

Attention Stanford Homeowners New Rebate Program Starts January 2011!

Want to reduce your Water Footprint and save Money?

Did you know ... new high efficiency toilets save more than 2 gallons of water per flush compared with pre-1992 toilets?

Stanford Utilities Division in partnership with **Santa Clara Valley Water District (SCVWD)** would like to help its customers save **water**, and **money** by offering rebates of up to **200 dollars** to replace inefficient toilets!

High Efficiency Toilet Rebate Eligibility

Santa Clara County residents who own old toilets (installed pre-1992) that use **3.5** gallon per flush (gpf) or more, can receive a rebate if they install a new high efficiency toilet using **1.28** (gpf) or less.

Before you buy, call **SCVWD** at **(877) 874-8479** for your rebate pre-approval application form, and list of approved toilets and toilet retailers. (Note: Your water meter number is your account number.)

Important!

Rebate depends on the price of the fixture (rebate amount cannot exceed new fixture costs), and the offer allows you to replace no more than three existing toilets per household.

To help in diverting waste from local landfills please contact PSSi at (650) 321-4236 for pick-up of your old toilet. Let PSSi know this is a Stanford Utilities/SCVWD Retrofit Program. Stanford Utilities will pay \$33.92 directly to PSSi to recycle the old toilet.
