

Stanford Woods Institute for the Environment

Five Year Strategic Plan Logic Model 2011–2015

KEY STRATEGIES

Strengthen existing & create new interdisciplinary programs and partnerships
Leverage Stanford environmental research funding for maximum impact
Build strong community/network of cross-sector, interdisciplinary scholars
Recruit, develop and engage top faculty, scholars and graduate students

Convene top scholars, experts and leaders on key sustainability issues
Connect research to inform development of policy & management practices
Create transformational methods for communicating environmental knowledge
Provide key leaders with cutting-edge knowledge and decision support tools

Enhance educational opportunities for students
Deliver leadership development programs for public and private sector leaders
Provide mentorship opportunities for the Woods community

Serve as Stanford's interdisciplinary hub for action on the environment
Increase relevance and reach of Stanford's environmental research
Promote expertise of Stanford's world class, environmental faculty & scholars

FIVE-YEAR GOALS

Stanford Woods Institute will have catalyzed and sponsored inter-disciplinary research that yields solutions to global environmental sustainability issues

Stanford Woods Institute will have advanced environmental decisions made by government, NGOs and businesses

Stanford Woods Institute will have developed global environmental leadership for today and the future

Stanford Woods Institute will be the go-to place at Stanford for working on environmental and sustainability issues

LONG-TERM OUTCOME

Societies around the world are meeting the needs of their populations for water, food, health, energy and other vital services while protecting and nurturing our planet to meet the needs of people today and the generations yet to come.
