (Yearley, L)

RELIGST 271B. Dante's Spiritual Vision

4-5 units, Win (Yearley, L)

RELIGST 308. Medieval Japanese Buddhism

3-5 units, not given this year

MODERN THOUGHT AND LITERATURE

Director: Elisabeth Mudimbe-Boyi

Committee in Charge: Lanier Anderson, Jean-Pierre Dupuy, Shelley Fisher Fishkin, Gregory Freidin (on leave), Hans U. Gumbrecht, Andrea A. Lunsford, Purnima Mankekar, Barbaro Martinez-Ruiz, Paula Moya, Elisabeth Mudimbe-Boyi, Helen Stacy (Law)

Affiliated Faculty: Lanier Anderson (Philosophy), Eamonn Callan (Education), Jean-Pierre Dupuy (French and Italian), Paulla Ebron (Cultural and Social Anthropology), Dan Edelstein (French and Italian), Harry Elam (Drama), Michele Elam (English), Amir Eshel (German Studies), Shelley Fisher Fishkin (English), James Ferguson (Cultural and Social Anthropology), Gregory Freidin (Slavic Languages and Literatures), Theodore Glasser (Communication), Roland Greene (English, Comparative Literature), Hans U. Gumbrecht (French and Italian), Akhil Gupta (Cultural and Social Anthropology), Sean Hanretta (History), Ursula Heise (English), Robert Kaufman (English), Matthew Kohrman (Cultural and Social Anthropology), Joshua Landy (French and Italian), Helen Longino (Philosophy), Andrea A. Lunsford (English), Liisa Malkki (Cultural and Social Anthropology), Purnima Mankekar (Cultural and Social Anthropology), Barbaro Martinez-Ruiz (Art and Art History), Franco Moretti (English, Comparative Literature), Paula Moya (English), Elisabeth Mudimbe-Boyi (French and Italian), David Palumbo-Liu (Comparative Literature), Arnold Rampersad (English), Ramón Saldivar (English, Comparative Literature), Priya Satia (History), Debra Satz (Philosophy), Londa Schiebinger (History), Helen Stacy (Law), Richard White (History), Bryan Wolf (Art and Art History), Alex Woloch (English, on leave), Sylvia Yanagisako (Cultural and Social Anthropology, on leave), Yvonne Yarbro-Bejarano (Spanish and Portuguese), Steven Zipperstein (History)

Web Site: <http://www.stanford.edu/dept/MTL>

Courses given in Modern Thought and Literature have the subject code MTL. For a complete list of subject codes, see Appendix.

The Program in Modern Thought and Literature is administered through the office of Interdisciplinary Studies in Humanities. The program admits students for the Ph.D. and a very limited number for a coterminal B.A./M.A. Program.

UNDERGRADUATE PROGRAMS

Although Modern Thought and Literature has no formal undergraduate degree granting program, undergraduates interested in completing a major in this field may do so through the undergraduate major in Interdisciplinary Studies in Humanities. This program is designed for students with a commitment to interdisciplinary study in the humanities. Students may devise majors that incorporate modern literature (since the 18th century), cultural history, and critical theory. Students may also create majors in other interdisciplinary concentrations. For course guidelines, see the *Handbook for the Major in Interdisciplinary Studies in Humanities*. Students wishing to declare the major in Interdisciplinary Studies in Humanities must apply for admission to the Humanities honors program and for graduation with honors in Humanities.

COTERMINAL BACHELOR'S AND MASTER'S PROGRAM

Each year, one or two undergraduates, who are exceptionally well prepared in literature and at least one foreign language and whose undergraduate course work includes a strong interdisciplinary component,

may petition to be admitted to the program for the purpose of completing a coterminal M.A. degree. Admission to this program is granted only on condition that in the course of working on their master's degree they do not apply to enter the Ph.D. program in Modern Thought and Literature. The deadline for application is early February.

To apply, applicants submit:

1. An unofficial grade transcript from Axes.
2. A Petition for Admission to the Coterminal Program from the Registrar's Office.
3. A statement giving the reasons the student wishes to pursue this program and its place in his or her future plans. This statement should pay particular attention to the reasons why the student could not pursue the studies he or she desires in some other way.
4. A plan of study listing, quarter by quarter, each course by name, units, and instructor, to be taken in order to fulfill the requirements for the degree for a total of 45 units, including at least 20 units of advanced work in one literature, and at least 20 units in a coherent interdisciplinary program of courses taken in non-literature departments.
5. A writing sample of critical or analytical prose.
6. Two letters of recommendation from members of the faculty who know the applicant well and who can speak directly to the question of his or her ability to do graduate-level work.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

REQUIREMENTS

The candidate for the M.A. must complete at least 45 units of graduate work, to be divided in the following manner:

1. The introductory seminar, MTL 334A, 5 units, or another graduate-level seminar offered by a member of the committee in charge and approved by the student's graduate program adviser.
2. At least 20 units of advanced course work in literature, to be approved by the director.
3. At least 20 units of course work in a coherent and individually arranged interdisciplinary program, to be approved by the director.

By the end of the course of study, each candidate must also demonstrate a reading knowledge of at least one foreign language.

GRADUATE PROGRAMS

The Ph.D. in Modern Thought and Literature is an interdisciplinary program combining work in modern literary/cultural studies with work in one or more other modern disciplines.

The Ph.D. program is designed specifically for students who have a strong interest in literature or culture, but whose approach or focus requires an interdisciplinary program; for example, students interested in anthropological or philosophical approaches to literature and culture; gender studies; ethnic studies; or in topics such as legal humanities, popular culture, and social or cultural theory.

Modern Thought and Literature is intended for students who plan to teach and write in literature departments or in interdisciplinary programs in the humanities, cultural studies, or humanistic social sciences, or for students intending to formulate cultural policy.

Course work in the program is divided about evenly between advanced courses in literature departments and advanced courses in non-literary departments.

MASTER OF ARTS

The Master of Arts is available to students who are admitted to the doctoral program. Students are not admitted into the program for the purpose of earning a terminal Master of Arts degree. Candidates for the Ph.D. who satisfy the committee of their progress and satisfactorily complete 45 units of course work forming a coherent program of study, may apply for an M.A. in Modern Thought and Literature.

DOCTOR OF PHILOSOPHY

University requirements for the Ph.D. are discussed in the “Graduate Degrees” section of this bulletin.

A candidate for the Ph.D. degree in Modern Thought and Literature must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the B.A. degree. He or she is expected to complete at least 18 courses of graduate work in addition to the dissertation. Students may spend one year of graduate study abroad.

Requirements for the Ph.D. in Modern Thought and Literature are:

1. A two quarter introductory seminar, MTL 334A,B, The Modern Tradition I and II (5 units each, Autumn, Winter) followed by MTL 300, The Modern Thought and Literature Colloquium (1 unit, Spring).
2. A coherent program of eight courses of advanced work in literary studies to be worked out with the adviser, of which at least six must be regularly scheduled courses in literature. Courses in the teaching of composition (ENGLISH 396, 397), ad hoc graduate seminars (MTL 395), research courses (MTL 398), and thesis registration (MTL 802) may not be counted among these six courses; MTL 396L, 397, 399, 802 may not be counted toward these requirements under any circumstances.
3. Eight courses of advanced work in non-literature departments, the core of which is completion of either a departmental minor or an interdepartmental concentration, typically consisting of six courses. Departmental minors are available from the departments of Cultural and Social Anthropology, Art and Art History, Communication, History, Philosophy, Political Science, Religious Studies, and Sociology (see the relevant information in those sections of this bulletin). Approved interdepartmental concentrations have been established in popular culture, ethnic studies, feminist and gender studies, and science and technology studies (specific course requirements are available from the program office). Individually designed concentrations may be approved by petition to the director. In addition to the required six courses in a minor or a concentration, two additional courses from non-literature departments are chosen in consultation with each student’s academic adviser. Course restrictions noted above in item 2 also apply.
4. *Qualifying Paper*: this certifies that students are likely to be able to undertake the quality of research, sustained argumentation, and cogent writing demanded in a doctoral dissertation. The qualifying paper must be a substantial revision of a seminar paper written at Stanford during the first year and should embody a substantial amount of independent research, develop an intellectual argument with significant elements of original thinking, and demonstrate the ability to do interdisciplinary work. Each paper is evaluated by two or three readers (designated before the end of the first year of graduate study), one of whom must be a member of the Committee in Charge. Qualifying papers must be submitted to the program office no later than the end of the third week of the fifth quarter of enrollment, normally, winter of the second year.
5. Teaching, an essential part of the program, is normally undertaken in conjunction with the Department of English. Candidates are required to demonstrate competence in teaching.
6. Students must demonstrate, by the end of the third quarter of the first year, a reading knowledge of one foreign language and, by the beginning of the first quarter of the third year, a reading knowledge of one other foreign language. Reading knowledge means the ability to make a genuine scholarly use of the language: that is, to read prose of ordinary difficulty.
Students may not take the University oral examination before completion of the foreign language requirement.
7. *Candidacy*: at the end of the second year, students apply for candidacy. The following qualifications are required before candidacy can be certified: the earlier submission of a satisfactory qualifying paper, demonstration of a reading knowledge of one foreign language; satisfactory progress in course work; a list of courses applicable to the degree, distinguishing between courses appropriate to the literary component and courses appropriate to the interdisciplinary component; designation of a departmental minor or an interdisciplinary

concentration; and the submission of a statement outlining the scope and coherence of the interdisciplinary component of the program in relation to the literary component and noting the relevance of the course work to that program.

8. *Annual Review*: the program and progress of each student must be approved by the Committee in Charge at the end of each academic year.
9. *University Oral Examination*: this examination, covering the student’s areas of concentration, normally is taken in the third year of graduate study. It is a two-hour oral examination administered by four faculty members specializing in the student’s areas of concentration, and a chair from another department. The exam is based on a substantial reading list prepared by the student in conjunction with the faculty committee and designed to cover the areas of expertise pertinent to the student’s dissertation project.
10. *Colloquium on the Dissertation Proposal*: sometime after the University oral examination, or in conjunction with that examination, the dissertation committee assembles for up to one hour to discuss the dissertation proposal with the student. Prior to this meeting, the student should have consulted each member of the committee to discuss the proposal and compile a bibliography.
11. *Dissertation*: the fourth and fifth years are devoted to the dissertation, which should be a substantial and original contribution acceptable to the Committee on Modern Thought and Literature. The subject is drawn from the literature of specialization and the area of nonliterary studies.

HUMANITIES

The program participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in Modern Thought and Literature and Humanities. For a description of the Humanities program, see the “Interdisciplinary Studies in Humanities” section of this bulletin.

COURSES

Students interested in literature and literary studies should also consult course listings in the departments of Asian Languages, Classics, Comparative Literature, English, French and Italian, German Studies, Slavic Languages and Literatures, and Spanish and Portuguese, and in the Division of Literatures, Cultures, and Languages. For other offerings, students should consult listings in the individual departments of interest. Consent of instructor is often required.

Students in the doctoral program in Modern Thought and Literature are advised to read through the offerings in English as well as offerings of the non-literature departments in which they wish to concentrate: for example, courses dealing with culture listed under Cultural and Social Anthropology, courses dealing with film under Communication or Art and Art History, courses in intellectual and cultural history under History. If the area of nonliterary interest is thematic rather than disciplinary, doctoral students should look under program listings such as Feminist Studies, African and African American Studies, or Comparative Studies in Race and Ethnicity.

MTL 300. Modern Thought and Literature Colloquium—Required of first-year graduate students in the program; open to all students in the program and to others by consent of instructor. Weekly meeting of students in the program to discuss interdisciplinary scholarship, writing, and issues pertaining to the requirements for the Ph.D. Presentations by affiliated faculty and by student panels.

1-3 units, Spr (Boyi, E)

MTL334A. The Modern Tradition I—(Same as ENGLISH 334A.) Preference to first-year graduate students in Modern Thought and Literature and English. Kant’s 18th-century development of the critique of reason; how it set the stage for the themes and problems that have preoccupied Western thinkers. Focus is on texts that extend and problematize the critique of reason. Writers include Kant, Hegel, Marx, Nietzsche, Weber, Freud, Lukács, and Heidegger.

5 units, Aut (Moya, P)

MTL 334B. The Modern Tradition II: Gramsci, Lacan, and Derrida as Cultural Critique—(Same as CASA 334B.) Responses, refutations, elaborations, modifications to texts in critical theory such as Gramsci, Lacan, and Derrida, and postcolonial and feminist theory. Prerequisite: consent of instructor.

3-5 units, Win (Mankekar, P)

MTL 390. Qualifying Paper—Preparation and writing of the qualifying paper for the Ph.D. in Modern Thought and Literature.

1-5 units, Aut, Win, Spr, Sum (Staff)

MTL 395. Ad Hoc Graduate Seminar—Graduate students (three or more) who wish to study a subject or an area not covered by regular courses and seminars may plan an informal seminar and approach a member of the faculty to supervise it. May be repeated for credit.

1-5 units, Aut, Win, Spr, Sum (Staff)

MTL 396. Current Issues in Interdisciplinarity—Dimensions of the interdisciplinary experience at MTL and Stanford; the future of interdisciplinarity in the humanities and social sciences. Possible outcomes include a jointly authored academic publication by MTL students, assessment of current curricula, statement of purpose of MTL, and 2007-08 conference on interdisciplinarity. May be repeated for credit.

1-2 units, Aut, Win, Spr (Mudimbe-Boyi, E)

MTL 398. Research—Students pursue a special subject of investigation under supervision of a member of the committee or another faculty member. Thesis work is not to be performed under this number. May be repeated for credit.

1-15 units, Aut, Win, Spr, Sum (Staff)

MTL 399. Reading for Orals—Reading in preparation for the University Oral Examination. May be repeated for credit.

1-15 units, Aut, Win, Spr, Sum (Staff)

MUSIC

Emeriti: (Professors) John M. Chowning, Albert Cohen, George Houle, William H. Ramsey, Leonard G. Ratner, Sandor Salgo, Leland C. Smith; *(Professors, Performance)* Arthur P. Barnes, Marie Gibson, Andor Toth; *(Professor, Research)* Max V. Mathews

Chair: Stephen M. Sano

Professors: Karol Berger, Chris Chafe, Brian Ferneyhough, Stephen Hinton, Julius O. Smith

Associate Professors: Jonathan Berger, Thomas Grey, Heather Hadlock, William P. Mahrt

Assistant Professor: Mark Applebaum

Professor (Teaching): George Barth (Piano)

Associate Professor (Teaching): Stephen Sano (Director of Choral Studies)

Associate Professor (Performance): Jindong Cai (Director of Orchestral Studies)

Senior Lecturers: Giancarlo Aquilanti (Director of Theory; Wind Ensemble), Stephen Harrison (Violoncello), Gennady Kleyman (Violin, Viola), Thomas Schultz (Piano), Gregory A. Wait (Voice; Director of Vocal Studies), Frederick R. Weldy (Piano)

Lecturers: Kumaran Arul (Piano), Carey Bell (Clarinet), Talya Berger (Theory), Fredrick Berry (Jazz Ensemble), Frances Blaisdell (Flute), Mark Brandenburg (Clarinet), Marjorie Chauvel (Harp), Tony Clements (Tuba), Laura Dahl (Resident Collaborative Pianist), John Dornenburg (Viola da Gamba), Charles A. Ferguson (Guitar), Debra Fong (Violin), Claire Giovannetti (Voice), Dawn Harms (Violin, Viola), Alexandra Hawley (Flute), Melody Holmes-Schaeffle (Flute), Robert Hubbard (Oboe), Joyce Johnson-Hamilton (Trumpet), Christopher Jones (Composition, Theory), Jay Kadis (Audio Recording), McDowell Kenley (Trombone), Mary Linduska (Voice), Fernando Lopez-Lezcano (CCRMA), Murray Low (Jazz Piano), Janet Maestre (Flute), Anthony Martin (Baroque Violin), James Matheson (Oboe), Robert Huw Morgan (University Organist, Organ), Bruce Moyer (Contrabass), Herbert Myers (Early Winds), James Nadel (Jazz), Rufus Olivier (Bassoon), Larry S. Ragent (French Horn), Amy Schneider (Voice), Harold Stein (Saxophone), Elaine Thornburgh (Harpsichord), Erik Ulman (Composition, Theory), Linda Uyechi (Taiko), Mark Veregge (Percussion), William L. Verplank (Human Computer Interface Design), Timothy Zerlang (University Carillonneur, Piano)

Consulting Professors: Jonathan Abel (CCRMA), David Berners (CCRMA), Marina Bosi-Goldberg (CCRMA), Walter Hewlett (Computer-Assisted Research in the Humanities), Eleanor Selfridge-Field (Computer-Assisted Research in the Humanities), Malcolm Slaney (CCRMA)

Visiting Professors: Jean-Claude Risset (CCRMA), Thomas Rossing (CCRMA), Richard Taruskin (Music History), Izaly Zemtsovsky (Music History)

Artists-in-Residence (St. Lawrence String Quartet): Geoff Nuttall (Violin 1), Scott St. John (Violin 2), Lesley Robertson (Viola), Christopher Costanza (Cello)

Mellon Fellows: James Kennaway (Music History), Michael Markham (Music History)

Department Offices: Braun Music Center, Room 101

Mail Code: 94305-3076

Phone: (650) 723-3811

Email: musicdept@stanford.edu

Web Site: <http://music.stanford.edu/>

Courses given in Music have the subject code MUSIC. For a complete list of subject codes, see Appendix.

The Department of Music's aims are to provide specialized training for those who plan careers in music as composers, performers, teachers, and research scholars; and to promote the understanding and enjoyment of music in the University at large through its courses and abundant performance offerings.

Varied opportunities for instrumental and vocal study and performance are available to majors and nonmajors alike. Students wishing to obtain

individual instruction, to participate in chamber music, or to play in departmental ensembles should note that auditions are held during registration week in Autumn Quarter. While there may be openings in some private studios and ensembles for qualified students during other quarters, it is to the student's advantage to audition in autumn, as most slots are filled for the entire year.

The department is housed in Braun Music Center, Dinkelspiel Auditorium, and The Knoll, including three concert halls for concert and recital productions, two rehearsal halls, a small chamber hall, and a state-of-the-art, heptagonal listening/research room. Pianos, organs, harpsichords, and a variety of early stringed and wind instruments are available for student use. In addition, advanced students may use fine old stringed instruments and bows from the Harry R. Lange Historical Collection (<http://music.stanford.edu/DeptInfo/Langecol.html>).

The Music Library (<http://www.sul.stanford.edu/depts/music/index.html>) contains a comprehensive collection of scores, books, and recordings with an emphasis on Western art music. In addition, the Department of Special Collections holds an invaluable collection of musical manuscripts and first and early editions, and the Archive of Recorded Sound has a superb collection of historical recordings of all types.

The Stanford Center for Computer Research in Music and Acoustics (CCRMA) is a multidisciplinary facility where composers and researchers work together using computer-based technology both as an artistic medium and as a research tool. Areas of ongoing interest at CCRMA include: composition, applications hardware, applications software, synthesis techniques and algorithms, physical modeling, real-time controllers, signal processing, digital recording and editing, psychoacoustics and musical acoustics, music manuscripting by computer, and real-time applications.

The CCRMA community consists of administrative and technical staff, faculty, research associates, graduate research assistants, graduate and undergraduate students, visiting scholars, visiting researchers and composers, and industrial affiliates. Center activities include academic courses, seminars, small interest-group meetings, summer workshops, and colloquia. Concerts of computer music are presented several times each year with an annual outdoor computer-music festival in July.

CCRMA houses studios, computing facilities, and a networked system of software that includes programs and tools for editing, viewing, synthesizing, and analyzing sound. For a detailed and up-to-date description of facilities available, see the CCRMA home page at <http://ccrma.stanford.edu/>.

The Center for Computer-Assisted Research in the Humanities (CCARH), located in Braun Music Center, conducts research focused on constructing computer databases for music and on creating programs that allow student and staff researchers to access, analyze, print, and electronically perform the music. For more information, see the CCARH home page at <http://www.ccarh.org/>.

UNDERGRADUATE PROGRAMS BACHELOR OF ARTS

The undergraduate major in Music is built around a series of foundation courses in theory, musicianship, and music history, in addition to performance and the proficiency requirements outlined below. Because of the sequence of courses, it takes more than two years to complete the requirements for the major. Prospective majors are urged to consult the undergraduate student services officer in the department as early as possible in order to plan a program that allows sufficient time for major course work, practice, and University requirements outside the major. Early planning is especially important for students wishing to double-major, for those contemplating overseas study during their undergraduate years, for those wishing to do an in-depth concentration in the Music major, and for those with particular musical talents and interests. All required courses for the B.A. in Music and in the Music, Science, and Technology specialization must be taken for a letter grade. Electives may be taken credit/no credit, but any courses taken towards concentration requirements must also carry a letter grade.

1. Students are required to include the following foundation courses in their programs:

- a) Theory: MUSIC 21, 22, 23
 - b) History: MUSIC 40, 41, 42, and three from the series 140-148 Writing in the Major (WIM) courses (two of which must be taken as 4-unit WIM courses)
 - c) Analysis: MUSIC 121 and two from 122A, B, or C
2. Additionally, Music majors must fulfill the following two performance requirements:
 - a) Instruction in instrumental and/or vocal performance: minimum of five quarters, comprising a minimum of 15 units.
 - b) Ensemble: five quarters (5 units minimum) of work in one or more of the department's organizations or chamber groups. MUSIC 156, "sic": Improvisation Collective, and MUSIC 157, Mariachi Band, do not satisfy this requirement. MUSIC 181 may count for up to two of the ensemble-unit requirements for the Music major. To fulfill the ensemble requirement, Music majors need to participate at least three quarters in the department's traditional large ensembles (MUSIC 159-167), with the exception of students whose primary instrument is harp, keyboard, or guitar, who need to participate at least one quarter in the ensembles above, but who may fulfill the rest of the requirement with chamber music (171).
 3. Majors are required to pass a Piano Proficiency examination as part of the music theory core (MUSIC 21, 22, 23). The examination is given in the first two weeks of MUSIC 21. Students who do not pass the Piano Proficiency examination are required to enroll in MUSIC 12 concurrently with the music theory core until they are able to pass. The examination consists of scales and arpeggios, performance of a simple tune to be set by the examiner, sight reading, and the performance of prepared pieces (consult the department undergraduate adviser for details).
 4. Majors must also pass an Ear-Training Proficiency examination, which is part of the requirements to complete MUSIC 23. It may be taken by arrangement, demonstrating a student's ability to hear music accurately and to perform it at sight.

RECOMMENDED SCHEDULE FOR THE MUSIC MAJOR

The following sample schedule shows how a student may include substantial work on a major in Music while also fulfilling the University General Education Requirements during the freshman and sophomore years. The schedule also includes foreign language study, which is strongly recommended for all Music majors and especially for those expecting to continue into graduate work in any area of music.

FIRST YEAR

Subject and Catalog Number	Quarter and Units		
	A	W	S
PWR as assigned	3		3
MUSIC 19 (if needed), 21, 22	(3)	4	4
Individual Instruction and/or Ensemble	1-4	1-4	1-4
Introduction to the Humanities	3-5	3-5	3-5
Choice of Foreign Language, General Education Requirement, or Stanford Introductory Seminar	3-5	3-5	3-5

SECOND YEAR

MUSIC 23, 40, 41, 42	8	4	4
Individual Instruction and/or Ensemble	1-4	1-4	1-4
General Education Requirement, or Stanford Introductory Seminar	3-5	3-5	3-5
Elective	(3)	(3)	(3)

THIRD AND FOURTH YEARS

MUSIC 121 and two from 122A, B, or C	4	4	4
Three from MUSIC 140-148	4-8	4-8	4-8
Elective	(4)	(4)	(4)
Senior Year: Concentration Project (if selected)	(4)		

MUSIC, SCIENCE, AND TECHNOLOGY

The specialization in Music, Science, and Technology is designed for those students with a strong interest in the musical ramifications of rapidly evolving computer technology and digital audio, and in the acoustic and psychoacoustic foundations of music. The program entails a research project under faculty guidance and makes use of the highly multidisciplinary environment at CCRMA. This program can serve as a complementary major to students in the sciences and engineering.

- Students in the program are required to include the following courses in their studies:
 - Theory: 21, 22, 23, 121, 151 (WIM) (4 units each); 150 (3 units); 220A,B,C (4 units each); 250A (4 units)
 - History: two from 40, 41, 42
 - Applied: individual studies in performance (6 units) or 192A,B; and Ensemble or 192C (5 units)
 - Research project: 220D (4 units)
- Students in Music, Science, and Technology must also pass the Piano and Ear-Training Proficiency examinations required of all Music majors.

MINORS

Minors in Music and in the Music, Science, and Technology specialization provide the student with a core of essential Music courses in the disciplines that establish both a foundation for informed appreciation of music and a basis for more advanced study, should the student wish to pursue it. Students minoring in Music or in the Music, Science, and Technology specialization must also pass the Piano and Ear-Training Proficiency examinations required of Music majors.

MUSIC

<i>Subject and Catalog Number</i>	<i>Units</i>
MUSIC 21, 22, 23. Elements of Music	12
MUSIC 40, 41, 42. Music-History Survey	12
Choice of one (WIM):	
MUSIC 140-148. Studies in Music History	4
Two quarters:	
MUSIC 159-171. Ensemble	2
MUSIC 172-177. Individual Instruction	6
Total	36

MUSIC, SCIENCE, AND TECHNOLOGY

MUSIC 21, 22, 23. Elements of Music	12
MUSIC 150. Musical Acoustics	3
MUSIC 151. Psychophysics and Cognitive Psychology for Musicians (WIM)	4
MUSIC 220A,B. Fundamentals of Computer-Generated Sound	8
MUSIC 192A,B. Theory and Practice of Audio Recording	6
MUSIC 192C. Session Recording (two quarters, 1 or 2 units/qr.)	3
Total	36

CONCENTRATIONS

Concentrations are offered in performance, conducting, composition, or history and theory. In each concentration, 6 additional course units in the area of concentration beyond the basic requirements for the major are required. In addition, each concentrator registers for an independent project (198, 4 units) in the senior year under faculty supervision, leading to a senior recital, a composition, a conducting project, or a senior research paper. Students wishing to pursue the concentration in performance must demonstrate private-lesson-level proficiency on their instrument. Specific guidelines and information on the concentration tracks are available from the Department of Music office and students are urged to select this option no later than the middle of their junior year in order to complete all of the requirements in a timely manner.

HONORS PROGRAM

Honors in Music is awarded by the faculty to concentrators who have produced an independent project of exceptional quality and meet certain departmental standards in musicianship, scholarship, and academic standing. The conferral of honors is done solely through faculty consultation. Students do not petition for honors.

OVERSEAS STUDIES

Courses in Music are often available at Stanford overseas programs, especially in Berlin, Paris, and Oxford. See the Overseas Studies Program section of this bulletin immediately following this section for this year's listings. Music majors and minors should talk to the Department of Music undergraduate administrator prior to going overseas.

GRADUATE PROGRAMS

University requirements for the M.A., D.M.A., and Ph.D. degrees are described in the "Graduate Degrees" section of this bulletin.

The following statements apply to all the graduate degrees described below, unless otherwise indicated.

Admission— Applicants are required to submit evidence of accomplishment (scores, recordings, and/or research papers, according to the proposed field of concentration) when they return the application form. Applicants should arrange to take the Graduate Record Examination (GRE) well in advance of the December 12 application deadline. All components of the application are due by December 12. International students whose first language is not English are also required to take the TOEFL exam (with certain exceptions: see <http://gradadmissions.stanford.edu/>).

Department Examinations— All entering graduate students except those in the M.A./MST program are required to take: (1) a diagnostic examination testing the student in theory (counterpoint, harmony, and analysis) and (for musicologists only) the history of Western art music, and (2) a proficiency examination in sight-singing and piano sight-reading. These exams are given at the beginning of study in the department (usually the week before school begins).

None of Stanford's required undergraduate courses may be credited toward an advanced degree unless specifically required for both degrees. Only work that receives a grade of 'A,' 'B,' or 'Satisfactory' (a passing grade in an instructor-mandated credit/no credit course) in music courses numbered 100 or higher taken as a graduate student is recognized as fulfilling the advanced-degree requirements. Students may need to devote more than the minimum time in residence if preparation for graduate study is inadequate.

MASTER OF ARTS

Residence— A minimum of 45 academic units is required for the master's degree in Music.

MUSIC

Students in the doctoral programs who enter directly from the bachelor's level may, upon completing 45 units and advancing to candidacy, be recommended for the M.A. degree. The Department of Music does not accept students for study only towards the M.A. degree except in the Music, Science, and Technology program, described below.

MUSIC, SCIENCE, AND TECHNOLOGY

This is a one-year program of 45 units focusing on the integration of music perception, music-related signal processing and controllers, and synthesis. The program is designed for students having an undergraduate engineering or science degree, or a degree that includes course work in engineering mathematics.

Required are:

<i>Subject and Catalog Number</i>	<i>Units</i>
MUSIC 151. Psychophysics and Cognitive Psychology for Musicians	4
MUSIC 154. Composition and Performance of Instrumental Music with Electronics	3
MUSIC 192A. Foundations of Sound-Recording Technology	3
MUSIC 192B. Advanced Sound-Recording Technology	3
MUSIC 220A. Fundamentals of Computer-Generated Sound	4
MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing	4
MUSIC 220C. Research Seminar in Computer-Generated Music	4
MUSIC 250A. HCI Theory and Practice	4
MUSIC 320. Introduction to Digital Audio Signal Processing	4
MUSIC 420. Signal Processing Models in Musical Acoustics	3
MUSIC 421. Audio Applications of the Fast Fourier Transform	3
Elective	6
Total	45

DOCTORAL PROGRAMS

Residence— The candidate must complete a minimum of 135 academic units (see Residency under the "Graduate Degrees" section of this bulletin). Doctoral candidates working on Ph.D. dissertations or Doctor of Musical Arts (D.M.A.) final projects that require consultation with faculty members continue enrollment in the University under Terminal Graduate

Registration (TGR), after they have reached the required 135 academic units and have completed their Special Area examinations.

Foreign Language Requirement—At the time of advancement to candidacy, all D.M.A. students, and Ph.D. students in the Computer-Based Theory and Acoustics program, are required to have demonstrated a reading knowledge of one language other than English and the ability to translate into idiomatic English. Ph.D. students in Musicology are required to demonstrate proficiency in German and a similar competence in a second language, chosen from French, Italian, or Latin (or, on a case-by-case basis, another language, if it has significant bearing on the candidate's field of study).

Qualifying Examination—A written and oral examination for admission to candidacy is given just prior to the fourth quarter of residence for D.M.A. students and Ph.D. students in the Computer-Based Music Theory and Acoustics programs; for Ph.D. students in Musicology, the exams are given just prior to the eighth quarter of residence. This exam tests knowledge of history, theory, repertory, and analysis.

Teaching—All students in the Ph.D. or D.M.A. degree programs, regardless of sources of financial support, are required to complete six quarters of supervised teaching at half time. Music 280 (given in Spring Quarter and taken at the end of the first year) is a required course for Teaching Assistants. Additional quarters of teaching may be required by the department.

Basic Requirements—Doctoral programs in the Department of Music do not require a master's degree as a prerequisite. All students entering directly from the bachelor's degree level are required to take the following course (which is, however, required of all students in musicology, regardless of entering degree level):

Subject and Catalog Number	Units
200. Graduate Proseminar	4
All doctoral candidates must take:	
301A,B,C. Music Analysis: Modal, Tonal, and Post-Tonal	12

DOCTOR OF MUSICAL ARTS IN COMPOSITION

The Doctor of Musical Arts (D.M.A.) degree in Composition is given breadth through collateral studies in other branches of music and in relevant studies outside music as seems desirable.

Examinations—A written Special Area examination in the candidate's field of concentration, including a final project proposal, is required to be completed during the fourth year of study, no later than the last day of classes in Autumn Quarter of that year. A public lecture/demonstration is also required during the last quarter of residence. It should be one hour in length, treating aspects of the final project.

Requirements—Besides those requirements listed above, candidates are expected to produce a number of works demonstrating their ability to compose in a variety of forms and for the common media: vocal, instrumental, and electronic music. If possible, the works submitted are presented in public performance prepared by the composer. Annual progress is reviewed by the composition faculty. The final project in composition is an extended work for instruments, voices, electronic media, or a combination of these. MUSIC 323, Doctoral Seminar in Composition (16 units), is a required course.

DOCTOR OF PHILOSOPHY

The Ph.D. in Music can be pursued in two concentrations: Musicology or Computer-Based Music Theory and Acoustics.

Examinations—

1. **Special Areas:** a written and oral examination testing the student's knowledge of music and research in the student's field of concentration is completed during the fourth year of study, no later than the last day of classes in Autumn Quarter of that year. This includes an oral defense of the dissertation proposal. The examining committee comprises prospective readers of the dissertation.
2. **Ph.D. Orals:** the University oral examination, taken once the dissertation is substantially underway, is an oral presentation and defense of dissertation research methods and results.

Requirements—Besides those requirements listed above, other requirements by concentration are:

MUSICOLOGY

Subject and Catalog Number	Units
221A. History of Music Theory: Ancient Through Baroque	4
221B. History of Music Theory: Classical Through Modern	4
269A. Seminar in Performance Practices	4
300A,B. Seminar in Notation	8
310. Research Seminars in Musicology*	24-40
312A,B. Aesthetics and Criticism of Music	8

* The requirement is for eight seminars of 3-5 units each. Students may petition to take up to two graduate seminars in other departments, in consultation with their adviser.

COMPUTER-BASED MUSIC THEORY AND ACOUSTICS

220A,B,C. Computer-Generated Music Seminars	12
220D. Research in Computer Music	12
221A. History of Music Theory: Ancient Through Baroque	4
221B. History of Music Theory: Classical Through Modern	4
320. Introduction to Digital Audio Signal Processing	4

JOINT PH.D. IN MUSIC AND HUMANITIES

The department participates in the Graduate Program in Humanities leading to a joint Ph.D. degree in Music and Humanities. For a description of the program, see the "Interdisciplinary Studies in Humanities" section of this bulletin.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. (AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

Many Music courses have web pages linked to the Music home page. Courses with web sites at press time are noted in their entries below.

GENERAL

MUSIC 2C. Men, Women, and Opera—An introduction to opera through the lenses of gender and sexuality. The doomed heroines of Italian tragic operas by Verdi and Puccini; the battle of the sexes in Mozart's comedies *The Marriage of Figaro* and *Don Giovanni*; and ambiguous representations of masculinity in serious opera from Handel to Rossini, where heroes were played by high-voiced men and crossdressing women. Literary and historical background; feminist and queer critiques of opera's misogynist plots and stereotypes. Students attend an opera performance. GER:DB-Hum, EC-Gender
3 units, Spr (Hadlock, H)

MUSIC 8A. Rock, Sex, and Rebellion—Development of critical listening skills and musical parameters through genres in the history of rock music. Focus is on competing aesthetic tendencies and subcultural forces that shaped the music. Rock's significance in American culture, and the minority communities that have enriched rock's legacy as an expressively diverse form. Lectures, readings, listening, and video screenings. GER:DB-Hum, EC-AmerCul
3 units, Spr (Applebaum, M)

MUSIC 9A. Tchaikovsky, Stravinsky, Shostakovich, and Beyond: A History of Russian Music—Introduction to Russian culture through classical music and folklore, including sacred, secular, oral, and written music. The variety of Russian sung folklore in its traditional context, and how it is reflected in the music of Russian composers including Glinka, Mussorgsky, Rimsky-Korsakov, Tchaikovsky, Skryabin, Stravinsky, Prokofiev, and Shostakovich. Listening assignments include fieldwork data and video recordings. GER:DB-Hum, EC-GlobalCom
3 units, Spr (Zemtsovsky, I)

MUSIC 11N-36N. Stanford Introductory Seminars

MUSIC 13Q. Classical Music and Politics: Western Music in Modern China—Stanford Introductory Seminar. Preference to sophomores. For students interested in social history, cultural studies, China studies, international relations, and music. From the Italian Jesuit, Matteo Ricci who presented a clavichord to the Chinese emperor, to the emergence of a modern generation of Chinese musicians. GER:DB-Hum, EC-GlobalCom

3 units, Spr (Cai, J)

MUSIC 14N. Women Making Music—Stanford Introductory Seminar. Women's roles as composers and performers across history and cultures. Music from diverse cultures, styles, and eras as a medium for women to express individuality and build community. Women's musical activities in folk and art music of Japan, India, Ireland, and Albania; women in popular music in America, Egypt, and Africa; female musicians of the medieval, Renaissance, Romantic, and contemporary eras. GER:DB-Hum, EC-Gender

3 units, Aut (Hadlock, H)

MUSIC 15Q. Topics in American Music—Stanford Introductory Seminar. American music as a central element in the quest for a national artistic expression that reflects the social order that forms it: pluralistic, multicultural, largely immigrant, democratic, and combining elements of its cultivated and vernacular traditions. Ballads, blues, band music, musical comedy, minstrel, missions music, American Indian music, country music, rags, rock, rhythm-and-blues, jazz, spirituals, swing, shape-notes. GER:DB-Hum, EC-AmerCul

3 units, Win (Cohen, A)

MUSIC 16N. Music, Myth, and Modernity: Wagner's Ring Cycle and Tolkien's Lord of the Rings—Stanford Introductory Seminar. Preference to freshmen. Roots of Wagner's operatic cycle and Tolkien's epic trilogy in a common core of Norse, Germanic, and Anglo-Saxon mythology. The role of musical motive and characterization in Wagner's music dramas and the film version of Tolkien's trilogy. Music as a key element in the psychological, political, and cultural revision of ancient myth in modern opera and film. GER:DB-Hum, EC-GlobalCom

3 units, Spr (Grey, T)

MUSIC 17N. The Operas of Mozart—Stanford Introductory Seminar. Preference to freshmen. Four of Mozart's mature operas, the earliest works in the operatic repertoire never to go out of fashion. What accounts for this extraordinary staying power? Focus on the history of their composition, performance, and reception, and their changing significance from Mozart's time to the present. GER:DB-Hum

3 units, Win (Berger, K)

MUSIC 17Q. Perspectives in North American Taiko—Stanford Introductory Seminar. Preference to sophomores. Taiko, or Japanese drum, is a newcomer to the American music scene. Emergence of the first N. American taiko groups coincided with increased Japanese American activism, and to some it is symbolic of Japanese American identity. N. American taiko is associated with Japanese American Buddhism. Musical, cultural, historical, and political perspectives of taiko. Hands-on drumming. Japanese music and Japanese American history, and relations among performance, cultural expression, community, and identity. GER:DB-Hum, EC-AmerCul

4 units, Spr (Sano, S)

MUSIC 35N. The Music and Ideas of Charles Ives—Stanford Introductory Seminar. Preference to freshmen. The life and work of Charles Ives, and the polarized reception his compositions received. Music includes Ives' Victorian songs and his symphonic works; his philosophical and political writings, historic recordings, oral and photographic histories, and live performances. Hands-on work with original manuscripts and editions. Recommended: ability to read music. GER:DB-Hum

3 units, Aut (Barth, G)

MUSIC 36N. Experimental Instruments—Stanford Introductory Seminar. The design of new, experimental musical instruments emphasizing sound-sculpture instruments and their sonic capabilities and visual appeal. Lab in the recently renovated CCMRA; students design

and build their own instruments, and form a performing ensemble. Historical readings, the evolution of traditional instruments, concert events, museum visits and guest lecturers. Recommended: experience with music, visual art, or power tools.

4 units, Aut (Applebaum, M)

MUSIC 18A. Jazz History: Ragtime to Bebop, 1900-1940—From the beginning of jazz to the war years. GER:DB-Hum, EC-AmerCul

3 units, Win (Berry, F)

MUSIC 18B. Jazz History: Bebop to Present, 1940-Present—Modern jazz styles from Bebop to the current scene. Emphasis is on the significant artists of each style. GER:DB-Hum, EC-AmerCul

3 units, Spr (Berry, F)

MUSIC 20A. Jazz Theory—Introduces the language and sounds of jazz through listening, analysis, and compositional exercises. Students apply the fundamentals of music theory to the study of jazz. Prerequisite: 19 or consent of instructor. GER:DB-Hum

3 units, Aut (Nadel, J)

MUSIC 20B. Advanced Jazz Theory—Approaches to improvisation through listening and transcribing, and developing familiarity with important contributors to this music. Topics: scale theory, altered dominants, and substitute harmony. Prerequisite: 20A or consent of instructor. GER:DB-Hum

3 units, Win (Nadel, J)

MUSIC 20C. Jazz Arranging and Composition—Jazz arranging and composition for small ensembles. Foundation for writing for big band. Prerequisite: 20A or consent of instructor.

3 units, alternate years, not given this year

MUSIC 127. Instrumentation and Orchestration—Individual instruments, instrumental groups within the orchestra, and combinations of groups. Arrangements from piano to orchestral music. Score analysis with respect to orchestration. Practical exercises using chamber ensembles and school orchestra. Prerequisite: 23. GER:DB-Hum

3 units, Win (Jones, C)

FOUNDATION FOR B.A. MAJOR

Students with training in theory should take the placement exam given at the beginning of each quarter for admission to more advanced courses. Students must not assume that they may begin study with MUSIC 21.

MUSIC 19. Introduction to Music Theory—For non-music majors and Music majors or minors unable to pass the proficiency test for entry to MUSIC 21. The fundamentals of music theory and notation, basic sight reading, sight singing, ear training, keyboard harmony; melodic, rhythmic, and harmonic dictation. Skill oriented, using piano and voice as basic tools to develop listening and reading skills. GER:DB-Hum

3 units, Aut, Spr (Berger, T)

MUSIC 21,22,23. Elements of Music—Melody, harmony, counterpoint, and rhythm are studied through analysis, composition, and exercises in practical musicianship. Emphasis is on tonal theory with components in melody, counterpoint, and harmony. Analytical and practical musicianship skills are taught, with analysis and compositional projects in historical styles. Students with previous training in theory should take the placement exam given at the beginning of each quarter for admission to more advanced courses. Students must not assume that they may begin study with MUSIC 21.

MUSIC 21. Elements of Music I—Preference to majors. Introduction to tonal theory. Practice and analysis. Diatonic harmony focusing on melodic and harmonic organization, functional relationships, voice-leading, and tonal structures. Ear-training and keyboard-harmony skills; analytical methods and listening strategies. Concurrent enrollment in MUSIC 12 (Piano) or demonstration of keyboard skills sufficient to pass the Piano Proficiency Exam within the first two weeks of the term is required. Enrollment limited to 40. Prerequisite: pass a basic musical skills proficiency examination on first day of class; students who do not pass may take MUSIC 19. GER:DB-Hum

4 units, Aut (Aquilanti, G), Win (Berger, T)

MUSIC 22. Elements of Music II—Preference to majors. Introduction to chromatic harmony focusing on secondary functions, modulations, harmonic sequences, mode mixture, and the Neapolitan, and augmented sixth chords. Analysis of musical forms and harmonizations complemented by harmonic and melodic dictation, sight singing, and other practical skills. Prerequisites: 21 or consent of instructor; demonstration of keyboard skills sufficient to pass the Piano Proficiency Exam within the first two weeks of the term is required, or concurrent enrollment in MUSIC 12. GER:DB-Hum

4 units, Win (Aquilanti, G), Spr (Berger, T)

MUSIC 23. Elements of Music III—Preference to majors. Continuation of chromatic harmony, complex forms, and introduction to early 20th-century techniques. Satisfactory passage of ear-training proficiency exam, part of the course's final, is a requirement for course completion and for continuation in the major sequence. Prerequisites: 22 or consent of instructor; demonstration of keyboard skills sufficient to pass the Piano Proficiency Exam within the first two weeks of the term is required, or concurrent enrollment in MUSIC 12. GER:DB-Hum

4 units, Aut (Jones, C), Spr (Aquilanti, G)

MUSIC 40, 41, 42. Music History—The history of Western art music from Gregorian chant to the present, stressing major styles and genres in their intellectual and institutional settings. Pre- or corequisite: 23. GER:DB-Hum

MUSIC 40. Music History to 1600

4 units, Aut (Markham, M)

MUSIC 41. Music History 1600-1830

4 units, Win (Hadlock, H)

MUSIC 42. Music History Since 1830

4 units, Spr (Kennaway, J)

MUSIC 121. Analysis of Tonal Music—Complete movements, or entire shorter works of the 18th and 19th centuries, are analyzed in a variety of theoretical approaches. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum

4 units, Win (Barth, G)

MUSIC 122A. Eighteenth-Century Counterpoint—Analysis and composition of two- and three-part inventions and three- and four-voice fugues. Use of keyboard, ear training, and sight singing. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum

4 units, Spr (Jones, C)

MUSIC 122B. Harmonic Materials of 19th Century—Analysis of 19th-century music, with compositional exercises based on 19th-century models. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum

4 units, Win (Ulman, E)

MUSIC 122C. Introduction to 20th-Century Composition—Contemporary works, with emphasis on music since 1945. Projects in free composition based on 20th-century models. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum

4 units, Aut (Ferneyhough, B)

COMPOSITION

MUSIC 123. Undergraduate Seminar in Composition—Current trends in composition. May be repeated for credit. Prerequisites: Music major; 23 or consent of instructor.

3 units, Aut (Ulman, E), Win (Applebaum, M)

MUSIC 125. Individual Undergraduate Projects in Composition—May be repeated for credit. Prerequisites: Music major and one quarter of 123.

1-3 units, Aut, Win, Spr (Staff)

MUSIC 323. Doctoral Seminar in Composition—Illustrated discussions of compositional issues and techniques. Students present their own work to the class, and individually to the instructor.

4 units, Aut (Applebaum, M), Win (Ferneyhough, B)

MUSIC 325. Individual Graduate Projects in Composition

1-5 units, Aut, Win, Spr, Sum (Staff)

HISTORY AND LITERATURE

MUSIC 140-148. Seminars in Music History—Specialized topics in music history are each offered at least once within any two-year period. Topics vary each year. May be repeated for credit. Music majors may repeat the same seminar in music history only once for credit towards the major and must turn in different papers the second time. Pre- or corequisite: 23. GER:DB-Hum, WIM

MUSIC 140/240. Studies in Medieval Music

3-4 units, alternate years, not given this year

MUSIC 141. Studies in Renaissance Music

3-4 units, alternate years, not given this year

MUSIC 142. Studies in Baroque Music

3-4 units, Spr (Hadlock, H), alternate years, not given next year

MUSIC 143. Studies in Classic Music

3-4 units, alternate years, not given this year

MUSIC 144. Studies in Romantic Music

3-4 units, alternate years, not given this year

MUSIC 145. Studies in Modern Music—May be repeated for credit.

3-4 units, Win (Ulman, E), alternate years, not given next year

MUSIC 148. Musical Shakespeare: Theater, Song, Opera, and Film—(Same as HUMNTIES 192G.) The role of music in productions, adaptations, and interpretations of Shakespeare's plays as theater, opera, and film from the Elizabethan era through the present. Emphasis is on the role of songs, stage music, and music in operatic and film adaptations. Incidental music, orchestral tone poems, and art-song settings of lyrics from the plays. Plays include *Romeo and Juliet*, *Othello*, *Macbeth*, *Hamlet*, *The Tempest*, *Midsummer Night's Dream*, and *Twelfth Night*. Pre- or corequisite: 23. GER:DB-Hum, WIM at 4- or 5-unit level only.

3-5 units, Aut (Grey, T), alternate years, not given next year

MUSIC 221A,B. History of Music Theory—Principal theories, theorists, and treatises of Western art music. Issues and controversies. Two quarter sequence. A: Ancient Through Baroque, B: Classical Through Modern.

4 units, alternate years, not given this year

MUSIC 240-248. Seminars in Music History—For graduate students; topics as in 140-145. Participation in upper-class seminars, with additional in-depth research. Specialized topics in music history are each offered at least once within any two-year period. Topics vary each year. Pre- or corequisite: 23.

MUSIC 240. Studies in Medieval Music

3-4 units, alternate years, not given this year

MUSIC 241. Studies in Renaissance Music

3-4 units, alternate years, not given this year

MUSIC 242. Studies in Baroque Music

3-4 units, Spr (Hadlock, H), alternate years, not given next year

MUSIC 243. Studies in Classic Music

3-4 units, alternate years, not given this year

MUSIC 244. Studies in Romantic Music

3-4 units, alternate years, not given this year

MUSIC 245. Studies in Modern Music

3-4 units, Win (Ulman, E), alternate years, not given next year

MUSIC 248. Musical Shakespeare: Theater, Song, Opera, and Film—(Graduate section; see 148; same as HUMNTIES 192G.)

3-5 units, Aut (Grey, T), alternate years, not given next year

MUSIC 310. Research Seminar in Musicology—For graduate students. Topics vary each quarter. May be repeated for credit.

3-5 units, Aut (Mahrt, W), Win (Taruskin, R), Spr (Grey, T)

MUSIC 310H. Modern Seminar—(Same as HUMNTIES 325.) How the Romantics saw aesthetic experience, emphasizing music, as a means of reading the self and defining the individual subject, community and nation. These complementary functions of music, drama, and myth in modern culture epitomized in Wagner's *Tristan und Isolde* and *Die Meistersinger*. Nietzsche and Mann's notion that the conflicting claims of subjective and collective identity generate tensions that threaten the survival of culture. Primary readings include: stories and criticism of E.T.A. Hoffmann; Wagner's music dramas; poetry and essays of Charles Baudelaire; Nietzsche's *Birth of Tragedy*, *Beyond Good and Evil*, and *The Case of Wagner*; Mann's *Death in Venice* and *Doctor Faustus*; and Adorno's criticism.

3-5 units, Win (Grey, T)

MUSIC 312A,B. Aesthetics and Criticism of Music—For graduate students. Primary texts focusing on the nature, purposes, and uses of music and other arts. A: Ancients and Moderns: Plato to Nietzsche, B: Contemporaries: Heidegger to Today.

4 units, A: Win, B: Spr (Berger, K)

COMPUTER MUSIC AND APPLICATIONS

MUSIC 120. Auditory Remapping of Bioinformatics—Representation of data related to bioinformatics and medical imaging. Physiological and perceptual perspectives. Representations of complexity in sound and types of auditory display applied to representation of data sets. Term project involving developing tools for sonification and/or applying these tools to a representation problem. Recommended: basic knowledge and interest in music, computer programming, or one of the biological sciences.

1-3 units, Aut (Yeo, W)

MUSIC 150. Musical Acoustics—The physics of vibrating systems, waves, and wave motion. Time- and frequency-domain analysis of sound. Room acoustics, reverberation, and spatialization. The acoustics of musical instruments: voice, strings, and winds. Emphasis is on the practical aspects of acoustics in making music. Hands-on and computer-based lab. See <http://ccrma.stanford.edu/courses/150/>. Prerequisites: music performance/composition experience, basic algebra, calculus, and physics. GER:DB-EngrAppSci

3 units, Win (Rossing, T)

MUSIC 151. Psychophysics and Cognitive Psychology for Musicians—Concepts and experiments relevant to the use of sound, especially synthesized, in music. Listening to sound examples. Emphasis is on salience and the importance of various auditory phenomena in music. See <http://ccrma.stanford.edu/>. Prerequisite: basic knowledge of music. GER:DB-Hum, WIM

4 units, Spr (Berger, J)

MUSIC 154. Composition and Performance of Instrumental Music with Electronics—Aesthetic and analytical issues of mixed instrumental and electronic works. Focus is on one or a few works leading to a public performance at the end of the quarter. Prerequisite: experience in analysis of contemporary music and in electronic music.

1-3 units, Spr (Risset, J)

MUSIC 192. Theory and Practice of Audio Recording

MUSIC 192A. Foundations of Sound-Recording Technology—For upper division undergraduates and graduate students; preference given to Music majors with MST specialization. Topics: elementary electronics; the physics of sound transduction and microphone operation, selection, and placement; mixing consoles; connectors and device interconnection; grounding and shielding; principles of analog magnetic recording; operation maintenance of recording equipment; and principles of recording engineering. Enrollment limited. Prerequisites: 151; algebra, physics basics, and consent of instructor. GER: DB-EngrAppSci

3 units, Aut (Kadis, J)

MUSIC 192B. Advanced Sound Recording Technology—Topics: noise reduction techniques; dynamics and time-delay audio effects; the principles of digital audio; disk- and tape-based digital recorders; digital audio workstations and editing; advanced multitrack techniques; SMPTE and MIDI time code and device synchronization; MIDI sequencing and synchronization. See <http://ccrma.stanford.edu/>. Prerequisite: 192A. GER:DB-EngrAppSci

3 units, Win (Kadis, J)

MUSIC 192C. Session Recording—Independent engineering of recording sessions. May be repeated for credit. Prerequisites: 192A,B.

1-2 units, Aut, Win, Spr (Kadis, J)

MUSIC 220A. Fundamentals of Computer-Generated Sound—Techniques for digital sound synthesis, effects, and reverberation. Topics: summary of digital synthesis techniques (additive, subtractive, nonlinear, wavetable, spectral-modeling, and physical-modeling); digital effects algorithms (phasing, flanging, chorus, pitch-shifting, and vocoding); and techniques for digital reverberation. Majors (undergraduate or graduate) must take for 4 units. See <http://ccrma.stanford.edu/>.

2-4 units, Aut (Chafe, C)

MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing—The use of high-level programming language as a compositional aid in creating musical structures. Advanced sound synthesis techniques. Simulation of a reverberant space and control of the position of sound within the space. See <http://ccrma.stanford.edu/>. Prerequisite: 220A.

2-4 units, Win (Lopez-Lezcano, F)

MUSIC 220C. Research Seminar in Computer-Generated Music—Individual projects in composition, psychoacoustics, or signal processing. See <http://ccrma.stanford.edu/>. Prerequisite: 220B.

2-4 units, Spr (Chafe, C)

MUSIC 220D. Research in Computer-Generated Music—Independent research projects in composition, psychoacoustics, or signal processing. May be repeated for credit. See <http://ccrma.stanford.edu/>. Prerequisite: 220C.

1-10 units, Aut, Win, Spr, Sum (Staff)

MUSIC 250A. HCI Theory and Practice—HCI issues as they relate to music applications in composition and performance. Project-oriented, examining issues from the technical and theoretical perspectives of computer science, haptics, and music theory. See <http://ccrma.stanford.edu/>.

3-4 units, Aut, Win (Verplank, W)

MUSIC 253. Musical Information: An Introduction—The kinds of musical information used in sound, graphical, and analytical applications. Emphasis is on independent concepts and principles in music representation and research objectives (repertory analysis, performance analysis, theoretical models, similarity, and stylistic simulation). Examples from Western art music. Prerequisites: one year of music theory or equivalent; methods courses in fields such as musical analysis, symbolic systems, information processing, sound engineering, or intellectual property issues.

1-4 units, Win (Selfridge-Field, E)

MUSIC 254. Applications of Musical Information: Query, Analysis, and Style Simulation—Participants explore the issues introduced in 253 in greater depth and take initiative for research projects related to a theoretical or methodological issue, a software project, or a significant analytical result. Prerequisite: 253 or consent of instructor.

1-4 units, Spr (Selfridge-Field, E)

MUSIC 318. Advanced Acoustics—Current topics. May be repeated for credit.

1-5 units, Win (Rossing, T)

MUSIC 319. Research Seminar on Computational Models of Sound Perception—All aspects of auditory perception, often with emphasis on computational models. Topics: music perception, signal processing, auditory models, pitch perception, speech, binaural hearing, auditory scene analysis, basic psychoacoustics, and neurophysiology. See <http://ccrma.stanford.edu/courses/>.

1-3 units, Aut, Win, Spr (Slaney, M)

MUSIC 320. Introduction to Digital Audio Signal Processing—Digital signal processing for music and audio research. Topics: complex numbers, sinusoids, spectrum representation, sampling and aliasing, digital filters, frequency response, z transforms, transfer-function analysis, and associated Matlab software. See <http://ccrma.stanford.edu/courses/320/>.

3-4 units, Aut (Smith, J)

MUSIC 420. Signal Processing Methods in Musical Acoustics—Computational methods in musical sound synthesis and digital audio effects based on acoustic physical models. Topics: acoustic simulation with delay lines, digital filters, and nonlinear elements; comb filters; allpass filters; artificial reverberation; delay-line interpolation and sampling-rate conversion; phasing, flanging, and chorus effects; efficient computational models of strings, woodwinds, brasses, and other musical instruments. See <http://ccrma.stanford.edu/courses/420/>. Prerequisites: 320 or equivalent; PHYSICS 21 or equivalent course applying Newton's laws of motion; and CS 106B or equivalent programming in C and C++.

3-4 units, Win (Smith, J)

MUSIC 421. Audio Applications of the Fast Fourier Transform (FFT)—Spectrum analysis and signal processing using the FFT with emphasis on audio applications. Topics: Fourier theorems; FFT windows; spectrum analysis; spectrograms; sinusoidal modeling; spectral modeling synthesis; FFT convolution; FIR filter design and system identification; overlap-add and filter-bank-summation methods for short-time Fourier analysis, modification, and resynthesis. See <http://ccrma.stanford.edu/courses/421/>. Prerequisites: 420 or consent of instructor.

3-4 units, Spr (Smith, J)

MUSIC 422. Perceptual Audio Coding—History and basic principles: development of psychoacoustics-based data-compression techniques; perceptual-audio-coder applications (radio, television, film, multimedia/internet audio, DVD, EMD). In-class demonstrations: state-of-the-art audio coder implementations (such as AC-3, MPEG) at varying data rates; programming simple coders. Topics: audio signals representation; quantization; time to frequency mapping; introduction to psychoacoustics; bit allocation and basic building blocks of an audio codec; perceptual audio codecs evaluation; overview of MPEG-1, 2, 4 audio coding and other coding standards (such as AC-3). Prerequisites: knowledge of digital audio principles, familiarity with C programming. Recommended: 320, EE 261. See <http://ccrma.stanford.edu/>.

3 units, Win (Bosi-Goldberg, M)

MUSIC 423. Signal Processing Research—Graduate research seminar. Problems in music and/or audio signal processing. Presentation of research-in-progress by graduate students, visiting scholars, and CCRMA faculty. See <http://ccrma.stanford.edu/courses/423/>.

1-4 units, Aut, Win, Spr (Smith, J)

MUSIC 424. Signal Processing Techniques for Digital Audio Effects—Techniques for dynamic range compression, reverberation, equalization and filtering, panning and spatialization, digital emulation of analog processors, and implementation of time-varying effects. Single-band and multiband compressors, limiters, noise gates, de-essers, convolutional reverberators, parametric and linear-phase equalizers, wah-wah and envelope-following filters, and the Leslie. Students develop effects algorithms of their own design in labs. Prerequisites: digital signal processing, sampling theorem, digital filtering, and the Fourier transform at the level of 320 or EE 261; Matlab and modest C programming experience. Recommended: 420 or EE 264; audio effects in mixing and mastering at the level of 192.

3-4 units, Spr (Berners, D; Abel, J)

PERFORMANCE

GROUP INSTRUCTION

Note—Special fee of \$100 per quarter for 12A, B, C (non-majors); 65A, B; 72, 73, 74, 75, 76, 77.

MUSIC 12A,B,C. Introductory Piano Class—(A = level 1; B = level 2; C = level 3)

1 unit, Aut, Win, Spr, Sum (Zerlang, T)

MUSIC 65A,B. Voice Class I, II—Group (7 students to a section) beginning voice for the non-major (A = level 1; B = level 2).

1 unit, Aut, Win, Spr (Giovannetti, C), Sum (Linduska, M)

MUSIC 65C. Voice Class (Majors and Ensemble Members)—For Music majors and non-majors who are members of departmental choral ensembles.

1 unit, Aut, Win, Spr (Wait, G)

MUSIC 72-77. Small-Group, Intermediate-Level Instruction—Minimum enrollment required. May be repeated for credit.

MUSIC 72A. Intermediate Piano Class—For intermediate students. Prerequisites: 12C or equivalent, audition.

1 unit, Aut, Win, Spr, Sum (Zerlang, T)

MUSIC 72B. Organ Class—For beginning organ students who have keyboard skills.

1 unit, Aut, Win, Spr (Morgan, R)

MUSIC 72C. Harpsichord Class—For beginning harpsichord students who have keyboard skills.

1 unit, Aut, Win, Spr (Thornburgh, E)

MUSIC 72D. Jazz Piano Class—By invitation only; priority to majors and jazz-ensemble participants.

1 unit, Aut, Win, Spr (Low, M)

MUSIC 73. Intermediate Voice Class—For intermediate students. Admission by audition.

1 unit, Aut, Win, Spr (Giovannetti, C)

MUSIC 74C. Classical Guitar Class

1 unit, Aut, Win, Spr (Ferguson, C)

MUSIC 74D. Harp Class

1 unit, Aut, Win, Spr (Chauvel, M)

MUSIC 75B. Renaissance Wind Instruments Class

1 unit, Aut, Win, Spr (Myers, H)

MUSIC 76. Brass Instruments Class

1 unit, Aut, Win, Spr (Kenley, M)

MUSIC 77. Percussion Class

1 unit, Aut, Win, Spr (Veregge, M)

INDIVIDUAL INSTRUCTION

MUSIC 172/272-177/277. Individual Vocal and Instrumental Instruction—270-level courses are for advanced students. Weekly lessons throughout the academic quarter. Special fee of \$200 per quarter for majors and \$400 for non-majors (fees remain the same for 1, 2, or 3 units). Prospective students must demonstrate, by audition with the appropriate teacher, a minimum proficiency on instrument. Minimum proficiency requirements for each instrument are posted on the bulletin board outside Braun 102 and at <http://music.stanford.edu/Academics/Auditions.html>. May be repeated for credit.

MUSIC 172/272. Keyboard Instruments

MUSIC 172A/272A. Piano—Private lessons and group master class weekly.

1-3 units, Aut, Win, Spr (Barth, G; Dahl, L; Schultz, T; Weldy, F; Arul, K)

MUSIC 172B/272B. Organ

1-3 units, Aut, Win, Spr (Morgan, R)

MUSIC 172C/272C. Harpsichord

1-3 units, Aut, Win, Spr (Thornburgh, E)

MUSIC 172D/272D. Jazz Piano—By invitation only; priority to majors and jazz-ensemble participants.

1-3 units, Aut, Win, Spr (Low, M)

MUSIC 172E/272E. Fortepiano*1-3 units, Aut, Win, Spr (Barth, G)***MUSIC 172F/272F. Carillon***1-3 units, Aut, Win, Spr (Zerlang, T)***MUSIC 173/273. Voice***1-3 units, Aut, Win, Spr (Giovannetti, C; Wait, G; Schneider, A)***MUSIC 174/274. Stringed Instruments****MUSIC 174A/274A. Violin***1-3 units, Aut, Win, Spr (Kleyman, G; Harms, D; Nuttall, G; St. John, S; Fong, D; Sohn, L)***MUSIC 174B/274B. Viola***1-3 units, Aut, Win, Spr (Kleyman, G; Robertson, L; Harms, D)***MUSIC 174C/274C. Violoncello***1-3 units, Aut, Win, Spr (Harrison, S; Costanza, C)***MUSIC 174D/274D. Contrabass***1-3 units, Aut, Win, Spr (Moyer, B)***MUSIC 174E/274E. Viola Da Gamba***1-3 units, Aut, Win, Spr (Dornenburg, J)***MUSIC 174F/274F. Classical Guitar***1-3 units, Aut, Win, Spr (Ferguson, C)***MUSIC 174G/274G. Harp***1-3 units, Aut, Win, Spr (Chauvel, M)***MUSIC 174H/274H. Baroque Violin***1-3 units, Aut, Win, Spr (Martin, A)***MUSIC 174I/274I. Early Plucked Strings***1-3 units, Aut, Win, Spr (Staff)***MUSIC 175/275. Woodwind Instruments****MUSIC 175A/275A. Flute***1-3 units, Aut, Win, Spr (Blaisdell, F; Hawley, A; Holmes-Schaeffle, M; Maestre, J)***MUSIC 175B/275B. Oboe***1-3 units, Aut (Hubbard, R), Win, Spr (Matheson, J)***MUSIC 175C/275C. Clarinet***1-3 units, Aut, Win, Spr (Brandenburg, M; Bell, C)***MUSIC 175D/275D. Bassoon***1-3 units, Aut, Win, Spr (Olivier, R)***MUSIC 175E/275E. Recorder/Renaissance Wind Instruments***1-3 units, Aut, Win, Spr (Myers, H)***MUSIC 175F/275F. Saxophone***1-3 units, Aut, Win, Spr (Stein, H)***MUSIC 175G/275G. Baroque Flute***1-3 units, Aut, Win, Spr (Staff)***MUSIC 176/276. Brass Instruments****MUSIC 176A/276A. French Horn***1-3 units, Aut, Win, Spr (Ragent, L)***MUSIC 176B/276B. Trumpet***1-3 units, Aut, Win, Spr (Johnson-Hamilton, J)***MUSIC 176C/276C. Trombone***1-3 units, Aut, Win, Spr (Kenley, M)***MUSIC 176D/276D. Tuba***1-3 units, Aut, Win, Spr (Clements, A)***MUSIC 177/277. Percussion***1-3 units, Aut, Win, Spr (Veregge, M)***PERFORMANCE PRACTICES**

MUSIC 126. Introduction to Thoroughbass—The development of continuo techniques and skills for figured-bass realization. Performance and analysis of selected repertoire, using thoroughbass principles and exercises based on historical theoretical treatises. Prerequisite: 21.

*1-3 units, Win (Berger, T)***MUSIC 130. Elementary Conducting**

MUSIC 130A. Introduction to Conducting—Baton techniques and rehearsal procedures. The development of coordination of the members

of the body involved in conducting; fluency in beat patterns and meters; dynamics, tempi, cueing, and use of the left hand in conducting. Prerequisites: 121 and diagnostic musicianship exam given first day of class; preference to students who have completed 122B.

3 units, Aut (Aquilanti, G)

MUSIC 130B. Elementary Orchestral Conducting—Prerequisites: 127 or previous orchestral performance experience, 130A.

3 units, Spr (Cai, J)

MUSIC 130C. Elementary Choral Conducting—Techniques specific to the conducting of choral ensembles: warm-ups, breathing, balance, blend, choral tone, isolation principles, recitative conducting, preparation, and conducting of choral/orchestral works. Prerequisite: 130A.

3 units, Win (Wait, G)

MUSIC 131. Intermediate Orchestral Conducting—Prerequisite: 130 A, B, or C, or orchestral conducting experience.

3 units, alternate years, not given this year

MUSIC 169A/269A. Seminar in Performance Practices—Performance techniques, theoretical principles, aesthetics, and musical resources of various historical periods. Graduate students must register for 4 units.

1-4 units, Win (Myers, H; Berger, T)

MUSIC 181. Solo Vocal Repertoire—Solo vocal repertoire for advanced vocal students. Song and operatic literature is studied and performed by class participants. Repertoire varies and/or spans more than one quarter, allowing students to repeat the course for credit.

1 unit, Aut, Win, Spr (Schneider, A)

MUSIC 182. Diction for Singers—The international phonetic alphabet and its application to German, French, and Italian vocal literature. Open also to pianists interested in vocal coaching and choral conducting.

1 unit, Win (Dahl, L)

MUSIC 183. Art Song Interpretation—For advanced singers and pianists as partners. Performance class in a workshop setting. Prerequisite: consent of instructor. Recommended: 170 for pianists or 182 for singers.

MUSIC 183A. German Art Song Interpretation—Including composers from Beethoven and Schubert to Wolf and Strauss.

1 unit, Spr (Dahl, L), alternate years, not given next year

MUSIC 183B. French Art Song Interpretation—Composers include Fauré, Debussy, Ravel, and Poulenc.

1 unit, alternate years, not given this year

MUSIC 230. Advanced Orchestral Conducting—May be repeated for credit. Prerequisite: 130B.

2-4 units, Aut, Win, Spr (Cai, J)

MUSIC 231. Advanced Choral Conducting—May be repeated for credit. Prerequisite: 130C.

*2-4 units, Aut, Win, Spr (Sano, S)***ENSEMBLE**

An audition is required for admission to any University musical ensemble; audition schedules are posted during the registration period in Autumn Quarter. Audition is by appointment in Winter and Spring quarters: contact the ensemble director. Membership is open to all students including those who do not register for credit, although these courses may be repeated for credit. Many Department of Music ensembles tour on a regular basis, usually after Commencement in June.

MUSIC 156. "sic": Improvisation Collective—Small ensemble devoted to learning trans-idiomatic improvisation techniques and composing indeterminate pieces in a workshop setting. One major concert. Prerequisite: access to an instrument. Improvisational experience and conventional instrumental virtuosity not required.

1 unit, Win (Applebaum, M)

MUSIC 157. Introduction to Mariachi Ensemble—Introduction to the practice of mariachi music, tradition, and history. Focus is on learning traditional sones, rancheras, huapangos, and boleros. Requirements:

ability to play and access to instruments (violin, trumpet, guitar, vihuela, and guitarron). (AU)

1 unit, Aut, Win, Spr (Staff)

MUSIC 159. Early Music Singers—Small choir specializing in Medieval, Renaissance, and early Baroque vocal music. One major concert per quarter.

1 unit, Aut, Win, Spr (Mahrt, W)

MUSIC 160. University Orchestra—70- to 100-member ensemble performing major orchestral works; minimum one concert per quarter.

1 unit, Aut, Win, Spr (Cai, J)

MUSIC 161. University Bands

MUSIC 161A. Stanford Wind Ensemble—40- to 50-member ensemble performing transcriptions of symphonic music, brass band music, and repertoire composed specifically for symphonic band. One concert per quarter.

1 unit, Aut, Win, Spr (Aquilanti, G)

MUSIC 161B. Jazz Orchestra—Big band format. Repertoire drawn primarily from the contemporary jazz-ensemble literature. One formal concert per quarter.

1 unit, Aut, Win, Spr (Berry, F)

MUSIC 161C. Red Vest Band—A small ensemble of the Leland Stanford Junior University Marching Band open to members of the LSJUMB by audition and consent of instructor. Members perform at all men's and women's home basketball games and travel to some away and post-season games. Twice-weekly rehearsals focus on introduction of new student arrangements and the LSJUMB's repertoire of rock, funk, and traditional styles.

1 unit, Win (Aquilanti, G)

MUSIC 162. Symphonic Chorus—100- to 150-voice ensemble, performing major choral masterworks with orchestra. One concert per quarter.

1 unit, Aut, Win, Spr (Sano, S)

MUSIC 163. Memorial Church Choir—Official choir of Memorial Church, furnishing music for Sunday services and special occasions in the church calendar.

2 units, Aut, Win, Spr (Wait, G)

MUSIC 165. Chamber Chorale—Select 24-voice chamber ensemble, specializing in virtuoso choral repertoire from all periods of Western art music.

1 unit, Aut, Win, Spr (Sano, S)

MUSIC 167. University Singers—Mixed-repertoire chorus, performing choral repertoire from all periods of Western art music and other world cultures.

1 unit, Aut, Win, Spr (Morgan, R)

MUSIC 169. Stanford Taiko—Select North American taiko ensemble, performing traditional and contemporary repertoire for Japanese drums. Multiple performances in Winter and Spring quarters, also touring; instrument construction and maintenance. Admission by audition in Autumn Quarter only.

1 unit, Aut, Win, Spr (Sano, S; Uyechi, L)

MUSIC 170. Collaborative Piano—Performance class in a workshop setting. Techniques of collaboration with vocalists and instrumentalists in repertoire ranging from songs and arias to sonatas and concertos. Prerequisite: private-lesson proficiency level in piano, or consent of instructor.

1 unit, Aut (Dahl, L)

MUSIC 171. Chamber Music—Small combinations for strings, winds, and keyboard instruments. Open to students at the private-lesson-proficiency level to hone ensemble skills, preferably while taking private lessons. Selected string instrument participants are invited to participate in a chamber orchestra, led by members of the St. Lawrence String Quartet, without conductor. Winter Quarter: chamber orchestra in conjunction with chamber chorale performing choral sacred music of the Baroque period, led by members of the St. Lawrence. All new and returning students are required to audition.

1 unit, Aut, Win, Spr (Staff)

UNDERGRADUATE DIRECTED READING AND RESEARCH

MUSIC 197. Undergraduate Teaching Apprenticeship—Work in an apprentice-like relationship with faculty teaching a student-initiated course. Prerequisite: consent of instructor.

1-2 units, Aut, Win, Spr (Staff)

MUSIC 198. Concentrations Project—For concentration program participants only. Must be taken in senior year.

4 units, Aut, Win, Spr (Staff)

MUSIC 199. Independent Study—For advanced undergraduates and graduate students who wish to do work outside the regular curriculum. Before registering, student must present specific project and enlist a faculty sponsor.

1-5 units, Aut, Win, Spr, Sum (Staff)

GRADUATE RESEARCH AND SPECIAL STUDIES

MUSIC 200. Graduate Proseminar—Required of first-year graduate students in music. Introduction to research in music, bibliographical materials, major issues in the field, philosophy, and methods in music history. Guest lecturers and individual research topics.

4 units, Aut (Berger, K; McBride, J)

MUSIC 269B. Research in Performance Practices—Directed reading and research.

1-5 units, Aut, Win, Spr, Sum (Staff)

MUSIC 280. TA Training Course—Required for doctoral students serving as teaching assistants. Orientation to resources at Stanford, guest presentations on the principles of common teaching activities, supervised teaching experience. Students who entered in the Autumn should take 280 in the Spring prior to the Autumn they begin teaching.

1 unit, Spr (Lee, H; Losness, E)

MUSIC 300. Seminar in Notation—Western notation of the Middle Ages and Renaissance: principles, purposes, and transcription.

MUSIC 300A. Medieval Notation

4 units, alternate years, not given this year

MUSIC 300B. Renaissance Notation

4 units, Aut (Mahrt, W)

MUSIC 301. Analysis of Music—Current trends, issues, and methods.

MUSIC 301A. Analysis of Music: Modal

4 units, Win (Mahrt, W)

MUSIC 301B. Analysis of Music: Tonal

4 units, Aut (Berger, J)

MUSIC 301C. Analysis of Music: Post-Tonal—Current analytical trends, issues, and methods.

4 units, Spr (Ferneyhough, B)

MUSIC 302. Research in Musicology—Directed reading and research.

1-5 units, Aut, Win, Spr, Sum (Staff)

MUSIC 321. Readings in Music Theory—Directed reading and research.

1-5 units, Aut, Win, Spr, Sum (Staff)

MUSIC 322. Directed Readings in German Language—Students create reading lists relevant to their studies in Music in conjunction with instructor. May be repeated for credit.

1 unit, Win (Kennaway, J)

MUSIC 341. Ph.D Dissertation—May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

MUSIC 399. D.M.A. Final Project—May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

HUMNTIES 321. Classical Seminar—(Same as CLASSGEN 321.)
3-5 units, *Aut (Nightingale, A)*

HUMNTIES 322. Medieval Seminar—(Same as MEDVLST 322, RELIGST 338.)
3-5 units, *Win (Gelber, H)*

HUMNTIES 323. Renaissance/Early Modern Seminar
3-5 units, *Spr (Brooks, H)*

HUMNTIES 324. Enlightenment Seminar—(Same as HISTORY 334.)
3-5 units, *Aut (Riskin, J)*

RELIGST 159/359. Music and Religion in South Asia
4-5 units, *not given this year*

OVERSEAS STUDIES PROGRAM

Program Director: Norman Naimark

Stanford Program in Australia

Director, Centre for Marine Studies, University of Queensland: Ove Hoegh-Guldberg

Faculty: Kevin Arrigo, Kenneth Anthony, Tony Chiffings, Martin Crotty, Norman Duke, Maoz Fine, Ron Johnstone, Michael Pole, Roger Shore, Selina Ward

Stanford Program in Beijing

Director: Jason D. Patent

Faculty: Li Chen, Haiyan Li, M. Colette Plum, Dingcheng Ren, Karen Seto, Andrew Walder, Jingjing Xue, Qi Zhang, Dongmei Zhao, Tianbiao Zhu

Stanford Program in Berlin

Director: Karen Kramer

Faculty: Maria Biege, Ulrich Brückner, Ehren Fordyce, Dubravka Friesel-Kopecki, David Hannah, Wolf-D. Junghanns, Juliane Keller, Ingo Klein, Christa Maerker, Franz Neckenig, Eric Roberts, Sylke Tempel, Jochen Wohlfeil

Stanford Program in Florence

Director: Ermelinda Campani

Faculty: Khaled Fouad Allam, Scott Delp, Paola Gaeta, Maria Gough, Charles Loverme, Giuseppe Mammarella, Leonardo Morlino, Lapo Pistelli, Stephen Quake, Fiorenza Quercioli, Filippo Rossi, Francesco Sberlati, Emanuela Scarpellini, Timothy Verdon, Luisa Vierucci, Sylvia Yanagisako, Pan Yotopoulos

Stanford Center for Technology and Innovation (SCTI)—Kyoto

Director: Terry MacDougall

Faculty: Toshiko Fujiwara, Toshihiko Hayashi, Bettina Langner-Teramoto, Leonard Ortolano, Mariko Uemiya, Orie Yamada, Chihiro Yamaoka

Stanford Program in Moscow

Program Director: Alexander Abashkin

Faculty: Tatyana Boldyreva, Galina Filatova, Vladimir Kozlov, Liza Kurganova, Vladimir Mau, Sergei Medvedev, Andrei Melville, Nancy Tuma

Stanford Program in Oxford

Director: Geoffrey Tyack

Faculty: Katrin Auel, Ronald Barrett, Paddy Bullard, Helena Chance, John Darwin, James Forder, Beatrice Groves, Helen Kidd, Jan Krawitz, Robert McMahon, Amanda Palmer, Emma Plaskitt, Christopher Rovee, Trevor Rowley, John Senior, Bart van Es

Stanford Program in Paris

Director: Estelle Halevi

Faculty: James Daughton, Colette Deremble, Jean Paul Deremble, Papa Diop, Jean-Marie Fessler, Patrick Guedon, Sylvaine Guyot, Herant Katchadourian, Jacques Le Cacheux, Fabienne Maître, Sophie Maurer, Nonna Mayer, Florence Mercier, Elizabeth Molkou, Anne Muxel, Dominique Remy-Granger, Pauline Reychman, Marie-Christine Ricci, Sylvie Strudel, Paul Switzer, Fabrice Virgili

Stanford Program in Santiago

Director: Iván Jaksic

Faculty: Mabel Abad, César Albornoz, Andrés Bobbert, Susan Cashion, Germán Correa, Armando DiFilippo, James Fox, Luis Fraga, Claudio Fuentes, Edmundo Fuenzalida, Rosanna Ginocchio, Sergio Micco, Oscar Muñoz, Veronica Poblete, Hernan Pons, Bernardo Subercaseaux, Teresa Valdés

Program Offices: First Floor, Sweet Hall, 590 Escondido Mall

Mail Code: 94305-3089

Phone: (650) 723-3558

Email: study@osp.stanford.edu

Web Site: <http://osp.stanford.edu>

Courses given in the Overseas Studies Program have subject codes beginning with OSP. For a complete list of subject codes, see Appendix.

The Bing Overseas Studies Program (BOSP) provides opportunities for Stanford students to broaden their undergraduate education through study in another country and immersion in its culture. Regular programs in Australia, Beijing, Berlin, Florence, Kyoto, Moscow, Oxford, Paris, and Santiago offer courses in engineering, humanities, sciences, and social sciences with full Stanford credit. Many courses also count toward major requirements and/or fulfill General Education Requirements. Students may enroll for one or more quarters at most locations. Academic or paid internships are available at the Berlin, Florence, Kyoto-SCTI, Moscow, Paris, and Santiago programs. Research opportunities are available in various formats at different centers. Minimum academic and language prerequisites are specific to each program. See <http://osp.stanford.edu> for information on these requirements.

While studying overseas through BOSP, students remain registered at Stanford and pay regular tuition, along with the overseas fee which is based on Stanford room and board rates. Regular financial aid applies, and may be increased to cover additional costs. At most centers, students live in a homestay or with local students.

Overseas Studies also offers a limited number of special programs including, in 2006-07, seven three-week faculty-led seminars at overseas locations.

Overseas Studies, located on the first floor of Sweet Hall, has full-time staff members and student advisers to assist in planning for overseas study. The following information, while accurate at the time of printing, is subject to change. See <http://osp.stanford.edu/> for updated information.

COURSES

(AU) indicates that the course is subject to the University Activity Unit limitations (8 units maximum).

International Relations has approved a number of Overseas Studies courses for major credit; these are listed in the "International Relations" section of this bulletin.

AUSTRALIA

OSPAUSTL 10. Coral Reef Ecosystems—(Same as BIOSCI 109Z, CEE 168X, EARTHYSYS 120X, HUMBIO 111X.) Key organisms and processes, and the complexity of coral reef ecosystems. Students explore the Great Barrier Reef from the southern end which demonstrates the physical factors that limit coral reefs, to the northern reef systems which demonstrate key aspects of these high biodiversity ecosystems. Human-related changes. Emphasis is on research experiences and development of analytical skills. Two units only counted for Biological Sciences major. GER:DB-EngrAppSci

3 units, *Aut (Ward, S; Fine, M; Anthony, K)*

OSPAUSTL 20. Coastal Resource Management—(Same as BIOSCI 110Z, CEE 168Y, EARTHSYS 121X, HUMBIO 112X.) Problem solving, research, communication, teamwork, and social assessment skills in sustainable coastal zone management. Issues include: ecosystem functions and values at risk under the proposed development in case study; environmental outcomes most desirable for the local stakeholders and how those are defined; features of the human communities and their function as they relate to the management options; tools or mechanisms for a sustainable management outcome. Taught by multidisciplinary team that includes Australian and developing country experts. Two units only counted for Biological Sciences major. GER:DB-EngrAppSci

3 units, Aut (Johnstone, R; Chiffings, T)

OSPAUSTL 30. Coastal Forest Ecosystems—(Same as BIOSCI 111Z, CEE 168Z, EARTHSYS 122X, HUMBIO 113X.) Prehistory of Australian rainforest and how rainforest structure and biodiversity change with altitude, latitude, and geology. Tropical coastal marine wetlands, mangrove forests, and the relationship between land- and sea-based biota. Biology and ecology of marine plants, mangroves, and tropical salt marsh. Introduction to specialized fields of marine plant biology and ecology including biogeography and evolution, aquatic plant ecophysiology, water quality and bioindicator techniques, pollution and eutrophication, and environmental control of marine plant distribution and productivity. Two units only counted for Biological Sciences major. GER:DB-EngrAppSci

3 units, Aut (Pole, M; Duke, N)

OSPAUSTL 40. Australian Studies— Introduction to Australian society, history, culture, politics, and identity. Social and cultural framework and working understanding of Australia in relationship to the focus on coastal environment in other program courses. Field trips.

3 units, Aut (Crotty, M)

OSPAUSTL 50. Targeted Research Project—Prior to arriving in Australia, students establish a link with University of Queensland faculty to develop project ideas that combine personal interests and career goals with opportunities presented by the Australian Coastal Studies program, such as how mangrove roots find sediment rich zones of the shore, or the dynamics of ecotourism in southern and northern coastal Queensland. Project report and presentation in Australia.

4 units, Aut (Pole, M)

BEIJING

OSPBEIJ 11. Chinese Society in the Post-Mao Era—(Same as SOC 118S.) The rapid changes that have transformed urban and rural China since the early 80s. Topics: agricultural reform, migration and unemployment, poverty and wealth, inequality, the new middle class and business elite, and social conflict. Research paper on one of these topics. GER:EC-GlobalCom

5 units, Aut (Walder, A)

OSPBEIJ 14. Comparing the Chinese and American Legal Systems—(Same as POLISCI 246P.) China's legal system and ongoing legal reforms with comparison to corresponding systems in the U.S. The framework of Chinese society, traditional legal culture, and changing social processes. GER:DB-SocSci, GER:EC-GlobalCom

5 units, Aut, Spr (Zhang, Q)

OSPBEIJ 21. History of Science and Technology in China—(Same as HPS 105V, STS 127V.) Characteristics and development of science in China in contrast to science that originated from Greek tradition. History of mathematics, astronomy, alchemy, and medicine in traditional China; social background of Chinese achievements in science and their impact on Chinese society and the World; intercourse between China and the West in science. GER:DB-EngrAppSci, EC-GlobalCom

4 units, Aut (Ren, D)

OSPBEIJ 22. Language, Culture, and Meaning: Understanding Human Cognition in a Crosscultural Context—(Same as LINGUIST 165.) Introduction to cognitive linguistics including conceptual metaphor, metonymy, image schemas, frame semantics, and mental spaces. Theorists and empirical investigations. Using Beijing as an example, how cognition and culture interact, how all human beings are cultural, and how culture and language influence behaviors and expectations. GER:DB-SocSci, EC-GlobalCom

4 units, Aut (Patent, J)

OSPBEIJ 23. China's Red Guard Movement, 1966-68—(Same as SOC 115S.) Historical description of the origins and course of the student Red Guard movement during China's Cultural Revolution. Broader issues about this period of Chinese history and features of Chinese society that made these events possible. Readings from social scientists; documentary and feature films. Simulation project with students adopting roles of university students in 1966. GER:EC-GlobalCom

5 units, Aut (Walder, A)

OSPBEIJ 25. Language, Culture and Thought—(Same as LINGUIST 167.) Principles of cognitive linguistics, including conceptual metaphor, metonymy, image schemas, frame semantics, and mental spaces. How cognition and culture interact through observation of everyday Beijing life; how culture influences behaviors and expectations. GER:DB-SocSci

4 units, Spr (Patent, J)

OSPBEIJ 34. Urbanization and Land-Use Change in China—(Same as EARTHSYS 139X, GES 136, URBANST 158V.) Globalization, decentralization, rural to urban migration, economic restructuring, and implications for continued economic development, social and political character, and environmental health and sustainability. Field trips to newly developed communities of Beijing; discussions with urban planners, mayors, factory managers, and developers.

4 units, Spr (Seto, K)

OSPBEIJ 35. China's Environment and Prospects for Sustainability—(Same as EARTHSYS 137X, GES 135, URBANST 159V.) Environmental regulatory efforts and the relationship between the natural environment and economic development. Topics: air and water pollution, land use, energy, and greenhouse gases. Focus is on the concept of sustainability: sustainable resource use, sustainable development, and cultural sustainability. Field trips to power plants and factories; discussions with government officials.

4 units, Spr (Seto, K)

OSPBEIJ 44. Discovering Modern Chinese History in Beijing—(Same as HISTORY 194V.) From 1840 to the present. Focus is on Beijing as China's political, economic, and cultural center. Latter part of the Qing dynasty as the root of China's backwardness and Chinese elites' initial efforts at self-strengthening; struggles of Chinese politicians and intellectuals to find a path to modernism; China's peaceful rise during the reform eras. Field trips to historical sites in Beijing. GER:DB-SocSci, EC-GlobalCom

4 units, Spr (Zhao, D)

OSPBEIJ 45. Wartime China: Chinese Nationalism and the Anti-Japanese War—(Same as HISTORY 198V.) The effect of wartime suffering and social trauma on the development of modern Chinese nationalism. Visions of the Chinese people contending with one another in the face of Japanese imperialism. Politicians, military leaders, and intellectuals who chose between the Communist and the Nationalist visions, and those who collaborated with the Japanese. GER:DB-SocSci

5 units, Spr (Plum, M)

OSPBEIJ 50. Chinese Economy—(Same as POLISCI 144P.) The structure of the Chinese economy and how it has changed over time. History prior to 1979. China's economic reform and development since 1979. Effect of the party on the structure of the economy. The relationship between private and public sectors since 1979. Political and economic reasons behind the transformation. GER:EC-GlobalCom

5 units, Aut (Zhu, T)

CHINESE LANGUAGE PROGRAM

OSPBEIJ 2. Second-Year Modern Chinese—(Same as CHINLANG 21C.)
5 units, Aut (Li, H)

OSPBEIJ 3. Second-Year Modern Chinese—(Same as CHINLANG 23C.)
5 units, Spr (Staff)

OSPBEIJ 4. Third-Year Modern Chinese—(Same as CHINLANG 101C.)
5 units, Aut (Chen, L)

OSPBEIJ 5. Third-Year Modern Chinese—(Same as CHINLANG 103C.)
5 units, Spr (Staff)

OSPBEIJ 6. Advanced Modern Chinese—(Same as CHINLANG 211C.)
5 units, Aut (Xue, J)

OSPBEIJ 8. First-Year Modern Chinese—(Same as CHINLANG 3C.)
5 units, Spr (Staff)

OSPBEIJ 9. Chinese Language Tutorial—(Staff)
2 units, Spr (Staff)

BERLIN

OSPBER 15. Shifting Alliances? The European Union and the U.S.—
(Same as POLISCI 245P.) The development of European integration, a model for global security and peace, and a possible replacement for the U.S. position as unilateral superpower. Competing arguments about the state of transatlantic relations. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Brueckner, U)

OSPBER 17. Split Images: A Century of Cinema—(Same as ARTHIST 163Y.) 20th-century German culture through film. The silent era, Weimar, and the instrumentalization of film in the Third Reich. The postwar era: ideological and aesthetic codes of DEFA, new German cinema, and post-Wende filmmaking including *Run Lola Run* and *Goodbye Lenin*. Aesthetic aspects of the films including image composition, camera and editing techniques, and relation between sound and image. GER:DB-Hum, EC-GlobalCom
4-5 units, Win (Kramer, K)

OSPBER 30. Berlin vor Ort: A Field Trip Module—The cultures of Berlin as preserved in museums, monuments, and architecture. Cityscape as narrative of its history from baroque palaces to E. German communism, 19th-century industrialism to the Sachsenhausen concentration camp. Competing political agendas and criteria of historical selection in monument alteration and removal, renaming streets, and structuring the capital. The interface between sociopolitical life and artistic expression. In German. (AU)
1 unit, Aut, Win, Spr (Neckenig, F)

OSPBER 33. Berlin Sketchbook—(Same as ARTSTUDI 143Y.) Visual exploration of the city. Principles of perspective and other sketchbook techniques. Attention to built form, weather, and the historical records of buildings. Diversity exemplified by Potsdamer Platz, Reichstag Dome, Kaiser-Wilhelm-Gedachtniskirche, Judisches Museum, and sites around Museum Sinsel. Drawing at sites. No drawing experience required.
3 units, Aut (Hannah, D)

OSPBER 35. Live Art and Performance in Berlin—(Same as DRAMA 158F.) Aesthetics and politics of contemporary performance. How contemporary practitioners of theater, performance art, and dance in Berlin explore new interart forms, relationships to audiences, ways to represent reality, and ways to collapse the difference between representation and reality. Field trips to live events.
3 units, Win (Fordyce, E)

OSPBER 37. Web Projects—Plan and develop a multimedia web project based on academic work associated with a concurrent course. Prerequisite: knowledge of web design or preparation on home campus.
1 unit, Aut, Win, Spr (Staff)

OSPBER 38. Research Module—For continuing students. Research under the guidance of a local specialist in libraries, archives, research institutes, and/or in the field. Prerequisite: GERGEN 177A.
3-4 units, Win, Spr (Staff)

OSPBER 44. Postwar German Art in Berlin Collections—(Same as ARTHIST 170Y.) Art of established international German artists such as Joseph Beuys, Anselm Kiefer, and Sigmar Polke, and younger practitioners. Relationship of artmaking to historical forces. Issues surrounding public memorials. How conditions of post-Wende Berlin impact artists who work there. Field trips to collections, including the Marx Collection, Neue Nationalgalerie, Martin-Gropius-Bau, Flick Collection, and the Kunst-Werke Institute for Contemporary Art, and to contemporary art exhibitions in commercial galleries such as Deutsche Guggenheim and D.A.A.D.
3 units, Aut (Hannah, D)

OSPBER 45. Computers, Ethics, and Social Responsibility—(Same as CS 201X.) Ethical and social issues related to the development and use of computer technology. Ethical theory, and social, political, and legal considerations. Scenarios in problem areas: privacy, reliability and risks of complex systems, and responsibility of professionals for applications and consequences of their work. Prerequisite: 106A or equivalent. WIM
3-4 units, Spr (Roberts, E)

OSPBER 55. Filmed Experience: Berlin at Eye-Level—(Same as FILMSTUD 133Y.) Students produce short documentary or experimental videos arising from experiences and course work in Berlin. Screenings of films made in Berlin to develop awareness of the practical side of filmmaking: narration; camera angles; editing; equipment; and shooting schedules.
5 units, Spr (Maerker, C)

OSPBER 66. Theory from the Bleachers: Reading German Sports and Culture—(Same as SOC 158S.) German culture past and present through the lens of sports. Intellectual, societal, and historical-political contexts. Comparisons to Britain, France, and the U.S. The concepts of *Körperkultur*, *Leistung*, *Show*, *Verein*, and *Haltung*. Fair play, the relation of team and individual, production and deconstruction of sports heroes and heroines, and sports nationalism. Sources include sports narrations and images, attendance at sports events, and English and German texts.
3 units, Win (Junghanns, W)

OSPBER 77. Wotan's Demise: Discourses of the Threatened Environment in Historical Perspective—(Same as GERGEN 173.) Wagner's Ring as a parable for the dichotomy in German political, cultural, and social discourse from industrialization to the globalized present: organic, nature-respecting, sustainable development versus an alienated, nature-denying, destructive mechanization of the earth. Can globalization be green as currently discussed in the context of the Kyoto Protocol?
4-5 units, Spr (Tempel, S)

OSPBER 88. Fascism: How Can it Happen?—How could a nation that seemed civilized and forward-looking descend into barbarism? What are the forces that led so much of Europe in that direction? Could it happen again anywhere in the world?
3 units, Spr (Roberts, E)

OSPBER 101A. Contemporary Theater—(Same as DRAMA 101A, GERLIT 195.) Texts of plays are supplemented by the theoretical writings of the respective playwrights and background reading in theater history and theory. Weekly theater trips, a tour of backstage facilities, attendance at a rehearsal, and discussions with actors, directors, or other theater professionals. In German. GER:DB-Hum
5 units, Spr (Kramer, K)

OSPBER 105V. Industry, Technology, and Culture, 1780-1945—(Same as HISTORY 105V, STS 120V.) From the steam engine to the modern factory, the engineer emerges as the hero of the innovative and the new in the modern world. The dialectical relationships among material, intellectual, and social culture using the example of modern materials, transport, and communications systems, the micro- and macrocosms discovered in physics, chemistry, and astronomy, and the revolutionizing influence of photography, film, and TV. GER:DB-Hum
4 units, Win (Neckenig, F)

OSPBER 110Y. Architecture and the City, 1871-1990: Berlin as a Nucleus of Modernity—(Same as ARTHIST 110Y, HISTORY 229V, STS 119V, URBANST 143U.) Differing logics of reconstruction in the two competing postwar German states. Architectural corrections attempted in post-Communist East Berlin and the rebuilding of the national capital since 1990. Dual perspective of the major architectural movements of the century and reconstruction of shifting roles of Berlin during unifications of 1871 and 1990. GER:DB-Hum
4 units, Spr (Neckenig, F)

OSPBER 115X. The German Economy: Past and Present—(Same as ECON 115X, POLISCI 111P.) The history of the German economy in: the Wilhelmine Empire, the Weimar Republic, the Third Reich, the postwar real socialism of the GDR, and the free market economy of the FRG. The processes of economic transition since unification and the current challenges faced by united Germany as Europe's first economic power and the world's second largest export nation. GER:DB-SocSci, EC-GlobalCom
4-5 units, Aut (Klein, I)

OSPBER 117V. The Industrial Revolution and its Impact on Art, Architecture, and Theory—(Same as ARTHIST 141Y, STS 117V.) The interlinking of architecture and painting with technological and scientific development. In a period of industrial revolution, the dominance of positivist thinking and empirical methods promotes in the cultural and artistic realm a response of euphoric acceptance or emphatic rejection. Artwork as a social, cultural, and spiritual symbol is a response to scientific and technological development, yet claims timeless validity. Topics: frictions between idealism and realism, photography and painting, historicism and functionalism, expression and dadaism, futurism and new sobriety, functionalism and Nazi classicism. GER:DB-Hum
5 units, Aut (Neckenig, F)

OSPBER 126X. A People's Union? Money, Markets, and Identity in the EU—(Same as POLISCI 112P.) The institutional architecture of the EU and its current agenda. Weaknesses, strengths, and relations with partners and neighbors. Discussions with European students from Berlin and Moscow. Field trips; guest speakers. GER:DB-SocSci, EC-GlobalCom
4-5 units, Aut (Brueckner, U)

OSPBER 161X. The German Economy in the Age of Globalization—(Same as ECON 161X.) Germany's role in the world economy: trade, international financial markets, position within the European Union; economic relations with Eastern Europe, Russia, the Third World, and the U.S. International aspects of the economic and environmental policies of the Red-Green Coalition Government. The globalization of the world's economy and Germany's competitiveness as a location for production, services, and R&D, focusing on the German car industry. GER:DB-SocSci, EC-GlobalCom
4-5 units, Win (Klein, I)

OSPBER 174. Sports, Culture, and Gender in Comparative Perspective—(Same as GERGEN 174.) Theory and history of mass spectator sports and their role in modern societies. Comparisons with U.S., Britain, and France; the peculiarities of sports in German culture. Body and competition cultures, with emphasis on the entry of women into sports, the modification of body ideals, and the formation and negotiation of gender identities in and through sports. The relationship between sports and politics, including the 1936 Berlin Olympic Games. GER:DB-SocSci, EC-Gender
5 units, Spr (Junghanns, W)

OSPBER 177A. Culture and Politics in Modern Germany—(Same as GERGEN 177A.) Key paradigms of modern Germany: German romanticism, the belated state and national identity, National Socialism and the Holocaust, Germany divided and unified. Literary, analytical, and theoretical texts; newspaper articles; film and TV; oral history. GER:DB-SocSci, EC-Gender
4-5 units, Aut (Kramer, K)

GERMAN LANGUAGE PROGRAM

OSPBER 1Z. Accelerated German: First and Second Quarters—(Same as GERLANG 1Z.) A jump start to the German language, enabling students with no prior German to study at the Berlin Center. Covers GERLANG 1 and 2 in one quarter.

8 units, Aut, Win (Wohlfeil, J; Behnen, J)

OSPBER 3B. German Language and Culture—(Same as GERLANG 3B.) Grammar, composition, and conversation. Increases fluency in German as rapidly as possible to help students take advantage of the many opportunities in Berlin. Corequisite: GERLANG 100B.

5 units, Aut, Win, Spr (Friesel, D)

OSPBER 22B. Berliner Geschichte(nz): Second-Year German—(Same as GERLANG 22B.) Readings in history, literature, politics, and economics.

5 units, Aut, Win, Spr (Biege, M)

OSPBER 100B. Aktives Deutsch—(Same as GERLANG 100B.) Required for students enrolled in GERLANG 3B; open to students in other German language classes. Active use of German, including vocabulary from a variety of fields and disciplines, and discussion of current issues.

2 units, Aut, Win, Spr (Keller, J)

ON VIDEOTAPE

OSPBER 40B. Introductory Electronics—(Same as ENGR 40B.) GER:DB-EngrAppSci

5 units, Aut, Win, Spr (Staff)

FLORENCE

OSPFLOR 10. From Galileo to Fermi: Five Italian Physicists Who Changed the World—(Same as BIOE30.) From the 16th through the 20th centuries. Introduction to astronomy, fundamentals of electricity, nature of atoms and molecules, radio communications, and nuclear energy. Biographies, historical context, and scientific contributions of Galileo, Volta, Avogadro, Marconi, and Fermi. Scientific background not required.

5 units, Spr (Quake, S)

OSPFLOR 11. Global Environmental Problems—(Same as PUBLPOL 120P.) Perspectives on environmental problems and international legal responses. The divide between European countries and the U.S. on global environmental problems, emphasizing global warming, sustainable development, and the greening of international trade. GER:DB-SocSci, EC-GlobalCom

4 units, Spr (Gaeta, P)

OSPFLOR 15. Is the Hero Serious or Facetious? Romances of Chivalry in Sixteenth-Century Europe—(Same as ITALLIT 246F.) Comparative study of Renaissance works of chivalry, including Ariosto, Cervantes, and Spenser. Chivalric literature in European courts as models of behavior for courtiers and gentlemen. Social and political conventions and how they represent shifting values in courtly civilization. How the relationship between epic myths and the power of aristocracy is inseparable.

5 units, Aut (Sberlati, F)

OSPFLOR 17. European Modernism and the International Avant Gardes, 1895-1945—(Same as ARTHIST 145Y.) How modern and avant garde artists have interrogated the nature of signification; and the avant garde's relationship to revolutionary politics. Matisse's Fauvism and Picasso's Cubism in Paris, German Expressionism, Italian Futurism, De Chirico, Morandi, Pittura Metafisica, Berlin Dada, Mondrian and de Stijl in the Netherlands, Suprematism and Russian Constructivism, and Surrealism in 30s Paris. Field trips to Bologna and Venice.

5 units, Aut (Gough, M)

OSPFLOR 22. Investigating Culture: An Introduction to Cultural Anthropology—(Same as CASA 101.) How anthropologists approach the study of culture. Theories of culture, methods of analysis, and investigatory strategies. Concepts and methods for reflecting on personal ideas about culture, society, and the individual. Integration of theory and practice. Readings in cultural anthropology and Italian culture and society; ethnographic exercises to explore daily life in Florence.

5 units, Win (Yanagisako, S)

OSPFLOR 25. Technology and Art: Conservation, Crime, and Copies—(Same as BIOE 170.) How modern technologies such as lasers, mass spectrometry, and genetic engineering are used in the art world to restore great works of art, verify authenticity, and create reproductions.

4 units, Spr (Delp, S; Quake, S)

OSPFLOR 29. Extreme Drawing—(Same as ARTHIST 147Y.) Modern and contemporary drawings by artists and architects emphasizing the role of drawing in the projection of revolutionary urban environments and social spaces, and transgression of the medium's traditional constraints. European emphasis with focus on Italian exemplars: the utopian 10s and 20s, and the dystopian 50s through 70s. Studio and museum visits.

5 units, Aut (Gough, M)

OSPFLOR 33. The Americanization of Italy—(Same as HISTORY 238V.) How cultural and social patterns from the U.S. shape everyday life in contemporary Italy. Popular culture and consumer culture as vehicles of penetration; role of supermarkets, malls, and new patterns of consumption. Are American models accepted or changed according to Italian culture? How global and local interact in this cultural encounter.

4 units, Win (Scarpellini, E)

OSPFLOR 41. The Contemporary Art Scene in Tuscany: Theory and Practice—(Same as ARTSTUDI 147Y.) The ever-changing and multifaceted scene of contemporary art through visual and sensorial stimulation. How art is thought of and produced in Italy today. Hands-on experience. Sketching and exercises on-site at museums and exhibits, plus workshops on techniques. GER:DB-Hum

3-5 units, Aut (Rossi, F)

OSPFLOR 42. Academic Internship—Mentored internships in banking, education, the fine arts, health, media, not-for-profit organizations, publishing, and retail. May be repeated for credit. (Campani.)

1-5 units, Win, Spr (Campani, E)

OSPFLOR 48. Sharing Beauty: Florence and the Western Museum Tradition—(Same as ARTHIST 113Y.) The city's art and theories of how art should be presented. The history and typology of world-class collections. Social, economic, political, and aesthetic issues in museum planning and management. Collections include the Medici, English and American collectors of the Victorian era, and modern corporate and public patrons. GER:DB-Hum

4 units, Win (Verdon, T; Rossi, F)

OSPFLOR 49. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema—(Same as ARTHIST 160Y, COMM 53, ITALGEN 191F, HISTORY 235V.) Structural and ideological attributes of narrative cinema, and theories of visual and cinematic representation. How film directors have translated history into stories, and war journals into visual images. Topics: the role of fascism in the development of Italian cinema and its phenomenology in film texts; cinema as a way of producing and reproducing constructions of history; film narratives as fictive metaphors of Italian cultural identity; film image, ideology, and politics of style. GER:DB-Hum

5 units, Win (Campani, E)

OSPFLOR 52. The Euro, the Dollar, and the Developing Countries in a World of Globalization—(Same as ECON 130X.) Operation of exchange networks that link countries and deliver outcomes, positive or negative. Free-market, free-trade, laissez-faire framework: the case of globalization with the dollar as the main instrument of financial intermediation; and the case of EU regionalization with the euro as the main instrument. Operational approach to the economic outcomes of these forms of globalization. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Yotopoulos, P)

OSPFLOR 54. High Renaissance and *Maniera*—(Same as ARTHIST 112Y, ITALGEN 150F.) The development of 15th- and early 16th-century art in Florence and Rome. Epochal changes in the art of Michelangelo and Raphael in the service of Pope Julius II. The impact of Roman High Renaissance art on masters such as Fra' Bartolomeo and Andrea del Sarto. The tragic circumstances surrounding the early *maniera*: Pontormo and

Rosso Fiorentino and the transformation of early Mannerism into the elegant style of the Medicean court. Contemporary developments in Venice. GER:DB-Hum

5 units, Spr (Verdon, T)

OSPFLOR 55. Academy of Fine Arts: Studio Art—(Same as ART-STUDI 198F.) Courses through the Accademia delle Belle Arti. Course details upon arrival. Minimum Autumn and Winter Quarter enrollment required; 1-3 units in Autumn. May be repeated for credit.

1-5 units, Aut, Win, Spr (Staff)

OSPFLOR 67. Women in Italian Cinema: Maternity, Sexuality, and the Image—(Same as FEMST 135F, ITALGEN 135F.) Film in the social construction of gender through the representation of the feminine, the female, and women. Female subjects, gaze, and identity through a historical, technical, and narrative frame. Emphasis is on gender, identity, and sexuality with references to feminist film theory from the early 70s to current methodologies based on semiotics, psychoanalysis, and cultural studies. Advantages and limitations of methods for textual analysis and the theories which inform them. Primarily in Italian. GER:DB-Hum, EC-Gender

4 units, Spr (Campani, E)

OSPFLOR 71. Becoming an Artist in Florence: Contemporary Art in Tuscany and New Tendencies in the Visual Future—(Same as ART-STUDI 141Y.) Recent trends in art, Italian artistic production, and differences and dialogue among visual arts. Events, schools, and movements of the 20th century. Theoretical background and practical training. Work at the Stanford Center and at museums, exhibits, and out in the city armed with a sketchbook and camera. Emphasis is on drawing as the key to the visual arts. Workshops to master the techniques introduced. GER:DB-Hum

3-5 units, Spr (Rossi, F)

OSPFLOR 77. Italian Politics Between Europe and the Mediterranean—(Same as POLISCI 123P.) How and why a country's internal and external geopolitical aspects are related to each other. How Italy's European membership and Mediterranean position complement each other in reshaping fundamental aspects of Italian domestic and foreign policy. GER:DB-SocSci

5 units, Win (Morlino, L)

OSPFLOR 78. An Extraordinary Experiment: Politics and Policies of the New European Union—(Same as POLISCI 42P.) Institutional design of EU, forthcoming changes, and comparison of the old and new designs. Interactions between the EU, member states, organized interests, and public opinion. Major policies of the EU that affect economics such as competition or cohesion policies, market deregulation, and single currency. Consequences of the expansion eastwards. The role of institutions as a set of constraints and opportunities for the economic actors; relationships between political developments and economic change in the context of regional integration; lessons for other parts of the world. GER:DB-SocSci

5 units, Aut (Morlino, L)

OSPFLOR 79. Migrations and Migrants: The Sociology of a New Phenomenon—(Same as SOC 114S.) Interdisciplinary approach to the study of immigration. Typology of forms of migration through politics put into action by the EU and within single nations. Related cultural and religious questions which elicit symbolic borders, territorialization of cultural identities, and the often spatial differentiation of immigrants and locals. The politics of integration and the instruments necessary to manage it. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Allam, K)

OSPFLOR 84. Democratic Quality in the Contemporary World—(Same as POLISCI 43P.) Qualitative and quantitative assessment of the implementation of democracy and human rights worldwide. Theoretical notions related to democratic quality including rule of law, accountability, responsiveness, freedom, and equality. Tools for subversion, how political elites developed different modes to avoid responsibility and responsiveness in political activities. Case studies such as the post-communist countries or the Arab world, including assessment of democracy in the area. Assessment of American democracy. GER:DB-SocSci

5 units, Spr (Morlino, L)

OSPFLOR 94. Photography in Florence—(Same as ARTSTUDI 70Y.) The functioning of the camera, exposure, and b/w film processing and printing. Emphasis is on perceptive imagery and the development of technical proficiency. 35mm camera required. Limited enrollment.

4 units, Win (*Loverme, C*)

OSPFLOR 97. Current Issues in Human Rights and International Justice—(Same as POLISCI 210P.) Roosevelt's four freedoms, problematic notions of human rights, concept of fair trial, the U.S. Supreme Court decision on Guantanamo detainees, current international protection against torture and rape. Is current international protection satisfactory? Did victors' justice at Nuremberg serve any purpose? Is a jury necessary to establish guilt or innocence? What is genocide? How should post-conflict situations be handled? Why is the U.S. opposing the International Criminal Court? GER:DB-SocSci, EC-GlobalCom

4 units, Win (*Vierucci, L*)

OSPFLOR 99. Form and Function: Anatomy and Biomechanics of Italian Renaissance Art—(Same as BIOE 80.) Anatomy, physiology, and biomechanics: how human beings and animals move. How knowledge of anatomy and physics gained during the Renaissance changed the way human form and movement were depicted in art. Student project.

4 units, Spr (*Delp, S*)

OSPFLOR 106V. Italy: From Agrarian to Postindustrial Society—(Same as HISTORY 106V, POLISCI 145P.) Italian history from the Risorgimento to the present. Society, crises, evolution, values, and the relation to the political institution in different periods. The ideologies, political doctrines, and historical events which contributed to the formation of modern Italy's predominant subcultures: Catholic and Socialist. In Italian. GER:DB-SocSci, EC-GlobalCom

4 units, Aut (*Mammarella, G*)

OSPFLOR 111Y. From Giotto to Michelangelo: Introduction to the Renaissance in Florence—(Same as ARTHIST 111Y.) Lectures, site visits, and readings reconstruct the circumstances that favored the flowering of architecture, sculpture, and painting in Florence and Italy, late 13th to early 16th century. Emphasis is on the classical roots; the particular relationship with nature; the commitment to human expressiveness; and rootedness in the real-world experience, translated in sculpture and painting as powerful plasticity, perspective space, and interest in movement and emotion. GER:DB-Hum

4 units, Win (*Verdon, T*)

OSPFLOR 134F. Modernist Italian Cinema—(Same as ARTHIST 161Y, ITALGEN 134F, STS 125V.) As the embodiment of modernity, cinema develops in the wake of modernism proper, but can be understood as one of its technological and aesthetic expressions. Topics: cinema's archaeology in Futurist texts and theories with their nationalistic political flavor and their iconoclastic, radical, and interdisciplinary rethinking of the language and form of all the arts (Marinetti, Pirandello, D'Annunzio). GER:DB-Hum

5 units, Aut (*Campani, E*)

ITALIAN LANGUAGE PROGRAM

OSPFLOR 35. Second-Year Italian, First Quarter—(Same as ITALLANG 21F.) Review of grammatical structures; grammar in its communicative context. Listening, speaking, reading, and writing skills practiced and developed through authentic material such as songs, newspaper articles, video clips, and literature. Insight into the Italian culture and crosscultural understanding.

4 units, Aut, Win, Spr (*Quercioli, F*)

OSPFLOR 37. Second-Year Italian, Second Quarter—(Enroll in ITALLANG 22F.) Grammatical structures, listening, reading, writing, speaking skills, and insight into the Italian culture through authentic materials. Intermediate to advanced grammar. Content-based course, using songs, video, and literature, to provide cultural background for academic courses.

4 units, Win (*Quercioli, F*)

OSPFLOR 66. Advanced Italian Conversation—(Enroll in ITALLANG 31F.) Refine language skills and develop insight into Italian culture using authentic materials. Group work and individual meetings with instructor.

4 units, Aut, Win, Spr (*Quercioli, F*)

KYOTO (STANFORD CENTER FOR TECHNOLOGY AND INNOVATION)

OSPKYOTO 21. Research Project—Independent research projects on significant aspects of Japanese culture, society, or public policy. Students interested in developing the project as a web page should take a home campus class on creating web pages or have equivalent experience.

2-3 units, Spr (*Staff*)

OSPKYOTO 24. Japan in Contemporary International Affairs—(Same as POLISCI 211P.) From the Meiji period to the present. WW II and its legacy as an issue in contemporary international relations; the transformation of the security environment and post-cold war Japanese diplomacy. Historical, strategic, political, economic and cultural dimensions of Japan's foreign relations with other Asian nations and the U.S. GER:DB-SocSci

5 units, Spr (*MacDougall, T*)

OSPKYOTO 28. Kyoto: History of Urban and Architectural Space—(Same as ARTHIST 186Y.) Introduction to the culture of Kyoto and the Kansai area through the built environment and its historical and cultural background. Representative building styles of major periods of Japanese history, and the development of spatial expression of social status and culture, relation of inside and outside, ambiguity of space, and living with the seasons. GER:DB-Hum

4-5 units, Spr (*Langner-Teramoto, B*)

OSPKYOTO 35. Environmental Policy Design and Implementation in Japan, China, and the U.S.—(Same as CEE 171X.) Strategies for reducing air and water pollution involving traditional regulations, waste discharge taxes, and marketable permits to pollute. Information transfer programs such as those concerning transfer of environmentally friendly technologies. Interplay between regulators, polluters, and NGOs, and institutional and organizational contexts. How participants in the regulatory process interact, influence each other, and advance change. GER:DB-EngrAppSci

3 units, Spr (*Ortolano, L*)

OSPKYOTO 215X. The Political Economy of Japan—(Same as ECON 124X, POLISCI 240P.) Institutions and processes in the political organization of economic activity in modern Japan. The interaction of public and private sector institutions in the growth of Japan's postwar economy. The organization and workings of key economic ministries and agencies of the government, private sector business groupings, government interaction, and public policy making. The transformation of Japanese industrial policy from the rapid growth of heavy and chemical industries to the promotion of high technology and communications industries. The international, political, and economic ramifications of the structure and importance of Japanese capitalism. GER:DB-SocSci

4-5 units, Spr (*Hayashi, T*)

JAPANESE LANGUAGE PROGRAM

OSPKYOTO 9K. First-Year Japanese Language, Culture, and Communication B—(Same as JAPANLNG 9K.)

5 units, Spr (*Yamada, O*)

OSPKYOTO 19K. Second-Year Japanese Language, Culture, and Communication B—(Same as JAPANLNG 19K.)

5 units, Spr (*Yamaoka, C*)

OSPKYOTO 129K. Third-Year Japanese Language, Culture, and Communication B—(Same as JAPANLNG 129K.)

5 units, Spr (*Uemiya, M*)

ON VIDEOTAPE

OSPKYOTO 32. Circuits II—(Same as EE 101B.) GER:DB-Engr-AppSci

4 units, Spr (Staff)

OSPKYOTO 33. Digital Systems II—(Same as EE 108B.) GER:DB-EngrAppSci

4 units, Spr (Staff)

OSPKYOTO 40K. Introductory Electronics—(Same as ENGR 40K.) GER:DB-EngrAppSci

5 units, Spr (Howe, R)

MOSCOW

OSPMOSC 57. Social Inequality in Socialist and Post-Socialist Societies—(Same as SOC 109S.) The extent to which socialist societies eliminated social classes and inequalities in power and material well-being; the nature of social inequalities in the Soviet era. Inequalities in power and material well-being in post-socialist and other transitional societies such as China, and post-Soviet and E. European societies. Social inequalities associated with gender, age, nationality, ethnicity, family status, and economic position. GER:DB-SocSci

3-5 units, Aut (Tuma, N)

OSPMOSC 60. Russian Politics and Institutions in a Comparative Perspective—(Same as POLISCI 118P.) Historical developments from early periods through the Soviet era. Evolution of the political regime from Yeltsin to Putin; transformation of political institutions and processes, political culture, and public attitudes. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Melville, A)

OSPMOSC 61. Problems and Prospects of Post-Soviet Eurasia—(Same as POLISCI 143P.) Processes shaping the former Soviet Union or the Commonwealth of Independent States, including Russia and the newly independent states of Eastern Europe, the South Caucasus, and Central Asia. Economic and political models since the break-up of the USSR. Changing geopolitics of post-Soviet Eurasia: political regimes, economic development, security, energy relationships, post-Soviet societies, religion, and globalization. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Medvedev, S)

OSPMOSC 62. Economic Reform and Economic Policy in Modern Russia—(Same as ECON 120X.) Reasons and logic for economic transformation, major components of postcommunist economic transformation doctrine, and results of practical implementation. Mechanisms of economic policy decision making in modern Russia, and patterns of and alternatives in economic development. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Mau, N)

OSPMOSC 65. Introduction to 20th-Century Russian History: Patterns and Key Events—(Same as HISTORY 122V.) International and local contexts; historical stereotypes and myths. Development of Soviet society as the prolongation of the Imperial tradition and part of world history where Russia used to act as the influential periphery. GER:DB-Hum

5 units, Aut (Kozlov, V)

OSPMOSC 66. Russia's Peoples and Places—(Same as SOC 108S.) Population processes. Topics: Russia's low fertility and high morbidity and mortality; family patterns; urban growth and change; migration within, into, and out of Russia; and variations in these phenomena across Russia and among its national subgroups. Consequences for social, economic, and political life in Russia, and societal problems associated with population characteristics. GER:DB-SocSci

3-5 units, Aut (Tuma, N)

RUSSIAN LANGUAGE PROGRAM

OSPMOSC 10M. Intensive First-Year Russian—(Same as SLAVLANG 10M.)

9 units, Aut (Boldyreva, T; Kurganova, L)

OSPMOSC 51M. Second-Year Russian—(Same as SLAVLANG 51M.)

5 units, Aut (Kurganova, L)

OSPMOSC 111M. Third-Year Russian—(Same as SLAVLANG 111M.)

5 units, Aut (Filatova, G)

OSPMOSC 177M. Fourth-Year Russian—(Same as SLAVLANG 177M.)

5 units, Aut (Staff)

OXFORD

OSPOXFRD 11. Documentary: Voice and Vision—(Same as FILMSTUD 131Y.) Focus is on British filmmakers. Films produced in the 30s and 40s under the Empire Marketing Board, the Free Cinema movement of the 50s, and contemporary documentary approaches. Forms, strategies, and conventions of documentary film. Current theoretical debates and dilemmas in documentary filmmaking; mutable boundaries of the genre. Film studies and practicum components.

4 units, Aut (Krawitz, J)

OSPOXFRD 15. British Architecture and the Renaissance: 1500-1850—(Same as HISTORY 132V.) The influence of classicism and the Renaissance. Insights into European art and architecture and the history of Britain from the Tudor era to the Industrial Revolution. Field trips; joint study trips to London and Florence. GER:DB-Hum

4-5 units, Win (Tyack, G)

OSPOXFRD 21. The Making of the English Nation, 400-1066—(Same as HISTORY 112V.) The Anglo-Saxon period through archaeology, literature, legend, and historical documents. Excavations of the royal burial mounds at Sutton Hoo, Winchester, and Oxford. Literary texts: Bede's *Ecclesiastical History of the English People* and *Beowulf*. Field trips to the British Museum, Winchester, and Oxford. GER:DB-Hum

3 units, Win (Rowley, T)

OSPOXFRD 22. Social Realism in British Film and Literature—(Same as FILMSTUD 130Y.) Fundamentals of film theory and criticism; how to read a film considering practice and politics, and style and form; and content as a springboard for analysis. Films that expose social problems related to class, race, drugs, dysfunctional family relationships, and economic conditions such as *Nil by Mouth* and *Trainspotting*. Language of film criticism and analysis. Novelists include Jonathan Coe and Hanif Kureishi.

4 units, Aut (Krawitz, J)

OSPOXFRD 24. British and American Constitutional Systems in Comparative Perspective—(Same as POLISCI 244P.) Introduction to the study of constitutions and constitutional systems of government. The workings of the British and American systems of government. Comparative study of the most important constitutional issues facing Britain and the U.S. such as how suspected terrorists should be treated in a time of war. How to think about fundamental constitutional questions. GER:DB-SocSci

4 units, Win (McMahon, R)

OSPOXFRD 25. Jane Austen's England—(Same as ENGLISH 135Z.) Emphasis is on the significance of place in *Northanger Abbey*, *Sense and Sensibility*, *Pride and Prejudice*, *Mansfield Park*, *Emma*, and *Persuasion*. Austen's life, historical contexts, and recent film versions. Field trips to Bath and Chawton.

5 units, Win (Rovee, C)

OSPOXFRD 33. The Idea of the Museum: History, Theory, Politics—(Same as ENGLISH 185Z.) History, theory, and politics of a definitive institution of modernity. Historical rise, role of national museums, the museum's sacralization of the viewing experience, and questions about art and authenticity. Related phenomena, such as antiquarian shops, private collections, displays of the domestic interior, industrial exhibitions, wax-works, and Oxford as an open-air museum. Visits to nearby collections.

5 units, Win (Rovee, C)

OSPOXFRD 35. Modern UK and European Government and Politics—(Same as POLISCI 141P.) Background of main political systems in Europe and recent developments in European politics. Topics: Blair's constitutional reforms; the consequences of the German reunification; Berlusconi's rise to power in Italy; the extreme right in France and elsewhere; the single currency; the enlargement of the EU; and proposals for a constitution and their recent rejection by the French and Dutch electorates. GER:DB-SocSci

4 units, Aut (Auel, K)

OSPOXFRD 42. Comparative Health Care Systems: UK and U.S.—(Same as HUMBIO 122X.) Differences between UK and U.S. health care systems from modern and historical perspectives. Evolution, current problems, future developments. Case of Canada as point of comparison. Attempts to maximize health gains while controlling costs, one system on the public service ideal, the other on market principles. Social, cultural, and ethical issues related to the development of health care systems; opportunities to interact with NHS doctors, nurses, and administrators. GER:DB-SocSci

4 units, Win (Senior, J)

OSPOXFRD 44. The Rise of the Novel—(Same as ENGLISH 174X.) The many novels that flooded the literary market throughout the 18th century. Male canonical writers such as Richardson and Fielding, and novels written by women. Topics include satire, sensibility, and the contemporary suspicion of the novel form as morally pernicious. GER:DB-Hum

5 units, Spr (Plaskitt, E)

OSPOXFRD 45. British Postwar Economic Policy—(Same as ECON 131X.) Development of British economic policy making from 1945, focusing on political economy including: ideological motives of governments; political business cycle; and the influence of changing intellectual fashions. Policy areas: attitude to the pound; control of the business cycle; and the role of the state in the economy. Prerequisite: ECON 50.

4 units, Win (Forder, J)

OSPOXFRD 50. British Ethnography and Ethnographies of Britain—(Same as ANTHSCI 171X.) British culture through the lens of ethnography. Ethnographic methodology as established by British schools of sociology and social anthropology. Works of seminal British ethnographers, many from Oxford. Themes of socioeconomic class, symbolic belief systems, identity politics, and Britain's popular subcultures of style. Individual field projects involving participant-observation among Oxford's communities.

5 units, Spr (Barrett, R)

OSPOXFRD 55. The British Healthcare System—(Same as ANTHSCI 101X.) Britain's National Health Service and its traditions of English medicine, through the framework of medical anthropology. Medicine and public health in Britain from the 18th century to present. Strengths and challenges of NHS; political and health parameters of current reforms. Comparison of NHS to other public and private healthcare systems around the world. Guest lecturers; field trips to clinics and public health settings.

5 units, Spr (Barrett, R)

OSPOXFRD 65. Oxford: The City as a Work of Art—Oxford's role as patron of British art, architecture, and design from the 13th century to the present. Themes in the history of art, architecture, and design: medieval and gothic, renaissance, classical, modern and postmodern. Resources such as university and college buildings, museums, galleries, and private collections. The roles of patronage and collecting; the functioning of the arts.

2 units, Aut, Spr (Chance, H)

OSPOXFRD 70. The History of London—(Same as HISTORY 138V.) London's physical growth, emphasizing characteristics which set it apart from other capitals, and its economic, social and political development, including the problems of poverty and the inner city, the provision of public services, and the growth of suburbs and public transport. Challenges facing London in modern times. Walking tours, especially less frequented areas. GER:DB-SocSci

5 units, Spr (Tyack, G)

OSPOXFRD 98. Creative Writing Workshop—Selection and combination; poetic language; metaphor and cohesion; setting and the pathetic fallacy; sentence variety; genres; dialogue; point of view; narrative positions; colors and senses; time management; plotting. Limited enrollment based on writing sample.

3 units, Aut, Win, Spr (Kidd, H)

OSPOXFRD 114Z. Close Readings in English Literature, 1509-1642—(Same as ENGLISH 114Z.) From the beginning of Henry VIII's reign to the onset of the Civil War, excluding Shakespeare. The poetry, prose, and drama of the period in their literary, cultural, and historical contexts. Open only to students majoring in English and related subjects. Taught jointly for Stanford students and second-year St. Catherine's undergraduates. GER:DB-Hum

5 units, Aut (van Es, B)

OSPOXFRD 116Z. Close Readings in English Literature, 1642-1740—(Same as ENGLISH 116Z.) From the Civil War to the middle of the 18th century. The poetry, prose, and drama of the period in their literary, cultural, and historical contexts, and key texts. Open only to students majoring in English and related subjects. Taught jointly for Stanford students and second-year St. Catherine's undergraduates. GER:DB-Hum

5 units, Win (Bullard, P)

OSPOXFRD 117W. Social Change in Modern Britain—(Same as SOC 117W.) Changes in the social institutions, attitudes, and values in Britain over the past 20 years. Social changes occurring as a consequence of the Thatcher years of government. Changes to the British economy, the welfare state, National Health Service, the education system, the criminal justice system, gender relations, marriage, divorce, reproduction, and the family. The consequences in terms of British competitiveness, income distribution, wealth and poverty, social class, health and illness, educational attainment and skills development, crime, and family life. GER:DB-SocSci

4 units, Spr (Palmer, A)

OSPOXFRD 141V. European Imperialism and the Third World, 1870-1970—(Same as HISTORY 141V, POLISCI 148P.) European imperialism from its zenith in the late 19th century to the era of decolonization after WW II. The effects of Western imperialism in the Third World. The legacy of imperialism and decolonization to the modern world. GER:DB-SocSci

5 units, Spr (Darwin, J)

OSPOXFRD 154Z. Romantic Literature, 1740-1832—(Same as ENGLISH 154Z.) Restricted to students majoring in English and related subjects. Taught jointly for Stanford and second-year St. Catherine's undergraduates. Authors include William Collins, Thomas Gray, and John Keats. GER:DB-Hum

5 units, Spr (Plaskitt, E)

OSPOXFRD 163X. Shakespeare: Critical Commentary—(Same as ENGLISH 163X.) For English majors or minors only. Topics include the use of soliloquy, epilogues, alternation of prose and verse, rhetoric, meta-theatricality. Close reading technique. Taught jointly with students from St. Catherine's College. GER:DB-Hum

5 units, Aut, Win (Groves, B)

PARIS

OSPPARIS 11. Cultures of Violence in 20th-Century Europe—(Same as HISTORY 237V.) Political, social, and cultural factors that made the 20th century the most violent in human history. Diplomatic, political, and social uses of, and the intellectual and cultural responses to violence. How men and women have witnessed, coped with, and survived violent episodes. Cases studies of state violence, and ethnic and religious conflict. Colonialism, WWI, the Holocaust, and decolonization. GER:DB-SocSci

5 units, Win (Daughton, J)

OSPPARIS 22. Immigration in France—(Same as SOC 115S.) Emphasis is on West African immigration. Historical, statistical, legal, and political perspectives. Living conditions of immigrants and their children. Ethnographic observations or interviews on a group-defined topic. GER:DB-SocSci

4 units, Spr (Maurer, S)

OSPPARIS 25. Literature and the City—(Same as FRENLIT 178FS.) Subtle and hidden aspects of Paris through the eyes of France's greatest writers, poets, and philosophers including Balzac, Baudelaire, Zola, and Aragon. Essays, poems, and novels that portray the historical, social, and political reality of the city better than textbooks or guides. GER:DB-Hum

4 units, Aut (*Guyot, S*)

OSPPARIS 30. Statistical Thinking—(Same as STATS 30.) Origins of probabilistic reasoning and its rapid development by French scientists during the 18th and 19th centuries. Games of chance and Bernoulli's binomial probabilities. Laplace's rules of statistical interference, Poisson's probability models for rare events, and Gauss's laws for measurement errors and the bell-shaped curve. Original sources and modern interpretations. GER:DB-Math

3 units, Aut (*Switzer, P*)

OSPPARIS 51. The Ancient World at the Louvre—Illustrated lectures and visits to the Louvre. History, art, and cultures of ancient civilizations and the archaeological background of excavations. Mesopotamia (Sumer, Babylon, Assur, Anatolia); Egypt; the classical world (Greece, Etruscans, Rome); Iran; and the Syro-Palestinian coast. What accounts for the greatness, and the rise and decline of these cultures? How are achievements transmitted to successor cultures? GER:DB-Hum

4 units, Spr (*Katchadourian, H*)

OSPPARIS 52. Erotic Art and Literature in 18th-Century France—(Same as HUMBIO 177X.) Origins of Western erotic art in the Classical period and revival during the Renaissance, with overview of 18th-century France and cultural context for its art and literature. Artists include Watteau, Boucher, and Fragonard; authors include Prevost, de Laclos, and de Sade. What these works meant then and now; comparison with the American experience since the 60s and modern views on erotic art and pornography. GER:DB-Hum

3 units, Spr (*Katchadourian, H*)

OSPPARIS 55. The History and Legacy of French Imperialism, 1830-Present—(Same as HISTORY 236V.) The significance of colonialism and decolonization on the formation of the French nation and contemporary world politics. The history of French involvement in Algeria, W. Africa, and Indochina; the legacy of the colonial past in contemporary France, where people from the former empire populate French cities and shape French politics and culture. Sources include histories, memoirs, political treatises, and fiction. GER:DB-SocSci

5 units, Win (*Daughton, J*)

OSPPARIS 57. Human Rights in Comparative Perspective—(Same as POLISCI 143P.) Human rights arose from Enlightenment principles but their status in the American and French constitutions differ. Have European court decisions created a transatlantic human rights model giving more weight to Anglo-Saxon legal tradition? Philosophical, historical, and legal resources; recent case studies from both sides of the Atlantic. GER:DB-SocSci, EC-GlobalCom

4-5 units, Spr (*Remy-Granger, D*)

OSPPARIS 61. Paris by Numbers—(Same as STATS 99.) Parisian demographic trends over the past 100 years. Small teams assemble and interpret statistical sources of demographic change. Sample surveys as a means of learning about present-day Paris. Principles of survey design. Students design and execute small-scale surveys combining practical limitations in the Parisian environment and contact with respondents.

2-4 units, Aut (*Switzer, P*)

OSPPARIS 81. France During the Second World War: Between History and Memory—(Same as HISTORY 139V.) French politics and society from the causes of the collapse of the French Third Republic and the emergence of the French State at Vichy. The political and cultural measures of this regime in the shadow of Nazi Germany. Anti-Jewish laws and action; deportations by Vichy, the Germans, the French Fascists, and reactions to the fate of the Jews. Visions of the Resistance, the combat for liberation, and WW II in the collective memory of France. GER:DB-SocSci

5 units, Aut (*Virgili, F*)

OSPPARIS 91. Globalization and Its Effect on France and the European Union—(Same as ECON 125X.) Economic and political impact of globalization on France and the EU and influence of France and the EU on the process of globalization. Issues of sovereignty and national identity for France; protection from versus integration into the network of globalization. GER:DB-SocSci

5 units, Spr (*Le Cacheux, J*)

OSPPARIS 92. Building Paris: Its History, Architecture, and Urban Design—(Same as ARTHIST 153Y.) The development of Parisian building and architecture from the 17th century to the present. Interaction of tradition and innovation in its transformation and its historical, political, and cultural underpinnings. Visits and case studies throughout Paris illustrate the formation of the city landscape and its culture. GER:DB-Hum

4 units, Spr (*Halevi, E*)

OSPPARIS 107Y. The Age of Cathedrals: Religious Art and Architecture in Medieval France—(Same as ARTHIST 107Y.) The major artistic and cultural movements that changed the face of France from the period of Suger in the 12th century through the reign of St. Louis in the 13th century. Monastic spirituality progressively gave way to an urban culture focused on man and secular knowledge, which developed daring and sophisticated building techniques. The years 1150-1250 represented a period of architectural renaissance and Ile-de-France was its birthplace. GER:DB-Hum

4 units, Aut (*Deremble, C; Deremble, J*)

OSPPARIS 120X. French Painting—(Same as ARTHIST 123Y.) Changes in artistic aims and the interaction between artist and society throughout the period. Weekly field trips to Paris museums holding paintings of David, Ingres, Delacroix, Courbet, Daumier, Manet, Renoir, Monet, Degas, and others. GER:DB-Hum, DB-Hum

4 units, Win (*Halevi, E*)

OSPPARIS 122X. Europe: Integration and Disintegration of States, Politics, and Civil Societies—(Same as POLISCI 149P.) European integration is now an economic, social, and political reality. This integration has a history of mutation and a transformation of its very foundation. Topics: the evolution of welfare states, elites, political parties, and systems in Europe; lobbies, trade unions, voluntary associations, social movements, popular protest, citizenship, democracy. GER:DB-SocSci

4-5 units, Win (*Strudel, S*)

OSPPARIS 124X. Building the European Economy: Economic Policies and Challenges Ahead—(Same as ECON 127X.) Issues and challenges of European economic construction. The European Economic Union at the end of the 50s; European industrial, agricultural, social, and monetary economic policies. Topics: wider definitions of Europe, its relations with industrial and developing countries, and its challenges in confronting global economic crises. GER:DB-SocSci

5 units, Aut (*Le Cacheux, J*)

OSPPARIS 153X. Health Systems and Health Insurance: France and the U.S., a Comparison across Space and Time—(Same as HUMBIO 120X, PUBLPOL 111P.) Should health systems be organized or left to the free market? What is the role of the state in the delivery of health care? The evolution of the health profession, health policy, and reform in France and the U.S.; measures restraining professional autonomy such as prescription guidelines in the French Medical Convention. Is the solution to the increase of health expenditures and reduced access to health care the end of autonomy for the medical profession? GER:DB-SocSci

4-5 units, Win (*Fessler, J*)

OSPPARIS 186F. Contemporary African Literature in French—(Same as AFRICAAM 186F, FRENLIT 186F.) Focus is on African writers and those of the diaspora, bound together by a common history of slave trade, bondage, colonization, and racism. Their works belong to the past, seeking to save an oral heritage of proverbs, story tales, and epics, but they are also contemporary. GER:DB-Hum, EC-GlobalCom

4 units, Win (*Diop, P*)

OSPPARIS 211X. Political Attitudes and Behavior in Contemporary France—(Same as POLISCI 241P.) The institutions of the Fifth Republic, the main political forces, and their evolution. Electoral behavior, taking into account other forms of political action such as the demonstrations for the defense of schools (1984) and the *lycée* students (1990), or the protest that followed the desecration of the Jewish cemetery in Carpentras. Attitudes and values are linked to voting choice. GER:DB-SocSci
4-5 units, Aut (Mayer, N; Muxel, A)

FRENCH LANGUAGE PROGRAM

OSPPARIS 22P. Intermediate French I—(Same as FRENLANG 22P.)
4 units, Aut, Win (Mercier, F), Spr (Molkou, E)

OSPPARIS 23P. Intermediate French II—(Same as FRENLANG 23P.)
4 units, Aut, Win (Maître, F), Spr (Reychman, P)

OSPPARIS 124P. Advanced French I—(Same as FRENLANG 124P.)
4 units, Aut (Guedon, P)

OSPPARIS 125P. Advanced French II—(Same as FRENLANG 125P.)
4 units, Win (Molkou, E), Spr (Ricci, M)

ON VIDEOTAPE

See the “School of Engineering” section of this bulletin for course descriptions.

OSPPARIS 40P. Introductory Electronics—(Same as ENGR 40P.)
GER:DB-EngrAppSci
5 units, Aut, Spr (Staff)

SANTIAGO

OSPSANTG 11. Dance and Culture in Latin America—(Same as DANCE 168.) Dance in its cultural context as a non-verbal form of communication, revealing cultural values and historical roots. Mexico; the Black Atlantic including Cuba, Brazil, and Puerto Rico; and the Pacific Corridor including Peru, Chile, and Argentina. Ritual dance such as los voladores of Mexico and Candomble of Brazil, social forms such as Cuban dazon and Puerto Rican plena, and national dances including Mexican jarabes, Brazilian samba, Cuban rumba, Argentine tango, and Chilean cueca. Sources include videos, lectures, readings, and field trips. GER:EC-GlobalCom
4 units, Win (Cashion, S)

OSPSANTG 15. Dances of Latin America—(Same as DANCE 42X.) Movement class. Social dances, such as salsa, tejano, banda, samba, Cuban son, Argentine tango, and Chilean cueca. A carnival dance, Brazilian bloco Afro; and ritual form Mexican matlachines. Social etiquette and gender roles prescribed by the cultural context. Field trips to Santiago nightclub and a festival site.
2 units, Win (Cashion, S)

OSPSANTG 34. Traces of Authority: The City of Santiago de Chile—(Same as URBANST 157V.) Relationships between acquisition, maintenance, and transmission of power in society, and the organization of public space in the city, using Santiago as example. Sources include downtown buildings, maps of the city, and pictures of older buildings. Comparison with American and European cities. GER:DB-SocSci
5 units, Aut (Fuenzalida, E)

OSPSANTG 58. Living Chile: A Land of Extremes—(Same as EARTH-SYS 110X, LATINAM 58X.) Physical, ecological, and human geography of Chile. Perceptions of the Chilean territory and technologies of study. Flora, fauna, and human adaptations to regional environments. Guest lectures; field trips; workshops. GER:DB-EngrAppSci
5 units, Aut, Spr (Ginocchio, R; Poblete, V)

OSPSANTG 62. Topics in Chilean History—(Same as HISTORY 276V.) Main themes of Chilean history: Spanish colonial background; independence in comparative perspective; construction of the republic in the 19th century; actors in the political process; the clash between authoritarian and democratic traditions in the 20th century. How Chileans have viewed their own history through conventional historical accounts, novels, and memoirs. GER:DB-Hum
4-5 units, Aut, Spr (Jaksic, I)

OSPSANTG 68. The Emergence of Nations in Latin America—(Same as HISTORY 275V.) Major themes of 19th-century Latin American history, including independence from Spain, the emergence of nation states, and the development of a new social, political, and economic order. GER:DB-Hum
4-5 units, Win (Jaksic, I)

OSPSANTG 70. Urban Politics in Latin America—(Same as POLISCI 223P.) Has the rise of democracy in Latin America been centered in the evolution of urban politics in its capital cities? The position of cities in the national systems of federalism; formal structure of government; history of urbanization; how city politics affected national politics; and whether the development of civil society and related electoral institutions had its origins in cities and their politics. Cities include Buenos Aires, Caracas, La Paz, Mexico City, and Santiago de Chile. GER:DB-SocSci
5 units, Spr (Fraga, L)

OSPSANTG 72. Language and Prehistory—(Same as ANTHSCI 111X.) Language classification and its implications for human prehistory. The role of linguistic data in analyzing prehistoric populations, cultures, contact, and migrations. Emphasis is on Chile and languages of Latin America. Comparison of linguistic and biological classifications. Reconstruction, proto-vocabularies, and culture. Archaeological decipherment and the origins and evolution of writing. Archaeological and genetic evidence for human migrations. (DA-A; HEF II,III.)
5 units, Aut (Fox, J)

OSPSANTG 104X. Modernization and Culture in Latin America—(Same as ANTHSCI 104X, SPANLIT 290Z.) Intellectual and cultural expressions of Latin America against the background of modernization viewed as a constant tension between rationalization and subjectification, change and identity preservation, and the logic of development or economic expansion and the logic of the culture. Readings include Morande, *Cultura y modernización en América Latina* and Sarlo, *Una modernidad periférica*. GER:DB-SocSci, EC-GlobalCom
5 units, Aut (Subercaseaux, B)

OSPSANTG 111. Social Heterogeneity in Latin America—(Same as SOC 111S, SPANLIT 164S.) Latin America is characterized by social heterogeneity and inequality. An interpretation of these phenomena, focusing on the social, ethnic, gender, political, and economic dimensions. Their historical roots and unfolding during the periods of industrialization, the 60s, 70s, and 80s, and the contemporary situation. GER:DB-SocSci
5 units, Aut (Valdés, T)

OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century—(Same as POLISCI 242P.) Chile’s strides towards becoming a developed country have engendered high levels of alienation and disaffection among significant sectors of the population. The roots of this apparent paradox of modernization, focusing on newly emerging actors in the Chilean political scene: Mapuche organizations, women’s groups, the environmental movement, and new features of the established ones like trade unions and human rights activists. GER:DB-SocSci
5 units, Spr (Correa, G)

OSPSANTG 118X. Artistic Expression in Latin America—(Same as LATINAM 118X, SPANLIT 166S.) Elite, mass-media, and popular cultural changes in Chile under of economic and political liberalization. The reception of cultural meanings from the center of the world social system (U.S., EU, and Japan), reformulation to respond to local conditions, and export in the shape of cultural artifacts. Innovative elements rooted in the regional and local culture. GER:DB-SocSci, EC-GlobalCom
5 units, Win (Albornoz, C)

OSPSANTG 119X. The Chilean Economy: History, International Relations, and Development Strategies—(Same as ECON 119X.) The Chilean economy in five stages, taking into account: the international economic position of Chile; internal economic structures closely related to the inherited historical conditions and to the changing international economic position of the country; and the economic strategies prevalent during the period and the concrete development policies conducted by government authorities. GER:DB-SocSci

5 units, Spr (Muñoz, O)

OSPSANTG 129X. Latin America in the International System—(Same as POLISCI 117P.) Latin America's role in world politics, with emphasis on the history of and models for explaining U.S.-Latin American relations. Latin America's evolving relationship in the international system. GER:DB-SocSci

4-5 units, Win (Fuentes, C)

OSPSANTG 130X. Latin American Economies in Transition—(Same as ECON 129X.) Introduction to the main debates and approaches developed to understand and analyze the economies of Latin America. Recent processes of transition to market economies. Common characteristics among countries of the region; the differences and special traits of individual countries. Historical, analytical, and empirical perspectives on topics at the center of controversies and specific policy problems over several decades. Recommended: ECON 1, 51, and 52. GER:DB-SocSci

5 units, Aut (Di Filippo, A)

OSPSANTG 141X. Politics and Culture in Chile—(Same as LATINAM 141X.) The relationship between politics and culture in Chile during the 20th century, reflecting on the effects of such relationships on esthetics and identity. The possibility that, in Chile, culture has been pulled by politics and social praxis, a condition that has created a deficit in cultural thickness. The oligarchic regime around 1920, the welfare state around 1940, projects of social transformation around 1970, dictatorship around 1980, women writers and Mapuche poetry in contemporary Chile. GER:DB-Hum

5 units, Spr (Subercaseaux, B)

OSPSANTG 160X. Latin America in the International Economy—(Same as ECON 128X.) The external economic relations of Latin American countries. Similarities and differences among countries, focusing on the last 15 years. Analytical and empirical elements for interpretation of policies, and the outcome. Trade, external debt, capital flows, and the inter-relationships between domestic economy and overall growth. Recommended: ECON 1, 51, and 52. GER:DB-SocSci

5 units, Win (Di Filippo, A)

OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective—(Same as LATINAM 221X, POLISCI 243P.) The dynamics of the Chilean transition. Topics: challenges faced by democratic governments in the 90s framed by the legacy of military rule, 1973-90; political culture; institutional traditions of democracy; and the Chilean process within the broader context of Latin American political development. GER:DB-SocSci

5 units, Aut (Micco, S)

SPANISH LANGUAGE PROGRAM

OSPSANTG 12S, 13S. Accelerated Second-Year Spanish: Chilean Emphasis—(Same as SPANLANG 12S, 13S.) Intensive sequence integrating language, culture, and sociopolitics of Chile. Emphasis is on achieving advanced proficiency in oral and written discourse including formal and informal situations, presentational language, and appropriate forms in academic and professional contexts. Prerequisites for 12S: one year of college Spanish, or 11 or 21B if taken more than two quarters prior to arriving in Santiago. Prerequisites for 13S: 11 or 21B within two quarters of arriving in Santiago, or 12 or 22B.

12S: 5 units, Aut, Win, Spr (Popp, J)

13S: 5 units, Aut, Win, Spr (Abad, M)

OSPSANTG 33. Spanish Language Tutorial—Prerequisite: two years of college Spanish or equivalent placement.

2 units, Aut, Win, Spr (Pons, H; Abad, M; Popp, J)

OSPSANTG 82. Composition and Writing Workshop for Students in Santiago—(Same as SPANLANG 102S.) Advanced. Writing as craft and process: brainstorming, planning, outlining, drafting, revising, style, diction, and editing. Non-Spanish majors or minors choose topics related to their studies. Prerequisite: SPANLANG 13C, 13R, 13S, 23B, or equivalent.

3-5 units, Aut, Win, Spr (Bobbert, A)

SPECIAL PROGRAMS

In addition to courses at its established centers, the Overseas Studies Program offers courses in other locations around the world. Additional details can be found at <http://osp.stanford.edu>.

OSPGEN 62. St. Petersburg and Beyond—(Same as HISTORY 20V.) St. Petersburg's culture through history, literature, and arts. Field trips to museums, palaces, the ancient city-state of Novgorod, and the monastic retreat on the Island of Valaam in Lake Ladoga. Location: St. Petersburg, Russian Federation.

2 units, Aut (Kollmann, N; Kollmann, J)

OSPGEN 63. Southeast Asia and the Singapore Exception—(Same as URBANST 12X.) Political economies of SE Asia and the special nature of Singapore. Why is this rich and modern city-state not a liberal democracy? Why has Singapore's wealth not spawned a middle class demanding civil liberties in place of the long-ruling People's Action Party which keeps winning elections? Location: Singapore.

2 units, Aut (Emmerson, D)

OSPGEN 64. A Decade of Majority Rule: Contested Transitions in South Africa—(Same as HISTORY 45V.) Efforts to transform S. Africa focusing on the space between the broken and the built. Comparative social history and public policy analysis. Three transition arenas: community reconstruction, HIV/AIDS and public health, and education. Location: Cape Town, S. Africa.

2 units, Aut (Samoff, J)

OSPGEN 65. The Pursuit of Peace: From the Enlightenment to the United Nations—(Same as FRENGEN 50G.) Enlightenment theories of tolerance, perpetual peace, popular sovereignty, and general will; focus is on the Geneva philosophers Rousseau and Voltaire. History of major international institutions in Geneva and their relation to Enlightenment ideas: Red Cross, League of Nations, and the UN and subsidiary institutions. Contemporary criticisms of international law and conventions and the viability of Enlightenment ideals in current times. Location: Geneva, Switzerland.

2 units, Aut (Edelstein, D)

OSPGEN 66. Issues of Development in Northern Tanzania—(Same as HUMBIO 55X.) Economic and cultural issues affecting development in northern Tanzania. Health and disease, education and technology, and conservation, tourism and land resource management. Field trips to rural clinics, NGO field sites, Ngorongoro Crater conservation area, and UN facility in Arusha. Location: Arusha, Tanzania.

2 units, Aut (Siegel, R)

OSPGEN 67. Workshop in Shakespearean Production—(Same as DRAMA 129F, ENGLISH 84Z.) Relationships among criticism, production, and performance of Shakespeare. Students attend Shakespeare productions in London and Stratford. Readings of the texts and hands-on experimentation with all phases of theatrical production, including scene work and performance. Location: Oxford, United Kingdom.

2 units, Aut (Friedlander, L)

OSPGEN 68. An Enduring Kyoto—(Same as ANTHSCI 125X, CASA 149.) Kyoto as political and cultural capital of Japan for a thousand years. Social, religious, and political institutions, literature, performing arts, architecture, landscape architecture, kimono, and tea ceremony. Kyoto's modern transformation since Meiji Restoration. Development of the Kyoto School of philosophy. Location: Kyoto, Japan.

2 units, Aut (Befu, H)

PHILOSOPHY

Emeriti (Professors): Fred Dretske, Solomon Feferman, Georg Kreisel,

David S. Nivison, Patrick Suppes, James O. Urmson

Honorary Emeritus (Professor): Richard Rorty

Chair: Kenneth Taylor

Director of Graduate Study: Michael Bratman

Director of Undergraduate Study: Chris Bobonich

Professors: Michael Bratman, Joshua Cohen, John Etchemendy, Dagfinn

Føllesdal (Autumn), Michael Friedman (on leave), Helen Longino,

Grigori Mints (on leave Spring), Julius Moravcsik (on leave Autumn),

John Perry, Kenneth Taylor, Johan van Benthem (Spring), Thomas

Wasow, Allen Wood

Associate Professors: Lanier Anderson, Chris Bobonich, Mark Crimmins,

Graciela De Pierris, Debra Satz (on leave)

Assistant Professors: Nadeem Hussain (on leave), Agnieszka Jaworska,

Krista Lawlor, Marc Pauly, Tamar Schapiro (on leave)

Professor (Research): Rega Wood (on leave Winter, Spring)

Lecturers: Katherine Dunlop, Thomas Ryckman

Acting Assistant Professor: David Hills

Courtesy Professors: Reviel Netz, Josiah Ober, Denis Phillips

Visiting Professor: Paolo Mancosu

Visiting Assistant Professors: Luca Ferrero, Jeffrey Seidman

Department Offices: Building 90

Mail Code: 94305-2155

Department Phone: (650)723-2547

Email: philosophy@csl.stanford.edu

Web Site: <http://www-philosophy.stanford.edu>

Courses given in Philosophy have the subject code PHIL. For a complete list of subject codes, see Appendix.

Philosophy concerns itself with fundamental problems. Some are abstract and deal with the nature of truth, justice, value, and knowledge; others are more concrete, and their study may help guide conduct or enhance understanding of other subjects. Philosophy also examines the efforts of past thinkers to understand the world and people's experience of it.

Although it may appear to be an assortment of different disciplines, there are features common to all philosophical enquiry. These include an emphasis on methods of reasoning and the way in which judgments are formed, on criticizing and organizing beliefs, and on the nature and role of fundamental concepts.

Students of almost any discipline can find something in philosophy which is relevant to their own specialties. In the sciences, it provides a framework within which the foundations and scope of a scientific theory can be studied, and it may even suggest directions for future development. Since philosophical ideas have had an important influence on human endeavors of all kinds, including artistic, political, and economic, students of the humanities should find their understanding deepened by acquaintance with philosophy.

Philosophy is an excellent major for those planning a career in law, medicine, or business. It provides analytical skills and a breadth of perspective helpful to those called upon to make decisions about their own conduct and the welfare of others. Philosophy majors who have carefully planned their undergraduate program have an excellent record of admission to professional and graduate schools.

The Special Program in the History and Philosophy of Science enables students to combine interests in science, history, and philosophy. Students interested in this program should see the special adviser.

The joint major in Philosophy and Religious Studies combines courses from both departments into a coherent theoretical pattern.

The Tanner Memorial Library of Philosophy contains an excellent working library and ideal conditions for study.

Graduate students and undergraduate majors in philosophy have formed associations for discussion of philosophical issues and the reading of papers by students, faculty, and visitors. These associations elect student representatives to department meetings.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

There are two ways of majoring in philosophy: the General Program and the Special Program in the History and Philosophy of Science. A student completing either of these receives a B.A. degree in Philosophy. There is also a major program offered jointly with the Department of Religious Studies. To declare a major, a student should consult with the Director of Undergraduate Study and see the undergraduate student services administrator to be assigned an adviser and work out a coherent plan. The department strongly urges proficiency in at least one foreign language.

GENERAL PROGRAM

- Course requirements, minimum 55 units:
 - preparation for the major: an introductory course (under 100 and 80. (PHIL 80 should normally be taken no later than the first quarter after declaring the major.) Students taking both quarters of the Winter/Spring Philosophy Introduction to the Humanities (IHUM) track can count 5 units toward the introductory Philosophy requirement.
 - the core, 24 additional Philosophy units, as follows:
 - Logic: one from 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
 - Philosophy of science: any course from 60, 61, 156, 163-168
 - Moral and political philosophy: one from 170-173
 - Metaphysics and epistemology: one from 180-189
 - History of philosophy: 100 and 102 are required of each major
 - one undergraduate philosophy seminar from the 194 series.
 - electives: courses numbered 10 or above, at least 13 units of which must be in courses numbered above 99.
- Units for Tutorial, Directed Reading (PHIL 196, 197, 198), *The Dualist* (PHIL 198), Honors Seminar (PHIL 199), or affiliated courses may not be counted in the 55-unit requirement. No more than 10 units completed with grades of "satisfactory" and/or "credit" may be counted in the 55-unit requirement.
- A maximum of 10 transfer units or two courses can be used for the departmental major. In general, transfer courses cannot be used to satisfy the five area requirements or the undergraduate seminar requirement. Students may not substitute transfer units for the PHIL 80 requirement.

SPECIAL PROGRAM IN HISTORY AND PHILOSOPHY OF SCIENCE

Undergraduates may major in Philosophy with a degree field in History and Philosophy of Science under the Department of Philosophy. Each participating student is assigned an adviser who approves the course of study. A total of 61 units are required for the sub-major, to be taken according to requirements 1 through 5 below. Substitutions for the listed courses are allowed only by written consent of the undergraduate adviser for History and Philosophy of Science. Students are encouraged to consider doing honors work with an emphasis on the history and philosophy of science. Interested students should see the description of the honors thesis in Philosophy and consult their advisers for further information.

- Three science courses (for example, biology, chemistry, physics) for 12 units.
- The following Philosophy (PHIL) core courses must be completed with a letter grade by the end of the junior year:
 - one from 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
 - 60 or 61
 - 80
- Three history of science courses.
- Three philosophy of science courses, of which one must be PHIL 164.
- Three additional courses related to the major, in philosophy or history, to be agreed on by the adviser.
- At least six courses in the major must be completed at Stanford with a letter grade. Units for Tutorial, Directed Reading, or *The Dualist* (196, 197, 198) may not be counted in the requirement. No more than

10 units completed with grades of “satisfactory” and/or “credit” may be counted in the requirement.

- Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring a major. Transfer courses are strictly limited when used to satisfy major requirements.

SPECIAL OPTION IN PHILOSOPHICAL AND LITERARY THOUGHT

Undergraduates may major in Philosophy with a special option in philosophy and literature. This option is declared to the department; it is not declared on Axess, and it does not appear on the transcript or the diploma. Students in this option take courses alongside students from other major departments which also have a specialized option associated with the program for the study of philosophical and literary thought, with administrative staff in the DLCL. Each student in this option is assigned an adviser in Philosophy, and students’ schedules and overall course of study must be approved in writing by the adviser, and the Directors of Undergraduate Studies of Philosophy and of the program.

A total of 65 units must be completed for this option, including the following requirements.

- Core requirements for the major in Philosophy, including
 - an introductory course
 - PHIL 80
 - the core distribution requirements listed in section 1b of the general program above
- Gateway course in philosophy and literature (PHIL 81). This course should be taken as early as possible in the student’s career, normally in the sophomore year.
- Three courses in a single national literature, chosen by the student in consultation with the adviser and the program director of undergraduate studies. This normally involves meeting the language proficiency requirements of the relevant literature department.
- Electives within Philosophy beyond the core requirements totaling at least 5 units, and drawn from courses numbered 100 or higher.
- Two upper division courses of special relevance to the study of philosophy and literature, as identified by the committee in charge of the program. A list of approved courses is available from the program director of undergraduate studies.
- Capstone seminar in the PHIL 194 series.
- Capstone seminar of relevance to the study of philosophy and literature, as approved by the program committee. In some cases, with approval of the Philosophy Director of Undergraduate Study and the program director of undergraduate studies, the same course may be used to meet requirements 6 and 7 simultaneously. In any case, the student’s choice of a capstone seminar must be approved in writing by the Philosophy Director of Undergraduate Study and the program director of undergraduate studies.

Students are encouraged to consider doing honors work in a topic related to philosophy and literature, either through the Philosophy honors program, or through Interdisciplinary Studies in the Humanities.

The following rules also apply to the special option:

- Units for Honors Tutorial, Directed Reading (PHIL 196, 197, 198), *The Dualist* (PHIL 198), Honors Seminar (PHIL 199) may not be counted toward the 65-unit requirement. No more than 10 units with a grade of “satisfactory” or “credit” may be counted toward the unit requirement.
- A maximum of 15 transfer units may be counted toward the major, at most 10 of which may substitute for courses within Philosophy. Transfer credits may not substitute for PHIL 80 or 81, and are approved as substitutes for the five area requirements or PHIL 194 only in exceptional cases.
- Courses offered in other departments may be counted toward requirements 3, 5, and 7, but such courses, including affiliated courses, do not generally count toward the other requirements. In particular, such courses may not satisfy requirement 4.
- Units devoted to meeting the language requirement are not counted toward the 65-unit requirement.

MINORS

A minor in Philosophy consists of at least 30 units of Philosophy courses satisfying the following conditions:

- IHUM 23A and B (The Fate of Reason) may be counted for a maximum of 5 units.
- At least 10 units must be from courses numbered 100 or above.
- The 30 units must include one of:
 - a history of philosophy course numbered 100 or above
 - two quarters of Area 1 (only 5 of the 10 units can count towards 30-unit requirement)
- One course from any two of the following three areas (PHIL):
 - Philosophy of science and logic: 60, 61, 156, 163-168; 50 (formerly 57), 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169)
 - Moral and political philosophy: 20, 30, 170-172
 - Metaphysics and epistemology: 10, 80, 180-189
- Units for tutorials, directed reading, and affiliated courses may not be counted.
- Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring. The number of transfer units is generally limited to a maximum of 10.
- No more than 6 units completed with grades of “satisfactory” or “credit” count towards the 30-unit requirement.

Students must declare their intention to minor in Philosophy in a meeting with the Director of Undergraduate Study. This formal declaration must be made no later than the last day of the quarter two quarters before degree conferral. The Permission to Declare a Philosophy Minor (signed by the Director of Undergraduate Study) lists courses taken and to be taken to fulfill minor requirements. This permission is on file in the department office. Before graduation, a student’s record is checked to see that requirements have been fulfilled, and the results are reported to the University Registrar.

HONORS PROGRAM

Students who wish to undertake a more intensive and extensive program of study, including seminars and independent work, are invited to apply for the honors program during Winter Quarter of the junior year. Admission is selective on the basis of demonstrated ability in philosophy, including an average grade of at least ‘A-’ in a substantial number of philosophy courses and progress towards satisfying the requirements of the major.

With their application, candidates should submit an intended plan of study for the remainder of the junior and the senior years. It should include at least 5 units of Senior Tutorial (196) during Autumn and/or Winter Quarter(s) of the senior year. Students who are applying to Honors College may use the same application for philosophy honors. In the quarter preceding the tutorial, students should submit an essay proposal to the Philosophy undergraduate director and determine an adviser.

Students applying for honors should enroll in Junior Honors Seminar (199) during the Spring Quarter of the junior year.

The length of this essay may vary considerably depending on the problem and the approach; usually it falls somewhere between 7,500 and 12,500 words. The honors essay may use work in previous seminars and courses as a starting point, but it cannot be the same essay that has been used, or is being used, in some other class or seminar. It must be a substantially new and different piece of work reflecting work in the tutorials.

A completed draft of the essay is submitted to the adviser at the end of the Winter Quarter of the senior year. Any further revisions must be finished by the fifth full week of the Spring Quarter, when three copies of the essay are to be given to the undergraduate secretary. The honors essay is graded by the adviser together with a second reader, chosen by the adviser in consultation with the student. The student also provides an oral defense of the thesis at a meeting with the adviser and second reader. The essay must receive a grade of ‘A-’ or better for the student to receive honors.

Honors tutorials represent units in addition to the 55-unit requirement.

The Department of Philosophy cooperates with the honors component of the “Interdisciplinary Studies in Humanities” as described in that section of this bulletin.

JOINT MAJOR IN PHILOSOPHY AND RELIGIOUS STUDIES

The joint major in Philosophy and Religious Studies consists of 60 units of course work with approximately one third each in the philosophy core, the religious studies core, and either the general major or the special concentration. Affiliated courses cannot be used to satisfy this requirement.

No courses in either the philosophy or religious studies core may be taken satisfactory/no credit or credit/no credit.

In general, transfer units cannot be used to satisfy the core requirements. Transfer units and substitutions must be approved by the director of undergraduate studies in the appropriate department.

CORE REQUIREMENTS

1. Philosophy (PHIL) courses:
 - a) 80
 - b) 16 units, including at least one Philosophy course from each of the following areas:
 - 1) Logic and philosophy of science: 50 (formerly 57), 60, 61, 150 (formerly 159), 151 (formerly 160A), 154 (formerly 169), 156, 162-168
 - 2) Ethics and value theory: 170-173
 - 3) Epistemology, metaphysics, and philosophy of language: 180-189
 - 4) History of philosophy: 100-103
2. Religious Studies courses: 20 units, including at least two courses in diverse religious traditions (for example, an Eastern and a Western or a literate and a preliterate tradition) and including at least one seminar.

General Major Requirements—Five additional courses (approximately 20 units) divided between the two departments. No more than 5 of these units may come from courses numbered under 99 in either department. Each student must also take at least one undergraduate seminar in religious studies and one undergraduate seminar in philosophy.

Special Concentration—With the aid of an adviser, students pursue a specialized form of inquiry in which the combined departments have strength; for example, American philosophy and religious thought, philosophical and religious theories of human nature and action, philosophy of religion. Courses for this concentration must be approved in writing by the adviser.

Directed Reading and Satisfactory/No Credit Units—Units of directed reading for fulfilling requirements of the joint major are allowed only with special permission. No more than 10 units of work with a grade of ‘satisfactory’ count toward the joint major.

Directed Reading and Satisfactory/No Credit Units—Units of directed reading for fulfilling requirements of the joint major are allowed only with special permission. No more than 10 units of work with a grade of ‘satisfactory’ count toward the joint major.

HONORS PROGRAM

Students pursuing a joint major in Philosophy and Religious Studies may also apply for honors by following the procedure for honors in either of the departments.

COTERMINAL BACHELOR’S AND MASTER’S DEGREES

It is possible to earn an M.A. in Philosophy while earning a B.A. or B.S. This can usually be done by the end of the fifth undergraduate year, although a student whose degree is not in philosophy may require an additional year. Standards for admission to, and completion of, this program are the same as for M.A. applicants who already have the bachelor’s degree when matriculating. Applicants for the coterminal program are not, however, required to take the Graduate Record Exam. Information about applying is available from Graduate Admissions in the Registrar’s Office. The application deadline for Philosophy is January 10.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

GRADUATE PROGRAMS

The department is prepared to direct and supervise individual study and research to supplement instruction offered in the courses listed below. In addition, advanced seminars not listed in the catalog are frequently organized in response to student interest. Candidates for advanced degrees are urged to discuss their entire program of study with their department advisers as early as possible.

Prospective graduate students should see <http://gradadmissions.stanford.edu> for information and application materials. Applicants should take the Graduate Record Examination by October of the year the application is submitted.

MASTER OF ARTS

University requirements for the M.A. are discussed in the “Graduate Degrees” section of this bulletin.

Four programs lead to the M.A. in Philosophy. One is a general program providing a grounding in all branches of the subject. The others provide special training in one branch.

Admissions—All prospective master’s students, including those currently enrolled in other Stanford programs, must apply for admission to the program. The application deadline is March 28 of the academic year preceding entry into the program. In exceptional circumstances, consideration may be given to applications received after the March 28 deadline but before April 30. No fellowships are available. Entering students must meet with the director of the master’s program and have their advisers’ approval, in writing, of program proposals. The master’s program should not be considered a stepping stone to the doctoral program; these two programs are separate and distinct.

Unit Requirements—Each program requires a minimum of 45 units in philosophy. Students in a special program may be allowed or required to replace up to 9 units of philosophy by 9 units in the field of specialization. Although the requirements for the M.A. are designed so that a student with the equivalent of a strong undergraduate philosophy major at Stanford might complete them in one year, most students need longer. Students should also keep in mind that although 45 units is the minimum required by the University, quite often more units are necessary to complete department requirements. Up to 6 units of directed reading in philosophy may be allowed. There is no thesis requirement, but an optional master’s thesis or project, upon faculty approval, may count as the equivalent of up to 8 units. A special program may require knowledge of a foreign language. At least 45 units in courses numbered 100 or above must be completed with a grade of ‘B-’ or better at Stanford. Students are reminded of the University requirements for advanced degrees, and particularly of the fact that for the M.A., students must complete three full quarters as measured by tuition payment.

GENERAL PROGRAM

The General Program requires a minimum of 45 units in Philosophy courses numbered above 99. These courses must be taken for a letter grade and the student must receive at least a ‘B-’ in the course. Courses taken to satisfy the undergraduate core or affiliated courses may not be counted in the 45 units. The requirement has three parts:

1. *Undergraduate Core*: students must have when they enter, or complete early in their program, the following undergraduate courses (students entering from other institutions should establish equivalent requirements with a master’s adviser upon arrival or earlier):
 - a) Logic: 50 (formerly 57), 150 (formerly 159), or 151 (formerly 160A)
 - b) Philosophy of science: any course from 60, 61, 163-167
 - c) Moral and political philosophy: one from 170-173
 - d) Metaphysics and epistemology: one from 80, 180-189
 - e) History of philosophy: two history of philosophy courses numbered 100 or above
2. *Graduate Core*: students must take at least one course numbered over 105 from three of the following five areas (courses used to satisfy the undergraduate core cannot also be counted toward satisfaction of the graduate core). Crosslisted and other courses taught outside the Department of Philosophy do not count towards satisfaction of the core.

- a) Logic and semantics
- b) Philosophy of science and history of science
- c) Ethics, value theory, and moral and political philosophy
- d) Metaphysics, epistemology, and philosophy of language
- e) History of philosophy

Each master's candidate must take at least two courses numbered above 200 (these cannot be graduate sections of undergraduate courses). One may be a graduate core seminar (360, 370, 380, 381), but no student is admitted to a core seminar before completing undergraduate requirements in the area of the seminar and securing the approval of the instructor.

- 3. Specialization: students must take at least three courses numbered over 105 in one of the five areas.

SPECIAL PROGRAM IN SYMBOLIC SYSTEMS

Students should have the equivalent of the Stanford undergraduate major in Symbolic Systems. Students who have a strong major in one of the basic SSP disciplines (philosophy, psychology, linguistics, computer science) may be admitted, but are required to do a substantial part of the undergraduate SSP core in each of the other basic SSP fields. This must include the following three philosophy courses or their equivalents: 80; 151 (formerly 160A); and one from 181, 183, 184, 186. This work does not count towards the 45-unit requirement.

COURSE REQUIREMENTS

- 1. Four courses in philosophy at the graduate level (numbered 200 or above), including courses from three of the following five areas:
 - a) Philosophy of language
 - b) Logic
 - c) Philosophy of mind
 - d) Metaphysics and epistemology
 - e) Philosophy of science

At most two of the four courses may be graduate sections of undergraduate courses numbered 100 or higher.

- 2. Three courses numbered 100 or higher from outside Philosophy, chosen in consultation with an adviser. These courses should be from two of the following four areas:
 - a) Psychology
 - b) Linguistics
 - c) Computer Science
 - d) Education

Remaining courses are chosen in consultation with and approved by an adviser.

SPECIAL PROGRAM IN THE PHILOSOPHY OF LANGUAGE

Admission is limited to students with substantial preparation in philosophy or linguistics. Those whose primary preparation has been in linguistics may be required to satisfy all or part of the undergraduate core requirements as described in the "General Program" subsection above. Those whose preparation is primarily in philosophy may be required to take additional courses in linguistics.

COURSE REQUIREMENTS

- 1. Philosophy of language: two approved courses in the philosophy of language numbered 180 or higher.
- 2. Syntactic theory and generative grammar: 384 and LINGUIST 231.
- 3. Logic: at least two approved courses numbered 151 (formerly 160A) or higher.
- 4. An approved graduate-level course in mathematical linguistics or automata theory.

DOCTOR OF PHILOSOPHY

The University's basic requirements for the Ph.D. degree (residence, dissertation, examination, and so on) are discussed in the "Graduate Degrees" section of this bulletin. The requirements detailed here are department requirements.

All courses used to satisfy proficiency requirements must be passed with a letter grade of 'B-' or better (no satisfactory/no credit).

At the end of each year, the department reviews the progress of each student to determine whether the student is making satisfactory progress, and on that basis to make decisions about probationary status and termination from the program where appropriate.

Any student in one of the Ph.D. programs may apply for the M.A. when all University and department requirements have been met.

PROFICIENCY REQUIREMENTS

- 1. *Course requirements*, to be completed during the first two years:
 - a) four core graduate courses and seminars in philosophy of language (381); philosophy of mind, metaphysics, and epistemology (380); value theory (370); and philosophy of science (360)
 - b) three of the four items listed below:
 - 1) three history courses, each consisting of an approved graduate-level course in the history of philosophy. Courses satisfying this seven-out-of-eight requirement must include at least one history course in ancient philosophy, one in modern.
 - 2) PHIL 151 (formerly 160A)
 - 3) PHIL 150 (formerly 159) or the equivalent
 - 4) A total of at least 49 units of course work in the Department of Philosophy numbered above 110, but not including Teaching Methods (PHIL 239) or affiliated courses. Units of Individual Directed Reading (PHIL 240) may be included only with the approval of the Director of Graduate Study.
- 2. *Teaching Assistance*: a minimum of five quarters of teaching assistance, usually during the second and third years. As part of the training for being a teaching assistant, Ph.D. students are required to take PHIL 239 during Spring Quarter of their first and second years.
- 3. *Candidacy*: to continue in the Ph.D. program, each student must be approved for candidacy during the sixth academic quarter (normally the Spring Quarter of the student's second year). Students may be approved for candidacy on a conditional basis if they have only one or two outstanding deficiencies, but are not officially advanced to candidacy until these deficiencies have been removed. Approval for candidacy indicates that, in the department's judgment, the student can successfully complete the Ph.D. In reaching this judgment, the department considers the overall quality of the student's work during the first six quarters and the student's success in fulfilling course requirements.
- 4. During the third year of graduate study, and after advancement to candidacy, a Ph.D. student should successfully complete at least three graduate-level courses/seminars, at least two of which must be in philosophy. Courses required for candidacy are not counted toward satisfaction of this requirement. Choice of courses/seminars outside philosophy is determined in consultation with a student's adviser.
- 5. During the summer of their second year, students are required to attend a dissertation development seminar given by the department.
- 6. Dissertation work and defense: the third and fourth (and sometimes fifth) years are devoted to dissertation work.
 - a) *Dissertation Proposal*: by Spring Quarter of the third year, students select a dissertation topic, a reading committee, and some possible thesis relative to that topic. The topic and thesis should be sketched in a proposal of three to five pages, plus a detailed, annotated bibliography indicating familiarity with the relevant literature. The proposal should be approved by the reading committee before the meeting on graduate student progress late in Spring Quarter.
 - b) *Departmental Oral*: during Autumn Quarter of the fourth year, students take an oral examination, called the "Departmental Oral," based on at least 30 pages of written work, in addition to the proposal. The aim of the exam is to help the student arrive at an acceptable plan for the dissertation and to make sure that the student, thesis, topic, and adviser make a reasonable fit. In cases where such an exam is deemed inappropriate by the reading committee, the student may be exempted by filing a petition with the Director of Graduate Study, signed by the student and the members of the reading committee.
 - c) *Fourth-Year Colloquium*: no later than the Spring Quarter of the fourth year, students present a research paper in a seminar open to the entire department. This paper should be on an aspect of the student's dissertation research.

- d) *University Oral Exam*: Ph.D. students must submit a completed draft of the dissertation to the three-person reading committee at least one month before the student expects to defend the thesis in the University oral exam. If the student is given permission to go forward, the University orals take place approximately two weeks later. A portion of the exam consists of a student presentation based on the dissertation and is open to the public. A closed question period follows. If the draft is ready by Autumn Quarter of the fourth year, the student can request that the University oral count as the department oral.

SPECIAL GRADUATE PROGRAMS

The department recognizes that some students may need to spend a large amount of time preparing themselves in some other discipline related to their philosophical goals, or in advanced preparation in some area within philosophy. In such circumstances, the department may be willing to waive some of the Ph.D. requirements. Such an exemption is not automatic; a program must be worked out with an adviser and submitted to the department some time in the student's first year. This proposal must be in writing and must include:

1. The areas to be exempted (see below).
2. A program of additional courses and seminars in the special area (usually at least 12 units).
3. A justification of the program that considers both intellectual coherence and the student's goals.

The department believes there is plenty of room for normal specialization within the program as it stands, and that all students specialize to some extent. Thus, the intent is not to exempt courses on a one-to-one basis, but only to grant exemptions when a student plans an extensive and intensive study of some relevant area.

Special program students may be exempted from the following:

1. One additional item from the items listed above in requirement 1(a)
2. PHIL 150 (formerly 159); but in this case, a student must take PHIL 50 (formerly 57)

If a student's special program involves substantial course work outside of philosophy, the student may, with the approval of the adviser, petition the department to reduce requirement 1(d), the Philosophy unit requirement for the first two years. Normally this requirement is not reduced below 32 units.

PH.D. MINOR

To obtain a Ph.D. minor in Philosophy, students must follow these procedures:

1. Consult with the Director of Graduate Study to establish eligibility, and select a suitable adviser.
2. Give to the department academic assistant a signed copy of the program of study (designed with the adviser) which offers:
 - a) 30 units of courses in the Department of Philosophy with a letter grade of 'B-' or better in each course. No more than 3 units of directed reading may be counted in the 30-unit requirement.
 - b) At least one course or seminar numbered over 99 to be taken in each of these five areas:
 - 1) Logic
 - 2) Philosophy of science
 - 3) Ethics, value, theory, and moral and political philosophy
 - 4) Metaphysics, epistemology, and philosophy of language
 - 5) History of philosophy
 - c) Two additional courses numbered over 199 to be taken in one of those (b) five areas.
3. A faculty member from the Department of Philosophy (usually the student's adviser) serves on the student's doctoral oral examination committee and may request that up to one third of this examination be devoted to the minor subject.
4. Paperwork for the minor must be submitted to the department office before beginning the program.

INTERDEPARTMENTAL PROGRAMS

GRADUATE PROGRAM IN HUMANITIES

The Department of Philosophy also participates in the Graduate Program in Humanities leading to the joint Ph.D. degree in Philosophy and Humanities. It is described in the "Interdisciplinary Studies in Humanities" section of this bulletin.

GRADUATE PROGRAM IN COGNITIVE SCIENCE

Philosophy participates with the departments of Computer Science, Linguistics, and Psychology in an interdisciplinary program in Cognitive Science. It is intended to provide an interdisciplinary education, as well as a deeper concentration in philosophy, and is open to doctoral students. Students who complete the requirements within Philosophy and the Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Philosophy. To receive this field designation, students must complete 30 units of approved courses, 18 of which must be taken in two disciplines outside of philosophy. The list of approved courses can be obtained from the Cognitive Science program located in the Department of Psychology.

SPECIAL TRACK IN PHILOSOPHY AND SYMBOLIC SYSTEMS

Students interested in interdisciplinary work relating philosophy to artificial intelligence, cognitive science, computer science, linguistics, or logic may pursue a degree in this program.

Prerequisites— Ideally, admitted students have covered the equivalent of the core of the undergraduate Symbolic Systems Program requirements as described in that section of this bulletin, including courses in artificial intelligence (AI), cognitive science, linguistics, logic, and philosophy. The graduate program is designed with this background in mind. Students missing part of this background may need additional course work. Aside from the required course work below, the Ph.D. requirements are the same as for the regular program.

Courses of Study— The program consists of two years of courses and two years of dissertation work. Students are required to take the following courses in the first two years:

1. Six Philosophy courses:
 - a) two of the following: 360, 370, 380, 381
 - b) one course in the history of modern philosophy
 - c) two quarters of graduate logic courses from among 350A, 351A, 352A, 353A
 - d) at least one additional seminar in the general area of symbolic systems: e.g., 354, 358
2. Five cognitive science and computer science courses:
 - a) at least two courses in cognitive psychology
 - b) two or three graduate courses in computer science, at least one in AI and one in theory
3. Three linguistics and computational linguistics courses:
 - a) graduate courses on natural language that focus on two of the following areas: phonetics and phonology, syntax, semantics, or pragmatics
 - b) one graduate course in computational linguistics, typically LINGUIST 239
4. At least two additional graduate seminars at a more advanced level, in the general area of the program, independent of department. These would typically be in the area of the student's proposed dissertation project.

The requirements for the third year are the same as for other third-year graduate students in philosophy: a dissertation proposal, creation of a dissertation committee, and at least three approved graduate courses and seminars. The dissertation committee must include at least one member of the Department of Philosophy and one member of the Program in Symbolic Systems outside the Department of Philosophy.

The requirement for the fourth year is the same as for the other graduate students in philosophy: a department oral on an initial draft of part of the dissertation, a fourth year colloquium, and a University oral exam when the dissertation is essentially complete.

JOINT PROGRAM IN ANCIENT PHILOSOPHY

This program is jointly administered by the Departments of Classics and Philosophy and is overseen by a joint committee composed of members of both departments. It provides students with the training, specialist skills, and knowledge needed for research and teaching in ancient philosophy while producing scholars who are fully trained as either philosophers (with a strong specialization in ancient languages and philology) or classicists (with a concentration in philosophy).

Students are admitted to the program by either department. Graduate students admitted by the Philosophy department receive their Ph.D. from the Philosophy department; those admitted by the Classics department receive their Ph.D. from the Classics department. For Philosophy graduate students, this program provides training in classical languages, literature, culture, and history. For Classics graduate students, this program provides training in the history of philosophy and in contemporary philosophy.

Each student in the program is advised by a committee consisting of one professor in each department.

Requirements for Philosophy Graduate Students:

These are the same as the proficiency requirements for the Ph.D. in Philosophy with the following exception: if the student has already taken two courses in modern philosophy, there is no need to take a course in modern philosophy to satisfy proficiency requirement 1.a.2.

One year of Greek is a requirement for admission to the program. If students have had a year of Latin, they are required to take 3 courses in second- or third-year Greek or Latin, at least one of which must be in Latin. If they have not had a year of Latin, they are then required to complete a year of Latin, and take two courses in second- or third-year Greek or Latin.

Students are also required to take at least three courses in ancient philosophy at the 200 level or above, one of which must be in the Classics department and two of which must be in the Philosophy department.

GRADUATE DEGREES IN HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY

See the description in the “History and Philosophy of Science and Technology” section of this bulletin.

GRADUATE FELLOWSHIPS AND ASSISTANTSHIPS

A limited amount of fellowship support is available for Ph.D. students in philosophy. Students request aid by checking the appropriate box on the application form. Details of this program may be obtained from the department. Note that a condition of financial aid may be teaching assistance that goes beyond the Ph.D. requirement.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements. See the quarterly *Time Schedule* for revised listings.

INTRODUCTORY

These courses acquaint the student with some of the most important problems, positions, and methods in Philosophy. Some are designed to give general preparation for further work in Philosophy. Some apply the philosopher’s approach to particular problems and subjects encountered in other areas of study.

PHIL 10. God, Self, and World: An Introduction to Philosophy—Traditional philosophical problems including the existence of God, how and what one can know about the world, how to understand the nature of the mind and its relation to the body, and whether people have free will. Paradoxes. Readings include classical and contemporary texts. GER:DB-Hum
5 units, Win (Perry, J)

PHIL 11N. Skepticism—Stanford Introductory Seminar. Preference to freshmen. Historical and contemporary philosophical perspectives on the limits of human knowledge of a mind-independent world and causal laws of nature. The nature and possibility of a priori knowledge. GER:DB-Hum
3 units, Aut (De Pierris, G)

PHIL 13N. What is Truth?—Stanford Introductory Seminar. Preference to freshmen. This question can be answered precisely in some important cases. In some of those cases, truth can be established through proof. Successes in this quest for certified truth connected to successes of automation of reasoning. Recommended: 5 units AP in Mathematics, or 5 units in Stanford Mathematics courses with a grade of A. GER:DB-Hum
3 units, Win (Mints, G)

PHIL 14N. Belief—Stanford Introductory Seminar. Preference to freshmen. Is there anything wrong with believing something without evidence? Is it possible? The nature and ethics of belief, and belief’s relation to evidence and truth. How much control do believers have over their beliefs? GER:DB-Hum
3 units, Spr (Lawlor, K)

PHIL 16N. Values and Objectivity—Stanford Introductory Seminar. Preference to freshmen. What is meant by the objectivity of beliefs and attitudes? Can the commitment of science to truthfulness be free of particular perspectives and subjective influence? Is objectivity a matter of degree relative to the kind of inquiry undertaken? Readings from philosophy of science, moral philosophy, and philosophy of mind. GER:DB-Hum
3 units, Aut (Ryckman, T)

PHIL 20. Introduction to Moral Philosophy—(Same as ETHICSOC 20.) What is the basis of moral judgment? What makes right actions right and wrong actions wrong? What makes a state of affairs good or worth promoting? What is it to have a good or virtuous character? Answers to classic questions in ethics through the works of traditional and contemporary authors. GER:DB-Hum, EC-EthicReas
5 units, Spr (Seidman, J)

PHIL 30. Introduction to Political Philosophy—(Same as ETHICSOC 30, POLISCI 3.) State authority, justice, liberty, and equality through major works in political philosophy. Topics include human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion, and politics. GER:DB-Hum, EC-EthicReas
5 units, Win (Stone, P)

PHIL 50. Introductory Logic—Propositional and predicate logic; emphasis is on translating English sentences into logical symbols and constructing derivations of valid arguments. GER:DB-Math
4 units, Aut (Alonso, F), Spr (Harp, R)

PHIL 60. Introduction to Philosophy of Science—(Same as HPS 60.) 20th-century views on the nature of scientific knowledge. Logical positivism and Popper; the problem of induction; Kuhn, Feyerabend, and radical philosophies of science; subsequent attempts to rebuild moderate empiricist and realist positions. GER:DB-Hum
5 units, Aut (Longino, H)

PHIL 61. Philosophy and the Scientific Revolution—(Same as HPS 61.) The relationship between the scientific revolution of the 17th century that resulted in the birth of modern science and the contemporaneous intellectual developments constituting the birth of modern philosophy. Readings focus on Galileo and Descartes. GER:DB-Hum
5 units, not given this year

PHIL 77. Methodology in Ethics: Translating Theory into Practice—(Same as ETHICSOC 77.) Ideally, social policies are informed by ethical thought and reflection, but doing good in the world requires the active translation of moral theory and political philosophy into action. What kinds of empirical data are relevant to social decision making, and how should they be collected, evaluated, and integrated into normative analysis? What assumptions about human nature are in play? How should diverse cultural values be addressed? Case studies from biomedical science, business, and government.
4 units, Spr (Staff)

PHIL 78. Medical Ethics—(Same as ETHICSOC 78.) Introduction to moral reasoning and its application to problems in medicine: informed consent, the requirements and limits of respect for patients' autonomy, surrogate decision making, euthanasia and physician-assisted suicide, and abortion. GER:DB-Hum, EC-EthicReas

4 units, Spr (Jaworska, A)

PHIL 80. Mind, Matter, and Meaning—Central topics in philosophy: free will and determinism, the relation of mind and body, and whether machines can think. Emphasis is on analytical writing skills. Prerequisite: introductory philosophy course. GER:DB-Hum, WIM

5 units, Aut (Lawlor, K), Spr (Crimmins, M)

PHIL 81. Philosophy and Literature—(Same as FRENGEN 181, ITALGEN 181.) Required gateway course for Philosophical and Literary Thought track offered through Philosophy and DLCL. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4 units, Win (Anderson, L; Landy, J)

HISTORY OF PHILOSOPHY

100-103 are surveys of important figures and movements in Western philosophy. Other courses cover particular periods, movements, and figures in the history of philosophy. Prospective Philosophy majors should take as many as possible during the sophomore year.

PHIL 100. Greek Philosophy—Greek philosophical thought, covering Socrates, Plato, Aristotle, and the Hellenistic schools (the Epicureans, the Stoics, and the Skeptics). Topics: the nature of the soul, virtue and happiness, knowledge, and reality. GER:DB-Hum

4 units, Aut (Bobonich, C)

PHIL 102. Modern Philosophy, Descartes to Kant—Major figures in early modern philosophy in epistemology, metaphysics, and philosophy of mind. Writings by Descartes, Locke, Leibniz, Berkeley, Hume, and Kant. GER:DB-Hum

4 units, Win (Wood, A)

PHIL 103. 19th-Century Philosophy—Focus is on ethics and the philosophy of history. Works include Mill's *Utilitarianism*, Hegel's *The Philosophy of World History*, Marx's *Economic and Philosophic Manuscripts*, Kierkegaard's *The Sickness Unto Death*, and Nietzsche's *On the Genealogy of Morals*. GER:DB-Hum

4 units, not given this year

PHIL 107/207. Plato and Heraclitus—(Graduate students register for 207.) Similarities and differences.

3 units, Spr (Moravcsik, J)

PHIL 114/214. The Paradox of Seneca—(Graduate students register for 214; same as CLASSGEN 114/214.) Millionaire or ascetic, principled Stoic or compromised courtier, advocate of detachment or addict of bloodthirsty tragedies: the contradictory facets of the philosopher Seneca, tutor to the young Nero. His views on living and dying well, passion and philosophy, and nature and civilization. Readings in English from his prose writings and tragedies.

3-5 units, Spr (Bobonich, C; Braund, S)

PHIL 115/215. Foundations of Medieval Psychology—(Graduate students register for 215.) Western medieval faculty psychology. Focus on Albert the Great and changes in his views on sensation and understanding and the faculties of sense, imagination, and intellect. Other texts by Albert's student Thomas Aquinas and his predecessors, Richard Rufus and Roger Bacon. Changes in the comparative influence exerted by Avicenna and Averroes on the Western tradition of Aristotelian psychology. See <http://rrp.stanford.edu/Albert/news>. May be repeated for credit. GER:DB-Hum

3-5 units, Aut (Wood, R)

PHIL 117/217. Descartes—(Graduate students register for 217; formerly 121/221.) Descartes's philosophical writings on rules for the direction of the mind, method, innate ideas and ideas of the senses, mind, God, eternal truths, and the material world. GER:DB-Hum

4 units, Aut (De Pierris, G)

PHIL 118/218. British Empiricism, 1660s-1730s—(Graduate students register for 218.)

4 units, Spr (Dunlop, K)

PHIL 119/219. Rationalists—(Graduate students register for 219; formerly 143/243.) Developments in 17th-century continental philosophy. Descartes's views on mind, necessity, and knowledge. Spinoza and Leibniz emphasizing their own doctrines and their criticism of their predecessors. Prerequisite: 102. GER:DB-Hum

4 units, not given this year

PHIL 122/222. Hume—(Graduate students register for 222; formerly 120/220.) Hume's theoretical philosophy, in particular, skepticism and naturalism, the theory of ideas and belief, space and time, causation and necessity, induction and laws of nature, miracles, a priori reasoning, the external world, and the identity of the self. GER:DB-Hum

4 units, not given this year

PHIL 125/225. Kant's First Critique—(Graduate students register for 225.) The founding work of Kant's critical philosophy emphasizing his contributions to metaphysics and epistemology. His attempts to limit metaphysics to the objects of experience. Prerequisite: course dealing with systematic issues in metaphysics or epistemology, or with the history of modern philosophy. GER:DB-Hum

4 units, Win (De Pierris, G)

PHIL 126/226. Kant's Ethical Theory—(Graduate students register for 226.) Kant's moral philosophy based primarily on the *Groundwork of Metaphysics of Morals*, *Critique of Practical Reason*, and *The Metaphysics of Morals*. GER:DB-Hum

4 units, not given this year

PHIL 127/227. Kant's Ethical Theory—(Graduate students register for 227.) Readings include *Groundwork for the Metaphysics of Morals* and *The Metaphysics of Morals*. GER:DB-Hum

4 units, Aut (Wood, A)

PHIL 130/230. Hegel's Phenomenology of Spirit—(Graduate students register for 230; formerly 122/222.) The aims and parts of the execution of the philosophical project of Hegel's first major work. Issues in epistemology, metaphysics, and ethics; and the relationship between the systematic and historical aspects of Hegel's project. May be repeated for credit. Prerequisite: course in the history of modern philosophy. GER:DB-Hum

4 units, not given this year

PHIL 134/234. Phenomenology and Intersubjectivity—(Graduate students register for 234.) Readings from Husserl, Stein, Heidegger, Sartre, and Merleau-Ponty on subjects related to awareness of others. Topics include solipsism, collective experience, empathy, and objectification of the other. GER:DB-Hum

4 units, Aut (Scotland-Stewart, L)

PHIL 135/235. Existentialism—(Graduate students register for 235; formerly 132/232.) The existentialist preoccupation with human freedom. What constitutes authentic individuality? What is one's relation to the divine? How can one live a meaningful life? What is the significance of death? Rethinking the traditional problem of freedom and determinism in readings from Rousseau, Kierkegaard, and Nietzsche, and the extension of these ideas by Sartre, Beauvoir, and Camus, including social and political consequences in light of 20th-century fascism and feminism. GER:DB-Hum

4 units, not given this year

PHIL 136/236. History of Analytic Philosophy—(Graduate students register for 236; formerly 147/247.) Theories of knowledge in Frege, Carnap, and Quine. Emphasis is on conceptions of analyticity and treatment of logic and mathematics. Prerequisite: 50 and one course numbered 150-165 or 181-90. GER:DB-Hum

4 units, not given this year

PHIL 137/237. Wittgenstein—(Graduate students register for 237.) The main themes and claims in Wittgenstein's later work concentrating on his views about meaning, mind, knowledge, the nature of philosophical perplexity, and the nature of philosophical progress in his *Philosophical Investigations*. Emphasis is on the relationship between the novel arguments of the *Investigations* and its ways of writing up the results of philosophical questioning. GER:DB-Hum
4 units, Win (Hills, D)

PHIL 143/243. Quine—(Graduate students register for 243; formerly 183/283.) The philosophy of Quine: meaning and communication; analyticity, modality, reference, and ontology; theory and evidence; naturalism; mind and the mental. GER:DB-Hum
4 units, not given this year

LOGIC AND PHILOSOPHY OF SCIENCE

PHIL 150/250. Basic Concepts in Mathematical Logic—(Graduate students register for 250; formerly 159.) The concepts and techniques used in mathematical logic, primarily through the study of the language of first order logic. Topics: formalization, proof, propositional logic, quantifiers, sets, mathematical induction, and enumerability. GER:DB-Math
4 units, Aut (Wasow, T)

PHIL 150X. Basic Concepts in Mathematical Logic—Equivalent to the second half of 150. Students attend the first meeting of 150 and rejoin the class on October 30. Prerequisite: CS 103A or X, or PHIL 50.
2 units, Aut (Wasow, T)

PHIL 151/251. First-Order Logic—(Graduate students register for 251; formerly 160A.) The syntax and semantics of sentential and first-order logic. Concepts of model theory. Gödel's completeness theorem and its consequences: the Löwenheim-Skolem theorem and the compactness theorem. Prerequisite: 150 or consent of instructor. GER:DB-Math
4 units, Win (Pauly, M)

PHIL 152/252. Computability and Logic—(Graduate students register for 252.) Approaches to effective computation: recursive functions, register machines, and programming styles. Proof of their equivalence, discussion of Church's thesis. Elementary recursion theory. These techniques used to prove Gödel's incompleteness theorem for arithmetic, whose technical and philosophical repercussions are surveyed. Prerequisite: 151. GER:DB-Math
4 units, Spr (Pauly, M)

PHIL 153. Feminist Theories and Methods Across the Disciplines—(Same as FEMST 103/203.) The interdisciplinary foundations of feminist thought, and the nature of disciplines and of interdisciplinary work. The challenges of feminism for scholarship and research, taught by a Feminist Studies resource faculty member from one of the disciplines in question. GER:EC-Gender
4-5 units, Aut (Longino, H)

PHIL 154/254. Modal Logic—(Graduate students register for 254.) Syntax and semantics of modal logic, technical results like completeness, and correspondence theory. The interdisciplinary nature of modal logic: applications to philosophy, computer science, linguistics, mathematics, and economic game theory. Prerequisite: 150 (formerly 159) or preferably 151 (formerly 160A). GER:DB-Math
4 units, Aut (Pauly, M)

PHIL 156. Popper, Kuhn, and Lakatos—(Same as EDUC 214) These 20th-century philosophers of science raise fundamental issues dealing with the nature of scientific progress: the rationality of change of scientific belief, science versus non-science, role of induction in science, truth or verisimilitude as regulative ideals. Their impact in the social sciences and applied areas such as educational research. (SSPEP) GER:DB-Hum
3 units, not given this year

PHIL 157/257. Topics in Philosophy of Logic—(Graduate students register for 257.) Disputed foundational issues in logic; the question of what the subject matter and boundaries of logic are, such as whether what is called second-order logic should be counted as logic. What is the proper notion of logical consequence? May be repeated for credit. Pre- or corequisite: 151, or consent of instructor.
3 units, not given this year

PHIL 162/262. Philosophy of Mathematics—(Graduate students register for 262.) 20th-century approaches to the foundations and philosophy of mathematics. The background in mathematics, set theory, and logic. Schools and programs of logicism, predicativism, platonism, formalism, and constructivism. Readings from leading thinkers. Prerequisite: 151 or consent of instructor.
4 units, Spr (Mancosu, P)

PHIL 163/263. Significant Figures in Philosophy of Science—(Graduate students register for 263.) Directed study of two or more thinkers, past or present, who have made a lasting impact on contemporary philosophy of science. Subjects for 2006-07 are Henri Poincaré, Pierre Duhem, and Gaston Bachelard.
4 units, Win (Ryckman, T)

PHIL 164/264. Central Topics in the Philosophy of Science: Theory and Evidence—(Graduate students register for 264.) The relation of theory to evidence and prediction, problems of induction, empirical underdetermination of theory by evidence, and theory choice. Hypothetico-deductive, Bayesian, pragmatic, and inference to the best explanation models of explanation. The semantic approach to theories. GER:DB-Hum
4 units, not given this year

PHIL 165/265. Philosophy of Physics—(Graduate students register for 265.) Central topic alternates annually between space-time theories and philosophical issues in quantum mechanics. For 2006-07, absolute and relational theories of space, time, and motion. Newton's critique of Descartes and debate with Leibniz. The principle of relativity and space-time formulations of Aristotelian, Galilean, and relativity physics. Mach's principle and the theory of general relativity. Einstein's struggles with the principle of general covariance. Space-time substantivalism, and the meaning of background independence. May be repeated for credit if content is different. GER:DB-Hum
4 units, Aut (Ryckman, T)

PHIL 167A/267A. Philosophy of Biology—(Graduate students register for 267A.) Philosophical questions raised by evolutionary biology. The concepts of fitness and adaptation. How are hypotheses about adaptation to be tested? How should organisms be classified? How can the history of the phylogenetic branching process be inferred? Are there laws in evolutionary biology? Are theories in biology reducible to theories in physics? What does evolutionary biology contribute to the understanding of human mind and culture? GER:DB-Hum
4 units, not given this year

PHIL 167B/267B. Philosophy, Biology, and Behavior—(Graduate students register for 267B.) Continuation of 167A/267A. Further philosophical study of key theoretical ideas in biology, focusing on problems involving explanation of behavior. Topics: evolutionary versus proximate causal explanations of behavior; genetic and other determinisms; and classification and measurement of behavior. Prerequisites: 167A; or one PHIL course and either one BIOSCI course or Human Biology core; or equivalent with consent of instructor.
4 units, not given this year

PHIL 168/268. Theories of Truth—(Graduate students register for 268.) The correspondence, coherence, pragmatist and deflationary theories of truth. Tarski's semantic conception of truth and hierarchical truth definitions. The problems posed by the liar paradox for non-hierarchical theories. Formal theories of truth proposed since the 70s to deal with these problems.
4 units, Win (Feferman, S)

ETHICS, AESTHETICS, AND SOCIAL AND POLITICAL PHILOSOPHY

PHIL 170/270. Ethical Theory—(Graduate students register for 270; same as ETHICSOC 170.) Major strands in contemporary ethical theory. Readings include Bentham, Mill, Kant, and contemporary authors. GER: DB-Hum, EC-EthicReas

4 units, Spr (Jaworska, A)

PHIL 171/271. Justice—(Graduate students register for 271; same as ETHICSOC 171, POLISCI 136S.) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas

5 units, Aut (Cohen, J)

PHIL 172A. Promises—Philosophical issues and recent debates about promises. Promising as a central normative phenomenon. Disagreements among philosophers over the basis of promissory obligations and how they should be understood. Readings include Anscombe, Hume, Kolodny and Wallace, Rawls, Raz, Scanlon, Thomson, and Watson.

4 units, Win (Alonso, F)

PHIL 173A. Aesthetics: Metaphor across the Arts—What if a metaphor is an instructively compact work of art, or if finding a metaphor apt is an instructively simple case of finding something aesthetically valuable? What does this reveal about the nature of art and language? Introduction to the philosophical study of art and aesthetic value, organized around metaphor. Contemporary accounts of metaphor as a verbal device. Arguments for the existence of nonverbal metaphor in nonliterary arts. The power and appeal of metaphors drawn from art, art criticism, theoretical inquiry, and everyday life. GER:DB-Hum

4 units, Spr (Hills, D)

PHIL 173B/273B. Metaethics—(Graduate students register for 273B.) Can moral and ethical values be justified or is it just a matter of opinion? Is there a difference between facts and values? Are there any moral truths? Does it matter if there are not? Focus is not on which things or actions are valuable or morally right, but what is value or rightness itself. Contemporary metaethics. Prerequisites: 80 and an ethics course. GER:DB-Hum

4 units, Spr (Alonso, F)

PHIL 174/274. Freedom and the Practical Standpoint—(Graduate students register for 274.) Confronted with the question of how to act, people think of themselves as freely determining their own conduct. Natural science poses a challenge to this by explaining all events, including human actions, in terms of causal processes. Are people justified in thinking of themselves as free? Major philosophical approaches to this question: incompatibilism, compatibilism, and the two-standpoint view. GER:DB-Hum

4 units, Aut (Ferrero, L)

PHIL 175/275. Philosophy of Law—(Graduate students register for 275.) Philosophical foundations of law and the legal system. The justifiability of patterns of assigning legal responsibility within criminal law. Prerequisite: four courses in Philosophy including 80. GER:DB-Hum

4 units, Win (Bratman, M)

PHIL 175M/275M. Two Ethical Theories and Being a Person—(Graduate students register for 275M.) The distinction between the ethics of being a person and the ethics of rules as opposed to the distinction between Kantian ethics and utilitarianism or consequentialism. Comparison of these two types of ethics with respect to their relationship to agency and being a good person. Relations between Western ethics and those of other continents. GER:DB-Hum

4 units, not given this year

PHIL 176/276. Political Philosophy: The Social Contract Tradition—(Graduate students register for 276.) Why and under what conditions do human beings need political institutions? What makes them legitimate or illegitimate? What is the nature, source, and extent of the obligation to obey the legitimate ones, and how should people alter or overthrow the others? Answers by political theorists of the early modern period: Hobbes, Locke, Rousseau, and Kant. GER:DB-Hum

4 units, Win (Hills, D)

PHIL 176B/276B. The Economic Individual in the Behavioral Sciences—(Graduate students register for 276B.)

4 units, not given this year

PHIL 177. Philosophical Issues Concerning Race and Racism—(Same as POLISCI 136.) Concepts of race, race consciousness, and racism, and their connections. What is race and what is its role in racism? How should ethnic and racial identities be viewed to secure the conditions in which humanity can be seen as a single moral community whose members have equal respect? What laws, values, and institutions best embody the balance among competing goals of group loyalty, opposition to racism, and common humanity? Philosophical writings on freedom and equality, human rights, pluralism, and affirmative action. Historical accounts of group exclusion. GER:DB-Hum, EC-AmerCul

4 units, not given this year

PHIL 178. Ethics in Society Honors Seminar—(Same as ETHICSOC 190.) For students planning honors in Ethics in Society. Methods of research. Students present issues of public and personal morality; topics chosen with advice of instructor.

3 units, Win (Reich, R)

PHIL 179M/279M. Philosophy of Friendship—(Graduate students register for 279M.) Interactions between individual and communal well-being.

4 units, Win (Moravcsik, J)

PHIL 179S/279S. Moral Psychology, Reasons for Action, and Moral Theory—(Graduate students register for 279S.) What sorts of considerations does an ethical agent take to be good reasons for action? Work in moral psychology to illuminate the theory of practical reasons, and the theory of practical reasons to test the prospects for systematic moral theory. Can any systematic moral theory be reconciled with the moral psychology of ordinary, morally respectable agents? Reading include Bernard Williams, Rosalind Hursthouse, Peter Railton, T.M. Scanlon, and Barbara Herman.

4 units, Win (Seidman, J)

EPISTEMOLOGY, METAPHYSICS, PHILOSOPHY OF MIND, AND PHILOSOPHY OF LANGUAGE

PHIL 181/281. Philosophy of Language—(Graduate students register for 281.) The study of conceptual questions about language as a focus of contemporary philosophy both for its inherent interest and because philosophers see questions about language as behind perennial questions in other areas of philosophy including epistemology, the philosophy of science, metaphysics, and ethics. Introduction to key concepts and debates about the notions of meaning, truth, reference, and language use, with relations to psycholinguistics and formal semantics. Readings from philosophers such as Frege, Russell, Wittgenstein, Grice, and Kripke. Prerequisites: 80 and background in logic.

4 units, Win (Crimmins, M)

PHIL 184/284. Theory of Knowledge—(Graduate students register for 284.) Competing theories of epistemic justification (foundationalism, coherentism, and externalism) against the background of radical scepticism. Readings from contemporary sources. Prerequisite: 80 or consent of instructor. GER:DB-Hum

4 units, Spr (Lawlor, K)

PHIL 184F/284F. Feminist Theories of Knowledge—(Graduate students register for 284F; same as FEMST 166.) Feminist critique of traditional approaches in epistemology and alternative feminist approaches to such topics as reason and rationality, objectivity, experience, truth, the knowing subject, knowledge and values, knowledge and power. GER: EC-Gender

4 units, Spr (Longino, H)

PHIL 186/286. Philosophy of Mind—(Graduate students register for 286.) Debates concerning the nature of mental states, their relation to physical states of the human body, how they acquire their content, how people come to know about them in themselves and others, and the roles they play in the explanation of human conduct.

4 units, Win (Perry, J)

PHIL 187/287. Philosophy of Action—(Graduate students register for 287.) What is it to be an agent? Is there a philosophically defensible contrast between being an agent and being a locus of causal forces to which one is subject? What is it to act purposively? What is intention? What is it to act intentionally? What is it to act for a reason? Are the reasons for which one acts causes of one's action? What is it to act autonomously? Readings include Davidson and Frankfurt. Prerequisite: 80. GER:DB-Hum

4 units, Spr (Bratman, M)

PHIL 188. Personal Identity—People seem to remain the same despite the changes they undergo during their lives. Why? The answer can influence one's beliefs about whether people are essentially bodies or minds, and whether one's own survival matters. Readings include John Locke, Thomas Reid, David Hume, Bernard Williams, and Derek Parfit. GER: DB-Hum

4 units, Aut (Ferrero, L)

PHIL 189. Philosophical Applications of Cognitive Science—The relevance of recent discoveries about the mind to philosophical questions in metaphysics, epistemology and philosophy of science, and ethics. Questions include: is there a right way to carve up the world into categories? Are the rules of logic objective, or just the way we happen to think? Is there such a thing as objective right and wrong?

4 units, not given this year

PHIL 190. Introduction to Cognitive Science—(Same as LINGUIST 144, PSYCH 130, SYMBSYS 100.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci

4 units, Spr (Bresnan, J)

PHIL 193H. The Art of the Movies: Story, Drama, and Image—(Same as HUMNTIES 193H.) A philosophical study of how movies coordinate and transform elements they borrow from older arts of literary narrative, live theater, and graphic illustration. Examples from the career of Alfred Hitchcock. GER:DB-Hum

4 units, Aut (Hills, D)

PHIL 193Y. The Moral Status of Human Beings—(Same as HUMNTIES 193Y.) The conviction that human beings have a unique moral status among animals, plants, and things, and that all humans have equal moral status is at the heart of ethics. Views which question these beliefs, attempts to defend them, and their implications for practical ethical issues such as abortion, euthanasia, new reproductive technologies, and the treatment of animals. GER:DB-Hum

5 units, Win (Jaworska, A)

PHIL 194C. Undergraduate Seminar

4 units, Win (Wood, A)

PHIL 194D. Certainty and Language—Priority to majors. May be repeated for credit.

4 units, Spr (Dunlop, K)

PHIL 195F. Shared Experience and the Experimental Actor—Practical acting workshop and seminar work in philosophical topics concerning shared awareness and collective intention. Dramatic and philosophical readings include Genet, Merleau-Ponty, Zarelli, and Bratman.

4 units, Spr (Scotland-Stewart, L)

PHIL 196. Tutorial, Senior Year

5 units, Aut, Win, Spr, Sum (Staff)

PHIL 197. Individual Work, Undergraduate—May be repeated for credit.

1-15 units, Aut, Win, Spr, Sum (Staff)

PHIL 198. The Dualist—Weekly meeting of the editorial board of *The Dualist*, a national journal of undergraduate work in philosophy. Open to all undergraduates. May be taken 1-3 quarters. (AU)

1 unit, Aut, Win, Spr (Angelides, A)

PHIL 199. Seminar for Prospective Honors Students—Open to juniors intending to do honors in philosophy. Methods of research in philosophy. Topics and strategies for completing honors project. May be repeated for credit.

2 units, Spr (Scotland-Stewart, L)

PRIMARYLY FOR GRADUATE STUDENTS

PHIL 224. Kant's Philosophy of Physical Science—Kant's *Metaphysical Foundations of Natural Science* (1786), published between the first (1781) and second (1787) editions of the *Critique of Pure Reason*, in the scientific and philosophical context provided by Newtonian natural philosophy and the Leibnizean tradition. The place of this work in the development of Kant's thought. Prerequisite: acquaintance with either Kant's theoretical philosophy or the contemporaneous scientific context, principally Newton, Leibniz, and Euler.

4 units, not given this year

PHIL 228. Fichte's Ethics—The founder of the German Idealist movement who adopted but revised Kant's project of transcendental philosophy basing it on the principle of awareness of free self-activity. The awareness of other selves and of ethical relations to them as a necessary condition for self-awareness. His writings from 1793-98 emphasizing the place of intersubjectivity in his theory of experience.

4 units, Spr (Wood, A)

PHIL 233. Husserl—Husserl's phenomenology. Main themes in his philosophy and their interconnections, including consciousness, perception, intersubjectivity, lifeworld, ethics, mathematics and the sciences, and time and space. Works in English translation.

4 units, Aut (Føllesdal, D)

PHIL 239. Teaching Methods in Philosophy—For Ph.D. students in their first or second year who are or are about to be teaching assistants for the department. May be repeated for credit.

1-4 units, Spr (Staff)

PHIL 240. Individual Work for Graduate Students—May be repeated for credit.

1-15 units, Aut, Win, Spr, Sum (Staff)

PHIL 241. Dissertation Development Seminar—Required of second-year Philosophy Ph.D. students; restricted to Stanford Philosophy Ph.D. students. Prerequisite: consent of instructor.

2-3 units, Sum (Anderson, L)

PHIL 242. The Philosophical and Educational Thought of John Dewey—(Same as EDUC 304.) Dewey's pragmatic philosophy and educational thought; his debt to Darwin, Hegel, Peirce, and James; his educational writings including *Democracy and Education*; and his call for a revolution in philosophy in *Reconstruction in Philosophy*.

4 units, Aut (Phillips, D)

PHIL 248. Medieval Latin Paleography—The history of medieval scripts and medieval abbreviation. Dating and placing Latin European medieval manuscripts. Editing medieval texts in philosophy, psychology, physics, and theology. Class project: an anonymous commentary on Aristotle's ethics preserved in a Florentine manuscript.

3-5 units, not given this year

PHIL 258. Minds and Machines—Readings on arguments concerning mechanical models of the mind including Turing machine models to which Gödel's incompleteness theorems are relevant, and connectionist (neural net) models. Prerequisites: 151 (formerly 160A), 152, or equivalents. Recommended: 389.

4 units, not given this year

PHIL 307. Practical Reason in Plato and Aristotle—Aristotle's notion that practical reason is central to ethical reflection and distinguished from philosophical understanding. What in Plato does the work of practical reason, and the shape of his resulting ethical theory. What problems Aristotle thinks Plato's theory faces that require a conception of practical reason.

4 units, Win (Bobonich, C)

PHIL 318. Aristotle's Ethics—Topics in Aristotle's ethical theory and related parts of his psychology.

4 units, not given this year

PHIL 322. Hume—Hume's theoretical philosophy emphasizing skepticism and naturalism, the theory of ideas and belief, space and time, causation and necessity, induction and laws of nature, miracles, a priori reasoning, the external world, and the identity of the self.

4 units, Win (De Pierris, G)

PHIL 323. Kant's Criticism of Metaphysics—Motivations and strategies of Kant's criticisms of traditional metaphysics in the *Critique of Pure Reason*. Leibnizian and Wolffian versions of the concept containment theory of truth and the Wolffian ideal of a conceptual system of metaphysical knowledge. Kant's analytic/synthetic distinction; its place in the rejection of metaphysics and arguments about the ideas of reason in the transcendental dialectic. Prerequisite: course on the first *Critique*, or consent of instructor.

4 units, not given this year

PHIL 332. Nietzsche—Preference to doctoral students. Nietzsche's later works emphasizing *The Gay Science*, *Beyond Good and Evil*, and *On the Genealogy of Morals*. The shape of Nietzsche's philosophical and literary projects, and his core doctrines such as eternal recurrence, will to power, and perspectivism. Problems such as the proper regulation of belief, and the roles of science, morality, art, and illusion in life.

4 units, Spr (Anderson, L)

PHIL 335. Topics in Aesthetics—May be repeated for credit.

4 units, not given this year

PHIL 350A. Model Theory—Language and models of the first order, predicate calculus, complete and decidable theories. Fraisse-Ehrenfeucht games. Preservation theorems. Prerequisites: 150, 151, or equivalent.

3 units, not given this year

PHIL 350B. Finite Model Theory—(Same as MATH 290B.) Classical model theory deals with the relationship between formal languages and their interpretation in finite or infinite structures; its applications to mathematics using first-order languages. Recent development of the model theory of finite structures in connection with complexity classes as measures of computational difficulty; how these classes are defined within languages that go beyond first-order logic in expressiveness, such as fragments of higher order or infinitary languages, rather than in terms of models of computation.

3 units, Win (Feferman, S)

PHIL 351A. Recursion Theory—Theory of recursive functions and recursively enumerable sets. Register machines, Turing machines, and alternative approaches. Gödel's incompleteness theorems. Recursively unsolvable problems in mathematics and logic. Introduction to higher recursion theory. The theory of combinators and the lambda calculus. Prerequisites: 151, 152, and 161, or equivalents.

3 units, not given this year

PHIL 351B. Constructive Mathematics—Effective and non-effective proofs. Background from constructive logic and computability. Elementary constructive analysis, recursive analysis. Constructive models. Foundational issues. May be repeated for credit. Prerequisites: 151, 152, or equivalents, and a calculus class.

3 units, Aut (Mints, G)

PHIL 352A,B. Set Theory—(Same as MATH 292A,B.) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL 160A,B, and MATH 161, or equivalents.

3 units, not given this year

PHIL 353A,B. Proof Theory—Gentzen's natural deduction and sequential calculi for first-order propositional and predicate logics. Normalization and cut-elimination procedures. Relationships with computational lambda calculi. Extensions to infinitary calculi; ordinal measures of complexity. Applications to the extraction of the constructive content of proofs in arithmetic and analysis. Extensions of Hilbert's consistency program. Prerequisites: 151, 152 and 161, or equivalents.

3 units, not given this year

PHIL 354. Topics in Logic—Readings on uses of proof theory in analysis and number theory. Proof mining: extraction of bounds from non-effective proofs, uniformity results. May be repeated for credit. Prerequisites: 151, 152, or equivalents, and a 100-level MATH course.

3 units, Aut (Feferman, S; Mints, G)

PHIL 355. Logic and Social Choice—Topics in the intersection of social choice theory and formal logic. Voting paradoxes, impossibility theorems and strategic manipulation, logical modeling of voting procedures, preference vs. judgment aggregation, role of language in social choice, meta-theory of social choice. May be repeated for credit. Prerequisite: 151 or consent of instructor.

4 units, Win (Pauly, M)

PHIL 356. Applications of Modal Logic—Applications of modal logic to knowledge and belief, and actions and norms. Models of belief revision to develop a dynamic doxastic logic. A workable modeling of events and actions to build a dynamic deontic logic on that foundation.

3 units, not given this year

PHIL 358. Logic, Language, and Information—(Formerly 298.) Logical systems for analyzing information structures, communication, and other cognitive actions. Special topics: systems for information update; logic and game theory. Prerequisite: 169 or equivalent background in modal logic.

3 units, Spr (van Benthem, J)

PHIL 359. Advanced Modal Logic—Mathematical analysis of modal systems, including bisimulation and expressive power, correspondence theory, algebraic duality, completeness and incompleteness, and extended modal logics, up to guarded fragments of first-order logic, fixed-point logics, and second-order logic. Prerequisite: 151, 154/254, or equivalent background.

4 units, Spr (van Benthem, J)

PHIL 360. Core Seminar in Philosophy of Science—Limited to first- and second-year Philosophy Ph.D. students.

4 units, Spr (Longino, H)

PHIL 365. Seminar in Philosophy of Science: Structural Realism—This recent version of scientific realism and its differences with standard realism and antirealism. Historical antecedents in Hertz, Poincaré, Russell, Eddington, and Weyl.

4 units, not given this year

PHIL 370. Core Seminar in Ethics—Limited to first- and second-year students in the Philosophy Ph.D. program.

4 units, alternate years, not given this year

PHIL 372. Problems in Kantian Ethics—May be repeated for credit.

4 units, not given this year

PHIL 372C. Graduate Seminar: Global Justice—(Same as POLISCI 432.) The applicability of the idea of justice to global politics; the foundations and substance of human rights; problems of accountability, democracy, and the rule of law in global governance; and issues of distributive justice.

5 units, Spr (Cohen, J)

PHIL 374. Valuing—What is it to value something? How is valuing related to desiring, judging something to be valuable, caring, the emotions, or having policies? What is the relation between valuing and the will? Are there reasons for valuing things or pursuing what is valued? Readings from contemporary literature, including Bratman, Frankfurt, Harman, Helm, Raz, Scheffler, and Velleman. May be repeated for credit.

4 units, Aut (Jaworska, A)

PHIL 374C. Democracy and the Constitution—(Same as POLISCI 434.) Connections between democratic theory and constitutional theory. Sources include literature from political philosophy, constitutional law, and jurisprudence, and arguments about freedom of expression, campaign finance, legislative apportionment, and privacy. Readings from Scalia, Breyer, Ely, Ackerman, Dahl, Habermas, Dworkin, Przeworski, Riker, and Schumpeter. Non-Law enrollment limited to 10 chosen by lottery.

3 units, Win (Cohen, J)

PHIL 376. Agency and Personal Identity—How philosophical theories of agency interact with philosophical accounts of personal identity. Readings include David Velleman and Harry Frankfurt.

4 units, not given this year

PHIL 377. Topics in Democratic Theory—(Same as POLISCI 333.) Modern approaches to democratic theory including liberal, communitarian, republican, and participatory theories beginning with the works of Locke, Rousseau, and Mill. Writers: John Rawls, Ronald Dworkin, Jeremy Waldron, Joshua Cohen, Habermas, Petit, Iris Marion Young, Ian Shapiro, and Amy Gutman.

3-5 units, not given this year

PHIL 378. Problems in Medical Ethics—Focus is on recent philosophical work concerning the moral status of non-paradigmatic human beings such as fetuses or Alzheimer's patients, and non-ideal conditions of decision making such as concretized emotions or exploitation. Prerequisite: 170 or equivalent.

4 units, not given this year

PHIL 379. Graduate Seminar in Metaethics—Theories about the meaning of ethical terms and the content of ethical judgments. Do these theories fit with best accounts of human agency and practical deliberation? Readings from recent literature. Prerequisites: 173B/273B, 181, 187/287 or equivalent.

4 units, not given this year

PHIL 380. Core Seminar in Metaphysics and Epistemology—Limited to first- and second-year students in the Philosophy Ph.D. program.

4 units, alternate years, not given this year

PHIL 381. Core Seminar in Philosophy of Language—Limited to first- and second-year students in the Philosophy Ph.D. program.

4 units, Aut (Crimmins, M)

PHIL 383. Philosophy of Mind Seminar: The Epistemology of Mind—First-person/third-person asymmetries in knowledge, especially of propositional attitudes. Topics include motivated belief, epistemic akrasia, and Moore's paradox. May be repeated for credit.

4 units, Win (Lawlor, K)

PHIL 384. Seminar in Metaphysics and Epistemology—Language, metaphysics, and literature. The extent to which contemporary philosophy of language and its metaphysics provides tools for understanding issues

that arise in literature, such as the status of fictional entities, the role of intention in literary interpretation, and metaphor. May be repeated for credit.

4 units, Aut (Perry, J)

PHIL 385B. Topics in Metaphysics and Epistemology

4 units, not given this year

PHIL 386B. Subjectivity—Readings from Husserl and others in the phenomenological tradition, and recent work on intentionality and consciousness by philosophers and cognitive scientists.

4 units, not given this year

PHIL 386C. Subjectivity—Continuation of 386B.

4 units, Aut (Føllesdal, D; Perry, J)

PHIL 387. Shared Agency—Contemporary work. May be repeated for credit.

4 units, Win (Bratman, M)

PHIL 387S. Practical Reasons and Practical Reasoning—Attempts to develop alternatives to Humean, instrumentalist conceptions of practical reasoning, and alternatives to Humean, non-cognitivist views of practical reasons. Readings include Aurel Kolnai, Bernard Williams, David Wiggins, Joseph Raz, Michael Bratman, Elijah Millgram, and T.M. Scanlon.

4 units, Spr (Seidman, J)

PHIL 388. Normativity—May be repeated for credit.

4 units, Spr (Taylor, K)

PHIL 450. Thesis

1-15 units, Aut, Win, Spr, Sum (Staff)

PHIL 470. Proseminar in Moral Psychology—Restricted to Philosophy doctoral students. May be repeated for credit.

4 units, Aut (Bratman, M)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

CLASSGEN 35. Becoming Like God: An Introduction to Greek Ethical Thought

3-5 units, Win (Nightingale, A)

CLASSGEN 133. Invention of Science

3-5 units, Aut (Netz, R)

CLASSGEN 212. Mimesis in Greek Poetry and Philosophy

4-5 units, Spr (Nightingale, A; Peponi, A)

FRENGEN 256E. Political Anthropology from Rousseau to Freud

3-5 units, Spr (Dupuy, J)

MATH 161. Set Theory

3 units, Win (Young, M)

POLISCI 130A/330A. History of Political Thought I—(Same as CLASSHIS 133/333.)

5 units, Win (Ober, J)

POLISCI 132. Ethics of Political Animals—(Same as CLASSHIS 132, ETHICSOC 132X.)

5 units, Spr (Ober, J)

POLISCI 436. Rational Choice

5 units, Spr (Stone, P)

RELIGST 244. St. Augustine's Confessions and the Early Dialogues—(Same as HUMNTIES 196Z.)

5 units, Win (Sheehan, T)

RELIGST 278/378. God, the Self, and Heidegger

4 units, Aut (Sheehan, T)

PHYSICS

Emeriti: (Professors) Stanley S. Hanna, William A. Little, David M. Ritson, H. Alan Schwettman, Peter A. Sturrock (Applied Physics), Richard Taylor (SLAC); *(Professor, Research)* John P. Turneaure; *(Professors, Courtesy)* Robert Wagoner,* Mason R. Yearian

Chair: Stanley G. Wojcicki

Associate Chair: Patricia Burchat

Director of Graduate Study: Sarah Church

Director of Undergraduate Study: Roger R. Romani

Professors: Roger Blandford, Phil Bucksbaum, Patricia Burchat, Blas Cabrera, Steven Chu (on leave), Savas G. Dimopoulos, Sebastian Doniach, Alexander L. Fetter, Giorgio Gratta, Shamit Kachru, Steven Kahn, Renata E. Kallosh, Aharon Kapitulnik, Mark Kasevich, Steven A. Kivelson, Robert B. Laughlin, Andrei D. Linde, Peter F. Michelson, Douglas D. Osheroff, Vahé Petrosian, Roger W. Romani, Zhi-Xun Shen, Stephen Shenker, Eva Silverstein, Leonard Susskind, Stanley G. Wojcicki, Shoucheng Zhang

Associate Professors: Tom Abel, Sarah Church, Kathryn Moler

Assistant Professors: Steve Allen, David Goldhaber-Gordon, Hari Manoharan, Risa Wechsler

Professors (Research): John A. Lipa, Phillip H. Scherrer, Todd I. Smith
Lecturers: John Beck, Alexander Kosovichev, Gregorz M. Madejski, Rick Pam

Courtesy Professor: Richard N. Zare

Consulting Professors: Gerald Fisher, Alan Title, Gareth Williams

Visiting Professor: Daniel Arovas, A. John Berlinsky, Catherine Kallin,

* Recalled to active duty.

Department Offices: 382 Via Pueblo Mall

Phone: (650) 723-4344

Web Site: <http://www.stanford.edu/dept/physics>

Courses in Physics have the subject code PHYSICS. For a complete list of subject codes, see Appendix.

The Russell H. Varian Laboratory of Physics, the nearby W. W. Hansen Experimental Physics Laboratory (HEPL), the E. L. Ginzton Laboratory, and the Geballe Laboratory for Advanced Materials (GLAM) together house a range of physics activities from general courses through advanced research. Ginzton Lab houses research on optical systems, including quantum electronics, metrology, optical communication and development of advanced lasers. GLAM houses research on novel and nanopatterned materials, from high-temperature superconductors and magnets to organic semiconductors, subwavelength photon waveguides, and quantum dots. GLAM also supports the materials community on campus with a range of characterization tools: it is the site for the new Stanford Nanocharacterization Lab (SNL) and the NSF-sponsored Center for Probing the Nanoscale (CPN). The Stanford Linear Accelerator Center (SLAC) is just a few miles from the Varian Laboratory. SLAC is a high-energy physics lab with a two-mile-long linear accelerator that can accelerate electrons and positrons up to 50 GeV, and produce highly polarized electron beams. The PEP-II asymmetric-energy electron-positron storage ring is used to study CP violation in the B meson system. The Stanford Synchrotron Radiation Laboratory (SSRL) uses intense x-ray beams produced with another smaller storage ring on the SLAC site. Construction of the world's first X-ray free electron laser, called the Linac Coherent Light Source, has started at SLAC. The facility is expected to be operational in 2009.

The Ginzton Laboratory, HEPL, GLAM, SLAC, and SSRL are listed in the "Academic Programs and Centers, Independent Research Laboratories, Centers, and Institutes" section of this bulletin. Students may also be interested in research and facilities at two other independent labs: the Center for Integrated Systems, focused on electronics and nanofabrication; and the Clark Center, a new interdisciplinary biological sciences laboratory.

The Kavli Institute for Particle Astrophysics and Cosmology (KIPAC), formed jointly with the Stanford Linear Accelerator Center (SLAC), provides a focus for theoretical, observational, and instrumental research

programs, including the Gamma Ray Large Area Space Telescope (GLAST) and the Large Synoptic Survey Telescope (LSST). Stanford is a member of the Hobby-Eberly Telescope Consortium, operating an innovative 9.2 meter-equivalent telescope at the McDonald Observatory in Texas. The CDMS (cryogenic dark matter search) experiment is operated in an underground laboratory on the Stanford campus and in the Soudan mine in Minnesota. These are research opportunities for students in this growing interdisciplinary field.

The Stanford Institute for Theoretical Physics is devoted to the investigation of basic structure of matter (string theory, M-theory, quantum cosmology, condensed matter physics).

The Physics Library, a center for the reading and study of physics and astronomy at all levels, includes print and electronic access to current subscriptions and back sets of important journals together with textbooks, dissertations, scholarly monographs, and the collected works of the most eminent physicists.

Course work is designed to provide students with a sound foundation in both classical and modern physics. Students who wish to specialize in astronomy, astrophysics, or space science should also consult the "Astronomy Course Program" section of this bulletin.

Three introductory series of courses include labs in which undergraduates carry out individual experiments. The Intermediate and Advanced Physics Laboratories offer facilities for increasingly complex individual work. Laboratories provide students with a sound basis for more advanced laboratory work, including the conception, design, and fabrication of laboratory equipment. Undergraduates are also encouraged to participate in research; most can do this through the honors program and/or the summer research program.

Graduate students find opportunities for research in the fields of astrophysics, particle astrophysics, cosmology, experimental particle physics, theoretical particle physics, intermediate energy physics, low temperature physics, condensed matter physics, materials research, atomic physics, laser physics, quantum electronics, coherent optical radiation, novel imaging technologies, and biophysics. Faculty advisers are drawn from many departments, including Physics, Applied Physics, Materials Science and Engineering, Electrical Engineering, and Biological Sciences. Opportunities for research are also available with the faculty at SLAC in the areas of theoretical and experimental particle physics, particle astrophysics, cosmology, and accelerator design.

The number of graduate students admitted to the Department of Physics is strictly limited. Students should submit applications by December 14 for the following Autumn Quarter. Graduate students may normally enter the department only at the beginning of Autumn Quarter.

UNDERGRADUATE PROGRAMS

The study of physics is undertaken by three principal groups of undergraduates: those including physics as part of a general education; those preparing for careers in professional fields that require a knowledge of physics, such as medicine or engineering; and those preparing for careers in physics or related fields, including teaching and research in colleges and universities, research in federally funded laboratories and industry, and jobs in technical areas. Physics courses numbered below 100 are intended to serve all three of these groups. The courses numbered above 100 meet the needs mainly of the third group, but also of some students majoring in other branches of science and in engineering.

ENTRY-LEVEL SEQUENCES

The Department of Physics offers three-year-long, entry-level physics sequences, the PHYSICS 20, 40 (formerly 50), and 60 series. The first of these is non-calculus-based, and is intended primarily for those who are majoring in the biological sciences. Such students with AP credit, particularly those who are considering research careers, may wish to consider taking the PHYSICS 20 or 40 series, rather than using AP placement. These introductory series provide a depth and emphasis on problem solving that is of significant value in biological research, which today involves considerable physics-based technology.

For those intending to major in engineering or the physical sciences,

or simply wishing a stronger background in physics, the department offers the PHYSICS 40 and 60 series. Either of these satisfy the entry-level physics requirements of any Stanford major. The 60 series is intended for those who have already taken a Physics course at the level of the 40 series, or at least have a strong background in mechanics, some background in electricity and magnetism, and a strong background in calculus. The PHYSICS 40 series begins with mechanics in Winter Quarter, electricity and magnetism in Spring Quarter, and light and heat in Autumn Quarter. While it is recommended that most students begin the sequence with mechanics (PHYSICS 41) in Winter Quarter, those who have had strong physics preparation in high school (such as a score of at least 4 on the Physics Advanced Placement C exam) may start the sequence with PHYSICS 45 in Autumn Quarter.

BACHELOR OF SCIENCE

A calculus-based entry-level series is required, either PHYSICS 61, 63, 64, 65, 67, or 41, 43, 44, 45, 46 (or preferably 67 rather than 44). Students who take the PHYSICS 40 series take PHYSICS 70, which covers the foundations of modern physics. This material is incorporated into the PHYSICS 60 series beginning in 2005-06. Students taking the PHYSICS 60 series in 2005-06 or after do not take PHYSICS 70; instead, they must take one advanced Physics elective (100-level or higher). In addition, the following more advanced courses are required: PHYSICS 105, 107 (WIM), 108, 110, 120, 121, 130, 131, 170, and 171; MATH 51, 52, 53, 131; one additional Mathematics course numbered 100 or higher, or PHYSICS 112. MATH 51H, 52H, and 53H may substitute for MATH 51, 52, and 53. It is strongly recommended that students intending to complete a Ph.D. in Physics also take PHYSICS 113, 134, and one or more of the following, depending upon their interests: PHYSICS 152, 153A,B, 160, 161, 172, 181, 204. PHYSICS 113 is designed to be taken in parallel with 110. The department advises the study of some computer science such as CS 106. Mathematics and Physics courses taken to satisfy the department's major requirements cannot be taken on a credit/no credit basis. Prospective Physics majors are also advised to take PHYSICS 59, Current Research Topics, in their freshman or sophomore year.

To decide which introductory sequence is appropriate, students contemplating majoring in Physics are urged to consult with the instructor of PHYSICS 61, 41 or 45, or the Director of Undergraduate Study, at the earliest possible date to see which sequence is the most suitable. Students who begin taking an entry-level Physics course after their freshman year and wish to major in Physics are generally advised to take the PHYSICS 61, 63, 65 sequence, provided they have previously taken MATH 41. For advanced placement advice, see http://registrar.stanford.edu/students/academics/adv_place.htm.

Undergraduates are offered help with physics problems in the department tutoring center, the Reference Frame, which is staffed Monday through Thursday.

REQUIRED COURSES FOR MAJORS

For sample schedules illustrating how to complete the Physics major, see <http://www.stanford.edu/dept/physics/academics/undergrad.html#sample>.

INTRODUCTORY SEQUENCE

<i>Subject and Catalog Number</i>	<i>Qtr. and Units</i>
PHYSICS 41 (formerly 53). Mechanics	W 4
PHYSICS 43 (formerly 55). Electricity and Magnetism	S 4
PHYSICS 44 (formerly 56). Electricity and Magnetism Lab	S 1
PHYSICS 45 (formerly 51). Light and Heat	A 4
PHYSICS 46 (formerly 52). Light and Heat Lab	A 1
PHYSICS 67. Introduction to Laboratory Physics (recommended for prospective majors in place of 44)	S 2
PHYSICS 70. Foundations of Modern Physics	A 4
or PHYSICS 61. Mechanics and Special Relativity	A 4
PHYSICS 63. Electricity, Magnetism and Waves	W 4
PHYSICS 64. Electromagnetism Lab	W 1
PHYSICS 65. Thermodynamics and Foundations of Modern Physics	S 4
PHYSICS 67. Introduction to Laboratory Physics	S 2
and	
MATH 51, 52, 53. Multivariable Calculus, Linear Algebra and Ordinary Differential Equations	A, W, S 15
PHYSICS 59. Current Research Topics (recommended)*	A 1

INTERMEDIATE SEQUENCE

PHYSICS 105. Intermediate Laboratory I: Analog Electronics	A	3
PHYSICS 107. Intermediate Laboratory II: Exp. Techniques (WIM)	W	4
PHYSICS 108. Intermediate Laboratory III: Project	S	3
PHYSICS 110. Intermediate Mechanics	S	4
PHYSICS 112. Math Methods of Physics (recommended)**	W	4
PHYSICS 113. Computational Physics (recommended)*	S	4
PHYSICS 120, 121. Intermediate Electricity and Magnetism and MATH 131. Partial Differential Equations	W, S A, W	8 3

ADVANCED SEQUENCE

PHYSICS 130, 131. Quantum Mechanics	A, W	8
PHYSICS 134. Advanced Topics in Quantum Mechanics*	S	4
PHYSICS 170, 171. Statistical Mechanics and one advanced Mathematics elective (100 level or higher) or PHYSICS 112	A, W	8
One advanced Physics elective (100 level or higher): required only for students who do take PHYSICS 70		

* These courses are not required, but 113 and 134 are recommended for students who intend to complete a Ph.D. in Physics.

** Those wishing to do physics theory in graduate school may wish to take a collection of courses in the Department of Mathematics rather than PHYSICS 112.

CONCENTRATIONS IN PHYSICS

The primary purpose of concentrations in the Physics major is to provide consistent and more formal advising to students who want to concentrate in a particular area of physics during their undergraduate education, or prepare for future studies (e.g., graduate studies) in a particular area of physics. Physics majors are not required to choose a concentration and a concentration does not add any formal requirements to the Physics major. Upon graduation, students will receive a certificate of completion of a concentration.

Students seeking further advice on a given concentration should contact the professor whose name appears next to the respective title of each section below.

A. APPLIED PHYSICS (Hari Manoharan)

At least four, one quarter courses chosen from the following courses, or three courses plus an honors thesis:

Solid State:

PHYSICS 172. Physics of Solids I
APPPHYS 270. Magnetism and Long Range Order in Solids
MATSCI 195. Waves and Diffraction in Solids

Biophysics:

APPPHYS 192. Introductory Biophysics

Lasers:

PHYSICS 181. Introduction to Modern Optics
APPPHYS 231A. Introduction to Lasers

Lab Methods:

APPPHYS 207, 208. Laboratory Electronics, Analog and Digital
APPPHYS 304. Lasers Laboratory

B. ASTROPHYSICS (Roger Romani, Sarah Church)

Requirements:

PHYSICS 100. Introduction to Observational and Laboratory Astronomy
PHYSICS 160. Introduction to Stellar and Galactic Astrophysics
PHYSICS 161. Introduction to Extragalactic Astrophysics and Cosmology

Plus one elective from below or an honors thesis:

PHYSICS 211. Continuum Mechanics
PHYSICS 260. Introduction to Astrophysics and Cosmology
PHYSICS 262. Introduction to Gravitation
PHYSICS 312. Basic Plasma Physics
(prerequisites are PHYSICS 210 and PHYSICS 220)

C. BIOPHYSICS (David Goldhaber-Gordon)

At least four, one quarter courses chosen from the following courses, or three courses plus an honors thesis:

APPPHYS 192/292. Introductory Biophysics
BIOC 202. Metabolic Biochemistry
BIOPHYS 228. Computational Structure Biology
BIOSCI 141. Biostatistics
BIOSCI 132/232. Advanced Imaging Lab In Biophysics
BIOSCI 135/HUMBIO 182. Biological Clocks
BIOSCI 211. Biophysics of Sensory Transduction
BIOSCI 217. Neuronal Biophysics
CS 273. Algorithms for Structure and Motion In Biology

It is recommended that Physics majors interested in pursuing a career in biophysics consider a minor in Biological Sciences.

D. GEOPHYSICS (Simon Klemperer, Geophysics)

At least four, one quarter courses chosen from the following courses, or three courses plus an honors thesis:

- GEOPHYS 102. Geosphere
- GEOPHYS 112. Exploring Geosciences with MATLAB
- GEOPHYS 140. Introduction to Remote Sensing
- GEOPHYS 150. General Geophysics and Physics of the Earth
- GEOPHYS 180. Geophysical Inverse Problems
- GEOPHYS 182. Reflection Seismology
- GEOPHYS 190. Near-Surface Geophysics
- GEOPHYS 262. Rock Physics
- GEOPHYS 288. Crustal Deformation

E. THEORETICAL PHYSICS (Andrei Linde)

At least four, one quarter courses chosen from the following courses, or three courses plus an honors thesis:

- Subject and Catalog Number*
- PHYSICS 153A,B Introduction to String Theory
 - PHYSICS 204. Advanced Seminar in Theoretical Physics
 - PHYSICS 212. Statistical Mechanics
 - PHYSICS 232. Special Topics in Quantum Mechanics
 - PHYSICS 252. Introduction to High Energy Physics
 - PHYSICS 260. Introduction to Astrophysics and Cosmology
 - PHYSICS 262. Introduction to Gravitation
 - PHYSICS 330,331,332. Quantum Field Theory
 - PHYSICS 351,352. Elementary Particle Physics
 - PHYSICS 362. Advanced Extragalactic Astrophysics and Cosmology
 - PHYSICS 364. Advanced Gravitation

Notes to students taking this concentration:

1. No more than one of the courses should be taken for CR/NC.
2. Students should discuss the choice of courses with members of the Institute for Theoretical Physics and/or their major adviser.

INDIVIDUALLY DESIGNED MAJOR PROGRAM IN TEACHING PHYSICAL SCIENCE

This major, a joint effort of the Department of Physics and the Stanford Teacher Education Program, is designed for students to prepare themselves as high school teachers of physics and general science. Students complete 45-47 units of Physics and related Mathematics courses, 40-43 units of course work in other sciences such as the life sciences, chemistry, and geosciences, and in general issues of science, and 9-15 units of concentration and depth courses. Total program units: 94-105. Students interested in this program should consult Professor Patricia Burchat (burchat@stanford.edu, 725-5771), and Frederic Stout, coordinator of the STEP Coterminial Teaching Program in the School of Education (fstout@stanford.edu, 725-6321).

CORE PHYSICS COURSES:

<i>Subject and Catalog Number</i>	<i>Units</i>
<i>Mechanics:</i>	
PHYSICS 41. Mechanics or PHYSICS 61. Mechanics and Special Relativity	4
<i>Heat:</i>	
PHYSICS 45. Light and Heat PHYSICS 46. Light and Heat Lab	
<i>or</i>	
PHYSICS 65. Thermodynamics and Foundations of Modern Physics	
PHYSICS 67. Introduction to Laboratory Physics	5-6
<i>Electricity and Magnetism:</i>	
PHYSICS 43. Electricity and Magnetism PHYSICS 67. Introduction to Laboratory Physics	
<i>or</i>	
PHYSICS 63. Electricity, Magnetism, and Waves PHYSICS 64. Electricity and Magnetism Lab	
<i>and</i>	
PHYSICS 105. Analog Electronics (Lab)	8-9
<i>Wave Motion:</i>	
PHYSICS 107 Intermediate Physics Laboratory II: Experimental Techniques and Data Analysis (WIM)	4
<i>Modern Physics (for students who take 40 series):</i>	
PHYSICS 70. Foundations of Modern Physics	4

Applications:

PHYSICS 59. Current Research Topics	1
<i>Mathematics (Physics departmental requirement):</i>	
MATH 51,52,53. Linear Algebra, Multivariable Calculus, and Ordinary Differential Equations and a course in Statistics (choose one):	
STATS 110. Statistical Methods in Engineering and the Physical Sciences	
STATS 116. Theory of Probability	
STATS 141. Biostatistics	
STATS 166. Statistical Methods in Computational Genetics	
STATS 191. Introduction to Applied Statistics	20
Total	46-48

ADDITIONAL SCIENCE BREADTH COURSES

Life Sciences:

BIOSCI 41. Genetics, Biochemistry, and Molecular Biology	
BIOSCI 42. Cell Biology and Animal Physiology	
BIOSCI 43. Plant Biology, Evolution and Ecology	
<i>or</i>	
HUMBIO 2A,B, 3A,B, 4A,B	15
<i>Chemistry:</i>	
CHEM 31A and B, or 31X. Chemical Principles	
CHEM 33. Structure and Reactivity	8
<i>Geosciences:</i>	
EARTHSYS 10. Introduction to Earth Systems	
PHYSICS 15. The Nature of the Universe	
or PHYSICS 16. Cosmic Horizons	8
<i>General Issues of Science:</i>	
STS 101. Science, Technology, and Contemporary Society	
or HUMBIO 2S, 3S, 4S	
and EDUC 180. Directed Reading in History of Science and ENGR 103. Public Speaking and Presentation Development	9-12

CONCENTRATION AND DEPTH COURSES

3 courses (100 level or above) in a single area of concentration	9-15
Total units for general science	49-58
Total units for the Physical Science program	94-105

This individually designed major program in Physical Science includes all the elements of a Program of Subject Matter Preparation for Secondary Teachers of Physics and General Science that has been approved by the California Commission on Teacher Credentialing (CCTC). Students who complete the program are exempt from taking the CSET examination in Physics and General Science for admission to the Stanford Teacher Education Program (STEP) or any other accredited secondary teacher education program in California. Full details of the CCTC-approved program may be found at <http://ed.stanford.edu/suse/programs-degrees/program-co-terminal-step.html>. *Note:* the Stanford individually designed major program in Physical Science requires course work beyond the CCTC-approved program, specifically 9-15 units of depth courses in a field of concentration: Physics, Astrophysics, Biological Sciences, Chemistry, Earth Sciences, Human Biology, or Computational Mathematics. See the adviser in the Physics department or the School of Education for more details.

MINORS

Students who take the 20 or 40 series at Stanford in support of their major may count those units towards the minor. Those who have fulfilled Physics requirements at the 20 or 40 series level by enrollment at another accredited university, or through advanced placement credits, may count credits towards 21/22 and 23/24, or 41 and 43/44, respectively. 25/26, or 45/46 for a technical minor, must be taken at Stanford even if similar material has been covered elsewhere. With the 21/22/23/24 or 41/43/44 exception noted above, all courses for the minor must be taken at Stanford University for a letter grade, and a grade of 'C' or better must be received for all units applied toward the minor. The minor declaration deadline is three quarters before graduation, i.e., beginning of Autumn Quarter if the student is graduating at the end of Spring Quarter.

MINOR IN PHYSICS

An undergraduate minor in Physics requires a minimum of 27 units with the following course work:

Non-Technical—For students whose majors do not require the PHYSICS 40 or 60 series:

<i>Subject and Catalog Number</i>	<i>Units</i>
PHYSICS 21, 22, 23, 24, 25, and 26	12
Any combination of Physics courses totaling 15 units or greater	<u>15</u>
Total	27

Technical—For students whose majors require the PHYSICS 40 or 60 series:

<i>Subject and Catalog Number</i>	<i>Units</i>
PHYSICS 41, 43/44, 45/46 and PHYSICS 70	18
or	
PHYSICS 61, 63/64, 65/67	15
at least three PHYSICS courses numbered 100 or above	<u>9-12</u>
Total	27-30

MINOR IN ASTRONOMY

Students wishing to pursue advanced work in astrophysical sciences should major in physics and concentrate in astrophysics. However, students outside of physics with a general interest in astronomy may organize their studies by completing one of the following minor programs.

An undergraduate minor in astronomy requires the following courses:

Non-Technical—For students whose majors do not require the PHYSICS 40 series:

<i>Subject and Catalog Number</i>	<i>Units</i>
PHYSICS 21, 23, 25/26	10
PHYSICS 50 or 100 (Observatory Lab)	3-4

Choose two courses from the following:

PHYSICS 15, 16, 17	<u>6</u>
Total	19-20 (9-10 in addition to the 20 series)

Technical—For students whose majors require the PHYSICS 40 series:

<i>Subject and Catalog Number</i>	<i>Units</i>
PHYSICS 41, 43, 45/46	13
PHYSICS 70	4
PHYSICS 100 (Observatory Lab)	4

Choose two courses from the following:

PHYSICS 160,* 161,* 164*	<u>6</u>
Total	27 (14 in addition to the 40 series)

* With approval of the minor adviser and the chair of the Astronomy Course Program, 3 units of PHYSICS 169, Independent Study in Astrophysics, may be substituted for one course of astronomy (e.g., 160, 161, 164). This independent study can either be constituted as a directed reading program or participation in a research project. Students are also strongly encouraged to take the electricity and magnetism/optics lab of the appropriate Physics series (24, 44) for 1 additional unit.

To be accepted to the minor program, the student must obtain an adviser from the faculty in the Astronomy Course Program.

HONORS PROGRAM

The department offers a program leading to the degree of Bachelor of Science in Physics with Honors as follows:

1. Students must submit an Honors Program Proposal to the Undergraduate Program Coordinator once they find a physics project, either theoretical or experimental, in consultation with individual faculty members. Proposal forms are available from the Physics undergraduate office and must be submitted by November 1 of the academic year in which the student plans to graduate.
2. Credit for the project is assigned by the adviser within the framework of PHYSICS 205. The work done in the honors program may not be used as a substitute for regular required courses.
3. Both a written report and a presentation of the work at its completion is required for honors. By mid-May, each honors candidate is required to present his or her project at the department's Honors Presentations. (This event is publicized and open to the general public. The expectation is that the student's adviser, second reader, and all other honors candidates attend.)
4. The decision as to whether a given independent study project does or does not merit award of honors is made jointly by the student's honors adviser and the second reader for the written thesis. This decision is based on the quality of the student's honors work and other work in physics.

GRADUATE PROGRAMS

MASTER OF SCIENCE

The department does not offer a coterminal degree program, or a separate program for the M.S. degree, but this degree may be awarded for a portion of the Ph.D. degree work.

University requirements for the master's degree, discussed in the "Graduate Degrees" section of this bulletin, include completion of 45 units of unduplicated course work after the bachelor's degree. Among the department requirements are a grade point average (GPA) of at least 3.0 (B) in courses 210 or 211, 212, 220, 221, 230, 231, or their equivalents. Up to 6 of these required units may be waived on petition if a thesis is submitted.

DOCTOR OF PHILOSOPHY

The University's basic requirements for the Ph.D. are discussed in the "Graduate Degrees" section of this bulletin. The minimum department requirements for the Ph.D. degree in Physics consist of completing all courses listed below, and at least one quarter from each of two subject areas (among biophysics, condensed matter, quantum optics and atomic physics, astrophysics and gravitation, and nuclear and particle physics) chosen from courses with numbers above 232, except 290 and 294. The requirements in the following list may be fulfilled by passing the course at Stanford or passing an equivalent course elsewhere: 210 or 211, 212, 220, 221, 230, 231, 290, 294. A grade point average (GPA) of at least 3.0 (B) is required in all the courses taken toward the degree.

All Ph.D. candidates must have math proficiency equivalent to the following Stanford math courses: 106, 113, 114, 131, 132.

Prior to making an application for candidacy, each student is required to pass a comprehensive qualifying examination on undergraduate physics. This closed book exam is given in the month of January immediately following the student's arrival at Stanford. This is a written examination held over two days, covering particle mechanics, electricity and magnetism, quantum mechanics, statistical mechanics, thermodynamics, special relativity, and general physics. A thesis proposal must be submitted during the third year. In order to assess the direction and progress toward a thesis, an oral report and evaluation are required during the fourth year. After completion of the dissertation, each student must take the University oral examination (defense of dissertation).

Three quarters of teaching (including a demonstrated ability to teach) are a requirement for obtaining the Ph.D. in Physics.

Students interested in applied physics and biophysics research should also take note of the Ph.D. granted independently by the Department of Applied Physics and by the Biophysics Program. Students interested in astronomy, astrophysics, or space science should also consult the "Astronomy Course Program" section of this bulletin.

PH.D. MINOR

Minors in Physics must take at least six courses numbered 210 to 232 among the 20 required units. All prospective minors must obtain approval of their Physics course program from the Physics Graduate Study Committee at least one year before award of the Ph.D.

FELLOWSHIPS AND ASSISTANTSHIPS

The Department of Physics makes an effort to support all its graduate students through fellowships, teaching assistantships, research assistantships, or a combination of sources. Information on application procedures is mailed with the admission information.

TEACHING CREDENTIALS

For information on teaching credentials, consult the "School of Education" section of this bulletin or address an inquiry to the Credential Administrator, Office of Academic Services, Cubberley Building, School of Education. Also see the earlier section on the Individually Designed Major program in Teaching Physical Science.

COURSES

There are four series of beginning courses. One course from the teen series (11, 15, 16, 17, 19) is recommended for the humanities or social science student who wishes to become familiar with the methodology and content of modern physics. The 20 series (21, 22, 23, 24, 25, 26) is recommended for general students and for students preparing for medicine or biology. The 40 series (41, 43, 44, 45, 46; formerly the 50 series) is for students of engineering, chemistry, geology, mathematics, or physics. The advanced freshman series (61, 63, 64, 65, 67) is for students who have had strong preparation in physics and calculus in high school. Students who have had appropriate background and wish to major in physics should take this introductory series.

The 20, 40, and 60 series consist of demonstration lectures on the fundamental principles of physics, problem work on application of these principles to actual cases, and lab experiments correlated with the lectures. Their objectives are not only to give information on particular subjects, but also to provide training in the use of the scientific method. The primary difference between the series of courses is that topics are discussed more thoroughly and treated with greater mathematical rigor in the 40 and 60 series.

Courses beyond 99 are numbered in accordance with a three-digit code. The first digit indicates the approximate level of the course:

100	undergraduate courses
200	first-year graduate courses
300	more advanced courses
400	research, special, or current topics

The second digit indicates the general subject matter:

00	laboratory
10,20,30	general courses
40	nuclear physics
50	elementary particle physics
60	astrophysics, cosmology, gravitation
70	condensed matter physics
80	optics and atomic physics
90	miscellaneous courses

UNDERGRADUATE

WIM indicates that the course satisfies the Writing in the Major requirements.

PHYSICS 11N. The Basic Rules of Nature—Stanford Introductory Seminar. Preference to freshmen. The development by physicists of descriptions of the behavior of matter on microscopic scales and scales characteristic of the Universe as a whole, including quantum mechanics, particle physics, and general relativity. Promising approaches that physicists are using to shed light on remaining mysteries, including string theory and M theory. Discussions are semiquantitative. Prerequisite: high school physics or equivalent. GER: DB-NatSci

3 units, Spr (Shenker, S)

PHYSICS 15. The Nature of the Universe—The structure, origin, and evolution of the major components of the Universe: planets, stars, and galaxies. Emphasis is on the formation of the Sun and planets, the evolution of stars, and the structure and content of our galaxy. Topics: cosmic enigmas (dark matter, black holes, pulsars, x-ray sources), star birth and death, and the origins of and search for life in the solar system and beyond. GER: DB-NatSci

3 units, Sum (Staff)

PHYSICS 16. Cosmic Horizons—The origin and evolution of the universe and its contents: stars, galaxies, quasars. The overall structure of the cosmos and the physical laws that govern matter, space, and time. Topics include the evolution of the cosmos from its primeval fireball, the origin of the elements and the formation of stars and galaxies, exotic astronomical objects (black holes, quasars, supernovae, and gamma ray bursts), dark matter, inflationary cosmology and the fate of the cosmos. GER: DB-NatSci

3 units, Win (Linde, A)

PHYSICS 17. Black Holes—Newton's and Einstein's theories of gravitation and their relationship to the predicted properties of black holes. Their formation and detection, and role in galaxies and high-energy jets. Hawking radiation and aspects of quantum gravity. GER: DB-NatSci

3 units, Spr (Blandford, R)

PHYSICS 18N. Revolutions in Concepts of the Cosmos—Stanford Introductory Seminar. Preference to freshmen. Faculty led dialogue. The evolution of the concept of the cosmos and its origin, from the Copernican heliocentric model to the current view based on Hubble's discovery of expansion of the Universe. Recent cosmological observations and the relevance of laboratory experiments in particle physics. One night of observations at the Stanford Observatory. Enrollment limited to 20 in one section. GER: DB-NatSci

2 units, Win (Abel, T)

PHYSICS 19. How Things Work: An Introduction to Physics—The principles of physics through familiar objects and phenomena, including gyroscopes, airplanes, refrigerators, lightning, radio, TV, microwave ovens, and fluorescent lights. Estimates of real quantities from simple calculations. Prerequisite: high school algebra and trigonometry. GER: DB-NatSci

3 units, Win (Fisher, I)

PHYSICS 21. Mechanics and Heat—For biology, social science, and premedical students. Introduction to Newtonian mechanics, fluid mechanics, theory of heat. Calculus is used as a language and developed as needed. Prerequisite: working knowledge of elementary algebra and trigonometry. GER: DB-NatSci

3 units, Aut (Linde, A)

PHYSICS 21S. Mechanics and Heat w/ laboratory—Equivalent to 21 and 22. GER: DB-NatSci

4 units, Sum (Fisher, G)

PHYSICS 22. Mechanics and Heat Laboratory—Pre- or corequisite: 21.

1 unit, Aut (Linde, A)

PHYSICS 23. Electricity and Optics—Electric charges and currents, magnetism, induced currents; wave motion, interference, diffraction, geometrical optics. Prerequisite: 21. GER: DB-NatSci

3 units, Win (Wojcicki, S)

PHYSICS 24. Electricity and Optics Laboratory—Pre- or corequisite: 23.

1 unit, Win (Wojcicki, S)

PHYSICS 25. Modern Physics—Introduction to modern physics. Relativity, quantum mechanics, atomic theory, radioactivity, nuclear reactions, nuclear structure, high energy physics, elementary particles, astrophysics, stellar evolution, and the big bang. Prerequisite: 23 or consent of instructor. GER: DB-NatSci

3 units, Spr (Burchat, P)

PHYSICS 25S. Modern Physics with Laboratory—Equivalent to 25 and 26. GER: DB-NatSci

4 units, Sum (Fisher, G)

PHYSICS 26. Modern Physics Laboratory—Pre- or corequisite: 25.

1 unit, Spr (Burchat, P)

PHYSICS 28. Mechanics, Heat, and Electricity—For biology, social science, and premedical students. The sequence 28 and 29 fulfills, in ten weeks, the one-year college physics requirement with lab of most medical schools. Topics: Newtonian mechanics, fluid mechanics, theory of heat, electric charges, and currents. Calculus is used as a language and developed as needed. Prerequisite: working knowledge of elementary algebra and trigonometry. GER: DB-NatSci

6 units, Sum (Fisher, G)

PHYSICS 29. Electricity and Magnetism, Optics, Modern Physics—Magnetism, induced currents; wave motion, optics; relativity, quantum mechanics, atomic theory, radioactivity, nuclear structure and reactions, elementary particles, astrophysics, and cosmology. Prerequisite: 28. GER: DB-NatSci

6 units, Sum (Fisher, G)

PHYSICS 41. Mechanics—(Formerly 53.) Vectors, particle kinematics and dynamics, work, energy, momentum, angular momentum; conservation laws; rigid bodies; mechanical oscillations and waves. Discussions based on use of calculus. Corequisite: MATH 19 or 41, or consent of instructor. GER: DB-NatSci

4 units, Win (Susskind, L)

PHYSICS 41N. Mechanics: Insights, Applications, and Advances—Stanford Introductory Seminar. Preference to freshman. Additional topics for students in PHYSICS 41 such as tidal forces, gyroscopic effects, fractal dimensions, and chaos. Corequisite: 41.

1 unit, Win (Burchat, P)

PHYSICS 43. Electricity and Magnetism—(Formerly 55.) Electrostatics, Coulomb's law, electric fields and fluxes, electric potential, properties of conductors, Gauss's law, capacitors and resistors, DC circuits; magnetic forces and fields, Biot-Savart law, Faraday's law, Ampere's law, inductors, transformers, AC circuits, motors and generators, electric power, Galilean transformation of electric and magnetic fields, Maxwell's equations; limited coverage of electromagnetic fields and special relativity. Prerequisites: 41 (formerly 53), and MATH 19 or 41. Corequisite: MATH 20 or 42, or consent of instructor. GER: DB-NatSci

4 units, Spr (Osheroff, D)

PHYSICS 44. Electricity and Magnetism Lab—(Formerly 56.) Pre- or corequisite: 43.

1 unit, Spr (Osheroff, D)

PHYSICS 45. Light and Heat—(Formerly 51.) Reflection and refraction, lenses and lens systems; polarization, interference, and diffraction; temperature, properties of matter and thermodynamics, introduction to kinetic theory of matter. Prerequisites: high school physics or 41 (formerly 53), and MATH 19 or 41, or consent of instructor. GER: DB-NatSci

4 units, Aut (Michelson, P), Sum (Staff)

PHYSICS 45N. Advanced Topics in Light and Heat—Stanford Introductory Seminar. Preference to freshmen. Expands on the subject matter presented in 45 to include optics and thermodynamics in everyday life, and applications from modern physics and astrophysics. Corequisite: 45 or advanced placement.

1 unit, Aut (Romani, R)

PHYSICS 46. Light and Heat Laboratory—(Formerly 52.) Pre- or corequisite: 45.

1 unit, Aut (Michelson, P), Sum (Staff)

PHYSICS 50. Astronomy Laboratory and Observational Astronomy—Introduction to observational astronomy emphasizing the use of optical telescopes. Observations of stars, nebulae, and galaxies in laboratory sessions with 16- and 24-inch telescopes at the Stanford Observatory. No previous physics required. Limited enrollment. Lab. GER: DB-NatSci

3 units, not given 2006-07

PHYSICS 59. Current Research Topics—Recommended for prospective Physics majors. Presentations of current research topics by faculty with research interests related to physics, often including tours of experimental laboratories where the research is conducted.

1 unit, Aut (Gratta, G)

PHYSICS 61, 63, 65. Advanced Freshman Physics—For students with a strong high school mathematics and physics background contemplating a major in Physics or interested in a rigorous treatment of physics. The fundamental structure of classical physics including Newtonian mechanics, electricity and magnetism, waves, optics, and thermodynam-

ics. Foundations of modern physics including special relativity, atomic structure, quantization of light, matter waves and the Schrödinger equation. Diagnostic quiz in calculus and conceptual Newtonian mechanics at first meeting to decide if course is appropriate; some students may benefit more from the 40 (formerly 50) series. Prerequisites: high school physics and familiarity with calculus (differentiation and integration in one variable); pre- or corequisite for 61: MATH 51; for 63: MATH 52; for 65: MATH 53. GER:DB-NatSci

PHYSICS 61. Mechanics and Special Relativity

4 units, Aut (Goldhaber-Gordon, D)

PHYSICS 63. Electricity, Magnetism, and Waves

4 units, Win (Allen, S)

PHYSICS 65. Thermodynamics and Foundations of Modern Physics

4 units, Spr (Romani, R)

PHYSICS 61N. Applications of Electromagnetism—Stanford Introductory Seminar. Preference to freshmen. Possible topics include tidal forces, gyroscopic effects, fractal dimension, and introduction to chaos. Corequisite: 61.

1 unit, Aut (Gratta, G)

PHYSICS 64. Advanced Electromagnetism Laboratory—Experimental work in mechanics, electricity and magnetism. Corequisite 63.

1 unit, Win (Allen, S)

PHYSICS 67. Introduction to Laboratory Physics—Methods of experimental design, data collection and analysis, statistics, and curve fitting in a laboratory setting. Experiments drawn from electronics, optics, heat, and particle physics. Intended as preparation for PHYSICS 105, 107, 108. Lecture plus laboratory format. Required for 60 series Physics majors; recommended for 40 series students who intend to major in Physics. Corequisite: 65 or 43.

2 units, Spr (Fisher, G)

PHYSICS 70. Foundations of Modern Physics—Required for Physics majors who completed the 40 series, or the PHYSICS 60 series prior to 2005-06. Special relativity, the experimental basis of quantum theory, atomic structure, quantization of light, matter waves, Schrödinger equation. Prerequisites: 41, 43. Corequisite: 45. Recommended: prior or concurrent registration in MATH 53. GER: DB-NatSci

4 units, Aut (Kasevich, M)

PHYSICS 80N. The Technical Aspects of Photography—Stanford Introductory Seminar. Preference to freshmen. For those with some background in photography. How cameras record photographic images on film and electronically. The technical photographic processes which the photographer must understand in order to use cameras effectively. Camera types and their advantages, how lenses work and their limitations, camera shutters, light meters and the proper exposure of film, film types, depth of focus, control of the focal plane and perspective, and special strategies for macro and night photography. View cameras and range finder technical cameras. Students exploit the flexibility of these formats to take photographs around campus. Prerequisite: knowledge of elementary physics.

3 units, Win (Osheroff, D)

PHYSICS 83N. Physics in the 21st Century—Stanford Introductory Seminar. Preference to freshmen. Current topics at the frontier of modern physics. Topics include subatomic particles and the standard model, symmetries in nature, extra dimensions of space, string theory, supersymmetry, the big bang theory of the origin of the universe, black holes, dark matter, and dark energy of the universe. Why the sun shines. Cosmology and inflation. GER: DB-NatSci

3 units, Aut (Dimopoulos, S)

PHYSICS 87N. The Physics of One: Nanoscale Science and Technology—Stanford Introductory Seminar. Preference to freshmen. Contemporary interdisciplinary research. The manipulation of nature's fundamental building blocks. Accomplishments and questions engendered by the pursuit of knowledge at the discrete limit of matter. Prerequisite: high-school physics.

3 units, Aut (Manoharan, H)

PHYSICS 100. Introduction to Observational and Laboratory Astronomy—For physical science or engineering students. Emphasis is on the quantitative measurement of astronomical parameters such as distance, temperature, mass, composition of stars, galaxies, and quasars. Observation using the 0.4m and 0.6m telescopes at the Stanford Observatory. Limited enrollment. Prerequisites: one year of college physics; prior or concurrent registration in 25, 65, or 70; and consent of instructor. GER: DB-NatSci

4 units, Spr (Church, S)

PHYSICS 105. Intermediate Physics Laboratory I: Analog Electronics—Analog electronics, from Ohm's Law and passive circuits to transistor and op amp circuits, with an emphasis on developing practical circuit design skills to prepare undergraduates for laboratory research. Course culminates in a short design project. Minimal use of math and physics, no prior electronics experience assumed beyond introductory physics. Prerequisite: PHYSICS 43 (formerly 55) or 63 or other introductory electricity and magnetism course.

3 units, Aut (Pam, R)

PHYSICS 107. Intermediate Physics Laboratory II: Experimental Techniques and Data Analysis—Experiments on lasers, Gaussian optics, and atom-light interaction, with emphasis on data and error analysis techniques. Students describe a subset of experiments in scientific paper format. Prerequisites: completion of 40 (formerly 50) or 60 series, 70, and 105. Recommended: 130, prior or concurrent enrollment in 120. WIM

4 units, Win (Kasevich, M)

PHYSICS 108. Intermediate Physics Laboratory III: Project—Small student groups plan, design, build, and carry out a single experimental project in low-temperature physics. Prerequisites 105, 107.

3 units, Spr (Kapitulnik, A)

PHYSICS 110. Intermediate Mechanics—Lagrangian and Hamiltonian mechanics. Principle of least action, Galilean relativity, Lagrangian mechanical systems, Euler-Lagrange equations. Central potential, Kepler's problem, planetary motion. Scattering problems, disintegration, Rutherford scattering, cross section. Harmonic motion in the presence of rapidly oscillating field. Poisson's brackets, canonical transformations, Liouville's theorem, Hamilton-Jacobi equation. Prerequisites: 41 (formerly 53) or 61, and MATH 53.

4 units, Spr (Gratta, G)

PHYSICS 112. Mathematical Methods of Physics—Theory of complex variables, complex functions, and complex analysis. Fourier series and Fourier transforms. Special functions such as Laguerre, Legendre, and Hermite polynomials, and Bessel functions. The uses of Green's functions. Covers material of MATH 106 and 132 most pertinent to Physics majors. Prerequisites: MATH 50 or 50H series, MATH 131.

4 units, Win (Fetter, A)

PHYSICS 113. Computational Physics—Numerical methods for solving problems in mechanics, electromagnetism, quantum mechanics, and statistical mechanics. Methods include numerical integration; solutions of ordinary and partial differential equations; solutions of the diffusion equation, Laplace's equation and Poisson's equation with relaxation methods; statistical methods including Monte Carlo techniques; matrix methods and eigenvalue problems. Short introduction to MatLab, used for class examples; class projects may be programmed in any language such as C. Prerequisites: MATH 53, prior or concurrent registration in PHYSICS 110, 121. Previous programming experience not required.

4 units, Spr (Cabrera, B)

PHYSICS 120,121. Intermediate Electricity and Magnetism—Vector analysis, electrostatic fields, including multipole expansion; dielectrics. Special relativity and transformation between electric and magnetic fields. Maxwell's equations. Static magnetic fields, magnetic materials. Electromagnetic radiation, plane wave problems (free space, conductors and dielectric materials, boundaries). Dipole and quadrupole radiation. Wave guides and cavities. Prerequisites: 43 (formerly 55) or 63; concurrent or prior registration in MATH 53 and 131 for 120 and 121, respectively. Recommended: concurrent or prior registration in 112.

4 units, 120: Win (Cabrera, B), 121: Spr (Robertson, N)

PHYSICS 130,131. Quantum Mechanics—The origins of quantum mechanics, wave mechanics, and the Schrödinger equation. Heisenberg's matrix formulation of quantum mechanics, solutions to one-dimensional systems, separation of variables and the solution to three-dimensional systems, the central field problem and angular momentum eigenstates, spin and the coupling of angular momentum, Fermi and Bose statistics, time-independent perturbation theory. Prerequisites: 70, 110; pre- or corequisites: 120, 121, and MATH 131.

4 units, 130: Aut, 131: Win (Kahn, S)

PHYSICS 134. Advanced Topics in Quantum Mechanics—Variational principle, WKB approximation, time-dependent perturbation theory. Scattering theory: partial wave expansion, Born approximation. EPR paradox and Bell's inequality. Introduction to relativistic quantum mechanics. Prerequisites: 130, 131.

4 units, Spr (Moler, K)

PHYSICS 152. Introduction to High Energy Physics—(Graduate students register for 252.) Elementary particles and the fundamental forces. Conservation laws and symmetries. Interaction of elementary particles with matter and detection techniques. The quark model. Weak interactions of quarks and leptons. The standard model of particle physics. Colliders. Connections to cosmology. Prerequisite: 130.

3 units, Win (Roodman, A)

PHYSICS 153A. Introduction to String Theory I: Goals—Facts about physics in extra dimensions. Nonrelativistic strings. Relativistic particles and strings. Light-cone quantization of relativistic strings and the emergence of the critical dimension.

4 units, not given this year

PHYSICS 153B. Introduction to String Theory II: Open Strings and D-branes—Emergence of gauge theory and connections to particle physics. String thermodynamics and black holes. T-duality, string compactification, and stringy modifications of geometry.

4 units, not given this year

PHYSICS 160. Introduction to Stellar and Galactic Astrophysics—Physics of matter under extreme conditions. Evolution and death of stars. White dwarfs, planetary nebulae, supernovae, neutron stars, pulsars, binary stars, x-ray stars, and black holes. Galactic structure: interstellar medium, molecular clouds, HI and HII regions, star formation and element abundances. Prerequisites: calculus and one year of college physics at the level of the PHYSICS 60 or 40 series and 70.

3 units, Win (Romani, R)

PHYSICS 161. Introduction to Extragalactic Astrophysics and Cosmology—Observations of the distances and compositions of objects on cosmic scales: galaxies, galaxy clusters, quasars, and diffuse matter at high red shift. Big bang cosmology, physical processes in the early universe, the origin of matter and the elements, inflation, and creation of structure in the Universe. Observational evidence for dark matter and dark energy. Future of the Universe. Prerequisites: calculus and college physics at the level of the 40 series and 70.

3 units, Spr (Michelson, P)

PHYSICS 169A. Independent Study in Astrophysics and Honors Thesis: Selection of the Problem—Description of the problem, its background, work planned in the subsequent two quarters, and development of the theoretical apparatus or initial interpretation of the problem.

1-9 units, Aut (Staff)

PHYSICS 169B. Independent Study in Astrophysics and Honors Thesis: Continuation of Project—Substantial completion of the required computations or data analysis for the research project selected.

1-9 units, Win (Staff)

PHYSICS 169C. Independent Study in Astrophysics and Honors Thesis: Completion of Project—Completion of research and writing of a paper presenting methods used and results.

1-9 units, Spr (Staff)

PHYSICS 170,171. Thermodynamics, Kinetic Theory, and Statistical Mechanics—The derivation of laws of thermodynamics from basic postulates; the determination of the relationship between atomic substructure and macroscopic behavior of matter. Temperature; equations of state, heat, and internal energy; entropy; reversibility; applications to various properties of matter; and absolute zero and low-temperature phenomena. Prerequisites: 45 (formerly 51) or 65, and MATH 53.

4 units, 170: Aut (Fetter, A), 171: Win (Zhang, S)

PHYSICS 172. Solid State Physics—Crystal structures and bonding in solids. X-ray diffraction. Lattice dynamics and thermal properties. Electronic structure of solids; transport properties of metals; quantum oscillations; charge density waves. Properties and applications of semiconductors. Phenomenology and microscopic theory of superconductivity. Prerequisite: 170.

3 units, Spr (Fisher, I)

PHYSICS 190. Independent Study—Undergraduate research in experimental or theoretical physics under the supervision of a faculty member. Prerequisites: superior work as an undergraduate Physics major, and consent of instructor.

1-9 units, Aut, Win, Spr, Sum (Laughlin, R; Staff)

PHYSICS 204A. Seminar in Theoretical Physics—Topics of recent interest in theoretical physics: Bose-Einstein condensation, quantum and classical chaos, superfluidity in 2D, and protein folding. Work in the seminar may provide a basis for an honors project in theoretical physics. Prerequisite: 134 or consent of instructor.

3 units, Aut (Doniach, S)

PHYSICS 204B. Seminar in Theoretical Physics—Applications of the Renormalization Group; emphasis is on principles and intuitions.

3 units, Spr (Susskind, L)

PHYSICS 205. Undergraduate Honors Research—Experimental or theoretical project and thesis in Physics under supervision of a faculty member. Planning of the thesis project should begin no later than middle of the junior year. Successful completion of an honors thesis leads to graduation with departmental honors. Prerequisites: superior work in Physics as an undergraduate major and approval of the honors adviser.

1-12 units, Aut, Win, Spr, Sum (Staff)

GRADUATE

PHYSICS 210. Advanced Particle Mechanics—The Lagrangian and Hamiltonian dynamics of particles. Beyond small oscillations. Phase portraits, Hamilton-Jacobi theory, action-angle variables, adiabatic invariance. Nonlinear dynamical systems, continuous and discrete. Behavior near the fixed points, stability of solutions, attractors, chaotic motion. Transition to continuum mechanics. Prerequisite: 110 or equivalent.

3 units, Spr (Kallosh, R)

PHYSICS 211. Continuum Mechanics—Elasticity, fluids, turbulence, waves, gas dynamics, shocks, and MHD plasmas. Examples from everyday phenomena, geophysics, and astrophysics.

3 units, Win (Blandford, R)

PHYSICS 212. Statistical Mechanics—Principles, ensembles, statistical equilibrium. Thermodynamic functions, ideal and near-ideal gases. Fluctuations. Mean-field description of phase-transitions and associated critical exponents. One-dimensional Ising model and other exact solutions. Renormalization and scaling relations. Prerequisites: 171, 231.

3 units, Spr (Peskin, M)

PHYSICS 216. Back of the Envelope Physics—Techniques to make order-of-magnitude estimates of physical effects. Goal is to sharpen physical intuition and promote a synthesis of physics through the application of undergraduate physics to problems, some not included in the standard curriculum. Techniques such as scaling and dimensional analysis. Applications include properties of materials, geophysics, astrophysics and cosmology, biomechanics, and particle physics. Prerequisites: undergraduate mechanics, statistical mechanics, electricity and magnetism, and quantum mechanics.

3 units, Aut (Madejski, G)

PHYSICS 220,221. Classical Electrodynamics—Electrostatics and magnetostatics: conductors and dielectrics, magnetic media, electric and magnetic forces, and energy. Maxwell's equations: electromagnetic waves, Poynting's theorem, electromagnetic properties of matter, dispersion relations, wave guides and cavities, magnetohydrodynamics. Special relativity: Lorentz transformations, covariant, equations of electrodynamics and mechanics, Lagrangian formulation, Noether's theorem and conservation laws. Radiation: dipole and quadrupole radiation, electromagnetic scattering and diffraction, the optical theorem, Liénard-Wiechert potentials, relativistic Larmor's formula, frequency and angular distribution of radiation, synchrotron radiation. Energy losses in matter: Bohr's formula, Cherenkov radiation, bremsstrahlung and screening effects, transition radiation. Prerequisites: 121 or equivalent; MATH 106 and 132, or PHYSICS 210.

3 units, 220: Aut, 221: Win (Church, S)

PHYSICS 230. Quantum Mechanics—Fundamental concepts. Introduction to Hilbert spaces and Dirac's notation. Postulates applied to simple systems, including those with periodic structure. Symmetry operations and gauge transformation. The path integral formulation of quantum statistical mechanics. Problems related to measurement theory. The quantum theory of angular momenta and central potential problems.

3 units, Aut (Kivelson, S)

PHYSICS 231. Quantum Mechanics—Basis for higher level courses on atomic solid state and particle physics. Wigner-Eckart theorem and addition of angular momenta. Approximation methods for time-independent and time-dependent perturbations. Semiclassical and quantum theory of radiation, second quantization of radiation and matter fields. Systems of identical particles and many electron atoms and molecules.

3 units, Win (Kivelson, S)

PHYSICS 232. Quantum Mechanics—Special topics. Elementary excitations in solids (the free electron gas, electronic band structure, phonons.) Elementary scattering theory (Born approximation, partial wave analyses, resonance scattering.) Relativistic single-particle equations. Dirac equation applied to central potentials, relativistic corrections, and nonrelativistic limits.

3 units, Spr (Kivelson, S)

PHYSICS 252. Introduction to High Energy Physics—See 152.

3 units, Win (Roodman, A)

PHYSICS 260. Introduction to Astrophysics and Cosmology—The observed properties and theoretical models of stars, galaxies, and the universe. Physical processes for production of radiation from cosmic sources. Observations of cosmic microwave background radiation. Newtonian and general relativistic models of the universe. Physics of the early universe, nucleosynthesis, baryogenesis, nature of dark matter and dark energy and inflation. Prerequisites: undergraduate physics, 121, and 171 or equivalent.

3 units, Aut (Petrosian, V)

PHYSICS 262. Introduction to Gravitation—Review of special relativity. Introduction to general relativity. Curvature, energy-momentum tensor, Einstein field equations. Newtonian limit of general relativity. Black holes, relativistic stars, gravitational waves, cosmology. Prerequisites: 121 or other courses including special relativity.

3 units, Win (Wagoner, R)

PHYSICS 275. Electrons in Nanostructures—The behavior of electrons in metals or semiconductors at length scales below 1 micron, smaller than familiar macroscopic objects but larger than atoms. Ballistic transport, Coulomb blockade, localization, quantum mechanical interference, and persistent currents. Topics may include quantum Hall systems, spin transport, spin-orbit coupling in nanostructures, magnetic tunnel junctions, Kondo systems, and 1-dimensional systems. Readings focus on the experimental research literature, and recent texts and reviews. Prerequisite: undergraduate quantum mechanics and solid state physics.

3 units, not given this year

PHYSICS 290. Research Activities at Stanford—Required of first-year Physics graduate students; suggested for junior or senior Physics majors for 1 unit. Review of research activities in the department and elsewhere at Stanford at a level suitable for entering graduate students.

1-3 units, Aut (Gratta, G)

PHYSICS 291. Practical Training—Opportunity for practical training in industrial labs. Arranged by student with the research adviser's approval. A brief summary of activities is required, approved by the research adviser.

3 units, Sum (Staff)

PHYSICS 293. Literature of Physics—Intensive study of the literature of any special topic. Preparation, presentation of reports. If taken under the supervision of a faculty member outside the department, approval of the Physics chair required. Prerequisites: 25 units of college physics, consent of instructor.

1-15 units, Aut, Win, Spr, Sum (Zhang, S; Staff)

PHYSICS 294. Teaching of Physics Seminar—Required of teaching assistants in Physics during first quarter of a teaching appointment. Techniques of teaching physics by means of weekly seminars, simulated teaching situations, and evaluation of in-class teaching performance.

1 unit, Aut, Win, Spr (Pam, R)

PHYSICS 301. Astrophysics Laboratory—Seminar/lab. Astronomical observational techniques and physical models of astronomical objects. Observational component uses the 24-inch telescope at the Stanford Observatory and ancillary photometric and spectroscopic instrumentation. Emphasis is on spectroscopic and photometric observation of main sequence, post-main sequence, and variable stars. Term project developing observational equipment or software. Limited enrollment. Prerequisite: consent of instructor.

3 units, not given this year

PHYSICS 312. Basic Plasma Physics—For the nonspecialist who needs a working knowledge of plasma physics for space science, astrophysics, fusion, or laser applications. Topics: orbit theory, the Boltzmann equation, fluid equations, MHD waves and instabilities, EM waves, the Vlasov theory of ES waves and instabilities including Landau damping and quasilinear theory, the Fokker-Planck equation, and relaxation processes. Advanced topics in resistive instabilities and particle acceleration. Prerequisite: 210 and 220, or consent of instructor.

3 units, Win (Kosovichev, A)

PHYSICS 321. Laser Spectroscopy—Theoretical concepts and experimental techniques. Absorption, dispersion, Kramers-Kronig relations, line-shapes. Classical and laser linear spectroscopy. Semiclassical theory of laser atom interaction: time-dependent perturbation theory, density matrix, optical Bloch equations, coherent pulse propagation, multiphoton transitions. High-resolution nonlinear laser spectroscopy: saturation spectroscopy, polarization spectroscopy, two-photon and multiphoton spectroscopy, optical Ramsey spectroscopy. Phase conjugation. Four-wave mixing, harmonic generation. Coherent Raman spectroscopy, quantum beats, ultra-sensitive detection. Offered occasionally. Prerequisite: 230. Recommended: 231.

3 units, Spr (Kasevich, M)

PHYSICS 323. Laser Cooling and Trapping—Principles of laser cooling and atom trapping. Optical forces on atoms, forms of laser cooling, atom optics and atom interferometry, ultra-cold collisions, and introduction to Bose condensation of dilute gases. Emphasis is on the development of the general formalisms that treat these topics. Applications of the cooling and trapping techniques: atomic clocks, internal sensors, measurements that address high-energy physics questions, many-body effects, polymer science, and biology. Prerequisite: 231 or equivalent.

3 units, not given this year

PHYSICS 330. Quantum Field Theory—Quantization of scalar and Dirac fields. Feynman diagrams. Quantum electrodynamics. Elementary electrodynamic processes: Compton scattering, $e+e-$ annihilation. Loop diagrams and electron ($g-2$). Soft photons and infrared divergences.

3 units, Aut (Kallosh, R)

PHYSICS 331. Quantum Field Theory—Local gauge invariance and Yang-Mills fields. Functional integral methods. Asymptotic freedom and quantum chromodynamics. Spontaneous symmetry breaking and the Higgs mechanism. Unified models of weak and electromagnetic interactions.

3 units, Win (Kallosh, R)

PHYSICS 332. Quantum Field Theory—Theory of renormalization. The renormalization group and applications to the theory of phase transitions. Renormalization of Yang-Mills theories. Applications of the renormalization group of quantum chromodynamics. Perturbation theory anomalies. Possible topics in field theory on time dependent backgrounds.

3 units, Spr (Silverstein, E)

PHYSICS 351. Particle Physics and Collider Physics—The standard big bang theory, its successes and problems. Versions of inflationary cosmology including old, new, chaotic, and hybrid inflation. Reheating of the Universe and creation of matter after inflation. The theory of density perturbations, large-scale structure formation, and anisotropy of cosmic microwave background radiation. Eternal inflation and the global structure of the Universe. Anthropic principle, the cosmological constant problem, and dark energy. Towards inflation in string theory and brane cosmology.

3 units, not given this year

PHYSICS 352. Neutrino Physics—Neutrino masses and mixing. Kinematics tests for neutrino masses. Neutrino interactions, the number of light neutrino species. Solar and atmospheric neutrino anomalies. Artificial neutrino sources: reactors and particle accelerators. Majorana and Dirac neutrinos. Double-beta decay. Neutrinos in supernovae. Relic neutrinos. Neutrino telescopes.

3 units, not given this year

PHYSICS 360. Physics of Astrophysics—Theoretical concepts and tools for modern astrophysics. Radiation transfer equations; emission, scattering, and absorption mechanisms: Compton, synchrotron and bremsstrahlung processes; photoionization and line emission. Equations of state of ideal, interacting, and degenerate gasses. Application to astrophysical sources such as HII regions, supernova remnants, cluster of galaxies, and compact sources such as accretion disks, X-ray, gamma-ray, and radio sources. Prerequisites: 121, 171 or equivalent.

3 units, Win (Abel, T)

PHYSICS 361. Stellar and Galactic Astrophysics—Astronomical data on stars, star clusters, interstellar medium, and the Milky Way galaxy. Theory of stellar structure; hydrostatic equilibrium, radiation balance, and energy production. Stellar formation, Jean's mass, and protostars. Evolution of stars to the main sequence and beyond to red giants, white dwarfs, neutron stars, and black holes. Supernovae and compact sources. Structure of the Milky Way: disk and spiral arms; dark matter and the halo mass; central bulge or bar; and black hole. Prerequisite: 221 or equivalent. Recommended: 260, 360.

3 units, Spr (Petrosian, V)

PHYSICS 362. Advanced Extragalactic Astrophysics and Cosmology—Observational data on the content and activities of galaxies, the content of the Universe, cosmic microwave background radiation, gravitational lensing, and dark matter. Models of the origin, structure, and evolution of the Universe based on the theory of general relativity. Test of the models and the nature of dark matter and dark energy. Physics of the early Universe, inflation, baryosynthesis, nucleosynthesis, and galaxy formation. Prerequisites: 210, 211, 260 or 360.

3 units, not given this year

PHYSICS 363. Solar and Solar-Terrestrial Physics—Structure, mechanisms, and properties of the Sun's interior and atmosphere. Tools for solar observations; magnetic fields and polarimetry. Solar oscillations and helioseismology. Differential rotation and turbulent convection. Solar MHD, Alfvén and magneto-acoustic waves. Solar cycle and dynamo. Magnetic energy release, reconnection, particle acceleration. Solar activity, sunspots, flares, coronal mass ejections; UV, X-ray, and high-energy particle emissions. The interaction of the solar wind with Earth's magnetosphere and its terrestrial effects; space weather. Prerequisite: 221 or equivalent.

3 units, not given this year

PHYSICS 364. Advanced Gravitation—Early universe cosmology. Topics at the interface between cosmology and gravity, particle theory, and speculative theories of physics at the Planck scale such as string theory. Inflationary cosmology and generation of density perturbations, models of baryogenesis, big bang nucleosynthesis, and speculations about the Universe at the Planck scale. Experiments in the near future that may extend or revise current notions.

3 units, Spr (Kachru, S)

PHYSICS 370. Theory of Many-Particle Systems—Application of quantum field theory to the nonrelativistic, many-body problem, including methods of temperature-dependent Green's functions and canonical transformations. Theory of finite-temperature, interacting Bose and Fermi systems with applications to superfluidity, superconductivity, and electron gas. Offered occasionally. Prerequisite: 232.

3 units, Aut (Zhang, S)

PHYSICS 376. Superfluidity and Superconductivity—Introduction to superfluid He: two-fluid model, phonons, and rotons. Feynman description, vortices, Bogoliubov theory. Phenomenology of superconductors: London description, Ginzburg-Landau model, type-I vs. type-II materials, Josephson effects, thin films, Kosterlitz-Thouless behavior, electron-phonon coupling. BCS theory: bulk systems, tunneling, strong-coupling materials, dirty and gapless superconductivity, fluctuation effects, Ginzburg criterion. Offered occasionally. Recommended: APPPHYS 272, 273, or equivalents.

3 units, not given this year

PHYSICS 450. LHC Physics: Theoretical Physics of Particles and Fields—Physics of high energy processes at hadron-hadron colliders. Parton model, measurement of parton distribution functions, use of the model to predict properties of quark and gluon collisions at high energy. Computation of parton cross-sections in perturbative QCD. W and Z boson production at hadron colliders. Phenomenology of the Higgs boson at hadron colliders. May be repeated for credit. Prerequisite: 331.

3 units, Aut (Peskin, M)

PHYSICS 451. Physics Beyond the Standard Model I—Advanced topics in the standard model. Instantons. Grand unified theories. Baryogenesis and leptogenesis. Monopoles. Inflation. Theories of fermion masses and

Froggat-Nilesen. Hierarchy problem, technicolor, and extended technicolor. Composite models. Introduction to the supersymmetric standard model. May be repeated for credit.

3 units, Win (Dimopoulos, S)

PHYSICS 452. Physics Beyond the Standard Model II—Advanced topics in the supersymmetric standard model. Large extra dimensions and TeV-strings. Warped compactifications. Cosmological constant problem and Weinberg's no-go theorem. Anthropic approach to the cosmological constant problem. The landscape of vacua and split supersymmetry. Minimal model. Precision tests of general relativity using atom interferometry.

3 units, Spr (Dimopoulos, S)

PHYSICS 463. Special Topics in Astrophysics: Theoretical Cosmology—Content varies depending on participant interest. This year, topics include: large-scale structure formation, the formation and structure of dark matter halos, and N-body simulations; alternative dark matter models; galaxy clustering, the halo model, and halo occupation statistics; galaxy formation models and galaxy evolution; and constraints on cosmological parameters and galaxy formation from large surveys.

3 units, Spr (Wechsler, R)

PHYSICS 490. Research—Open only to Physics graduate students, with consent of instructor. Work is in experimental or theoretical problems in research, as distinguished from independent study of a non-research character in 190 and 293.

1-15 units, Aut, Win, Spr, Sum (Staff)

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

APPPHYS 207. Laboratory Electronics

3 units, Win (Fox, J)

APPPHYS 208. Laboratory Electronics

3 units, Spr (Fox, J), alternate years, not given next year

APPPHYS 226. Physics of Quantum Information

3 units, Spr (Yamamoto, Y), alternate years, not given next year

APPPHYS 270. Magnetism and Long Range Order in Solids

3 units, Aut (Fisher, I)

APPPHYS 272,273. Solid State Physics

3 units, 272: Win, 273: Spr (Laughlin, R)

APPPHYS 315. Methods in Computational Biology

3 units, Win (Doniach, S), alternate years, not given next year

APPPHYS 383. Introduction to Atomic Processes

3 units, Win (Bucksbaum, P)

APPPHYS 392. Topics in Molecular Biophysics

3 units, Spr (Doniach, S), alternate years, not given next year

EE 268. Introduction to Modern Optics

3 units, Aut (Hesselink, L)

GES 222. Planetary Systems: Dynamics and Origins

3-4 units, Aut (Staff)

POLITICAL SCIENCE

Emeriti: (Professors) David B. Abernethy, Lucius J. Barker, Richard A. Brody, Charles Drekmeier, Richard R. Fagen, Alexander L. George, John W. Lewis, Seymour M. Lipset, John Manley, James March, Hubert R. Marshall, Robert A. Packenham, Philippe Schmitter, Robert Ward, Hans N. Weiler; (Senior Lecturer) Elisabeth Hansot

Chair: Terry M. Moe

Professors: David W. Brady, Joshua Cohen, James D. Fearon, John A. Ferejohn (on leave), Morris P. Fiorina (on leave Autumn, Spring), Judith L. Goldstein, Stephen H. Haber, David J. Holloway (on leave Autumn), Shanto Iyengar (on leave Spring), Terry L. Karl, Stephen D. Krasner (on leave), Jon A. Krosnick (on leave), David D. Laitin, Terry M. Moe, Josiah Ober, Jean C. Oi (on leave), Daniel I. Okimoto (on leave), Jack N. Rakove (on leave), Condoleezza Rice (on leave), Douglas Rivers, Scott D. Sagan, Paul M. Sniderman, Barry R. Weingast

Associate Professors: Luis R. Fraga, Simon D. Jackman, Isabela Mares (on leave), Michael A. McFaul, Kenneth A. Schultz

Assistant Professors: Alberto Díaz-Cayeros (on leave), Beatriz Magaloni (on leave), Rob Reich, Peter Stone, Michael R. Tomz (on leave), Jonathan Wand (on leave), Jeremy Weinstein, Anne T. Wren (on leave)

Professor (Research): Norman Nie

Lecturers: Ebru Erdem, Tammy Frisby, Andrea Gates, Solomon Major, Abbas Milani, Andrew R. Rutten, Mary Sprague, Kathryn Stoner-Weiss

Courtesy Professors: David P. Baron, Jonathan B. Bendor, Coit D. Blacker, Gerhard Casper, Larry Diamond, Gerald A. Dorfman, Jean-Pierre Dupuy, James Fishkin, Lawrence Friedman, Keith Krehbiel, Roger Noll, Stephen J. Stedman

Courtesy Associate Professor: Debra M. Satz

Visiting Professors: Andrea Gates, Josef Joffe, John Wallis

Visiting Associate Professor: H. Lyman Miller

Visiting Assistant Professor: Sebastian Etchemendy

Department Offices: Encina Hall West, Room 100

Mail Code: 94305-6044

Phone: (650) 723-1806

Web Site: <http://polisci.stanford.edu>

Courses given in Political Science have the subject code POLISCI. For a complete list of subject codes, see Appendix.

UNDERGRADUATE PROGRAMS

BACHELOR OF ARTS

To receive a B.A. in Political Science, a student must:

1. Submit an application for the Political Science major to the undergraduate administrator, and declare on Axess. Forms are available in Encina Hall West, Room 100. For additional information, drop by or phone (650) 723-1608. Students must complete their major declaration no later than the end of Autumn Quarter in junior year.
2. Complete 70 units including:
 - a) 45 Political Science course units to complete the breadth requirements.
 - b) a 5-unit methods requirement satisfied by POLISCI 150A, 150B, 150C, 151B, ECON 102A, or STATS 60. The list of courses satisfying the methods requirement is updated annually by the department. Students should consult the Bulletin for new courses that satisfy this requirement.
 - c) 20 additional Political Science units including no more than 5 units of directed reading. 10 units of ECON 1A,B may substitute for two 5-unit POLISCI courses.
 - d) no more than two 5-unit Stanford Introductory Seminar courses can be applied toward the 70-unit major requirement.
3. Satisfy breadth requirements (45 units): each student must take two from the following Political Science courses, one of which must be in the primary concentration, the other in the secondary concentration. These courses must be completed by the end of sophomore year.
 - POLISCI 1. Introduction to International Relations

POLISCI 2. American National Government and Politics

POLISCI 3. Introduction to Political Philosophy

POLISCI 4. Introduction to Comparing Political Systems

POLISCI 151A. Doing Political Science,

or POLISCI 151B. Data Analysis for Political Science

The primary concentration must be completed by fulfilling the depth requirement with at least 30 units (see Statement 4).

Each major should declare a secondary concentration in another subfield, with at least 15 units in that concentration, including the introductory course for that subfield.

4. Satisfy a depth requirement. Each major should declare a primary concentration in one subfield and take at least 30 units in this concentration, including the introductory course for that subfield. Subfields include:
 - International Relations (1, 110-119, 210-219, 310-319)
 - American Politics (2, 120-129, 220-229, 320-329)
 - Political Theory (3, 130-139, 230-239, 330-339)
 - Comparative Politics (4, 140-149, 240-249, 340-349)
5. Demonstrate the capacity for sustained research and writing in the discipline. This requirement is satisfied by taking a Political Science course designated as a Writing in the Major (WIM) course.
6. Take at least one 5-unit, advanced undergraduate seminar in Political Science.
7. Students may apply a maximum of 10 units from Stanford Summer Session or courses outside Stanford. Transfer students are allowed up to 20 units of transfer units or summer session. A maximum of 15 units may be applied towards breadth requirements and 5 towards other Political Science course units. All transfer cases require petitions which must be reviewed and approved by the Director of Undergraduate Studies.
8. Directed reading and Oxford tutorial units require a petition and may only be applied towards related course work units. These units may not be used to fulfill a breadth requirement, and no more than 10 units of directed reading and Oxford tutorial units combined may count toward the required 70 Political Science units.
9. Courses counting toward the 70-unit requirement must be taken for a letter grade, although units in excess of the required 70 may be taken on a credit/no credit basis. A minimum grade of 'C' is required for courses to count towards major requirements.

MINORS

Students must complete their declaration of the minor on Axess no later than the end of the junior year.

To receive a minor in Political Science, a student must complete a minimum of 30 unduplicated units. All units must be in courses listed or crosslisted in the Department of Political Science. A maximum of 5 units of directed reading may count if supervised by a member of the department.

All units are for a letter grade. A minimum grade point average (GPA) of 2.0 (C) is required for courses to count towards minor requirements.

Concentration—The student selects a subfield in which three courses are taken. One of these courses is the introductory course, the other two at a more advanced level (numbered above 100). Where a linked set of advanced courses is offered, as with the Political Theory 130A,B,C series, the introductory course need not be taken.

The concentration corresponds to one of the subfields the department already has in place, namely, international relations, American politics, political theory, and comparative politics.

Distribution—Three courses must be in the area of concentration, as specified above, for 15 units. An additional 10 units of intermediate and advanced courses (100 level or above) must be in two additional subfields.

Transfer Work—A maximum of 10 units of work completed outside Stanford may be given Political Science credit toward the minor for transfer students. A maximum of 5 units of work completed in Stanford Summer Session or outside of Stanford for non-transfer students may be given Political Science credit toward the minor. All such cases must be individually reviewed and approved by the Director of Undergraduate Studies.

PRIZES

There are several annual prizes for undergraduate students: the Arnaud B. Leavelle Memorial Prize for the best paper in the History of Political Thought sequence (POLISCI 130A,B,C), a cash prize for the best thesis written in political theory, the Lindsay Peters, Jr., Memorial Prize for the outstanding student each year in POLISCI 2, and Cottrell Prizes for outstanding students in POLISCI 1, 3, and 4.

HONORS PROGRAM

The honors program offers qualified students an opportunity to conduct independent research, write a thesis summarizing their findings, and make a presentation of their work. During the process of research, analysis, thinking, drafting, rethinking, and redrafting, students work closely with a faculty adviser and their fellow students.

Applicants must have a 3.5 grade point average (GPA) in Political Science courses, and an adviser who must be a member of the academic council. Students are required to declare their intention to pursue honors on the Major Proposal form. Applications can be obtained from the department office.

Students pursuing honors must complete the following by the end of Spring Quarter of their junior year: Methods requirement (POLISCI 150A,B,C, 151B, STATS 60, or ECON 102A), WIM requirement, and a completed research paper from an advanced undergraduate seminar or directed reading. Students are required to enroll in one quarter of POLISCI 299Q, Junior Research Seminar, in their junior year. This credit/no-credit course is designed to help students find a manageable thesis topic and adviser.

Students who are accepted into the program should plan to make the thesis the focus of their senior year. They should enroll in POLISCI 299A,B,C, which covers research and writing directed by the student's adviser. In addition, students must enroll in POLISCI 299R, a 3-unit Autumn Quarter seminar designed to develop research and writing skills. In the Winter Quarter, students must enroll in POLISCI 299S which is a credit/no credit tutorial in which students work with other students and tutors to finish their research.

Most students find themselves in one of two groups: (1) those who already have substantial background in their thesis topic, and can expect to complete the honors program in two or three quarters for a total of 10-15 units completed in POLISCI 299A,B,C; or (2) those who have little or no previous work on the topic, and can expect to complete the program in three quarters with 15 units of work.

To complete the honors program, students must:

1. Complete all requirements for the major.
2. Enroll in one quarter of POLISCI 299Q, 299R, and 299S.
3. Enroll in at least 10 units of POLISCI 299A, B, or C, senior project. Students must take at least two quarters of Senior Project units.
4. Complete a thesis of honors quality, for a grade of 'B+' or better.

Students cannot apply units from the POLISCI 299Q, Junior Research Seminar, POLISCI 299R, Senior Research Seminar, or POLISCI 299S, Senior Honors Tutorial, toward the 70-unit requirement for the major. However, students can apply up to 10 units from POLISCI 299A,B,C Senior Project, toward the 70-unit requirement.

GRADUATE PROGRAMS

Admission—Prospective graduate students should see <http://gradadmissions.stanford.edu> for application materials. Applicants are required to submit a recent sample of their writing (not to exceed 35 pages) and to take the General Test of the Graduate Record Examination. Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL). The TOEFL requirements are waived for applicants who have recently completed two or more years of study in an English-speaking country. For details concerning these tests, see the Guide to Graduate Admission, available at <http://registrar.stanford.edu/shared/publications.htm#GradStud>. The application deadline is December 5. Admission is offered for the Autumn Quarter only. The department expects all students to pursue a full-time program except for time devoted to teaching or research assistantships.

MASTER OF ARTS

The M.A. degree may be pursued as part of a joint degree program with one of the University's professional schools. Students interested in a joint degree should apply for admission to the M.A. program in Political Science during the Autumn Quarter of the first year in the Stanford professional school.

Doctoral candidates may elect to take the M.A. degree when they have met the following requirements:

1. Completion of at least three quarters of residency as a graduate student with 45 units of credit of which at least 25 units must be taken in Political Science graduate seminars of 300 level and above. Not more than 25 units of the 45-unit requirement may be taken in a single field.
2. At least two graduate seminars in each of two fields and at least one graduate seminar in a third field.
3. Of the remaining 20 units, not more than 10 units of work from related departments may be accepted in lieu of a portion of the work in Political Science. Not more than 10 units may be taken as directed reading.
4. Courses must be numbered above 300.
5. A grade point average (GPA) of 2.7 (B-) or better must be attained for directed reading and all course work.

The department does not offer a coterminal bachelor's and master's degree.

Doctoral candidates may pursue master's degrees from other departments. Recent examples include but are not restricted to master's degrees in Statistics and Economics. Students interested in this option should consult the relevant sections of this bulletin for both University and department requirements for master's degrees.

MASTER OF ARTS IN TEACHING

The M.A. degree in Teaching is offered jointly by this department and the School of Education. The degree is intended for candidates who have a teaching credential or relevant teaching experience and wish to further strengthen their academic preparation. The program consists of a minimum of 25 units in Political Science courses and 12 units in the School of Education. The M.A. requires a minimum of 45 total units. A student's program must be approved by the Director of Graduate Studies before the courses are taken. Detailed program requirements are outlined in the "School of Education" section of this bulletin.

DOCTOR OF PHILOSOPHY

The University's basic requirements for the Ph.D. degree are discussed in the "Graduate Degrees" section of this bulletin.

Programs of study leading to the Ph.D. degree are designed by the student, in consultation with advisers and the Director of Graduate Studies, to serve his or her particular interests as well as to achieve the general department requirements. A student is recommended to the University Committee on Graduate Studies to receive the Ph.D. degree in Political Science when the following program of study has been completed:

1. The candidate for the Ph.D. degree must offer three of the following concentrations in political science: American politics, comparative politics, international relations, methodology, political organizations, and political theory. Upon petition, a special field (for example, public law, or urban politics) may be offered as a third concentration. Students concentrate on two of these areas by fulfilling, depending on the concentration, combinations of the following: written qualifying examinations, research papers, research design, or course work. The requirement for the third concentration may be satisfied by taking either a written examination in that area or by offering a minimum of 10 units with a grade point average (GPA) of 3.0 (B) or better in the third concentration from among the formal graduate-level courses in the six divisions of the department. The third concentration cannot be satisfied by courses taken as a requirement for a first or second concentration. A third concentration in theory requires two courses in addition to the 5 units necessary to fulfill the program requirement. Completion of special concentrations may require more than 10 units of course work. Students are not permitted to use the following combination of concentrations for the purposes of fulfilling the requirements for

the PhD: American politics, political organizations, and methodology. Students wishing to concentrate in American politics, political organizations, and methodology are not prohibited from doing so, but must add another field of concentration to their course of study.

2. The Ph.D. candidate is required to demonstrate competence in a language and/or skill that is likely to be relevant to the dissertation research. The level of competence needed for successful completion of the research is determined by the student's adviser. All candidates must complete 5 units of statistical methods or its equivalent. Students who are in the concentration of international relations, American politics, or political organizations are required to take an additional 5 units of methods. Previous instruction can be counted towards this requirement only if approved by the Director of Graduate Studies.
3. Every Ph.D. candidate must complete at least five units of graduate-level instruction in political theory.
4. By the start of the fourth quarter in residence, each first-year graduate student submits to the student's adviser a statement of purpose. This statement indicates the student's proposed major concentrations of study, the courses taken and those planned to be taken to cover those fields, the student's plan for meeting language and/or skill requirements, plans for scheduling of comprehensive examinations and/or research papers, and, where possible, dissertation ideas or plans. This statement is discussed with, and must be approved by, the student's adviser. In the Autumn Quarter following completion of their first year, students are reviewed at a regular meeting of the department faculty. The main purposes of this procedure are, in order of importance: to advise and assist the student to realize his or her educational goals; to provide an incentive for clarifying goals and for identifying ways to achieve them; and to facilitate assessment of progress toward the degree.
5. Students must take the comprehensive exams in two major fields by the end of their second year in the program. Students are expected to have passed these examinations and to have faculty approval of their research paper by the end of their second year.
6. Upon completion of one research paper and two comprehensive exams in his or her two major concentrations, the student files an Application for Admission to Candidacy for the Ph.D. which details program plans and records. The University and the department expect that students be advanced to candidacy by the completion of their sixth quarter as a full-time student. Each second-year student is reviewed and considered for admission to candidacy in a meeting of the faculty that is typically held during the tenth week of Spring Quarter. Since completion of two comprehensive exams and a research paper are prerequisites for admission to candidacy, students should plan their first- and second-year studies so that these requirements are satisfied by the time of the faculty review meeting. In particular, students should submit their research paper to the relevant faculty readers no later than the start of Spring Quarter, since revisions of the paper are often required prior to obtaining faculty approval.
7. During the third year, a formal dissertation proposal is submitted by the student to a thesis committee of three faculty members, including the principal adviser. The dissertation proposal requires approval by the student's dissertation adviser and the Director of Graduate Studies. Dissertation proposals must be approved by the end of the third year.
8. A candidate for the Ph.D. in Political Science is required to serve as a teaching assistant (TA) in the department for a minimum of three quarters.
9. Doctoral candidates who apply for the M.A. degree are awarded that degree on completion of the requirements outlined in the description of the M.A. program.
10. The candidate must pass the University oral examination on the area of the dissertation at a time, after the passing of the written comprehensive examinations, suggested by the candidate's dissertation committee.
11. The candidate must complete a dissertation satisfactory to the Dissertation Reading Committee and the University Committee on Graduate Studies.

PH.D. MINOR

Candidates in other departments offering a minor in Political Science select two concentrations in political science in consultation with the Director of Graduate Studies and submit to her or him a program of study for approval. Written approval for the program must be obtained from the Director of Graduate Studies before application for doctoral candidacy. Students are required to complete at least 20 units in Political Science courses. Two of these courses, in separate concentrations of political science, must be 300 level and above. All grades must be a GPA of 3.0 (B) or better. Candidates may be examined in their concentrations in the general oral examination by a member of the Department of Political Science, chosen in consultation with the Director of Graduate Studies.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirements.

Summer Quarter—During Summer Quarter, the Department of Political Science offers a variety of courses and seminars. Offerings depend upon available faculty.

The department uses the following course numbering system:

- 1- 99 Introductory Courses
- 100-199 Intermediate Undergraduate Lecture Courses
- 200-299 Advanced Undergraduate Seminar Courses
- 300-400 Advanced Undergraduate/Graduate Courses
- 400-500 Graduate Courses

Course information is accurate when the *Stanford Bulletin* goes to press; however, students should be aware that there may be changes and should check the quarterly *Time Schedule* for up-to-date information.

INTRODUCTORY

POLISCI 1. Introduction to International Relations—Theories and uses of international relations for understanding historical and contemporary events. Topics include the causes of war, trade and development, the environment, humanitarian intervention, nuclear proliferation, and terrorism GER:DB-SocSci

5 units, Aut (Schultz, K)

POLISCI 2. Introduction to American National Government and Politics—The role and importance of the ideal of democracy in the evolution of the American political system. American political institutions (the Presidency, Congress, and the Court) and political processes (the formation of political attitudes and voting) are examined against the backdrop of American culture and political history. The major areas of public policy in the current practice of the ideal of democracy. GER:DB-SocSci

5 units, Win (Fiorina, M; Frisby, T)

POLISCI 3. Introduction to Political Philosophy—(Same as ETHIC-SOC 30, PHIL 30.) State authority, justice, liberty, and equality through major works in political philosophy. Topics include human nature and citizenship, the obligation to obey the law, democracy and economic inequality, equality of opportunity and affirmative action, religion, and politics. GER:DB-Hum, EC-EthicReas

5 units, Win (Stone, P)

POLISCI 4. Introduction to Comparing Political Systems—Politics in major regime types including democratic, authoritarian, and communist; how types of politics affect economic development and state/society relations. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Laitin, D)

POLISCI 21N. The Evolution of Voting Rights in the U.S.—Stanford Introductory Seminar. Preference to freshmen. The evolution of voting rights in the U.S. from the 1965 Voting Rights Act to the present. Emphasis is on identifying conditions under which expansion was possible as a result of the removal of barriers. Current issues in the interpretation and implementation of provisions of the Voting Rights Act. Participation in a mock trial. GER:DB-SocSci

5 units, Win (Fraga, L)

POLISCI 33Q. Legal Craft and Moral Intuitions—(Same as LAW 107Q.) Stanford Introductory Seminar. Preference to sophomores. The conflict between translating rules for social interaction into legal practices versus deciding what constitutes impermissible harm-causing, coercion, or discrimination. Approaches to this conflict through cases such as: can government forbid wetland development without compensating property owners; why might private nurses or Playboy bunnies but not flight attendants be selected on the basis of gender; why is gender equality in resource distribution provided for college athletes but not math graduate students? GER:DB-SocSci

4 units, Win (Kelman, M)

POLISCI 35Q. Food and Politics—Topics include the politics of food production and distribution; organic and sustainable farming; federal farm and free trade policies; genetically-modified food; animal ethics; and the political context of famine and obesity. Community-based learning.

2 units, Win (Reich, R)

POLISCI 41Q. Building Democracy after Conflict: Iraq in Comparative Perspective—Stanford Introductory Seminar. Preference to sophomores. Problems of post-conflict situations, the conditions for building democracy and how they relate to post-conflict situations, and historical experiences such as Germany and Japan. Iraq as a principal case study.

5 units, Spr (Diamond, L)

POLISCI 46N. Contemporary African Politics—Stanford Introductory Seminar. Preference to freshmen. Focus is on the last decade. Patterns of economic collapse and recovery; shifts toward more democratic political systems; and increasing levels of political violence and civil conflict including warlordism and genocide. Trends across the continent, with emphasis on Liberia's emergence from conflict and Uganda's political and economic decline. Students design strategies for diplomatic engagement to be presented to former U.S. policy makers at the conclusion of course. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Weinstein, J)

INTERMEDIATE UNDERGRADUATE LECTURES

INTERNATIONAL RELATIONS

Students interested in international relations are encouraged to take POLISCI 1. While not a formal prerequisite for many of the courses listed below, it provides background for more advanced work.

The courses in international relations offered in Political Science can be divided into those dealing with global political, military, and economic problems, and those dealing with the foreign relations of nations or geographic regions. Students concentrating in international relations are encouraged to select their courses from both groups.

Students interested in a major in international relations should refer to the "International Relations" section of this bulletin.

POLISCI 110A. Sovereignty and Globalization—The relationship between globalization and the viability of state sovereignty, the development of international institutions, and the international distribution of wealth and security. GER:DB-SocSci

5 units, not given this year

POLISCI 110B. Strategy, War, and Politics—Traditional and modern theories on the causes of war and sources of peace. Contrasting explanations for the origins of WW I and II; alternative theories of deterrence in the nuclear age; the causes of war in the Persian Gulf, ethnic conflicts, and terrorism in the post-Cold War era. GER:DB-SocSci

5 units, not given this year

POLISCI 110C. America and the World Economy—(Students not taking this course for WIM, register for 110X.) American foreign economic policy. Issues: the evolution of American tariff and trade policy, the development of mechanisms for international monetary management, and American foreign investment policy reflected in the changing political goals pursued by American central decision makers. Prerequisite: 1 or equivalent. GER:DB-SocSci, WIM

5 units, Win (Goldstein, J)

POLISCI 110X. America and the World Economy—(Same as 110C.) Does not fulfill WIM requirement. GER:DB-SocSci

5 units, Win (Goldstein, J)

POLISCI 110D. War and Peace in American Foreign Policy—(Students not taking this course for WIM, register for 110Y.) The causes of war in American foreign policy. Issues: international and domestic sources of war and peace; war and the American political system; war, intervention, and peace making in the post-Cold War period. GER:DB-SocSci, WIM

5 units, Spr (Schultz, K)

POLISCI 110Y. War and Peace in American Foreign Policy—(Same as 110D.) Does not fulfill WIM requirement. GER:DB-SocSci

5 units, Spr (Schultz, K)

POLISCI 111D. British Politics—The impact on the world's oldest democracy of major changes in policies, politics, and the institution of government made over the last two decades by Margaret Thatcher and Tony Blair. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Dorfman, G)

POLISCI 112. Japanese Foreign Policy—(Graduate students register for 312.) The origins of WW II in the Pacific; Japan's role in international security; the N. Korean nuclear crisis; Japan's evolving security policies; and the U.S.-Japan trade conflict. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year

POLISCI 112D. International Organization—Theoretical and applied issues concerning the administration, operation, and impact of international organizations. Topics include: the UN's role as a peacekeeper; anti-globalization protestors; the expansion of international organizations; the role and obligations of the U.S.; and the normative implications and tradeoffs of effective supranational governance.

5 units, Aut (Major, S)

POLISCI 113F. The United Nations and Global Governance—The role of international institutions and organizations in the areas of health, environment, security, trade, development, and human rights. Evaluation, accountability, participation, legitimacy, and autonomy.

5 units, Spr (Stedman, S)

POLISCI 114D. Democracy, Development, and the Rule of Law—(Same as INTNLREL 114D.) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts.

5 units, Aut (McFaul, M; Stoner-Weiss, K)

POLISCI 114S. International Security in a Changing World—The major international and regional security problems in the modern world. Interdisciplinary faculty lecture on the political and technical issues involved in nuclear proliferation, terrorism and homeland security, civil wars and insurgencies, and future great power rivalries. GER:DB-SocSci

5 units, Win (Sagan, S)

POLISCI 116. History of Nuclear Weapons—(Same as HISTORY 103E.) The development of nuclear weapons and policies. How existing nuclear powers have managed their relations with each other. How nuclear war has been avoided so far and whether it can be avoided in the future. GER:DB-SocSci

5 units, Spr (Holloway, D)

AMERICAN POLITICS

POLISCI 120A. American Political Sociology and Public Opinion: Who We Are and What We Believe—First of team-taught, intermediate-level, three-part sequence designed to introduce students to topics in American politics and government. The sociology of the U.S. and the political beliefs and values of Americans. Students may enroll for one,

two, or three quarters, but the course is cumulative so maximum benefit results from enrollment in the entire sequence. Completion of 2 is assumed but not required. GER:DB-SocSci

5 units, not given this year

POLISCI 120B. Parties, Interest Groups, the Media, and Elections—What are the public's powers and constraints in influencing the political process? The role of parties in organizing the electorate and Congress and affecting electoral and policy outcomes. Influence of elections and interest groups in the political process, and their effect on the distribution of power. Media's impact on political participation. GER:DB-SocSci

5 units, Win (Sprague, M)

POLISCI 120C. American Political Institutions: Congress, the Executive Branch, and the Courts—How politicians, once elected, work together to govern America. The roles of the President, Congress, and Courts in making and enforcing laws. Focus is on the impact of constitutional rules on the incentives of each branch, and on how they influence law. GER:DB-SocSci, WIM

5 units, Spr (Rutten, A)

POLISCI 121. Urban Politics—(Same as URBANST 111.) The major actors, institutions, processes, and policies of sub-state government in the U.S., emphasizing city general-purpose governments through a comparative examination of historical and contemporary politics. Issues related to federalism, representation, voting, race, poverty, housing, and finances. Prerequisite: 2 or consent of instructor. GER:DB-SocSci

5 units, Win (Fraga, L)

POLISCI 122. Introduction to American Law—(Same as AMSTUD 179, LAW 106.) For undergraduates. The structure of the American legal system including the courts; American legal culture; the legal profession and its social role; the scope and reach of the legal system; the background and impact of legal regulation; criminal justice; civil rights and civil liberties; and the relationship between the American legal system and American society in general. GER:DB-SocSci

3-5 units, Aut (Friedman, L)

POLISCI 123. Politics and Public Policy—How policies come to be formed. How interests compete within public institutions to turn ideas into policies. Examples of this process from contemporary policy areas, including tax, social welfare, and environmental policy; results evaluated using equity and efficiency criteria. Prerequisite: 2. Students taking this course may not take PUBLPOL 101 for credit. GER:DB-SocSci

5 units, Spr (Sprague, M)

POLISCI 124R. Judicial Politics and Constitutional Law: The Federal System—The impact of constitutional rules on policy making in the U.S. with a focus on structural issues such as separation of powers and federalism. Topics such as: the role of unelected judges in a democracy; the rule of law; and the constitutionality of the war in Iraq. Prerequisites: 2 or equivalent, and sophomore standing. GER:DB-SocSci, WIM

5 units, Aut (Rutten, A)

POLISCI 124S. Judicial Politics and Constitutional Law: Civil Liberties—The role and participation of courts, primarily the U.S. Supreme Court, in public policy making and the political system. Judicial activity in civil liberty areas (religious liberty, free expression, race and sex discrimination, political participation, and rights of persons accused of crime). Prerequisites: 2 or equivalent, and sophomore standing. GER:DB-SocSci

5 units, Win (Rutten, A)

POLITICAL THEORY

POLISCI 130A. History of Political Thought I—(Graduate students register for 330A; same as CLASSHIS 133/333.) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change. GER:DB-SocSci

5 units, Win (Ober, J)

POLISCI 130B. History of Political Thought II: Early Modern Political Thought, 1500-1700—(Graduate students register for 330B.) The development of constitutionalism, Renaissance humanism and the Reformation, and changing relationships between church and states. Emphasis is on the relationships among political thought, institutional frameworks, and immediate political problems and conflicts. The usefulness of the history of political thought to political science. GER:DB-SocSci

5 units, not given this year

POLISCI 130C. History of Political Thought III: Freedom, Reason, and Power—(Graduate students register for 330C.) Classic works in political theory since the American and French revolutions. Readings include Kant, Hegel, Marx, Nietzsche, and Dewey. GER:DB-SocSci

5 units, Spr (Stone, P)

POLISCI 131. Children's Citizenship: Justice Across Generations—(Same as EDUC 158.) The development of children into citizens, focusing on major social institutions responsible for their civic education: schools, families, communities, and civil society. How does each institution develop citizenship? What is the relationship between civic education and the reproduction of social equality or inequality? Do children's rights differ from those of adults? Readings: political theorists on justice, feminist theorists on family and children, court cases on tensions between the state and community interest in education, and social critics on the practice of civic education. GER:DB-SocSci, EC-EthicReas

5 units, not given this year (Reich, R)

POLISCI 132. Ethics of Political Animals—(Same as CLASSHIS 132, ETHICSOC 132X.) The ancient Greek conception of ethics as arising from human social and political nature. Problems related to values, identity, and responsibility. Topics include civic friendship, equality, reciprocity, integrity, dignity, and legal obedience. GER:EC-EthicReas

5 units, Spr (Ober, J)

POLISCI 133. Ethics and Politics of Public Service—(Same as ETHICSOC 133.) Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford. GER:DB-SocSci

5 units, not given this year (Reich, R)

POLISCI 136. Philosophical Issues Concerning Race and Racism—(Same as PHIL 177.) Concepts of race, race consciousness, and racism, and their connections. What is race and what is its role in racism? How should ethnic and racial identities be viewed to secure the conditions in which humanity can be seen as a single moral community whose members have equal respect? What laws, values, and institutions best embody the balance among competing goals of group loyalty, opposition to racism, and common humanity? Philosophical writings on freedom and equality, human rights, pluralism, and affirmative action. Historical accounts of group exclusion. GER:DB-SocSci

4 units, not given this year

POLISCI 136S. Justice—(Same as ETHICSOC 171, PHIL 171/271.) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas

5 units, Aut (Cohen, J)

POLISCI 138. Modern Political Ideologies—Prominent political ideologies that define the terms of contemporary political discourse including liberalism, conservatism, feminism, and anarchism through the intellectual debates generated by the French Revolution. Readings include Price, Burke, Godwin, Wollstonecraft, and Paine. GER:DB-Hum

5 units, not given this year

COMPARATIVE POLITICS

Undergraduate courses and seminars in comparative politics generally fall into two groups: those dealing with a particular country or region, and those dealing with major political problems or processes. Students are encouraged to take courses from both groups, and are also urged to do course work in more than one country or region.

POLISCI 140. Political Economy of Development—Emphasis is on the interplay between political economic processes, and national and international factors from Latin America, Africa, and Asia. Do governments provide the foundations for economic development? The role of the state in solving problems of violence and capital accumulation. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year

POLISCI 140F. The Comparative Political Economy of Advanced Countries—Classical approaches to comparative political economy, emphasizing the interwar period in Europe, which focus on ideas, interest, or institutions as explanatory variables. Major contemporary political economy debates on the advanced countries, such as the types of welfare state and the varieties of capitalism literature. Students may not receive credit for both POLISCI 140F and IPS 233.

5 units, Win (Etchemendy, S)

POLISCI 140L. China in World Politics—The implications of the rise of China in contemporary world politics and for American foreign policy, including issues such as arms and nuclear proliferation, regional security arrangements, international trade and investment, human rights, environmental problems, and the Taiwan and Tibet questions. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Miller, L)

POLISCI 141. The Global Politics of Human Rights—The global development and changing nature of human rights and the rise of an international human rights movement. Conflicts between national sovereignty and rights, and among types of rights. Case studies include genocide in Rwanda, holding torturers accountable in Chile and El Salvador, factory workers versus Nike, and the rights of women in S. Africa. GER:DB-SocSci

5 units, Win (Karl, T)

POLISCI 141E. Elections in the U.S. and Canadian Wests: Innovation and Reform—How laws governing elections in western U.S. states and Canadian provinces affect representation, citizenship, and public policy. Emphasis is on the evolution of direct democracy, including the initiative and referendum processes, since state- and provincehood. Is there a distinctive Western political culture?

5 units, Spr (Frisby, T)

POLISCI 142F. Politics of Central Asia in Comparative Perspective—Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. Historical background, current issues, and the role of these countries in international politics. The Soviet legacy and Islam in society and politics.

5 units, Aut (Erdem, E)

POLISCI 142R. Representative Government in Europe—How electoral institutions, party systems, and structures of interest group representation differ across European countries, and between Europe and the U.S. How these variations influence the structure and content of ideological debate and mediate its influence on the policy making process. How European integration is altering the structure of citizen representation in EU member states. GER:DB-SocSci

5 units, not given this year

POLISCI 142T. Social Protection Around the World—The political origin of and differences in major policies of social protection across developed and developing countries; recent challenges faced by these policies. Why some countries provide old-age or sickness benefits to all citizens, while others offer no protection during employment-related risks. Are these differences in policies and institutions driven by economic development alone? Prerequisite: 4.

5 units, not given this year

POLISCI 143. Nongovernmental Organizations and Development in Poor Countries—(Same as INTNLREL 143.) How nongovernmental organizations affect economic growth, equity, political stability, and prospects for democracy in poor countries. Do NGOs contribute to these goals? What is reasonable to expect from the NGO sector? Interactions among NGOs from wealthy and poor countries, governments, international financial institutions, and multinational corporations. GER:DB-SocSci

5 units, not given this year

POLISCI 144S. Democracies and Autocracies—The study of political regimes. The main characteristics of democratic versus authoritarian regimes. What determines that political order is established in the form of democracy or authoritarianism? How democracies and autocracies operate; how each regime achieves political order, adopts public decisions, and impacts economic performance. GER:DB-SocSci

5 units, not given this year

POLISCI 145. Politics and Development in Latin America—Political, economic, and social development in Brazil, Mexico, Cuba, and Argentina. Emphasis is on historical and comparative analyses and policy and theoretical issues such as ideologies of development, democracy and its alternatives, constraints on national autonomy, and civil-military, state-society, and state-market relations. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year

POLISCI 147. Comparative Democratic Development—Social, cultural, political, economic, and international factors affecting the development and consolidation of democracy in historical and comparative perspective. Individual country experiences with democracy, democratization, and regime performance. Emphasis is on the third wave of democratization over the past three decades and contemporary possibilities for democratic change. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year

POLISCI 148. Chinese Politics: The Transformation and the Era of Reform—(Graduate students register for 348.) For advanced undergraduates and beginning graduate students. The content, process, and consequences of reform in China from 1976 to the present. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Miller, L)

POLISCI 148R. Chinese Politics—The politics of the People's Republic of China. The origins of the Communist Revolution, the institutionalization and consequences of communist rule, and attempts to reform the system since 1978. GER:DB-SocSci

5 units, not given this year

POLISCI 148S. The U.S. and Asia During the Cold War—International relations perspective. WW II and its impact on international relations; the efforts of Allied statesmen to design a stable postwar order; the Chinese civil war; the American occupation of Japan; the Korean War; S.E. Asian independence struggles; the American alliance system in the 50s, the Sino-Soviet alliance; Indo-Pakistani conflicts; the Vietnam War; strategic realignment in the 70s; and the legacy of the Cold War on the region's international agenda and American policy priorities. The relevance of the region to the international system. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Miller, L)

POLISCI 148T. Political Parties and Elections in Japan—Introduction to Japanese democracy focusing on electoral politics since the end of WW II. The establishment of one-party dominance, the mechanisms that sustained it, and events leading to the current Japanese political transformation. GER:DB-SocSci

5 units, not given this year

POLISCI 149S. Islam and the West—Changes in relative power and vitality of each side. The relationship in the Middle Ages revolved around power and domination, and since the Renaissance around modernity. Focus is on Muslims of the Middle East. GER:DB-SocSci

5 units, Spr (Milani, A)

POLITICAL METHODOLOGY

POLISCI 150A. Political Methodology I—(Graduate students register for 350A.) Introduction to probability and statistical inference, with applications to political science and public policy. Prerequisite: elementary calculus. GER:DB-Math
5 units, Aut (Rivers, D)

POLISCI 150B. Political Methodology II—(Graduate students register for 350B.) Understanding and using the linear regression model in a social-science context: properties of the least squares estimator; inference and hypothesis testing; assessing model fit; presenting results for publication; consequences and diagnosis of departures from model assumptions; outliers and influential observations, graphical techniques for model fitting and checking; interactions among exploratory variables; pooling data; extensions for binary responses. GER:DB-Math
5 units, Win (Jackman, S)

POLISCI 150C. Political Methodology III—(Graduate students register for 350C.) Models for discrete outcomes, time series, measurement error, and simultaneity. Introduction to nonlinear estimation, large sample theory. Prerequisite: 150B/350B.
3-5 units, Spr (Jackman, S)

POLISCI 151A. Doing Political Science—For students planning a major in Political Science. An introduction to social science methodological approaches, from case studies and formal models, to the study of politics and government. Beneath the diversity of means that political scientists use to pursue knowledge lies a common language, core concepts, and scholarly goals. Concepts and their use through the research of Stanford Political Science professors. In addition to the instructors, 6-8 other faculty appear in various course sessions. Goal is to prepare students to do political science, not just study it. GER:DB-Math
5 units, not given this year

POLISCI 151B. Data Analysis for Political Science—Operationalization of concepts, measurement, scale construction, finding and pooling/merging data, cross-tabulations, tests of association, comparison of means, correlation, scatterplots, and regression models. How to present the results of data analysis in research reports, essays, and theses. Emphasis is on getting and using data with appropriate statistical software. Prior mathematics not required. GER:DB-Math
5 units, not given this year

POLISCI 152. Introduction to Game Theoretic Methods in Political Science—(Graduate students register for 352.) Concepts and tools of non-cooperative game theory developed using political science questions and applications. Formal treatment of Hobbes' theory of the state and major criticisms of it; examples from international politics. Primarily for graduate students; undergraduates admitted with consent of instructor.
3-5 units, Win (Fearon, J)

POLISCI 157. Sampling and Surveys—(Graduate students register for 357.) The importance of sample surveys as a source of social science data including public opinion, voting, welfare programs, health, employment, and consumer behavior. Survey design, sampling theory, and estimation. Nonresponse, self-selection, measurement error, and web survey methods. Prerequisite: 150B or equivalent.
5 units, Win (Rivers, D)

ADVANCED UNDERGRADUATE SEMINARS INTERNATIONAL RELATIONS

POLISCI 215. Explaining Ethnic Violence—What is ethnic violence and why does it occur? Should elite machinations, the psychology of crowds, or historical hatreds be blamed? Case studies and theoretical work on the sources and nature of ethnic violence. GER:DB-SocSci, WIM
5 units, Aut (Fearon, J)

POLISCI 218. U.S. Relations in Iran—The evolution of relations between the U.S. and Iran. The years after WW II when the U.S. became more involved in Iran. Relations after the victory of the Islamic republic. The current state of affairs and the prospects for the future. Emphasis is on

original documents of U.S. diplomacy (White House, State Department, and the U.S. Embassy in Iran). Research paper. GER:DB-SocSci
5 units, Aut (Milani, A)

POLISCI 219. Directed Reading and Research in International Relations—May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

AMERICAN POLITICS

POLISCI 221. Tolerance and Democracy—The value of tolerance and its implications for the principles and practices of democracy. Tolerance as it is understood by political philosophers and by citizens. Readings include: John Stuart Mill *On Liberty*, Isaiah Berlin *Two Concepts of Liberty*, and modern studies of public opinion. Topics include: ideas and liberty; value pluralism; the interplay of authority and obedience; the role of political elites and mass publics in democratic societies; multiculturalism. Objectives: to promote critical thinking; to explore principal forms of value conflict in contemporary liberal democracies. GER:DB-SocSci
5 units, Spr (Sniderman, P)

POLISCI 221D. The Psychology of Political Choice—How citizens choose among political alternatives.
5 units, not given this year

POLISCI 221F. Race and American Politics—How the issue of race has helped define the modern era of American politics. Major theories of political cleavage over public policies dealing with race.
5 units, Spr (Sniderman, P)

POLISCI 221S. Civic Capacity and Urban Youth—The logic and possibilities of mobilizing urban youth to overcome the decline in civic engagement across American society. Can youth be trained to be advocates for their interests in education or in local government? If youth are mobilized, can this serve as a catalyst to mobilize their parents and other adults? Class requirements include an internship of at least 7 hours per week in the John W. Gardner Center for Youth and their Communities. GER:DB-SocSci, EC-AmerCul
5 units, not given this year

POLISCI 221T. Politics of Race and Ethnicity in the United States—Race and ethnicity issues used to understand current challenges to political development of the U.S. Focus is on political institutions and how current issues such as campaigning, affirmative action, and voting rights operate within parameters set by these institutions. National values underlying notions of identity, citizenship, justice, and public interest. GER:DB-SocSci, EC-AmerCul
5 units, not given this year

POLISCI 221U. Latinos in American Politics—(Same as PUBLPOL 189.) Evolution of Latino participation in American politics from the mid-19th century to the present. Issues include conquest, immigration, the Chicano movement, national origin diversity, gender, political parties, and office holding. GER:DB-SocSci, EC-AmerCul
5 units, not given this year

POLISCI 221V. California Politics: Past, Present, and Future—(Same as PUBLPOL 188.) Changing patterns of politics from the mid-19th century to the present. Emphasis is on the role of institutions in structuring the state's politics. GER:DB-SocSci, EC-AmerCul
5 units, not given this year

POLISCI 222R. Culture, Identity, and Diversity—The interplay of liberalism, pluralism, and diversity.
5 units, Win (Sniderman, P; Callan, E)

POLISCI 223D. Term Limits and American Democracy—Why voters place constitutional and statutory limits on the number of terms elected officials can serve in an office. Effects of term limits on elections and policy making in the U.S. Presidential, gubernatorial, and state legislator term limits, the congressional term limits movement, and the success of the movement in the American West.
5 units, Win (Frisby, T)

POLISCI 223S. The Imperial Temptation: U.S. Foreign Policy in a Unipolar World—How the collapse of the Soviet Union liberated the U.S. from the constraints of bipolarity. How current policy fits into earlier traditions such as Wilsonianism or realism. Normative questions; what is America's proper role in the world? GER:DB-SocSci

5 units, Aut (Joffe, J)

POLISCI 224R. Democratic Citizenship: Can Ordinary Citizens Reason about Politics?—The tradition of skepticism about whether ordinary citizens can discharge the responsibilities of democratic citizenship. How this skepticism has been strengthened by recent research on public opinion and electoral behavior. Sources include the interplay of empirical and normative democratic theory. GER:DB-SocSci

5 units, not given this year

POLISCI 225D. Politics, Constitutions, and Building America—(Same as PUBLPOL 127, URBANST 168.) How Americans built their infrastructure; why financing infrastructure has changed. Sources include economic history, political history, public finance theory, and political economy theory.

5 units, Win (Wallis, J)

POLISCI 227R. Polarized Politics and Special Interest Groups—The influence of special interest groups on electoral competition and policy outcomes in the U.S., and the increasing partisan polarization among elites. How money spent by special interest groups affects the types of candidates who are elected, the agendas of the parties, and the votes of Congressmen. GER:DB-SocSci

5 units, not given this year

POLISCI 229. Directed Reading and Research in American Politics—May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

POLITICAL THEORY

POLISCI 231S. Contemporary Theories of Justice—Social and political justice and contemporary debates in political theory. Recent works that develop the principles of justice, and the political arrangements that best satisfy their requirements. Limited enrollment. GER:DB-SocSci, EC-EthicReas, WIM

5 units, Win (Reich, R)

POLISCI 232. Civil Society and the Nonprofit Sector—(Same as URBANST 121.) Development of the idea of civil society from early Enlightenment Europe to the contemporary U.S. Historical and theoretical foundations. Contemporary features of the nonprofit sector including its legal, economic, political, and ethical dimensions. Structure and operation of modern philanthropy and challenges of the 21st century.

2-4 units, not given this year

POLISCI 235. Politics and Religion—Theories about the proper relationship between church and state. Court cases and policy debates.

5 units, Win (Stone, P)

POLISCI 236. Theories of Civil Society, Philanthropy, and the Nonprofit Sector—The historical development and modern structure of civil society emphasizing philanthropy and the nonprofit sector. What is the basis of private action for the public good? How are charitable dollars distributed and what role do nonprofit organizations and philanthropic dollars play in a modern democracy? How do nongovernmental organizations operate domestically and globally? Readings in political philosophy, political sociology, and public policy.

5 units, Spr (Reich, R; Sievers, B)

POLISCI 239. Directed Reading and Research in Political Theory—May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

COMPARATIVE POLITICS

POLISCI 241D Political Systems Across Muslim Societies—The differing political and institutional contexts of Muslim societies, emphasizing relationships between religion and state. Case studies including Turkey, Iran, India/Pakistan, and the U.S. Prospects for democratic government in Muslim societies.

5 units, Spr (Erdem, E)

POLISCI 241S. Regime Change: Comparative Theories—Comparison of structural and actor-centric theories, and evolutionary versus revolutionary models. Emphasis is on theories of democratization and revolution. Case studies from the 20th and 21st century. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year

POLISCI 242S. Politics of Welfare State Expansion and Reform—Major theories explaining the development of the welfare state and its impact on the organization of the political economy. The relative importance of institutional variables, social cleavages, partisanship, and ideology, and the role of economic openness in explaining cross-national differences in social policy. Recent politics of social policy adjustment, and existing differences among welfare states facing unfavorable economic and demographic developments and political pressures toward welfare state retrenchment.

5 units, not given this year

POLISCI 242U. Varieties of Capitalism—The political origin of and differences in major policies of social protection across developed and developing countries; recent challenges. Why some countries provide old-age or sickness benefits to all citizens, while others offer no protection for employment-related risks. Are these differences in policies and institutions driven by economic development alone? Prerequisite: 4. GER:DB-SocSci

5 units, not given this year

POLISCI 243R. Research Seminar in Democratization and Human Rights—Goal is to produce a minimum 30-page paper based on field research abroad. Students prepare research problem statement, meet individually with the professor, and circulate drafts for class comment. Graduate students should register for directed reading under the professor's name. GER:DB-SocSci

5 units, Win (Karl, T)

POLISCI 244R. Political Economy of Disease: AIDS in Historical Perspective—Demographic, economic, cultural, and political changes in the wake of AIDS. The social dimensions of infectious diseases and epidemics; the impact of epidemics on political and economic institutions; and the political economy of responses to the AIDS crisis. Students conduct original research on causes and/or consequences of AIDS or AIDS-related policies. GER:DB-SocSci

5 units, not given this year

POLISCI 245D. The European Union—The history of European integration, the EU's political system, enlargement, internal and external security, and monetary union.

5 units, Aut (Gates, A)

POLISCI 245F. Latin American Political Development—Classical postwar approaches to Latin American development. Pressures for economic reform and liberalization that stemmed from the international economy after 1973. Business and organized labor as key actors in the political implementation of market-oriented adjustment. Recent trends in party system evolution, and the resurgence of the new left.

5 units, Win (Etchemendy, S)

POLISCI 245R. Politics in Modern Iran—Modern Iran has been a smelting pot for political movements, ideologies, and types of states. Movements include nationalism, constitutionalism, Marxism, Islamic fundamentalism, social democracy, Islamic liberalism, and fascism. Forms of government include Oriental despotism, authoritarianism, Islamic theocracy, and liberal democracy. These varieties have appeared in Iran in an iteration shaped by history, geography, proximity to oil and the Soviet Union, and the hegemony of Islamic culture. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Milani, A)

POLISCI 247S. Politics and Economic Policy in Advanced Industrial Democracies—The role of political ideology and government partisanship in influencing economic outcomes. How political parties interact with interest groups in the formation of economic strategies. How voters influence patterns of economic policy making. The cross-national impact of globalization and increasing openness of trade and capital markets. Constraints on domestic political actors by the development of supranational political organizations such as the EU. GER:DB-SocSci
5 units, not given this year

POLISCI 247T. The Politics of the European Union—Origins and current structure. Effects on domestic politics, electoral landscape, distribution of political power, power of national governments to formulate public policy, and economic and social policies. Current issues including the EU constitution, enlargement, future of European welfare states, and military role. GER:DB-SocSci, EC-GlobalCom
5 units, not given this year

POLISCI 247U. Electoral and Party Politics in Developed Democracies—Origins of modern parties and party systems, determinants of voting behavior, role of parties in electoral competition and government formation, effects of partisan governments and elections on political-economic outcomes, and shifts in electoral cleavages and party systems.
5 units, not given this year

POLISCI 248. Mexican Politics—Why did Mexico fail to eliminate poverty and destitution despite resources channeled to that end and a rhetoric of social justice inherited from the Revolution? The durability of the political regime, the peculiar characteristics of the Mexican process of democratization, and the regime's incentives to redress ancestral problems of inequality and destitution. Emphasis is on crafting research projects on the political economy of Mexican development, and hypothesis testing with empirical data. GER:DB-SocSci, EC-GlobalCom
5 units, not given this year

POLISCI 248S. Latin American Politics—Fundamental transformations in Latin America in the last two decades: why most governments are now democratic or semidemocratic; and economic transformation as countries abandoned import substitution industrialization policies led by state intervention for neoliberal economic policies. The nature of this dual transformation. GER:DB-SocSci
5 units, not given this year

POLISCI 248T. Problems of Governance and Economic Growth in Mexico: From the Aztecs to NAFTA—(Same as HISTORY 278.) Political and economic institutions of Mexico. Emphasis is on the origins and economic consequences of authoritarianism. GER:DB-SocSci
5 units, not given this year

POLISCI 249. Directed Reading and Research in Comparative Politics—May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

RESEARCH

POLISCI 299A,B,C. Senior Project—Students conduct independent research work towards a senior honors thesis. See "Honors Program" above.
1-5 units, Aut, Win, Spr (Staff)

POLISCI 299Q. Junior Research Seminar—For students interested in writing a senior honors thesis. Focus is on finding a manageable topic and an adviser.
2 units, Aut, Win, Spr (Rutten, A)

POLISCI 299R. Senior Research Seminar—Required of students writing honors theses. Focus is on acquiring research skills and developing an appropriate research design.
3 units, Aut (Rutten, A)

POLISCI 299S. Senior Honors Tutorial—Required of students writing honors theses. Focus is on solving problems in writing a thesis such as keeping on schedule and rewriting drafts. Students work with other honors students and graduate student tutors.
2 units, Win (Rutten, A)

ADVANCED UNDERGRADUATE/GRADUATE INTERNATIONAL RELATIONS

POLISCI 310A. International Relations Theory, Part I—First of a three-part graduate sequence. History of international relations, current debates, and applications to problems of international security and political economy.
5 units, Aut (Fearon, J)

POLISCI 310B. International Relations Theory, Part II—Second of a three-part graduate sequence. History of international relations theory, current debates, and applications to problems of international security and political economy. Prerequisite: 310A.
5 units, Win (Goldstein, J)

POLISCI 310C. Research in International Relations—Third of a three-part graduate sequence. Focus is on developing research papers begun in 310A or B, and exploring active areas of research in the field. Prerequisite: 310B.
5 units, Spr (Sagan, S)

POLISCI 311. Contemporary Issues in Peace Studies—(Same as PSYCH 185/285.) Interdisciplinary. Challenges of pursuing peace in a world of conflict and regional, ethnic, and religious antagonisms. Historical, social, psychological, and moral perspectives. Current research in social psychology, political science, international relations, and negotiation theory. Student involvement in real-world efforts to identify and overcome the barriers that impede a peace settlement. Prerequisite: consent of instructor.
3 units, Spr (Holloway, D)

POLISCI 311A,B,C. Workshop in International Relations—For graduate students. Contemporary work. Organized around presentation of research by students and outside scholars. May be repeated for credit.
1-5 units, A: Aut, B: Win (Schultz, K; Goldstein, J), C: not given this year

POLISCI 312. Japanese Foreign Policy—(For graduate students; see 112.)
5 units, not given this year

POLISCI 312R. Domestic Politics and International Conflict—Theoretical and empirical research on the effects of domestic politics and political institutions on the incidence, outcome, and resolution of international conflict. Topics include the democratic peace, diversionary conflict, economic sources of war and peace, domestic influences on war outcomes, and the politics of resolving international rivalries.
5 units, not given this year

POLISCI 314S. Decision Making in U.S. Foreign Policy—(Same as IPS 314S.) Priority to IPS students. Formal and informal processes involved in U.S. foreign policy decision making. The formation, conduct, and implementation of policy, emphasizing the role of the President and executive branch agencies. Theoretical and analytical perspectives; case studies.
5 units, Spr (Blacker, C)

POLISCI 316. International History and International Relations Theory—(Same as HISTORY 202/306E.) The relationship between history and political science as disciplines. Sources include studies by historians and political scientists on topics such as the origins of WW I, the role of nuclear weapons in international politics, the end of the Cold War, nongovernmental organizations in international relations, and change and continuity in the international system.
5 units, Win (Holloway, D)

POLISCI 318S. State Building—Past and present efforts by external actors to influence domestic authority structures. Topics may include: colonialism; protection of minority rights in the 19th and first half of the 20th century; U.S. intervention in the Caribbean and Central America; U.S. and Soviet intervention in Europe after WW II; Afghanistan; and Iraq. For Ph.D. students; others with consent of instructor.
5 units, not given this year

POLISCI 319. Directed Reading in International Relations—May be repeated for credit.
1-10 units, Aut, Win, Spr, Sum (Staff)

AMERICAN POLITICS

POLISCI 322. Campaign Finance and Elections—The strategies and behavior of special interest groups, parties, candidates, and voters in the U.S. Emphasis is on statistical models and empirical tests of formal models. Prerequisite: 350B; 351 sequence or 352; or equivalents.

5 units, not given this year

POLISCI 323R. The Press and the Political Process—(Same as COMM 160/260.) The role of mass media and other channels of communication in political and electoral processes.

4-5 units, not given this year

POLISCI 323S. Analysis of Political Campaigns—(Same as COMM 162/262.) Seminar. The evolution of American political campaigns, and the replacement of the political party by the mass media as intermediary between candidates and voters. Academic literature on media strategies, the relationship between candidates and the press, the effects of campaigns on voter behavior, and inconsistencies between media campaigns and democratic norms. Do media-based campaigns enable voters to live up to their civic responsibility? Has the need for well-financed campaigns increased the influence of elites over nominations? Have citizens become disengaged?

4-5 units, Aut (Iyengar, S)

POLISCI 326R. Urban Politics and Public Policy—Major theoretical approaches regarding democracy, participation, representation, economic development, and governance.

5 units, not given this year

POLISCI 329. Directed Reading and Research in American Politics—May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

POLITICAL THEORY

POLISCI 330A. History of Political Thought I—(For graduate students; see 130A; same as CLASSHIS 133/333.)

5 units, Win (Ober, J)

POLISCI 330B. History of Political Thought II: Early Modern Political Thought, 1500-1700—(For graduate students; see 130B.)

5 units, not given this year

POLISCI 330C. History of Political Thought III: Freedom, Reason, and Power—(For graduate students; see 130C.)

5 units, Spr (Stone, P)

POLISCI 332. The Political Theory of Rawls—The work of John Rawls on justice in the 20th century. His major works: *A Theory of Justice* and *Political Liberalism*.

5 units, not given this year

POLISCI 333. Topics in Democratic Theory—(Same as PHIL 377.) Modern approaches to democratic theory including liberal, communitarian, republican, and participatory theories beginning with the works of Locke, Rousseau, and Mill. Writers: John Rawls, Ronald Dworkin, Jeremy Waldron, Joshua Cohen, Habermas, Petit, Iris Marion Young, Ian Shapiro, and Amy Gutman.

3-5 units, not given this year

POLISCI 339. Directed Reading and Research in Political Theory—May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

COMPARATIVE POLITICS

POLISCI 340R. Political Economics—How governments collect revenue, allocate spending, and obtain credit, as determined by variations in institutional and political conditions. The emphasis is in a democracy on the provision of public goods and services and representative accountability as against the emphasis in less democratized settings on the extractive capacity of the state, the temporal horizons of rulers, and the purchase of political support with money.

5 units, not given this year

POLISCI 340S. Political Economy of Post-Communism—The sources of the collapse of the communist states in E. Europe and the former Soviet Union. The relationship between political reform and economic change, emphasizing democracy versus dictatorship, liberalization, stabilization and privatization, and the role of external actors in internal change in the region. Models and historical analogs for analyzing the emergence of post-communist politics.

5 units, Win (McFaul, M)

POLISCI 341T. Comparative Democratization and Regime Change—Issues of democracy, its definition, problems of transition and consolidation, and comparison. The relationship between democracy and the military, the economy, and the interstate system.

5 units, not given this year

POLISCI 343R. African Civil Wars in Comparative Perspectives: A Research Seminar—Taught jointly with Columbia University via videoconferencing. Topics include causes of civil war, patterns of recruitment and participation, organization of rebel groups, strategies of warring factions, bargaining in the context of peace processes, and civil war termination. Required research paper using original datasets from instructors. Prerequisites: econometric modeling and graduate course work in comparative politics, international relations, and statistics.

5 units, not given this year

POLISCI 344S. Comparative Political Institutions—Overview of existing political institutions and their impact on political-economic outcomes. The roles of political institutions and what determines their stability, how they are chosen, and which processes enable their transformation over time. The main variances in institutional settings, emphasizing the menu of democratic institutions, including parliamentary, semi-presidential, and presidential systems; electoral rules; bicameralism; federalism; and legislative-executive relations. The effect of political institutions on economic growth and political stability.

5 units, not given this year

POLISCI 344U. Political Culture—An approach to culture emphasizing equilibrium attributes through relationships among culture, choice, coordination, and common knowledge. Implications for the study of political processes and institutions.

5 units, not given this year

POLISCI 345R. Political Economy of Japan—Institutions and processes in the political organization of economic activity in Japan. The interaction of public and private sector institutions in the growth of Japan's postwar economy. The organization and workings of key economic ministries and agencies of the government, private sector business groupings, and public policy making. Comparison of Japan's political economy before the bursting of the bubble in 1990-91 with the current situation; why it fell into stagnation and why it has taken Japan so long to recover.

5 units, not given this year

POLISCI 345T. Elections, Electoral Systems, and Democracy in Japan

5 units, not given this year

POLISCI 346S. Logic of Authoritarian Government—(Same as HISTORY 278A/378A.) If authoritarianism is less economically efficient than democracy, and if authoritarianism is a less stable form of political organization than democracy, then why are there more authoritarian governments than democracies? To address this paradox, focus is on theoretical and empirical literature on authoritarian governments, and related literatures on the microeconomic analysis of property rights and credible commitments.

5 units, Win (Haber, S)

POLISCI 347S. Comparative Political Economy of Developed Democracies—Relative importance of government partisanship and ideology, social cleavages, and institutional structures in explaining patterns in economic policy and outcomes. How these political models compare with models emphasizing economic variables such as capital market integration, trade openness, or technological change.

3-5 units, not given this year

POLISCI 348. Chinese Politics: The Transformation and the Era of Reform—(For graduate students; see 148.)

5 units, Aut (Miller, L)

POLISCI 349. Directed Reading and Research in Comparative Politics—May be repeated for credit.

1-10 units, Aut, Win, Spr, Sum (Staff)

POLITICAL METHODOLOGY

POLISCI 350A,B,C. Political Methodology—(For graduate students; see 150A,B,C.)

A: 5 units, Aut (Rivers, D)

B: 5 units, Win (Jackman, S)

C: 3-5 units, Spr (Jackman, S)

POLISCI 351A. Foundations of Political Economy—(Same as POLECON 680.) Emphasis is on formal models of collective choice, public institutions, and political competition. Topics include voting theory, social choice, institutional equilibria, agenda setting, interest group politics, bureaucratic behavior, and electoral competition.

4 units, Aut (Hatfield, J)

POLISCI 351B. Economic Analysis of Political Institutions—(Same as POLECON 681.) Continuation of 351A. Application of microeconomic analysis and game theory to the study of political behavior and institutions. Techniques include information economics, games of incomplete information, sequential bargaining theory, repeated games, and rational expectations. Applications include agenda formation in legislatures, government formation in parliamentary systems, the implications of legislative structure, elections and information aggregation, lobbying, electoral competition and interest groups, the control of bureaucracies, interest group competition, and collective choice rules.

4 units, Win (Shotts, K)

POLISCI 351C. Applied Formal Models: Governmental Decision Making—(Same as POLECON 682.) Applications of formal models to decision making in the U.S. national government, emphasizing the legislative branch. Topics include strategies of committees, roll call voting, the budget process, policy formation, effects of special rules, congressional-presidential relations, and congressional-agency relations. Prerequisites: 351A,B.

4 units, Spr (Krehbiel, K)

POLISCI 352. Introduction to Game Theoretic Methods in Political Science—(For graduate students; see 152.)

3-5 units, Win (Fearon, J)

POLISCI 353A,B,C. Workshop in Statistical Modeling—Theoretical aspects and empirical applications of statistical modeling in the social sciences. Guest speakers. Students present a research paper. Prerequisite: 350B or equivalent.

1-5 units, not given this year

POLISCI 354F. Applied Bayesian Analysis—(Same as ANTHSCI 254.) Bayesian modeling in the social sciences emphasizing applications in political science, anthropological science, sociology, and education testing. Topics include: Bayesian computation via Markov chain Monte Carlo; Bayesian hierarchical modeling; Bayesian models for latent variables and latent states (measurement modeling); dynamic models; and Bayesian analysis of spatial models. Implementation of Bayesian approaches (priors, efficient sampling from posterior densities), data analysis, and model comparisons. Final project. Prerequisites: exposure to statistical modeling such as 200-level STATS or POLISCI 150/350B,C, or ANTHSCI 292.

3-5 units, Spr (Jones, J; Jackman, S)

POLISCI 355. Advanced Topics in Research Methods—Applications to American and comparative politics and international relations.

1-5 units, not given this year

POLISCI 357. Sampling and Surveys—(For graduate students; see 157.)

5 units, Win (Rivers, D)

POLITICAL ORGANIZATIONS

POLISCI 362. New Economics of Organization—(Same as OB 686.)

Survey of economic approaches to organization, emphasizing theory and application, with attention to politics.

5 units, Spr (Weingast, B)

POLISCI 364. Politics and Organization—A foundation for understanding organized activity as it reflects the organization of political life. Coverage of theories is eclectic and interdisciplinary. Emphasis is on political institutions and formal organizations generally, and the norms, expectations, and routines characteristic of informal political structure.

4 units, Win (Moe, T)

POLISCI 365. Organizational Decision Making—Behavioral theories of organization. Emphasis is on the institutional applications of bounded rationality. Models of incrementalism; evolutionary models of change; organizational learning. The differences between predictions of theories of perfect rationality and those of imperfect rationality. Organizational responses (constructive and pathological) to constraints on information processing. Institutional contexts; public agencies and firms.

5 units, Win (Bendor, J)

GRADUATE

POLISCI 402. Methods of Analysis Program in the Social Sciences (MAPSS) Workshop—(Same as COMM 310.) Colloquium series. Creation and application of new methodological techniques for social science research. Presentations on methodologies of use for social scientists across departments at Stanford by guest speakers from Stanford and elsewhere. See <http://mapss.stanford.edu>. May be repeated for credit.

1 unit, Aut, Win, Spr (Krosnick, J)

POLISCI 411A,B,C. Research Seminar in International Security and Social Science—Advanced graduate students, faculty, and visitors present current research on contemporary problems in international security.

1 unit, Aut, Win, Spr (Staff)

POLISCI 420A. Approaches to the Study of American Politics—Theories of American politics, focusing on Congress, the presidency, the bureaucracy, and the courts.

5 units, Aut (Staff)

POLISCI 420B. Topics in American Political Behavior—For graduate students with background in American politics embarking on their own research. Current research in American politics, emphasizing political behavior and public opinion. Possible topics: uncertainty and ambivalence in political attitudes, heterogeneity in public opinion, the structure of American political ideology, political learning, the media as a determinant of public opinion, and links between public opinion and public policy.

5 units, Win (Sniderman, P)

POLISCI 420C. American Political Institutions—Field seminar. Prerequisites: 420A,B.

5 units, Spr (Moe, T)

POLISCI 422. Campaigns, Elections, and Public Opinion—Research seminar. Frontiers in mass political behavior. Sources include data sets from the 2004 election cycle. Prerequisite: 420B or equivalent.

5 units, not given this year

POLISCI 422A,B. Research Seminar in American Political Institutions—Two quarter sequence. Recent work on American institutions including Congress, the courts, and administrative agencies. Some attention to issues of federalism.

5 units, not given this year

POLISCI 423. Topics in Judicial Politics—Political aspects of law and courts within modern democratic institutional settings. Prerequisite: consent of instructor.

1-5 units, not given this year

POLISCI 424. Introduction to Political Psychology—Current issues in public opinion and political psychology. The design and analysis of experiments embedded in survey research. Focus is on reviewing the research literature and analyzing relevant data sets.

5 units, not given this year

POLISCI 431. Collective Action in Democratic Athens—(Same as CLASSHIS 431.) How can a collectivity reap the social benefits of cooperation in the face of the tendency of self-seeking individuals to defect? The problem is pressing in democracies, which require cooperation by diverse persons, and in highly competitive environments such as the classical Greek city states. Focus is on the organizational design of classical Athens as a state; how political institutions served to organize useful social and technical knowledge.

5 units, Spr (Ober, J)

POLISCI 432. Graduate Seminar: Global Justice—(Same as PHIL 372C.) The applicability of the idea of justice to global politics; the foundations and substance of human rights; problems of accountability, democracy, and the rule of law in global governance; and issues of distributive justice.

5 units, Spr (Cohen, J)

POLISCI 434. Democracy and the Constitution—(Same as PHIL 374C.) Connections between democratic theory and constitutional theory. Sources include literature from political philosophy, constitutional law, and jurisprudence, and arguments about freedom of expression, campaign finance, legislative apportionment, and privacy. Readings from Scalia, Breyer, Ely, Ackerman, Dahl, Habermas, Dworkin, Przeworski, Riker, and Schumpeter. Non-Law enrollment limited to 10 chosen by lottery.

3 units, Win (Cohen, J)

POLISCI 435. Topics in the Philosophy of Social Science—Topics relevant to present-day political science practice including: the foundation of probability theory; theories of scientific progress; the scope and limits of rational choice theory; and interpretive social science.

5 units, not given this year

POLISCI 436. Rational Choice—The scope and limits of rational choice theory. Possible topics: explanatory and normative uses of rational choice; self-interest versus altruism; the nature of social norms; incommensurable choices; and bounded rationality.

5 units, Spr (Stone, P)

POLISCI 437. Legal Studies Workshop—(Same as LAW 497.)

3 units, Win (Fried, B)

POLISCI 440A. Theories in Comparative Politics—Required of Political Science Ph.D. students with comparative politics as first or second concentration; others by consent of instructor. Theories addressing major concerns in the comparative field including democracy, regime change, the state, revolutions, national heterogeneity, and economic performance.

5 units, Aut (Laitin, D)

POLISCI 440B. Political Economy of Development—(Same as HISTORY 378E.) Required of Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of the instructor. The origins of political and economic institutions and their impact on long run outcomes for growth and democracy. Emphasis is on the analysis of causal models, hypothesis testing, and the quality of evidence.

5 units, Win (Haber, S)

POLISCI 440C. Methods in Comparative Politics—Required of Political Science Ph.D. candidates with comparative politics as a first or second concentration; others by consent of instructor. Current methodological standards in comparative politics. Students develop their own research design that meets these standards.

5 units, Spr (Laitin, D)

POLISCI 440D. Workshop in Comparative Politics—Faculty, guest speakers, and graduate students conducting research in comparative politics present work-in-progress. Graduate students may enroll for up to 5 total units apportioned by quarter. Auditors welcome. Graduate students whose major or minor field is comparative politics must make at least one presentation to the seminar.

1-5 units, Aut, Win, Spr (Laitin, D; Weinstein, J)

POLISCI 440E. Political Economy of Advanced Industrialized Democracies—Theories of comparative political economy organized as a progression from micro- to macro-level explanations. Sources of political cleavages over economic policies and the formation of political coalitions. Theories positing that differences in the organization of interest groups lead to systematic differences in economic outcomes. The economic and political consequences of differences in partisanship, political institutions, regime types, and the level of economic openness.

5 units, not given this year

POLISCI 441. Politics of Development—Theoretical understanding of how political processes and institutions are reflected in poverty and inequality; the creation of land, labor, and credit markets; and the configuration of fiscal, monetary, and trade policies. The politics of developing countries with emphasis on contrasts between Latin America and Africa.

5 units, not given this year

POLISCI 442. Qualitative and Field Methods—Qualitative methods for data gathering and analysis in political science. Theoretical literature on research design; challenges associated with analysis; techniques for fieldwork. Topics include case selection, levels of analysis, process tracing, ethical concerns in the field, participant observation, interviewing, archival research, survey design, and field experiments. Prerequisites: 440A,B,C.

5 units, Spr (Weinstein, J)

POLISCI 443R. Corporate Restructuring and Governance in Asia—The political economy of state-business relations and attempts at reform. Problems since the 1997 financial crisis, and reforms and restructuring. Consequences for corporate governance. Cases studies.

5 units, not given this year

POLISCI 443S. Political Economy of Reform in China—Changes in property rights, markets, credit, and the role of the state in economic development. Comparative insights about reform in the Chinese communist system that distinguishes it from Eastern Europe and the former Soviet Union. Readings in Chinese and English.

5 units, not given this year

COGNATE COURSES

See respective department listings for course descriptions and General Education Requirements (GER) information. See degree requirements above or the program's student services office for applicability of these courses to a major or minor program.

COMM 238/338. Democratic Theory: Normative and Empirical Issues
1-5 units, Win (Staff)

COMM 239. Questionnaire Design for Surveys and Laboratory Experiments: Social and Cognitive Perspectives
4 units, Spr (Krosnick, J)

EDUC 260X. Understanding Statistical Models and their Social Science Applications—(Same as STATS 209.)
3 units, Spr (Rogosa, D)

FRENGEN 256E. Political Anthropology from Rousseau to Freud
3-5 units, Spr (Dupuy, J)

HISTORY 92A. The Historical Roots of Modern East Asia
5 units, Spr (Miller, L)

HISTORY 150A. Colonial and Revolutionary America
5 units, Aut (Winterer, C)

HISTORY 203A/303A. Theories of the State from the Ancient World to the Present

5 units, Win (Baker, K; Sheehan, J)

HISTORY 233F. Political Thought in Early Modern Britain

5 units, Spr (Como, D)

HUMBIO 171. The Death Penalty: Human Biology, Law, and Policy

3 units, Spr (Abrams, W)

IPS 220. Comparative Political Institutions

5 units, Win (Mcelwain, K)

IPS 233. Introduction to Comparative and International Political Economy

5 units, Spr (Mcelwain, K)

MS&E 193/193W/293. Technology and National Security

3 units, Aut (Perry, W; Hecker, S)

PUBLPOL 102. Organizations and Public Policy

5 units, Win (Bendor, J)

PUBLPOL 183. Philanthropy and Social Innovation

5 units, Spr (Arrillaga, L)

SOC 117A/217A. China Under Mao

5 units, Spr (Walder, A)

OVERSEAS STUDIES

Courses approved for the Political Science major and taught overseas can be found in the "Overseas Studies" section of this bulletin, or in the Overseas Studies office, 126 Sweet Hall.

BEIJING**POLISCI 144P. Chinese Economy**

5 units, Aut (Zhu, T)

POLISCI 246P. Comparing the Chinese and American Legal Systems—GER:DB-SocSci

5 units, Aut, Spr (Zhang, Q)

BERLIN**POLISCI 112P. A People's Union? Money, Markets, and Identity in the EU—GER:DB-SocSci**

4-5 units, Aut (Brueckner, U)

POLISCI 245P. Shifting Alliances? The European Union and the U.S.—GER:DB-SocSci

5 units, Win (Brueckner, U)

FLORENCE**POLISCI 42P. An Extraordinary Experiment: Politics and Policies of the New European Union—GER:DB-SocSci**

5 units, Aut (Morlino, L)

POLISCI 43P. Democratic Quality in the Contemporary World—GER:DB-SocSci

5 units, Spr (Morlino, L)

POLISCI 123P. Italian Politics Between Europe and the Mediterranean—GER:DB-SocSci

5 units, Win (Morlino, L)

POLISCI 145P. Italy: From Agrarian to Postindustrial Society—(Same as HISTORY 106V.) GER:DB-SocSci

4 units, Aut (Mammarella, G)

POLISCI 210P. Current Issues in Human Rights and International Justice—GER:DB-SocSci

4 units, Win (Vierucci, L)

KYOTO**POLISCI 211P. Japan in Contemporary International Affairs—GER:DB-SocSci**

5 units, Spr (MacDougall, T)

POLISCI 240P. The Political Economy of Japan—(Same as ECON 124X.) GER:DB-SocSci

5 units, Spr (Darwin, J)

POLISCI 244P. British and American Constitutional Systems in Comparative Perspective—GER:DB-SocSci

4 units, Win (McMahon, R)

PARIS**POLISCI 143P. Human Rights in Comparative Perspective—GER:DB-SocSci**

4-5 units, Spr (Remy-Granger, D)

POLISCI 149P. Europe: Integration and Disintegration of States, Politics, and Civil Societies—GER:DB-SocSci

4-5 units, Win (Strudel, S)

POLISCI 241P. Political Attitudes and Behavior in Contemporary France—GER:DB-SocSci

4-5 units, Aut (Mayer, N; Muxel, A)

SANTIAGO**POLISCI 117P. Latin America in the International System—GER:DB-SocSci**

4-5 units, Win (Fuentes, C)

POLISCI 223P. Urban Politics in Latin America

5 units, Spr (Fraga, L)

POLISCI 242P. Modernization and its Discontents: Chilean Politics at the Turn of the Century—GER:DB-SocSci

5 units, Spr (Correa, G)

POLISCI 243P. Political Transition and Democratic Consolidation: Chile in Comparative Perspective—(Same as LATINAM 221X.) GER:DB-SocSci

5 units, Aut (Micco, S)

PSYCHOLOGY

Emeriti: (Professors) Gordon H. Bower, John H. Flavell, Albert H. Hastorf, Eleanor E. Maccoby, David L. Rosenhan, Roger N. Shepard, Carl Thoresen, Barbara Tversky, Robert B. Zajonc, Philip G. Zimbardo; (Senior Lecturer) Lyn K. Carlsmith

Chair: Laura L. Carstensen

Professors: Albert Bandura (on leave Spring), Laura L. Carstensen, Herbert H. Clark, Carol Dweck, Ian H. Gotlib, Leonard M. Horowitz, John D. Krumboltz, Mark R. Lepper, Ellen M. Markman, Hazel R. Markus, James L. McClelland, Dale Miller, Lee D. Ross, David E. Rumelhart (on leave), Claude M. Steele (on leave), Ewart A. C. Thomas, Brian Wandell, Jeffrey J. Wine (on leave Autumn)

Associate Professors: Anne Fernald, James J. Gross, Anthony Wagner
Assistant Professors: Lera Boroditsky, Kalanit Grill-Spector (on leave), Susan C. Johnson, Natasha Kirkham, Brian Knutson, Benoît Monin, Michael Ramscar (on leave), Jeanne L. Tsai

Associate Professors (Teaching): Jennifer L. Eberhardt, Catherine Heaney

Lecturers: Jennifer Culver, Beverly Hartman, Janie Hong, Jeanne Lepper, Adrienne Lomangino

Courtesy Professors: William C. Dement, Gary H. Glover, Jon Krosnick, William T. Newsome, Richard J. Shavelson

Other Affiliation: Albert Ahumada, Jr., Donald Norman, Andrew B. Watson

Director, Bing Nursery School: Jeanne Lepper

Department Offices: Jordan Hall, Building 420

Mail Code: 94305-2130

Department Phone: (650) 725-2400

Web Site: <http://psychology.stanford.edu/>

Courses given in Psychology have the subject code PSYCH. For a complete list of subject codes, see Appendix.

The courses and research opportunities in the Department of Psychology introduce students to the corpus of data on, and explanations of, human nature and human behavior. Through the study of abnormal behavior, aging, child development, cognitive processes, decision making, emotion, group behavior, infancy, language, learning and memory, personality, social perception, visual perception, and other related topics, students are introduced to the properties of sensory, cognitive, and affective systems, and of their interrelationships; to the reciprocal effects of one person on another; and to the effects on behavior of the physical, social, and cultural environment. The research programs of the faculty and students focus on the study of basic psychological mechanisms and, where appropriate, on relating basic research to the analyses and solutions of important societal problems.

The department, housed in Jordan Hall, maintains shop facilities and many computer-equipped laboratories. Bing Nursery School, located on campus at 850 Escondido Road, provides a laboratory for child observation, training in nursery school teaching, and research. It was constructed with funding from the National Science Foundation and a special grant from Mrs. Anna Bing Arnold and Dr. Peter Bing.

The department provides (1) courses designed for the general student, (2) a major program leading to the degree of Bachelor of Arts, including options for honors and a specialization in one of four content area tracks, (3) a minor program, (4) a coterminal master's degree program leading to the degree of Master of Arts, and (5) programs of graduate study and research leading to the degree of Doctor of Philosophy. Applications are not accepted for the master's degree except as noted below.

UNDERGRADUATE PROGRAMS BACHELOR OF ARTS

Major Requirements—All students declaring a major in Psychology must complete a minimum of 70 units of course work in Psychology, 60 of which must be taken in the Psychology department. The remaining 10 units must be pre-approved by the student services office or faculty

MORRISON INSTITUTE FOR POPULATION AND RESOURCE STUDIES

Faculty: (Director) Marcus W. Feldman (Biological Sciences); Carl Djerassi (Chemistry, emeritus), William Durham (Anthropological Sciences), Paul R. Ehrlich (Biological Sciences), Lawrence H. Goulder (Economics, Institute for International Studies), Mary Lake Polan (Obstetrics and Gynecology), Shripad Tuljapurkar (Biological Sciences)

Institute Office: 371 Serra Mall (Gilbert 116)

Mail Code: 94305-5020

Phone: (650) 723-7518

Email: morrinst@stanford.edu

Web Site: <http://www.stanford.edu/group/morrinst/>

Although Stanford University does not have a degree program in population studies, it does have scholars of international reputation in specialties such as demographic history, demographic methods, economic demography, epidemiology, population biology, population genetics, and the sociology and anthropology of populations.

The Morrison Institute for Population and Resource Studies is an interdisciplinary group serving three major functions: (1) encouraging graduate work in population and resource studies through fellowship grants and supervision, (2) instituting courses and seminars in population and resource studies, and (3) bringing visiting faculty to Stanford to strengthen existing course offerings. The institute also organizes an interdisciplinary Colloquium on Population Studies to introduce upper-division undergraduates and graduate students to issues in population-related specialties.

COURSES

Many departments offer courses focusing on issues related to the study of populations and resource use. The following course is sponsored by the Morrison Institute.

BIOSCI 146. Population Studies—Series of talks by distinguished speakers introducing approaches to population and resource studies.

1 unit, Win (Feldman, M)

adviser. These courses should represent a coherent thematic focus. One way to achieve this focus is through a specialization track. All courses taken to satisfy the 70-unit requirement must be taken for a grade of 'C-' or better (except for courses offered only on a satisfactory/no credit basis). All majors must take PSYCH 1, Introduction to Psychology, and PSYCH 10, Introduction to Statistical Methods, or a comparable Statistics course. Advanced placement (AP) credit may no longer be used toward the Psychology major requirements. Beyond these two required courses, students must complete at least five of the following ten core Psychology courses, with a minimum of two from each area A and B:

Area A Courses:

- BIOSCI 20. Introduction to Brain and Behavior (formerly PSYCH 20)
- PSYCH 30. Introduction to Perception
- PSYCH 45. Introduction to Learning and Memory
- PSYCH 55. Introduction to Cognition and the Brain

Area B Courses:

- PSYCH 60. Introduction to Developmental Psychology
- PSYCH 70. Introduction to Social Psychology
- PSYCH 75. Introduction to Cultural Psychology
- PSYCH 80. Introduction to Personality Psychology
- PSYCH 90. Introduction to Clinical Psychology
- PSYCH 95. Introduction to Abnormal Psychology

Students who declared a major in Psychology prior to the 2002-03 academic year may choose any five of the ten core courses. Students who declared a major in Psychology prior to the 2005-06 academic year may choose to adhere to the 55-unit major requirement, taking PSYCH 1 and 10, five core courses, and elective courses, totaling 55 units.

Students must take one Writing in the Major (WIM) course in Psychology, and should check the *Stanford Bulletin* yearly as these courses may change. The department also strongly recommends that all majors take at least one advanced seminar.

Students may count up to 10 units of research and independent study (including but not limited to PSYCH 194, 195, 281) toward the Psychology major. Students who are teaching assistants for a Psychology course or are enrolled in the senior honors program are allowed up to 15 units in independent study and research. Any units beyond the limit of 10 or 15 may be counted toward the 180 units required for graduation.

Summer Quarter Psychology courses are not equivalent to courses given during the regular academic year and, while applicable toward the 70 units needed for the major, may not be used to fulfill the core course requirement. Additionally, a course taken during the Summer Quarter cannot be used to replace the grade of a non-Summer Quarter course, even if the title and units of the two courses are the same.

Beyond the Minimal Requirements—The following recommendations may be helpful to students who wish to plan a program which goes beyond the minimal requirements listed above:

1. Within the general major, the student may take advanced undergraduate or graduate courses, including seminars. The student may also take advantage of widespread opportunities for directed research, working closely with individual faculty and graduate students.
2. The student may apply to the Senior Honors Program, described below.
3. The student may elect to pursue one of four specialization tracks: Cognitive Sciences; Health and Development; Mind, Culture, and Society; or Neuroscience, described below.

The training obtained from the pursuit of any of these options is valuable not only for students considering graduate work in psychology, but also for those thinking of professional careers outside of psychology in fields such as business, counseling, education, law, or medicine.

MINORS

Declaration—Students who wish to declare a minor field of concentration in Psychology must do so no later than the deadline for their application to graduate.

Requirements—Completion of a minimum of 35 units in Psychology is required for the minor, including PSYCH 1, Introduction to Psychology, and PSYCH 10, Introduction to Statistical Methods, or a comparable statistics course. Advanced placement (AP) credit may no longer be used

towards the Psychology minor. The minor must include three of ten core courses, with a minimum of one from each of two areas (A: BIOSCI 20; PSYCH 30, 40, 45, 50; and B: 60, 70, 75, 80, 90, 95) and elective Psychology courses of at least three units each, totaling 35 units. Students who declared a Psychology minor prior to the 2002-03 academic year may choose any three of the ten core courses. Students who declared a Psychology minor prior to the 2005-06 academic year may choose to complete seven total courses: PSYCH 1 and 10, three core courses, and two elective courses. Independent study and research cannot be counted toward the minor. Summer Quarter Psychology courses are not applicable toward the 35 units needed for the minor. All courses used to fulfill the requirements of the minor must be passed with a grade of 'C-' or better.

TRANSFER CREDIT

Evaluation of transfer credit for the Psychology major or minor is a three-step process. First, in order to submit an undergraduate petition for transfer credit, a student must already have declared Psychology as a major or minor. Second, Stanford credit for courses completed at other institutions must be granted by the External Credit Evaluation section of the Registrar's Office. Those units can then be applied toward the 180 required for graduation. Third, the Psychology department evaluates the courses to determine if they can be applied toward Psychology major or minor requirements. To have a course evaluated, students complete an undergraduate petition form (available from the student services office) and submit it with a course syllabus and a copy of the signed transcript from the External Credit Evaluation section showing the number of Stanford units granted for the course.

Psychology majors must complete at least 43 units of course work toward their major at Stanford. No more than 10 units of transfer credit may be counted toward the Psychology minor. Both majors and minors may use only one transfer course towards fulfilling the core course requirements. Additional courses may be used to fulfill the 70-unit requirement, but do not count as core courses.

SPECIALIZATION TRACKS

Students in the major program, including those in the senior honors program, may elect to specialize in one of four tracks: Cognitive Sciences; Health and Development; Mind, Culture, and Society; or Neuroscience. Specialization tracks consist of a coherent set of courses leading to advanced undergraduate or even graduate level courses in an area. In the ideal case, the student who specializes would acquire an understanding of a range of psychological processes, as well as an appreciation of the significance of these processes in the chosen area of application. In this way, specialization could facilitate the student's preparation for a professional career in, for example, medicine, business, or counseling, as well as for graduate work in Psychology.

Specialization in a track is optional, although students who do not wish to complete all the requirements for a track may still want to use the track as a guideline for an integrated program in Psychology. Students who choose to complete a specialization track must meet the requirements for the major plus the additional requirements designated for the track. Typically the courses required for a track include one or two required courses, four to six recommended courses in Psychology, one or two advanced seminars, and three or four courses in related disciplines. Psychology courses completed for the track count toward satisfying the major requirements. Courses from other departments listed for the tracks may count toward the 10 outside units for the major requirement, but must be pre-approved by the student services office or faculty adviser. The Mind, Culture, and Society track includes a two quarter research practicum; students are encouraged to apply for this track by Autumn Quarter of their junior year. Application forms are available from the student services office. There is no application for the other tracks, but all tracks must be declared on Axess and students must submit a track form that can be found at http://www-psych.stanford.edu/undergraduate_forms.html or at the student services office. Completion of a track is noted on a student's transcript, but not on the diploma. Information about the required and recommended courses for each track is available from the student services office.

HONORS PROGRAM

The senior honors program is designed for exceptionally able Psychology majors who wish to pursue a year of intensive supervised independent research. Admission to the program is made at the end of the student's junior year on the basis of (1) excellent academic performance, (2) previous research experience, and (3) two letters of recommendations by faculty and/or graduate students. An information meeting about the program is held in Winter Quarter. Applications are available late Spring Quarter and are to be turned in to the student services office with a current transcript and recommendations by June 1 prior to the student's senior year.

Students interested in the program should involve themselves in research as early as possible and should acquire a broad general background in Psychology, including statistics, and a deep background in their chosen area. The honors program is particularly appropriate for students planning to go to graduate school in Psychology or in other social sciences, as well as in computer science, business, law, and medicine.

During Autumn Quarter of their senior year, honors program students participate in a weekly seminar. Initially, discussions are on general methods and issues in psychological research, but most of the sessions are devoted to discussions of students' presentations of their proposed research. During the quarter, students meet with their advisers to develop their experimental program and begin data collection. At the end of Autumn Quarter, students turn in a written proposal. Winter and Spring quarters are devoted to completing the research, analyzing the data, and writing the thesis, which is submitted mid-May. Students give oral presentations of their projects at the annual Honors Convention, scheduled for the day between classes and exams. This convention is attended by undergraduates, graduate students, and faculty.

GRADUATE PROGRAMS

MASTER OF ARTS

The Department of Psychology normally offers a Master of Arts degree only to students concurrently enrolled in its Ph.D. program or to students currently pursuing Stanford B.A. or M.A. degrees. Admission to the program is by Psychology faculty nomination only. All applicants must satisfy University residency requirements for the degree and are responsible for consulting with their primary departments or the Financial Aid Office about the effects of the proposed program on their current funding. General University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin.

Stanford undergraduate students who would like advanced training in Psychology may apply for a coterminal M.A. degree in Psychology. To do so, students should consult with the student services officer in the department. Along with a coterminal program application, applicants must submit (1) a statement of purpose, (2) a preliminary program plan specifying the courses in which they intend to enroll to fulfill degree requirements, (3) at least two letters of recommendation from Stanford faculty members familiar with their academic work, (4) a current Stanford undergraduate transcript, and (5) a written nomination by a member of the Psychology faculty willing to serve as the student's master's degree adviser. This program is limited in size and admission is selective. Applicants must have earned a minimum of 120 units towards graduation as shown on the undergraduate transcript. The department's deadline for the submission of an application to the coterminal program is January 10.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

In exceptional cases, students concurrently enrolled in another doctoral or professional program at Stanford may also apply for the M.A. degree. Such applicants also consult with the department's student services officer.

Students must complete at least 45 units of Psychology courses for the degree. (For coterminal degree students, course work for the master's degree may not duplicate courses taken for the undergraduate degree.) Of these 45 units, at least 27 must be in Psychology courses numbered 200 or above. Units from research, teaching, independent study, and lab courses,

such as PSYCH 258, 269, 275, 281, 282, and 297, may not be counted toward these 27 units. Two of the graduate courses of at least 3 units each (one from Area A and one from Area B below) are required. In addition, at least one upper division statistics course is required. The course must be approved by the student's adviser. It is recommended that all coterminal students enroll in PSYCH 196, Contemporary Psychology. In addition to the unit and course requirements, coterminal students are required to serve as a teaching assistant for one Psychology course. Details about the teaching assistantships are available upon acceptance to the program.

All courses to be counted toward the master's degree must be passed with a grade of 'B-' or better (unless the course is offered only on a satisfactory/no credit basis). Units from research, teaching, practica, independent study, and lab courses, such as PSYCH 258, 269, 275, 281, 282, and 297, may be counted toward the remaining required 18 units. Psychology courses numbered in the 100-level and courses from other Stanford departments may be used to satisfy the remaining 18 units. Courses specifically for undergraduates (i.e., undergraduate honors courses) may not be counted toward the master's program unit requirements. Demonstration of competence in the design and execution of psychological research is also required for receipt of the master's degree. This demonstration entails completion of a master's thesis. If the student is currently doing a senior honors thesis, this honors thesis may be accepted as proof of research competence provided the honors thesis is judged to be master's level research by the student's adviser and the department's Committee on Graduate Studies. If the student has just completed an honors thesis in Psychology in the prior year, the student would be expected to continue independent research during the coterminal year and to submit thesis research in a written report which, together with the completed honors thesis, would constitute the master's thesis. All students are required to make an oral presentation of their research during the Spring Quarter, and to present their thesis or written report by June 1.

Area A Courses:

- 202. Cognitive Neuroscience
- 205. Foundations of Cognition
- 210. Memory and Learning
- 214. Psycholinguistics
- 221. Applied Vision and Image Systems
- 228. Ion Transport
- 251. Affective Neuroscience
- 261. Emotion
- 261A. Learning and Cognition in Activity

Area B Courses:

- 211. Developmental Psychology
- 212. Social Psychology
- 213. Personality and Psychopathology
- 215. Mind, Culture, and Society
- 217. Topics and Methods in Cultural Psychology
- 259. Emotions: History, Theories, Research
- 271. Applications of Social Psychology

DOCTOR OF PHILOSOPHY

There are no specific course requirements for admission to the doctoral program. However, an applicant should have research experience as an undergraduate, as well as the equivalent of an undergraduate major in psychology. The major focus of the doctoral program is on research training, and admission is highly selective.

Applicants for admission must submit their scores on the general Graduate Record Examination as part of the application. GRE subject scores are strongly encouraged.

General University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

In addition to fulfilling Stanford University requirements for the degree, the following departmental requirements are stipulated.

First-Year Course Requirements — During the first year of graduate study, the student must take 207, Proseminar for First-Year Ph.D. Graduate Students, at least one approved graduate statistics course, and at least two core courses from the list following:

- 202. Neuroscience
- 205. Foundations of Cognition
- 211. Developmental Psychology
- 212. Social Psychology
or 215. Mind, Culture, and Society
- 213. Personality

Students in each area may be required to take up to two additional non-core graduate courses in their area of specialization.

The student is expected to spend at least half of the time in research from the beginning of the first year of graduate study to the completion of the Ph.D., normally taking no more than 10 units of course work each quarter. At the end of the first year of graduate study, the student must file with the department a written report of the first-year research activities. The deadline for filing this report is June 1.

Second-Year Course Requirements—By the end of the second year of graduate study, the student must complete the core courses listed above and take a second approved graduate course in statistics.

Third-Year Major Area Paper—During the first week of Autumn Quarter of the fourth year, the student must turn in a Conceptual Analysis of the Dissertation Area (CADA). This paper provides a general framework for the research topic of the dissertation, addresses the central issues within the specialty area, and reviews the pertinent literature. Typically, the analysis has the kind of scope found in the opening chapters of the more traditional dissertations, but the exact format and scope of the paper is a joint decision made by student and adviser.

Prior to Autumn Quarter, the student should select two faculty members to read this paper and give feedback and commentary on it. These should be two faculty members most likely to serve later on the orals committee of the dissertation. A portion of the paper, revised as appropriate, can then become the first section of the actual dissertation proposal.

If the student should radically change the area of the dissertation research after the CADA has been written, the formal CADA procedure does not need to be repeated for the second dissertation topic. The student is still expected, however, to be knowledgeable about the literature and problems of any research topics being pursued for the dissertation.

Minor Requirements—The candidate must complete either a University minor satisfactory to the minor department, or elect to have the minor waived by selecting 12 upper-level units. These 12 units may be fulfilled by either (a) non-core graduate courses in Psychology, excluding any non-core graduate courses required by a particular area, or (b) graduate-level courses in other departments comparable in quality to Psychology's graduate courses. If there is any question about comparability, students should consult the Graduate Education Committee before taking the course.

Dissertation Reading Committee—The candidate must select a dissertation reading committee satisfactory to the department. The minimum membership of this committee must be (1) the principal dissertation adviser, (2) a second member from within the department, and (3) a third member chosen from Psychology or another department.

Orals—The candidate must pass the University oral examination, which is based on the dissertation proposal, not on the completed dissertation. The reason for this policy is to permit the oral examination to serve the function of guiding and improving the proposed research. This function can best be served if the oral examination is scheduled early in the year in which the dissertation research is conducted. It is therefore expected that the oral examination be taken by the end of the Autumn Quarter of the fourth year.

Dissertation Requirements—The candidate must complete a dissertation satisfactory to the dissertation reading committee.

Ph.D. candidacy expires five years after admission to candidacy at the end of the second year of study. Reapplication requires department reexamination.

STUDENT EVALUATIONS

First-Year Evaluation—It is the department's policy to evaluate the progress of each graduate student at the end of the first year of graduate study. As part of the procedure, each student is required to file with the department a report of the first-year research activities.

Students should discuss this report and the evaluation procedures with their adviser as early as possible in their first year. The report is due on June 1. If the student fulfills the academic promise displayed upon entrance, he or she is invited to continue to the doctorate.

The first-year evaluation is primarily based on three factors:

1. quality of research carried out in the first year
2. performance in courses (especially required courses)
3. recommendations of the adviser (including a commitment on the part of that adviser to continue in that role)

Second-Year Evaluation—A similar evaluation is conducted at the end of the second year of graduate training involving the same criteria as the first year; however, the student is not required to submit a paper. Students who do not make satisfactory progress during the second year may be dropped from the program.

THE DOCTORAL TRAINING PROGRAM

As indicated by the requirements described above, a student may concentrate in any one of several areas within psychology. Regardless of area, however, the training program places emphasis on the development of research competence, and students are encouraged to develop those skills and attitudes that are appropriate to a career of continuing research productivity.

Two kinds of experience are necessary for this purpose. One is the learning of substantial amounts of technical information. A number of courses and seminars are provided to assist in this learning, and a student is expected to work out a program, with his or her adviser, to attain this knowledge in the most stimulating and economical fashion.

A second aspect of training is one that cannot be gained from the courses or seminars. This is firsthand knowledge of, and practical experience with, the methods of psychological investigation and study. These methods include ways of behaving with the people or animals being studied. Students are provided with whatever opportunities they need to reach those levels of competence representative of doctoral standing. Continuing research programs, sponsored by members of the faculty, offer direct opportunities for experience in fields represented by the faculty's many research interests.

Each student achieves competence in unique ways and at different rates. Each student and adviser share in planning a program leading to the objectives discussed. The student is expected to spend half of his or her time on research and normally takes no more than 10 units of course work per quarter.

TEACHING REQUIREMENT

The department views experience in supervised teaching as an integral part of its graduate program. Regardless of the source of financial support, all students serve as teaching assistants for five Psychology courses during their graduate study. Of the courses, two should be PSYCH 1, Introduction to Psychology, and/or PSYCH 10, Statistical Methods. Students are discouraged from participating in teaching during the first year of graduate study. Students typically progress from closely supervised teaching to more independent work. Some students may be invited to offer a supervised, but essentially independent, seminar during their final year of graduate study.

PH.D. MINOR

Candidates for the Ph.D. degree in other departments may elect a minor in Psychology. To obtain a minor, the student must complete 20 units of course work at the graduate level in the Department of Psychology, excluding PSYCH 275 (graduate-level research). Crosslisted graduate courses can be used to satisfy this requirement. All courses counting toward the Ph.D. minor must be passed with a grade of 'B-' or better (unless the course is offered only on a satisfactory/no credit basis).

COGNITIVE SCIENCE PROGRAM

Psychology participates, along with the departments of Computer Science, Linguistics, and Philosophy, and the School of Education, in an interdisciplinary program of cognitive science. The program is intended to provide students with an interdisciplinary education as well as a deeper concentration in psychology. Doctoral students in Psychology are eligible

to participate in the cognitive science program. Students who complete the requirements receive a special designation in cognitive science along with the Ph.D. in Psychology. To receive this field designation, students must complete 30 units of approved courses, 18 of which must be taken in two disciplines outside of psychology. For information or course approval, see the student services officer.

PSYCHOLOGY COLLOQUIUM

The Psychology Colloquium meets on most Wednesday afternoons at 3:45. Speakers from Stanford and other institutions present topics of current interest. Graduate students are expected to attend.

COURSES

WIM indicates that the course satisfies the Writing in the Major requirement.

SUMMER SESSION

The courses announced for the Summer Session are those regularly scheduled in the department curriculum. Additional courses may be announced by Stanford Summer Session at <http://summer.stanford.edu>.

STANFORD INTRODUCTORY SEMINARS

PSYCH 7Q. Language Acquisition—Stanford Introductory Seminar. Preference to sophomores. Debates concerning how biology guides linguistic development; theories about the nature and origins of human language abilities; and experimental research on the emergence of understanding in infancy.

3 units, Aut (Fernald, A)

PSYCH 12Q. Self Theories—Stanford Introductory Seminar. Preference to sophomores. The impact of people's self theories, their beliefs in a fixed self versus a self that can be developed through motivation and performance in school, business, sports, and relationships. How self theories develop and can be changed. Readings include research articles and popular writings. GER:DB-SocSci

3 units, Win (Gross, J)

PSYCH 13N. Culture and Social Relationships—Stanford Introductory Seminar. Preference to freshmen. How does culture influence how people relate to others including romantic partners, family, friends, acquaintances, and strangers? The cultural norms, values, and structures that shape expectations of and interactions with others. GER:DB-SocSci

3 units, Win (Tsai, J)

PSYCH 16N. Amines and Affect—Stanford Introductory Seminar. Preference to freshmen. How serotonin, dopamine, and norepinephrine influence people's emotional lives.

3 units, Win (Knutson, B)

PSYCH 17N. Language and Society: How Languages Shape Lives—Stanford Introductory Seminar. Preference to freshmen. Do people who speak different languages think differently? What role does language play in politics, law, and religion? The role of language in individual cognition and in society. Breaking news about language and society; the scientific basis for thinking about these broad issues. GER:DB-SocSci

3 units, Aut (Boroditsky, L)

PSYCH 21N. Conflict, Dispute, Resolution, and the Pursuit of Justice—Stanford Introductory Seminar. Preference to sophomores. Topics include negotiation, human misunderstanding and conflict, and agreements. Emphasis is on psychological processes and barriers to dispute resolution, and strategies for overcoming those barriers.

3 units, Spr (Ross, L)

PSYCH 22N. The Psychology of Everyday Morality—Stanford Introductory Seminar. Preference to freshmen. How psychology applies the scientific method to understand moral behavior. When and why people do or do not act morally. Emphasis is descriptive versus normative; focus is on findings of social science, their implications and shortcomings, and psychological research. Sources include classic papers and recent empirical reports.

4 units, Spr (Monin, B)

OPEN TO ALL STUDENTS

PSYCH 1. Introduction to Psychology—Human behavior and mental processes including the nervous system, consciousness, learning, memory, development, emotion, psychopathology, interpersonal process, society, and culture. Current research. GER:DB-SocSci

5 units, Aut (Gross, J), Win (Monin, B), Spr (Kirkham, N)

PSYCH 10. Introduction to Statistical Methods: Precalculus—(Same as STATS 60/160.) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER:DB-Math

*5 units, Aut (Walther, G), Win (Thomas, E), Spr (Switzer, P),
Sum (Richards, W)*

PSYCH 30. Introduction to Perception—Perceptual psychology and sensory neuroscience, emphasizing vision and hearing. Topics include anatomy and physiology of the eye and ear, and of the visual and auditory areas of the brain, pitch and loudness perception, speech perception, color vision, depth and motion perception, and object and face recognition. Recommended: 1. GER: DB-NatSci

3 units, Aut (Wandell, B)

PSYCH 45. Introduction to Learning and Memory—The literature on learning and memory including cognitive and neural organization of memory, mechanisms of remembering and forgetting, and why people sometimes falsely remember events that never happened. Cognitive theory and behavioral evidence integrated with data from patient studies and functional brain imaging. Recommended: 1.

3 units, Spr (Wagner, A)

PSYCH 55. Introduction to Cognition and the Brain—Major topics in cognitive psychology and neuroscience, including empirical approaches to perception, language, learning, memory, knowledge representation, problem solving, and reasoning. WIM

4 units, Win (Boroditsky, L)

PSYCH 60. Introduction to Developmental Psychology—Psychological development from birth to adulthood, emphasizing infancy and the early and middle childhood years. The nature of change during childhood and theories of development. Recommended: 1. GER:DB-SocSci

3 units, Aut (Johnson, S)

PSYCH 60A. Introduction to Developmental Psychology Section—Guided observation of children age 2-6 at Bing Nursery School. Corequisite: 60.

2 units, Win (Hartman, B; Lomangino, A)

PSYCH 70. Introduction to Social Psychology—Theory and empirical research in social psychology: conformity, obedience, helping, and aggression; attitudes, persuasion, identity and roles; person perception, attribution, and social judgment; interpersonal and intergroup relationships, social conflict, prejudice, and stereotyping. Original research proposal. Recommended: 1. GER:DB-SocSci, WIM

4 units, Spr (Eberhardt, J; Markus, H)

PSYCH 75. Introduction to Cultural Psychology—The cultural sources of diversity in thinking, emotion, motivation, self, personality, morality, development, and psychopathology. Recommended: 1. GER:DB-SocSci, EC-GlobalCom, WIM

5 units, Spr (Markus, H)

PSYCH 80. Introduction to Personality Psychology—Concepts and research methods, major theoretical approaches, and related empirical findings. The psychodynamic, trait, biological, humanistic, behavioral, social learning, cognitive, and cultural perspectives. Recommended: 1. GER:DB-SocSci

3 units, Spr (Tsai, J)

PSYCH 90. Introduction to Clinical Psychology—Topics include the history of clinical psychology, models and assessment of personality, behavior, cognition, psychopathology, and approaches to the treatment

of abnormal behavior. Emphasis is on current theory, research, issues in, and the role of clinical psychology in contemporary society. Recommended: 1. GER:DB-SocSci

3 units, Aut (Culver, J)

PSYCH 95. Introduction to Abnormal Psychology—The nature, origin, and treatment of a variety of psychological disorders from various psychological and biomedical perspectives. Historical and current controversies in the field. Recommended: 1. GER:DB-SocSci

3 units, Spr (Hong, J)

PSYCH 101. Community Health Psychology—(Same as HUMBIO 128.) Social ecological perspective on health emphasizing how individual health behavior is shaped by social forces. Topics include: biobehavioral factors in health; health behavior change; community health promotion; and psychological aspects of illness, patient care, and chronic disease management.

4 units, Spr (Heaney, C)

PSYCH 102. Longevity—(Same as NENS 202.) Interdisciplinary. Challenges to and solutions for the young from increased human life expectancy: health care, financial markets, families, work, and politics. Guest lectures from engineers, economists, geneticists, and physiologists.

3 units, Win (Rando, T; Carstensen, L)

PSYCH 110. Research Methods and Experimental Design—Structured research exercises and design of an individual research project. Prerequisite: consent of instructor. GER:DB-SocSci, WIM

5 units, Win (Lepper, M)

PSYCH 120. Cellular Neuroscience: Cell Signaling and Behavior—(Same as BIOSCI 153.) Neural interactions underlying behavior. Prerequisites: 1 or basic biology. GER: DB-NatSci

4 units, not given this year

PSYCH 121. Ion Transport and Intracellular Messengers—(Graduate students register for 228.) Ion channels, carriers, ion pumps, and their regulation by intracellular messengers in a variety of cell types. Lab demonstrations and hands-on introduction to techniques such as patch clamping. Recommended: 120 or introductory course in biology or human biology.

1-3 units, Spr (Wine, J)

PSYCH 125. Beyond Stereotype Threat: Claiming a Rightful Place in an Academic Community—(Same as CTL 130.) Stereotype threat as mitigating the quality of a student's test performance; its impact on academic success at Stanford. How to reduce the impact of stereotype threat on Stanford students.

2-3 units, Win (Glickman, A)

PSYCH 130. Introduction to Cognitive Science—(Same as LINGUIST 144, PHIL 190, SYMBSYS 100.) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci

4 units, Spr (Bresnan, J)

PSYCH 131. Language and Thought—(Graduate students register for 262.) The psychology of language including: production and understanding in utterances; from speech sounds to speaker's meaning; children's acquisition of the first language; and the psychological basis for language systems. Language functions in natural contexts and their relation to the processes by which language is produced, understood, and acquired. Prerequisite: 1 or LINGUIST 1. GER:DB-SocSci

4 units, Aut (Clark, H)

PSYCH 133. Human Cognitive Abilities—(Same as EDUC 369.) Psychological theory and research on human cognitive abilities; their nature, development, and measurement; and their importance in society. Persistent controversies and new areas of research, recent perspectives on the nature-nurture debate and the roles of genetics, health and education in shaping HCAs. Prerequisite: PSYCH 1 or equivalent. (PSE) GER:DB-SocSci

3 units, Win (Shavelson, R)

PSYCH 134. Seminar on Language and Deception—Deceptive, exploitative, and other noncooperative uses of language. How is language used to deceive or exploit? Where are these techniques practiced and why? What are the personal, ethical, and social consequences of these practices? Prerequisite: 131, LINGUIST 1, or PHIL 181. GER:DB-SocSci

3 units, Win (Clark, H)

PSYCH 137. Birds to Words: Cognition, Communication, and Language—(Graduate students register for 239A; same as HUMBIO 145.) Although the communicative abilities of animals are determined by their genetic endowment, and human communicative skills dwarf those of other species, the relation between language and genetics remains the subject of debate. Is human language genetically specified? Or are human communicative powers just one facet of human cognitive advantage? Focus is on the nature and origins of language, using evidence from studies of animals, children, and adults. GER:DB-SocSci

3 units, Win (Fernald, A)

PSYCH 141. Cognitive Development—Topics and issues on cognitive development, developmental changes in memory, conceptual organization, logical reasoning, and communication skills. Prerequisite: 1. GER:DB-SocSci

3 units, Aut (Markman, E)

PSYCH 143. Developmental Anomalies—Developmental disorders and impairments. What the sparing of mental abilities in otherwise devastating disorders (or vice versa) tell about the mind and its development in the normal case? Examples of disorders and impairments: autism, congenital blindness, deafness, mental retardation, attachment disorder, and Williams syndrome. Prerequisites: 60, 141. GER:DB-SocSci

3 units, Spr (Johnson, S)

PSYCH 145. Seminar on Infant Development—For students preparing honors research. Conceptual and methodological issues related to research on developmental psycholinguistics; training in experimental design; and collection, analysis, and interpretation of data.

1-2 units, Win (Fernald, A)

PSYCH 146. Observation of Children—Learning about children through guided observations at Bing Nursery School, Psychology's lab for research and training in child development. Physical, emotional, social, cognitive, and language development. Recommended: 60. GER:DB-SocSci

3-5 units, Aut (Hartman, B; Lomangino, A), Spr (Hartman, B)

PSYCH 147. Development in Early Childhood—Supervised experience with young children at Bing Nursery School. 3 units require 4 hours per week in Bing classrooms throughout the quarter; 4 units require 7 hours per week; 5 units require 10.5 hours per week. Seminar on developmental issues in the Bing teaching-learning environment. Prerequisite: 60 or 146, or consent of instructor.

3-5 units, Aut, Win, Spr (Winters, J)

PSYCH 149. The Infant Mind: Cognitive Development over the First Year—How do babies learn so much in so little time? Emphasis is on cognitive and perceptual development, and the relationship between brain and behavior in infancy. Prerequisite: 1. Recommended: 60 or 141. GER:DB-SocSci

3 units, not given this year

PSYCH 152. Mediation for Dispute Resolution—(Same as EDUC 131.) Mediation as more effective and less expensive than other forms of settling disputes such as violence, lawsuits, or arbitration. How mediation can be structured to maximize the chances for success. Simulated mediation sessions.

3 units, Aut (Krumboltz, J)

PSYCH 155. Introduction to Comparative Studies in Race and Ethnicity—(Same as CSRE 196C, ENGLISH 172D.) How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. GER:DB-SocSci

5 units, not given this year

PSYCH 156. Applications of Social Psychology—(Graduate students register for 271.) The application of social psychological theory and research to evaluating the impact of social interventions, strategies, and shortcomings in personal and social decision making; the effects of mass media and other sources of social persuasion; conflict resolution and negotiation; applications in legal, medical, educational, and business settings. Prerequisites: 1 and 10, or consent of instructor.

1-4 units, not given this year

PSYCH 158. Emotions: History, Theories, and Research—(Graduate students register for 259.) Theoretical and empirical issues in the domain of emotions. The history of emotion theories, current approaches, and the interaction between emotion and cognition.

1-3 units, Aut (Zajonc, R)

PSYCH 161. Emotion—(Graduate students register for 261.) The scientific study of emotion. Topics: models of emotion, emotion antecedents, emotional responses (facial, subjective, and physiological), functions of emotion, emotion regulation, individual differences, and health implications. Focus is on experimentally tractable ideas. GER:DB-SocSci

3 units, Win (Gross, J)

PSYCH 162. The Psychology of Gender—Research and theory on the socialization and psychological development of women and men. The biological, cultural, and social factors that influence gendered behavior. GER:EC-Gender

4 units, not given this year

PSYCH 163. Interpersonal Basis of Abnormal Behavior—The role of interpersonal problems and processes in producing forms of psychopathology including neurotic reactions and schizophrenia. Conventional empirical methods clarify the origin, nature, and treatment of emotional and personality disorders. Prerequisite: 90. GER:DB-SocSci

3 units, Win (Horowitz, L)

PSYCH 166. Seminar on Personal and Social Change—Social cognitive approaches to personal and social change. Applications of sociocognitive theory to the modification of psychological dysfunctions in familial, educational, medical, and organizational settings. Ethical and value issues in behavior change.

3 units, not given this year

PSYCH 167. Seminar on Aggression—The causes and modification of individual and collective aggression. Major issues in aggression: social labeling of injurious conduct, social determinants of aggression, effects of the mass media, institutionally sanctioned violence, terrorism, psychological mechanisms of moral disengagement, modification of aggressive styles of behavior, and legal sanctions and deterrence doctrines.

3 units, Win (Bandura, A)

PSYCH 168. Emotion Regulation—(Graduate students register for 268.) The scientific study of emotion regulation. Topics: historical antecedents, conceptual foundations, autonomic and neural bases, individual differences, developmental and cultural aspects, implications for psychological and physical health. Focus is on experimentally tractable ideas. GER:DB-SocSci

3 units, Spr (Gross, J)

PSYCH 171. Research Seminar on Aging—Two quarter practicum exposes students to multiple phases of research by participating in a laboratory focusing on social behavior in adulthood and old age. Review of current research; participation in ongoing data collection, analysis, and interpretation. Prerequisites: 1, research experience, and consent of instructor.

4 units, Aut, Win, Spr (Carstensen, L)

PSYCH 173. Mind, Culture, and Society Research Lab—For juniors in the Mind, Culture, and Society track. Offered over two quarters. Lecture series on current research topics. Research project in second quarter.

2-3 units, Win, Spr (Eberhardt, J)

PSYCH 177. Senior Seminar on Mind, Culture, and Society

3 units, Aut (Markus, H)

PSYCH 178. Stigma and Marginality—(Graduate students register for 263.) The perceptions and strategies of the targets of prejudice and discrimination, with emphasis on race and ethnicity. Topics: social perceptions and the judgments of targets, racial identity, behavioral consequences of prejudice and discrimination, and legal/policy implications. Readings from social psychology, African American studies, sociology, and law. Limited enrollment. GER:DB-SocSci

3 units, not given this year
