

## energyStartup 2015 Summer Internship Position

**Company Name:** WaterSmart Software

### Description of position:

WaterSmart is looking for an energetic and thoughtful team player to serve as a water policy research intern. An ideal candidate will have an interest and some background or coursework in water, natural resources, or environmental policy.

Responsibilities include: assisting WaterSmart's Policy team in conducting research including regulatory structure and agencies, water supply costs and sources, and Public Utility Commission rulings and requirements of key markets; identifying key partners such as trade organizations, elected leaders, non-profits; and investigating privacy laws regarding utility customer data.

### Who should apply:

Candidates should be excited to:

- further the meaningful cause of saving water and fighting climate change
- work in a highly agile, learning-rich environment where everyone is passionate about delivering results with impact
- work with an informal, smart, and collegial team with which to collaborate

### Required expertise:

Interest in environmental policy, water, natural resources or law is a plus. Please mention any relevant work, volunteer or coursework in your application.

### Preferred skills/Majors:

Research skills and synthesis are highly valued. Majors or coursework in natural resources, policy, social sciences preferred.

**Internship term:** 8-12 weeks over the summer. Flexible hours.

**Compensation:** \$20/hr
