FEMGEN 104B. Senior Seminar and Practicum. 2 Units.

Required for Feminist Studies majors. Non-majors enrolled with consent of instructor. Students develop oral reports on their practicum and its relationship to their academic work, submit a report draft and revised written analysis of the practicum, and discuss applications of feminist scholarship. May be repeated once for credit.

FEMGEN 105. Honors Work. 1-15 Unit.

(Staff).

FEMGEN 105C. Human Trafficking: Historical, Legal, and Medical Perspectives. 5 Units.

(Same as HISTORY 5C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution and labor exploitation, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning and offers an optional service-learning component.

Same as: HISTORY 105C, INTNLREL 105C.

FEMGEN 107A. Ripped from the Headlines: Current Feminist, Gender, and Sexuality Issues and Questions. 1-2 Unit.

Discussion of current issues and questions related to Feminist, Gender, and Sexuality Studies.

FEMGEN 107B. EAST House Seminar: Current Issues and Debates in Education. 1 Unit.

Education and Society Theme (EAST) House seminar. In autumn quarter, faculty and other scholars from around the University discuss the latest issues, debates, and research in the field of Education. In winter quarter, research and practice pertaining to sex, gender, and education are presented by professionals and scholars. In the spring, the seminar revolves around race, ethnicity, and higher education with a particular emphasis on Asian American issues. Through an examination of these topics, students are able to share and develop their varied interests in educational research, policy, and practice. Notes: Attendance at first class required. Seminar meets in the EAST House Dining Hall located at 554 Governor's Ave.

Same as: EDUC 100B.

FEMGEN 107C. You're Majoring in What?! Why Feminism is Still Relevant. 1-2 Unit.

Stanford Feminist Study alum and community activists will join this weekly seminar to share how studying feminism has helped them professionally. Together speakers and students will explore answers to questions such as: *Why study feminism, sexuality, or gender studies? Why is feminism still relevant?*

FEMGEN 108. Internship in Feminist Studies. 1-5 Unit.

Supervised field, community, or lab experience in law offices, medical research and labs, social service agencies, legislative and other public offices, or local and national organizations that address issues related to gender and/or sexuality. One unit represents approximately three hours work per week. Required paper. May be repeated for credit. Service Learning Course (certified by Haas Center). Feminist, Gender, and Sexuality Majors may not receive 108 credit for their required practicum, as they are to sign up for FEMGEN 104 A & B instead. Prerequisites: Course work in Feminist, Gender, and Sexuality Studies, written proposal and application form submitted for approval by program office, written consent of faculty sponsor. Course may be taken 3 times total, for a max of 15 units.

FEMGEN 109. Looking Back, Moving Forward: Raising Critical Awareness in Gender and Sports. 3 Units.

In 1972, Title IX legislation opened up a vast range of opportunities for women in sports. Since then, women's sports have continued to grow yet the fight for recognition and equality persists. Simply put, men's sports are more popular than women's--so much so, in fact, that people often make the hierarchical distinction between "sports" and "women's sports." But what would it take to get more women's sports featured on ESPN or more female athletes on the cover of Sports Illustrated? And, given the well-documented corruption at the highest levels of men's sports, should such an ascent in popularity be the goal for women's sports? This course will map out and respond to the multifaceted issues that emerge when women enter the sports world. Throughout the quarter, we will explore the fight for gender equality in sports through historical, cultural, and rhetorical lenses.

FEMGEN 115. Queer Reading and Queer Writing in Early Modern England. 5 Units.

Considers the possibility of identifying queer reading and writing practices in early modern England as well the theoretical and historical obstacles such a project necessarily encounters. Focus on the role which Renaissance discourses of desire continue to play in our negotiations of homo/erotic subjectivity, identity politics, and sexual and gender difference. Study of Renaissance queerness in relation to the classical tradition on the one hand and the contemporary discourses of religion, law, and politics on the other. Readings include plays, poems, and prose narratives as well as letters, pamphlets, and ephemeral literature. Both major and minor authors will be represented.

Same as: ENGLISH 105A.

FEMGEN 120. Queer Raza. 3-5 Units.

Examination of cultural representations by U.S. Latin@s that explore the following questions: How is the mutual constitution of race/sex/class/gender theorized and represented? How is desire racialized? How is racial difference produced through sex acts and what is the function of sex in racial (self)formation? How to reconcile pleasure and desire with histories of imperialism and (neo)colonialism and other structures of power? How do these texts reinforce or contest stereotypes and the "ideal" bodies of national identity? How do these texts produce queerness as a web of social relations? Same as: CHILATST 120, ILAC 287.

FEMGEN 129. Critical Issues in International Women's Health. 4 Units.

Women's lives, from childhood through adolescence, reproductive years, and aging. Economic, social, and human rights factors, and the importance of women's capacities to have good health and manage their lives in the face of societal pressures and obstacles. Emphasis is on life or death issues of women's health that depend on their capacity to negotiate or feel empowered, including maternal mortality, violence, HIV/AIDS, reproductive health, and sex trafficking. Organizations addressing these issues. A requirement of this class is participation in public blogs. Prerequisites: Human Biology core or equivalent or consent of instructor. Same as: HUMBIO 129.

FEMGEN 138. Violence Against Women: Theory, Issues, and Prevention. 3-4 Units.

[Technical error is capping enrollment prematurely; come to first day of class] Course offers an interdisciplinary feminist perspective on the causes of gender violence, addresses the multi-leveled approaches to ending gender violence, and explores the relationship between violence against women and other forms of oppression: racism, economic exploitation, heterosexism and social class. Framework examines institutional barriers maintaining gender violence in our culture and considers multi-dimensional solutions. Students from every discipline, women and men, apply theoretical perspectives to professional goals and an optional service-learning project. Service Learning Course (certified by Haas Center) Same as: FEMGEN 238, HUMBIO 178V.

FEMGEN 139. Rereading Judaism in Light of Feminism. 4 Units.

During the past three decades, Jewish feminists have asked new questions of traditional rabbinic texts, Jewish law, history, and religious life and thought. Analysis of the legal and narrative texts, rituals, theology, and community to better understand contemporary Jewish life as influenced by feminism.

Same as: JEWISHST 139.

FEMGEN 140A. Destroying Dichotomies: Exploring Multiple Sex, Gender, and Sexual Identities. 3-5 Units.

This course is designed to broaden the student's awareness of the human experience by introducing scholarly debates about sex, gender and sexual identities and expressions. We will consider the socially constructed nature of sex, gender and sexuality and examine the history and community of those who identify as intersexual, transgender, homosexual, bisexual, asexual, pansexual and/or queer through texts, discussion, films, and class presentations.

FEMGEN 140D. LGBT/Queer Life in the United States. 4-5 Units.

An introductory course on LGBT social, cultural, and political history in the United States. This course explores how categories of sexuality have changed over time, with particular emphasis on the relationship among homosexuality, heterosexuality, and transgenderism. Students will analyze how the intersections of race, class, and sexuality influenced the constitution of these categories and the politics of social relations. Historical and literary sources will be used to examine changes in LGBT experiences and identities, primarily in the twentieth century.

Same as: HISTORY 257C.

FEMGEN 140G. Identity and Popular Music. 3-5 Units.

Major political issues of our time are played out in popular music. How do we come to identify with it and how does it influence our sense of self? This course investigates the intersection of identifications such as gender, sexuality, nationality, race, ethnicity, age, class, and ability in a variety of popular music from mid-century to the present. No special knowledge of music is required.

Same as: CSRE 140G, MUSIC 140G.

FEMGEN 140H. New Citizenship: Grassroots Movements for Social Justice in the U.S.. 5 Units.

Focus is on the contributions of immigrants and communities of color to the meaning of citizenship in the U.S. Citizenship, more than only a legal status, is a dynamic cultural field in which people claim equal rights while demanding respect for differences. Academic studies of citizenship examined in dialogue with the theory and practice of activists and movements. Engagement with immigrant organizing and community-based research is a central emphasis.

Same as: ANTHRO 169A, CHILATST 168, CSRE 168.

FEMGEN 140P. Queer Art and Performance. 4-5 Units.

Examines the late 19th, 20th and 21st century forms of performance-- including examples from drama, theater, cabaret, and performance art -- through the perspectives of contemporary critical gender and queer theories. Texts and movements range from early avant-garde (Dada, Futurism) to gay and lesbian drama (Lillian Hellmann, Joe Orton, Tony Kushner) to post-liberation Queer performance and video (Split Britches, Carmelita Tropicana, Kalup Linzy). Theorists include Judith Butler, Michel Foucault, and Eve Kosofsky Sedgwick.

Same as: TAPS 164T, TAPS 364T.

FEMGEN 142. Sociology of Gender. 5 Units.

(Graduate students register for 242.) Gender inequality in contemporary American society and how it is maintained. The social and relative nature of knowledge and the problems this poses for understanding sex differences and gendered behavior in society. Analytical levels of explanation for gender inequalities: socialization, interaction processes, and socioeconomic processes; arguments and evidence for each approach. The social consequences of gender inequality such as the feminization of poverty, and problems of interpersonal relations.

Same as: FEMGEN 242, SOC 142, SOC 242.

FEMGEN 144. History of Women and Gender in Science, Medicine and Engineering. 5 Units.

(Same as HISTORY 44. Majors and others taking 5 units, enroll in HISTORY 144.) Men's and women's roles in science, medicine, and engineering over the past 200 years with a focus on the present. What are the efforts underway globally to transform science, medicine, and engineering into fields where women can flourish? How have science and medicine studied and defined males and females? Can gender analysis spark creativity in human knowledge?

Same as: HISTORY 144.

FEMGEN 145. Culture Wars: Art and Social Conflict in the USA, 1890-1950. 4 Units.

This course examines social conflicts and political controversies in American culture through the lens of visual art and photography. We consider how visual images both reflect and participate in the social and political life of the nation and how the terms of citizenship have been represented—and, at times, contested—by artists throughout the first half of the 20th century. The class explores the relation between American art and the body politic by focusing on issues of poverty, war, censorship, consumerism, class identity, and racial division.

Same as: AMSTUD 145M, ARTHIST 145, ARTHIST 345.

FEMGEN 150D. Women Poets. 5 Units.

The development of women's poetry from the 17th to the 20th century. How these poets challenge and enhance the canon, amending and expanding ideas of tone, voice and craft, while revising societal expectations of the poet's identity. Poets include Katharine Philips, Letitia Barbauld, Elizabeth Barrett Browning, Charlotte Mew, Sylvia Plath, and Adrienne Rich.

Same as: ENGLISH 150D.

FEMGEN 151. Studying Popular Music. 3-5 Units.

What is "popular" music? How do the tools we use to think about the popular shape our understanding of what it contains? What can popular music tell us about a time period, a community, an artist, an industry, or a country? This course teaches the methodologies utilized in popular music studies, including analysis of sonic, visual, and social media, listener and performance ethnography, critical theory, and engagement with journalism. No musical experience required.

Same as: MUSIC 151F.

FEMGEN 152. Gender and Genre on the Threshold of the Modern World. 5 Units.

We will explore the vibrant early modern world in the context of the onset of modern conceptions of gender and sexuality as manifest in new literary and artistic forms as well as in key historical and cultural texts, conceptions rarely studied at length in the history and representation of gender roles. It was a time of profound change, such as the new cosmology, creation of navigation instruments, expanded education for women, the Protestant Reformation, and the flourishing of theater and performance. Such changes exerted a vital role in the movement from a closed to an open world and in changing conceptions of the self. And with the emergence of linear perspective and a refocus on the individual, attention will be given to reconfigurations of space and of specific structures of thought and the encoding of gender roles. We will consider the role of a reader or viewer in the formation of particular instances of artistic form, including material from recent work in the neurosciences and cognitive studies. At the center of what promises to be lively discussions will be early modern and modern art along with texts (and films) that include Christine de Pizan's *The Book of the City of Ladies*; Shakespeare's *Othello*; the poetry of Lady Mary Wroth and John Donne; Virginia Woolf's *A Room of One's Own*; poetry and essays of Adrienne Rich; and Samuel Beckett's play *Waiting for Godot* and its rich conceptual implications for literary and gender studies.

Same as: FEMGEN 252.

FEMGEN 153Q. Creating the Gendered Story. 4-5 Units.

Exploration of novels, stories, memoirs and micro-narratives in which gender plays a major role. The texts are by writers of varied genders and sexual orientations as well as varied class, racial and national backgrounds. Written assignments present a mixture of academic and creative options.

FEMGEN 154. Black Feminist Theory. 5 Units.

This course will examine black feminist theoretical traditions, marking black women's analytic interventions into sexual and pleasure politics and reproduction, critical culture and race theory, citizenship, identity, power and agency, representation, and questions of the body. Exploring concepts such as intersectionality, controlling images, the politics of respectability and the particularities of a black feminist liberation politic, we will look to black feminist scholars, activists, and artists from the 19th century to today.

Same as: AFRICAAM 154.

FEMGEN 155. The Changing American Family. 4 Units.

Family change from historical, social, demographic, and legal perspectives. Extramarital cohabitation, divorce, later marriage, interracial marriage, and same-sex cohabitation. The emergence of same-sex marriage as a political issue. Are recent changes in the American family really as dramatic as they seem? Theories about what causes family systems to change.

Same as: FEMGEN 255, SOC 155, SOC 255.

FEMGEN 156. Happiness, Well-Being, Gender. 1-3 Unit.

Exploring the meaning and attainment of psychological well-being and happiness, this course will address gender differences in well-being and approaches that can be used by all individuals to improve their state of happiness and well-being. Course literature will be drawn primarily from social, clinical, and positive psychology, but will be drawn from other disciplines as well. Students will actively engage with course material by critiquing studies, discussing research, and applying methods for improving well-being to their daily lives.

Same as: PSYCH 129.

FEMGEN 161. Women in Modern America. 4-5 Units.

The transformation from the New Woman of the 1890s to the New Woman of the 1990s; attention to immigrant, black, and white women, both historical analyses and personal accounts. Topics include: workforce participation; family and reproductive labor; educational and professional opportunities; the impact of wars, economic depression, and popular culture; and recurrent feminist movements.

Same as: AMSTUD 161, CSRE 162, HISTORY 161.

FEMGEN 188Q. Imagining Women: Writers in Print and in Person. 4-5 Units.

Gender roles, gender relations and sexual identity explored in contemporary literature and conversation with guest authors. Weekly meetings designated for book discussion and meeting with authors. Interest in writing and a curiosity about diverse women's lives would be helpful to students. Students will use such tools as close reading, research, analysis and imagination. Seminar requires strong voice of all participants. Oral presentations, discussion papers, final projects.

Same as: CSRE 188Q.

FEMGEN 191Q. Writing Women's Lives. 2 Units.

Creative writing through dialogue focusing on prose about the lives of women in different cultures and generations. Novels, short stories, and micro-narrative including fiction and memoir. Students produce work using research, memory, imagination, and metaphor.

FEMGEN 193G. Psychological Well-Being on Campus: A Focus on Gender and Sexual Identities. 1 Unit.

This course examines mental health and psychological well-being across the spectrum of gender and sexual identities. It addresses the unique challenges that face LGBTQ-identified students, and provides tools for supporting peers as they navigate these challenges. Discussion topics include current conceptualizations of gender identity and sexual orientation, including sexual and gender fluidity; the intersection of queer identities with multiple identities such as ethnic/racial identify and faith/spirituality; unpacking stereotypes; queer relationships and sexuality, coming out and disclosure, and mental health issues.

Same as: EDUC 193G.

FEMGEN 195. Directed Reading. 1-15 Unit.

May be repeated for credit. (Staff).

FEMGEN 199A. Feminist, Gender, and Sexuality Studies Honors Workshop. 2-3 Units.

Required of seniors in the Feminist, Gender, and Sexuality Studies honors program. Participants share ongoing work on their honors theses. Prerequisite: consent of Instructor.

FEMGEN 199B. Feminist, Gender, and Sexuality Studies Honors Workshop. 2-3 Units.

Required of seniors in the Feminist, Gender, and Sexuality Studies honors program. Participants share ongoing work on their honors theses. Prerequisite: consent of instructor.

FEMGEN 199C. Feminist, Gender, and Sexuality Studies Honors Workshop. 2-3 Units.

Required of seniors in the Feminist, Gender, and Sexuality Studies honors program. Participants share ongoing work on their honors theses. Prerequisite: consent of instructor.

FEMGEN 203. Feminist Theories and Methods Across the Disciplines. 2-5 Units.

(Graduate Students register for PHIL 253 or FEMGEN 203) The interdisciplinary foundations of feminist thought. The nature of disciplines and of interdisciplinary work. Challenges of feminism for scholarship and research. Prerequisites: Feminist Studies 101 or equivalent with consent of instructor.

Same as: FEMGEN 103, PHIL 153, PHIL 253.

FEMGEN 205. Songs of Love and War: Gender, Crusade, Politics. 3-5 Units.

Analysis of medieval love, satirical and Crusade lyrics of the troubadours. Study of deictic address, corporeal subjectivity, the female voice, love debates, and the body as a figure of political conflict. Course readings include medieval treatises on lyric and modern translations of the troubadour tradition. Works by Ovid, Bernart de Ventadorn, Bertran de Born, La Comtessa de Dia, Thibaut de Champagne, Raimon Vidal, Dante, and Pound. Taught in English. Course includes a lab component for creation of multi-media translation projects: trobar. stanford.edu.

Same as: FRENCH 205.

FEMGEN 205X. Sanela Diana Jenkins International Human Rights Colloquium. 1 Unit.

This course focuses on the relationship between global health and human rights. The course will feature leading human rights scholars and practitioners from around the world. We will examine the conceptual linkages between global health and human rights and explore both the promise of the field and the challenges inherent in implementing its norms on the ground. Health and human rights are interrelated in multiple ways: human rights abuses have negative health consequences; health policies and programs can enhance or hinder human rights; and health outcomes are improved by fulfilling the full range of human rights. Stanford students may enroll in the course for 1 Unit credit based upon attendance. The Series is also open to the Stanford community and the general public.

Same as: INTNLREL 110, IPS 271, POLISCI 204, POLISCI 304.

FEMGEN 226A. Queer Literature and Film. 3-5 Units.

Close analysis of major works of LGBTQ literature, film, and visual art from the 1890s to today. Students will gain deeper knowledge and appreciation of historical and contemporary forms of queer representation in various national literatures, film, and visual art; understand relevant social and political debates; and gain a basic knowledge of feminist and queer theory. Course will include an optional online component to reach out to the public (class website queerlitfilm.wordpress.com, social media).

Same as: COMPLIT 226A.

FEMGEN 236. Literature and Transgression. 3-5 Units.

Close reading and analysis of erotic-sexual and aesthetic-stylistic transgression in selected works by Wilde, Schnitzler, Joyce, Barnes, Bataille, Burroughs, Thomas Mann, Guenter Grass, Kathy Acker, Junot Diaz and others. Along with understanding the changing cultural, social, and political contexts of what constitutes "transgression" or censorship, students will gain knowledge of influential theories of transgression by Foucault, Blanchot, and contemporary queer and feminist writers.

Same as: COMPLIT 236.

FEMGEN 238. Violence Against Women: Theory, Issues, and Prevention. 3-4 Units.

[Technical error is capping enrollment prematurely; come to first day of class] Course offers an interdisciplinary feminist perspective on the causes of gender violence, addresses the multi-leveled approaches to ending gender violence, and explores the relationship between violence against women and other forms of oppression: racism, economic exploitation, heterosexism and social class. Framework examines institutional barriers maintaining gender violence in our culture and considers multi-dimensional solutions. Students from every discipline, women and men, apply theoretical perspectives to professional goals and an optional service-learning project. Service Learning Course (certified by Haas Center)

Same as: FEMGEN 138, HUMBIO 178V.

FEMGEN 242. Sociology of Gender. 5 Units.

(Graduate students register for 242.) Gender inequality in contemporary American society and how it is maintained. The social and relative nature of knowledge and the problems this poses for understanding sex differences and gendered behavior in society. Analytical levels of explanation for gender inequalities: socialization, interaction processes, and socioeconomic processes; arguments and evidence for each approach. The social consequences of gender inequality such as the feminization of poverty, and problems of interpersonal relations.

Same as: FEMGEN 142, SOC 142, SOC 242.

FEMGEN 252. Gender and Genre on the Threshold of the Modern World. 5 Units.

We will explore the vibrant early modern world in the context of the onset of modern conceptions of gender and sexuality as manifest in new literary and artistic forms as well as in key historical and cultural texts, conceptions rarely studied at length in the history and representation of gender roles. It was a time of profound change, such as the new cosmology, creation of navigation instruments, expanded education for women, the Protestant Reformation, and the flourishing of theater and performance. Such changes exerted a vital role in the movement from a closed to an open world and in changing conceptions of the self. And with the emergence of linear perspective and a refocus on the individual, attention will be given to reconfigurations of space and of specific structures of thought and the encoding of gender roles. At the center of what promises to be lively discussions will be early modern and modern art along with texts (and films) that include Christine de Pizan's *The Book of the City of Ladies*; Shakespeare's *Othello*; the poetry of Lady Mary Wroth and John Donne; Virginia Woolf's *A Room of One's Own*; poetry and essays of Adrienne Rich; and Samuel Beckett's play *Waiting for Godot* and its rich conceptual implications for literary and gender studies. Same as: FEMGEN 152.

FEMGEN 255. The Changing American Family. 4 Units.

Family change from historical, social, demographic, and legal perspectives. Extramarital cohabitation, divorce, later marriage, interracial marriage, and same-sex cohabitation. The emergence of same-sex marriage as a political issue. Are recent changes in the American family really as dramatic as they seem? Theories about what causes family systems to change. Same as: FEMGEN 155, SOC 155, SOC 255.

FEMGEN 258. Topics in the History of Sexuality: Sexual Violence. 4-5 Units.

Recent historical interpretations of sexual violence, with particular attention to the intersections of gender and race in the construction of rape, from early settlement through the twentieth century. Topics include the legal prosecution of rape in Early America; the racialization of rape in the U.S.; lynching and anti-lynching in the U.S.; and feminist responses to sexual violence.

Same as: AMSTUD 258, CSRE 192E, FEMGEN 358, HISTORY 258, HISTORY 358.

FEMGEN 260. Seminar in Women's Health: Women and Disabilities. 5 Units.

Explores visible and invisible disabilities, women's psychological as well as physical health, issues of access, caretaking, self-definition and the diversity of disabled women's identities. Disabilities covered include blindness, multiple sclerosis, diabetes, arthritis, emotional and learning disabilities, and conditions requiring wheelchairs and other forms of physical assistance. Prerequisite: consent of instructor.

Same as: FEMGEN 360.

FEMGEN 260X. Journeys in Women's Health and Sex and Gender in Medicine. 1 Unit.

Sponsored by the Stanford WSDM Center. Course focuses on health research on women and sex differences in medicine, acknowledges the "wisdom" of research and education on sex (e.g. chromosomes, gonads, gonadal hormones) and gender (sociocultural) factors influencing health. Brings alumni to share their professional journeys in the world of Women and Sex Differences in Medicine. Meets Women's Health Scholarly Concentration Requirement.

Same as: INDE 260.

FEMGEN 297. Education, Gender, and Development. 4 Units.

Theories and perspectives from the social sciences relevant to the role of education in changing, modifying, or reproducing structures of gender differentiation and hierarchy. Cross-national research on the status of girls and women and the role of development organizations and processes.

Same as: EDUC 197, SOC 134.

FEMGEN 299. Graduate Workshop: Feminist, Gender, and Sexuality Studies. 1-3 Unit.

Theory, methods, and research in feminist, gender, and sexuality studies, through presentations of ongoing work by students, faculty, and guest speakers, and discussion of recent literature and controversies, feminist pedagogy and career development issues. Restricted to doctoral students. Repeatable for credit. Required for PhD Minors in Feminist, Gender, and Sexuality Studies (3 quarters min.).

Same as: EDUC 370X.

FEMGEN 358. Topics in the History of Sexuality: Sexual Violence. 4-5 Units.

Recent historical interpretations of sexual violence, with particular attention to the intersections of gender and race in the construction of rape, from early settlement through the twentieth century. Topics include the legal prosecution of rape in Early America; the racialization of rape in the U.S.; lynching and anti-lynching in the U.S.; and feminist responses to sexual violence.

Same as: AMSTUD 258, CSRE 192E, FEMGEN 258, HISTORY 258, HISTORY 358.

FEMGEN 360. Seminar in Women's Health: Women and Disabilities. 5 Units.

Explores visible and invisible disabilities, women's psychological as well as physical health, issues of access, caretaking, self-definition and the diversity of disabled women's identities. Disabilities covered include blindness, multiple sclerosis, diabetes, arthritis, emotional and learning disabilities, and conditions requiring wheelchairs and other forms of physical assistance. Prerequisite: consent of instructor.

Same as: FEMGEN 260.

FEMGEN 395. Graduate Independent Study. 1-15 Unit.

Students pursue a special subject of investigation under supervision of an affiliated faculty member. May be repeated for credit.

Film Production Courses

FILMPROD 10AX. Filmmaking. 2 Units.

Fundamentals of digital video production. The process of expressing ideas in an audiovisual medium from the concept stage through post-production. Hands-on experience in directing, shooting, sound design, and editing on Final Cut Pro; examples of narrative, documentary, and experimental work screened and discussed in class. Short exercises: audio self-portrait; continuity exercise in which a story is conceptualized and executed in-camera with no additional editing. Final project: working in pairs, students create a visual essay that explores a process, place, person, or theme. This course requires a significant amount of work (including nights and weekends) outside of class; daily deadlines for submission of creative work.

FILMPROD 11AX. Intro to Visual Writing. 2 Units.

Intro to Visual Writing is a screenwriting workshop that takes students from basic visual literacy to scene writing and longer sequences, culminating in a completed short screenplay or beginning of a feature film. Students will engage in exercises in basic visual literacy (composition, shot selection, camera movement) and more advanced visual thinking (storyboarding); learn the fundamentals of writing in screenplay form (both format and content); and complete a number of scene writing exercises which build toward longer sequential storytelling. Throughout the course students will learn to give and take constructive criticism in a writing workshop, a crucial skill for the collaborative world of film.

FILMPROD 101. Screenwriting. 5 Units.

Priority to Film and Media Studies majors. Craft, form, and approaches to writing for the screen. Prerequisites: 1) ENGLISH 90, 2) ENGLISH 190F or FILMPROD 104, and 3) consent of instructor.

Same as: FILMPROD 301.

FILMPROD 103. Adaptation. 4 Units.

A close analysis of film adaptation, using various source materials to examine the demands form makes on content and the creative choices made in adaptation to film. Source materials will include plays, fiction, biography, history, graphic novels, and reference to video games and amusement park rides. A weekly film screening is a requirement of the course.

FILMPROD 104. Visual Writing. 4 Units.

A writing workshop that is an exploration of visual storytelling. Beginning with visual literacy, the class progresses from basic cinematic techniques through scene exercises to revisions and ultimately to connecting scenes in order to build sequences of script pages. Open to all majors; may substitute for ENGL 190F prerequisite for FP101.

FILMPROD 105. Script Analysis. 4 Units.

Analysis of screenplay and film from the writer's perspective, with focus on ideation, structure, and dramatic tension in narrative features. Sources include screenplays and screenings.

Same as: FILMPROD 305.

FILMPROD 106. Image and Sound. 2 Units.

This course will explore fiction, nonfiction, and experimental modes of storytelling using visual and aural elements. Through the production of five short projects, the student will be encouraged to adopt innovative approaches to a range of narrative forms.

FILMPROD 110. Advanced Screenwriting. 5 Units.

Advanced writing workshop in which students develop and complete a feature-length screenplay. Prerequisites: FP101 Screenwriting and approval of the instructor. Enrollment is limited.

FILMPROD 114. Introduction to Film and Video Production. 5 Units.

Hands-on. Techniques of film and video making including conceptualization, visualization, story structure, cinematography, sound recording, and editing. Enrollment limited to 12 students. Priority to junior/senior Film & Media Studies majors.

FILMPROD 117. ADVANCED VIDEO PRODUCTION. 5 Units.

This course introduces the fundamentals of digital video production. Special emphasis is placed on the development of interview and observational sync-sound filming techniques. Students acquire hands-on experience in shooting, sound recording, lighting, and editing. Critiques of creative work emphasizes the conceptual, aesthetic, and technical aspects of digital video production. Prerequisite: Filmprod 114 or Filmprod 10AX.

FILMPROD 301. Screenwriting. 5 Units.

Priority to Film and Media Studies majors. Craft, form, and approaches to writing for the screen. Prerequisites: 1) ENGLISH 90, 2) ENGLISH 190F or FILMPROD 104, and 3) consent of instructor.

Same as: FILMPROD 101.

FILMPROD 305. Script Analysis. 4 Units.

Analysis of screenplay and film from the writer's perspective, with focus on ideation, structure, and dramatic tension in narrative features. Sources include screenplays and screenings.

Same as: FILMPROD 105.

FILMPROD 400. Film/Video Writing and Directing. 4 Units.

Restricted to M.F.A. documentary students. Emphasis is on the development of the research, conceptualization, visualization, and preproduction skills required for nonfiction filmmaking. Prerequisite: consent of instructor.

FILMPROD 401. Nonfiction Film Production. 4 Units.

Restricted to M.F.A. documentary students. 16mm production techniques and concepts. Final project is a short black-and-white film with multitrack sound design. Prerequisite: consent of instructor.

FILMPROD 402. Digital Video. 4 Units.

Restricted to M.F.A. documentary students. Fundamentals of digital storytelling. Working with small format cameras, interviewing techniques, and nonlinear editing skills. Prerequisite: consent of instructor.

FILMPROD 403. Advanced Documentary Directing. 4 Units.

Restricted to M.F.A. documentary students. Further examination of structure, emphasizing writing and directing nonfiction film. Prerequisite: consent of instructor.

FILMPROD 404. Advanced Video Production. 4 Units.

Restricted to M.F.A. documentary students. Techniques of visual storytelling and observational shooting. Final quarter of professional training in documentary video production. Prerequisite: consent of instructor.

FILMPROD 405. Producing Practicum. 4 Units.

Restricted to M.F.A. documentary students. Advanced producing principles through the preproduction of the M.F.A. thesis project, including development of a professional film proposal. Practical training in fundraising. Prerequisite: consent of instructor.

FILMPROD 406A. Documentary M.F.A. Thesis Seminar I. 4 Units.

Restricted to M.F.A. documentary students. Production of film or video project. Focus is on shooting strategies, ethical challenges, and practical production issues. Prerequisite: consent of instructor.

FILMPROD 406B. Documentary M.F.A. Thesis Seminar II. 4 Units.

Restricted to M.F.A. documentary students. Editing and post-production of film or video project. Emphasis is on aesthetic choices (structure, narration, music), distribution, contracts, and audience. Prerequisite: consent of instructor.

Film Studies Courses

FILMSTUD 4. Introduction to Film Study. 5 Units.

Formal, historical, and cultural issues in the study of film. Classical narrative cinema compared with alternative narrative structures, documentary films, and experimental cinematic forms. Issues of cinematic language and visual perception, and representations of gender, ethnicity, and sexuality. Aesthetic and conceptual analytic skills with relevance to cinema.

FILMSTUD 4S. Language of Film. 4 Units.

This course familiarizes students with various elements of film language (cinematography, editing, sound, etc.) and introduces them to a range of approaches to cinematic analysis (authorship, genre, close formal reading, socio-historical considerations). Different types of films (narrative, documentary, and experimental) will be surveyed. Classical narrative cinema will be compared with alternative modes of story-telling.

FILMSTUD 6. Introduction to Digital Media. 5 Units.

Media beyond the horizon of cinema and television present unique problems of definition and analysis. Taking the digital - information represented as discrete values - as a reasonable approximation of the mechanics and fantasies of computation, course surveys theoretical approaches to code, networks, and cyberculture. Taking familiar formations like web sites and video games as objects by which to learn how thinkers have understood and envisioned emerging media from the mid-20th century to the present. Students to develop own methodological tools for becoming more critical users of digital media. COMM 1B can be taken in substitution of FILMSTUD 6 when the course is not being offered.

FILMSTUD 7. Introduction to Television Studies. 5 Units.

Television is arguably the most influential and ubiquitous mass medium of the last half century. Because of its familiarity and popularity, it is also often the medium most overlooked, dismissed, and maligned. Drawing from the history of television and of television scholarship, this course builds a theoretical framework for understanding this pivotal cultural form. Course covers interdisciplinary approaches to studying TV texts, TV audiences, and TV industries, including questions of the boundaries of television (from independent and avant-garde video to convergence). In the process students develop methodological tools as critical television viewers.

FILMSTUD 100A. History of World Cinema I, 1895-1929. 4 Units.

From cinema's precursors to the advent of synchronized sound.
Same as: FILMSTUD 300A.

FILMSTUD 100B. History of World Cinema II, 1930-1959. 4 Units.

The impact of sound to the dissolution of Hollywood's studio system.
Same as: FILMSTUD 300B.

FILMSTUD 100C. History of World Cinema III, 1960-Present. 4 Units.

From the rise of the French New Wave to the present.
Same as: FILMSTUD 300C.

FILMSTUD 101. Fundamentals of Cinematic Analysis. 4 Units.

The close analysis of film. Emphasis is on formal and narrative techniques in structure and style, and detailed readings of brief sequences. Elements such as cinematography, mise-en-scène, composition, sound, and performance. Films from various historical periods, national cinemas, directors, and genres. Prerequisite: FILMSTUD 4 or equivalent. Recommended: ARTHIST 1 or FILMSTUD 102. Course can be repeated twice for a max of 8 units.
Same as: FILMSTUD 301.

FILMSTUD 102. Theories of the Moving Image. 4 Units.

Major theoretical arguments and debates about cinema: realism, formalism, poststructuralism, feminism, postmodernism, and phenomenology.
Prerequisites: FILMSTUD 4.
Same as: FILMSTUD 302.

FILMSTUD 104. Introduction to the Movies- How Movies Are Developed, Produced, Marketed and Exhibited. 4 Units.

How are movies created? How are scripts developed and selected for production? How are films actually made and marketed? How are they shown in various media? Who decides what in all of these processes and what information do the decision-makers rely on? This course will follow the life cycle of a movie, from its inception as an idea, article, book, etc., to its release in theaters and other media as a finished product. Guest speakers will discuss the evolution of the film industry, creative development of scripts, how deals are structured to acquire intellectual property, film finance, and how movies are physically produced and then marketed, distributed and exhibited in theaters and in other media. We will use two films as case studies: *The Chronicles of Narnia* and *Voyage of the Dawn Treader* and *Chasing Mavericks*.
Same as: FILMSTUD 304.

FILMSTUD 110. Science Fiction Cinema. 4 Units.

Science fiction film's sense of wonder depends upon the development and revelation of new ways of seeing. The American science fiction film emphasizes the fundamental activity of human perception, its relation to bodily experience and the exploration of other worlds, new cities, and other modes of being, in such new technological spaces as the cyberspaces of the information age. It is perhaps the Hollywood genre most directly concerned with the essence of cinema itself.
Same as: FILMSTUD 310.

FILMSTUD 110N. Darkness in Light: The Filmic Imagination of Horror. 3 Units.

Preference to freshmen. From its beginnings, the cinema evinced an affinity with the phantom realm of specters, ghosts, and supernatural beings. Not only does horror have deep and diverse roots in the international history of film; it emerges as a trope of film itself, as a medium of shadows, dematerialized presence, life drained of substance. Overview of filmic imaginations of horror with a focus on the U.S., Europe, and Japan. Theories of horror, from the fantastic to the uncanny; unpacking these in light of key moments in the genre's development. The merits of vampires versus zombies. Ongoing debates through the lens of horror about cinematic representation, from Andre Bazin's idea of the mummy complex to Linda Williams' thesis of body genres to Jeffrey Sconce's notion of haunted media. Introduction to film analysis and interpretation; no prior experience in film studies required. Required weekly screening.

FILMSTUD 115. Documentary Issues and Traditions. 4 Units.

Issues include objectivity/subjectivity, ethics, censorship, representation, reflexivity, responsibility to the audience, and authorial voice. Parallel focus on form and content.
Same as: FILMSTUD 315.

FILMSTUD 116. International Documentary. 4 Units.

Historical, aesthetic, and formal developments of documentary through nonfiction films in Europe, Asia, Latin America, and Africa.
Same as: FILMSTUD 316.

FILMSTUD 133. Contemporary Chinese Auteurs. 4 Units.

New film cultures and movements in Taiwan, Hong Kong, and mainland China in the 80s. Key directors including Jia Zhangke, Wu Wenguang, Tsai Ming-liang, Hou Hsiao-hsien, Wong Kar-wai, Ann Hui. Topics include national cinema in the age of globalization, the evolving parameters of art cinema, and authorship.
Same as: FILMSTUD 333.

FILMSTUD 136. Gender and Sexuality in Chinese Cinema. 4 Units.

Representations of gender and sexuality in the cinemas of China, Taiwan, and Hong Kong, covering key periods and genres such as the golden age of Shanghai film, Hong Kong action pictures, opera films, post-socialist art films, and new queer cinema. Historical and contemporary perspectives on cinematic constructions of femininity, masculinity, and sexuality as they relate to issues of nationalism, modernity, globalization, and feminist and queer politics. Weekly screening required.
Same as: FILMSTUD 336.

FILMSTUD 140. Film Aesthetics: Editing. 4 Units.

Practical and theoretical approaches to editing and montage. The role of editing in film meaning, and cognitive and emotional impact on the viewer. Developments in the history and theory of cinema including continuity system, Soviet montage, French new wave, postwar and American avant garde. Aesthetic functions, spectatorial effects, and ideological implications of montage. Film makers include Eisenstein, Godard, and Conner.
Same as: FILMSTUD 340.

FILMSTUD 141. Music Across Media: Music Video to Postclassical Cinema. 4 Units.

What makes music videos, YouTube clips and musical numbers in today's films engaging? What makes them tick? Emphasis is on aesthetics and close reading. How music videos and its related forms work. Uses of the body, how visual iconography operates, what lyrics and dialogue can do, how and what music can say, and how it can work with other media. Questions of representation such as how class, ethnicity, gender, race, and nationality function. Viewership and industry practices.
Same as: FILMSTUD 341, MUSIC 185, MUSIC 385.

FILMSTUD 145. Politics and Aesthetics in East European Cinema. 4 Units.

From 1945 to the mid-80s, emphasizing Polish, Hungarian, Czech, Slovak, and Yugoslav contexts. The relationship between art and politics; postwar establishment of film industries; and emergence of national film movements such as the Polish school, Czech new wave, and new Yugoslav film. Thematic and aesthetic preoccupations of filmmakers such as Wajda, Jancso, Forman, and Kusturica.
Same as: FILMSTUD 345.

FILMSTUD 145B. History and Politics in Russian and Eastern European Cinema. 4-5 Units.

From 1945 to the mid-80s, emphasizing Polish, Hungarian, Czech, Slovak, and Yugoslav contexts. The relationship between art and politics; postwar establishment of film industries; and emergence of national film movements such as the Polish school, Czech new wave, and new Yugoslav film. Thematic and aesthetic preoccupations of filmmakers such as Wajda, Jancso, Forman, and Kusturica.
Same as: FILMSTUD 345B, REES 301A.

FILMSTUD 150. Cinema and the City. 4 Units.

Utopian built environments of vast perceptual and experiential richness in the cinema and city. Changing understandings of urban space in film. The cinematic city as an arena of social control, social liberation, collective memory, and complex experience. Films from international narrative traditions, industrial films, experimental cinema, documentaries, and musical sequences. Recommended: 4 or equivalent. Same as: FILMSTUD 350.

FILMSTUD 157. Film Noir from Bogart to Mulholland Drive. 4 Units.

Why did prosperous mid-20th-century America produce a dark cinema of hard-boiled characters, gritty urban settings, stark high-contrast lighting, and convoluted plots? Key examples and the recent legacy of film noir: 40s and 50s Hollywood movies featuring anti-heroes, femmes fatales, shattered dreams, violence, and a heaviness of mood. Film noir's influences included pulp fiction; B-movie production-budgets; changes in Hollywood genres; left-populist aesthetic movements; a visual style imported by European émigré directors; innovations in camera and film technology; changes in gender roles; combat fatigue; and anxieties about the economy, communism and crime. Directors, writers, cinematographers and actors. Film viewings, readings and analyses. Same as: FILMSTUD 357.

FILMSTUD 164A. Technology and the Visual Imagination. 4 Units.

An exploration of the dynamic relationship between technology and the ways we see and represent the world. The course examines technologies from the Renaissance through the present day, from telescopes and microscopes to digital detectors, that have changed and enhanced our visual capabilities as well as shaped how we imagine the world. We also consider how these technologies influenced and inspired the work of artists. Special attention is paid to how different technologies such as linear perspective, photography, cinema, and computer screens translate the visual experience into a representation; the automation of vision; and the intersection of technology with conceptions of time and space.

Same as: ARTHIST 164A, ARTHIST 364A, FILMSTUD 364A.

FILMSTUD 165A. Fashion Shows: From Lady Godiva to Lady Gaga. 4 Units.

The complex and interdependent relationship between fashion and art. Topics include: the ways in which artists have used fashion in different art forms as a means to convey social status, identity, and other attributes of the wearer; the interplay between fashion designers and various art movements, especially in the 20th century; the place of prints, photography, and the Internet in fashion, in particular how different media shape how clothes are seen and perceived. Texts by Thorstein Veblen, Roland Barthes, Dick Hebdige, and other theorists of fashion.

Same as: ARTHIST 165A, ARTHIST 365A, FILMSTUD 365A.

FILMSTUD 167B. Beyond the Fuzzy-Techie Divide: Art, Science, Technology. 4 Units.

Although art and science are often characterized as "two cultures" with limited common interests or language, they share an endeavor: gaining insight into our world. They even rely on common tools to make discoveries and visually represent their conclusions. To clarify and interrogate points of similarity and difference, each week's theme (time, earth, cosmos, body) explores the efforts of artists and scientists to understand and represent it and the role of technology in these efforts. Focus on contemporary examples.

Same as: ARTHIST 167, ARTHIST 367, FILMSTUD 367B.

FILMSTUD 250B. Bollywood and Beyond: An Introduction to Indian Film. 3-5 Units.

A broad engagement with Indian cinema: its relationship with Indian politics, history, and economics; its key thematic concerns and forms; and its adaptation of and response to global cinematic themes, genres, and audiences. Locating the films within key critical and theoretical debates and scholarship on Indian and world cinemas. Goal is to open up what is often seen as a dauntingly complex region, especially for those who are interested in but unfamiliar with its histories and cultural forms.

Same as: COMPLIT 247, ICA 250.

FILMSTUD 251. Media in Transition. 5 Units.

In a culture obsessed with new media, we are bombarded with hype about the present as a revolutionary phase of convergence. But everything old was once new, and pioneering media of the past also had to negotiate existing technologies, ideologies, and fantasies. This seminar is organized around case studies of transitional media moments from the long 20th century, including proto-cinema, ham radio, early television, hypertext, and digital film. In exploring the material and discursive aspects of remediation through theoretical, historical, and media archaeological readings, we will ask: what is a medium and how do they emerge and evolve.

FILMSTUD 290. Movies and Methods-The Judy Garland Seminar. 5 Units.

Judy Garland was one of the most accomplished performers of her time, her seeming naturalism a function of her fierce discipline. Her career straddled multiple media: film, recording, live performance and television. From childhood, her life was lived in the public eye, and her personal travails were as well known as the characters she incarnated on screen. In fact, her biography informs some of her later film roles. Garland's work in this period occurs primarily in two genres: the musical and the melodrama, and some of her best films were directed by Vincente Minnelli and George Cukor. The intersections between star, genre, and director. Both a mainstream star and a gay cult icon, Garland's persona was read differently by different audiences; the reception of Garland and her significance to audiences then and now. This is a required course for graduating Film and Media Studies majors. Remaining enrollment (open to both graduates and undergraduates) will be by permission of instructor. Capstone course for majors.

Same as: FILMSTUD 490.

FILMSTUD 297. Honors Thesis Writing. 1-5 Unit.

May be repeated for credit.

FILMSTUD 299. Independent Study: Film and Media Studies. 1-15 Unit.

May be repeated for credit.

FILMSTUD 300A. History of World Cinema I, 1895-1929. 4 Units.

From cinema's precursors to the advent of synchronized sound.

Same as: FILMSTUD 100A.

FILMSTUD 300B. History of World Cinema II, 1930-1959. 4 Units.

The impact of sound to the dissolution of Hollywood's studio system.

Same as: FILMSTUD 100B.

FILMSTUD 300C. History of World Cinema III, 1960-Present. 4 Units.

From the rise of the French New Wave to the present.

Same as: FILMSTUD 100C.

FILMSTUD 301. Fundamentals of Cinematic Analysis. 4 Units.

The close analysis of film. Emphasis is on formal and narrative techniques in structure and style, and detailed readings of brief sequences. Elements such as cinematography, mise-en-scène, composition, sound, and performance. Films from various historical periods, national cinemas, directors, and genres. Prerequisite: FILMSTUD 4 or equivalent.

Recommended: ARTHIST 1 or FILMSTUD 102. Course can be repeated twice for a max of 8 units.

Same as: FILMSTUD 101.

FILMSTUD 302. Theories of the Moving Image. 4 Units.

Major theoretical arguments and debates about cinema: realism, formalism, poststructuralism, feminism, postmodernism, and phenomenology.

Prerequisites: FILMSTUD 4.

Same as: FILMSTUD 102.

FILMSTUD 304. Introduction to the Movies- How Movies Are Developed, Produced, Marketed and Exhibited. 4 Units.

How are movies created? How are scripts developed and selected for production? How are films actually made and marketed? How are they shown in various media? Who decides what in all of these processes and what information do the decision-makers rely on? This course will follow the life cycle of a movie, from its inception as an idea, article, book, etc., to its release in theaters and other media as a finished product. Guest speakers will discuss the evolution of the film industry, creative development of scripts, how deals are structured to acquire intellectual property, film finance, and how movies are physically produced and then marketed, distributed and exhibited in theaters and in other media. We will use two films as case studies: *The Chronicles of Narnia: Voyage of the Dawn Treader* and *Chasing Mavericks*.

Same as: FILMSTUD 104.

FILMSTUD 310. Science Fiction Cinema. 4 Units.

Science fiction film's sense of wonder depends upon the development and revelation of new ways of seeing. The American science fiction film emphasizes the fundamental activity of human perception, its relation to bodily experience and the exploration of other worlds, new cities, and other modes of being, in such new technological spaces as the cyberspaces of the information age. It is perhaps the Hollywood genre most directly concerned with the essence of cinema itself.

Same as: FILMSTUD 110.

FILMSTUD 315. Documentary Issues and Traditions. 4 Units.

Issues include objectivity/subjectivity, ethics, censorship, representation, reflexivity, responsibility to the audience, and authorial voice. Parallel focus on form and content.

Same as: FILMSTUD 115.

FILMSTUD 316. International Documentary. 4 Units.

Historical, aesthetic, and formal developments of documentary through nonfiction films in Europe, Asia, Latin America, and Africa.

Same as: FILMSTUD 116.

FILMSTUD 332. East Asian Cinema. 4 Units.

Social, historical, and aesthetic dimensions of the cinemas of Japan, Hong Kong, Taiwan, mainland China, and Korea. Topics such as nation and gender, form and genre, and local and transnational conditions of practice and reception. Screenings include popular and art films from the silent to contemporary eras, including, Zhang Yimou, Wong Kar-wai, Hou Hsiao-hsien, Ozu Yasujiro, Kurosawa Akira, and Im Kwon-taek.

FILMSTUD 333. Contemporary Chinese Auteurs. 4 Units.

New film cultures and movements in Taiwan, Hong Kong, and mainland China in the 80s. Key directors including Jia Zhangke, Wu Wenguang, Tsai Ming-liang, Hou Hsiao-hsien, Wong Kar-wai, Ann Hui. Topics include national cinema in the age of globalization, the evolving parameters of art cinema, and authorship.

Same as: FILMSTUD 133.

FILMSTUD 336. Gender and Sexuality in Chinese Cinema. 4 Units.

Representations of gender and sexuality in the cinemas of China, Taiwan, and Hong Kong, covering key periods and genres such as the golden age of Shanghai film, Hong Kong action pictures, opera films, post-socialist art films, and new queer cinema. Historical and contemporary perspectives on cinematic constructions of femininity, masculinity, and sexuality as they relate to issues of nationalism, modernity, globalization, and feminist and queer politics. Weekly screening required.

Same as: FILMSTUD 136.

FILMSTUD 340. Film Aesthetics: Editing. 4 Units.

Practical and theoretical approaches to editing and montage. The role of editing in film meaning, and cognitive and emotional impact on the viewer. Developments in the history and theory of cinema including continuity system, Soviet montage, French new wave, postwar and American avant garde. Aesthetic functions, spectatorial effects, and ideological implications of montage. Film makers include Eisenstein, Godard, and Conner.

Same as: FILMSTUD 140.

FILMSTUD 341. Music Across Media: Music Video to Postclassical Cinema. 4 Units.

What makes music videos, YouTube clips and musical numbers in today's films engaging? What makes them tick? Emphasis is on aesthetics and close reading. How music videos and its related forms work. Uses of the body, how visual iconography operates, what lyrics and dialogue can do, how and what music can say, and how it can work with other media. Questions of representation such as how class, ethnicity, gender, race, and nationality function. Viewership and industry practices.

Same as: FILMSTUD 141, MUSIC 185, MUSIC 385.

FILMSTUD 345. Politics and Aesthetics in East European Cinema. 4 Units.

From 1945 to the mid-80s, emphasizing Polish, Hungarian, Czech, Slovak, and Yugoslav contexts. The relationship between art and politics; postwar establishment of film industries; and emergence of national film movements such as the Polish school, Czech new wave, and new Yugoslav film.

Thematic and aesthetic preoccupations of filmmakers such as Wajda, Jancso, Forman, and Kusturica.

Same as: FILMSTUD 145.

FILMSTUD 345B. History and Politics in Russian and Eastern European Cinema. 4-5 Units.

From 1945 to the mid-80s, emphasizing Polish, Hungarian, Czech, Slovak, and Yugoslav contexts. The relationship between art and politics; postwar establishment of film industries; and emergence of national film movements such as the Polish school, Czech new wave, and new Yugoslav film.

Thematic and aesthetic preoccupations of filmmakers such as Wajda, Jancso, Forman, and Kusturica.

Same as: FILMSTUD 145B, REES 301A.

FILMSTUD 350. Cinema and the City. 4 Units.

Utopian built environments of vast perceptual and experiential richness in the cinema and city. Changing understandings of urban space in film. The cinematic city as an arena of social control, social liberation, collective memory, and complex experience. Films from international narrative traditions, industrial films, experimental cinema, documentaries, and musical sequences. Recommended: 4 or equivalent.

Same as: FILMSTUD 150.

FILMSTUD 355. Comics and the City. 4 Units.

Urban history and life informs the history, stories, structures and aesthetics of the comics, coinciding with the emergence of the modern metropolis in America and Europe and is rooted in the same industrial, commercial, and social transformations. Comics and cartoons were fixtures of urbane humor publications of the 19th century and became a valued fixture of the American newspaper in the very earliest part of the 20th. The characters in early comic strips were often denizens of the urban world, whether immigrants fresh off the boat or the nouveau riche. Many strips were grounded in quotidian urban experience. Later comics use the city as setting, aesthetic, and metaphor. The mean streets of Jacques Tardi's noirish cities about the rather sunnier and shinier example of Superman's Metropolis. Science fiction comics and manga give us the impacted and often destructed cities of the future. The graphic novel adaptation of Paul Auster's *City of Glass* maps the grid pattern of the comics page onto the gridded streets of Manhattan. Chris Ware's *Building Stories* series uses one apartment building to follow the myriad and sometimes intersecting lines found therein. Assigned readings include many comics alongside urban and comics scholarship. Artists to be considered include Outcault, Swinnerton, McCay, Eisner, Katchor, Tatsumi, Doucet, Tardi, Otomo, Hergé, Mazzuchelli, Chaykin, Miller, Ware, Pekar, Crumb, Gloeckner.

FILMSTUD 357. Film Noir from Bogart to Mulholland Drive. 4 Units.

Why did prosperous mid-20th-century America produce a dark cinema of hard-boiled characters, gritty urban settings, stark high-contrast lighting, and convoluted plots? Key examples and the recent legacy of film noir: 40s and 50s Hollywood movies featuring anti-heroes, femmes fatales, shattered dreams, violence, and a heaviness of mood. Film noir's influences included pulp fiction; B-movie production-budgets; changes in Hollywood genres; left-populist aesthetic movements; a visual style imported by European émigré directors; innovations in camera and film technology; changes in gender roles; combat fatigue; and anxieties about the economy, communism and crime. Directors, writers, cinematographers and actors. Film viewings, readings and analyses.

Same as: FILMSTUD 157.

FILMSTUD 364A. Technology and the Visual Imagination. 4 Units.

An exploration of the dynamic relationship between technology and the ways we see and represent the world. The course examines technologies from the Renaissance through the present day, from telescopes and microscopes to digital detectors, that have changed and enhanced our visual capabilities as well as shaped how we imagine the world. We also consider how these technologies influenced and inspired the work of artists. Special attention is paid to how different technologies such as linear perspective, photography, cinema, and computer screens translate the visual experience into a representation; the automation of vision; and the intersection of technology with conceptions of time and space.

Same as: ARTHIST 164A, ARTHIST 364A, FILMSTUD 164A.

FILMSTUD 365A. Fashion Shows: From Lady Godiva to Lady Gaga. 4 Units.

The complex and interdependent relationship between fashion and art. Topics include: the ways in which artists have used fashion in different art forms as a means to convey social status, identity, and other attributes of the wearer; the interplay between fashion designers and various art movements, especially in the 20th century; the place of prints, photography, and the Internet in fashion, in particular how different media shape how clothes are seen and perceived. Texts by Thorstein Veblen, Roland Barthes, Dick Hebdige, and other theorists of fashion.

Same as: ARTHIST 165A, ARTHIST 365A, FILMSTUD 165A.

FILMSTUD 367B. Beyond the Fuzzy-Techie Divide: Art, Science, Technology. 4 Units.

Although art and science are often characterized as "two cultures" with limited common interests or language, they share an endeavor: gaining insight into our world. They even rely on common tools to make discoveries and visually represent their conclusions. To clarify and interrogate points of similarity and difference, each week's theme (time, earth, cosmos, body) explores the efforts of artists and scientists to understand and represent it and the role of technology in these efforts. Focus on contemporary examples.

Same as: ARTHIST 167, ARTHIST 367, FILMSTUD 167B.

FILMSTUD 402. Frankfurt School & Film Theory. 5 Units.

Formal, historical, and cultural issues in the study of film. Classical narrative cinema compared with alternative narrative structures, documentary films, and experimental cinematic forms. Issues of cinematic language and visual perception, and representations of gender, ethnicity, and sexuality. Aesthetic and conceptual analytic skills with relevance to cinema.

FILMSTUD 404. Postwar American Avant Garde Cinema. 5 Units.

History and theory of post-WW II American independent and experimental film. Emphasis is on issues of audiovisual form, structure, and medium specificity. Films and writings include Maya Deren, Stan Brakhage, Michael Snow, and Hollis Frampton.

FILMSTUD 405. Graduate Pedagogy Course. 5 Units.

This course is designed for graduate students in Art History and Film Studies preparing to work as teaching assistants in the Department of Art and Art History. The seminar will focus on a range of theoretical and practical concerns pertaining to the successful conceptualization, organization, and execution of class lectures and discussion sections. Students will be exposed to a variety of perspectives and strategies related to quality teaching at the college level.

Same as: ARTHIST 405A.

FILMSTUD 406. Montage. 5 Units.

Graduate seminar in film aesthetics. Theoretical and practical approaches to editing/montage. Stylistic, semiotic, epistemological, and ideological functions of montage considered in film-historical contexts including: development of the continuity system of editing; flourishing of the Soviet montage school; and achievements of the post-war new waves. Filmmakers include D. W. Griffith, Sergei Eisenstein, Jean-Luc Godard, and Dusan Makavejev.

FILMSTUD 410A. Documentary Perspectives I. 4 Units.

Restricted to M.F.A. documentary film students. Topics in nonfiction media. Presentations and screenings by guest filmmakers. Prerequisite: consent of instructor.

FILMSTUD 410B. Documentary Perspectives II. 4 Units.

Restricted to M.F.A. documentary film students. Continuation of 410A. Topics in nonfiction media. Presentations and screenings by guest filmmakers. Prerequisite: consent of instructor.

FILMSTUD 414. Comics. 5 Units.

Long derided as neither literature nor art, the medium of comics, with its complex juxtapositions of word and image and of images with one another, is increasingly understood as a supple and sophisticated mode of communication and expression. Dynamic new work is appearing on a weekly basis, and lavish reprint projects have made comics history more available for study and pleasure. This seminar simultaneously explores the aesthetic and historical parameters of the medium as well as the shape of comics scholarship. As comics are something of a hybrid form, the seminar will necessarily be interdisciplinary in approach. The treatment of time, rhythm, and tempo will be considered alongside explorations of line, panel, sequence, page, story, and seriality. The flexibility of the medium will be encountered by reading broadly in comic strips (humorous and dramatic), superheroes, undergrounds and independents, political satire and pedagogy, autobiography, experimental works, and children's comics, as well as recent iterations of the graphic novel.

FILMSTUD 436. Chinese Cinema. 5 Units.

Course surveys a range of critical perspectives and debates on Chinese cinema. It is organized on the basis of weekly topics, such as genre, historiography, gender, modernity, and the idea of national cinema. Consent of instructor required.

FILMSTUD 490. Movies and Methods-The Judy Garland Seminar. 5 Units.

Judy Garland was one of the most accomplished performers of her time, her seeming naturalism a function of her fierce discipline. Her career straddled multiple media: film, recording, live performance and television. From childhood, her life was lived in the public eye, and her personal travails were as well known as the characters she incarnated on screen. In fact, her biography informs some of her later film roles. Garland's work in this period occurs primarily in two genres: the musical and the melodrama, and some of her best films were directed by Vincente Minnelli and George Cukor. The intersections between star, genre, and director. Both a mainstream star and a gay cult icon, Garland's persona was read differently by different audiences; the reception of Garland and her significance to audiences then and now. This is a required course for graduating Film and Media Studies majors. Remaining enrollment (open to both graduates and undergraduates) will be by permission of instructor. Capstone course for majors.

Same as: FILMSTUD 290.

FILMSTUD 620. Area Core Examination Preparation. 5 Units.
For Art History Ph.D. candidates. Prerequisite: consent of instructor.

FILMSTUD 660. Independent Study. 1-15 Unit.
For graduate students only. Approved independent research projects with individual faculty members.

FILMSTUD 660E. Extended Seminar. 4 Units.
May be repeated for credit. (Staff).

Finance Courses

FINANCE 121. Undergraduate Finance Research and Discussion Seminar. 1 Unit.

This seminar is designed to provide some experience with research methods and topics in finance, and to assist undergraduates with career interests in financial research, whether academic or not, with preparation for those careers. The seminar meetings are weekly and discussion based, covering a range of issues and methods in financial economics. Students are expected to prepare a 30-minute research presentation once during the quarter.

FINANCE 201. Managerial Finance. 4 Units.

This course covers the foundations of finance with an emphasis on applications that are vital for corporate managers. We will discuss many of the major financial decisions made by corporate managers, both within the firm and in their interactions with investors. Essential in most of these decisions is the process of valuation, which will be an important emphasis of the course. Topics include criteria for making investment decisions, valuation of financial assets and liabilities, relationships between risk and return, capital structure choice, payout policy, the use and valuation of derivative securities, and risk management. This course is targeted to those students who are new to finance and for those with little quantitative background.

FINANCE 204. Managerial Finance - Accelerated. 4 Units.

This course covers the foundations of finance with an emphasis on applications that are vital for corporate managers. We will discuss many of the major financial decisions made by corporate managers, both within the firm and in their interactions with investors. Essential in most of these decisions is the process of valuation, which will be an important emphasis of the course. Topics include criteria for making investment decisions, valuation of financial assets and liabilities, relationships between risk and return, capital structure choice, the use and valuation of derivative securities (e.g., options and convertible securities), and risk management. This accelerated course is designed for those students who are relatively new to finance but who possess solid quantitative skills.

FINANCE 211. Corporate Finance: Applications, Techniques, and Models. 3 Units.

The focus of this course is to apply the fundamental ideas and tools of corporate finance to real-world corporate decisions. This course (in either its basic or accelerated format) is designed to be the second course in a standard finance sequence; that is, it is designed to be the natural follow-up to the Winter Managerial Finance course. This course will develop and extend standard tools and techniques of financial analysis, valuation, and model-building, and apply these methods to a wide range of cases. Case topics will include capital structure, valuation, mergers and acquisitions, private equity and venture capital, international finance, hostile takeovers and leveraged buyouts, financial distress and bankruptcy. Students will be expected to develop detailed model-based analyses for the cases using the tools and techniques we develop in this course, and to employ their analyses to reach and defend specific recommendations for these cases.

FINANCE 214. Accelerated Corporate Finance: Applications, Techniques, and Models. 3 Units.

The focus of this course is to apply the fundamental ideas and tools of corporate finance to real-world corporate decisions. This course (in either its basic or accelerated format) is designed to be the second course in a standard finance sequence; that is, it is designed to be the natural follow-up to the Winter Managerial Finance course. This course will develop and extend standard tools and techniques of financial analysis, valuation, and model-building, and apply these methods to a wide range of cases. Case topics will include capital structure, valuation, mergers and acquisitions, private equity and venture capital, international finance, hostile takeovers and leveraged buyouts, financial distress and bankruptcy. Students will be expected to develop detailed model-based analyses for the cases using the tools and techniques we develop in this course, and to employ their analyses to reach and defend specific recommendations for these cases.

FINANCE 221. Finance for Non-MBAs. 3 Units.

This course, intended for graduate students and advanced undergraduates, covers the foundations of finance with applications in corporate finance and investment management. It discusses many of the major financial decisions made by managers and investors, emphasizing the process of valuation. Topics include criteria for making investment decisions, risk and return, market efficiency, capital structure, and the valuation of derivative securities (e.g., options). The course also provides coverage of the major financial instruments issued by corporations. Prerequisite: ability to use spreadsheets, knowledge of basic probability and statistics concepts, including random variables, expected value, variance, covariance, and simple estimation and regression. For registration questions about this course, please contact the Graduate School of Business at academic_operations@gsb.stanford.edu.

FINANCE 229. MSx: Finance. 4 Units.

This course covers the foundations of corporate finance including the management of liquidity, capital structure, financial forecasting, dividend policy, financial distress, cost of capital and capital budgeting. It discusses the major financial decisions made by corporate managers and the impact of those decisions on investors and the value of the firm. Topics include criteria for understand the valuation of financial assets and liabilities, relationships between risk and return, market efficiency, and the role of derivative securities including options. The course also provides coverage of the role of financial markets in the operations of the firm.

FINANCE 310. Managerial Finance - Advanced. 4 Units.

This course covers the foundations of finance with an emphasis on applications that are vital for corporate managers. We will tackle most of the important financial decisions made by corporate managers, both within the firm and in their interactions with investors. Essential in most of these decisions is the process of valuation, which will be an important emphasis of the course. Topics include criteria for making investment decisions, valuation of financial assets and liabilities, relationships between risk and return, capital structure choice, payout policy, the use and valuation of derivative securities (e.g., options and convertible securities), and risk management. This advanced course is targeted to those with a strong background in finance and (at least) solid quantitative skills.

FINANCE 319. Private Equity Investing Seminar. 4 Units.

This seminar focuses on private equity investing, including investments with control, buyouts, and minority investments at various stages in a company's life. Private equity investing activity has grown significantly over the past decade. This seminar explores selected topics in private equity investing for those MBA students who take the corequisite course FINANCE 321, Investment Management and Entrepreneurial Finance. Private equity includes both established and early stage companies. The course extends and deepens the entrepreneurial finance area for those with an interest in private equity, venture capital and principal investing, taking a global view. Utilization will be made of original case studies and lecture-discussions, building on the framework of FINANCE 321. The Seminar meets with outstanding investors. All those registered in F321.1 will also be registered in F319. See yellow Term Sheet put in MBA Boxes in early May. All those registered in F321.2 will also be registered in F329. See yellow Term Sheet.

FINANCE 320. Debt Markets. 4 Units.

This course is intended for those who plan careers that may involve debt financing for their businesses or other investments, or involve trading or investing in debt instruments and their derivatives, including money-market instruments, government bonds, repurchase agreements, interest-rate swaps, mortgage-backed securities (MBS), corporate bonds, structured credit products, and credit derivatives. We will emphasize institutional features of the markets, including trading, pricing, and hedging. There is a special focus on distressed debt. Most lectures will start with a cold-called student presentation of an un-graded short homework calculation. There will also be a series of graded homework, an in-class mid-term, and about six graded 'pop quizzes' of 10 minutes or less.

FINANCE 321. Investment Management and Entrepreneurial Finance. 3 Units.

Equity investment in companies, common stocks, early/growth stage ventures, deals, partnerships, hedge funds, or other entrepreneurial opportunities will be immediately or eventually important for most MBAs—either on the investing side or on the fund-raising financing side. This investment course discusses many practical and conceptual factors influencing the analysis and value of companies and deals, including publicly listed and private equity investments, and on success of investment approaches. The focus of this course is on quoted and private equity investments and on entrepreneurial finance. The format of the class is primarily case discussions and lecture discussions led by the professor and investors/principals who were involved in the case. This course enables MBA students to learn a broad investing skill-set and to study outstanding investors. See yellow Term Sheet put in MBA Boxes in early May.

FINANCE 322. Financial Intermediaries and Capital Markets. 4 Units.

This course focuses on financial markets, institutions, and instruments. We consider when and how firms raise capital through the life cycle, beginning with the capital-raising decisions and transactions for young firms and then discussing the decisions facing older, listed firms. We concentrate mainly on the firm's perspective while also considering the perspective of financial intermediaries. Issues to be considered in this course include the role of financial intermediaries like banks, the decision to go public, the pricing and role of investment banks in IPOs, bank debt, project finance, public debt, private placements, securitizations, convertibles, and markets for junk bonds.

FINANCE 324. Practical Corporate Finance. 4 Units.

The focus of this course is to apply the fundamental ideas of corporate finance to real-world problems. This course is a follow-up to the Fall course in Managerial Finance in which the basics of finance and valuation were covered. We will explore both how to make the acquired knowledge practical as well as to deepen our understanding of the core principles of finance. During the course we will analyze cases covering a wide range of topics such as capital structure, private equity and venture capital, mergers and acquisitions, hostile takeovers and leveraged buyouts, as well as bankruptcy and financial distress. These cases provide an opportunity to bridge the gap between theory and real-life situations. Students are expected to develop their own spreadsheets and provide recommendations based on their analysis of the case material. This course was formerly known as FINANCE 224. An accelerated version of this course is offered as FINANCE 331.

FINANCE 326. Derivative Securities. 4 Units.

This course is an introduction to options, futures and other derivative securities. The goal is to learn a core set of principles that underlie the pricing and use of derivatives. In particular, we will cover the valuation and use, both for risk management and for speculation, of forwards, futures, swaps, and options; the Black-Scholes option-pricing formula; delta-hedging; credit derivatives; financial risk management; and the role of derivatives in the recent financial crisis.

FINANCE 327. Financial Markets. 4 Units.

The aim of this course is to develop a thorough understanding of financial markets. We explore how investors make decisions about risk and return, how financial markets price risky assets in equilibrium, and how financial markets can sometimes malfunction. The course puts particular emphasis on the role of real-world imperfections that are absent from the standard textbook view of financial markets. For example, we explore the role of illiquidity: Why are there liquid markets for some types of assets but not for others? Why does liquidity often disappear in times of market turmoil? We will also study recent insights from behavioral finance about investor psychology and market inefficiencies. Moreover, we will look at financial innovations such as credit-default swaps, securitization, and hedge funds that play important roles in financial markets these days. We use cases to develop these topics in the context of practical decision-problems in the areas of asset allocation, risk management, and financing.

FINANCE 329. Investment Seminar. 4 Units.

"Global Principal Investing/Hedge Funds" is a seminar on selected topics in masterful investing in publicly traded and private equity/venture capital investments, with focus on the principal's point of view. We study hedge funds and mutual funds and meet with outstanding investors. The scope and context is global including emerging markets. The Seminar is taught by a founding director of one of the largest international investment funds. All those registered in F321.1 will also be registered in F319. See yellow Term Sheet put in MBA Boxes in early May. All those registered in F321.2 will also be registered in F329. See yellow Term Sheet.

FINANCE 330. Investment Management: Asset Allocation and Asset/Manager Selection. 4 Units.

This course covers strategic and tactical asset allocation in investment portfolios as well as specific asset and manager selection issues. We consider challenges that are unique to the various asset classes that comprise broad-based portfolios, including: public equities, fixed income securities, private equity (both buyout and venture capital), hedge funds, and real assets (real estate, energy, timber, and commodities). We also consider challenges that are specific to various geographies (e.g., domestic, developed international and emerging markets) across the various asset classes. The portfolio optimization framework employed considers the perspective of different types of investors that vary along such dimensions as risk preference, investment horizon, tolerance for illiquidity, tax status, social objectives, and special asset-specific relationship, information or skill advantages. More specifically, our framework considers: tradeoffs between seeking diversification to control risks, and making concentrated bets where there appears to be outsized return prospects (whether due to one-off proprietary investment opportunities or the market appearing to value certain sectors improperly); tradeoffs between passive investment (at low administrative cost and complexity) and active investment designed to produce premium returns (despite the incremental cost and complexity); distinctions between investing as principals and delegating to managers, and the importance of aligning incentives among all parties; the importance of liquidity in driving the pricing, risk and expected returns to various asset classes and the importance of identifying which parties are natural suppliers of liquidity and which the natural demanders; the importance of effective underwriting and ongoing monitoring of investment opportunities; the importance of tax considerations in the pricing and expected returns to various asset classes; and the importance of identifying which parties form the natural clientele in each asset class. For a number of the sessions, we will invite domain experts to add spice and depth to a portion of the class discussion.

FINANCE 331. Practical Corporate Finance. 4 Units.

(Note: this course was formerly known as FIN 230) The main aim of this course is to enable students to apply the fundamental ideas of finance to problems in the area of corporate finance with all the complexities the real world entails. The course is a follow-up to the Fall Managerial Finance course where students learnt basics of valuation techniques and various finance applications. We will explore both how to make all this knowledge practical as well as how to deepen our knowledge of fundamental finance ideas. The main focus of this course is on the corporate financial manager and how he/she reaches decisions as to investments, dividends and financing of all sorts. Topics include leveraged buyouts, hostile takeovers, private equity financing and venture capital, financial distress and bankruptcy, mergers and acquisitions, managing working capital. The cases will be used to motivate our discussion of how to bridge the gap between rigorous finance theory and its application to practical problems in corporate finance. The course is case-based and more advanced than FINANCE 324. "Advanced" means that we will discuss a lot of subtle qualitative issues as well as explore deeper fundamental applications of core finance ideas. The course is intensive and will require students to prepare carefully all cases, read and understand a lot of materials, and actively participate in the class discussion. The main teaching method is cold calling.

Same as: Accelerated.

FINANCE 332. Finance and Society. 3 Units.

This interdisciplinary course will discuss the role of the financial system within the broader economy and the interactions between the financial industry and the rest of society. The course will provide an overview of the financial system, cover the basic economic principles essential for understanding the role of finance in the economy, and discuss of policy issues around financial regulation. It seeks to mix students from GSB, Law School, Public Policy, Economics, Political Science, and other departments. Topics to be discussed include: nn* The financial system, from microfinance to global megabanks: how and why finance can benefit society as well as endanger and harm. nn* Financial regulation: why and how? nn* Other people's money: the challenge of effective control, governance, and trust. nn* The politics of banking and finance. nn* Ethical issues in finance.

FINANCE 335. Corporate Valuation, Governance and Behavior. 4 Units.

This course will develop a detailed knowledge of corporate valuation techniques, together with an understanding of the role such valuations play in a wide range of corporate financing decisions. First, the course will carefully consider different valuation techniques, the assumptions that underlie each of these methods, how they are applied in practice, how they are related to one another, and how to decide which method of valuation is appropriate for a given application. After developing these tools, they will then be applied to a wide range of corporate finance settings. Among the applications to be considered are mergers and acquisitions, international valuation, corporate governance, financial distress, agency conflicts, asymmetric information, and overvaluation. For all of these applications, this course will emphasize the central importance of valuation to understanding observed phenomena and to guiding optimal decision making, as well as the unique challenges to valuation posed by the particular application.

FINANCE 336. The Finance of Retirement and Pensions. 4 Units.

The financial economics of how retirement is financed, particularly in the US. Topics: basic finance concepts necessary for understanding individual retirement savings. Properties of financial instruments such as bonds and stocks. Optimization of individual retirement account or 401(k) portfolios. Defined benefit pensions. Measuring defined benefit pension liabilities. Impact of defined benefit pension liabilities on corporate, state, and local budgeting. The economics of national retirement policy including Social Security and government treatment of private retirement savings.

FINANCE 341. Modeling for Investment Management. 3 Units.

This course will combine practical and up-to-date investment theory with modeling applications. Understanding beautiful theory, without the ability to apply it, is essentially useless. Conversely, creating state-of-the-art spreadsheets that apply incorrect theory is a waste of time. Here, we try to explicitly combine theory and application. The course will be divided into 6 modules, or topics. The first day of each module will be a lecture on an investment topic. Also provided is a team modeling project on the topic. The second day of each module will be a lab. The lab day will begin with modeling concepts (tips) designed to help you use Excel to implement the module's investment topic. After the tips are provided, the remainder of the lab day is devoted to teams working on their modeling project and allowing for Q&A. On the third day of each module will be presentations and wrap-up.

FINANCE 345. History of Financial Crises. 4 Units.

Financial crises are as old as financial markets themselves. There are many similarities between historical events. The recent credit crisis, for example, is far from unique. More often than not financial crises are the result of bubbles in certain asset classes or can be linked to a specific form of financial innovation. This course gives an overview of the history of financial crises, asset price bubbles, banking collapses and debt crises. We start with the Tulip mania in 1636 and end with the recent credit and debt crises. The purpose of the course is to understand the causes of past crises and to develop a conceptual framework that ties common elements together. We will discuss the lessons that we can draw for financial markets today.

FINANCE 346. Institutional Money Management. 3 Units.

The object of this course is to study the money management industry from the perspective of the user --- an investor who wants to invest money. This course will study the main components of the money management industry: mutual funds, hedge funds, private equity funds and venture capital funds. It will also examine important users of the industry such as non profits, endowments and defined benefit pension funds. The emphasis of the course will not be on how fund managers make money, but rather on how the industry is organized, how managerial skill is assessed, how compensation is determined, and how economic rents are divided between managers and investors. The course will explore how competitive market forces interact with managerial skill and other market frictions to give rise to the observed organization of the industry.

FINANCE 350. Corporate Financial Modeling. 4 Units.

The course will take the perspective of a mid-level manager or decision-maker who is responsible for collecting, analyzing, and utilizing financial information in the context of a major transaction. We will integrate theories presented throughout courses in the core, particularly accounting and finance, and take a hands-on approach to understand how the theory is implemented in practice. The focus of the course will be on developing critical financial modeling skills, understanding best practices, and recognizing common pitfalls. Students will work on a series of cases and build models that can be used for earnings and pro-forma financial statement forecasts, valuation, the assessment of financing needs, merger analysis, and LBO evaluation. Students will also gain experience presenting financial models and critically assessing them. By the conclusion of the course, students will develop the skills to construct complex financial models and the logical frameworks to utilize them for various organizational applications. [Note: This course is geared toward students relatively new to financial modeling; those with extensive financial modeling backgrounds may be better served by an alternative course.]

FINANCE 351. Advanced Corporate Financial Modeling. 4 Units.

Students will engage in the development of corporate financial modeling cases and solutions. Students will also develop materials to aid others in building financial models, and serve as case leaders during lab workshops. Extensive background in financial modeling and experience with Excel is required.

FINANCE 361. Behavioral Finance. 4 Units.

This course provides an introduction to behavioral finance, a discipline which integrates insights from psychology into the study of financial decisions and markets. There will be a focus on understanding the psychological underpinnings of financial decision-making as well as the institutional frictions that may allow these psychological mechanisms to influence economic outcomes. Applications include the pricing of assets relative to fundamental value, trading strategies, managerial behavior, and household savings and investment decisions. Conceptual issues will be emphasized through a mix of case discussions and lectures, and quantitative exercises will serve to develop analytical tools for making financial choices.

FINANCE 373. Entrepreneurial Finance. 4 Units.

This is a course about the financial decision-making process for start-up firms. The course takes a two-pronged approach: First, we develop tools and concepts of corporate finance related to modeling, valuation, control, and investment decisions within an entrepreneurial context. Second, we use cases with firms at different stages of their life cycle from initial angel or venture capital investments through exit decisions, to see the issues that arise when these principles are applied in practice. In some cases we take the viewpoint of the entrepreneur and in others the viewpoint of the investor. After all, as an entrepreneur, you cannot negotiate effectively without understanding the investor's motivations. Conversely, you cannot evaluate a potential investment opportunity without appreciating the entrepreneur's perspective and incentives. Finally, we explore new developments in entrepreneurial finance such as crowdfunding and early liquidity provision.

FINANCE 381. Private Equity in Frontier Markets: Creating a New Investible Asset Class. 4 Units.

In 2001, Jim O'Neil of Goldman Sachs wrote a research note which underscored the importance of so-called Emerging Markets to a well-balanced investment portfolio. Still today, most investors have little or no investment exposure beyond North America, Europe, Japan and more recently India, China and Brazil. All of this is just beginning to change. The not yet fully formed investment category called frontier market private equity is emerging and within the next decade is likely to be an asset class of its own. Private equity investments are being made in southeast Asia, in MENA (Middle East/ North Africa), in sub-Saharan countries beyond South Africa and in Latin America. Even fund of funds are appearing across these markets. At the same time, investors face a world of diminished returns expectations in developed economies just as aging demographics and the need for continued growth, innovation and infrastructure renewal places increasing demands for payout. Suffice it to say, investors will be looking beyond traditional asset classes and geographies for sources of return. This new course is designed to expose you to the still emerging, not yet fully formed world of frontier market private equity. To set the context we will start by reviewing the fundamentals of economic growth and development globally. In addition we will discuss the fundamental concepts involved in constructing and evaluating the performance of a large scale investment portfolio. We will then review cases on the elements of the private equity cycle/process and specifically address the special demands of frontier markets in general. We will also focus on issues that are specific to various markets (e.g. Nigeria, Vietnam, etc.). Students taking the course will be given the opportunity to make important contributions to the knowledge base of this still very young field by working in small teams to research topics of personal and general interest, the results of which will be reported to the rest of the class.

FINANCE 385. Angel and Venture Capital Financing and Decision Making. 4 Units.

This course covers all the stages of investment in early stage high-growth companies, from the seed funding of a novel idea to venture capital rounds to a successful exit, be it an M&A or an IPO. We will concentrate on how investors and entrepreneurs make and should make important decisions at different stages. Some questions that we will discuss are: How do angels and VCs generate and process their deal flow and select companies? What are typical mistakes of entrepreneurs in raising capital and negotiating with financiers? How do VC funds operate and make decisions? How are VCs involved in business decisions such as recruiting talent and replacing CEOs? What are the important provisions of financial contracts between VCs and founders? How to value early-stage companies? The course is mostly case-based and as a part of the course we will also simulate angel group and VC partners meetings. The course is for those who want to become entrepreneurs and thus likely consumers of angel and VC financing and those who want to pursue a career in the financial services industry. No prior knowledge of the VC industry is needed.

FINANCE 555. Managing Wealth and Private Investing. 2 Units.

The Wealth Management and Private Investing course will address issues that relate to the management of personal assets as opposed to institutional investing. It will cover the historical origins and growth of private wealth, investment planning, risk management, inter-generational transfers of wealth, philanthropy and tax planning. Classes will focus on case studies and various readings. Two instructors will lead the class and several classes will be augmented by visits from professionals in the wealth management and private banking industries. Active class participation and a group project are required.

FINANCE 562. Financial Trading Strategies. 2 Units.

The purpose of this course is to familiarize students with the different types of trading strategies employed by various money management institutions. These financial trading strategies are used to manage the risk and return profiles of specific portfolios. Throughout the sessions, students will be challenged to understand and explore the application and implementation of these different strategies. This course specifically focuses on the execution, mechanics, and measurement of financial trading strategies. It does not, for example, teach students "how to make money playing the market." The decision making and analytical process of investing (finding alpha strategies) is a distinct process that is somewhat removed from implementation and measurement (how to execute and evaluate your alpha strategies). The focus of the course concepts will include, but not be limited to: Market Microstructure and Market Liquidity- VWAP, sourcing liquidity, and algorithmic strategies Portfolio Hedging and Risk Management- portfolio insurance and delta hedging Hedge Fund Strategies- inter-listed arbitrage, risk-arbitrage, trading volatility Trading simulations employed on the Rotman Interactive Trader and Rotman Portfolio Manager (using real market data and computer generated data) will be used extensively in this course as a way to learn and test different strategies. All classes will be held in the new "Real-time Analytics and Investment Lab" (the GSB's own Hi-speed R.A.I.L), located on the third floor of the Bass Building (B312). Students are expected to attend all sessions. Students will be graded based on their in-class trading results and two assignments. Kevin Mak is the co-inventor of the Rotman Interactive Trader and Rotman Portfolio Manager applications. Previously, he has taught in various courses relating to financial securities, risk management, and trading at the University of Toronto's Rotman School of Management. Kevin also develops and delivers trading simulations and trading models for various financial institutions.

FINANCE 587. Private Equity - An Overview of the Industry. 2 Units.

This 2-unit elective at the GSB is an analytical review and overview of private equity partnerships. The course looks at all aspects of private equity investing and may be of interest to five groups of students: (i) students who aspire to be employed in private equity as a career; (ii) students who plan to be employed by operating companies that are owned by private equity firms; (iii) students who may invest in private equity partnerships as a limited partner; (iv) students who find private equity to be an interesting part of the financial community in general (v) students who expect to participate in corporate business development or mergers and acquisitions. The course will meet for nine classes, most for a duration of 90 minutes. One class will be a mock investment review committee presentation as a final project.

FINANCE 620. Financial Markets I. 3 Units.

This course is an introductory PhD level course in financial economics. We begin with individual choice under uncertainty, then move on to equilibrium models, the stochastic discount factor methodology, and no-arbitrage pricing. We will also address some empirical puzzles relating to asset markets, and explore the models that have been developed to try to explain them.

FINANCE 621. Financial Markets II. 4 Units.

This course continues F620 and covers a number of main concepts in market microstructure. Among the topics that are covered are (i) Rational Expectations models and their foundations (ii) strategic trading models (iii) models of market and funding liquidity. In addition to the discussion of theoretic models time will be allotted to empirical applications.

FINANCE 622. Dynamic Asset Pricing Theory. 4 Units.

This course is an introduction to multiperiod models in finance, mainly pertaining to optimal portfolio choice and asset pricing. The course begins with discrete-time models for portfolio choice and security prices, and then moves to a continuous-time setting. The topics then covered include advanced derivative pricing models, models of the term structure of interest rates, the valuation of corporate securities, portfolio choice in continuous-time settings, and general-equilibrium and over-the-counter asset pricing models. Students should have had some previous exposure to general equilibrium theory and some basic courses in investments. Strong backgrounds in calculus, linear algebra, and probability theory are recommended. Problem assignments are frequent and, for most students, demanding. Prerequisite: F620 or permission of instructor.

FINANCE 624. Corporate Finance Theory. 4 Units.

This course considers a wide range of topics in theoretical corporate finance (broadly interpreted). Topics include capital structure decisions, agency conflicts in the firm, dividend policy, security design, optimal financial contracting, the theory of the firm, the market for corporate control, and banking and financial intermediation, among others. The primary focus is on how asymmetric information, agency conflicts, strategic interactions, and incomplete contracting affect corporate financial decision-making. The course aims both to familiarize students with influential papers and current research, and to promote new research ideas in the area.

FINANCE 625. Empirical Asset Pricing. 4 Units.

This course is an introduction to empirical research in asset pricing. The focus of the course is on the interplay between financial economic theory, econometric method, and that analysis of financial market data. Topics include tests of asset pricing models, return predictability in time-series and cross-section, empirical studies of asset market imperfections, and studies of individual and professional investor behavior. Class discussions will draw on textbooks/monographs and original articles and working papers.

FINANCE 626. Advanced Corporate Finance. 3 Units.

This is a course on contemporary theoretical and empirical issues in corporate finance. Building upon the first-year courses in corporate finance theory and empirical methods in finance, we will examine issues in asset pricing applications to corporate finance, dynamic capital structure (dynamic financing decisions), financial distress, financing and investment interactions, and behavioral corporate finance. Both conceptual economic frameworks and econometric methods will be developed as needed. A requirement for this course is that students complete two written projects, one theoretical and one empirical, and at least one of these projects will be presented to the class.

FINANCE 628. Finance Pre-Seminar Reading Course. 1 Unit.

Finance Pre-Seminar Reading.

FINANCE 630. Empirical Corporate Finance. 3 Units.

This course provides an introduction to empirical research in corporate finance, with an emphasis on the application of cross-sectional and panel data econometric techniques for causal inference. Topics include investment policy, entrepreneurship and innovation, financing decisions, firm ownership, corporate governance, managerial incentives, financial contracting, and the structure and internal organization of firms. The course assumes knowledge of econometrics at the level of MGTECON 603.

FINANCE 632. Empirical Dynamic Asset Pricing. 4 Units.

This course explores the interplay between dynamic asset pricing theory, statistical assumptions about sources of risk, and the choice of econometric methods for analysis of asset return data. Therefore, the lectures will be a blend of theory, econometric method, and critical review of empirical studies. Both arbitrage-free and equilibrium preference-based pricing models will be discussed, with particular emphasis given to recent developments and outstanding puzzles in the literature. The prerequisites for F632 are MGTECON 603 - 604, Finance 620, Finance 622, and Finance 625. In particular, I will assume familiarity with dynamic asset pricing theory, at the level of F622; and large-sample theory for least-squares, generalized method-of-moments, and maximum likelihood estimation methods. We will review these methods in the context of specific applications, but this material will not be developed in depth.

FINANCE 633. Advanced Empirical Corporate Finance. 4 Units.

This class is devoted to recent developments in the empirical corporate finance literature. Topics include: financial contracting, liquidation and renegotiation, taxation and capital structure, the role of labor markets, leveraged buyouts, executive compensation, the causes and consequences of the financial crisis, and implications of finance for the public sector. The class is very interactive. Many of the sessions will consist of student presentations about the papers from the reading list. We will also further explore empirical methods relevant for applied research in corporate finance, with a focus on identification and panel data issues.

FINANCE 691. PhD Directed Reading. 1-15 Unit.

This course is offered for students requiring specialized training in an area not covered by existing courses. To register, a student must obtain permission from the faculty member who is willing to supervise the reading.

Same as: ACCT 691, GSBGEN 691, HRMGT 691, MGTECON 691, MKTG 691, OB 691, OIT 691, POLECON 691, STRAMGT 691.

FINANCE 692. PhD Dissertation Research. 1-15 Unit.

This course is elected as soon as a student is ready to begin research for the dissertation, usually shortly after admission to candidacy. To register, a student must obtain permission from the faculty member who is willing to supervise the research.

Same as: ACCT 692, GSBGEN 692, HRMGT 692, MGTECON 692, MKTG 692, OB 692, OIT 692, POLECON 692, STRAMGT 692.

FINANCE 802. TGR Dissertation. 0 Units.

Same as: ACCT 802, GSBGEN 802, HRMGT 802, MGTECON 802, MKTG 802, OB 802, OIT 802, POLECON 802, STRAMGT 802.

French General Courses

French Language Courses

FRENLANG 1. First-Year French, First Quarter. 5 Units.

Proficiency-based. Development of discourse appropriate in French and Francophone contexts.

FRENLANG 1A. Accelerated First-Year French, Part 1. 5 Units.

Completes first-year language sequence in two rather than three quarters. Recommended for students with previous knowledge of French who place into FRENLANG 1A on the placement test or who are familiar with another Romance language. FRENLANG 2A fulfills the University foreign language requirement. Prerequisite: Placement Test.

FRENLANG 1G. Accelerated First-Year Business French, Part 1. 4 Units.

For GSB students only. Limited enrollment.

FRENLANG 2. First-Year French, Second Quarter. 5 Units.

Continuation of FRENLANG 1. Proficiency-based. Development of discourse appropriate in French and Francophone contexts. Prerequisite: Placement Test, FRENLANG 1 or equivalent.

FRENLANG 2A. Accelerated First-Year French, Part 2. 5 Units.

Continuation of FRENLANG 1A. Completes first-year language sequence in two rather than three quarters. Recommended for students with previous knowledge of French who place into FRENLANG 1A on the placement test or who are familiar with another Romance language. Fulfills the University foreign language requirement. Prerequisite: FRENLANG 1A, Placement Test.

FRENLANG 2G. Accelerated First-Year Business French, Part 2. 4 Units.

For GSB students only. Limited enrollment.

FRENLANG 3. First-Year French, Third Quarter. 5 Units.

Continuation of FRENLANG 2. Proficiency-based. Development of discourse appropriate in French and Francophone contexts. Prerequisite: Placement Test, FRENLANG 2 or equivalent. Fulfills the language requirement.

FRENLANG 3G. Accelerated First-Year Business French, Part 3. 4 Units.

For GSB students only. Limited enrollment.

FRENLANG 5A. Intensive First-Year French, Part A. 5 Units.

Same as FRENLANG 1. Accelerated. Written exercises, compositions, conversational practice, and daily work. Only Stanford graduate students restricted to 9 units may register for 205A,B,C.

FRENLANG 5B. Intensive First-Year French, Part B. 5 Units.

Same as FRENLANG 2. Continuation of 5A. Written exercises, compositions, conversational practice, and daily work. Only Stanford graduate students restricted to 9 units may register for 205A,B,C. Prerequisite 1 or 5A.

FRENLANG 5C. Intensive First-Year French, Part C. 5 Units.

Same as FRENLANG 3. Continuation of 5B. Written exercises, compositions, conversational practice, and daily work. Only Stanford graduate students restricted to 9 units may register for 205A,B,C. Fulfills the University language requirement. Prerequisite 2 or 5B.

FRENLANG 10. Beginning French Oral Communication. 2 Units.

For students who have completed FRENLANG 2 or equivalent. Emphasis is on speaking skills, vocabulary, and pronunciation. May be repeated once for credit.

FRENLANG 15. Intermediate French Oral Communication. 2 Units.

For students who have completed the first-year language requirement. May be repeated once for credit.

FRENLANG 15S. Intermediate Conversation: French in Everyday Life. 3 Units.

Same content as 15. May be repeated once for credit. Prerequisite: one year of college French or equivalent.

FRENLANG 20A. France and Francophonie. 2 Units.

Second-year French conversation based on themes from the regions of France and the Francophone world. Intermediate-level speaking skills and advanced-level functions. Topics include travel, food, and crosscultural comparisons. Students returning from study abroad programs are encouraged to enroll. May be repeated once for credit. Prerequisite: FRENLANG 21C or equivalent.

FRENLANG 20B. French Cinema. 2 Units.

Second-year French conversation based on films. Intermediate-level speaking skills and advanced-level functions. Themes include: French filmmakers, stars, and trends. Required film viewing in and outside class in French. May be repeated once for credit. Prerequisite: FRENLANG 21C or equivalent.

FRENLANG 20C. Contemporary French Language. 2 Units.

Second-year French conversation. Intermediate-level speaking skills and advanced-level functions for formal and informal situations. Useful for students planning to travel or study abroad. May be repeated once for credit. Prerequisite: FRENLANG 21C or equivalent.

FRENLANG 21C. Second-Year French: Cultural Emphasis, First Quarter. 4-5 Units.

Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socio culturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: Placement Test, one year of college French.

FRENLANG 22C. Second-Year French: Cultural Emphasis, Second Quarter. 4-5 Units.

Continuation of FRENLANG 21C. Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socio culturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: Placement Test, FRENLANG 21C.

FRENLANG 23C. Second-Year French: Cultural Emphasis, Third Quarter. 4-5 Units.

Continuation of FRENLANG 22C. Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socio culturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: placement Test, FRENLANG 22C.

FRENLANG 24C. Second-Year French: Literary Texts. 3-4 Units.

Proficiency oriented. Discussion, writing, reading, and listening comprehension based on literary texts. Prerequisite: 23.

FRENLANG 24R. Second-Year French: International Relations, Political Science, and Economics Emphasis. 3-4 Units.

Proficiency-based. Discussion, writing, reading, and listening comprehension based on political, economic, and social topics. Prerequisite: 23.

FRENLANG 60A. Beginning French Conversation. 1 Unit. (AU).**FRENLANG 60B. Intermediate French Conversation. 1 Unit. (AU) (Staff).****FRENLANG 60C. Advanced French Conversation. 1 Unit.****FRENLANG 60D. French Viticulture. 1 Unit.**

See <http://www.stanford.edu/class/frenlang60d/>. Prerequisite: 21 or older. (AU).

FRENLANG 60E. French Cooking. 1 Unit. (AU).**FRENLANG 60F. French Cinema. 1 Unit.**
May be repeated for credit. (AU).**FRENLANG 60N. French cheese. 1 Unit.****FRENLANG 60P. Advanced Viticulture. 1 Unit.**
Prerequisite: Completion of 60D. (AU).**FRENLANG 60T. Teaching French Conversation. 1 Unit. (AU).****FRENLANG 120. Advanced French Oral Communication. 3 Units.**

Speaking skills and functions including narration, description, supporting opinions, and hypothesizing about current events and issues in France. May be repeated once for credit. Prerequisites: FRENLANG 23C or equivalent.

FRENLANG 121. Introduction to French Texts. 3-4 Units.

Readings of major literary figures and themes from medieval times to the present. Prerequisite: 23. Recommended: 124.

FRENLANG 122. Introduction to French Culture and Civilization. 3-4 Units.

Discussion of French art, geography, history, political change, and social institutions. Prerequisite: 23 or equivalent.

FRENLANG 123. French Creative Writing. 3-4 Units.

Advanced. Model texts introduce students to genres and styles; review of grammar and vocabulary. Discussion of original writing by students. Prerequisite: 23 or equivalent.

FRENLANG 124. Mastering Advanced French Grammar: Grammar through Contemporary Literature and Culture. 4-5 Units.

Required for students majoring or minoring in French; recommended for students planning to take literature courses. Review of difficulties in French. Grammatical and logical analysis. Prerequisite: FRENLANG 23C or equivalent.

FRENLANG 125. French Phonetics. 3-4 Units.

For majors and other students who plan to enroll in advanced courses. Study and practice of the French language sound system. Language lab. Prerequisite: 23 or equivalent.

FRENLANG 199. Language Specials. 1-5 Unit.

Prerequisite: consent of instructor.

FRENLANG 205A. Intensive First-Year French for Stanford Grads, Part A. 3-5 Units.

Equivalent to FRENLANG 5A. For Stanford graduate students only. Accelerated. Written exercises, compositions, conversational practice, and daily work. Stanford graduate students restricted to 9 units may take 205A,B,C for a total of 9 units or 2 of the courses for a total of 9 units.

FRENLANG 205B. Intensive First-Year French for Stanford Grads, Part B. 3-5 Units.

Equivalent to FRENLANG 5B. For Stanford graduate students only. Continuation of 205A. Accelerated. Written exercises, compositions, conversational practice, and daily work . Prerequisite 205B or equivalent. Stanford graduate students restricted to 9 units may take 205A,B,C for a total of 9 units or 2 of the courses for a total of 9 units. Prerequisite 205A or equivalent.

FRENLANG 205C. Intensive First-Year French for Stanford Grads - Part C. 3-5 Units.

Equivalent to FRENLANG 5B. For Stanford graduate students only. Continuation of 205B. Accelerated. Written exercises, compositions, conversational practice, and daily work. Stanford graduate students restricted to 9 units may take 205A,B,C for a total of 9 units or 2 of the courses for a total of 9 units. Prerequisite 205B or equivalent.

FRENLANG 250. Reading French. 4 Units.

For seniors or graduate students seeking to meet the University reading requirement for advanced degrees. Reading strategies for comprehension of secondary literature for academic research. Fulfills the University foreign language requirement for advanced degrees if student earns a grade of 'B.' Prerequisite: one year or reading proficiency in another Romance language.

FRENLANG 250S. Reading French. 2-4 Units.

For seniors or graduate students seeking to meet the University reading requirement for advanced degrees. Reading strategies for comprehension of secondary literature for academic research. Fulfills the University foreign language requirement for advanced degrees if student earns a grade of 'B.' Prerequisite: one year or reading proficiency in another Romance language.

FRENLANG 394. Graduate Studies in French Conversation. 1-3 Unit.

Prerequisite: consent of the instructor.

FRENLANG 395. Graduate Studies in French. 2-5 Units.

Prerequisite: consent of instructor.

French Literature Courses

French Literature Courses

FRENCH 60S. Advanced Conversation Salon. 1 Unit.

This course provides students with the opportunity to practice speaking French at the advanced level. Recreating the atmosphere of a French salon, participants will develop greater oral proficiency through discussions of literature, film, politics, and contemporary culture. Please note that all Maison Française courses take place at the Maison Française and begin during Week 2 of the quarter. Prerequisite: FRENLANG 23C or equivalent.

FRENCH 75N. Narrative Medicine and Near-Death Experiences. 3 Units.

Even if many of us don't fully believe in an afterlife, we remain fascinated by visions of it. This course focuses on Near-Death Experiences and the stories around them, investigating them from the many perspectives pertinent to the growing field of narrative medicine: medical, neurological, cognitive, psychological, sociological, literary, and filmic. The goal is not to understand whether the stories are veridical but what they do for us, as individuals, and as a culture, and in particular how they seek to reshape the patient-doctor relationship. Materials will span the 20th century and come into the present. Taught in English.

Same as: ITALIAN 75N.

FRENCH 112. Oscar Wilde and the French Decadents. 3-5 Units.

Close reading of Oscar Wilde's work together with major texts and authors of 19th-century French Decadence, including Symbolism, l'art pour l'art, and early Modernism. Points of contact between Wilde and avant-garde Paris salons; provocative, creative intersections between (homo)erotic and aesthetic styles, transgression; literary and cultural developments from Baudelaire to Mallarmé, Huysmans, Flaubert, Rachilde, Lorrain, and Proust compared with Wilde's *Salomé*, *Picture of Dorian Gray*, and critical writings; relevant historical and philosophical contexts. All readings in English; all student levels welcome.

Same as: COMPLIT 112, COMPLIT 312, FRENCH 312.

FRENCH 118. Literature and the Brain. 5 Units.

Recent developments in and neuroscience and experimental psychology have transformed the way we think about the operations of the brain. What can we learn from this about the nature and function of literary texts? Can innovative ways of speaking affect ways of thinking? Do creative metaphors draw on embodied cognition? Can fictions strengthen our "theory of mind" capabilities? What role does mental imagery play in the appreciation of descriptions? Does (weak) modularity help explain the mechanism and purpose of self-reflexivity? Can the distinctions among types of memory shed light on what narrative works have to offer? Same as: ENGLISH 118, FRENCH 318, PSYCH 118F.

FRENCH 120. Coffee and Cigarettes: The Making of French Intellectual Culture. 4-5 Units.

Examines a quintessential French figure "l'intellectuel" from a long-term historical perspective. We will observe how this figure was shaped over time by such other cultural types as the writer, the artist, the historian, the philosopher, and the moralist. Proceeding in counter-chronological order, from the late 20th to the 16th century, we will read a collection of classic French works. As this course is a gateway for French studies, special emphasis will be placed on oral proficiency. Taught in French; readings in French.

FRENCH 122. Nation in Motion: Film, Race and Immigration in Contemporary French Cinema. 3-5 Units.

An examination of the current debates in France regarding national identity, secularism, and the integration of immigrants, notably from the former colonies. Confronts films' and other media's visual and discursive rhetorical strategies used to represent ethnic or religious minorities, discrimination, citizens' resistance to government policies, inter-racial marriages, or women's rights within immigrant communities. By embodying such themes in stories of love, hardships, or solidarity, the motion pictures make the movements and emotions inherent to immigration tangible: to what effect? Taught in French. Films in French with English subtitles. Additional paper for students enrolled in 235.

FRENCH 124. The View from Paris: Key Moments in French Culture. 4 Units.

An intellectually intense, document-based approach to the identity of French culture, made palpable through five moments in the history of Paris (which, more perhaps than any other capital in the western world, has been the center and focus of that nation's productivity. Readings and subsequent discussions will focus on the following contexts in Paris's past: 12th/13th century: the University of Paris as a center of Christian spirituality, intellect, and passion; 17th century: the performance of tragedy on the stages of the city; comedies at the Court of Versailles; 1794: the moment of Terror in the French Revolution and a turning point towards a new form of political life; 1889: Eiffel Tower and World Expo, Paris as the first City of Modernity; 1958: Général de Gaulle assumes power: de-colonization, Existentialism, and France's new identity within Europe. Offered as a part of the Gateways to the World program. Taught in English.

FRENCH 125. Religion, The Self, and Society in 20th-Century French Novels and Film. 3-5 Units.

Survey course on religion, the self, and society in 20th-century French novels and film. Readings may include: Gide, Camus, and Bernanos for the novels, and films by Robert Bresson and others. Taught in French.

FRENCH 130. Introduction to Medieval and Renaissance French Literature. 4 Units.

Introduction to the Middle Ages and the Renaissance. The birth of a national literature and its evolution. Literature as addressing cultural, philosophical, and artistic issues which question assumptions on love, ethics, art, and the nature of the self. Readings: epics (*La Chanson de Roland*), medieval romances (*Tristan, Chrétien de Troyes' Yvain*), post-Petrarchan poetics (*Du Bellay, Ronsard, Labé*), and prose humanists (*Rabelais, Montaigne*). Taught in French. Prerequisite: FRENLANG 124 or consent of instructor.

FRENCH 131. Absolutism, Enlightenment, and Revolution in 17th- and 18th-Century France. 4 Units.

The literature, culture, and politics of France from Louis XIV to Olympe de Gouges. How this period produced the political and philosophical foundations of modernity. Readings include Corneille, Molière, Racine, Lafayette, Voltaire, Diderot, Rousseau, Beaumarchais, and Gouges. Taught in French. Prerequisite: FRENLANG 124 or consent of instructor.

FRENCH 132. Literature, Revolutions, and Changes in 19th- and 20th-Century France. 4 Units.

This course will explore several of the most important texts of 19th- and 20th-century French literature. The aim of the course will be understanding stylistic and thematic experimentation in its historical/cultural context, with a focus on the theme of transgression: moral, political, and social. We will read works in all major literary genres (poetry, prose, and drama) and discuss prominent movements such as Realism, Romanticism, Symbolism, Decadentism, and Existentialism through the works that best define them. Readings include Constant, Balzac, Baudelaire, Mallarmé, Rimbaud, Flaubert, Maupassant, Jarry, Gide, Apollinaire, Breton, Yourcenar, Sartre. All readings, discussion, and assignments are in French.

FRENCH 133. Literature and Society in Africa and the Caribbean. 4 Units.

This course aims to equip students with an understanding of the cultural, political and literary aspects at play in the literatures of Francophone Africa and the Caribbean. Our primary readings will be Francophone novels and poetry, though we will also read some theoretical texts, as well as excerpts of Francophone theater. The assigned readings will expose students to literature from diverse French-speaking regions of the African/Caribbean world. This course will also serve as a "literary toolbox," with the intention of facilitating an understanding of literary forms, terms and practices. Students can expect to work on their production of written and spoken French (in addition to reading comprehension) both in and outside of class. Required readings include: Aimé Césaire, "Cahier d'un retour au pays natal," Albert Memmi, "La Statue de Sel," Abdelkebir Khatibi, "Amour bilingue," Abdelwahab Meddeb, "Talismano." Taught in French. Prerequisite: FRENLANG 124 or consent of instructor. Same as: AFRICAAM 133, JEWISHST 143.

FRENCH 140. Paris: Capital of the Modern World. 4-5 Units.

This course explores how Paris, between the eighteenth and twentieth centuries, became the political, cultural, and artistic capital of the modern world. It considers how the city has both shaped and been shaped by the tumultuous events of modern history- class conflict, industrialization, imperialism, war, and occupation. It will also explore why Paris became the major world destination for intellectuals, artists and writers. Sources will include films, paintings, architecture, novels, travel journals, and memoirs. Same as: FRENCH 340, HISTORY 230C.

FRENCH 145. French Theatromania: From Great Classics to Private Theater in 17th & 18th Century France. 3-5 Units.

For French majors and minors. Explore the French passion for theater in the 17th and 18th centuries, from the great classics to private theater. A selection of plays from the official and the private repertory will be used to illustrate the evolution of French theater as a genre and to discuss its role in the sociopolitical shifts of the period. All readings, discussions, and assignments will be in French.

FRENCH 145B. Ideas of Africa in Atlantic Writing. 3-5 Units.

This course examines the ways Anglophone and Francophone writers from the African, Caribbean and North Atlantic have represented Africa as a geographic, aesthetic and political space where one may think through problems of history, community and identity formation, art, language and the author's function. The course begins with Equiano and may include DuBois, Césaire, Senghor, Maryse Condé, Bessie Head, Phillip Gourevitch, Antjie Krog, and Barack Obama. Graduate students read in original French. Same as: COMPLIT 145B, COMPLIT 345B, FRENCH 345B.

FRENCH 150. Season and Off-Season of North-African Cinema and Literature. 3-5 Units.

This course explores the emergence of Francophone cinema and literature from North Africa (Algeria, Tunisia, Morocco) in the post-independence era: aesthetics, language metissage and hybridization, ethnic interactions, gender relations, collective imagination and collective memory, nationalism, popular culture, religion, urbanism, post-colonialism, migration, and the Arab Spring will be covered. Special attention will be given to Moroccan cinema, and to the notions of francophone/maghrebi/"beur"/diasporic cinema and literature. Readings from Franz Fanon, Albert Memmi, Kateb Yacine, Albert Camus, Reda Bensmaïa, Assia Djebar, Colette Fellous, Abdelkebir Khatibi, Michel de Certeau, Benjamin Stora, Lucette Valensi, Abdelwahab Meddeb. Movies include Viva Laldjérie, Rome plutot que vous, Les Sabots en or, Les Silence des Palais, Halfaouine, Satin Rouge, Le Chant des Mariées, and Mort à Vendre. Taught in French. Films in French and Arabic with English subtitles. Same as: FRENCH 350.

FRENCH 154. Film & Philosophy. 4 Units.

Issues of freedom, morality, faith, knowledge, personal identity, and the value of truth explored through film; philosophical investigation of the filmic medium itself. Screenings to include Twelve Monkeys (Gilliam), Ordet (Dreyer), The Dark Knight (Nolan), Vicky Cristina Barcelona (Allen), and Eternal Sunshine of the Spotless Mind (Kaufman). Taught in English.

Same as: COMPLIT 154A, ITALIAN 154, PHIL 193C, PHIL 293C.

FRENCH 168. Imagining the Oceans. 5 Units.

How has Western culture constructed the world's oceans since the beginning of global ocean exploration? How have imaginative visions of the ocean been shaped by marine science, technology, exploration, commerce and leisure? Readings might include voyage accounts by Cook and Darwin, sailors' narratives by Equiano and Dana, poetry by Coleridge, Bishop and Walcott, novels by Melville, Verne, Conrad and Woolf. Visual culture might include paintings by Turner and Redon, and films by Jean Painlevé, Kathryn Bigelow, Jerry Bruckheimer and James Cameron. Critical texts will be drawn from interdisciplinary theorists of modernity and mobility, such as Schmitt, Wallerstein, Corbin, Latour, Deleuze + Guattari, and Cresswell.

Same as: COMPLIT 168, COMPLIT 368, FRENCH 368.

FRENCH 181. Philosophy and Literature. 5 Units.

Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. Taught in English.

Same as: CLASSGEN 81, COMPLIT 181, ENGLISH 81, GERMAN 181, ITALIAN 181, PHIL 81, SLAVIC 181.

FRENCH 190Q. Parisian Cultures of the 19th and Early 20th Centuries. 4 Units.

Preference to sophomores. Political, social, and cultural events in Paris from the Napoleonic era and the Romantic revolution to the 30s. The arts and letters of bourgeois, popular, and avant garde cultures. Illustrated with slides. Taught in English.

FRENCH 199. Individual Work. 1-12 Unit.

Restricted to French majors with consent of department. Normally limited to 4-unit credit toward the major. May be repeated for credit.

FRENCH 204. Revolutions in Prose: The 19th-Century French Novel. 3-5 Units.

The French Revolution was not just a haunting memory in nineteenth-century France: it was the decisive structure around which French politics, but also French culture and the arts more generally, were centered. As some historians have argued, the French Revolution might not even have really "ended" until 1880. In this course, we will examine both literary representations of the French Revolution, as well as the literary analyses of a society constantly dealing with the fears (or hopes) of a new Revolution. Primary readings by Stendhal, Balzac, Flaubert, Zola. Taught in French.

FRENCH 205. Songs of Love and War: Gender, Crusade, Politics. 3-5 Units.

Analysis of medieval love, satirical and Crusade lyrics of the troubadours. Study of deictic address, corporeal subjectivity, the female voice, love debates, and the body as a figure of political conflict. Course readings include medieval treatises on lyric and modern translations of the troubadour tradition. Works by Ovid, Bernart de Ventadorn, Bertran de Born, La Comtessa de Dia, Thibaut de Champagne, Raimon Vidal, Dante, and Pound. Taught in English. Course includes a lab component for creation of multi-media translation projects: trobar. stanford.edu. Same as: FEMGEN 205.

FRENCH 210. Representation and Theatre Culture in 20th Century France. 5 Units.

This course will examine some major French playwrights such as Alfred Jarry, Eugene Ionesco, Samuel Beckett, Jean Genet, Jean Tardieu, Albert Camus or Jean Anouilh in their global cultural environment. Discussion in English; French majors read in French. Same as: TAPS 353.

FRENCH 213. When the World Spoke French: Kings, Writers, and Philosophers, 1630-1789/Old Regime France. 4-5 Units.

Starting in the mid-17th century, France became the cultural trendsetter for most of Europe and parts of the world. How did French culture impose itself as culture tout court? We will examine the importance of politics, literature, and philosophy in this process. Readings will include Corneille, Descartes, Pascal, Racine, Moliere, Montesquieu, Voltaire, Rousseau, Diderot, and Beaumarchais. Taught in French; readings in French.

FRENCH 218. Skepticism and Atheism in Early-Modern French Thought. 4-5 Units.

Religious belief was a fundamental part of early-modern life, and the proposition that human beings could not prove God's existence had profound implications for all realms of human experience. This course will explore the complex relationship between philosophical skepticism and religious belief in early-modern Europe (particularly France) and investigate how these heterodox philosophies transformed the understanding of humanity's interaction with the surrounding world. We will begin by looking at the origins of religious unbelief and the revival of Pyrrhonian skepticism in the 16th century. By placing the atheists and the skeptics in dialogue with their deist and Christian opponents, we will see how these ideas evolved over the course of the 17th and 18th centuries and consider the influence of these subversive theories on the social and political fabric of Europe. Taught in English. Readings in French (English translations available).

FRENCH 219. The Renaissance Body in French Literature and Medicine. 3-5 Units.

If the Renaissance is famous for discovering unknown continents and ancient texts the body too was a new territory of conquest. How did literature respond to the rise of an anatomical gaze in the arts and in medicine and how did it stage the aesthetic religious philosophical and moral issues related to such a promotion or deconstruction of the body? Does literature aim at representing the body or does it use it instead as a ubiquitous signifier for intellectual emotional and political ideas? The locus of desire, pleasure and disease, the body also functioned as a reminder of human mortality and was caught in the web of gender issues, religious controversies and new norms of behavior. Texts from prose fiction (Rabelais) poetry (Scève Ronsard Labé D'Aubigné) essays (Montaigne) and emblem literature. Extra documents include music scores tapestries paintings philosophical and anatomical plates from medical treatises. Taught in English. Visit the Web site: renaissancebodyproject.stanford.edu Same as: FRENCH 319.

FRENCH 221. Conceiving Other Worlds: Travel Narrative and Science Fiction in Early-Modern France. 4-5 Units.

This course will concentrate on the important role of science fiction and travel literature in early-modern France. Although these narratives were intended to describe distant worlds and different ways of living, they frequently revealed more about the aspirations, assumptions, hopes, and concerns of the cultures in which they originated than about their actual subject matter. Authors frequently sought to determine the identity and uniqueness of their own cultures by contrasting them against the 'otherness' of their imagined subjects. Similarly, by describing either utopian or dystopian civilizations, writers attempted to highlight the problems that plagued their own societies. Among other texts, we will read selections from Montaigne's 'Essais,' Cyrano de Bergerac's 'L'Autre monde ou les états et empires de la Lune,' Huygens's 'Nouveau traité de la pluralité des mondes,' Fontenelle's 'Entretiens sur la pluralité des mondes,' Voltaire's 'Micromegas,' Bougainville's 'Voyage autour du monde,' and Diderot's 'Supplement au voyage de Bougainville.' Taught in English. Readings in French (English translations available).

FRENCH 225. Introduction to Medieval French Literature. 5 Units.

Introduction to the premodern period of French literature through the interpretation of major works (La Chanson de Roland; Béroul and Thomas, Tristan; lais of Marie de France; romans of Chrétien de Troyes; Le Roman de la Rose). Special attention given to the socio-cultural contexts in which these works were composed and first received, and to the emergence of the concept of writing as a self-defining act. Study of Old French language and the material aspects of a medieval work. Taught in English.

FRENCH 228. Science, Technology, and Society in the Face of the Looming Disaster. 3-5 Units.

The major topic will be the indeterminacy regarding the survival of humankind. With the advent of the atomic bomb humankind became potentially the maker of its own demise. Will combine a number of significant case studies (environmental disasters, industrial catastrophes, threat of nuclear devastation, technological risks) with the lessons drawn from a form of literature that is at the intersection of STS and the Humanities, in particular the early warnings made by such thinkers as Ivan Illich, Martin Heidegger, Hans Jonas, Günther Anders, and Hannah Arendt. Same as: ITALIAN 228, POLISCI 233F.

FRENCH 229. Literature of Global Health. 3-5 Units.

This course examines the ways Anglophone and Francophone writers of literature and medicine have used the narrative form to explore the ethics of care and research in what has been called the developing world. We will begin with a call made by the editor-in-chief of *The Lancet* for a literature of global health -- modeled on the social reform novels of the nineteenth century, during the development of modern public health. And we will spend the quarter understanding how colonial and world literatures may answer or complicate this call. Readings will be selected from Joseph Conrad, Albert Schweitzer, Aime Cesaire, Jean-Paul Sartre, Albert Camus, Frantz Fanon, Tsitsi Dangarembga, Bessie Head, Amitav Ghosh, John Le Carre, Anne Fadiman, and Paul Farmer. Same as: COMPLIT 229.

FRENCH 234. Courtly Love: Deceit and Desire in the Middle Ages. 3-5 Units.

A comparative seminar on medieval love books and their reception. We will examine and question the notion of "amour courtois," which arose in the lyrics and romances of medieval France and was codified in Romantic-era criticism. Primary readings will be enriched by thinking about this notion through the lens of modern theories of desire, such as those of Girard, Lacan, and Zizek. Conducted in English with readings in translation. Same as: COMPLIT 221A, ITALIAN 234.

FRENCH 237. Cultural Contact in Medieval French Literature. 3-5 Units.

Introduction to medieval French literature through the analysis of representations of cross-cultural contact in historical perspective. Class conducted in French. Readings in modern French translation (with occasional reference to Old French) and in English. Readings include *La Chanson de Roland*; *Le Charroi de Nîmes*; *La Prise d'Orange*; *Le Conte de Floire et Blancheflor*; and *Chrétien de Troyes, Cligés*. No previous knowledge of Old French or medieval literature is expected; willingness to engage with historical texts and questions required.

FRENCH 242. Seasons in North African Cinema and Literature. 3-5 Units.

This course explores the emergence of Francophone cinema and literature from North Africa (Algeria, Tunisia, Morocco) in the post-independence era: aesthetics, language metissage and hybridization, ethnic interactions, gender relations, collective imagination and collective memory, nationalism, popular culture, religion, urbanism, post-colonialism, migration, and the Arab Spring will be covered. Special attention will be given to judeo-maghrebi history, and to the notions of francophone/maghrebi/"beur"/diasporic cinema and literature. Readings from Franz Fanon, Albert Memmi, Kateb Yacine, Albert Camus, Reda Bensmaïa, Assia Djebar, Colette Fellous, Abdelkebir Khatibi, Michel de Certeau, Leïla Sebbar, Benjamin Stora, Lucette Valensi, Abdelwahab Meddeb. Movies include *Viva Laldjerie*, *Tenja*, *Le Chant des Mariées*, *Française*, *Bled Number One*, *Omar Gatlato*, *Casanegra*, *Le Silence des Palais*, *Les Sabots en Or*, *Harragas*, *La Saison des Hommes*, *L'Homme de Cendres*, *Mascarades*. Taught in French. Films in French and Arabic with English subtitles.

FRENCH 248. Literature, History and Memory. 3-5 Units.

Analysis of literary works as historical narratives. Focus on the relationship history, fiction, and memory as reflected in Francophone literary texts that envision new ways of reconstructing or representing ancient or immediate past. Among questions to be raised: individual memory and collective history, master narratives and alternatives histories, the role of reconstructing history in the shaping or consolidating national or gender identities. Readings include fiction by Glissant, Kane, Condé, Schwarz-Bart, Djebar, Perec, as well as theoretical texts by Ricoeur, de Certeau, Nora, Halbwachs, White, Echevarría. Taught in French. Same as: COMPLIT 250.

FRENCH 251. Writing, Memory, and Self-Fashioning. 3-5 Units.

Writing is not a mere recording of the past, but a selection and reinvention of our experiences. We will look at how writing is central to the philosophical project of fashioning the self, even as it reveals that much of what we call the self is a fictional construct. Materials include fiction and memoirs (Primo Levi, Michel Tournier, Melania Mazzucco, Jonathan Littell), and theoretical works in philosophy (Bergson, James, Freud, Jung, Derrida, Wyszogrod, Nehamas), psycholinguistics, and neuroscience. Taught in English. Same as: ITALIAN 251.

FRENCH 253. Honoré de Balzac. 3-5 Units.

Working through a selection of novels by the author widely considered as a founder of western (19th-century) "Literary Realism." Balzac's will be contextualized within his life and the French culture and literature of his time. We will also approach, from a philosophical point of view, the emergence and functions of "Literary Realism." Another focus will be Balzac's work as exemplary of certain traditions within Literary Criticism (particularly Marxist Literary Criticism). Taught in English. Same as: COMPLIT 253.

FRENCH 260. Italy, France, and Postcolonialism. 3-5 Units.

The starting point for our seminar is the question of how postcolonial thought enhances our possible understandings of Italy - as a nation, as a territorial unit coalescing cultural parts that remain disparate to this day, and as a population that has not come fully to terms with its fascist history, its crimes in World War II, or the atrocities it perpetrated as a colonizing state. The Italian case is unusual compared to others, in that the country's colonial past in north and east Africa is still being uncovered after a long period of public silence and government suppression; and what might be called the postcolonial Italian project has begun only recently, driven by a distinct minority of scholars, 'migrant' authors, and activists. French cultural politics and history are often taken as a point of reference from which to analyze Italian phenomena. In this case, we will make use of the French postcolonial tradition as a point of both comparison and differentiation. Among other things, we will focus on the different meanings of 'postcolonial' in a country that is strongly centralized (France) and another which is unremittingly fragmented (Italy). As just one example, we will scrutinize how Gramsci's work has been understood in Anglophone and Francophone criticism (cultural studies, Subaltern studies, and so on), as opposed to how it may be read in its original Italian context, where it concerned subalterns within the nation-state. Asking what is postcolonial, for whom, when, and where?, ultimately our goal is to discern the specific contours of Italy's postcolonialism by juxtaposing it with France's, and to simultaneously ask what light can be shed on French postcolonial particularities by placing it in this dialogue. Beginning with fundamental historical readings (Gramsci, Fanon, Memmi) and touching on some early Anglophone postcolonial critics (Said, Bhabha), the seminar will then be structured around key literary and theoretical readings from Italy and France. Ideally, readings will be in the original language, but as often as possible they will be selected such that they will be accessible in English translation as well. Taught in English. Same as: ITALIAN 260.

FRENCH 265. The Problem of Evil in Literature, Film, and Philosophy. 3-5 Units.

Conceptions of evil and its nature and source, distinctions between natural and moral evil, and what belongs to God versus to the human race have undergone transformations reflected in literature and film. Sources include Rousseau's response to the 1755 Lisbon earthquake; Hannah Arendt's interpretation of Auschwitz; Günther Anders' reading of Hiroshima; and current reflections on looming climatic and nuclear disasters. Readings from Rousseau, Kant, Dostoevsky, Arendt, Anders, Jonas, Camus, Ricoeur, Houellebeck, Girard. Films by Lang, Bergman, Losey, Hitchcock. Same as: POLISCI 338E.

FRENCH 271. Thinking Modernity: Montaigne to Lafayette. 3-5 Units.

From the times of the religious wars to those of Louis XIV, a series of French thinkers played a major role in the speculations that helped establish the norms of what is now thought of as Western modernity. We will look at some of these, especially their moral and political philosophy in the contexts of a centralizing growth toward bureaucratic absolutist monarchy, of increasing colonization and imperialist urges, of growing intolerance (leading eventually to the Revocation of the Edict of Nantes more or less simultaneous in 1685 with the promulgation of the *Code noir*, seeking to control the treatment of slaves in the colonies). We shall also be interested in the complex development of the modern western individual, of new notions of truth, ethical conduct, the politics of authoritarian individualism, the aesthetics of taste, and the perplexities of gender politics. Closely examining a number of works, we will look at the interplay between these contexts and the epistemology, psychology, ethics and politics that gradually became normative. Authors from among: Montaigne, Gournay, Descartes, Pascal, Hobbes (*De cive*), Cyrano, Madame de Lafayette, but participants may wish to bring other authors to the table. Taught in French.

FRENCH 275. Twentieth-Century French Thought: Literature, Politics, and Intellectual History. 3-5 Units.

This course will introduce students to the major intellectual and historical movements of twentieth-century France. We will consider the impact of key events (including WWI, the rise of fascism, the Nazi occupation, and May '68) on literary and intellectual life. Special importance will be placed on existentialism, structuralism, leftism, and feminism. Students will read a variety of literary, philosophical, and political essays. Taught in French.

FRENCH 284. Nineteenth-Century French Realism: Classic Novels and Contemporary Interpretations. 3-5 Units.

This course will read three great novels of the French 19th century: Stendhal's *Le rouge et le noir*; Balzac's *Le Père Goriot*; Flaubert's *Madame Bovary*. These texts are the classics of Realism. But this course intends to complicate the genre designation. Realist novels are richer and deeper than any objective recording of external and internal events could capture. They are visionary, poetic, and politically explosive. Reading them today requires us to stretch beyond what many critics have asserted about them, and indeed beyond what the novels asserted about themselves. That will be a significant objective of our analysis. Taught in French.

FRENCH 293A. Topics in French Literature and Philosophy. 2 Units.
Five-week course. May be repeated for credit. Taught in French.**FRENCH 293B. Topics in French Literature and Philosophy. 2 Units.**
Five-week course. May be repeated for credit. Taught in French.**FRENCH 312. Oscar Wilde and the French Decadents. 3-5 Units.**

Close reading of Oscar Wilde's work together with major texts and authors of 19th-century French Decadence, including Symbolism, *l'art pour l'art*, and early Modernism. Points of contact between Wilde and avant-garde Paris salons; provocative, creative intersections between (homo)erotic and aesthetic styles, transgression; literary and cultural developments from Baudelaire to Mallarmé, Huysmans, Flaubert, Rachilde, Lorrain, and Proust compared with Wilde's *Salomé*, *Picture of Dorian Gray*, and critical writings; relevant historical and philosophical contexts. All readings in English; all student levels welcome.

Same as: COMPLIT 112, COMPLIT 312, FRENCH 112.

FRENCH 316. Understanding and Staging Molière Theatre. 3-5 Units.

Devoted to an in depth analysis of Molière's major plays, as well as a study of contemporary productions of his work. Taught in French.

Same as: TAPS 368S.

FRENCH 318. Literature and the Brain. 5 Units.

Recent developments in and neuroscience and experimental psychology have transformed the way we think about the operations of the brain. What can we learn from this about the nature and function of literary texts? Can innovative ways of speaking affect ways of thinking? Do creative metaphors draw on embodied cognition? Can fictions strengthen our "theory of mind" capabilities? What role does mental imagery play in the appreciation of descriptions? Does (weak) modularity help explain the mechanism and purpose of self-reflexivity? Can the distinctions among types of memory shed light on what narrative works have to offer?

Same as: ENGLISH 118, FRENCH 118, PSYCH 118F.

FRENCH 319. The Renaissance Body in French Literature and Medicine. 3-5 Units.

If the Renaissance is famous for discovering unknown continents and ancient texts the body too was a new territory of conquest. How did literature respond to the rise of an anatomical gaze in the arts and in medicine and how did it stage the aesthetic religious philosophical and moral issues related to such a promotion or deconstruction of the body? Does literature aim at representing the body or does it use it instead as a ubiquitous signifier for intellectual emotional and political ideas? The locus of desire, pleasure and disease, the body also functioned as a reminder of human mortality and was caught in the web of gender issues, religious controversies and new norms of behavior. Texts from prose fiction (Rabelais) poetry (Scève Ronsard Labé D'Aubigné) essays (Montaigne) and emblem literature. Extra documents include music scores tapestries paintings philosophical and anatomical plates from medical treatises. Taught in English. Visit the Web site: renaissancebodyproject.stanford.edu Same as: FRENCH 219.

FRENCH 320. The Posthumanistic Subject. 3-5 Units.

The course will examine the need to rethink the traditional western idea of the strong subject. Through close readings of works by Agamben, Braidotti, Derrida, Deleuze, Hall, Haraway, Latour, Wolfe, among others, this course will explore posthumanist theories of individual and collective subjectivity that challenge traditional ways of defining the human and the non-human subject/person and promote fundamental reconsideration of issues such as agency, autonomy, essence, freedom, dignity, otherness, substance, personhood, sociality, and life itself. The course would consider, how we can empower the subject and community in order to develop a desired model of participatory democracy. Prerequisite: graduate standing or consent of instructor.

FRENCH 327. Genres of the Novel. 5 Units.

Provides students with an overview of major genres in the history of the modern novel. Novels might include works by Cervantes, Defoe, Lafayette, Radcliffe, Goethe, Balzac, Woolf, and Marquez, coupled with theory by Lukacs, Bahktin, Jameson and Barthes.

Same as: COMPLIT 327.

FRENCH 328. Literature, Narrative, and the Self. 3-5 Units.

The role of narrative in the well-lived life. Are narratives necessary? Can they, and should they, be literary? When might non-narrative approaches, whether literary or otherwise, be more relevant? Is unity of self something given, something to be achieved, or something to be overcome? Readings from Aristotle, Montaigne, Schopenhauer, Nietzsche, Camus, Sartre, MacIntyre, G. Strawson, Velleman; Ricoeur, Brooks; Shakespeare, Stendhal, Musil, Levi, Beckett, Morrison; film. Taught in English.

Same as: COMPLIT 328, ITALIAN 328.

FRENCH 331. The Craft of Confession and Its Cultural Contexts. 5 Units.

Course examines medieval treatises and literature relating to the practice of confession as well as modern examples, with a focus on medieval concern with a sincere and authentic confession in theological, ethical, and aesthetic terms. Study includes expressions of subjectivity, institutional frameworks of confession, and the phenomenon as an instrument for political activity such as crusade. Texts: Augustine's *Confessions*, pastoral treatises, Aquinas, Arthurian romances concerning the grail legend, crusade lyric, and Foucault; films such as Dreyer and martyrdom videos. Taught in French.

FRENCH 340. Paris: Capital of the Modern World. 4-5 Units.

This course explores how Paris, between the eighteenth and twentieth centuries, became the political, cultural, and artistic capital of the modern world. It considers how the city has both shaped and been shaped by the tumultuous events of modern history- class conflict, industrialization, imperialism, war, and occupation. It will also explore why Paris became the major world destination for intellectuals, artists and writers. Sources will include films, paintings, architecture, novels, travel journals, and memoirs. Same as: FRENCH 140, HISTORY 230C.

FRENCH 345B. Ideas of Africa in Atlantic Writing. 3-5 Units.

This course examines the ways Anglophone and Francophone writers from the African, Caribbean and North Atlantic have represented Africa as a geographic, aesthetic and political space where one may think through problems of history, community and identity formation, art, language and the author's function. The course begins with Equiano and may include DuBois, Césaire, Senghor, Maryse Condé, Bessie Head, Phillip Gourevitch, Antjie Krog, and Barack Obama. Graduate students read in original French. Same as: COMPLIT 145B, COMPLIT 345B, FRENCH 145B.

FRENCH 350. Season and Off-Season of North-African Cinema and Literature. 3-5 Units.

This course explores the emergence of Francophone cinema and literature from North Africa (Algeria, Tunisia, Morocco) in the post-independence era: aesthetics, language metissage and hybridization, ethnic interactions, gender relations, collective imagination and collective memory, nationalism, popular culture, religion, urbanism, post-colonialism, migration, and the Arab Spring will be covered. Special attention will be given to Moroccan cinema, and to the notions of francophone/maghrebi/"beur"/diasporic cinema and literature. Readings from Franz Fanon, Albert Memmi, Kateb Yacine, Albert Camus, Reda Bensmaïa, Assia Djebar, Colette Fellous, Abdelkebir Khatibi, Michel de Certeau, Benjamin Stora, Lucette Valensi, Abdelwahab Meddeb. Movies include Viva Laldjérie, Rome plutot que vous, Les Sabots en or, Les Silence des Palais, Halfaouine, Satin Rouge, Le Chant des Mariées, and Mort à Vendre. Taught in French. Films in French and Arabic with English subtitles. Same as: FRENCH 150.

FRENCH 368. Imagining the Oceans. 5 Units.

How has Western culture constructed the world's oceans since the beginning of global ocean exploration? How have imaginative visions of the ocean been shaped by marine science, technology, exploration, commerce and leisure? Readings might include voyage accounts by Cook and Darwin, sailors' narratives by Equiano and Dana, poetry by Coleridge, Bishop and Walcott, novels by Melville, Verne, Conrad and Woolf. Visual culture might include paintings by Turner and Redon, and films by Jean Painlevé, Kathryn Bigelow, Jerry Bruckheimer and James Cameron. Critical texts will be drawn from interdisciplinary theorists of modernity and mobility, such as Schmitt, Wallerstein, Corbin, Latour, Deleuze + Guattari, and Cresswell.

Same as: COMPLIT 168, COMPLIT 368, FRENCH 168.

FRENCH 369. Introduction to Graduate Studies: Criticism as Profession. 5 Units.

A number of faculty will present published work and discuss their research and composition process. We will read critical, theoretical, and literary texts that address, in different ways, "What is a World?" Taught in English. Same as: COMPLIT 369, DLCL 369, GERMAN 369, ITALIAN 369.

FRENCH 395. Philosophical Reading Group. 1 Unit.

Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht is required. May be repeated for credit. Taught in English. Same as: COMPLIT 359A, ITALIAN 395.

FRENCH 398. Intensive Reading in French/Italian. 10 Units.

Enrollment is limited to French/Italian Ph.D. students. Course is designed for French/Italian Ph.D. students to prepare for department milestone exams.

Same as: ITALIAN 398.

FRENCH 399. Individual Work. 1-12 Unit.

For students in French working on special projects or engaged in predissertation research.

FRENCH 801. TGR Project. 0 Units.**FRENCH 802. TGR Dissertation. 0 Units.**

GSB General & Interdisciplinary Courses

GSBGEN 10SC. Lives of Consequence. 2 Units.

This course examines how exceptionally creative individuals from a variety of domains (including the arts, sciences, politics, technology, and society) found a sense of purpose in their lives and then successfully pursued that purpose. In the creative domain, for example, we examine the lives of filmmaker George Lucas, Apple CEO Steve Jobs, lifestyle designer Martha Stewart, and master chef Thomas Keller. In the political sphere, we examine the lives of Margaret Thatcher, Martin Luther King, and Robert F. Kennedy. We also explore the work of individuals engaged in philanthropic efforts around the globe, including Melinda Gates and Paul Farmer. We complement the study of these individuals, and others, with a variety of readings from the social science literature on happiness, meaning, and creativity. Students interested in psychology, philosophy, creativity, the arts and sciences, or business should find the course particularly useful and engaging. Students, working individually and in small groups, will have a chance to apply the course concepts to their own lives, using a series of reflective writing exercises. Students will complete an independent research project on a topic or person of interest to them. They will make a presentation to the class on the basis of their research. The course is designed to be highly discussion-oriented and interactive. Students may take this course for either a letter grade or on a pass/fail basis. Letter grades for the course will be based upon the quality of the independent library research and class presentation, along with the quality and consistency of class participation. Both components (research and class participation) are equally weighted.

GSBGEN 111Q. Seminar in Entrepreneurial Communication. 3 Units.

College campuses have been the incubators for thousands of new business ventures. What makes the difference between a successful entrepreneur and an initial failure out of the gate? It's often not the quality of the idea, but rather the ability of the entrepreneurs to successfully communicate their vision to potential investors, employees, and customers. This seminar will explore successful and failed entrepreneurial communication. Students will learn the basics of persuasive oral and written communication, and then apply these principles to their own ideas.

GSBGEN 112Q. Leading Out Loud: an Exploration of Leadership Communication through an LGBT Lens. 3 Units.

Students of all sexual orientations are invited to apply for this unique new seminar looking at the distinct challenge LGBT leaders have faced in communicating effectively. Through the years, many individuals have led the struggle for gay rights and inclusion through a variety of different communication strategies and tactics; some were successful while others were not. This seminar course will explore some of the key leaders in the LGBT community and how they chose to communicate. Together we will search through a variety of film clips, transcripts, news reports, and other historical elements to see how the message, media, and moments work together. A number of guest speakers will also share their perspective on what it means to "Lead Out Loud." Heterosexual identified students as well as LGBT students are encouraged to apply; in fact, we seek to have a true diversity of opinions in the room as we explore this topic. All students will benefit from this exploration of how to communicate about controversial, sensitive, and personal subjects with greater strength and purpose.

GSBGEN 199. Curricular Practical Training for PhD Students. 1 Unit.

GSB students are eligible to report on work experience that is relevant to their core studies under the direction of the Director of the PhD Program. Registration for this work must be approved by the Director of the PhD Program and is limited to students who present a project which in judgment of the Advisor may be undertaken to enhance the material learned in PhD courses. It is expected that this research be carried on by the student with a large degree of independence and the expected result is a written report, due at the end of the quarter in which the course is taken. Because this course runs through the summer, reports are due the 2nd week of October. Units earned for this course do not meet the requirements needed for graduation.

GSBGEN 202. Critical Analytical Thinking. 2 Units.

The Critical Analytical Thinking (CAT) course provides a setting for students to further develop and hone the skills needed to analyze complex issues and make forceful and well-grounded arguments. In 16-18 person sections, you will analyze, write about, and debate a set of topics that encompass the types of problems managers must confront. In doing this CAT will enhance your ability to identify critical questions when exploring challenging business issues. The emphasis will be on developing reasoned positions and making sound and compelling arguments that support those positions.

GSBGEN 203. Global Strategy. 1 Unit.

The economies of the world are ever more closely linked. Record levels of international trade and investment are achieved every year. Cross-border mergers and acquisitions are booming. The foreign exchange markets handle trillions of dollars of volume daily. Offshore provision of services has grown immensely. Host governments and non-governmental organizations operating internationally affect how companies do business far from their home bases and close to home. Nearly all businesses today are somehow connected to the world economy, and it is quite likely that the process of globalization will continue apace. To succeed as a leader in your career, you will need to be able to think systematically about the challenges and opportunities brought about by globalization. This course is designed to help you develop as a leader in this international environment. Our objectives are to help you: 1. To develop an analytic framework that you can use to understand how countries are different or similar in ways that matter to the globalization of business. 2. To understand how corporate strategies can deal with these differences and similarities, resulting in competitive advantage.

GSBGEN 208. Ethics in Management. 2 Units.

With leadership comes responsibility. This course explores the numerous ethical duties faced by managers and organizations. It combines analytical frameworks with the latest findings on human behavior to inform a wide range of ethical decisions and strategies. Readings include case studies, insights from experimental psychology and economics, and excerpts from or about major works of moral philosophy. Through online and in-class exercises, discussions, and personal reflection, you will reveal and assess your ethical intuitions, compare them with more explicit modes of ethical thought, and learn how to use ethics in business settings. A diverse set of ethical viewpoints will be considered with an emphasis on not only their implications for ethical behavior but also on the social and cognitive pitfalls that undermine the ability of business leaders to fulfill their ethical duties.

GSBGEN 239. MSx: Executive Communication Strategies. 2 Units.

Communication is crucial to the success of all leaders, but as you climb within an organization the ability to write and speak effectively is magnified. This course will explore how individuals can develop and execute effective communication strategies for a variety of business settings. This course introduces the essentials of communication strategy and persuasion at an executive level. We will study: audience analysis, communicator credibility, message construction and delivery. Deliverables will include written documents and oral presentations and you will present both individually and in a team. You will receive continuous feedback to improve your communication effectiveness. Through this highly interactive course, you will see why ideas, data and advocacy are combined for a professional, persuasive presentation. This practical course helps students at all levels of communication mastery develop confidence in their speaking and writing through weekly presentations and assignments, lectures and discussions, guest speakers, simulated activities, and filmed feedback. This section is specifically designed with the needs of a senior leader in mind and is only open to Sloan Students. Students who elect to take this course in the fall should not also take strategic communication in the winter or spring; the courses will have sufficient overlap in concepts and assignments.

GSBGEN 259. MSx: Ethics. 1 Unit.

With leadership comes responsibility. This course explores the numerous ethical duties faced by managers and organizations. It combines analytical frameworks with the latest findings on human behavior to inform a wide range of ethical decisions and strategies. Readings include case studies, insights from experimental psychology and economics, and excerpts from or about major works of moral philosophy. Through online and in-class exercises, discussions, and personal reflection, you will reveal and assess your ethical intuitions, compare them with more explicit modes of ethical thought, and learn how to use ethics in business settings. A diverse set of ethical viewpoints will be considered with an emphasis on not only their implications for ethical behavior but also on the social and cognitive pitfalls that undermine the ability of business leaders to fulfill their ethical duties.

GSBGEN 299. The Core Curriculum in the Workplace. 1 Unit.

GSB students are eligible to report on work experience that is relevant to their core studies under the direction of the Senior Associate Dean responsible for the MBA Program. Registration for this work must be approved by the Director of the MBA Program and is limited to students who present a project which, in judgment of the Advisor, may be undertaken to enhance the material learned in the first year core required courses. It is expected that this research be carried on by the student with a large degree of independence and the expected result is a written report, due at the end of the quarter in which the course is taken. Units earned for this course do not meet the requirements needed for graduation.

GSBGEN 304. Deals I. 3 Units.

This course applies economic concepts to the practice of structuring contracts. The course extends over two quarters, meeting three hours per week the first quarter and two hours per week the second quarter. Students enrolled in the course must take both quarters. All of the first quarter will be spent in a traditional classroom setting, discussing economics articles and case studies of actual contracts that illustrate the concepts described in the articles. During the second quarter, we will explore the connection between economic theory and contracting practice by studying specific current deals. Students, divided into groups, will study a deal beginning in the first quarter. Then, during the second quarter, each group will give a presentation of its deal to the class. The following week, a lawyer or other participant in the deal will come to class to lead a discussion of the deal. When it works, the students' and the practitioners' analyses are mutually enlightening. We study new deals each year. Deals that we have studied over the years have included movie financings, biotech alliances, venture capital financings, cross-border joint ventures, private equity investments, and corporate reorganizations.

GSBGEN 306. Real Estate Investment. 4 Units.

The major objective of this course is to provide the student with an understanding of the fundamentals of real estate investment. The course covers land economics, market analysis, finance, taxation, investment analysis, investment vehicles, real estate risk, development and urban design. Major land uses are discussed including apartments, retail, office, and industrial. The course is designed for students with limited or no background in real estate.

GSBGEN 313. Advanced Seminar on Social Entrepreneurship and Global Poverty. 3 Units.

As an "advanced" seminar, this course is designed for students with strong backgrounds or interests in social entrepreneurship as a tool for solving social problems. The learning format is based on active engagement. For most of the classes, students will be required to lead off the class discussions. The ultimate goal of this course is to make students (and the instructor) smarter about the strengths and limits of social entrepreneurship as a tool for social change. To this end, we will focus on global poverty reduction as a testing ground. During this process we will explore different theories, concepts, frameworks, and guidelines for effective social entrepreneurship to see whether, when and how these help. nnnThe course is organized into three modules. The first focuses on how social entrepreneurship fits in a broader framework of social change and social innovation. The second module provides a brief overview of issues, debates, and theories about poverty and development. The third module focuses on specific entrepreneurial interventions aimed at addressing some of the conditions that keep people poor or make them poor. nnnThis course allows us to dig into the complexities and challenges of effective social entrepreneurship. It will be taught in a discussion style. The reading will be demanding. So if you are not prepared to dig into the reading or to engage in active discussion, or if you don't feel like you bring relevant knowledge to add to the mix of discussion, this is not the course for you. It is not meant to be an introduction to social entrepreneurship. If everyone contributes, we will all emerge from the course with new perspectives and frameworks for advancing practice in this field. Only take this course if you are ready for an intellectual adventure and ready to make the investment it requires. nnnThis course will be taught by Greg Dees, his bio can be found here: <http://www.caseatduke.org/about/caseteam/#greg>.

GSBGEN 314. Creating High Potential Ventures in Developing Economies. 3 Units.

This course addresses the distinctive challenges and opportunities of launching high-potential new ventures in developing economies. Developing economies are attractive targets for entrepreneurs because many are just starting to move up the growth curve, and they offer low-cost operating environments that can be great development labs for potentially disruptive innovations. They increase in attractiveness when their political institutions stabilize and they become more market-friendly. At the same time, developing economies pose serious challenges. Pioneering entrepreneurs take on significant risks to gain early mover advantages. Specifically, entrepreneurs will not be able to count on the same kind of supportive operating environments that we take for granted in the developed world. They often face cumbersome permit and licensing processes, poorly developed financial and labor markets, problematic import and export procedures, unreliable local supply chains, weak infrastructure, corruption, currency risks, limited investment capital, lack of financial exits and more. This course is designed to help would-be entrepreneurs better understand and prepare for these issues as they pursue the opportunities and address the challenges to start, grow, and harvest their ventures in these environments. The core of the course is a team-based exercise involving the development of a deep understanding of the team's chosen country of focus with respect to the opportunities and challenges for starting a new business. Interested students must come in willing to be team players and do the work necessary to complete this exercise over the full quarter. Each team member's contributions will be assessed by fellow teammates. Students will submit country preferences before the quarter begins and teams will be formed on the first day. The teams will identify what they think would be a high potential opportunity for innovative entrepreneurship in their country that they will evaluate using the country-specific knowledge they've developed. The team will describe, in a final written paper and presentation, the challenges and opportunities in their country using a framework from the recently published World Economic Forum report on "Entrepreneurial Ecosystems Around the Globe and Company Growth Dynamics." The final materials will also include the team's thoughts on the viability of their proposed venture and how it capitalizes on their country's assets and addresses its challenges. A detailed business plan is not required; however, specific recommendations and plans for next steps that would be carried out during a 3 to 6 month field and market research study in the country will be part of the final presentation. In effect, the team will answer the questions: Why do they think this new proposed venture is viable in the specific developing economy given the country's specific opportunities and challenges?; and, What would the group do "in country" to confirm the viability and complete the plans to actually start and grow the business? Based on feedback from instructors and students in the inaugural class last year, some revisions have been incorporated, - more interaction with instructors; fewer case studies; expert guest speakers more focused on a specific topic to share their relevant experiences; a shortened reading list including new notes written on key topics to replace existing readings; and some "flipped" class sessions allowing time for teams to work in class on their projects. Since the course is still evolving, we particularly want to attract students who would enjoy helping further develop the course since this is an arena that begs for new approaches and material. This course will relate to the work being done in SEED, under the theory that healthy entrepreneurship and innovation will improve the overall economy and reduce poverty. Most countries that have successfully grown out of poverty did not do it by focusing only on Bottom of Pyramid (BoP) businesses, but by promoting healthy business growth overall. Helping entrepreneurs build successful new ventures in a developing economy is an essential element of an overall strategy for moving a country out of poverty. BoP businesses have tended to grow slowly, and struggle to raise capital, often being forced to pay low wages, etc. Without complementing these businesses with strong, high-potential, high-growth, profit-making businesses, none of these developing economies are likely to progress economically or eliminate poverty. A prosperous business with a solid plan will help the country, the economy, and ultimately the poor.

GSBGEN 315. Strategic Communication. 4 Units.

Business leaders have marketing strategies, expansion strategies, finance strategies, even exit strategies. Successful leaders, however, also have communication strategies. This course will explore how individuals and organizations can develop and execute effective communication strategies for a variety of business settings. This course introduces the essentials of communication strategy and persuasion: audience analysis, communicator credibility, message construction and delivery. Deliverables will include written documents and oral presentations and you will present both individually and in a team. You will receive feedback to improve your communication effectiveness. In the final team presentation, your challenge is to craft an oral presentation that will persuade your audience to accept your strategic recommendations. By doing this, you will see why ideas, data and advocacy are combined for a professional, persuasive presentation. This practical course helps students develop confidence in their speaking and writing through weekly presentations and assignments, lectures and discussions, guest speakers, simulated activities, and videotaped feedback. An important new feature of this course is that a team of external communications coaches work in concert with the professor to ensure that students get rigorous and individualized coaching and feedback. In this course you will learn to:

- Create communication strategies at an individual and organizational level
- Develop clearly organized and effective presentations and documents
- Diagnose and expand your personal writing and oral delivery style
- Adapt your delivery style to different material and audiences
- Enhance oral delivery through effective visual aids

Students at all levels of comfort and expertise with public speaking and business writing will benefit from this course. In the 2012-2013 academic year this course will only be offered once in the winter and once in the spring term. Waitlists have been long for this course and you're encouraged to keep that in mind as you make your super round selections.

GSBGEN 317. Reputation Management: Strategies for Successful Communicators. 4 Units.

Successful leaders have to conceive, author, rebuild, pivot, differentiate, and finally maintain a personal reputation to make a lasting, recognizable and powerful identity. Reputation Management will explore how you can work alone, within groups or as part of an organization to create, adapt and maintain your personal reputation. Your reputation remains fluid as you navigate your career decisions and interact with different professionals along your journey. It's not your reputation at a given moment that is significant; rather, it is the Continuum of Reputation throughout your career that matters. The course is designed along three interlocking elements: reputation management literature, relevant case studies, and curated guest speakers. Beginning with the frameworks of Paul Argenti, one of the leaders in the field of reputation management, students will learn the fundamentals of strategic corporate communication and the risk of not managing reputation effectively. These frameworks will be extended with specific case studies to illustrate where individuals, groups, and firms have faced the challenge of managing reputation effectively. We will focus on both traditional and virtual components of communication including the relevancy of online reputation management. Finally we will invite key leaders who have built their careers in media through effective communication. We have already begun discussions to ensure availability and have initial commitments from a wide range of on-camera talent, off-camera producers and network executives, a renowned author, a hollywood director and corporate spokespeople and strategists. Each leader has had to manage their reputations in the public eye, and alongside their peers, supervisors, and employees. Guests will be invited to discuss their conscious and unplanned strategies of how to successfully communicate the kind of person, leader, innovator, public figure they wanted, and continue to be known as. The crux being: how to obtain and maintain success by creating and managing your reputation. Students will benefit from a rich blend of frameworks, cases, and speakers enabling them to successfully enter the work force and create their own, personal reputations. What they learn about the importance of Reputation Management will help ensure a more thoughtful and strategic success plan for each graduate. A mid-term assignment will require students to create a case study drawn from their own experience (or personal network), of a reputation dilemma. Teams of other students will then create solutions to the dilemma informed by the frameworks from the course. A final assignment requires students to articulate their own reputation using any media of the student's choosing and share that with others in the course and GSB community.

GSBGEN 324. Deals II. 2 Units.

This course applies economic concepts to the practice of structuring contracts. The course extends over two quarters, meeting three hours per week the first quarter and two hours per week the second quarter. Students enrolled in the course must take both quarters. All or most of the first quarter is spent in a traditional classroom setting, discussing economics articles and case studies of actual contracts that illustrate the concepts described in the articles. Beginning either at the end of the first quarter or the beginning of the second quarter until the end of the course (the "deals" segment of the course), the class explores the connection between economic theory and contracting practice by studying specific current deals. Students, divided into groups, study a deal beginning in the first quarter. Then, during the deals segment of the course, each group gives a presentation of its deal to the class. The following week, a lawyer or other participant in the deal will come to class and lead a discussion of the deal. When it works, the students' and the practitioners' analyses are mutually enlightening. The course examines new deals each year. Deals that studied over the years have included movie financings, biotech alliances, venture capital financings, cross-border joint ventures, private equity investments, and corporate reorganizations.

GSBGEN 334. Family Business. 3 Units.

Family-controlled private and public companies are the dominant form of enterprise worldwide. Despite their prominence, teaching and research have traditionally focused on analyzing the widely-held model of the firm. The family business management and valuation course explores the unique challenges and opportunities faced by family firms. The course is taught by Leo Linbeck III, Lecturer since 2005 at the GSB and President and CEO of Aquinas Companies, LLC. The course balances managerial perspectives with general frameworks. The course is intended for four main audiences: (1) Students whose family owns a business. (2) Students who are considering working for a family firm. (3) Students who are interested in acquiring a private firm either directly (search funds, minority investments, etc) or indirectly (private equity, etc). (4) Students who seek to consult or provide professional services to closely held firms or their owners (wealth management solutions, management consulting, etc). The main objectives of this course are three. First, to understand the unique challenges and characteristics of family firms. Second, to provide a coherent and consistent set of tools to evaluate the most relevant decisions faced by family firms. Third, to focus on decision-making. The course uses a combination of case studies, guest speakers, and student presentations to explore the central ideas of the course.

GSBGEN 336. Energy Markets and Policy. 4 Units.

Transforming the global energy system to reduce climate change impacts, ensure security of supply, and foster economic development of the world's poorest regions depends on the ability of commercial players to deliver the needed energy at scale. Technological innovation is a necessary but not sufficient condition for this to occur. The complex institutional frameworks that regulate energy markets in the United States and around the world will play a major role in determining the financial viability of firms in the energy sector. In this course we survey the institutional contexts for energy enterprises of all types and consider what kinds of business models work in each setting. We study in detail how markets function for carbon (assessing the advantages and disadvantages of different policy tools and considering in particular California's implementation of A.B. 32); electricity (with extensive discussion of wholesale electricity markets, energy trading, and issues of market power); renewable energy technologies (focusing on ways to manage intermittency and on how renewable energy businesses respond to government incentives); nuclear power (as a case study of how the regulatory process affects investment decisions); oil and natural gas (treating both conventional and unconventional resources and emphasizing the key role of risk management in an industry characterized by uncertainty and high capital requirements); transportation fuels (discussing biofuels incentives, fuel efficiency standards, and other policy tools to lower carbon intensity); and energy for low-income populations, for which affordability and distribution pose special challenges. A primary teaching tool in the course is a game-based simulation of California's electricity markets under cap and trade. Student teams play the role of power companies and compete to maximize return by bidding generation into electricity markets and trading carbon allowances. The objective of the course is to provide a robust intellectual framework for analyzing how a business can most constructively participate in any sector like energy that is heavily affected by government policy. Instructors: nFrank A. Wolak, Director, Program on Energy and Sustainable Development; Mark Thurber, Associate Director, Program on Energy and Sustainable Development.

GSBGEN 337. Business Collaboration to Promote a Sustainable Food System. 3 Units.

This goal of this class is to redesign our food system through project-based, experiential education and entrepreneurship. Projects will focus on food justice, sustainable food and farming technology and disruptive models of production and distribution. The class will scale change by providing creative spaces and resources for students, faculty, and community partners to learn and apply design thinking to real-world opportunities in the food system.

GSBGEN 340. Financial Crises in the U.S. and Europe. 4 Units.

This lecture course will explore the U.S. financial crisis of 2008 and the European debt crisis of 2011-13. We will examine the causes of both crises, policies implemented during the crisis, and options for reform. This is an economic policy course rather than a pure economics course. It will focus on the practical intersection of economics, financial markets and institutions, policy, and politics. Topics we will examine include the following for the 2008 crisis: Did a global savings glut, international savings flows, or Fed policy cause the credit bubble? What caused the housing and mortgage bubbles? How does a bad mortgage turn into a toxic financial asset? Why and how did large financial institutions fail? What's the difference between a solvency crisis and a liquidity crisis? What is Too Big To Fail? Is it real? Why was Bear Stearns bailed out but not Lehman? Was the global financial system on the verge of meltdown in September 2008? How? Why? What was the TARP? The TALF? The CPP? The stress tests? What can we learn from comparing the US financial crisis with that in other major economies? How effective were various policy tools during the crisis? How have policies enacted and implemented since the crisis changed the outlook for the future? For the European debt crisis we will examine: The fiscal and economic situations in various European countries; The structures and history of the Eurozone; Policy options to address problems in troubled European economies; The interaction between European financial institutions and European governments; Options for longer-term reform of the Eurozone. There will be no exams. Students will write two individual memos and a group memo.

GSBGEN 346. Comparing Institutional Forms: Public, Private, and Nonprofit. 4 Units.

For students interested in the nonprofit sector, those in the joint Business and Education program, and for Public Policy MA students. The focus is on the missions, functions, and capabilities of nonprofit, public, and private organizations, and the managerial challenges inherent in the different sectors. Focus is on sectors with significant competition among institutional forms, including health care, social services, the arts, and education. Sources include scholarly articles, cases, and historical materials. Same as: EDUC 377, PUBLPOL 317, SOC 377.

GSBGEN 348. The Economics of Higher Education. 4 Units.

Topics: the worth of college and graduate degrees, and the utilization of highly educated graduates; faculty labor markets, careers, and workload; costs and pricing; discounting, merit aid, and access to higher education; sponsored research; academic medical centers; and technology and productivity. Emphasis is on theoretical frameworks, policy matters, and the concept of higher education as a public good. Stratification by gender, race, and social class.

GSBGEN 349. Introduction to the Politics of Education. 4 Units.

The relationships between political and economic analysis and policy formulation in education; focus is on alternative models of the political process, the nature of interest groups, political strategies, policy efficiency, the external environment of organizations, and the implementations of policy. Applications to policy analysis, implementation, and politics of reform. (APA).

GSBGEN 350. International Internship. 1-2 Unit.

GSBGEN 359. Leading Your Life. 4 Units.

This course takes conventional managerial perspectives on the "strategic leadership" of organizations and applies them to the design and management of your life. Fundamental notions of "purpose" and "vision" are translated to the personal level in the form of "dreams" and "aspirations." Basic elements of strategy such as "scope" and "competitive advantage" are applied to help you evaluate fundamental choices about how you lead your life. Constructs such as "priorities," "commitments" and "resource allocation" all have analogues in individual life - as does the core objective of performance and success. The class begins with a hard-nosed and broad-based self-assessment of the quality of your life along a variety of dimensions including relationships, career, money, spirituality and health. Based on this assessment you will develop a strategy and a set of concrete goals for enhancing the quality of your life in targeted domains. The course consists of five intensive sessions designed to help you develop the skills and knowledge- but more importantly the insight and capacity - to be more strategic (in best sense of the term) and effective in how you lead your personal and professional life - meaning actively guiding, stewarding, and driving your results to create a life that is truly exceptional. Substantively, the course draws on a variety of different traditions including existential, humanistic, and positive psychology; personal growth, adult development, and the human potential movement; as well as the practice of life and executive coaching. Central themes and learning objectives include: * The development of self-awareness, self-acceptance, and self-control * An understanding of the power of choice and "authoring" one's life * The essential role of dreams and aspirations * The art and discipline of knowing and speaking your truth * The challenges and self-limiting impact of negative thoughts and self-theories * Developing a stance towards oneself and others that is rooted in grace and wisdom NB: While we expect the class to be helpful and of interest to a wide range of students, it involves a substantial commitment of time and emotional and intellectual energy. It is not for the faint of heart or those who are ambivalent about introspection, feedback, or constructive confrontation.

GSBGEN 360. Sports Business Management. 4 Units.

This course will examine the diverse management challenges facing the sports industry. The course will cover issues at the league level, the team level, the athlete/agent level, and the college level. The diverse constituencies with interests in sports issues (athletes, fans, media companies, advertisers, and legislators to name a few) will be discussed. Sports issues at a global level (the IOC) and both U.S. and outside U.S. will be covered. There will be coverage of evolving business ventures related to the sports industry (such as venture backed sports companies and sports networks). A key focus is on how the sports industry is similar to and different from other industries. Key concepts underlying the course are: value creation/value sharing; revenue ecosystem; virtuous circles and vicious circles; disruptive technologies; growth facilitators and growth inhibitors; leveragable assets/inherited liabilities; and entrepreneurship/new product innovations. Over 80% of the sessions typically will include a guest co-lecturer from the sporting industry.

GSBGEN 363. Fiscal Policy. 4 Units.

More than one out of every five dollars in the American economy will be spent by the federal government this year. This course will examine how federal spending, taxes, deficits and debt affect the U.S. economy and global financial markets, and how the economy affects the federal budget. We will look inside the federal budget to understand entitlement spending, what causes it to grow so fast, how it could be reformed, and why that's so hard to do. We'll understand where the money goes -- how much goes to infrastructure, education, housing, health care, energy and the environment, parks, scientific research, national defense, and other needs. We'll look at the stimulus vs. austerity debate, both within the U.S. and between the U.S. and Europe. We'll look beyond partisan battle lines and explore various fiscal philosophies that sometimes split the political parties. We'll cover the federal budget process from developing the President's budget to enacting individual spending and tax bills, and discuss process reforms including spending and deficit reduction targets, a balanced budget amendment, and line item veto. We'll cover the major players in the budget debate and understand where the big and small budget decisions are made. We'll look at federal taxation, where the money comes from, how it affects the economy, and how it might be restructured.

GSBGEN 370. Social Innovation Project. 2 Units.**GSBGEN 376. Work and Family. 3 Units.**

This course examines the strategies that highly educated women and men use to combine work and family and the strategies that managers and policy makers can use to help others strike a balance. Topics include the tradeoffs in becoming a stay-at-home parent, the economic value of unpaid labor, the consequences of balancing two high-powered careers and children, the economics of marriage, fertility, child care, and elder care, the gendered division of labor in the home, time-management, workplace innovations, and policy initiatives. Guest speakers add their own perspectives on these issues and describe the roles their organizations play.

GSBGEN 380. Real Estate Private Equity Investing. 4 Units.

This course is intended for any student interested in a career in managing, developing, or investing in real estate or private equity. The course covers cases involving the perspectives of general partners and limited partners; the attributes of successful real property investment firms; analyses of investment portfolios and individual transactions, primarily in the private equity real estate category. Cases will be global. Objectives include: How to construct a private real estate portfolio; How to assess the risks in projects and portfolios; How to perform relative value analyses of differing investments; How to manage troubled investments (when to "hold 'em and when to fold 'em"); How to manage a general partner firm. The course is divided into three modules with special emphasis on real estate financial analysis for transactions and portfolios. The first module will focus on portfolio construction issues and how to quantify whether the investor has been successful. The second module will focus on underwriting individual transactions and applying a relative value construct in determining the more attractive investments. The second module will also focus on the management of troubled investments, including deciding when to "double down" and how to protect investments already in place. The third module will address how general partners manage their firms.

GSBGEN 381. Strategic Philanthropy. 3 Units.

Appropriate for any student driven to effect positive social change from either the for-profit or nonprofit sector, Strategic Philanthropy (GSBGEN 381/ EDUC 377C) will challenge students to expand their own strategic thinking about philanthropic aspiration and action. In recent decades, philanthropy has become an industry in itself - amounting to nearly \$300 billion in the year 2011. Additionally, the last decade has seen unprecedented innovation in both philanthropy and social change. This course explores the key operational and strategic distinctions between traditional philanthropic entities, such as community foundations, private foundations, and corporate foundations; and innovative models, including funding intermediaries, open-source platforms, technology-driven philanthropies, and venture philanthropy partnerships. Course work will include readings and case discussions that encourage students to analyze both domestic and global philanthropic strategies as they relate to foundation mission, grant making, evaluation, financial management, infrastructure, knowledge management, policy change, and board governance. Guest speakers will consist of high profile philanthropists, foundation presidents, social entrepreneurs and Silicon Valley business leaders creating new philanthropic models. The course will culminate in an individual project in which students will complete a business plan for a \$10 million private foundation.

GSBGEN 382. Thinking Like a Lawyer. 3 Units.

Open to all non-law graduate students at the University, this course will provide non-law students an analytical framework for understanding the core concepts of the law and familiarize students with how lawyers analyze and structure their work. This course will be taught by Vice Dean Mark Kelman and Law School faculty in their areas of expertise, with one to two classes devoted to each topic. It will introduce students to some of the foundational principles of law and will review topics such as contracts, litigation, intellectual property, securities and employment law. No previous study of law or legal systems is required and there are no pre-requisites. It will be offered in the Winter 2012-13 quarter (1/8/13 - 3/13/13), with lectures twice weekly on Tuesdays and Thursdays from 1:30 - 3:00 pm at the Law School. Additional mandatory TA-led discussion sections will be taught on Tuesday and Thursday - students must also attend one of these TA sessions each week. Students will indicate their availability for specific sections on forms passed out at the first lecture. Readings and assignments will be posted to Coursework; there is no textbook. Grading: The class is graded on a pass/fail basis. There will be no final exam, but completion of problem sets on various topics as well as attendance at discussion sections will be used to determine grading. All students must complete 4 problem sets. Two specific problem sets are required of all students and the other assignments can be chosen from a list of available assignments.

GSBGEN 390. Individual Research. 1-4 Unit.

Need approval from sponsoring faculty member and GSB Registrar.

GSBGEN 507. Impact Investing: Strategies and Tools. 2 Units.

This course will explore how investment capital and financial tools can be applied to deliver both financial returns and impact (benefit) for our communities and environment. The class will be organized around a set of guest lectures from impact investing firms across a spectrum of investment strategies & returns expectations. Through these examples, we'll explore how impact investing is applying the basics of investing to different objectives: arbitraging market inefficiencies- valuing and pricing risk- determining how each party in a transaction may see the value created on different scales and aligning these objectives- the role of public policy in these markets. The class will emphasis applying these concepts and examples to create, in groups, your own impact investment fund or instrument.

GSBGEN 510. Taking Stock and Moving Forward. 1 Unit.

This spring quarter elective is designed to help you prepare for a challenging, fulfilling, and meaningful future. GSBGEN 510 seeks to: Provide you with the opportunity and tools to take stock of what you have learned about yourself as a person and as a leader over the last 18 months at the GSB; Expose you to research on personal and professional development and help you apply it; Encourage you to reflect on what matters most to you, personally and professionally, and begin to determine how to achieve it; Prepare you for the challenges and transition immediately ahead and, in so doing, learn how to manage life's big transitions in the future. We will address four major life and career themes: Learning from Choices, Fulfillment and Meaning, Failure and Resilience, Transitions and Renewal. This class is limited to 36 students. Each class will begin with conceptual input and an overview of that session's topic in the main classroom. Students will then be divided into three twelve-person break-out groups during the remainder of the class time. These groups are NOT T-groups, for those of you who took Interpersonal Dynamics, but rather discussion groups. Discussion will be of a reflective and personal nature. Each group will have 2 Group Leaders who are experienced executive coaches specializing in helping people through life and career transitions.

GSBGEN 512. Funding Social Impact: Methods and Measurement. 2 Units.

The past decade has seen an increasing interest in impact investments, which seek to generate financial returns at the same time as they have social (or environmental) impact. But how does an investor actually achieve impact? We explore this question through a framework that requires that the investee enterprise itself has net positive impact and that the investor's financial or other contribution increases that impact. We consider the challenges of measuring an enterprise's impact, and then turn to assessing the value added by investors, fund managers, and other intermediaries. The course will be taught mainly through case studies that consider investments in different asset classes ranging from those that expect below-market returns to ones that expect risk-adjusted market returns or better. We will look at investments at various stages, from R&D to start-ups to mature enterprises and entire sectors, considering the role of subsidies (for better or worse) and how an enterprise's social mission can be protected upon exit, and also will examine social impact bonds. The course is taught by Paul Brest, <http://www.law.stanford.edu/profile/paul-brest>. With its focus on assessing impact, it has a different mission than Matt Bannick's winter quarter course, *New Business Models in the Developing World*, which examines enterprises serving the base of the pyramid, and David Chen's spring quarter course, *Impact Investing: Strategies and Tools*, which broadly examines the domain of impact investments with emphasis on those yielding market returns. Students will find only slight overlap among the three courses.

GSBGEN 515. Essentials of Strategic Communication. 2 Units.

Successful leaders understand the power of authentic, memorable communication. This course uses the lens of oral communication and presentations, to introduce the essential elements of the strategic communication strategies that make authentic, memorable communication work. Focusing on oral communication and presentation, we introduce the essentials of communication strategy and persuasion: audience analysis, message construction, communicator credibility, and delivery. Deliverables include written documents, focusing on individual and team presentations, with students receiving continuous feedback to improve their communication effectiveness, and to sharpen their authentic leadership voice. This highly interactive, practical course, is focused on feedback to help students at all levels of communication mastery develop confidence in their speaking and writing. Course includes presentations, assignments, lectures, discussions, simulated activities, in-class feedback, and filmed feedback. In this course you will learn to: Recognize strategically effective communication Implement the principles of strategic communication across different platforms Develop clearly organized and effective presentations and documents Diagnose and expand, your personal authentic communication style Select the course format that will best meet your needs: autumn term offers a ten week course meeting once a week as well as a two-week immersive experience, in a compressed version of the course that focuses particularly on the three most vital elements of leadership communication and features in-class filming and review of student work in each session. These two formats are again offered in the winter, and in the spring the full term format is offered only. All versions of the course offer the same opportunities for individual and group presentations and feedback. As you make your super round selection, keep in mind that waitlists have been long for this course.

GSBGEN 516. Using Neuroscience to Influence Human Behavior. 1 Unit.

Why is it so difficult to change human behavior? Why is it that more than 80% of individuals who sign up for fitness classes drop out within a few weeks, even a few days? Why is it that despite the dramatic increase in devices and apps that are geared for changing behaviors, people still struggle to adopt and maintain new behaviors? The issue is not about a desire to change—it is about using the right methods and techniques to bring about habit change. The primary goal of this seminar is to gain a rich understanding of changing behaviors through frameworks and concepts that are grounded in neuroscience. In this seminar, we will examine (1) ways of characterizing different domains of behavior change, each requiring different methods and techniques, (2) why methods that often work in one domain are often unsuccessful in others and (3) how companies create habits in users and how one can leverage the power of technology to bring about behavior change.

GSBGEN 518. Dynamics of the Global Wine Industry. 2 Units.

This course will examine the world of wine with a fresh and contemporary lens. It will explore the market dynamics of this fascinating global industry. The goal of the course is to provide insight into the branding, marketing, and distribution dynamics that shape what consumers can buy and consume with a focus on the strategies of some of the world's leading wine brands. Attention will also be paid to the legal, regulatory, and market dynamics that define the U.S. wine industry as well as to issues of contested authenticity in the world of wine.

GSBGEN 520. The Frinky Science of the Human Mind. 2 Units.

The exponential growth in our understanding of the workings of the human brain has led to a rather startling and maybe embarrassing (even depressing) conclusion. While the human brain is unique among species in its ability to strategize, conceptualize, hypothesize, etc., it is now undeniable that most of our decisions, behaviors and experiences are shaped by instinctual brain systems. Thus, constituting the broad goals of this seminar, it behooves us to first understand the workings of the instinctual brain and then leverage this understanding to craft solutions for real-world issues from the vantage points of the "firm" as well you as an individual, a leader and an innovator. Topics that will be covered from your vantage point include leadership skills including being effective at influencing key stakeholders within and outside the firm and being effective at making decisions, personal as well as professional. Topics that will be covered from the firm's vantage point include crafting superior value propositions at the decision as well as the experience phases of the "customer" journey, fostering an innovative organizational culture and developing incentives to increase employee engagement.

GSBGEN 521. Managing Under Uncertainty. 2 Units.

Uncertainty with changing opportunity shapes investment planning whether in financial firms, corporations or entities such as pension funds, venture capital and private equity, and, in particular, in non-traded assets or securities. We will develop an approach to understanding (1) capital allocation issues; (2) capital structure planning; (3) optimization policies with changing opportunity sets and adjustment costs; and, (4) the selection of levels of risk taking. These relate to what is needed to manage uncertainty. The following three areas: (1) developing feedback mechanisms to assist planning; (2) reporting mechanisms for management and investors; and, (3) compensation planning and business structure, relate to managerial effectiveness under uncertainty. These internal risks must be integrated with external risks such as geopolitical issues and fiscal and monetary policies in a global setting. I plan to introduce each of these from my theoretical and applied perspective. I will provide selective reading on each topic and a list of questions to provide follow on discussion. Students will work with me to flesh out not only the answers to these questions, but also provide additional questions and discover additional readings that are germane to expanding understanding and to following developments in each of these areas.

GSBGEN 524. Leading with Mindfulness and Compassion. 2 Units.

The course explores the role of mindfulness and compassion in the workplace, and the contribution of these qualities to leadership. Topics addressed will include: How can mindfulness enhance clarity in purpose and productivity? What is the connection between mindfulness and compassion? Is compassion in the business world a strength or a weakness? Are compassion and profit motives fundamentally incompatible, or can they support each other? What does compassionate leadership look like? Can mindfulness and compassion be trained at the individual level, and built into company policy? How does self-compassion support effective leadership and recovery from setbacks? Guests from the corporate or non-profit sectors will discuss the challenges of integrating mindfulness and compassion into business strategy and the work environment. Guests from the scientific field will discuss research on mindfulness and compassion as they relate to real-world challenges. Participants in the course will engage with exercises from evidence-based programs targeting the development of mindfulness and the various facets of compassion.

GSBGEN 525. From Business Concept to Business Plan. 1 Unit.

This entrepreneurship course is designed to teach students the basic processes and tasks required to construct a business plan en route to the creation of a new venture. The course is designed not only for students with immediate entrepreneurial aspirations, but for any student considering being involved in an entrepreneurial venture at any point in his or her career. The course is organized around a number of business concepts that we have selected. With your team, you will study one of the concepts, analyze it and evolve it into a business plan. The class comprises multiple student teams, each working on a different business concept. Each team will also review and critique the work of the other two teams.

GSBGEN 528. Creativity, Problem Solving, and Innovation. 2 Units.

This course is designed to expose second-year MBAs to research on creativity in problem-solving. The course has straightforward practical goals: it will explore ways in which individuals, groups, and organizations can become more creative, in useful ways. In order to do this effectively, we will study hard-nosed research on problem-solving. We will not read articles entitled "The five-fold path to creativity." If there really were recipes or algorithms for reliably increasing creativity, I would certainly teach them. (Or more likely, I wouldn't need to: they would routinely be taught in the core curriculum of every MBA program.) Instead, we will study what cognitive and social scientists have discovered about novelty and effectiveness in problem-solving. Some of this work--e.g., Scott Page's examination of the value of cognitive diversity in teams--will have relatively direct action-implications. The pragmatic implications of other research--e.g., on organizational norms for resolving conflict--will be more indirect. Because the course's practical goal is easy to state but hard to achieve, some patience is required. As indicated above, we will study creativity at three levels: individuals, groups and organizations. Because there is pretty good evidence that different kinds of factors are prominent at these different levels, the course's approach is multi-disciplinary. We will read articles and books by cognitive psychologists and cognitive scientists, social psychologists, organization theorists, and perhaps historians who have studied industrial innovation. Disciplinary boundaries are irrelevant: any work that articulates a significant claim about pragmatically useful creativity and backs up that claim with a good argument is grist for our mill. Because the course focuses on creativity that makes a difference--i.e., that ultimately makes some organizational stakeholder better off--we will also study how innovations get selected. This inevitably means studying how new ideas get criticized and sometimes discarded. This process is less fun than generating new ideas, but given that brand-new ideas are usually flawed in one way or another, critical and hard-headed scrutiny of innovations is vital. Hence, we will examine psychological, political, and organizational obstacles to the effective criticism and evaluation of novel solutions, and we will also look at some ideas on how these obstacles might be reduced. Classes will be run seminar-style: they'll focus on examining the readings closely and critically. Understanding what a study does not establish is sometimes just as important as understanding what it does establish. Hence, I will expect everyone to read carefully; skimming won't cut it. This effort will probably result in a rather deep and sophisticated comprehension of the topic. Given the importance of creativity and innovation in modern organizations, that should be adequate return for hard effort.

GSBGEN 529. Leading With Agility. 2 Units.

Can you actually prepare for unexpected make or break career challenges you will face in the years ahead? By definition, the future is unpredictable, but understanding and grappling with the types of challenges seasoned leaders describe as the toughest they've faced can help to prepare one for the emotional demands that come with increasingly broad leadership responsibilities. Those challenges include role and team transitions, confrontations and conflicts, turning around poor performance (in individuals or groups), and recruiting or developing talent. This class will draw from a collection of video cases, role plays and exercises, based on real-life examples that are the product of hundreds of interviews conducted with leaders by the school's Center for Leadership Development and Research. The goal is to help students prepare for some of the gut-wrenching choices they will make in leadership roles, while evaluating how their mental and emotional responses influence their own managerial judgment.

GSBGEN 530. Learning from Experience. 1 Unit.

It is commonly believed that experience is a great teacher. But is it? Do we always learn what we can or should from experience? Research on this question suggests that the answer is no. Often we do not learn all that experience has to teach us and often the lessons we draw from experience are the wrong ones. This seminar examines what research suggests about how managers and others learn and don't learn from experience. Among the questions we will consider are: (1) How does experience teach? (2) What are the impediments to learning from experience? (3) How can we learn better from our experiences? (4) How can we have better learning experiences; that is, design and structure our experience and that of others so that it produces better learning?.

GSBGEN 531. Global Trip Leadership. 2 Units.

This course is open only to leaders of the Service Learning Trips or Global Study Trips. The course will meet eight times during the first four weeks of Fall Term. In addition, the teams have the option of making use of a Master Coach just before their trip to review how they are operating as a team. There will be a 10th meeting during Winter term where the Winter Trip leaders will share their experience with the Spring Trip leaders. The purpose of this course is to help trip leaders in the planning and conducting of the trip so as to maximize the learning for the trip participants and the trip leaders as well as increasing the overall success of the trip. A range of topics will be covered including: articulating a vision for the trip, developing their team as a high performing team, making quality decision, resolving interpersonal issues (within the team and with participants), understanding how to make full use of the faculty member and dealing with the myriad of issues that are likely to arise. Class time will mainly be spent discussing and role-playing a series of short cases that have been developed around issues that have come up in past trips. These will be supplemented by short lectures to provide the conceptual underpinning. There will be a very modest reading list.

GSBGEN 532. Cleantech: Business Fundamentals and Public Policy. 2 Units.

This course examines trends and opportunities in the cleantech sector with a particular focus on low carbon energy and carbon emission reductions. We examine these trends in the context of changing technology, economic fundamentals, and public policy. A particular focus of the course will be on the role of regulation and tax subsidies in determining the cost competitiveness of clean energy sources. Specific topics and industries to be analyzed include: Expanding role of Natural Gas in Electricity Generation; Carbon Capture by Fossil Fuel Power Plants; Solar PV industry; Cellulosic Biofuels; Energy Efficiency; Clean Energy Policies and Investment in China.

GSBGEN 533. Sustainability as Market Strategy. 2 Units.

The increasing social emphasis on environmental sustainability creates both dilemmas and opportunities for firms. Recognizing that sustainability means a focus on not just the environment, but also on broader issues of corporate social responsibility, we will examine the ways in which some companies are developing a "sustainability strategy." We will also consider the way in which companies are profiting from such a strategy with an eye toward understanding the conditions under which such a strategy can generate profits for firms. We will also focus on the way in which many companies are partnering with non-governmental organizations to develop business strategies that focus not only on profits, but also on the environment and social responsibility.

GSBGEN 535. Emerging Network-Based Consumer Services. 1 Unit.

This seminar considers the economics, development, and growth of emerging networks that use technology to connect people (typically sharing a purpose) to one another. Each day of the seminar will focus on a different company (or a few companies) and a different theme. The set of companies is preliminary, and is shown here just to illustrate a potential example.
 nn- Network Platforms/Zynga: Zynga is one of the leading and most advanced network-based consumer services. It has been struggling recently with growth and monetization on Facebook. We'll examine Zynga's business model, Zynga as an application vs. Zynga as a platform, and the choices Zynga has made along the way.
 nn- Metrics/LinkedIn: We'll examine the use of metrics to track application growth, engagement and monetization. We'll also compare the use of a proprietary social graph vis-a-vis Facebook's, considering the choices made by LinkedIn vs. a few Facebook apps.
 nn- Growth and Evolution: We'll discuss how network-based consumer services can grow and evolve their business models using a few company examples.
 nn- Monetization/Pinterest: We'll analyze interest and content networks, focusing on how they may be monetized vis-a-vis Facebook.
 nnSome of the seminar topics overlap topics covered in OIT 256 or OIT 356. Students who took one of these courses will not be allowed to take this course.

GSBGEN 537. The Role of Business in Sustainable Food Systems. 1 Unit.

The food system in the United States has contributed to a number of societal and ecological problems, from increasing rates of diet- and food-related illnesses, to "food deserts" in our inner cities, to the loss of farmland to urban sprawl, to agricultural chemical runoff into our water sources, to unjust farm labor practices, to the overuse of antibiotics, to an enormous amount of food waste, to questionable animal husbandry practices, and more generally to a diminishing level of diversity among the people, plants, and animals on whom we rely for our sustenance. These problems create both dilemmas and opportunities for business. This course will focus on how some companies (both for-profit and non-profit) are working to try to repair the damaged food system in the United States. Topics include (but are not limited to): organic and biodynamic agriculture, the economic demise of the family farm, the health effects of our current system of food production and the habits it has engendered, and opportunities for entrepreneurship and new modes of food distribution. We will have several guest speakers, field trips, and cooking/food preparation workshops and demonstrations.

GSBGEN 538. Energy Policy, Markets, and Climate Change. 2 Units.

This course will consider world energy markets as well as national and international policy challenges for the energy sector, in the context of climate change and its probable impacts. Case studies, readings, and class discussions will explore the history of fossil fuel price changes and their effects on trade, the influence of subsidies and tax incentives on the prospects for renewable alternative sources, and the role of governments in setting import and export policies. The class will consider such questions as: What policies are adopted when energy developments confront other land values, or are associated with human or environmental risks? What role do Public Utility Commissions play and how do international agreements influence the sector? How do new technologies for improving energy yield, building efficiency, and transportation affect use? What is the role of regulation in establishing patterns of energy use? Cases may require students to play such roles as: (1) an executive director of an environmental non-governmental organization considering approval for construction of a large solar-thermal facility in the Mojave Desert; (2) the chief executive officer of a company drilling shale deposits for natural gas developing his case for a governor; (3) a Senator evaluating her position on converting a port to permit US coal to be exported to China.

GSBGEN 542. How to Tell a Story. 1 Unit.

"Tell me the facts and I'll learn. Tell me the truth and I'll believe. But tell me a story and it will live in my heart forever."
 nnnStories are all around us. Stories move us, make us feel alive, inspire us to be more than we would be otherwise. As famed screenwriting coach and author of the screenwriting bible, *Story*, McKee says: "Story is not only our most prolific art form, but rivals all activities - work, play, eating, exercise - for our waking hours. We tell and take in stories as much as we sleep - and even then we dream."
 ** Despite our love for stories, most of us leave stories to "storytellers" - fiction writers, journalists, and film makers. But we all have this skill. We simply need to hone it. The question is - how can we hone it? In this seminar, we will break down the basic elements of storytelling, elucidate the power of the verbal as well as the visual, and discuss how storytelling helps build brands and organizations. For the final project, you will create tell a 3 minute story about (a) your organization, (b) your brand, or (c) you. Thus, the goals for this class:
 nnn(1) Understand what makes bad stories, okay stories, and great stories.
 nn(2) Learn how to create storyboards
 nn(3) Gain practice in crafting and telling a compelling 3 minute story about yourself. You will get feedback by filmmakers on what went well, went poorly, and how to take the story to level further.
 nnn** Robert McKee, *Story*, (Regan Books: 1997), p. 11.

GSBGEN 543. The Power of Stories in Business. 2 Units.

Successful innovation creates a new normal, a new way of being for individuals or businesses. Successful innovation disrupts industries; it drives success. We all want to innovate, but how do we do it? To innovate, you not only need a big idea, you also need people to create it and people to buy into it. Story fuels innovation. Stories have long held the power to transform the listener; to take listeners on a journey that changes how they think, feel or act. In business, stories can drive innovation and impact by painting a clear picture of what is and what could be for everyone from employees, to customers, to investors and the media. In this nine hour, interactive course we explore story in business; what does it mean to tell stories in business? What makes an effective story in business? And when can you use stories in business? We will focus on innovation, but also explore other applications of story.
 nBy the end of this short 5 week class, you will have gained:
 n-Understanding of the role story plays in business.
 n-Awareness of what makes for a good (and bad) story, and how to use stories for strategic advantage to further business objectives.
 n-Practice crafting stories, for internal and external stakeholders that spur innovation.

GSBGEN 544. The Role of the Modern General Counsel. 2 Units.

The news is filled with reports of one corporate crisis after another - names like BP, Goldman Sachs, Bank of America, AIG, Siemens, Toyota, and issues like backdating, bribery, antitrust violations, insider trading, procurement fraud, health and safety violations, consumer class actions and the like. And often the cry is heard - where are the lawyers? This course explores the evolution of the role of the general counsel of major American public companies and, more broadly, the expanding role of in-house counsel. These are the lawyers in the trenches, on the front lines of American businesses. Each week, we'll review another dimension of the general counsel's job. We'll consider how general counsel today play an important role on the executive team of major companies and explore the different ways in which general counsels manage large corporate legal departments and direct functional legal areas like litigation, IP, corporate and securities, M&A, environmental and employment law. We will also examine the professional responsibilities and legal obligations of the general counsel -- including the delicate and sometimes conflicting reporting relationships to the CEO and the board of directors -- and consider how an in-house legal department fits into a corporation's organizational structure and how it supports the company's operating units on a day-to-day basis. We will explore the general counsel's role in internal investigations, regulatory investigations and compliance programs, and governmental affairs. We will also consider current practices in how in-house lawyers select, collaborate with and evaluate outside counsel. The class will meet weekly and we will invite current and former general counsels to join us occasionally for our discussions. Each student will be expected to participate actively in class discussions, and will be required to complete two projects, each in collaboration with three other students and submitted as a team, presenting how the team would address a complex set of legal and business issues. The course grade will be based 1/3 on class participation and 1/3 on each of the two team projects.

GSBGEN 548. Crafting Your Life Story. 1 Unit.

This new seminar explores how the "life stories" we tell ourselves influence the choices we make in life, including the personal and professional choices we make, the ambitions we pursue - and, ultimately, our very success. Together, we will look at the science and art of what might be called "generative autobiography" - finding the particular life story that helps you pursue a more consequential and meaningful life. In developing this idea, you will learn to identify the essential elements of a great life story. You will learn how to craft a better, more creative life story for yourself, and you'll learn also how to tell your life story more effectively to other people in order to engage them more deeply and lead them more effectively. The course will include a series of outstanding readings from psychology, philosophy and literature on how to think more creatively about the life you are living now - and the life you hope to live going forward. One distinctive feature of this new seminar will be the extensive use of materials from award-winning films to illustrate the major themes and dilemmas of telling a good life story. We will examine the lives of a number of fascinating high achievers from business, science, politics and the arts. The course also includes several exercises designed to help you craft, refine, and project your life story. The seminar will be very discussion-oriented and very engaging!

GSBGEN 550. Issues in Leadership. 2 Units.

This seminar will explore the nature and role of leadership in organizations. We will examine such questions as (1) What is leadership? (2) Why is it important? (3) What is it that leaders actually do? (4) How do they do it? (5) How are leaders developed? (6) Why do leaders succeed or fail? (7) What about your potential for leadership and your strategy for developing it? Our primary objective in this seminar is to achieve a deeper understanding of the nature and role of leadership in organizations. Our approach will be to examine a small sample of the literature, together with the amazing story of Ernest Shackleton and his Endurance crew, and then to probe several key questions through lively class discussion. The discussion, informed by the readings and also by our collective experiences, will seek to develop some general principles and observations about leadership - particularly about how you might better develop yourself as a leader.

GSBGEN 551. Innovation and Management in Health Care. 2 Units.

The health care system accounts for over 18% of US GDP and is one of the fastest growing segments of the economy. This two unit class focuses on the interplay and tension between the main players in the health care field - providers of health care services (individual doctors, group practices, integrated health care systems), payors (insurances companies, employers, consumers, and government), patients, and innovator companies (biopharma, medical device, diagnostics, and health care IT). The course is designed for students with a broad diversity of backgrounds and interests who want to better understand the health care business and system. No prior experience in the health care or medical field is assumed or needed. The focus of the class will be primarily on the US health care system, but there will be limited discussion of non-US systems as well. The course is divided into five modules: 1. An overview of the US Health Care System and the interplay between payers, providers, and innovators 2. Provider organization models and incentive structures - The relationship between quality, cost, and access - Integrated systems and fee for service models - New IT technologies, including electronic data records, and incentives for adoption - How the delivery system structure affects technology innovators 3. Innovator business models and issues - Financing and managing new product development and portfolio management - Clinical trial management and gaining regulatory approval - Marketing, communication and sales strategies (both physician and patient communication and sales) to drive product adoption and gain third party reimbursement - Business models to drive innovation 4. New technologies, business opportunities, and business models - Molecular diagnostics - Stem cells and regenerative medicine - Consumer genomics 5. Health care system reform The class will be taught primarily from the perspective of a business person operating a company rather than that of a policy maker, academic, or investor. While there will be a few lectures to provide background and frameworks for course topics, most classes will involve a case discussion and prominent guest speakers from the health care industry. Speakers and panelists in previous years included CEOs and senior executives from Genentech, Onyx Pharmaceuticals, UnitedHealth, Jazz Pharmaceuticals, GE, Safeway, and Genomic Health; venture investors from Venrock and Essex Woodland Health Ventures; and heads of the health care/biotech practices at McKinsey and Goldman Sachs.

GSBGEN 553. "Intrapreneurship" for Sustainability: Driving Environmental Change from Within Corporations. 2 Units.

An organizational change approach to the development and introduction of new corporate strategies and product lines that have a sustainability benefit. Students will be given the opportunity to work on real-world cases to help them effectively incorporate sustainability strategy into their chosen career path. Learning Objectives: 1. Articulate the sustainability challenges facing today's corporation in terms that will make executives receptive to action 2. Employ organizational change management techniques to spur environmentally-friendly product and process innovation 3. Expand the repertoire of techniques for priming the market for new sustainability offerings 4. Refine collaboration skills within multi-disciplinary teams 5. Improve oral and written presentation skills for executive audiences This class is appropriate for those seeking positions within large enterprises or business consultancies, or those seeking to refine their thinking on social entrepreneurship.

GSBGEN 554. Savvy: Crafting Effective Communication. 1 Unit.

This course is designed for individuals interested in improving their communication skills. As a leader, you will spend the majority of your time communicating with others team members, subordinates, clients, and other constituents. Right now, you probably don't spend much time thinking about the way you communicate, nor are you likely, in the corporate setting, to get honest feedback on the messages you send. Yet the quality of your communications will have a large impact on your overall effectiveness. This class will help you appreciate the nature and complexity of communication and provide guidelines for both improving your communication style and recognizing the unique styles of others. The class is based on the assumption that organizations are fundamentally political entities, and interpersonal influence through communication is a key mechanism by which things get done. Effective leaders don't simply lead by fiat they often must influence and persuade others to go along with their ideas. In each session, we'll consider a number of well-studied tactics of interpersonal communication. For each tactic, we'll talk about why it works, when it works best, and what its limitations might be. We'll discuss how you can put these approaches to work in order to support your attempts at persuasion and how to resist them as an unwilling target of persuasion. After taking this course, you will be better able to: (1) identify strategies for crafting effective communication in the form of everyday conversation, written work, and public presentations, (2) develop techniques for building strong, long-term alliances with your colleagues, and (3) become more persuasive in advancing an agenda, acquiring resources, or eliciting compliance from others. These skills will be invaluable to you throughout your career.

GSBGEN 555. Designing Empathy-Based Organizations. 1 Unit.

Organizations are often designed for efficiency or optimization of workflow, not for user empathy. How do you design for both? This pop-up class is geared toward the design (or redesign) for empathy-based organizations. It will teach early-stage leaders about the three basic levers they have for organizational design/re-design: organizational culture, organizational structure (informal and formal), and organizational routines. Emphasis will be placed on how to align these levers to facilitate communication and to structure workflows for empathy-based organizations. The class will work with a fast-growing, design-driven startup, which will articulate to students its goals as a business, as well as its challenges in designing the business. Students will interview and observe multiple stakeholders from diverse teams and use design thinking to address uncovered needs and insights with respect to organizational design.

GSBGEN 557. Authenticity in Markets: The Case of the Wine Industry. 1 Unit.

Evidence has mounted that consumer care about issues of authenticity in many kinds of markets. This seminar explores the meanings of authenticity in market contexts. It emphasizes the idea that authenticity attaches as much or more to the characteristics and actions of producers than to characteristics of products. Although these issues arise in many kinds of markets, they are especially intense for food and drink. So the seminar emphasizes these contexts, especially the wine industry. In wine production we see battles over the "soul of wine," what it means for a wine to provide an authentic representation of terroir, national traditions, and so forth. Especially interesting for understanding authenticity is the recent success of biodynamic producers.

GSBGEN 561. Sports Business Financing. 2 Units.

Course examines investment and financing issues that face a diverse set of participants in the sports industry (defined very broadly). A key theme is using general financial concepts to better structure decision making in the sports industry. Specific topics illustrate the broad set of perspectives considered: Player Payroll Financial Dynamics; Asset Appreciation Opportunities; Assessing the Value of Players (& General Managers); Investment Syndicates in Sports; Investing in Startup Leagues; Financial Valuation of Sporting Clubs; Financial/Strategy Analysis for a Mixed Martial Arts (MMA) Venture; and On-Line Sports Venture Evaluation. One hand in requires feedback to the CEO's of several new sporting ventures about ways to expand their opportunity set; the CEO's come to a class and present their venture. The second hand in is a case study of a sports investment where there was sizable value creation or value destruction. Each session typically is co-taught with an industry visitor.

GSBGEN 562. Sports Marketing. 2 Units.

This Sports Marketing course combines (a) a focus on key marketing themes (such as branding, customer attraction/retention, and celebrity power) and (b) an analysis of marketing in diverse areas of the sporting industry: the league level, the team level, the player level, the network level, the advertiser level, the sponsor level, the fan level, and the media level. The nine sessions cover the following: Corporate Sponsorship; Online Marketing; Events as Brand Building Investments; Marketing to Youth; Sports/Entertainment Nexus; Club Marketing Strategies; Brand Revitalization & Strengthening; Motor Sports Marketing; Marketing in a Web 2.0/Social Networking World. Each session is typically taught with an industry visitor.

GSBGEN 564. The Entertainment Industry - An Intersection of Art and Commerce. 2 Units.

In this seminar we will explore the intersection of art and commerce in the entertainment industry. We will look at creating films and television programming that are artistically meaningful and/or have the potential for commercial success. Films are also increasingly used as a tool for social change, and we will examine this power. The entertainment industry is one of enormous importance - both from a business and cultural standpoint, and has influence in virtually every sphere of our society. Sometimes the industry can seem baffling, mercurial, and characterized more by madness than method. But despite its uncertainties, Hollywood does have its own rules, rhythms, methods and strategies - and examining and evaluating them will be a key part of this seminar. This is a time when old formulas are being reconsidered or jettisoned, and emergent technologies are bringing further changes - and tracking and analyzing them, will also be part of the class. As a writer, producer, director in film and television, I will also bring my own experiences into the classroom, where I'll discuss my work (including directing, writing, acquiring financing, producing films, executive producing a network series, etc.), and its rewards and challenges, and look at these experiences thorough the intersection of the business and creative sides of the industry. The students in the seminar, working either individually or in small groups, will be asked to generate and present proposals for projects that have artistic and/or commercial merit, and we will examine how they may best fit into the industry - to gain widespread distribution or have social influence. The seminar will cover the entertainment industry from multiple angles and be very discussion oriented.

GSBGEN 565. Political Communication: How Leaders Become Leaders. 2 Units.

Politics, perhaps like no other arena, provides a rich and dramatic laboratory for studying the art and science of influential communication. Whether it is a local school bond election or a Congressional race, a Presidential debate or a State of the Union Address, the demanding communications of politics provide insights into our own strengths and gaps as a communicator and leader. Political campaigns, by their very nature, are highly visible, oriented toward very specific objectives, and increasingly leverage a variety of new media platforms. They are often emotionally charged, and rife with conflict and drama. The principles of political communications transcend politics, and are useful guides for leaders in business, the non-profit community, as well as government. How candidates, elected officials, and leaders in all kinds of organizations communicate vision, values, and experience, as well as how they perform in very fluid environments, not the least of which may be during a crisis, has a great deal to do with their career success. In its sixth year, this highly interactive course allows students to explore both theory and practice behind effective positioning and presentation. Students will analyze and evaluate both successful and unsuccessful communications strategies of political campaigns and candidates. They will explore historic examples of US Presidential debates, from Nixon/Kennedy to the present. Further they will experience political events as they happen -- with each class drawing lessons from political developments around the nation and the world. Students will also hone their own strategic communications skills in a final activity requiring both written and spoken communication. This is not a course in political science, American government, or in public speaking. However, the engaged student will gain insights into those areas as well. The course is taught by David Demarest, Vice President of Public Affairs for Stanford University. Demarest has broad communications experience across the public and private sector in financial services, education, and government. After serving as Assistant U.S. Trade Representative, and Assistant Secretary of Labor in the Reagan Administration, in 1988 he served as Communications Director for Vice President George H. W. Bush's successful presidential campaign. He then became a member of the White House senior staff as White House Communications Director. After leaving government in 1993, he spent the next decade leading communications for two Fortune 50 companies, before coming to Stanford in 2005.

GSBGEN 566. Real-Life Ethics. 2 Units.

GSBGEN 566 will be an elective course offered to 2nd-year MBA and Sloan students. The goal of this course is to improve students' judgment in confronting ethical situations encountered in the normal course of business activities. Classes use the Socratic method to examine ethical questions and build analytical skills. The course aims to sharpen moral reasoning and build judgment without favoring a particular position. The course will be taught by Mark Leslie and Peter Levine, Lecturers, and will include additional guest lecturers in many of the specific areas. The course, which will be case-based, will involve frequent student-to-student and student-to-instructor role-playing. Cases will be drawn from a wide selection of business situations, including such topics as raising venture capital, managing major industrial customers, product distribution agreements, board of director fiduciary conflicts, developing financial instruments, senior management mutiny, etc. This class is for two GSB credits and will be graded on a pass/fail basis. Sixty percent of the final grade will be derived from classroom performance; the remainder will be based on a final written assignment.

GSBGEN 567. SEEDing Change: Approaches and Innovations in Poverty Alleviation. 2 Units.

This Bass Seminar is an opportunity to help lay the foundation for the GSB's new initiative on poverty alleviation in developing economies, the Stanford Institute for Innovation in Developing Economies (nicknamed SEED). Following an introduction to the major approaches to poverty alleviation and the role of entrepreneurial activity, the course will be a student-driven seminar. Groups of students will work on focused projects of their choosing within the confines of SEED's mission, which is to stimulate, develop, and disseminate research and innovations that enable entrepreneurs, managers, and leaders to alleviate poverty in developing economies. A particular focus will be given to exploring and assessing the different ways in which SEED can most effectively help entrepreneurs in developing countries grow and scale. Project deliverables can take a variety of forms, including business plans, proofs of concept, case studies, teaching notes, etc.

GSBGEN 568. Managing Difficult Conversations. 2 Units.

This elective 2-credit course is offered to 2nd-year, 3rd-year, and 4th-year Medical students, Residents, and Fellows, and to 2nd-year MBA students who aspire to improve their ability to deal effectively with difficult interpersonal situations. The course will be taught at Stanford Medical School by H. Irving Grousbeck, Consulting Professor of Management, Stanford Graduate School of Business, with assistance from Dr. Charles G. Prober, Senior Associate Dean for Medical Education. Teaching techniques that have been successful in helping business school students improve their ability to manage difficult conversations will be used. The course, which will be case-based, will involve frequent student-to-student and student-to-instructor role-playing in actual medical situations. Physician-experts often will be present to participate as class guests. Relevant principles of professionalism, leadership, and psychology underlie the course pedagogy. There will be seven classes held on Wednesdays beginning September 25th and concluding on November 13th. (No class on October 23) Each class will begin promptly at 12:30 and end at 2:15, without a break. Due to the abbreviated nature of the class (7 sessions), students will be expected to attend all classes unless excused in advance. Class preparation will include reading of assigned cases; analysis of the cases and recommendations as to how to confront specific difficult conversations (consistent with assigned study questions); and reading of assigned background material. While optional, it is suggested that students form regular study groups. For GSB students, 50% of the final grade will depend on classroom performance; the remainder will be based on a final written assignment of no more than 6 pages. GSB students will be graded on a Pass/Fail basis. The course will be ungraded for Medical School students, Residents and Fellows. All students will be expected to complete the written assignment. Class size will be limited to 35 students per the following: (1) a maximum of 15 MBA2 students and (2) a maximum of 20 2nd-year, 3rd-year and 4th-year Medical Students, Residents, and Fellows.

GSBGEN 569. Online Financial Training for Managers and Entrepreneurs in Developing Economies. 2 Units.

Growing and scaling a successful business demands familiarity and comfort with financial principles and decision-making. Yet particularly in developing countries, where the need for growth is greatest, a large fraction of the population, and entrepreneurs and managers in particular, lack this basic knowledge. The goal of this project-based seminar is for teams of students to develop education modules for teaching financial literacy to entrepreneurs in developing economies. We will partner with on the ground organizations who work directly with these entrepreneurs, and who can provide feedback on the user's needs and market validation for project teams' approaches. We will examine research on the effectiveness of credit-linked training and review some existing programs offering similar training. Students will be expected to deliver a short training video at the end of the course.

GSBGEN 571. Becoming a Leader: Managing Early Career Challenges. 2 Units.

This course is based on 60 interviews with MBA grads who have been out of the GSB for 4-10 years. These interviews identified a set of common early career challenges that young MBAs faced--and the lessons they learned from these. This 10-session course is based on these critical transitions, formative experiences, and personal conflicts that characterize the challenges young leaders face. The course objective is to help current students better understand some of the pitfalls they are likely to face as they become leaders and to avoid the career-limiting mistakes that these can bring.

GSBGEN 572. The Art of Damage Control. 2 Units.

In the Information Age, there are two kinds of leaders, institutions, and organizations: those who have been hit with a crisis and those who haven't been around very long. And of those who have confronted a crisis, the landscape has a few winners, but is crowded with losers who simply did not have what it took to survive the crisis. Crisis is a constant state of nature in our age and if you do not effectively fight back, in the modern spin cycle, you will no longer have your brand, your image, or your reputation. This course will cover the strategies, techniques, and art of damage control. The course will also explore the five fundamental elements responsible for why we live in a state of crisis: the proliferation of media outlets communicating information; the speed in which information travels; the erosion of trust from society related to the quality of information received; the capacity to selectively leverage information; and the community nature of how information is developed and shared. Building from an analysis of these elements, we will explore methods of surviving and thriving in this environment. The course will also offer detailed approaches to managing one's way through a crisis. We will provide case studies of those who failed to master the art of damage control whose mistakes endangered the survival of their company and/or their careers. We will also study cases where those in a crisis handled it deftly. By considering, analyzing, and reviewing these techniques, it is hoped the students will learn how best manage the crisis - and what it takes to survive. The course will co-taught by Chris Lehane and Bill Guttentag. Chris Lehane is one of the nation's leading political consultants with a particular expertise in damage control. He was a Special Assistant Counsel to President Bill Clinton where he was responsible for helping to manage the Clinton White House's damage control operation and later served as Vice President Al Gore's Press Secretary, and has been a top advisor to many who have run for President, Senate, Governor or other elected offices, both in the US and internationally. He consults for numerous Fortune 500 Companies, professional sports leagues and teams, Hollywood studios and high profile individuals. Bill Guttentag is a narrative and documentary film writer, producer, director who has been teaching at the GSB since 2001. He is a two-time Oscar winner, his films have played extensively in the US and internationally, and have premiered at a number of prominent film festivals including Sundance and Cannes. Lehane and Guttentag are the co-authors of *Masters of Disaster: The 10 Commandments of Damage Control*. The book will be published this fall by Palgrave/Macmillan and will serve as the principal text for this course.

GSBGEN 575. Leadership and Crisis Management. 2 Units.

During this class, you will:

- * Challenge your basic beliefs about the nature of crisis
- * Learn to scan your business practices for political and social risks
- * Anticipate and prepare for potential crises
- * Explore techniques for successfully solving problems in high-pressure crisis situations characterized by complex decision environments, time-pressure, high stakes, unanticipated events, and information overload
- * Develop strategies for managing stakeholders, public opinion, media relations, and public officials
- * Integrate your crisis management approach into your overall business strategy.

GSBGEN 576. Work and Family. 2 Units.

This course examines the strategies that highly educated women and men use to combine work and family and the strategies that managers and policy makers can use to help others strike a balance. Topics include the tradeoffs in becoming a stay-at-home parent, the economic value of unpaid labor, the consequences of balancing two high-powered careers and children, the economics of marriage, fertility, child care, and elder care, the gendered division of labor in the home, time-management, workplace innovations, and policy initiatives. Guest speakers add their own perspectives on these issues and describe the roles their organizations play.

GSBGEN 578. Decisions About the Future. 2 Units.

How should you decide between now and the future? This course will cover the descriptive and prescriptive theories of intertemporal choice in psychology and economics. Topics will include financial decision making, social (who should you marry?), environmental, and health. The goal of the course is to maximize the long term happiness and effectiveness of yourself and others. Grading will be based on: class participation, a decision diary (in three parts), and an exam.

GSBGEN 580. Management of Real Estate Investment Portfolios. 2 Units.

This course is intended for any student interested in a career in managing, developing, or investing in real estate. The course covers cases involving the perspectives of general partners and limited partners; the attributes of successful real property investment firms; analyses of investment portfolios and individual transactions, primarily in the private equity real estate category. Cases will be global. Objectives include:

- How to construct a private real estate portfolio;
- How to assess the risks in projects and portfolios;
- How to perform relative value analyses of differing investments;
- How to manage troubled investments (when to "hold 'em" and when to fold 'em').

The course is divided into three modules with special emphasis on real estate financial analysis for transactions and portfolios. The first module will focus on portfolio construction issues and how to quantify whether the investor has been successful. The second module will focus on underwriting individual transactions and applying a relative value construct in determining the more attractive investments. The third module will focus on the management of troubled investments, including deciding when to "double down" and how to protect investments already in place.

GSBGEN 585. Social Innovation through Corporate Social Responsibility. 2 Units.

This course accepts that the (CSR) movement linking business, communities and sustainability has moved past the stage of debate. The last decade has seen an increased awareness in regard to environmental and social issues that has found its way up the corporate ladder and into company boardrooms. How companies incorporate CSR programs and strategies, however, is varied and diverse. The course will utilize reading assignments, case analysis and/or company presentations to provide an overview of CSR, the frameworks and models for developing a CSR strategy and the growing utilization of cross-sector partnerships in CSR and innovation efforts. Particular focus will be on cutting edge business strategies for squaring social and environmental responsibilities with competitive demands. The latter part of the course will examine the role of cross-sector partnerships as a critical lever. Cross-sector collaboration is increasingly desirable as a strategy for addressing many of society's problems; however, research evidence indicates that it is hardly easy. Guests will bring to life the challenges and rewards in working collaboratively to implement social change.

GSBGEN 586. Poverty, Entrepreneurship, and Development. 2 Units.

Global poverty is a problem that persists on a massive scale, and its persistence may itself be a major impediment to growth in emerging economies. Recent years have seen a blossoming interest in socially innovative approaches to alleviating poverty and stimulating economic growth in emerging economies. In this short course, we will explore different conceptualizations of the problem of global poverty, the potential role of entrepreneurship in helping to address it, as well as the strengths and weaknesses of different approaches. Some possible areas of focus include:

- Different conceptualizations of the main drivers of persistent, extreme poverty
- The challenges to entrepreneurship posed by the institutional environments of emerging economies
- The appropriate role of entrepreneurship as a means of addressing the concerns of the poor
- The pros and cons of different models (e.g., venture philanthropy, social enterprise, non-profit)
- Ethical issues and concerns associated with different strategies

In addition to reading and in-class discussion, the course will also draw on the expertise and experiences of one or more guest speakers.

GSBGEN 587. Survive and Thrive: The Art of Navigating Crucial Conversations. 2 Units.

Careers are enjoyed in the good times but truly made when challenging situations are successfully managed throughout every business cycle. Individuals who both perform well and communicate effectively in tense situations, gain the attention of senior management and are relied upon to deliver. A key to this success is the ability to successfully navigate crucial conversations. Crucial conversations are those which not only have a bearing on your firm and business but, also can also enhance or destroy your own personal reputation and credibility by poorly communicated situation analysis, facts and the mode in which you deliver information. Sometimes these conversations take place in minutes while others evolve over the course of days and weeks. Regardless, a professional's ability to read the "tea leaves" and execute a communication plan to address is vitally important to long term career success. This highly interactive course will take you through a series of business inflection points in a simulated firm where you will be expected to navigate different situations and make quick decisions both as an individual and as part of a team. Students can expect to leave this course with a heightened sense of their own gifts as communicators, a greater understanding of the research around effective communication, and specific tools and tactics to use throughout their career when faced with pivotal situations. Attendance at all six sessions is required to pass this course and participation counts for half the grade. Students will regularly give and receive feedback with their peers on their ability to apply course concepts in the simulation as it unfolds. While no prerequisite exists for this course, we expect that students seeking fundamentals of communication consider other course offerings. This course relies on students who are already reasonably comfortable communicating in high-stakes settings seeking greater mastery and nuance in their communication. Required pre-reading will provide the theoretical frameworks and case background necessary for the six-session simulation. One final reflection paper will be due within a week after the final class session. The balance of each student's grade is based on their participation and learning within the simulation and the depth and quality of their feedback to peers. This course is co-created and co-taught by JD Schramm and Steve Mellas. Schramm brings over a decade of MBA communication teaching and coaching to the course along with more than 15 years of professional experience in healthcare, financial services, and education. He founded the GSB's Mastery Initiative and co-founded LOWKeynotes. He is a sought out speaker and coach with two talks in the TED library. Mellas serves as a principal at AQR Capital in Greenwich CT where he oversees operations. Prior to joining AQR he worked for Goldman Sachs as a Managing Director in the Investment Management Division with responsibility for Asset Management Operations worldwide. Before that Mellas was with Morgan Stanley where he managed fixed income trading operations. Schramm and Mellas have teamed up on a number of highly ranked courses at NYU Stern since 2005 and hatched this latest collaboration while delivering a Mastery workshop for the GSB in January 2012.

GSBGEN 598. Stanford-Tsinghua Exchange Program. 2 Units.

This course is open only to students participating in the Stanford-Tsinghua Exchange Program and is required of those students. Requirements include researching and reporting on companies to be visited, attending lectures in preparation for the China visit, attending lectures at Tsinghua, and carrying out and reporting on a project with one or more Tsinghua student. Offered Pass/No Pass only. 2 units. Winter quarter.

GSBGEN 635. Neuroscience for Business and Economics. 4 Units.

A growing number of scholars in business and economics are turning to neuroscience for new theoretical insights and new methodologies. This seminar will explore how findings from neuroscience can inform research in business and economics. The objectives of this course are for students to: Gain an understanding of the basic theories of neuroscience. Gain an understanding of the basic methodologies of neuroscience, including behavioral paradigms, eye-tracking, and fMRI. Survey the key literature at the intersection of business, economics, and neuroscience. Learn how to critically reflect on and evaluate research that uses principles from neuroscience. Learn how to design experiments that utilize principles from neuroscience.

GSBGEN 641. Advanced Empirical Methods. 3 Units.

This course covers various advanced quantitative methods with applications in marketing and economics. Topics include simulation-based estimation, dynamic decision processes, and other topics relating to empirical models of demand and supply. The course stresses the conceptual understanding and application of each technique. Students will learn to apply these techniques using Matlab or an equivalent language.

GSBGEN 645. Communication Strategies for Scholars. 2 Units.

Educators must be experts in their subject matter, but also effective scholarly communicators. This course will examine the theories for effective communication in the wide range of settings that PhDs will encounter: seminars, academic conferences, job talks, and ultimately in the classroom. This course will provide PhD candidates with the opportunity to practice course principles in simulated communication settings and receive direct and filmed feedback on their performance. Students will benefit from participating in observations of GSB classes (within and beyond their discipline), readings on current education and communication theory and practice, class discussion, and visits from GSB professors. Learning Objectives: By the end of this course students will: Understand the essentials of oral communication in scholarly settings. Understand the fundamentals of business education including syllabus development, classroom instruction, case method teaching, assessment and grading. Understand and practice the essential elements of effective presentations - the verbal, vocal, and visual aspects of oral presentation. Articulate essential distinctions of teaching undergraduate, graduate (including MBA), and executive education students, and how to adapt their approach for these audiences. Demonstrate effectiveness as a presenter and growth in the ability to plan and present content in a variety of simulated settings from benchmark to final mock class. Apply course content to job talks, conference presentations, and other professional settings beyond the classroom. Evaluate peers and other educators on their ability to practice effective teaching and presentation delivery.

GSBGEN 646. Behavioral Decision Making. 3 Units.

This seminar examines research on the psychology of judgment and choice. Although the normative issue of how decisions should be made is relevant, the descriptive issue of how decisions are made is the main focus of the course. Topics of discussion include choice, judgment heuristics and biases, decision framing, prospect theory, mental accounting, context effects, task effects, regret, and other topics. The goal of the seminar is twofold: to foster a critical appreciation of existing knowledge in behavioral decision theory, to develop the students' skills in identifying and testing interesting research ideas, and to explore research opportunities for adding to that knowledge.

GSBGEN 652. Online Research Methods. 2 Units.

This course will cover the practicalities of running research on the internet, including: online research tools, experimental design, online process measures, subject pool selection, detecting and dealing with inattentive participants, basic programming techniques, debugging, data organization, and data cleaning. Class time and assignments will take a hands-on approach, giving you direct experience and practice. There will be two main projects, both of which should be useful for your research. The first will be creating a personal web page (or, if you already have a web page that you like, you can substitute a different project). The second assignment will be designing and running an online experiment with a dynamic component. Grading will be based on these projects, as well as class participation and small weekly assignments.

GSBGEN 691. PhD Directed Reading. 1-15 Unit.

This course is offered for students requiring specialized training in an area not covered by existing courses. To register, a student must obtain permission from the faculty member who is willing to supervise the reading.

Same as: ACCT 691, FINANCE 691, HRMGT 691, MGTECON 691, MKTG 691, OB 691, OIT 691, POLECON 691, STRAMGT 691.

GSBGEN 692. PhD Dissertation Research. 1-15 Unit.

This course is elected as soon as a student is ready to begin research for the dissertation, usually shortly after admission to candidacy. To register, a student must obtain permission from the faculty member who is willing to supervise the research.

Same as: ACCT 692, FINANCE 692, HRMGT 692, MGTECON 692, MKTG 692, OB 692, OIT 692, POLECON 692, STRAMGT 692.

GSBGEN 698. Doctoral Practicum in Teaching. 1-2 Unit.

Doctoral Practicum in Teaching.

GSBGEN 699. Doctoral Practicum in Research. 1-2 Unit.

Doctoral Practicum in Research.

GSBGEN 802. TGR Dissertation. 0 Units.

Same as: ACCT 802, FINANCE 802, HRMGT 802, MGTECON 802, MKTG 802, OB 802, OIT 802, POLECON 802, STRAMGT 802.

Genetics Courses

GENE 104Q. Law and the Biosciences. 3 Units.

Preference to sophomores. Focus is on human genetics; also assisted reproduction and neuroscience. Topics include forensic use of DNA, genetic testing, genetic discrimination, eugenics, cloning, pre-implantation genetic diagnosis, neuroscientific methods of lie detection, and genetic or neuroscience enhancement. Student presentations on research paper conclusions.

GENE 199. Undergraduate Research. 1-18 Unit.

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

GENE 200. Genetics and Developmental Biology Training Camp. 1 Unit.

Open to first year Department of Genetics and Developmental Biology students, to others with consent of instructors. Introduction to basic manipulations, both experimental and conceptual, in genetics and developmental biology.

Same as: DBIO 200.

GENE 202. Human Genetics. 4 Units.

Utilizes lectures and small group activities to develop a working knowledge of human genetics as applicable to clinical medicine. Basic principles of inheritance, risk assessment, and population genetics are illustrated using examples drawn from diverse areas of medical genetics practice including prenatal, pediatric, adult and cancer genetics. Practical aspects of molecular and cytogenetic diagnostic methods emphasized. Existing and emerging treatment strategies for single gene disorders are also covered. Prerequisites: biochemistry, basic genetics.

GENE 205. Advanced Genetics. 3 Units.

For PhD students in any of the Biosciences Departments and Programs at Stanford University. Emphasis on developing the ability to solve problems using genetic ideas and methods, to understand the nature and reliability of genetic inference, and to apply genetic reasoning to biological research. Weekly paper discussions based on original research papers that define or illustrate the ideas and techniques covered in the lecture.

GENE 206. Epigenetics. 2 Units.

For graduate students in the Biosciences and upper level Biology undergraduates. Mechanisms by which phenotypes not determined by the DNA sequence are stably inherited in successive cell divisions. From the discovery of position-effect variegation in *Drosophila* in the 1920s to present-day studies of covalent modifications of histones and DNA methylation. Topics include: position effect, gene silencing, heterochromatin, centromere identity, genomic imprinting, histone code, variant histones, and the role of epigenetics in cancer. Prerequisite: BIO41 and BIO42, or GENE 203 or GENE 205, or consent of instructor. Same as: BIO 156, BIO 256, PATH 206.

GENE 209. Current Topics in Human, Population, and Statistical Genomics. 2 Units.

Intensive seminar/workshop. Topics, drawn from current and past literature, may include: assessing and population genetic analysis of genomic variation; genome-to-phenome mapping; reconstructing demographic history from genome sequence data; domestication genomics; host-pathogen genome evolution; detecting signatures of selection; experimental design in human genetics; linkage and association mapping; ethical and social issues in human, plant, and animal genetics research. Emphasis on analysis and logic or experimental and observational genomics research. Faculty-led discussion with evaluation of response papers, problem sets, and intensive course project. May be repeated for credit.

GENE 210. Genomics and Personalized Medicine. 3 Units.

Principles of genetics underlying associations between genetic variants and disease susceptibility and drug response. Topics include: genetic and environmental risk factors for complex genetic disorders; design and interpretation of genome-wide association studies; pharmacogenetics; full genome sequencing for disease gene discovery; population structure and genetic ancestry; use of personal genetic information in clinical medicine; ethical, legal, and social issues with personal genetic testing. Hands-on workshop making use of personal or publicly available genetic data. Prerequisite: GENE 202, Gene 205 or BIOS 200. Same as: DBIO 220.

GENE 211. Genomics. 3 Units.

Genome evolution, organization, and function; technical, computational, and experimental approaches; hands-on experience with representative computational tools used in genome science; and a beginning working knowledge of PERL.

GENE 212. Introduction to Biomedical Informatics Research Methodology. 3 Units.

Hands-on software building. Student teams conceive, design, specify, implement, evaluate, and report on a software project in the domain of biomedicine. Creating written proposals, peer review, providing status reports, and preparing final reports. Guest lectures from professional biomedical informatics systems builders on issues related to the process of project management. Software engineering basics. Prerequisites: BIOMEDIN 210, 211, 214, 217 or consent of instructor. Same as: BIOE 212, BIOMEDIN 212, CS 272.

GENE 214. Representations and Algorithms for Computational Molecular Biology. 3-4 Units.

Topics: introduction to bioinformatics and computational biology, algorithms for alignment of biological sequences and structures, computing with strings, phylogenetic tree construction, hidden Markov models, Gibbs Sampling, basic structural computations on proteins, protein structure prediction, protein threading techniques, homology modeling, molecular dynamics and energy minimization, statistical analysis of 3D biological data, integration of data sources, knowledge representation and controlled terminologies for molecular biology, microarray analysis, machine learning (clustering and classification), and natural language text processing. Prerequisites: programming skills; consent of instructor for 3 units. Same as: BIOE 214, BIOMEDIN 214, CS 274.

GENE 215. Frontiers in Biological Research. 1 Unit.

Literature discussion in conjunction with the Frontiers in Biological Research seminar series in which investigators present current work. Students and faculty meet beforehand to discuss papers from the speaker's primary research literature. Students meet with the speaker after the seminar to discuss their research and future directions, commonly used techniques to study problems in biology, and comparison between the genetic and biochemical approaches in biological research. Same as: BIOC 215, DBIO 215.

GENE 217. Translational Bioinformatics. 4 Units.

Analytic, storage, and interpretive methods to optimize the transformation of genetic, genomic, and biological data into diagnostics and therapeutics for medicine. Topics: access and utility of publicly available data sources; types of genome-scale measurements in molecular biology and genomic medicine; analysis of microarray data; analysis of polymorphisms, proteomics, and protein interactions; linking genome-scale data to clinical data and phenotypes; and new questions in biomedicine using bioinformatics. Case studies. Prerequisites: programming ability at the level of CS 106A and familiarity with statistics and biology.

GENE 218. Computational Analysis of Biological Information: Introduction to Python for Biologists. 2 Units.

Computational tools for processing, interpretation, communication, and archiving of biological information. Emphasis is on sequence and digital microscopy/image analysis. Intended for biological and clinical trainees without substantial programming experience. Same as: MI 218, PATH 218.

GENE 221. Current Issues in Aging. 2 Units.

Current research literature on genetic mechanisms of aging in animals and human beings. Topics include: mitochondria mutations, insulin-like signaling, sirtuins, aging in flies and worms, stem cells, human progeria, and centenarian studies. Prerequisite: GENE 203, 205 or BIOS 200.

GENE 224. Principles of Pharmacogenomics. 3 Units.

Introduction to the relevant pharmacology, genomics, experimental methods for high-throughput measurements (sequencing, expression, genotyping), analysis methods for GWAS, chemoinformatics, and natural language processing. Review of key gene classes (cytochromes, transporters, GPCRs), key drugs for which genetics is critical (warfarin, clopidogrel, statins, NSAIDs, neuropsychiatric drugs and cancer drugs). Also reviews resources for pharmacogenomics (PharmGKB, Drugbank, CMAP, and others) as well as issues in doing clinical implementation of pharmacogenomics testing. Reading of key papers, including student presentations of this work. Problem sets; final project selected with approval of instructor. Prerequisites: two of BIO 41, BIO 42, BIO 43, BIO 44X, BIO 44Y or consent of instructor. Same as: BIOMEDIN 224.

GENE 233. The Biology of Small Modulatory RNAs. 2 Units.

Open to graduate and medical students. Explores recent progress and unsolved questions in the field of RNA interference and microRNA biology. Students are required to read assigned primary literature before each class and actively participate in guided discussions on related technical and conceptual issues during class meetings. Assignments include critiques of assigned papers and developing a novel research proposal. Same as: MI 233, PATH 233.

GENE 234. Fundamentals of RNA Biology. 2 Units.

For graduate or medical students and (if space allows) to active participants from other segments of the Stanford Community (e.g., TGR students); undergraduates by instructor consent. Fundamental issues of RNA biology, with the goal of setting a foundation for students to explore the expanding world of RNA-based regulation. Each week a topic is covered by a faculty lecture and journal club presentations by students. Same as: MI 234, PATH 234.

GENE 235. C. Elegans Genetics. 2 Units.

Genetic approaches to *C. elegans*, practice in designing experiments and demonstrations of its growth and anatomy. Probable topics include: growth and genetics, genome map and sequence, mutant screens that start with a desired phenotype, reverse genetics and RNAi screens, genetic duplications, uses of null phenotype non-null alleles, genetic interactions and pathway analysis, and embryogenesis and cell lineage. Focus of action, mosaic analysis, and interface with embryological and evolutionary approaches.

GENE 243. Intellectual Property: Scientific Evidence in Patent Litigation. 3 Units.

(Same as LAW 343) Open to clinical MD and graduate students. Explores the role of scientific experts in patent infringement litigation. In other areas of the law where scientific experts are used -- medical malpractice, environmental law, criminal law -- the science itself is often in dispute. In patent cases, however, the parties generally agree on the science. This affects the relationship between the lawyer and the expert and the substantive content of their interactions. Patent experts need to be able to explain science to the judge and jury. But they also must help the litigators choose which legal issues to press and which to concede, and to be aware of how the complications of the science might help, hurt, obscure or reveal how the law should be applied to the facts. The class examines judicial decisions and trial documents involving scientific evidence in patent litigation, followed by work in teams on final projects: simulations of expert testimony in a patent case. Simulations are performed at the end of the quarter before panels of practicing patent lawyers. Prerequisite: graduate students must have completed their required coursework and have TGR status.

GENE 244. Introduction to Statistical Genetics. 3 Units.

Statistical methods for analyzing human genetics studies of Mendelian disorders and common complex traits. Probable topics include: principles of population genetics; epidemiologic designs; familial aggregation; segregation analysis; linkage analysis; linkage-disequilibrium-based association mapping approaches; and genome-wide analysis based on high-throughput genotyping platforms. Prerequisite: STATS 116 or equivalent or consent of instructor. Same as: STATS 344.

GENE 260. Supervised Study. 1-18 Unit.

Genetics graduate student lab research from first quarter to filing of candidacy. Prerequisite: consent of instructor.

GENE 267. Molecular Mechanisms of Neurodegenerative Disease. 4 Units.

The epidemic of neurodegenerative disorders such as Alzheimer's and Parkinson's disease occasioned by an aging human population. Genetic, molecular, and cellular mechanisms. Clinical aspects through case presentations.

GENE 271. Human Molecular Genetics. 4 Units.

For genetic counseling students, graduate students in genetics, medical students, residents, and postdoctoral fellows interested in the practice of medical genetics and genomics. Gene structure and function; the impact of mutation and polymorphism as they relate to developmental pathways and human disease; mitochondrial genetics; approaches to the study of complex genetic conditions; GWAS and genome sequencing technologies; variant curation; gene therapy, stem cell biology, and pharmacogenetics. Undergraduates require consent of instructor and a basic genetics course.

GENE 272. Introduction to Medical Genetics. 2-3 Units.

For genetic counseling students, graduate students in human genetics, medical students, residents, and fellows; undergraduates with consent of instructor. Principles of medical genetics practice, including taking a family history, modes of inheritance and risk assessment, and mathematical principles of medical genetics (Bayes theorem, population genetics). An additional problem set is required for 3 units.

GENE 273. Introduction to Clinical Genetics Testing. 1 Unit.

For genetic counseling students, medical students, residents, and fellows. Uses a combination of case based assignments, laboratory observation and didactic lectures to introduce the laboratory concepts of cytogenetics, molecular genetics and biochemical genetics, and to illustrate common genetic conditions that are commonly diagnosed through genetic testing, introducing students to skills in case preparation, management and presentation.

GENE 274A. A Case Based Approach to Clinical Genetics. 2 Units.

For genetic counseling students, graduate students in genetics, medical students, residents and fellows. Case-based scenarios and guest expert lectures. Students learn skills in case preparation, management, and presentation, as well as content around common genetic disorders.

GENE 274B. A Case Based Approach to Clinical Genetics. 2 Units.

For genetic counseling students, graduate students in genetics, medical students, residents, and fellows. Case-based scenarios and guest expert lectures. Students learn skills in case preparation, management, and presentation, as well as content around common genetic disorders. This course is a continuation of GENE 274A, but may be taken individually with instructor permission.

GENE 275. Role Play and Genetic Counseling Observations. 2 Units.

Students role play aspects of genetic counseling sessions and learn through clinical observations. Observation includes genetic counseling sessions in prenatal, pediatric, and cancer settings.

GENE 276. Genetic Counseling Clinical Rotations. 4-7 Units.

For genetic counseling students only. Supervised clinical experiences. May be repeated for credit. Prerequisite: GENE 275.

GENE 278. Prenatal Genetic Counseling. 1 Unit.

Internet-based course for genetic counseling students, graduate students in genetics, medical students, residents, and fellows; genetic counseling students should take this course in conjunction with their initial prenatal genetics rotation. Topics include prenatal genetic screening and diagnosis in the first and second trimesters, ultrasound, teratology, and genetic carrier screening.

GENE 279. Pediatric and Adult Genetic Counseling. 1 Unit.

Internet based course for genetic counseling students, graduate students in genetics, medical students, residents, and fellows; genetic counseling students should take this course in conjunction with their initial general genetics rotation. Topics include: common genetic conditions, assessment of child development and medical history in the context of a genetic workup, the pediatric genetics medical examination, dysmorphology, introduction to laboratory genetic testing, development of a differential diagnosis, and resources for case management and family support.

GENE 280. Metabolic Genetic Counseling. 1 Unit.

Internet based course for genetic counseling students, graduate students in genetics, medical students, residents, and fellows genetic counseling students should take this course in conjunction with their metabolic genetics rotation. Topics include: overview of metabolic diseases; common pathways; diagnosis, management, and treatment of metabolic disorders; and newborn screening.

GENE 281. Cancer Genetic Counseling. 1 Unit.

Internet based course for genetic counseling students, graduate students in genetics, medical students, residents, and fellows; genetic counseling students should take this course in conjunction with their initial cancer genetics rotation. Topics include: cancer biology and cytogenetics; diagnosis and management of common cancer genetic syndromes; predictive testing; psychology of cancer genetic counseling; and topics recommended by ASCO guidelines.

GENE 282A. Genetic Counseling Research Seminar. 1 Unit.

For genetic counseling students only. Facilitated discussions on identifying a topic and mentor for genetic counseling departmental research projects.

GENE 282B. Genetic Counseling Research Seminar. 1 Unit.

For genetic counseling students only. Lectures and facilitated discussions on research methodology for genetic counseling departmental research projects. Prerequisite: GENE 282A.

GENE 283. Genetic Counseling Research. 1-8 Unit.

Genetic counseling students conduct clinical research projects as required by the department for graduation. May be repeated for credit. Pre- or corequisite: GENE 282.

GENE 284. Medical Genetics Seminar. 1-2 Unit.

Presentation of research and cases. Students enrolling for 2 units also attend and report on external seminars. May be repeated for credit.

GENE 285A. Genetic Counseling Seminar. 2-3 Units.

Year-long seminar primarily for genetic counseling students. Autumn: basics of medical communication; crosscultural and disability sensitive communication about genetics, and principles of providing genetic counseling. Undergraduates may enroll in Autumn Quarter with consent of instructor.

GENE 285B. Genetics Counseling Seminar. 2 Units.

Year-long seminar primarily for genetic counseling students. Winter: the impact of chronic illness and genetic disease in a developmental manner.

GENE 285C. Genetic Counseling Seminar. 2 Units.

Year-long seminar primarily for genetic counseling students. Spring: applying therapeutic counseling approaches to the practice of genetic counseling.

GENE 286. Advanced Genetic Counseling Seminar. 2 Units.

For genetic counseling students only. Psychosocial issues associated with genetic counseling cases are discussed through presentation of cases that students have seen throughout their training. Professional development topics will be included. Must be taken for 3 quarters. Prerequisites: GENE 285 A,B,C and 276.

GENE 299. Directed Reading in Genetics. 1-18 Unit.

Prerequisite: consent of instructor.

GENE 399. Graduate Research. 1-18 Unit.

Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

GENE 801. TGR Project. 0 Units.**GENE 802. TGR Dissertation. 0 Units.**

Geological & Environmental Sciences Courses

GES 1A. Introduction to Geology: The Physical Science of the Earth. 5 Units.

For non-majors or prospective majors in the Earth Sciences. Lectures, hands-on laboratories, and three one-day weekend field trips. Focus is on the physical and chemical processes of heat and mass transfer within the earth and its fluid envelopes, including deep-earth, crustal, surface, and atmospheric processes. Topics include the dynamics of and interactions between the inner earth, plate tectonics, surface processes, and atmospheric processes such as climate change and global warming. Only one of GES 1A, 1B, or 1C may be taken for credit. Prerequisites: MATH 19 or equivalent.

GES 1B. Introduction to Geology: California Desert Geology. 4 Units.

For non-majors and prospective majors or minors in the Earth Sciences. The landscapes and rock formations of California's Death Valley and Owens Valley are used as natural laboratories for studying active geologic processes that shape Earth's surface (earthquakes, mountain building, volcanoes, glaciers) and for tracing a billion years of Earth history, climate change, and historic human impacts. Lectures on these topics and hands-on laboratory exercises involving rock identification and interpreting topographic and geologic maps and satellite imagery provide an introduction to physical geology and the background necessary to appreciate an optional 6-day field trip to these desert areas during the Thanksgiving recess, which can be taken separately as GES183. Only one of GES 1A, 1B, or 1C may be taken for credit. Recommended: high school chemistry.

GES 1C. Introduction to Geology: Dynamic Earth. 4 Units.

For non-majors or prospective majors in the Earth Sciences. Integrated lecture-lab includes hands-on activities and local field trips. Focus is on reading the dynamic geological landscape, with an emphasis on California-primarily Bay Area-geology. Topics include plate tectonics, earthquakes and volcanoes, Earth materials, geologic time, stream processes, and climate change over geologic time. Only one of GES 1A, 1B, or 1C may be taken for credit.

GES 4. Evolution and Extinction: Introduction to Historical Geology. 4 Units.

Introduction to the basic tools and principles geologists and paleontologists use to reconstruct the history of the Earth. Principles of stratigraphy, correlation, the geological timescale, the history of biodiversity, and the interpretation of fossils. The use of data from sedimentary geology, geochemistry, and paleontology to test theories for critical events in Earth history such as mass extinctions. Two half-day field trips. Same as: EARTH SYS 4.

GES 5. Living on the Edge. 1 Unit.

A weekend field trip along the Pacific Coast. Tour local beaches, geology, and landforms with expert guides from the Department of Geological and Environmental Sciences. Enjoy a BBQ dinner and stay overnight in cabins along the Santa Cruz coast. Get to know faculty and graduate students in the Earth Sciences. Requirements: Two campus meeting and weekend field trip to Pacific Coast. Enrollment limited to 25. Freshman have first choice.

GES 7A. An Introduction to Wilderness Skills. 1 Unit.

Living, traveling, and working in the wilderness for those planning fieldwork in the back country. Local geology, environmental ethics, trip planning, first aid, and leadership techniques. Four mandatory weekend outings focus on back country travel, minimum impact camping, equipment use and maintenance, rock climbing, and navigation. 7A emphasizes wilderness travel and climbing. 7B emphasizes winter camping skills and back country skiing. Food, group, and major personal gear provided. Guest speakers. Fee. See <http://www.stanford.edu/class/ges7>, or email oepteachers@lists.stanford.edu.

GES 7B. An Introduction to Wilderness Skills. 1 Unit.

Living, traveling, and working in the wilderness for those planning fieldwork in the backcountry. Local geology, environmental ethics, trip planning, first aid, and leadership techniques. Four mandatory weekend outings focus on backcountry travel, minimum impact camping, equipment use and maintenance, rock climbing, and navigation. 7A emphasizes wilderness travel and climbing. 7B emphasizes winter camping skills and backcountry skiing. Food, group, and major personal gear provided. Guest speakers. Fee. See <http://www.stanford.edu/class/ges7>, or email oepteachers@lists.stanford.edu.

GES 7C. Advanced Wilderness Skills. 1 Unit.

For students with prior backcountry experience. Backcountry skiing, mountaineering, climbing, first aid, and trip planning. Focus is on outdoor leadership experience and trip management techniques. Food, group, and major personal gear provided. Four mandatory weekend trips. Fee. See <http://www.stanford.edu/class/ges7/> for information or contact oepteachers@lists.stanford.edu. Prerequisite: application.

GES 8. Oceanography: An Introduction to the Marine Environment. 3 Units.

For non-majors and earth science and environmental majors. Topics: topography and geology of the sea floor; evolution of ocean basins; circulation of ocean and atmosphere; nature of sea water, waves, and tides; and the history of the major ocean basins. The interface between continents and ocean basins, emphasizing estuaries, beaches, and continental shelves with California margin examples. Relationships among the distribution of inorganic constituents, ocean circulation, biologic productivity, and marine environments from deep sea to the coast. One-day field trip to measure and analyze waves and currents.

GES 38N. The Worst Journey in the World: The Science, Literature, and History of Polar Exploration. 3 Units.

This course examines the motivations and experiences of polar explorers under the harshest conditions on Earth, as well as the chronicles of their explorations and hardships, dating to the 1500s for the Arctic and the 1700s for the Antarctic. Materials include *The Worst Journey in the World* by Aspley Cherry-Garrard who in 1911 participated in a midwinter Antarctic sledging trip to recover emperor penguin eggs. Optional field trip into the high Sierra in March.

Same as: EARTHSYS 38N, EESS 38N.

GES 39N. Forensic Geoscience: Stanford CSI. 3 Units.

Preference to freshmen. Geological principles, materials, and techniques indispensable to modern criminal investigations. Basic earth materials, their origin and variability, and how they can be used as evidence in criminal cases and investigations such as artifact provenance and environmental pollution. Sources include case-based, simulated forensic exercises and the local environments of the Stanford campus and greater Bay Area. Local field trips; research presentation and paper.

GES 40N. Diamonds. 3 Units.

Preference to freshmen. Topics include the history of diamonds as gemstones, prospecting and mining, and their often tragic politics. How diamond samples provide clues for geologists to understand the Earth's deep interior and the origins of the solar system. Diamond's unique materials properties and efforts in synthesizing diamonds.

GES 42N. Landscapes and Tectonics of the San Francisco Bay Area. 4 Units.

Active faulting and erosion in the Bay Area, and its effects upon landscapes. Earth science concepts and skills through investigation of the valley, mountain, and coastal areas around Stanford. Faulting associated with the San Andreas Fault, coastal processes along the San Mateo coast, uplift of the mountains by plate tectonic processes, and landsliding in urban and mountainous areas. Field excursions; student projects.

GES 43Q. Environmental Problems. 3 Units.

Preference to sophomores. Components of multidisciplinary environmental problems and ethical questions associated with decision making in the regulatory arena. Students lead discussions on environmental issues such as groundwater contamination from point and nonpoint sources, cumulative watershed effects related to timber and mining practices, acid rain, and subsurface disposal of nuclear waste.

GES 50Q. The Coastal Zone Environment. 3 Units.

Preference to sophomores. The oceanographic, geological, and biological character of coastal zone environments, including continental shelves, estuaries, and coastal wetlands, with emphasis on San Francisco Bay. Five required field trips examine estuarine and coastal environments, and agencies and facilities that manage these resources. Students present original research. Prerequisite: beginning course in Biology such as BIOSCI 51, Chemistry such as CHEM 30 or 31, Earth Sciences such as GES 1 or 2, or Earth Systems such as EARTHSYS 10.

GES 55Q. The California Gold Rush: Geologic Background and Environmental Impact. 3 Units.

Preference to sophomores. Topics include: geologic processes that led to the concentration of gold in the river gravels and rocks of the Mother Lode region of California; and environmental impact of the Gold Rush due to population increase, mining operations, and high concentrations of arsenic and mercury in sediments from hard rock mining and milling operations. Recommended: introductory geology.

GES 90. Introduction to Geochemistry. 3-4 Units.

The chemistry of the solid earth and its atmosphere and oceans, emphasizing the processes that control the distribution of the elements in the earth over geological time and at present, and on the conceptual and analytical tools needed to explore these questions. The basics of geochemical thermodynamics and isotope geochemistry. The formation of the elements, crust, atmosphere and oceans, global geochemical cycles, and the interaction of geochemistry, biological evolution, and climate. Recommended: introductory chemistry.

GES 101. Environmental and Geological Field Studies in the Rocky Mountains. 3 Units.

Three-week, field-based program in the Greater Yellowstone/Teton and Wind River Mountains of Wyoming. Field-based exercises covering topics including: basics of structural geology and petrology; glacial geology; western cordillera geology; paleoclimatology; chemical weathering; aqueous geochemistry; and environmental issues such as acid mine drainage and changing land-use patterns.

Same as: EARTHSYS 100, EESS 101.

GES 102. Earth Materials: Introduction to Mineralogy. 4 Units.

The minerals and materials that comprise the earth and their uses in modern society. How to identify, classify, and interpret rock-forming minerals. Emphasis is on information provided by common minerals about the nature of the Earth's interior and processes such as magmatism and metamorphism that operate there, as well as the major processes of weathering and erosion that link plate tectonics to earth cycles. Required lab section. Prerequisite: introductory geology course. Recommended: introductory chemistry.

GES 103. Earth Materials: Rocks in Thin Section. 3 Units.

Use of petrographic microscope to identify minerals and common mineral associations in igneous, metamorphic, and sedimentary rocks. Crystallization histories, mineral growth and reaction relations, deformation textures in metamorphic rocks, and provenance of siliciclastic rocks. Prerequisite 102.

GES 104. Earth Materials: Introduction to Petrology. 4 Units.

The origin of different rock types as a function of geologic and plate tectonic setting. How to identify rocks and interpret their conditions of formation. Required lab section. Prerequisite: introductory geology course; GES102.

GES 105. Introduction to Field Methods. 3 Units.

Two-week, field-based course in the White Mountains of eastern California. Introduction to the techniques for geologic mapping and geologic investigation in the field: systematic observations and data collection for lithologic columns and structural cross-sections. Interpretation of field relationships and data to determine the stratigraphic and deformational history of the region. Prerequisite: GES 1, recommended: GES 102.

GES 107. Journey to the Center of the Earth. 3 Units.

The interconnected set of dynamic systems that make up the Earth. Focus is on fundamental geophysical observations of the Earth and the laboratory experiments to understand and interpret them. What earthquakes, volcanoes, gravity, magnetic fields, and rocks reveal about the Earth's formation and evolution. Offered every other year, winter quarter. Next offering Winter 2013-14.

Same as: GEOPHYS 184, GEOPHYS 274, GES 207.

GES 110. Structural Geology and Tectonics. 3-5 Units.

Theory, principles, and practical techniques to measure, describe, analyze, and interpret deformation-related structures on Earth. Collection of fault and fold data in the field followed by lab and computer analysis; interpretation of geologic maps and methods of cross-section construction; structural analysis of fault zone and metamorphic rocks; measuring deformation; regional structural styles and associated landforms related to plate tectonic convergence, rifting, and strike-slip faulting; the evolution of mountain belts and formation of sedimentary basins. Prerequisite: GES 1, calculus. Recommended: 102.

GES 111. Fundamentals of Structural Geology. 3 Units.

Techniques for mapping using GPS and differential geometry to characterize structures; dimensional analysis and scaling relations; kinematics of deformation and flow; measurement and analysis of stress; elastic deformation and properties of rock; brittle deformation including fracture and faulting; linear viscous flow including folding and magma dynamics; model development and methodology. Models of tectonic processes are constructed and solutions visualized using MATLAB. Prerequisites: GES 1, MATH 51

Same as: CEE 195.

GES 115. Engineering Geology and Global Change. 3 Units.

The application of geology and global change to the planning, design, and operation of engineering projects. Case histories taught in a seminar setting and field trips emphasize the impact of geology and global change on both individual engineering works and the built environment by considering Quaternary history and tectonics, anthropogenic sea level rise, active geologic processes, engineering properties of geologic deposits, site exploration, and professional ethics. Prerequisite: GES 1 or consent of instructor.

Same as: CEE 196.

GES 118. Understanding Natural Hazards, Quantifying Risk, Increasing Resilience in Highly Urbanized Regions. 3 Units.

Integrating the science of natural hazards, methods for quantitatively estimating the risks that these hazards pose to populations and property, engineering solutions that might best ameliorate these risks and increase resilience to future events, and policy and economic decision-making studies that may increase long-term resilience to future events. Panel discussions by outside experts exploring the science, engineering, policy, and economics that underly the hazards, risks, and strategies for increasing resilience. Group assignments to evaluate the way in which natural hazards, and human population and developing interact in megacities to produce risk, and what strategies might be adopted in each area to reduce risks posed by the specific hazards faced by these urban areas.

Same as: EESS 118, EESS 218, GEOPHYS 118, GEOPHYS 218, GES 218.

GES 119. A Solar System Odyssey: Introduction to Planetary Geology. 3 Units.

How could planetary bodies such as Earth, Moon and Mars form so close together, with such similar starting products have such drastically different outcomes? Did Mars ever have standing water? Does Europa have a subsurface ocean teeming with life? In this course, you will study the formation and evolution of planets and moons, and how differences such as mass and composition have led to a diverse selection of terrain. Through our exploration of selected topics in planetary geology (volcanism, cratering, tectonics), we will actively debate contemporary controversies in planetary geology. GES 1 required or permission of the instructor.

GES 120. Planetary and Early Biological Evolution Seminar. 2-3 Units.

Interdisciplinary. For upper division science undergraduates and graduate students. Synthesis of biology, geology, physics, and chemistry. Recent approaches for identifying traces of past life on Earth. How to look for life on other planets such as Mars, Europa, and Titan. May be repeated for credit.

Same as: GES 220.

GES 121. What Makes a Habitable Planet?. 3 Units.

Physical processes affecting habitability such as large impacts and the atmospheric greenhouse effect, comets, geochemistry, the rise of oxygen, climate controls, and impact cratering. Detecting and interpreting the spectra of extrasolar terrestrial planets. Student-led discussions of readings from the scientific literature. Team taught by planetary scientists from NASA Ames Research Center.

Same as: GES 221.

GES 122. Planetary Systems: Dynamics and Origins. 3-4 Units.

(Students with a strong background in mathematics and the physical sciences should register for 222.) Motions of planets and smaller bodies, energy transport in planetary systems, composition, structure and dynamics of planetary atmospheres, cratering on planetary surfaces, properties of meteorites, asteroids and comets, extrasolar planets, and planetary formation. Prerequisite: some background in the physical sciences, especially astronomy, geophysics, or physics.

GES 123. Paleobiology. 4 Units.

Introduction to the fossil record with emphasis on marine invertebrates. Major debates in paleontological research. The history of animal life in the oceans. Topics include the nature of the fossil record, evolutionary radiations, mass extinctions, and the relationship between biological evolution and environmental change. Fossil taxa through time. Exercises in phylogenetics, paleoecology, biostratigraphy, and statistical methods. Same as: EARTHSYS 122.

GES 130. Soil Physics and Hydrology. 3 Units.

The occurrence, distribution, circulation, and reaction of water at the surface and within the near surface. Topics: precipitation, evapotranspiration, infiltration and vadose zone, groundwater, surface water and streamflow generation, and water balance estimates. Current and classic theory in soil physics and hydrology. Urban, rangeland, and forested environments.

GES 131. Hydrologically-Driven Landscape Evolution. 3 Units.

Materials of the Earth and hydrologically driven landscape processes. Topics: hillslope hydrology, weathering of rocks and soils, erosion, flow failures, mass wasting, and conceptual models of landscape evolution. Current and classic theory in geomorphology.

GES 150. Senior Seminar: Issues in Earth Sciences. 3 Units.

Focus is on written and oral communication in a topical context. Topics from current frontiers in earth science research and issues of concern to the public. Readings, oral presentations, written work, and peer review.

Same as: GEOPHYS 199.

GES 151. Sedimentary Geology and Petrography: Depositional Systems. 4 Units.

Topics: weathering, erosion and transportation, deposition, origins of sedimentary structures and textures, sediment composition, diagenesis, sedimentary facies, tectonics and sedimentation, and the characteristics of the major siliciclastic and carbonate depositional environments. Lab: methods of analysis of sediments in hand specimen and thin section. Field trips. Prerequisites: 1, 102, 103.

GES 163. Introduction to Isotope Geochemistry. 3 Units.

Stable, cosmogenic, and radiogenic isotopes; processes that govern isotopic variations. Application of isotopes to geologic, biologic, and hydrologic questions. Major isotopic systems and their applications. Simple modeling techniques used in isotope geochemistry.

Same as: GES 263.

GES 170. Environmental Geochemistry. 4 Units.

Solid, aqueous, and gaseous phases comprising the environment, their natural compositional variations, and chemical interactions. Contrast between natural sources of hazardous elements and compounds and types and sources of anthropogenic contaminants and pollutants. Chemical and physical processes of weathering and soil formation. Chemical factors that affect the stability of solids and aqueous species under earth surface conditions. The release, mobility, and fate of contaminants in natural waters and the roles that water and dissolved substances play in the physical behavior of rocks and soils. The impact of contaminants and design of remediation strategies. Case studies. Prerequisite: 90 or consent of instructor.

Same as: EARTHSYS 170.

GES 171. Geochemical Thermodynamics. 3 Units.

Introduction to the application of chemical principles and concepts to geologic systems. The chemical behavior of fluids, minerals, and gases using simple equilibrium approaches to modeling the geochemical consequences of diagenetic, hydrothermal, metamorphic, and igneous processes. Topics: reversible thermodynamics, solution chemistry, mineral-solution equilibria, reaction kinetics, and the distribution and transport of elements by geologic processes. Prerequisite: GES 102.

GES 180. Igneous Processes. 4 Units.

For juniors, seniors and beginning graduate students in Earth Sciences. Structure and physical properties of magmas; use of phase equilibria and mineral barometers and thermometers to determine conditions of magmatic processes; melting and magmatic lineages as a function of tectonic setting; processes that control magma composition including fractional crystallization, partial melting, and assimilation; petrogenetic use of trace elements and isotopes. Labs emphasize identification of volcanic and plutonic rocks in thin section and interpretation of rock textures. Prerequisite 102, 103, or consent of instructor.

GES 181. Metamorphic Processes. 3-5 Units.

For juniors, seniors, and beginning graduate students in Earth Sciences. Thermodynamics and phase equilibria of multiple component systems; use of phase equilibria to determine pressure and temperature of metamorphic assemblages; geochronology of metamorphic rocks; heat flow in the lithosphere; links between tectonics and metamorphism; and the role of heat and mass transfer in the Earth's crust and mantle. Labs emphasize identification of metamorphic rocks and minerals for common pelitic and basic rocks and interpretation of rock textures. May be taken for 3 units without lab. Prerequisites: 102, 103, or consent of instructor.

GES 183. California Desert Geologic Field Trip. 1 Unit.

Field seminar. Two class meetings during Autumn quarter followed by a 6-day field trip over Thanksgiving recess to Mojave Desert, Death Valley, and Owens Valley. Basin-and-range faulting, alluvial fans, playas, sand dunes, and metamorphic rocks, granites of the Sierra Nevada, lava flows and the deposits of supervolcanic eruptions, hot springs, ore deposits, and desert landscapes. Involves camping and moderate hiking. Recommended: introductory geology. Enrollment limited to 30 students; preference given to students taking GES1B concurrently, freshman and sophomores; additionally graduate students in the School of Earth Sciences.

GES 185. Volcanology. 3-4 Units.

For juniors, seniors, and beginning graduate students in earth sciences. Eruptive processes that create volcanic deposits and landforms; relation to physical properties of magmas. Volcanic hazards and the effects of eruptions on climate; volcanic-hosted geothermal systems and mineral resources. Required 4-day field trip over Memorial Day weekend to study silicic and mafic volcanism in the eastern Sierra Nevada. Those taking the class for 4 units will complete a 3-hour weekly lab involving hand specimen and thin section identification and interpretation, which emphasizes recognizing types of lavas and products of explosive eruptions. Prerequisite: 1, for those taking the course for 3 units; 103 and 104 or equivalent for those taking the course for 4 units.

GES 190. Research in the Field. 2 Units.

Two to three-week long courses that provide students with the opportunity to collect data in the field as part of a team-based investigation of research questions or topics under the expert guidance of knowledgeable faculty and graduate students. Topics and locations vary. May be taken multiple times for credit. Prerequisites: GES 1, GES 102, GES 105.

GES 191. GES Field Trips. 1 Unit.

Four- to seven-day field trips to locations of geologic and environmental interest. Includes trips offered during Thanksgiving and Spring breaks. May be repeated for credit. See <http://pangea.stanford.edu/GES/undergraduates/courses/>.

GES 192. Undergraduate Research in Geological and Environmental Sciences. 1-10 Unit.

Field-, lab-, or literature-based. Faculty supervision. Written reports. May be repeated for credit.

GES 197. Senior Thesis. 3-5 Units.

For seniors who wish to write a thesis based on research in 192 or as a summer research fellow. May not be repeated for credit; may not be taken if enrolled in 199.

GES 198. Special Problems in Geological and Environmental Sciences. 1-10 Unit.

Reading and instruction under faculty supervision. Written reports. May be repeated for credit.

GES 199. Honors Program. 1-10 Unit.

Research on a topic of special interest. See "Undergraduate Honors Program" above. May be repeated for credit.

GES 207. Journey to the Center of the Earth. 3 Units.

The interconnected set of dynamic systems that make up the Earth. Focus is on fundamental geophysical observations of the Earth and the laboratory experiments to understand and interpret them. What earthquakes, volcanoes, gravity, magnetic fields, and rocks reveal about the Earth's formation and evolution. Offered every other year, winter quarter. Next offering Winter 2013-14.

Same as: GEOPHYS 184, GEOPHYS 274, GES 107.

GES 208. Topics in Geobiology. 1 Unit.

Reading and discussion of classic and recent papers in the field of Geobiology. Co-evolution of Earth and life; critical intervals of environmental and biological change; geomicrobiology; paleobiology; global biogeochemical cycles; scaling of geobiological processes in space and time.

Same as: EESS 208.

GES 210. Geologic Evolution of the Western U.S. Cordillera. 2-3 Units.

The geologic and tectonic evolution of the U.S. Cordillera based on its rock record through time. This region provides good examples of large-scale structures and magmatic activity generated during crustal shortening, extension, and strike-slip faulting and affords opportunity to study crustal-scale processes involved in mountain building in context of plate tectonic motions.

GES 211. Topics in Regional Geology and Tectonics. 2-3 Units.

May be repeated for credit.

GES 212. Topics in Tectonic Geomorphology. 2 Units.

For upper-division undergraduates and graduate students. Topics vary and may include coupling among erosional, tectonic, and chemical weathering processes at the scale of orogens; historical review of tectonic geomorphology; hillslope and fluvial process response to active uplift; measures of landscape form and their relationship to tectonic uplift and bedrock lithology. May be repeated for credit.

GES 213. Topics in Sedimentary Geology. 2 Units.

For upper division undergraduates and graduate students. Topics vary each year but the focus is on current developments and problems in sedimentary geology, sedimentology, and basin analysis. These include issues in deep-water sediments, their origin, facies, and architecture; sedimentary systems on the early Earth; and relationships among tectonics, basin development, and basin fill. May be repeated for credit.

GES 214. Topics in Paleobiology. 2 Units.

For upper division undergraduates and graduate students. Topics vary each year; focus is on paleontological, sedimentological, and geochemical approaches to the history of life. Topics may include: mass extinction events; evolutionary radiations; the history of global biodiversity; links between evolutionary histories of primary producers and consumers; and the quality of the fossil record. Term paper. May be repeated for credit.

GES 215. Structural Geology and Rock Mechanics. 4 Units.

Quantitative field and laboratory data integrated with solutions to boundary value problems of continuum mechanics to understand tectonic processes in Earth's crust that lead to the development of geological structures including folds, faults, fractures and fabrics. Topics include: techniques and tools for structural mapping; differential geometry to characterize structures; dimensional analysis and scaling relations; kinematics of deformation and flow; traction and stress analysis, conservation of mass and momentum in a deformable continuum; linear elastic deformation and elastic properties; brittle deformation including fracture and faulting; model development and methodology. Data sets analyzed using MATLAB. Prerequisites: GES 1, MATH 53, MATLAB or equivalent. Same as: CEE 297R, GEOPHYS 251.

GES 216. Rock Fracture Mechanics. 3 Units.

Principles and tools of elasticity theory and fracture mechanics are applied to the origins and physical behaviors of faults, dikes, joints, veins, solution surfaces, and other natural structures in rock. Field observations, engineering rock fracture mechanics, and the elastic theory of cracks. The role of natural fractures in brittle rock deformation, and fluid flow in the earth's crust with applications to crustal deformation, structural geology, petroleum geology, engineering, and hydrogeology. Prerequisite: 215 or equivalent.

GES 217. Faults, Fractures, and Fluid Flow. 3 Units.

Process-based approach to rock failure; the microstructures and overall architectures of the failure products including faults, joints, solution seams, and types of deformation bands. Fluid flow properties of these structures are characterized with emphasis on sealing and transmitting of faults and their role in hydrocarbon flow, migration, and entrapment. Case studies of fracture characterization experiments in aquifers, oil and gas reservoirs, and waste repository sites. Guest speakers; weekend field trip. Prerequisite: first-year graduate student in Earth Sciences.

GES 218. Understanding Natural Hazards, Quantifying Risk, Increasing Resilience in Highly Urbanized Regions. 3 Units.

Integrating the science of natural hazards, methods for quantitatively estimating the risks that these hazards pose to populations and property, engineering solutions that might best ameliorate these risks and increase resilience to future events, and policy and economic decision-making studies that may increase long-term resilience to future events. Panel discussions by outside experts exploring the science, engineering, policy, and economics that underly the hazards, risks, and strategies for increasing resilience. Group assignments to evaluate the way in which natural hazards, and human population and developing interact in megacities to produce risk, and what strategies might be adopted in each area to reduce risks posed by the specific hazards faced by these urban areas.

Same as: EESS 118, EESS 218, GEOPHYS 118, GEOPHYS 218, GES 118.

GES 220. Planetary and Early Biological Evolution Seminar. 2-3 Units.

Interdisciplinary. For upper division science undergraduates and graduate students. Synthesis of biology, geology, physics, and chemistry. Recent approaches for identifying traces of past life on Earth. How to look for life on other planets such as Mars, Europa, and Titan. May be repeated for credit.

Same as: GES 120.

GES 221. What Makes a Habitable Planet?. 3 Units.

Physical processes affecting habitability such as large impacts and the atmospheric greenhouse effect, comets, geochemistry, the rise of oxygen, climate controls, and impact cratering. Detecting and interpreting the spectra of extrasolar terrestrial planets. Student-led discussions of readings from the scientific literature. Team taught by planetary scientists from NASA Ames Research Center.

Same as: GES 121.

GES 222. Planetary Systems: Dynamics and Origins. 3-4 Units.

(For students with a strong background in mathematics and the physical sciences; other should register for 122.) Motions of planets, moons, and small bodies; energy transport in planetary systems; meteorites and the constraints they provide on the formation of the solar system; asteroids and Kuiper belt objects; comets; planetary rings; planet formation; and extrasolar planets. In-class presentation of student papers.

GES 223. Planetary Systems: Atmospheres, Surfaces, and Interiors. 3 Units.

Focus is on physical processes, such as radiation transport, atmospheric dynamics, thermal convection, and volcanism, shaping the interiors, surfaces, and atmospheres of the major planets in the solar system. How these processes manifest themselves under various conditions in the solar system. Case study of the surface and atmosphere of Mars. Application of comparative planetary science to extrasolar planets and brown dwarfs. In-class presentation of student papers.

GES 224. Modeling Transport and Transformations in the Environment. 2-3 Units.

An introduction to geochemical and reactive transport modeling using Geochemist's Workbench and other appropriate models. Working knowledge of geochemical and hydrologic principles is assumed. Throughout the quarter the students will use the principles and tools to develop and analyze an environmental problems as part of a simulated consulting exercise. Topics covered include contaminant transport, mineral dissolution/precipitation and aquifer microbiology. An additional focus of the course will be to develop presentation skills through practice, feedback and discussions. Prerequisites: Either EESS 221 (CEE 260C) or EESS 220 (CEE 260A) and either GES 90, 170, or 171, or permission from instructors.

GES 237. Surface and Near-Surface Hydrologic Response. 3 Units.
Quantitative review of process-based hydrology and geomorphology. Introduction to finite-difference and finite-element methods of numerical analysis. Topics: biometeorology, unsaturated and saturated subsurface fluid flow, overland and open channel flow, and physically-based simulation of coupled surface and near-surface hydrologic response. Links hydrogeology, soil physics, and surface water hydrology. Same as: CEE 260B.

GES 238. Soil Physics. 3 Units.
Physical properties of the soil solid phase emphasizing the transport, retention, and transformation of water, heat, gases, and solutes in the unsaturated subsurface. Field experiments.

GES 240. Geostatistics. 2-3 Units.
Geostatistical theory and practical methodologies for quantifying and simulating spatial and spatio-temporal patterns for the Earth Sciences. Real case development of models of spatial continuity, including variograms, Boolean models and training images. Estimation versus simulation of spatial patterns. Loss functions. Estimation by kriging, co-kriging with secondary data. Dealing with data on various scales. Unconditional and conditional Boolean simulation, sequential simulation for continuous and categorical variables. Multi-variate geostatistical simulation. Probabilistic and pattern-based approaches to multiple-point simulation. Trend, secondary variable, auxiliary variable and probability-type constraints. Quality control techniques on generated models. Workflows for practical geostatistical applications in mining, petroleum, hydrogeology, remote sensing and environmental sciences. prerequisites: Energy 160/260 or basic course in data analysis/statistics
Same as: ENERGY 240.

GES 246. Reservoir Characterization and Flow Modeling with Outcrop Data. 3 Units.
Project addressing a reservoir management problem by studying an outcrop analog, constructing geostatistical reservoir models, and performing flow simulation. How to use outcrop observations in quantitative geological modeling and flow simulation. Relationships between disciplines. Weekend field trip.
Same as: ENERGY 146, ENERGY 246.

GES 249. Petroleum Geochemistry in Environmental and Earth Science. 3 Units.
How molecular fossils in crude oils, oil spills, refinery products, and human artifacts identify their age, origin, and environment of formation. The origin and habitat of petroleum, technology for its analysis, and parameters for interpretation, including: origins of molecular fossils; function, biosynthesis, and precursors; tectonic history related to the evolution of life, mass extinctions, and molecular fossils; petroleum refinery processes and the kinds of molecular fossils that survive; environmental pollution from natural and anthropogenic sources including how to identify genetic relationships among crude oil or oil spill samples; applications of molecular fossils to archaeology; worldwide petroleum systems through geologic time.

GES 250. Sedimentation Mechanics. 3-4 Units.
The mechanics of sediment transport and deposition and the origins of sedimentary structures and textures as applied to interpreting ancient rock sequences. Dimensional analysis, fluid flow, drag, boundary layers, open channel flow, particle settling, erosion, sediment transport, sediment gravity flows, soft sediment deformation, and fluid escape. Field trip required.

GES 251. Sedimentary Basins. 3 Units.
Analysis of the depositional framework and tectonic evolution of sedimentary basins. Topics: tectonic and environmental controls on facies relations, synthesis of basin development through time in terms of depositional systems and tectonic settings. Weekend field trip required. Prerequisites: 110, 151.

GES 252. Sedimentary Petrography. 4 Units.
Siliciclastic sediments and sedimentary rocks. Research in modern sedimentary mineralogy and petrography and the relationship between the composition and texture of sediments and their provenance, tectonic settings, and diagenetic histories. Topics vary yearly. Prerequisite: 151 or equivalent.

GES 253. Petroleum Geology and Exploration. 3 Units.
The origin and occurrence of hydrocarbons. Topics: thermal maturation history in hydrocarbon generation, significance of sedimentary and tectonic structural setting, principles of accumulation, and exploration techniques. Prerequisites: 110, 151. Recommended: GEOPHYS 223.

GES 255. Basin and Petroleum System Modeling. 3 Units.
For advanced undergraduates or graduate students. Students use stratigraphy, subsurface maps, and basic well log, lithologic, paleontologic, and geochemical data to construct 1-D, 2-D, and 3-D models of petroleum systems that predict the extent of source-rock thermal maturity, petroleum migration paths, and the volumes and compositions of accumulations through time (4-D). Recent software such as PetroMod designed to reconstruct basin geohistory. Recommended: 251 or 253.

GES 256. Quantitative Methods in Basin and Petroleum System Modeling. 3 Units.
Examine the physical processes operating in sedimentary basins by deriving the basic equations of fundamental, coupled geologic processes such as fluid flow and heat flow, deposition, compaction, mass conservation, and chemical reactions. Through hands-on computational exercises and instructor-provided "recipes," students will deconstruct the black box of basin modeling software. Students write their own codes (Matlab) as well as gain expertise in modern finite-element modeling software (PetroMod, COMSOL).
Same as: ENERGY 275.

GES 257. Clastic Sequence Stratigraphy. 3 Units.
Sequence stratigraphy facilitates integration of all sources of geologic data, including seismic, log, core, and paleontological, into a time-stratigraphic model of sediment architecture. Tools applicable to regional and field scales. Emphasis is on practical applications and integration of seismic and well data to exploration and field reservoir problems. Examples from industry data; hands-on exercises.

GES 259. Stratigraphic Architecture. 1 Unit.
The stratigraphic architecture of deposits associated with a spectrum of depositional environments, using outcrop and subsurface data. Participants read and discuss selected literature.

GES 260. Laboratory Methods in Organic Geochemistry. 2-3 Units.
Knowledge of components in geochemical mixtures to understand geological and environmental samples. The presence and relative abundance of these compounds provides information on the biological source, depositional environment, burial history, biodegradation, and toxicity of organic materials. Laboratory methods to detect and quantify components of these mixtures. Methods for separation and analysis of organic compounds in geologic samples: extraction, liquid chromatography, absorption by zeolites, gas chromatography and gas chromatography-mass spectrometry. Student samples considered as material for analysis. Prerequisite: GES 249 or consent of instructor.

GES 261. Physics and Chemistry of Minerals and Mineral Surfaces. 4 Units.
The concepts of symmetry and periodicity in crystals; the physical properties of crystals and their relationship to atomic-level structure; basic structure types; crystal chemistry and bonding in solids and their relative stability; the interaction of x-rays with solids and liquids (scattering and spectroscopy); structural variations in silicate glasses and liquids; UV-visible spectroscopy and the color of minerals; review of the mineralogy, crystal chemistry, and structures of selected rock-forming silicates and oxides; mineral surface and interface geochemistry.

GES 262. Thermodynamics and Disorder in Minerals and Melts. 3 Units.

The thermodynamic properties of crystalline, glassy, and molten silicates and oxides in light of microscopic information about short range structure and ordering. Measurements of bulk properties such as enthalpy, density, and their pressure and temperature derivatives, and structural determination by spectroscopies such as nuclear magnetic resonance and Mössbauer. Basic formulations for configurational entropy, heats of mixing in solid solutions, activities; and the energetics of exsolution, phase transitions, and nucleation. Quantitative models of silicate melt thermodynamics are related to atomic-scale views of structure. A general view of geothermometry and geobarometry. Prerequisites: introductory mineralogy and thermodynamics.

GES 263. Introduction to Isotope Geochemistry. 3 Units.

Stable, cosmogenic, and radiogenic isotopes; processes that govern isotopic variations. Application of isotopes to geologic, biologic, and hydrologic questions. Major isotopic systems and their applications. Simple modeling techniques used in isotope geochemistry. Same as: GES 163.

GES 264. Mathematical Modeling in Biogeochemistry. 3 Units.

The basics of translating a conceptual model into a numerical model is presented. Emphasis on building models, box modeling, methods of solving models. Lab exercises draw from examples in biogeochemistry, including modeling global biogeochemical cycles, sediment biogeochemistry, and microbial processes.

GES 267. Solution-Mineral Equilibria: Theory. 3 Units.

Procedures for calculating and evaluating the thermodynamic properties of reversible and irreversible reactions among rock-forming minerals and aqueous solutions in geologic systems. Emphasis is on the generation and utility of phase diagrams depicting solution-mineral interaction relevant to phase relations associated with weathering diagenetic, hydrothermal, and metamorphic processes, and the prediction of temperature, pressure, and the chemical potential of thermodynamic components compatible with observed mineralogic phase relations in geologic outcrops. Individual research topics. Prerequisite: 171.

GES 272. Biomineralization. 3 Units.

The functional properties of many animal and plant skeletons are dependent largely on mineralization. The relationship between mineralization processes and adaptation for all the animal phyla is reviewed. The sedimentologic contribution of mineralized skeletons, especially in carbonate reefs and pelagic sedimentation is considered. Synthesis of organic matrix and the composite nature of many animal and plant skeletons, and their development and morphogenesis are described. The mechanisms of crystal nucleation and growth are considered. The macroevolutionary history of biomineralization, and mass extinctions and the diversification of well skeletonized groups in the geologic record are considered.

GES 273. Isotope Geochemistry Seminar. 1-3 Unit.

Current topics including new analytical techniques, advances in isotopic measurements, and new isotopic approaches and systems.

GES 275. Electron Probe Microanalytical Techniques. 2-3 Units.

The practical and theoretical aspects of x-ray generation and detection, and the behavior of electron beams and x-rays in solids. The basic principles needed to quantitatively analyze chemically complex geological materials. Operation of the JEOL 733 electron microprobe and associated computer software for quantitatively analyzing materials. X-ray chemical mapping. Enrollment limited to 8.

GES 276. Earth's Weathering Engine. 3 Units.

The complex interactions between the chemical, biological, hydrologic and tectonic process that control the chemical and isotopic flux of material to the oceans, and ultimately the long-term composition of both the atmosphere and the hydrosphere. Through a literature review and discussions students will identify key outstanding questions regarding global chemical weathering fluxes. Through data collection, data analysis, and application of appropriate modeling tools students will produce novel analyses and conclusions regarding the operation of the Earth's weathering engine. Permission of instructor required.

GES 277. Flood Basalts and Mass Extinctions. 3 Units.

Recent work in geochronology and paleobiology supports the temporal coincidence of the eruption of continental flood basalts with mass extinction in the marine and terrestrial realms. The mechanisms and timescale of flood basalt eruptions, their likely environmental and biological consequences, and the evidence for flood basalt eruptions as the triggers of many mass extinction events. Sources include recent primary literature.

GES 278. Mantle Processes. 1-3 Unit.

The mantle is the largest reservoir on Earth and is fundamental to a variety of plate tectonic processes, from convection to the generation of crust. This course reviews current knowledge of the mantle based on the geochemistry and rheology of rocks derived from the upper mantle. Focus is on processes at ocean ridges and subduction zones. The tools used for studying the mantle, including radiogenic isotopes, trace elements, melting equations, diffusion coefficients and rheological flow laws, are explored in detail. Prerequisites: basic geology, petrology and chemistry or consent of the instructor.

GES 281. Principles of ⁴⁰Ar/³⁹Ar Thermochronometry. 3-4 Units.

The ⁴⁰Ar/³⁹Ar method is based upon the K-Ar decay scheme and allows high precision geochronology and thermochronology to be performed with K-bearing minerals. Provides a detailed exploration of the method including all practical considerations and laboratory procedures for standardization and instrument calibration. A laboratory component allows practical experience in making measurements and interpreting results.

GES 282. Interpretative Methods in Detrital Geochronology. 1-5 Unit.

Over the past decade, the number of studies that make use of isotopic provenance data has sky-rocketed. This type of data is now routinely used throughout the geosciences to solve a broad range of geologic problems. This seminar examines the state-of-the-art of existing interpretative methods for detrital geo/thermochronology data in provenance studies and critically examines their strengths and weaknesses. While this course will touch upon sampling approaches analytical aspects of data collection, focus is primarily upon data interpretation.

GES 283. Thermochronology and Crustal Evolution. 4 Units.

Thermochronology analyzes the competition between radioactive ingrowth and temperature-dependant loss of radiogenic isotopes within radioactive mineral hosts in terms of temperature-time history. Coupled with quantitative understanding of kinetic phenomena and crustal- or landscape-scale interpretational models, thermochronology provides an important source of data for the Earth Sciences, notably tectonics, geomorphology, and petrogenesis. Focus on recent developments in thermochronology, specifically analytical and interpretative innovations developed over the past decade. Integrates the latest thermochronology techniques with field work in a small-scale research project focused upon crustal evolution.

GES 284. Field Seminar on Eastern Sierran Volcanism. 1 Unit.

For graduate students in the earth sciences and archaeology. Four-day trip over Memorial Day weekend to study silicic and mafic volcanism in the eastern Sierra Nevada: basaltic lavas and cinder cones erupted along normal faults bounding Owens Valley, Long Valley caldera, postcaldera rhyolite lavas, hydrothermal alteration and hot springs, Holocene rhyolite lavas of the Inyo and Mono craters, subaqueous basaltic and silicic eruptions of Mono Basin, floating pumice blocks. If snow-level permits, silicic volcanism associated with the Bodie gold district. Recommended: 1 or equivalent.

GES 285. Igneous Petrogenesis of the Continents. 2-4 Units.

Radiogenic isotopes, stable isotopes, and trace elements applied to igneous processes; interaction of magmas with mantle and crust; convergent-margin magmatism; magmatism in extensional terrains; origins of rhyolites; residence times of magmas and magma chamber processes; granites as imperfect mirrors of their source regions; trace element modeling of igneous processes; trace element discriminant diagrams in tectonic analysis; phase equilibria of partial melting of mantle and crust; geothermometry and geobarometry. Topics emphasize student interest. Prerequisite: 180 or equivalent.

GES 286. Secondary Ionization Mass Spectrometry. 3 Units.

Secondary ionization mass spectrometry (SIMS) is a versatile method capable of performing elemental and isotopic analysis in the solid-state at the nanogram to picogram scale. SIMS offers the most favorable combination of high spatial resolution, sensitivity, and mass resolving power. This course explores the ion optics of the primary and secondary columns of SIMS instruments and explains instrumental mass fractionation and standardization methods for both positive and negative secondary ions. Ion imaging and depth profiling approaches are also covered. Practical experience using Stanford's SHRIMP-RG and NanoSIMS instruments is provided.

GES 287. Fundamentals of Mass Spectrometry. 3 Units.

This course explains ion creation, mass separation, and ion detection in mass spectrometry methods commonly used in the Earth Sciences. Gas source (C-O-H-S stable isotope, $^{40}\text{Ar}/^{39}\text{Ar}$, and (U-Th)-He), secondary ionization (SIMS), laser ablation and solution-based mass inductively coupled (ICP-MS) and thermal ionization (TIMS) mass spectrometry techniques are also explored. Additional topics include ion optics, vacuum generation, and pressure measurement, instrument calibration, data reduction, and error propagation methods.

GES 290. Departmental Seminar in Geological and Environmental Sciences. 1 Unit.

Current research topics. Presentations by guest speakers from Stanford and elsewhere. May be repeated for credit.

GES 291. GES Field Trips. 1 Unit.

Field trips for teaching and research purposes. Trips average 5-10 days. Prerequisite: consent of instructor.

GES 292. Directed Reading with Geological and Environmental Sciences Faculty. 1-10 Unit.

May be repeated for credit.

GES 299. Field Research. 2-4 Units.

Two-three week field research projects. Written report required. May be repeated three times.

GES 310. Climate Change, Climate Variability, and Landscape Development. 1 Unit.

The impact of long-term climate change on erosional processes and the evolution of Cenozoic landscapes. Climate data that highlight recurring climate variability on inter-annual to decadal timescales. The behavior of climate on multi-decadal to tectonic timescales over which significant changes in topography take place. The effects of climate change and variability on landscape development, sedimentary environments, and the deposits of these events. May be repeated for credit.

GES 311. Interpretation of Tectonically Active Landscapes. 3 Units.

Focuses on interpreting various topographic attributes in terms of horizontal and vertical tectonic motions. Topics include identification, mapping, and dating of geomorphic markers, deducing tectonic motions from spatial changes in landscape steepness, understanding processes that give rise to different landscape elements, interrogating the role of climate and lithology in producing these landscape elements, and understanding relationships between tectonic motions, surface topography, and the spatial distribution of erosion. Consists of two one hour lectures per week and one laboratory section that help students gain proficiency in Quaternary mapping and interpretation of topographic metrics.

GES 312. Analysis of Landforms. 3 Units.

Quantitative methods to analyze digital topography and to interpret rates of tectonic and geomorphic processes from topographic metrics. Topics include analysis of digital topography using local and neighborhood-based methods, spectral methods, and wavelet methods. Course consists of two one hour lectures per week and one laboratory section that will help students gain proficiency in calculating topographic metrics using ArcGIS and Matlab.

GES 315. Literature of Structural Geology. 1 Unit.

Classic studies and current journal articles. May be repeated for credit.

GES 325. The Evolution of Body Size. 2 Units.

Preference to graduate students and upper-division undergraduates in GES and Biology. The influence of organism size on evolutionary and ecological patterns and processes. Focus is on integration of theoretical principles, observations of living organisms, and data from the fossil record. What are the physiological and ecological correlates of body size? Is there an optimum size? Do organisms tend to evolve to larger size? Does productivity control the size distribution of consumers? Does size affect the likelihood of extinction or speciation? How does size scale from the genome to the phenotype? How is metabolic rate involved in evolution of body size? What is the influence of geographic area on maximum body size?

Same as: BIO 325.

GES 328. Seminar in Paleobiology. 1 Unit.

For graduate students. Current research topics including paleobotany, vertebrate and invertebrate evolution, paleoecology, and major events in the history of life on Earth.

GES 336. Stanford Alpine Project Seminar. 1 Unit.

Seminar on the geology of Italy. Weekly student presentations on continental collision tectonics, sedimentology, petrology, geomorphology, climate, culture, and other topics of interest. Students create a guidebook of geologic stops in advance of field trip. May be repeated for credit.

GES 340. Seminar on the Earth's Interior. 1 Unit.

Seminar to review and discuss current research in mineral physics, seismology, geochemistry and geodynamics on understanding the distribution, form, and role of volatiles in Earth's mantle.

GES 355. Advanced Stratigraphy Seminar and Field Course. 1-3 Unit.

Student-led presentations; poster-sized display on assigned topic; field trip.

GES 373. METAMORPHIC PETROLOGY. 3 Units.

Metamorphic petrology is concerned with the range of solid-state recrystallization and chemical mass transfer processes under physical conditions ranging from those prevalent at the Earth's surface to crustal melting. This course explores the phenomenology of these processes from mineralogic, textural, structural, geochemical, and geodynamic perspectives. The focus is on subduction, arc magmatic, rift magmatic and regional tectonic (collisional and extensional) settings. Important concepts and methods in phase equilibria, thermobarometry, geo/thermochronology, and fabric analysis are explored.

GES 373L. Metamorphic Petrology Laboratory. 1 Unit.

Teaches petrographic methods for characterizing recrystallization of common clastic and chemically precipitated sedimentary, mafic and felsic igneous, and ultramafic mantle rocks. Features suites from contact and regional metamorphic settings including arc magmatic, subduction, convergent, and extensional metamorphic settings.

GES 381. Igneous Petrology and Petrogenesis Seminar. 1-2 Unit.

Topics vary by quarter. May be repeated for credit.

GES 384. Volcanology Seminar. 1-2 Unit.

Specialized and advanced topics vary by offering. May be repeated for credit.

GES 385. Practical Experience in the Geosciences. 1 Unit.

On-the-job training in the geosciences. May include summer internship; emphasizes training in applied aspects of the geosciences, and technical, organizational, and communication dimensions. Meets USCIS requirements for F-1 curricular practical training.nn (Staff).

GES 399. Advanced Projects. 1-10 Unit.

Graduate research projects that lead to reports, papers, or other products during the quarter taken. On registration, students designate faculty member and agreed-upon units.

GES 400. Graduate Research. 1-15 Unit.

Faculty supervision. On registration, students designate faculty member and agreed-upon units.

GES 801. TGR Project. 0 Units.**GES 802. TGR Dissertation. 0 Units.**

Geophysics Courses

GEOPHYS 20N. Predicting Volcanic Eruptions. 3 Units.

Preference to sophomores. The physics and chemistry of volcanic processes and modern methods of volcano monitoring. Volcanoes as manifestations of the Earth's internal energy and hazards to society. How earth scientists better forecast eruptive activity by monitoring seismic activity, bulging of the ground surface, and the discharge of volcanic gases, and by studying deposits from past eruptions. Focus is on the interface between scientists and policy makers and the challenges of decision making with incomplete information. Field trip to Mt. St. Helens, site of the 1980 eruption. Offered Spring quarter 2013-14.

GEOPHYS 50N. Planetary Habitability, World View, and Sustainability. 3 Units.

Sustainability lessons from the geological past Life on Earth has partially perished in sudden mass extinctions several time over the Earth's history. Threats include actions of our own volition, including fossil fuel burning as well as natural events, including the impact of large asteroids. The end Permian 250 million years ago and end Paleocene 55 million years ago extinctions involved natural burning of fossil fuels. The 65 million year ago end Cretaceous extinction involved the impact of an asteroid and possibly fossil fuel burning. Related sustainability topics in the popular press will be discussed as they arise. Student pairs lead discussions on topics on how humanity might avert these catastrophes. Offered occasionally. Next quarter offered Spring 2014.

GEOPHYS 60N. Man versus Nature: Coping with Disasters Using Space Technology. 4 Units.

Preference to freshman. Natural hazards, earthquakes, volcanoes, floods, hurricanes, and fires, and how they affect people and society; great disasters such as asteroid impacts that periodically obliterate many species of life. Scientific issues, political and social consequences, costs of disaster mitigation, and how scientific knowledge affects policy. How spaceborne imaging technology makes it possible to respond quickly and mitigate consequences; how it is applied to natural disasters; and remote sensing data manipulation and analysis. GER:DB-EngrAppSci
Same as: EE 60N.

GEOPHYS 100. Directed Reading. 1-2 Unit.

(Staff).

GEOPHYS 104. The Water Course. 4 Units.

The pathway that water takes from rainfall to the tap using student home towns as an example. How the geological environment controls the quantity and quality of water; taste tests of water from around the world. Current U.S. and world water supply issues. Offered Spring 2014.
Same as: EARTHSYS 104.

GEOPHYS 110. Earth on the Edge: Introduction to Geophysics. 3 Units.

Introduction to the foundations of contemporary geophysics. Topics drawn from four broad themes in: whole Earth geodynamics, geohazards, natural resources, and environment/sustainability. In each case the focus is on how the interpretation of a variety of geophysical measurements (e.g., gravity, seismology, heat flow, magnetism, electromagnetics, and geodesy) can be used to provide fundamental insight into the behavior of the Earth's complex geosystems. Prerequisite: CME 100 or MA TH 51, or co-registration in either. Offered every year, autumn quarter. Next offering, Autumn 2013-14.

GEOPHYS 112. Exploring Geosciences with MATLAB. 1-3 Unit.

How to use MATLAB as a tool for research and technical computing, including 2-D and 3-D visualization features, numerical capabilities, and toolboxes. Practical skills in areas such as data analysis, regressions, optimization, spectral analysis, differential equations, image analysis, computational statistics, and Monte Carlo simulations. Emphasis is on scientific and engineering applications. Offered every year, autumn quarter.

GEOPHYS 113. Earthquakes and Volcanoes. 3 Units.

Earthquake location, magnitude and intensity scales, seismic waves, styles of eruptions and volcanic hazards, tsunami waves, types and global distribution of volcanoes, volcano forecasting. Plate tectonics as a framework for understanding earthquake and volcanic processes. Forecasting; earthquake resistant design; building codes; and probabilistic hazard assessment. For non-majors and potential earth scientists. Offered every year, spring quarter.

Same as: EARTHSYS 113.

GEOPHYS 118. Understanding Natural Hazards, Quantifying Risk, Increasing Resilience in Highly Urbanized Regions. 3 Units.

Integrating the science of natural hazards, methods for quantitatively estimating the risks that these hazards pose to populations and property, engineering solutions that might best ameliorate these risks and increase resilience to future events, and policy and economic decision-making studies that may increase long-term resilience to future events. Panel discussions by outside experts exploring the science, engineering, policy, and economics that underly the hazards, risks, and strategies for increasing resilience. Group assignments to evaluate the way in which natural hazards, and human population and developing interact in megacities to produce risk, and what strategies might be adopted in each area to reduce risks posted by the specific hazards faced by these urban areas.

Same as: EESS 118, EESS 218, GEOPHYS 218, GES 118, GES 218.

GEOPHYS 120. Ice, Water, Fire. 3-5 Units.

Introductory application of continuum mechanics to ice sheets and glaciers, water waves and tsunamis, and volcanoes. Emphasis on physical processes and mathematical description using balance of mass and momentum, combined with constitutive equations for fluids and solids. Designed for undergraduates with no prior geophysics background; also appropriate for beginning graduate students.nnPrerequisites: CME 100 or MATH 52 and PHYSICS 41 (or equivalent).nnOffered every year, winter quarter (except 2013-2014, when offered in spring).

Same as: GEOPHYS 220.

GEOPHYS 130. Introductory Seismology. 3 Units.

Introduction to seismology including: elasticity and the wave equation, P, S, and surface waves, dispersion, ray theory, reflection and transmission of seismic waves, seismic imaging, large-scale Earth structure, earthquake location, earthquake statistics and forecasting, magnitude scales, seismic source theory. Offered every year, Autumn quarter. (Beroza, G).

GEOPHYS 135. The Energy-Water Nexus. 3 Units.

Energy, water, and food are our most vital resources constituting a tightly intertwined network: energy production requires water, transporting and treating water needs energy, producing food requires both energy and water. The course is an introduction to learn specifically about the links between energy and water. Students will look first at the use of water for energy production, then at the role of energy in water projects, and finally at the challenge in figuring out how to keep this relationship as sustainable as possible. Students will explore case examples and are encouraged to contribute examples of concerns for discussion as well as suggest a portfolio of sustainable energy options.

Same as: EARTHSYS 140.

GEOPHYS 141. Remote Sensing of the Oceans. 3-4 Units.

How to observe and interpret physical and biological changes in the oceans using satellite technologies. Topics: principles of satellite remote sensing, classes of satellite remote sensors, converting radiometric data into biological and physical quantities, sensor calibration and validation, interpreting large-scale oceanographic features.

Same as: EARTHSYS 141, EARTHSYS 241, EESS 141, EESS 241.

GEOPHYS 146A. Atmosphere, Ocean, and Climate Dynamics: The Atmospheric Circulation. 3 Units.

Introduction to the physics governing the circulation of the atmosphere and ocean and their control on climate with emphasis on the atmospheric circulation. Topics include the global energy balance, the greenhouse effect, the vertical and meridional structure of the atmosphere, dry and moist convection, the equations of motion for the atmosphere and ocean, including the effects of rotation, and the poleward transport of heat by the large-scale atmospheric circulation and storm systems. Prerequisites: MATH 51 or CME100 and PHYSICS 41.

Same as: EARTHSYS 146A, EARTHSYS 246A, EESS 146A, EESS 246A, GEOPHYS 246A.

GEOPHYS 146B. Atmosphere, Ocean, and Climate Dynamics: the Ocean Circulation. 3 Units.

Introduction to the physics governing the circulation of the atmosphere and ocean and their control on climate with emphasis on the large-scale ocean circulation. This course will give an overview of the structure and dynamics of the major ocean current systems that contribute to the meridional overturning circulation, the transport of heat, salt, and biogeochemical tracers, and the regulation of climate. Topics include the tropical ocean circulation, the wind-driven gyres and western boundary currents, the thermohaline circulation, the Antarctic Circumpolar Current, water mass formation, atmosphere-ocean coupling, and climate variability. Prerequisites: EESS 146A or EESS 246A, or CEE 164 or CEE 262D, or consent of instructor.

Same as: EARTHSYS 146B, EARTHSYS 246B, EESS 146B, EESS 246B, GEOPHYS 246B.

GEOPHYS 150. Geodynamics: Our Dynamic Earth. 3 Units.

In this course we cover the dynamic forces acting upon the Earth. We will investigate how geophysical forces effect the bending of tectonic plates, the flow of heat, sea level topography, the breaking point of rocks, porous flow, and how faults store and release energy. Math 52 or CME 102, GP 107 or permission from instructor. Offered every year, spring quarter (except 2013-14 when offered in Winter).

GEOPHYS 160. Introduction to SES Computing. 2-3 Units.

For beginning undergraduates and graduate students in the School of Earth Sciences. Computer concepts. What are computers and networks, and how do they work? Web page authoring. Introduction to scientific programming. Free computing tools for plotting data. Computer resources available to students in the school. An online repository of source codes useful for and developed by SES students, faculty, and staff. Specialists from around the school provide practical instruction and concrete examples of how to achieve basic computing needs. 2 units requires a class project: code development to be uploaded to the course's code repository. Offered every year, autumn quarter - except in Autumn 2013-14
Same as: ISESC.

GEOPHYS 162. Laboratory Methods in Geophysics. 2-3 Units.

Lab. Types of equipment used in experimental rock physics. Principles and measurements of geophysical properties such as porosity, permeability, acoustic wave velocity, and resistivity through lectures and laboratory experiments. Training in analytical project writing skills and understanding errors for assessing accuracy and variability of measured data. Students may investigate a scientific problem to support their own research. Prerequisites: Physics 45 (Light and Heat); and CME 100 (Vector Calculus). Offered every other year, spring quarter (except 2013-2014, when offered in Autumn).

GEOPHYS 170. Global Tectonics. 3 Units.

The architecture of the Earth's crust; regional assembling of structural or deformational features and their relationship, origin and evolution. The plate-tectonic cycle: rifting, passive margins, sea-floor spreading, subduction zones, and collisions. Case studies.

GEOPHYS 171. Tectonics Field Trip. 1-3 Unit.

Long weekend field trip to examine large-scale features in the crust. Destinations may include the San Andreas fault, Mendocino Triple Junction, Sierra Nevada, and western Basin and Range province.

GEOPHYS 181. Fluids and Flow in the Earth: Computational Methods. 3 Units.

Interdisciplinary problems involving the state and movement of fluids in crustal systems, and computational methods to model these processes. Examples of processes include: nonlinear, time-dependent flow in porous rocks; coupling in porous rocks between fluid flow, stress, deformation, and heat and chemical transport; percolation of partial melt; diagenetic processes; pressure solution and the formation of stylolites; and transient pore pressure in fault zones. MATLAB, Lattice-Boltzmann, and COMSOL Multiphysics. Term project. No experience with COMSOL Multiphysics required. Offered every other year, winter quarter. Next offering, Winter 2014-15.

Same as: GEOPHYS 200.

GEOPHYS 182. Reflection Seismology. 3 Units.

The principles of seismic reflection profiling, focusing on methods of seismic data acquisition and seismic data processing for hydrocarbon exploration.

Same as: GEOPHYS 222.

GEOPHYS 183. Reflection Seismology Interpretation. 1-4 Unit.

The structural and stratigraphic interpretation of seismic reflection data, emphasizing hydrocarbon traps in two and three dimensions on industry data, including workstation-based interpretation. Lectures only, 1 unit. Prerequisite: 222, or consent of instructor. Offered Spring quarter 2013-14
Same as: GEOPHYS 223.

GEOPHYS 184. Journey to the Center of the Earth. 3 Units.

The interconnected set of dynamic systems that make up the Earth. Focus is on fundamental geophysical observations of the Earth and the laboratory experiments to understand and interpret them. What earthquakes, volcanoes, gravity, magnetic fields, and rocks reveal about the Earth's formation and evolution. Offered every other year, winter quarter. Next offering Winter 2013-14.

Same as: GEOPHYS 274, GES 107, GES 207.

GEOPHYS 185. Rock Physics for Reservoir Characterization. 3 Units.
How to integrate well log and laboratory data to determine and theoretically generalize rock physics transforms between sediment wave properties (acoustic and elastic impedance), bulk properties (porosity, lithology, texture, permeability), and pore fluid conditions (pore fluid and pore pressure). These transforms are used in seismic interpretation for reservoir properties, and seismic forward modeling in what-if scenarios. Offered every other year, spring quarter. Next offering Spring quarter, 2013-14. Same as: GEOPHYS 260.

GEOPHYS 186. Tectonophysics. 3 Units.
The physics of faulting and plate tectonics. Topics: plate driving forces, lithospheric rheology, crustal faulting, and the state of stress in the lithosphere. Exercises: lithospheric temperature and strength profiles, calculation of seismic strain from summation of earthquake moment tensors, slip on faults in 3D, and stress triggering and inversion of stress from earthquake focal mechanisms. Offered every other year, winter quarter.
Same as: GEOPHYS 290.

GEOPHYS 187. Environmental Soundings Image Estimation. 3 Units.
Imaging principles exemplified by means of imaging geophysical data of various uncomplicated types (bathymetry, altimetry, velocity, reflectivity). Adjoints, back projection, conjugate-gradient inversion, preconditioning, multidimensional autoregression and spectral factorization, the helical coordinate, and object-based programming. Common recurring issues such as limited aperture, missing data, signal/noise segregation, and nonstationary spectra. See <http://sep.stanford.edu/sep/prof/>.
Same as: GEOPHYS 211.

GEOPHYS 190. Near-Surface Geophysics. 3 Units.
Introduction to the integration of geophysical field measurements and laboratory measurements for imaging and characterizing the top 100 meters of Earth. Examples will focus on applications related to water resource management. The link between the measured geophysical properties of rocks, soils, and sediments, and their material properties. Forward modeling and inversion of geophysical data sets. Each week includes two hours of lectures; plus one two-hour lab that involves acquisition of field or lab data, or computer modeling/analysis of data. Pre-requisite: CME 100 or Math 51, or co-registration in either. Not given 2013-14.

GEOPHYS 196. Undergraduate Research in Geophysics. 1-10 Unit.
Field-, lab-, or computer-based. Faculty supervision. Written reports.

GEOPHYS 197. Senior Thesis in Geophysics. 3-5 Units.
For seniors writing a thesis based on Geophysics research in 196 or as a summer research fellow.

GEOPHYS 198. Honors Program. 1-3 Unit.
Experimental, observational, or theoretical honors project and thesis in geophysics under supervision of a faculty member. Students who elect to do an honors thesis should begin planning it no later than Winter Quarter of the junior year. Prerequisites: department approval.

GEOPHYS 199. Senior Seminar: Issues in Earth Sciences. 3 Units.
Focus is on written and oral communication in a topical context. Topics from current frontiers in earth science research and issues of concern to the public. Readings, oral presentations, written work, and peer review.
Same as: GES 150.

GEOPHYS 200. Fluids and Flow in the Earth: Computational Methods. 3 Units.
Interdisciplinary problems involving the state and movement of fluids in crustal systems, and computational methods to model these processes. Examples of processes include: nonlinear, time-dependent flow in porous rocks; coupling in porous rocks between fluid flow, stress, deformation, and heat and chemical transport; percolation of partial melt; diagenetic processes; pressure solution and the formation of stylolites; and transient pore pressure in fault zones. MATLAB, Lattice-Boltzmann, and COMSOL Multiphysics. Term project. No experience with COMSOL Multiphysics required. Offered every other year, winter quarter. Next offering, Winter 2014-15.
Same as: GEOPHYS 181.

GEOPHYS 201. Frontiers of Geophysical Research at Stanford: Faculty Lectures. 1 Unit.
Required for new students entering the department. Second-year and other graduate students may attend either for credit or as auditors. Department faculty and senior research staff introduce the frontiers of research problems and methods being employed or developed in the department and unique to department faculty and students: what the current research is, why the research is important, what methodologies and technologies are being used, and what the potential impact of the results might be. Offered every year, autumn quarter.

GEOPHYS 202. Reservoir Geomechanics. 3 Units.
Basic principles of rock mechanics and the state of stress and pore pressure in sedimentary basins related to exploitation of hydrocarbon and geothermal reservoirs. Mechanisms of hydrocarbon migration, exploitation of fractured reservoirs, reservoir compaction and subsidence, hydraulic fracturing, utilization of directional and horizontal drilling to optimize well stability. Given alternate years. Next offering Winter 2013-14.

GEOPHYS 204. Spectral Finite Element Method (SPECFEM) Seismograms. 3 Units.
This is a short course intended for graduate students, but senior level undergraduate students are welcome. The course will cover spectral finite element methods for generating synthetic seismograms. The course will emphasize application over theory, such that students will be able to generate synthetic seismograms by the end of the course. We will employ the SPECFEM code suite on the Center for Computational Earth and Environmental Science (CEES) cluster to generate synthetic seismograms. Bring your laptop to class! Pre-requisite: A working knowledge of differential equations, matrix algebra, unix/linux, and earthquake seismology.

GEOPHYS 210. Basic Earth Imaging. 2-3 Units.
Echo seismogram recording geometry, head waves, moveout, velocity estimation, making images of complex shaped reflectors, migration by Fourier and integral methods. Anti-aliasing. Dip moveout. Computer labs. See <http://sep.stanford.edu/sep/prof/>. Offered every year, autumn quarter.

GEOPHYS 211. Environmental Soundings Image Estimation. 3 Units.
Imaging principles exemplified by means of imaging geophysical data of various uncomplicated types (bathymetry, altimetry, velocity, reflectivity). Adjoints, back projection, conjugate-gradient inversion, preconditioning, multidimensional autoregression and spectral factorization, the helical coordinate, and object-based programming. Common recurring issues such as limited aperture, missing data, signal/noise segregation, and nonstationary spectra. See <http://sep.stanford.edu/sep/prof/>.
Same as: GEOPHYS 187.

GEOPHYS 218. Understanding Natural Hazards, Quantifying Risk, Increasing Resilience in Highly Urbanized Regions. 3 Units.

Integrating the science of natural hazards, methods for quantitatively estimating the risks that these hazards pose to populations and property, engineering solutions that might best ameliorate these risks and increase resilience to future events, and policy and economic decision-making studies that may increase long-term resilience to future events. Panel discussions by outside experts exploring the science, engineering, policy, and economics that underly the hazards, risks, and strategies for increasing resilience. Group assignments to evaluate the way in which natural hazards, and human population and developing interact in megacities to produce risk, and what strategies might be adopted in each area to reduce risks posted by the specific hazards faced by these urban areas.

Same as: EESS 118, EESS 218, GEOPHYS 118, GES 118, GES 218.

GEOPHYS 220. Ice, Water, Fire. 3-5 Units.

Introductory application of continuum mechanics to ice sheets and glaciers, water waves and tsunamis, and volcanoes. Emphasis on physical processes and mathematical description using balance of mass and momentum, combined with constitutive equations for fluids and solids. Designed for undergraduates with no prior geophysics background; also appropriate for beginning graduate students. Prerequisites: CME 100 or MATH 52 and PHYSICS 41 (or equivalent). Offered every year, winter quarter (except 2013-2014, when offered in spring).

Same as: GEOPHYS 120.

GEOPHYS 222. Reflection Seismology. 3 Units.

The principles of seismic reflection profiling, focusing on methods of seismic data acquisition and seismic data processing for hydrocarbon exploration.

Same as: GEOPHYS 182.

GEOPHYS 223. Reflection Seismology Interpretation. 1-4 Unit.

The structural and stratigraphic interpretation of seismic reflection data, emphasizing hydrocarbon traps in two and three dimensions on industry data, including workstation-based interpretation. Lectures only, 1 unit. Prerequisite: 222, or consent of instructor. Offered Spring quarter 2013-14. Same as: GEOPHYS 183.

GEOPHYS 224. Seismic Reflection Processing. 2-3 Units.

Workshop in computer processing of 2D and 3D seismic reflection data. Students individually process a seismic reflection profile (of their own choice or instructor-provided) from field recordings to migrated sections and subsurface images, using interactive software (OpenCPS from OpenGeophysical.com). Prerequisite: GEOPHYS 222 or consent of instructor.

GEOPHYS 235. WAVES AND FIELDS IN GEOPHYSICS. 3 Units.

Basic topics and approaches (theory and numerical simulations) on acoustic, electromagnetic, and elastic waves and fields for geophysical applications: dispersion, phase and group velocities, attenuation, reflection and transmission at planar interfaces, high frequency and low frequency approximations, heterogeneous media. Prerequisites: UG level class on waves or consent of instructor. Offered Autumn 2013-14.

GEOPHYS 240. Borehole Seismic Modeling and Imaging. 3 Units.

Borehole seismic imaging for applications to subsurface reservoir characterization and monitoring. Topics include data acquisition, data processing, imaging and inversion. Analysis and processing of synthetic and field datasets. Prerequisites: Waves class equivalent to GP 230, Matlab or other computer programming. Spring Quarter, every other year. Offered 2013/14.

GEOPHYS 241A. Seismic Reservoir Characterization. 3-4 Units.

(Same as GP241) Practical methods for quantitative characterization and uncertainty assessment of subsurface reservoir models integrating well-log and seismic data. Multidisciplinary combination of rock-physics, seismic attributes, sedimentological information and spatial statistical modeling techniques. Student teams build reservoir models using limited well data and seismic attributes typically available in practice, comparing alternative approaches. Software provided (SGEMS, Petrel, Matlab). Recommended: ERE240/260, or GP222/223, or GP260/262 or GES253/257; ERE246, GP112

Same as: ENERGY 141, ENERGY 241.

GEOPHYS 246A. Atmosphere, Ocean, and Climate Dynamics: The Atmospheric Circulation. 3 Units.

Introduction to the physics governing the circulation of the atmosphere and ocean and their control on climate with emphasis on the atmospheric circulation. Topics include the global energy balance, the greenhouse effect, the vertical and meridional structure of the atmosphere, dry and moist convection, the equations of motion for the atmosphere and ocean, including the effects of rotation, and the poleward transport of heat by the large-scale atmospheric circulation and storm systems. Prerequisites: MATH 51 or CME100 and PHYSICS 41.

Same as: EARTHSYS 146A, EARTHSYS 246A, EESS 146A, EESS 246A, GEOPHYS 146A.

GEOPHYS 246B. Atmosphere, Ocean, and Climate Dynamics: the Ocean Circulation. 3 Units.

Introduction to the physics governing the circulation of the atmosphere and ocean and their control on climate with emphasis on the large-scale ocean circulation. This course will give an overview of the structure and dynamics of the major ocean current systems that contribute to the meridional overturning circulation, the transport of heat, salt, and biogeochemical tracers, and the regulation of climate. Topics include the tropical ocean circulation, the wind-driven gyres and western boundary currents, the thermohaline circulation, the Antarctic Circumpolar Current, water mass formation, atmosphere-ocean coupling, and climate variability. Prerequisites: EESS 146A or EESS 246A, or CEE 164 or CEE 262D, or consent of instructor.

Same as: EARTHSYS 146B, EARTHSYS 246B, EESS 146B, EESS 246B, GEOPHYS 146B.

GEOPHYS 251. Structural Geology and Rock Mechanics. 4 Units.

Quantitative field and laboratory data integrated with solutions to boundary value problems of continuum mechanics to understand tectonic processes in Earth's crust that lead to the development of geological structures including folds, faults, fractures and fabrics. Topics include: techniques and tools for structural mapping; differential geometry to characterize structures; dimensional analysis and scaling relations; kinematics of deformation and flow; traction and stress analysis, conservation of mass and momentum in a deformable continuum; linear elastic deformation and elastic properties; brittle deformation including fracture and faulting; model development and methodology. Data sets analyzed using MATLAB. Prerequisites: GES 1, MATH 53, MATLAB or equivalent.

Same as: CEE 297R, GES 215.

GEOPHYS 255. Report on Energy Industry Training. 1-3 Unit.

On-the-job-training for master's and doctoral degree students under the guidance of on-site supervisors. Students submit a report detailing work activities, problems, assignment, and key results. May be repeated for credit. Prerequisite: written consent of adviser.

GEOPHYS 257. Introduction to Computational Earth Sciences. 2-4 Units.

Techniques for mapping numerically intensive algorithms to modern high performance computers such as the Center for Computational Earth and Environmental Science;s (CEES) high productivity technical computing (HPTC). Topics include: debugging, performance analysis, and concepts of parallel programming; efficient serial and parallel programs; OpenMP; and MPI. Exercises using SMP and cluster computers. See <http://pangea.stanford.edu/research/cees/>. Recommended: familiarity with MATLAB, C, or Fortran. May be repeated for credit. Offered every other year, winter quarter.

GEOPHYS 258. Applied Optimization Laboratory (Geophys 258). 3-4 Units.

Application of optimization and estimation methods to the analysis and modeling of large observational data sets. Laboratory exercises using inverse theory and applied linear algebra to solve problems of indirect and noisy measurements. Emphasis on practical solution of scientific and engineering problems, especially those requiring large amounts of data, on digital computers using scientific languages. Also addresses advantages of large-scale computing, including hardware architectures, input/output and data bus bandwidth, programming efficiency, parallel programming techniques. Student projects involve analyzing real data by implementing observational systems such as tomography for medical and Earth observation uses, radar and matched filtering, multispectral/multitemporal studies, or migration processing. Prerequisites: Programming with high level language. Recommended: EE261, EE263, EE178/278A, ME300 or equivalent. Same as: EE 257.

GEOPHYS 260. Rock Physics for Reservoir Characterization. 3 Units.

How to integrate well log and laboratory data to determine and theoretically generalize rock physics transforms between sediment wave properties (acoustic and elastic impedance), bulk properties (porosity, lithology, texture, permeability), and pore fluid conditions (pore fluid and pore pressure). These transforms are used in seismic interpretation for reservoir properties, and seismic forward modeling in what-if scenarios. Offered every other year, spring quarter. Next offering Spring quarter, 2013-14. Same as: GEOPHYS 185.

GEOPHYS 262. Rock Physics. 3 Units.

Properties of and processes in rocks as related to geophysical exploration, crustal studies, and tectonic processes. Emphasis is on wave velocities and attenuation, hydraulic permeability, and electrical resistivity in rocks. Application to in situ problems, using lab data and theoretical results. Offered every year, autumn quarter.

GEOPHYS 265. Imaging Radar and Applications. 3 Units.

Radar remote sensing, radar image characteristics, viewing geometry, range coding, synthetic aperture processing, correlation, range migration, range/Doppler algorithms, wave domain algorithms, polar algorithm, polarimetric processing, interferometric measurements. Applications: surface deformation, polarimetry and target discrimination, topographic mapping surface displacements, velocities of ice fields. Prerequisites: EE261. Recommended: EE254, EE278B, EE279. Same as: EE 355.

GEOPHYS 270. Electromagnetic Properties of Geological Materials. 3 Units.

Laboratory observations and theoretical modeling of the electromagnetic properties and nuclear magnetic resonance response of geological material. Relationships between these properties and water-saturated materials properties such as composition, water content, surface area, and permeability. Offered Winter 2014.

GEOPHYS 274. Journey to the Center of the Earth. 3 Units.

The interconnected set of dynamic systems that make up the Earth. Focus is on fundamental geophysical observations of the Earth and the laboratory experiments to understand and interpret them. What earthquakes, volcanoes, gravity, magnetic fields, and rocks reveal about the Earth's formation and evolution. Offered every other year, winter quarter. Next offering Winter 2013-14.

Same as: GEOPHYS 184, GES 107, GES 207.

GEOPHYS 280. 3-D Seismic Imaging. 2-3 Units.

The principles of imaging complex structures in the Earth subsurface using 3-D reflection seismology. Emphasis is on processing methodologies and algorithms, with examples of applications to field data. Topics: acquisition geometrics of land and marine 3-D seismic surveys, time vs. depth imaging, migration by Kirchhoff methods and by wave-equation methods, migration velocity analysis, velocity model building, imaging irregularly sampled and aliased data. Computational labs involve some programming. Lab for 3 units. Offered every year, Spring quarter.

GEOPHYS 281. Geophysical Inverse Problems. 3 Units.

Concepts of inverse theory, with application to geophysics. Inverses with discrete and continuous models, generalized matrix inverses, resolving kernels, regularization, use of prior information, singular value decomposition, nonlinear inverse problems, back-projection techniques, and linear programming. Application to seismic tomography, earthquake location, migration, and fault-slip estimation. Prerequisite: MATH 51.

GEOPHYS 284. Hydrogeophysics. 3 Units.

The use of geophysical methods for imaging and characterizing the top 100 meters of Earth for hydrogeologic applications. Includes material properties, forward modeling, data acquisition, inversion, and integration with other forms of measurement. Each week includes three hours of lectures; plus one three-hour lab that involves acquisition of data at campus or nearby sites, or computer modeling of data. Offered occasionally.

GEOPHYS 286. Global Seismology. 3 Units.

This course investigates how waves propagate through the whole Earth. This course examines the questions ¿How do body waves and surface waves behave within the Earth?¿ and ¿What does that tell us about the Earth?¿ The course delves into both theory and how we apply that theory to understand seismic observations. Requirements: Math 52 or CME 102, GPI30 or permission from instructor.

GEOPHYS 287. Earthquake Seismology. 3-5 Units.

Seismic wave propagation in layered media, ray theory, Green's functions, seismic moment tensors, representation theorem, finite-source effects, kinematics and dynamics of earthquakes, and engineering aspects of seismology. Prerequisites: GEOPHYS 130 or equivalent. Offered every other year, spring quarter. Not offered 2013-14.

GEOPHYS 288A. Crustal Deformation. 3-5 Units.

Earthquake and volcanic deformation, emphasizing analytical models that can be compared to data from GPS, InSAR, and strain meters. Deformation, stress, and conservation laws. Dislocation models of strike slip and dip slip faults, in 2 and 3 dimensions. Crack models, including boundary element methods. Dislocations in layered and elastically heterogeneous earth models. Models of volcano deformation, including sills, dikes, and magma chambers. Offered every other year, autumn quarter. Next offering, Autumn 2013-14.

GEOPHYS 288B. Crustal Deformation. 3-5 Units.

Earthquake and volcanic deformation, emphasizing analytical models that can be compared to data from GPS, InSAR, and strain meters. Viscoelasticity, post-seismic rebound, and viscoelastic magma chambers. Effects of surface topography and earth curvature on surface deformation. Gravity changes induced by deformation and elastogravitational coupling. Poro-elasticity, coupled fluid flow and deformation. Earthquake nucleation and rate-state friction. Models of earthquake cycle at plate boundaries. Offered Winter 2013-14.

GEOPHYS 289. Global Positioning System in Earth Sciences. 3-5 Units.

The basics of GPS, emphasizing monitoring crustal deformation with a precision of millimeters over baselines tens to thousands of kilometers long. Applications: mapping with GIS systems, airborne gravity and magnetic surveys, marine seismic and geophysical studies, mapping atmospheric temperature and water content, measuring contemporary plate motions, and deformation associated with active faulting and volcanism.

GEOPHYS 290. Tectonophysics. 3 Units.

The physics of faulting and plate tectonics. Topics: plate driving forces, lithospheric rheology, crustal faulting, and the state of stress in the lithosphere. Exercises: lithospheric temperature and strength profiles, calculation of seismic strain from summation of earthquake moment tensors, slip on faults in 3D, and stress triggering and inversion of stress from earthquake focal mechanisms. Offered every other year, winter quarter.

Same as: GEOPHYS 186.

GEOPHYS 385A. Reflection Seismology. 1-5 Unit.

Research in reflection seismology and petroleum prospecting. May be repeated for credit.

GEOPHYS 385B. Environmental Geophysics. 1-5 Unit.

Research on the use of geophysical methods for near-surface environmental problems. May be repeated for credit.

GEOPHYS 385D. Theoretical Geophysics. 1-5 Unit.

Research on physics and mechanics of earthquakes, volcanoes, ice sheets, and nnglaciers. Emphasis is on developing theoretical understanding of processes governing natural phenomena.

GEOPHYS 385E. Tectonics. 1-5 Unit.

Research on the origin, major structures, and tectonic processes of the Earth's crust. Emphasis is on use of deep seismic reflection and refraction data. May be repeated for credit.

GEOPHYS 385J. Global Seismic Techniques, Theory, and Application. 1-5 Unit.

Topics chosen from surface wave dispersion measurement, 1D inversion techniques, regional tomographic inversion, receiver functions, ray theory in spherical geometry, seismic attenuation, seismic anisotropy, seismic focusing, reflected phases, stacking, and interpretations of seismic results in light of other geophysical constraints. May be repeated for credit.

GEOPHYS 385K. Crustal Mechanics. 1-5 Unit.

Research in areas of petrophysics, seismology, in situ stress, and subjects related to characterization of the physical properties of rock in situ. May be repeated for credit.

GEOPHYS 385L. Earthquake Seismology, Deformation, and Stress. 1-5 Unit.

Research on seismic source processes, crustal stress, and deformation associated with faulting and volcanism. May be repeated for credit.

GEOPHYS 385N. Experimental Rock Physics. 1-5 Unit.

Research on the use of laboratory geophysical methods for the characterization of the physical properties of rocks and their response to earth stresses, temperature, and rock-fluid interactions. May be repeated for credit.

GEOPHYS 385S. Wave Physics. 1-5 Unit.

Theory, numerical simulation, and experiments on seismic and electromagnetic waves in complex porous media. Applications from Earth imaging and in situ characterization of Earth properties, including subsurface monitoring. Presentations by faculty, research staff, students, and visitors. May be repeated for credit.

GEOPHYS 385V. Poroelasticity. 1-5 Unit.

Research on the mechanical properties of porous rocks: dynamic problems of seismic velocity, dispersion, and attenuation; and quasi-static problems of faulting, fluid transport, crustal deformation, and loss of porosity. Participants define, investigate, and present an original problem of their own. May be repeated for credit.

GEOPHYS 385Z. Radio Remote Sensing. 1-5 Unit.

Research applications, especially crustal deformation measurements. Recent instrumentation and system advancements. May be repeated for credit.

GEOPHYS 400. Research in Geophysics. 1-15 Unit.**GEOPHYS 801. TGR Project. 0 Units.****GEOPHYS 802. TGR Dissertation. 0 Units.**

German General Courses

German Literature Courses

GERMAN 10SC. Resistance Writings in Nazi Germany. 2 Units.

Developing the courage to do what is right and maintaining the strength to resist evil in the face of personal persecution are fundamental human dilemmas. Many who lived in Nazi Germany had neither the courage, the intellectual and/or spiritual means, nor the strength to speak or act against the evil with which they were confronted. But some did possess courage and strength, and they serve as touchstones for understanding the best of the human spirit during the worst of times. This course focuses on documents generated by nonmilitary resistance groups during the period of National Socialism. Letters, essays, diaries, and statements on ethics from the Bonhoeffer and Scholl families form the core of the readings. The resistance novel, *Every Man Dies Alone*, by Hans Fallada, is also included. Texts will be read as historical documents, reflections of German thought, statements of conscience, attempts to maintain normal relationships with others in the face of great risk, as poetic works, and as guides for the development of an ethical life.

GERMAN 41N. Inventing Modern Theatre: Georg Büchner and Frank Wedekind. 3 Units.

The German writers Georg Büchner (1813-1837) and Frank Wedekind (1864-1918). Many of the most important theater and film directors of the last century, including Max Reinhardt, G. W. Pabst, Orson Welles, Robert Wilson, and Werner Herzog, have wrestled with their works, as have composers and writers from Alban Berg and Bertolt Brecht through Christa Wolf and Thalia Field. Rock artists as diverse as Tom Waits, Lou Reed, Duncan Sheik, and Metallica have recently rediscovered their urgency. Reading these works in translation and examining artistic creations they inspired. Classroom discussions and written responses; students also rehearse and present in-class performances of excerpts from the plays. The aim of these performances is not to produce polished stagings but to creatively engage with the texts and their interpretive traditions. No previous theatrical experience required. Same as: TAPS 41N.

GERMAN 80N. Modern Conservatives. 4 Units.

How do conservatives respond to the modern world? How do they find a balance between tradition and freedom, or between stability and change? This seminar will examine selections from some conservative and some classically liberal writers that address these questions. At the center of the course are thinkers who left Germany and Austria before the Second World War: Friedrich Hayek, Leo Strauss and Hannah Arendt. We will also look at earlier European writers, such as Edmund Burke and Friedrich Nietzsche, as well as some recent American thinkers. Taught in English.

GERMAN 88Q. Gateways to the World: Germany in 5 Words. 3 Units.

This course explores German history, culture and politics by tracing five (largely untranslatable) words and exploring the debates they have engendered in Germany over the past 200 years. This course is intended as preparation for students wishing to spend a quarter at the Bing Overseas Studies campus in Berlin, but is open to everyone. It fulfills the WRITE-2 requirement. Preference to sophomores.

GERMAN 104. Resistance Writings in Nazi Germany. 3 Units.

This course focuses on documents generated by nonmilitary resistance groups during the period of National Socialism. Letters, essays, diaries, and statements on ethics from the Bonhoeffer and Scholl families form the core of the readings. The resistance novel, *Every Man Dies Alone*, is also included. Texts will be read as historical documents, reflections of German thought, statements of conscience, attempts to maintain normal relationships with others in the face of great risk, as poetic works, and as guides for the development of an ethical life. Taught in English.

GERMAN 116. Writing About Germany: New Topics, New Genres. 3-4 Units.

For Seniors who are declared German Studies majors. How to write about various topics in German Studies for a wide public through opinion pieces or blogs. Topics based on student interests: current politics, economics, European affairs, start-ups in Germany. Intensive focus on writing. Taught in English. Fulfills the WIM requirement.

GERMAN 120N. The Brothers Grimm and Their Fairy Tales. 4 Units.

Historical, biographical, linguistic, and literary look at the *Kinder-* and *Hausmarchen* of Jacob and Wilhelm Grimm. Readings from the fairy tales, plus materials in other media such as film and the visual arts. Four short essays, one or two oral reports. Preference to Freshmen; class then opens to all. Fulfills WIM for German majors (must be taken for letter grade.) In German.

GERMAN 120Q. Contemporary Politics in Germany. 3-4 Units.

This course provides an opportunity to engage with issues and actors, politicians and parties in contemporary Germany, while building German language abilities. We will work with current events texts, news reports, speeches and websites. Course goals include building analytic and interpretive capacities of political topics in today's Europe, including the European Union, foreign policy, and environmentalism. Differences between US and German political culture are a central topic. At least one year German language study required.

GERMAN 122. Germany in Crisis. 3-5 Units.

Focusing on literature that precedes three major events in German history- the Reformation, the Second World War, and German reunification- this course explores German cultural output leading up to moments of fissure. Beginning in 1930s Frankfurt, exploring a pre- and post- reunified Berlin, and returning to the Middle Ages, students will develop an understanding of the role of literature as a critical indicator of social and cultural paradigm shifts. Through the study of the diverse set of authors and literature under consideration, students will explore a variety of categorization issues such as medium, religion, ideology, gender and secularization.

GERMAN 123. German Culture and Film. 3-5 Units.

This course has two primary goals. First, it is designed to provide students with a visual and linguistic foundation for discussing and writing about German film from the Weimar period to the present. To that end we will review important genres, directors, and technological developments in the history of German film. Second, using film as a lens, we will examine several key moments in German cultural history from the 1920s to the present. Certain themes will reoccur throughout the course, including gender, the city, technology, violence, and social crisis. All materials and class discussion in German. (Meets Writing-in-the-Major requirement).

GERMAN 124. Introduction to German Poetry. 3-5 Units.

Introduction to the reading and interpretation of lyrical poetry in German from the 18th century to present. Readings include poems by Goethe, Holderlin, Brentano, Eichendorff, Heine, Rilke, Trakl, Celan, Brecht. Ways of thinking about and thinking with poetry. Attention to poetic form, voice, figural language, and the interaction of sensory registers. Taught in German.

GERMAN 128N. Medicine, Modernism, and Mysticism in Thomas Mann's the Magic Mountain. 3 Units.

Published in 1924, *The Magic Mountain* is a novel of education, tracing the intellectual growth of a budding engineer through a maze of intellectual encounters during a seven- year sojourn in a sanatorium set high in the Swiss Alps. It engages with the key themes of modernism: the relativity of time, the impact of psychoanalysis, the power of myth, and an extended dispute between an optimistic belief in progress and a pessimistic vision of human nature. Through its detailed discussion of disease (tuberculosis), this remarkable text connects the study of medicine to the humanities. There will be an exploration of this rich and profound novel both as a document of early twentieth-century Europe and as a commentary on the possibilities of education that are urgent for liberal arts education today. Taught in English.

GERMAN 131. What is German Literature?. 3-5 Units.

This course covers material from the fairy tales of German romanticism, expressionist poetry and painting, literary responses to Nazi Germany and reflections on a unified Germany. Exploring the shifting relationships between cultural aesthetics, entertainment, historical context, and "what is German" we will cover roughly 250 years of literary and artistic production, social and political upheavals, as well as the lives of numerous authors, both male and female. Taught in German.

GERMAN 132. Dynasties, Dictators and Democrats: History and Politics in Germany. 3-5 Units.

Key moments in German history through documents: personal accounts, political speeches and texts, and literary works. The course begins with the Prussian monarchy and proceeds to the crisis years of the French Revolution. Documents from the 1848 revolution and the age of Bismarck and German unification follow. World War I and its impact on Germany, including the rise of Hitler, as well as the aftermath, divided Germany in the Cold War through the fall of the Berlin Wall. Taught in German. Same as: COMPLIT 132A.

GERMAN 133. Marx, Nietzsche, Freud. 3-5 Units.

We read and discuss selections from works by the key master thinkers who have exerted a lasting influence by debunking long-cherished beliefs. Do these authors uphold or repudiate Enlightenment notions of rationality, autonomy and progress? How do they assess the achievements of civilization? How do their works illuminate the workings of power in social and political contexts? Readings and discussion in German.

GERMAN 154. Poetic Thinking Across Media. 4 Units.

Even before Novalis claimed that the world must be romanticized, thinkers, writers, and artists wanted to perceive the human and natural world poetically. The pre- and post-romantic poetic modes of thinking they created are the subject of this course. Readings include Ecclestias, Zhaozhou Congshen, Montaigne, Nietzsche, Kafka, Benjamin, Arendt, and Sontag. This course will also present poetic thinking in the visual arts--from the expressionism of Ingmar Bergman to the neo-romanticism of Gerhard Richter.

Same as: COMPLIT 154B, JEWISHST 144B.

GERMAN 181. Philosophy and Literature. 5 Units.

Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track; majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. Taught in English. Same as: CLASSGEN 81, COMPLIT 181, ENGLISH 81, FRENCH 181, ITALIAN 181, PHIL 81, SLAVIC 181.

GERMAN 182. War and Warfare in Germany. 3 Units.

Survey of Germany at war through historical, theoretical and literary accounts. War in the international system and the role of technology. Religious wars, rationalization of warfare, violence and politics, terrorism. War films, such as *All Quiet on the Western Front*. Readings by authors such as Clausewitz, Jünger, Remarque, Schimdt, and Arendt. Taught in English.

GERMAN 184. Technology, Innovation, and the History of the Book. 3-5 Units.

An historical perspective on the intellectual and social impact of developments in information technology will be examined. Focusing on the evolution of media from scrolls to codices to printed books we will look at the social, historical, cultural, and economic sources and ramifications of innovation in media and information technology, and explore why such innovation occurs in certain places and within certain social groups and not others. Examples draw from German cultural history, e.g. Gutenberg and the printing press, but also from the broader European history of the book. Students will have the opportunity to work with historical materials from Special Collections. Taught in English.

GERMAN 191. German Capstone Project. 1 Unit.

Each student participates in a capstone interview and discussion with a panel of the German Studies faculty on topics related to German cultural and literary analysis. In preparation for the interview/discussion, students submit written answers to a set of questions based on several authentic cultural texts in German. The written answers, normally in English, should be well-formed and coherent. Within the interview/discussion, students must demonstrate a further understanding of the topic(s) posed, through cogent argument.

GERMAN 199. Individual Work. 1-12 Unit.

Repeatable for Credit. Instructor Consent Required.

GERMAN 218. Central European Literature. 4 Units.

Central Europe is not a clearly defined region so much as an idea debated with particular intensity in the successor states of the Austro-Hungarian monarchy. Part reality part fantasy, "Central Europe" refers to a contested space between East and West, between cosmopolitanism and provincial narrowness, a space whose diversity has fostered cultural creativity, political conflict and utopian fantasy. Our survey will focus on fiction, memoirs and essayistic commentary from the successor states of the Austro-Hungarian monarchy. It will comprise the dissolution of the empire, the interwar years, the Cold War decades and the postcommunist era. Attention to the predicament of small nations, "minor" literatures and cultural cross-pollination. Authors include Musil, Kafka, Roth, Kosztolányi, Márai, Hasek, Svevo, Kis, Torberg, Hrabal, Kundera, Esterházy, Magris. Discussion and readings in English.

GERMAN 220. Medieval and Early Modern German Literature. 5-8 Units.

This seminar offers a survey of literary, cultural and intellectual developments in German-speaking lands from ca.1200 to 1600. We will begin our investigation with a sampling of medieval heroic epic, romance, lyric poetry, and mysticism. From there we will move into humanism and consider the invention of print and the popular literary forms characteristic of Reformation culture in the German lands. Discussion in English. All texts are available in modern German or English translation. Undergraduates enroll in 220 for 5 units, graduate students enroll in 320 for 8 units.

Same as: GERMAN 320.

GERMAN 221. From Enlightenment to Realism: German Literature 1750-1900. 5-8 Units.

How German writers respond to the rise of historical awareness in the long nineteenth century. The role of historical precedents and models, especially Judeo-Christian and Greco-Roman legacies, the Middle Ages, the Reformation, the French Revolution and its aftermath. The vexed relation between cultural production, material circumstances and political agency. The belatedness of German modernity and the anomalous character of Germany's development. France as a screen for the projection of nationalist and utopian fantasies. Authors include Herder, Goethe, Fichte, Heine, Büchner, Marx, Nietzsche, Fontane. Taught in German. Undergraduates enroll in 220 for 5 units, German graduate students enroll in 320 for 8 units. Same as: COMPLIT 321A, GERMAN 321.

GERMAN 222. Wrestling with Modernity: German Literature and Thought from 1900 to the Present. 5-8 Units.

Masters of German 20th- and 21st-Century literature and philosophy as they present aesthetic innovation and confront the challenges of modern technology, social alienation, manmade catastrophes, and imagine the future. Readings include Nietzsche, Freud, Rilke, Musil, Brecht, Kafka, Doebelin, Benjamin, Juenger, Arendt, Musil, Mann, Adorno, Celan, Grass, Bachmann, Bernhardt, Wolf, and Kluge. Taught in English. Undergraduates enroll in 222 for 5 units, graduate students enroll in 322 for 8 units. Same as: COMPLIT 222A, GERMAN 322.

GERMAN 233. Cultures of Forgetting: On the Ethics and Aesthetics of Dementia. 3 Units.

Both identity and narration rely on memory and (some extent of) cohesion. What happens in the case of dementia, when the ability to remember fails and language tends to disintegrate? Reading scientific and (fictitious or biographical) literary texts, we will analyze competing concepts of forgetting, their bioethical and political impact against the backdrop of (post-) World War II, possible differences between European and American ways of relating dementia, and the aesthetic strategies of telling stories about the breakdown of language. Readings include literary texts by J. Bernlef, Irene Dische, Ulrike Draesner, Jonathan Franzen, Arno Geiger, Michael Ignatieff, Tilman Jens, and Alice Munro. Taught in English with some readings in German. 6-week course, offered weeks 1-6.

GERMAN 245. German Idealist and Romantic Aesthetics. 3-5 Units.

Focus on influential theories of aesthetic experience as an autonomous cultural domain that supplements science and morality. How the discovery of beauty and sublimity in nature led to an unprecedented celebration of art as the highest form of human activity. The problem of the relation between aesthetic experience and conceptual understanding. Readings by Kant, Schiller, Friedrich Schlegel, Schelling, Hegel, and more recent responses to their works. Taught in English.

GERMAN 246. Hegel's Phenomenology of Spirit. 4 Units.

Written in the turmoil of the Napoleonic Wars, Hegel's masterpiece is a freewheeling philosophical story about what Hegel takes to be the experiential path that consciousness must traverse from rudimentary awareness to insight into the absolute truth. Experience, as Hegel understands it, is a necessary process in the course of which consciousness becomes estranged from itself in order finally to recognize itself in its object. This recognition seals the knowledge that thought is not finite and constrained by an inert reality but absolutely free, the only source of authority for modern subjects. We will ask whether Hegel's thesis about the supremacy of conceptual thought is compatible with his reliance on narrative form and dramatic impersonation. How does Hegel's survey of rival models of consciousness and forms of life relate to historical reality? Is the ideal of modernity upheld by Hegel still relevant in the light of recent developments? Discussion and readings in English.

GERMAN 250. Humanities Education in the Changing University. 3 Units.

Advanced study in the humanities faces changes within fields, the university and the wider culture. Considers the debate over the status of the humanities with regard to historical genealogies and current innovations. Particular attention on changes in doctoral education. Topics include: origins of the research university; disciplines and specialization; liberal education in conflict with professionalization; literature and literacy education; interdisciplinarity as a challenge to departments; education policy; digital humanities; accountability in education, assessment and student-centered pedagogies.
Same as: COMPLIT 275, DLCL 320.

GERMAN 262. The Total Work of Art. 5 Units.

Frequently associated with the work of Richard Wagner, The Total Work of Art (or Gesamtkunstwerk) is a genre that aims to synthesize a range of artistic forms into an organic unity, a unity that both models and helps to forge an ideal state. This seminar will examine the history of the Gesamtkunstwerk from its roots in German Romanticism to the present day, focusing on the genre's relations with technology and mass culture across a wide range of media. Creations we will consider include Wagner's Festival Theatre at Bayreuth, Walter Gropius' plans for a Totaltheater, Bertolt Brecht and Kurt Weill's radio-oratorio The Lindbergh Flight, Leni Riefenstahl's Triumph of the Will, Walt Disney's theme parks, Andy Warhol's Exploding Plastic Inevitable, and Bill Gates' "home of the future." Taught in English.
Same as: TAPS 262S.

GERMAN 262A. Explosions of Enlightenment. 3-5 Units.

Eighteenth-century culture seen as permeated by intellectual and artistic practices and plays pushing principles of reason and rationality to an extreme that becomes self-undercutting. Such obsessions and practices are becoming more visible and prominent now, as the traditional concept of "Enlightenment" (synonymous with the 18th century) is undergoing a profound transformation. Among the protagonists of this seminar will be: Diderot as a philosopher and novelist; Lichtenberg as a scientist and writer of everyday notes; Goya, accusing violence and obsessed with nightmarish visions; Mozart as the excessive master of repetition and variation.
Same as: COMPLIT 262A.

GERMAN 264. Post-Cold War German Foreign Policy. 5 Units.

This course is devoted to Germany's role and policy in international relations since 1990. It is based on the premise that Germany's post-Cold War foreign policy was shaped by two potentially conflicting impulses which is historical learning versus the country's economic role and geopolitical position. The course's objective is to make students familiar with the overall conditions of German Foreign Policy in the post-Cold War era and to analyze related tensions and dilemmas. Empirical examples are Germany's role in the Yugoslavian wars in the first half of the 1990s, the transatlantic crisis over the Iraq war of 2003 and Germany's engagement in Afghanistan and German Foreign Policy during the country's tenure as a non-permanent member of the UN Security Council 2011-2012. Discussion in English; German reading knowledge required.

GERMAN 264A. Walter Benjamin. 3-5 Units.

Walter Benjamin's work as cultural historian, critic, literary author and philosopher, seen from the trajectory of a German-Jewish intellectual life in the context of the first half of the 20th century. Providing such a historical perspective will be the condition for an actively critical reading of Benjamin's works; a reading that -- counter to the predominant Benjamin-reception -- will try to distinguish between works of purely biographical and historical interest and those Benjamin texts that prove to be of great and lasting intellectual value. Taught in English.
Same as: COMPLIT 264.

GERMAN 271. Futurity: Why the Past Matters. 3-5 Units.

Drawing on literature, the arts, political discourse, museums, and new media, this course asks why and how we take interest in the watershed events of the modern era; how does contemporary culture engages with modern, made-made disasters such as the World Wars or 9/11? Readings and viewings include the literature of G. Grass, W. G. Sebald, Ian McEwan, Toni Morrison and Cormac McCarthy; the cinema of Kathryn Bigelow and Steven Spielberg; speeches by Barak Obama; and the theoretical writing of Walter Benjamin, Hayden White, Fredric Jameson, among others. Taught in English.
Same as: COMPLIT 271A.

GERMAN 282. Martin Heidegger. 3-5 Units.

Working through the most systematically important texts by Martin Heidegger and their historical moments and challenges, starting with *Being and Time* (1927), but emphasizing his philosophical production after World War II. The philological and historical understanding of the texts function as a condition for the laying open of their systematic provocations within our own (early 21st-century) situations. Satisfies the capstone seminar requirement for the major tracks in Philosophy and Literature. Taught in English.
Same as: COMPLIT 213A, COMPLIT 313A, GERMAN 382.

GERMAN 284. The Nervous Age: Neurosis, Neurology, and Nineteenth-century Theatre. 5 Units.

The nineteenth century witnessed profound developments in neurological and psychological sciences, developments that fundamentally altered conceptions of embodiment, agency, and mind. This course will place these scientific shifts in conversation with theatrical transformations of the period. We will read nineteenth-century neuropsychologists such as Charles Bell, Johannes Müller, George Miller Beard, Jean-Martin Charcot, and Hippolyte Bernheim alongside artists such as Percy Shelley, Georg Büchner, Richard Wagner, Émile Zola, and August Strindberg.
Same as: TAPS 354.

GERMAN 285. Environmentalism, Literature and Cultural Criticism. 3-5 Units.

Concern for environmental threats increasingly draw on traditions of cultural and civilizational criticism. This course explores literary and cultural dimensions of environmentalist discourse, especially in German-speaking Europe but with opportunities for comparative treatments of ecological tendencies in other countries. Topics include: Environmentalism as progressive or as conservative; ambivalence toward technology; sustainability and the critique of growth; humans and animals. Authors such as F. Jünger, Jahn, Wolf, C. Amery, Dath, with comparisons to Leopold, Atwood, Ghosh, Latouche and others. Reading knowledge of German or permission of instructor.

GERMAN 298. Writing Workshop. 1-12 Unit.

Open only to German majors and to students working on special projects, including written reports for internships. Honors students use this number for the honors essay. May be repeated for credit.

GERMAN 310A. Music and Critical Theory. 3-5 Units.

The seminar provides an opportunity to study some of the seminal texts of Critical Theory dealing with music. Concentrating on Theodor Adorno's writings on music, we will also include key philosophers who informed Adorno's thinking (in particular Kant, Hegel and Nietzsche), influential nineteenth-century aesthetics of music (Hoffmann, Schopenhauer and Hanslick), other contemporaries of Adorno (for example, Ernst Bloch), and some later authors whose work was influenced by the Frankfurt School (such as Carl Dahlhaus). We will also consider the impact of Critical Theory on recent scholarship. Weekly meetings will be organized around various topics, ranging from central concepts such as "Enlightenment" and "musical material" to individual composers. Music by Wagner, Mahler, Schoenberg, Stravinsky and Weill will feature prominently on the syllabus. Same as: MUSIC 310A.

GERMAN 320. Medieval and Early Modern German Literature. 5-8 Units.

This seminar offers a survey of literary, cultural and intellectual developments in German-speaking lands from ca.1200 to 1600. We will begin our investigation with a sampling of medieval heroic epic, romance, lyric poetry, and mysticism. From there we will move into humanism and consider the invention of print and the popular literary forms characteristic of Reformation culture in the German lands. Discussion in English. All texts are available in modern German or English translation. Undergraduates enroll in 220 for 5 units, graduate students enroll in 320 for 8 units.

Same as: GERMAN 220.

GERMAN 321. From Enlightenment to Realism: German Literature 1750-1900. 5-8 Units.

How German writers respond to the rise of historical awareness in the long nineteenth century. The role of historical precedents and models, especially Judeo-Christian and Greco-Roman legacies, the Middle Ages, the Reformation, the French Revolution and its aftermath. The vexed relation between cultural production, material circumstances and political agency. The belatedness of German modernity and the anomalous character of Germany's development. France as a screen for the projection of nationalist and utopian fantasies. Authors include Herder, Goethe, Fichte, Heine, Büchner, Marx, Nietzsche, Fontane. Taught in German. Undergraduates enroll in 220 for 5 units, German graduate students enroll in 320 for 8 units. Same as: COMPLIT 321A, GERMAN 221.

GERMAN 322. Wrestling with Modernity: German Literature and Thought from 1900 to the Present. 5-8 Units.

Masters of German 20th- and 21st-Century literature and philosophy as they present aesthetic innovation and confront the challenges of modern technology, social alienation, manmade catastrophes, and imagine the future. Readings include Nietzsche, Freud, Rilke, Musil, Brecht, Kafka, Doebelin, Benjamin, Juenger, Arendt, Musil, Mann, Adorno, Celan, Grass, Bachmann, Bernhardt, Wolf, and Kluge. Taught in English. Undergraduates enroll in 222 for 5 units, graduate students enroll in 322 for 8 units. Same as: COMPLIT 222A, GERMAN 222.

GERMAN 369. Introduction to Graduate Studies: Criticism as Profession. 5 Units.

A number of faculty will present published work and discuss their research and composition process. We will read critical, theoretical, and literary texts that address, in different ways, "What is a World?" Taught in English. Same as: COMPLIT 369, DLCL 369, FRENCH 369, ITALIAN 369.

GERMAN 382. Martin Heidegger. 3-5 Units.

Working through the most systematically important texts by Martin Heidegger and their historical moments and challenges, starting with *Being and Time* (1927), but emphasizing his philosophical production after World War II. The philological and historical understanding of the texts function as a condition for the laying open of their systematic provocations within our own (early 21st-century) situations. Satisfies the capstone seminar requirement for the major tracks in Philosophy and Literature. Taught in English.

Same as: COMPLIT 213A, COMPLIT 313A, GERMAN 282.

GERMAN 397. Graduate Studies Colloquium. 1 Unit.

A forum for German Studies graduate students to present their work and discuss it with German Studies faculty and with their peers, and take first steps toward a successful career in and outside the academy.

GERMAN 398. Dissertation Prospectus Colloquium. 1-12 Unit.

Repeatable for Credit.

GERMAN 399. Individual Work. 1-12 Unit.

Repeatable for Credit. Instructor Consent Required.

GERMAN 802. TGR Dissertation. 0 Units.

German Language Courses

GERLANG 1. First-Year German, First Quarter. 5 Units.

Speaking, reading, writing, and listening. Authentic materials. Interactive approach with emphasis on developing communicative expression. The cultural context in which German is spoken.

GERLANG 2. First-Year German, Second Quarter. 5 Units.

Continuation of GERLANG 1. Speaking, reading, writing, and listening. Authentic materials. Interactive approach with emphasis on developing communicative expression. The cultural context in which German is spoken. Prerequisite: Placement Test, GERLANG 1.

GERLANG 3. First-Year German, Third Quarter. 5 Units.

Continuation of GERLANG 2. Speaking, reading, writing, and listening. Authentic materials. Interactive approach with emphasis on developing communicative expression. The cultural context in which German is spoken. Fulfills the University language requirement. Prerequisite: Placement Test, GERLANG 2.

GERLANG 5A. Intensive First-Year German, Part A. 5 Units.

Same as GERLANG 1. Accelerated. Written exercises, compositions, conversation practice, and daily work. Only Stanford students restricted to 9 units may register for 205A,B,C.

GERLANG 5B. Intensive First-Year German, Part B. 5 Units.

Same as GERLANG 2. Continuation of 5A. Accelerated. Written exercises, compositions, conversation practice, and daily work. Only Stanford students restricted to 9 units may register for 205A,B,C. Prerequisite 1 or 5A.

GERLANG 5C. Intensive First-Year German, Part C. 5 Units.

Same as GERLANG 3. Continuation of 5B. Accelerated. Written exercises, compositions, conversation practice, and daily work. Only Stanford students restricted to 9 units may register for 205A,B,C. Prerequisite 2 or 5B. Fulfills the University Foreign Language Requirement.

GERLANG 10. Elementary German for Seniors and Graduate Students. 4 Units.

Intensive. For students who need to acquire reading ability in German for the Ph.D. or for advanced research in their own field. 250 fulfills Ph.D. reading exam.

GERLANG 11P. Individually Programmed Beginning German. 1-12 Unit.

For those who wish to complete more or fewer than 5 units a quarter, have scheduling conflicts, or prefer to work independently. Self-paced work with text and tapes; instructor available for consultation on a regular basis. 3-unit minimum for beginners. Conversational practice available for additional unit. May be repeated for credit. This course does not fulfill the University language requirement.

GERLANG 20A. Beginning German Conversation. 1 Unit. (AU).**GERLANG 20B. Intermediate German Conversation. 1 Unit. (AU).****GERLANG 20C. Advanced German Conversation. 1 Unit. (AU).****GERLANG 20E. Fun Facts about Europe. 1 Unit. (AU) (Staff).**

GERLANG 20J. Central European Brewing. 1 Unit.

Only students 21 and over may enroll. Fee \$ 40. For further information contact mbotzapp@stanford.edu or anaissie@stanford.edu.

GERLANG 20K. Küche Mitt. 1 Unit.

(AU)

Same as: German Cooking Class.

GERLANG 20M. Mitt Movie Series. 1 Unit.

(AU).

GERLANG 20P. Theme Projects. 1 Unit.

(AU).

GERLANG 20R. German Art and Design. 1 Unit.**GERLANG 20T. Teaching German Conversation. 1 Unit.**

(AU).

GERLANG 21. Intermediate German I. 4 Units.

Reading short stories, and review of German structure. Discussions in German, short compositions, videos. Prerequisite: Placement Test, GERLANG 3 or consent of instructor.

GERLANG 21S. Intermediate German. 4 Units.

Reading short stories, and review of German structure. Discussions in German, short compositions, videos. Prerequisite: one year of college German; or two years high school German or equivalent, or AP German.

GERLANG 21W. Intermediate German I: German for Business and International Relations. 4 Units.

Equivalent to 21, but focus is on business and the political and economic geography of Germany. CDs and videos. For students planning to do a business internship in a German-speaking country. Prerequisite: placement test, 3.

GERLANG 22. Intermediate German II. 4 Units.

Continuation of GERLANG 21, with greater emphasis on reading and writing skills. Literary texts of major 20th-century writers in historical context. Prerequisite: Placement Test, GERLANG 21.

GERLANG 22W. Intermediate German II: German for Business and International Relations. 4 Units.

Equivalent to 22, but continuation of 21W. Recommended for students planning to do a business internship in a German-speaking country. Prerequisite: placement test, 21, 21W.

GERLANG 23. One Hundred German Years. 4 Units.

Hundert deutsche Jahre - Hones German language skills while introducing the history and culture of Germany as experienced by ordinary people over the course of the 20th century. Themes include Germans and money, foreigners, Hitler, the Wall, food, etc. Video series, parallel readings, discussion in German, writing, advanced usage. Prerequisite: Placement Test, GERLANG 22, GERLANG 22W.

GERLANG 23C. Second Year German, Third Quarter. 4 Units.

Continuation of GERLANG 22.

GERLANG 99. Language Specials. 1-12 Unit.

Prerequisite: consent of instructor.

GERLANG 105. Advanced Business German. 4 Units.

For students planning to work in a German-speaking country and for preparation of the International Business German exams. Case studies of typical business situations with accompanying videos, listening comprehension exercises, and class simulations. Business correspondence and reports in German. Prerequisite: Placement Test, GERLANG 22.

GERLANG 110. German Newspapers. 3-4 Units.

For intermediate and advanced students. Articles from current newspapers and magazines, reading comprehension strategies with online news updates, and vocabulary. Writing practice if desired. May be repeated once for credit.

GERLANG 111. Television News from Germany. 3-4 Units.

For intermediate and advanced students. Current news reports and features for listening comprehension and vocabulary. Extra listening, speaking, or writing practice for fourth unit.

GERLANG 199. Individual Reading. 1-12 Unit.

Prerequisite: consent of instructor.

GERLANG 205A. Intensive First-Year German for Stanford Grads. 3-5 Units.

Equivalent to GERLANG 5A. For Stanford graduate students only. Stanford graduate students restricted to 9 units; may take 205A, B and C for a total of 9 units.

GERLANG 205B. Intensive First-Year German for Stanford Grads. 3-5 Units.

Equivalent to GERLANG 5B. For Stanford graduate students only. Continuation of 205A. Stanford graduate students restricted to 9 units; may take 205A, B and C for a total of 9 units.

GERLANG 205C. intensive First-Year German, Part C. 3-5 Units.

Equivalent to GERLANG 5C. For Stanford graduate students only. Continuation of 205B. Stanford graduate students restricted to 9 units may take 205A, B and C for a total of 9 units.

GERLANG 210. Elementary German for Graduate Students. 3-4 Units.

Restricted to Stanford graduate students. Prerequisite: consent of instructor.

GERLANG 250. Reading German. 4 Units.

For undergraduates and graduate students with a knowledge of German who want to acquire reading proficiency. Readings from scholarly works and professional journals. Recommended for students who need to pass the Ph.D. reading exam. Prerequisite: one year of German, or 10, or equivalent.

GERLANG 395. Graduate Studies in German. 2-5 Units.

Prerequisite: consent of instructor.

GERLANG 399. Independent Study. 1-6 Unit.

Prerequisite: consent of instructor.

German Literature Courses

Health Research & Policy Courses

HRP 89Q. Introduction to Cross Cultural Issues in Medicine. 3 Units.

Preference to sophomores. Introduction to social factors that impact health care delivery, such as ethnicity, immigration, language barriers, and patient service expectations. Focus is on developing a framework to understand culturally unique and non-English speaking populations in the health care system.

HRP 198. Unite, Empower, Experience: Understanding the Universality of Women's Health. 1 Unit.

Directed reading course reading. Focus is on the impact of the unique challenges women face in the healthcare system on women and their communities. Examines the current state of women's health from global perspective, considering: community health, health policy, and the medical technology sector.

HRP 199. Undergraduate Research. 1-18 Unit.

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

HRP 206. Meta-research: Appraising Research Findings, Bias, and Meta-analysis. 3 Units.

Open to graduate, medical, and undergraduate students. Appraisal of the quality and credibility of research findings; evaluation of sources of bias. Meta-analysis as a quantitative (statistical) method for combining results of independent studies. Examples from medicine, epidemiology, genomics, ecology, social/behavioral sciences, education. Collaborative analyses. Project involving generation of a meta-research project or reworking and evaluation of an existing published meta-analysis. Prerequisite: knowledge of basic statistics.

Same as: MED 206, STATS 211.

HRP 207. Introduction to Concepts and Methods in Health Services and Policy Research I. 3 Units.

Primarily for medical students in the Health Services and Policy Research scholarly concentration. Topics include health economics, statistics, decision analysis, study design, quality measurement, cost benefit and effectiveness analysis, and evidence based guidelines.

HRP 208. Introduction to Concepts and Methods in Health Services and Policy Research II. 3 Units.

Primarily for medical students in the Health Services and Policy Research scholarly concentration; continuation of 207. Topics include health economics, statistics, decision analysis, study design, quality measurement, cost benefit and effectiveness analysis, and evidence based guidelines. Recommended: 207.

HRP 209. FDA's Regulation of Health Care. 2-3 Units.

(Same as LAW 458) Open to law and medical students; other graduate students by consent of instructor. The FDA's regulatory authority over drugs, biologics, medical devices, and dietary supplements. The nature of the pharmaceutical, biotech, medical device, and nutritional supplement industries.

HRP 210. Health Law and Policy. 3 Units.

(Same as Law 313) Open to law, medicine, business, and graduate students. Focus this term is on the physician/patient relationship, medical ethics, and public health law.

HRP 211. Law and the Biosciences: Neuroscience. 3 Units.

(Same as LAW 368) Legal, social, and ethical issues arising from advances in neuroscience, including effects upon law and society through improvements in predicting illnesses and behaviors, reading minds through neuroimaging, understanding responsibility and consciousness, treating criminal behavior, and cognitive enhancement.

HRP 212. Cross Cultural Medicine. 3 Units.

Developing interviewing and behavioral skills needed to facilitate culturally relevant health care across all population groups. Discussions focus on explicit and implicit cultural influences operating in formal and informal medical contexts.

HRP 213. Writing in the Sciences. 2-3 Units.

Primarily for medical students in the Clinical Research Scholarly concentration; open to graduate students except Epidemiology graduate students. Development of research questions and plans for statistical analysis. Study design, sample size and power calculations, and statistical analysis of study data. Analytic methods to carry out statistical power and sample size calculations. Prerequisites: 225, and 258 or 259, or consent of instructor.

HRP 214. Scientific Writing. 2-3 Units.

Step-by-step through the process of writing and publishing a scientific manuscript. How to write effectively, concisely, and clearly. Preparation of an actual scientific manuscript. Students are encouraged to bring a manuscript on which they are currently working to develop and polish throughout the course.

HRP 215. Scientific Writing for Basic and Translational Scientists. 2-3 Units.

Teaches students in the basic sciences how to write clearly, concisely, and effectively. Focuses on the process of writing and publishing a scientific manuscript. 3 unit option requires work on a manuscript. Not intended for epidemiology graduate students.

HRP 216. Analytical and Practical Issues in the Conduct of Clinical and Epidemiologic Research. 2-3 Units.

Topics include: advanced aspects of study design and data analyses; development of health measurement instruments; methods of summarizing literature and quantifying effect sizes; and multivariable nature of health events in human populations. 3 units requires a term paper. Prerequisites: 225, and 258 or 261, or consent of instructor.

HRP 220. BIOTECHNOLOGY LAW AND POLICY. 3 Units.

(Same as LAW 440) Open to all law or medical students; other graduate students by consent of the instructor. Focuses on the biotechnology industry, with some discussion of the "med tech" or medical device industry and the pharmaceutical industry. The life cycle of a biotech firm, from a good idea to a start-up company to FDA approval and beyond. Guest speakers. In addition to a final exam, students are required to participate in a group project during the term, making law and business recommendations about a biotech firm.

HRP 221. Law and the Biosciences: Genetics. 3 Units.

(Same as LAW 480) Open to all law or medical students; other graduate students by consent of the instructor. Focus is on ethical, legal, and social issues arising from advances in our knowledge of human genetics. Includes forensic uses of genetics, genetic testing, widespread whole genome sequencing, the consequences of genetics for human reproduction, and the ethics of genomic biobanks for research. Research paper required.

HRP 222A. Advising Congress on Health Policy. 1 Unit.

(Same as LAW 413L) Focus on conducting research on national health policy problems for the Medicare Payment Advisory Commission, or MedPAC. Students work in teams with lawyers and PhD economists from MedPAC, resident and fellow physicians from Stanford Hospital, and other students from throughout the University on expanding the healthcare workforce through reform of states' scope of practice regulation or designing antitrust policy to achieve the benefits of coordination and avoid the costs of consolidation. Application required.

HRP 222B. Advising Congress on Health Policy. 2 Units.

(Same as LAW 413L) Focus on conducting research on national health policy problems for the Medicare Payment Advisory Commission, or MedPAC. Students work in teams with lawyers and PhD economists from MedPAC, resident and fellow physicians from Stanford Hospital, and other students from throughout the University on expanding the healthcare workforce through reform of states' scope of practice regulation or designing antitrust policy to achieve the benefits of coordination and avoid the costs of consolidation. Application required.

HRP 223. Epidemiologic Analysis: Data Management and Statistical Programming. 2-3 Units.

The skills required for management and analysis of biomedical data. Topics include importing and exporting data from multiple database systems, visualizing and cleaning data, data management for multicenter projects, and data security. Introduction to applied statistical programming relevant to epidemiologic and clinical research. No previous programming experience required.

HRP 225. Design and Conduct of Clinical and Epidemiologic Studies. 3-4 Units.

Intermediate-level. The skills to design, carry out, and interpret epidemiologic studies, particularly of chronic diseases. Topics: epidemiologic concepts, sources of data, cohort studies, case-control studies, cross-sectional studies, sampling, estimating sample size, questionnaire design, and the effects of measurement error. Prerequisite: A basic/introductory course in statistics or consent of instructor.

HRP 226. Advanced Epidemiologic and Clinical Research Methods. 3-4 Units.

The principles of measurement, measures of effect, confounding, effect modification, and strategies for minimizing bias in clinical and epidemiologic studies. Students enrolled for 4 units complete an additional assignment or paper. Prerequisite: 225 or consent of instructor.

HRP 228. Genetic Epidemiology. 2 Units.

Provides framework for physicians, epidemiologists, and other scientists to interpret the literature and incorporate genetic information into human disease research. Topics include: common genetic measures, approaches to finding disease genes, study design and analysis issues, genome-wide association studies, meta-analysis of genetic studies, genetic risk prediction, and applications of new genomic technologies. Includes reading seminal papers in genetic epidemiology.

HRP 230. Cancer Epidemiology. 2-3 Units.

Descriptive epidemiology and sources of incidence/mortality data; the biological basis of carcinogenesis and its implications for epidemiologic research; methodological issues relevant to cancer research; causal inference; major environmental risk factors; genetic susceptibility; cancer control; examples of current research; and critique of the literature. 3 units requires paper or project. Prerequisite: 225, or consent of instructor.

HRP 231. Epidemiology of Infectious Diseases. 3 Units.

Principles of the transmission of the infectious agents (viruses, bacteria, rickettsiae, mycoplasma, fungi, and protozoan and helminth parasites). The role of vectors, reservoirs, and environmental factors. Pathogen and host characteristics that determine the spectrum of infection and disease. Endemicity, outbreaks, and epidemics of selected infectious diseases. Principles of control and surveillance.

HRP 236. Epidemiology Research Seminar. 1 Unit.

Weekly forum for ongoing epidemiologic research by faculty, staff, guests, and students, emphasizing research issues relevant to disease causation, prevention, and treatment. May be repeated for credit.

HRP 238. Genes and Environment in Disease Causation: Implications for Medicine and Public Health. 2-3 Units.

The historical, contemporary, and future research and practice among genetics, epidemiology, clinical medicine, and public health as a source of insight for medicine and public health. Genetic and environmental contributions to multifactorial diseases; multidisciplinary approach to enhancing detection and diagnosis. The impact of the Human Genome Project on analysis of cardiovascular and neurological diseases, and cancer. Ethical and social issues in the use of genetic information. Prerequisite: basic course in genetics; for undergraduates, Human Biology core or equivalent or consent of instructor. Same as: HUMBIO 159.

HRP 239. Statistical Methods for Group Comparisons and Causal Inference. 3 Units.

Critical examination of statistical methods in social science applications, especially for cause and effect determinations. Topics: path analysis, multilevel models, matching and propensity score methods, analysis of covariance, instrumental variables, compliance, longitudinal data, mediating and moderating variables. See <http://www-stat.stanford.edu/~rag/stat209>. Prerequisite: intermediate-level statistical methods. Same as: EDUC 260X, STATS 209.

HRP 241. Measuring Global Health. 4 Units.

Open to MD, graduate, and undergraduate students. Assessing the global burden of disease, its distribution among and within countries, its causes, and appropriate interventions requires rigorous quantitative approaches. This course develops skills in these areas by critically examining questions like: How do we know who is sick and where? How are risk factors incorporated into our projections of future disease trends? How do we combine mortality and morbidity in a meaningful way? What works for improving health efficiently? Workshops build familiarity with relevant data and their analysis. Prerequisite: coursework in statistics, biostatistics, quantitative epidemiology, econometrics, or equivalent. Same as: HUMBIO 129M, MED 231.

HRP 251. Design and Conduct of Clinical Trials. 3 Units.

The rationale for phases 1-3 clinical trials, the recruitment of subjects, techniques for randomization, data collection and endpoints, interim monitoring, and reporting of results. Emphasis is on the theoretical underpinnings of clinical research and the practical aspects of conducting clinical trials.

HRP 252. Outcomes Analysis. 3 Units.

Methods of conducting empirical studies which use large existing medical, survey, and other databases to ask both clinical and policy questions. Econometric and statistical models used to conduct medical outcomes research. How research is conducted on medical and health economics questions when a randomized trial is impossible. Problem sets emphasize hands-on data analysis and application of methods, including re-analyses of well-known studies. Prerequisites: one or more courses in probability, and statistics or biostatistics. Same as: BIOMEDIN 251.

HRP 255. Observational Studies. 2-3 Units.

This course will cover statistical methods for the design and analysis of observational studies. Topics for the course will include the potential outcomes framework for causal inference; randomized experiments; methods for controlling for observed confounders in observational studies; sensitivity analysis for hidden bias; instrumental variables; tests of hidden bias; coherence; and design of observational studies. Same as: STATS 355.

HRP 256. Economics of Health and Medical Care. 5 Units.

Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: demand for medical care and medical insurance; institutions in the health sector; economics of information applied to the market for health insurance and for health care; measurement and valuation of health; competition in health care delivery. Graduate students with research interests should take ECON 249. Prerequisites: ECON 50 and ECON 102A or Stats 116 or the equivalent. Recommended: ECON 51. Same as: BIOMEDIN 156, BIOMEDIN 256, ECON 126.

HRP 258. Introduction to Probability and Statistics for Clinical Research. 3 Units.

Open to medical and graduate students; required of medical students in the Clinical Research Scholarly Concentration. Tools to evaluate medical literature. Topics include random variables, expectation, variance, probability distributions, the central limit theorem, sampling theory, hypothesis testing, confidence intervals, correlation, regression, analysis of variance, and survival analysis.

HRP 259. Introduction to Probability and Statistics for Epidemiology. 3-4 Units.

Topics: random variables, expectation, variance, probability distributions, the central limit theorem, sampling theory, hypothesis testing, confidence intervals. Correlation, regression, analysis of variance, and nonparametric tests. Introduction to least squares and maximum likelihood estimation. Emphasis is on medical applications. Differential between 3 and 4 units is the amount of out-of-class work required.

HRP 260A. Workshop in Biostatistics. 1-2 Unit.

Applications of statistical techniques to current problems in medical science. To receive credit for one or two units, a student must attend every workshop. To receive two units, in addition to attending every workshop, the student is required to write an acceptable one page summary of two of the workshops, with choices made by the student.
Same as: STATS 260A.

HRP 260B. Workshop in Biostatistics. 1-2 Unit.

Applications of statistical techniques to current problems in medical science. To receive credit for one or two units, a student must attend every workshop. To receive two units, in addition to attending every workshop, the student is required to write an acceptable one page summary of two of the workshops, with choices made by the student.
Same as: STATS 260B.

HRP 260C. Workshop in Biostatistics. 1-2 Unit.

Applications of statistical techniques to current problems in medical science. To receive credit for one or two units, a student must attend every workshop. To receive two units, in addition to attending every workshop, the student is required to write an acceptable one page summary of two of the workshops, with choices made by the student.
Same as: STATS 260C.

HRP 261. Intermediate Biostatistics: Analysis of Discrete Data. 3 Units.

Methods for analyzing data from case-control and cross-sectional studies: the 2x2 table, chi-square test, Fisher's exact test, odds ratios, Mantel-Haenzel methods, stratification, tests for matched data, logistic regression, conditional logistic regression. Emphasis is on data analysis in SAS. Special topics: cross-fold validation and bootstrap inference.
Same as: BIOMEDIN 233, STATS 261.

HRP 262. Intermediate Biostatistics: Regression, Prediction, Survival Analysis. 3 Units.

Methods for analyzing longitudinal data. Topics include Kaplan-Meier methods, Cox regression, hazard ratios, time-dependent variables, longitudinal data structures, profile plots, missing data, modeling change, MANOVA, repeated-measures ANOVA, GEE, and mixed models. Emphasis is on practical applications. Prerequisites: basic ANOVA and linear regression.
Same as: STATS 262.

HRP 263. Advanced Decision Science Methods and Modeling in Health. 3 Units.

Advanced methods currently used in published model-based cost-effectiveness analyses in medicine and public health, both theory and technical applications. Topics include: Markov and microsimulation models, model calibration and evaluation, and probabilistic sensitivity analyses. Prerequisites: a course in probability, a course in statistics or biostatistics, a course on cost-effectiveness such as HRP 392, a course in economics, and familiarity with decision modeling software such as TreeAge.
Same as: MED 263.

HRP 268. Genetics and Reproductive Technologies. 2 Units.

(Same as LAW 568) Examines the complex interrelationship among legal, political, ethical, and social issues shaping the intersection of genetics, reproductive technologies and reproductive rights. Issues discussed may include, but are not limited to: the commercialization and sale of reproductive materials like sperm, ovum, and surrogacy services; genetic technologies, prenatal genetic screening, and diagnostic testing of offspring; criminalization of reproductive decision-making such as sex-selection and genetic enhancement; stem cells, cloning, and abortion; DNA databanks and collection of genetic information; in vitro fertilization and other emerging reproductive technologies.

HRP 274. Design for Service Innovation. 4 Units.

(Same as OIT 343/01) Open to graduate students from all schools and departments. An experiential project course in which students work in multidisciplinary teams to design new services to address the needs of medically patients. Project teams partner with "safety net" hospitals and clinics to find better ways to deliver care to the low income and uninsured patients these institutions serve. Students learn proven innovation processes from experienced GSB, d. school, and SoM faculty, interface with students from across the university, and have the opportunity to see their ideas translated into improvements in the quality and efficiency of healthcare in the real world. Prerequisite: admission to the course is by application only. Applications available at <http://DesignForService.stanford.edu>. Applications must be submitted by November 16, 2011.
Same as: BIOE 372, MED 274.

HRP 280. Spanish for Medical Students. 3 Units.

First quarter of three-quarter series. Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on taking the medical history. Topics include the human body, hospital procedures, diagnostics, food, and essential doctor-patient phrases when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge. Offered to undergraduates for 3 units(2 units for medical students).
Same as: SPANLANG 121M.

HRP 281. Spanish for Medical Students. 2 Units.

Second quarter of three-quarter series. Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on performing a physical examination. Topics include the human body, hospital procedures, diagnostics, food, and essential doctor-patient phrases when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge. Offered to undergraduates for 3 units(2 units for medical students).
Same as: SPANLANG 122M.

HRP 282. Spanish for Medical Students. 2-3 Units.

Third quarter of three-quarter series. Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on different specialties and medical conditions. Topics include the human body, hospital procedures, diagnostics, food, and essential doctor-patient phrases when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge. Offered to undergraduates for 3 units(2 units for medical students).
Same as: SPANLANG 123M.

HRP 283. Health Services Research Core Seminar. 1 Unit.

Presentation of research in progress and tutorials in the field of health services research.

HRP 290. Advanced Medical Spanish Oral Communication. 2 Units.

Enrollment limited to medical students. Designed to further develop linguistic skills, covering all medical specialties according to student needs. Sessions also include topics on patient education and diseases, such as diabetes, asthma, TB, and CVDs.

HRP 296. Current Topics in Bioethics. 3 Units.

(Same as LAW 596) Explores the ethical, legal, and public policy issues arising from recent advances in biomedicine and the biosciences. Approaches to bioethical reasoning including casuistry, social justice, resource allocation, and individual rights in areas such as refusal of treatment conception. Topics include: the use of forensic genetics in criminal law, neuroscience and national security, race and ethnicity in genetic research, experimentation on human subjects and prisoners, privacy of medical and genetic information in the information age, synthetic biology, and do-it-yourself medical and genetic testing. No prior knowledge in science, medicine, philosophy or related disciplines is required.

HRP 299. Directed Reading in Health Research and Policy. 1-18 Unit. Epidemiology, health services research, preventive medicine, medical genetics, public health, economics of medical care, occupational or environmental medicine, international health, or related fields. May be repeated for credit. Prerequisite: consent of instructor.

HRP 370. Medical Scholars Research. 4-18 Units. Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

HRP 391. Health Care Regulation, Finance and Policy. 3 Units. (SAME AS LAW 348, MGTECON 331) Provides the legal, institutional, and economic background necessary to understand the financing and production of health services in the U.S. Potential topics include: health reform, health insurance (Medicare and Medicaid, employer-sponsored insurance, the uninsured), medical malpractice and quality regulation, pharmaceuticals, the corporate practice of medicine, regulation of fraud and abuse, and international comparisons.
Same as: PUBLPOL 231.

HRP 392. Analysis of Costs, Risks, and Benefits of Health Care. 4 Units. (Same as MGTECON 332) For graduate students. How to do cost/benefit analysis when the output is difficult or impossible to measure. How do M.B.A. analytic tools apply in health services? Literature on the principles of cost/benefit analysis applied to health care. Critical review of actual studies. Emphasis is on the art of practical application.
Same as: BIOMEDIN 432.

HRP 399. Graduate Research. 1-18 Unit. Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

HRP 801. TGR Project. 0 Units.

HRP 802. TGR Dissertation. 0 Units.

History Courses

HISTORY 1B. Global History: The Early Modern World, 1300 to 1800. 3-5 Units.

Topics include early globalization and cross-cultural exchanges; varying and diverse cultural formations in different parts of the world; the growth and interaction of empires and states; the rise of capitalism and the economic divergence of "the west"; changes in the nature of technology, including military and information technologies; migration of ideas and people (including the slave-trade); disease, climate, and environmental change over time. Designed to accommodate beginning students, non-majors, and more advanced history students.

HISTORY 3S. Building Modern Society: Revolution & Economy in the Eighteenth-Century Atlantic World. 5 Units.

What do the Declaration of Independence and Adam Smith's *Wealth of Nations* have in common? Both were published in 1776, and both ushered in an age of political and economic upheaval. This course examines the relationship between new ways of economic thinking and democratic revolution. We will use pamphlets, cartoons, revolutionary speeches, currencies, sermons, laws, poetry, and advertisements to explore debates on luxury, virtue, self-interest, the evils of paper money, consumer culture, free trade, and the moral economy of slavery.

HISTORY 4N. A World History of Genocide. 3-5 Units.

Reviews the history of genocide from ancient times until the present. Defines genocide, both in legal and historical terms, and investigates its causes, consequences, and global dimensions. Issues of prevention, punishment, and interdiction. Main periods of concern are the ancient world, Spanish colonial conquest; early modern Asia; settler genocides in America, Australia, and Africa; the Armenian genocide and the Holocaust; genocide in communist societies; and late 20th century genocide.

HISTORY 5C. Human Trafficking: Historical, Legal, and Medical Perspectives. 3 Units.

(Same as History 105C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution and labor exploitation, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning and offers an optional service-learning component.

Same as: FEMGEN 5C, HUMBIO 178T, SOMGEN 205.

HISTORY 5W. Human Trafficking Service Learning. 2 Units.

Continuation of service learning for students who completed History 105C.

HISTORY 10B. From Renaissance to Revolution: Early Modern Europe. 3 Units.

(Same as HISTORY 110B. History majors and others taking 5 units, register for 110B.) From 1350 to 1789, Europe went from being a provincial backwater to a new global center of power. This course surveys the profound changes of the period that shape our world today: the spread of humanism and science, religious reformation, new styles of warfare, the rise of capitalism and a new global economy, the emergence of the state, and revolution which sought to overthrow established governments.

HISTORY 10C. Introduction to Modern Europe. 3 Units.

(SAME as HISTORY 110C. History majors and others taking 5 units, register for 110C.) From the late 18th century to the present. How Europeans responded to rapid social changes caused by political upheaval, industrialization, and modernization. How the experience and legacy of imperialism and colonialism both influenced European society and put in motion a process of globalization that continues to shape international politics today.

HISTORY 10SC. Biography in History, Fiction, and Elsewhere. 2 Units.

How biographers, novelists, critics and others have written about the rhythms of life the lives of the famous as well as the obscure - will be explored in this course. Biographical writing can be frivolous, but at its best it has the capacity to uncover so much of life's richness, complexity, and confusions. We'll study biography with the use of some of the most resonant, compelling examples of the genre. Together we'll read books about poets Sylvia Plath and Ted Hughes, Henry James *Aspern Papers*, the brilliant novel on biographical writing, A. S. Byatt's *Possession*, and Norman Mailer on Marilyn Monroe. How one chooses one topic over another; the differences and similarities between the representation of lives in fiction and biography; the benefits and pitfalls of an intense identification with one's own subjects these and other matters will be examined. We'll meet in San Francisco with local writers wrestling with issues of this sort, and students will be encouraged to try their hands at writing about lives based on research, personal observation, or both.

HISTORY 11N. The Roman Empire: Its Grandeur and Fall. 4 Units.

Preference to freshmen. Explore themes on the Roman Empire and its decline from the 1st through the 5th centuries C.E.. What was the political and military glue that held this diverse, multi-ethnic empire together? What were the bases of wealth and how was it distributed? What were the possibilities and limits of economic growth? How integrated was it in culture and religion? What were the causes and consequences of the conversion to Christianity? Why did the Empire fall in the West? How suitable is the analogy of the U.S. in the 21st century?
Same as: CLASSHIS 24N.

HISTORY 11SC. How Is a Buddhist. 2 Units.

Buddhism as a system of thought, a culture, a way of life, a definition of reality, a method for investigating it, and a mental, physical, and social practice. Buddhism as a total phenomenon. Readings, films, music, and art. How Buddhist practices constitute the world of the Buddhist.

HISTORY 11W. Service-Learning Workshop on Issues of Education Equity. 1 Unit.

Introduces students to a variety of issues at stake in the public education of at-risk high school youth in California. Participants will hear from some of the leading faculty in the School of Education as well as the Departments of Psychology, Sociology, and others, who will share perspectives on the problems and challenges of educating a diverse student body in the state's public school system. The service-learning component of the workshop is a mentoring project (Stanford Students for Educational Equity) with junior class history students from East Palo Alto Academy High School, a Stanford charter school.

Same as: CSRE 11W.

HISTORY 12N. The Early Roman Emperors: History, Biography, and Fiction. 3 Units.

Preference to freshmen. The politics, drama, and characters of the period after the fall of the Roman Republic in 49 B.C.E. Issues of liberty and autocracy explored by Roman writers through history and biography. The nature of history writing, how expectations about literary genres shape the materials, the line between biography and fiction, and senatorial ideology of liberty. Readings include: Tacitus' *Annals*, Suetonius' *Lives of the Caesars*, and Robert Graves' *I Claudius* and episodes from the BBC series of the same title.

HISTORY 20N. Russia in the Early Modern European Imagination. 4 Units.

Preference to freshmen. The contrast between the early modern image of Europe as free, civilized, democratic, rational, and clean against the notion of New World Indians, Turks, and Chinese as savage. The more difficult, contemporary problem regarding E. Europe and Russia which seemed both European and exotic. Readings concerning E. Europe and Russia from the Renaissance to the Enlightenment; how they construct a positive image of Europe and conversely a negative stereotype of E. Europe. Prerequisite: PWR 1.

HISTORY 20S. Resistance and Rebellion under Communism. 5 Units.

Massive demonstrations swept through Eastern Europe in 1989-1991, ushering in the surprisingly peaceful collapse of communism. This course focuses on resistance and rebellion in the Soviet Bloc, including the Hungarian Uprising (1956), the Solidarity movement in Poland (1980-81), worker strikes, literature and art of dissent, and environmental activism. Students will work with eyewitness accounts, memoirs, archival documents, and visual materials, in order to better understand how resistance evolved under Soviet communism and whether peaceful protests precipitated its collapse.

HISTORY 22SC. A Tale of Two Cities: London and San Francisco. 2 Units.

San Francisco and London are two of the world's best-loved and most-visited cities. They have certain things in common: both are ports, situated on the edge of continents; both are major commercial and cultural centres; and both have been shaped by immigration. Their differences are more obvious than their similarities, however, and these differences are to a large extent explained by their very different histories. London was founded by the Romans and was, for a period in its recent history, the capital of an Empire on which the sun famously never set; San Francisco did not emerge as a city until well into the 19th century and even now has something of the character of a "city state" rather than a national or state capital. Though often considered one of the most European of American cities, San Francisco is in fact laid out on the typically American grid plan; the planning of London is, by contrast, chaotic, reflecting its long evolution and the lack of any effective central planning control. The course will explain the ways in which these two fascinating cities have evolved, especially over the past 200 years. We will focus on the development of what is sometimes called the "urban landscape"-streets, public buildings, housing, open spaces, transport systems-and investigate who made the decisions that shaped the two cities as we experience them today. We will look not only at the impact of major events-the San Francisco earthquake of 1906, the bombing of London during World War II-but also at the small decisions made by property owners and developers which helped determine the character of urban neighborhoods. We will use maps and primary documents as well as published histories, and there will be two field trips to explore buildings and neighborhoods in San Francisco. Students will write two papers, each of 4-5-pages, on aspects of the history of each city. An interest in history and/urban studies is an obvious asset.

HISTORY 23SC. People, Land, and Water in the Heart of the West. 2 Units.

Salmon River. Sun Valley. Pioneer Mountains. The names speak of powerful forces and ideas in the American West. Central Idaho - a landscape embracing snow-capped mountains, raging rivers, sagebrush deserts, farms, ranches, and resort communities - is our classroom for this field-based seminar led by David Freyberg, professor of Civil and Environmental Engineering, and David Kennedy, professor emeritus of History. This course focuses on the history and future of a broad range of natural resource management issues in the western United States. We will spend a week on campus preparing for a two-week field course in Idaho exploring working landscapes, private and public lands, water and fisheries, conservation, and the history and literature of the relationship between people and the land in the American West. After the first week spent on campus, we will drive to Idaho to begin the field portion of our seminar. In Idaho, we will spend time near Twin Falls, at Lava Lake Ranch near Craters of the Moon National Monument, in Custer County at the Upper Salmon River, and near Stanley in the Sawtooth National Forest. No prior camping experience is required, but students should be comfortable living outdoors in mobile base camps for periods of several days. Students will investigate specific issues in-depth and present their findings at the end of the course. Same as: CEE 11SC, EARTHSYS 13SC.

HISTORY 30C. Culture and Society in Reformation England. 3 Units.

(Same as History 130C. History majors and others taking 5 units, register for 130C.) Focuses on the appeal of both Reformed and Catholic ideas in the political and cultural contexts of early modern Europe. Topics include: the Lutheran revolt; the spread of Protestant ideas; Calvin's Geneva; the English Reformation; Tridentine reform and the Jesuits; toleration and the underground churches; wars and religious violence; and the making of European confessional identities. Sources include sermons, religious polemic, autobiographies, graphic prints, poetry, and music.

HISTORY 30Q. English Society Through Fiction. 4 Units.

Preference to sophomores. England from the eighteenth century to the twentieth century through the reading of seven novels ranging from Henry Fielding's *Joseph Andrews*, to Evelyn Waugh's *A Handful of Dust*. Focus is on the novels themselves and the historical context of the novels to acquire a knowledge of British history over two hundred years.

HISTORY 33A. Blood and Roses: The Age of the Tudors. 3 Units.

(Same as HISTORY 133A. History majors and others taking 5 units, register for 133A.) English society and state from the Wars of the Roses to the death of Elizabeth. Political, social, and cultural upheavals of the Tudor period and the changes wrought by the Reformation. The establishment of the Tudor monarchy; destruction of the Catholic church; rise of Puritanism; and 16th-century social and economic changes.

HISTORY 33S. Public Knowledge? Propaganda, Censorship, and News in Early Modern England. 5 Units.

New technologies of communication inevitably raise questions of access, control, and freedom. With the invention of Gutenberg's press, printing became integral to political life in early modern England during the upheavals of the sixteenth and seventeenth centuries, as actors vied to manipulate the printed word. Topics include: visual and written propaganda, censorship, book burning, secret printing, freedom of the press, growth in printed news, coffeehouses, the public sphere, and political debate during the English Reformation, Civil Wars and Glorious Revolution.

HISTORY 34A. European Witch Hunts. 3 Units.

(Same as HISTORY 134A. History majors and others taking 5 units, register for 134A.) After the Reformation, in the midst of state building and scientific discovery, Europeans conducted a series of deadly witch hunts, violating their own laws and procedures in the process. What was it about early modernity that fueled witch hunting? Witch trials and early modern demonology as well as historians' interpretations of events to seek answers to this question.

HISTORY 36N. Gay Autobiography. 4 Units.

Preference to freshmen. Gender, identity, and solidarity as represented in nine autobiographies: Isherwood, Ackerley, Duberman, Monette, Louganis, Barbin, Cammermeyer, Gingrich, and Lorde. To what degree do these writers view sexual orientation as a defining feature of their selves? Is there a difference between the way men and women view identity? What politics follow from these writers' experiences?

HISTORY 38A. Germany and the World Wars, 1870-1990. 3 Units.

(Same as HISTORY 138A. Majors and others taking 5 units, enroll in 138A.) Germany's history from Bismarck's wars of unification through the end of the Cold War. The radicalizing relationship between international conflict, social upheaval, and state transformation with a focus on the clashes of the Second Empire, the road to WW I, interwar instability, the rise of Nazism, WW II, the Holocaust, the division of communist E. and capitalist W. Germany, and the fall of the Iron Curtain.

HISTORY 38S. Antislavery, Abolition, and Emancipation in the British Empire. 5 Units.

This seminar will introduce students to the history of abolition and emancipations in three broad periods: first, the origins and rise of the British antislavery movement in the late eighteenth century; second, the rise and triumph of abolition in the early nineteenth century; and third, the complex persistence of un-free labor in the era of emancipation, roughly 1834 to 1900. Through close analysis of primary and secondary sources, students will examine key relationships between antislavery thought and historical notions of race, religion, law, gender, national identity, and capitalism.

HISTORY 40. World History of Science. 3 Units.

(Same as HISTORY 140. History majors and others taking 5 units, register for 140.) The earliest developments in science, the prehistoric roots of technology, the scientific revolution, and global voyaging. Theories of human origins and the oldest known tools and symbols. Achievements of the Mayans, Aztecs, and native N. Americans. Science and medicine in ancient Greece, Egypt, China, Africa, and India. Science in medieval and Renaissance Europe and the Islamic world including changing cosmologies and natural histories. Theories of scientific growth and decay; how science engages other factors such as material culture and religions.

HISTORY 41Q. Mad Women: Women and Mental Illness in U.S. History. 3 Units.

Explores how gender and historical context have shaped the experience and treatment of mental illness in U.S. history. Why have women been the witches and hysterics of the past, and why have there historically been more women than men among the mentally ill? Topics include the relationship between historical ideas of femininity and insanity, the ways that notions of gender influence the definition and treatment of mental disorder, and the understanding of the historically embedded nature of medical ideas, diagnoses, and treatments.

HISTORY 42S. The Circle of Life: Visions of Nature in Modern Science, Religion, Politics and Culture. 5 Units.

A new understanding of nature emerged in the 1700s that fundamentally altered our perception of the living world and humanity's relationship with it. By tracing the evolution of this understanding forward, we gain insight into the interpenetration of science, religion, politics and culture. Topics include: Romantic science, poetry and art, Darwin's theory of evolution, the 20th century environmental movement, the Gaia hypothesis and modern views on biodiversity. We also explore an early American court case concerning whether whales are fish.

HISTORY 44. History of Women and Gender in Science, Medicine, Engineering, and Environment. 3 Units.

(Same as HISTORY 144. Majors and others taking 5 units, enroll in HISTORY 144.) Men's and women's roles in science, medicine, and engineering over the past 200 years with a focus on the present. What are the efforts underway globally to transform science, medicine, and engineering into fields where women can flourish? How have science and medicine studied and defined males and females? Can gender analysis spark creativity in human knowledge?

HISTORY 44Q. Gendered Innovations in Science, Medicine, Engineering, and Environment. 4-5 Units.

Section 1 focuses on the history of women in science, medicine, and engineering. Section 2 looks at transforming research institutions so that both men and women can flourish. Section 3 explores how sex and gender analysis can enhance creativity. We discuss concrete examples of how taking gender into account has yielded new research results. Stanford University currently has a multiple year collaboration with the European Commission for Gendered Innovations, and this class will be part of that project. This course fulfills the second level Writing and Rhetoric Requirement (WRITE 2) and will emphasize oral and multimedia presentation.

HISTORY 45B. Africa in the Twentieth Century. 3 Units.

(Same as HISTORY 145B. History majors and others taking 5 units, register for 145B.) The challenges facing Africans from when the continent fell under colonial rule until independence. Case studies of colonialism and its impact on African men and women drawn from West, Central, and Southern Africa. Novels, plays, polemics, and autobiographies written by Africans.

HISTORY 47. History of South Africa. 3 Units.

(Same as HISTORY 147. History majors and others taking 5 units, register for 147.) Introduction, focusing particularly on the modern era. Topics include: precolonial African societies; European colonization; the impact of the mineral revolution; the evolution of African and Afrikaner nationalism; the rise and fall of the apartheid state; the politics of post-apartheid transformation; and the AIDS crisis.

Same as: AFRICAAM 47.

HISTORY 48N. African History through Literature and Film. 3-4 Units.

Literary and cinematic works as a window into the history of sub-Saharan Africa; and the difficulty of using artistic works as historical sources, the value of art as representation and artifact of the past. Premodern traditions of political narrative; art in the era of the slave trade; the impact of colonialism on African intellectuals; the political uses of art by nationalists; and the struggle to represent rapidly changing social and culture norms.

HISTORY 48Q. South Africa: Contested Transitions. 3 Units.

Preference to sophomores. The inauguration of Nelson Mandela as president in May 1994 marked the end of an era and a way of life for S. Africa. The changes have been dramatic, yet the legacies of racism and inequality persist. Focus: overlapping and sharply contested transitions. Who advocates and opposes change? Why? What are their historical and social roots and strategies? How do people reconstruct their society? Historical and current sources, including films, novels, and the Internet. Same as: AFRICAAM 48Q.

HISTORY 49C. THE SLAVE TRADE. 3 Units.

(Same as HISTORY 149C. History majors and others taking 5 units, enroll in 149C.) Slave trades and forms of slavery in W. Africa from 1000 to 1885; impacts on lives, social organization, and political structures. Slavery in Islam, the slave market in the Mediterranean and Middle East, and the Saharan slave trade. Slavery within Africa, growth of the Atlantic trade, the Middle Passage, and war and trade that produced slaves. Impact of the Industrial Revolution and European abolition movements on the use of slaves and warfare in Africa. The relationship between slaving and the European conquest of Africa.

HISTORY 50A. Colonial and Revolutionary America. 3 Units.

(Same as HISTORY 150A. History majors and others taking 5 units, register for 150A.) Survey of the origins of American society and polity in the 17th and 18th centuries. Topics: the migration of Europeans and Africans and the impact on native populations; the emergence of racial slavery and of regional, provincial, Protestant cultures; and the political origins and constitutional consequences of the American Revolution.

HISTORY 50B. 19th Century America. 3 Units.

(Same as HISTORY 150B. History majors and others taking 5 units, register in 150B.) Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture.

Same as: AFRICAAM 50B.

HISTORY 50C. The United States in the Twentieth Century. 3 Units.

(Same as HISTORY 150C. History majors and others taking 5 units, register for 150C.) Major political, economic, social, and diplomatic developments in the U.S. Themes: the economic and social role of government (Progressive, New Deal, Great Society, and Reagan-Bush eras); ethnic and racial minorities in society (mass immigration at the turn of the century and since 1965, the civil rights era of the 50s and 60s); the changing status of women since WW II; shifting ideological bases, institutional structures, and electoral characteristics of the political system (New Deal and post-Vietnam); determinants of foreign policy in WW I and II, and the Cold War.

HISTORY 50K. John F. Kennedy: Fifty Years Later. 1 Unit.

November 22, 2013 marks the 50th anniversary of President John F. Kennedy's assassination. Half a century on, our visually saturated culture remains besotted with images of the youthful president and his strikingly photogenic family. But the passage of time has also yielded new perspectives on Kennedy's presidency and on his era. November 22, 1963 may well come to be remembered not only as the day when the life of a promising young leader was violently cut short, but also as the pivot between two distinct eras in American history. Ironically, though Kennedy was the first World War II veteran to reach the White House, his death heralded the end of the long postwar season of national pride, optimism, confidence, and widely shared prosperity, and may have opened the road to the great catastrophe that was the Vietnam War. His passing also helped to pry open the portals to historic changes in the lives of millions of African Americans, as witnessed by Lyndon Johnson's artful invocation of the fallen president to bring about passage of the epic civil rights legislation of the late 1960s. This course will examine the postwar domestic and international settings in which Kennedy rose to and exercised power. It will probe our continuing fascination with his character and with his family; his role as a Cold Warrior, especially in the tense confrontation known as the Cuban Missile Crisis; and his relation to the African American struggle to bury Jim Crow. We will conclude with an assessment of the longer-term historical consequence of his brief moment in the arenas of celebrity and power. Guest speakers will include noted Kennedy biographer Robert Dallek; Johnson biographer Bruce Schulman; Taylor Branch, acclaimed biographer of Martin Luther King, Jr.; and Stanford's own Jennifer Burns, historian of modern America.

HISTORY 59. Introduction to Asian American History. 3 Units.

(Same as HISTORY 159. History majors and others taking 5 units, register for 159.) The historical experience of people of Asian ancestry in the U.S. Immigration, labor, community formation, family, culture and identity, and contemporary social and political controversies. Readings: interpretative texts, primary material, and historical fiction.

HISTORY 60N. Revolutionaries and Founders. 3 Units.

Americans remain fascinated by the revolutionary generation which secured independence and established a national constitutional republic. Books about the founders come steadily from the presses, some describing the lives of individual revolutionaries, others trying to analyze and explain what made these events possible. This seminar will approach the Revolution through both a biographical and analytical framework, relying both on scholarly writings and the massive array of primary sources that are readily available through letterpress editions and on-line. The course will rely on the instructor's own recent book, *Revolutionaries: A New History of the Invention of America*, which carries the story from the crisis around the Boston Tea Party of 1773 through the end of President Washington's first administration. The course will be divided evenly between modern scholarship and the careful reading of original materials, and students will write short essays that will involve the analysis of explanatory problems, the close interpretation of documents, and the crafting of historical narratives. Topics to be discussed will include the outbreak of the revolution, constitution-making at both the state and national levels of government, the conduct of the war, and the legacies that Americans particularly associate with Thomas Jefferson, James Madison, and Alexander Hamilton.

HISTORY 64. Racial and Ethnic Diversity in Modern America. 5 Units.

How ethnicity influenced the American experience and how prevailing attitudes about racial and ethnic groups over time have affected the historical and contemporary reality of the nation's major minority populations. Focus is on the past two centuries. Same as: CSRE 64.

HISTORY 70. Culture, Politics, and Society in Latin America. 3 Units. (Same as HISTORY 170B. History majors and others taking 5 units, enroll in HISTORY 170B.) The course of Latin American history from the colonial era to the present day. Key issues such as colonialism, nationalism, democracy, and revolution will be examined critically in light of broad comparative themes in Latin American and world history. Sources include writings in the social sciences as well as primary documents, fiction, and film.

HISTORY 71S. American Political Thought from the Civil War to the Cold War. 5 Units.

This course explores America's most important political tradition: liberalism. What does liberalism mean? Does it mean something different today than it did in the past? Using multiple textual and visual sources, students will grapple with how Americans remade liberalism in the 19th and 20th centuries and how political thinkers have understood its meaning over time. We will see how American liberalism was shaped by factors of race, gender, and class and by competing ideologies like conservatism and socialism.

HISTORY 74. Mexico Since 1876: History of a "Failed State"?. 3 Units.

This course is an introduction to the history and diverse peoples of modern Mexico from 1876 to the present. Through lectures, discussions, primary and secondary readings, short documentaries, and written assignments, students will critically explore and analyze the multiplicity of historical processes, events and trends that shaped and were shaped by Mexicans over the course of a century. The course will cover some of the social and political dimensions of rural social change, urbanization and industrialization, technological innovation and misuse, environmental degradation and conservation, education, ideology, culture and media, migration, and the drug trade.

HISTORY 74S. Sounds of the Century: Popular Music and the United States in the 20th Century. 5 Units.

What can popular music teach us about the past? What can we learn about music if we study it historically? This course grapples with these two questions by examining various examples of American music in the 20th century, as well as more conventional historical sources, scholarly books, and essays. Will pay special attention to how issues of race, gender, sexuality, class, and nation were reflected in and produced by people's interactions with music, inside and outside American borders.

HISTORY 76S. The World that Columbus Made: Imagining the Spanish Empire. 5 Units.

According to J.H. Elliott, it took a century for Europeans to come "to grips with the realities of America." This is a seminar about this process as it took place in the Spanish world. We will read a wide array of primary sources: Explorers' journals, conquistadors' accounts, chronicles, pioneering ethnographies, gory engravings, and heartfelt denunciations of colonialism. We will explore issues related to otherness, cultural encounters, knowledge and power, rhetoric and propaganda, and historical memory in the early modern era.

Same as: 1492- c. 1600.

HISTORY 78N. Latin American Movies of Revolution. 3 Units.

In this course we will watch and critique films made about Latin America's 20th century revolutions focusing on the Mexican, Cuban, Chilean and Nicaraguan revolutions. We will analyze the films as both social and political commentaries and as aesthetic and cultural works, alongside archivally-based histories of these revolutions.

HISTORY 81B. Formation of the Contemporary Middle East. 3 Units.

(Same as HISTORY 181B. History majors and others taking 5 units, register for 181B.) The history of the Middle East since WW I, focusing on the eastern Arab world, Egypt, the Fertile Crescent, and the Arabian Peninsula, with attention to Turkey, Iran, and Israel.

HISTORY 82C. The Making of the Islamic World, 600-1500. 3 Units.

(Same as HISTORY 182C. Majors and other taking 5 units, register for 182C.) The History of Islam and Muslim peoples from 600-1500. Topics include Muhammad and his community; the early Arab conquests and empires; sectarian movements; formation of Islamic belief, thought, legal culture and religious institutions; transregional Sufi and learned networks; family and sexuality; urban, rural and nomadic life; non-Muslim communities; the development of Mediterranean and Indian Ocean trade; relations with Byzantium, the Latin West, China; the Crusades and the Mongols.

HISTORY 85B. Jews, 1500 to the Present. 3 Units.

(Same as HISTORY 185B. History majors and others taking 5 units, register for 185B.) Topics include the restructuring of Jewish existence during the Enlightenment and legal emancipation at the end of the 18th century in W. Europe; the transformation of Jewish life in E. Europe under the authoritarian Russian regime; colonialism in the Sephardic world; new ideologies (Reform Judaism and Jewish nationalisms); the persistence and renewal of antisemitism; the destruction of European Jewry under the Nazis; new Jewish centers in the U.S.; and the State of Israel. Same as: JEWISHST 85B.

HISTORY 87. The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan. 3 Units.

(Same as HISTORY 187. History majors and other taking 5 units, register for 187.) Explores the contested politics of these societies in modern times. Topics include controversies surrounding the meaning of revolution, state building, war, geopolitics, Islamic law, clerical authority, gender, an Islamic economy, culture, and ethnic, national and religious identities from the 1940s to the present. Assignments will focus on primary sources (especially legal documents, poetry, novels, and memoirs) and films.

HISTORY 91B. The City in Imperial China. 3 Units.

The evolution of cities in the early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative cases from European history. Readings include primary and secondary sources, and visual materials.

HISTORY 91D. China: The Northern and Southern Dynasties. 3 Units.

(Same as HISTORY 191D. History majors and others taking 5 units, register for 191D.) Examines one of the most dynamic periods of Chinese history with the emergence of the institutional religions (Buddhism and Daoism), the development of the garden as an art form, the rise of landscape as a theme of verse and art, the invention of lyric poetry, and the real beginnings of the southward spread of Chinese civilization.

HISTORY 92. Early Empires in China. 3 Units.

How China was transformed as a consequence of its political unification by the Qin dynasty. The geographical reorganization of China in the process of unification. The changing nature of rulership, cities, rural society, military organization, kinship structure, religion, literary practice, law, and relations to the outside world. The nature of empire as a political system.

HISTORY 92A. The Historical Roots of Modern East Asia. 4-5 Units.

Focus is on China and Japan before and during their transition to modernity. The populous, urbanized, economically advanced, and culturally sophisticated Ming empire and Muromachi shogunate in the 16th century when Europeans first arrived. How the status quo had turned on its head by the early 20th century when European and American steamships dominated the Pacific, China was in social and political upheaval, and Japan had begun its march to empire.

Same as: HISTORY 392E.

HISTORY 94B. Japan in the Age of the Samurai. 3 Units.

(Same as HISTORY 194B. History majors and others taking 5 units, register for 194B.) From the Warring States Period to the Meiji Restoration. Topics include the three great unifiers, Tokugawa hegemony, the samurai class, Neoconfucian ideologies, suppression of Christianity, structures of social and economic control, frontiers, the other and otherness, castle-town culture, peasant rebellion, black marketing, print culture, the floating world, National Studies, food culture, samurai activism, black ships, unequal treaties, anti-foreign terrorism, restorationism, millenarianism, modernization as westernization, Japan as imagined community.

HISTORY 94S. Rebels, Boxers and Bandits: Violent Resistance in Late Imperial China. 5 Units.

In the mid-19th century a man claiming to be Jesus Christ's younger brother led a rebellion that killed 20 million. In 1900, the Boxers United in Righteousness staged a bloody uprising. Bandits, something in Western women's clothing, raided across the country. How did these rebels, Boxers and bandits see themselves? How were they represented by others? What were their relations to the state? Do they mean anything? Are they important?.

HISTORY 95. Modern Korean History. 3 Units.

(Same as HISTORY 195. History majors and others taking 5 units, register for 195.) Themes include status, gender, and monarchy in the Choson dynasty; intellectual life and social transformation in the 19th century; the rise of Korean nationalism; Japan's colonial rule and Korean identities; culture, economy, and society in colonial Korea; the Korean War, and the different state building processes in North and South after the Korean War.

HISTORY 95C. Modern Japanese History: From Samurai to Pokemon. 3 Units.

(Same as History 195C. History majors and others taking 5 units, register for 195C.) Japan's modern transformation from the late 19th century to the present. Topics include: the Meiji revolution; industrialization and social dislocation; the rise of democracy and empire; total war and US occupation; economic miracle and malaise; Japan as soft power; and politics of memory. Readings and films focus on the lived experience of ordinary men and women across social classes and regions.

HISTORY 95N. Mapping the World: Cartography and the Modern Imagination. 4-5 Units.

Preference to freshmen. Focus is on cutting-edge research. Topics: the challenge of grasping the globe as a whole; geography's roots in empire; maps as propaganda and as commodities; the cultural production of scale; and the cartography of imaginery worlds. Sources include resources in the Green Library Special Collections and in the Stanford Spatial History Lab.

HISTORY 96. Worlds of Gandhi. 3 Units.

Place the paradox of Gandhi in context of global convulsions of 20th century. Gandhi lived across continents; maturing in South Africa, struggling in India, attaining celebrity in Europe. As leader of masses, his method of Satyagraha was distinctively at odds with his times. Yet, he also privileged sacrifice, dying, even euthanasia. In a world beset by fear and war, Gandhi's complex theory of nonviolence is compelling. What kind of nonviolent politics did Gandhi envision after Fascism, Auschwitz, Hiroshima, and Pakistan?.

HISTORY 98. The History of Modern China. 3 Units.

(Same as HISTORY 198. History majors and others taking 5 units, register for 198.) Major historical transformations including the decline of the last imperial dynasty, the formation of the first Chinese republic, WW II, the rise of Communism, China under Mao, post-Mao reforms, and the Beijing Olympics of 2008.

HISTORY 98N. Beijing, Shanghai, and the Structure of Modern China. 3 Units.

This course examines the transformation of China from the late empire to the present by studying the nature of its two greatest cities. Topics examined will include the evolving physical structure of the cities, their changing relations to the Chinese state and the outside world, shifting understandings of the urban population/crowd, the changing nature of time, new modes of self-definition through patterns of consumption, the cities as topics of literature and movies, and the nature of urban modernity.

HISTORY 101. The Greeks. 4-5 Units.

Greek history from the rise of the city state through Alexander the Great's conquest of Persia. Economics, society, culture, and technology. Competition and cooperation within and between states; the emergence of strong forms of citizenship along with chattel slavery and gender inequality; the origins and practices of democracy; and relations with non-Greek peoples. Focus is on ancient sources and archaeological remains. Weekly participation in a discussion section is required. Same as: CLASSHIS 101.

HISTORY 102. The History of the International System since 1914. 5 Units.

After defining the characteristics of the international system at the beginning of the twentieth century, this course reviews the primary developments in its functioning in the century that followed. Topics include the major wars and peace settlements; the emergence of Nazism and Communism; the development of the Cold War and nuclear weapons; the rise of China, India, and the EU; and the impact of Islamic terrorism. The role of international institutions and international society will also be a focus as will the challenge of environment, health, poverty, and climate issues to the functioning of the system. Same as: INTNLREL 102.

HISTORY 102A. The Romans. 3-5 Units.

How did a tiny village create a huge empire and shape the world, and why did it fail? Roman history, imperialism, politics, social life, economic growth, and religious change. Weekly participation in a discussion section is required.

Same as: CLASSHIS 60.

HISTORY 103D. Human Society and Environmental Change. 4 Units.

Interdisciplinary approaches to understanding human-environment interactions with a focus on economics, policy, culture, history, and the role of the state. Prerequisite: ECON 1A

Same as: EARTHSYS 112, EESS 112.

HISTORY 103F. Introduction to Military History. 5 Units.

Introduces students to the rich history of military affairs and, at the same time, examines the ways in which we think of change and continuity in military history. How did war evolve from ancient times, both in styles of warfare and perceptions of war? What is the nature of the relationship between war and society? Is there such a thing as a Western way of war? What role does technology play in transforming military affairs? What is a military revolution and can it be manufactured or induced? Chronologically following the evolution of warfare from Ancient Greece to present day so-called new wars, we will continuously investigate how the interdependencies between technological advances, social change, philosophical debates and economic pressures both shaped and were influenced by war.

HISTORY 105C. Human Trafficking: Historical, Legal, and Medical Perspectives. 5 Units.

(Same as HISTORY 5C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution and labor exploitation, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning and offers an optional service-learning component.

Same as: FEMGEN 105C, INTNLREL 105C.

HISTORY 106A. Global Human Geography: Asia and Africa. 5 Units.

Global patterns of demography, economic and social development, geopolitics, and cultural differentiation, covering E. Asia, S. Asia, S.E. Asia, Central Asia, N. Africa, and sub-Saharan Africa. Use of maps to depict geographical patterns and processes.

HISTORY 106B. Global Human Geography: Europe and Americas. 5 Units.

Patterns of demography, economic and social development, geopolitics, and cultural differentiation. Use of maps to depict geographical patterns and processes.

HISTORY 106C. Global Historical Geography. 5 Units.

The sweep of human history through the medium of maps. The rise, expansion, and fall of kingdoms, empires, and other states; the spread of major religions; the paths of explorers, conquerors, and diseases; and the development and intensification of trade networks. Overview of the prehistoric period and ancient times, but focus is on the modern world.

HISTORY 107. Introduction to Feminist Studies. 4-5 Units.

Introduction to interdisciplinary feminist scholarship, which seeks to understand the creation, perpetuation, and critiques of gender inequalities. Topics include the historical emergence of feminist politics and contemporary analysis of work and family, health and sexuality, creativity, and politics. Close attention to the intersections of race, gender, ethnicity, and sexuality and to international, as well as U.S., perspectives. Students learn to think critically about gender in the past, present, and future.

Same as: AMSTUD 107, CSRE 108, FEMGEN 101.

HISTORY 110B. From Renaissance to Revolution: Early Modern Europe. 5 Units.

(Same as HISTORY 10B. History majors and others taking 5 units, register for 110B.) From 1350 to 1789, Europe went from being a provincial backwater to a new global center of power. This course surveys the profound changes of the period that shape our world today: the spread of humanism and science, religious reformation, new styles of warfare, the rise of capitalism and a new global economy, the emergence of the state, and revolution which sought to overthrow established governments.

HISTORY 110C. Introduction to Modern Europe. 5 Units.

(SAME as HISTORY 10C. History majors and others taking 5 units, register for 110C.) From the late 18th century to the present. How Europeans responded to rapid social changes caused by political upheaval, industrialization, and modernization. How the experience and legacy of imperialism and colonialism both influenced European society and put in motion a process of globalization that continues to shape international politics today.

HISTORY 113. Before Globalization: Understanding Premodern World History. 3-5 Units.

This course covers the history of the world from 60,000 years ago until 1500 by asking big questions: Why did civilizations develop the way they did? What factors were responsible for similarities and differences between different parts of the world? What does this mean for our newly globalized world?

Same as: CLASSHIS 147.

HISTORY 114. Origins of History in Greece and Rome. 4-5 Units.

The beginnings and development of historical writing in the ancient world. Emphasis on major classical historians and various models of history they invented, from local to imperial, military, cultural, biographical, world history and church history. Focus on themes of power, war, loss, growth and decline, as put by the ancients into historical narrative forms and probed by way of historical questioning and explanation. Attention to how these models resonate still today. Readings in translation: Herodotus, Thucydides, Tacitus, Livy and others.

Same as: CLASSHIS 117.

HISTORY 116N. Howard Zinn's 'A People's History' and the Quest for Historical Truth. 3 Units.

Howard Zinn's 'A People's History of the United States' has few peers among contemporary historical works. With more than two million copies in print, A People's History is more than a book. It is a cultural icon, a symbol of our time. "You wanna read a real history book," Matt Damon tells Robin Williams in Good Will Hunting, "read People's History of the US. That book'll knock you on your ass." Today, A People's History's original grey cover has been colorized in red, white, and blue for its Harper "Perennial Modern Classic" edition, and is now marketed with special displays in suburban megastores. You can buy A People's History T-shirts and tote-bags. Zinn's book was not the first but is certainly the defining example of a genre of historical writing known as revisionism, in which the cherished truths of a previous generation are turned on their head. In this seminar, we will use A People's History to probe the question of historical truth. How do we determine what was true in the past? Why and under what circumstances should we believe what historians say? Under what circumstances are we required to rethink our own interpretations about the past, even if doing so causes discomfort and upheaval? A People's History will be our point of departure, but our journey will visit a variety of historical trouble spots: debates about whether the US was founded as a Christian nation, Holocaust denial, and the "Birther" controversy of President Obama.

Same as: EDUC 116N.

HISTORY 120B. The Russian Empire. 5 Units.

From Peter the Great to the Bolsheviks. Russia as an empire; its varied regions, including the Caucasus, Central Asia, Ukraine, Poland, and the Baltics. Focus is on the politics and cultures of empire. Sources include novels, political tracts, paintings, music, and other primary sources.

HISTORY 120C. 20th-Century Russian and Soviet History. 5 Units.

The Soviet polity from the 1917 Revolution to its collapse in 1991. Essentials of Marxist ideology; the Russian Empire in 1917. Causation in history; interpretations of the Revolution; state building in a socialist polity; social engineering through collectivization of agriculture, force-paced industrialization, and cultural revolution; terror as concept and practice; nationality policies in a multiethnic socialist empire; the routinization, decline, and collapse of the revolutionary ethos; and the legacy of the Soviet experiment in the new Russia.

HISTORY 125. Dark Century: Eastern Europe After 1900. 5 Units.

Major historical trends in 20th-century E. European history. Empires and national movements. The creation of independent Eastern Europe after WW I; social movements and the emergence of dictatorships and fascism in the inter-war period. WW II, Stalinism, and destalinization in contemporary E. Europe.

HISTORY 130A. In Sickness and In Health: Medicine and American Society, 1800-Present. 5 Units.

Explores the history of medical institutions, ideas and practices in the United States from the early nineteenth century to the present. How are ideas of illness and health historically rooted and socially constructed? How did scientific and medical discoveries lead to the risk of scientific medicine, and how were these innovations adopted within the American cultural landscape? Topics include the transformation of therapeutics and technologies, medicine and the scientific ideal in the U.S., gender and race and medicine, the history of public health, and the professionalization and specialization of American medical practice.

HISTORY 131A. Britain and World History since 1750: "Britain invented everything!". 5 Units.

Jolly Chaps or Perfidious Albion?— That is the question. This course introduces students to the broad world-historical patterns of the last two centuries, with an eye to the particular role of Britain and its Empire. Britain's role in spreading industrialism, capitalism, nationalism, Darwinism and liberalism among others are studied. We consider the abyss between intentions and outcomes, the hypocrisies of the 'civilizing mission,' as well as tangible benefits for those touched by British power.

HISTORY 132. Ordinary Lives: A Social History of the Everyday in Early Modern Europe. 5 Units.

What war meant for foot soldiers and the peasants across whose fields they marched. Ordinary people's lives in the eras of Machiavelli, Shakespeare, the Reformation, and the scientific revolution. Topics include: birth, marriage, and death; city life and peasant culture; lay encounters with religious and intellectual ideas; war and crime; and gender and sexuality.

HISTORY 133A. Blood and Roses: The Age of the Tudors. 5 Units.

English society and state from the Wars of the Roses to the death of Elizabeth. Political, social, and cultural upheavals of the Tudor period and the changes wrought by the Reformation. The establishment of the Tudor monarchy; destruction of the Catholic church; rise of Puritanism; and 16th-century social and economic changes.

HISTORY 134A. The European Witch Hunts. 5 Units.

(Same as HISTORY 34A. History majors and others taking 5 units, register for 134A.) After the Reformation, in the midst of state-building and scientific discovery, Europeans conducted a series of deadly witch hunts, violating their own laws and procedures in the process. What was it about early modernity that fueled witch hunting? Examines witch trials and early modern demonology as well as historians' interpretations of events to seek answers to this question.

HISTORY 137A. Europe, 1945-2002. 5 Units.

Europe's transformation from the end of WW II to an expanded EU. Political, cultural, economic, and social history. Topics: postwar reconstruction, Cold War, consumer versus socialist culture, collapse of Communism, postcommunist integration.

HISTORY 138A. Germany and the World Wars, 1870-1990. 5 Units.

(Same as HISTORY 38A. Majors and others taking 5 units, enroll in 138A.) Germany's history from Bismarck's wars of unification through the end of the Cold War. The radicalizing relationship between international conflict, social upheaval, and state transformation with a focus on the clashes of the Second Empire, the road to WW I, interwar instability, the rise of Nazism, WW II, the Holocaust, the division of communist E. and capitalist W. Germany, and the fall of the Iron Curtain.

HISTORY 140. World History of Science. 5 Units.

(Same as HISTORY 40. History majors and others taking 5 units, register for 140.) The earliest developments in science, the prehistoric roots of technology, the scientific revolution, and global voyaging. Theories of human origins and the oldest known tools and symbols. Achievements of the Mayans, Aztecs, and native N. Americans. Science and medicine in ancient Greece, Egypt, China, Africa, and India. Science in medieval and Renaissance Europe and the Islamic world including changing cosmologies and natural histories. Theories of scientific growth and decay; how science engages other factors such as material culture and religions.

HISTORY 144. History of Women and Gender in Science, Medicine and Engineering. 5 Units.

(Same as HISTORY 44. Majors and others taking 5 units, enroll in HISTORY 144.) Men's and women's roles in science, medicine, and engineering over the past 200 years with a focus on the present. What are the efforts underway globally to transform science, medicine, and engineering into fields where women can flourish? How have science and medicine studied and defined males and females? Can gender analysis spark creativity in human knowledge?

Same as: FEMGEN 144.

HISTORY 145A. Africa Until European Conquest. 5 Units.

Episodes in African history from the earliest records up until European partition of the continent, focusing on how knowledge about the natural, social, and spiritual worlds was linked to the exercise of power. The effects of technological innovations on states and other forms of social complexity; use of religious beliefs and practices to legitimate or critique authority. The effects of slave trades and imperial conquest on these forms of authority.

HISTORY 145B. Africa in the 20th Century. 5 Units.

(Same as HISTORY 45B. History majors and others taking 5 units, register for 145B.) The challenges facing Africans from when the continent fell under colonial rule until independence. Case studies of colonialism and its impact on African men and women drawn from West, Central, and Southern Africa. Novels, plays, polemics, and autobiographies written by Africans.

Same as: AFRICAAM 145B.

HISTORY 147. History of South Africa. 5 Units.

(Same as HISTORY 47. History majors and others taking 5 units, register for 147.) Introduction, focusing particularly on the modern era. Topics include: precolonial African societies; European colonization; the impact of the mineral revolution; the evolution of African and Afrikaner nationalism; the rise and fall of the apartheid state; the politics of post-apartheid transformation; and the AIDS crisis.

Same as: AFRICAAM 147.

HISTORY 149C. The Slave Trade. 5 Units.

(Same as HISTORY 49C. History majors and others taking 5 units, enroll in 149C.) Slave trades and forms of slavery in W. Africa from 1000 to 1885; impacts on lives, social organization, and political structures. Slavery in Islam, the slave market in the Mediterranean and Middle East, and the Saharan slave trade. Slavery within Africa, growth of the Atlantic trade, the Middle Passage, and war and trade that produced slaves. Impact of the Industrial Revolution and European abolition movements on the use of slaves and warfare in Africa. The relationship between slaving and the European conquest of Africa.

HISTORY 150A. Colonial and Revolutionary America. 5 Units.

(Same as HISTORY 50A. History majors and others taking 5 units, register for HISTORY 150A.) Survey of the origins of American society and polity in the 17th and 18th centuries. Topics: the migration of Europeans and Africans and the impact on native populations; the emergence of racial slavery and of regional, provincial, Protestant cultures; and the political origins and constitutional consequences of the American Revolution.

Same as: AMSTUD 150A.

HISTORY 150B. 19th-Century America. 5 Units.

(Same as HISTORY 50B. History majors and others taking 5 units, register for 150B.) Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture.

Same as: AFRICAAM 150B, AMSTUD 150B.

HISTORY 150C. The United States in the Twentieth Century. 5 Units.

(Same as HISTORY 50C. History majors and others taking 5 units, register for 150C.) Major political, economic, social, and diplomatic developments in the U.S. Themes: the economic and social role of government (Progressive, New Deal, Great Society, and Reagan-Bush eras); ethnic and racial minorities in society (mass immigration at the turn of the century and since 1965, the civil rights era of the 50s and 60s); the changing status of women since WW II; shifting ideological bases, institutional structures, and electoral characteristics of the political system (New Deal and post-Vietnam); determinants of foreign policy in WW I and II, and the Cold War.

Same as: AMSTUD 150C.

HISTORY 151. THE AMERICAN WEST. 4 Units.

The American West is characterized by frontier mythology, vast distances, marked aridity, and unique political and economic characteristics. This course integrates several disciplinary perspectives into a comprehensive examination of Western North America; its history, geology, climate, literature, art, film, institutions, politics, demography, economy, and continuing policy challenges. Students will examine several themes fundamental to understanding the region: borders (including how we define the West), space and distance, Native Americans, water, and boom and bust cycles.

Same as: AMSTUD 124A, ARTHIST 152, ENGLISH 124, POLISCI 124A.

HISTORY 154D. Religion and War in America. 4 Units.

Scholars have devoted much attention to wars in American history, but have not agreed as to whether religion was a major cause or simply a cover for political, economic, and other motives. We will compare interpretations that leave religion out, with those that take it into account. We will also look at the impact of war on the religious lives of ordinary Americans. We will examine both secondary as well as primary sources, beginning with King Philip's War in the 17th century, and ending with the "War on Terror" in the present day.

Same as: RELIGST 105.

HISTORY 158. The United States Since 1945. 4-5 Units.

Focus is on foreign policy and politics with less attention to social and intellectual history. Topics include nuclear weapons in WW II, the Cold War, the Korean and Vietnam wars, Eisenhower revisionism, the Bay of Pigs and Cuban missile crisis, civil rights and the black freedom struggle, the women's movement, the Great Society and backlash, welfare policy, conservatism and liberalism, the 60s anti-war movement, Watergate and the growth of executive power, Iran-Contra and Reagan revisionism, Silicon Valley, the Gulf War, the Clinton impeachment controversy, 2004 election, and 9/11 and Iraq war.

HISTORY 158B. History of Education in the United States. 3-5 Units.

How education came to its current forms and functions, from the colonial experience to the present. Focus is on the 19th-century invention of the common school system, 20th-century emergence of progressive education reform, and the developments since WW II. The role of gender and race, the development of the high school and university, and school organization, curriculum, and teaching.

Same as: AMSTUD 201, EDUC 201.

HISTORY 158C. History of Higher Education in the U.S.. 3-5 Units.

Major periods of evolution, particularly since the mid-19th century. Premise: insights into contemporary higher education can be obtained through its antecedents, particularly regarding issues of governance, mission, access, curriculum, and the changing organization of colleges and universities.

Same as: AMSTUD 165, EDUC 165, EDUC 265.

HISTORY 159. Introduction to Asian American History. 5 Units.

(Same as HISTORY 59. History majors and others taking 5 units, register for 159.) The historical experience of people of Asian ancestry in the U.S. Immigration, labor, community formation, family, culture and identity, and contemporary social and political controversies. Readings: interpretative texts, primary material, and historical fiction. (Chang)

Same as: AMSTUD 159.

HISTORY 161. Women in Modern America. 4-5 Units.

The transformation from the New Woman of the 1890s to the New Woman of the 1990s; attention to immigrant, black, and white women, both historical analyses and personal accounts. Topics include: workforce participation; family and reproductive labor; educational and professional opportunities; the impact of wars, economic depression, and popular culture; and recurrent feminist movements.

Same as: AMSTUD 161, CSRE 162, FEMGEN 161.

HISTORY 163. A History of North American Wests. 5 Units.

The history, peoples, and natural systems of a region that has never been contained within a single empire or nation state, but has been united by the movement of peoples, species, and things. Topics include smallpox, horses, gold, salmon, rivers, coal, and oil.

HISTORY 164C. From Freedom to Freedom Now: African American History, 1865-1965. 5 Units.

(Same as HISTORY 64C. History majors and others taking 5 units, register for 164C.) Explores the working lives, social worlds, political ideologies and cultural expressions of African Americans from emancipation to the early civil rights era. Topics include: the transition from slavery to freedom, family life, work, culture, leisure patterns, resistance, migration and social activism. Draws largely on primary sources including autobiographies, memoirs, letters, personal journals, newspaper articles, pamphlets, speeches, literature, film and music.

Same as: AMSTUD 164C.

HISTORY 165. Mexican American History through Film. 4-5 Units.

Focus is on the 20th century. Themes such as immigration, urbanization, ethnic identity, the role of women, and the struggle for civil rights.

HISTORY 166. Introduction to African American History: The Modern African American Freedom Struggle. 3-5 Units.

This course is an introduction to African-American Political movements of the period after 1930, with special emphasis on mass protest and civil rights activism as well as leaders such as W. E. B. Du Bois, Thurgood Marshall, Martin Luther King, Jr., Malcom X, Jesse Jackson, and Barack Obama.

The lectures will utilize audio-visual materials extensively, and the exams will cover these materials as well as the traditional lectures. In addition to attending lectures, students are encouraged to undertake research projects.

Same as: AFRICAAM 166, AMSTUD 166.

HISTORY 166B. Immigration Debates in America, Past and Present. 3-5 Units.

Examines the ways in which the immigration of people from around the world and migration within the United States shaped American nation-building and ideas about national identity in the twentieth century. Focuses on how conflicting ideas about race, gender, ethnicity, and citizenship with respect to particular groups led to policies both of exclusion and integration. Part One begins with the ways in which the American views of race and citizenship in the colonial period through the post-Reconstruction Era led to the passage of the Chinese Exclusion Act in 1882 and subsequently to broader exclusions of immigrants from other parts of Asia, Southern and Eastern Europe, and Mexico. Explores how World War II and the Cold War challenged racial ideologies and led to policies of increasing liberalization culminating in the passage of the 1965 Immigration Act, which eliminated quotas based on national origins and opened the door for new waves of immigrants, especially from Asia and Latin America. Part Two considers new immigration patterns after 1965, including those of refugees, and investigates the contemporary debate over immigration and immigration policy in the post 9/11 era as well as inequalities within the system and the impact of foreign policy on exclusions and inclusions.

Same as: CSRE 166B, HISTORY 366B.

HISTORY 167A. Martin Luther King, Jr. and the Global Freedom Struggle. 3-5 Units.

Using the unique documentary resources and publications of Stanford's King Research and Education Institute, this course will be taught by Professor Carson and his colleagues at the Institute. It will provide a general introduction to the life and legacy of Martin Luther King, Jr., as well as devote attention to the movements he inspired. In addition to lectures, the course will include presentations of documentaries such as Eyes on the Prize. Students will be expected to read the required texts, participate in class discussions, and take a final exam or submit a research paper (or an audio-visual project developed in consultation with the professor).

HISTORY 168. American History in Film Since World War II. 3-4 Units.

U.S. society, culture, and politics since WW II through feature films. Topics include: McCarthyism and the Cold War; ethnicity and racial identity; changing sex and gender relationships; the civil rights and anti-war movements; and mass media. Films include *The Best Years of Our Lives*, *Salt of the Earth*, *On the Waterfront*, *Raisin in the Sun*, *Kramer v Kramer*, and *Falling Down*.

HISTORY 172A. Mexico: From Colony to Nation, or the History of an impossible Republic?. 5 Units.

Was a republican form of government even possible in 19th-century Mexico after 300 years of colonial rule under the Spanish monarchy? Was the Spanish colonial heritage a positive or a negative legacy according to 19th-century Mexican politicians? How were they to forge a new national identity with so many ethnically and culturally diverse peoples throughout the territory? Just how "traditional" was, in fact, the colonial period? These are some of the questions we will explore in this course. Journeying from the late colonial period (c.1700) to the 35-year dictatorship known as El Porfiriato (1876-1911) we will examine how Mexico's diverse indigenous peoples adapted to both colonial and postcolonial rule, how they actively participated in politics and political discourse to preserve their cultures, customs and colonial privileges, and how after independence in 1821, a new republican political culture was forged. Mexico was not an impossible republic, but rather another kind of republic.

HISTORY 174. Mexico Since 1876: History of a "Failed State"?. 5 Units.

This course is an introduction to the history and diverse peoples of modern Mexico from 1876 to the present. Through lectures, discussions, primary and secondary readings, short documentaries, and written assignments, students will critically explore and analyze the multiplicity of historical processes, events and trends that shaped and were shaped by Mexicans over the course of a century. The course will cover some of the social and political dimensions of rural social change, urbanization and industrialization, technological innovation and misuse, environmental degradation and conservation, education, ideology, culture and media, migration, and the drug trade.

HISTORY 181B. Formation of the Contemporary Middle East. 5 Units.

(Same as HISTORY 81B. History majors and others taking 5 units, register for 181B.) The history of the Middle East since WW I, focusing on the eastern Arab world, Egypt, the Fertile Crescent, and the Arabian Peninsula, with attention to Turkey, Iran, and Israel.

HISTORY 182C. The Making of the Islamic World, 600-1500. 5 Units.

(Same as HISTORY 82C. Majors and other taking 5 units, register for 182C.) The History of Islam and Muslim peoples from 600-1500. Topics include Muhammad and his community; the early Arab conquests and empires; sectarian movements; formation of Islamic belief, thought, legal culture and religious institutions; transregional Sufi and learned networks; family and sexuality; urban, rural and nomadic life; non-Muslim communities; the development of Mediterranean and Indian Ocean trade; relations with Byzantium, the Latin West, China; the Crusades and the Mongols.

HISTORY 185B. Jews, 1500 to the Present. 5 Units.

(Same as HISTORY 85B. History majors and others taking 5 units, register for 185B.) Topics include the restructuring of Jewish existence during the Enlightenment and legal emancipation at the end of the 18th century in W. Europe; the transformation of Jewish life in E. Europe under the authoritarian Russian regime; colonialism in the Sephardic world; new ideologies (Reform Judaism and Jewish nationalisms); the persistence and renewal of antisemitism; the destruction of European Jewry under the Nazis; new Jewish centers in the U.S.; and the State of Israel. Same as: JEWISHST 185B.

HISTORY 187. The Islamic Republics: Politics and Society in Iran, Afghanistan and Pakistan. 5 Units.

(Same as HISTORY 87. History majors and others taking 5 units, register for 187.) Explores the contested politics of these societies in modern times. Topics include controversies surrounding the meaning of revolution, state building, war, geopolitics, Islamic law, clerical authority, gender, an Islamic economy, culture and ethnic, national and religious identities from the 1940s to the present. Assignments will focus on primary sources (especially legal documents, poetry, novels, and memoirs) and films.

HISTORY 187D. Zionism and Its Critics. 4-5 Units.

Zionism from its genesis in the 1880s up until the establishment of the state of Israel in May, 1948, exploring the historical, ideological and political dimensions of Zionism. Topics include: the emergence of Zionist ideology in connection to and as a response to challenges of modernity; emancipation; Haskalah (Jewish enlightenment); other national and ideological movements of the period; the ideological crystallization of the movement; and the immigration waves to Palestine.

HISTORY 191B. The City in Imperial China. 5 Units.

The evolution of cities in the early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative cases from European history. Readings include primary and secondary sources, and visual materials.

HISTORY 191D. China: The Northern and Southern Dynasties. 5 Units.

(Same as HISTORY 91D. History majors and others taking 5 units, register for 191D.) Examines one of the most dynamic periods of Chinese history with the emergence of the institutional religions (Buddhism and Daoism), the development of the garden as an art form, the rise of landscape as a theme of verse and art, the invention of lyric poetry, and the real beginnings of the southward spread of Chinese civilization.

HISTORY 192. China: The Early Empires. 5 Units.

How China was transformed as a consequence of its political unification by the Qin dynasty. The geographical reorganization of China in the process of unification. The changing nature of rulership, cities, rural society, military organization, kinship structure, religion, literary practice, law, and relations to the outside world. The nature of empire as a political system.

HISTORY 194B. Japan in the Age of the Samurai. 5 Units.

(Same as HISTORY 94B. History majors and others taking 5 units, register for 194B.) From the Warring States Period to the Meiji Restoration. Topics include the three great unifiers, Tokugawa hegemony, the samurai class, Neoconfucian ideologies, suppression of Christianity, structures of social and economic control, frontiers, the other and otherness, castle-town culture, peasant rebellion, black marketing, print culture, the floating world, National Studies, food culture, samurai activism, black ships, unequal treaties, anti-foreign terrorism, restorationism, millenarianism, modernization as westernization, Japan as imagined community.

HISTORY 195. Modern Korean History. 5 Units.

(Same as HISTORY 95. History majors and others taking 5 units, register for 195.) Themes include status, gender, and monarchy in the Choson dynasty; intellectual life and social transformation in the 19th century; the rise of Korean nationalism; Japan's colonial rule and Korean identities; culture, economy, and society in colonial Korea; the Korean War, and the different state building processes in North and South after the Korean War. Same as: HISTORY 395.

HISTORY 195C. Modern Japanese History: From Samurai to Pokemon. 5 Units.

(Same as HISTORY 95C. History majors and others taking 5 units, register for 195C.) Japan's modern transformation from the late 19th century to the present. Topics include: the Meiji revolution; industrialization and social dislocation; the rise of democracy and empire; total war and US occupation; economic miracle and malaise; Japan as soft power; and politics of memory. Readings and films focus on the lived experience of ordinary men and women across social classes and regions.

HISTORY 195X. Islam in India: Conflict and Accommodation. 4 Units.

This course will investigate the history of Islam in South Asia, particularly interactions between Muslims and Hindus, through the lenses of conflict and accommodation. This topic has become increasingly important in modern times as India and neighboring nations experience sectarian violence and simultaneously strive to engender the peaceful coexistence of multiple religious communities. In many ways the debate over South Asia's present and future is being played out in regards to interpretations of its past. In this course, students will gain a solid overview of the chronological development of Islam in India and its negotiations with other religious traditions on the subcontinent. We will think critically about the relevance of South Asia's past to its present and the crucial role of forms of Indian Islam in the broader context of Islamic cultures across the globe.
Same as: RELIGST 111.

HISTORY 196. Worlds of Gandhi. 5 Units.

(Same as HISTORY 96. History majors and others taking 5 units, register for 196.) Place the paradox of Gandhi in context of global convulsions of 20th century. Gandhi lived across continents; maturing in South Africa, struggling in India, attaining celebrity in Europe. As leader of masses, his method of Satyagraha was distinctively at odds with his times. Yet, he also privileged sacrifice, dying, even euthanasia. In a world beset by fear and war, Gandhi's complex theory of nonviolence is compelling. What kind of nonviolent politics did Gandhi envision after Fascism, Auschwitz, Hiroshima, and Pakistan?

HISTORY 197. Southeast Asia: From Antiquity to the Modern Era. 5 Units.

The history of S.E. Asia, comprising Indonesia, the Philippines, Malaysia, Singapore, Thailand, Vietnam, Burma, Cambodia, and Laos, from antiquity to the present. The spread of Indian cultural influences, the rise of indigenous states, and the emergence of globally linked trade networks. European colonization, economic transformation, the rise of nationalism, the development of the modern state, and the impact of globalization.

HISTORY 198. The History of Modern China. 5 Units.

(Same as HISTORY 98. History majors and others taking 5 units, register for 198.) Major historical transformations including the decline of the last imperial dynasty, the formation of the first Chinese republic, WW II, the rise of Communism, China under Mao, post-Mao reforms, and the Beijing Olympics of 2008.

HISTORY 198G. Beijing, Shanghai, and the Structure of China. 3-5 Units.

China's modern history through the rivalry of its two most important cities. The course begins in the nineteenth century, contrasting Beijing, the classic imperial capital and a foreign foundation paradoxically celebrated as the embodiment of "traditional" China, with Shanghai, a treaty port and demographic/economic center of China, but identified as a "foreign" city. After following the cities' history through the warlord period, the "Shanghai decade" of Nationalist rule, and the Japanese occupation, the course examines the two cities' developments under Mao and Deng. The course concludes with a look at their current relations and roles, and the transformed nature of China's cities.

HISTORY 201. Introduction to Public History in the U.S., 19th Century to the Present. 4-5 Units.

Gateway course for the History and Public Service interdisciplinary track. Topics include the production, presentation, and practice of public history through narratives, exhibits, web sites, and events in museums, historical sites, parks, and public service settings in nonprofit organizations, government agencies, and educational institutions. Service Learning Course (certified by Haas Center).

Same as: AFRICAAM 102, CSRE 201, HISTORY 301.

HISTORY 201A. The Global Drug Wars. 4-5 Units.

Explores the global story of the struggle over drugs from the nineteenth century to the present. Topics include the history of the opium wars in China, controversies over wine and tobacco in Iran, narco-trafficking and civil war in Lebanon, the Afghan 'narco-state,' Andean cocaine as a global commodity, the politics of U.S.- Mexico drug trafficking, incarceration, drugs, and race in the U.S., and the globalization of the American 'war on drugs.'

Same as: HISTORY 301A.

HISTORY 201C. The U.S., U.N. Peacekeeping, and Humanitarian War. 5 Units.

The involvement of U.S. and the UN in major wars and international interventions since the 1991 Gulf War. The UN Charter's provisions on the use of force, the origins and evolution of peacekeeping, the reasons for the breakthrough to peacemaking and peace enforcement in the 90s, and the ongoing debates over the legality and wisdom of humanitarian intervention. Case studies include Croatia and Bosnia, Somalia, Rwanda, Kosovo, East Timor, and Afghanistan.

Same as: INTNLREL 140C.

HISTORY 202A. Questions in Modern World History: Provincializing Europe?. 4-5 Units.

Though this class will consider themes addressed in most modern history classes (imperialism, liberalism, capitalism, the construction of the modern nation-state, the roots of the 19th and 20th century wars, questions of governance, various forms of resistance, colonizer and colonized identities, and the process of globalization, etc.), we will take a world-historical approach, considering these topics from a non-western viewpoint, outside of a nationalist narrative, while taking a multi-perspectival stance.

Same as: HISTORY 302A.

HISTORY 202B. Coffee, Sugar, and Chocolate: Commodities and Consumption in World History, 1200-1800. 4 Units.

Many of the basic commodities that we consider staples of everyday life became part of an increasingly interconnected world of trade, goods, and consumption between 1200 and 1800. This seminar offers an introduction to the material culture of the late medieval and early modern world, with an emphasis on the role of European trade and empires in these developments. We will examine recent work on the circulation, use, and consumption of things, starting with the age of the medieval merchant, and followed by the era of the Columbian exchange in the Americas that was also the world of the Renaissance collector, the Ottoman patron, and the Ming connoisseur. This seminar will explore the material horizons of an increasingly interconnected world, with the rise of the Dutch East India Company and other trading societies, and the emergence of the Atlantic economy. It concludes by exploring classic debates about the "birth" of consumer society in the eighteenth century. How did the meaning of things and people's relationships to them change over these centuries? What can we learn about the past by studying things?

Same as: HISTORY 302B.

HISTORY 202G. Peoples, Armies and Governments of the Second World War. 4-5 Units.

Clausewitz conceptualized war as always consisting of a trinity of passion, chance, and reason, mirrored, respectively, in the people, army and government. Following Clausewitz, this course examines the peoples, armies, and governments that shaped World War II. Analyzes the ideological, political, diplomatic and economic motivations and constraints of the belligerents and their resulting strategies, military planning and fighting. Explores the new realities of everyday life on the home fronts and the experiences of non-combatants during the war, the final destruction of National Socialist Germany and Imperial Japan, and the emerging conflict between the victors. How the peoples, armies and governments involved perceived their possibilities and choices as a means to understand the origins, events, dynamics and implications of the greatest war in history.
Same as: HISTORY 302G.

HISTORY 203. Premodern Economic Cultures. 5 Units.

A comparative survey of premodern economies and the value systems that supported them. Students will read and discuss theories of economic culture as well as historical monographs about specific regions. Discussions will focus on the comparison and conceptualization of premodern economic cultures. Students will be required to research the literature on a particular premodern society of their choosing, compile an annotated bibliography of that literature, and compose an essay analyzing the problems and possibilities presented therein.

Same as: HISTORY 303.

HISTORY 203B. Secret Societies in Western History. 5 Units.

What drives human beings to join secret societies? What is the knowledge so jealously guarded by these groups? Are they just for men or are there female secret societies? Is there really a Judeo-Masonic conspiracy to dominate the world? These are some of the questions we will answer in this course. Surveying ancient civilizations to contemporary society, we will discuss secret societies from anthropological and sociological approaches, but especially from a historical perspective, by reviewing their political, religious and cultural impacts in Western History as well as the myths surrounding them.

Same as: HISTORY 303B.

HISTORY 203C. History of Ignorance. 3 Units.

Scholars pay a lot of attention to knowledge; how it arises and impacts society; but much less attention has been given to ignorance, even though its impacts are equally profound. Here we explore the political history of ignorance, through case studies including: corporate denials of harms from particular products (tobacco, asbestos), climate change denialism, and creationist rejections of Darwinian evolution. Students will be expected to produce a research paper tracing the origins and impact of a particular form of ignorance.

HISTORY 204. Introduction to History and Historiography. 4-5 Units.

An introduction to the discipline of history, designed for current or prospective History majors. Focusing on methods and theories of historical inquiry, students will learn how historians frame problems, collect and analyze evidence, and contribute to on-going debates. Through a series of case studies or exemplary works of historical study, the course will also explore different genres of historical writing (such as narrative, biography, social history) and different methodological approaches to history (such as Annales school, microhistory, and cultural history).

HISTORY 204C. How Wars End: War and Peace in the 20th Century. 5 Units.

Based on an analysis of primary documents, the course will examine how conflicts end: cases include the two world wars, Korea, Vietnam, the Cold War, the Bosnian conflict, and the Irish Civil War.

Same as: HISTORY 304C.

HISTORY 204E. Totalitarianism. 4-5 Units.

Modern revolutionary and totalitarian politics. Sources include monographs on the medieval, Reformation, French Revolutionary, and Great War eras. Topics: the essence of modern ideology, the concept of the body national, state terror, charismatic leadership, gender assignments, private and public spheres, and identities.

Same as: HISTORY 307E.

HISTORY 204G. War and Society. 5 Units.

How Western societies and cultures have responded to modern warfare. The relationship between its destructive capacity and effects on those who produce, are subject to, and must come to terms with its aftermath. Literary representations of WW I; destructive psychological effects of modern warfare including those who take pleasure in killing; changes in relations between the genders; consequences of genocidal ideology and racial prejudice; the theory of just war and its practical implementation; and how wars are commemorated.

Same as: HISTORY 304G.

HISTORY 205F. Digital History. 4 Units.

Students will study the development of the relationship between the discipline of history and computing tools through a combination of theoretical and hands-on activities, and readings. Students will read leading critical works, examine seminal digital projects, and examine the works of leading digital humanities scholars. The end product of the course will be a beta version of a born-digital scholarly product.

HISTORY 206. History and Geography of Contemporary Global Issues. 5 Units.

The historical background and geographical context of contemporary global issues and events. Texts are a world atlas and regular reading of *The New York Times* and *The Economist*. Topics vary according to what is happening in the world. Student presentations.

HISTORY 206A. City, Society, Literature- 19th Century Histories. 4 Units.

This course examines the rise of modern cities through an analysis of urban society and the imaginative literature of the 1900s.

Same as: HISTORY 306A.

HISTORY 207. Biography and History. 4-5 Units.

The relationship between biographical and historical writing, primarily in Europe and America. Problems of methodology, evidence, dispassion, and empathy. Texts: biographies, critical literature on biographical work, and novels (A. S. Byatt's *Possession*, Bernard Malamud's *Dubin's Lives*) that illuminate the intellectual underpinnings of biographical labor.

Same as: HISTORY 308.

HISTORY 207B. Environment, Technology and Revolution in World History. 4-5 Units.

Exploration of historiographical and interdisciplinary methodologies and approaches to intersections among environmental, technological, and revolutionary social change in diverse geographical and temporal contexts. Readings include broad theoretical and synthetic works as well as case studies of American, French, Mexican, Russian, Chinese, and Hungarian revolutions.

HISTORY 207C. The Global Early Modern. 4-5 Units.

In what sense can we speak of "globalization" before modernity? What are the characteristics and origins of the economic system we know as "capitalism"? When and why did European economies begin to diverge from those of other Eurasian societies? With these big questions in mind, the primary focus will be on the history of Europe and European empires, but substantial readings deal with other parts of the world, particularly China and the Indian Ocean.

Same as: HISTORY 307C.

HISTORY 207F. Heavenly Bodies: Saints' Bodies, Relics and Miracles in Late Antique and Medieval Europe. 4-5 Units.

This seminar will use both written and visual sources to explore how the body mattered in the creation of saintly tropes and cults in late antique and medieval Europe. We will begin by reading the diary of an early Christian martyr to consider how a good death set the terms for an ideal Christian life. We will then explore a number of medieval vitae or saints' lives to uncover narrative devices used to describe an exemplary life and consider the role self-denial, bodily and otherwise, played in constructing those portraits. We will conclude by considering the power medieval people ascribed to the remains of saints' bodies and look at the cult of relics as well as miracle accounts describing the bodily healings and transformations ascribed to saints.

Same as: HISTORY 307F, RELIGST 237, RELIGST 337.

HISTORY 208. Private Lives, Public Stories: Autobiography in Women's History. 5 Units.

Changing contexts of women's lives and how women's actions have shaped and responded to those contexts.

HISTORY 208A. Science and Law in History. 4-5 Units.

How the intertwined modern fields of science and law, since the early modern period, together developed central notions of fact, evidence, experiment, demonstration, objectivity, and proof.

Same as: HISTORY 308A.

HISTORY 208B. Women Activists' Response to War. 4-5 Units.

Theoretical issues, historical origins, changing forms of women's activism in response to war throughout the 20th century, and contemporary cases, such as the Russian Committee of Soldiers Mothers, Bosnian Mothers of Srebrenica, Serbian Women in Black, and the American Cindy Sheehan. Focus is on the U.S. and Eastern Europe, with attention to Israel, England, and Argentina.

Same as: HISTORY 308B.

HISTORY 208C. History of Death and Dying. 4 Units.

The changing realities of, attitudes towards and ways of coping with death drawing on examples from Europe, Africa, the Caribbean, Latin America and the United States. The role of death in shaping the modern world via the global slave trades, imperial conquest, pandemics, wars and genocides. Changing rituals relating to death, intellectual and philosophical debates about the personal and social meanings of death, and the political and personal consequences of particular ways and patterns of dying.

Same as: HISTORY 308C.

HISTORY 208S. Facing the Past: The Politics of Retrospective Justice. 5 Units.

Forms of injustice in history including slavery, genocide, ethnic cleansing, mass rape, forced religious conversion, and torture of prisoners. Mechanisms developed over the last century to define, deter, and alleviate the effects of such offenses, including war crimes tribunals, truth commissions, national apologies, and monetary reparations. Case studies chart the international field of retrospective justice, exploring the legal, political, and moral implications of confronting traumatic pasts.

HISTORY 209B. The Idea of Politics. 4-5 Units.

Can we live without politics? Is politics indispensable for humanity and vice-versa? The idea of politics is that it must transform, through human action, conditions of collective life. But the 20th century produced colliding beliefs about what that life might be and what the human being itself might look like. Explore whether, after the century, we might still think of politics as an ethical idea and the "human" as foundational political category.

Keywords: Civility, Cruelty, Friendship, Empire, Democracy, Humanism, Animals.

Same as: HISTORY 309B.

HISTORY 209D. Postcolonialism and Universalism. 4-5 Units.

Key texts and motifs from postcolonial theory: empire, class, exile, suffering, textuality, archive in juxtaposition to 20th-century philosophical questions about universal history and the relevance of humanist inquiry.

Same as: HISTORY 309A.

HISTORY 209S. Research Seminar for Majors. 5 Units.

Required of History majors. How to conduct original, historical research and analysis, including methods such as using the libraries and archives at Stanford and elsewhere, and working collaboratively to frame topics, identify sources, and develop analyses. Autumn quarter focuses on European Lit and Arts; winter quarter on U.S. History and Colonialism; spring quarter on modern Europe, ancient China and early modern Europe.

HISTORY 215K. The Crusades: A Cultural History. 5 Units.

This seminar follows the trajectory of the Crusades in Europe and the Middle East from the late eleventh to the fifteenth century. A particular emphasis will be placed on cultural developments such as art and architecture in both regions, the depiction of Crusaders in Muslim sources and of Muslims in Christian chronicles, and on the cultural assimilation of the Crusaders into the Holy Land as they settled there and became acquainted with local customs. The first crusade, started at the initiative of pope Urban II in 1095, brought Jerusalem under Christian rule for the first time since the early 7th century. This event was perceived as crucial in both Muslim and Christian sources, and the transformation of the architecture of the city soon began, with mosques being converted to churches, some of them thus returning to their initial function. Other buildings, such as the Dome of the Rock, built for Muslim worship in 689-691, were given new meaning. The direct contact between Christians and Muslims had an effect also on Europe, which now increasingly heard first-hand reports from the Holy Lands, and received objects such as glass, metalwork, and textiles produced in Syria or Egypt for its church treasuries. Salah al-Din Yusuf ibn b. Ayyub, better known in the West as Saladin, regained Jerusalem in 1187, an event that started further crusades and brought Richard Lionheart to the Holy Land. The fourth crusade in 1204 brought the sack of Constantinople, traumatic for the Byzantine Empire, yet influential for the artistic production of Western Europe as new relics, icons, and jewelry arrived. Venice received the famous bronze horses that still adorn the facade of the basilica of San Marco. In 1270, the French king Louis IX died in Tunisia during his second attempt at crusade. In 1292, the Mamluks of Egypt and Syria captured Acre, the last Crusader stronghold on the Levant, yet the notion of Crusade as religious conflict was to persist over centuries to be inserted into present-day political discourse.

HISTORY 219C. Science, Technology, and Modernity in the Soviet Union. 5 Units.

Science and technology were integral to the Soviet claim to offer a vision of modernity superior to that of Western capitalism. Science and technology would flourish; society would develop on a scientific basis. The results were more complex than the vision. Topics to be covered: science and Marxism-Leninism; the Lysenko affair; the R&D system; the role of the secret police; the atomic project; the space race; missile development; Andrei Sakharov; technology and innovation.

Same as: HISTORY 319C.

HISTORY 221A. Men, Women, and Power in Early Modern Russia, 1500-1800. 5 Units.

Social values, gender relations, and social change in an era of rapid change; challenges to established norms by new constructions of deviance (witchcraft, religious reform, and revolt) and new standards of civility; encounters with non-Russians and the construction of national consciousness. Social values as political ethos: patrimonial autocracy and the reality of female rule in the late 17th and 18th century.

HISTORY 221B. The Woman Question in Modern Russia. 5 Units.

Russian radicals believed that the status of women provided the measure of freedom in a society and argued for the extension of rights to women as a basic principle of social progress. The social status and cultural representations of Russian women from the mid-19th century to the present. The arguments and actions of those who fought for women's emancipation in the 19th century, theories and policies of the Bolsheviks, and the reality of women's lives under them. How the status of women today reflects on the measure of freedom in post-Communist Russia.

HISTORY 222. Honor, Law, and Modernity. 5 Units.

How Europe evolved from medieval to modern; focus is on standards for conflict resolution emphasizing insults to honor. How attitudes towards the self and society, and the state's relationship to individuals, changed from the 16th to 18th centuries in Europe and Russia. Traditional concepts of honor and patterns of settling disputes contrasted to early modern concepts of honor, private life, civility, and crime and punishment.

HISTORY 223. Art and Ideas in Imperial Russia. 4-5 Units.

Poetry, novels, symphonic music, theater, opera, painting, design, and architecture: what they reveal about the politics and culture of tsarist Russia.

Same as: HISTORY 323.

HISTORY 224A. The Soviet Civilization. 4-5 Units.

Socialist visions and practices of the organization of society and messianic politics; the Soviet understanding of mass violence, political and ethnic; and living space. Primary and secondary sources. Research paper or historiographical essay.

Same as: HISTORY 424A.

HISTORY 224C. Genocide and Humanitarian Intervention. 3 Units.

Open to medical students, graduate students, and undergraduate students. Traces the history of genocide in the 20th century and the question of humanitarian intervention to stop it, a topic that has been especially controversial since the end of the Cold War. The pre-1990s discussion begins with the Armenian genocide during the First World War and includes the Holocaust and Cambodia under the Khmer Rouge in the 1970s. Coverage of genocide and humanitarian intervention since the 1990s includes the wars in Bosnia, Rwanda, Kosovo, the Congo and Sudan. Same as: HISTORY 324C, PEDS 224.

HISTORY 226E. Famine in the Modern World. 3 Units.

Open to medical students, graduate students, and undergraduate students. Examines the major famines of modern history, the controversies surrounding them, and the reasons that famine persists in our increasingly globalized world. Focus is on the relative importance of natural, economic, and political factors as causes of famine in the modern world. Case studies include the Great Irish Famine of the 1840s; the Bengal famine of 1943-44; the Soviet famines of 1921-22 and 1932-33; China's Great Famine of 1959-61; the Ethiopian famines of the 1970s and 80s, and the Somalia famines of the 1990s and of 2011.

Same as: HISTORY 326E, PEDS 226.

HISTORY 228. Circles of Hell: Poland in World War II. 5 Units.

Looks at the experience and representation of Poland's wartime history from the Nazi-Soviet Pact (1939) to the aftermath of Yalta (1945). Examines Nazi and Soviet ideology and practice in Poland, as well as the ways Poles responded, resisted, and survived. Considers wartime relations among Polish citizens, particularly Poles and Jews. In this regard, interrogates the traditional self-characterization of Poles as innocent victims, looking at their relationship to the Holocaust, thus engaging in a passionate debate still raging in Polish society.

Same as: HISTORY 328, JEWISHST 282, JEWISHST 382.

HISTORY 230A. The Witness in Modern History: Memoir, Reportage, Image. 5 Units.

The rise of the witness as icon and debates about its reliability as a historical source. The power of eyewitness accounts to convict accused criminals, inspire indignation about war and genocide, and attract attention to humanitarian crises. Their notorious unreliability due to exaggeration and misapprehension. Sources include reportage, photography, and documentary film. Case studies include criminal cases, war, poverty, and natural disasters.

HISTORY 230C. Paris: Capital of the Modern World. 4-5 Units.

This course explores how Paris, between the eighteenth and twentieth centuries, became the political, cultural, and artistic capital of the modern world. It considers how the city has both shaped and been shaped by the tumultuous events of modern history- class conflict, industrialization, imperialism, war, and occupation. It will also explore why Paris became the major world destination for intellectuals, artists and writers. Sources will include films, paintings, architecture, novels, travel journals, and memoirs. Same as: FRENCH 140, FRENCH 340.

HISTORY 230D. Europe in the World, 1789-Present. 4-5 Units.

The European conquest of parts of Africa, Asia, and the South Pacific by European merchants, missionaries, armies, and administrators had significant, and often cataclysmic, effects on indigenous political alliances, cultural practices, and belief systems. But were the effects of expansion entirely one-sided? What impact did the experiences of colonialism have on European politics, culture, and Europe's relations with the rest of the world? Explores how interaction between Europe and the rest of the world redefined the political, racial, sexual, and religious boundaries of both Europe and its colonies and gave rise to the more "globalized" society we live in today.

Same as: HISTORY 330D.

HISTORY 230F. Self-Policing, Denunciation, and Surveillance in Modern Europe. 4-5 Units.

How individual actions impact state machineries of power. The motives, pressures, and consequences of everyday collaboration from the French Revolution to Nazi Germany and Soviet bloc police states; popular outrage over such practices in the aftermath of these regimes. The phenomenon of anticipatory compliance, as people tended to perceive less freedom of action than actually existed, and the reciprocal intensification of real and imagined restrictions. The malleability of personal values and interests as represented in diaries, memoirs, secondary sources, and film; variety of individual and national responses.

Same as: HISTORY 330F.

HISTORY 231G. European Reformations. 4-5 Units.

Readings in and discussion of theological and social aspects of sixteenth century reformations: Luther, Radical Reform, Calvin, and Council of Trent, missionary expansion, religious conflict, creative and artistic expressions. Texts include primary sources and secondary scholarly essays and monographs.

Same as: HISTORY 331G, RELIGST 236, RELIGST 336.

HISTORY 232A. Power, Art, and Knowledge in Renaissance Italy. 4-5 Units.

Provides a fundamental understanding of the cultural and political imagination of the Italian Renaissance, with particular emphasis on Florence between 1300 and 1600 CE. Topics include political and social upheavals, radical shifts in religious practice and devotion, the commercial revolution in trade and banking, the rediscovery of classical philosophy and style, and the flowering of the literary and visual arts.

Same as: HISTORY 332A.

HISTORY 232D. Rome: The City and the World, 1350-1750. 4-5 Units.

What lies beyond the ruins of an ancient city? The history of Rome from the Renaissance to the age of the grand tour. Topics include: the political, diplomatic, and religious history of the papacy; society and cultural life; the everyday world of Roman citizens; the relationship between the city and the surrounding countryside; the material transformation of Rome as a city; and its meaning for foreigners.

Same as: HISTORY 332D.

HISTORY 232F. The Scientific Revolution. 5 Units.

Was there a scientific revolution in the sixteenth and seventeenth centuries? How did modern science emerge as a distinctive kind of knowledge and practices? Explores changing ideas of nature and knowledge during the age of Copernicus, Galileo, Descartes, Bacon, and Newton. Examines the contexts in which western science emerged, issues of scientific methodology (e.g. induction, deduction, probability, and the rise of experimentation), the development of scientific institutions, and the emergence of the scientist as a historical figure. How historians have explained and debated the birth pangs of modern science.

HISTORY 233. Reformation, Political Culture, and the Origins of the English Civil War. 4-5 Units.

English political and religious culture from the end of the Wars of the Roses to the Civil War of the 1640s. Themes include the growth of the size and power of the state, Reformation, creation of a Protestant regime, transformation of the political culture of the ruling elite, emergence of Puritanism, and causes of the Civil War.

Same as: HISTORY 333.

HISTORY 233C. Two British Revolutions. 4-5 Units.

Current scholarship on Britain, 1640-1700, focusing on political and religious history. Topics include: causes and consequences of the English civil war and revolution; rise and fall of revolutionary Puritanism; the Restoration; popular politics in the late 17th century; changing contours of religious life; the crisis leading to the Glorious Revolution; and the new order that emerged after the deposing of James II.

Same as: HISTORY 333C.

HISTORY 233F. Political Thought in Early Modern Britain. 5 Units.

1500 to 1700. Theorists include Hobbes, Locke, Harrington, the Levellers, and lesser known writers and schools. Foundational ideas and problems underlying modern British and American political thought and life.

HISTORY 233G. Catholic Politics in Europe, 1789-1992. 5 Units.

What led to the creation of a specifically Catholic mass politics? How did these parties and movements interact with the Vatican and the wider Church? What accounts for political Catholicism's involvement in clerical-fascist states and its important role in shaping the EU? Sources focus on monographs. Research paper using primary sources.

HISTORY 233K. The Invention of the Modern Republic. 4-5 Units.

Examines the history of republican thinking in the Atlantic World from the Renaissance to the French Revolution.

Same as: HISTORY 333K.

HISTORY 236. The Ethics of Imperialism. 5 Units.

Can a commitment to liberty, progress, and universal rights be reconciled with imperialism? The ethical underpinnings of empire; how modern Europeans provided ethical and political justifications for colonial expansion. How European ideals were used to defend and justify inequality, violence, and genocide. The ethics of American-driven globalization and humanitarianism. Texts include primary sources, philosophical treatises, and historical studies.

HISTORY 239F. Empire and Information. 4-5 Units.

How do states see? How do they know what they know about their subjects, citizens, economies, and geographies? How does that knowledge shape society, politics, identity, freedom, and modernity? Focus is on the British imperial state activities in S. Asia and Britain: surveillance technologies and information-gathering systems, including mapping, statistics, cultural schemata, and intelligence systems, to render geographies and social bodies legible, visible, and governable.

Same as: HISTORY 339F.

HISTORY 239H. Colonialism and Empire in Modern Europe. 5 Units.

To better understand the history of modern Europe within a global context, explores the following questions: What impact did more than a century of colonialism have on the social lives, cultural attitudes, political loyalties, and intellectual world views of European women and men during the nineteenth century? What accounts for the resiliency of empire during a period of rapid global change that witnessed the rise of modern democracy, economic liberalism, ethnic nationalism, and international socialism?.

HISTORY 243G. Tobacco and Health in World History. 4-5 Units.

Same as: HISTORY 343G.

HISTORY 243J. Climate Change in the West: A History of the Future. 5 Units.

Global warming is changing the American West. But this region is no stranger to environmental change and human adaptation to harsh environments. How can history create more clear thinking about the current crisis and choices for the future? The long history of climate change in the West, as well as current warming, through scientific research, historical sources, environmental histories, and visions for the future, including plans for mitigation and adaptation, scientific predictions, and science fiction.

Same as: EARTHSYS 143J.

HISTORY 243S. Human Origins: History, Evidence, and Controversy. 4-5 Units.

Research seminar. Debates and controversies include: theories of human origins; interpretations of fossils, early art, and the oldest tools; the origin and fate of the Neanderthals; evolutionary themes in literature and film; visual rhetoric and cliché in anthropological dioramas and phyletic diagrams; the significance of hunting, gathering, and grandmothers; climatological theories and neocatastrophic geologies; molecular anthropology; the impact of racial theories on human origins discourse. Background in human evolution not required.

Same as: HISTORY 443A.

HISTORY 244C. The History of the Body in Science, Medicine, and Culture. 4-5 Units.

The human body as a natural and cultural object, historicized. The crosscultural history of the body from the 18th century to the present. Topics include: sciences of sex and race; medical discovery of particular body parts; human experimentation, foot binding, veiling, and other bodily coverings; thinness and obesity; notions of the body politic.

Same as: HISTORY 444C.

HISTORY 245E. Health and Society in Africa. 4-5 Units.

The history of disease, therapeutic and diagnostic systems, and the definition of health in precolonial, colonial, and postcolonial Africa. The social and political histories of specific epidemics, including sleeping sickness, influenza, TB, mental illness, and AIDS. The colonial contexts of epidemics and the social consequences of disease.

Same as: HISTORY 347E.

HISTORY 248S. African Societies and Colonial States, Part 1. 4-5 Units.

The encounter between African societies and European colonialism in the colony or region of their choice. Approaches to the colonial state; tours of primary source collections in the Hoover Institution and Green Libraries. Students present original research findings and may continue research for a second quarter.

HISTORY 250A. History of California Indians. 5 Units.

Demographic, political, and economic history of California Indians, 1700s-1950s. Processes and events leading to the destruction of California tribes, and their effects on the groups who survived. Geographic and cultural diversity. Spanish, Mexican, and Anglo-American periods. The mission system.

Same as: CSRE 117S.

HISTORY 251G. Topics in Constitutional History. 5 Units.

Ideas of rights in American history emphasizing the problem of defining constitutional rights, the free exercise of religion, freedom of expression, and the contemporary debate over rights talk and the idiom of human rights.

Same as: AMSTUD 251, POLISCI 222S.

HISTORY 252B. Diplomacy on the Ground: Case Studies in the Challenges of Representing Your Country. 5 Units.

The tragic death of Ambassador Chris Stevens has recently highlighted the dangers of diplomacy in the modern era. This class will look at how Americans in embassies have historically confronted questions such as authoritarian rule, human rights abuses, violent changes of government, and covert action. Case studies will include the Berlin embassy in the 1930s, Tehran in 1979, and George Kennan's experiences in Moscow, among others. Recommended for students contemplating careers in diplomatic service.

Same as: INTNLREL 174.

HISTORY 252K. America as a World Power: U.S. Foreign Relations, 1914 to Present. 5 Units.

This course will examine the modern history of American foreign relations, from 1914 to the present. Beginning with the fateful decision to intervene in the First World War, it will examine the major crises and choices that have defined the "American Century." Our study of U.S. foreign relations will consider such key factors as geopolitics, domestic politics, bureaucracy, psychology, race, and culture. Students will be expected to undertake their own substantial examination of a critical episode in the era studied.

Same as: INTNLREL 168.

HISTORY 253D. Approaches to American Legal History. 5 Units.

Legal history, once primarily devoted to exploring legal doctrines and key judicial opinions and thus of interest mainly to legal scholars and lawyers, now resembles historical writing more generally; the study of legal ideas and practices is increasingly integrated with social, intellectual, cultural, and political history. Recent writings in American legal history; how the field reflects developments in historical writing; and how the use of legal materials affects understanding of American history.

Same as: POLISCI 226U.

HISTORY 255. Martin Luther King, Jr.: The Social Gospel and the Struggle for Justice. 5 Units.

The religious and political thought of Martin Luther King, Jr., using the documentary resources of the King Institute at Stanford. His social gospel Christianity and prophetic message of radical social transformation. Readings include the forthcoming *The Papers of Martin Luther King, Jr., Volume VI: Advocate of the Social Gospel*.

HISTORY 255E. Education, Race, and Inequality in African American History, 1880-1990. 3-5 Units.

Seminar. The relationship among race, power, inequality, and education from the 1880s to the 1990s. How schools have constructed race, the politics of school desegregation, and ties between education and the late 20th-century urban crisis.

Same as: AFRICAAM 116, CSRE 216X, EDUC 216.

HISTORY 256. U.S.-China Relations: From the Opium War to Tiananmen. 4-5 Units.

The history of turbulent relations, military conflict, and cultural clashes between the U.S. and China, and the implications for the domestic lives of these increasingly interconnected countries. Diplomatic, political, social, cultural, and military themes from early contact to the recent past.

Same as: AMSTUD 256, HISTORY 356.

HISTORY 256G. Constructing Race and Religion in America. 4-5 Units.

This seminar focuses on the interrelationships between social constructions of race, and social interpretations of religion in America. How have assumptions about race shaped religious worldviews? How have religious beliefs shaped racial attitudes? How have ideas about religion and race contributed to notions of what it means to be "American"? We will look at primary and secondary sources, and at the historical development of ideas and practices over time.

Same as: CSRE 246, HISTORY 356G, RELIGST 246, RELIGST 346.

HISTORY 257C. LGBT/Queer Life in the United States. 4-5 Units.

An introductory course on LGBT social, cultural, and political history in the United States. This course explores how categories of sexuality have changed over time, with particular emphasis on the relationship among homosexuality, heterosexuality, and transgenderism. Students will analyze how the intersections of race, class, and sexuality influenced the constitution of these categories and the politics of social relations. Historical and literary sources will be used to examine changes in LGBT experiences and identities, primarily in the twentieth century.

Same as: FEMGEN 140D.

HISTORY 258. Topics in the History of Sexuality: Sexual Violence. 4-5 Units.

Recent historical interpretations of sexual violence, with particular attention to the intersections of gender and race in the construction of rape, from early settlement through the twentieth century. Topics include the legal prosecution of rape in Early America; the racialization of rape in the U.S.; lynching and anti-lynching in the U.S.; and feminist responses to sexual violence.

Same as: AMSTUD 258, CSRE 192E, FEMGEN 258, FEMGEN 358, HISTORY 358.

HISTORY 258D. School: What Is It Good For?. 3-4 Units.

Focus is on authors who establish claims that the purposes, functions, impacts, and social roles of schooling promote human capital, citizenship, social reproduction, values transmission, social mobility, class equality, racial equality, social stratification, disciplinary power, and the pursuit of individual interests. Historical and sociological approaches.

Same as: EDUC 207.

HISTORY 258E. History of School Reform: Origins, Policies, Outcomes, and Explanations. 3-5 Units.

Required for students in the POLS M.A. program; others welcome. Focus is on 20th-century U.S. Intended and unintended patterns in school change; the paradox of reform that schools are often reforming but never seem to change much; rhetorics of reform and factors that inhibit change. Case studies emphasize the American high school. This course is required for POLS students pursuing the PreK-12 concentration.

Same as: EDUC 220D.

HISTORY 259A. Poverty and Homelessness in America. 4-5 Units.

Service learning. Students participate in a two quarter internship at a local shelter for homeless individuals or families. Readings include historical, social science, and social commentary literature. Service Learning Course (certified by Haas Center).

HISTORY 260. California's Minority-Majority Cities. 4-5 Units.

Historical development and the social, cultural, and political issues that characterize large cities and suburbs where communities of color make up majority populations. Case studies include cities in Los Angeles, Santa Clara, and Monterey counties. Comparisons to minority-majority cities elsewhere in the U.S. Service Learning Course (certified by Haas Center).

Same as: CSRE 260.

HISTORY 261. Race, Gender, and Class in Jim Crow America. 5 Units.

How African American life and labor were redefined from 1890-1954. Topics include family life, work, leisure patterns, transnational relations, cultural expressions emphasizing literature and music, resistance and social activism. Primary sources including visual materials, literature, and film; historical interpretations of the period.

HISTORY 261G. Presidents and Foreign Policy in Modern History. 5 Units.

Nothing better illustrates the evolution of the modern presidency than the arena of foreign policy. This class will examine the changing role and choices of successive presidential administrations over the past century, examining such factors as geopolitics, domestic politics, the bureaucracy, ideology, psychology, and culture. Students will be encouraged to think historically about the institution of the presidency, while examining specific case studies, from the First World War to the conflicts of the 21st century. Same as: INTNLREL 173.

HISTORY 262A. Globalizing the American Revolution. 5 Units.

The causes and consequences of the American Revolution. Takes into account worldwide developments and their implications for North America. Topics include the crisis of the British Empire, efforts to create an American republic, global imperial competition, and comparisons with other Atlantic revolutions.

Same as: AMSTUD 262A.

HISTORY 262E. Atlantic America: Politics, Economics, and Empire. 5 Units.

The British North American colonies and their relationship to Africa, Europe, and Latin America in the seventeenth and eighteenth centuries. The course focuses on both the connections between Britain's colonies and the rest of the world as well as the ways in which they were similar and different to other European expansion efforts. Topics include ideas about colonization and empire, politics- both local and imperial, state building, economic development, and slavery.

HISTORY 264G. The Social History of Mental Illness in the United States. 5 Units.

(Formerly HPS 158.) Explores the variety of meanings of mental illness in the past, and the diagnostic, therapeutic, cultural and policy challenges historically posed by mental illness. Focus is on the U.S. but is not limited to it. How has mental illness been defined in history? How has the mind been medicalized and managed? Topics include the rise of institutions for the mentally ill, the growth of the psychiatric profession and the relationship between psychiatry, deviance and anti-psychiatry, and gender and psychiatric norms.

HISTORY 266C. The Cold War: An International History. 5 Units.

Though it ended twenty years ago, we still live in a world shaped by the Cold War. Beginning with its origins in the mid-1940s, this course will trace the evolution of the global struggle, until its culmination at the end of the 1980s. Students will be asked to ponder the fundamental nature of the Cold War, what kept it alive for nearly fifty years, how it ended, and its long term legacy for the world.

Same as: INTNLREL 154.

HISTORY 267. Religion in Twentieth Century American Life. 5 Units.

Why is the United States such a religious country? Over 90% of Americans profess a belief in God, and more than half identify religion as "very important" to their lives. In this seminar, we will examine the durability and power of religion in modern American history, from the emergence of Christian fundamentalism to the theology of the Cold war to the conflict with radical Islam. Other topics include: the Holocaust, Civil Rights and religion, gender and sexuality.

Same as: AMSTUD 267.

HISTORY 269. History of Capitalism. 5 Units.

What is capitalism? An economic and social system that maximizes both individual freedom and social good? An exploitative arrangement dependent on the subordination of labor to capital? A natural arrangement guided by a munificent invisible hand? Or a finely tuned mechanism requiring state support? We will study the history of debates about markets and social organization, taking capitalism as both an economic system and a culture. Focus on American and British writers including Keynes, Lippmann, Hayek, Rand, Schumpeter, and Friedman.

Same as: HISTORY 369.

HISTORY 272A. Spanish Nationalist Discourses from Franco to Zapatero: What does 'plural Spain' mean?. 3-5 Units.

Spanish nationalism and 'patriotic affirmation' discourses existing in contemporary Spain. Since the end of Francoism, Spanish nationalism has existed in a de-articulated and diffuse way, rather as a reaction against the challenge of stateless nationalisms than as a substantive doctrine. However, since the mid-1980s there has been a recovery of Spanish nationalist discourse, often labeled as 'Constitutional patriotism', whose main point is the insistence on History as the founding basis for the legitimation of the present Spanish polity, as well as the vindication of the 1978 Constitution as the end-point of decentralization.

HISTORY 273. The European Expansion. 4-5 Units.

The relationship between European monarchies and their colonial domains from the 16th-18th centuries. Reasons for expansion, methods, and results. Case studies include the Spanish, Portuguese, Dutch, French, and English domains in Africa, Asia, and the Americas. Readings include primary and secondary sources.

Same as: HISTORY 373A.

HISTORY 277D. U.S. Intervention and Regime Change in 20th Century Latin America. 5 Units.

As the drumbeats of war in the U.S. grow louder for a forcible regime change in Iran due to its alleged nuclear ambitions, many politicians, pundits and journalists have already consigned the disastrous war for regime change in neighboring Iraq in 2003 to seemingly ancient and irrelevant history. This course does the opposite and takes seriously the proverbial saying "if history is any guide..." by examining U.S. interventions in Latin America, a region where so-called preventive regime change (covert as well as overt) has been operative policy for well over a century. Investigates the rationales, motivations and strategies behind U.S.-backed or engineered regime changes in Mexico in the 1910s, Guatemala in the 1950s, Chile in the 1970s, and Nicaragua in the 1980s.

HISTORY 279. Latin American Development: Economy and Society, 1800-2000. 4-5 Units.

The newly independent nations of Latin America began the 19th century with economies roughly equal to, or even ahead of, the U.S. and Canada. What explains the economic gap that developed since 1900? Why are some Latin American nations rich and others poor? Marxist, dependency, neoclassical, and institutionalist interpretive frameworks. The effects of globalization on Latin American economic growth, autonomy, and potential for social justice.

Same as: HISTORY 379.

HISTORY 281A. Twentieth-Century Iraq: A Political and Social History. 5 Units.

The colonial experience, creation of the modern Iraqi state, and transition to military dictatorship. Political movements, religious and tribal elements, and their relation to the state. Geopolitical context.

HISTORY 281B. Modern Egypt. 4-5 Units.

From the mid-nineteenth century to the present. Topics: European imperialism, the political economy of cotton, rise of nationalism, gender and the nation, minorities, the coup of 1952, positive neutralism and the Cold War, and the neo-liberal reconstruction of Egypt.

HISTORY 282. The United States and the Middle East since 1945. 4-5 Units.

Since the end of WW II, U.S. interests in the Middle East have traditionally been defined as access to oil at a reasonable price, trade and markets, containing the influence of the Soviet Union, and the security of Israel. Is this the full range of U.S. interests? How has the pursuit of these interests changed over time? What forces have shaped U.S. policy? What is the impact of U.S. policy on the region itself?

Same as: HISTORY 382.

HISTORY 282F. History of Modern Turkey. 4-5 Units.

Social, political and cultural history of Modern Turkey from the last decades of the Ottoman Empire in the late 19th century until Today. Themes include transformation from a multi-national empire to a national republic; Islam, secularism and radical modernism; military, bureaucracy and democratic experience; economic development, underdevelopment and class; Istanbul, Ankara and provincial Turkey; socialism, conservatism(s), and Kurdish challenge; Turkey in Europe, the Middle East and Central Asia; gender, sexuality and family; popular culture, soccer, and film industry; Post-Modernism, Neo-Ottomanism, and the New-Turkey; The class also include reading works of Turkish literature and watching movies by Turkish directors.

HISTORY 283. The New Global Economy, Oil, and Islamic Movements in the Middle East. 4-5 Units.

The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market combined with case studies of Egypt, Iraq, and Palestine.

Same as: HISTORY 383.

HISTORY 284. The Ottoman Empire, 1300-1923. 4-5 Units.

This is a course on the Middle East and Southeast Europe under the Ottoman Empire. Topics include how the Ottoman enterprise was constructed in the frontier region of the Christian and Islamic worlds; the conquests and consolidation of the imperial institutions; how diverse peoples, cultures, and regions were integrated into the imperial system; the Ottoman Empire and the broader world; merchants and their markets; elite, urban, rural and nomadic lives; women, family sexuality; art, literature, and architecture; the transformation of the empire on the eve of modernity; the rise of nationalism and the Ottoman response; Ottoman disintegration and the making of the Middle East and Southeast Europe.

Same as: HISTORY 384.

HISTORY 284F. Islamic Eurasia: Empires, Nomads and Merchants (1300-1850). 4-5 Units.

Focuses on political regimes, economic interactions and sociocultural formations in the early modern Balkans and Middle East to Central and South Asia. Topics include complex political systems of the Ottoman, Safavid and Mughal empires; experiences of various Muslim, Christian, Jewish and Hindu, as well as urban, rural and nomadic communities; consolidation of transregional commerce and cultural exchange; incorporation of the Islamic world in the global economy; transimperial networks of the Muslim and Non-Muslim merchants, scholars and sufis.

Same as: HISTORY 384F.

HISTORY 287C. Zionism and its Critics. 4-5 Units.

Zionism from its genesis in the 1880s up until the establishment of the state of Israel in May, 1948, exploring the historical, ideological and political dimensions of Zionism. Topics include: the emergence of Zionist ideology in connection to and as a response to challenges of modernity; emancipation; Haskalah (Jewish enlightenment); other national and ideological movements of the period; the ideological crystallization of the movement; and the immigration waves to Palestine.

HISTORY 288. Palestine and the Arab-Israeli Conflict. 4-5 Units.

1882 to the present. Comparison of representative expressions of competing historical interpretations. U.S. policy towards the conflict since 1948.

(Beinin)

Same as: JEWISHST 288, JEWISHST 388.

HISTORY 290E. Movies and Empire in East Asia. 5 Units.

Cinema was invented in the 1890s and simultaneously introduced to East Asia. This colloquium explores how this new medium changed the cultural and social landscape of East Asia and how the visual power of films also affected the culture politics of empires in the region. The themes include cinema and urban spaces, cultural imperialism, film images and gender discourse, colonial modernity, Americanism and Asianism, the visual and the textual, wartime propaganda, and Hollywood movies and cold war empires.

Same as: HISTORY 390E.

HISTORY 291A. Archaeology and Modernity in Asia: The Excavation of Ancient Civilizations in Modern Times. 4-5 Units.

The interplay in Asia between antiquity and modernity, civilization and nation state, and national versus colonial science. The recent excavation of artifacts and places associated with Asian civilization such as the terracotta warriors in China and Angkor Wat in Cambodia. How Asian states have grappled with modernity and colonialism as they simultaneously dug up their ancient pasts.

Same as: HISTORY 391A.

HISTORY 292. The Two Koreas. 4-5 Units.

Examines major themes and scholarly works to understand the origins, outbreak, and consequences of the Korean War. One focus will be the division of Korea into ROK and DPRK and their subsequent developments. Themes include World War II in East Asia; Korean communist movements during Japanese colonial rule; the Cold War in East Asia; the roles of the US, China, and USSR in the Korean War; the ideas of key North and South Korean leaders, and the consolidation of the two Koreas after the Korean War.

Same as: HISTORY 392.

HISTORY 292D. Japan in Asia, Asia in Japan. 4-5 Units.

How Japan and Asia mutually shaped each other in the late 19th and 20th centuries. Focus is on Japanese imperialism in Asia and its postwar legacies. Topics include: pan-Asianism and orientalism; colonial modernization in Korea and Taiwan; collaboration and resistance; popular imperialism in Manchuria; total war and empire; comfort women and the politics of apology; the issue of resident Koreans; and economic and cultural integration of postwar Asia.

Same as: HISTORY 392D.

HISTORY 292F. Traditional Korea: History and Culture. 4-5 Units.

Korea before 1800 and how iconic features of Korean tradition were created and reinvented. Themes include Korea's ancient kingdoms, the aristocracy and military in the Koryo dynasty, the print culture and Korean alphabet, ideologies and religions, the social status system and the life of women, the kingship and court culture of the Choson dynasty, and Korea's place in premodern East Asia. The modern and contemporary debates.

Same as: HISTORY 392F.

HISTORY 296. Communism and Revolution in China. 5 Units.

From the formation of the Chinese Communist Party (CCP) in 1921 through the 1949 founding of the People's Republic of China (PRC). Topics include: early theories of socialism in China; the relationship between Chinese communism and the Communist International and Soviet Union; agrarian reformulation of communism by Mao; the communist-nationalist civil war; the Communist Revolution of 1949; and the consolidation of communist power in the PRC.

HISTORY 296F. Short Stories from India and Pakistan. 3-5 Units.

The course introduces the main periods and trends of 20th- and 21st-century Urdu short story: Progressive Writers' Movement, Partition literature, Modernism, contemporary fiction. Classes include close reading and discussion of selected short stories, with special focus on prominent themes such as social problems; personal loss, exile, displacement, alienation, and questions of identity; gender and sexuality; history, memory, and nostalgia; myth and imagination. Readings include: Premchand, Manto, Ismat Chughtai, Qurratulain Hyder, Intizar Husain, Naiyer Masud. All readings are in English.

Same as: ICA 296F.

HISTORY 297. The Cold War and East Asia. 5 Units.

Explores how East Asia negotiated superpower rivalry and global ideological competition during the Cold War. Considers the ways in which China, Japan, and Korea were more than battlegrounds for US-Soviet contestation and played active roles in defining the nature and dynamics of the conflict. Re-examines conventional narratives and periodizations against alternative conceptual models and interpretive frameworks highlighting the constructed nature of the struggle as well as the role of historical and cultural factors in shaping the East Asian experience.

Same as: HISTORY 397.

HISTORY 299A. Senior Research I. 1-5 Unit.**HISTORY 299B. Senior Research II. 1-5 Unit.****HISTORY 299C. Senior Research III. 1-5 Unit.****HISTORY 299D. Tooling Up for Digital Humanities. 1 Unit.**

What are the digital humanities? The twenty-first century presents new opportunities in the humanities, such as unprecedented access to millions upon millions of digitized sources along with powerful technological tools to study those sources. Yet it also raises new challenges, such as the responsible and effective use of technology, and defining the nature of digital scholarship and communication. This workshop offers an introduction to fundamental concepts, methods, and issues within the growing field of digital humanities, including managing your online identity, digitizing sources, managing databases, text mining, spatial analysis, visualization, and pedagogy.

HISTORY 299H. Junior Honors Colloquium. 1 Unit.

Required of junior History majors planning to write a History honors thesis during senior year. Meets four times during the quarter.

HISTORY 299M. Undergraduate Directed Research: Martin Luther King, Jr., Research and Education Institute. 1-4 Unit.

May be repeated for credit.

HISTORY 299S. Undergraduate Directed Research and Writing. 1-5 Unit.

May be repeated for credit.

HISTORY 299X. Preparing for International Field Work: Public Service or Research. 1 Unit.

Problems involved in research abroad: ethical issues; safety; security and conduct; human subjects protocol. Methodologies of research: interviewing, networking, case studies, participant observation, large surveys.

Same as: HISTORY 399A.

HISTORY 301. Introduction to Public History in the U.S., 19th Century to the Present. 4-5 Units.

Gateway course for the History and Public Service interdisciplinary track. Topics include the production, presentation, and practice of public history through narratives, exhibits, web sites, and events in museums, historical sites, parks, and public service settings in nonprofit organizations, government agencies, and educational institutions. Service Learning Course (certified by Haas Center).

Same as: AFRICAAM 102, CSRE 201, HISTORY 201.

HISTORY 301A. The Global Drug Wars. 4-5 Units.

Explores the global story of the struggle over drugs from the nineteenth century to the present. Topics include the history of the opium wars in China, controversies over wine and tobacco in Iran, narco-trafficking and civil war in Lebanon, the Afghan 'narco-state,' Andean cocaine as a global commodity, the politics of U.S.- Mexico drug trafficking, incarceration, drugs, and race in the U.S., and the globalization of the American 'war on drugs.'

Same as: HISTORY 201A.

HISTORY 302A. Questions in Modern World History: Provincializing Europe?. 4-5 Units.

Though this class will consider themes addressed in most modern history classes (imperialism, liberalism, capitalism, the construction of the modern nation-state, the roots of the 19th and 20th century wars, questions of governance, various forms of resistance, colonizer and colonized identities, and the process of globalization, etc.), we will take a world-historical approach, considering these topics from a non-western viewpoint, outside of a nationalist narrative, while taking a multi-perspectival stance.

Same as: HISTORY 202A.

HISTORY 302B. Coffee, Sugar, and Chocolate: Commodities and Consumption in World History, 1200-1800. 4 Units.

Many of the basic commodities that we consider staples of everyday life became part of an increasingly interconnected world of trade, goods, and consumption between 1200 and 1800. This seminar offers an introduction to the material culture of the late medieval and early modern world, with an emphasis on the role of European trade and empires in these developments. We will examine recent work on the circulation, use, and consumption of things, starting with the age of the medieval merchant, and followed by the era of the Columbian exchange in the Americas that was also the world of the Renaissance collector, the Ottoman patron, and the Ming connoisseur. This seminar will explore the material horizons of an increasingly interconnected world, with the rise of the Dutch East India Company and other trading societies, and the emergence of the Atlantic economy. It concludes by exploring classic debates about the "birth" of consumer society in the eighteenth century. How did the meaning of things and people's relationships to them change over these centuries? What can we learn about the past by studying things?

Same as: HISTORY 202B.

HISTORY 302E. The Great War. 4-5 Units.

The First World War provided a prototype for a new, horrific kind of war. It catalyzed the emergence of modern means of warfare and the social mechanisms necessary to sustain the industrialized war machine. Killing millions, it became the blueprint for the total war that succeeded it. It also brought about new social and political orders, transforming the societies which it mobilized at unprecedented levels. This course will examine the military, political, economic, social and cultural aspects of the conflict. We will discuss the origins and outbreak of the war, the land, sea and air campaigns, the war's economic and social consequences, the home fronts, the war's final stages in eastern and western Europe as well as non-European fronts, and finally, the war's impact on the international system and on its belligerents' and participants' perceptions of the new reality it had created.

HISTORY 302G. Peoples, Armies and Governments of the Second World War. 4-5 Units.

Clausewitz conceptualized war as always consisting of a trinity of passion, chance, and reason, mirrored, respectively, in the people, army and government. Following Clausewitz, this course examines the peoples, armies, and governments that shaped World War II. Analyzes the ideological, political, diplomatic and economic motivations and constraints of the belligerents and their resulting strategies, military planning and fighting. Explores the new realities of everyday life on the home fronts and the experiences of non-combatants during the war, the final destruction of National Socialist Germany and Imperial Japan, and the emerging conflict between the victors. How the peoples, armies and governments involved perceived their possibilities and choices as a means to understand the origins, events, dynamics and implications of the greatest war in history. Same as: HISTORY 202G.

HISTORY 303. Premodern Economic Cultures. 5 Units.

A comparative survey of premodern economies and the value systems that supported them. Students will read and discuss theories of economic culture as well as historical monographs about specific regions. Discussions will focus on the comparison and conceptualization of premodern economic cultures. Students will be required to research the literature on a particular premodern society of their choosing, compile an annotated bibliography of that literature, and compose an essay analyzing the problems and possibilities presented therein. Same as: HISTORY 203.

HISTORY 303B. Secret Societies in Western History. 5 Units.

What drives human beings to join secret societies? What is the knowledge so jealously guarded by these groups? Are they just for men or are there female secret societies? Is there really a Judeo-Masonic conspiracy to dominate the world? These are some of the questions we will answer in this course. Surveying ancient civilizations to contemporary society, we will discuss secret societies from anthropological and sociological approaches, but especially from a historical perspective, by reviewing their political, religious and cultural impacts in Western History as well as the myths surrounding them. Same as: HISTORY 203B.

HISTORY 303C. History of Ignorance. 3 Units.

Scholars pay a lot of attention to knowledge - how it arises and impacts society - but much less attention has been given to ignorance, even though its impacts are equally profound. Here we explore the political history of ignorance, through case studies including: corporate denials of harms from particular products (tobacco, asbestos), climate change denialism, and creationist rejections of Darwinian evolution. Students will be expected to produce a research paper tracing the origins and impact of a particular form of ignorance.

HISTORY 303F. Words and Things in the History of Classical Scholarship. 4-5 Units.

How have scholars used ancient texts and objects since the revival of the classical tradition? How did antiquarians study and depict objects and relate them to texts and reconstructions of the past? What changed and what stayed the same as humanist scholarship gave way to professional archaeologists, historians, and philologists? Focus is on key works in the history of classics, such as Erasmus and Winckelmann, in their scholarly, cultural, and political contexts, and recent critical trends in intellectual history and the history of disciplines. Same as: CLASSGEN 241.

HISTORY 304. Approaches to History. 4-5 Units.

Required of first-year History Ph.D. students.

HISTORY 304C. How Wars End: War and Peace in the 20th Century. 5 Units.

Based on an analysis of primary documents, the course will examine how conflicts end: cases include the two world wars, Korea, Vietnam, the Cold War, the Bosnian conflict, and the Irish Civil War. Same as: HISTORY 204C.

HISTORY 304G. War and Society. 5 Units.

How Western societies and cultures have responded to modern warfare. The relationship between its destructive capacity and effects on those who produce, are subject to, and must come to terms with its aftermath. Literary representations of WW I; destructive psychological effects of modern warfare including those who take pleasure in killing; changes in relations between the genders; consequences of genocidal ideology and racial prejudice; the theory of just war and its practical implementation; and how wars are commemorated. Same as: HISTORY 204G.

HISTORY 305. Graduate Workshop in Teaching. 1 Unit.

Required of first-year History Ph.D. students. Perspectives on pedagogy for historians: course design, lecturing, leading discussion, evaluation of student learning, use of technology in teaching lectures and seminars. Addressing today's classroom: sexual harassment issues, integrating diversity, designing syllabi to include students with disabilities.

HISTORY 305A. The History of Information. 4-5 Units.

Examines the history of information from multiple perspectives such as the changing conceptions of facticity and evidence cross-culturally as well as a range of information technologies, from moveable type printing and telegraphy to text messaging and Twitter. Other topics include the ways in which information is shaped by the languages in which it is recorded, stored, and transmitted, and also the ways in which information infrastructures influence what is forgotten and lost.

HISTORY 305G. Creative Political Thinking: Three Cases. 4-5 Units.

How can we account for creativity and innovation in political thinking? Are these qualities simply a product of political expediency and rhetorical urgency, or do they also depend on qualities of mind and historical contingencies that have to be studied individually? This class will explore these questions with three noteworthy cases: Niccolò Machiavelli, John Locke, and James Madison. Extensive reading in both primary writings and secondary sources.

Same as: POLISCI 235J, POLISCI 335J.

HISTORY 306A. City, Society, Literature- 19th Century Histories. 4 Units.

This course examines the rise of modern cities through an analysis of urban society and the imaginative literature of the 1900s. Same as: HISTORY 206A.

HISTORY 306D. World History: Graduate Colloquium. 4 Units.

How do historians engage the global scale in the classroom as well as in research? The world history canon including Toynbee, McNeill, Braudel, Wolf, and Wallerstein; contrasting approaches, recent research, and resources for teaching. Recommended: concurrent enrollment in HISTORY 306K.

HISTORY 306E. International History and International Relations Theory. 5 Units.

The relationship between history and political science as disciplines. Sources include studies by historians and political scientists on topics such as the origins of WW I, the role of nuclear weapons in international politics, the end of the Cold War, nongovernmental organizations in international relations, and change and continuity in the international system. Same as: POLISCI 216E, POLISCI 316.

HISTORY 306F. Identities and Identification in the Atlantic World. 4-5 Units.

How identities and processes of identification changed in Europe, Africa, and the Americas during the early modern period and as a result of the engagement of the inhabitants of these three continents in the Atlantic world.

HISTORY 306G. Colonial Law. 4-5 Units.

Examines the relationship between law and colonialism in Latin America, Africa and Asia during both the early modern and the modern period. By reading some of the seminal works that have been published on this issue, we will seek to understand how law both facilitated and limited colonialism and how colonialism, in turn, had modified the legal systems that had existed previously. Attention will also be given to law as an acculturating agent and to the legal arena as a sphere for conflict resolution, negotiation, and identity formation.

HISTORY 306K. World History Pedagogy Workshop. 1 Unit.

Students draft a syllabus and create a curriculum module for use in a world history lecture course. Corequisite: HISTORY 306D, recommended.

HISTORY 307A. Legal History Workshop. 4-5 Units.

(Same as LAW 372.) Faculty and students from the Law school and the History department discuss research in the field of legal history. Guest speakers. Secondary literature relevant to the speaker's research. Undergraduates require consent of instructors.

HISTORY 307C. The Global Early Modern. 4-5 Units.

In what sense can we speak of "globalization" before modernity? What are the characteristics and origins of the economic system we know as "capitalism"? When and why did European economies begin to diverge from those of other Eurasian societies? With these big questions in mind, the primary focus will be on the history of Europe and European empires, but substantial readings deal with other parts of the world, particularly China and the Indian Ocean.

Same as: HISTORY 207C.

HISTORY 307E. Totalitarianism. 4-5 Units.

Modern revolutionary and totalitarian politics. Sources include monographs on the medieval, Reformation, French Revolutionary, and Great War eras. Topics: the essence of modern ideology, the concept of the body national, state terror, charismatic leadership, gender assignments, private and public spheres, and identities.

Same as: HISTORY 204E.

HISTORY 307F. Heavenly Bodies: Saints' Bodies, Relics and Miracles in Late Antique and Medieval Europe. 4-5 Units.

This seminar will use both written and visual sources to explore how the body mattered in the creation of saintly tropes and cults in late antique and medieval Europe. We will begin by reading the diary of an early Christian martyr to consider how a good death set the terms for an ideal Christian life. We will then explore a number of medieval vitae or saints' lives to uncover narrative devices used to describe an exemplary life and consider the role self-denial, bodily and otherwise, played in constructing those portraits. We will conclude by considering the power medieval people ascribed to the remains of saints' bodies and look at the cult of relics as well as miracle accounts describing the bodily healings and transformations ascribed to saints.

Same as: HISTORY 207F, RELIGST 237, RELIGST 337.

HISTORY 308. Biography and History. 4-5 Units.

The relationship between biographical and historical writing, primarily in Europe and America. Problems of methodology, evidence, dispassion, and empathy. Texts: biographies, critical literature on biographical work, and novels (A. S. Byatt's *Possession*, Bernard Malamud's *Dubin's Lives*) that illuminate the intellectual underpinnings of biographical labor.

Same as: HISTORY 207.

HISTORY 308A. Science and Law in History. 4-5 Units.

How the intertwined modern fields of science and law, since the early modern period, together developed central notions of fact, evidence, experiment, demonstration, objectivity, and proof.

Same as: HISTORY 208A.

HISTORY 308B. Women Activists' Response to War. 4-5 Units.

Theoretical issues, historical origins, changing forms of women's activism in response to war throughout the 20th century, and contemporary cases, such as the Russian Committee of Soldiers Mothers, Bosnian Mothers of Srebrenica, Serbian Women in Black, and the American Cindy Sheehan. Focus is on the U.S. and Eastern Europe, with attention to Israel, England, and Argentina.

Same as: HISTORY 208B.

HISTORY 308C. History of Death and Dying. 4 Units.

The changing realities of, attitudes towards and ways of coping with death drawing on examples from Europe, Africa, the Caribbean, Latin America and the United States. The role of death in shaping the modern world via the global slave trades, imperial conquest, pandemics, wars and genocides. Changing rituals relating to death, intellectual and philosophical debates about the personal and social meanings of death, and the political and personal consequences of particular ways and patterns of dying.

Same as: HISTORY 208C.

HISTORY 308D. Pre-Modern Warfare. 3-5 Units.

This course examines the evolving nature of warfare and its impact on society across the Eurasian continent up to the Gunpowder Revolution and rise of the nation-state. Beginning with an attempt to define war, it will trace the evolution of military technology from the Stone Age through the rise of the chariot, the sword, and the mounted rider, and examine how changing methods of conducting warfare were inextricably linked to changes in the social order and political structures.

HISTORY 309A. Postcolonialism and Universalism. 4-5 Units.

Key texts and motifs from postcolonial theory: empire, class, exile, suffering, textuality, archive in juxtaposition to 20th-century philosophical questions about universal history and the relevance of humanist inquiry.

Same as: HISTORY 209D.

HISTORY 309B. The Idea of Politics. 4-5 Units.

Can we live without politics? Is politics indispensable for humanity and vice-versa? The idea of politics is that it must transform, through human action, conditions of collective life. But the 20th century produced colliding beliefs about what that life might be and what the human being itself might look like. Explore whether, after the century, we might still think of politics as an ethical idea and the "human" as foundational political category.

Keywords: Civility, Cruelty, Friendship, Empire, Democracy, Humanism, Animals.

Same as: HISTORY 209B.

HISTORY 309C. Liberalism and Violence. 5 Units.

Does Liberalism have a theory of violence? What does modern political thought, in privileging humanity and rights, share with "terrorists" and "rogue states?" How is liberalism transformed by the use of religion and death for political ends? We read key thinkers of modern life- Adorno, Arendt, Agamben, Benjamin, Derrida, Fanon, Foucault, Gandhi, Heidegger, and Schmitt- to interrogate the relationship between religion, sacrifice, and democracy. At the center are connections between war and modern life, and between violence and non-violence.

HISTORY 309E. History Meets Geography. 4-5 Units.

Focus is on developing competence in GIS computer applications and applying it to historical problems. Previous experience with GIS not required. Recommended: complete the GIS tutorial in Branner Library before the course starts.

HISTORY 309F. Historical Geography Colloquium: Maps in the Early Modern World. 4-5 Units.

The significance of cartographic enterprise across the early modern world. Political, economic, and epistemological imperatives that drove the proliferation of nautical charts, domain surveys, city plans, atlases, and globes; the types of work such artifacts performed for their patrons, viewers, and subjects. Contributions of indigenous knowledge to imperial maps; the career of the map in commerce, surveillance, diplomacy, conquest, and indoctrination. Sources include recent research from Asia, Europe, and the Americas.

HISTORY 309G. Paleography of Medieval and Early Modern Manuscripts. 3-5 Units.

Introductory course in the history of writing and of the book, from the late antique period until the advent of printing. Opportunity to learn to read and interpret medieval manuscripts through hands-on examination of original materials in Special Collections of Stanford Libraries as well as through digital images. Offers critical training in the reading of manuscripts for students from departments as diverse as Classics, History, Philosophy, Religious Studies, English, and the Division of Languages Cultures and Literatures.

Same as: CLASSGEN 311, DLCL 209, ENGLISH 209, RELIGST 204.

HISTORY 311A. Family, Gender, and Production in Ancient Rome. 4-5 Units.

Seminar. The household as the basic unit of production in Rome in the context of family relations and ideologies of gender. Methodological challenges of doing social and economic history from literary, epigraphic, and literary texts. Demography of family and kinship in ancient Rome. Ideologies of gender and family roles and their influence on economic production. Economic theories of the family and human capital.

HISTORY 311G. Big Ancient History. 4-5 Units.

How the shift away from thinking about European history in terms of a western civilization model toward embedding it in stories of how global history affects research and teaching on ancient Greece and Rome. Conventional, evolutionary, and global history narratives of the past 5,000 to 15,000 years and some new ideas about how Greco-Roman history might fit into different storylines.

HISTORY 319B. Secularity. 4-5 Units.

Classic theories of secularity. Is a secular world possible? How does, historically seen, the notion of the secular emerge, impose itself, and get challenged? Readings include Max Weber, E. Durkheim, R.A. Markus, Carl Schmitt, and Hans Blumenberg, and studies bearing on the Middle Ages, English monastic secularization, the French Revolution, and 20th-century political religions.

HISTORY 319C. Science, Technology, and Modernity in the Soviet Union. 5 Units.

Science and technology were integral to the Soviet claim to offer a vision of modernity superior to that of Western capitalism. Science and technology would flourish; society would develop on a scientific basis. The results were more complex than the vision. Topics to be covered: science and Marxism-Leninism; the Lysenko affair; the R&D system; the role of the secret police; the atomic project; the space race; missile development; Andrei Sakharov; technology and innovation.

Same as: HISTORY 219C.

HISTORY 320G. Demons, Witches, and Priests: Religion and Popular Culture in Russia. 4-5 Units.

19th and early 20th centuries. Peasants, parish priests, witches, possessed persons, cults and sects, old believers, saints, and women's religious communities. Nominally Christian, and members of the Orthodox Church, Russians embraced beliefs and customs that combined teaching from Church and folk traditions.

HISTORY 321A. Theories of State and Society: Russian Historiography 19th-20th Century. 4-5 Units.

Main trends of Russian intellectual history as seen through major historians' treatment of Muscovy: Romanticism, Slavophilism, Hegelianism, Populism, Social Democracy, New Idealism, and Marxism-Leninism.

HISTORY 321B. Imperial Russian Historiography. 4-5 Units.

HISTORY 323. Art and Ideas in Imperial Russia. 4-5 Units.
Poetry, novels, symphonic music, theater, opera, painting, design, and architecture: what they reveal about the politics and culture of tsarist Russia.

Same as: HISTORY 223.

HISTORY 323B. Research Methodologies in Early Modern Russian History. 4-5 Units.**HISTORY 324C. Genocide and Humanitarian Intervention. 3 Units.**

Open to medical students, graduate students, and undergraduate students. Traces the history of genocide in the 20th century and the question of humanitarian intervention to stop it, a topic that has been especially controversial since the end of the Cold War. The pre-1990s discussion begins with the Armenian genocide during the First World War and includes the Holocaust and Cambodia under the Khmer Rouge in the 1970s. Coverage of genocide and humanitarian intervention since the 1990s includes the wars in Bosnia, Rwanda, Kosovo, the Congo and Sudan. Same as: HISTORY 224C, PEDS 224.

HISTORY 324F. The Caucasus and the Muslim World. 4-5 Units.

The linkages connecting the societies of the Caucasus to Muslim communities in Iran, Russia, the Ottoman Empire and Turkey, S. Asia, and the Middle East.

HISTORY 326A. Modern Europe: Society and Politics. 5 Units.

The goal of this course is to introduce graduate students to major works of history and literature in the field of nineteenth and early-twentieth century history. A colloquia will be given in tandem with a research seminar.

HISTORY 326C. Graduate Colloquium on Balkan History. 4-5 Units.

Designed for History Ph.D. students to develop competence in the history and historiography of the modern Balkans, from the French Revolution to the present. Areas of study include the influence of empires on the region, the rise of nationalism and nation states, the dilemmas of independence, the emergence and decline of communism in the region, and the recurrence of war and ethnic conflict.

HISTORY 326E. Famine in the Modern World. 3 Units.

Open to medical students, graduate students, and undergraduate students. Examines the major famines of modern history, the controversies surrounding them, and the reasons that famine persists in our increasingly globalized world. Focus is on the relative importance of natural, economic, and political factors as causes of famine in the modern world. Case studies include the Great Irish Famine of the 1840s; the Bengal famine of 1943-44; the Soviet famines of 1921-22 and 1932-33; China's Great Famine of 1959-61; the Ethiopian famines of the 1970s and 80s, and the Somalia famines of the 1990s and of 2011.

Same as: HISTORY 226E, PEDS 226.

HISTORY 327. East European Women and War in the 20th Century. 4-5 Units.

Thematic chronological approach through conflicts in the region: the Balkan Wars, WW I, WW II, and the recent wars in the former Yugoslavia. The way women in E. Europe have been involved in and affected by these wars compared to women in W. Europe in the two world wars. Women's involvement in war as members of the military services, the backbone of underground movements, workers in war industries, mothers of soldiers, subjects and supporters of war aims and propaganda, activists in peace movements, and objects of wartime destruction, dislocation, and sexual violation.

HISTORY 328. Circles of Hell: Poland in World War II. 5 Units.

Looks at the experience and representation of Poland's wartime history from the Nazi-Soviet Pact (1939) to the aftermath of Yalta (1945). Examines Nazi and Soviet ideology and practice in Poland, as well as the ways Poles responded, resisted, and survived. Considers wartime relations among Polish citizens, particularly Poles and Jews. In this regard, interrogates the traditional self-characterization of Poles as innocent victims, looking at their relationship to the Holocaust, thus engaging in a passionate debate still raging in Polish society.

Same as: HISTORY 228, JEWISHST 282, JEWISHST 382.

HISTORY 330. Core Colloquium on Early Modern Europe: Ancien Regime. 4-5 Units.

Topics in the social, political, and religious history of Western Europe, 1550-1789, with an emphasis on France. May be repeated for credit.

HISTORY 330D. Europe in the World, 1789-Present. 4-5 Units.

The European conquest of parts of Africa, Asia, and the South Pacific by European merchants, missionaries, armies, and administrators had significant, and often cataclysmic, effects on indigenous political alliances, cultural practices, and belief systems. But were the effects of expansion entirely one-sided? What impact did the experiences of colonialism have on European politics, culture, and Europe's relations with the rest of the world? Explores how interaction between Europe and the rest of the world redefined the political, racial, sexual, and religious boundaries of both Europe and its colonies and gave rise to the more "globalized" society we live in today.

Same as: HISTORY 230D.

HISTORY 330E. Republic of Letters: Knowledge and Community, 1300-1800. 4-5 Units.

How did a "republic of letters" emerge in the Renaissance and undergo multiple transformations during the Reformation, Scientific Revolution, and Enlightenment? How did knowledge, communication, and community change between the age of Renaissance humanists such as Petrarch, Machiavelli, and Erasmus, the invention of printing, the political, religious and intellectual upheavals of the seventeenth century, and the trans-Atlantic, cosmopolitan world of salons, libraries, and enlightened philosophers such as Voltaire, Gibbon, and Franklin?

HISTORY 330F. Self-Policing, Denunciation, and Surveillance in Modern Europe. 4-5 Units.

How individual actions impact state machineries of power. The motives, pressures, and consequences of everyday collaboration from the French Revolution to Nazi Germany and Soviet bloc police states; popular outrage over such practices in the aftermath of these regimes. The phenomenon of anticipatory compliance, as people tended to perceive less freedom of action than actually existed, and the reciprocal intensification of real and imagined restrictions. The malleability of personal values and interests as represented in diaries, memoirs, secondary sources, and film; variety of individual and national responses.

Same as: HISTORY 230F.

HISTORY 330K. Left, Right, and the Intellectual Life: Politics and Intellectuals in the Short Twentieth Century. 5 Units.

The twentieth century has been called the "century of intellectuals" because of the important role that men and women of letters played in debating, creating, and legitimizing the intense ideological conflict that defined the era. Beginning with the classic debates between Sartre and Camus, which encapsulate the dilemma of political commitment felt acutely throughout the century, this course then considers intellectuals' relationships to the major ideologies of the century: from fascism and Communism to liberalism and right-wing libertarianism.

HISTORY 331D. Core Colloquium on Modern Europe: Intellectual History. 4-5 Units.**HISTORY 331G. European Reformations. 4-5 Units.**

Readings in and discussion of theological and social aspects of sixteenth century reformations: Luther, Radical Reform, Calvin, and Council of Trent, missionary expansion, religious conflict, creative and artistic expressions. Texts include primary sources and secondary scholarly essays and monographs.

Same as: HISTORY 231G, RELIGST 236, RELIGST 336.

HISTORY 332A. Power, Art, and Knowledge in Renaissance Italy. 4-5 Units.

Provides a fundamental understanding of the cultural and political imagination of the Italian Renaissance, with particular emphasis on Florence between 1300 and 1600 CE. Topics include political and social upheavals, radical shifts in religious practice and devotion, the commercial revolution in trade and banking, the rediscovery of classical philosophy and style, and the flowering of the literary and visual arts.

Same as: HISTORY 232A.

HISTORY 332B. Heretics, Prostitutes, and Merchants: Venice and its Empire. 4-5 Units.

Between 1200-1600, Venice created a powerful empire at the boundary between East and West that controlled much of the Mediterranean, with a merchant society that allowed social groups, religions, and ethnicities to coexist. Topics include the features of Venetian society, the relationship between center and periphery, order and disorder, orthodoxy and heresy, the role of politics, art, and culture in the Venetian Renaissance, and the empire's decline as a political power and reinvention as a tourist site and living museum.

HISTORY 332D. Rome: The City and the World, 1350-1750. 4-5 Units.

What lies beyond the ruins of an ancient city? The history of Rome from the Renaissance to the age of the grand tour. Topics include: the political, diplomatic, and religious history of the papacy; society and cultural life; the everyday world of Roman citizens; the relationship between the city and the surrounding countryside; the material transformation of Rome as a city; and its meaning for foreigners.

Same as: HISTORY 232D.

HISTORY 332F. The Scientific Revolution. 5 Units.

What do people know and how do they know it? What counts as scientific knowledge? In the 16th and 17th centuries, understanding the nature of knowledge engaged the attention of individuals and institutions including Copernicus, Galileo, Descartes, Newton, the early Royal Society, and less well-known contemporaries. New meanings of observing, collecting, experimenting, and philosophizing, and political, religious, and cultural ramifications in early modern Europe.

HISTORY 332G. When Worlds Collide: The Trial of Galileo. 4-5 Units.

In 1633, the Italian mathematician Galileo was tried and condemned for advocating that the sun, not the earth, was the center of the cosmos. The Catholic Church did not formally admit that Galileo was right until 1992. Examines the many factors that led to the trial of Galileo and looks at multiple perspectives on this signal event in the history of science and religion. Considers the nature and definition of intellectual heresy in the sixteenth and early seventeenth centuries, and examines the writings of Galileo's infamous predecessor Giordano Bruno (burned at the stake in 1600). Looks closely at documents surrounding the trial and related literature on Renaissance and Reformation Italy in order to understand the perspectives of various participants in this famous event. Focal point of seminar involves the examination of the many different histories that can be produced from Galileo's trial. What, in the end, were the crimes of Galileo?

HISTORY 333. Reformation, Political Culture, and the Origins of the English Civil War. 4-5 Units.

English political and religious culture from the end of the Wars of the Roses to the Civil War of the 1640s. Themes include the growth of the size and power of the state, Reformation, creation of a Protestant regime, transformation of the political culture of the ruling elite, emergence of Puritanism, and causes of the Civil War.

Same as: HISTORY 233.

HISTORY 333C. Two British Revolutions. 4-5 Units.

Current scholarship on Britain, 1640-1700, focusing on political and religious history. Topics include: causes and consequences of the English civil war and revolution; rise and fall of revolutionary Puritanism; the Restoration; popular politics in the late 17th century; changing contours of religious life; the crisis leading to the Glorious Revolution; and the new order that emerged after the deposing of James II.

Same as: HISTORY 233C.

HISTORY 333E. European Intellectual History: The Age of Grand Ideologies. 4-5 Units.

Ever since the Napoleonic Wars, European culture, society and politics have experienced a series of dramatic transformations, changes that unleashed a myriad of intellectual theories and debates. Focuses on the nineteenth century, the age of grand theories such as Liberalism, Positivism, Nationalism, Socialism, and Marxism and examines them historically. Readings include French Utopian Socialists and members of the Russian intelligentsia, J.S. Mill, Marx, Durkheim, Weber, Freud, and others.

HISTORY 333K. The Invention of the Modern Republic. 4-5 Units.

Examines the history of republican thinking in the Atlantic World from the Renaissance to the French Revolution.

Same as: HISTORY 233K.

HISTORY 334. Enlightenment Seminar. 3-5 Units.

The Enlightenment as a philosophical, literary, and political movement. Themes include the nature and limits of philosophy, the grounds for critical intellectual engagement, the institution of society and the public, and freedom, equality and human progress. Authors include Voltaire, Montesquieu, Rousseau, Hume, Diderot, and Condorcet.

Same as: DLCL 324, HISTORY 432A, HUMNTIES 324.

HISTORY 334F. Science, Technology, and Empire. 4-5 Units.

How modern Europe came to be connected to the wider world through repeated cycles of expansion, circulation, and exchange from the mid-nineteenth century to the present. Using weekly themes and in-depth discussions of watershed moments, the roles played by colonialism, migration, commerce, warfare, telecommunications, and popular culture in redefining the place of Europe in a changing global landscape will be explored.

HISTORY 336. Modern France. 4-5 Units.

(Daughton).

HISTORY 336E. Violence in History and Theory. 4-5 Units.

Methodological challenges associated with defining and analyzing violence in late-19th- and 20th-century contexts. How people witnessed, coped with, and survived violent episodes. Cases of state violence, ethnic and religious conflict, warfare, genocide, and decolonization. The notion of everyday suffering in the contemporary world. Sources include anthropology, sociology, and history.

HISTORY 337C. Street History: Learning the Past in School and Out. 3-5 Units.

Interdisciplinary. Since Herodotus, history and memory have competed to shape minds: history cultivates doubt and demands interpretation; memory seeks certainty and detests that which thwarts its aims. History and memory collide in modern society, often violently. How do young people become historical amidst these forces; how do school, family, nation, and mass media contribute to the process?

Same as: EDUC 356.

HISTORY 338A. Graduate Colloquium in Modern British History, Part I. 4-5 Units.

Influential approaches to problems in British, European, and imperial history. The 19th-century British experience and its relationship to Europe and empire. National identity, the industrial revolution, class formation, gender, liberalism, and state building. Goal is to prepare specialists and non-specialists for oral exams.

HISTORY 339D. Capital and Empire. 4-5 Units.

Can empire be justified with balance sheets of imperial crimes and boons, a calculus of racism versus railroads? The political economy of empire through its intellectual history from Adam Smith to the present; the history of imperial corporations from the East India Company to Wal-mart; the role of consumerism; the formation of the global economy; and the relationship between empire and the theory and practice of development.

HISTORY 339F. Empire and Information. 4-5 Units.

How do states see? How do they know what they know about their subjects, citizens, economies, and geographies? How does that knowledge shape society, politics, identity, freedom, and modernity? Focus is on the British imperial state activities in S. Asia and Britain: surveillance technologies and information-gathering systems, including mapping, statistics, cultural schemata, and intelligence systems, to render geographies and social bodies legible, visible, and governable.

Same as: HISTORY 239F.

HISTORY 339H. Modern European History in a Global Age. 4-5 Units.

How scholars can write the history of modern Europe in a way that integrates global and transnational perspectives. Discussed the methodological challenges and merits of various approaches and reviews relevant theoretical and interdisciplinary models for how this can best be done. Topics include globalization, migration, internationalism, colonialism, post-colonialism, modern warfare, and the media.

HISTORY 342. Darwin in the History of Life. 4-5 Units.

Origins and impact of evolutionary theory from the nineteenth century to the present. Early theories of fossils, the discovery of deep time and uniformitarian geology, debates over evolution vs. extinction, the origin of life, and human origins; the rise of anthropology and racial theory; the changing challenge of creationism, the abuse of evolution in eugenics and Nazi racial hygiene; and new discoveries in the realm of extreme life, evolution, neocatastrophism, and the new technological frontier of biomimicry. Attendance at the lectures of HISTORY 142 is required.

HISTORY 342A. What is Life? The History of a Question. 4-5 Units.

History of attempts to understand the nature of life and mind by comparing living creatures with artificial machines and material arrangements. Imitations of animal life and human thought and discussions of relations between creatures and contraptions from antiquity onward, with an eye toward providing historical depth to current attempts to simulate life and mind.

HISTORY 343G. Tobacco and Health in World History. 4-5 Units.

Same as: HISTORY 243G.

HISTORY 345A. Africa in the Era of the Slave Trade. 4-5 Units.

The slave trade, including the trans-Saharan, Indian Ocean, and trans-Atlantic trades, constituted nearly a millennium of interaction with the wider world and set in motion transformations in African societies, politics, and cultures. Topics include the debates about slavery in Africa, the impact of the slave trade on African societies, state formation, economic change, religious change, and household change in the period before the scramble for Africa in the late 19th century.

HISTORY 346C. Islam and Christianity in Africa. 4-5 Units.

History of the 20% of the Muslims and Christians in the world who live in Africa. The role of these religions in social, cultural and political transformations. Linkages between African religions and global/transnational institutions. African contributions to theology, religious practice and religious styles. Muslim/Christian relations and relations with "traditional" African religions.

Same as: AFRICAAM 246C.

HISTORY 347E. Health and Society in Africa. 4-5 Units.

The history of disease, therapeutic and diagnostic systems, and the definition of health in precolonial, colonial, and postcolonial Africa. The social and political histories of specific epidemics, including sleeping sickness, influenza, TB, mental illness, and AIDS. The colonial contexts of epidemics and the social consequences of disease.

Same as: HISTORY 245E.

HISTORY 351A. Core in American History, Part I. 4-5 Units.**HISTORY 351B. Core in American History, Part II. 4-5 Units.****HISTORY 351C. Core in American History, Part III. 4-5 Units.****HISTORY 351D. Core in American History, Part IV. 4-5 Units.**

HISTORY 351E. Core in American History, Part V. 4-5 Units.

Required of all first-year United States History Ph.D. students.

HISTORY 351F. Core in American History, Part VI. 4-5 Units.

Required of all first-year Ph.D. students in U.S. History.

HISTORY 352B. History of American Law. 5 Units.

(Same as LAW 318.) Modern history of American law, legal thought, legal institutions and the legal profession. Topics include law and regulation of corporate organizations and labor relations in the age of enterprise, law of race relations in the South and North, development of classical legalism, critiques of classical legalism, modern administrative state, organized legal profession, New Deal legal thought and legislation, legal order of the 50s, expansion of enterprise liability, civil rights movements from 1940, rights revolution of the Warren Court and Great Society.

HISTORY 353D. Approaches to American Legal History. 4-5 Units.

(Same as LAW 651.) Legal history may once have been primarily devoted to exploring legal doctrines and key judicial opinions, and thus to be of interest mainly to legal scholars and lawyers. Now, the best writing in legal history resembles historical writing more generally, and the study of legal ideas and practices is increasingly integrated with social, intellectual, cultural, and political history. Examines recent writings in American legal history, ranging broadly across time and space to ask how the field reflects developments in historical writing more generally, and how the use of legal materials affects our understanding of major aspects of American history.

HISTORY 355. Decision Making in International Crises: The A-Bomb, the Korean War, and the Cuban Missile Crisis. 4-5 Units.

For advanced undergraduates and graduate students. Primary documents and secondary literature. Topics include: the decision to use the atomic bomb on Japan, the Korean War, and the Cuban missile crisis.

HISTORY 355D. Racial Identity in the American Imagination. 4-5 Units.

Major historical transformations shaping the understanding of racial identity and how it has been experienced, represented, and contested in American history. Topics include: racial passing and racial performance; migration, immigration, and racial identity in the urban context; the interplay between racial identity and American identity; the problems of class, gender, and sexuality in the construction of racial identity. Sources include historical and legal texts, memoirs, photography, literature, film, and music. Same as: AFRICAAM 255, AMSTUD 255D, CSRE 255D.

HISTORY 356. U.S.-China Relations: From the Opium War to Tiananmen. 4-5 Units.

The history of turbulent relations, military conflict, and cultural clashes between the U.S. and China, and the implications for the domestic lives of these increasingly interconnected countries. Diplomatic, political, social, cultural, and military themes from early contact to the recent past. Same as: AMSTUD 256, HISTORY 256.

HISTORY 356G. Constructing Race and Religion in America. 4-5 Units.

This seminar focuses on the interrelationships between social constructions of race, and social interpretations of religion in America. How have assumptions about race shaped religious worldviews? How have religious beliefs shaped racial attitudes? How have ideas about religion and race contributed to notions of what it means to be "American"? We will look at primary and secondary sources, and at the historical development of ideas and practices over time.

Same as: CSRE 246, HISTORY 256G, RELIGST 246, RELIGST 346.

HISTORY 358. Topics in the History of Sexuality: Sexual Violence. 4-5 Units.

Recent historical interpretations of sexual violence, with particular attention to the intersections of gender and race in the construction of rape, from early settlement through the twentieth century. Topics include the legal prosecution of rape in Early America; the racialization of rape in the U.S.; lynching and anti-lynching in the U.S.; and feminist responses to sexual violence.

Same as: AMSTUD 258, CSRE 192E, FEMGEN 258, FEMGEN 358, HISTORY 258.

HISTORY 362G. The Pivotal Decade in U.S. History: 1960's or 1970's?. 4-5 Units.

Which had more lasting impact, the civil war of the 1960s or the conservative revolt of the 1970s? Should the 1970s supersede the 1960s as a pivotal moment when something happened of considerable importance to historians? Considers this debate of the decades comparatively and thematically, addressing topics including civil rights, foreign policy, electoral politics, popular culture, law, economics, labor, and social movement organizing.

HISTORY 363G. History Through a Life: The Allure of American Biography. 4-5 Units.

Considers the possibilities and limitations of exploring U.S. history through the genre of biography. Is a single life too narrow to explain why and how pivotal events in U.S. history, such as war, economic depression, social revolution, unfold? Or can one life illuminate the complexity of historical shifts? Readings will span U.S. history, exploring topics such as labor and racial civil rights, science and culture, women and sexuality, transnationalism and diplomacy, law and presidential politics. The craft of biography will be considered alongside biographical subjects.

HISTORY 365. Writing Asian American History. 5 Units.

Recent scholarship in Asian American history, with attention to methodologies and sources. Topics: racial ideologies, gender, transnationalism, culture, and Asian American art history. Primary research paper.

Same as: AMSTUD 265, ASNAMST 265.

HISTORY 366B. Immigration Debates in America, Past and Present. 3-5 Units.

Examines the ways in which the immigration of people from around the world and migration within the United States shaped American nation-building and ideas about national identity in the twentieth century. Focuses on how conflicting ideas about race, gender, ethnicity, and citizenship with respect to particular groups led to policies both of exclusion and integration. Part One begins with the ways in which the American views of race and citizenship in the colonial period through the post-Reconstruction Era led to the passage of the Chinese Exclusion Act in 1882 and subsequently to broader exclusions of immigrants from other parts of Asia, Southern and Eastern Europe, and Mexico. Explores how World War II and the Cold War challenged racial ideologies and led to policies of increasing liberalization culminating in the passage of the 1965 Immigration Act, which eliminated quotas based on national origins and opened the door for new waves of immigrants, especially from Asia and Latin America. Part Two considers new immigration patterns after 1965, including those of refugees, and investigates the contemporary debate over immigration and immigration policy in the post 9/11 era as well as inequalities within the system and the impact of foreign policy on exclusions and inclusions.

Same as: CSRE 166B, HISTORY 166B.

HISTORY 369. History of Capitalism. 5 Units.

What is capitalism? An economic and social system that maximizes both individual freedom and social good? An exploitative arrangement dependent on the subordination of labor to capital? A natural arrangement guided by a munificent invisible hand? Or a finely tuned mechanism requiring state support? We will study the history of debates about markets and social organization, taking capitalism as both an economic system and a culture. Focus on American and British writers including Keynes, Lippmann, Hayek, Rand, Schumpeter, and Friedman.
Same as: HISTORY 269.

HISTORY 370. Graduate Colloquium on Colonial Latin American History. 4-5 Units.

Sixteenth to nineteenth centuries. Indigenous cultures. The arrival of Europeans and its impact on native and European societies. Culture, religion and institutions, and everyday life. The independence period and the formation of new nations.

HISTORY 372A. Mexico: From Colony to Nation or the History of an Impossible Republic?. 5 Units.

Was a republican form of government even possible in 19th-century Mexico after 300 years of colonial rule under the Spanish monarchy? Was the Spanish colonial heritage a positive or a negative legacy according to 19th-century Mexican politicians? How were they to forge a new national identity with so many ethnically and culturally diverse peoples throughout the territory? Just how "traditional" was, in fact, the colonial period? These are some of the questions we will explore in this course. Journeying from the late colonial period (c.1700) to the 35-year dictatorship known as El Porfiriato (1876-1911) we will examine how Mexico's diverse indigenous peoples adapted to both colonial and postcolonial rule, how they actively participated in politics and political discourse to preserve their cultures, customs and colonial privileges, and how after independence in 1821, a new republican political culture was forged. Mexico was not an impossible republic, but rather another kind of republic.

HISTORY 373A. The European Expansion. 4-5 Units.

The relationship between European monarchies and their colonial domains from the 16th-18th centuries. Reasons for expansion, methods, and results. Case studies include the Spanish, Portuguese, Dutch, French, and English domains in Africa, Asia, and the Americas. Readings include primary and secondary sources.
Same as: HISTORY 273.

HISTORY 375B. Borders and Borderlands in Modern Mexico. 4-5 Units.

Surveys the history of Mexico's borders and borderlands from the nineteenth century to the present. Examines theoretical conceptualizations of the borderlands as well as the historical development of identities and geographic borders within and around Mexico. Topics include the legacies of war, map making, the construction of *lo Mexicano*, the politics of culture, and migrations to, from, and through Mexico. Analyzes the prevailing trends in Mexicanist historiography.

HISTORY 376. Modern Brazil. 4-5 Units.

From independence in 1822 to the present. Social and cultural history. Literary and historical sources.

HISTORY 378A. The Logic of Authoritarian Government, Ancient and Modern. 5 Units.

If authoritarianism is less economically efficient than democracy, and if authoritarianism is a less stable form of political organization than democracy, then why are there more authoritarian governments than democracies? To address this paradox, focus is on theoretical and empirical literature on authoritarian governments, and related literatures on the microeconomic analysis of property rights and credible commitments.

HISTORY 379. Latin American Development: Economy and Society, 1800-2000. 4-5 Units.

The newly independent nations of Latin America began the 19th century with economies roughly equal to, or even ahead of, the U.S. and Canada. What explains the economic gap that developed since 1900? Why are some Latin American nations rich and others poor? Marxist, dependency, neoclassical, and institutionalist interpretive frameworks. The effects of globalization on Latin American economic growth, autonomy, and potential for social justice.
Same as: HISTORY 279.

HISTORY 381. Economic and Social History of the Modern Middle East. 5 Units.

The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market are combined with possible case studies of Egypt, Iraq, and Palestine.

HISTORY 382. The United States and the Middle East since 1945. 4-5 Units.

Since the end of WW II, U.S. interests in the Middle East have traditionally been defined as access to oil at a reasonable price, trade and markets, containing the influence of the Soviet Union, and the security of Israel. Is this the full range of U.S. interests? How has the pursuit of these interests changed over time? What forces have shaped U.S. policy? What is the impact of U.S. policy on the region itself?
Same as: HISTORY 282.

HISTORY 382E. Jews, Christians and Muslims in the Ottoman World. 4-5 Units.

The experiences of the Jewish, Christian and Muslim communities in the Ottoman Empire, fifteenth to twentieth centuries. How diverse social and religious communities lived together in an imperial setting, specifically the mechanisms, discourses and crises of coexistence in the Ottoman Empire. Various comparisons of the Ottoman Empire to the Habsburg, the Romanov (Russian), the Mughal, and the British empires.

HISTORY 382F. History of Modern Turkey. 4-5 Units.

Social, political and cultural history of Modern Turkey from the last decades of the Ottoman Empire in the late 19th century until Today. Themes include transformation from a multi-national empire to a national republic; Islam, secularism and radical modernism; military, bureaucracy and democratic experience; economic development, underdevelopment and class; Istanbul, Ankara and provincial Turkey; socialism, conservatism(s), and Kurdish challenge; Turkey in Europe, the Middle East and Central Asia; gender, sexuality and family; popular culture, soccer, and film industry; Post-Modernism, Neo-Ottomanism, and the New-Turkey; The class also include reading works of Turkish literature and watching movies by Turkish directors.

HISTORY 382G. Israel from the Margins. 4-5 Units.

Although secular, European Jews form a minority of the population of the State of Israel, and its history is typically narrated and interpreted from that perspective. Israel looks like a rather different place if it is seen and understood from the point of view of Middle Eastern and North African Jews, including those indigenous to the country before the advent of the modern Zionist movement, orthodox and ultra-orthodox Jews, Palestinian Arabs (nearly twenty percent of Israel's population today), migrant workers (about 200,000), and women. This course does not suggest that their perspectives are necessarily more real or true, only that an understanding of Israel that does not adequately consider them is necessarily false.

HISTORY 383. The New Global Economy, Oil, and Islamic Movements in the Middle East. 4-5 Units.

The integration of the Middle East into the world capitalist market on a subordinate basis and the impact on economic development, class formation, and politics. Alternative theoretical perspectives on the rise and expansion of the international capitalist market combined with case studies of Egypt, Iraq, and Palestine.

Same as: HISTORY 283.

HISTORY 384. The Ottoman Empire, 1300-1923. 4-5 Units.

This is a course on the Middle East and Southeast Europe under the Ottoman Empire. Topics include how the Ottoman enterprise was constructed in the frontier region of the Christian and Islamic worlds; the conquests and consolidation of the imperial institutions; how diverse peoples, cultures, and regions were integrated into the imperial system; the Ottoman Empire and the broader world; merchants and their markets; elite, urban, rural and nomadic lives; women, family sexuality; art, literature, and architecture; the transformation of the empire on the eve of modernity; the rise of nationalism and the Ottoman response; Ottoman disintegration and the making of the Middle East and Southeast Europe.

Same as: HISTORY 284.

HISTORY 384F. Islamic Eurasia: Empires, Nomads and Merchants (1300-1850). 4-5 Units.

Focuses on political regimes, economic interactions and sociocultural formations in the early modern Balkans and Middle East to Central and South Asia. Topics include complex political systems of the Ottoman, Safavid and Mughal empires; experiences of various Muslim, Christian, Jewish and Hindu, as well as urban, rural and nomadic communities; consolidation of transregional commerce and cultural exchange; incorporation of the Islamic world in the global economy; transimperial networks of the Muslim and Non-Muslim merchants, scholars and sufis. Same as: HISTORY 284F.

HISTORY 385K. History of Modern Antisemitism: Nineteenth and Twentieth Centuries. 4-5 Units.

The articulations of anti-Jewish hatred from the advent of Jewish emancipation in Europe. The legacy of premodern Christian demonization and its modern protean transformations as they penetrated and annexed new currents of ideology, notions of identity (social, national, racial), taste, and aesthetics. A history of ideas, representations, and stereotypes, and their relation to historical experience, action, and mobilization. Europe is the focus; case studies also include the Middle East and elsewhere.

HISTORY 386. Jews among Muslims. 4-5 Units.

The history of Jewish communities in the lands of Islam and their relations with the surrounding Muslim populations from the time of Muhammad to the 20th century. Topics: the place of Jews in Muslim societies, Jewish communal life, variation in the experience of communities in different Muslim lands, the impact of the West in the Modern period, the rise of nationalisms, and the end of Jewish life in Muslim countries.

HISTORY 386B. The Ottoman Empire in the Age of Revolutions, 1750-1850. 4-5 Units.

Investigates the Ottoman World (the Balkans and the Middle East under the Ottoman Empire) in the Age of Revolutions in the global context. While the Ottoman World is the primary interest, developments in Europe, India and China are also discussed in a comparative perspective. Topics include military and fiscal transformation; regionalism; urban life and formations of public spheres; political crisis, social disturbances and political violence; transformation in the ethnoreligious structures, gender relations and family life; protonationalism in the Balkans and Egypt.

HISTORY 387C. Zionism and Its Critics. 4-5 Units.

Zionism from its genesis in the 1880s up until the establishment of the state of Israel in May, 1948, exploring the historical, ideological and political dimensions of Zionism. Topics include: the emergence of Zionist ideology in connection to and as a response to challenges of modernity; emancipation; Haskalah (Jewish enlightenment); other national and ideological movements of the period; the ideological crystallization of the movement; and the immigration waves to Palestine.

HISTORY 387K. Gentlemen and Jews: History of the Jews of England. 4-5 Units.

Focuses on key chapters in the cultural and political histories of Britain and its Jews, between 1650 and 1950 and examines the advantages, as well as possible difficulties, that emerge when connecting Anglo-Jewish history to mainstream British history. What is unique about Jewish emancipation in England, and what are its connections to the formation of British national identity? Is there a unique path in which Jewish Enlightenment developed in England? What was the contribution of Jews to British Imperialism? Is there a cultural affinity between English philosemitism and liberalism?

HISTORY 390. Han Chinese and the Global White: The Production of Ethnoracial Majorities, East and West. 4-5 Units.**HISTORY 390A. Major Topics in Modern Chinese History: Qing/Republican Transition. 4-5 Units.**

Continuities and discontinuities in society, economy, politics, culture, and thought during the transition from the Qing dynasty to the republic. May be repeated for credit.

HISTORY 390E. Movies and Empire in East Asia. 5 Units.

Cinema was invented in the 1890s and simultaneously introduced to East Asia. This colloquium explores how this new medium changed the cultural and social landscape of East Asia and how the visual power of films also affected the culture politics of empires in the region. The themes include cinema and urban spaces, cultural imperialism, film images and gender discourse, colonial modernity, Americanism and Asianism, the visual and the textual, wartime propaganda, and Hollywood movies and cold war empires.

Same as: HISTORY 290E.

HISTORY 391. East Asia in the Early Buddhist Age. 4-5 Units.

Evolution of cities in imperial China through early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative examination of cases from European history.

HISTORY 391A. Archaeology and Modernity in Asia: The Excavation of Ancient Civilizations in Modern Times. 4-5 Units.

The interplay in Asia between antiquity and modernity, civilization and nation state, and national versus colonial science. The recent excavation of artifacts and places associated with Asian civilization such as the terracotta warriors in China and Angkor Wat in Cambodia. How Asian states have grappled with modernity and colonialism as they simultaneously dug up their ancient pasts.

Same as: HISTORY 291A.

HISTORY 391B. The City in Imperial China. 5 Units.

The evolution of cities in the early imperial, medieval, and early modern periods. Topics include physical structure, social order, cultural forms, economic roles, relations to rural hinterlands, and the contrast between imperial capitals and other cities. Comparative cases from European history. Readings include primary and secondary sources, and visual materials.

HISTORY 391C. Early Imperial China. 4-5 Units.

The first millennium of imperial China, what endured over the centuries, and the major changes that took place in the political, social, and intellectual realms. Topics include the evolving geographic and environmental background, cities, the countryside, kinship, relations with the outer world, religion, philosophy, and literature. Also examines the nature of empire as a distinctive political form.

HISTORY 391G. Pre-Modern Chinese Warfare. 3-5 Units.

This course examines the evolution of warfare in China, and its impact on the evolving political and social orders, from the earliest states through the Mongol conquest. It will study how changing military technology was inextricably linked to changes in the state and society. It will also look at changing Chinese attitudes towards warfare over the same period, from the celebration of heroism, through writing about warfare as an intellectual art, to the links of militarism with steppe peoples/.

HISTORY 392. The Two Koreas. 4-5 Units.

Examines major themes and scholarly works to understand the origins, outbreak, and consequences of the Korean War. One focus will be the division of Korea into ROK and DPRK and their subsequent developments. Themes include World War II in East Asia; Korean communist movements during Japanese colonial rule; the Cold War in East Asia; the roles of the US, China, and USSR in the Korean War; the ideas of key North and South Korean leaders, and the consolidation of the two Koreas after the Korean War.

Same as: HISTORY 292.

HISTORY 392B. Law and Society in Late Imperial China. 4-5 Units.

Connections between legal and social history. Ideology and practice, center and periphery, and state-society tensions and interactions. Readings introduce the work of major historians on concepts and problems in Ming-Qing history.

HISTORY 392D. Japan in Asia, Asia in Japan. 4-5 Units.

How Japan and Asia mutually shaped each other in the late 19th and 20th centuries. Focus is on Japanese imperialism in Asia and its postwar legacies. Topics include: pan-Asianism and orientalism; colonial modernization in Korea and Taiwan; collaboration and resistance; popular imperialism in Manchuria; total war and empire; comfort women and the politics of apology; the issue of resident Koreans; and economic and cultural integration of postwar Asia.

Same as: HISTORY 292D.

HISTORY 392E. The Historical Roots of Modern East Asia. 4-5 Units.

Focus is on China and Japan before and during their transition to modernity. The populous, urbanized, economically advanced, and culturally sophisticated Ming empire and Muromachi shogunate in the 16th century when Europeans first arrived. How the status quo had turned on its head by the early 20th century when European and American steamships dominated the Pacific, China was in social and political upheaval, and Japan had begun its march to empire.

Same as: HISTORY 92A.

HISTORY 392F. Traditional Korea: History and Culture. 4-5 Units.

Korea before 1800 and how iconic features of Korean tradition were created and reinvented. Themes include Korea's ancient kingdoms, the aristocracy and military in the Koryo dynasty, the print culture and Korean alphabet, ideologies and religions, the social status system and the life of women, the kingship and court culture of the Choson dynasty, and Korea's place in premodern East Asia. The modern and contemporary debates.

Same as: HISTORY 292F.

HISTORY 393B. Homosexuality in Historical and Comparative Perspective. 4-5 Units.

Comparative history of homoerotic desire, relations, and identity through scholarship on different historical periods and parts of the world: the classical Mediterranean, early modern European cities, late imperial and modern China, Tokugawa and modern Japan, and the U.S.

HISTORY 395. Modern Korean History. 5 Units.

(Same as HISTORY 95. History majors and others taking 5 units, register for 195.) Themes include status, gender, and monarchy in the Choson dynasty; intellectual life and social transformation in the 19th century; the rise of Korean nationalism; Japan's colonial rule and Korean identities; culture, economy, and society in colonial Korea; the Korean War, and the different state building processes in North and South after the Korean War. Same as: HISTORY 195.

HISTORY 395J. Gender and Sexuality in Chinese History. 4-5 Units.**HISTORY 396D. Modern Japan. 4-5 Units.**

Introduces students to the major historical problems and historiographic trends in the study of modern Japan from the Meiji period to the present. Themes include approaches to late Meiji culture and politics, the formation of imperial subjects and citizens, agrarian society and politics, gender in modern Japan, empire and modernity, total war and transwar state and society, U.S. occupation, and postwar Japan.

HISTORY 397. The Cold War and East Asia. 5 Units.

Explores how East Asia negotiated superpower rivalry and global ideological competition during the Cold War. Considers the ways in which China, Japan, and Korea were more than battlegrounds for US-Soviet contestation and played active roles in defining the nature and dynamics of the conflict. Re-examines conventional narratives and periodizations against alternative conceptual models and interpretive frameworks highlighting the constructed nature of the struggle as well as the role of historical and cultural factors in shaping the East Asian experience.

Same as: HISTORY 297.

HISTORY 397D. Readings in Indo-Persian Literature. 3-5 Units.

This course introduces the life, poetry, and mystical thought of the Indo-Persian poet Mirza Abd al-Qadir Bedil (1644-1720) through reading selections from his autobiographical work *Chahar Unsur*. In this work, composed in ornate prose interspersed with poetry, Bedil recounts episodes from his life: miraculous events, encounters with Sufis, the composition of poems, and elaborates on themes of mysticism. We will pay close attention to Bedil's peculiar linguistic and literary style and tackle his metaphysical views. Two years Persian language required.

Same as: ICA 397D, RELIGST 309P.

HISTORY 399A. Preparing for International Field Work: Public Service or Research. 1 Unit.

Problems involved in research abroad: ethical issues; safety; security and conduct; human subjects protocol. Methodologies of research: interviewing, networking, case studies, participant observation, large surveys.

Same as: HISTORY 299X.

HISTORY 399E. Preparing for International Field Research: Public Svc or Research, Electronic Version. 1 Unit.

Restricted to students studying at a Stanford Overseas Studies campus; same course content as HISTORY 299X. Problems involved in research abroad: ethical issues; safety; security and conduct; human subjects protocol. Methodologies of research: interviewing, networking, case studies, participant observation, large surveys. Prerequisite: consent of instructor.

HISTORY 399W. Graduate Directed Reading. 1-10 Unit.**HISTORY 401A. Spatial History: Concepts, Methods, Problems. 4-5 Units.**

Technical training in GIS, with modules taught by Stanford Spatial History Lab staff; conceptual work in the use of these techniques in spatial historical analysis. Students develop their own spatial history projects and produce beta versions of dynamic visualizations.

HISTORY 401B. Spatial History, Part II. 4-5 Units.

Prerequisite: 401A.

HISTORY 406. Graduate Research Seminar on Colonial Law. 4-5 Units.

Prerequisite: HISTORY 306G.

HISTORY 414A. Medieval History. 4-5 Units.**HISTORY 414B. Medieval History. 4-5 Units.****HISTORY 421A. Early Modern Russia. 4-5 Units.****HISTORY 422A. Research Seminar on the History of the Russian Empire. 4-5 Units.****HISTORY 422B. Research Seminar in Imperial Russia. 4-5 Units.**

HISTORY 424A. The Soviet Civilization. 4-5 Units.

Socialist visions and practices of the organization of society and messianic politics; the Soviet understanding of mass violence, political and ethnic; and living space. Primary and secondary sources. Research paper or historiographical essay.

Same as: HISTORY 224A.

HISTORY 424B. The Soviet Civilization, Part 2. 4-5 Units.

Prerequisite: HISTORY 424A.

HISTORY 424C. The End of Communism in Europe. 4-5 Units.

Causes, course, and consequences.

HISTORY 430. Graduate Research Seminar: Early Modern Europe. 4-5 Units.

Prerequisite: HISTORY 331S. Students may research any aspect of late medieval, Renaissance, and early modern history, 1300-1800. Students wishing to take this seminar must enroll in HISTORY 332A (Power, Art, and Knowledge in Renaissance Italy) in Winter 2014.

HISTORY 430A. Graduate Research Seminar: Early Modern Europe. 3-5 Units.

Students will begin a research project on any aspect of early modern European history, 1400-1800, by taking HISTORY 430A in winter quarter as the first quarter of this two-quarter sequence. Enrollment by permission of instructor.

HISTORY 431. Early Modern Things. 4-5 Units.

How do objects reveal their histories? What can be learned about the past by studying things? The material culture of early modern Europe, ca 1450-1750. Recent work on the circulation, use, and consumption of things, starting with the Columbian exchange which expanded the material horizons of the early modern world in the late 15th century, exploring challenges to the meaning of things in the age of the Reformation and Scientific Revolution, and ending with the birth of consumer society in the 18th century. How did the meaning of things and people's relationships to them change over these centuries? What objects, ordinary and extraordinary, secular and sacred, natural and man-made, came to define the emerging features of the early modern world?.

HISTORY 432A. Enlightenment Seminar. 3-5 Units.

The Enlightenment as a philosophical, literary, and political movement. Themes include the nature and limits of philosophy, the grounds for critical intellectual engagement, the institution of society and the public, and freedom, equality and human progress. Authors include Voltaire, Montesquieu, Rousseau, Hume, Diderot, and Condorcet. Same as: DLCL 324, HISTORY 334, HUMNTIES 324.

HISTORY 432B. Grad Research Seminar: The Enlightenment, Pt. II. 4-5 Units.

Prerequisite: completion of HISTORY 432A.

HISTORY 433A. Modern Europe: Society and Politics. 5 Units.

The goal of this course is to introduce graduate students to major works of history and literature in the field of nineteenth and early-twentieth century history. A colloquia will be given in tandem with a research seminar. May be repeated for credit.

HISTORY 433B. European History. 4-5 Units.

Prerequisite: HISTORY 433A.

HISTORY 438. European History Workshop. 1 Unit.

All European history graduate students in residence register for this weekly workshop, at which dissertation chapters and prospectuses, papers, and grant proposals by students and faculty are read and discussed.

HISTORY 439A. Graduate Research Seminar: Modern Britain and the British Empire. 4-5 Units.**HISTORY 439B. Graduate Research Seminar: Modern Britain and the British Empire II. 4-5 Units.****HISTORY 443A. Human Origins: History, Evidence, and Controversy. 4-5 Units.**

Research seminar. Debates and controversies include: theories of human origins; interpretations of fossils, early art, and the oldest tools; the origin and fate of the Neanderthals; evolutionary themes in literature and film; visual rhetoric and cliché in anthropological dioramas and phyletic diagrams; the significance of hunting, gathering, and grandmothing; climatological theories and neocatastrophic geologies; molecular anthropology; the impact of racial theories on human origins discourse. Background in human evolution not required. Same as: HISTORY 243S.

HISTORY 444C. The History of the Body in Science, Medicine, and Culture. 4-5 Units.

The human body as a natural and cultural object, historicized. The crosscultural history of the body from the 18th century to the present. Topics include: sciences of sex and race; medical discovery of particular body parts; human experimentation, foot binding, veiling, and other bodily coverings; thinness and obesity; notions of the body politic. Same as: HISTORY 244C.

HISTORY 445A. Research Seminar in African History. 4-5 Units.

Primary sources such as government records and missionary archives. Students present work in progress. Prerequisite: consent of instructor.

HISTORY 445B. Research Seminar in African History. 4-5 Units.

Primary sources such as government records and missionary archives. Students present work in progress. Prerequisite: consent of instructor.

HISTORY 460. America in the World. 4-5 Units.

Ways to place American history in an international context. Comparative, transnational, diplomatic, and world systems are approaches to complete a research paper based on research into primary materials. Historical methodologies, research strategies, and essay projects. May be repeated for credit.

HISTORY 461A. Research Seminar on the Histories of Women, the Family, and Sexuality. 4-5 Units.

Research design, research methods, and historical writing on topics in the histories of women, the family, or sexuality in the U.S. Prepares graduate students for dissertation work. Workshop model involves exchanging preliminary prospectus, outline, writing sample, and draft for peer responses. Article-length original paper based on primary sources, to be completed by the end of Spring Quarter.

HISTORY 461B. Research Seminar on the Histories of Women, the Family, and Sexuality, Part II. 4-5 Units.

Prerequisite: 461A.

HISTORY 464E. Research in History and Social Science Education. 3-5 Units.

For doctoral students. Literature on historical learning and teaching and corresponding social sciences research designs, assessment, and curriculum evaluation. Same as: EDUC 496.

HISTORY 470. Graduate Colloquium: Explorations in Latin American Social History. 4-5 Units.

How to use primary sources such as government records, estate inventories, and parish records for social history.

HISTORY 471A. Environmental History of Latin America. 5 Units.

What role did the natural environment play in the emergence of Latin America as a distinct geographical and socio-cultural world region? How do we analyze the historical relationship between the regions rich and seemingly abundant natural resources and its status as underdeveloped? What historical consequences did this relationship have and what alternative, more sustainable developmental paths can we envision for the future in light of the past that we will study? In this course, students will become familiar with the historiography on Brazil, Mexico, Peru, Cuba and Honduras that has explored these questions through a variety of approaches, methodologies and points of view.

HISTORY 471B. Environmental History of Latin America. 5 Units.

What role did the natural environment play in the emergence of Latin America as a distinct geographical and socio-cultural world region? How do we analyze the historical relationship between the region's rich and seemingly abundant natural resources and its status as 'underdeveloped'? What historical consequences did this relationship have and what alternative, more sustainable developmental paths can we envision for the future in light of the past that we will study? In this course, students will become familiar with the historiography on Brazil, Mexico, Peru, Cuba and Honduras that has explored these questions through a variety of approaches, methodologies and points of view.

HISTORY 481. Research Seminar in Middle East History. 4-5 Units.

Student-selected research topics.
Same as: JEWISHST 287S, JEWISHST 481.

HISTORY 481A. Research Seminar in Middle East History. 4-5 Units.**HISTORY 486A. Graduate Research Seminar in Jewish History. 4-5 Units.**

Same as: JEWISHST 486A.

HISTORY 486B. Graduate Research Seminar in Jewish History. 4-5 Units.

Prerequisite: HISTORY 486A.
Same as: JEWISHST 486B.

HISTORY 491A. Modern Korea Research Seminar. 4-5 Units.

This graduate seminar prepares students to undertake research using Korean-language sources on a variety of themes in modern Korea. Students will identify characteristics of major online and offline archives in Korean studies, learn essential skills in investigating primary sources, and analyze selected sample documents in class.

HISTORY 491B. Modern Korea Research Seminar. 4-5 Units.

This graduate seminar prepares students to undertake research using Korean-language sources on a variety of themes in modern Korea. Students will identify characteristics of major online and offline archives in Korean studies, learn essential skills in investigating primary sources, and analyze selected sample documents in class.

HISTORY 494C. Early Empires: Han and Rome. 4-5 Units.

This course systematically compares the Han Empire and the Roman Empire in order to provide insight into the distinctive features of the empires as a political and social type. Topics examined will include geographic frames, the nature of the ruler, the role of the city, the form and function of military forces, religious aspects, legal codes, structures of kinship, and the relation of these states to the outside world.
Same as: CLASSHIS 344.

HISTORY 495A. Qing Legal Documents. 4-5 Units.

How to use Qing legal documents for research. Winter: sample documents that introduce the main genres including: the Qing code and commentaries; magistrates' handbooks and published case collections; and case records from Chinese archives. Spring: class meets occasionally; students complete research papers. Prerequisite: advanced reading ability in Chinese.

HISTORY 497A. Maps and Gazetteers as Sources for East Asian History. 4-5 Units.

For graduate students of early modern or modern East Asia. Includes weekend workshop on Chinese historical GIS with Harvard's Peter Bol. Students work with the Stanford Spatial History Lab to develop analytical techniques. Prerequisite: background in GIS.

HISTORY 497B. Maps and Gazetteers as Sources for East Asian History, Part 2. 4-5 Units.

Prerequisite: HISTORY 497A.

HISTORY 498D. Japanese Imperial Archives, Part 2. 4-5 Units.

Second part of a two quarter sequence. Graduate seminar on conducting research in modern Japanese history. Focus is on Japanese imperialism and colonialism in Asia, especially Korea. Different types of archives, from national and research libraries to online databases, and methods of research including oral history. Primary sources include government publications, classified police records, and media sources. Prerequisite: HISTORY 498C.

HISTORY 499X. Graduate Research. 1-10 Unit.

Units by arrangement. May be repeated for credit.

HISTORY 802. TGR Dissertation. 0 Units.

Units by arrangement.

History & Philosophy of Science Courses

HPS 60. Introduction to Philosophy of Science. 5 Units.

The nature of scientific knowledge: evidence and confirmation; scientific explanation; models and theories; objectivity; science, society, and values. Same as: PHIL 60.

HPS 61. Science, Religion, and the Birth of Modern Philosophy. 5 Units.

Galileo's defense of the Copernican world-system that initiated the scientific revolution of the 17th century, led to conflict between science and religion, and influenced the development of modern philosophy. Readings focus on Galileo and Descartes.
Same as: PHIL 61.

HPS 199. Directed Reading. 1-15 Unit.

May be repeated for credit.

HPS 299. Graduate Individual Work. 1-15 Unit.

May be repeated for credit.

Human Biology Courses

HUMBIO 2A. Genetics, Evolution, and Ecology. 5 Units.

Introduction to the principles of classical and modern genetics, evolutionary theory, and population biology. Topics: micro- and macro-evolution, population and molecular genetics, biodiversity, and ecology, emphasizing the genetics and ecology of the evolutionary process and applications to human populations. HUMBIO 2A and 2B must be taken concurrently.

HUMBIO 2B. Culture, Evolution, and Society. 5 Units.

Introduction to the evolutionary study of human diversity. Hominid evolution, the origins of social complexity, social theory, and the emergence of the modern world system, emphasizing the concept of culture and its influence on human differences. HUMBIO 2A and 2B must be taken concurrently.

HUMBIO 3A. Cell and Developmental Biology. 5 Units.

The principles of the biology of cells: principles of human developmental biology, biochemistry of energetics and metabolism, the nature of membranes and organelles, hormone action and signal transduction in normal and diseased states (diabetes, cancer, autoimmune diseases), drug discovery, immunology, and drug addiction. HUMBIO 3A and 3B must be taken concurrently. Prerequisite: college chemistry or completion of the HumBio chemistry lecture series during the fall quarter.

HUMBIO 3B. Behavior, Health, and Development. 5 Units.

Research and theory on human behavior, health, and life span development. How biological factors and cultural practices influence cognition, emotion, motivation, personality, and health in childhood, adolescence, and adulthood. HUMBIO 3A and 3B must be taken concurrently.

HUMBIO 3Y. Practicum in Child Development. 1 Unit.

Practicum experience at Bing Nursery School for 1 1/4 hours of observation per week, class meeting every other week for 1 hour. Pre- or corequisite: 3B.

HUMBIO 4A. The Human Organism. 5 Units.

Organ system physiology: the principles of neurobiology and endocrinology, and the functions of body organs. The mechanisms of control, regulation, and integration of organ systems function. HUMBIO 4A and 4B must be taken concurrently.

HUMBIO 4B. Environmental and Health Policy Analysis. 5 Units.

Connections among the life sciences, social sciences, public health, and public policy. The economic, social, and institutional factors that underlie environmental degradation, the incidence of disease, and inequalities in health status and access to health care. Public policies to address these problems. Topics include pollution regulation, climate change policy, biodiversity protection, health care reform, health disparities, and women's health policy. HUMBIO 4A and 4B must be taken concurrently.

HUMBIO 5E. Science Education in Human Biology. 1 Unit.

In this seminar, students will become familiar with current research on science education. They will use this knowledge to create and analyze teaching material such as section plans, exams, and problem sets. Material produced in this course will be related to the topics covered in the core course of the Program in Human Biology. Students will experience and practice various teaching styles.

HUMBIO 6. Human Origins. 5 Units.

The human fossil record from the first non-human primates in the late Cretaceous or early Paleocene, 80-65 million years ago, to the anatomically modern people in the late Pleistocene, between 100,000 to 50,000 B.C.E. Emphasis is on broad evolutionary trends and the natural selective forces behind them.

Same as: ANTHRO 6, ANTHRO 206, BIO 106.

HUMBIO 10SI. What's love got to do with it? - Exploring Sexuality, Gender, and Relationships in Romantic Movies. 1 Unit.

This course will examine how sexuality, gender, and relationships are depicted in popular romantic films. Students will be asked to identify and analyze the messages these films send about what love is, how people should fall in love, and how men and women should approach sexual relationships. Students will also be asked to consider how these messages affect audiences on both a personal and cultural level. The goals of the course are to promote media literacy through thoughtful analysis of the materials presented and to encourage students to sincerely explore and share their thoughts on topics of sexuality, gender, and relationships.

HUMBIO 16SC. The Stanford Safari: Field Observations in Our Own Backyard. 2 Units.

Although Stanford is renowned as a place of learning and research, the goal of this class is to approach Stanford University as a subject worthy of study in and of itself. Students will study Stanford in terms of the built environment (e.g. architecture; how buildings and styles interact; how the landscape shapes the flow of people, plants, and animals), the human interactions (e.g. sociology of tourism, the politics of land use), and the ecology (flora, fauna, geology, climatology, and pest control) of campus. The students in this course will defamiliarize themselves with their campus environment and approach Stanford with new eyes—the eyes of the anthropologist, the photographer, the historian, the artist, and the tourist. We will explore its edifices, gardens, sculptures, open spaces, and commercial areas. Moreover, we will use Stanford as a lens to discuss a variety of disciplines: architecture, educational theory, California history, climatology, and natural history. But more than anything, we will focus on the human component, including the vision, drive, and serendipity that shaped the University. In taking the course students will hone their skills in field observation that will carry over to future field work in more distant locales, develop an interdisciplinary approach to analyzing complex institutions, and gain a deeper appreciation for the complexity and richness of Stanford that will enhance all aspects of their remaining time as undergraduates. On a daily basis, the class will consist of three components: class presentations and discussions, formal and informal talks by many of the local experts at Stanford, and topical field trips. Students will select a theme that is of personal interest and develop field observation techniques useful for their particular topics. Course assignments will be to give two presentations on specific aspects of Stanford. In addition, each student will keep a field note-book with daily observations and field notes, post a collection of photographic observations, and complete pertinent readings. Plan to work intensely and have a great time in the process.

HUMBIO 17SC. Darwin, Evolution, and Galapagos. 2 Units.

The tiny remote islands of Galápagos have played a large and central role in the study of evolution. Not surprisingly, they have also been central to the study of conservation. The fascinating adaptations of organisms to the unique ecosystems of the archipelago have left them particularly vulnerable to outside introductions. Drawing on lessons learned in Galapagos from Darwin's time to the present, this seminar explores evolution, conservation, and their connection in the Galapagos. Using case-study material on finches, iguanas, tortoises, cacti, *Scalesia* plants, and more, we will explore current theory and debate about adaptation, sexual selection, speciation, adaptive radiation, and other topics in evolution. Similarly, we will explore the special challenges Galápagos poses today for conservation, owing to both its unusual biota and the increasing human impact on the archipelago. This course includes an intensive eleven-day expedition to Galápagos to observe firsthand the evolutionary phenomena and conservation issues discussed in class. A chartered ship will serve as our floating classroom, dormitory, and dining hall as we work our way around the archipelago to visit as many as ten islands. For this portion of the class, undergraduates will be joined by a group of Stanford alumni and friends in a format called a Stanford "Field Seminar." Because our class time on campus is limited to one week before travel, students will be required to complete all course readings over the summer. Both on campus and in South America, the course emphasizes student contributions and presentations. Students will be asked to lead discussions and carry out literature research on the evolutionary and conservation biology of particular Galápagos species. The final assignment for the seminar is to complete a seven- to ten-page paper on the evolutionary biology and conservation challenges of a particular organism or adaptation and to present the main findings of that paper in a joint seminar of undergrads and alumni as we travel in Galápagos. Note: Students will arrive on campus and will be housed at Stanford until we leave for Galápagos. Travel to Galápagos will be provided and paid by Sophomore College (except incidentals) and is made possible by the support of the Stanford Alumni Association Travel/Study Program and generous donors. Students will return to campus late afternoon or evening on Sunday, September 23, the day before the fall term begins. Same as: ANTHRO 10SC.

HUMBIO 18SC. Conservation and Development Dilemmas in the Amazon. 2 Units.

This course explores the human dimensions of conservation efforts under way in the Amazon Basin of South America. It has two specific goals: (1) to introduce the human ecology of Amazonia; and (2) to assess the prospects for joint efforts at biodiversity conservation and community development. We will draw on case studies to investigate such topics as the causes and consequences of deforestation, the social impact of parks and protected areas, and the potential for "Integrated Conservation and Development Projects" (ICDPs) such as extractive reserves, natural forest management, biodiversity prospecting, and community-based ecotourism. The course views Amazonia as a microcosm of the challenges facing conservation and development efforts today in the Third World. Part of the course is an intensive 11-day expedition to the Peruvian Amazon, at no extra cost, to observe firsthand the conservation and development dilemmas discussed in class. We will visit ecologies in the rainforest, walking miles of trails to learn about local flora, fauna, and conservation efforts. We will also visit Machu Picchu in the upper reaches of the rainforest. For the travel portion of the class, undergraduates will be joined by a group of Stanford alumni and friends. Student contributions and presentations are emphasized throughout the course. Students are expected to come well-prepared to each session, to lead discussions, and to carry out literature research. The final assignment is a 6 to 8 page paper on a case study of your own choosing or an equivalent piece of a longer collaborative paper that offers a critical assessment of one particular conservation and/or development project in or near the region we will visit. Students will present the main findings of their papers in a joint seminar of undergraduates and alumni as we travel in the Peruvian Amazon. Note: Students will arrive on campus and will be housed at Stanford until we leave for the Amazon. Travel to and from Peru/organized by the Travel/Study Program of the Stanford Alumni Association is included; costs are defrayed by the Stanford Field Seminar Fund and generous donors. Same as: ANTHRO 11SC.

HUMBIO 21. Introduction to Brain and Behavior. 3 Units.

Evolutionary principles to understand how the brain regulates behavior physiologically, and is also influenced by behavioral interactions. Topics include neuron structure and function, transmission of neural information, anatomy and physiology of sensory and motor systems, regulation of body states, the biological basis of learning and memory, and behavioral abnormalities. Same as: BIO 20.

HUMBIO 27. Traditional Chinese Medicine. 1 Unit.

The philosophy and history behind traditional Chinese medicine. Concepts such as Qi, Yin/Yang, meridians, Chinese organs, and the 5 elements. How these concepts are applied through techniques such as acupuncture, herbal medicine, Qi gong, and massage. How traditional Chinese medicine is understood from a scientific standpoint. Political and socioeconomic implications. Observation of an acupuncturist. Readings on the integration of Eastern and Western medicine and on traditional Chinese medicine.

HUMBIO 79Q. Sexuality and Society. 3 Units.

This course will explore how sexual identity, attitudes, and behaviors are shaped by the messages sent by the various agents of society such as schools, family, peers, media, and religious, medical, and political institutions. The interaction of biology, psychology, and socio-cultural factors, such as gender roles and sexual/relationship scripts will be discussed, as will the intersection of sexuality and notions of love, romance, and commitment. Critical developmental periods, such as adolescence and emerging adulthood will be examined in depth. Students will explore their own values and feelings about sexuality and come to an understanding of how their beliefs were formed. We will discuss how information about sexuality is disseminated in our society and what we can do to help ensure that such information is used in a way that promotes healthy self-conceptions, behavior, and relationships.

HUMBIO 81Q. Introduction to Child Nutrition. 3 Units.

This course examines contemporary child nutrition in America, from the level of the intestinal villus to the food marketing directed at children, as well as the diseases associated with inappropriate nutrition. Students will obtain an understanding of what constitutes a healthy diet for growth and how dietary needs change throughout childhood and adolescence. We will review existing community and school-based nutrition interventions as well as pertinent literature on child nutrition. Students will also gain practical experience in healthy food preparation, emphasizing a seed-to-table approach.

HUMBIO 82A. Qualitative Research Methodology. 3 Units.

Goal is to develop knowledge and skills for designing and conducting qualitative research studies including purposes, conceptual contexts, research questions, methods, validity issues, and interactions among these facets. Each student designs a qualitative research study.

HUMBIO 82B. Advanced Data Analysis in Qualitative Research. 3 Units.

For students writing up their own qualitative research. Students prepare a complete draft presenting their own qualitative research study including results, with reports drafted section by section, week by week. Class provides feedback, guidance, support.

HUMBIO 85A. Essential Statistics for Human Biology. 4 Units.

Introduction to statistical concepts and methods that are essential to the study of questions in biology, environment, health, epidemiology and related areas. The course will teach and use the computer language R. Topics include distributions, probabilities, likelihood, linear models; illustrations will be based on recent research.

HUMBIO 86Q. Love as a Force for Social Justice. 3 Units.

Preference to sophomores. Biological, psychological, religious, social and cultural perspectives on the concept of love. How love is conceptualized across cultures; love as the basis of many religions; different kinds of love; the biology of love; love in action for social justice; the languages of love including art, literature, music, and poetry. Emphasis is on blog writing, participation, and oral presentation.

HUMBIO 87Q. Women and Aging. 5 Units.

Preference to sophomores. Biology, clinical issues, social and health policies of aging; relationships, lifestyles, and sexuality; wise women and grandmothers. Sources include scientific articles, essays, poetry, art, and film. Service-learning experience with older women. Service Learning Course (certified by Haas Center).

Same as: MED 87Q.

HUMBIO 88. Introduction to Statistics for the Health Sciences. 3 Units.

Students will learn the statistical tools used to describe and analyze data in the fields of medicine and epidemiology. This very applied course will rely on current research questions and publicly available data. Students will gain proficiency with Stata to do basic analyses of health-related data, including linear and logistic regression, and will become sophisticated consumers of health-related statistical results.

HUMBIO 91Q. Neuroethology: The Neural Control of Behavior. 3 Units.

Preference to sophomores. Animal behavior offers insights about evolutionary adaptations. The origins of the study of animal behavior and its development to the present. Discussion of original research papers. The use and misuse of parallels between animal and human behavior. Possible field trip to observe animals in their natural habitat.

HUMBIO 94Q. Law, Lawyers and Justice in Cinema. 4 Units.

Examination of how the law, justice and lawyers are depicted in film, how real the depictions are, and the social issues that are the subjects of the film and the effect of film on change, attitudes and policy.

HUMBIO 96Q. Injustice, Advocacy and Courage: The Path of Everyday Heroes. 3 Units.

This course will study the paradigms of people of courage, action and energy who have fought against injustice by advocating for causes against great odds and at personal risk. The focus will be on everyday people who have taken action, often at great personal risk, not for ambition, but because of their convictions and steadfast commitment to their beliefs.

HUMBIO 97Q. Sport, Exercise, and Health: Exploring Sports Medicine. 3 Units.

Preference to sophomores. Sports medicine is the practice of clinical medicine at the interface between health and performance, competition and well-being. While sports medicine had its origins in providing care to athletes, medical advances developed in care of athletes exerted a great effect on the nature and quality of care to the broader community. Topics include sports injuries, medical conditions associated with sport and exercise, ethics, coaching, women's issues, fitness and health, and sports science. Case studies.

Same as: ORTHO 97Q.

HUMBIO 99Q. Becoming a Doctor: Readings from Medical School, Medical Training, Medical Practice. 3 Units.

Preference to sophomores. For students considering medicine as a career. Goal is to acquaint students with medical school, training in medicine and surgery, and the practice of medicine and surgery using stories to illustrate the topics: how to pick a medical school and a residency; how medicine affects family life, especially children; the differences between surgical and medical specialties; the advantages and disadvantages among academic/teaching, pure research, group practice, HMO, hospital staff, or private practice; malpractice concerns; financial considerations; and the importance of empathy.

HUMBIO 110. Building a Sustainable Society: New Approaches for Integrating Human and Environmental Priorities. 3 Units.

"Building a Sustainable Society: New approaches to integrating human and environmental priorities" draws on economics, natural resources management, sociology and leadership science to examine theoretical frameworks and diverse case studies that illustrate the main drivers, core features and challenges of building a sustainable society where human beings and the natural environment thrive. Themes include collaborative consumption, the sharing economy, worker-owned cooperatives, community-corporate partnerships, cradle to cradle design, social entrepreneurship, impact investing, "beyond GDP" measures, and 21st century leadership. Critical perspectives, lectures and student-led discussions guide analysis of innovations within public, private and civic sectors globally, with emphasis on Latin America.

Same as: EARTHSYS 121.

HUMBIO 111. Human Dimensions of Global Environmental Change: Resilience, Vulnerability, and Environmental Justice. 3 Units.

The complexity of social and political issues surrounding global environmental change. Emphasis is on synergies precipitated by human-induced climatic change. Case studies and scenarios to explore the vulnerability and resilience in households, communities, regions, and nation-states most affected by extreme weather conditions. Their concerns, livelihood changes, and diverse responses of rural smallholders, indigenous communities, the state, and local and regional migrants. Central theme is environmental justice.

Same as: ANTHRO 173.

HUMBIO 111M. Marine Resource Economics and Conservation. 5 Units.

Economic and ecological frameworks to understand the causes of and potential solutions to marine resource degradation. Focus on conservation of marine biodiversity and ecosystem-based management. Applications include: commercial and recreational fisheries, marine reserves, and offshore energy production.

Same as: EARTHSYS 156M, ECON 156.

HUMBIO 112. Conservation Biology: A Latin American Perspective. 3 Units.

Principles and application of the science of preserving biological diversity. Conceptually, this course is designed to explore 4 major components relevant to the conservation of biodiversity, as exemplified by the Latin American region. The conceptual frameworks and principles, however, should be generally applicable, and provide insights for all regions of the world, including those of lesser biodiversity. Satisfies Central Menu Area 4 for Bio majors. Prerequisite: BIO 101, or BIO 43 or HUMBIO 2A with consent of instructor.

Same as: BIO 144.

HUMBIO 113. The Biologies of Humans and Plants. 3 Units.

The biological interdependence of humans and plants, particularly the ways in which people and plants have imposed selection pressures and ecological change on one another. Topics include evolution and basic plant structure; plant characteristics and genetic variants allowing domestication; effects of plant domestication on human biology; plants in traditional and contemporary diets; and human influences on plant biology through genetic manipulation and environmental change. Class meetings center on discussing journal articles.

HUMBIO 114. Environmental Change and Emerging Infectious Diseases. 3-5 Units.

The changing epidemiological environment. How human-induced environmental changes, such as global warming, deforestation and land-use conversion, urbanization, international commerce, and human migration, are altering the ecology of infectious disease transmission, and promoting their re-emergence as a global public health threat. Case studies of malaria, cholera, hantavirus, plague, and HIV.

Same as: ANTHRO 177, ANTHRO 277.

HUMBIO 116. Controlling Climate Change in the 21st Century. 3 Units.

Climate change is a global environmental, social, cultural and economic challenge. Responding to this challenge requires a paradigm shift which will alter energy production, transport, industry, politics, development strategies, north/south equity, and individual freedom and responsibilities around the world. Given the short term planning horizon of the majority of political, economic and social institutions, the slow burn of climate change presents major policy challenges. The course is designed to clarify the primary issues embedded in these challenges.

Same as: BIO 147, BIO 247, EARTHSYS 247.

HUMBIO 117H. Human Behavioral Ecology. 3-5 Units.

Theory, method, and application in anthropology. How theory in behavioral ecology developed to understand animal behavior is applied to questions about human economic decision making in ecological and evolutionary contexts. Topics include decisions about foraging and subsistence, competition and cooperation, mating, and reproduction and parenting.

Same as: ANTHRO 161, ANTHRO 261.

HUMBIO 118. Theory of Ecological and Environmental Anthropology. 5 Units.

Dynamics of culturally inherited human behavior and its relationship to social and physical environments. Topics include a history of ecological approaches in anthropology, subsistence ecology, sharing, risk management, territoriality, warfare, and resource conservation and management. Case studies from Australia, Melanesia, Africa, and S. America.

Same as: ANTHRO 90C.

HUMBIO 119. Demography: Health, Development, Environment. 3 Units.

Demographic methods and their application to understanding and projecting changes in human infant, child, and adult mortality and health, fertility, population, sex ratios, and demographic transitions. Progress in human development, capabilities, and freedoms. Relationships between population and environment. Prerequisites: numeracy and basic statistics; Biology or Human Biology core; or consent of instructor.

Same as: BIO 102.

HUMBIO 120. Health Care in America: An Introduction to U.S. Health Policy. 4 Units.

Health policy and health care delivery from a historical and a current policy perspective. Introduces cost, quality, and access as measures of health system performance. Considers institutional aspects of health care reform.

HUMBIO 120A. American Health Policy. 3 Units.

Issues in health care reform and the policy making process, the evolution of current systems, and theories underlying efforts for change. The national search for solutions to the problems of the uninsured, and the feasibility, options, and ramifications of alternative proposals for health care reform. Student presentations. Prerequisite: Human Biology core or equivalent, Human Biology 120, or consent of instructor.

HUMBIO 121. Critical Issues in Child Health. 4 Units.

Integrated picture of the physical and psychosocial health factors that result in a healthy child building on principles taught in the Human Biology core. Students apply basic human physiology to the physiology of the child to develop perspective on global pediatric health challenges and how the cultural context influences and defines the child living within it.

HUMBIO 121E. Ethnicity and Medicine. 1-3 Unit.

Weekly lecture series. Examines the linguistic, social class, and cultural factors that impact patient care. Presentations promote culturally sensitive health care services and review contemporary research issues involving minority and underserved populations. Topics include health care inequities and medical practices of African Americans, Asians, Latinos, Native Americans, immigrants, and refugees in both urban and rural settings. 1 unit requires weekly lecture attendance, completion of required readings, completion of response questions; 2 units requires weekly lecture attendance and discussion session, completion of required readings and weekly response questions; additional requirement for 3 units (HUMBIO only) is completion of a significant term paper Only students taking the course for 3 units may request a letter grade.

Same as: FAMMED 244.

HUMBIO 122. Beyond Health Care: Seeking Health in Society. 3 Units.

Available evidence at the national and cross-country level linking social welfare interventions and health outcomes. If and how non-health programs and policies could have an impact on positive health outcomes. Evaluation of social programs and policies that buffer the negative health impact of economic instability and unemployment among adult workers and their children. Examination of safety nets, including public health insurance, income maintenance programs, and disability insurance. Prerequisites: HUMBIO 4B or equivalent, and background in research methods and statistics.

Same as: PEDS 222.

HUMBIO 122M. Challenges of Human Migration: Health and Health Care of Migrants and Autochthonous Populations. 3 Units.

An emerging area of inquiry. Topics include: global migration trends, health Issues/aspects of migration, healthcare and the needs of immigrants in the US, and migrants as healthcare providers: a new area of inquiry in the US. Class is structured to include: lectures lead by the instructor and possible guest speakers; seminar, discussion and case study sessions led by students.

Same as: PEDS 212.

HUMBIO 122S. Social Class, Race, Ethnicity, and Health. 4 Units.

Examines health disparities in the U.S., looking at the patterns of those disparities and their root causes. Explores the intersection of lower social class and ethnic minority status in affecting health status and access to health care. Compares social and biological conceptualizations of race and ethnicity.

HUMBIO 123. Obesity in America: Clinical and Public Health Implications. 3-4 Units.

Interdisciplinary clinical, research, and policy approaches. The prevalence, predictors, and consequences of obesity and diabetes; biological and physiological mechanisms; clinical treatments including medications and surgery; and the relevance of behavioral, environmental, economic, and policy approaches to obesity prevention and control. Prerequisite: Human Biology core or equivalent, or consent of instructor.

HUMBIO 125. Current Controversies in Women's Health. 2-3 Units.

Interdisciplinary. Focus is on the U.S. Topics include: health research; bioethical, legal, and policy issues; scientific and cultural perspectives; social influences; environmental and lifestyle effects on health; and issues related to special populations. Guest lecturers; student debates. Prerequisite: Human Biology core or equivalent, or consent of instructor. Only students who can attend both Mon and Wed classes can register for 3 units; students who can attend only Wed, register for 2 units. Same as: OBGYN 256.

HUMBIO 126. Promoting Health Over the Life Course: Multidisciplinary Perspectives. 3 Units.

Disease prevention and health promotion topics pertinent to different stages of the life span emphasizing healthy lifestyle and reducing risk factors in both individuals and communities. Focus is on scientific investigation, the application of behavioral science to risk reduction strategies, and the importance of health promotion as a social and economic imperative. Topics include: epidemiology of chronic diseases; social determinants of health, behavior change; obesity, nutrition, and stress; young adult, mid-life and aging health issues; health care delivery and public health system; workplace wellness programs; and environmental and international issues. Prerequisite: Human Biology core or equivalent, or consent of instructor.

HUMBIO 127A. Community Health: Assessment and Planning I. 4 Units.

Major determinants of health in a community. Working with community partners to identify health issues and plan programs and policies to prevent disease and promote health. Service learning component involving students in community health assessment techniques. Final grade given upon completion of HUMBIO 127B. Service Learning Course (certified by Haas Center). Prerequisite: 4B or equivalent, or consent of instructor.

HUMBIO 127B. Community Health: Assessment and Planning II. 4 Units.

Continuation of 127A. Service learning course with emphasis on conducting community health assessment and planning projects in collaboration with community-based organizations. Service Learning Course (certified by Haas Center). Prerequisite: 4B or equivalent, 127A, or consent of instructor.

HUMBIO 128. Community Health Psychology. 4 Units.

Social ecological perspective on health emphasizing how individual health behavior is shaped by social forces. Topics include: biobehavioral factors in health; health behavior change; community health promotion; and psychological aspects of illness, patient care, and chronic disease management. Prerequisites: HUMBIO 3B or PSYCH 1, or equivalent. Same as: PSYCH 101.

HUMBIO 129. Critical Issues in International Women's Health. 4 Units.

Women's lives, from childhood through adolescence, reproductive years, and aging. Economic, social, and human rights factors, and the importance of women's capacities to have good health and manage their lives in the face of societal pressures and obstacles. Emphasis is on life or death issues of women's health that depend on their capacity to negotiate or feel empowered, including maternal mortality, violence, HIV/AIDS, reproductive health, and sex trafficking. Organizations addressing these issues. A requirement of this class is participation in public blogs. Prerequisites: Human Biology core or equivalent or consent of instructor. Same as: FEMGEN 129.

HUMBIO 129M. Measuring Global Health. 4 Units.

Open to MD, graduate, and undergraduate students. Assessing the global burden of disease, its distribution among and within countries, its causes, and appropriate interventions requires rigorous quantitative approaches. This course develops skills in these areas by critically examining questions like: How do we know who is sick and where? How are risk factors incorporated into our projections of future disease trends? How do we combine mortality and morbidity in a meaningful way? What works for improving health efficiently? Workshops build familiarity with relevant data and their analysis. Prerequisite: coursework in statistics, biostatistics, quantitative epidemiology, econometrics, or equivalent. Same as: HRP 241, MED 231.

HUMBIO 129S. Global Public Health. 4 Units.

The class is an introduction to the fields of international public health and global medicine. It focuses on resource poor areas of the world and explores major global health problems and their relation to policy, economic development and human rights. The course is intended for students interested in global health, development studies, or international relations, and provides opportunities for in-depth discussion and interaction with experts in the field. .

HUMBIO 129W. Health Care Systems Around the World. 4 Units.

This course will explore the role of health care systems in societies around the world, identifying the common challenges facing health care systems and how different institutional structures in different countries perform in response to these challenges. We will structure the course around general conceptual frameworks related to key health system institutions (including financing, insurance, provider payment, patient cost-sharing, and the regulation of medical technology). From this foundation, we will draw on the experience of individual countries (high and low income, with heavy chronic disease and infectious disease burdens) to illustrate the function of these institutions under real-world circumstances observed around the globe.

HUMBIO 130. Human Nutrition. 4 Units.

The study of food, and the nutrients and substances therein. Their action, interaction, and balance in relation to health and disease. Emphasis is on the biological, chemical, and physiological processes by which humans ingest, digest, absorb, transport, utilize, and excrete food. Dietary composition and individual choices are discussed in relationship to the food supply, and to population and cultural, race, ethnic, religious, and social economic diversity. The relationships between nutrition and disease; ethnic diets; vegetarianism; nutritional deficiencies; nutritional supplementation; phytochemicals.

HUMBIO 132. Functional Anatomy of Exercise. 4 Units.

Interdisciplinary: physiology, pathology, and biomechanics. Anatomy of the body's major joints in the context of exercise and movement emphasizing adaptations that occur with intensity and nature of exercise, age, and disease. Students will work in cooperative groups in the Stanford Human Performance Lab to conduct projects and experiments relating to biomechanics, exercise physiology, and anatomy of the athlete. Enrollment limited to 40. Prerequisites: HumBio 139 or consent of instructor.

HUMBIO 133. Human Physiology. 4 Units.

Human physiology will be examined by organ systems: respiratory, cardiovascular, renal, and gastrointestinal. Concepts of cell and molecular biology that underlie organ development, pathophysiology and opportunities for regenerative medicine will be introduced. Signaling and integrative control by the endocrine, autonomic and central nervous systems will be introduced. Prerequisite: Biology or Human Biology core. Same as: BIO 112, BIO 212.

HUMBIO 135. Exercise Physiology. 4 Units.

How body systems respond to the stress of acute exercise and adapt to chronic exercise training. How the cardiovascular system adapts to optimize oxygen delivery and utilization, how muscles generate force and hypertrophy in response to training, how metabolic/biochemical pathways are regulated to support the increased energy demand of exercise. Theories on the causes of fatigue and muscle soreness, and on what limits human performance. Applied topics such as the effects of aging, gender, and environmental conditions (high altitude, heat, cold) on exercise capacity will also be discussed. Prerequisite: Human Biology core, Biology core, or equivalent, or consent of instructor.

HUMBIO 135S. Applied Topics in Exercise Physiology and Metabolism. 3 Units.

Discussions of controversial topics related to exercise physiology, sports performance, impacts of aging and environmental physiology. Special focus on how to get science out of the lab via novel training programs, medical device development, and science communication. Students will learn the fundamentals of science storytelling and podcast production. A requirement of this class is participation in blogs, participation in discussions of physiology research, and creation of a science-based podcast. Enrollment limited to 10. Prerequisites: HB135 or consent of instructor.

HUMBIO 139. Sports Medicine. 4 Units.

Sports, exercise, health, and medicine throughout the human performance continuum. Exercise as therapy; injuries and illnesses that result from sports and exercise; and the use of technology in modern sports science. Sources include physiology, nutrition, and biomechanics. Medical problems exacerbated or caused by exercise and sport; maximizing performance in elite athletes; and population-based issues such as exercise and its relationship to health, drugs in sport, and aging. Prerequisite: Biology or Human Biology core, or consent of instructor.

HUMBIO 140. Sex and Gender Differences in Human Physiology and Disease. 2-3 Units.

Chromosomal and hormonal influences on cells, tissues, and organs that underlie the development of reproductive organs and sexual dimorphism of the neuroendocrine system. Effects of endogenous and exogenous sex hormones and environmental factors that differ between men and women on the musculoskeletal, neurological, cardiovascular, and immunological systems over the lifecourse, from conception to puberty, through reproductive phases (including changes during the menstrual cycle up to and beyond menopause in women and with aging in men). Transgender health issues. Guest lecturers. Prerequisite: Human Biology core or equivalent, or consent of instructor. Same as: MED 240.

HUMBIO 142. Adolescent Development. 4 Units.

Underlying changes and their consequences in everyday functioning. Physical, cognitive, social, and sexual development; how these changes influence the emerging sense of identity, autonomy, and intimacy. Contexts in which adolescents move such as family, friends and peers, school, and workplace. Focus is on normal development of boys and girls; attention to problem outcomes including eating disorders, depression, and teen pregnancy. Prerequisite: 3B or PSYCH 1, or consent of instructor.

HUMBIO 142M. Special Topics in Adolescent Mental Health. 4 Units.

Includes the study of aspects of common disorders seen in adolescent populations, such as prevalence, developmental course, gender differences, theoretical explanations, and therapeutic interventions. Topics will include mood/anxiety disorders, eating disorders, learning disabilities and ADHD, sexual risk behaviors, developmental disorders, substance abuse, and self-harm. Goals of this course include getting students to think critically about the unique mental health needs of adolescents, collaborating on devising ways to improve the way our society meets those needs, and strengthening writing and communication skills applicable to this area of inquiry.

HUMBIO 143. Adolescent Sexuality. 4 Units.

Developmental perspective. Issues related to scientific, historical, and cultural perceptions; social influences on sexual development; sexual risk; and the limitations and future directions of research. Sexual identity and behavior, sexually transmitted diseases including HIV, pregnancy, abortion, gay and lesbian youth, sex education and condom availability in schools, mass media, exploitative sexual activity, and difficulties and limitations in studying adolescent sexuality. Legal and policy issues, gender differences, and international and historical trends. Prerequisite: Human Biology core or equivalent, or consent of instructor.

HUMBIO 144. Boys' Psychosocial Development. 3 Units.

From early childhood through adolescence. Emphasis is on how boys' lives and experiences are embedded within their interpersonal relationships and social and cultural contexts. Interdisciplinary approach including perspectives from fields such as psychology, sociology, anthropology, family studies, and education. Prerequisite: Human Biology core, or Developmental Psychology, or consent of instructor.

HUMBIO 145L. The Biology and Evolution of Language. 4-5 Units.

Lecture course surveying the biology, linguistic functions, and evolution of the organs of speech and speech centers in the brain, language in animals and humans, the evolution of language itself, and the roles of innateness vs. culture in language. Suitable both for general education and as preparation for further studies in anthropology, biology, linguistics, medicine, psychology, and speech & language therapy. Anthropology concentration: CS, EE. No prerequisites.

Same as: ANTHRO 171, ANTHRO 271.

HUMBIO 146D. Developmental Disabilities: From Biology to Policy. 3 Units.

Fifteen percent of US children have disabilities. While advances in medicine and technology have increased life expectancy for these children, health care delivery, education, and public attitudes have not kept pace. Students in this course will learn the possibilities and limitations of new biomedical treatments of Down syndrome, cerebral palsy, and autism. Students will also evaluate the impact of public policy initiatives, such as the Individuals with Disabilities Education Act and Americans with Disabilities Act on inclusion and participation in society.

Same as: PEDS 246.

HUMBIO 148W. Women, Fertility, and Work. 5 Units.

How do choices relating to bearing, nursing, and raising children influence women's participation in the labor force? Cultural, demographic, and evolutionary explanations, using crosscultural case studies. Emphasis is on understanding fertility and work in light of the options available to women at particular times and places.

Same as: ANTHRO 151, ANTHRO 251.

HUMBIO 149. Psychological and Educational Resilience Among Children and Youth. 4 Units.

Theoretical, methodological, and empirical issues pertaining to the psychological and educational resilience of children and adolescents. Overview of the resilience framework, including current terminology and conceptual and measurement issues. Adaptive systems that enable some children to achieve successful adaptation despite high levels of adversity exposure. How resilience can be studied across multiple levels of analysis, ranging from cell to society. Individual, family, school, and community risk and protective factors that influence children's development and adaptation. Intervention programs designed to foster resilient adaptation in disadvantaged children's populations.
Same as: EDUC 256.

HUMBIO 149L. Longevity. 4 Units.

Interdisciplinary. Challenges to and solutions for the young from increased human life expectancy: health care, financial markets, families, work, and politics. Guest lectures from engineers, economists, geneticists, and physiologists.
Same as: NENS 202, PSYCH 102.

HUMBIO 150A. Assisted Reproductive Technologies. 1-3 Unit.

Primary and current literature in basic and clinical science aspects of assisted reproductive technologies (ART), and demonstrations of current ART techniques including in vitro fertilization and embryo culture, and micromanipulation procedures such as intracytoplasmic sperm injection and embryo biopsy and cryopreservation. Class only may be taken for 1 unit. 2 units includes papers and attendance at clinical demonstrations. 3 units includes a term paper. Recommended: DBIO 201, or consent of instructors.
Same as: DBIO 202, OBGYN 202.

HUMBIO 151P. PRINCIPLES OF EPIDEMIOLOGY. 3 Units.

Epidemiology is the study of the distribution and determinants of health and disease in human populations. This course introduces students to the major epidemiological study designs and how to compute epidemiological measures of association. The course also covers how error, bias, and confounding can affect analytic findings and how to detect and interpret interaction effects. Students will learn through lectures, problem sets, and critical appraisal of both classic and contemporary research articles.

HUMBIO 151R. Biology Research in the Age of Informatics. 3 Units.

This course will introduce bioinformatics tools and databases that are commonly used in biology and medicine. The financial, political and social infrastructure that supports bioinformatics databases and biology research will also be discussed. Students will select a biology-related topic of their choice and will use this topic as a case study to learn about bioinformatics tools, science funding, the process of abstract and grant writing and the portrayal of science in the media. Programming skills are NOT required.
Prerequisites: HumBio 2A, 3A or equivalent.

HUMBIO 152. Viral Lifestyles. 3 Units.

Viral lifestyle is a seminar devoted to exploring contemporary topics in microbiology with a focus on the global microbiome. The course includes lectures and will provide an opportunity for students to interact with each other, the instructor and guest lecturers to explore novel research areas in microbiology that are still being formed. The course will begin with lectures on topics such as cross-species transmission of microbes and human microbiome and will transition to presentation and discussion led by student groups. A significant percentage of class will be devoted to presentation and discussion focused on group projects.

HUMBIO 153. Parasites and Pestilence: Infectious Public Health Challenges. 4 Units.

Parasitic and other pestilence of public health importance. Pathogenesis, clinical syndromes, complex life cycles, and the interplay among environment, vectors, hosts, and reservoirs in historical context. Public health policy initiatives aimed at halting disease transmission. World Health Organization tropical disease targets including river blindness, sleeping sickness, leishmaniasis, schistosomiasis, mycobacterial disease (tuberculosis and leprosy), malaria, toxoplasmosis, dracunculiasis, and intestinal helminthes. Guest lecturers with expertise in disease control.
Prerequisite: Human Biology core or equivalent, or consent of instructor.

HUMBIO 154. Cancer Epidemiology. 4 Units.

Epidemiological methods relevant to human research in cancer. The concepts of risk; case control, cohort, and cross-sectional studies; clinical trials; bias; confounding; interaction; screening; and causal inference. Social, political, economic, and ethical controversies surrounding cancer screening, prevention, and research. Prerequisite: Human Biology core or equivalent, or consent of instructor.

HUMBIO 154A. Outbreaks, Epidemics, & Disease Control Systems. 4 Units.

This course teaches skills in disease control epidemiology. Students will engage in in-depth interdisciplinary study of disease detection and control strategies from a "systems science" perspective, which addresses classical public health dilemmas such as how to allocate limited resources, investigate disease outbreaks, and analyze common problems at the intersection of social policy and public health. Lectures and problem sets will focus on developing quantitative skills essential to public health practice, emphasizing the use of common mathematical techniques for disease control. Readings will complement the lectures and problem sets by offering critical perspectives from the sociology of public health. In-depth case studies from non-governmental organizations, departments of public health, and international agencies will drive the course.

HUMBIO 155B. The Vaccine Revolution. 6 Units.

Advanced seminar. Human aspects of viral disease, focusing on recent discoveries in vaccine development and emerging infections. Journal club format: students choose articles from primary scientific literature, write formal summaries, and synthesize them into a literature review. Emphasis is on analysis, experimental design, and interpretation of data. Oral presentations. Enrollment limited to 8. Prerequisite: prior enrollment in HumBio 155H Humans and Viruses or MI 116, The Human Virosphere
Same as: MI 115B.

HUMBIO 155H. Humans and Viruses I. 6 Units.

Introduction to human virology integrating epidemiology, molecular biology, clinical sciences, social sciences, history, and the arts. Emphasis is on host pathogen interactions and policy issues. Topics: polio and vaccination, smallpox and eradication, yellow fever and history, influenza and genomic diversity, rubella and childhood infections, adenovirus and viral morphology, ebola and emerging infection, lassa fever and immune response.
Same as: MI 155H.

HUMBIO 156. Global HIV/AIDS. 3 Units.

Public health, policy, and research issues. Identify resources at Stanford, and from government, NGOs, and pharmaceutical, advocacy, and international organizations. Sources include biomedical, social, and behavioral sciences. Emphasis on student projects which feature methodologies in the development and design of Operational Research and Implementation Science in AIDS/TB and Malaria in response to PEPFAR and Global Fund programs. Guest lectures. Prerequisite: Human Biology core or equivalent, or consent of instructor.
Same as: MED 256.

HUMBIO 157. The Biology of Stem Cells. 3 Units.

The role of stem cells in human development and potential for treating disease. Guest lectures by biologists, ethicists, and legal scholars.

Prerequisites: HumBio 2A and 3A, or the equivalent in the BioCore in Biological Sciences.

HUMBIO 158. The Human Genome and Disease. 3 Units.

The variability of the human genome and the role of genomic information in research, drug discovery, and human health. Concepts and interpretations of genomic markers in medical research and real life applications. Human genomes in diverse populations. Original contributions from thought leaders in academia and industry and interaction between students and guest lecturers. Students with a major, minor or coterm in Biology: 109A/209A or 109B/209B may count toward degree program but not both.

Same as: BIO 109A, BIO 209A, BIOC 109A, BIOC 209A.

HUMBIO 158G. Genomics, Bioinformatics and Medicine. 3 Units.

Molecular basis of inherited human disease. Diagnostics approaches: simple Mendelian diseases and complex, multifactorial diseases.

Genomics: functional genomics, epigenetics, gene expression, SNPs, copy number and other structural genomic variations involved in disease.

Novel therapeutic methods: stem cell therapy, gene therapy and drug developments that depend on the knowledge of genomics. Personal genomics, pharmacogenomics, clinical genomics and their role in the future of preventive medicine. Prerequisites: BIO 41 or HUMBIO 2A or consent of instructor. Those with credit in BIOC 118 not eligible to enroll. Course webpage: <http://biochem158.stanford.edu/>
Same as: BIOC 158, BIOC 258, BIOMEDIN 258.

HUMBIO 159. Genes and Environment in Disease Causation: Implications for Medicine and Public Health. 2-3 Units.

The historical, contemporary, and future research and practice among genetics, epidemiology, clinical medicine, and public health as a source of insight for medicine and public health. Genetic and environmental contributions to multifactorial diseases; multidisciplinary approach to enhancing detection and diagnosis. The impact of the Human Genome Project on analysis of cardiovascular and neurological diseases, and cancer. Ethical and social issues in the use of genetic information. Prerequisite: basic course in genetics; for undergraduates, Human Biology core or equivalent or consent of instructor.

Same as: HRP 238.

HUMBIO 160. Human Behavioral Biology. 5 Units.

Multidisciplinary. How to approach complex normal and abnormal behaviors through biology. How to integrate disciplines including sociobiology, ethology, neuroscience, and endocrinology to examine behaviors such as aggression, sexual behavior, language use, and mental illness.

Same as: BIO 150, BIO 250.

HUMBIO 161. The Neurobiology of Sleep. 4 Units.

Preference to seniors and graduate students. The neurochemistry and neurophysiology of changes in brain activity and conscious awareness associated with changes in the sleep/wake state. Behavioral and neurobiological phenomena including sleep regulation, sleep homeostasis, circadian rhythms, sleep disorders, sleep function, and the molecular biology of sleep. Enrollment limited to 16.

Same as: BIO 149, BIO 249.

HUMBIO 163. Neural Systems and Behavior. 4 Units.

The field of neuroethology and its vertebrate and invertebrate model systems. Research-oriented. Readings include reviews and original papers. How animal brains compare; how neural circuits are adapted to species-typical behavior; and how the sensory worlds of different species represent the world. Lectures and required discussions. Satisfies Central Menu Area 3 for Bio majors. Prerequisites: BIO 42, HUMBIO 4A.

Same as: BIO 163, BIO 263.

HUMBIO 164. Autism Spectrum Disorders. 3 Units.

Abnormal social deficits, language development and repetitive behaviors, are the core symptoms of Autism Spectrum Disorders (ASD), a group of neurodevelopmental disorders that affect about 1% of all children and costs society an estimated \$35B annually. This interactive new seminar will provide an overview of our understanding of ASD, from genetics through epidemiology, biology and treatment, and the many implications for society, including the principles and problems of diagnosis, its impact upon family and lifespan, and controversies regarding its etiology, perception and care.

HUMBIO 166. Food and Society: Exploring Eating Behaviors in Social, Environmental, and Policy Context. 4 Units.

The class examines the array of forces that affect the foods human beings eat, and when, where, and how we eat them, including human labor, agriculture, environmental sustainability, politics, animal rights/welfare, ethics, policy, culture, economics, business, law, trade, and ideology, and psychology. The class addresses the impact of current policies and actions that might be taken to improve human nutrition and health; macro-scale influences on food, nutrition, and eating behavior.

HUMBIO 167. The Art of Vision. 3 Units.

This course concerns eyes and art. It asks how eyes are built, how they process visual information, and how they are affected by diseases that are major problems in our society. These topics are illustrated through fine art and famous artists, and we explore the implications of both normal and abnormal vision for art. There are short diversions into animal eyes and the role of vision in music, literature, and sports.

HUMBIO 170. Justice, Policy, and Science. 5 Units.

The role of science in civil rights, justice, policy, criminal justice, evidence, education, and disabled rights.

HUMBIO 170A. Sex and the Law. 4 Units.

This course uses an interdisciplinary approach to examine the laws and regulation of sex in the United States by considering the legal, policy, social, political and scientific bases (or lack thereof) of such laws, the context and objectives of sex regulation, and the political dynamics of contemporary and controversial issues presented by this subject. Some laws reflect policies to protect persons from harm related to sexual conduct, such as rape, assault and pedophilia. Other laws impose notions of morality, such as sodomy, incest or polygamy, or homosexuality, or reflect policy or social judgments regarding abortion, contraceptives, and sexual activity of minors. Regulation often concern consensual conduct. This course will consider these topics from varying perspectives and policy objectives, and in the context of Constitutional and other liberty interests.

HUMBIO 172B. Children, Youth, and the Law. 5 Units.

How the legal rights of children and adolescents in America are defined, protected, and enforced through the legal process within the context of their developmental needs and competing societal interests. Topics: origins and definitions of children's rights; adoption; custody; the juvenile justice system; education; informed consent; health care; protection from harm and child welfare; due process; and privacy and freedom of expression. Interactive, using hypotheticals for discussion and analysis. A and B alternate annually; students may take one or both. Prerequisite: Human Biology core or equivalent, or consent of instructor.

HUMBIO 173. Science, Innovation and the Law. 3 Units.

The interaction of science, business and law: how scientific ideas are protected by law; the rights of those who invent, develop, and finance scientific discovery; and how ideas are commercialized and brought to market. What kinds of research, discovery, and innovation are protected; who has rights that can be protected; what kinds of rights can be protected, and the kinds of protections that apply; how inventions are commercialized; and the success and failure of businesses based on scientific discovery. Prerequisite: Human Biology core or equivalent, or consent of instructor.

HUMBIO 174. Foundations of Bioethics. 3 Units.

Classic articles, legal cases, and foundational concepts. Theoretical approaches derived from philosophy. The ethics of medicine and research on human subjects, assisted reproductive technologies, genetics, cloning, and stem cell research. Ethical issues at the end of life. Prerequisite: Human Biology core or equivalent, or consent of instructor.

HUMBIO 175. Health Care as Seen Through Medical History, Literature, and the Arts. 3 Units.

The differences between disease as pathology and as the patient's experience. Topics include: patient-doctor relationships; medical technology; the changing focus on illness; gender issues; love, sex, and illness; mental illness; sick children; and death and dying. Limited enrollment.

HUMBIO 175S. Novels and Theater of Illness. 3 Units.

Illness and disease through novels and plays by authors including Shakespeare, Miller, Sophocles, Hemingway, and Camus. How sickness involves the patient, family, community, and state. Limited enrollment.

HUMBIO 176. Impact of Infectious Diseases on Human History. 3 Units.

Impact of infectious diseases on human society. Some topics include: Plague of Justinian and 14th century; impact on exploration, trade and conquest; how slavery, malaria and yellow fever conspired to alter the New World; Microbes and war; diseases of poverty, tuberculosis and others; Cholera and public health; pandemic influenza; diseases of human progress. Students give a 30 minute presentation on a topic of their choosing that exemplifies an aspect of the impact of politics, societal influences, religion or other forces on infectious diseases.

Same as: MED 176.

HUMBIO 177C. Culture, Narrative, and Medicine. 5 Units.

This course examines the ways in which medicine is practiced in diverse cultural contexts with narrative skills of recognizing, interpreting and being moved by the stories of illness. It is an examination of the human experience of illness and healing through narratives as presented in literature, film, and storytelling. We explore how cultural resources enable and empower healing and how narrative medicine can guide the practice of culturally competent medical care.

Same as: ANTHRO 178A.

HUMBIO 178. Ethics and Politics of Public Service. 5 Units.

Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford.

Same as: CSRE 178, ETHICSOC 133, PHIL 175A, PHIL 275A, POLISCI 133, PUBLPOL 103D, URBANST 122.

HUMBIO 178T. Human Trafficking: Historical, Legal, and Medical Perspectives. 3 Units.

(Same as History 105C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution and labor exploitation, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning and offers an optional service-learning component.

Same as: FEMGEN 5C, HISTORY 5C, SOMGEN 205.

HUMBIO 178V. Violence Against Women: Theory, Issues, and Prevention. 3-4 Units.

[Technical error is capping enrollment prematurely; come to first day of class] Course offers an interdisciplinary feminist perspective on the causes of gender violence, addresses the multi-leveled approaches to ending gender violence, and explores the relationship between violence against women and other forms of oppression: racism, economic exploitation, heterosexism and social class. Framework examines institutional barriers maintaining gender violence in our culture and considers multi-dimensional solutions. Students from every discipline, women and men, apply theoretical perspectives to professional goals and an optional service-learning project. Service Learning Course (certified by Haas Center)

Same as: FEMGEN 138, FEMGEN 238.

HUMBIO 179S. Spirituality and Healing. 3-5 Units.

The puzzle of symbolic healing. How have societies without the resources of modern medicine approached healing? Why do these rituals have common features around the world? Shamanism, spirit possession, prayer, and the role of placebos in modern biomedicine. Students do ethnographic work and practical explorations along with more traditional scholarly approaches to learning.

Same as: ANTHRO 184.

HUMBIO 180. Human Skeletal Anatomy. 5 Units.

Study of the human skeleton (a. k. a. human osteology), as it bears on other disciplines, including medicine, forensics, archaeology, and paleoanthropology (human evolution). Basic bone biology, anatomy, and development, emphasizing hands-on examination and identification of human skeletal parts, their implications for determining an individual's age, sex, geographic origin, and health status, and for the evolutionary history of our species. Three hours of lecture and at least three hours of supervised and independent study in the lab each week.

Same as: ANTHRO 175, ANTHRO 275, BIO 174, BIO 274.

HUMBIO 186. Biological Clocks. 3 Units.

The biological basis for endogenous timekeeping in organisms from flies to human beings. How biological clocks are constructed at the molecular, tissue, and behavioral levels; how these clocks interact with other physiological systems and allow animals to anticipate changes in their environment. Applications of circadian rhythm principles to treating human disorders and diseases such as cancer. Prerequisite: Biology or Human Biology core, or consent of instructor.

HUMBIO 193. Research in Human Biology. 1-5 Unit.

Independent research conducted under faculty supervision, in junior or senior year, normally but not necessarily in pursuit of an honors project. May be taken for a maximum 3 quarters of credit. Prerequisite: Faculty approval; application available in student services office.

HUMBIO 194. Honors. 1-10 Unit.

Completion of the honors project, normally taken in the student's final quarter. First component: the honors thesis, a final paper providing evidence of rigorous research, fully referenced, and written in an accepted scientific style. Second component: participation in the honors symposium, including a 10-minute oral presentation followed by a brief question and answer session. Prerequisites: 193 or 199, and acceptance into the honors program.

HUMBIO 197. Human Biology Internship. 1-4 Unit.

Limited to and required of Human Biology majors. A supervised field, community, or lab experience of student's choosing, pre-approved by Human Biology faculty and student advisers, and initiated at least three quarters prior to graduation. Participation in a poster session on the internship experience is required during the first quarter that the student is in residence at Stanford after completion of the internship. May be repeated for credit. Prerequisite: Human Biology core.

HUMBIO 198. Senior Tutorial in Human Biology. 1-5 Unit.

Reading for Human Biology majors in exceptional circumstances and under sponsorship of Human Biology associated faculty. Students must apply through Human Biology student services before registering. Reading list, paper, and evaluation required. May be repeated for credit.

HUMBIO 199. Directed Reading/Special Projects. 1-4 Unit.

Human Biology majors must obtain a sponsor from the Human Biology associated faculty or the Academic Council. Non-majors and students who have not declared must obtain a sponsor only from the Human Biology associated faculty. Students must complete application in student services office.

HUMBIO 200. Teaching of Human Biology. 1-5 Unit.

For upper division undergraduates and graduate students. Practical experience in teaching Human Biology or serving as an assistant in a lecture course. May be repeated for credit.

Human Resource Management Courses

HRMGT 280. Human Resource Management. 2 Units.

An organization's human resources are very often a key, even the key, to the organization's success. Human resource management (HRM) is therefore of strategic importance. We begin by surveying the fundamentals of human resource management from the perspective of the organization's overall strategy, relying on concepts and theories from your previous economics and organizational behavior courses. Then we focus on the question of motivation and, in particular, how organizations can successfully motivate their employees to provide "efforts" that go above and beyond the nominal specs of the particular job.

HRMGT 289. Sloan: Talent Management Strategy. 4 Units.

Everyone manages people; how can it be done better? How can it be done to facilitate your overall strategy, for your company and your career? This class covers the standard topics of people management: recruitment and selection; performance evaluation; incentives and compensation; promotions; job design; training; teamwork; and layoffs and retention. Each topic is covered through case studies and then analytical models for choosing and using best practices. The class content is aimed at managers who recognize that people management is important, but who typically want to spend less time managing people and more time doing what they really enjoy.

HRMGT 302. Incentives and Productivity. 4 Units.

This course is designed to teach the student how to use economics to solve practical personnel problems that affect worker productivity. Topics include: selecting the best workers to hire, training workers, turnover, setting compensation strategically, structuring salespersons' commissions, downsizing, using promotions as an incentive mechanism, and other topics. Examples and cases will be presented to demonstrate the importance of using economic techniques to structure human resources programs. The course will appeal most to the student who expects to be a general manager or who hopes to run his or her own business. Although the human resources specialist may benefit from this course, the emphasis will be on decisions that affect personnel, but are made primarily by general managers. The class format is somewhat unusual. Most classes consist of lecture with questions, but two are class workshops. The lecture will present a theoretical development of a topic. The questions discussed during the last part of the lecture period will involve practical business application of the theory presented in lecture. This course is more technical than other human resources courses, but should be accessible to anyone who has successfully completed the economics and statistics courses in the MBA core. Every student is expected to know calculus and basic probability and statistics. Although I will not emphasize the technical aspects on the final exam, the problem sets will require some knowledge of mathematics. To ease your fears, many "poets" have taken variants of this course in the past and have done well. There will be graded team problem sets and a final exam.

HRMGT 512. Changing How We Manage People. 1 Unit.

This course is designed for individuals interested in changing how people are managed to dispel flawed assumptions about human resource strategies and develop new techniques. In the past, human resource practices rarely served as a source of innovation in organizations. Rather, when establishing guidelines, policies, and rules, most companies chose to follow the norm, which often was unsatisfying and frustrating for their employees. These same firms chose not to focus on their human resource practices as a source of competitive advantage that could be used to hire the best talent, perform at the highest level, and weather the most difficult times. More recently, new ideas about the optimal approach to managing the firm's most important asset—its human capital—have flourished. As a result, a debate has surfaced in the corporate world about the best ways to get work done—from the allocation of job tasks to the structure of financial incentives. We tackle many of these fundamental questions in this course—what is the best way to hire people, to give performance feedback, to foster collaboration—but we look at these problems through a new lens, one informed more by evidence and analysis than by tradition and intuition. This class is an exercise in collaboration: a joint effort by a practitioner and an academic who are both hopelessly optimistic about how the management of human resources can be improved. In each session, we will tackle a novel and important topic (e.g., engagement surveys?) from three distinct points of view, first describing what is currently done, then identifying alternative approaches in other firms, and finally considering what a bold and creative approach might look like. After taking this course, you will be better able to: (1) identify misconceptions that undermine the effectiveness of human resource strategies; (2) learn new insights about human motivation in the workplace and (3) design new tools that can improve the working lives of your employees. We believe this perspective will be invaluable to you throughout your career.

HRMGT 691. PhD Directed Reading. 1-15 Unit.

This course is offered for students requiring specialized training in an area not covered by existing courses. To register, a student must obtain permission from the faculty member who is willing to supervise the reading.

Same as: ACCT 691, FINANCE 691, GSBGEN 691, MGTECON 691, MKTG 691, OB 691, OIT 691, POLECON 691, STRAMGT 691.

HRMGT 692. PhD Dissertation Research. 1-15 Unit.

This course is elected as soon as a student is ready to begin research for the dissertation, usually shortly after admission to candidacy. To register, a student must obtain permission from the faculty member who is willing to supervise the research.

Same as: ACCT 692, FINANCE 692, GSBGEN 692, MGTECON 692, MKTG 692, OB 692, OIT 692, POLECON 692, STRAMGT 692.

HRMGT 802. TGR Dissertation. 0 Units.

Same as: ACCT 802, FINANCE 802, GSBGEN 802, MGTECON 802, MKTG 802, OB 802, OIT 802, POLECON 802, STRAMGT 802.

Humanities & Sciences Courses

HUMSCI 201. Graduate Environment of Support. 1 Unit.

Psychosocial, financial, and career issues in adapting graduate students to Stanford; how these issues relate to diversity, resources, policies, and procedures. Discussions among faculty, advanced graduate students, campus resource people, and the dean's office. (Thomas).

Iberian & Latin American Cultures Courses

ILAC 10SC. Spanish Immersion. 2 Units.

Wouldn't it be great if you could quickly increase your Spanish proficiency through an intensive immersion experience right here at Stanford? Wouldn't you love to gain the cultural and historical knowledge necessary to begin taking literature and culture courses generally reserved for advanced students? This intensive Spanish immersion course is designed to help students who have completed a year of Spanish to move forward quickly toward greater linguistic and cultural competence. After a year of Spanish, students tend to be able to handle straightforward interactions related to basic needs and personal information, but they generally lack the ability to handle more abstract discussions or to combine short utterances into longer presentations of their ideas. Most students likewise have little knowledge of the rich and complex history that surrounds the Spanish language or the central role that Spanish has played in the cultural and political life of California. In this course, a team of experienced instructors will help students to improve their Spanish through intensive lessons that incorporate film, literature, and social issues. Through a focused discussion of the themes of immigration and democracy in Spain, Latin America, and the United States, as well as excursions and guest lectures by Stanford faculty and community leaders, this course will immerse students in Spanish and help them to gain advanced proficiency much more quickly.

ILAC 103N. The Millenium Novel in Latin America. 3 Units.

Between 2000 and 2012, a young Spanish American novel emerges, taking at times a minimalist point of view to narrate individual stories with a subjective tone, or continuing a tradition of the historical panorama to present national tragedies that occurred in the last two or three decades. Focus is on this new type of novel from different countries, with such titles as "El cuerpo en que naci" by Guadalupe Entel; "Las teorías salvajes" by Pola Oloixarac; "El ruido de las cosas al caer" by Juan Gabriel Vazquez; and "Bonsai" by Alejandro Zambra, among others. Taught in Spanish.

Taught in Spanish.

ILAC 110. Spanish Society in the 21st Century Throughout Film. 3-5 Units.

Open to undergraduates with an interest in 21st Century Film and the social reality of Spain nowadays. Explores how Spain has evolved from being one of the most undeveloped European countries to become a first mover in social issues such as gay marriage or women's public role. Topics include racism, migration, the reconstruction of the past and the vision of the other. Themes are analyzed through movies directed by Spanish and American filmmakers such as: Cesc Gay, Bollaín, Bigas-Luna, González-Iñárritu and Woody Allen. Class taught in Spanish, readings both in Spanish and English.

ILAC 114N. Introduction to Lyric Poetry. 3-5 Units.

A basic introduction to the elements of lyric poetry--image, metaphor, symbol, connotation, denotation, irony, rhyme and meter--drawing upon a selection of poems from major poets of the Hispanic World, including, G. A. Bécquer, Rosalía de Castro, Rubén Darío, Miguel de Unamuno, Antonio Machado, Juan Ramón Jiménez, García Lorca, Pablo Neruda, and Gabriela Mistral. Prerequisites: Two years of college-level Spanish. This is a bilingual course, taught both in English, and Spanish, with an emphasis on Spanish.

ILAC 115. A short history of Iberian Cinema. 3-5 Units.

A survey of Iberian cinema in the second half of the 20th century. Traces the slow making of an international success with directors like Saura, Almodóvar, Amenábar, Medem, Pons, Bollaín and Villaronga. Starting with the early Buñuel, the course examines cinema's shaping of the national imaginary and its articulation of collective memories suppressed during the Franco dictatorship, as well as the challenges of cultural continuity. Taught in Spanish. Same as: ILAC 315.

ILAC 115. A short history of Iberian Cinema. 3-5 Units.

Taught in Spanish. Same as: ILAC 315.

ILAC 116. Approaches to Spanish and Spanish American Literature. 3-5 Units.

Short stories, poetry, and theater. What analytical tools do the "grammars" of different genres call for? What contact zones exist between these genres? How have ideologies, the power of patronage, and shifting poetics shaped their production over time? Authors may include Arrabal, Borges, Cortázar, Cernuda, García Márquez, Lorca, Neruda, Rivas. Taught in Spanish.

ILAC 116. Approaches to Spanish and Spanish American Literature. 3-5 Units.

Taught in Spanish.

ILAC 120. Advanced Critical Reading in Spanish. 3-5 Units.

Research and writing in the humanities; focus is on culture, literature, and society of the Spanish-speaking world. Students will learn how to conduct research online and in the library while developing archive skills. Emphasis is on skill-building while exploring topics of interest to each student from various historical periods and global locations. Prerequisite: SPANLANG 13 or equivalent. Meets Writing-in-the-Major requirement.

ILAC 120A. The Biographical Space in Contemporary Culture. 3-5 Units.

Proposes a space of articulation between theoretical reflection and analytical practice that allows to address, from language, the symbolic plot of the constitution of subjects and identities in diverse auto/biographical registers--texts, images, representations, testimonies, narratives; the affirmation of their voices: the search for senses, memories and values. Through a trans-disciplinary perspective, prominence will be given to cultural objects, debates and issues of great relevance in the current Latin American scene.

Same as: ILAC 320.

Same as: ILAC 320.

ILAC 122. Literature and Politics - Two Mediterranean Cases: Catalonia and Italy. 3-5 Units.

A comparison between the different roles played by writers as members of the intellectual establishment in Catalonia, Spain and Italy. Focus on the relation between intellectuals and politics in shaping national identity. We will give especially consideration to the role played by intellectuals during the Fascist and Francoist dictatorships and during Spain's transition to democracy. Taught in English.

Same as: ITALIAN 136.

ILAC 130. Introduction to Iberia: Cultural Perspectives. 3-5 Units.

The purpose of this course is to study major figures and historical trends in modern Iberia against the background of the linguistic plurality and social and cultural complexity of the Iberian world. We will study the fundamental issues of empire, the Napoleonic occupation of Spain, Latin American independence, recurring civil wars, federal republicanism, and the historic nationalisms (Galician, Basque, and Catalan), all leading up to the Spanish Civil War (1936-1939), which is a defining moment in modern Spanish and European history, with ongoing consequences still felt and debated painfully today in contemporary Spain. This course is designed to help prepare students for their participation in the Stanford overseas study programs in Barcelona and Madrid. Taught in Spanish.

ILAC 131. Introduction to Latin America: Cultural Perspectives. 3-5 Units.

Part of the Gateways to the World program, this is an introductory course for all things Latin American: culture, history, literature, and current events. By combining lecture and seminar formats, the class prepares you for all subsequent research on, and learning about, the region. Comparative discussion of independence movements in Mexico, Central America, the Caribbean, the Andean Region, Brazil, and the Southern Cone. Other topics vary yearly, including: representations of ethnicity and class, the Cold War, popular culture, as well as major thinkers and writers. Open to all. Recommended for students who want to study abroad in Santiago, Chile. Required for majors in Spanish or Iberian and Latin American Cultures (ILAC). In Spanish.

ILAC 133N. The Animal Within: Animal Presence in Latin American Narrative. 3 Units.

How does the criterion for the division between the human and the animal take part on contemporary Latin American narrative? To what extent is this divide challenged or contested? The course combines a discussion of the literary works of authors like Jorge Luis Borges, Horacio Quiroga, Julio Cortázar, Mario Bellatin, Clarice Lispector, and José María Arguedas with a reflection on the animal and animality in the writings of Bataille, Derrida and Deleuze. Taught in English.

Taught in English.

ILAC 134. In the First Person: Representation of the Self in Modern Latin America. 3-5 Units.

This course examines different expressions of self-portrayal in Latin America from 1920s to the present. The course explores different models of self-shaping and forms of expression that draw contours on self and identity in Latin America. After a brief consideration of the Inca Garcilaso, Sor Juana, J.F. Sarmiento, we examine the works of José Vasconcelos, Norah Lange, Victoria Ocampo, Frida Kahlo, José María Arguedas, Rosario Castellanos, Mario Bellatin, Tununa Mercado, Marcela Trujillo, Fernando Vallejo, among others. Taught in Spanish; Spanish proficiency required.

Taught in Spanish; Spanish proficiency required.

ILAC 135. From Book to Screen: Brazilian Novels and Their Film Adaptations. 3-5 Units.

Can the study of cinematographic adaptation of novels help us understand better the specific nature of literature and that of film? Addressing this central question, the course combines an introduction to Brazilian narrative (Euclides Da Cunha, Mário De Andrade, João Guimaraes Rosa, Graciliano Ramos, Rubem Fonseca, Clarice Lispector) and a panorama of Brazilian cinematography (from Cinema Novo to contemporary productions). The course offers a space for reflection on the multifaceted relationship between the literary and the cinematographic. Taught in English.

ILAC 135. From Book to Screen: Brazilian Novels and Their Film Adaptations. 3-5 Units.

ILAC 136. Modern Iberian Literatures. 3-5 Units.

Survey on modern Iberian literatures (Spanish, Catalan, Basque, Galician and Portuguese) through major canonical authors. Community building, tolerance, the ethics of memory, the value of human purpose as a tool for survival are some of the issues explores in key works by Eca de Queiros, Miguel de Unamuno, García Lorca, Fernando Pessoa, Antonio Machado, Mercè Rodoreda, Maria Angels Anglada, Ramón Sainzarbitoria and Manuel Rivas. Taught in Spanish. Prerequisites: SPANLANG 13 or equivalent, SPANLANG 102 Recommended.

ILAC 136. Modern Iberian Literatures. 3-5 Units.

Taught in Spanish. Prerequisites: SPANLANG 13 or equivalent, SPANLANG 102 Recommended.

ILAC 140. Migration in 21st Century Latin American Film. 3-5 Units.

Focus on how images and narratives of migration are depicted in recent Latin American film. It compares migration as it takes place within Latin America to migration from Latin America to Europe and to the U.S. We will analyze these films, and their making, in the global context of an evergrowing tension between "inside" and "outside"; we consider how these films represent or explore precariousness and exclusion; visibility and invisibility; racial and gender dynamics; national and social boundaries; new subjectivities and cultural practices. Films include: El niño pez, Bolivia, Ulises, Faustino Mayta visita a su prima, Copacabana, Chico y Rita, Sin nombre, Los que se quedan, Amador, and En la puta calle. Films in Spanish, with English subtitles. Discussions and assignments in Spanish. Same as: CHILATST 140.

ILAC 140. Migration in 21st Century Latin American Film. 3-5 Units.

ILAC 143. The Latin American Women's Novel. 3-5 Units.

An exploration of women's novels as an intellectual counterculture of the male-dominated Latin American literary canon. Latin American women's writing and thought will be considered in a regional and global context of feminism and feminist theory. Authors include Gómez de Avellaneda, Bombal, Castellanos, Lispector, Eliot, Oloixarac, de Beauvoir, Kristeva, Engels, Cixous, and Butler. Course discussion in Spanish. Prerequisite: SPANLANG 3 or equivalent.

ILAC 143. The Latin American Women's Novel. 3-5 Units.

An exploration of women's novels as an intellectual counterculture of the male-dominated Latin American literary canon. Latin American women's writing and thought will be considered in a regional and global context of feminism and feminist theory. Authors include Gómez de Avellaneda, Bombal, Castellanos, Lispector, Eliot, Oloixarac, de Beauvoir, Kristeva, Engels, Cixous, and Butler. Course discussion in Spanish. Prerequisite: SPANLANG 3 or equivalent.

ILAC 145. Poets, Journalists and Collectors: Latin American Modernismo. 3-5 Units.

Discusses the different artistic avatars exercised by Latin American modernistas at the turn of the 19th Century in the context of growing capitalism, technological innovation and social transformation. We focus on how modernistas as poets, journalists and collectors explored and transgressed the limits of the individual and his/her situation. We consider topics like cosmopolitanism, dandysm, autonomy of art, and the aesthetic cultivation of the self. Authors include: Delmira Agustini, Rubén Darío, Julián del Casal, Leopoldo Lugones, José Martí, Manuel Gutierrez Nájera, José Enrique Rodó, José Asunción Silva, and Abraham Valdelomar. Spanish proficiency required.

Spanish proficiency required.

ILAC 157. Medieval and Early Modern Iberian Literatures. 3-5 Units.

Survey of literature in Spanish from the early modern period. Course will draw on transatlantic literature. Taught in Spanish; prerequisite: SPANLANG 13 or equivalent.

ILAC 157. Medieval and Early Modern Iberian Literatures. 3-5 Units.

Survey of literature in Spanish from the early modern period. Course will draw on transatlantic literature. Taught in Spanish; prerequisite: SPANLANG 13 or equivalent.

ILAC 161. Modern Latin American Literature. 3-5 Units.

From independence to the present. Topics include romantic allegories of thenation; modernism and postmodernism; avant-garde poetry; regionalism versus cosmopolitanism; indigenous and indigenist literature; magical realism and the literature of the boom; Afro-Hispanic literature; and testimonial narrative. Authors may include: Bolívar, Bello, Gómez de Avellaneda, Isaacs, Sarmiento, Machado de Assis, Darío, Martí-, Agustini, Vallejo, Huidobro, Borges, Cortázar, Neruda, Guillon, Rulfo, Ramos, García Marquez, Lispector, and Bolaño. Taught in Spanish.

Topics include romantic allegories of thenation; modernism and postmodernism; avant-garde poetry; regionalism versus cosmopolitanism; indigenous and indigenist literature; magical realism and the literature of the boom; Afro-Hispanic literature; and testimonial narrative. Authors may include: Bolívar, Bello, Gómez de Avellaneda, Isaacs, Sarmiento, Machado de Assis, Darío, Martí-, Agustini, Vallejo, Huidobro, Borges, Cortázar, Neruda, Guillon, Rulfo, Ramos, García Marquez, Lispector, and Bolaño. Taught in Spanish.

ILAC 175. Daydreaming in Portugal and Brazil. 3-5 Units.

This course explores the role of the imagination in 19th and 20th century Portuguese and Brazilian literature. We will read 4-5 novels, short stories and articles analyzing how and why authors recreate imaginary processes in their characters, and what these processes reveal about the socio-cultural contexts of their period. Authors include Raúl Brandão, Machado de Assis, Antonio Lobo Antunes, Raduan Nassar, and Álvaro Cardoso Gomes, with complementary short pieces by Fernando Pessoa, José Saramago, Mario de Andrade, Guimarães Rosa, and Clarice Lispector. Readings available in English and Portuguese. In English.

Readings available in English and Portuguese. In English.

ILAC 193. The Cinema of Pedro Almodovar. 3-5 Units.

Pedro Almodóvar is one of the most recognizable auteur directors in the world today. His films express a hybrid and eclectic visual style and the blurring of frontiers between mass and high culture. Special attention is paid to questions of sexuality and the centering of usually marginalized characters. This course studies Pedro Almodóvar's development from his directorial debut to the present, from the "shocking" value of the early films to the award-winning mastery of the later ones. Prerequisite: ability to understand spoken Spanish. Readings in English. Midterm and final paper can be in English. Majors should write in Spanish. Same as: ILAC 393.

ILAC 193Q. Spaces and Voices of Brazil through Film. 3-4 Units.

The manners in which a country is perceived and defines itself is a result of many complex forces, and involves the reproduction of social relations and complex social constructions both on the part of those who live there and those who see it from a distance. The perceptions of what Brazil is and what defines the country has changed throughout times, but has conserved some clear pervasive defining traits. This course is an introduction to the history, culture, politics and artistic production of Brazil as seen through feature films, documentaries and some complementary readings. Movies include, among others, Banana is my Business, Black Orpheus, Olga, They Don't Use Black-Tie, City of God, Central Station, Gaijin, and Four Days in September-among others. In English.
Same as: PORTLANG 193Q.

Open only to students in the department, or by consent of instructor.

ILAC 207E. RENAISSANCE PASTORALISMS. 3-5 Units.

Major works of Iberian pastoral lyric poetry and narrative fiction. What made this classical mode so popular during the Renaissance and beyond? What are its essential characteristics? What does it tell us about early modern theories of humanity's relation to nature? Was it merely a form of erotic escapism or is something darker and more troubling lurking between its lines? What can it teach us today about nature, eros, ethics, death, and love? Authors include: Theocritus; Virgil; Sannazaro; Garcilaso de la Vega; Montemayor; Ribeiro; Camões; and Cervantes. Readings in English, Portuguese, and Spanish. Discussion in English.

ILAC 217. Spain & Catalonia face to face. History, Literature and Arts within two European national traditions. 3-5 Units.

During the long period considered, the relationship between Spain and Catalonia has passed from aversion and misunderstanding to acceptance and understanding, hardly to sympathy. Emphasis on giving students a "longue durée" viewpoint on Spanish-Catalan relations in a European and Mediterranean framework. Political concerns, especially in the Romantic period, are largely mediated by literature, the arts and other cultural venues. Will emphasize cross-cultural references while considering the following topics: 1. Maragall and the Iberianist tradition, 2. "Modernisms" in and out the Iberian peninsula, 3. Avant-Garde movements in Spain and Catalonia, 4. Meditating in a desert: Catalan culture under Franco. Taught in Spanish. Readings in English and Spanish.

ILAC 218. Anticlericalism in the Iberian Novel of the 19th Century. 3-5 Units.

The rapid social and cultural changes in which 19th-century novelists wrote; the anti-clerical stance as marker of society's attempts to modernize. Why were monks and priests reviled by many Spanish novelists? How and why did they re-write Spanish history around these figures? What was the role of the church and religious men in modern society? Questions of individualism, property, and labor in novels by major Iberian prose realists. In Spanish.

ILAC 223. The Generation of 1898 and Beyond. 3-5 Units.

Preference for graduate students, majors are welcome. Course will focus on six major authors (Unamuno, Baroja, A. Machado, J. R. Jiménez, Valle-Inclán, García Lorca) and representative works, written between 1898 and 1930, dealing with an historical period of crisis and transition, and displaying major aesthetic innovations in both poetry and theater. Fundamental themes include the decline of feudal Galicia, the Spanish-American War of 1898, the emergence and social activism of new social forces, and the struggle for and betrayal of democracy, expressed through the various genres of the novel, poetry, and theater. Major works of Antonio Machado, Juan Ramón Jiménez, and Federico García Lorca will be examined, with special emphasis on the historical context of the first three decades of the 20th century and their contributions to the development of 20th century Spanish lyric poetry. Taught in either English or Spanish, depending on course enrollment.

ILAC 240E. Borges and Philosophy. 3-5 Units.

Analysis of the Argentine author's literary renditions of philosophical ideas. Topics may include: time, free will, infinitude, authorship and self, nominalism vs. realism, empiricism vs. idealism, skepticism, peripheral modernities, postmodernism, and Eastern thought. Close reading of short stories, poems, and essays from Labyrinths paired with selections by authors such as Augustine, Berkeley, James, and Lao Tzu. The course will be conducted in English; Spanish originals will be available. Satisfies the capstone seminar requirement for the major in Philosophy and Literature.

ILAC 241. Fiction Workshop in Spanish. 3-5 Units.

Enrollment limited. Spanish and Spanish American short stories approached through narrative theory and craft. Assignments are creative in nature and focus on the formal elements of fiction (e.g. character and plot development, point of view, creating a scene, etc.). Students will write, workshop, and revise an original short story throughout the term. No previous experience with creative writing is required. Readings may include works by Ayala, Bolaño, Borges, Clarín, Cortázar, García Márquez, Piglia, Rodoreda, and others. Prerequisite: SPANLANG 102 or permission from instructor.

ILAC 242. Poetry Workshop in Spanish. 3-5 Units.

Latin American and Spanish poetry approached through elements of craft. Assignments are creative in nature and focus on lyric subgenres (e.g. ode, elegy, prose poetry) and formal elements of poetry (e.g. meter, rhythm, rhetorical figures, and tropes). Students write original poems over the course of the quarter. No previous experience with creative writing is required. Authors include Dario, Machado, Jimenez, Vallejo, Huidobro, Salinas, Pales Matos, Lorca, Aleixandre, Cernuda, Neruda, Gironde. Course is offered every other year. Taught in Spanish. Prerequisite: 100-level course taught in Spanish, or equivalent. Enrollment limited to 10 students.

ILAC 243. The Millenium Novel in Latin America. 3-5 Units.

Between 2000 and 2012, a young Spanish American novel emerges, taking at times a minimalist point of view to narrate individual stories with a subjective tone, or continuing a tradition of the historical panorama to present national tragedies that occurred in the last two or three decades. Focus is on this new type of novel from different countries, with such titles as "El cuerpo en que nació" by Guadalupe Entel; "Las teorías salvajes" by Pola Oloixarac; "El ruido de las cosas al caer" by Juan Gabriel Vazquez; and "Bonsai" by Alejandro Zambra, among others.

ILAC 254. Surrealism in Latin America and Spain. 3-5 Units.

This course focuses on the legacy of Surrealism in the Hispanic transatlantic traditions, both in literature and the visual arts (film and paintings). We will study and analyze two aesthetic paths: on one hand, the embracing of Surrealism to enrich one's own poetics; on the other, that of other groups and authors' orthodox approach to the principles established by André Breton and his cohort in the aesthetic adventure. The course will study and assess Surrealism's lasting echoes in recent literary manifestations (among them Roberto Bolaño's works). Taught in Spanish. Same as: Poetry and Fiction.

ILAC 254. Surrealism in Latin America and Spain. 3-5 Units.

Readings in Portuguese; Class discussions in English; Assignments in Portuguese or in English.

ILAC 274. Catalonia's Literary Cartography. 3-5 Units.

Barcelona is a well known literary topic, but Catalan literature has also documented other areas of its geography, like the Pyrenees, the Ebro valley, the Balearic Islands ... It is interesting to note that two of the most notable international successes in recent years, Maria Barbal and Jaume Cabré, write specifically about rural areas. The course aims to trace the construction of literary cartography of Catalonia in the postwar literature. At the same time, however, we will try to understand why some authors have abandoned urban areas to establish their stories in marginal places, indefinite and forgotten. This tendency is not characteristic only for the Catalan literature, but it is also visible in the contemporary literature in general. Taught in Spanish; most readings available in English.

ILAC 276. Aesthetics, Revolutionaries and Terrorists. 3-5 Units.

Who is a terrorist and who is a revolutionary? With surge of Anarchism in the XXth Century, the "culture of fear" has been one of the axes of political activism. This course will explore the difference between the desire to correct injustice in society (Revolution) and the desire to destroy society (Terrorism) using literary texts and films. Readings will include novels and testimonies of the protagonists in various social struggles, as well as journalistic and academic papers about these social movements.

Same as: ILAC 376.

Same as: ILAC 376.

ILAC 277. Spanish in Society. 3-5 Units.

Emphasis is on the documentation and analysis of the use of Spanish in real-world contexts. Readings include representative scholarship from linguistic anthropology, sociolinguistics, psychology, and sociology. Topics include fieldwork methods, the ethnography of communication, conversational narrative, body language, and language ideologies and politics. Students will conduct their own ethnographic fieldwork and present findings to class. Taught in English (with fieldwork component in Spanish).

ILAC 278. Senior Seminar: Early 20th Century Lyric Poetry. 3-5 Units.

This course will study the development of the dominant trends of early Iberian 20th-century lyric poetry, against the background of Restoration Spain (1875-1930), and the forces of resistance and opposition to its oligarchical and archaic social and political structure. We will concentrate on the major works of the three most important poets: Antonio Machado, Juan Ramon Jimenez, and Federico Garcia Lopez. Symbolist-modernist poetry, the creation of symbolic systems, and the brief appearance of surrealism all define key aspects of this avant-garde during the first two decades. Special attention will be given to close stylistic analysis and to the historical and social conditions out of which arose the progressive intellectual and educational movement that gave rise to this renaissance of brilliant lyric poetry. Taught in English. WIM course.

Same as: Machado, Jimenez, Lorca.

ILAC 280. Latin@ Literature. 3-5 Units.
Examines a diverse set of narratives by U.S. Latin@s of Mexican, Puerto Rican, Cuban, Guatemalan, and Dominican heritage through the lens of latinidad. All share the historical experience of Spanish colonization and U.S. imperialism, yet their im/migration patterns differ, affecting social, cultural, and political trajectories in the US and relationships to "home" and "homeland," nation, diaspora, history, and memory. Explores how racialization informs genders as well as sexualities. Emphasis on textual analysis. Taught in English.
Same as: CHILATST 200, CSRE 200, ILAC 382.

ILAC 281. Fernando Pessoa's Five forms of Anxiety. 3-5 Units.
Ethics, politics, and philosophy in the poetry of Fernando Pessoa. A close analysis of five forms of anxiety that pervade Fernando Pessoa's poetry: 1) that you are a person; 2) that you are one person; 3) that you are yourself; 4) that your life can be wasted; and 5) that others may fail to understand you. How do these forms of anxiety shape Pessoa's style(s), his system of heteronyms, his interest in certain literary forms (such as esoteric and prophetic literature), and his perception of the Portuguese cultural and geohistorical context? Readings available in English and Portuguese. Taught in English.

ILAC 281. Fernando Pessoa's Five forms of Anxiety. 3-5 Units.

ILAC 287. Queer Raza. 3-5 Units.
Examination of cultural representations by U.S. Latin@s that explore the following questions: How is the mutual constitution of race/sex/class/gender theorized and represented? How is desire racialized? How is racial difference produced through sex acts and what is the function of sex in racial (self)formation? How to reconcile pleasure and desire with histories of imperialism and (neo)colonialism and other structures of power? How do these texts reinforce or contest stereotypes and the "ideal" bodies of national identity? How do these texts produce queerness as a web of social relations? Same as: CHILATST 120, FEMGEN 120.

ILAC 287. Queer Raza. 3-5 Units.
Examination of cultural representations by U.S. Latin@s that explore the following questions: How is the mutual constitution of race/sex/class/gender theorized and represented? How is desire racialized? How is racial difference produced through sex acts and what is the function of sex in racial (self)formation? How to reconcile pleasure and desire with histories of imperialism and (neo)colonialism and other structures of power? How do these texts reinforce or contest stereotypes and the "ideal" bodies of national identity? How do these texts produce queerness as a web of social relations? Same as: CHILATST 120, FEMGEN 120.

ILAC 287. Queer Raza. 3-5 Units.

ILAC 299. Individual Work. 1-12 Unit.
Open to department advanced undergraduates or graduate students by consent of professor. May be repeated for credit.

ILAC 299. Individual Work. 1-12 Unit.

Open to department advanced undergraduates or graduate students by consent of professor. May be repeated for credit.

ILAC 305. Rhythm: Ethics and Poetics of the Premodern. 3-5 Units.

Focus is on the notion of rhythm as a theoretical frame for the analysis of medieval and early modern Iberian poetry. Topics include Ancient Greek and modern conceptions of rhythm and the links between poetics and ethics in the medieval period and beyond. Authors include: Aeschylus, Plato, Aristoxenus, Maurice Blanchot, Paul Celan, Emmanuel Levinas, Arcipreste de Hita, Ausiàs March, Garcilaso de la Vega, and Luís de Camões. Taught in English.

ILAC 309. First Year Writing Workshop. 1 Unit.

This course enables students to develop the writing skills necessary in their academic careers. Course topics include writing in the discipline, critiques, and literature reviews.

ILAC 309. First Year Writing Workshop. 1 Unit.

This course enables students to develop the writing skills necessary in their academic careers. Course topics include writing in the discipline, critiques, and literature reviews.

ILAC 315. A short history of Iberian Cinema. 3-5 Units.

A survey of Iberian cinema in the second half of the 20th century. Traces the slow making of an international success with directors like Saura, Almodóvar, Amenábar, Medem, Pons, Bollaín and Villaronga. Starting with the early Buñuel, the course examines cinema's shaping of the national imaginary and its articulation of collective memories suppressed during the Franco dictatorship, as well as the challenges of cultural continuity. Taught in Spanish.

Same as: ILAC 115.

Same as: ILAC 115.

ILAC 316. Realism and Surrealism in the Cinema of Luis Bunuel. 3-5 Units.

Surrealism, realism, dark comedy, film genres transformed by Spanish director, Luis Bunuel in Spain, France and Mexico during the second half of the XX century. An examination of Bunuel's work from his Surrealist beginnings (*L'Age d'Or*, *Un Chien Andalou*), subsequent realistic films in Mexico (*Los Olvidados*, *Nazarin*), and a mixture of Surrealism and Realism (*Viridiana*, *Exterminating Angel*, *Simon del Desierto*), as well his work with dark comedy (*Archibaldo de la Cruz*, *Belle de Jour*, *Le charme discret de la bourgeoisie*). In Spanish.

ILAC 320. The Biographical Space in Contemporary Culture. 3-5 Units.

Proposes a space of articulation between theoretical reflection and analytical practice that allows to address, from language, the symbolic plot of the constitution of subjects and identities in diverse auto/biographical registers--texts, images, representations, testimonies, narratives; the affirmation of their voices: the search for senses, memories and values. Through a trans-disciplinary perspective, prominence will be given to cultural objects, debates and issues of great relevance in the current Latin American scene.

Same as: ILAC 120A.

ILAC 320. The Biographical Space in Contemporary Culture. 3-5 Units.

Same as: ILAC 120A.

ILAC 332. Race and Slavery in Nineteenth Century Spain. 3-5 Units.

An analysis of the literature written in Spain during the nineteenth and twentieth centuries dealing with the empire post 1808. Authors discussed include Blanco White, Baroja, Avellaneda, and Rusiñol, among others.

ILAC 332. Race and Slavery in Nineteenth Century Spain. 3-5 Units.

An analysis of the literature written in Spain during the nineteenth and twentieth centuries dealing with the empire post 1808. Authors discussed include Blanco White, Baroja, Avellaneda, and Rusiñol, among others.

ILAC 335. Materialism and Literature. 3-5 Units.

Exploration of vibrant materialism (Bennet, Latour) and historical materialism (critical theory) as a basis to approach Latin American commodity novels, i.e., those that revolve around bananas, coffee, etc. Literary works by J.E. Rivera, García Márquez, Asturias, Neruda, Magnus, and others. Taught in Spanish.

Same as: COMPLIT 335A.

Same as: COMPLIT 335A.

ILAC 336. Early 20th Century Iberian Poetry. 3-5 Units.

This course will study the development of the dominant trends of early Iberian 20th-century lyric poetry, against the background of Restoration Spain (1875-1930), and the forces of resistance and opposition to its oligarchical and archaic social and political structure. We will concentrate on the major works of the three most important poets: Antonio Machado, Juan Ramón Jiménez, and Federico García Lorca. Symbolist-modernist poetry, the creation of symbolic systems, and the brief appearance of surrealism all define key aspects of this avant-garde during the first three decades. Special attention will be given to close stylistic analysis and to the historical and social conditions out of which arose the progressive intellectual and educational movement that gave rise to this renaissance of brilliant lyric poetry. Taught in either English or Spanish depending on class enrollment.

ILAC 345. Biopolitics and Sovereignty in Andean Culture, 1920-1940. 3-5 Units.

What is productive life? How is life aesthetically and politically valued? This course explores the inscription of life in changing political and aesthetic regimes of the Andean South in the turbulent decades of the 1920s-1940s. Based on theories of biopower and sovereignty, we explore topics such as domination, domestication, appropriation, exclusion, facism, solidarity, tellurism, race, mestizaje, and human/nature relations. We will consider poetry, narrative, journals, and the visual arts. Authors include: Gabriela Mistral, Pablo Neruda, Pablo de Rokha, Alcides Arguedas, Augusto Céspedes, Franz Tamayo, Leopoldo Marechal, Roberto Arlt, Jorge Luis Borges, César Vallejo, José Carlos Mariátegui, Ciro Alegría, and José María Arguedas. Spanish proficiency required.

ILAC 371. The Ambiguity of the Periphery. 3-5 Units.

Franz Kafka's concept of "small literature" is still very useful to understand literary productivity in conflict areas in Europe. Catalonia is always seen as a country that has yet to find its place in Spain. Its uniqueness, however, when compared with other "peripheral" areas, especially with the cultures of Central Europe, is not an exception, but part of a general pattern. In literary terms, the margins of Europe are not invisible: from this perspective it is possible to understand the rich literary heritage of this continent. The course aims to compare the Catalan with other European peripheries through paired readings of Catalan and various European texts from different linguistic traditions, such as the German, the Italian, the Greek, the Czech and the Swedish (Bernhard, Lampedusa, Cavafy, Kundera, Enquist). Taught in Spanish; most readings available in English.

ILAC 376. Aesthetics, Revolutionaries and Terrorists. 3-5 Units.

Who is a terrorist and who is a revolutionary? With surge of Anarchism in the XXth Century, the "culture of fear" has been one of the axes of political activism. This course will explore the difference between the desire to correct injustice in society (Revolution) and the desire to destroy society (Terrorism) using literary texts and films. Readings will include novels and testimonies of the protagonists in various social struggles, as well as journalistic and academic papers about these social movements. Same as: ILAC 276.

ILAC 376. Aesthetics, Revolutionaries and Terrorists. 3-5 Units.

ILAC 380E. Critical Concepts in Chican@ Literature. 3-5 Units.

Combines primary texts of Chican@ literature with a metacritical interrogation of key concepts informing Chican@ literary criticism, the construction of Chican@ literary history, and a Chican@ literary canon. Interrogates the resistance paradigm and the "proper" subject of this literature, and critiques established genealogies and foundational authors and texts, as well as issues of periodization, including the notion of "emergence" (e.g. of feminist voices or dissident sexualities). Considers texts, authors and subjects that present alternatives to the resistance paradigm. Same as: CHILATST 201C, CSRE 201C.

ILAC 380E. Critical Concepts in Chican@ Literature. 3-5 Units.

ILAC 382. Latin@ Literature. 3-5 Units.

Examines a diverse set of narratives by U.S. Latin@s of Mexican, Puerto Rican, Cuban, Guatemalan, and Dominican heritage through the lens of latinidad. All share the historical experience of Spanish colonization and U.S. imperialism, yet their im/migration patterns differ, affecting social, cultural, and political trajectories in the US and relationships to "home" and "homeland," nation, diaspora, history, and memory. Explores how racialization informs genders as well as sexualities. Emphasis on textual analysis. Taught in English.

Same as: CHILATST 200, CSRE 200, ILAC 280.

ILAC 382. Latin@ Literature. 3-5 Units.

Same as: CHILATST 200, CSRE 200, ILAC 280.

ILAC 389E. Queer of Color Critique: Race, Sex, Gender in Cultural Representations. 3-5 Units.

Examines major questions and issues that arise in considering race, sex, and gender together. Focus on critical and theoretical texts queering ethnic and diaspora studies and bringing race and ethnicity into queer studies. Close reading of texts in a variety of media negotiating racialized sexualities and sexualized identities. How is desire racialized? How is racial difference produced through sex acts? How to reconcile pleasure and desire with histories of imperialism and (neo)colonialism and structures of power?

Same as: CSRE 289E, FEMST 389E.

ILAC 393. The Cinema of Pedro Almodovar. 3-5 Units.

Pedro Almodóvar is one of the most recognizable auteur directors in the world today. His films express a hybrid and eclectic visual style and the blurring of frontiers between mass and high culture. Special attention is paid to questions of sexuality and the centering of usually marginalized characters. This course studies Pedro Almodóvar's development from his directorial debut to the present, from the "shocking" value of the early films to the award-winning mastery of the later ones. Prerequisite: ability to understand spoken Spanish. Readings in English. Midterm and final paper can be in English. Majors should write in Spanish.

Same as: ILAC 193.

Iberian Languages Courses

IBERLANG 8. First-Year Basque Language and Culture, Second Quarter. 5 Units.

Continuation of 7. Speaking, reading, writing, and listening. Authentic materials. Interactive approach with emphasis on developing communicative expression. The cultural context in which Basque is spoken. Prerequisite: 7 or equivalent.

Immersion in the Arts Courses

ITALIC 91. Immersion in the Arts: Living in Culture. 4 Units.

ITALIC is a new residence-based program built around a series of big questions about the historical, critical and practical purposes of art and its unique capacities for intellectual creativity, communication, and expression. This year-long program fosters close exchanges among faculty, students and guest artists and scholars in class, over meals and during excursions to arts events. We trace the challenges that works of art have presented to categories of knowledge -- history, politics, culture, science, medicine, law -- by turning reality upside-down or inside-out, or just by altering one's perspective on the world. The arts become a model for engaging with problem-solving: uncertainty and ambiguity confront art makers and viewers all the time; artworks are experiments that work by different sets of rules. Students will begin to understand and use the arts to create new frameworks for exploring our (and others') experience.

ITALIC 92. Immersion in the Arts: Living in Culture. 4 Units.

Immunology Courses

IMMUNOL 199. Undergraduate Research. 1-18 Unit.

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

IMMUNOL 201. Advanced Immunology I. 3 Units.

For graduate students, medical students and advanced undergraduates. Topics include the innate and adaptive immune systems; genetics, structure, and function of immune molecules; lymphocyte activation and regulation of immune responses. Prerequisites: undergraduate course in Immunology and familiarity with experimental approaches in biochemistry, molecular biology, and cell biology. Same as: MI 211.

IMMUNOL 202. Advanced Immunology II. 3 Units.

Readings of immunological literature. Classic problems and emerging areas based on primary literature. Student and faculty presentations. Prerequisite: IMMUNOL 201/MI 211. Same as: MCP 202.

IMMUNOL 203. Advanced Immunology III. 2 Units.

Key experiments and papers in immunology. Course focuses on the history of Immunology and how current research fits into the historical context. Students work on developing effective presentation skills.

IMMUNOL 204. Innate Immunology. 3 Units.

Innate immune mechanisms as the only defenses used by the majority of multicellular organisms. Topics include Toll signaling, NK cells, complement, antimicrobial peptides, phagocytes, neuroimmunity, community responses to infection, and the role of native flora in immunity. How microbes induce and defeat innate immune reactions, including examples from vertebrates, invertebrates, and plants. Same as: MI 104, MI 204.

IMMUNOL 205. Immunology in Health and Disease. 4 Units.

Concepts and application of adaptive and innate immunology and the role of the immune system in human diseases. Case presentations of diseases including autoimmune diseases, infectious disease and vaccination, hematopoietic and solid organ transplantation, genetic and acquired immunodeficiencies, hypersensitivity reactions, and allergic diseases. Problem sets based on lectures and current clinical literature. Laboratory in acute and chronic inflammation.

IMMUNOL 206A. Systems and Computational Immunology. 3-4 Units.

Introduction to the major underpinnings of systems immunology: first principles of development of computational approaches to immunological questions and research; aspects of study design and analysis of data sets; literature and quantifying effects sizes as applied to clinical trial design. Final projects: individual and team reviewed grant proposals (3 units); individual or team development of grant proposals into projects and journal articles (4 units).

IMMUNOL 206B. Directed Projects in Systems and Computational Immunology. 3-10 Units.

Independent and team grant proposals, developed in Immunol 206A, will continue on as projects and contribute to ongoing research. Number of units assigned dependent upon the difficulty of and time spent on the project. May be repeated for credit.

IMMUNOL 209. Translational Immunology. 1 Unit.

(Open to medical students in the Immunology concentration, graduate students, undergraduates by consent of instructor) Journal style format focusing on current basic immunology research and how it is translated into immunotherapies and clinical trials. Topics include hematopoiesis, transplantation, tolerance, immune monitoring, vaccination, autoimmunity and antibodies, rheumatoid arthritis, chronic pulmonary disease, and asthma. May be repeated for credit.

IMMUNOL 210. Immunology Research Seminars for Medical Students. 2 Units.

Required for medical students selecting the Immunology Concentration. Attendance at a minimum of ten seminars related to immunology outside of required medical school classes. A one-page essay on each seminar, what was presented and how it relates to a clinical immunologic problem, is required.

IMMUNOL 215. Principles of Biological Technologies. 3 Units.

The principles underlying novel as well as commonly utilized techniques to answer biological questions. Lectures and primary literature critiques on topics such as fluorescence microscopy, including applications such as FRET and single-cell analysis; human and murine genetic analysis; FACS; proteomics and analysis of noncoding RNAs. Class participation is emphasized. Prerequisite: biochemistry. Required of first-year graduate students in Microbiology and Immunology and the Immunology program. Same as: MI 215.

IMMUNOL 231. Medicine for Innovators and Entrepreneurs. 3-4 Units.

Interdisciplinary, project-based course in which bioscience, bioinformatics, biodesign, bioengineering students learn concepts and principles to understand human disease and work together to propose solutions to medical problems. Diabetes mellitus is used as a paradigm for understanding human disease. Guest medical school and outside faculty. Field trips to Stanford clinics and biotechnology companies. Prerequisite: college level biology. Same as: PEDS 231.

IMMUNOL 260. HIV: The Virus, the Disease, the Research. 3-4 Units.

Open to medical students, graduate students in biological sciences, undergraduates with strong biological background. Topics: immunopathogenesis immune deficits, opportunistic infections including TB, and malignancies; genomics viral genetic analyses that have traced the origin of HIV-1 and HIV-2 to primates, dated the spread of infection in humans, and characterized the evolution of the virus within infected individuals; antiretroviral drug development identification of drug targets, structure-based drug design, overcoming drug resistance, pivotal clinical trials, and role of community activism; clinical management solutions in high- and low-income countries; vaccine development learning from past failures and the future of engineering the human immune response. 4 units includes a final project assigned in consultation with the instructor to fit the individual student's background and area of HIV interest. Same as: MED 260.

IMMUNOL 275. Tumor Immunology. 3 Units.

Focuses on the ability of innate and adaptive immune responses to recognize and control tumor growth. Topics include: tumor antigens, tumor immunosurveillance and immunoeediting, tumor immunotherapy, cancer vaccines and dendritic cell therapy. Tracks the historical developments of our understanding of modulating tumor immune response and discusses their relative significance in the light of current research findings. Prerequisite: for undergraduates, human biology or biology core. Same as: CBIO 275.

IMMUNOL 280. Early Clinical Experience in Immunology. 1-3 Unit.

Clinical observation experience for medical students in the Immunology Scholarly Concentration. At the end of the observation period, which may span over one to two quarters, the student submits a case observation paper to his/her faculty sponsor. Prerequisite: IMMUNOL 205.

IMMUNOL 290. Teaching in Immunology. 1-15 Unit.

Practical experience in teaching by serving as a teaching assistant in an immunology course. Unit values are allotted individually to reflect the level of teaching responsibility assigned to the student. May be repeated for credit.

IMMUNOL 299. Directed Reading in Immunology. 1-18 Unit.

Prerequisite: consent of instructor.

IMMUNOL 305. Immunology Journal Club. 1 Unit.

Required of first- to fourth-year graduate students. Graduate students present and discuss recent papers in the literature. May be repeated for credit.

IMMUNOL 310. Applied Computational Immunology. 1 Unit.

Presentation of CSI technologies from recent literature. Discussion of emerging application areas and limitations. Dissemination of computational resources.

IMMUNOL 311. Seminar in Immunology. 1 Unit.

Enrollment limited to Ph.D., M.D./Ph.D., and medical students whose scholarly concentrations are in Immunology. Current research topics.

IMMUNOL 311A. Discussions in Immunology. 1 Unit.

Students discuss papers of speakers in 311, and meet with the speakers. Corequisite: 311.

IMMUNOL 315. Special Topics in Immunology. 1 Unit.

Format for 2013-14 is a year long (three quarter) lecture series comprising directed readings and survey study of these topics in human and mousenimmunology: cells of the immune system; innate and adaptive immunity; antibodies and antigens; histocompatibility complex; lymphocyte development and the rearrangement and expression of antigen receptor genes; T-cell and B-cell signaling and activation; immunological tolerance; transplantation; diseases caused by immune responses; allergy; congenital and acquired immunodeficiencies. Graduate students outside immunology and Postdoctoral fellows and clinical fellows are welcome.

IMMUNOL 399. Graduate Research. 1-15 Unit.

For Ph.D., M.D./Ph.D. students, and medical students whose scholarly concentrations are in Immunology.

IMMUNOL 801. TGR Project. 0 Units.

IMMUNOL 802. TGR Dissertation. 0 Units.

Institute for International Studies Courses

IIS 199. Interschool Honors Program in International Security Studies. 1-5 Unit.

Students from different schools meet in a year-long seminar to discuss, analyze, and conduct research on international security. Combines research methods, policy evaluation, oral presentation, and preparation of an honors thesis by each student. May be repeated for credit.

Interdisciplinary Studies in the Humanities Courses

HUMNTIES 324. Enlightenment Seminar. 3-5 Units.

The Enlightenment as a philosophical, literary, and political movement. Themes include the nature and limits of philosophy, the grounds for critical intellectual engagement, the institution of society and the public, and freedom, equality and human progress. Authors include Voltaire, Montesquieu, Rousseau, Hume, Diderot, and Condorcet. Same as: DLCL 324, HISTORY 334, HISTORY 432A.

International Policy Studies Courses

IPS 200. Global Affairs: Social Media and Blog Writing Workshop. 1-2 Unit.

IPS 201. Managing Global Complexity. 3 Units.

Is international relations theory valuable for policy makers? The first half of the course will provide students with a foundation in theory by introducing the dominant theoretical traditions and insights in international relations. The second half of the course focuses on several complex global problems that cut across policy specializations and impact multiple policy dimensions. Students will assess the value of major theories and concepts in international relations for analyzing and addressing such complex global policy issues.

IPS 202. Topics in International Macroeconomics. 5 Units.

Topics: standard theories of open economy macroeconomics, exchange rate regimes, causes and consequences of current account imbalances, the economics of monetary unification and the European Monetary Union, recent financial and currency crises, the International Monetary Fund and the reform of the international financial architecture. Prerequisites: Econ 52 and Econ 165.

IPS 203. Issues in International Economics. 5 Units.

Topics in international trade and international trade policy: trade, growth and poverty, the World Trade Organization (WTO), regionalism versus multilateralism, the political economy of trade policy, trade and labor, trade and the environment, and trade policies for developing economies. Prerequisite: ECON 51, ECON 166.

IPS 204A. Microeconomics. 4 Units.

Microeconomic concepts relevant to decision making. Topics include: competitive market clearing, price discrimination; general equilibrium; risk aversion and sharing, capital market theory, Nash equilibrium; welfare analysis; public choice; externalities and public goods; hidden information and market signaling; moral hazard and incentives; auction theory; game theory; oligopoly; reputation and credibility. Prerequisites: ECON 50 and MATH 51 or equiv. Same as: PUBLPOL 301A.

IPS 204B. Cost-Benefit Analysis and Evaluation. 4-5 Units.

This class provides the economic and institutional background necessary to use "cost-benefit analysis" or CBA to evaluate public policy. We will examine the economic justification for government intervention and apply these concepts in different policy contexts. We will also examine the theoretical foundations and the practical challenges of implementing CBA. The goal of the course is to provide you with the conceptual foundations and practical skills you will need to be thoughtful consumers or producers of CBA.

Same as: PUBLPOL 301B.

IPS 205. Introductory Statistics for Policy. 5 Units.

Introduction to key elements of probability statistical analysis focusing on international and public policy relevant applications. Topics will include the algebra of events and probability, discrete and continuous random variables, exploratory data analysis and elements of mathematical statistics. The two lectures per week will be structured such that they will involve both theoretical and practical components. Students will be introduced to R statistical programming and LaTeX.

IPS 206. Applied Statistics for Policy. 5 Units.

Introduction to the use of statistical models, as relevant for decision making and data interpretation in policy contexts. Emphasis on regression analysis, as the most frequently used tool in quantitative policy analysis. The purpose of the course is to enable students to become intelligent consumers of regression analysis. Applied experience in both consuming and producing regression analyses, as well as knowledge of the underlying statistical theory.

IPS 207. Governance, Corruption, and Development. 3-5 Units.

The role of governance in the growth and development experience of countries with a focus on the economics of corruption. Topics covered: the concept and measurement of governance; theory and evidence on the impact of corruption on growth and development outcomes, including investment, financial flows, human capital accumulation, poverty and income inequality; the link between governance and financial crises with a focus on the recent global crisis; the cultural, economic, and political determinants of corruption; and policy implications for improving governance. Prerequisite: ECON 50.

IPS 207A. Judgment and Decision Making. 4-5 Units.

(Same as LAW 333.) Introduction to problem framing and problem solving. Theories and research on heuristics and biases in human inference, judgment, and decision making. Experimental and theoretical work in prospect theory emphasizing loss and risk aversion. Challenges that psychology offers to the rationalist expected utility model; attempts to meet this challenge through integration with modern behavioral economics. Decision making biases and phenomena of special relevance to public policy such as group polarization, group think, and collective action. Same as: PUBLPOL 305A.

IPS 207B. Public Policy and Social Psychology: Implications and Applications. 4 Units.

Theories, insights, and concerns of social psychology relevant to how people perceive issues, events, and each other, and links between beliefs and individual and collective behavior. Topics include: situationist and subjectivist traditions of applied and theoretical social psychology; social comparison, dissonance, and attribution theories; social identity, stereotyping, racism, and sources of intergroup conflict and misunderstanding; challenges to universality assumptions regarding human motivation, emotion, and perception of self and others; the problem of producing individual and collective changes in norms and behavior. Same as: PSYCH 216, PUBLPOL 305B.

IPS 208. Justice. 4-5 Units.

Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include financing schools and elections, regulating markets, discriminating against people with disabilities, and enforcing sexual morality. Counts as Writing in the Major for PoliSci majors. Same as: ETHICSOC 171, PHIL 171, PHIL 271, POLISCI 3P, POLISCI 136S, POLISCI 336S, PUBLPOL 103C, PUBLPOL 307.

IPS 209. Practicum. 1-8 Unit.

Applied policy exercises in various fields. Multidisciplinary student teams apply skills to a contemporary problem in a major international policy exercise with a public sector client such as a government agency. Problem analysis, interaction with the client and experts, and presentations. Emphasis is on effective written and oral communication to lay audiences of recommendations based on policy analysis. May be repeated for credit for a total of 10 units.

IPS 209A. IPS Master's Thesis. 1-10 Unit.

For IPS M.A. students only (by petition). Regular meetings with thesis advisers required.

IPS 210. The Politics of International Humanitarian Action. 3-5 Units.

The relationship between humanitarianism and politics in international responses to civil conflicts and forced displacement. Focus is on policy dilemmas and choices, and the consequences of action or inaction. Case studies include northern Iraq (Kurdistan), Bosnia, Rwanda, Kosovo, and Darfur.

IPS 211. The Transition from War to Peace: Peacebuilding Strategies. 3-5 Units.

How to find sustainable solutions to intractable internal conflicts that lead to peace settlements. How institutions such as the UN, regional organizations, and international financial agencies attempt to support a peace process. Case studies include Bosnia, East Timor, Kosovo, Burundi, Liberia, and Afghanistan.

IPS 213. International Mediation and Civil Wars. 3-5 Units.

This graduate seminar will examine international mediation efforts to achieve negotiated settlements for civil wars over the last two decades. Contending approaches to explain the success or failure of international mediation efforts will be examined in a number of cases from Africa (Sudan, Sierra Leone, Burundi), the Balkans (Bosnia, Macedonia), and Asia (Cambodia, Indonesia/Aceh).

IPS 219. Intelligence and National Security. 3-4 Units.

How intelligence supports U.S. national security and foreign policies. How it has been used by U.S. presidents to become what it is today; organizational strengths and weaknesses; how it is monitored and held accountable to the goals of a democratic society; and successes and failures. Current intelligence analyses and national intelligence estimates are produced in support of simulated policy deliberations.

IPS 230. Democracy, Development, and the Rule of Law. 5 Units.

Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts. Same as: INTNLREL 114D, POLISCI 114D, POLISCI 314D.

IPS 233. Civil Society, Protest, and Revolution. 3-5 Units.**IPS 234. Religion and Multiculturalism. 3 Units.**

Multiculturalism has become a major theory supporting religious accommodations for minority groups. However, such accommodations can give rise to a number of problems, especially if the accommodated group adheres to norms that are illiberal in nature. Exploration of the different justifications for accommodating religious groups from the point of view of multicultural theory. Discussion of the different problems that such accommodations might generate and identify potential solutions. Examination of issues from the point of view of both Western liberal democracies and nation states. Special emphasis will be given to the Israeli millet system.

IPS 235. From Innovation to Implementation: How Government Can Develop and Apply New Ideas. 3-5 Units.

What are the barriers to reform and innovative thinking in government? What are the factors that need to be taken into account when implementing change? What are the bureaucratic structures and power relationships that policy-makers must understand and navigate in order to embed reform? The aim of this seminar is to give students a detailed understanding of how political change happens and an understanding of why it often doesn't. Using cases studies from successful and unsuccessful reform programs around the world, this course will expose students to innovations in key public sector issue areas including education, healthcare, well-being, and government transparency and accountability; provides a sense of what's it's like actually trying to make change happen in a government context, and will equip students with the skills and understanding to be able to make change happen in a government setting. Same as: PUBLPOL 235.

IPS 241. International Security in a Changing World. 5 Units.

This class surveys the most pressing international security issues facing the world today and includes an award-winning two-day international crisis simulation led by Stanford faculty and former policymakers. Guest lecturers have included former Secretary of Defense William Perry, former U.S. Ambassador to Afghanistan Gen. Karl Eikenberry, and former Secretary of State Condoleezza Rice. Major topics covered: cyber security, nuclear proliferation, insurgency and intervention, terrorism, the Arab Spring, and the future of U.S. leadership in the world. No prior background in international relations is necessary. Same as: POLISCI 114S.

IPS 244. U.S. Policy toward Northeast Asia. 5 Units.

Case study approach to the study of contemporary U.S. policy towards Japan, Korea, and China. Historical evolution of U.S. foreign policy and the impact of issues such as democratization, human rights, trade, security relations, military modernization, and rising nationalism on U.S. policy. Case studies include U.S.-Japan trade tensions, anti-Americanism in Korea, and cross-straits relations between China and Taiwan.

IPS 245. An Introduction to Theories of Authoritarian Resilience and Vulnerability. 3-5 Units.

The Arab spring demonstrated that even long-standing authoritarian regimes may be vulnerable to sudden collapse. Introduction to theories of authoritarian vulnerability and resilience. Why are some autocrats more or less durable in the face of challenges to their rule? Exploration of theories rooted in regime type, resources, state capacity, parties, popular protest, and leadership. The second part of the course will then explore the utility of competing approaches through close examinations of regime crises in Ethiopia in 1974, Iran in 1978 and China in 1989.

IPS 246. China on the World Stage. 3-5 Units.

China's reemergence as a global player is transforming both China and the international system. Other nations view China's rise with a mixture of admiration, anxiety, and opportunism. Some welcome China's rise as a potential counterweight to US preeminence; others fear the potential consequences of Sino-American rivalry and erosion of the US-led international system that has fostered unprecedented peace and prosperity. This course provides an overview of China's engagement with countries in all regions and on a wide range of issues since it launched the policy of opening and reform in 1978. The goal is to provide a broad overview and systematic comparisons across regions and issues, and to examine how China's global engagement has changed over time.

IPS 247. Organized Crime and Democracy in Latin America. 5 Units.

Scholars and policy analysts have long emphasized the strength of the rule of law as a key determinant of economic development and social opportunity. They also agree that the rule of law requires an effective and accountable legal system. The growth of transnational organized crime is a major impediment, however, to the creation of effective and accountable legal systems. This seminar examines how and why transnational criminal organizations have developed in Latin America, explores why they constitute a major challenge to the consolidation of democratic societies, economic development and individual rights. It also examines the efforts of governments to combat them, with a focus on the experiences of Mexico, Colombia, and Brazil. The course examines these cases in order to draw lessons; by pointing to both successes and failures; of use to policy analysts, legal scholars, and practitioners.

Same as: INTNLREL 152, POLISCI 244T.

IPS 249. Living at the Nuclear Brink: Yesterday and Today. 3 Units.

The development, testing, and proliferation of nuclear weapons will be covered, from World War II through the Cold War to the present. Emphasis will be placed on understanding the evolving role of these weapons, both militarily and politically. It will also examine controversies and opposition movements to nuclear weapons and their use. The course will feature numerous guest speakers from Stanford and beyond. Students will be required to write in-depth analyses of specific nuclear weapons policy questions. Following this course, students are expected to have a deeper understanding of the profound dangers these weapons continue to present to the world today.

IPS 250. International Conflict Resolution. 3 Units.

(Same as LAW 656) This seminar examines the challenges of managing and resolving violent inter-group and international conflicts. Employing an interdisciplinary approach drawing on social psychology, political science, game theory, and international law, the course identifies various tactical, psychological, and structural barriers that can impede the achievement of efficient solutions to conflicts. We will explore a conceptual framework for conflict management and resolution that draws not only on theoretical insights, but also builds on historical examples and practical experience in the realm of conflict resolution. This approach focuses on the following questions: (1) how can the parties to conflict develop a vision of a mutually bearable shared future; (2) how can parties develop trust in the enemy; (3) how can each side be persuaded, as part of a negotiated settlement, to accept losses that it will find very painful; and (4) how do we overcome the perceptions of injustice that each side are likely to have towards any compromise solution? Among the conceptual issues we will examine include the problem of spoilers who seek to sabotage agreements, the role of mediators, the role international legal rules can play in facilitating or impeding conflict resolution, and the advantages and disadvantages of unilateral versus and reciprocal measures in advancing conflict resolution efforts. Particular conflicts we will explore include the Northern Ireland conflict, the Israeli-Palestinian conflict, and the U.S.-Soviet Cold War rivalry. Prerequisite for undergraduates: consent of instructor.

Same as: PSYCH 383.

IPS 250A. International Conflict Resolution Colloquium. 1 Unit.

(Same as LAW 611.) Sponsored by the Stanford Center on International Conflict and Negotiation (SCICN). Conflict, negotiation, and dispute resolution with emphasis on conflicts and disputes with an international dimension, including conflicts involving states, peoples, and political factions such as the Middle East and Northern Ireland. Guest speakers. Issues including international law, psychology, and political science, economics, anthropology, and criminology.

Same as: PSYCH 283.

IPS 263. Energy and Climate Cooperation in the Western Hemisphere. 4 Units.

Current political dynamics in major western hemisphere fossil fuel producers in N. America, the Andean region, the Southern Cone of S. America, and Trinidad and Tobago. The potential for developing sustainable alternative energy resources in the western hemisphere for export particularly biofuels, and its impact on agricultural policy, environmental protection, and food prices. The feasibility of creating regional energy security rings such as the proposed N. American Energy Security and Prosperity Partnership.

Same as: EARTHYSYS 132, EARTHYSYS 232, INTNLREL 146A.

IPS 264. Behind the Headlines: An Introduction to US Foreign Policy in South and East Asia. 3-5 Units.

Introduction to India, Af-Pak and China. Analyzes historical forces that shaped the region, recent history and current state of key countries: the economic and political rise of India and China; rise of the Taliban and Al Qaeda in Afghanistan; Pakistan's government, military, and mullahs; and China's impact on the region. Explores U.S. policy in depth: U.S. intervention in- and upcoming withdrawal from Afghanistan, U.S. relations with Pakistan and India, the "pivot to Asia" and its implications for US-China relations and the strategic balance in Asia. Satisfies the IPS policy writing requirement.

IPS 270. The Geopolitics of Energy. 3-5 Units.

This course examines how the interplay of political, economic, and technological forces may reshape future energy production and consumption. Building upon international political economy theory, we will address questions such as: What policies are energy importers pursuing to ensure reliable, plentiful and cheap energy supply? What are the socioeconomic and political challenges and strategic options energy exporters face? How can technological breakthroughs in alternative energy and carbon policies affect the distribution of power between traditional energy exporters and importers?

IPS 271. Sanela Diana Jenkins International Human Rights Colloquium. 1 Unit.

This course focuses on the relationship between global health and human rights. The course will feature leading human rights scholars and practitioners from around the world. We will examine the conceptual linkages between global health and human rights and explore both the promise of the field and the challenges inherent in implementing its norms on the ground. Health and human rights are interrelated in multiple ways: human rights abuses have negative health consequences; health policies and programs can enhance or hinder human rights; and health outcomes are improved by fulfilling the full range of human rights. Stanford students may enroll in the course for 1 Unit credit based upon attendance. The Series is also open to the Stanford community and the general public.

Same as: FEMGEN 205X, INTNLREL 110, POLISCI 204, POLISCI 304.

IPS 280. Transitional Justice, Human Rights, and International Criminal Tribunals. 3-5 Units.

Historical backdrop of the Nuremberg and Tokyo Tribunals. The creation and operation of the Yugoslav and Rwanda Tribunals (ICTY and ICTR). The development of hybrid tribunals in East Timor, Sierra Leone, and Cambodia, including evaluation of their success in addressing perceived shortcomings of the ICTY and ICTR. Examination of the role of the International Criminal Court and the extent to which it will succeed in supplanting all other ad hoc international justice mechanisms and fulfill its goals. Analysis focuses on the politics of creating such courts, their interaction with the states in which the conflicts took place, the process of establishing prosecutorial priorities, the body of law they have produced, and their effectiveness in addressing the needs of victims in post-conflict societies.

Same as: ETHICSOC 280, INTNLREL 180A.

IPS 298. Practical Training. 1-3 Unit.

Students obtain internship in a relevant research or industrial activity to enhance their professional experience consistent with their degree program and area of concentration. Prior to enrolling students must get internship approved by associate director. At the end of the quarter, a three page final report must be supplied documenting work done and relevance to degree program. Meets the requirements for Curricular Practical Training for students on F-1 visas. Student is responsible for arranging own internship. Limited to International Policy Studies students only. May be repeated for credit.

IPS 299. Directed Reading. 1-5 Unit.

IPS students only. May be repeated for credit.

IPS 300. Issues in International Policy Studies. 1 Unit.

Presentations of techniques and applications of international policy analysis by students, faculty, and guests, including policy analysis practitioners.

IPS 802. TGR Dissertation. 0 Units.

International Relations Courses

INTNLREL 1. Introduction to International Relations. 5 Units.

Approaches to the study of conflict and cooperation in world affairs. Applications to war, terrorism, trade policy, the environment, and world poverty. Debates about the ethics of war and the global distribution of wealth.

Same as: POLISCI 1.

INTNLREL 12. The Human Rights Fad? International Human Rights Advocacy and the Ethics of Humanitarianism. 1 Unit.

This 1-unit Alternative Spring Break course and trip will explore the world of international human rights advocacy, and the ethics of humanitarianism in the 21st Century. The course will examine the history of human rights and the international system that has been created to promote them. By looking at case studies of historical and current human rights violations, specifically those associated with mass atrocities, we hope to develop our understanding of thennterm human rights and how it is applied in our world today. We will critically analyze the strategies employed by governments and NGOs to address these crimes committed against humanity.

INTNLREL 13. Not For Sale: Human Trafficking in the Bay Area. 1 Unit.

When we hear the phrase, "human trafficking", we usually envision brothels in India or red light districts in Nepal. Yet, trafficking is a worldwide phenomenon that is occurring right in our backyard, from the massage parlors of San Francisco to the small night clubs of Gilroy. Throughout our course and trip, we will shed light on the impact of trafficking in our daily lives, and why this billion dollar industry is occurring right here in the Bay Area. We will examine trafficking as an intersection of issues, and how topics such as gender, politics, immigration, and, even, economics fuel this dangerous industry. Through arming ourselves with awareness, we, as students, can equip ourselves with knowledge to identify and fight trafficking in our own community.

INTNLREL 61Q. Food and security. 3 Units.

The course will provide a broad overview of key policy issues concerning agricultural development and food security, and will assess how global governance is addressing the problem of food security. At the same time the course will provide an overview of the field of international security, and examine how governments and international institutions are beginning to include food in discussions of security.

Same as: EARTHSYS 61Q, EESS 61Q.

INTNLREL 71Q. Aesthetics of Dissent: the Case of Islamic Iran. 2 Units.

Censorship, Borges tells us, is the mother of metaphors. The Islamic regime in Iran censors all aesthetic production in the country. But Iranian dissident artists, from film-makers and fiction writers to composers in a thriving under-ground musical scene, have cleverly found ways to fight these draconian measures. They have developed an impressive body of work that is as sophisticated in style as it is rich in its discourse of democracy and dissent. The purpose of the seminar is to understand the aesthetic tropes of dissent in Iran, and the social and theological roots of rules of censorship. Masterpieces of post-revolutionary film, fiction, and music will be discussed in the context of tumultuous history of dissent in Islamic Iran. Same as: COMPLIT 40Q.

INTNLREL 102. The History of the International System since 1914. 5 Units.

After defining the characteristics of the international system at the beginning of the twentieth century, this course reviews the primary developments in its functioning in the century that followed. Topics include the major wars and peace settlements; the emergence of Nazism and Communism; the development of the Cold War and nuclear weapons; the rise of China, India, and the EU; and the impact of Islamic terrorism. The role of international institutions and international society will also be a focus as will the challenge of environment, health, poverty, and climate issues to the functioning of the system.

Same as: HISTORY 102.

INTNLREL 103E. Global Catholicism. 5 Units.

The rise of Catholicism as a global phenomenon, and its multiple transformations as it spread to the Americas, Asia, and Africa. Topics include the Reformation, Tridentine reform and the Jesuits, the underground churches in England and the Dutch Republic, the missions to Asia, the Spanish conquest of Latin America, conversion and indigenous religions, missionary imperialism and new religious movements in the non-European world.

INTNLREL 105C. Human Trafficking: Historical, Legal, and Medical Perspectives. 5 Units.

(Same as HISTORY 5C. History majors and others taking 5 units, enroll in 105C.) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution and labor exploitation, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning and offers an optional service-learning component.

Same as: FEMGEN 105C, HISTORY 105C.

INTNLREL 110. Sanela Diana Jenkins International Human Rights Colloquium. 1 Unit.

This course focuses on the relationship between global health and human rights. The course will feature leading human rights scholars and practitioners from around the world. We will examine the conceptual linkages between global health and human rights and explore both the promise of the field and the challenges inherent in implementing its norms on the ground. Health and human rights are interrelated in multiple ways: human rights abuses have negative health consequences; health policies and programs can enhance or hinder human rights; and health outcomes are improved by fulfilling the full range of human rights. Stanford students may enroll in the course for 1 Unit credit based upon attendance. The Series is also open to the Stanford community and the general public.

Same as: FEMGEN 205X, IPS 271, POLISCI 204, POLISCI 304.

INTNLREL 110C. America and the World Economy. 5 Units.

Examination of contemporary US foreign economic policy. Areas studied: the changing role of the dollar; mechanism of international monetary management; recent crises in world markets including those in Europe and Asia; role of IMF, World Bank and WTO in stabilizing world economy; trade politics and policies; the effects of the globalization of business on future US prosperity. Enroll in PoliSci 110C for WIM credit. Same as: POLISCI 110C, POLISCI 110X.

INTNLREL 110D. War and Peace in American Foreign Policy. 5 Units.

(Students not taking this course for WIM, register for 110Y.) The causes of war in American foreign policy. Issues: international and domestic sources of war and peace; war and the American political system; war, intervention, and peace making in the post-Cold War period.

Same as: POLISCI 110D, POLISCI 110Y.

INTNLREL 114D. Democracy, Development, and the Rule of Law. 5 Units.

Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts. Same as: IPS 230, POLISCI 114D, POLISCI 314D.

INTNLREL 118S. Political Economy of International Trade and Investment. 5 Units.

How domestic and international politics influence the economic relations between countries. Why do governments promote or oppose globalization? Why do countries cooperate economically in some situations but not others? Why do countries adopt bad economic policies? Focus on the politics of international trade and investment. Course approaches each topic by examining alternative theoretical approaches and evaluate these theories using historical and contemporary evidence from many geographical regions around the world. Prerequisites: ECON 1A, ECON 1B, and a statistics course.

Same as: POLISCI 218S.

INTNLREL 122A. The Political Economy of the European Union. 5 Units.

EU institutions, the legislative process, policies, relations with the U.S., and enlargement and the future of the EU. History and theories of EU integration. Democratic accountability of the institutions, and the emerging party system. Principal policies in agriculture, regional development, the internal market, single currency, and competition. Emphasis is on policies that affect the relations with the U.S. including trade and security. Results of the EU's constitutional convention.

INTNLREL 123. The Future of the European Union: Challenges and Opportunities. 5 Units.

First, this course analyzes the EU's greatest challenge, preserving the monetary union, and discusses the political and economic reforms needed to achieve that goal. In this context the course also studies the fiscal and budgetary policies of the EU. Second, the course discusses the EU's role in global politics, its desire to play a more prominent role, and the ways to reach that objective. Third, the course analyzes the EU's institutional challenges in its efforts to enhance its democratic character.

INTNLREL 128B. International Problem-Solving Through NGOs: Policy, Players, Strategies, and Ethics. 2 Units.

This course will focus on advanced international problem-solving through the lens of international NGOs, while integrating other relevant players that address global issues within a lens of ethics and accountability. Particular aspects of NGOs that will be assessed are: policy, business, strategy, and engagement with other players. Students will consider the major issues that international NGOs face in their effort to effect positive change in an increasingly complex global environment. The course draws heavily on a series of sophisticated case studies involving a variety of NGOs, areas of specialization, and geographic regions. Topics may include: poverty and famine; the natural resources curse; terrorism; HIV/Aids and other epidemics and neglected diseases; natural disasters and emergencies; climate change; and contagion of unethical behavior. A final project tailored to each student's interest will be in lieu of a final exam. Students will have the opportunity to work with several internationally prominent guests. Same as: PUBLPOL 128, PUBLPOL 228.

INTNLREL 136. History of International Relations Thought. 5 Units.

In this course, we will examine the intellectual origins of contemporary theories and approaches to international politics. In particular, we will trace the classical and early modern roots of contemporary realism, idealism, and cosmopolitanism. We will also address some of the enduring normative and empirical questions about international politics: (1) What is the basis of political power and authority? (2) What rights and obligations do individuals have? (3) What rights and obligations do states have? (4) What are the causes of conflict? (5) What are the prospects for enduring peace? Thinkers covered may include: Thucydides, Cicero, Augustine, Aquinas, Grotius, Hobbes, Kant, Morgenthau, and Waltz. Same as: POLISCI 238T.

INTNLREL 136R. Introduction to Global Justice. 4 Units.

Recent work in political theory on global justice. Topics include global poverty, human rights, fair trade, immigration, climate change. Do developed countries have a duty to aid developing countries? Do rich countries have the right to close their borders to economic immigrants? When is humanitarian intervention justified? Readings include Charles Beitz, Thomas Pogge, John Rawls.

Same as: ETHICSOC 136R, PHIL 76, POLISCI 136R, POLISCI 336.

INTNLREL 140A. International Law and International Relations. 5 Units.

What is the character of international legal rules? Do they matter in international politics, and if so, to what degree? The foundational theories, principles, and sources of public international law. Prominent theories of international relations and how they address the role of law in international politics. Practical problems such as human rights, humanitarian intervention, and enforcement of criminal law. International law as a dynamic set of rules, at times influenced by power, at other times constraining it, but always essential to studying international relations.

INTNLREL 140C. The U.S., U.N. Peacekeeping, and Humanitarian War. 5 Units.

The involvement of U.S. and the UN in major wars and international interventions since the 1991 Gulf War. The UN Charter's provisions on the use of force, the origins and evolution of peacekeeping, the reasons for the breakthrough to peacemaking and peace enforcement in the 90s, and the ongoing debates over the legality and wisdom of humanitarian intervention. Case studies include Croatia and Bosnia, Somalia, Rwanda, Kosovo, East Timor, and Afghanistan.

Same as: HISTORY 201C.

INTNLREL 141A. Camera as Witness: International Human Rights Documentaries. 5 Units.

Rarely screened documentary films, focusing on global problems, human rights issues, and aesthetic challenges in making documentaries on international topics. Meetings with filmmakers.

INTNLREL 142. Challenging the Status Quo: Social Entrepreneurs Advancing Democracy, Development and Justice. 5 Units.

This seminar is part of a broader program on Social Entrepreneurship at CDDRL. It will use practice to better inform theory. Working with three visiting social entrepreneurs from developing and developed country contexts students will use case studies of successful and failed social change strategies to explore relationships between social entrepreneurship, gender, democracy, development and justice. It interrogates current definitions of democracy and development and explores how they can become more inclusive of marginalized populations. This is a service learning class in which students will learn by working on projects that support the social entrepreneurs' efforts to promote social change. Limited enrollment. Attendance at the first class is mandatory in order to participate in service learning.

Same as: AFRICAST 142.

INTNLREL 143. State and Society in Korea. 4 Units.

20th-century Korea from a comparative historical perspective. Colonialism, nationalism, development, state-society relations, democratization, and globalization with reference to the Korean experience.

Same as: SOC 111, SOC 211.

INTNLREL 144. NEW GLOBAL HUMAN RIGHTS. 3 Units.

Examination of emerging trends in international human rights with an analysis of new categories of human rights victims, human rights actors, and human rights technologies.

INTNLREL 145. Genocide and Humanitarian Intervention. 4 Units.

The course, a colloquium, traces the history of genocide in the 20th century and the question of humanitarian intervention to stop it, a topic that has been especially controversial since the end of the Cold War. The pre-1990s discussion begins with the Armenian genocide during the First World War and includes the Holocaust and Cambodia under the Khmer Rouge in the 1970s. Coverage of genocide and humanitarian intervention since the 1990s includes the wars in Bosnia, Rwanda, Kosovo, the Congo, and Sudan. The final session of the course will be devoted to a discussion of the International Criminal Court and the separate criminal tribunals that have been tasked with investigating and punishing the perpetrators of genocide.

INTNLREL 146A. Energy and Climate Cooperation in the Western Hemisphere. 4 Units.

Current political dynamics in major western hemisphere fossil fuel producers in N. America, the Andean region, the Southern Cone of S. America, and Trinidad and Tobago. The potential for developing sustainable alternative energy resources in the western hemisphere for export particularly biofuels, and its impact on agricultural policy, environmental protection, and food prices. The feasibility of creating regional energy security rings such as the proposed N. American Energy Security and Prosperity Partnership.

Same as: EARTHSYS 132, EARTHSYS 232, IPS 263.

INTNLREL 149. The Economics and Political Economy of the Multilateral Trade System. 5 Units.

The historical development of the multilateral trade system, the current agenda of the World Trade Organization, and prospects for trade liberalization. Emphasis is on the economic rationale for multilateral trade rules, the political problems facing countries in supporting further liberalization, and the challenges to the legitimacy of WTO procedures and practices. Issues include the greater participation of developing countries, the impact of new members, and the relationship between the WTO and other multilateral bodies. Guest speakers; student research paper presentations.

INTNLREL 151. Decoding the Arab Spring and the Future of the Middle East. 5 Units.

The seminar will focus on events of the Arab Spring and the future of the Middle East under new political players. The course will explore themes such as: the issues that forged the identity of the Arab Spring; common features among the Arab Spring countries; mechanisms of street protests against police states, history and current relationship between the military and new political powers; differences and similarities between secularists and Islamists towards public policy; why the Islamists are winning in public polls; scenarios for the region and some countries under new constitutions and parties.

INTNLREL 152. Organized Crime and Democracy in Latin America. 5 Units.

Scholars and policy analysts have long emphasized the strength of the rule of law as a key determinant of economic development and social opportunity. They also agree that the rule of law requires an effective and accountable legal system. The growth of transnational organized crime is a major impediment, however, to the creation of effective and accountable legal systems. This seminar examines how and why transnational criminal organizations have developed in Latin America, explores why they constitute a major challenge to the consolidation of democratic societies, economic development and individual rights. It also examines the efforts of governments to combat them, with a focus on the experiences of Mexico, Colombia, and Brazil. The course examines these cases in order to draw lessons; by pointing to both successes and failures; of use to policy analysts, legal scholars, and practitioners.

Same as: IPS 247, POLISCI 244T.

INTNLREL 154. The Cold War: An International History. 5 Units.

Though it ended twenty years ago, we still live in a world shaped by the Cold War. Beginning with its origins in the mid-1940s, this course will trace the evolution of the global struggle, until its culmination at the end of the 1980s. Students will be asked to ponder the fundamental nature of the Cold War, what kept it alive for nearly fifty years, how it ended, and its long term legacy for the world.

Same as: HISTORY 266C.

INTNLREL 157. The Political Economy of the Arab Revolutions. 5 Units.

Many observers prefer to interpret the popular uprisings that swept through the Middle East in 2011 as a mere reaction to decades of authoritarian rule and human rights abuses. Conversely, others have underlined the deeper and more structural socio-economic drivers of revolt. This course aims at providing an in-depth analysis of Arab revolutions by employing the tools of political economy and departing from the conviction that revolts are the culmination of lengthy and complex processes rather than just occasional breakdown of authoritarian regimes.

INTNLREL 159. Political Economy of East Asia. 3-5 Units.

(Formerly 117.) Comparative and international political economy of E. and S.E. Asia. Industrial development and the Asian miracle, economic integration, regional cooperation, the Asian financial crisis, and contemporary challenges.

Same as: POLISCI 211.

INTNLREL 163. Introduction to Israeli Politics. 5 Units.

This course aims to introduce students to Israel's political system and its major actors. We will survey Israel's political landscape, both chronologically and thematically, covering the major issues and conflicts which have dominated Israeli politics since its inception.

Same as: JEWISHST 279P, POLISCI 249P.

INTNLREL 168. America as a World Power: U.S. Foreign Relations, 1914 to Present. 5 Units.

This course will examine the modern history of American foreign relations, from 1914 to the present. Beginning with the fateful decision to intervene in the First World War, it will examine the major crises and choices that have defined the American Century. Our study of U.S. foreign relations will consider such key factors as geopolitics, domestic politics, bureaucracy, psychology, race, and culture. Students will be expected to undertake their own substantial examination of a critical episode in the era studied.

Same as: HISTORY 252K.

INTNLREL 173. Presidents and Foreign Policy in Modern History. 5 Units.

Nothing better illustrates the evolution of the modern presidency than the arena of foreign policy. This class will examine the changing role and choices of successive presidential administrations over the past century, examining such factors as geopolitics, domestic politics, the bureaucracy, ideology, psychology, and culture. Students will be encouraged to think historically about the institution of the presidency, while examining specific case studies, from the First World War to the conflicts of the 21st century.

Same as: HISTORY 261G.

INTNLREL 174. Diplomacy on the Ground: Case Studies in the Challenges of Representing Your Country. 5 Units.

The tragic death of Ambassador Chris Stevens has recently highlighted the dangers of diplomacy in the modern era. This class will look at how Americans in embassies have historically confronted questions such as authoritarian rule, human rights abuses, violent changes of government, and covert action. Case studies will include the Berlin embassy in the 1930s, Tehran in 1979, and George Kennan's experiences in Moscow, among others. Recommended for students contemplating careers in diplomatic service.

Same as: HISTORY 252B.

INTNLREL 180A. Transitional Justice, Human Rights, and International Criminal Tribunals. 3-5 Units.

Historical backdrop of the Nuremberg and Tokyo Tribunals. The creation and operation of the Yugoslav and Rwanda Tribunals (ICTY and ICTR). The development of hybrid tribunals in East Timor, Sierra Leone, and Cambodia, including evaluation of their success in addressing perceived shortcomings of the ICTY and ICTR. Examination of the role of the International Criminal Court and the extent to which it will succeed in supplanting all other ad hoc international justice mechanisms and fulfill its goals. Analysis focuses on the politics of creating such courts, their interaction with the states in which the conflicts took place, the process of establishing prosecutorial priorities, the body of law they have produced, and their effectiveness in addressing the needs of victims in post-conflict societies.

Same as: ETHICSOC 280, IPS 280.

INTNLREL 191. IR Journal. 1 Unit.

(Staff).

INTNLREL 197. Directed Reading in International Relations. 1-5 Unit.

Open only to declared International Relations majors.n (Staff).

INTNLREL 198. Senior Thesis. 2-10 Units.

Open only to declared International Relations majors with approved senior thesis proposals.

INTNLREL 200A. International Relations Honors Field Research. 3 Units.

For juniors planning to write an honors thesis during senior year. Initial steps to prepare for independent research. Professional tools for conceptualizing a research agenda and developing a research strategy. Preparation for field research through skills such as data management and statistics, references and library searches, and fellowship and grant writing. Creating a work schedule for the summer break and first steps in writing. Prerequisite: acceptance to IR honors program.

INTNLREL 200B. International Relations Honors Seminar. 3 Units.

Second of two-part sequence. For seniors working on their honors theses. Professional tools, analysis of research findings, and initial steps in writing of thesis. How to write a literature review, formulate a chapter structure, and set a timeline and work schedule for the senior year. Skills such as data analysis and presentation, and writing strategies. Prerequisites: acceptance to IR honors program, and 199 or 200A.

INTNLREL 200C. IR Honors Thesis Writing. 1 Unit.

Mandatory seminar for International Relations Honors Students who are writing their Honors Thesis. INTNLREL 200A and 200B are prerequisites.

INTNLREL 206. Palestinian Nationalism, Past and Present. 5 Units.

The Palestinian national movement and its role in the Arab-Israeli conflict. The roots of the movement in the Ottoman Empire, its growth through the British Mandate, the 1948 and 1967 wars, the Intifada, and the Israeli-Palestinian peace process. Emphasis is on components which contributed to or delayed the growth of a distinct Palestinian identity, including Zionism.

INTNLREL 207. Tribe, State, and Society in the Modern Middle East. 5 Units.

The staying power of tribal identities and values in the Middle East. Examples include the Iraqi Sunni tribal insurgency against the U.S. The role of tribes in the formation of Middle Eastern states and how tribal values continue to impact social, political, and economic issues today.

Introduction to the Humanities Courses

Italian General Courses

Italian Language Courses

ITALLANG 1. First-Year Italian, First Quarter. 5 Units.

All-in-Italian communicative and interactive approach. Emphasis is on the development of appropriate discourse in contemporary cultural contexts. Interpretation of authentic materials, written and oral presentations, and plenty of conversational practice. Language lab, multimedia, and online activities.

ITALLANG 1A. Accelerated First-Year Italian, Part 1. 5 Units.

Accelerated sequence that completes first-year Italian in two rather than three quarters. For students with previous knowledge of Italian or with a strong background in another Romance language. Prerequisite: advanced-level proficiency in another Romance language or placement test.

ITALLANG 2. First-Year Italian, Second Quarter. 5 Units.

Continuation of ITALLANG 1. All-in-Italian communicative and interactive approach. Emphasis is on the development of appropriate discourse in contemporary cultural contexts. Interpretation of authentic materials, written and oral presentations, and plenty of conversational practice. Language lab, multimedia, and online activities. Prerequisite: Itallang 1 or placement test.

ITALLANG 2A. Accelerated First-Year Italian, Part 2. 5 Units.

Continuation of ITALLANG 1A. Accelerated sequence that completes first-year Italian in two rather than three quarters. For students with previous knowledge of Italian or with a strong background in another Romance language. Prerequisite: Placement Test or ITALLANG 1A. Fulfills the University language requirement.

ITALLANG 3. First-Year Italian, Third Quarter. 5 Units.

Continuation of ITALLANG 2. All-in-Italian communicative and interactive approach. Emphasis is on the development of appropriate discourse in contemporary cultural contexts. Interpretation of authentic materials, written and oral presentations, and plenty of conversational practice. Language lab, multimedia, and online activities. Prerequisite: Itallang 2 or placement test. Fulfills the University language requirement.

ITALLANG 5A. Intensive First-Year Italian, Part A. 5 Units.

Same as ITALLANG 1. Accelerated. Covers 1 quarter of Italian. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials. Only Stanford graduate students restricted to 9 units may register for 205A,B,C.

ITALLANG 5B. Intensive First-Year Italian, Part B. 5 Units.

Same as ITALLANG 2. Continuation of 5A. Accelerated. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials. Only Stanford graduate students restricted to 9 units may register for 205A,B,C. Prerequisite 1 or 5A.

ITALLANG 5C. Intensive First-Year Italian, Part C. 5 Units.

Same as ITALLANG 3. Continuation of 5B. Accelerated. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials. Only Stanford graduate students restricted to 9 units may register for 205A,B,C. Prerequisite 2 or 5B. Fulfills the University language requirement.

ITALLANG 15S. Intermediate Italian Oral Conversation. 3 Units.

May be repeated once for credit.

ITALLANG 20. Intermediate Oral Communication: Italy Today. 3 Units.

Second-year conversational and presentational skills developed through exposure to based on movie clips, slide shows, and other authentic multimedia materials. Guest lectures on Italian culture including opera, pop music, wine, and food culture. Preview of the Florentine experience with Florence returnees sharing their experiences in Italy. Prerequisite: ITALLANG 2A, ITALLANG 3. Repeatable for credit twice.

ITALLANG 21. Second Year Italian, First Quarter. 3-4 Units.

Continuation of 3. Second-Year Italian, First Quarter - Sequence integrating culture and language in the development of socioculturally appropriate discourse. Authentic materials include news and film clips, video and audio files, and short stories. Reading, writing, listening, and speaking competence based on cross cultural understanding. Prerequisite: Placement Test, ITALLANG 3.

ITALLANG 21A. Accelerated Second-Year Italian, Part 1. 4-5 Units.

Continuation of ITALLANG 2A. For students going to Florence. Completes second-year sequence in two rather than three quarters. Prerequisite: placement test, ITALLANG 2A, ITALLANG 3.

ITALLANG 22. Second-Year Italian, Second Quarter. 3-4 Units.

Continuation of ITALLANG 21. Sequence integrating culture and language in the development of socioculturally appropriate discourse. Authentic materials include news and film clips, video and audio files, and excerpts from short stories. Reading, writing, listening, and speaking competence based on cross-cultural understanding. Prerequisite: Placement Test, ITALLANG 21 or equivalent.

ITALLANG 22A. Accelerated Second-Year Italian, Part 2. 4-5 Units.

Continuation of ITALLANG 21A or OSPFLOR 21F (for Florence returnees). Part A of a second-year sequence in two rather than three quarters. Satisfies the foreign language requirement for International Relations majors. Prerequisite: Placement Test, ITALLANG 21A or OSPFLOR 21F.

ITALLANG 23. Second-Year Italian, Third Quarter. 3-4 Units.

Continuation of ITALLANG 22. Sequence integrating culture and language in the development of socioculturally appropriate discourse. Authentic materials include news and film clips, video and audio files, and short stories. Reading, writing, listening, and speaking competence based on cross cultural understanding. Prerequisite: Placement Test, ITALLANG 22 or equivalent. Satisfies the foreign language requirement for International Relations majors.

ITALLANG 99. Language Specials. 1-5 Unit.

Prerequisite: consent of instructor.

ITALLANG 101. Advanced Oral Communication: Italian Opera. 3 Units.

For Florence returnees or those who have completed second-year Italian. Use of opera excerpts by Leoncavallo, Puccini, Rossini, and Verdi to improve communication skills and review language functions. Emphasis is on presentation, conversation, and debate. Prerequisites: Placement Test, second-year Italian or equivalent.

ITALLANG 102. Advanced Oral Communication: Modern Cinema. 3 Units.

For Florence returnees or those who have completed second-year Italian. Use of movie sequences by Italian film directors such as Benigni, Moretti, Salvatores, Soldini, and Tornatore to improve communication skills and review language functions. Emphasis is on presentation, conversation, and debate. Prerequisite: placement test, 101.

ITALLANG 103. Advanced Oral Communication: Italian Classic Cinema. 3 Units.

For Florence returnees or those who have completed second-year Italian. Use of classical movie sequences by Italian film directors such as Antonioni, De Sica, Fellini, Rossellini, and Visconti to improve communication skills and review language functions. Emphasis is on presentation, conversation, and debate. Prerequisite: second-year Italian.

ITALLANG 113. Italian Cultural Studies. 3-4 Units.

Literary texts, news reports, comic books, film reviews, music lyrics, and sociological surveys used to examine Italy's language, culture, and society today. Advanced grammatical analysis and reading comprehension. Prerequisite: second-year Italian or equivalent.

ITALLANG 114. Advanced Stylistics and Composition. 3-4 Units.

Goal is advanced proficiency in written Italian. Textual and grammatical analysis of literary and non-literary texts, oral reports, translations, and writing assignments. Prerequisite: Placement Test, second-year Italian or equivalent.

ITALLANG 115. Academic and Creative Writing. 3-4 Units.

Continuation of 114. Academic prose: formal structures and academic terminology. Creative prose: short stories, expressive language, and when and how to break the rules for effect. Prerequisite: second-year Italian or equivalent.

ITALLANG 126. Italy and Italians Today. 2 Units.

May be repeated for credit.

ITALLANG 205A. Intensive First-Year Italian for Stanford Grads, Part A. 3-5 Units.

Equivalent to ITALLANG 5A. Accelerated. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials. Only Stanford graduate students restricted to 9 units may register for 205A,B,C or 2 of the courses for a total of 9 units.

ITALLANG 205B. Intensive First-Year Italian for Stanford Grads, Part B. 3-5 Units.

Equivalent to ITALLANG 5B. Accelerated. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials. Only Stanford graduate students restricted to 9 units may register for 205A,B,C or 2 of the courses for a total of 9 units Prerequisite 205A or equivalent.

ITALLANG 205C. Intensive First-Year Italian for Stanford Grads, Part C. 3-5 Units.

Equivalent to ITALLANG 5C. Accelerated. Emphasis is on the development of authentic discourse. Online activities, conversational practice, and interpretation and production of oral and written materials. Only Stanford graduate students restricted to 9 units may register for 205A,B,C or 2 of the courses for a total of 9 units Prerequisite 205B or equivalent.

ITALLANG 250. Reading Italian. 4 Units.

For seniors or graduate students seeking to meet the University reading requirement for advanced degrees. Reading strategies for comprehension of secondary literature for academic research. Fulfills the University foreign language requirement for advanced degrees if student earns a grade of 'B.' Prerequisite: one year of Italian or reading proficiency in another Romance language.

ITALLANG 394. Graduate Studies in Italian Conversation. 1-3 Unit.

Prerequisite: consent of instructor.nn (Staff).

ITALLANG 395. Graduate Studies in Italian. 2-5 Units.

Prerequisite: consent of instructor.nn (Staff).

Italian Literature Courses

Italian Literature Courses

ITALIAN 41N. Imagining Italy. 3 Units.

Preference to freshmen. To the English and American literary imagination, Italy has long been a source of fascination. During the past hundred years, writers from Nathaniel Hawthorne to Frances Mayes have explored the broad range of contradictory resonances of the Italian setting, in fiction, travel essays, and memoirs. While some writers have celebrated the sensuality of Italian culture and landscape, others have imagined Italy as a more dangerous place -- as dangerous as the erotic love with which it is often identified. The range of literary responses to Italy by writers in English during the past hundred years will be examined, and the ways in which our culture has continued to construct myths of Italy will be explored. We will also see how these myths have been transformed into commodities in today's consumer culture, making "Italy" one of the most profitable fictions in the marketplace. Taught in English.

ITALIAN 52N. Life is a Play: Identity, Persona, and Improvisation in Luigi Pirandello. 3 Units.

Stanford Introductory Seminar. Preference to freshmen. For Pirandello (1867-1936; Nobel Prize, 1934), to suddenly realize your entire life has been a performance is a moment of utmost horror, comedy, and opportunity for self-awareness. In a quintessentially modern fashion, he claims that the performance cannot be stopped, that authenticity is a mirage, and that learning to laugh at oneself is the only liberation. Materials include Pirandello's existential "theater within the theater," his novels, and their film adaptations, which we will study in their cultural context.

ITALIAN 75N. Narrative Medicine and Near-Death Experiences. 3 Units.

Even if many of us don't fully believe in an afterlife, we remain fascinated by visions of it. This course focuses on Near-Death Experiences and the stories around them, investigating them from the many perspectives pertinent to the growing field of narrative medicine: medical, neurological, cognitive, psychological, sociological, literary, and filmic. The goal is not to understand whether the stories are veridical but what they do for us, as individuals, and as a culture, and in particular how they seek to reshape the patient-doctor relationship. Materials will span the 20th century and come into the present. Taught in English.

Same as: FRENCH 75N.

ITALIAN 101. Italy: The Good, the Bad and the Ugly. 3-5 Units.

Renowned for its rich cultural tradition, Italy is also one of the most problematic nations in Europe. This course explores the contradictions at the heart of Italy, focusing on five key words and their corresponding human figures, which embody the spirit of Italy and its people: Stile (the artist), Spirito (the hero-saint), Scienza (the thinker), Migrazione (the explorer), and Crisi (the political man). Through the study of historical and literary texts, films, and news media, the course addresses figures such as Dante, Michelangelo, Da Vinci, and Galileo; and socio-cultural phenomena such as fashion and design, the scientific revolution, immigration, and Berlusconi. Offered as a part of the Gateways to the World program. Taught in English.

ITALIAN 104. La dolce vita: Italian Stereotypes in Film. 3-5 Units.

Passion, nostalgia, mafia, women. What has it meant to be Italian in the past hundred years? How are these stereotypes invented, portrayed and dismantled by filmmakers such as Fellini, Scola, Giordana, Benigni and Torre? This course will address the problem of Italianità, its anomalies and contradictions, and look at how Italians have imagined themselves on the big screen, from the figure of the hopeless romantic to the mafioso. Films will be in Italian with English subtitles. Taught in Italian.

ITALIAN 120. Love Italian Style. 4 Units.

Gateway course for Italian studies. An examination of representations of love and sexuality in Italian literature, art, film, and popular culture from the Italian Renaissance to the current period. Beginning with the figure of Silvio Berlusconi and ending with Dante's love for Beatrice, the course considers differences in social practices and mores over time, the role of literary and artistic representations in establishing cultural expectations about love, the question of gender roles and identity in Italian society, as well as contemporary stereotypes about love in Italy and Italians in love. Taught in Italian. Prerequisites: ITALLANG 22A or equivalent.

ITALIAN 127. Inventing Italian Literature: Dante, Boccaccio, Petrarca. 4 Units.

The origins of Italian literature. Poetry such as 13th-century love lyrics, Dante's Vita Nuova and Petrarca's Canzoniere; prose such as stories from Boccaccio's Decameron. Taught in Italian. Prerequisites: ITALLANG 22A or equivalent.

ITALIAN 128. The Italian Renaissance and the Path to Modernity. 4 Units.

The literature, art, and history of the Renaissance and beyond. Readings from the 15th through 18th centuries include Moderata Fonte, Machiavelli, Ariosto, Tasso, Galileo, and Goldoni. Taught in Italian. Prerequisites: ITALLANG 22A or equivalent (2 years of Italian).

ITALIAN 129. Modern Italian History and Literature. 4 Units.

The history of the Italian nation and national literary identity in the 19th and 20th centuries. The relationship between literary texts and their historical context from the Risorgimento to the Resistance. Focus is on the romantic lyric, futurism, fascism, and the changing status of women. Authors include Foscolo, Leopardi, D'Annunzio, Aleramo, Marinetti, Pirandello, Ungaretti, and Montale. Prerequisite: ITALLANG 22A or equivalent. Taught in Italian.

ITALIAN 136. Literature and Politics - Two Mediterranean Cases: Catalonia and Italy. 3-5 Units.

A comparison between the different roles played by writers as members of the intellectual establishment in Catalonia, Spain and Italy. Focus on the relation between intellectuals and politics in shaping national identity. We will give especially consideration to the role played by intellectuals during the Fascist and Francoist dictatorships and during Spain's transition to democracy. Taught in English. Same as: ILAC 122.

ITALIAN 152. Boccaccio's Decameron: The Ethics of Storytelling. 3-5 Units.

This course involves an in-depth study of Boccaccio's Decameron in the context of medieval theories of poetry and interpretation. The goal is to understand more fully the relationship between literature and lived experience implied by Boccaccio's fictions. We will address key critical issues and theoretical approaches related to the text. Taught in English translation, there will be an optional supplementary Italian discussion section during weeks 2-9.

Same as: ITALIAN 352.

ITALIAN 154. Film & Philosophy. 4 Units.

Issues of freedom, morality, faith, knowledge, personal identity, and the value of truth explored through film; philosophical investigation of the filmic medium itself. Screenings to include *Twelve Monkeys* (Gilliam), *Ordet* (Dreyer), *The Dark Knight* (Nolan), *Vicky Cristina Barcelona* (Allen), and *Eternal Sunshine of the Spotless Mind* (Kaufman). Taught in English.

Same as: COMPLIT 154A, FRENCH 154, PHIL 193C, PHIL 293C.

ITALIAN 155. The Mafia in Society, Film, and Fiction. 4 Units.

The mafia has become a global problem through its infiltration of international business, and its model of organized crime has spread all over the world from its origins in Sicily. At the same time, film and fiction remain fascinated by a romantic, heroic vision of the mafia. Compares both Italian and American fantasies of the Mafia to its history and impact on Italian and global culture. Taught in English.

ITALIAN 166. Women's Voices in Contemporary Italian Literature. 3-5 Units.

The traditional canon of Italian literature consists almost exclusively of male authors. Yet Italian women writers have been active since the time of Dante. This presents an overview of women's prose fiction of the last 100 years, from Sibilla Aleramo's groundbreaking feminist novel **Una donna** (1906) to novels from the 80's and 90's. We will examine such issues as the central issue of sexual violence in many female autobiographies; the experience of motherhood; the conflict between maternal love and the desire for self-determination and autonomy; paths to political awareness; reinventing the historical novel. Taught in English.

Same as: ITALIAN 366.

ITALIAN 181. Philosophy and Literature. 5 Units.

Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. Taught in English.

Same as: CLASSGEN 81, COMPLIT 181, ENGLISH 81, FRENCH 181, GERMAN 181, PHIL 81, SLAVIC 181.

ITALIAN 199. Individual Work. 1-12 Unit.**ITALIAN 220. Early Modern Seminar. 3-5 Units.**

Explores some of the key texts of European early modernity and the critical paradigms according to which the idea of the "Renaissance" has been formed, analyzed, and questioned since the 19th century. Will aim to provide a broad introduction to Early Modern studies from the point of view of the Italian Renaissance and its reception in different European contexts. Taught in English.

Same as: DLCL 323.

ITALIAN 221. Italo Calvino: Literature, Science, Philosophy. 3-5 Units.

The course will follow the development of Italo Calvino's literary career, with a particular focus on his interest in fantastical and meta-fictional forms of narrative. Readings of Calvino's literary works, such as *Cosmicomics*, *Invisible Cities*, and *Mr. Palomar*, will be supplemented by readings from his critical prose, collected in the volumes *The Uses of Literature* and *Six Memos for the Next Millennium*. Taught in English.

ITALIAN 226. Modern Italian Poetry and Ultimate Questions. 3-5 Units.

More than in any other tradition, Italian poets of the twentieth century focus on "ultimate questions," and look all the way back to Dante in doing so: why do we die? is there a God? what does it mean to love? are we responsible for our neighbors? is beauty related to truth? what do we learn from the past? what makes life meaningful? Poets include Ungaretti, Montale, Caproni, Sereni, Rosselli, Pasolini, Luzi, Merini, and Zanzotto. Taught in Italian. Prerequisites: Second-year Italian minimum.

ITALIAN 228. Science, Technology, and Society in the Face of the Looming Disaster. 3-5 Units.

The major topic will be the indeterminacy regarding the survival of humankind. With the advent of the atomic bomb humankind became potentially the maker of its own demise. Will combine a number of significant case studies (environmental disasters, industrial catastrophes, threat of nuclear devastation, technological risks) with the lessons drawn from a form of literature that is at the intersection of STS and the Humanities, in particular the early warnings made by such thinkers as Ivan Illich, Martin Heidegger, Hans Jonas, Günther Anders, and Hannah Arendt. Same as: FRENCH 228, POLISCI 233F.

ITALIAN 234. Courtly Love: Deceit and Desire in the Middle Ages. 3-5 Units.

A comparative seminar on medieval love books and their reception. We will examine and question the notion of "amour courtois," which arose in the lyrics and romances of medieval France and was codified in Romantic-era criticism. Primary readings will be enriched by thinking about this notion through the lens of modern theories of desire, such as those of Girard, Lacan, and Žižek. Conducted in English with readings in translation. Same as: COMPLIT 221A, FRENCH 234.

ITALIAN 235E. Dante's "Inferno". 3-5 Units.

Intensive reading of Dante's "Inferno" (the first canticle of his three canticle poem *The Divine Comedy*). Main objective: to learn how to read the *Inferno* in detail and in depth, which entails both close textual analysis as well as a systematic reconstruction of the Christian doctrines that subtend the poem. The other main objective is to understand how Dante's civic and political identity as a Florentine, and especially his exile from Florence, determined his literary career and turned him into the author of the poem. Special emphasis on Dante's moral world view and his representation of character. Taught in English.

ITALIAN 236E. Dante's "Purgatorio and Paradiso". 4-5 Units.

Reading the second and third canticles of Dante's *Divine Comedy*. Prerequisite: students must have read Dante's *Inferno* in a course or on their own. Taught in English. Recommended: reading knowledge of Italian.

ITALIAN 247. Shakespeare and Italy. 3-5 Units.

Focus on Italy's presence in Shakespeare's corpus; his use of Italian literary sources, and the Italian settings of some of his plays. It will also look at the reception of Shakespeare in Italy, especially in Italian opera and film. Readings will include Petrarch, Boccaccio, Bandello and Machiavelli; Shakespeare's sonnets and some of his major plays that are set in Italy. We will also discuss Verdi's opera, *Otello*, and Zeffirelli's movie *Romeo and Juliette*, among others Italian renditions of Shakespeare's plays. Taught in English.

ITALIAN 251. Writing, Memory, and Self-Fashioning. 3-5 Units.

Writing is not a mere recording of the past, but a selection and reinvention of our experiences. We will look at how writing is central to the philosophical project of fashioning the self, even as it reveals that much of what we call the self is a fictional construct. Materials include fiction and memoirs (Primo Levi, Michel Tournier, Melania Mazzucco, Jonathan Littell), and theoretical works in philosophy (Bergson, James, Freud, Jung, Derrida, Wyschogrod, Nehamas), psycholinguistics, and neuroscience. Taught in English.

Same as: FRENCH 251.

ITALIAN 256. North/South in Contemporary Italy. 4 Units.

One of the most difficult tasks of Italian unification was to negotiate the many differences between North and South -- economic, social, cultural, and linguistic. The phenomenal growth of regional and even separatist sentiment exemplified in the Northern League shows that Italian integration is far from complete. In this course we will explore the history of conflict between North and South from the Risorgimento to the present day, with a primary focus on prose fiction and film. Taught in English.

ITALIAN 260. Italy, France, and Postcolonialism. 3-5 Units.

The starting point for our seminar is the question of how postcolonial thought enhances our possible understandings of Italy - as a nation, as a territorial unit coalescing cultural parts that remain disparate to this day, and as a population that has not come fully to terms with its fascist history, its crimes in World War II, or the atrocities it perpetrated as a colonizing state. The Italian case is unusual compared to others, in that the country's colonial past in north and east Africa is still being uncovered after a long period of public silence and government suppression; and what might be called the postcolonial Italian project has begun only recently, driven by a distinct minority of scholars, 'migrant' authors, and activists. French cultural politics and history are often taken as a point of reference from which to analyze Italian phenomena. In this case, we will make use of the French postcolonial tradition as a point of both comparison and differentiation. Among other things, we will focus on the different meanings of 'postcolonial' in a country that is strongly centralized (France) and another which is unremittingly fragmented (Italy). As just one example, we will scrutinize how Gramsci's work has been understood in Anglophone and Francophone criticism (cultural studies, Subaltern studies, and so on), as opposed to how it may be read in its original Italian context, where it concerned subalterns within the nation-state. Asking what is postcolonial, for whom, when, and where?, ultimately our goal is to discern the specific contours of Italy's postcolonialism by juxtaposing it with France's, and to simultaneously ask what light can be shed on French postcolonial particularities by placing it in this dialogue. Beginning with fundamental historical readings (Gramsci, Fanon, Memmi) and touching on some early Anglophone postcolonial critics (Said, Bhabha), the seminar will then be structured around key literary and theoretical readings from Italy and France. Ideally, readings will be in the original language, but as often as possible they will be selected such that they will be accessible in English translation as well. Taught in English.

Same as: FRENCH 260.

ITALIAN 281. Novels into Film. 4-5 Units.

Some critics claim that film has displaced the novel as the most popular narrative form of contemporary culture. What is the relationship between the two media? Which novels are chosen for adaptation and why? What are the relative strengths and limitations of literature and film as media? What are the specific pleasures of adaptations? In this course we will read five Italian novels and analyze their film versions, viewing adaptation as a legitimate creative response to a work of literature. We will first read the novel and consider the particular challenges it presents to transposition into film. We will follow this discussion with a close reading of the film version. The goal of the course is to examine cinematic adaptation as a cultural process by introducing a group of significant texts from the Italian tradition. Taught in English.

ITALIAN 328. Literature, Narrative, and the Self. 3-5 Units.

The role of narrative in the well-lived life. Are narratives necessary? Can they, and should they, be literary? When might non-narrative approaches, whether literary or otherwise, be more relevant? Is unity of self something given, something to be achieved, or something to be overcome? Readings from Aristotle, Montaigne, Schopenhauer, Nietzsche, Camus, Sartre, MacIntyre, G. Strawson, Velleman; Ricoeur, Brooks; Shakespeare, Stendhal, Musil, Levi, Beckett, Morrison; film. Taught in English. Same as: COMPLIT 328, FRENCH 328.

ITALIAN 352. Boccaccio's Decameron: The Ethics of Storytelling. 3-5 Units.

This course involves an in-depth study of Boccaccio's Decameron in the context of medieval theories of poetry and interpretation. The goal is to understand more fully the relationship between literature and lived experience implied by Boccaccio's fictions. We will address key critical issues and theoretical approaches related to the text. Taught in English translation, there will be an optional supplementary Italian discussion section during weeks 2-9.

Same as: ITALIAN 152.

ITALIAN 366. Women's Voices in Contemporary Italian Literature. 3-5 Units.

The traditional canon of Italian literature consists almost exclusively of male authors. Yet Italian women writers have been active since the time of Dante. This presents an overview of women's prose fiction of the last 100 years, from Sibilla Aleramo's groundbreaking feminist novel *Una donna* (1906) to novels from the 80's and 90's. We will examine such issues as the central issue of sexual violence in many female autobiographies; the experience of motherhood; the conflict between maternal love and the desire for self-determination and autonomy; paths to political awareness; reinventing the historical novel. Taught in English.

Same as: ITALIAN 166.

ITALIAN 369. Introduction to Graduate Studies: Criticism as Profession. 5 Units.

A number of faculty will present published work and discuss their research and composition process. We will read critical, theoretical, and literary texts that address, in different ways, "What is a World?" Taught in English. Same as: COMPLIT 369, DLCL 369, FRENCH 369, GERMAN 369.

ITALIAN 395. Philosophical Reading Group. 1 Unit.

Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht is required. May be repeated for credit. Taught in English. Same as: COMPLIT 359A, FRENCH 395.

ITALIAN 398. Intensive Reading in French/Italian. 10 Units.

Enrollment is limited to French/Italian Ph.D. students. Course is designed for French/Italian Ph.D. students to prepare for department milestone exams.

Same as: FRENCH 398.

ITALIAN 399. Individual Work. 1-12 Unit.

Repeatable for Credit.

ITALIAN 802. TGR Dissertation. 0 Units.

Japanese General Courses

JAPANGEN 51. Japanese Business Culture and Systems. 3-5 Units.

Japanese sociocultural dynamics in industrial and corporate structures, negotiating styles, decision making, and crisis management. Practicum on Japan market strategies.

Same as: JAPANGEN 251.

JAPANGEN 57. How to Find Modern Japan: A Gateway Course. 4 Units.

An introduction to key locales in the cultural production of modern Japanese identity, offering a virtual tour of Japan and its significant others through major works of Japanese literature and film. Particular attention to sociohistorical context.

JAPANGEN 60. Asian Arts and Cultures. 5 Units.

An introduction to major monuments, themes, styles, and media of East and South Asian visual arts, in their social, literary, religious, and political contexts. Through close study of primary monuments of architectural, pictorial, and sculptural arts and related texts, this course will explore ritual and mortuary arts; Buddhist arts across Asia; narrative and landscape images; and courtly, urban, monastic, and studio environments for art from Bronze Age to modern eras.

Same as: ARTHIST 2.

JAPANGEN 75N. Around the World in Seventeen Syllables: Haiku in Japan, the U.S., and the Digital World. 3-4 Units.

Preference to freshmen. Origins of the haiku form in Japan, its place in the discourse of Orientalism during the 19th and early 20th centuries in the West, its appropriation by U.S. devotees of Zen and the beat poets after WW II, and its current transformation into a global form through the Internet.

JAPANGEN 79. Japanese Ghosts: The Supernatural in Japanese Art and Entertainment. 4 Units.

The complex meanings of ghosts in Japanese culture. Representations of the supernatural in images, drama, oral narratives, prose, film, comics and animation at different moments in Japanese history.

Same as: JAPANGEN 179.

JAPANGEN 82N. Joys and Pains of Growing Up and Older in Japan. 3 Units.

What do old and young people share in common? With a focus on Japan, a country with a large long-living population, this seminar spotlights older people's lives as a reflection of culture and society, history, and current social and personal changes. Through discussion of multidisciplinary studies on age, analysis of narratives, and films, we will gain a closer understanding of Japanese society and the multiple meanings of growing up and older. Students will also create a short video/audio profile of an older individual, and we will explore cross-cultural comparisons.

JAPANGEN 92. Traditional East Asian Culture: Japan. 5 Units.

Required for Chinese and Japanese majors. Introduction to Japanese culture in historical context. Previous topics include: shifting paradigms of gender relations and performance, ancient mythology, court poetry and romance, medieval war tales, and the theaters of Noh, Bunraku, and Kabuki.

JAPANGEN 121. Translating Japan, Translating the West. 3-4 Units.

Translation lies at the heart of all intercultural exchange. This course introduces students to the specific ways in which translation has shaped the image of Japan in the West, the image of the West in Japan, and Japan's self-image in the modern period. What texts and concepts were translated by each side, how, and to what effect? No prior knowledge of Japanese language necessary.

Same as: JAPANGEN 221.

JAPANGEN 124. Manga as Literature. 3-5 Units.

Analysis of representative manga as narratives that combine verbal and visual elements, with attention to historical and cultural background. Representative manga by Tezuka Osamu, Tatsumi Yoshihiro, Koike Kazuo, Taniguchi Jiro, Natsume Ono, Kono Fumiyo, and others. All readings in English.

JAPANGEN 133. Japanese Media Culture. 3-5 Units.

Explores cultural aspects of contemporary media in Japan, including television, cassette tape, video games, digital media, and the internet. How these new media cultures have challenged existing aesthetics, shifted social norms, restructured media industries, and generated new forms of personal expression. Impact on older media like film and the novel.

Same as: JAPANGEN 233.

JAPANGEN 137. Classical Japanese Literature in Translation. 4 Units.

Prose, poetry, and drama from the 10th-19th centuries. Historical, intellectual, and cultural context. Works vary each year. May be repeated for credit with consent of instructor.

Same as: JAPANGEN 237.

JAPANGEN 138. Introduction to Modern Japanese Literature and Culture. 3-4 Units.

This class introduces key literary texts from Japan's modern era (1868-present), locating these works in the larger political, social, and cultural trends of the period. Primary texts include: Futabatei Shimei's *Floating Clouds*, Higuchi Ichiyō's *Child's Play*, Natsume Sōseki's *Kokoro*, Kobayashi Takiji's *Cannery Boat*, Ōe Kenzaburō's *The Catch*, and Yoshimoto Banana's *Kitchen*. Examination of these literary works will be contextualized within larger political trends (e.g., the modernization program of the Meiji regime, the policies of Japan's wartime government, and postwar Japanese responses to the cold war), social developments (e.g., changing notions of social class, the women's rights movement, and the social effects of the postwar economic expansion), and cultural movements (e.g., literary reform movement of the 1890s, modernism of the 1920s and 30s, and postmodernism of the 1980s). The goal of the class is to use literary texts as a point of entry to understand the grand narrative of Japan's journey from its tentative re-entry into the international community in the 1850s, through the cataclysm of the Pacific War, to the remarkable prosperity of the bubble years in the 1980s.

Same as: JAPANGEN 238.

JAPANGEN 141. Japanese Performance Traditions. 3-4 Units.

Major paradigms of gender in Japanese performance traditions from ancient to modern times, covering Noh, Kabuki, Bunraku, and Takarazuka.

Same as: JAPANGEN 241.

JAPANGEN 142. Gender, Sex, and Text in Early Modern Japan. 3-4 Units.

The early modern period in Japan (1600-1868) was a vibrant time when popular culture flourished, cities expanded, and people enjoyed a 'floating world' of transient, sensual delights. Reading popular literature from the time (in translation), including novels and poetry, and looking at explicit erotic imagery in woodblock prints as well as other visual media, we will discuss topics related to gender, sex, and sexuality. Critical scholarship by historians, art historians and scholars of literature will add to students' own readings of these primary sources.

Same as: JAPANGEN 242.

JAPANGEN 148. Modern Japanese Narratives: Literature and Film. 3-5 Units.

Central issues in modern Japanese visual and written narrative. Focus is on competing views of modernity, war, and crises of individual and collective identity and responsibility. Directors and authors include Kurosawa, Mizoguchi, Ozu, Ogai, Akutagawa, Tanizaki, Abe, and Oe.

Same as: JAPANGEN 248.

JAPANGEN 149. Screening Japan: Issues in Crosscultural Interpretation. 3-4 Units.

Is the cinematic language of moving images universal? How have cultural differences, political interests, and genre expectations affected the ways in which Japanese cinema makes meaning across national borders? Sources include the works of major Japanese directors and seminal works of Japanese film criticism, theory, and scholarship in English. No Japanese language skills required.

Same as: JAPANGEN 249.

JAPANGEN 160. Early Modern Japan: The Floating World of Chikamatsu. 4 Units.

Early modern Japan as dramatized in the puppet theater of Chikamatsu Monzaemon (1653-1725), Japan's leading dramatist, who depicted militarization, commercialization, and urbanization in the Tokugawa period (1603-1868). Emperors, shogun, daimyo, samurai, merchants, monks, geisha, and masterless ronin in his bunraku plays as denizens of a floating world. Themes of loyalty, love, heroism, suicide, and renunciation in the early modern world. In English.

Same as: JAPANGEN 260.

JAPANGEN 179. Japanese Ghosts: The Supernatural in Japanese Art and Entertainment. 4 Units.

The complex meanings of ghosts in Japanese culture. Representations of the supernatural in images, drama, oral narratives, prose, film, comics and animation at different moments in Japanese history.

Same as: JAPANGEN 79.

JAPANGEN 184. Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting. 4 Units.

Changes marking the transition from medieval to early modern Japanese society that generated a revolution in visual culture, as exemplified in subjects deemed fit for representation; how commoners joined elites in pictorializing their world, catalyzed by interactions with the Dutch.

Same as: ARTHIST 184, ARTHIST 384, JAPANGEN 384.

JAPANGEN 185. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868. 4 Units.

Narratives of conflict, pacification, orthodoxy, nostalgia, and novelty through visual culture during the change of episteme from late medieval to early modern, 16th through early 19th centuries. The rhetorical messages of castles, teahouses, gardens, ceramics, paintings, and prints; the influence of Dutch and Chinese visuality; transformation in the roles of art and artist; tensions between the old and the new leading to the modernization of Japan.

Same as: ARTHIST 187, ARTHIST 387.

JAPANGEN 186. Theme and Style in Japanese Art. 4 Units.

A mixture of lecture and discussion, this course presents a chronological introduction to some of the defining monuments in the history of Japanese visual culture from prehistory to the mid-19th century. This introductory class presumes no prior knowledge of art history or of Japan. We will emphasize certain overarching themes like religious life; notions of decorum appropriate to various classes (court, warrior, and commoner); the relationship between and among the arts, such as the visual and the verbal, or the symphonic assemblage arts as seen in the tea ceremony; pervasive cultural tropes like nostalgia, seasonality, or the sense of place; and broader issues such as censorship, patronage, gender issues, and the encounters between Japanese and foreign cultures.

Same as: ARTHIST 186, ARTHIST 386, JAPANGEN 286.

JAPANGEN 187. Romance, Desire, and Sexuality in Modern Japanese Literature. 3-4 Units.

This class is structured around three motifs: love suicide (as a romantic ideal), female desire, and same-sex sexuality. Over the course of the quarter we will look at how these motifs are treated in the art and entertainment from three different moments of Japanese history: the Edo period (1615-1868), the modern period (1920-65), and the contemporary period (1965-present). We will start by focusing on the most traditional representations of these topics. Subsequently, we will consider how later artists and entertainers revisited the conventional treatments of these motifs, informing them with new meanings and social significance. We will devote particular attention to how this material comments upon issues of gender, sexuality, and human relationships in the context of Japan. Informing our perspective will be feminist and queer theories of reading and interpretation.

Same as: JAPANGEN 287.

JAPANGEN 198. Senior Colloquium in Japanese Studies. 1 Unit.

Research, write, and present capstone essay or honors thesis.

Same as: KORGEN 198.

JAPANGEN 200. Directed Reading in Asian Languages. 1-12 Unit.

For Japanese literature. Prerequisite: consent of instructor. (Staff).

JAPANGEN 201. Teaching Japanese Humanities. 1 Unit.

Prepares graduate students to teach humanities at the undergraduate level.

Topics include syllabus development and course design, techniques for generating discussion, effective grading practices, and issues particular to the subject matter.

JAPANGEN 220. The Situation of the Artist in Traditional Japan. 5 Units.

Topics may include: workshop production such as that of the Kano and Tosa families; the meaning of the signature on objects including ceramics and tea wares; the folk arts movement; craft guilds; ghost painters in China; individualism versus product standardization; and the role of lineage.

How works of art were commissioned; institutions supporting artists; how makers purveyed their goods; how artists were recognized by society; the relationship between patrons, desires and artists, modes of production.

Same as: ARTHIST 485.

JAPANGEN 221. Translating Japan, Translating the West. 3-4 Units.

Translation lies at the heart of all intercultural exchange. This course introduces students to the specific ways in which translation has shaped the image of Japan in the West, the image of the West in Japan, and Japan's self-image in the modern period. What texts and concepts were translated by each side, how, and to what effect? No prior knowledge of Japanese language necessary.

Same as: JAPANGEN 121.

JAPANGEN 229. Topophilia: Place in Japanese Visual Culture through 19th Century. 5 Units.

Attachments to "place" and "home" are hard-wired into the biology of humans and animals alike, although such attachments vary according to specific times, cultures, and states of mind. Can we speak of a "Japanese sense of place" and if so, what is distinctive about it? Seminar explores religious visions and ritual fields; narratives of itinerancy; cityscapes; topographic taxonomies. Knowledge of Japanese culture is beneficial but not mandatory.

Same as: ARTHIST 229D.

JAPANGEN 233. Japanese Media Culture. 3-5 Units.

Explores cultural aspects of contemporary media in Japan, including television, cassette tape, video games, digital media, and the internet. How these new media cultures have challenged existing aesthetics, shifted social norms, restructured media industries, and generated new forms of personal expression. Impact on older media like film and the novel.

Same as: JAPANGEN 133.

JAPANGEN 237. Classical Japanese Literature in Translation. 4 Units.

Prose, poetry, and drama from the 10th-19th centuries. Historical, intellectual, and cultural context. Works vary each year. May be repeated for credit with consent of instructor.

Same as: JAPANGEN 137.

JAPANGEN 238. Introduction to Modern Japanese Literature and Culture. 3-4 Units.

This class introduces key literary texts from Japan's modern era (1868-present), locating these works in the larger political, social, and cultural trends of the period. Primary texts include: Futabatei Shimei's *Floating Clouds*, Higuchi Ichiyō's *Child's Play*, Natsume Sōseki's *Kokoro*, Kobayashi Takiji's *Cannery Boat*, Ōe Kenzaburō's *The Catch*, and Yoshimoto Banana's *Kitchen*. Examination of these literary works will be contextualized within larger political trends (e.g., the modernization program of the Meiji regime, the policies of Japan's wartime government, and postwar Japanese responses to the cold war), social developments (e.g., changing notions of social class, the women's rights movement, and the social effects of the postwar economic expansion), and cultural movements (e.g., literary reform movement of the 1890s, modernism of the 1920s and 30s, and postmodernism of the 1980s). The goal of the class is to use literary texts as a point of entry to understand the grand narrative of Japan's journey from its tentative re-entry into the international community in the 1850s, through the cataclysm of the Pacific War, to the remarkable prosperity of the bubble years in the 1980s.

Same as: JAPANGEN 138.

JAPANGEN 241. Japanese Performance Traditions. 3-4 Units.

Major paradigms of gender in Japanese performance traditions from ancient to modern times, covering Noh, Kabuki, Bunraku, and Takarazuka.

Same as: JAPANGEN 141.

JAPANGEN 242. Gender, Sex, and Text in Early Modern Japan. 3-4 Units.

The early modern period in Japan (1600-1868) was a vibrant time when popular culture flourished, cities expanded, and people enjoyed a 'floating world' of transient, sensual delights. Reading popular literature from the time (in translation), including novels and poetry, and looking at explicit erotic imagery in woodblock prints as well as other visual media, we will discuss topics related to gender, sex, and sexuality. Critical scholarship by historians, art historians and scholars of literature will add to students' own readings of these primary sources.

Same as: JAPANGEN 142.

JAPANGEN 248. Modern Japanese Narratives: Literature and Film. 3-5 Units.

Central issues in modern Japanese visual and written narrative. Focus is on competing views of modernity, war, and crises of individual and collective identity and responsibility. Directors and authors include Kurosawa, Mizoguchi, Ozu, Ogai, Akutagawa, Tanizaki, Abe, and Oe.

Same as: JAPANGEN 148.

JAPANGEN 249. Screening Japan: Issues in Crosscultural Interpretation. 3-4 Units.

Is the cinematic language of moving images universal? How have cultural differences, political interests, and genre expectations affected the ways in which Japanese cinema makes meaning across national borders? Sources include the works of major Japanese directors and seminal works of Japanese film criticism, theory, and scholarship in English. No Japanese language skills required.

Same as: JAPANGEN 149.

JAPANGEN 251. Japanese Business Culture and Systems. 3-5 Units.

Japanese sociocultural dynamics in industrial and corporate structures, negotiating styles, decision making, and crisis management. Practicum on Japan market strategies.

Same as: JAPANGEN 51.

JAPANGEN 260. Early Modern Japan: The Floating World of Chikamatsu. 4 Units.

Early modern Japan as dramatized in the puppet theater of Chikamatsu Monzaemon (1653-1725), Japan's leading dramatist, who depicted militarization, commercialization, and urbanization in the Tokugawa period (1603-1868). Emperors, shogun, daimyo, samurai, merchants, monks, geisha, and masterless ronin in his bunraku plays as denizens of a floating world. Themes of loyalty, love, heroism, suicide, and renunciation in the early modern world. In English.

Same as: JAPANGEN 160.

JAPANGEN 286. Theme and Style in Japanese Art. 4 Units.

A mixture of lecture and discussion, this course presents a chronological introduction to some of the defining monuments in the history of Japanese visual culture from prehistory to the mid-19th century. This introductory class presumes no prior knowledge of art history or of Japan. We will emphasize certain overarching themes like religious life; notions of decorum appropriate to various classes (court, warrior, and commoner); the relationship between and among the arts, such as the visual and the verbal, or the symphonic assemblage arts as seen in the tea ceremony; pervasive cultural tropes like nostalgia, seasonality, or the sense of place; and broader issues such as censorship, patronage, gender issues, and the encounters between Japanese and foreign cultures.

We will devote particular attention to how this material comments upon issues of gender, sexuality, and human relationships in the context of Japan. Informing our perspective will be feminist and queer theories of reading and interpretation.

Same as: JAPANGEN 187.

JAPANGEN 287A. The Japanese Tea Ceremony: The History, Aesthetics, and Politics Behind a National Pastime. 5 Units.

The Japanese tea ceremony, the ultimate premodern multimedia phenomenon, integrates architecture, garden design, ceramics, painting, calligraphy, and other treasured objects into a choreographed ritual wherein host, objects, and guests perform designated roles on a tiny stage sometimes only six feet square. In addition to its much-touted aesthetic and philosophical aspects, the practice of tea includes inevitable political and rhetorical dimensions. This course traces the evolution of tea practice from its inception within the milieu of courtier diversions, Zen monasteries, and warrior villas, through its various permutations into the 20th century, where it was manipulated by the emerging industrialist class for different-but ultimately similar-ends.

Same as: ARTHIST 287A, ARTHIST 387A.

JAPANGEN 384. Aristocrats, Warriors, Sex Workers, and Barbarians: Lived Life in Early Modern Japanese Painting. 4 Units.

Changes marking the transition from medieval to early modern Japanese society that generated a revolution in visual culture, as exemplified in subjects deemed fit for representation; how commoners joined elites in pictorializing their world, catalyzed by interactions with the Dutch.

Same as: ARTHIST 184, ARTHIST 384, JAPANGEN 184.

Japanese Language Courses

JAPANLNG 1. First-Year Japanese Language, Culture, and Communication, First Quarter. 5 Units.

(Formerly JAPANLNG 7.) First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. 300 kanji characters. See http://japanese.stanford.edu/?page_id=5.

JAPANLNG 2. First-Year Japanese Language, Culture, and Communication, Second Quarter. 5 Units.

(Formerly JAPANLNG 8.) Continuation of 1. First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. Prerequisite: placement test, 1. 300 kanji characters. http://japanese.stanford.edu/?page_id=5.

JAPANLNG 3. First-Year Japanese Language, Culture, and Communication, Third Quarter. 5 Units.

(Formerly JAPANLNG 9.) Continuation of 2. First-year sequence enables students to converse, write, and read essays on topics such as personal history, experiences, familiar people. Fulfills University Foreign Language Requirement. Prerequisite: placement test, 2. 300 kanji characters. http://japanese.stanford.edu/?page_id=5.

JAPANLNG 4A. First -Year Japanese Language Essentials, First Quarter. 3 Units.

(Formerly JAPANLNG 7A.) For students who want to build communication skills in limited time. Online listening exercises, audiovisual materials, kanji exercises. See http://japanese.stanford.edu/?page_id=73.

JAPANLNG 4B. First-Year Japanese Language Essentials, Second Quarter. 3 Units.

(Formerly JAPANLNG 8A.) Continuation of JAPANLNG 4A. For students who want to build communication skills in limited time. Online listening exercises, audiovisual materials, kanji exercises. Prerequisite: Placement Test, JAPANLNG 4A. See http://japanese.stanford.edu/?page_id=73.

JAPANLNG 4C. First-Year Japanese Language Essentials, Third Quarter. 3 Units.

(Formerly JAPANLNG 9A.) Continuation of JAPANLNG 4B. For students who want to build communication skills in limited time. Online listening exercises, audiovisual materials, kanji exercises. Prerequisite: Placement Test, JAPANLNG 4B. See http://japanese.stanford.edu/?page_id=73.

JAPANLNG 5. Intensive First-Year Japanese Language. 15 Units.

Equivalent to 1, 2, and 3 combined. See http://japanese.stanford.edu/?page_id=323. Graduate students restricted to 9 units should enroll in 305.

JAPANLNG 11A. Intermediate Japanese Conversation, First Quarter. 2 Units.

(Formerly JAPANLNG 27.) Develops oral proficiency through simple sentence patterns, audio materials, and oral presentations. For the practical use of Japanese. Prerequisite: JAPANLNG 3.

JAPANLNG 11B. Intermediate Japanese Conversation, Second Quarter. 2 Units.

(Formerly JAPANLNG 28.) Continuation of JAPANLNG 11A. Develops oral proficiency through simple sentence patterns, audio materials, tapes, and, oral presentations. For the practical use of Japanese. Prerequisite: JAPANLNG11A.

JAPANLNG 11C. Intermediate Japanese Conversation, Third Quarter. 2 Units.

(Formerly JAPANLNG 29.) Continuation of JAPANLNG 11B. Develops oral proficiency through simple sentence patterns, audio materials, and oral presentations. For the practical use of Japanese. Prerequisite: JAPANLNG 11B.

JAPANLNG 14A. Second-Year Japanese Language Essentials, First Quarter. 3 Units.

(Formerly JAPANLNG 17A.) Continuation of JAPANLNG 4C. For students who want to build communication skills in limited time. Prerequisite: JAPANLNG 4C. See http://japanese.stanford.edu/?page_id=89.

JAPANLNG 14B. Second-Year Japanese Language Essentials, Second Quarter. 3 Units.

(Formerly JAPANLNG 18A.) Continuation of JAPANLNG 14A. For students who want to build communication skills in limited time. Prerequisite: JAPANLNG 14A. See http://japanese.stanford.edu/?page_id=89.

JAPANLNG 14C. Second-Year Japanese Language Essentials, Third Quarter. 3 Units.

(Formerly JAPANLNG 19A.) Continuation of JAPANLNG 14B. For students who want to build communication skills in limited time. Prerequisite: JAPANLNG 14B. See http://japanese.stanford.edu/?page_id=89.

JAPANLNG 20. Intensive Second-Year Japanese. 15 Units.

Equivalent to 21,22,23 combined. Prerequisite: 3. 5 or consent of instructor. graduate students restricted to 9 units may take the course under JAPANLNG 320. See http://japanese.stanford.edu/?page_id=323.

JAPANLNG 21. Second-Year Japanese Language, Culture, and Communication, First Quarter. 5 Units.

(Formerly JAPANLNG 17.) Goal is to further develop and enhance spoken and written Japanese in order to handle advanced concepts such as comparison and contrast of the two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include authentic materials such as newspaper articles, and essays. Prerequisite: Placement Test, JAPANLNG 3. See http://japanese.stanford.edu/?page_id=23.

JAPANLNG 22. Second-Year Japanese Language, Culture, and Communication, Second Quarter. 5 Units.

(Formerly JAPANLNG 18.) Continuation of JAPANLNG 21. Goal is to further develop and enhance spoken and written Japanese in order to handle advanced concepts such as comparison and contrast of the two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include authentic materials such as newspaper articles, and essays. Prerequisite: Placement Test, JAPANLNG 21. See http://japanese.stanford.edu/?page_id=23.

JAPANLNG 23. Second-Year Japanese Language, Culture, and Communication, Third Quarter. 5 Units.

(Formerly JAPANLNG 19.) Goal is to further develop and enhance spoken and written Japanese in order to handle advanced concepts such as comparison and contrast of the two cultures, descriptions of incidents, and social issues. 800 kanji, 1,400 new words, and higher-level grammatical constructions. Readings include authentic materials such as newspaper articles, and essays. (Formerly JAPANLNG 18B.) Prerequisite: 22. http://japanese.stanford.edu/?page_id=23.

JAPANLNG 31A. Intermediate to Advanced Conversation, First Quarter. 2 Units.

Oral proficiency through role play, oral presentations, and discussion. Recommended for those who have participated in Kyoto SCTI program. May be taken concurrently with JAPANLNG 21, 22, and 23. Prerequisite: 9K, or consent of instructor. See http://japanese.stanford.edu/?page_id=421.

JAPANLNG 31B. Intermediate to Advanced Conversation, Second Quarter. 2 Units.

Continuation of JAPANLNG 31A. (Oral proficiency through role play, oral presentations, and discussion. Recommended for those who have participated in Kyoto SCTI program. May be taken concurrently with JAPANLNG 21, 22, and 23. Prerequisite: JAPANLNG 31A. See http://japanese.stanford.edu/?page_id=421.

JAPANLNG 31C. Intermediate to Advanced Conversation, Third Quarter. 2 Units.

(Continuation of JAPANLNG 31B. Oral proficiency through role play, oral presentations, and discussion. Recommended for those who have participated in Kyoto SCTI program. May be taken concurrently with JAPANLNG 21, 22, and 23. Prerequisite: JAPANLNG 32B. See http://japanese.stanford.edu/?page_id=421.

JAPANLNG 32G. Accelerated Beginning Business Japanese II. 4 Units.
For GSB students only. Limited enrollment.**JAPANLNG 33G. Accelerated Beginning Business Japanese III. 4 Units.**

For GSB students only. Limited enrollment.

JAPANLNG 99. Language Specials. 1-5 Unit.

Prerequisite: consent of instructor. (Staff).

JAPANLNG 101. Third-Year Japanese Language, Culture, and Communication, First Quarter. 5 Units.

(Formerly JAPANLNG 117.) Goal is to express thoughts and opinions in paragraph length in spoken and written forms. Materials include current Japanese media and literature for native speakers of Japanese. Cultural and social topics related to Japan and its people. Prerequisite: Placement Tests, JAPANLNG 23. See http://japanese.stanford.edu/?page_id=39.

JAPANLNG 102. Third-Year Japanese Language, Culture, and Communication, Second Quarter. 5 Units.

(Formerly JAPANLNG 118). Continuation of 101. Goal is to express thoughts and opinions in paragraph length in spoken and written forms. Materials include current Japanese media and literature for native speakers of Japanese. Cultural and social topics related to Japan and its people. Prerequisite: 101. See http://japanese.stanford.edu/?page_id=39.

JAPANLNG 103. Third-Year Japanese Language, Culture, and Communication, Third Quarter. 5 Units.

(Formerly JAPANLNG 119). Continuation of 102. Goal is to express thoughts and opinions in paragraph length in spoken and written forms. Materials include current Japanese media and literature for native speakers of Japanese. Cultural and social topics related to Japan and its people. Prerequisite: 102. See http://japanese.stanford.edu/?page_id=39 Prerequisite.

JAPANLNG 104A. Japanese for Professionals, First Quarter. 3 Units.

Recommended for students who have the basic grammatical foundation (equivalent to completion of JAPANLNG 14C or 3), and are ready to develop further communication skills in a limited time not only in their field of interest but also in a professional environment. Prerequisite: JAPANLNG 14C, JAPANLNG 3. See http://japanese.stanford.edu/?page_id=223.

JAPANLNG 104B. Japanese for Professionals, Second Quarter. 3 Units.

Continuation of JAPANLNG 104A. Recommended for students who have the basic grammatical foundation, and are ready to develop further communication skills in a limited time not only in their field of interest but also in a professional environment. Prerequisite: JAPANLNG 104A. See http://japanese.stanford.edu/?page_id=223.

JAPANLNG 104C. Japanese for Professionals, Third Quarter. 3 Units.

Continuation of JAPANLNG 104B. Recommended for students who have the basic grammatical foundation, and are ready to develop further communication skills in a limited time not only in their field of interest but also in a professional environment. Prerequisite: JAPANLNG 104B. See http://japanese.stanford.edu/?page_id=223.

JAPANLNG 105. Intensive 3rd Year Modern Japanese. 15 Units.

Equivalent to 101, 102, 103 combined. Prerequisite 20, 23, or, equivalent. Graduate students restricted to 9 units may take the course for 9 units under 405.

JAPANLNG 111A. Advanced Japanese Conversation, First Quarter. 2 Units.

(formerly JAPANLNG 121) The J111A, B, & C course sequence is designed for students who wish to advance their speaking skills of the Japanese language to the advanced level. Its goals are to help students gain proficiency and confidence in the use of Japanese and to prepare them for their lifelong study. This is a "students-driven, students-centered" course. The instructor will not "teach." Instead she is there to facilitate interactions and "help the students obtain their goals." Students are expected to come to class with their concrete goals as to what they want to do with their Japanese, and be ready to work hard in class to reach their goals.

JAPANLNG 111B. Advanced Japanese Conversation, Second Quarter. 2 Units.

(Formerly JAPANLNG 122.) Continuation of JAPANLNG 111A. The J111A, B, & C course sequence is designed for students who wish to advance their speaking skills of the Japanese language to the advanced level. Its goals are to help students gain proficiency and confidence in the use of Japanese and to prepare them for their lifelong study. This is a "students-driven, students-centered" course. The instructor will not "teach." Instead she is there to facilitate interactions and "help the students obtain their goals." Students are expected to come to class with their concrete goals as to what they want to do with their Japanese, and be ready to work hard in class to reach their goals.

JAPANLNG 111C. Advanced Japanese Conversation, Third Quarter. 2 Units.

(Formerly JAPANLNG 123.) Continuation of JAPANLNG 111B. The J111A, B, & C course sequence is designed for students who wish to advance their speaking skills of the Japanese language to the advanced level. Its goals are to help students gain proficiency and confidence in the use of Japanese and to prepare them for their life-long study. This is a "students-driven, students-centered" course. The instructor will not "teach." Instead she is there to facilitate interactions and "help the students obtain their goals." Students are expected to come to class with their concrete goals as to what they want to do with their Japanese, and be ready to work hard in class to reach their goals.

JAPANLNG 113F. Japanese Through Film, Part 1. 2-4 Units.

Contemporary Japanese culture through Japanese films, documentaries, news, and TV dramas. Structured for students with a strong desire to advance their Japanese communication skills quickly and who have limited class preparation time. In-depth discussion and exploration of current issues, cultural icons, idiomatic expressions and nonverbal social cues. Prerequisite: JAPANLNG 23. See http://japanese.stanford.edu/?page_id=255.

JAPANLNG 114F. Japanese Through Film, Part 2. 2-4 Units.

Continuation of JAPANLNG 113F. Contemporary Japanese culture through Japanese films, documentaries, news, and TV dramas. Structured for students with a strong desire to advance their Japanese communication skills quickly and who have limited class preparation time. In-depth discussion and exploration of current issues, cultural icons, idiomatic expressions and nonverbal social cues. Prerequisite: JAPANLNG 113F. See http://japanese.stanford.edu/?page_id=255.

JAPANLNG 115F. Japanese Through Film, Part 3. 2-4 Units.

Continuation of JAPANLNG 114F. Contemporary Japanese culture through Japanese films, documentaries, news, and TV dramas. Structured for students with a strong desire to advance their Japanese communication skills quickly and who have limited class preparation time. In-depth discussion and exploration of current issues, cultural icons, idiomatic expressions and nonverbal social cues. Prerequisite: JAPANLNG 114F. See http://japanese.stanford.edu/?page_id=255.

JAPANLNG 200. Directed Reading. 1-5 Unit.

Prerequisite: 213 and consent of instructor.

JAPANLNG 211. Fourth-Year Japanese, First Quarter. 3-5 Units.
Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: JAPANLNG 103. See http://japanese.stanford.edu/?page_id=263.

JAPANLNG 212. Fourth-Year Japanese, Second Quarter. 3-5 Units.
Continuation of JAPANLNG 211. Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: JAPANLNG 211. See http://japanese.stanford.edu/?page_id=263.

JAPANLNG 213. Fourth-Year Japanese, Third Quarter. 3-5 Units.
Continuation of JAPANLNG 212. Structure of Japanese, writings in different genres and styles, using such knowledge in writing, and expressing opinions on a variety of topics. Original writings, including fiction, essays, newspaper, and journal articles. Recommended taken in sequence. Prerequisite: JAPANLNG 212. See http://japanese.stanford.edu/?page_id=263.

JAPANLNG 305. Intensive First-Year Japanese for Stanford Graduate Students. 9 Units.
Equivalent to 3 quarters of JAPANLNG 1, 2, and 3 combined. Same as JAPANLNG nn5. Stanford Grads only. http://japanese.stanford.edu/?page_id=323.nnSum.

JAPANLNG 320. Intensive Second-Year Japanese for Stanford Graduate Students. 9 Units.
Equivalent to 21, 22, 23 combined or 20. Stanford Grads only. See http://japanese.stanford.edu/?page_id=323.

JAPANLNG 394. Graduate Studies in Japanese Conversation. 1-3 Unit.
Prerequisite: consent of instructor. (Staff).

JAPANLNG 395. Graduate Studies in Japanese. 1-5 Unit.
Prerequisite: consent of instructor. (Staff).

JAPANLNG 405. Intensive third Year Japanese for Graduate Students. 9 Units.
Equivalent to 101, 102, and 103 combined or 105. Prerequisite 23 or 20. For Stanford grads only.

Japanese Literature Courses

JAPANLIT 146. Introduction to Premodern Japanese. 3-5 Units.
Readings from Heian, Kamakura, Muromachi, and early Edo periods with focus on grammar and reading comprehension. Prerequisite: JAPANLNG 129B or 103, or equivalent.
Same as: JAPANLIT 246.

JAPANLIT 157. Points in Japanese Grammar. 2-4 Units.
Meaning and grammatical differences of similar expressions, and distinctions that may not be salient in English. Prerequisite: JAPANLNG 18B or 22, or equivalent.
Same as: JAPANLIT 257.

JAPANLIT 170. The Tale of Genji and Its Historical Reception. 4 Units.
Approaches to the tale including 12th-century allegorical and modern feminist readings. Influence upon other works including poetry, Noh plays, short stories, modern novels, and comic book (manga) retellings. Prerequisite for graduate students: JAPANLNG 129B or 103, or equivalent.
Same as: JAPANLIT 270.

JAPANLIT 181. Japanese Pragmatics. 2-4 Units.
Sociocultural and discourse factors reflected in the choice of linguistic forms, and their theoretical implications. Prerequisites: one year of Japanese and a course in linguistics, or two years of Japanese, or consent of instructor.
Same as: JAPANLIT 281.

JAPANLIT 189A. Honors Research. 2-5 Units.

JAPANLIT 189B. Honors Research. 5 Units.
Open to senior honors students to write thesis.

JAPANLIT 199. Individual Reading in Japanese. 1-4 Unit.
Asian Languages majors only. May be repeated for credit. Prerequisites: JAPANLNG 129B or 103, and consent of instructor.

JAPANLIT 200. Directed Reading in Japanese. 1-12 Unit.

JAPANLIT 201. Proseminar: Introduction to Graduate Study in Japanese. 2-5 Units.
Bibliographical and research methods. Major trends in literary and cultural theory and critical practice. May be repeated once for credit. Prerequisite: JAPANLNG 103 or 129B, or consent of instructor.

JAPANLIT 202. Bibliographic and Research Methods in Japanese. 1-3 Unit.
The use of library and online resources for the study of Japanese literature, language, and culture. Prerequisite: JAPANLNG 103 or 129B, or consent of instructor.

JAPANLIT 235. Academic Readings in Japanese I. 2-4 Units.
Strategies for reading academic writings in Japanese. Readings of scholarly papers and advanced materials in Japanese in students' research areas in the humanities and social sciences. Prerequisites: JAPANLNG 103, 129B, or equivalent; and consent of instructor.

JAPANLIT 236. Academic Readings in Japanese II. 2-4 Units.
Strategies for reading academic writings in Japanese. Readings of scholarly papers and advanced materials in Japanese in students' research areas in the humanities and social sciences. May be taken independently of 264. May be repeated for credit. Prerequisites: JAPANLNG 103, 129B, or equivalent; and consent of instructor.

JAPANLIT 246. Introduction to Premodern Japanese. 3-5 Units.
Readings from Heian, Kamakura, Muromachi, and early Edo periods with focus on grammar and reading comprehension. Prerequisite: JAPANLNG 129B or 103, or equivalent.
Same as: JAPANLIT 146.

JAPANLIT 247. Readings in Premodern Japanese. 2-5 Units.
Edo and Meiji periods with focus on grammar and reading comprehension. May be repeated for credit. Prerequisite: 246 or equivalent.

JAPANLIT 248. Readings in Classical Japanese. 5 Units.
Edo and Meiji periods including travel writings, fictions, miscellanies, and poetry. Focus is on grammar, stylistic analysis, and rhetoric. Can be taken independently. Prerequisite: 246.

JAPANLIT 257. Points in Japanese Grammar. 2-4 Units.
Meaning and grammatical differences of similar expressions, and distinctions that may not be salient in English. Prerequisite: JAPANLNG 18B or 22, or equivalent.
Same as: JAPANLIT 157.

JAPANLIT 260. Japanese Poetry and Poetics. 2-4 Units.
Heian through Meiji periods with emphasis on relationships between the social and aesthetic. Works vary each year. This year's genre is the diary. Prerequisites: 246, 247, or equivalent.

JAPANLIT 266. Introduction to Sino-Japanese. 3-5 Units.
Readings in Sino-Japanese (*kambun*) texts of the Heian, Kamakura, and Muromachi periods, with focus on grammar and reading comprehension. Prerequisite: 246 or equivalent.

JAPANLIT 267. Readings in Sino-Japanese. 2-4 Units.

Readings in Sino-Japanese (*kambun*) texts of the Edo and Meiji periods, with focus on grammar and reading comprehension. Prerequisite: 264 or equivalent.

JAPANLIT 270. The Tale of Genji and Its Historical Reception. 4 Units.

Approaches to the tale including 12th-century allegorical and modern feminist readings. Influence upon other works including poetry, Noh plays, short stories, modern novels, and comic book (manga) retellings. Prerequisite for graduate students: JAPANLNG 129B or 103, or equivalent. Same as: JAPANLIT 170.

JAPANLIT 276. Modern Japanese Short Stories. 2-4 Units.

This course explores the postwar Japanese short story. We will read representative works by major authors, such as Ishikawa Jun, Hayashi Fumiko, Abe Kobe and Murakami Haruki. Attention will be devoted to both accurate reading of the Japanese prose and more general discussion of the literary features of the texts.

JAPANLIT 279. Research in Japanese Linguistics. 2-4 Units.

Introduction to graduate research in Japanese linguistics. Fields of research, methods and bibliographical background. Conduct a pilot research project in a chosen area. May be repeated for credit. Prerequisite: JAPANLNG 119 or consent of instructor.

JAPANLIT 281. Japanese Pragmatics. 2-4 Units.

Sociocultural and discourse factors reflected in the choice of linguistic forms, and their theoretical implications. Prerequisites: one year of Japanese and a course in linguistics, or two years of Japanese, or consent of instructor. Same as: JAPANLIT 181.

JAPANLIT 287. Pictures of the Floating World: Images from Japanese Popular Culture. 5 Units.

Printed objects produced during the Edo period (1600-1868), including the Ukiyo-e (pictures of the floating world) and lesser-studied genres such as printed books (ehon) and popular broadsheets (kawaraban). How a society constructs itself through images. The borders of the acceptable and censorship; theatricality, spectacle, and slippage; the construction of play, set in conflict against the dominant neo-Confucian ideology of fixed social roles.

Same as: ARTHIST 287, ARTHIST 487X.

JAPANLIT 296. Modern Japanese Literature. 2-5 Units.

Advanced readings. May be repeated for credit. Prerequisite: JAPANLNG 213. Formerly JAPANLIT 396.

JAPANLIT 298. The Theory and Practice of Japanese Literary Translation. 2-5 Units.

Theory and cultural status of translation in modern Japanese and English. Comparative analysis of practical translation strategies. Final project is a literary translation of publishable quality. Prerequisite: fourth-year Japanese or consent of instructor.

JAPANLIT 299. Master's Thesis or Translation. 1-5 Unit.

A total of 5 units, taken in one or more quarters.nn (Staff).

JAPANLIT 350. Japanese Historical Fiction. 3-5 Units.

Authors include Mori Ogai, Akutagawa Ryunosuke, Tanizaki Jun'ichiro, Enchi Fumiko, Shiba Ryotaro, Fujisawa Shuhei, and Hiraiwa Yumie. Genre theory, and historical and cultural context. Works vary each year. May be repeated for credit.

JAPANLIT 377. Seminar: Structure of Japanese. 2-4 Units.

Linguistic constructions in Japanese. Topics vary annually. In 2009-10, focus is on noun-modifying constructions in Japanese from multiple perspectives including syntax, semantics, pragmatics, and acquisition. Contrasts with similar constructions in other languages. Typological implications. Prerequisites: courses in Japanese linguistics, consent of instructor.

JAPANLIT 381. Topics in Pragmatics and Discourse Analysis. 2-4 Units.

Naturally occurring discourse (conversational, narrative, or written) and theoretical implications. Discourse of different age groups, expressions of identity and persona, and individual styles. May be repeated for credit.

JAPANLIT 395. Early Modern Japanese Literature. 2-4 Units.

May be repeated for credit. Prerequisite: 247.

JAPANLIT 396. Modern Japanese Literature Seminar: Comedy. 2-5 Units.

Works and topics vary each year. May be repeated for credit. Prerequisite: fourth-year Japanese or consent of instructor.

JAPANLIT 399. Dissertation Research. 1-12 Unit.

For doctoral students in Japanese working on dissertations.

JAPANLIT 400. Advanced Language Training. 1-15 Unit.

For students at the Yokohama Center. For more information, see the Inter-University Center for Japanese Studies in Yokohama at <http://stanford.edu/dept/IUC/>.

JAPANLIT 801. TGR Project. 0 Units.**JAPANLIT 802. TGR Dissertation. 0 Units.**

Jewish Studies Courses

JEWISHST 5. Biblical Greek. 3-5 Units.

This is a one term intensive class in Biblical Greek. After quickly learning the basics of the language, we will then dive right into readings from the New Testament and the Septuagint, which is the ancient Greek translation of the Hebrew Bible. By the end of the term everyone will be able to read the Greek Bible with ease. No previous knowledge of Greek required. Same as: CLASSGRK 5, RELIGST 171A.

JEWISHST 18N. Religion and Politics: Comparing Europe to the U.S.. 3-4 Units.

Interdisciplinary and comparative. Historical, political, sociological, and religious studies approaches. The relationship between religion and politics as understood in the U.S. and Europe. How this relationship has become tense both because of the rise of Islam as a public religion in Europe and the rising influence of religious groups in public culture. Different understandings and definitions of the separation of church and state in Western democratic cultures, and differing notions of the public sphere. Case studies to investigate the nature of public conflicts, what issues lead to conflict, and why. Why has the head covering of Muslim women become politicized in Europe? What are the arguments surrounding the Cordoba House, known as the Ground Zero Mosque, and how does this conflict compare to controversies about recent constructions of mosques in Europe? Resources include media, documentaries, and scholarly literature. Same as: RELIGST 18N.

JEWISHST 85B. Jews, 1500 to the Present. 3 Units.

(Same as HISTORY 185B. History majors and others taking 5 units, register for 185B.) Topics include the restructuring of Jewish existence during the Enlightenment and legal emancipation at the end of the 18th century in W. Europe; the transformation of Jewish life in E. Europe under the authoritarian Russian regime; colonialism in the Sephardic world; new ideologies (Reform Judaism and Jewish nationalisms); the persistence and renewal of antisemitism; the destruction of European Jewry under the Nazis; new Jewish centers in the U.S.; and the State of Israel. Same as: HISTORY 85B.

JEWISHST 101A. First-Year Hebrew, First Quarter. 5 Units.

Same as: AMELANG 128A.

JEWISHST 101B. First-Year Hebrew, Second Quarter. 5 Units.

Continuation of AMELANG 128A. Prerequisite: Placement Test, AMELANG 128A.

Same as: AMELANG 128B.

JEWISHST 101C. First-Year Hebrew, Third Quarter. 5 Units.
Continuation of AMELANG 128B. Prerequisite: Placement Test, AMELANG 128B. Fulfill the University Foreign Language Requirement. Same as: AMELANG 128C.

JEWISHST 102A. Second-Year Hebrew, First Quarter. 4 Units.
Continuation of AMELANG 128C. Prerequisite: Placement Test, AMELANG 128C.
Same as: AMELANG 129A.

JEWISHST 102B. Second-Year Hebrew, Second Quarter. 4 Units.
Continuation of AMELANG 129A. Prerequisite: Placement Test, AMELANG 129A.
Same as: AMELANG 129B.

JEWISHST 102C. Second-Year Hebrew, Third Quarter. 4 Units.
Continuation of AMELANG 129B. Prerequisite: Placement Test, AMELANG 129B.
Same as: AMELANG 129C.

JEWISHST 104. Hebrew Forum. 2-4 Units.
Intermediate and advanced level. Biweekly Hebrew discussion on contemporary issues with Israeli guest speakers. Vocabulary enhancement. Focus on exposure to academic Hebrew.
Same as: AMELANG 131A.

JEWISHST 104A. First-Year Yiddish, First Quarter. 4 Units.
Reading, writing, and speaking.
Same as: AMELANG 140A.

JEWISHST 104B. First-Year Yiddish, Second Quarter. 4 Units.
Continuation of AMELANG 140A. Prerequisite: AMELANG.
Same as: AMELANG 140B.

JEWISHST 104C. First-Year Yiddish, Third Quarter. 4 Units.
Continuation of AMELANG 140B. Prerequisite: AMELANG 140B. Fulfills the University Foreign Language Requirement.
Same as: AMELANG 140C.

JEWISHST 105. Hebrew Forum. 2-4 Units.
Intermediate and advanced level. Biweekly Hebrew discussion on contemporary issues with Israeli guest speakers. Vocabulary enhancement. Focus on exposure to academic Hebrew.
Same as: AMELANG 131B.

JEWISHST 106. Reflection on the Other: The Jew in Arabic Literature, the Arab in Hebrew Literature. 4 Units.
How literary works outside the realm of western culture struggle with questions such as identity, minority, and the issue of the other. How the Arab is viewed in Hebrew literature and how the Jew is viewed in Arabic literature. Historical, political, and sociological forces that have contributed to the shaping of the writer's views. Arab and Jewish (Israeli) culture.
Same as: AMELANG 126, COMPLIT 145.

JEWISHST 107A. Biblical Hebrew, First Quarter. 2 Units.
Establish a basic familiarity with the grammar and vocabulary of Biblical Hebrew and will begin developing a facility with the language. Students that are enrolled in this course must also enroll in Beginning Hebrew. This course requires no prior knowledge of Hebrew and will begin with learning the alphabet. By the end of the year, students will be able to translate basic biblical texts, will be familiar with common lexica and reference grammars, and will have sufficient foundational knowledge to enable them to continue expanding their knowledge either in a subsequent course or on their own.
Same as: AMELANG 170A, RELIGST 170A.

JEWISHST 107B. Biblical Hebrew, Second Quarter. 1 Unit.
Continuation of 170A
Same as: AMELANG 170B.

JEWISHST 116. Lessons in Ecological Restoration: Israel and the Middle East. 3 Units.

The environment in the Middle East reflects the impacts of millennia of continued human activities, with degraded soils, biodiversity loss and contaminated water resources. In a trial and error process since its inception, Israel has pursued an ambitious program of ecological restoration through afforestation, aggressive water management and environmental conservation. This course evaluates the effectiveness of different environmental policies from ecological perspectives. It also assesses potential regional ecological cooperation as part of a Middle Eastern peace process.
Same as: BIO 162.

JEWISHST 127D. Readings in Talmudic Literature. 1 Unit.

Readings of the talmudic texts. Some knowledge of Hebrew is preferred. The ongoing seminar is designed to study the making of the talmudic sugya (unit of discourse), along with classic commentaries. Students will consider some of the recent developments in the academic study of Talmudic literature, introduced by the instructor. The goal of the ongoing seminar is to provide Stanford students and faculty with the opportunity to engage in regular Talmud study, and to be introduced to a variety of approaches to studying Talmudic texts. In 2013-14 sugyot will be selected from the context of civic and criminal law.
Same as: JEWISHST 227D, RELIGST 170D, RELIGST 270D.

JEWISHST 129. Modern Jewish Thought. 4 Units.

From 1870 to the late twentieth century, Jewish thought and philosophy attempted to understand Judaism in response to the developments and crises of Jewish life in the modern world. In this course we shall explore the responses of figures such as Martin Buber, Franz Rosenzweig, Hermann Cohen, Abraham Joshua Heschel, Joseph Soloveitchik, Emil Fackenheim, and Emmanuel Levinas. Central topics will concern ethics and politics, faith and revelation, redemption and messianism, and the religious responses to catastrophe and atrocity. We shall discuss Judaism in European culture before and after World War I and in North America in the postwar period and after the Six Day War. A central theme will be the ways in which attempts to understand Jewish experience are related to history.
Same as: RELIGST 129.

JEWISHST 139. Rereading Judaism in Light of Feminism. 4 Units.

During the past three decades, Jewish feminists have asked new questions of traditional rabbinic texts, Jewish law, history, and religious life and thought. Analysis of the legal and narrative texts, rituals, theology, and community to better understand contemporary Jewish life as influenced by feminism.
Same as: FEMGEN 139.

JEWISHST 143. Literature and Society in Africa and the Caribbean. 4 Units.

This course aims to equip students with an understanding of the cultural, political and literary aspects at play in the literatures of Francophone Africa and the Caribbean. Our primary readings will be Francophone novels and poetry, though we will also read some theoretical texts, as well as excerpts of Francophone theater. The assigned readings will expose students to literature from diverse French-speaking regions of the African/Caribbean world. This course will also serve as a "literary toolbox," with the intention of facilitating an understanding of literary forms, terms and practices. Students can expect to work on their production of written and spoken French (in addition to reading comprehension) both in and outside of class. Required readings include: Aimé Césaire, "Cahier d'un retour au pays natal," Albert Memmi, "La Statue de Sel," Abdelkebir Khatibi, "Amour bilingue," Abdelwahab Meddeb, "Talismano." nnTaught in French. Prerequisite: FRENLANG 124 or consent of instructor.
Same as: AFRICAAM 133, FRENCH 133.

JEWISHST 144B. Poetic Thinking Across Media. 4 Units.

Even before Novalis claimed that the world must be romanticized, thinkers, writers, and artists wanted to perceive the human and natural world poetically. The pre- and post-romantic poetic modes of thinking they created are the subject of this course. Readings include Ecclesiastes, Zhaozhou Congshen, Montaigne, Nietzsche, Kafka, Benjamin, Arendt, and Sontag. This course will also present poetic thinking in the visual arts--from the expressionism of Ingmar Bergman to the neo-romanticism of Gerhard Richter.

Same as: COMPLIT 154B, GERMAN 154.

JEWISHST 146. Co-Existence in Hebrew Literature. 4-5 Units.

Is co-existence possible? Does pluralism require co-existence? Can texts serve as forms of co-existence? The class will focus on these and other questions related to coexistence and literature. Through reading works mostly by Jewish authors writing in Europe, Israel and the US we will explore attempts for complete equality, for a variety of hierarchical systems and for different kinds of co-dependence. Guest speaker: professor Anat Weisman, Ben Gurion University of the Negev.

Same as: AMELANG 175, COMPLIT 161.

JEWISHST 148. Writing Between Languages: The Case of Eastern European Jewish Literature. 3-5 Units.

Eastern European Jews spoke and read Hebrew, Yiddish, and their co-territorial languages (Russian, Polish, etc.). In the modern period they developed secular literatures in all of them, and their writing reflected their own multilinguality and evolving language ideologies. We focus on major literary and sociolinguistic texts. Reading and discussion in English; students should have some reading knowledge of at least one relevant language as well.

Same as: JEWISHST 348, SLAVIC 198, SLAVIC 398.

JEWISHST 155D. Jewish American Literature. 5 Units.

Fiction of Jewish-American writers across the 20th and into the 21st centuries, both immigrants and subsequent generations of native-born Jews, to show how the topic of assimilation is thematized in the literature and to evaluate the distinctiveness of Jewish-American literature as a minority literature.

Same as: ENGLISH 145D, REES 145D.

JEWISHST 185B. Jews, 1500 to the Present. 5 Units.

(Same as HISTORY 85B. History majors and others taking 5 units, register for 185B.) Topics include the restructuring of Jewish existence during the Enlightenment and legal emancipation at the end of the 18th century in W. Europe; the transformation of Jewish life in E. Europe under the authoritarian Russian regime; colonialism in the Sephardic world; new ideologies (Reform Judaism and Jewish nationalisms); the persistence and renewal of antisemitism; the destruction of European Jewry under the Nazis; new Jewish centers in the U.S.; and the State of Israel.

Same as: HISTORY 185B.

JEWISHST 199B. Directed Reading in Yiddish, Second Quarter. 1-5 Unit.

For intermediate or advanced students. May be repeated for credit.

JEWISHST 205. Reading Hebrew, First Quarter. 2-4 Units.

Introduction to Hebrew literature through short stories and poetry by notable Israeli writers. In Hebrew. Prerequisite: one year of Hebrew or equivalent.

Same as: AMELANG 250A.

JEWISHST 224. Emmanuel Levinas: Ethics, Philosophy and Religion. 4 Units.

Emmanuel Levinas (1906-1995) is a major French philosopher of the second half of the twentieth century and is among the half-dozen most important Jewish thinkers of the century. Born in Lithuania, Levinas lived most of his life in France; he was primarily a philosopher but also a deeply committed Jewish educator who often lectured and wrote about Judaism and Jewish matters. Levinas was influenced by Bergson, Husserl, Heidegger, and others, like Buber and Rosenzweig. We will look at the philosophical world in which he was educated and explore his unique development as a philosopher in the years after World War Two. Levinas reacted against the main tendencies of Western philosophy and religious thought and as a result shaped novel, powerful, and challenging ways of understanding philosophy, religion, ethics, and politics. In this course, we will examine works from every stage of Levinas's career, from his early study of Husserl and Heidegger to the emergence of his new understanding of the human condition and the primacy of ethics, the face-to-face encounter with the human other, the role of language and the relationship between ethics and religion, and finally his understanding of Judaism and its relationship to Western philosophy. We will be interested in his philosophical method, the relevance of his thinking for ethics and religion, the role of language in his philosophy and the problem of the limits of expressibility, and the implications of his work for politics. We shall also consider his conception of Judaism, its primary goals and character, and its relation to Western culture and philosophy.

Same as: JEWISHST 324, RELIGST 234, RELIGST 334.

JEWISHST 227D. Readings in Talmudic Literature. 1 Unit.

Readings of the talmudic texts. Some knowledge of Hebrew is preferred. The ongoing seminar is designed to study the making of the talmudic sugya (unit of discourse), along with classic commentaries. Students will consider some of the recent developments in the academic study of Talmudic literature, introduced by the instructor. The goal of the ongoing seminar is to provide Stanford students and faculty with the opportunity to engage in regular Talmud study, and to be introduced to a variety of approaches to studying Talmudic texts. In 2013-14 sugyot will be selected from the context of civic and criminal law.

Same as: JEWISHST 127D, RELIGST 170D, RELIGST 270D.

JEWISHST 243. Masterpieces of Hebrew Literature from the Bible to the Present. 4-5 Units.

This course presents and reflects on some of the canonical works of Hebrew literature, from biblical era to the present. Discussing works such as the Wisdom Books and selections from the Midrash; and reflecting on important periods such as the Golden Age of Jewish Culture in Spain, the Renaissance, and contemporary Israeli literature, we will highlight linguistic innovation, as well as crucial thematic and philosophical concerns. Readings include the Book of Job, Psalm, Ibn Gabirol, Mapu, Rachel, Goldbegr, Agnon, S. Yizhar, Amichai, Oz and more.

Same as: COMPLIT 283.

JEWISHST 271C. Campaigns and Elections in Israel. 5 Units.

Employing a theoretical and comparative framework, this seminar focuses on campaigns and elections in Israel. The seminar is divided into two interrelated sections. In the first section, we will cover voting behavior. Here we will look at Israel's election laws, its political culture, socialization and cleavages, turnout, political sophistication, ideology, partisanship and issue voting. In the second half of the semester we will examine elections from the perspective of candidates and campaign strategists. The topics we will focus on include election laws, public and private campaign finance, campaign strategy, media, polling, and advertising. In examining these topics, we will cover a variety of elections campaigns since Israel's birth, with an emphasis on the most recent ones.

Same as: POLISCI 241C.

JEWISHST 279P. Introduction to Israeli Politics. 5 Units.

This course aims to introduce students to Israel's political system and its major actors. We will survey Israel's political landscape, both chronologically and thematically, covering the major issues and conflicts which have dominated Israeli politics since its inception.

Same as: INTNLREL 163, POLISCI 249P.

JEWISHST 282. Circles of Hell: Poland in World War II. 5 Units.

Looks at the experience and representation of Poland's wartime history from the Nazi-Soviet Pact (1939) to the aftermath of Yalta (1945). Examines Nazi and Soviet ideology and practice in Poland, as well as the ways Poles responded, resisted, and survived. Considers wartime relations among Polish citizens, particularly Poles and Jews. In this regard, interrogates the traditional self-characterization of Poles as innocent victims, looking at their relationship to the Holocaust, thus engaging in a passionate debate still raging in Polish society.

Same as: HISTORY 228, HISTORY 328, JEWISHST 382.

JEWISHST 287S. Research Seminar in Middle East History. 4-5 Units.

Student-selected research topics.

Same as: HISTORY 481, JEWISHST 481.

JEWISHST 288. Palestine and the Arab-Israeli Conflict. 4-5 Units.

1882 to the present. Comparison of representative expressions of competing historical interpretations. U.S. policy towards the conflict since 1948. (Beinin)

Same as: HISTORY 288, JEWISHST 388.

JEWISHST 291X. Knowing God: Learning Religion in Popular Culture. 4 Units.

This course will examine how people learn religion outside of school, and in conversation with popular cultural texts and practices. Taking a broad social-constructivist approach to the variety of ways people learn, this course will explore how people assemble ideas about faith, identity, community, and practice, and how those ideas inform individual, communal and global notions of religion. Much of this work takes place in formal educational environments including missionary and parochial schools, Muslim madrasas or Jewish yeshivot. However, even more takes place outside of school, as people develop skills and strategies in conversation with broader social trends. This course takes an interdisciplinary approach to questions that lie at the intersection of religion, popular culture, and education.

Same as: EDUC 231X, RELIGST 231X.

JEWISHST 299A. Directed Reading in Yiddish, First Quarter. 1-5 Unit.

Directed Reading in Yiddish, First Quarter.

JEWISHST 324. Emmanuel Levinas: Ethics, Philosophy and Religion. 4 Units.

Emmanuel Levinas (1906-1995) is a major French philosopher of the second half of the twentieth century and is among the half-dozen most important Jewish thinkers of the century. Born in Lithuania, Levinas lived most of his life in France; he was primarily a philosopher but also a deeply committed Jewish educator who often lectured and wrote about Judaism and Jewish matters. Levinas was influenced by Bergson, Husserl, Heidegger, and others, like Buber and Rosenzweig. We will be interested in his philosophical method, the relevance of his thinking for ethics and religion, the role of language in his philosophy and the problem of the limits of expressibility, and the implications of his work for politics. We shall also consider his conception of Judaism, its primary goals and character, and its relation to Western culture and philosophy.

Same as: JEWISHST 224, RELIGST 234, RELIGST 334.

JEWISHST 348. Writing Between Languages: The Case of Eastern European Jewish Literature. 3-5 Units.

Eastern European Jews spoke and read Hebrew, Yiddish, and their co-territorial languages (Russian, Polish, etc.). In the modern period they developed secular literatures in all of them, and their writing reflected their own multilinguality and evolving language ideologies. We focus on major literary and sociolinguistic texts. Reading and discussion in English; students should have some reading knowledge of at least one relevant language as well.

Same as: JEWISHST 148, SLAVIC 198, SLAVIC 398.

JEWISHST 382. Circles of Hell: Poland in World War II. 5 Units.

Looks at the experience and representation of Poland's wartime history from the Nazi-Soviet Pact (1939) to the aftermath of Yalta (1945). Examines Nazi and Soviet ideology and practice in Poland, as well as the ways Poles responded, resisted, and survived. Considers wartime relations among Polish citizens, particularly Poles and Jews. In this regard, interrogates the traditional self-characterization of Poles as innocent victims, looking at their relationship to the Holocaust, thus engaging in a passionate debate still raging in Polish society.

Same as: HISTORY 228, HISTORY 328, JEWISHST 282.

JEWISHST 385B. Core in Jewish History, 20th Century. 4-5 Units.

Instructor consent required.

JEWISHST 388. Palestine and the Arab-Israeli Conflict. 4-5 Units.

1882 to the present. Comparison of representative expressions of competing historical interpretations. U.S. policy towards the conflict since 1948. (Beinin)

Same as: HISTORY 288, JEWISHST 288.

JEWISHST 393X. The Education of American Jews. 4 Units.

This course will take an interdisciplinary approach to the question of how American Jews negotiate the desire to retain a unique ethnic sensibility without excluding themselves from American culture more broadly. Students will examine the various ways in which people debate, deliberate, and determine what it means to be an "American Jew". This includes an investigation of how American Jewish relationships to formal and informal educational encounters through school, popular culture, religious ritual, and politics.

Same as: EDUC 313X, RELIGST 313X.

Same as: HISTORY 481, JEWISHST 287S.

JEWISHST 486A. Graduate Research Seminar in Jewish History. 4-5 Units.
Same as: HISTORY 486A.

JEWISHST 486B. Graduate Research Seminar in Jewish History. 4-5 Units.
Prerequisite: HISTORY 486A.
Same as: HISTORY 486B.

Korean General Courses

KORGEN 101. Kangnam Style: Korean Media and Pop Culture. 4 Units.

For over a decade now, South Korea has established itself as a tireless generator of soft power, the popularity of its pop-culture spreading from Asia to the rest of the world. This class will look into the economic engine that moves this "cultural contents" industry, and will examine some of its expressions in the form of K-pop, soap operas, tourism, food, sports, and fashion in order to illuminate the ways in which Korean culture is being (self-)narrated and consumed in this era of globalization of the 21st century. Same as: KORGEN 201.

KORGEN 120. Narratives of Modern and Contemporary Korea. 4 Units.

This introductory survey will examine the development of South and North Korean literature from the turn of the 20th century until the present. The course will be guided by historical and thematic inquiries as we explore literature in the colonial period, in the period of postwar industrialization, and contemporary literature from the last decade. We will supplement our readings with critical writing about Korea from the fields of cultural studies and the social sciences in order to broaden the terms of our engagement with our primary texts.
Same as: KORGEN 220.

KORGEN 121. Ethics and Violence in Korean film and literature. 3-4 Units.

Ethics and violence seem to be contradictory terms, yet much of Korean film and literature in the past five decades has demonstrated that they are an intricate, and in many ways justifiable, part of the fabric of contemporary existence. Film and literature exposes time and again the complex ways in which the supposed vanguards of morality, religious institutions, family, schools, and the state, are sites of condoned transgression, wherein spiritual and physical violation is inflicted relentlessly. This class will explore the ways in which questions about Truth and the origins of good and evil are mediated through film and literature in the particular context of the political, social, and economic development of postwar South Korea.
Same as: KORGEN 221.

KORGEN 140. Childhood and Children: Culture in East Asia. 3-5 Units.

Literature for children often reflects society's deepest-held convictions and anxieties, and is therefore a critical site for the examination of what is deemed to be the most imperative knowledge for the young generation. In this respect, the analysis of both texts and visual culture for children, including prose, poetry, folk tales, film, and picture books illuminates prevalent discourses of national identity, family, education and gender. Through an examination of a diverse range of genres and supported by the application of literary theories, students will obtain an understanding, in broad strokes, of the birth of childhood and the emergence of children's literature of China, Korea and Japan from the turn of the century until the present.
Same as: KORGEN 240.

KORGEN 198. Senior Colloquium in Japanese Studies. 1 Unit.
Research, write, and present capstone essay or honors thesis.
Same as: JAPANGEN 198.

KORGEN 200. Directed Reading. 1-12 Unit.
Directed Reading in Korean Studies.

KORGEN 201. Kangnam Style: Korean Media and Pop Culture. 4 Units.

Korean Language Courses

KORLANG 1. First-Year Korean, First Quarter. 5 Units.

Communication skills, vocabulary, and grammar patterns. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language.

KORLANG 1H. Beginning Korean for Heritage Learners, First Quarter. 3 Units.

For students with previous knowledge of Korean or a strong background in listening and speaking. Focus is on reading, writing, and spelling rather than speaking and listening. Sources include textbook, workbook, and digitized listening materials.

KORLANG 2. First-Year Korean, Second Quarter. 5 Units.

Continuation of KORLANG 1. Communication skills, vocabulary, and grammar patterns. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language. Prerequisite: Placement Test, KORLANG 1.

KORLANG 2H. Beginning Korean for Heritage Learners, Second Quarter. 3 Units.

Continuation of KORLANG 1H. For students with previous knowledge of Korean or a strong background in listening and speaking. Focus is on reading, writing, and spelling rather than speaking and listening. Sources include textbook, workbook, and digitized listening materials. Prerequisite: KORLANG 1H.

KORLANG 3. First-Year Korean, Third Quarter. 5 Units.

Continuation of KORLANG 2. Communication skills, vocabulary, and grammar patterns. Culturally appropriate conduct relevant to contexts such as greetings, gestures, and body language. Prerequisite: Placement Test, KORLANG 2. Fulfills the University language requirement.

KORLANG 3H. Beginning Korean for Heritage Learners, Third Quarter. 3 Units.

Continuation of KORLANG 2H. For students with previous knowledge or a strong background in listening and speaking. Focus is on reading, writing, and spelling rather than speaking and listening. Sources include textbook, workbook, and digitized listening materials. Prerequisite: KORLANG 2H.

KORLANG 21. Second-Year Korean, First Quarter. 5 Units.

Continuation of KORLANG 3. More complex sentences and grammatical patterns. Conversation in daily situations such as making a polite request or suggestion, reading simple texts, and Korean culture. Prerequisite: Placement Test, KORLANG 3.

KORLANG 22. Second-Year Korean, Second Quarter. 5 Units.

Continuation of KORLANG 21. More complex sentences and grammatical patterns. Conversation in daily situations such as making a polite request or suggestion, reading simple texts, and Korean culture. Prerequisite: Placement Test, KORLANG 21.

KORLANG 23. Second-Year Korean, Third Quarter. 5 Units.

Continuation of KORLANG 22. More complex sentences and grammatical patterns. Conversation in daily situations such as making a polite request or suggestion, reading simple texts, and Korean culture. Prerequisite: Placement Test, KORLANG 22.

KORLANG 101. Third-Year Korean, First Quarter. 4-5 Units.

Continuation of KORLANG 23. Materials about Korean culture and society. Proficiency in interpersonal, interpretive, and presentational communication. Vocabulary, reading, and aural/oral skills. Prerequisite: Placement Test, KORLANG 23.

KORLANG 102. Third-Year Korean, Second Quarter. 4-5 Units.

Continuation of KORLANG 101. Materials about Korean culture and society. Proficiency in interpersonal, interpretive, and presentational communication. Vocabulary, reading, and aural/oral skills. Prerequisite: Placement Test or KORLANG 101.

KORLANG 103. Third-Year Korean, Third Quarter. 4-5 Units.

Continuation of KORLANG 102. Materials about Korean culture and society. Proficiency in interpersonal, interpretive, and presentational communication. Vocabulary, reading, and aural/oral skills. Prerequisite: Placement Test, or KORLANG 102.

KORLANG 110. Korean Pronunciation and Intonation. 1-2 Unit.

Goal is intelligibility and fluency. Lab assignments. Prerequisite: 3.

KORLANG 111. Medical Korean, First Quarter. 2-3 Units.

Medical vocabulary; cultural attitude. Video clips, technical journal and prescription reading, and class simulations. Prerequisite: 23.

KORLANG 112. Medical Korean, Second Quarter. 2 Units.

Medical vocabulary; cultural attitude. Video clips, technical journal and prescription reading, and class simulations. Prerequisite: 111.

KORLANG 120A. Korean Culture. 1-3 Unit.

Examination of Korean culture and society to develop fluency and vocabulary through newspapers and short essays. May be repeated for credit. Prerequisite: 103.

KORLANG 120B. Korean Culture. 1-2 Unit.

Examination of Korean culture and society to develop fluency and vocabulary through newspapers and short essays. May be repeated for credit. Prerequisite: 103.

KORLANG 120C. Korean Culture. 1-2 Unit.

Examination of Korean culture and society to develop fluency and vocabulary through newspapers and short essays. May be repeated for credit. Prerequisites: 103.

KORLANG 120K. Korean Language and Culture through Drama and Film. 2-3 Units.

Korean culture and society through contemporary Korean drama and films. Advanced vocabulary, grammar, and idiomatic expressions. Prerequisite: placement test or 103.

KORLANG 130. Reading Korean. 2-3 Units.

Contemporary literature and academic texts. May be repeated for credit. Prerequisite: KORLANG 103.

KORLANG 200. Directed Reading in Korean. 1-5 Unit.

Prerequisite: consent of instructor.nn (Staff).

KORLANG 395. Graduate Studies in Korean. 1-5 Unit.

Prerequisite: consent of instructor.

Korean Literature Courses

KORLIT 230. Intimate Encounters: Reading and Translating Korean Literature. 3-4 Units.

Close analysis of fiction and poetry in original Korean. Discussion of the works in a broader context of Korean literature, history, and current events. Translation of Korean fiction that has not previously been translated; select translations will be considered for publication. Prerequisite: three years of Korean language.

Same as: KORLIT 330.

KORLIT 330. Intimate Encounters: Reading and Translating Korean Literature. 3-4 Units.

Close analysis of fiction and poetry in original Korean. Discussion of the works in a broader context of Korean literature, history, and current events. Translation of Korean fiction that has not previously been translated; select translations will be considered for publication. Prerequisite: three years of Korean language.

Same as: KORLIT 230.

Latin American Studies Courses

LATINAM 197. Directed Individual Research. 1-10 Unit.

For students engaged in interdisciplinary work that cannot be arranged by department. May be repeated for credit. Prerequisite: consent of instructor.

LATINAM 198. Honors Thesis. 1-10 Unit.

Restricted to those writing an honors thesis in Latin American Studies.

LATINAM 200. Seminar on Contemporary Issues in Latin American Studies. 1 Unit.

Guest scholars present analyses of major Latin American themes.

LATINAM 398. Master's Thesis. 1-10 Unit.

Restricted to students writing a master's thesis in Latin American Studies. May be repeated for credit.

LATINAM 801. TGR Project. 0 Units.

Law Courses

LAW 201. Civil Procedure I. 4 Units.

This course is part of the required first-year JD curriculum. This course is a study of the process of civil litigation from the commencement of a lawsuit through final judgment under modern statutes and rules of court, with emphasis on the federal rules of civil procedure. May include class participation, written assignments, or other elements. Your instructor will advise you of the basis for grading.

LAW 203. Constitutional Law. 3 Units.

This course is part of the required first-year JD curriculum. This course offers an introduction to American constitutional law. In addition to examining questions of interpretive method, the course focuses on the powers of the federal government and the allocation of decision making authority among government institutions, including both federalism and separation of powers. Class participation, attendance, written assignments, and final exam. This course is open to first-year Law School students only.

LAW 205. Contracts. 4 Units.

This course is part of the required first-year JD curriculum. It provides exposure to basic contract law. The course will identify the scope and purpose of the legal protection accorded to interests predicated on contract and will focus on problems of contract formation, interpretation, performance, and remedies for breach.

LAW 207. Criminal Law. 4 Units.

This course is part of the required first-year JD curriculum. It examines the traditional general issues in the substantive criminal law, including the purposes of punishment and the appropriate limits on the use of the criminal sanction. It focuses predominantly on how criminal statutes are organized around objective offense elements (conduct, causation, and attendant circumstances) and mental states, and to a lesser degree on inchoate crimes, complicity, justification and excuse.

LAW 217. Property. 4 Units.

This course is part of the required first-year JD curriculum. It deals with possession and ownership of land and with the incidents thereof, including private and public restrictions on its use and development, nuisance, trespass, concurrent interests, landlord and tenant, and eminent domain. Attendance and final exam. Your instructor will advise you of other basis of grading. This course is open to first-year Law School students only.

LAW 218. JSD Research Colloquium. 0 Units.

Required for and limited to JSD candidates. The objective of the colloquium is to assist students in developing their dissertation research proposals. Weekly colloquium sessions will include a mix of lectures and discussions on selected methodological topics, relevant to the candidates' dissertation research; guest lectures by empirical legal research scholars; presentations by and discussions with more advanced doctoral candidates; and presentations by the first year JSD candidates.

LAW 219. Legal Research and Writing. 2 Units.

Legal Research and Writing is a two-unit course taught as a simulation. Students work on a legal problem starting with an initial interview, and they conduct fact investigation and legal research related to that problem. Students receive rigorous training in reading and analyzing legal authority, and in using persuasive strategies--legal analysis, narrative, rhetoric, legal theory, and public policy--to frame and develop legal arguments. Students write predictive memos and persuasive briefs, and are introduced to the professional norms of ethics, timeliness, and courtesy. This course is part of the required first-year JD curriculum.

LAW 220. Regulatory Economics. 5 Units.

Law 220 examines public policies for dealing with problems arising in markets in which competitive forces are weak. The focus is on monopolies, oligopolies, cartels, and other environments where market mechanisms are unlikely to produce outcomes that benefit consumers more than the alternatives involving costly government intervention. The two main areas examined are competition policy and economic regulation. Competition policy refers to policies that define certain market behavior as illegal because it is harmful to competition. Economic regulation refers to policies in which government controls prices and/or decides which firms can participate in a market. Other areas of regulation, such as product and workplace safety standards, are not included in this course. This course is cross-listed with the Economics Department (Same as ECON 158). Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper and Final Exam.

LAW 220. Regulatory Economics. 5 Units.

The history, economics, and legal background of the institutions under which U.S. industry is subject to government control. Topics: economics and practice of public utility regulation in the communications, television, transportation, energy, and postal delivery sectors and health and safety regulation. Emphasis on the application of economic concepts in evaluating the performance and policies of government agencies. Antitrust law will be introduced and discussed where necessary. Prerequisite: ECON 51 or equivalent intermediate microeconomics course. Same as: ECON 158.

LAW 221. Intellectual Property: Commercial Law. 3 Units.

This seminar, co-taught by eBay's first In-House Counsel and former Director of Law & Public Policy, Brad Handler, examines the ways in which intellectual property rights are asserted, exchanged, protected, and respected, both in theory and in practice. Special attention is devoted to the regulatory and strategic considerations involved in the business and legal decisions implicating intellectual property. See SLS Registrar's website for prerequisites.

LAW 222. Advanced Legal Research. 3 Units.

The course is designed to prepare law students for research in practice and clerkships. The course will review who produces legal authority and how this material is organized, published, indexed and kept current. Objectives for the course: 1) to show students how to evaluate legal research sources and use them effectively, with particular emphasis on cost-effective research; 2) to expand skills in primary and secondary U.S. legal sources; and 3) to introduce students to the array of non-legal information resources that could be useful to legal practice. Since learning legal research requires a hands-on approach, students are required to complete homework assignments and in-class exercises. Each student is also required to analyze a recent California Supreme Court opinion. Special Instructions: Upon prior consent of the instructors, students will be eligible to receive Research (R) credit. Those requesting Research credit will be required to write a substantial research paper based on independent research in an area related to legal research and publishing. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. The course is open to Stanford graduate students with permission from the instructor. See "Special Instructions" in course description above. Elements used in grading: Written assignments and in-class exercises.

LAW 223. Torts. 4 Units.

This course is part of the required first-year JD curriculum. It considers issues involved in determining whether the law should require a person to compensate for harm intentionally or unintentionally caused. These problems arise in situations as diverse as automobile collisions, operations of nuclear facilities, and consumption of defective food products. Among other considerations, the course explores various resolutions in terms of their social, economic, and political implications.

LAW 224. Federal Litigation. 2 Units.

This course is part of the required first-year JD curriculum. It is an introductory course in the litigation process. Students represent the plaintiff or defendant in a simulated public interest case set in a federal district court that raises complex issues of federal civil procedure, privacy, and first amendment law. Students plan litigation strategy, draft pleadings, conduct discovery, write short briefs, and orally argue major motions for dismissal, class action certification, and preliminary injunctive relief. While developing students' written and oral advocacy skills, the course also focuses on substantive issues of civil procedure and constitutional law. Attendance, class participation and written assignments. This course is open to first-year Law School students only.

LAW 225A. Immigrants' Rights Clinic: Clinical Practice. 4 Units.

The Immigrants' Rights Clinic offers students the opportunity to provide direct representation to indigent immigrants, including immigrant survivors of domestic violence, non-citizens in removal (deportation) proceedings, and asylum seekers. Students enrolled in the clinic participate in all aspects of case development, including interviewing clients and witnesses, investigating facts, writing pleadings, developing case strategy, conducting legal research, and/or arguing cases. Clinic students also work on a variety of multi-disciplinary legal advocacy projects on behalf of immigrants' rights organizations and community groups. Students conduct various forms of advocacy, including impact litigation, legislative and regulatory work, public education, litigation in international tribunals, and grassroots organizing. No prior substantive experience or background in immigration or immigrants' rights work is necessary. Special Instructions: General Structure of Clinical Courses. The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students will be awarded three separate grades for their clinical quarter, each reflecting four credits. The three grades are broken into the following categories: clinical practice; clinical methods; and clinical coursework. Grading is pursuant to the H/P system. Enrollment in a clinic is binding; once selected into a clinic to which he or she has applied, a student may not later drop the course except in limited and exceptional cases. Requests for withdrawal are processed through the formal petition and clinical faculty review process described in the clinic policy document posted on the SLS website. Students may not enroll in any clinic (full-time or advanced) which would result in them earning more than 27 clinical credits during their law school career. The rules described here do not apply to advanced clinics for students who are continuing with a clinic in which they were previously enrolled. For information about advanced clinics, please see the course descriptions for those courses. For more information about clinic enrollment and operations, please see the clinic policy document posted on the SLS website. Elements used in grading: Attendance and participation in class, case and project work and writing assignments. Writing (W) credit for 3Ls only.

LAW 225B. Immigrants' Rights Clinic: Clinical Methods. 4 Units.

The Immigrants' Rights Clinic offers students the opportunity to provide direct representation to indigent immigrants, including immigrant survivors of domestic violence, non-citizens in removal (deportation) proceedings, and asylum seekers. Students enrolled in the clinic participate in all aspects of case development, including interviewing clients and witnesses, investigating facts, writing pleadings, developing case strategy, conducting legal research, and/or arguing cases. Clinic students also work on a variety of multi-disciplinary legal advocacy projects on behalf of immigrants' rights organizations and community groups. Students conduct various forms of advocacy, including impact litigation, legislative and regulatory work, public education, litigation in international tribunals, and grassroots organizing. No prior substantive experience or background in immigration or immigrants' rights work is necessary. Special Instructions: General Structure of Clinical Courses. The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students will be awarded three separate grades for their clinical quarter, each reflecting four credits. The three grades are broken into the following categories: clinical practice; clinical methods; and clinical coursework. Grading is pursuant to the H/P system. Enrollment in a clinic is binding; once selected into a clinic to which he or she has applied, a student may not later drop the course except in limited and exceptional cases. Requests for withdrawal are processed through the formal petition and clinical faculty review process described in the clinic policy document posted on the SLS website. Students may not enroll in any clinic (full-time or advanced) which would result in them earning more than 27 clinical credits during their law school career. The rules described here do not apply to advanced clinics for students who are continuing with a clinic in which they were previously enrolled. For information about advanced clinics, please see the course descriptions for those courses. For more information about clinic enrollment and operations, please see the clinic policy document posted on the SLS website. Elements used in grading: Attendance and participation in class, case and project work and writing assignments. Writing (W) credit for 3Ls only.

LAW 225C. Immigrants' Rights Clinic: Clinical Coursework. 4 Units.

The Immigrants' Rights Clinic offers students the opportunity to provide direct representation to indigent immigrants, including immigrant survivors of domestic violence, non-citizens in removal (deportation) proceedings, and asylum seekers. Students enrolled in the clinic participate in all aspects of case development, including interviewing clients and witnesses, investigating facts, writing pleadings, developing case strategy, conducting legal research, and/or arguing cases. Clinic students also work on a variety of multi-disciplinary legal advocacy projects on behalf of immigrants' rights organizations and community groups. Students conduct various forms of advocacy, including impact litigation, legislative and regulatory work, public education, litigation in international tribunals, and grassroots organizing. No prior substantive experience or background in immigration or immigrants' rights work is necessary. Special Instructions: General Structure of Clinical Courses. The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students will be awarded three separate grades for their clinical quarter, each reflecting four credits. The three grades are broken into the following categories: clinical practice; clinical methods; and clinical coursework. Grading is pursuant to the H/P system. Enrollment in a clinic is binding; once selected into a clinic to which he or she has applied, a student may not later drop the course except in limited and exceptional cases. Requests for withdrawal are processed through the formal petition and clinical faculty review process described in the clinic policy document posted on the SLS website. Students may not enroll in any clinic (full-time or advanced) which would result in them earning more than 27 clinical credits during their law school career. The rules described here do not apply to advanced clinics for students who are continuing with a clinic in which they were previously enrolled. For information about advanced clinics, please see the course descriptions for those courses. For more information about clinic enrollment and operations, please see the clinic policy document posted on the SLS website. Elements used in grading: Attendance and participation in class, case and project work and writing assignments. Writing (W) credit for 3Ls only.

LAW 226. Accounting. 3 Units.

The objective of financial accounting is to measure economic activity for decision-making. Financial statements are a key product of this measurement process and an important component of firms' financial reporting activities. This course is aimed at developing students' ability to read, understand, and use corporate financial statements. The primary focus is on understanding the mapping between underlying economic events and financial statements, and how this mapping can affect inferences about future firm profitability. To this end, the course will provide an introduction to: (1) accrual accounting concepts, principles and conventions; (2) the process of preparing and presenting the primary financial statements (income statement, balance sheet, and statement of cash flows); (3) the judgment involved and discretion allowed in making accounting choices; (4) the effects of accounting discretion on the quality of the (reported) financial information; and (5) the fundamentals of financial statement analysis. Class time will be allocated to a combination of short lectures and discussions of the assigned cases. The assigned cases are based on actual corporate financial statements and/or "real life" financial situations. Elements used in grading: Class participation, attendance, written assignments, final paper.

LAW 229. Equal Protection: Race and the Law. 3 Units.

This course will examine the application of constitutional and statutory antidiscrimination law to race related controversies across a variety of settings. The course will begin with an exploration of the historical developments that led to antidiscrimination law, and with an introduction to the competing frameworks that define current antidiscrimination law: the discriminatory purpose and anti-classification approaches that feature prominently in equal protection doctrine, and the disparate impact framework that is incorporated into some statutory law. After some exploration of the historical origins of antidiscrimination law and its alternative formulations, the course will then turn to the specific contexts in which controversies arise. The settings that will be examined include criminal justice, college admissions, political participation, primary/secondary education, employment, housing, hate speech, and the formation of family relationships. In each of these settings, we will devote close attention to the role of antidiscrimination law in specific controversies. Throughout, our intellectual goals will be twofold: to understand the special challenges that race poses, and to appreciate more generally some of the dilemmas of legal regulation.

LAW 230. Creation of the Constitution. 4 Units.

The course begins with readings setting forth the intellectual and experiential background of the framing, including common law and natural rights theory, republicanism, economic & political scientific ideas, and colonial and post-Independence experience. We then study large parts of the debates at the Constitutional Convention, primarily using Madison's Notes. Next come the ratification debates, including readings from antifederalist writers, about half of *The Federalist*, and overviews of the Virginia and New York ratification conventions. We conclude with the addition of the Bill of Rights. Classes consist of a combination of lecture and extensive participation by students. Elements used in grading: Exam.

LAW 233. Antitrust. 3 Units.

Antitrust law sets the ground rules for competition. This course will explore the basic concepts in antitrust law. We will examine cartels and competitor collaborations, monopolization, vertical restraints and mergers. There are no prerequisites for this course. No economic background is required. The course is open to GSB students and graduate students in the Economics Department. To apply for this course, non-Law students must complete a Non-Law Student Course Add Request Form available on the SLS Registrar's Office website (see Stanford Non-Law Student Course Registration). Elements used in grading: Class participation, attendance and final exam.

LAW 236. Art and the Law. 2 Units.

This course covers the legal, public policy, and ethical issues that concern artists, art dealers, auction houses, museums, collectors, and others who comprise the world of visual art. Our focus will be on artists' rights (including copyright, resale royalties, moral rights, and freedom of expression issues), how the market in art functions (such as the artist-dealer relationship, auction rules, and issues faced by collectors), and the legal and ethical rules governing the collection, donation, and display of visual art, particularly for museums and their donors. The course focuses on certain recurrent themes: How do statutes and courts define (or attempt to define) art-and how is art defined differently for different legal purposes? How does the special character of art justify or require different treatment under the law from that accorded other tangible personal property, and how does (and should) the expressive nature of art affect the way it is owned, protected, regulated, or funded? We anticipate having two or three visitors to the class during the quarter, such as a gallery owner, auctioneer, and museum director. In addition, we will also have the students participate in at least one or two interactive negotiation simulation exercises inspired by real situations and controversies in the art world. Special Instructions: Students have the option to write a research paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class participation, attendance, final paper or final exam.

LAW 238. Administrative Law. 4 Units.

Administrative agencies interpret statutes, promulgate regulations, and adjudicate disputes, thereby affecting vast areas of life -- from employment to food and drug safety, from the environment to energy markets, and from telecommunications to immigration. This course surveys the law of the administrative state, considering rationales for delegation to administrative agencies, procedural and substantive constraints of agency decision-making, and the judicial review of agency actions. Elements used in grading: Class participation, attendance, assignments, final exam.

LAW 238. Administrative Law. 4 Units.

Law made by administrative agencies dominates the modern legal system and modern legal practice. This course examines the legal and practical foundations of the modern administrative state. Topics include rationales for delegation to administrative agencies; the legal framework (both constitutional and statutory) that governs agency decision-making; the proper role of agencies in interpreting statutory and regulatory law; and judicial review of agency action. The course will cover these topics through a combination of cases and examples drawn primarily from separation of powers doctrine; the constitutional law of due process; health, safety, and environmental policy; criminal justice; and national security law. The central theme of the course is how administrative law balances "rule of law" values (procedural regularity, substantive limits on arbitrary action) against the often competing values of political accountability, democratic participation, and effective administrative governance. Elements used in grading: Class participation, attendance and final exam.

LAW 239. Writing Workshop: Law and Creativity. 3 Units.

Practicing law is very much a creative enterprise. Effective advocates and counselors provide innovative and thoughtful solutions to complex problems. But there often isn't enough attention devoted in law school either to thinking creatively or to reflecting in a creative way on the issues students confront inside and outside the classroom. This course will respond to this gap by building a bridge between law and the arts, with the goal of helping students hone their ability to think creatively and use disciplined imagination. Law & Creativity will meet twice a week and have dual components designed to inform one another. The first session will be structured as a seminar in which students gather to examine and discuss creative treatments of legal and professional issues in a variety of media (including film, fiction, and nonfiction). The second session will follow the creative-writing workshop model in which students submit their own fiction and creative nonfiction pieces for group discussion. Through the workshop process, students will develop the skills necessary to constructively critique and workshop one another's work, and learn a variety of techniques for improving their own creative writing. Special Instructions: Writing (W) credit is for 3Ls only. Elements Used in Grading: Class attendance, participation and final paper.

LAW 240. Bankruptcy. 3 Units.

This course concerns the law and finance of corporate bankruptcy with an emphasis on reorganization. The course reviews the fundamentals of debt contracting, including the role of events of default, debt priority, and security interests. The course examines various aspects of the bankruptcy process: including the automatic stay, the avoidance of prebankruptcy transactions (e.g. fraudulent conveyances and preferences), the treatment of executory contracts, the debtor's governance structure during bankruptcy, the financing of operations and investments in bankruptcy, sales of assets during bankruptcy, and the process of negotiating, voting, and ultimately confirming a plan of reorganization. Elements used in grading: Class participation and exam.

LAW 241. Payment Systems. 3 Units.

Negotiable instruments, letters of credit, checks, credit cards, electronic fund transfers, and cash. This course surveys the legal mechanisms by which funds can be transferred, including new mechanisms that have become more important as a result of (a) changes in electronic technology and (b) increased international trade. Designing a system for transferring funds is not easy -- as e-firms like PayPal have discovered -- and the law has had to deal with the difficulties of each new system in turn. The principal focus will be on articles 3, 4, 4A, and 5 of the Uniform Commercial Code, with occasional reference to other statutes and to international conventions and treaties. Bankruptcy is the first of three courses (the other two are Secured Credit and Payment Systems) dealing with the financing of commercial ventures through means other than the sale of corporate stock. These courses may be taken in any order: neither presupposes any knowledge of the others. Students who cannot take all three should probably prioritize them in the order they are listed--that is, Bankruptcy is the single most important course to take, then Secured Credit, then Payment Systems. Elements Used in Grading: In-School, open book.

LAW 242. Corporations. 4 Units.

This course is an introduction to the basic legal rules and principles governing the relations among managers, investors, and (to a lesser extent) creditors in the business enterprise. The course is the foundation for advanced business courses. We focus on problems that arise because a firm's managers and owners have conflicting interests. We examine the costs associated with this conflict and how markets, legal rules, and contracts address them. Elements used in grading: Class participation, attendance, written assignments, midterm, final exam.

LAW 242. Corporations. 4 Units.

This course is an introduction to the basic legal rules and principles governing the relations among managers, investors, and creditors in the business enterprise. The course is the foundation for advanced business courses. We focus on problems that arise because a firm's managers and owners have conflicting interests. We examine the costs associated with this conflict and how markets, legal rules and contracts might reduce them. Special Instructions: Exposure to Quantitative Methods: Finance (Law 467) and Statistical Inference in Law (Law 468) will be helpful in this course and for a number of advanced courses in the law and business concentration and is strongly recommended. Although Corporations is an open enrollment course, Professor Daines would like to determine his final enrollment number on the first day of instruction. If you want to enroll in Corporations, you must attend the first day of class or receive permission from Professor Daines (daines@stanford.edu) if you have a legitimate reason for why you cannot attend. Failure to attend or receive permission may lead you to be dropped from the course. Statistical Inference (Law 468) and QM: Finance (Law 467) are strongly recommended. See "Special Instructions in course description above. Elements used in grading: Class participation, attendance, written assignments, midterm, final exam.

LAW 245. China Law and Business. 3 Units.

This introductory course provides an overview of the Chinese legal system and business environment and examines Chinese legal rules and principles in selected business-related areas. These areas include intellectual property, dispute resolution, foreign investment, mergers and acquisitions, antimonopoly law, and environment. Through active class participation and analysis of business case studies, students will learn both the law in the books and the law in action in China, as well as strategies that businesses could use to overcome limitations in the Chinese legal system. Leaders from the legal and business communities will be invited to share their experiences and insights. This course is open to all students, including undergraduates who have permission from the instructor. A Stanford Non-Law Student Course Registration Form is available at <http://www.law.stanford.edu/school/offices/registrar/>. Elements used in grading: Class participation (30%) and extended take-home exam (70%).

LAW 248. Corporate Reorganization. 3 Units.

This course examines the reorganization of a financially distressed company under chapter 11 of the Bankruptcy Code. Among other things, the course follows a fictitious company through several stages of a business turnaround and financial restructuring, including an out-of-court workout, a chapter 11 filing, selected chapter 11 operating issues, and the negotiation, formulation and confirmation of a plan of reorganization. In addition, the course follows current developments relating to bankruptcy, primarily through reports in the media. For example, in recent years the course has examined developments in actual chapter 11 cases (e.g., General Motors, Chrysler Corporation, American Airlines and Lehman Brothers) and the effects of bankruptcy on specific industries (e.g., airlines, automotive, financial services and real estate). Finally, the course touches on various issues that often arise in a bankruptcy setting, such as valuation, leveraged buyouts, debt and derivative instruments, and distressed debt trading. Elements used in grading: Class participation and final exam.

LAW 251. Conflict of Laws. 3 Units.

Instances are common in law where more than one legal authority potentially governs a particular event, occurrence or transaction. When the outcome required by these authorities differs, which law governs? Beginning with the classic problem of choosing an applicable law in cases with facts touching more than one jurisdiction, this course is designed broadly to explore the variety of theories and systems used to resolve this question. The course thus uses state/state conflicts to develop a set of approaches and then extends these to such other problems as adjudicatory jurisdiction, judgments, federal subject-matter jurisdiction, and public and private international law. Elements used in grading: Attendance, preparation, participation and final examination.

LAW 255. Constitutional Law: The Fourteenth Amendment. 3 Units.

This course examines various aspects of the Fourteenth Amendment, with special attention paid to equal protection and substantive due process. Topics addressed will include equal protection in relation to race, gender, and sexual orientation, among others, and substantive due process in relation to procreation, sexuality, and relationships. The state action doctrine will also be covered. Elements used in grading: Class participation and exam.

LAW 259. State-Building and the Rule of Law Workshop. 3 Units.

The State-Building and Rule of Law Seminar is a law and development course centrally concerned with bridging theory and practice. The seminar will introduce the key theories relevant to rule of law generally and state-building in particular. And it will critically examine efforts to promote rule of law in countries at a state-building stage of development. The seminar will situate rule of law programs conceptually and practically around the core challenge of the state-building enterprise: to build durable formal and informal institutions, including legal institutions, which have legitimacy and capacity and can ensure security. The seminar also will critically assess case studies as well as project documents generated by the development industry on state-building. The theoretical and applied discussions will lay the foundation for the third part of the seminar, a practicum unit where students will present draft project proposals, project work products or analytical papers. In the practicum unit, one group will build on the ongoing Afghanistan Legal Education Project, another will pursue needs in the Bhutan Law and Policy Project, and another group will focus on needs in the Timor Leste Legal Education Project. Yet another group of students will develop rule of law projects for other countries within the scope of the seminar or write analytical problem oriented papers about the challenges to building the rule of law in one or more of these countries. The set of developing countries considered within the scope of this seminar is broad. It includes, among others, states engaged in post-conflict reconstruction, e.g., Cambodia, Timor Leste, Sierra Leone; states still in conflict, e.g., Afghanistan, Somalia; the poorest states of the world that may not fall neatly into the categories of conflict or post-conflict, e.g., Nepal, Haiti; and least developed states that are not marked by high levels of violent conflict at all, e.g., Bhutan.

Special Instructions: Students have the option to receive Writing (W) credit or Research (R) credit upon instructor approval. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor.

Class participation and presentation of final written product, reaction papers, and final paper/project/proposal.

Automatic grading penalty waived for writers. Writing (W) credit is for 3Ls only.

LAW 262. Corporate Finance I. 3 Units.

TBA.

LAW 266A. Juelsgaard Intellectual Property and Innovation Clinic: Clinical Practice. 4 Units.

The Juelsgaard Intellectual Property and Innovation Clinic provides students the opportunity to understand and advocate for sound innovation policies. Students in the clinic will help shape the course and outcome of significant legal and policy debates before courts, legislators, regulatory bodies, and other policy makers. Our work focuses on the relationship between law, regulation and innovation in areas ranging from biotechnology to information technology, pharmaceuticals, clean technology, and the creation and distribution of information.

Students will represent a variety of NGOs and non-profit entities and, in certain cases, groups or associations of innovators, entrepreneurs, technology users or consumers, economists, technologists, legal academics, and the like, and occasionally individual inventors, start-ups, journalists, or researchers. Students will address their clients' complex issues through tools that may include amicus briefs; comments or testimony in rulemaking and regulatory proceedings (i.e., DMCA exemption requests, comments to OSTP on issues such as open access, privacy or open data, comments to the FTC as part of IP and innovation hearings and reports, comments to the PTO or FDA, etc.); comments or testimony on proposed legislation; and whitepapers or other "best practices" documents to encourage sensible and balanced legal approaches to innovation and creativity. Our policy advocacy will often involve intertwined factual, technological, business, economic, political and public relations considerations along with the substantive legal issues. Students in the clinic may be called upon to collaborate with technologists, researchers, doctors, economists, social scientists, industry experts, and others to develop and articulate the appropriate policy advocacy for their clients.

The clinic seminar will focus on student-led workshops regarding client projects, and on engaging with current thinking around innovation, innovation economics and the impact of IP, antitrust, and other law and regulation on innovation. We will explore the process of policy advocacy, including various policy levers, the types of tools available to advocates and the strategies and tactics that may be employed, and will consider and critique a variety of case studies of previous advocacy, situating them in the larger context in which these efforts occurred. Students will critically examine the role of lawyers advocating for the public interest and for sound and sensible innovation policy outcomes and bring those lessons to bear on their own clinic work.

A background in technology may be useful in some cases but is not necessary to a successful experience in the clinic.

Special Instructions:

General Structure of Clinical Courses

The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers.

Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis.

Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor.

The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours."

Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students will be awarded three separate grades for their clinical quarter, each reflecting four credits. The three grades are broken into the following categories: clinical practice; clinical methods; and clinical coursework. Grading is pursuant to the H/P system.

Enrollment

LAW 266B. Juelsgaard Intellectual Property and Innovation Clinic: Clinical Methods. 4 Units.

The Juelsgaard Intellectual Property and Innovation Clinic provides students the opportunity to understand and advocate for sound innovation policies. Students in the clinic will help shape the course and outcome of significant legal and policy debates before courts, legislators, regulatory bodies, and other policy makers. Our work focuses on the relationship between law, regulation and innovation in areas ranging from biotechnology to information technology, pharmaceuticals, clean technology, and the creation and distribution of information. Students will represent a variety of NGOs and non-profit entities and, in certain cases, groups or associations of innovators, entrepreneurs, technology users or consumers, economists, technologists, legal academics, and the like, and occasionally individual inventors, start-ups, journalists, or researchers. Students will address their clients' complex issues through tools that may include amicus briefs; comments or testimony in rulemaking and regulatory proceedings (i.e., DMCA exemption requests, comments to OSTP on issues such as open access, privacy or open data, comments to the FTC as part of IP and innovation hearings and reports, comments to the PTO or FDA, etc.); comments or testimony on proposed legislation; and whitepapers or other "best practices" documents to encourage sensible and balanced legal approaches to innovation and creativity. Our policy advocacy will often involve intertwined factual, technological, business, economic, political and public relations considerations along with the substantive legal issues. Students in the clinic may be called upon to collaborate with technologists, researchers, doctors, economists, social scientists, industry experts, and others to develop and articulate the appropriate policy advocacy for their clients. The clinic seminar will focus on student-led workshops regarding client projects, and on engaging with current thinking around innovation, innovation economics and the impact of IP, antitrust, and other law and regulation on innovation. We will explore the process of policy advocacy, including various policy levers, the types of tools available to advocates and the strategies and tactics that may be employed, and will consider and critique a variety of case studies of previous advocacy, situating them in the larger context in which these efforts occurred. Students will critically examine the role of lawyers advocating for the public interest and for sound and sensible innovation policy outcomes and bring those lessons to bear on their own clinic work. A background in technology may be useful in some cases but is not necessary to a successful experience in the clinic. Special Instructions: General Structure of Clinical Courses The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students will be awarded three separate grades for their clinical quarter, each reflecting four credits. The three grades are broken into the following categories: clinical practice; clinical methods; and clinical coursework. Grading is pursuant to the H/P system. Enrollment

LAW 266C. Juelsgaard Intellectual Property and Innovation Clinic: Clinical Coursework. 4 Units.

The Juelsgaard Intellectual Property and Innovation Clinic provides students the opportunity to understand and advocate for sound innovation policies. Students in the clinic will help shape the course and outcome of significant legal and policy debates before courts, legislators, regulatory bodies, and other policy makers. Our work focuses on the relationship between law, regulation and innovation in areas ranging from biotechnology to information technology, pharmaceuticals, clean technology, and the creation and distribution of information. Students will represent a variety of NGOs and non-profit entities and, in certain cases, groups or associations of innovators, entrepreneurs, technology users or consumers, economists, technologists, legal academics, and the like, and occasionally individual inventors, start-ups, journalists, or researchers. Students will address their clients' complex issues through tools that may include amicus briefs; comments or testimony in rulemaking and regulatory proceedings (i.e., DMCA exemption requests, comments to OSTP on issues such as open access, privacy or open data, comments to the FTC as part of IP and innovation hearings and reports, comments to the PTO or FDA, etc.); comments or testimony on proposed legislation; and whitepapers or other "best practices" documents to encourage sensible and balanced legal approaches to innovation and creativity. Our policy advocacy will often involve intertwined factual, technological, business, economic, political and public relations considerations along with the substantive legal issues. Students in the clinic may be called upon to collaborate with technologists, researchers, doctors, economists, social scientists, industry experts, and others to develop and articulate the appropriate policy advocacy for their clients. The clinic seminar will focus on student-led workshops regarding client projects, and on engaging with current thinking around innovation, innovation economics and the impact of IP, antitrust, and other law and regulation on innovation. We will explore the process of policy advocacy, including various policy levers, the types of tools available to advocates and the strategies and tactics that may be employed, and will consider and critique a variety of case studies of previous advocacy, situating them in the larger context in which these efforts occurred. Students will critically examine the role of lawyers advocating for the public interest and for sound and sensible innovation policy outcomes and bring those lessons to bear on their own clinic work. A background in technology may be useful in some cases but is not necessary to a successful experience in the clinic. Special Instructions: General Structure of Clinical Courses The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Students will be awarded three separate grades for their clinical quarter, each reflecting four credits. The three grades are broken into the following categories: clinical practice; clinical methods; and clinical coursework. Grading is pursuant to the H/P system. Enrollment

LAW 267. Law of Nonprofits. 3 Units.

This course provides an overview of the rules governing the formation and operation of nonprofit organizations. The course will focus both on the state laws governing nonprofit corporations and on federal tax laws. Topics will include the fiduciary duties of nonprofit directors, obtaining and maintaining tax-exempt status, nonprofit lobbying and political activities, and nonprofit earned income strategies, including social enterprise.

LAW 272A. Organizations and Transactions Clinic: Clinical Practice. 4 Units.

The O&T Clinic is a place to learn about corporate practice. We're targeted at both students seeking to explore a non-litigation, advisory-oriented practice and those planning to do M&A, finance, securities, IP licensing or other corporate or transactional work at major firms. In the clinic, students develop legal advice, learn to review and write contracts and governance materials, meet with client executives, examine commercial relationships, and receive extensive feedback about their work. Students work on structural, programmatic, contractual, affiliation, and governance matters for corporate entities. Students typically represent multiple clients during the term, interact with client CEOs, CFOs, board members, and general counsels, and work in teams with other students and the instructors. Students receive detailed comments about the design, content, and execution of work-products and client communications, and about their performance in client meetings and calls. Students regularly assess their own work throughout the quarter and prepare a self-evaluation at the end of the term. O&T clients are all established Northern California nonprofit corporations. Most of the clients generate annual revenues in the range of \$1 - \$10 million, and some are considerably larger. We focus on these organizations because they are corporations that typically have meaningful governance and disclosure obligations, active boards of directors, audited financial statements, physical facilities, multiple collaborations, and diverse funding sources and contractual relationships -- all of which are relevant to and productive of corporate work -- yet are small enough that the clinic's contact is a senior executive. We think they provide excellent material for students learning about organizational representation and institutional corporate practice. The course includes a seminar that generally meets twice a week. Seminar meetings focus on student-led workshops regarding client projects, and on orientation to corporate practice, including discussion of core commercial relationships such as acquisition, credit, and licensing, and practice skills such as transaction planning and management. Evaluation and grading are based on detailed points of emphasis that reflect ways of working we believe characterize an effective lawyer and responsible colleague. Course design and operation reflect the instructors' combined 40+ years of corporate practice representing consumer products, finance, technology, and life science companies, in both law firm and senior in-house roles. Information about prior projects is available from the instructors and on the SLS website. No prior experience in business, finance, or corporate law is necessary. Special Instructions: General Structure of Clinical Courses The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. The three grades are broken into the following categories: clinical practice; clinical methods; and

LAW 273. Deals I. 3 Units.

This course applies economic concepts to the practice of structuring contracts. Our goal is to understand common problems and solutions that arise in complex deals. The course extends over two quarters, meeting three hours per week the first quarter and two hours per week the second quarter. Students enrolled in the course must take both quarters. The first quarter will be spent in a traditional classroom setting, discussing economics articles and case studies of actual contracts that illustrate the concepts described in the articles. We focus on the issues arising from transaction costs, adverse selection, moral hazard, problems of enforceability, agency problems, and contracting over time. During the second quarter, we will explore the connection between economic theory and contracting practice by studying specific deals. Students, divided into groups, will study a deal and give a class presentation based on their deal. A lawyer or another participant in the deal will also lead a class discussion of that deal. When it works, the students' and the practitioners' analyses are mutually enlightening. In the past, we have studied movie financings, biotech alliances, venture capital financings, cross-border joint ventures, private equity investments, and corporate reorganizations. This course is capped at 30 Students, 12 GSB, 18 Law School students. Students enrolled in the course must take both quarters. The course is open to first-year Law School students. Writing (W) credit is for 3Ls only. No exam in Winter Term. An In-School exam will be given at the conclusion of the course in the Spring Term. Elements used in grading: Attendance, class participation, presentation, written assignments, a group paper, and exam. Grades will be given at the end of the second quarter and will be applied to both quarters. This course is cross-listed with GSBGEN 304. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

LAW 274. Advanced Immigrants' Rights Clinic. 2-7 Units.

The Immigrants' Rights Advanced Clinic offers the opportunity for students who have already successfully completed the Immigrants' Rights Clinic to pursue: a specific immigrants' rights advocacy project; advanced individual client representation; and/or working with the clinic director to provide direction/guidance to those enrolled in the Clinic for the first time. All advanced Clinic projects will be jointly designed by the director and the advanced student. Advanced students providing guidance/direction to first-time students will receive additional training on providing supervision. Special instructions: Advanced students are expected to attend the case- rounds portion of the weekly seminar, and to participate as needed in the lecture/discussion portion of the seminar. Advanced students may arrange with the instructor to receive between two and seven units. No student may receive more than 27 overall clinical credits, however, during the course of the student's law school career. Elements used in grading: Attendance and participation in class, project work, writing assignments, and case preparation. Writing (W) credit is for 3Ls only.

LAW 275. Deals II. 2 Units.

This course applies economic concepts to the practice of structuring contracts. Our goal is to understand common problems and solutions that arise in complex deals. The course extends over two quarters, meeting three hours per week the first quarter and two hours per week the second quarter. Students enrolled in the course must take both quarters. The first quarter will be spent in a traditional classroom setting, discussing economics articles and case studies of actual contracts that illustrate the concepts described in the articles. We focus on the issues arising from transaction costs, adverse selection, moral hazard, problems of enforceability, agency problems and contracting over time. During the second quarter, we will explore the connection between economic theory and contracting practice by studying specific deals. Students, divided into groups, will study a deal and give a class presentation based on their deal. A lawyer or another participant in the deal will also lead a class discussion of that deal. When it works, the students' and the practitioners' analyses are mutually enlightening. In the past, we have studied movie financings, biotech alliances, venture capital financings, cross-border joint ventures, private equity investments, and corporate reorganizations. This course is capped at 30 Students, 12 GSB, 18 Law School students. This course is cross-listed with GSBGEN 304. Students enrolled in the course must take both quarters. The course is open to first-year Law School students. Writing (W) credit is for 3Ls only. No exam in Winter Term. An In-School exam will be given at the conclusion of the course in the Spring Term. Elements used in grading: Attendance, class participation, presentation, written assignments, a group paper, and exam. Grades will be given at the end of the second quarter and will be applied to both quarters.

LAW 276. Employee Benefits Law. 3 Units.

Employee benefits law focuses on the various forms of benefits and compensation employers provide to their employees: cash and equity compensation, retirement plans, and health and welfare benefits. The field lies at the intersection of a number of different legal disciplines, including employment and labor law, tax, health care law and even corporate and securities law. As such it is an uniquely challenging field of law, one which offers insight into many of the major issues our society currently faces: fears about the adequacy of retirement savings, struggles over the new health care law, and attempts to rein in outside executive compensation arrangements. Elements used in grading: Class participation, attendance and final paper. Writing (W) credit is for 3Ls only.

LAW 278. The Article III Judge. 2 Units.

The contemporary debate over the proper role of a federal judge under the Constitution turns, in large measure, on what it is we think an Article III judge is doing when she is called upon to resolve a "case or controversy." Is she looking for the fair result? If so, by whose lights? Is she a political actor, or is she instead looking for a rule of decision that has been previously established by law (a "mere translator" of the law, in Justice Frankfurter's words). If so, by natural law or positive law? These are some of the questions we will consider in discussing what role a federal judge plays when she exercises "the judicial Power of the United States" conferred by Article III of the Constitution. Readings will include books and articles by some of the leading legal thinkers in the nation's history. Special Instructions: This class will meet the first three weeks of the quarter only. Elements used in grading: Class attendance and participation, reading the assigned material, and four short papers (no longer than 3 pages each) reacting to the readings.

LAW 280. Toxic Harms. 3 Units.

This seminar will examine the concerns arising from exposure to toxic substances from a variety of perspectives. A principal focus will be tort liability, and a central theme in the course will be whether tort law is an effective method of compensating victims of toxic exposure and controlling the distribution and/or emission of toxic substances. In order to assess the efficacy of tort, it is essential to compare the liability system with alternatives such as restructured "public law" litigation, administrative compensation schemes, and regulatory control strategies. Moreover, it seems equally important that these options be grounded in a concrete understanding of the major current problem areas. To accomplish these aims, the course will focus on a number of specific present concerns, including tobacco, asbestos, anti-inflammatory drugs, and natural gas extraction (fracking). In each instance, we will look at the nature of the public health problem as well as ensuing tort litigation and regulatory activity. In addition to examining these distinctive problem areas, we will look at broader, cross-cutting institutional reform proposals that have received recent attention.

LAW 281. Natural Resources Law and Policy. 3 Units.

Natural resource management presents extremely difficult and contentious issues of law and public policy. Major debates continue to rage over issues such as the Endangered Species Act, whether the United States should permit drilling in the Arctic National Wildlife Refuge, and how to prevent the overfishing of the oceans. This course will focus on two major aspects of natural-resource management: biodiversity protection (including the Endangered Species Act, ocean fisheries management, and global protection of marine mammals) and public lands in the United States such as national parks and wilderness areas. The course also will examine the National Environmental Protection Act and the effectiveness of environmental impact assessments. Class sessions will include critical examinations of current law and policy and in-depth discussions of situational case studies that force you to consider how you would resolve real-life issues.

LAW 283. Federal Courts. 4 Units.

This course addresses the role of the federal courts in the American system of federalism and separation of powers, as well as their role in the development of substantive federal law and constitutional rights. A central premise of the course is that the institutional, political, and constitutional features of federal court litigation cannot be understood without engaging the historical context, especially the social, political, and legal movements, in response to which the federal courts have developed. Thus while many of the traditional aspects of federal court jurisprudence will be covered (e.g., federal common law including implied rights of action, justiciability doctrines and other doctrines of restraint, congressional power to limit the jurisdiction of the federal courts and to create "legislative courts" outside of Article III, Supreme Court review of judgments, state sovereign immunity, litigating against the government, and federal habeas corpus), doctrine will be placed alongside interdisciplinary readings on social, political, and theoretical accounts that reveal how the courts and ordinary Americans have come to understand the distinctive role of the federal courts, as well as claims for expansion or contraction of their powers. The course is strongly recommended for students interested in pursuing a career in litigation and/or judicial clerkships in the federal courts. Elements used in grading: Class attendance, class participation, take home exam and short paper.

LAW 283. Federal Courts. 5 Units.

This course considers the role of the federal courts in the federal system. It is both an advanced course in constitutional law and a course on the institutional design of the federal courts. In the first aspect, we consider two great themes: the allocation of power between the states and the federal government -- federalism -- and the relationship between the federal courts and the political branches of the national government -- separation of powers. In the other aspect, we focus on the structure of the judicial system, the scope and limits of federal judicial power, essential aspects of federal court procedure, and the evolving structural response of the federal courts to changes in technology, commerce, government, and a multitude of factors that affect the business of the federal courts and the role of federal judges. Topics will include the original and appellate jurisdiction of the federal courts, Supreme Court review of state court judgments, federal common law including implied rights of action, Congressional power to limit the jurisdiction of the federal courts and to create adjudicative bodies within the federal government but outside the requirements of Article III, state sovereign immunity, justiciability, abstention and other doctrines of restraint, and the role of the federal courts in the war on terrorism. This course is highly recommended for students planning to practice in the federal courts, and many judges consider it essential preparation for a judicial clerkship. This course complements Constitutional Litigation (Law 641), and students, especially those who plan to clerk, will benefit from taking both courses. Exam: In-School: Three hour exam. Students may consult course materials and their own notes, but not treatises, including Chemerinsky, commercial outlines, or student notes from past years or other schools. Elements used in grading: Class participation, attendance and final exam.

LAW 285. International Trade Law. 3 Units.

This course will examine the international trading system and focus primarily on the architecture and functioning of the World Trade Organization (WTO). It will explore the WTO's interaction with regional trade regimes, like the North American Free Trade Agreement (NAFTA), as well as Bilateral Investment Treaties and analyze relevant U.S. constitutional and statutory provisions concerning international trade. We will consider the theoretical foundations of the international trade regime, its current institutional and legal design, and its political and social implications (e.g., environmental, representativeness or economic development). We will conclude by exploring the interaction of trade and the global economic system. Elements used in grading: Class participation, attendance, written assignments, final exam.

LAW 290. Evidence. 4 Units.

Evidence rules constrain proof at criminal and civil trials. We will study the Federal Rules of Evidence, related case law, and those constitutional concepts that limit proof at criminal trials. Topics include relevance, unfair prejudice, character evidence, impeachment, the rape shield law, hearsay, and the Confrontation Clause. Please note that the California Bar Examiners have announced that "[t]he scope of the subject titled 'evidence' will include the California Code of Evidence." It appears that "include" means that the bar examination addresses both the Federal Rules of Evidence and the California Evidence Code. This evidence course covers only the Federal Rules of Evidence and does not address the California Code. Although the same principles of law govern the California and Federal rules, the two sets of rules are not identical, and students preparing for the California Bar Exam will have to learn some new material. Elements used in grading: Class participation, attendance and final exam.

LAW 290. Evidence. 5 Units.

Evidence rules constrain proof at criminal and civil trials. We will study the Federal Rules of Evidence, related case law, and those constitutional concepts that limit proof at criminal trials. Topics include relevance, unfair prejudice, character evidence, impeachment, the rape shield law, hearsay, and the Confrontation and Compulsory Process Clauses. Please note that the California Bar Examiners have posted this announcement: Applicants should be prepared to answer questions that have issues concerning the Federal Rules of Evidence and the California Evidence Code. Applicants should be prepared to compare and contrast the differences between the Federal Rules and the California Evidence Code, especially where the California rules of evidence have no specific counterparts in the Federal Rules. This evidence course covers only the Federal Rules of Evidence and does not address the California Evidence Code. Although similar principles of law govern the California Code and Federal Rules, the two sets of rules are not identical. Students preparing for the California Bar Exam will have to learn some new material. In-School Exam: one-half essay and one-half multiple choice. This course is open to first-year Law School students.

LAW 292. Estate Planning. 3 Units.

This class will cover the basics of the gift and estate tax system and estate planning principles. With these fundamentals, the course will then examine basic and advanced estate planning and wealth transfer techniques, including wills, various types of trusts, titling property, gifts during lifetime, charitable vehicles, handling closely held businesses and valuation matters--with an emphasis on how to use these tools in planning an estate to meet the objectives of a couple or individual. Probate of an estate, durable power of attorneys, conservatorships, and planning for other life situations will be explored. Elements used in grading: Class participation (is a small factor and only in the positive direction) and final exam. This course is open to GSB and graduate students with consent of the instructor.

LAW 293. Family Law. 3 Units.

Family law mediates and structures life's most intimate relationships. It establishes rules that order the relationships of members of family units and between families and society as a whole. The rules reflect many of society's most critical value premises--about gender roles, parent child relationships, sexual behavior, and how people should order and arrange their family lives. Social policy regarding families is a central focus of many disciplines, law being just one. This course examines the rules regarding the making and breaking of legally recognized relationships, especially those between marital partners and parents and children.

LAW 297. Entertainment Law. 3 Units.

Entertainment law is not, in and of itself, a separate legal discipline. Instead, the practice of entertainment law lies at the intersection of various traditional legal disciplines, such as contract, tort, copyright, trademark, antitrust, secured transactions, etc., and applies those disciplines to a unique business setting. This course is intended to approach the study of entertainment law from a practical perspective, applying the principles of traditional legal disciplines to avoid problems and find solutions in various facets of the entertainment industry. To accomplish the necessary background, we will study the entertainment industry from both a macro level (i.e., the organization of the motion picture, television and music business, including the function of studios, producers, networks, record companies, agencies, managers, lawyers and labor unions) and a micro level (i.e., examining actual agreements in order to understand the principal components of motion picture talent, production and distribution contracts, television series contracts, music and book publishing contracts). We will also examine key litigation issues that affect the industry, such as the interaction of the First Amendment and the right of publicity, the right of privacy and libel, the anti-SLAPP laws, the "final cut" and profit participation cases. The impact of the digital media (including the internet) will, of course, be analyzed, along with the future of the entertainment industry, including convergence, holograms, syntho-thesians and the like. We plan to include guest speakers from the entertainment industry so that this class will embody both business and legal considerations. The overall goals of this course are (1) to expose students to the unique and increasingly complex structure of the entertainment business; (2) to foster an understanding of the role the law and entertainment lawyers play in that unique business structure; (3) to strengthen students' ability to draft key documents and craft persuasive legal arguments to accomplish the goals they may seek to achieve as lawyers in the entertainment industry; and (4) to develop the analytical and problem-solving skills necessary to make them into effective entertainment lawyers. Writing (W) credit is for 3Ls only. Elements used in grading: Class participation, brief writing exercises, team contract negotiation and drafting projects.

LAW 299. Derivatives. 2 Units.

The course will examine the legal, regulatory, trading and risk management aspects of the \$600 trillion notional over-the-counter and exchange traded derivatives markets. Derivatives are not well-understood by regulators or the public, and have been blamed for causing or contributing to the economic crisis. This course will offer students the opportunity to understand how various derivative products are designed, traded and risk-managed and what role regulators play in the derivatives industry. In addition, students will focus on understanding key legal contracts that underpin the global derivatives industry, in particular focusing on the ISDA® Master Agreement and Credit Support Annex, as well as documentation supporting credit derivatives. Students will also consider the shifting regulatory landscape for financial institutions and hedge funds as it relates to the way in which these products are traded, with rates and credit products migrating to clearinghouses, as well as how conduct of business rules and disclosures may shift. The course will conclude with an examination of the economic crisis that erupted with Lehman Brothers' bankruptcy in September 2008 and the consequent policy reactions to that event from a derivatives and bankruptcy perspective. Elements used in grading: Attendance, written assignments and final exam.

LAW 300. Securities Litigation. 3 Units.

This course examines private enforcement of the securities laws through class action litigation. The course will analyze the elements of the key causes of action under the securities laws-materiality, causation, and damages-and the ways in which each is proven. A central element of proof in these cases is expert testimony based on an econometric technique called an "event study." An economist who specializes in this type of work will teach this methodology to the class, and the class will conduct such a study in teams. The course will also cover procedural requirements that are unique to securities class actions, including class certification and pleading requirements. Finally, we will cover the dynamics of settlement and the role of rules governing indemnification and insurance for defendants. The course concludes with an assessment of the public policy issues bearing on private securities litigation. Elements Used in Grading: Class assignments and final exam.

LAW 301. Labor Law. 3 Units.

This course will consider the fundamental legal principles affecting collective labor relations in the private sector workplace, with particular attention to the National Labor Relations Act. Students will consider the strategies adopted by labor groups, employers, and legal actors in response to evolving economic and social conditions. The course will emphasize union organizing, the collective bargaining process, and related topics, including the scope of statutory coverage, interference with union rights, elections, negotiations, strikes, picketing, secondary boycotts, arbitration, and individual employee rights in the labor-management context. There is no prerequisite for the course. Special Instructions: Regular, punctual attendance is required. If you expect (or are unexpectedly forced) to miss more than two classes, please consult with the instructor as soon as possible, as exceptions will be considered on a case-by-case basis. Elements used in grading: Final Exam. Early Add/Drop Deadline: Add/Drop decisions must be made the first week of class. Exceptions are at the instructor's discretion and will be considered on a case-by-case basis. Class is cancelled on Thursday, April 3rd. A makeup class will be held from approximately 12:30-2 p.m. on Friday, April 18th at which a (free) lunch will be served.

LAW 302. Advanced Topics in Federalism. 2-3 Units.

This seminar will deal with a variety of legal issues arising out of our federal system. The goal is to go beyond well-worn debates about Congress's enumerated powers and look at a series of more intricate legal problems. The first part of the course will examine several discrete issues about the relationship of states to federal institutions, such as whether states have any reserved rights under the Tenth Amendment, and what relationship states have to federal courts. The second part of the course will look at "horizontal"? federalism--i.e., relations between the states themselves. The final part of the course will reflect on the bigger picture--what purposes, if any, is federalism supposed to serve, and which of these doctrines, if any, serve them well?.

LAW 304. Law and the Rhetorical Tradition. 3 Units.

In this interdisciplinary seminar we will explore the rhetorical underpinnings of legal argument. In the first half of the course, we will acquaint ourselves with relevant elements of the rhetorical tradition. In the second half, we will analyze a variety of legal texts (both written and oral) with an eye to the use and function of rhetorical principles, as well as the ways form and content are mutually constitutive. This course aims both to increase students' understanding of rhetoric as readers and interpreters of legal texts and to develop students' skills as writers and speakers. Students will be expected to participate in class discussion in addition to completing a series of writing assignments including the rhetorical analysis of legal and non-legal texts and the revision of students' legal writing. Special Instructions: This course can satisfy either the Writing "W" or Research "R" requirement. The instructor and the student must agree whether the student will receive "W" or "R" credit. For "R" credit, the paper is substantial and is based on independent research. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. This course is cross listed with Program in Writing and Rhetoric (PWR 194). Elements used in grading: Class participation, attendance, assignments, final paper. Automatic grading penalty waived for writers. Writing (W) credit is for 3Ls only. This course is open to first year Law School students.

LAW 307. Gender, Law, and Public Policy. 3 Units.

Topics in this course will include equal protection standards, employment, family, reproductive rights, sexual harassment, rape, domestic violence, pornography, sexual orientation, diversity in the profession, feminist legal theory, international human rights, and intersections with race, ethnicity, class, and sexual orientation. Materials will include cases, commentary, problems, and media portrayals. Special Instructions: Course requirements will include class participation and a presentation and either (1) a long paper, which will satisfy the research requirement or (2) short weekly reflection papers on the assigned readings, and a short final research paper, which will satisfy the writing requirement. Students writing reflection papers will form teams and each member will be responsible for writing comments on one classmate's paper each week. There will be no final examination. A maximum of 10 students will be permitted to write the long paper for R credit. All students interested in R credit should pre-register by lottery for Law 307-0-02. Students who do not receive a spot in section 02 may enroll in section 01. Writing (W) credit is for 3Ls only. Open to students from other schools with the consent of the instructor. To apply for this course, non-Law students must complete a Non-Law Student Course Add Request Form available on the SLS Registrar's Office website (see Stanford Non-Law Student Course Registration). Elements used in grading: Class participation, attendance, written assignments, final paper, short reflection papers and class presentation.

LAW 310. Protecting Workers' Rights in Hard Times. 2-3 Units.

Workplace law is at a difficult crossroads. With high unemployment, violations of labor laws widespread, and unionization at an all-time low, promoting workers' rights poses unprecedented challenges. This seminar will explore, in turn, a variety of pressing issues confronting worker advocates and policymakers. Through analysis of academic and non-academic readings, and candid conversations with attorneys and officials in the trenches, we will evaluate the contours of each problem and consider a variety of solutions that have been attempted or proposed. We will consider statutory and common-law reforms, as well as the quality of enforcement, new regulatory approaches, and private/nonprofit-sector initiatives. Among the topics to be explored are the fissuring of employment relationships through outsourcing, franchising, reliance on independent contractors, and the like; the prevalence of wage theft; the difficulties of redressing more subtle forms of workplace discrimination; the decline of private-sector unionization and the attack on public-sector unions; the precarious legal status of undocumented workers; the regulatory challenges involved in protecting workers' safety and health; and the proliferating contractual bans on workers' ability to pursue class actions and court adjudication. The course format will combine lecture, group discussions and guest presentations. Although there are no formal prerequisites, prior experience and/or coursework in at least one workplace-related field such as employment law, employment discrimination law, or labor law is recommended.

LAW 311. Comparative Law. 2-3 Units.

The big question in comparative law today—and one that is of key importance to anyone interested in international law—is whether we are currently witnessing a convergence of national legal systems. This course examines this question, as well as the related problem of American exceptionalism, by exploring key aspects of contemporary Western European legal systems. We will study a range of legal institutions and practices, including such topics as legal education, the role of judges and judging, the function and meaning of codes versus precedent, constitutional courts, judicial review, and criminal procedure and punishment. In contrast to the traditional comparative law course, we will also devote substantial time to such pressing public-law questions as racial equality and affirmative action, gender equality and sexual harassment, church and state, and the relationship between European institutions, on the one hand, and national legal systems, on the other.

LAW 312. Criminal Procedure: Investigation. 4 Units.

The law school offers two survey courses dealing with constitutional criminal procedure. "Criminal Adjudication" covers the formal pretrial and trial processes, including the right of counsel, prosecutorial charging criteria, grand juries, bail, speedy trial, discovery, plea bargaining, trial by jury, and double jeopardy. This course, "Criminal Investigation," covers police investigation in the form of searches and seizures, interrogations, lineups, and undercover operations, and hence examines the Fourth, Fifth, and Sixth Amendment rules regulating the police in these endeavors. It also incorporates some of the new statutory law of investigation under the USA Patriot Act and other laws relating to national security. Students may take both Criminal Investigation and Criminal Adjudication. (There is, of course, no requirement to do so.)

LAW 315. Criminal Procedure: Adjudication. 4 Units.

The Law School offers two survey courses dealing with constitutional criminal procedure. "Criminal Investigation" will consider questions that arise under the fourth, fifth, and sixth amendments regarding investigations, interrogations, and charging decisions. This course, "Criminal Adjudication," will look at the way the judicial system handles criminal cases. Topics will include the right to counsel (and the concomitant right to "effective assistance" of counsel), prosecutorial discretion and plea bargaining, joinder and severance, discovery, the right to jury trial, double jeopardy, sentencing, and appellate review. Students may take both Criminal Investigation and Criminal Adjudication. (There is, of course, no requirement to do so.) Elements used in grading: Attendance, participation and final exam.

LAW 317. The Criminal Trial Jury. 3 Units.

This seminar, which is taught by a local state court judge, examines the criminal trial jury from both a practical and theoretical perspective. The course will consider the history of the criminal jury trial, legal and strategic considerations in jury selection, jurors' ability to act as fact-finders, rules protecting jury deliberations, the consequences of juror misconduct, and the practical importance of plea bargains as an alternative to jury trials. Students will observe portions of actual jury trials occurring at the Palo Alto Superior Court courthouse. They will also examine legal decisions, theoretical critiques, and empirical research about the jury. Class discussion will consider the practical challenges for lawyers and judges posed by jury trials. The course will culminate in a discussion of potential reforms to the jury system, with each student proposing a reform based on his or her in-person observations and review of the relevant literature. This course will combine a 2 hour seminar with a mandatory 1 hour per week practicum involving time spent at court. Special Instructions: Grades will be based on class participation and Option 1 (section 01) a series of short assignments; or Option 2 (section 02) a final paper for Research R credit. After the term begins, students accepted into the course can transfer from section (01) into section (02), with consent of the instructor. Elements used in grading: Class participation and a series of short assignments or a final paper.

LAW 318. History of American Law. 3 Units.

This course examines the growth and development of American legal institutions with particular attention to crime and punishment, slavery, and race relations, the role of law in developing the economy, and the place of lawyers in American society, from colonial times to the present. Any student may write a paper in lieu of the final exam with consent of instructor. Special Instructions: Any student may write a paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. This course is cross-listed with HISTORY 152 (consent of instructor required) & HISTORY 352B. Automatic grading penalty waived for writers. Elements used in grading: Final exam or paper.

LAW 319. Legislation. 3 Units.

Lawyers work in a legal system largely defined by statutes, and constantly shaped by the application of legislative power. This course is about statutes and the legislative institutions that create them. It discusses some of the key laws governing access to legislative power and the procedures that culminate in the production of statutes in the legislature. The course is divided into two parts. The first part will focus on the acquisition of legislative power. Key topics include bribery laws, lobbying and indirect influence on legislative activity, and campaign finance regulations. The second part will focus on the exercise of legislative power. Through a number of public policy case studies, students will better understand the organization of the U.S. Congress, the ways in which power is exercised in that institution, and the intersection between politics, the law, and policymaking. Elements used in grading: Class participation and final exam.

LAW 321. Patent Prosecution. 2 Units.

(Same as ME 238). The course follows the patent application process through the important stages: inventor interviews, patentability analysis, drafting claims, drafting a specification, filing a patent application, and responding to an office action. The subject matter and practical instruction relevant to each stage are addressed in the context of current rules and case law. The course includes four written assignments: an invention capture, a claim set, a full patent application, and an Office Action response. Prerequisites: Law 326 (IP:Patents), Law 409 (Intro to IP) or ME 208.

LAW 322. Patent Litigation Workshop. 3 Units.

This course simulates the strategy and pretrial preparation of a patent lawsuit. The course materials include information typical to a patent lawsuit: a patent, file history, prior art, and information regarding the accused product. Students will represent either the patentee or the accused infringer. Students will plan litigation strategy, meet with and advise a client, conduct written discovery, take and defend depositions, and brief and argue claim construction and motions for summary judgment. Some knowledge of patent law is presumed. IP: Patents (Law 326) is a prerequisite for this course, but can be taken coterminously.

LAW 323. Cross Border Mergers and Acquisitions. 3 Units.

This course will explore the complexities of cross-border mergers and acquisitions, with a particular focus on transatlantic and other international public M&A transactions. The subject-matter provides an opportunity to tie together different bodies of law relevant to M&A (corporate, contracts, securities, antitrust and other regulatory fields.) and to confront the US, European and other geographical and cultural legal and business environments in a deal-oriented context, including case studies of major transactions. We will go over the business and legal framework of cross-border M&A, transaction structures and key deal considerations, and explore the content of cross-border M&A agreements. Regulatory matters, deal risk management and hostile takeovers will also be addressed, as well as post-merger matters and broader policy and cross-cultural considerations. Guest speakers will be invited to share their experience. The course will aim to provide students with a broad understanding of the legal aspects of major cross-border M&A transactions. This is an interactive, primarily practice-oriented course requiring active student participation.

LAW 324. Intellectual Property: Copyright. 3 Units.

Copyright law protects music, film, video games and books, software, dance, architecture, design and dozens of other forms of creative work. This course examines all of the traditional corners of copyright doctrine, and also the challenges and opportunities--from BitTorrent to iTunes and beyond--that the Internet presents for the exploitation of copyrighted works, online and off. nThere are no prerequisites for this class.

LAW 325. The Role of the Modern General Counsel. 2 Units.

(Same as GSBGEN 544) The news is filled with reports of one corporate crisis after another - names like BP, Goldman Sachs, Bank of America, AIG, Siemens, Toyota, and issues like backdating, bribery, antitrust violations, insider trading, procurement fraud, health and safety violations, consumer class actions and the like. And often the cry is heard - where are the lawyers? This course explores the evolution of the role of the general counsel in major American public companies and, more broadly, the expanding role of in-house counsel. These are the lawyers in the trenches, on the front lines of American businesses. Each week, we'll review another dimension of the general counsel's job. We'll consider how general counsel today play an important role on the executive team of major companies and explore the different ways in which general counsels manage large corporate legal departments and direct functional legal areas like litigation, IP, corporate and securities, M&A, environmental and employment law. We will also examine the professional responsibilities and legal obligations of the general counsel -- including the delicate and sometimes conflicting reporting relationships to the CEO and the board of directors -- and consider how an in-house legal department fits into a corporation's organizational structure and how it supports the company's operating units on a day-to-day basis. We will explore the general counsel's role in internal investigations, regulatory investigations and compliance programs, and governmental affairs. We will also consider current practices in how in-house lawyers select, collaborate with and evaluate outside counsel. The class will meet weekly and we will invite current and former general counsels to join us occasionally for our discussions. Each student will be expected to participate actively in class discussions, and will be required to complete two projects, each in collaboration with three other students and submitted as a team, presenting how the team would address a complex set of legal and business issues.

LAW 326. Intellectual Property: Patents. 3 Units.

This course is a comprehensive introduction to patent law, the patent system, and the way patents are deployed by businesses and other patent owners. We cover the core concepts of U.S. patent law, as they relate to (1) patent validity; (2) infringement; and (3) remedies. We draw on traditional case law under the 1952 Patent Act, as well as recent legislation (particularly the America Invents Act of 2011) and contemporary case law (both Federal Circuit and Supreme Court). We will emphasize two main themes: (a) practical aspects of the patent system, of interest to inventors, entrepreneurs and patent owners; and (b) issues that pose challenges to the patent system, such as the purchase and sale of patent portfolios and current trends in patent litigation.

LAW 327. Introduction to Organizational Behavior. 4 Units.

Why are some organizations more successful than others? Is it their emphasis on innovation and risk taking? Their founders' eccentric and visionary personalities? Or perhaps their bureaucratic discipline and effectiveness? We will explore these questions by reviewing existing theory and research on organizational problems in a number of areas including: individual motivation and behavior; decision making and leadership; interpersonal and intergroup communication, influence and conflict; organizational culture; and inter-organizational competition and cooperation. The course focuses on the reasons for organizational founding and failure, the variety of organizational forms and the ways in which organizations and their members affect one another. You will participate in a number of group exercises to illustrate the theoretical and practical implications of addressing organizational problems and increasing overall performance. nElements used in grading: Class Participation, Attendance, Written Assignments, Final Paper.

LAW 328. Intellectual Property: Advanced Patents. 3 Units.

This is an advanced seminar, open only to those who have taken patent law. We will discuss current cases, as well as some issues not covered in the basic class. We will also focus on current efforts to reform the patent system. Students will write and present a research paper on a patent law topic.

LAW 329. Intellectual Property: International. 3 Units.

Music, motion pictures, even books travel instantaneously around the globe. So do patented inventions; so do brands and trademarks. Copyright and trademark licenses increasingly take foreign exploitation into account. Litigation over an important patented invention often proceeds on several foreign fronts. No lawyer practicing intellectual property law today can afford to overlook the substantive and procedural differences that separate one country's law from another's. This course will focus on the counseling considerations that surround the exploitation of intellectual properties in domestic and foreign markets through licensing, litigation, or both. The course will survey the principal legal systems and international treaty arrangements for copyright, patent, trademark and neighboring rights, as well as questions of jurisdiction, territoriality, national treatment and choice of law.

LAW 330. International Human Rights. 3 Units.

The course will provide an introduction to the international protection of human rights. In addition to the history and theoretical framework of human rights, the course will discuss the various charter-based and treaty-based mechanisms of the United Nations (Human Rights Council, Human Rights Committee and other treaty bodies) and relevant regional organizations, above all the Council of Europe, the Organization of American States, and the jurisprudence of the European and Inter-American Courts of Human Rights. Human Rights will also be put in the broader context of international peace, human security, and human development. nConsent Instructions: Any student may write a paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. nElements used in grading: Class participation, attendance, written assignments, final research paper or final exam.

LAW 331. Intellectual Property: Strategy for Technology Companies. 3 Units.

This course focuses on the actual day-to-day intellectual property issues faced by a technology-based company. Each class will cover a different aspect of an intellectual property practice, covering such topics as the establishment of a patent program, trade secret management, intellectual property licensing, the intellectual property issues arising during M&A transactions and strategic alliances, patent litigation, and managing open source software. The emphasis in each class will be on case studies, guest speakers, and interactive exercises designed to simulate scenarios commonly faced by an intellectual property attorney, including the negotiation of patent cross licenses, the drafting of intellectual property representations and warranties, the generation of intellectual property disclosure and licensing policies, and the identification and prioritization of patentable inventions.

LAW 333. Judgment and Decision-Making. 4 Units.

Theories and research on heuristics and biases in human inference, judgment, and decision making. Experimental and theoretical work in prospect theory emphasizing loss and risk aversion. Challenges that psychology offers to the rationalist expected utility model; attempts to meet this challenge through integration with modern behavioral economics. Decision-making biases and phenomena of special relevance to public policy, such as group polarization, group think, and collective action. Special Instructions: This course is part of the Master in Public Policy (MPP) Core Curriculum. Instructors in the MPP core curriculum will assume that students are familiar with calculus, intermediate undergraduate microeconomics, and introductory statistics and probability. Ideally, student preparation will equal or exceed the material covered currently at Stanford in Math 41, Econ 1 102A or Stat 60, and Economics 50. This course is cross-listed with School of Humanities & Sciences (PUBLPOL 305A and IPS 207A). Writing (W) credit is for 3Ls only. Elements used in grading: Class participation, midterm exam, and final paper.

LAW 335. Legal Ethics. 3 Units.

This course introduces students to the goals, rules and responsibilities of the American legal profession and its members. The course is designed around the premise that the subject of professional responsibility is the single most relevant to students' future careers as members of the bar. These issues come up on a constant basis and it is critical that lawyers be alert to spotting them when they arise and be educated in the methods of resolving them. As such, the course will address many of the most commonly recurring issues that arise, such as confidentiality, conflicts of interest, candor to the courts and others, the role of the attorney as counselor, the structure of the attorney-client relationship, issues around billing, the tension between cause lawyering and individual representation, and lawyers' duty to serve the underrepresented. In addition, we will delve into some more personal ethical issues that reflect on why students have chosen law as a profession and how lawyers compose careers that promote or frustrate those goals. A written problem will be distributed during each week of the Quarter. During the course of the Quarter, each student is responsible for submitting a series of written memos (three-to-five pages each) analyzing and resolving five of these problems. Each memo will be due two weeks after the problem is distributed. (Thus, by the end of the course, each student will have written on his or her choice of five of the nine problems distributed.) Special Instructions: Grades will be based on the memos submitted, with the instructor retaining the right to take class participation into account. Attendance is mandatory. Elements used in grading: Class participation, attendance and written assignments.

LAW 335. Legal Ethics. 3 Units.

This course will explore issues involving professional responsibility. Topics will include the role of advocates, the adversary system, the conditions of practice, diversity, candor, and confidentiality, conflicts of interest, lawyer-client relationships, regulatory structures, and legal education. Special attention will also focus on the profession's public obligations in areas such as access to justice and pro bono service. Special Instructions: Grades will be based on class participation and (1) short reflection essays on the readings and a short research paper or (2) a long paper. A maximum of 10 students will be permitted to write the long paper for R credit. After the term begins, 10 students can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. If more than 10 students apply to write a long paper for R credit, a lottery will be run to determine the 10 students accepted in section (02). Because this class is designated as fulfilling the Ethics requirement (and a W or R requirement) and substantially oversubscribed, admitted students are asked out of courtesy to those on the waitlist to commit to whether they are taking the course by the end of the second class. Elements used in grading: Attendance, class participation, short reflection essays on the readings and short research paper. Preference will be given to 3Ls. This course is open to first-year Law School students. Writing (W) credit is for 3Ls only.

LAW 335. Legal Ethics. 3 Units.

This course is a survey overview of the American legal profession, some of its leading institutions and fields of practice, and the ethical, legal, and administrative regimes that govern the practice of law. Topics will include overviews of the history and sociology of the profession; the role of lawyers as advocates in the adversary system, as counselors and as gatekeepers; obligations to clients, courts, adversaries, and third parties; obligations of competence, loyalty, and confidentiality; and modes of regulation. The course is in part designed to satisfy the American Bar Association's requirement that every law student have some instruction in professional responsibility and legal ethics. The course provides an introduction to and an overview of the ABA's Model Rules of Professional Conduct. (Most of the states - California is the major exception - base their ethics codes largely on the Model Rules, with modifications varying from state to state.) But the course also reflects the view that it is of limited use to learn the ethics rules in the abstract. Lawyers in different practice contexts face very different pressures and incentives to engage in unethical conduct; and develop very different norms and customs about how to interpret the rules. In any case, as we'll see, the Rules are wholly inadequate guides to practice. They are silent or vague on many of the important dilemmas lawyers face and they are only one of many sources of law governing lawyers. The "legal profession" is really many different sub-professions, segmented by education, practice institutions (e.g. large firms v. small and solo practices), practice specialties, and types of represented parties (e.g. plaintiffs or defendants, individuals or corporate entities, governments or private parties). Much of this course is given to descriptions and analyses of some of these various practices and of the organizations and incentives that structure lawyers' work. So, for example, we will be looking at large law firms representing and counseling corporate clients; plaintiff's lawyers representing individuals in personal-injury tort or mass-tort class-action litigation; prosecutors and criminal defense lawyers; and "public interest" lawyers. Course requirements may be satisfied in one of two ways: (1) A take-home examination given at the end of the course; or (2) A research paper on a topic within the scope of the course, based in significant part on primary source materials. A maximum of 10 students will be permitted to write the paper for R credit. After the term begins, 10 students may transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. If more than 10 students apply to write a research paper for R credit, a lottery will be run to determine the 10 students accepted in section (02). Elements used in grading: Attendance, class participation, take-home exam or research paper. Preference for 3Ls.

LAW 336. Real Estate Transactions. 3 Units.

Real Estate Transactions will have a "real world" focus, helping students apply some of the substantive concepts covered in the first-year property course to actual commercial property transactions involving the transfer, leasing and financing of real property interests. Among the topics covered will be preparing the letter of intent, preparing and negotiating the purchase and sale contract, examining title and survey issues, reviewing leases, negotiating finance documents, and closing the transaction. The course will also explore various negotiation strategies. Emphasis will be on California law, with some discussion of how the laws of other states may affect how a transaction is structured. Tangential issues that may be covered include selecting the appropriate entity to be used in various real estate transactions, the role of the attorney v. the role of the businessperson on a transaction, and what actions should be taken when something goes wrong on a real estate transaction, including a discussion of applicable remedies. The course will be taught through a combination of lectures, reading assignments and drafting exercises. Time and size of class permitting, there may also be some practice negotiation exercises.

LAW 337. Intellectual Property: Trademark and Unfair Competition Law. 3 Units.

This course will help students to develop the professional management skills that are essential for a successful legal career. The course will focus on team dynamics and leadership; effectively communicating with clients, colleagues, other parties and tribunals; client development and service; managing expectations and unexpected adversity; and the economics of law practice, including forecasting demand for legal services and project management. For the final paper, students will create a comprehensive, personal plan outlining the substantive knowledge, professional skills, and business focus they need to build a fulfilling law practice. Assignments and simulations will demonstrate and model various skills and instructors will provide real-time feedback to students on class exercises. The course is not limited to any particular type of practice (size or substantive area). Elements used in grading: Class participation and attendance, course exercises and written assignments.

LAW 338. Land Use. 3 Units.

This course focuses on the pragmatic (rather than theoretical) aspects of contemporary land use law and policy, including: nuisance as a land use tool and foundation for modern land use law; use and abuse of the "police power" (the legal basis for land use control); zoning flexibility; vested property rights, development agreements, and takings; redevelopment; growth control; and direct democracy. We explore how land use decisions affect environmental quality and how land use decision-making addresses environmental impacts. Special Instructions: All graduate students from other departments are encouraged to enroll, and no pre-requisites apply. Student participation is essential. Roughly two-thirds of the class time will involve a combination of lecture and classroom discussion. The remaining time will engage students in case studies based on actual land use issues and disputes. Elements used in grading: Attendance, class participation, writing assignments, and final exam.

LAW 339. Employment Law. 3 Units.

Workplace issues have become one of the fastest-growing areas of state and federal law. Employment-related lawsuits filed in federal court have tripled in volume in the past decade, and now account for a tenth of all civil cases. Many state courts have experienced a similar burgeoning of their employment law caseloads. This course examines this diverse, rewarding, and rapidly evolving area of legal practice by considering the diverse array of laws and institutions that regulate the employment relationship. The focus of the course is on laws that affect employees in non-unionized settings, such as protections against dismissal without cause, wage and hour restrictions, workplace privacy, covenants not to compete, the Family and Medical Leave Act, and mandatory arbitration of employment disputes. The course does not cover either Employment Discrimination or Labor Law, both of which are offered as separate courses. Special Instructions: Regular, punctual attendance is required. If you expect (or are unexpectedly forced) to miss more than two classes, please consult with the instructor as soon as possible, as exceptions will be considered on a case-by-case basis. Early Add/Drop Deadline: Add/Drop decisions must be made the first week of class. Exceptions are at the instructor's discretion and will be considered on a case-by-case basis. Elements used in grading: Final Exam.

LAW 340. Comparative Corporate Capitalism. 2 Units.

Forms of corporate ownership and control vary widely from one country to another. The type of corporate capitalism based on widely distributed share ownership that is found in the United States, and that is the usual subject of law school corporate law and corporate governance courses, is in fact an outlier. For example, in most countries public corporations have a controlling shareholder. In this seminar we'll examine the organization of enterprise in a range of both developed and developing countries to the end of understanding their variety, including the influence of a country's political governance. As part of this exercise, we'll look at the ways in which organizations and organizational law have evolved in different countries, and we'll speculate on the directions in which they'll continue to evolve in the future. Finally, we'll address the relationship between forms of capitalism and economic development. Students will do a series of short weekly papers on the readings. Elements used in grading: Series of short weekly papers.

LAW 343. Intellectual Property: Scientific Evidence in Patent Litigation. 3 Units.

(Same as GENE 243). This seminar will explore the role of scientific experts in patent infringement litigation. The class will have a mix of law students and doctoral candidates from the sciences and engineering. The law students must have some familiarity with United States patent law from classes or work experience. The graduate students must have completed their required coursework and have TGR status. In other areas of the law where scientific experts are used -- medical malpractice, environmental law, criminal law -- the science itself is often in dispute. In patent cases, however, the parties generally agree on the science. This affects the relationship between the lawyer and the expert and the substantive content of their interactions. Patent experts need to be able to explain science to the judge and jury, of course. But they also must help the litigators to choose which legal issues to press and which to concede, and to be aware of how the complications of the science might help, hurt, obscure or reveal how the law should be applied to the facts. Thus, both the lawyer and the scientist must educate the other about their specialties. For the first several weeks, the class will examine judicial decisions and trial documents involving scientific evidence in patent litigation. The rest of the quarter is largely devoted to work on the final projects: simulations of expert testimony in a patent case. Students will work together in teams and will meet regularly with the instructor in order to: select suitable patents; identify a balanced issue on either validity or infringement; prepare claim charts and materials for testimony; and give short, illustrated talks to inform their classmates about their projects. Finally, they will choose sides (patent owner or accused infringer) and finetune their presentations. The simulations will be performed at the end of the quarter before panels of practicing patent lawyers.

LAW 344. Law and Economics Seminar I. 2-3 Units.

This seminar will examine current research by lawyers and economists on a variety of topics in law and economics. Several sessions of the seminar will consist of an invited speaker, usually from another university, who will discuss his or her current research. Representative of these sessions have been discussions of compensation for government regulations and takings, liability rules for controlling accidents, the definition of markets in antitrust analysis, the role of the government as a controlling shareholder, and optimal drug patent length. Special Instructions: Students may enroll in this seminar for either W or R credit. You may write a series of short commentaries on the guest speakers' papers, of which there will be four. This will satisfy the Law School's Writing requirement. Students electing this option will be graded on a Mandatory Pass/Restricted Credit/Fail basis and receive 2 units of credit. Alternatively, you may write a single research paper on a law and economics topic of your choice. This will satisfy the Law School's Research requirement. These papers will be graded on an Honors/Pass/Restricted Credit/Fail basis. (You may write a single longer paper for two quarters if you enroll in the Seminar in the Winter as well.) Students taking the seminar for R credit can take the seminar for either 2 or 3 units of credit, depending on the paper length. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. There is no formal economics prerequisite to take this seminar, though students doing the longer research papers typically have some prior training in economics. Students may take both Law and Economics Seminar I and Law and Economics Seminar II in either order (neither is a prerequisite for the other). This seminar is cross-listed with the Economics Department (same as Econ 354). Elements used in grading: Four commentaries or one research paper. Writing (W) credit is for 3Ls only. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

LAW 344. Law and Economics Seminar II. 2-3 Units.

This seminar will examine current research by lawyers and economists on a variety of topics in law and economics. Several sessions of the seminar will consist of an invited speaker, usually from another university, who will discuss his or her current research. Representative of these sessions have been discussions of compensation for government regulations and takings, liability rules for controlling accidents, the definition of markets in antitrust analysis, the role of the government as a controlling shareholder, and optimal drug patent length. Special Instructions: Students may enroll in this seminar for either W or R credit. You may write a series of short commentaries on the guest speakers' papers, of which there will be four. This will satisfy the Law School's Writing requirement. Students electing this option will be graded on a Mandatory Pass/Restricted Credit/Fail basis and receive 2 units of credit. Alternatively, you may write a single research paper on a law and economics topic of your choice. This will satisfy the Law School's Research requirement. These papers will be graded on an Honors/Pass/Restricted Credit/Fail basis. (You may write a single longer paper for two quarters if you enroll in the Seminar in the Autumn as well.) Students taking the seminar for R credit can take the seminar for either 2 or 3 units of credit, depending on the paper length. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. There is no formal economics prerequisite to take this seminar, though students doing the longer research papers typically have some prior training in economics. Students may take both Law and Economics Seminar I and Law and Economics Seminar II in either order (neither is a prerequisite for the other). This seminar is cross-listed with the Economics Department (same as Econ 354). This course is open to first-year Law School students. Writing (W) credit is for 3Ls only. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

LAW 345. Law and Culture in American Fiction. 3 Units.

This seminar examines the way literary texts register changes in property law, the law of contracts, intellectual property and legal constructions of race, gender, and privacy, especially as they relate to the maintenance of personal identity, community stability, and linguistic meaning. The terms and stakes of these relationships will inform our readings of the texts themselves, as well as our understanding of their representations of law. The writers whose work we will consider include James Fenimore Cooper, Herman Melville, Henry James, Nella Larsen, Willa Cather, William Faulkner, and Sherman Alexie. Each week, a novel or story will be paired with relevant legal and historical readings. We will also consider the points of contact between literary narrative and narrative in law. English Department cognate course. Special instructions: Course requirements include class attendance and participation, three short response papers, and two longer papers. For Research "R" credit, students may petition to complete one long paper based on independent research. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Automatic grading penalty waived for writers. Elements used in grading: Class participation, attendance, written assignments and final paper. Writing (W) credit is for 3Ls only.

LAW 347. Law and Culture in American Film. 3 Units.

In this course we will attend to representations of law in 20th century American film - particularly Westerns, gangster films, and courtroom dramas. The themes we will address include: the asymmetry of law and justice, the relationship between law and social change, the public and private identities of lawyers, anxiety that the rule of law fails individuals and minorities, and the disciplinary modes of both law and culture. We will also attend to the convergence of narrative, visual, aural, and dramatic practices in legal proceedings and cinematic productions. Special instructions: Course requirements include class attendance and participation, three short response papers, and two longer papers. For Research "R" credit, students must complete one long paper based on independent research. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Class participation, attendance, assignments, final paper. Automatic grading penalty waived for writers. This course is open to first year Law School students. Writing (W) credit is for 3Ls only.

LAW 348. Health Care Regulation, Finance and Policy. 3 Units.

This course provides the legal, institutional, and economic background necessary to understand the financing and production of health services in the U.S. Potential topics include: health reform, health insurance (Medicare and Medicaid, employer-sponsored insurance, the uninsured), medical malpractice and quality regulation, pharmaceuticals, the corporate practice of medicine, regulation of fraud and abuse, and international comparisons. The syllabus for this course can be found at <https://syllabus.stanford.edu>. This class is crosslisted with HRP 391, PubIPol 231, and MGTECON 331. Elements used in grading: Participation, attendance, class presentation, and final exam. This course is open to first-year Law School students.

LAW 349. Employment Discrimination. 3 Units.

This course will examine legal responses to the barriers to workplace equality that are faced by minority groups. The course will survey the relevant doctrine, focusing primarily on federal employment discrimination statutes, but also addressing more expansive antidiscrimination protections under some state statutes, and local ordinances. Covered topics include sexual and racial harassment, sexual orientation discrimination, and affirmative interventions aimed at increasing the minority group and/or female representation in certain job categories or segments of the labor market. In addition to surveying the doctrine as it stands and as it has developed over time, we will also explore the doctrinal and conceptual difficulties inherent in identifying invidious discrimination and in devising appropriate remedies. Elements used in grading: Class participation and exam.

LAW 351. Corporate Income Taxation. 3 Units.

Overview of federal taxation of corporate entities. Course will address choice of entity (corporate or non-corporate), formation issues, and taxation of income and dividends. Approximately half of the class will be devoted to taxable and non-taxable acquisitions and reorganizations. The student's final grade will be based on final exam, although class participation may improve a student's grade. nElements used in grading: Final exam, and class participation may improve a student's grade.

LAW 352. International Tax. 2 Units.

This course examines the United States federal income taxation of international operations and transactions, including international joint ventures and M&A transactions. Income source, foreign tax credits and Subpart F are important. International transfer pricing rules also will be addressed. Elements used in grading: Final Exam.

LAW 353. Corporate Acquisitions. 4 Units.

This course examines the corporate acquisitions from a transactional and financial perspective. It begins with a review of a corporate acquisition agreement, the document at the center of a friendly transaction. We then consider a variety of explanations for how corporate acquisitions may promise to create value, and think about why they often fail to meet that expectation. In doing so, we will review the basics of accounting for acquisitions and their tax treatment. From there we move on to the corporate law side of acquisitions - the different forms the transaction can take, the rules governing hostile transactions, freezeouts of minority shareholders, and proxy fights.nElements used in grading: Final exam.

LAW 355. Taxation I. 4 Units.

This course provides an overview of the federal income tax.nElements use in grading: Class participation and final exam.

LAW 355. Taxation I. 5 Units.

This class teaches the fundamentals of the federal income tax as applied to individuals. It considers what is taxed as income and what is deductible, timing issues, and the taxation of capital gains and losses. The class considers the politics of tax reform as well as fundamental policy issues, such as whether the income tax should be progressive or a flat tax or whether alternative tax systems (like a consumption tax) would be a better way to pay for the federal government. It also considers a variety of issues relating to tax avoidance. Elements Used in Grading: Final Exam.

LAW 358. Advanced Antitrust: Litigating an Antitrust Case. 3 Units.

We will examine in depth four pivotal antitrust cases: Polygram Holdings, Microsoft, Leegin and Oracle. We will study the record created in the lower courts and then analyze how the court came to the conclusions it did. Students will write an amicus brief and argue a motion for preliminary injunction or an appeal.

LAW 359. Tax Policy. 2 Units.

This course will explore various tax policy issues. In past years, the issues we've explored have included the carbon tax, health care, social security, consumption tax, tax compliance, tax shelters and school financing. nSpecial Instructions: Grades will be based on either (A) class participation and memos responding to the discussion questions for any five of the sessions or (B) class participation and a research paper on a topic of your choosing (subject to our approval). Option A is Writing (W) credit and option B is Research (R) credit. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor.nElements used in grading: Class Participation, attendance and written assignments.nSee "Special Instructions" in course description above. Writing (W) credit is for 3Ls only.

LAW 360. Advanced Empirical Methods. 3 Units.

This course will examine topics in the empirical evaluation of law and policy for those who have already been exposed to basic statistics and regression. The course will begin with a discussion of problems of causal inference that have plagued some traditional statistical approaches and then examine the virtues and limitations associated with some more advanced techniques, such as regression discontinuity analyses and instrumental variables estimation. The course is designed to move students towards a publishable empirical research project. Given the constraints of the quarter system, the product is more likely to end with a detailed project design rather than a fully implemented study. nnSuccessful completion of the course requires regular attendance, and: (1) Careful reading of the course assignments coupled with frequent one page written assignments on the reading; (2) A PowerPoint presentation to the class discussing a major paper; and (3) A detailed project design using one of the empirical approaches discussed in the class. nElements used in grading: Attendance, written assignments, class-room presentation and paper.

LAW 363. History of the Common Law in England and America. 3 Units.

The right to a trial by jury, the presumption of public access to criminal proceedings, and citizenship by birth rather than blood, all enshrined in the U.S. Constitution, ultimately derive from English common law. American private law-including contracts, torts, and property-is indebted to the same heritage. This course will examine the history and theory of the common law with the aim of demonstrating its continuing relevance.nThree principal strands will run through the class. The first will trace the substantive and procedural evolution of the common law from its early English roots and writs to its role in the American legal system today. Another thread will emphasize conceptions of the common law, including both historical accounts derived from the writings of Sir Edward Coke, Matthew Hale, Jeremy Bentham, and Oliver Wendell Holmes, and more recent theoretical contributions by Guido Calabresi and Ronald Dworkin, among others. Finally, the course will examine certain central institutions of the common law, including the judge who follows precedent and the jury, and compare common law modes of adjudication with the alternative methods employed by the Chancellor in equity and judges in the civil law system. Source materials will include historical cases and documents as well as some secondary articles.nSpecial Instructions: Grades will be based on class participation and (1) the final exam or (2) a long independent research paper for Research (R) credit. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor.nElements used in grading: Class Participation, assignments, final exam or final paper. This course is cross-listed with Hist 131B.

LAW 368. Law and Biosciences: Neuroscience. 3 Units.

(Same as HRP211) This seminar examines legal, social, and ethical issues arising from advances in the biosciences. This year it will focus exclusively on neuroscience. It will examine how neuroscience will affect the law, and society, through improvements in predicting illnesses and behaviors, in "reading minds" through neuroimaging, in understanding responsibility and consciousness, in "treating" criminal behavior, and in cognitive enhancement. Students who have taken the Law and the Biosciences seminar in past years may receive additional credit for taking this year's class.

LAW 372. Legal History Workshop. 2-3 Units.

(Same as HISTORY 307A). The Legal History Workshop is designed as a forum in which faculty and students from both the Law School and the History Department can discuss some of the best work now being done in the field of legal history. Every other week, an invited speaker presents his or her current research for discussion. Speakers are chosen not only for the quality of their work, but also with the aim of exposing students to a broad array of topics and methodologies within legal history. In the week prior to a given speaker's presentation, the class meets as a group to discuss secondary literature relevant to understanding and critiquing the speaker's research. Students then read the speaker's paper in advance of the following week's workshop presentation.

LAW 373. Protection of Personality. 3 Units.

This course will examine the theoretical foundations and common law development of the range of tort remedies designed to afford protection to the interests in personality. Defamation, the right of privacy, and claims of emotional distress and harassment will receive particular attention, along with the constitutional defenses to these claims, based on the First Amendment, which have arisen since the mid-1960's.

LAW 378. Banking Law. 3 Units.

This course will examine the legal and regulatory system governing financial institutions, with an emphasis on banks. It will do so by exploring the underlying economics of banking, and the ongoing effort to reform financial regulation. Questions addressed will include: Why do we regulate financial institutions? What dangers do we want to avoid? How well does the current regulatory system achieve what we want to achieve? What alternative approaches can be taken? What are the costs and benefits of the current system, and those of the alternatives? Elements used in grading: Class participation, attendance, final exam.

LAW 386. Health Law and Policy: Public Health and Bioethics. 3 Units.

This course will focus on the physician/patient relationship, medical ethics, and public health law.

LAW 387. Internet Torts and Crimes. 2 Units.

The purpose of this course is to cover the highlights of torts and crimes on the Internet. Topics include cybercrimes (spam, fraud, cyberbullying), privacy, and First Amendment issues (defamation, threats, and indecent speech). The perspective will be from that of a practitioner faced with various fact patterns and known case law who has to advise his/her client on the best course of action. (Think stud poker as applied to the practice of law.).

LAW 388. Technological, Economic and Business Forces Transforming the Private Practice of Law. 2 Units.

The private commercial practice of law is undergoing fundamental change. Modern technological, economic and business forces are placing extreme pressure on the traditional private attorney law firm model. These forces will transform, eliminate or replace virtually every aspect of legal services provided by attorneys. Traditional foundations of the large law firm model such as "billable" hours, summer associate programs, large staffs (e.g., paralegals and secretaries) and high associate-to-partner ratios are becoming (or have already become) relics of a bygone era. Today, the business need for clients to select a one-stop, full-service law firm for their important legal work has, in a variety of circumstances, disappeared. Sophisticated clients are utilizing a wide range of legal services firms and companies for their legal work. As a result, the diversity of legal business models and manner of providing legal services has greatly expanded. Often individual lawyers (or very small firms) can provide high-level legal services by assembling "virtual" teams in which each team member handles a different constituent part of the representation. "In-sourcing," "out-sourcing" and the transferring of large portions of work to non-lawyer legal support vendors are all becoming fixtures of the legal economy. This rapid increase in diversity on both the supply and demand side of the legal economy will greatly alter the skills and prerequisites required for the successful private practice of law. The course is composed of two parts. In part one, the technological, economic and business practices transforming the legal profession are identified and their impact on the traditional approaches to private practice law firms will be examined. In part two, the course focuses on how individual lawyers can adapt to or embrace the forces transforming law to improve their practice and succeed in the new environment. Part two of the course will additionally focus on how specific skills such as project management, social networking and information management will be crucial to a successful legal career. Part two of the course will also discuss how the changing legal environment creates new ethical and professional challenges for attorneys.

LAW 393. Remedies. 3 Units.

The remedy is arguably the most important part of any lawsuit, and often the most neglected. This course considers the question of what plaintiffs are entitled to when they win a case and why. It will cover damages, punitive damages, restitution, unjust enrichment, and injunctive relief. While we will consider public remedies in constitutional cases, the majority of the course will focus on remedies in private law civil actions.

LAW 394. Criminal Law and Policy: Research Workshop. 3 Units.

This course is designed for students who are actively engaged in empirical research in crime and public policy and wish to turn their research projects into an academic publication.

LAW 395. Creating New Legal Tools to Address the Environmental Impacts of Energy Projects. 3 Units.

A domestic energy boom is underway with major new energy projects being sited on both private and public lands, including wind projects, utility-scale solar projects, oil and gas projects, and associated transmission lines and pipeline projects. Many of these projects have significant footprints, with related negative impacts on their local environments. Students will work with policymakers in Sacramento and Washington this fall in evaluating new regulatory and market-based options to address the environmental impacts of energy-related projects. In doing so, seminar participants will be working "in real time" on new state and federal initiatives to develop more expedited and effective mechanisms to compensate for environmental impacts of energy and other infrastructure projects, including a number of large renewable energy projects that currently are being developed on public and private lands in the southwest. The seminar also will explore the full range of environmental issues associated with major infrastructure development, including an in-depth discussion and evaluation of permitting reforms and environmental issues that the Administration is now addressing under Executive Order 13604 (President Obama's infrastructure permitting reform initiative).

LAW 397. Law and Economics of Death Penalty. 2-3 Units.

This course will explore three primary issues: 1) the Supreme Court's forty-year effort to define what cases can permissibly receive the death penalty and the procedures under which it must be imposed; 2) the arguments for and against the death penalty, with a major focus on whether the death penalty deters, is administered in a racially biased way, or is otherwise implemented in an arbitrary and capricious manner; and 3) what the U.S. and international status of the death penalty is today and what the prospects are for the future. The readings on deterrence and racial discrimination will entail some substantial statistical analysis, although a background in statistics, though helpful, will not be required. Special Instructions: After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Students taking the course for R credit can take the course for either 2 or 3 units, depending on the paper length. This course is open to first-year Law School students. Elements used in grading: Written assignments and final paper. Writing (W) credit is for 3Ls only.

LAW 400. Directed Research. 1-4 Unit.

Directed Research is an extraordinary opportunity for students beyond the first-year to research problems in any field of law. The final product must be embodied in a paper or other form of written work involving a substantial independent effort on the part of the student. A student must submit a detailed petition of at least 250 words, approved by the sponsoring faculty member, outlining his or her proposed project and demonstrating that the research is likely to result in a significant scholarly contribution. A petition will not be approved for work assigned or performed in a course, clinic, or externship for which the student has or will receive credit. A petition must indicate whether the product is intended for publication in a law review or elsewhere. A student may petition for "Directed Research: Curricular Development" when the work involves assisting a Law School faculty member in developing concepts or materials for new and innovative law school courses. Both the supervising faculty member and the Associate Dean for Curriculum must approve petition for "Directed Research: Curricular Development." Students must meet with the instructor frequently for the purposes of report and guidance. Unit credit is by arrangement. Students whose projects warrant more than four units should consider a Senior Thesis or the Research Track. See SLS Student Handbook for requirements and limitations. With the approval of the instructor, a directed research project of two-units or more may satisfy one research writing course (R course). Elements used in grading: As agreed to by instructor. Directed Research petitions are available on the Law School Registrar's Office website (see Petition Process and Forms).

LAW 401. Venture Capital II. 3 Units.

This class will focus on the legal and non-legal tactical details of entrepreneurial endeavors. The legal specifics of corporate formation, tax, and contracts are well covered by a variety of other courses at the Law School and will only be reviewed briefly in this course. Instead, the course will examine the life stages (formation, financing, execution, and exit) of a venture-backed company from the entrepreneur's perspective. Students who are interested in either starting companies or working with startup founders as their legal counsel will solidify their foundations in this course. There will be no textbook - course materials will include PowerPoint slides, readings from various entrepreneur and venture capital blogs, sample business plans, and other sources. Grades will be based on class participation (10%), short reflection papers and/or short problem sets (15%), and a 60 minute oral business plan presentation with accompanying slide deck and written business plan. You will be required to present a business plan to a panel of 3-4 people, at least one of which will be Dan Siciliano or John Rodkin. The presentation, including Q&A, should be approximately 60 minutes. In addition to the oral presentation (with accompanying slides), you'll need to turn in a written mini-plan (executive summary, lead generation, sales, and marketing) (no more than 5 pages), a capitalization table (current and after at least two more future rounds of financing), a long term financing plan with corresponding milestones for each round of investment, and written follow-up for any unanswered questions during the presentation. (Don't worry if you don't yet understand all of these terms - that's why we have the course!). Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. Special Instructions: Prerequisites: QM Finance or equivalent modest background in finance and Venture Capital (or Venture Capital I) are recommended but not strictly required. Elements Used in Grading: Class participation (10%), several short reflection papers and/or short problem sets (25%), and a 60 minute oral business plan presentation with accompanying slide deck and written business plan (65%).

LAW 402. Moot Court. 2 Units.

The major moot court activity at Stanford Law School is the Marion Rice Kirkwood Memorial Competition, which takes place each year during the Autumn and Winter terms. Autumn term will be dedicated to brief writing and completion of the written portion of the Competition; the oral portion of the Competition will be conducted during the first four weeks (approx.) of Winter term. Students on externship and in clinics may enroll if permitted by their respective programs as class attendance is not required Autumn term and students must only participate in scheduled oral arguments Winter term. nPrior to the Competition itself, materials and lectures are provided on research, brief writing, and oral advocacy techniques. Registration for the Kirkwood Competition is by team. Each team is required to submit an appellate brief of substantial length and quality, and to complete at least two oral arguments, one on each side of an actual case. The first draft of the brief is reviewed and critiqued by the course instructors. The final draft of the brief is scored by the course instructors and members of the Moot Court Board. The course also offers videotaping and critiques of practice oral arguments. Panels of local attorneys and judges serve as judges who score the oral argument portion of the Competition. Teams are selected for the quarterfinal, semifinal and final round of the Competition based on their brief score and oral advocacy score. The final round of the Competition is held before a panel of distinguished judges and the entire Law School community is invited to attend. nSpecial Instructions: In order to maintain academic standards, enrollment in the Kirkwood Competition is limited to 20 two-person teams. This limit will be strictly enforced. Registration forms will be distributed in the Spring. If the program is oversubscribed, a lottery will be held to determine participating teams and to establish a waiting list. The final drop deadline for the course will be Friday of the first week of classes. nEnrollment in both the Autumn and Winter terms is required. The final grade for both the Autumn and Winter terms, and the Writing and Professional Skills credit will be awarded upon the completion of the course in the Winter Term. nConsent Instructions: Instructions on how to register for Moot Court competition are sent out to students each year in spring quarter for the coming academic year.nWriting (W) credit is for 3Ls only.nElements used in grading: Attendance and written assignments.

LAW 402. Moot Court. 1 Unit.

The major moot court activity at Stanford Law School is the Marion Rice Kirkwood Memorial Competition, which takes place each year during the Autumn and Winter terms. Autumn term will be dedicated to brief writing and completion of the written portion of the Competition; the oral portion of the Competition will be conducted during the first four weeks (approx.) of Winter term. Students on externship and in clinics may enroll if permitted by their respective programs as class attendance is not required Autumn term and students must only participate in scheduled oral arguments Winter term. nPrior to the Competition itself, materials and lectures are provided on research, brief writing, and oral advocacy techniques. Registration for the Kirkwood Competition is by team. Each team is required to submit an appellate brief of substantial length and quality, and to complete at least two oral arguments, one on each side of an actual case. The first draft of the brief is reviewed and critiqued by the course instructors. The final draft of the brief is scored by the course instructors and members of the Moot Court Board. The course also offers videotaping and critiques of practice oral arguments. Panels of local attorneys and judges serve as judges who score the oral argument portion of the Competition. Teams are selected for the quarterfinal, semifinal and final round of the Competition based on their brief score and oral advocacy score. The final round of the Competition is held before a panel of distinguished judges and the entire Law School community is invited to attend. nSpecial Instructions: In order to maintain academic standards, enrollment in the Kirkwood Competition is limited to 20 two-person teams. This limit will be strictly enforced. Registration forms will be distributed in the Spring. If the program is oversubscribed, a lottery will be held to determine participating teams and to establish a waiting list. The final drop deadline for the course will be Friday of the first week of classes. nEnrollment in both the Autumn and Winter terms is required. The final grade for both the Autumn and Winter terms, and the Writing and Professional Skills credit will be awarded upon the completion of the course in the Winter Term. nConsent Instructions: Instructions on how to register for Moot Court competition are sent out to students each year in spring quarter for the coming academic year.nElements used in grading: Attendance and written assignments.

LAW 403. Senior Thesis. 5-8 Units.

An opportunity for third-year students to engage in original research and to prepare a substantial written-work product on the scale of a law review article. The thesis topic should be chosen no later than two weeks after the beginning of the seventh term of law study and may be chosen during the sixth term. The topic is subject to the approval of the thesis supervisor, who may be any member of the Law School faculty under whose direction the student wishes to write the thesis and who is willing to assume the responsibility therefor. An oral defense of the thesis before members of the faculty, including the thesis supervisor, will be conducted late in the student's ninth academic term. Acceptance of the thesis for credit requires the approval of the thesis supervisor and one or more other members of the faculty who will be selected by the supervisor. Satisfactory completion of the senior thesis will satisfy graduation requirements to the extent of (a) 5 - 8 units of credit and (b) two research courses. The exact requirements for a senior thesis are in the discretion of the supervising faculty member. Special Instructions: Two Research credits are possible. Elements Used in Grading: Paper.

LAW 404B. Foreign Legal Study: Bucerius Law School. 9-14 Units.

This course is for J.D. students who have been approved by the Law School to study at Bucerius Law School (Hamburg, Germany), European University Institute (Florence, Italy), Waseda University Law School (Tokyo, Japan), CIDE - Centro de Investigación y Docencia Económicas (Mexico City, Mexico), Peking University Law School (Beijing, China), or the National University of Singapore (Singapore). See SLS Foreign Legal Study Exchange Program at http://www.law.stanford.edu/program/centers/spil/foreign_study/ for details.nElements used in grading: Satisfactory evaluation of course work at the exchange institution.

LAW 404C. Foreign Legal Study: Centro de Investigación y Docencia Económicas. 9-14 Units.

This course is for J.D. students who have been approved by the Law School to study at Bucerius Law School (Hamburg, Germany), European University Institute (Florence, Italy), Waseda University Law School (Tokyo, Japan), CIDE - Centro de Investigación y Docencia Económicas (Mexico City, Mexico), Peking University Law School (Beijing, China), or the National University of Singapore (Singapore). See SLS Foreign Legal Study Exchange Program at http://www.law.stanford.edu/program/centers/spil/foreign_study/ for details. Elements used in grading: Satisfactory evaluation of course work at the exchange institution.

LAW 404E. Foreign Legal Study: European University Institute. 9-14 Units.

This course is for J.D. students who have been approved by the Law School to study at Bucerius Law School (Hamburg, Germany), European University Institute (Florence, Italy), Waseda University Law School (Tokyo, Japan), CIDE - Centro de Investigación y Docencia Económicas (Mexico City, Mexico), Peking University Law School (Beijing, China), or the National University of Singapore (Singapore). See SLS Foreign Legal Study Exchange Program at http://www.law.stanford.edu/program/centers/spil/foreign_study/ for details. Elements used in grading: Satisfactory evaluation of course work at the exchange institution. This course is for J.D. students who have been approved by the Law School to study at Bucerius Law School (Hamburg, Germany), European University Institute (Florence, Italy), Waseda University Law School (Tokyo, Japan), CIDE - Centro de Investigación y Docencia Económicas (Mexico City, Mexico), Peking University Law School (Beijing, China), or the National University of Singapore (Singapore). See SLS Foreign Legal Study Exchange Program at http://www.law.stanford.edu/program/centers/spil/foreign_study/ for details.

LAW 404P. Foreign Legal Study: Peking University Law School. 9-14 Units.

This course is for J.D. students who have been approved by the Law School to study at Bucerius Law School (Hamburg, Germany), European University Institute (Florence, Italy), Waseda University Law School (Tokyo, Japan), CIDE - Centro de Investigación y Docencia Económicas (Mexico City, Mexico), Peking University Law School (Beijing, China), or the National University of Singapore (Singapore). See SLS Foreign Legal Study Exchange Program at http://www.law.stanford.edu/program/centers/spil/foreign_study/ for details. Elements used in grading: Satisfactory evaluation of course work at the exchange institution.

LAW 404S. Foreign Legal Study: National University of Singapore. 9-14 Units.

This course is for J.D. students who have been approved by the Law School to study at Bucerius Law School (Hamburg, Germany), European University Institute (Florence, Italy), Waseda University Law School (Tokyo, Japan), CIDE - Centro de Investigación y Docencia Económicas (Mexico City, Mexico), Peking University Law School (Beijing, China), or the National University of Singapore (Singapore). See SLS Foreign Legal Study Exchange Program at http://www.law.stanford.edu/program/centers/spil/foreign_study/ for details. Elements used in grading: Satisfactory evaluation of course work at the exchange institution.

LAW 404W. Foreign Legal Study: Waseda University. 9-14 Units.

This course is for J.D. students who have been approved by the Law School to study at Bucerius Law School (Hamburg, Germany), European University Institute (Florence, Italy), Waseda University Law School (Tokyo, Japan), CIDE - Centro de Investigación y Docencia Económicas (Mexico City, Mexico), Peking University Law School (Beijing, China), or the National University of Singapore (Singapore). See SLS Foreign Legal Study Exchange Program at http://www.law.stanford.edu/program/centers/spil/foreign_study/ for details. Elements used in grading: Satisfactory evaluation of course work at the exchange institution.

LAW 405. Privacy and Technology in Law and Practice. 2 Units.

In this lecture course, students will identify instances in which new technologies have changed the likelihood that information about individuals will be created, collected, stored, analyzed, and disclosed to both private entities and to governments. We will look at the internet, mobile platforms and drones, among other developments. The class will identify both privacy defeating and privacy enhancing technologies, and consider how legal regimes and policy choices as well as technological design can mitigate or heighten the risk of unwanted information disclosure. Assignments will ask for both descriptive and normative analysis. Students will examine the interrelationship between privacy, security, free speech, innovation and other public goods and be asked to debate particular policy outcomes in light of competing values about information privacy with regard to both the public and private sector. We will cover issues such as Do-Not-Track and online advertising, data security breaches, consumer notice, privacy by design, corporate best practices, Federal Trade Commission enforcement, workplace monitoring, and law enforcement and national security access.

LAW 406. Research Track. 9-12 Units.

The Research Track is for students who wish to carry out a research project of a scope larger than that contemplated for a Senior Thesis. Research Track projects are to be supervised by two or more professors, at least one of whom must be a member of the Law School faculty. At least one faculty member in addition to the supervisors must read the written product of the research, and the student must defend the written work orally before the readers. Students will be admitted to Research Track only if they have a demonstrated capability for substantial independent research, and propose a significant and well-formulated project at the time of application. Special Instructions: Two Research credits are possible. Elements Used in Grading: Paper.

LAW 407. International Deal Making. 2 Units.

This course specifically focuses on the application of legal and business knowledge to real world transactions in the international context. This is a practical course for students who are interested in applying their knowledge to deal structuring, identifying and resolving legal and business concerns, negotiations, documentation and deal closing. The caselets (short-form cases), developed by the instructor (JD/MBA/CPA) from his 25 years' experience in deal-making in China and Asia, raising \$9 billion in equity and debt, often place the student inside the negotiating room and challenge the student to strike deals with senior private and public officials. This course is structured as an intense large seminar with a maximum of 30 law and 10 business students, mixed into groups for class work and presentations. Course objectives: (1) To give the law student a deeper understanding of the legal issues that arise in cross-border transactions, and a broader understanding of the business context in which legal advice is asked for and given; (2) to give the business student an appreciation of the importance of reading the legal documents which purport to describe his/her business transaction, and an understanding of the role the legal advisor can and should play in deal structuring, negotiating and documenting aspects; and (3) for both sets of students, there will be the opportunity to strategize, structure and be the principal negotiator in real world, substantive, international business deals. Following the outcomes decided in class, the actual outcomes and subsequent events will be shared. This is an applied business law course focused on structuring, negotiating and closing pioneering business transactions which have several legal and business obstacles to overcome. Elements used in grading: Class participation (30%), attendance, final paper (30%) and group presentation (40%).

LAW 408A. Criminal Defense Clinic: Clinical Practice. 4 Units.

Students in the Criminal Defense Clinic will represent indigent criminal defendants in a wide range of misdemeanor cases in Santa Clara and San Mateo counties. Students will be California Bar Certified and thus will be bound by the rules and ethics of the profession, notably zealous advocacy on behalf of clients. Students will take the lead role in all aspects of case development, including interviewing clients and witnesses, investigating facts, developing case strategy, negotiating with the prosecutor, drafting and arguing motions, and trying cases before judges and juries. Common charges include drug possession, public order offenses, assault, theft, and weapons possession. While students will have primary responsibility for all aspects of their cases, all trial work will be closely supervised. In addition to casework, there will be weekly workshop sessions. These classes will focus both on case-rounds and on broader systemic issues. The goal of the clinic is to train students how to try a criminal case from beginning to end while engaging in thoughtful reflection on the role of the criminal defense attorney in the criminal justice system. While the work is often challenging and sometimes heartbreaking, it offers students a unique opportunity to put their skills, intellect and compassion to use by serving people in a moment of great need.

Special Instructions:

General Structure of Clinical Courses

The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis.

Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor.

The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students will be awarded three separate grades for their clinical quarter, each reflecting four credits. The three grades are broken into the following categories: clinical practice; clinical methods; and clinical coursework. Grading is pursuant to the H/P system.

Enrollment in a clinic is binding; once selected into a clinic to which he or she has applied, a student may not later drop the course except in limited and exceptional cases. Requests for withdrawal are processed through the formal petition and clinical faculty review process described in the clinic policy document posted on the SLS website. Students may not enroll in any clinic (full-time or advanced) which would result in them earning more than 27 clinical credits during their law school career. The rules described here do not apply to advanced clinics for students who are continuing with a clinic in which they were previously enrolled. For information about advanced clinics, please see the course descriptions for those courses.

For more information about clinic enrollment and operations, please see the clinic policy document posted on the SLS website.

Elements used in grading: Class participation, attendance, written assignments and case work and professionalism.

Writing (W) credit is for 3Ls only.

LAW 408B. Criminal Defense Clinic: Clinical Methods. 4 Units.

Students in the Criminal Defense Clinic will represent indigent criminal defendants in a wide range of misdemeanor cases in Santa Clara and San Mateo counties. Students will be California Bar Certified and thus will be bound by the rules and ethics of the profession, notably zealous advocacy on behalf of clients. Students will take the lead role in all aspects of case development, including interviewing clients and witnesses, investigating facts, developing case strategy, negotiating with the prosecutor, drafting and arguing motions, and trying cases before judges and juries. Common charges include drug possession, public order offenses, assault, theft, and weapons possession. While students will have primary responsibility for all aspects of their cases, all trial work will be closely supervised. In addition to casework, there will be weekly workshop sessions. These classes will focus both on case-rounds and on broader systemic issues. The goal of the clinic is to train students how to try a criminal case from beginning to end while engaging in thoughtful reflection on the role of the criminal defense attorney in the criminal justice system. While the work is often challenging and sometimes heartbreaking, it offers students a unique opportunity to put their skills, intellect and compassion to use by serving people in a moment of great need.

Elements used in grading: Class participation, attendance, written assignments and case work and professionalism.

Writing (W) credit is for 3Ls only.

LAW 409. Introduction to Intellectual Property. 4 Units.

This is an overview course covering the basics of intellectual property law -- trade secrets, patents, copyrights, and trademarks, as well as selected other state intellectual property rights. This course is designed both for those who are interested in pursuing IP as a career, and those who are looking only for a basic knowledge of the subject. There are no prerequisites, and a scientific background is not required. Elements used in grading: Class participation and final exam.

LAW 411. Directed Writing. 1-4 Unit.

Teams of students may earn "Directed Writing" credit for collaborative problems involving professional writing, such as briefs, proposed legislation or other legal writing. Only projects supervised by a member of the faculty (tenured, tenure-track, senior lecturer, or professor from practice) may qualify for Directed Writing credit. It will not necessarily be appropriate to require each member of the team to write the number of pages that would be required for an individual directed research project earning the number of credits that each team member will earn for the team project. The page length guidelines applicable to individual papers may be considered in determining the appropriate page length, but the faculty supervisor has discretion to make the final page-length determination.

Students must meet with the instructor frequently for the purposes of report and guidance. Unit credit is by arrangement. A petition will not be approved for work assigned or performed in a course, clinic, or externship for which the student has or will receive credit.

Special Instructions: A Directed Writing project may count as the equivalent of a "W" (Writing - For students entering prior to Autumn 2012) course with the approval of the supervising faculty member. A Directed Writing project may not count as the equivalent of a "PW" (Professional Writing - For students entering Autumn 2012 and thereafter) course.

LAW 413A. Obesity in Santa Clara County. 3 Units.

This course will develop obesity initiatives for Santa Clara County. Law, medical, and public policy students will work with representatives from the County Board of Supervisors to identify strategies for reducing child and adult obesity that the County can implement. A paper focusing on particular initiatives will be required. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis.

Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for contact information and submission deadline. Elements used in grading: Class Participation, Attendance, Final Paper.

LAW 413B. Election Administration and Reform. 2 Units.

Students in this policy lab will be conducting research on problems in administration that have plagued recent elections, as well as potential reform proposals. The areas of inquiry will include: wait times to vote, polling place location and management, poll worker recruitment and training, voting accessibility for uniformed and overseas voters, individuals with disabilities, limited English proficiency, voter rolls and poll books, voting machine capacity and technology, ballot simplicity and voter education, provisional ballots, absentee and early voting, and the adequacy of contingency plans for natural disasters and other emergencies that may disrupt elections. Students will be responsible for white papers on one or more of these issues, as well as creating bibliographies on these and related topics. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for contact information and submission deadline. Elements used in grading: Written Assignments.

LAW 413C. Improving Bone Marrow Donation Programs. 2-3 Units.

The National Bone Marrow Donation Program (NBMD) operates the Be the Match Registry. Individuals who register with Be the Match may be identified as potential donors of hematopoietic cells (most typically bone marrow) to patients facing life-threatening disorders such as leukemia, lymphoma, and aplastic anemia who do not have family members who are good matches to serve as donors. (Family members are appropriate for only 30% of patients needing these transplants.) The NBMD is considering whether the procedures that it uses to attract people to enroll as potential donors in the registry could be improved, and also wants to investigate the further possibility that the proportion of potential donors who actually donate cells once it is discovered that they are a match for a particular patient could be increased. Social psychologists here at Stanford are interested in working with the NBMD to examine some of the organization's practices, taking advantage of the sorts of social psychological insights often employed by those interested in marketing products or increasing charitable donations. There are questions, of course, about the efficacy of the techniques that they might recommend in terms of increasing ultimate donation levels, but there are also significant questions about whether some of the techniques might run afoul of existing legal regulation or pose other sorts of problems for the organization. Law students who choose to work on this practicum will almost surely work (in teams with other law students and in conjunction with social psychologists working on this issue and the NBMD) on the following issues: ¿ To what extent is it consonant with existing medical privacy law (or laws that the NBMD might press to adopt) to reveal personal information about donees to potential donors, assuming that donors are more likely to donate to those with whom they feel a greater personal connection? ¿ To what degree can NBMD simplify the process of registering potential donors without running afoul of current (or ideal) regulation protecting people against undergoing medical procedures in the absence of informed consent? ¿ What sorts of material incentives for donation, if any, are permissible under current (or ideal) law and what stance should the NBMD take on the use of material incentives? There may well be other related topics upon which students will work as well. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for contact information and submission deadline. Elements used in grading: Written Assignments, Class Participation, Group Work.

LAW 413D. Institutional and Legislative Copyright Reform. 2-3 Units.

The US Copyright Office has developed an ambitious agenda for legislative and institutional reform of the American copyright system, and the Register of Copyrights would like us to assist in researching and formulating policy on two of the more pressing projects on its agenda, at least one of which may be the subject of hearings before the House Judiciary Committee this fall. Students will be responsible for developing and implementing the research design; consulting regularly with Copyright Office personnel on development of policy proposals; and preparing a final report for presentation to the Copyright Office. This will require a student commitment to two quarters of work during the Fall and Winter Quarters. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. Elements used in grading: As agreed to by instructor. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

LAW 413E. Empirical Study of Patent Troll Litigation. 2 Units.

Many believe litigation by patent trolls—those in the business of asserting patents rather than making products—is rampant and has harmed innovation and raised consumer prices. This concern has spread to Congress and the U.S. Patent Office, which are considering new regulation of patent trolls. However, there remains insufficient data to determine the amount and impact of patent troll litigation. Students selected for this course will work with renowned patent law scholar Mark Lemley and Olin-Searle fellow Shawn Miller to produce the first patent litigation database to include comprehensive identification of the type of patent plaintiff involved in each lawsuit. Students' principal responsibility will be to identify and code patent plaintiffs by type. Though voluntary, Professor Lemley and Dr. Miller will encourage and aid students in utilizing this experience and the database for their own scholarly work. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. Elements used in grading: Class Participation, Attendance, Written Assignments. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

LAW 413F. Mediation Confidentiality and Attorney Malpractice in California. 2 Units.

The issue of confidentiality is central to contemporary mediation practice, yet raises significant public policy issues. The California Legislature has directed the California Law Revision Commission to analyze "the relationship under current law between mediation confidentiality and attorney malpractice and other misconduct and the purposes for, and impact of, those laws on public protection, professional ethics, attorney discipline, client rights, the willingness of parties to participate in voluntary and mandatory mediation, and the effectiveness of mediation, as well as any other issues that the Commission deems relevant," with an eye to making recommendations for revising relevant state law. California is a leader in the ADR domain and significant changes in its policies regarding mediation have the potential to affect mediation law in other state courts as well as the federal court system. In this practicum students will work collaboratively to assist Commission staff identify issues for research and analysis, conduct research and prepare policy memoranda for consideration of Commission staff. Elements used in grading: Class Participation, Attendance, Written Assignments. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors at dhensler@law.stanford.edu and janmartinez@law.stanford.edu. See Consent Application Form for submission deadline.

LAW 413G. Social Mobility In Higher Education. 2 Units.

The Mobility Project will explore ways to increase the representation at elite universities of high achieving students who are socioeconomically disadvantaged. Economically disadvantaged students are underrepresented at most selective colleges or universities. This despite the fact that in recent years a number of prominent universities (Stanford among them) have made their financial aid policies considerably more generous for students from lower income families. Recent research indicates that the pool of resource disadvantaged, high achieving high school students is much larger than commonly thought. Each year, there are more than 25,000 high school seniors from relatively low income families whose standardized test scores and grades place them in the top 4% of high school students, making it likely that they could be admitted to, receive financial aid from, and thrive at a selective institution. Yet many thousands of these talented students do not apply to any top tier college. Some do not even apply to any four year school. This failure in the matching of students to schools is socially significant. While higher education has long been a means of promoting mobility for individuals and across generations, the economic benefits of advanced education are even greater now than in past eras. Thus, it has become especially important that universities provide an avenue of advancement for talented students of all backgrounds. The Mobility Project is also timely given the likelihood of increasing restrictions on race-based affirmative action. Expanding access to elite colleges for economically disadvantaged students will also contribute to the racial diversity of those institutions. The group of low income, high achievers is more racially diverse (and more specifically, has a higher representation of African Americans and Latinos) than the group of high achieving students from affluent families. We will examine a variety of initiatives to increase the enrollment at elite universities of high achieving economically disadvantaged students. We hope to assemble a small interdisciplinary team of faculty and students from the Schools of Law, Education, and Humanities and Sciences to explore scalable interventions. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors at rbanks@law.stanford.edu and pprest@law.stanford.edu. See Consent Application Form for submission deadline.

LAW 413H. State Law Enforcement Access to Customer Records of Communication Companies. 2 Units.

If California Senate Bill SCR 54 is enacted, as seems likely, the California Law Revision Commission will be tasked with modernizing California statutory law on law enforcement access to customer records of cell phone providers, internet service providers, social media companies, and other mobile and internet-based communication providers. The Commission would like us to prepare a thorough and balanced background study of the relevant legal and policy concerns, including civil liberties, public safety, and the scope of federal preemption in the area, with an emphasis on new and emerging communication services. This is likely to be a high profile project, with close attention from the Legislature and many interest groups.

This project involves complex issues under the Fourth Amendment and such statutory structures as the Electronic Communications Privacy Act. Completion of the course in Criminal Investigation is a prerequisite, with exceptions only for those with demonstrable alternative background in Fourth Amendment law.

Elements used in grading: As agreed to by instructor

Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor at weisberg@stanford.edu. See Consent Application Form for submission deadline.

LAW 413I. Tax Regulatory Project. 3 Units.

The changing economic landscape places great stress on the tax legislative process. This stress is magnified by flaws in existing statutes, and by taxpayer attempts to exploit those flaws. There are no statutory rules governing hundreds of billions of dollars of annual transactions. Much of this void is filled in (imperfectly) by Treasury regulations. This practicum will take a close look at one or two issues raised by one proposed Treasury regulation. We will look at the relevant literature, talk to stakeholders, and (possibly) and in our individual names, provide public comments and testimony on the regulation.

Since the primary output will be a public (and therefore published in the leading tax journal, *Tax Notes*) comment, the course will offer Professional Writing (PW) credit.

Students with a research interest in this area that is aligned with the project can with permission of the professor write a paper that receives Research (R) credit. After the term begins, students accepted into the course can transfer from the PW section (01) to the R section (02) with consent of the instructor.

Elements used in grading: Class Participation, Written Assignments or Research Paper

Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor at jbankman@stanford.edu. See Consent Application Form for submission deadline.

LAW 413J. Court-Supervised Remediation of Complex Environmental Problems. 2 Units.

The Law School's Environmental Law Clinic is representing an environmental group in a lawsuit against the Monterey County Water Resources Agency. The suit asserts that the agency has been polluting both surface and ground waters in the Salinas River Valley and Elkhorn Slough by discharging pesticide-laden farm irrigation run-off in violation of California environmental laws. If the plaintiffs prevail, the appropriate injunctive relief is likely to be complex. Neither the precise dimensions of the problem nor those of the most effective interventions to remedy it are known. So, ideally, relief should combine adaptive flexibility for the agency, meaningful accountability to the plaintiffs and the public, and an opportunity for all parties to learn in the process of the implementation.

Policy Lab students will work with Professors Deborah Sivas (lead plaintiffs' counsel) and Bill Simon on some aspect of a possible remedial regime. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis.

Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline. Elements used in grading: Class Participation, Final Paper.

LAW 413K. Stream Flow Restoration Transactions. 2 Units.

Water in the West (a joint program of the Woods Institute and the Lane Center for the American West) is working with the National Fish and Wildlife Foundation (NFWF) on research related to water rights transactions that restore water to the environment. Rivers in the western United States are subject to significant water withdrawals that have had major impacts on the health of their ecosystems. In an effort to restore the health of such rivers, a number of conservation groups have begun to facilitate voluntary transactions to restore water to the environment, such as acquiring water rights and funding irrigation efficiency improvements. NFWF has extensive experience with these efforts through its funding of the Columbia Basin Water Transaction Program and implementation of the Walker Basin Restoration Program, and intends to expand its efforts to other parts of the West. It faces the challenge of deciding where to invest funds and resources in order to achieve the greatest conservation benefits for available dollars. Students in this policy lab will assist NFWF in the development of an assessment methodology for identifying and analyzing watersheds in the western United States as potential locations for expanding its efforts. Our work will focus on evaluating western states in terms of the extent to which they allow the transfer of water rights for environmental use and in terms of the regulatory, financial, and social hurdles such transactions face in each state. We will also analyze data related to stream flow alteration and work with NFWF to integrate this information into its broader assessment. Finally, we will work with NFWF staff to integrate our work into their broader assessment and help them begin to evaluate specific candidate watersheds.

Elements used in grading: As agreed to by instructor

Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor at leonsz@stanford.edu. See Consent Application Form for submission deadline.

LAW 413L. Advising Congress on Health Policy. 2 Units.

This policy lab will conduct research on national health policy problems for the Medicare Payment Advisory Commission, or MedPAC (MedPAC is an independent Congressional agency established by the Balanced Budget Act of 1997 to advise the U.S. Congress on issues affecting the Medicare program). Students will work in teams with lawyers and PhD economists from MedPAC, resident and fellow physicians from Stanford Hospital, and other students from throughout the University on one of two topics: nExpanding the healthcare workforce through reform of states' scope of practice regulation. This project will examine how changes in licensing rules governing health care providers' allowed scope of practice can accommodate the expansion of demand for health services due to the Affordable Care Act and other factors. Specific questions include: 1) Under existing state law, what additional tasks can non-physicians such as nurse practitioners, physician assistants, and pharmacists undertake that would reduce cost and/or improve quality? 2) What changes to state law might expand the allowed scope of practice of non-physicians that would reduce cost and/or improve quality? 3) What incentives might the federal government provide, either through Medicare or other means, to encourage states to reform optimally their scope of practice rules to reflect new available technologies? nDesigning antitrust policy to achieve the benefits of coordination and avoid the costs of consolidation. On one hand, closer links between physicians, hospitals, and other health care providers has the potential to reduce cost and improve quality by improving communication across care settings, avoiding wasteful duplication of effort, and reducing medical errors. On the other hand, consolidation may be used to exploit consumers by facilitating the exercise of health care providers' market power. This tension has become especially important due to incentives in the Affordable Care Act that encourage doctors and hospitals to join together in Accountable Care Organizations. This project will examine the following questions: 1) How can the U.S. Department of Justice and Federal Trade Commission use existing federal antitrust law to allow welfare-improving coordination while prohibiting welfare-reducing consolidation in ways that minimize costs of enforcement, including the legal uncertainty facing providers? 2) Can adoption of health-care-specific antitrust laws, such as those proposed or enacted in Massachusetts and California, effectively fill in the gaps in existing federal antitrust laws? 3) What incentives might the federal government provide, through design of reimbursement policies in the Medicare program, to complement federal and state antitrust laws? nConsent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline. Elements used in grading: Written Assignments, Final Paper. This course is cross-listed with HRP 222A and B.

LAW 413M. Stereotype Threat and Higher Education. 2 Units.

A large body of social psychological research has established the existence of stereotype threat--a worry that one might be viewed through the lens of a negative intellectual stereotype. This concern provokes anxiety and can undermine the academic performance of members of negatively stereotyped groups, underrepresented minority groups in particular. Stereotype threat acts like an intellectual headwind.nThis project will consider changes that colleges and universities institutions might undertake to reduce the effect of stereotype threat.nElements use in grading: Class Participation, Attendance, Written Assignments, Final Paper.nConsent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

LAW 413N. Court Online Mediation Service Practicum. 2 Units.

California is a leader in the ADR domain and significant changes in its policies regarding mediation have the potential to affect mediation law in other state courts as well as the federal court system. In this practicum students will work collaboratively to assist the San Mateo Superior Court develop and implement an online mediation process for the Small Claims and Family Law divisions. Students will work with the instructor, Court staff and Modria Inc. (a mediation software provider that is donating the technological platform we will be using), as well as other relevant stakeholders. The students will transform the off-line mediation process to an online flow (including procedural simplification and adaptation), creating the supporting legal and procedural educational materials for disputants and mediators, and developing an evaluation protocol to measure the success of the program and inform its future improvement. Special Instructions: Enrollment in Thinking Like a Policy Analyst (Law 444) strongly encouraged. Preference given to students who have taken LAW 615 Negotiation, LAW 613 Dispute System Design, LAW 545 ADR Law Policy & Practice, or demonstrate substantial equivalent coursework or experience in ADR, or law and technology. Students have the option to write papers for W or R credit. If the paper involves independent research, then it will be eligible for R credit. The instructor and student must agree whether the student will receive an R or a W. After the term begins, students accepted into the course can transfer from the W writing section (01) into section (02), which meets the R requirement, with consent of the instructor. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline. Elements used in grading: Class Participation, Attendance, Written Assignments.

LAW 4130. China's Solar Industry and its Global Implications. 2-3 Units.

China dominates and defines a growing global market for solar power. That market faces a stark dichotomy. Solar energy's prospects as a meaningful electricity source are increasingly bright. Yet, amid a global glut of solar panels, the future contours of the industry - the relative roles of leading players such as the United States and China - are increasingly unclear. Students in this seminar will analyze industry and policy data to assess China's competitive strengths in the global solar industry and, based on those conclusions, to suggest finance and policy approaches that the US and China each could adopt so that the two countries operate more strategically in an economically efficient global solar market - and, by extension, a globalizing market for cleaner sources of energy. This research will figure into a project on this theme underway at the Steyer-Taylor Center for Energy Policy and Finance. Course deliverables will vary among students and will be based on discussions at the start of the class between the instructors and the students. Some students will produce papers; others will develop and analyze key sets of data. Students from graduate programs around the university - the law school and others - are encouraged to apply. Preference will be given to those with demonstrated interest in energy finance and policy, particularly bearing on China, and with fluency in Mandarin, though neither is a firm requirement. Given that the Steyer-Taylor Center project will continue through the academic year, preference also will be given to students who intend to continue with the practicum in both the winter and spring quarters. Students have the option to write papers for W or R credit. If the paper involves independent research, then it will be eligible for R credit. The instructor and student must agree whether the student will receive an R or a W. After the term begins, students accepted into the course can transfer from the W writing section (01) into section (02), which meets the R requirement, with consent of the instructor. Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. Elements used in grading: Class Participation, Written Assignments or Paper. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

LAW 413P. Wildlife Trafficking: Stopping the Scourge. 2 Units.

This policy lab seminar will address the international wildlife trafficking crisis, with a focus on legal and policy tools that can help combat the scourge. The price of ivory on black markets has skyrocketed and elephant and rhino populations in Africa are being decimated. At current poaching rates, African elephants could be wiped out within 8 to 10 years. Trafficking also is hitting tigers, great apes, sharks and other important species. The seminar will key into the President's recent Executive Order on this subject (E.O. 13658, issued on July 1, 2013) and related international efforts to reduce the killing in host countries, the transshipment of poached materials, and consumer demand for ivory and other wildlife parts. The seminar will address US laws and their role in addressing trade in wildlife parts. It also will undertake a comparative review of the legal structures in relevant African and Asian nations, and the potential role of the international endangered species treaty (CITES) and transnational enforcement efforts in cracking down on ivory and other wildlife-related trafficking. The seminar will review prior poaching crises, including the elephant/ivory crisis in the late 1980s, and evaluate why the strategies that reduced killings in the 1990s are no longer successful. Based on these analyses, the class will develop and submit recommendations for reforms to US, African, and international laws and practices to two groups established under the Executive Order: (1) the President's Wildlife Trafficking Task Force, which is chaired by the Secretaries of State and Interior and the Attorney General; and (2) the Wildlife Trafficking Advisory Council, which is composed of outside experts who are advising the Task Force. (Professor Hayes is an appointed member of the Advisory Council.) Students may normally receive no more than four units for a Policy Lab practicum and no more than a total of eight units of Policy Lab practicums and Directed Research projects combined may be counted toward graduation unless additional units for graduation are approved in advanced by the Petitions Committee. A student cannot receive a letter grade for more than eight units of independent research (Policy Lab practicum, Directed Research, Senior Thesis, and/or Research Track). Any units taken in excess of eight will be graded on a mandatory pass basis. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

LAW 417. Advanced Criminal Law and Public Policy: A Research Practicum. 3 Units.

This course will provide students with a rare opportunity to engage in real-world crime policy analysis, both as a way to use some of the skills they have learned in previous SLS courses, as well as to help them learn about the political and practical issues involved in constructing public policies. Students will work with a "client" agency or organization in the crime policy sector to carry out a policy-related research and analysis project. We will organize ourselves as a provisional policy think-tank or, if you prefer, a makeshift policy institute or short-term consulting group. As such, this practice-oriented course has both learning and real-world policy reform goals, which makes this course unique within SLS and, I hope, refreshing and compelling. Students will learn how to: Identify and analyze empirical data for policy purposes; develop evidence-based policy proposals; interact with high-level policymakers around politically sensitive issues; and effectively prepare a policy brief and deliver a formal presentation to high-level government officials.

LAW 418. Advanced Criminal Defense Clinic. 2-7 Units.

Advanced clinic allows students who have taken the Criminal Defense Clinic to continue working on cases. Participation in case rounds is required. Advanced clinic may be taken for 2-7 units. Students may not enroll in any clinic (basic or advanced) which would result in them earning more than 27 clinical credits during their law school career. Students must have taken Criminal Defense Clinic (Law 408). Elements used in grading: Class participation, attendance, written assignments and case work. Writing (w) credit is for 3Ls only.

LAW 419. Three Strikes Project: Criminal Justice Reform & Individual Representation. 3 Units.

This seminar offers a unique opportunity to study criminal justice reform in real time. California's Three Strikes and You're Out sentencing law is one of the most infamous criminal laws in America. Last year, California voters enacted an overhaul of the recidivist sentencing law (Proposition 36) prompted by work conducted by SLS students enrolled in the Three Strikes Project. In this seminar, students will read and discuss a variety of cases and articles, examining the evolution of the Three Strikes statute as a case study in the history, politics, practical considerations and legal regulation of sentencing in the United States. In addition to studying the law, students will have an opportunity to test their skills in the field, assisting in the representation of inmates currently serving life sentences under the Three Strikes law and hoping to win release under Prop. 36. Students will visit the client in prison, conduct factual investigation in the field, and draft petitions on the client's behalf. Students will also contribute to ongoing policy work to ensure the effective implementation of Prop. 36. The Three Strikes Project is an ongoing, fast-paced organization that depends on the hard work and contributions of law students enrolled in the seminar. This course offers the opportunity to both study the theory behind the law, and to hone practical litigation and advocacy skills in and out of the courtroom. The seminar will meet for 3 hours per week. Students will also meet for 1 hour individually and in teams with Project director Mike Romano each week to discuss their work on their projects. This class may be repeated for credit one time, with consent of instructor. Consent Application: Interested students must apply to enroll in the seminar by sending a one-page statement of interest and resume to Mike Romano (mromano@stanford.edu). Applications will be considered on a rolling basis.

LAW 423. Advanced Supreme Court Litigation Clinic. 2-7 Units.

The Advanced Supreme Court Litigation Clinic provides an opportunity for students who have already successfully completed the Supreme Court Litigation Clinic to continue their work in the Clinic. Work includes research and drafting petitions for certiorari and oppositions, merits briefs, and amicus briefs, compiling joint appendices, and preparing advocates for oral argument, as well as commenting on drafts of briefs being filed by lawyers in other cases. Advanced students will also continue to participate in the Clinic's discussion of cases during case rounds. For a more elaborate description of the clinic's content, see the course description for Course Number 436-0-01. Special instructions: Admission is by consent of instructor. Advanced students may arrange with the instructor to receive between two and seven units. No student may receive more than 27 overall clinical credits, however, during the course of the student's law school career. Students have the option to receive R credit upon instructor approval. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Projects and participation. Writing (W) credit is for 3Ls only.

LAW 424. Secured Credit. 3 Units.

This course surveys the law of raising funds by granting security interests in personal property. Security interests affect the creditor's rights if the debtor is unable to repay the loan; as a result, they significantly affect the terms on which capital can be raised. They affect industries ranging from traditional manufacturing to high tech start-ups; they also play a role in consumer loans (and help explain the movie "Repo Man"). The course focuses primarily on Article 9 of the Uniform Commercial Code, but also considers the federal Bankruptcy Code, the federal intellectual property statutes, and other state and federal laws. Bankruptcy is the first of three courses (the other two are Secured Credit and Payment Systems) dealing with the financing of commercial ventures through means other than the sale of corporate stock. These courses may be taken in any order: neither presupposes any knowledge of the others. Students who cannot take all three should probably prioritize them in the order they are listed—that is, Bankruptcy is the single most important course to take, then Secured Credit, then Payment Systems. Elements used in grading: Final exam.

LAW 425. Statutory Interpretation. 3 Units.

Statutory law is the dominant source of contemporary law, and it is the form of law that lawyers are likely to confront most often in almost any area of practice. It is also an area of vibrant intellectual debate, as scholars, Supreme Court justices, and others debate the methods and aims of statutory interpretation. This course will stress both the practical and theoretical dimensions of interpretation. Students will learn and apply the methods of statutory interpretation. We will also spend considerable time on contemporary controversies, such as debates about textualist, purposive and dynamic interpretation; about the use of legislative history and canons of construction; about the special interpretive problems that arise in the context of direct democracy; and about the democratic and constitutional foundations of statutory interpretation itself. Readings will draw from political science as well as law. Elements used in grading: Class participation and final exam.

LAW 427. Local Government Law. 3 Units.

This course will examine the source, scope and limits of local government power. It will consider the relationship of local governments to state and federal government and of the relationship of local governments to the individuals and communities within and around them. Specific themes will include the potential of local governments to be responsive democratic communities, the potential of local governments to become isolated or exclusive enclaves, and the effect of local governments on the metropolitan political economy. Using the casebook *Local Government Law* by Frug, Ford and Barron, the course will examine state and federal doctrine that affects local government, political/ social theory and urban planning/ development literature. Open to first-year Law School students with prior instructor approval. Special Instructions: Students may write papers in lieu of the final exam. Upon instructor consent, students interested in writing should enroll in Law 427-0-02. Students who do not receive a spot in section 02 may enroll in section 01. Elements used in grading: Exam or paper and class participation.

LAW 430. Trusts and Estates. 2 Units.

This survey course will cover issues related to: intestacy; will execution and revocation; will provisions and interpretations; restrictions on the right to devise; probate; creation of trusts; revocable and irrevocable trusts; trust provisions; charitable trusts; trust administration; and substitutes and conservatorships. Elements used in grading: Exam.

LAW 432. Hot Topics on Major Federal Environmental Statutory Schemes. 2-3 Units.

This workshop seminar will provide students with the opportunity to examine and critique cutting-edge research and work in the field of environment, energy, and natural resources. Although it is open to all students, the seminar is designed especially for those with an interest in the field who wish to stay abreast of current issues, work, and ideas. In each class, an academic expert, policy maker, or practitioner will present their current research or work and engage in a robust discussion. Special Instructions: Grades will be based on class participation and; Option 1 (Section 01, 2 units) - You will receive a course credit if you choose to write reflection/discussion papers. Grading for this option is Mandatory P/R/F. Option 2 (Section 02 or 03, 2-3 units) - Students will have the option, to write reflection/discussion papers and a longer paper for Research (R) credit or Writing (W) credit, with consent of the instructor. If the longer paper involves independent research, then it is eligible for "R" credit. The instructor and student must agree whether the student will receive "R" credit or "W" credit. Students approved for "R" credit will be enrolled in Section 02 for 2-3 units depending on paper length, student approved for "W" credit will be enrolled in Section 03 for 2 units. Writing (W) credit for 3Ls only. Grading for this option is H/P/R/F. Elements used in grading: (1) Class participation and reflection/discussion papers (2) Class participation, reflection/discussion papers and longer papers for Writing/ Research students.

LAW 434. Contract Design: Principles and Practice. 2 Units.

Although transaction lawyers spend much time drafting contracts and related documents, they can contribute very significant value by designing transactions. Transactions should be tailored to the goals and circumstances of each set of parties, but there are some general principles that can guide the design process. This seminar examines some of these principles: such as the use of embedded options in contracts, of third parties, and of tailored procedures for dispute resolution and enforcement. Some of the readings and discussion will be at a fairly high level of abstraction, drawing on economic and sociological theories of contracting. The rest will closer to ground level, looking at particular types of transactions, such as franchising, construction, joint ventures, or start-up financing. We will also look at the process of innovation in contract design, including the role of lawyers and digital document production. Students will be required to write paper for the seminar, and encouraged to focus on a specific type of transaction. Elements used in grading: Paper.

LAW 436A. Supreme Court Litigation Clinic: Clinical Practice. 4 Units.

The Supreme Court Litigation Clinic will expose students to the joys and frustrations of litigation before the Supreme Court of the United States. The bulk of the clinic will be run as a small law firm working on live cases before the Court. Students will participate in drafting petitions for certiorari and oppositions, merits briefs, and amicus briefs, compiling joint appendices, and preparing advocates for oral argument, as well as commenting (the technical term is "kibbitzing") on drafts of briefs being filed by lawyers in other cases. The precise nature of the cases will depend on the Court's docket, but in recent Terms, the clinic's cases have involved federal criminal law and procedure, habeas corpus, constitutional and statutory antidiscrimination and employment law, bankruptcy law, and the First Amendment. Our aim is to involve students as fully as possible in this type of litigation. The Clinic begins with an intensive introduction to the distinctive nature of Supreme Court practice, including the key differences between merits arguments and the certiorari process, the role of amicus briefs, and the Supreme Court Rules. After that, seminar meetings will be devoted primarily to collaborative work on the cases the clinic is handling. While students will be primarily responsible for working in teams on one case at a time, they will also be expected to acquire familiarity with the issues raised in other students' cases and will both edit each others' substantive work and assist each other and the instructors with the technical production work attendant on filing briefs with the Supreme Court. The course will involve substantial amounts of legal research. The Supreme Court operates on a tight, and unyielding deadline, and students must be prepared both to complete their own work in a timely fashion and to assist one another and the instructors on other cases. The instructors will not ask students to do any kind of "grunt work" that they themselves will not also be handling, but grunt work there will be: proofreading, cite-checking, dealing with the joint appendix, and the like. The nature of the work product means that while students will average thirty hours per week on their case-related work, that work will surely be distributed unevenly across the quarter. Unlike most other courts, the Supreme Court has no student practice rules. Thus, students will not be able to argue cases before the Court. But they will participate in moot courts on their cases, as both advocates and Justices. Each student will also have the opportunity to travel to Washington to see the Court in session, preferably with respect to a case on which the student has worked. Ideally students will already have experience with persuasive doctrinal writing, through a course like Federal Pretrial Litigation or through intensive supervision during their summer jobs or other clinics. Admission to the Clinic is by consent of the instructors. Students will need to submit a writing sample that reflects their facility with doctrinal legal arguments and the name of at least one reference who can comment on their legal analytic ability. Special instructions: General Structure of Clinical Courses The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter

LAW 436B. Supreme Court Litigation Clinic: Clinical Methods. 4 Units.

The Supreme Court Litigation Clinic will expose students to the joys and frustrations of litigation before the Supreme Court of the United States. The bulk of the clinic will be run as a small law firm working on live cases before the Court. Students will participate in drafting petitions for certiorari and oppositions, merits briefs, and amicus briefs, compiling joint appendices, and preparing advocates for oral argument, as well as commenting (the technical term is "kibbitzing") on drafts of briefs being filed by lawyers in other cases. The precise nature of the cases will depend on the Court's docket, but in recent Terms, the clinic's cases have involved federal criminal law and procedure, habeas corpus, constitutional and statutory antidiscrimination and employment law, bankruptcy law, and the First Amendment. Our aim is to involve students as fully as possible in this type of litigation. The Clinic begins with an intensive introduction to the distinctive nature of Supreme Court practice, including the key differences between merits arguments and the certiorari process, the role of amicus briefs, and the Supreme Court Rules. After that, seminar meetings will be devoted primarily to collaborative work on the cases the clinic is handling. While students will be primarily responsible for working in teams on one case at a time, they will also be expected to acquire familiarity with the issues raised in other students' cases and will both edit each others' substantive work and assist each other and the instructors with the technical production work attendant on filing briefs with the Supreme Court. The course will involve substantial amounts of legal research. The Supreme Court operates on a tight, and unyielding deadline, and students must be prepared both to complete their own work in a timely fashion and to assist one another and the instructors on other cases. The instructors will not ask students to do any kind of "grunt work" that they themselves will not also be handling, but grunt work there will be: proofreading, cite-checking, dealing with the joint appendix, and the like. The nature of the work product means that while students will average thirty hours per week on their case-related work, that work will surely be distributed unevenly across the quarter. Unlike most other courts, the Supreme Court has no student practice rules. Thus, students will not be able to argue cases before the Court. But they will participate in moot courts on their cases, as both advocates and Justices. Each student will also have the opportunity to travel to Washington to see the Court in session, preferably with respect to a case on which the student has worked. Ideally students will already have experience with persuasive doctrinal writing, through a course like Federal Pretrial Litigation or through intensive supervision during their summer jobs or other clinics. Admission to the Clinic is by consent of the instructors. Students will need to submit a writing sample that reflects their facility with doctrinal legal arguments and the name of at least one reference who can comment on their legal analytic ability. Special instructions: nGeneral Structure of Clinical CoursesnThe Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. nStudents enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. nClinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. nThe work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter

LAW 436C. Supreme Court Litigation Clinic: Clinical Coursework. 4 Units.

The Supreme Court Litigation Clinic will expose students to the joys and frustrations of litigation before the Supreme Court of the United States. The bulk of the clinic will be run as a small law firm working on live cases before the Court. Students will participate in drafting petitions for certiorari and oppositions, merits briefs, and amicus briefs, compiling joint appendices, and preparing advocates for oral argument, as well as commenting (the technical term is "kibbitzing") on drafts of briefs being filed by lawyers in other cases. The precise nature of the cases will depend on the Court's docket, but in recent Terms, the clinic's cases have involved federal criminal law and procedure, habeas corpus, constitutional and statutory antidiscrimination and employment law, bankruptcy law, and the First Amendment. Our aim is to involve students as fully as possible in this type of litigation. The Clinic begins with an intensive introduction to the distinctive nature of Supreme Court practice, including the key differences between merits arguments and the certiorari process, the role of amicus briefs, and the Supreme Court Rules. After that, seminar meetings will be devoted primarily to collaborative work on the cases the clinic is handling. While students will be primarily responsible for working in teams on one case at a time, they will also be expected to acquire familiarity with the issues raised in other students' cases and will both edit each others' substantive work and assist each other and the instructors with the technical production work attendant on filing briefs with the Supreme Court. The course will involve substantial amounts of legal research. The Supreme Court operates on a tight, and unyielding deadline, and students must be prepared both to complete their own work in a timely fashion and to assist one another and the instructors on other cases. The instructors will not ask students to do any kind of "grunt work" that they themselves will not also be handling, but grunt work there will be: proofreading, cite-checking, dealing with the joint appendix, and the like. The nature of the work product means that while students will average thirty hours per week on their case-related work, that work will surely be distributed unevenly across the quarter. Unlike most other courts, the Supreme Court has no student practice rules. Thus, students will not be able to argue cases before the Court. But they will participate in moot courts on their cases, as both advocates and Justices. Each student will also have the opportunity to travel to Washington to see the Court in session, preferably with respect to a case on which the student has worked. Ideally students will already have experience with persuasive doctrinal writing, through a course like Federal Pretrial Litigation or through intensive supervision during their summer jobs or other clinics. Admission to the Clinic is by consent of the instructors. Students will need to submit a writing sample that reflects their facility with doctrinal legal arguments and the name of at least one reference who can comment on their legal analytic ability. Special instructions: nGeneral Structure of Clinical CoursesnThe Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. nStudents enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. nClinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. nThe work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter

LAW 437. Water Law and Policy. 3 Units.

This course will study how society allocates and protects its most crucial natural resource -- water. The emphasis will be on current legal and policy debates, although we will also examine the history of water development and politics in the United States. Among the many issues that we will consider are: alternative means of responding to the growing worldwide demand for water; the appropriate role for the market and private companies in meeting society's water needs; protection of threatened groundwater resources; environmental limits on water development (including the Endangered Species Act and the "public trust" doctrine); Indian water rights; and interstate and international disputes over water. Students will be expected to participate actively in classroom discussions. Elements Used in Grading: Class participation, attendance and final exam.

LAW 439. Democracy and Incarceration. 2 Units.

This course will consider the breadth and limitations of democracy within the lens of American incarceration. In particular, we'll consider how various entities (the court, juries, the legislature, or the populace) are empowered with decision-making within the framework of the criminal justice system. Our central question will be: How does it and how should the democratic process affect the criminal justice system? Classes will cover the following topics and more: theories of punishment; the judiciary and discretion in sentencing; jury nullification and clemency; districting and political representation; felon disenfranchisement, ballot initiatives; mental health law, privacy and prisons; prisons in China, death penalty jurisprudence; and the privatization of prisons. Each student will be responsible for leading one three-hour class at San Quentin State Prison to a blended class of Stanford and prisoner students. Students will be also be expected to write weekly reflection papers in response to the assigned reading and to attend and participate heavily in each class discussion. In addition, attendance at a training held by the Prison University Project is mandatory.

LAW 444. Thinking Like a Policy Analyst: Introduction to Policy Analysis. 2 Units.

This seminar is designed primarily for students working on Policy Lab projects, but will be open to other students as well subject to a total enrollment of 15 students. It will be offered both the Autumn and Winter quarters during 2013-14, with any individual student eligible to enroll only in one quarter. You already know how to think like a lawyer, but if you are interested in policymaking, policy advocacy or policy research, whether in the public, nonprofit, or corporate sector, you need to know how to think like a policy analyst as well. This seminar, designed primarily for students beginning or continuing in Policy Lab practicums, has three purposes. First, it introduces students to the ways in which policy analysts approach public policy problems and controversies, focusing on perspectives that distinguish policy analysis from traditional legal analysis. Second, it introduces students to the tools of policy analysis, including approaches to collecting and analyzing information. Third, it provides hand-on lessons on communicating with policy makers orally and in writing. There is no text for the course. Readings for the course will include examples of policy analyses conducted to inform public policymaking. Students engaged in policy practicums will use their practicum experience as a basis for assessing the value of various policy analytic perspectives and research approaches. Students not engaged in policy practicums will pick a policy problem they are interested in and develop a plan for conducting a policy analysis relevant to this problem. Elements used in grading (Autumn): Attendance, class participation, three short reflection papers. Elements used in grading (Winter): Course paper and class participation. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

LAW 447. Communications Law: Broadcast and Cable Television. 3 Units.

Most people watch television on a regular basis (although not necessarily on TV). Television entertains, delivers the news, and provides an important forum for debating political issues. Focusing on communications law and first amendment law, the course will discuss how and why regulation shapes what we see on TV, and how it attempts to ensure that television can fulfill its functions for society. For example, why is cable television so expensive? Why can comedians swear on cable TV, but not on broadcast TV? Should regulators care as much about violence as they do about indecency? Can we trust the market to give the audience what it wants? Will the market provide content that is in the public interest, such as local news or educational programming, or do regulators need to intervene? Should we care if media outlets are increasingly owned by a few small conglomerates? And how does the Internet affect the need for ownership regulation? The course mostly focuses on the U.S., but highlights developments elsewhere where appropriate. Special instructions: Students may take Communications Law: Internet and Telephony and Communications Law: Broadcast and Cable Television in any order (neither is a prerequisite for the other). There are no prerequisites for this course. No technical background is required. Elements used in grading: Class participation, attendance, final exam.

LAW 448. Contemporary Issues in Constitutional Law. 2 Units.

This is an advanced constitutional law seminar for students who have already taken the introductory Constitutional Law course. The seminar will provide an opportunity for in-depth discussion of competing theories of constitutional interpretation, the role of the Supreme Court in our political system, and analysis of judicial behavior. Each week, these themes will be examined through the lens of a current "hot topic" in constitutional law - for example, the Affordable Care Act, affirmative action, the Second Amendment, the death penalty, executive power in the war on terrorism, campaign finance, immigration, same-sex marriage, and other topics. This is not a "spectator" class; all students will be expected to participate actively in class discussion each week. This is a good seminar for students interested in clerking or pursuing academia.

LAW 451. European Union Law. 2-3 Units.

The U.S. and the European Union (which comprises 28 European states and 500 million people) have the largest bilateral trade relationship in the world. About 60% of the world's GDP is generated on the Transatlantic Marketplace. U.S. companies rely on the EU market for more than half of their global foreign profits. In the last ten years, several proposed mergers between U.S. companies have been killed solely by the EU antitrust authorities, although approved by the U.S. antitrust regulators. In recent years, this has tremendously heightened the need for a sound understanding of the legal system of the EU, especially for business and technology lawyers. Elements used in grading: Class participation, writing assignments and papers. This course is open to first-year Law School students. Writing (W) credit is for 3Ls only.

LAW 453A. State-Building and the Rule of Law Workshop: Advanced. 3 Units.

The Advanced Workshop on State-Building and the Rule of Law builds on the State-Building and Rule of Law Seminar offered in the fall quarter. Enrollment is by consent and limited to three groups of students who began their work in the fall quarter, on the Afghanistan Legal Education Project (ALEP), the Bhutan Law and Policy Project (BLPP), the Timor Leste Legal Education Project (TLLEP), or the Iraq Legal Education Initiative (ILEI). The Afghanistan group will write textbooks and create other written products, to build out the curriculum for a full Bachelor of Laws program at the American University of Afghanistan. The Bhutan group will write legal textbooks to be used by the Royal Law Project, to train Bhutanese lawyers on the laws of their home country. The Timor Leste group will write textbooks at the request for use at the National Law School of Timor Leste and the judicial training center. The Iraq group will write textbooks and materials to begin the process of building out a law program at the American University of Iraq, Sulaimani. Elements used in grading: Active participation in group meetings to address project needs as well as production of written products outlined above. Automatic grading penalty waived for writers. Writing (W) credit is for 3Ls only. Same as: ALEP.

LAW 453B. State-Building and the Rule of Law Workshop: Advanced. 3 Units.

The Advanced Workshop on State-Building and the Rule of Law builds on the State-Building and Rule of Law Seminar offered in the fall quarter. Enrollment is by consent and limited to three groups of students who began their work in the fall quarter, on the Afghanistan Legal Education Project (ALEP), the Bhutan Law and Policy Project (BLPP), the Timor Leste Legal Education Project (TLLEP), or the Iraq Legal Education Initiative (ILEI). The Afghanistan group will write textbooks and create other written products, to build out the curriculum for a full Bachelor of Laws program at the American University of Afghanistan. The Bhutan group will write legal textbooks to be used by the Royal Law Project, to train Bhutanese lawyers on the laws of their home country. The Timor Leste group will write textbooks at the request for use at the National Law School of Timor Leste and the judicial training center. The Iraq group will write textbooks and materials to begin the process of building out a law program at the American University of Iraq, Sulaimani. Elements used in grading: Active participation in group meetings to address project needs as well as production of written products outlined above. Automatic grading penalty waived for writers. Writing (W) credit is for 3Ls only. Same as: BLPP.

LAW 453C. State-Building and the Rule of Law Workshop: Advanced. 3 Units.

The Advanced Workshop on State-Building and the Rule of Law builds on the State-Building and Rule of Law Seminar offered in the fall quarter. Enrollment is by consent and limited to three groups of students who began their work in the fall quarter, on the Afghanistan Legal Education Project (ALEP), the Bhutan Law and Policy Project (BLPP), the Timor Leste Legal Education Project (TLLEP), or the Iraq Legal Education Initiative (ILEI). The Afghanistan group will write textbooks and create other written products, to build out the curriculum for a full Bachelor of Laws program at the American University of Afghanistan. The Bhutan group will write legal textbooks to be used by the Royal Law Project, to train Bhutanese lawyers on the laws of their home country. The Timor Leste group will write textbooks at the request for use at the National Law School of Timor Leste and the judicial training center. The Iraq group will write textbooks and materials to begin the process of building out a law program at the American University of Iraq, Sulaimani. Elements used in grading: Active participation in group meetings to address project needs as well as production of written products outlined above. Automatic grading penalty waived for writers. Writing (W) credit is for 3Ls only. Same as: TLLEP.

LAW 453D. State-Building and the Rule of Law Workshop: Advanced. 3 Units.

The Advanced Workshop on State-Building and the Rule of Law builds on the State-Building and Rule of Law Seminar offered in the fall quarter. Enrollment is by consent and limited to three groups of students who began their work in the fall quarter, on the Afghanistan Legal Education Project (ALEP), the Bhutan Law and Policy Project (BLPP), the Timor Leste Legal Education Project (TLLEP), or the Iraq Legal Education Initiative (ILEI). The Afghanistan group will write textbooks and create other written products, to build out the curriculum for a full Bachelor of Laws program at the American University of Afghanistan. The Bhutan group will write legal textbooks to be used by the Royal Law Project, to train Bhutanese lawyers on the laws of their home country. The Timor Leste group will write textbooks at the request for use at the National Law School of Timor Leste and the judicial training center. The Iraq group will write textbooks and materials to begin the process of building out a law program at the American University of Iraq, Sulaimani. Elements used in grading: Active participation in group meetings to address project needs as well as production of written products outlined above. Automatic grading penalty waived for writers. Writing (W) credit is for 3Ls only. Same as: ILEI.

LAW 455. Energy Law. 3 Units.

The supply of a reliable, low-cost, clean energy supply for the United States is a key determinant of current and future prosperity. Perhaps as a result, electricity suppliers are among the most heavily regulated of large firms. This regulation is composed of a complex patchwork of overlapping state and federal jurisdiction that has and is evolved to meet emerging challenges to the energy system. In this course, students will acquire a basic understanding of the law of rate based regulation of monopolies. We will then examine the history of natural gas regulation in the United States, concluding with restructuring and the introduction of market competition into transmission of natural gas. Next, we will cover the basics of the electricity system, including consumer demand, grid operations, and power plant technologies and economics. We will then revisit cost of service rate regulation as it has been applied in the electricity context. We will then focus on various attempts at reform of both rate-regulated and wholesale market-based structures. In particular, we will examine various attempts to introduce market competition into various aspects of the industry and to strengthen incentives for utility investment in energy efficiency. Finally, students will examine various approaches to subsidization of renewable energy. Throughout, the course will focus on the sometimes cooperative, sometimes competing, but ever evolving federal and state roles in regulating the supply of electric power. Students will write two 1000 word response papers to questions related to readings and outside speakers in addition to taking a final exam. Elements used in grading: Class participation (20%), written assignments (40%), and final exam (40%). This course is open to first-year Law School students.

LAW 458. Food and Drug Administration. 3 Units.

(Same as HRP 209). This course will examine the Food and Drug Administration. It will focus largely on the FDA's regulation of drugs and biologics, but will also cover its regulation of medical devices, nutritional supplements, and, to some extent, its jurisdiction over food, legal, social, and ethical issues arising from advances in the biosciences. The class is open to all law or medical students. Graduate students may be admitted from other parts of the University by consent of the instructor. Substantial class attendance is required; in addition, the quality of class participation will play a small role in grading.

LAW 465. Venture Capital I. 3 Units.

This course introduces the operation of the venture capital industry from both a theoretical and practical perspective. The course follows the start-up process from initial formation of a new High-Tech venture through its private capitalization, the navigation of typical operational or strategic hurdles/milestones, and potential exit through merger or initial public offering. It analyzes each step in the process from perspective of the entity, of the founder-employees, and of the venture backers. It also considers the incentive mechanisms and control structures used at each step of the transaction (and alternatives to these structures), with a focus on both the underlying economic and financial theory, as well as on pragmatic considerations in structuring the transactions. Students are required to complete a term sheet negotiation exercise, offer a written analysis (in short pieces) related to speaker perspectives concerning the venture capital process, and sit for an examination. Speakers include visitors from practice with extensive experience in the VC, M&A, and the business formation process. nSpecial Instructions: QM: Finance (Law 467) (or a modest background in financial analysis) is a prerequisite for this class.nElements used in grading: Class assignments and final exam.

LAW 467. Quantitative Methods: Finance. 2 Units.

This course covers some of the central ideas in modern finance with a particular focus on the time value of money. Topics include present value and future value analysis, discounting, net present value, "IRR", bond valuations, and a critique of other project valuation methods. Along with a brief overview of "market fundamentals" and an introduction to the vocabulary of modern "popular finance" (as found in such publications as the Wall Street Journal), additional topics will include diversification, the risk-return trade-off, portfolio performance measurement, and market efficiency. Issues of arbitrage and tax considerations will be considered as time allows. Each topic is introduced with an emphasis on applications in legal settings. nThe course is intended to provide students with very little or no background in finance with the essential vocabulary, tools, and insights to spot "finance related issues" in various legal practice areas. The problem sets, class discussions, and applied hypotheticals should allow students to develop the skills necessary to ask the right questions when confronted with problems that involve elements of modern finance. nSpecial Instructions: You are expected to have little or no background in finance or related areas prior to taking this course. Required math skills are very modest (low-level high school algebra, at most) and students will rely mainly on the use of Excel and/or financial calculators for simple calculations.nElements used in grading: Class participation, written assignments and final exam.nThis course is open to first-year Law School students.

LAW 468. Statistical Inference in Law. 3 Units.

Drawing an inference from quantitative evidence lies at the heart of many legal and policy decisions. This course provides the tools, concepts, and framework for lawyers to become sophisticated consumers of quantitative evidence and social science. Unlike traditional statistics courses, it will be taught using substantive case law as a springboard for considering quantitative evidence. No background, beyond high school algebra, is assumed. Elements Used in Grading: Class participation, attendance, assignments, final paper.

LAW 471. Constitutional Law: Freedom of Speech. 3 Units.

A survey of First Amendment law, including a close study of text, the drafting and ratification process, and the development of modern First Amendment theory. The course will explore the multiple participants in the speech process, including the speaker, hearer, publisher, target and regulator, and ask why the law favors certain participants over others. The evolution of Supreme Court case law will be analyzed historically, with special emphasis on the relationship between free speech and democracy.

LAW 472. Externship Companion Seminar. 2 Units.

The practice of public interest law - whether in the criminal or civil context or a government or non-profit setting - requires an attorney to consider a host of issues distinct from one in private practice. How should decisions be made about priorities with limited resources? Where an organization has a broad social justice mission, where does litigation on behalf of individual clients or a group of clients fit in? Prior to initiating litigation or advancing a defense, what quantum of evidence should an attorney require? What role, if any, should an attorney's personal beliefs play in a course of representation? Through directed supervision of their externships in prosecutors', public defenders' or civil non-profit and government offices, as well as participation in weekly seminars, students will evaluate such questions in the context of their practical experience. Students are required to write weekly reflection papers of 3 to 5 pages and a 15 page paper at the end of the course.nElements used in grading: Attendance, class participation, weekly reflection papers and final reflection paper.

LAW 473. Externship, Special Circumstances. 12 Units.

Following approval of a student's application, the Special Circumstances Externship Program (SCEP) allows second and third year students to work for credit for one quarter in non profit, public interest, public policy, and government agencies outside of the Bay Area. (See Law 474 and Law 475). Standards for approval of a SCEP placement are similar to those for Directed Research proposals, although they are higher. Because there is a preference for local civil and criminal SEP placements, your SCEP proposal must explain (a) how it meets the goals of the externship program; and (b) why a similar project cannot be accomplished in one of the placements offered in the Bay Area. SCEP placements outside the Bay Area must be full-time. Students wishing to undertake a SCEP placement must concurrently participate in either (1) the Externship Companion Seminar (see Law 472) via remote technology or (2) obtain the supervision of a faculty member who will oversee their externship and an accompanying tutorial. For a full description of the SCEP, students should read the Externship Handbook, which is available from the Levin Center for Public Service and Public Interest Law or online at: <http://www.law.stanford.edu/program/centers/pip/externship/>. Students wishing to enroll in an externship must meet the various requirements that are set out in the Handbook. Interested students should speak to Betsy de la Vega, Lecturer in Law and Director of Externship and Pro Bono Programs at delavega@law.stanford.edu. Grading Elements used: Full participation and attendance, satisfactory evaluation by field placement supervisor, weekly reflection papers of three to five pages, and a final reflection paper of no less than 15 pages.

LAW 473X. "U.S. SEC Law Student Observer Program and Securities Regulation Seminar". 3 Units.

The U.S. SEC, Law Student Observer Program, is a one-semester volunteer/for-credit externship position offered to current law students selected by representatives of the SEC. The program provides exposure to the workings of the SEC and to the regulation of securities markets. Students are assigned to work with SEC staff members on a broad range of projects, including the investigation of industry and issuer practices, litigation of civil enforcement actions, and the drafting of proposed statutes and rules. In addition to working 40-hour weeks, students attend a weekly securities regulation seminar that includes lectures by SEC Commissioners and senior staff, and prominent members of the private bar. The topics for discussion at this seminar are chosen to complement the materials covered in basic securities regulation courses offered at the participating law schools.

LAW 474. Externship, Civil Law. 5-12 Units.

Following approval of a student's application, the Civil Standard Externship Program (SEP) allows second and third year students to obtain academic credit for externing in select non-profit public interest, public policy, and government agencies in the Bay Area for one quarter. The Civil SEP allows students to (a) gain experience in a field where a clinical course is not offered, or (b) pursue advanced work in an area of prior clinical practice. Placements can be either full time (40 hours per week) or part time, but no fewer than 16 hours per week. Because of other Law School requirements, students in their final quarter are limited to part-time externships of no more than 16 hours per week. For a complete description of the Civil SEP, students should read the Externship Handbook, which is available from the Levin Center for Public Service and Public Interest Law or online at: <http://www.law.stanford.edu/program/centers/pip/externship/>. Students wishing to enroll in an externship must meet various requirements that are set out in the Handbook. Interested students should speak to Betsy de la Vega, Lecturer in Law and Director of Externship and Pro Bono Programs at delavega@law.stanford.edu. Students participating in the Civil SEP must also enroll in the Externship Companion Seminar during the 2014 spring term. In some cases, where other seminars would be more appropriate companion courses for a student's placement, the student can request to substitute the seminar for the standard course in the application process. Grading Elements used: Full participation and attendance, satisfactory evaluation by field placement supervisor, weekly reflection papers of three to five pages, and a final reflection paper of no less than 15 pages.

LAW 475. Externship, Criminal Law. 5-12 Units.

Following approval of a student's application, the Criminal Standard Externship Program (SEP) allows second and third year students to work for credit in criminal prosecutors' and defenders' offices in the Bay Area for one quarter. Placements can be either full time (40 hours per week) or part-time, but no fewer than 16 hours per week. Because of other Law School requirements, students in their final quarter are limited to part-time externships of no more than 16 hours per week. Students participating in the Criminal SEP must also enroll in the Externship Companion Seminar during the 2013 fall term. In some cases, where other seminars would be more appropriate companion courses for a student's placement, the student can request to substitute the seminar for the standard course in the application process. For a complete description of the Criminal SEP, students should read the Externship Handbook, which is available from the Levin Center for Public Service and Public Interest Law or online at: <http://www.law.stanford.edu/program/centers/pip/externship/>. Students wishing to enroll in an externship must meet various requirements that are set out in the Handbook. Interested students should speak to Betsy de la Vega, Lecturer in Law and Director of Externships and Pro Bono programs at delavega@law.stanford.edu. Grading Elements used: Full participation and attendance, satisfactory evaluation by field placement supervisor, weekly reflection papers of three to five pages, and a final reflection paper of no less than 15 pages.

LAW 476. Advanced Criminal Practice. 3 Units.

In this seminar, we will discuss the most pressing current issues and cases across the criminal justice spectrum, from arrest through appeal and collateral attack. Our focus will be on the practice of criminal law -- how prosecutors and defense lawyers actually develop and use the latest cases and arguments. The subjects that we will take up will include, for example, ineffective assistance and the death penalty, sentencing, the "drug court" development, public prosecution and white collar crime. Each student will choose a case from the Supreme Court's current criminal docket and write about the issues that either arose or should have arisen during any of the stages of the case. Understanding these issues will require a careful investigation of the case history and the way it is developed for the Supreme Court. Particular attention will be paid to the ethical issues that arise in practice. Our text for the course will be pre-assigned cases from the current Criminal Law Reporter, along with articles and litigation materials in connection with a particular topic. Students should use the class to develop the habit of keeping up with the constantly evolving law in the specialized fields of criminal law and criminal procedure.

LAW 478. IP Advanced Topics: The Future of Online Music and Online Video. 3 Units.

The online music and online video industries are undergoing profound changes. In online video, the rise of Netflix and Hulu are just two examples of this trend. This class will explore how the different technical, economic or regulatory decisions we make today will interact to shape the future of these industries, and what the different options under consideration will mean for specific companies in this space. Class sessions will consist of a mix of guest lectures by industry leaders and class discussions of the assigned readings. Throughout the class, the students will work in interdisciplinary groups on problems facing specific companies in the online and online video industry today. For the final project, the groups will address specific policy problems from the perspective of a specific company, with different groups representing companies on different sides of an issue.

LAW 479. International Law. 3 Units.

This course provides a general introduction to international aspects of modern legal practice, including both public and private international law. It is intended to provide students who might not take any other courses in international law with the basic minimum knowledge necessary to practice in today's global environment; it is also a good first class for students who intend to pursue more advanced study in particular aspects of public or private international law. Case studies focus on a variety of issues including human rights, environment, terrorism, trade and commercial law. Themes of the course include the role of national sovereignty in the era of globalization, the democratic deficit of international institutions, theories about why nations obey or disobey international law, how nations internalize or reject international norms, how international institutions interact with national legal systems, and the role of non-state actors in the international system. Elements used in grading: Class participation, written assignments and final exam.

LAW 480. Law and Biosciences: Genetics. 3 Units.

This seminar will focus on ethical, legal, and social issues arising from advances in our knowledge of human genetics. These include forensic uses of genetics, genetic testing, widespread whole genome sequencing, the consequences of genetics for human reproduction, and the ethics of genomic biobanks for research, among other things. Students are required to write a research paper for this course. This class is crosslisted with HRP221. Special Instructions: The class is open to all law students and to other graduate students with consent of instructor. Substantial class attendance is required; in addition, the quality of class participation will play a small role in grading. Students will be required to submit an independent research paper. Elements used in grading: Class participation, attendance and final paper.

LAW 481. Communications Law: Internet and Telephony. 3 Units.

New developments in Internet and other technology enable new forms of innovation, content production and political participation that have the potential to significantly transform our economy, society and democratic system. This transformation will not happen automatically. Technical, legal and economic choices will affect whether the Internet can realize its potential or not. Communications law - the law that governs both the physical infrastructures for communications services such as cable and telephone networks as well as the communication services which are provided over these infrastructures - has become one of the most important arenas in which choices affecting the future of the information society are made. The debates over network neutrality (whether network providers should be able to restrict the applications and content that their Internet service customers can access over the network) or the right ways to foster broadband deployment are examples of this trend. At the same time, the Internet's ability to support a variety of different communications services such as telephony, information services or video over the same physical network infrastructure challenges the existing communications law, which is based on the assumption that different physical infrastructures offer different communications services. What are the features of the Internet that are at the core of its economic, social, cultural and political potential? What can regulators and legislators do to allow the Internet to realize this potential? And how can they allow applications like Internet telephony and traditional telephony to coexist without giving one an unfair advantage over the other? The course will address how current law deals with these questions, but also explore what regulators and legislators may do to better deal with the challenges posed by the Internet. The course is mostly focused on the US, but highlights developments elsewhere where appropriate. Students may take Communications Law: Internet and Telephony and Communications Law: Broadcast and Cable Television in any order (neither is a prerequisite for the other). There are no prerequisites for this course. No technical background is required.

LAW 483. Deal Litigation Seminar. 2-3 Units.

This seminar is designed as an introduction to mergers and acquisitions litigation. The course aims to provide both a practical and doctrinal perspective on M&A-related litigation and will rely heavily on readings and issues derived from practice in the Delaware courts where much contemporary deal litigation occurs. Students will be asked to apply cases and legal principles in various practical situations that may arise in a transactional litigation practice. Familiarity with basic corporate law principles is assumed. Classes and readings. The first segment of the course will introduce basic doctrinal principles of M&A law and provide an introduction to the litigator's role in the transactional setting. The remaining sessions will revolve around three detailed M&A case studies, with seminar members divided into group roles. The first week of each case study will involve the negotiation and structuring of an M&A transaction. The second week will involve litigation relating to the transaction. Reading for these sessions will include case scenarios, supporting materials, and additional relevant case law and articles. The attendance and active participation of seminar members is essential. Readings for all classes will be provided in spiral-bound volumes distributed in class. Written assignments and grading. Students will be expected to (i) write a final paper; (ii) prepare two additional short written assignments associated with the case study assignments (such as marking up draft documents or preparing court papers); and (iii) participate actively in class. Special Instructions: After the term begins, students accepted into the course can transfer from section (01) into section (02) which meets the R requirement, with consent of the instructor. Students taking the seminar for R credit can take the seminar for either 2 or 3 units, depending on the paper length. Corporations (Law 242) is a prerequisite. Elements used in grading: Attendance, class participation, written assignments and paper. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructor. See Consent Application Form for submission deadline.

LAW 487. The Financial Crisis. 3 Units.

This class will focus on the evolution of the financial crisis and the implications for the future of financial markets and the economy. Part of the course will concern the history of the financial crisis, from 2008-12, including policy responses. The rest will focus on current events. There will be a number of guest speakers, either live or by Skype. Last year's list included Tanya Beder, John Geanakoplos, Bob Joss, Tom Kempner, Ken Rogoff, Larry Summers, Kevin Warsh, and Nancy Zimmerman. Myron Scholes participated in about half the classes. I assume that this year there will be a similar but not identical list. This course is cross-listed with Graduate School of Business (MGTECON 343). Class will be taught at GSB.

LAW 488. Legal Aspects of Autonomous Driving. 2-3 Units.

Self-driving cars and trucks are rapidly entering the mainstream. They raise key legal and policy questions, which this seminar explores through source materials (from case law to treaties), academic scholarship, and industry speakers. Topics include state and federal regulation, public and private standards, liability and insurance, privacy and security, and social norms. Because the course is intended to meaningfully advance-rather than to merely present-legal analysis of this emerging technology.

LAW 490. Reproductive Justice: Law, Policy and Advocacy. 2 Units.

This course offers an opportunity to explore constitutional doctrines on childbearing and to consider contemporary strategies for advancing reproductive justice. We will examine federal court decisions defining reproductive rights, including cases involving conflicts between reproductive freedom, religious liberty and freedom of speech. We will consider the limits of federal constitutional protection for vulnerable women's reproductive choices (prisoners, teenagers, women who need public assistance and soldiers). In light of those limitations, we will consider alternative strategies to strengthen reproductive freedom: state constitutional litigation, legislation, administrative advocacy, communications, organizing and initiative campaigns. Each of these will be paired with a current reproductive rights controversy, such as the federal ban on abortion in military facilities, insurance coverage of contraception, teenagers access to confidential reproductive health care, shackling of pregnant inmates and abstinence-only sex education. Reproductive justice advocates, including litigators, communications experts and empirical health researchers will make guest appearances. The success of this course depends on lively class participation. Students will write a short piece on each week's topic using a different advocacy style (such as a legislative fact sheet, blog post, initiative ballot argument, op-ed article) and will make oral presentations in class.

LAW 491. Myth, Law, and Practice. 2 Units.

Collective myths from a variety of traditions and cultures capture enduring psychological truths about human choices and the human condition. Lawyers at various stages in their careers have their own personal myths, sometimes conscious and sometimes not. These personal myths embody key tendencies that determine or heavily influence each lawyer's personal and professional path. This course examines both collective myths that capture relevant archetypal human tendencies and the personal myths along with the associated histories of individual lawyers. It offers a space and time for each student to consider his or her own personal and professional direction through the course materials, class interactions, and a series of reflection papers. The course benefits from the collaboration of Michael Guasperini, a Ph.D. mythologist and lawyer whose primary vocation is working intimately with lawyers and firms during periods of personal and institutional transition. Mr. Guasperini has deep experience with the personal lives of hundreds of lawyers at various ages and levels of professional development. Elements used in grading: A series of reflection papers totaling at least 18-pages. This course is open to first-year Law School students. Writing (W) credit is for 3Ls only.

LAW 492. Multi-Party Litigation. 3 Units.

This introduction to aggregative litigation will cover joinder of claims and parties, class actions, and multidistrict litigation, as well as related topics such as preclusion and brief coverage of remedies and choice of law. The focus will be both doctrinal and practice-oriented, and we will also consider broader questions of how the civil justice system should respond to mass harms as well as proposals for reform. This course is strongly recommended for students planning a practice in private or public civil litigation, managing or supervising litigation, or a judicial clerkship. It provides a basis for advanced courses such as complex litigation. Elements used in grading: Class participation, assignments and final exam. This course is open to first-year Law School students.

LAW 493. Entrepreneurship, Leadership and the Law Practicum. 2 Units.

Starting or advising a growing social enterprise requires on-the-ground experience. This class brings theory and case studies examined in Entrepreneurship, Leadership and Law in Social Enterprise to use through placements as consultants with local social enterprises. Students will make connections in the community; learn creative and hands-on problem solving skills; teamwork and communication skills; and be inspired to innovate and break away from the traditional lawyer path.

LAW 496. Legal Studies Workshop. 1 Unit.

The Legal Studies Workshop is designed to support students working on a piece of legal scholarship with an eye to publication. The workshop will meet every other week for two quarters (Autumn and Winter). Students may sign up for one or both quarters, and will receive one credit for each quarter they are enrolled. Each session will be devoted to presentations of one or two student works-in-progress. Every student is expected to present his or her own work at least once, and to provide constructive oral feedback on others'. Attendance is mandatory (except of course for extenuating circumstances). Other faculty will participate on an informal basis when their expertise will be helpful for a particular paper. There are no written requirements for the course, and no requirement that the work presented be original to the Workshop. Students may wish to use the Workshop as an opportunity to expand on seminar papers or pursue independent research projects for which they are getting separate credit through one of the research tracks (e.g., directed research, dissertation). Whether students are working on a new project or revising an old, the expectation is that students will develop their topics independent of the course. Students who would like to participate in the Workshop but feel they need help in developing a workable research topic should consult Prof. Fried ahead of time. Elements use in grading: Class participation and attendance.

LAW 499. Intellectual Property: Trade Secrets. 3 Units.

Industry increasingly emphasizes technology as a means of achieving efficiency and competitive success. The law must provide an environment that encourages commercial investment in research, but that also protects an individual's right to change employment or compete directly with a former employer. This course is designed to explore the theoretical and practical aspects of protecting information as a trade secret. It will examine the basic legal doctrines and social issues which define this field, and will address the process of trade secret litigation. It will focus on a number of topics of current interest, such as state and federal legislation, "inevitable disclosure," non-competition agreements, corporate programs to protect trade secrets, and criminal sanctions." Elements used in grading: Class participation and final exam.

LAW 500. Modern American Legal Thought. 3 Units.

The course is a survey of the theories of law and adjudication that have been most important in this country since the Civil War, concluding with an introduction to presently significant schools of legal thought. The past schools of thought covered are Formalist Legal Science, Sociological Jurisprudence, American Legal Realism, and Legal Process. The more recent and still active movements include Law and Moral Philosophy, Law and Economics, Critical Legal Studies, Feminist Jurisprudence, Public Choice Theory, and Neo-formalism. The readings are drawn primarily from primary materials, the important contemporary manifestos and critiques of the schools of thought studied, along with writings that involve their application or reveal their influence. Among the recurring issues treated are: How political is law? How objective? How much do and should courts legislate? Is law mostly rules? Principles? Policies? Decisions? How much should law be bound up with other intellectual disciplines? What should legal education be like?.

LAW 504. International Business Negotiation. 3 Units.

This course is structured around a quarter-long, simulated negotiation exercise which is intended to provide an in-depth study of the structuring and negotiating of an international business transaction. This class will be taught in counterpart with a class at Berkeley Law School. Students in this class will represent a U.S. pharmaceutical company, and the students in the class at Berkeley will represent an African agricultural production company. The two companies are interested in working together to exploit a new technology developed by the pharmaceutical company that uses the cassava produced by the African agricultural production company. The form of their collaboration could be a joint venture, a licensing agreement or a long term supply contract. The negotiations between the two classes will take place through written exchanges and through real-time negotiation which will be conducted both in-person and via videoconferences. The course provides students with an opportunity to gain insight into the dynamics of negotiating and structuring international business transactions, to learn about the role that lawyers, law and business play in these negotiations, and to develop experience in drafting communications and actual negotiations. Students will also learn about the legal and business issues that may arise in joint ventures, supply agreements and licensing agreements. The thrust of this course is class participation and active involvement in the negotiations process. Students are expected to spend time outside of class, working in teams, to prepare for class discussions involving the written exchanges, as well as preparing for the live negotiations. Class discussions will focus on the strategy for, and progress of, the negotiations, as well as the substantive legal, business and policy matters that impact on the negotiations. In addition to the regular Monday class, classes will meet for the live negotiations on two Thursday evenings on-campus at 7:00 PM (10/24 and 11/7) and three Saturday mornings at 10:30 AM (10/12, 11/2 and 11/16) in the San Francisco office of DLA Piper (close to Montgomery St. BART station). Due to the Thursday and Saturday classes, this class will conclude on November 18. The course will be limited by lottery to 12 students from SLS, with six additional slots held for students from engineering or business, provided that law students will be accepted if such slots are not filled by day of lottery. Attention Non-Law Students: Non-Law student enrollment in this course will be determined by a lottery. To bid for this course, you must complete and submit a Non-Law Student Course Add Request Form to the Law School Registrar's Office (room 100). For detailed enrollment instructions, see the Limited Enrollment Courses With Reserved Openings For Non-Law Students section of the Law School Registrar's website at: <http://www.law.stanford.edu/school/ofHces/registrar/#stanford-non-law-student-course-registration>. Prerequisites: A course in basic negotiations (e.g., Law 615) or comparable prior experience is recommended. A primer on basic negotiations skills will be offered at a time TBD as an alternative for students who have not had a prior negotiations class or experience. Elements used in grading: Class participation, written assignments and final paper.

LAW 508. Law and Social Change in the Global Context. 3 Units.

This colloquium will examine the impact of human rights and rule of law strategies on social change in the global context. Over the past two decades, the establishment of international criminal courts and the expansion of regional human rights tribunals have significantly improved the enforceability of international human rights law in many regions of the world. Within a similar timeframe, building the rule of law, especially in transitional societies, has found an increasingly important place on the development agenda of international organizations, governmental development agencies and private foundations. One issue that remains unclear is the impact of human rights enforceability on the reform of domestic justice systems. During the first half of the course, students will read and discuss articles that provide an overall framework for understanding the field of international human rights and the field of rule of law, including the most common critiques of both fields as they are currently practiced. In the latter half of the course, students will hear examine case studies and hear perspectives from leading public interest attorneys about how they are deploying human rights mechanisms and engaging with the process of legal reform in their respective countries. There will be a focus on equal treatment and the lack of discrimination on the basis of race or ethnicity as a case study. The attorneys will offer on-the-ground observations of both the complex relationship between human rights and rule of law, and the potential and limitations of both approaches. Students will be required to participate in a symposium of leading international practitioners that addresses the same topic, and to synthesize lessons learned from the symposium as their final writing assignment. Special instructions: Requirements will include class participation, a class presentation and (1) either short written weekly reflection papers (about 3-4 pages) for and a short research paper (about 5 pages) for W credit or (2) a long paper (approximately 30 pages) for R credit with consent of the instructor. Writing (W) credit is for 3Ls only.

LAW 509. Facilitation for Attorneys. 2 Units.

This course is designed to help students develop an understanding of the practice of facilitation in the legal context and to develop skills as facilitators. As the practice of law becomes more complex, it includes more and more situations where groups of people need to work together. Common examples include: planning complex legal strategies, developing firm policies, coordinating work among attorneys and staff, working with corporations or other multi-person clients, shareholder meetings, public commissions and councils, corporate and non-profit Board of Directors meetings. Countless hours are spent in meetings - a typical lawyer in the United States can expect to spend at least 10,000 hours in meetings during his or her working life. This course will help students improve the quality of both the processes and products of meetings, as a facilitator, leader, or meeting participant. Elements used in grading: Class attendance, participation and final paper. Class Schedule dates: Fri Oct 18, Sat Oct 19 and Sat Oct 26.

LAW 511. Legal Cultures and Legal Professionals in Latin America and Latin Europe. 2 Units.

The Latin countries of Europe and Latin America are the most direct inheritors of Roman language and law. They have made very important contributions to the history of law and mankind. They have not only an important legal tradition - the civil law tradition - but also some countries of the area among the fast growing economies of the world and are undergoing quick social change. This course proposes to give a broad picture of the transformation of law and legal thinking, and the relation between law and society in this important part of the world.

LAW 512. Intellectual Property: Licensing. 2 Units.

In this course we cover the major aspects of intellectual property licenses. We will cover patent, copyright, trademark and trade secret licenses in a variety of industries. We will focus on agreements governed by US federal and state law, but will cover select issues in cross border transactions. Topics include: grant language, upstream and downstream immunities, change of control events, indemnities, and insolvency. Using a case law-based approach, we will examine the interrelationship between contract language and background law. Introduction to Intellectual Property or consent of the instructor is a prerequisite for this course.

LAW 514. California Coast: Science, Policy and Law. 4 Units.

(Same as CEE 175A/275A, EARTHSYS 175/275). This interdisciplinary course integrates the legal, science, and policy dimensions of characterizing and managing our coastal resources in California. Our focus is on the land-sea interface as we explore contemporary coastal land use and marine resource decision-making. Among the focal issues we will examine are: coastal pollution, public health, ecosystem management; public access; private development; local community and state infrastructure; natural systems and significant threats; resource extraction; and conservation, mitigation and restoration. Students will learn the fundamental physics, chemistry, and biology of the coastal zone, tools for exploring data collected in the coastal ocean (time series analysis), as well as the institutional framework that shapes public and private decision-making affecting coastal resources. This course will take a "place-based" approach.

LAW 515. Clean Tech: Business Fundamentals and Public Policy. 2 Units.

The course materials include case studies, book chapters, reports, homework exercises, videos, guests, and the presentation of final course projects. COURSE OBJECTIVES: * Examine developments in the cleantech sector related to energy and carbon emissions. * Provide a framework for comparing the cost competitiveness of alternative energy solutions. * Examine current trends in public policy and regulatory initiatives related to carbon emissions and clean energy standards. * Understand challenges for the commercialization of new energy technologies. Examine strategies for avoiding the "Valley of Death." This course is crosslisted with GSBGEN 532. Class taught at TBA. Special Instructions: This course is limited to 20 Law School students. Class will meet October 7 to October 18. Elements used in grading: Class participation (35%), written assignments (25%) and paper (40%) that either provides a (rough) business plan or examines an existing business (or policy) initiative related to the cleantech sector.

LAW 517. Why Intellectual Property?: Rationales and Critiques of IP Law. 2 Units.

Why do societies decide to grant special legal protection to various types of creative works? A number of answers have been given over the years. Some are utilitarian: we grant these rights because doing so maximizes social welfare. Some are deontological: we grant rights because this is morally required in a just society. We will examine these various justifications, as well as variants on them. We will also ask how a society, having decided to grant some version of IP rights, ought best structure them. Should they be true property rights, with all or most of the powers this implies (creator control over uses, right to compensation from exploitation, etc.), or something else? Would a state-backed reward system work better, so that compensation is divorced from individual control? Should compensation for successful creators be limited or capped, as part of a wider attempt to moderate the distributional impacts of granting individual property rights; or must we tolerate big winners; as an inducement or symbolic reward for other creators? We will address these and related questions by reading two sets of materials: (1) classic treatments of property rights (Locke, Kant, etc.) and social justice (Rawls); and (2) material from the contemporary literature on IP theory. We may also host some of the most interesting scholars working in the field of IP theory today, to come and explain their thinking and their work.

LAW 518. International Public Interest Lawyering Colloquium. 2-3 Units.

Over the past two decades, the establishment of international criminal courts and the expansion of regional human rights tribunals have significantly improved the enforceability of international human rights law in many regions of the world. Within a similar timeframe, building the rule of law, especially in transitional societies, has found an increasingly important place on the development agenda of international organizations, governmental development agencies and private foundations. One issue that remains unclear is the impact of human rights enforceability on the reform of domestic justice systems. This colloquium will examine the relationship between international human rights and domestic rule of law in transitional societies from the perspective of public interest attorneys who are seeking to achieve justice for clients who are low-income and marginalized. During the first half of the course, students will read and discuss articles that provide an overall framework for understanding the field of international human rights and the field of rule of law, including the most common critiques of both fields as they are currently practiced. In the latter half of the course, students will hear perspectives from leading public interest attorneys about how they are deploying human rights mechanisms and engaging with the process of legal reform in their respective countries. There will be a focus on gender equality and protecting the human rights of women as a case study. The attorneys will offer on-the-ground observations of both the complex relationship between human rights and rule of law, and the potential and limitations of both approaches. Students will be required to participate in a symposium of leading international practitioners that addresses the same topic, and to synthesize lessons learned from the symposium as their final writing assignment.

LAW 519. 21st Century Professional Skills and Practice Management. 2 Units.

This course will help students to develop the professional management skills that are essential for a successful legal career. The course will focus on team dynamics and leadership; effectively communicating with clients, colleagues, other parties and tribunals; client development and service; managing expectations and unexpected adversity; and the economics of law practice, including forecasting demand for legal services and project management. For the final paper, students will create a comprehensive, personal plan outlining the substantive knowledge, professional skills, and business focus they need to build a fulfilling law practice. Assignments and simulations will demonstrate and model various skills and instructors will provide real-time feedback to students on class exercises. The course is not limited to any particular type of practice (size or substantive area). Elements used in grading: Class participation and attendance, course exercises and written assignments.

LAW 520. Betrayal and Loyalty, Treason and Trust. 2 Units.

The main topic of the seminar is Betrayal: its meaning as well as its moral, legal and political implications. We shall discuss various notions of betrayal: Political (military) betrayal such as treason, Religious betrayal with Judas as its emblem, but also apostasy (converting one's religion) which is regarded both as a basic human right and also as an act of betrayal, social betrayal - betraying class solidarity as well as Ideological betrayal - betraying a cause. On top of political betrayal we shall deal with personal betrayal, especially in the form of infidelity and in the form of financial betrayal of the kind performed by Madoff. The contrasting notions to betrayal, especially loyalty and trust, will get special consideration so as to shed light or cast shadow, as the case may be, on the idea of betrayal. The seminar will focus not only on the normative aspect of betrayal - moral or legal, but also on the psychological motivations for betraying others. The seminar will revolve around glaring historical examples of betrayal but also use informed fictional novels, plays and movies from Shakespeare and Pinter, to John Le Carre. Elements used in grading: Class Participation, Attendance, Final Paper. This course is cross-listed with School of Humanities & Sciences (Department & Course Number TBA).

LAW 522. Private Equity Investing. 3 Units.

This course will concern itself with the central issues related to private equity investing. Topics to be covered include the following: valuation, pricing and structuring of private investments; leveraged buyouts and other transactions involving multitiered capital structures; the structure and governance of private equity funds; conceptual issues (such as option theory, asymmetric information and bounded rationality) relevant in this realm; and private equity as a distinct asset class. The primary pedagogical objective is to have students learn skills and tools used in the private equity arena including, inter alia, financial analysis, conducting a multipronged due diligence process, spreadsheet modeling and the crafting of legal documents. Case studies requiring the assessment of actual transactions will be utilized. We will have a number of guest speakers during the term, and will use various materials illustrative of what one would encounter in private equity deals and funds. Special Instructions: In order to enroll in Private Equity Investing students must concurrently enroll in PEI: Quantitative Skills Seminar (Law 721; 1 unit). In other words, no student may enroll in either Law 522 or Law 721 without also enrolling in the other. Elements used in grading: Class attendance, participation and written assignments. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

LAW 524. Mental Health Law. 3 Units.

This seminar explores topics in mental health law with special emphasis on liberty issues. After a brief introduction to mental disorders, their treatment and the mental health profession, the seminar sessions will explore topics such as: civil commitment, criminal responsibility, competency determinations, and the right to refuse and consent to psychiatric treatment. A research paper is required. Elements used in grading: Final Paper.

LAW 527. Juvenile Justice and Social Policy. 3 Units.

Juveniles are accorded special status under the American legal system. This introductory course will examine the historical precedents and philosophical reasons for treating juveniles differently from adults, and review empirical evidence about child development that can illuminate the reasons for their special status within the court system. Students will learn about the distribution of juvenile delinquency and the impact of significant social and institutional influences on delinquency: family, school, peers, and drugs. The course will also provide a detailed overview of the juvenile system, from its beginning to the current state of the institution, which will include a review of police work with juveniles, pretrial procedures, and the juvenile court and corrections systems. Major court rulings that have shaped contemporary juvenile justice will be presented. Finally, the course will consider dispositional options available to Courts, and will identify the most effective in reducing delinquency. By the conclusion of this course, students should have an understanding of the juvenile justice system and how it compares with the adult justice system, what programs work to reduce recidivism, and be cognizant of some of the major legal and policy issues confronting that system today. The course format will combine lecture, group discussions, and guest presentations. Students may also have the opportunity to observe the juvenile justice system first hand by attending a juvenile court session, visiting a correctional facility for adjudicated delinquents, and hearing directly from those who work with high-risk youth on probation or in the community. Written Work. Each student will write two essays over the course of the quarter, about 13 pages each. Each of these essays will respond to a specific question I pose to you and the due dates will be contained in the course syllabus. The two questions will ask you to critically assess the issues, methods, and policy implications in the readings and class discussions. Elements used in grading: Final grades will be based on the two essays (40% each) and class participation (20%). Writing (W) credit is for 3Ls only. This course is open to first-year Law School students.

LAW 528. Economic Analysis of Law. 4 Units.

This course will provide a broad overview of the scholarly field known as "law and economics." The focus will be on how legal rules and institutions can correct market failures. We will discuss the economic function of contracts and, when contracts fail or are not feasible, the role of legal remedies to resolve disputes. We will also discuss at some length the choice between encouraging private parties to initiate legal actions to correct externalities and governmental actors, such as regulatory authorities. Extensive attention will be given to the economics of litigation, and to how private incentives to bring lawsuits differ from the social value of litigation. The economic motive to commit crimes, and the optimal governmental response to crime, will be studied in depth. Specific topics within the preceding broad themes include: the Coase Theorem; the tradeoff between the certainty and severity of punishment; the choice between ex ante and ex post sanctions; negligence versus strict liability; property rules; remedies for breach of contract; and the American rule versus the English rule for allocating litigation costs. There is no formal economics prerequisite to take this course, though some prior training in economics will be helpful. This course is cross-listed with the Public Policy program (same as PubIPol 302B). Elements used in grading: Final exam. Midterm exam grade will be used to boost your final grade if you do better on the midterm exam than on the final exam. The course is open to first-year Law School students.

LAW 531. Wine and the Law. 2-3 Units.

The wine industry is the subject of intense activity in many legal subject areas, including constitutional law, intellectual property, environmental and land use regulation, trade protectionism, and internet commerce. This seminar surveys the legal landscape of this multibillion dollar industry, focusing on contemporary debates and developments in judicial, legislative, and administrative arenas. Course materials will consist of a blend of judicial opinions, governmental materials, and secondary sources. The instructor specializes in litigation concerning the California wine industry, and the course will feature several guest speakers addressing the economic, political, and legal aspects of the subject in its state, national, and international dimensions. A paper will be required of all students on some topic of their choosing concerning the course subject matter.

LAW 532. Understanding the Legislative Process: American Legislative Institutions in Analytical Perspective. 3 Units.

Statutes are central to the legal system in the United States and virtually every other country, but they are generated through an intricate legislative process that is often poorly understood and has in recent years been subject to intense criticism. The primary goal of this course is to explore certain categories, procedures, and norms used in the U.S. Congress. The class will also consider how the U.S. legislative process functions relative to approaches in other countries (particularly advanced industrialized countries with mature legislative and executive institutions), and will critically examine some of the concerns that have been raised among scholars and commentators about the efficacy of the U.S. legislative process. Specific topics covered in the course will include the legislative budgeting and appropriations process; legal (including constitutional) interpretation in the legislature; oversight of executive and administrative action; legislative agenda-setting and other counter-majoritarian features of the lawmaking process; and the division of labor between legislative chambers, committees, and subcommittees. Students will have an option of either choosing between writing 4 short response papers (4-5 pp. each), or one longer paper for writing "W" credit for 3Ls only. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the W requirement, with consent of the instructor. Special Instructions Writing (W) credit is for 3Ls only. Elements Used in Grading: Class participation, attendance, four short response papers or final paper.

LAW 537. The United States Senate as a Legal Institution. 3 Units.

This course will familiarize students with major, and/or emerging legal and constitutional issues concerning the U.S. Senate. In so doing, it will examine: 1) the Senate's nature as a complex legal institution, and 2) the issue of the Senate's legitimacy in the context of the current and largely unprecedented criticism of the Senate from all parts of the political spectrum. This first portion of the course will consider institutional-legitimacy issues facing the Senate, including the appointment of senators to fill vacancies as well as disputes concerning Senate rules and procedures such as the filibuster and holds. The second part of the course will explore how the Senate interfaces with the Constitution and the Supreme Court. It will examine how senators should regard the issue of constitutionality in voting on legislation, be it campaign-finance reform, internet decency, or health care. This part of the course will also consider how senators should approach proposed constitutional amendments. The final portion of the course will review the wide range of issues that have emerged in recent years regarding the constitutional relationship between the Senate and the Executive Branch, including the increasingly acrimonious issue of the standard to apply to executive appointments under the advice and consent power. Particular emphasis on this part of the course will be given to issues that have gained greater prominence since 9/11, including the relationship between enacted, constitutional legislation and the presidential assertion of Article II powers, as well as the Senate's abdication of its Article I war-declaration power.

LAW 541. Legal Profession Workshop: Deconstructing Big Law. 3 Units.

Wondering what life in a large law firm will be like in this age of radical change in the delivery of legal services? How the new economics are shaping the structure and management of large law firms? How law firms are re-thinking professional development and advancement within firms? What the globalization of legal services portends for your future? The goal of the workshop is to bring research and practical experience to bear on helping you think about how to build a professional career in an era of professional change.

LAW 543. Entrepreneurship, Leadership and Law in Social Enterprises. 2 Units.

Many believe that society's greatest challenges have already been solved by social entrepreneurs and the challenge is how to take their ideas to scale. However, it has become increasingly difficult to start and sustain social ventures. The lines between the public and private sectors have become increasingly blurry as best practices in the social sector now include innovation, strategy and accountability. This course will expose students to the work of social entrepreneurs in social enterprises - focusing primarily on domestic non-profit organizations. Using the "case study method" typically used in MBA programs, students will examine the challenges of starting, counseling, serving, funding and scaling social ventures through the eyes of the entrepreneur, investor, attorney and community leader. The course will explore the intricacies of remaining mission driven, talent, board relations, managing and sustaining growth, the changing role of corporate governance, and leveraging private sector partnerships and resources. Students will also explore innovative public / private sector partnerships and the challenges and opportunities of engaging diverse partners with differing agendas. The course will include guest speakers from the fields of law, business and the social sector. Throughout, students will explore the valuable roles that attorneys can and have played in such ventures. Students will be expected to attend, participate actively, present to the class and write reflection papers. Elements used in grading: Reflection Papers.

LAW 545. Alternate Dispute Resolution: Law, Practice, and Policy. 3 Units.

Lawyers' representation of their clients increasingly calls for skills within a broad range of alternative dispute resolution processes. In this course, you will learn about the variety of dispute resolution procedures that operate under the ADR umbrella, within and outside of the court system (including mediation and arbitration). The goal is for students to understand the law and policy behind these alternatives relative to court adjudication, to be able to select the appropriate process for a client, and to effectively represent that client in the selected process. Guests include third party neutrals and advocates from a range of contexts, including federal court, private mediation, private and public arbitration, and corporate legal counsel.

LAW 546. Alternate Dispute Resolution: Practicum. 2 Units.

Effective client representation increasingly calls for lawyers with skill within a broad range of alternative dispute resolution processes. In this course, you will have the opportunity to observe 2-3 ADR processes being handled by Bay Area third-party neutral practitioners. Students in the class will meet periodically to review relevant law and policy, and to discuss observed cases. Grades will be based on seminar participation and 3 short papers. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline. Co- or Prerequisites: Mediation or ADR: Law, Practice and Policy. Elements used in grading: Class participation, attendance and written assignments.

LAW 554. International Commercial Arbitration. 2 Units.

This course is designed to provide students with an introduction to the theory and practice of international commercial arbitration, the preferred method of dispute resolution in international trade and commerce. It will familiarize students with the framework of international treaties and federal and state laws that undergird the international arbitral system and explore U.S. jurisprudence on the respective roles of courts and arbitral tribunals in resolving disputes subject to international arbitration. In addition the course will analyze alternatives in drafting international arbitration clauses, including the applicable arbitration rules, the significance of the agreed-upon place of arbitration, the number of arbitrators, and the method of their selection. The course will also impart a practical, in-depth understanding of each of the principal stages of arbitration, including the enforcement of the arbitration agreement; initiation of the arbitral proceedings; the availability of provisional remedies; the conduct of the arbitration from the pleading stage through discovery and briefing to the hearing; the arbitral tribunal's preparation of the award; and the judicial enforcement proceedings that conclude the process. Although the course will focus on the practice of international arbitration from the U.S. perspective, it will also introduce students to perspectives from other leading civil and common law jurisdictions.

LAW 556. Counterterrorism and the Law. 3 Units.

This seminar will explore legal and policy questions related to the investigation, detention, and prosecution of terrorism suspects under U.S. law. Moving beyond Supreme Court detainee decisions, the course will address contemporary challenges involving civil liberties, national security oversight, and effective counterterrorism policy. Topics addressed will include domestic intelligence-gathering and investigations (including the use of informants, FISA surveillance, racial/religious profiling, and terrorist watchlists); the prosecution of terrorism suspects (material support laws, the choice between civilian and military courts); and the future of detention policy. One core theme will be the extent to which both lawmaking and oversight in the national security context occur outside the courts - often through legal counsel opinions, agency guidelines, internal watchdogs, and other lesser-known institutions and sources of law. The course also pays special attention to the policy controversies that most affect U.S. immigrant and minority communities. This course is designed to complement Professor Janet Alexander's Terrorism and the Courts seminar (Winter term). To develop skills central to the work of practicing lawyers, students will write two short papers that simulate the actual work assignments of lawyers for government agencies, human rights groups, or other interested parties. For instance, students might choose among assignments that ask them to draft a local ordinance governing police intelligence-gathering, prepare a memo for an agency head or member of Congress, revise a section of Attorney General Guidelines for FBI investigations, or write a section of an Inspector General report on a counterterrorism issue. These assignments, for Writing (W) or Professional Writing (PW) credit, will be due before the end of the quarter. Alternatively, students may opt to take the seminar for Research (R) credit with the instructor's approval, according to the standard requirements and deadlines. In addition to completing the writing assignments, students are expected to read thoroughly and contribute to a thoughtful and lively discussion each class. Special Instructions: After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Writing (W) credit is for 3Ls only. Elements used in grading: Class participation and two short papers or research paper.

LAW 557. Direct Democracy. 2-3 Units.

In recent years, the use of ballot measures has sharply risen, and initiatives and referenda have featured prominently in contested debates over immigration, affirmative action, abortion, same sex marriage and term limits. This seminar will focus on direct democracy as a method of lawmaking. Our principal focus will be on initiatives and referenda, but we will allocate some time to the recall, as well. We will consider the history, practice, theoretical justifications, and constitutional dimensions of direct democracy, as well as how direct democracy interacts with representative democracy. We will also explore many legal questions that have arisen in as ballot measures have been used as instruments of governance and policy. Topics will include whether direct democracy comports with the federal constitution; judicial review and interpretation of ballot measures; minority rights under direct democracy; election rules relating to signature gathering, qualifying ballot measures and campaign finance; and the role of interest groups. I anticipate one or more guest lecturers. Each student will present on one particular ballot measure that is linked to that week's topics. Students will write either multiple response papers (for W credit) or a final research paper (for R credit) on a topic to be worked out with the instructor. Special Instructions: After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Students taking the seminar for R credit can take the seminar for either 2 or 3 units, depending on the paper length. Elements used in grading: Class participation, written assignments, multiple response papers or a final paper. Writing (W) credit is for 3Ls only.

LAW 558. Workshop on International Security, Law, and Social Science. 1 Unit.

Societies throughout the world face pressing security and international cooperation problems involving insurgency, transnational crime, risk regulation, migration, arms control, and related areas. This seminar, based at Stanford's university-wide Center for International Security and Cooperation covers a variety of issues of interest for a multi-disciplinary audience of social scientists, lawyers and legal scholars, and natural scientists, among others. Issues include nuclear weapons proliferation and arms control, war and civil conflict, international and transnational organizations, governance, counter-terrorism, biosecurity and global public health, and migration.

LAW 560. Mental Health Law: Forensics. 3 Units.

It is estimated that nearly one-third of Americans experience a diagnosable mental disorder each year. This course is designed to provide law students with a working knowledge of the major areas of mental health and illness, as well as a basic understanding of legal issues affecting the practice of psychology and psychiatry. Basic concepts of clinical psychiatry and psychopathology will be highlighted throughout the course. We will also address legal issues that pertain to the needs and rights of individuals with a mental disorder and explore the delivery of mental health services, the regulation of mental health professionals, and the relationship between society and individuals with a mental disability. Whenever appropriate, landmark cases will be discussed and their impact in the practice of mental health delivery (i.e., psychiatry and psychology) and on the practice of law, will be discussed. This course is intended to be interactive and while the core of the course is pre-determined, some of the content will be tailored to address interests and needs of participants. The structure of most sessions will begin with case presentations highlighting the day's topic, followed by a didactic portion from the instructor, ending with an interactive discussion between class members and invited panelists. Grades will be based on class participation, group participation in a mock deposition/trial, and a research paper for R credit- the topic for the paper is to be agreed upon between the student and the course director. Elements used in grading: Class participation, attendance, group participation in a mock deposition/trial and final paper.

LAW 563. Beyond the Common Law: Tort Reform and Tort Alternatives. 2 Units.

Over the past century, tort law has been under sustained attack. Using a broad mix of case law, case studies, and scholarly analysis, this seminar will explore those attacks-including their historical roots, their theoretical justifications, and their practical effects. We will first study "replacement reforms"-attempts to jettison the common law in favor of alternative compensation mechanisms-including workers' compensation, auto no-fault, the September 11th Compensation Fund, and the "Vaccine Court," housed within the Court of Federal Claims. Second, we will study modern tort reform initiatives, often dubbed "discouragement reforms," which have chiseled away at damages and chilled personal injury victims' incentives to seek relief. Finally, we will study the United States Supreme Court's own tort reform activity, including recent jurisprudence limiting punitive damages and granting broad preemptive effect to agency actions. Through this analysis, students will develop a deeper and richer understanding of the tort system, its contemporary operation and excesses, and the uneasy but important place tort law-and civil litigation more generally-occupies in contemporary American society. Special Instructions: Grades will be based on class attendance and participation and either section (01) several short reflection papers or section (02) an independent research paper. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Early drop deadline. Writing (W) credit is for 3Ls only. Elements used in grading: Class participation, attendance, reflection papers or research paper.

LAW 564. Policy and Strategy Issues in Quantitative Finance. 2 Units.

This interdisciplinary course will survey the current landscape of the global markets as the world continues to progress through the financial crisis. We will discuss the sweeping change underway at the policy level by regulators and legislators around the world as well as the strategic discussions, which will include guest-lecturer perspectives on how affairs may change as a result and where the greatest opportunities exist for students entering the world of finance today. The course will also review, in a non-technical way, the basics of the financial derivatives and other quantitative techniques that are a core part of the global capital markets. The subject matter, by necessity, is multi-disciplinary and the course is particularly suited to those students having an interest in finance-based careers, entering legal, regulatory or public policy positions related to finance or studying the evolution of modern financial markets. Elements used in grading: Class Participation, Attendance, Final Paper. Same as ECON152/252, PUBLPOL364, STATS238. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

LAW 565. Immigration Law, Policy and Constitutional Rights. 3 Units.

This survey course will provide a foundation in immigration law, the system of admission and removal, and the constitutional principles governing the regulation of non-citizens. The course will also explore some selected topics concerning immigrants' rights and the normative values informing contemporary policies by drawing on the instructor's extensive experience litigating constitutional and civil rights issues on behalf of non-citizens throughout the country. After surveying the immigration system and constitutional principles, we will examine such topics as detention of immigrants; state and local immigration regulation; constitutional prohibitions on 'alienage' discrimination; access to the courts and habeas corpus for non-citizens; rights of undocumented workers; extraterritorial application of the Constitution; and Fourth Amendment issues arising in federal immigration enforcement. No prior course or background in immigration law is expected. Elements used in grading: Class participation and attendance (15%), final exam (85%). This course is open to first-year Law School students.

LAW 572. Social Justice Impact Litigation: Issues and Strategies. 2 Units.

This seminar will explore strategic and legal issues related to using law reform and social justice litigation to advance constitutional and civil rights. The course will be informed by the instructor's thirty years' experience litigating class action and appellate cases, including in the Supreme Court, on behalf of immigrants and civil rights plaintiffs as founder and director of the ACLU national Immigrants' Rights Project. We will consider legal doctrine and practical problems. Among the issues that may be included are selecting and using test cases; strategic pleading; class action problems; the role of amicus briefs; suits for damages versus injunctive relief; standing and mootness; ethical problems, settlement strategies; coalition litigation; use of public advocacy and media; the effect of lawsuits on policymakers and government officials; and litigation to achieve legislative change. Guest speakers may be invited. Enrollment is limited. Grading will be based on class participation and written work of at least 18 pages. In consultation with the instructor at the beginning of the course, students will have the option of choosing either to submit a final paper or a series of reflection or analytical pieces responding to seminar issues or guests. All students enrolled in the course are eligible for Writing (W) credit. With the instructor's prior consent, a limited number of students may be approved for Research (R) credit for writing a substantial research paper on an approved topic. After the term begins, students approved for R credit will transfer from section (01) into section (02). Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for contact information and submission deadline. Special Instructions: Writing (W) credit is for 3Ls only. Elements Used in Grading: Class participation (25%), presentation, and paper (75%).

LAW 576. Law and Sexuality. 2-3 Units.

This seminar will focus on how the law regulates sexuality. We will approach the material as an exercise in advanced constitutional law, exploring how courts have used--or might use--federal or state constitutional provisions to address issues regarding a wide array of issues involving sexuality. The core of the class will relate to contemporary controversies concerning sexual orientation and gender identity (including, for example, regulation of sexual conduct, defining sexual identity, the Boy Scouts' policy, marriage and parenting rights of same-sex couples, among others). But we will also discuss other issues, including controversies about sex education and polygamy. We will maintain an interdisciplinary focus throughout as we consider how social, cultural, and political forces shape, and are shaped by, legal doctrine. Special attention will be paid to the unfolding debate on same-sex marriage as a case study in the contested role of courts as engines of social change. All students taking the seminar for 2 credits will write a final research paper of approximately 18 pages (for R credit). Students who wish to write a longer R paper (approx. 26 pages) may enroll in the seminar for 3 credits. Elements used in grading: Class participation and final paper.

LAW 577. Regulation of the Political Process. 4 Units.

This course is intended to give students a basic understanding of the themes in the legal regulation of elections and politics. We will cover all the major Supreme Court cases on topics of voting rights, reapportionment/redistricting, ballot access, regulation of political parties, campaign finance, and the 2000 presidential election controversy. The course pays particular attention to competing political philosophies and empirical assumptions that underlie the Court's reasoning while still focusing on the cases as litigation tools used to serve political ends. Elements used in grading: Class participation and exam.

LAW 583. International Investment Law. 2 Units.

International investment law and arbitration is one of the fastest-developing areas of international law. It is an area that combines elements of treaty and customary international law, public policy, and private dispute resolution. In the past decade, there has been a dramatic increase in the number of bilateral investment treaties and other agreements with investment-related provisions, followed by a sharp rise in the number of disputes between private investors and sovereign states under those specialized legal regimes. In particular, investment arbitration under the auspices of the World Bank's International Centre for Settlement of Investment Disputes (ICSID) is booming, with some 419 arbitration and conciliation proceedings instituted under the ICSID Convention and Additional Facility Rules as of 31 December 2012. Due to the widespread geographical participation of states and private investors in investment arbitration, involving significant amounts of money in every conceivable investment sector--from oil, gas & mining, construction, transportation to the financial sector--the particularities and dynamics of investment treaty law and arbitration are becoming increasingly important to foreign investors, sovereign states, and the global economy that is increasingly fueled by foreign investment. The rise of international investment law and arbitration has also bred a new and exciting practice area in global law firms, where teams of lawyers act on behalf of investors against sovereign states, or defending sovereign states against investor claims, before international arbitral tribunals. This course will cover four broad areas: (I) the historic, theoretical and policy grounds underpinning international investment law; (II) the substantive obligations and standards governing the investor-state relationship; (III) the growth of investor-state arbitration and its impact on international law; and (IV) the wider issues of fairness and functionality of investment treaty law and investor-state dispute resolution. The course uses materials from international investment treaty texts, case law, and commentaries to enable students to evaluate and apply legal doctrine to future situations. As international investment law and investment arbitration is a dynamic, unsettled, and controversial body of law, this course will highlight different and sometimes conflicting interpretations and decisions in the area, and invite students to analyze, discuss, and form their own views on key issues. Elements used in grading: Class participation and final paper.

LAW 586. Classical Islamic Law. 4 Units.

The course explores legal interpretation in the classical Islamic tradition. It explores the factors that shaped the laws and role and nature of textual interpretation. The course also considers case-studies selected from among the following topics: gender, ritual, privacy, relations with non-Muslims, commercial law, and the obligation to forbid wrong and enjoin right. This course is cross-listed with RELIGST 201/301. Elements used in grading: Participation (50%) and final paper (50%).

LAW 588. Sports Law. 2 Units.

This seminar will examine the legal dimensions of the business of professional sports. Topics covered will include the history and evolution of sports leagues, the application of antitrust and labor law, drugs and sports, the rules governing sports leagues, and the relationships between owners, players, fans and the media. Labor Law (Law 301) is a prerequisite for this course.

LAW 590. Modern Capital Markets and the Financial Crisis. 4 Units.
 Money: Shadow Banking, Dark Financial Matter and the Future of Finance.
 This course introduces law students to the structure of the shadow banking system and related financial markets. Emphasis is placed on the securitization process, the swaps markets (including credit default swaps, total returns swaps, interest rate, and currency swaps), repo agreements, forwards, futures, and related institutions such as clearing houses and exchanges. The course will consider the role that these markets played in the recent and ongoing financial crisis, their potential implications for future crises, and several of the regulatory initiatives proposed by the Dodd Frank Act. Much of the course will operate through the lens of a series of case studies including the Greek debt crisis, Harvard's loss of \$500 million in the swaps market, the AIG bailout, and JPMorgan's loss of \$2 billion in its hedge book. Special Instructions: If you have taken Law 559: Modern Securities Regulation (Sonsini) and/or Law 542: Modern Securities Fraud Litigation (Eth), you may take Law 590: Modern Capital Markets (Grundfest). Elements used in grading: Class attendance, participation and exam.

LAW 591. Securities Regulation: Mandatory Disclosure, Capital Formation, and the IPO Process. 4 Units.
 Capital Formation and Securities Regulation. This course analyzes the regulations governing the capital formation process in the United States. The course explains the process by which companies register securities with the SEC in order to go public, and the reporting obligations that arise once companies are publicly traded. The course also analyzes the process by which companies raise capital through private placements (the dominant capital formation process in Silicon Valley), restrictions on the resale of privately placed securities, and the securities law liabilities that arise in these transactions. The course also addresses the processes by which foreign issuers commonly raise many billions of dollars in the US markets without registering their offerings with the SEC, Chinese reverse mergers which have led to a spate of litigation, and recent legislation allowing "crowdfunding" of certain enterprises. Much of the course will operate through the analysis of case studies, in particular, a close analysis of the Facebook and Google IPOs, and private placement and secondary market transaction histories preceding those public offerings. Time permitting, we will also analyze the Foreign Corrupt Practices Act (which, among other matters, requires that publicly traded firms properly account for and disclose bribes paid to foreign government officials), and disclosures related to the use of conflict minerals and to contracts with foreign governments in the extractive industries, i.e., oil and gas drilling. Special Instructions: If you have taken Law 559: Modern Securities Regulation (Sonsini) then you may not take Law 591: Securities Regulation (Grundfest). If you have taken Law 542: Modern Securities Fraud Litigation (Eth) you may take Law 591: Securities Regulation (Grundfest). Elements Used in Grading: Class attendance, participation and final exam.

LAW 592. Law and Race. 2-3 Units.
 This seminar explores the intersection of race with legal institutions in both historical and contemporary contexts. Given that the seminar is designed to culminate in a scholarly paper, much of the reading will consist of canonical law review articles and other forms of legal scholarship. Although students are welcome to address a wide range of paper topics, the assigned readings will include: racial profiling, racial tokenism, and critical race theory (and its discontents). Students will be evaluated upon class participation and a substantial written paper. Students in the seminar will write a substantial research paper of either 18 pages to receive 2 units of credit or 26 pages to receive 3 credits. Elements used in grading: Class participation and research paper.

LAW 593. Terrorism and the Courts. 3 Units.
 The emergence of international terrorism and governments' responses to it have led to novel questions for courts at the intersection of constitutional, criminal, international, and procedural law. This seminar will consider a series of interrelated problems that have arisen in federal courts over the treatment and punishment of suspected terrorists and compensation for victims. Topics will include habeas litigation by detainees; the creation and use of non-Article III courts such as military commissions as alternatives to criminal prosecution; congressional attempts to withdraw jurisdiction from federal courts over litigation involving terrorism; separation of powers issues involving the roles of the President, Congress, and the courts in the treatment and punishment of suspected terrorists; compensation claims by victims of terrorism (through statutory compensation funds, litigation against foreign states under the Foreign Sovereign Immunities Act, and tort litigation against individuals and entities); techniques for handling complex litigation involving terrorism; the Alien Tort Statute; and civil litigation by detainees over their treatment. The course is designed to be complementary to Professor Shirin Sinnar's Counterterrorism and the Law. Students are encouraged to take both courses. Grading will be based on class participation, a paper, and an oral presentation of the paper topic to the class. Papers meeting the requirements for Research (R) credit will be eligible for R credit with the consent of the instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Special Instructions: If the course is over-subscribed preference will be given to third year students, then to students who have relevant background in federal courts, national security, international law, or other related topics, then to second year students without such background, then to first year students. Selection within those categories will be by lottery. Students wishing to have prior coursework or experience considered in case of oversubscription should submit a short statement describing their background. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline. Elements used in grading: Class participation, written assignments, final paper and oral presentation. This course is open to first-year Law School students. Automatic grading penalty waived for writers.

LAW 600. Federal Indian Law. 3 Units.
 This course offers an overview of federal Indian law through a study of cases, statutes, and historical material. It focuses on the interlocking relationships of tribes, states, and the federal government with special emphasis on economic development, religious freedom, and environmental justice. Elements used in grading: Final Exam.

LAW 602. Religion and the First Amendment. 3 Units.
 This course covers the major doctrines and decisions interpreting the provisions of the First Amendment affecting religion, especially the free exercise and establishment clauses. Special emphasis is placed on the historical, philosophical, and theological roots of first amendment principles, and it also studies the briefs and arguments in a case currently in litigation.

LAW 603. Environmental Law and Policy. 3 Units.

This course is an introduction to federal environmental law, regulation, and policy in the United States. Throughout, the course emphasizes the cooperative and competing roles that the federal, as well as state governments, play in implementing environmental law in the United States. The course encourages students to adopt a comparative and dynamic view of environmental protection under U.S. law. We begin with a discussion of the property law roots of environmental law. Next we briefly touch on some aspects of U.S. administrative law that are essential to understanding the material that follows (students should feel free to take this class without having taken Administrative Law). Next, we turn to the National Environmental Policy Act to understand how environmental concerns are included in the process of agency decision making. This is followed by a discussion of the risk assessment and cost-benefit frameworks essential to understanding the current U.S. approach to environmental problems. We conclude this segment with a comparison of two approaches to chemical safety regulation - the U.S. Toxic Substances Control Act and the EU REACH directive. Next, we focus on three key substantive federal environmental statutes: the Clean Air Act, the Clean Water Act, and the Endangered Species Act. The course concludes with a discussion of current EPA efforts to address emissions of greenhouse gases under the Clean Air Act. Special Instructions: Substantial participation is expected and class participation constitutes twenty percent (20%) of the overall grade for the course. In addition, students are expected to complete two 1000 word written assignments during the course that will constitute forty percent (40%) of the overall grade. Finally, an in-school exam will, similar in format and length to the written assignments, constitute the remaining forty percent (40%) of the overall grade. Elements used in grading: Class participation (20%), written assignments (40%) and final exam (40%).

LAW 605. International Environmental Law. 3 Units.

This course examines the legal, scientific, political, economic, and organizational issues associated with the creation of international environmental regimes. The principal emphasis will be on the issue of climate change, with a focus on the current regime(s) and the post-Kyoto negotiations, now underway. The course will also address the Montreal Protocol for Ozone Depleting Substances, the International Convention for Regulation of Whaling, and the U.N. Convention on Straddling Fish Stocks and Highly Migratory Fish Stocks. The course examines the choice of treaty instrument, as well as the implementation and evolution of environmental regimes. The course also looks closely at the structure and performance of environmental markets as solutions to global commons problems. Finally, close attention is paid to equity and development issues that are critical in bridging north-south divides on international environmental issues. Substantial student participation is expected and class participation will constitute twenty percent (20%) of the overall grade for the course. Elements used in grading: Class participation and final paper.

LAW 606. Supreme Court Simulation Seminar. 3 Units.

This seminar provides students with the opportunity to analyze, argue, hear oral arguments and draft opinions in cases that are currently pending before the Supreme Court of the United States. Professor Larry Marshall will serve as the instructor in the seminar, but many of the Law School's esteemed group of Supreme Court litigators will be participating in one or more of the sessions. The 18 students in the seminar will be divided into two courts. One of these courts will sit five times and the other will sit four times. During each sitting, the court will hear arguments in a case currently pending before the Supreme Court. The cases chosen will provide a mix of constitutional and statutory issues, as well as a mix between criminal and civil cases. Each student will be assigned the role of a particular Justice for the entire quarter. Each student's task while sitting on cases is to do his or her best to understand that particular justice, based on that justice's prior opinions and judicial philosophy. In this sense, the seminar is intended to help promote insight into the role of judicial personality and philosophy within the decisional process. The weekly seminars will proceed as follows: In preparation for each week's session, all students (whether they are the two students arguing that week, the nine students judging that week, or the seven students observing that week) will read the lower courts' decisions, the briefs (the party briefs and selected amicus briefs) and the major precedents implicated. During the first portion of each week's session (approximately one hour), two of the students (who are members of the Court that is not sitting that week) will present oral arguments to the nine "justices" sitting that week. The arguments will be based on the briefs that were actually filed in the case. During the second segment of each week's session (approximately 45 minutes), the "justices" who are sitting that week will "conference" the case while the other non-sitting students, students who argued, instructors and guests will observe. Again, each student will be in the role of a particular justice. At the end of the "conference," the opinion-writing will be assigned to one "justice" in the majority and one "justice" in the dissent. During the final portion of each session (approximately one hour), the instructors, guests and students will engage in a broad discussion of what they just observed. This may include analysis of the briefing, discussion about the oral argument, reflections on the "conference," and, more generally, a discussion about the case and its significance. After each class, the student assigned to draft the majority opinion will have two weeks to circulate a draft to the "Court." The student writing the dissent will then have two weeks to circulate his or her opinion. The other sitting "justices" can join one of these opinions, request some changes as a condition of joining, or decide to write separately. Over the course of the Quarter, then, each student will argue one case, sit on four or five cases, and draft at least one opinion.

LAW 610. Trial Advocacy Workshop. 4 Units.

This lawyering skills course gives students an orientation to and constant practice in most basic pretrial and trial advocacy skills areas. Topics include: taking and defending depositions, motion practice, trial evidence, including admission of trial exhibits in evidence and use of prior witness statements to refresh and impeach a witness, jury selection and voir dire, opening statements, direct and cross-examination of witnesses, and closing arguments. Students will try a full jury case through to verdict with use of jurors and before a real judge in the Superior Court in Palo Alto at the end of the course. Students will also have a chance to watch the jurors deliberate and talk with them after their verdict. The course takes place during seven weeks of the Autumn Quarter with two classes (one lecture and one workshop) per week on most weeks from 4:15-9:00 (these usually occur on T, W, or Th, plus an occasional M), plus two Saturday workshops and the final weekend of jury trials, Saturday and Sunday November 16 and 17. Each day's ending time will vary; most sessions will end before 9:00. For a detailed schedule, contact Sara Abarbanel at sabarbanel@law.stanford.edu. The format for each topic begins with a lecture/discussion featuring video vignettes of various techniques and a live demonstration by an expert trial lawyer. Following the discussion portion of each topic are small group sessions during which each student practices the skills involved. Constructive feedback is given after each exercise by two of our faculty of very experienced Bay Area litigators and judges. Most exercises are also videoed for further one-on-one critique by another faculty member. The course ends with full jury trials. The central philosophy of the workshop is that skills are best acquired in an experiential manner by seeing and doing. Frequent short, well-defined exercises followed by immediate constructive feedback in a non-competitive, non-threatening atmosphere provide the core of the program. The workshop directors are Tim Hallahan and Jeff Kobrick. They have taught similar programs at Harvard Law School, the University of San Francisco School of Law, Boalt Hall, the California Continuing Education of the Bar, and in private and public interest law firms around the country. Special Instructions: If you haven't taken Evidence you must contact Mr. Hallahan before the course begins for some brief pre-course reading assignments. There are no papers or tests, but attendance at every session is required. Since we will begin our trial advocacy exercises on the first day of class, all students who are interested in taking the course (whether enrolled or on the wait-list) need to be present for the first class. (Students who are not present will be dropped from the class or waiting list unless they have made previous arrangements with the professor.) Add-drop decisions need to be resolved at the first class; no drops will be permitted thereafter. Exceptions to this rule will be made by petition only. Elements used in grading: Attendance and in-class assignments. Mandatory attendance.

LAW 612. Constitutional Law: Speech and Religion. 4 Units.

This is a course about the freedoms of speech, press, religion, association, and assembly under the First Amendment. Two-thirds of the course will be about freedoms of speech, press, and assembly. We will examine historical context, doctrinal development, and current caselaw. We will ask why government regulates speech (to prevent harms? to protect sensibilities? to redistribute power? to advance the interests and ideas of the politically powerful?), how government regulates speech (by aiming at messages? by aiming at markets? by aiming at when and where speech takes place? by conditioning subsidies?), and what justifications are ever sufficient for limiting speech. We will include consideration of the institutional press and new technologies including the Internet, as well as the rights of private organizations to determine their membership and organization. About a third of the course will be about religion. We will ask how the twin constraints of the Free Exercise and Establishment Clauses relate, looking especially at notions of neutrality, voluntarism, separation, and accommodation. Elements used in grading: Exam.

LAW 613. Dispute Systems Design. 3 Units.

Lawyers are often called upon to help design systems for managing and resolving conflicts that support or supplant existing legal structures. The crisis of September 11 led Congress to pass a law creating the September 11 Fund; a California Supreme Court challenge to its method of resolving health care disputes led Kaiser Permanente to reform its arbitration system; escalating litigation costs in financial and relationship terms have led corporate general counsels to develop alternative means, including online -- to deal with employee, customer and partner disputes; years of atrocities committed against the people of South Africa, Guatemala and many other countries led to the formation of truth commissions. Lawyers helped to structure these and many other conflict resolution systems. We'll use a case study model to survey different kinds of conflict prevention, management and resolution systems, and examine different factors in their design. Special Instructions: Grades will be based on class participation and Option 1 (section 01) a series of short essays and a short research paper; or Option 2 (section 02) a long research paper involving independent research. Students electing Option 2 will be graded on the H/P/R/F system and will receive Research credit. After the term begins, students accepted into the course can transfer from section (01) into section (02), with consent of the instructor. Negotiation Seminar (Law 615) or its substantial equivalent strongly preferred, but not required. Attendance at the first class is mandatory. Writing (W) credit is for 3Ls only. Elements used in grading: Class participation and engagement, attendance, written assignments and final paper.

LAW 615. Negotiation. 3 Units.

As a lawyer, you will probably negotiate more than you do anything else. You will negotiate not just over cases, but any time that you need something that you cannot get alone. You will negotiate with your boss, your clients, your secretary, and all of their counterparts (plus the lawyers) on the other side. You will negotiate with "the system" whether it is the court, the government, the structure of society, or the law. You will also continue to negotiate with your family, your friends, and yourself. This course is designed to: (1) develop your understanding of negotiation, and your awareness of yourself as a negotiator; (2) give you some tools and concepts for analyzing and preparing for negotiations; (3) enhance your negotiating skills through frequent role plays, reflection, and feedback; and (4) teach you how to keep learning from your own negotiation experience. In addition to negotiation skills and theory, you will be introduced to issues of representation, ethics, and the place of negotiation in our legal system. The Negotiation Seminar is an intense, interactive course. We will require weekly preparation of readings, simulations, and written assignments. Basically, you will learn by reading about specific research and doing simulated negotiations -- figuring out with the rest of the class what works and what does not, writing about what you're learning, and trying again. Because participation in the simulations is central to the course, attendance at all classes is required. Since we will begin our simulation exercises on the first day of class, all students who are interested in taking the course (whether enrolled or on the wait-list) need to be present for the first class. (Students who are not present will be dropped from the class or waiting list unless they have made previous arrangements with the professor.) Add-drop decisions need to be resolved at the first class; no drops will be permitted thereafter. Once you commit to the class, you must complete it or receive a failing grade. Exceptions to this rule will be made by petition only. Petitions of this type must be extraordinarily strong in order to be granted. Elements used in grading: Class participation, attendance and written assignments.

LAW 616. Complex Litigation. 3 Units.

This course will examine the variety of procedures used to develop and manage large-scale litigation within and outside the U.S., and the policy controversies surrounding them. Topics include class actions, multidistrict litigation, pretrial procedure, special trial and evidentiary issues, judicial case management, issues of federalism, problems of absent and future claimants, settlement issues, alternate dispute resolution techniques within litigation, and proposals for law reform. Much of the course will consider these topics as they play out in current cases, with guest lectures by judges, lawyers, and others from the U.S. and elsewhere. Early in the quarter each student will choose a recent or ongoing complex litigation to investigate. (A list of candidate litigations will be provided, but students are free to choose any complex litigation that interests them.) During the quarter, students will conduct research on the litigation including, where possible, contacting key participants for information and perspective. This research will serve as the basis for in-class discussion, focusing on different aspects of the litigation as the quarter progresses. Students will hand in 3 papers during the course of the quarter, for review and comment, but not for grading. Regular reading assignments will be tailored to allow time for this on-going student research. Elements used in grading: Final paper and class participation.

LAW 617. Public Interest Law and Practice. 2-3 Units.

This course will examine the history, theoretical frameworks, strategies and political position of public interest law practice and attorneys in the United States. We will consider the role of lawyers and the legal system in advancing reforms; different models of lawyering; ethical issues related to working as a lawyer within a social movement; the personal impacts of this type of career choice; and strategies employed by lawyering in differing settings, from issue-based non-profits to government agencies, and private public interest law firms or legal services groups. Readings will include law review articles, legal pleadings and case studies that allow analysis and exploration of the tensions and challenges that exist within the legal system for public interest practitioners. We will also consider how lawyers interact and collaborate with other participants in social justice movement. Students will be asked to produce several short papers throughout the quarter. For an additional credit and Research credit, students will be asked to produce a substantially longer paper on a related topic and can be excused from some of the shorter assignments. Elements used in grading: Attendance, class participation, written assignments. Writing (W) credit is for 3Ls only. This course is open to first-year Law School students.

LAW 620A. Criminal Prosecution Clinic: Clinical Practice. 4 Units.

Prosecution Clinic students prosecute cases at the San Jose Superior Court under the guidance of Santa Clara County prosecutors and a faculty supervisor. They formulate case strategy, identify and interview witnesses, and advocate before the court at evidentiary motions and preliminary hearings. The cases, almost all felonies, include drug offenses, thefts, burglaries, assaults, and a range of less common crimes. Police witnesses are most common, though students sometimes offer testimony from crime victims. When defendants testify or offer other witnesses, they face cross-examination by clinic students. Students spend three full days a week in the D.A.'s office. All six students must spend all day Tuesdays and Fridays on site. Each student must also choose a third on-site day, when the student will work closely with the student's on-site supervisor. The six students need not all choose the same third day, but each student must pick a day that stays constant through the term. There generally will be two class sessions each week--a three-hour on-campus class and a lunchtime seminar in the D.A.'s office. At the beginning of the term classes focus on skills training, including direct and cross-examination, admission of physical evidence, and argument. Toward the end of the term the focus shifts to an examination and critique of the local mechanisms of criminal justice. Topics include the impact of race, gender, and class on the quality of justice; the institutional strengths and weaknesses of the actors in the system; and the ethical issues that confront prosecutors and defense lawyers. Students typically tour the Santa Clara County jail and crime lab, San Quentin Prison, and the Chaderjian Youth Correctional Facility in Stockton and have the option to spend an evening on a police ride-along. Students must submit regular written reflections on their experiences in and observations of the local justice system. Their assigned cases often will demand written court filings. Evidence is a prerequisite. In rare cases a concurrent clinic module in evidence can fulfill this requirement. Courses in criminal procedure (investigation) and trial advocacy are strongly encouraged. Class attendance is mandatory, and class participation will be considered in grading. Students will be asked to commit to the course in the summer of 2013; dropping the course after committing will not be permitted. Special Instructions: General Structure of Clinical Courses. The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students will be awarded three separate grades for their clinical quarter, each reflecting four credits. The three grades are broken into the following categories: clinical practice; clinical methods; and clinical coursework. Grading is pursuant to the H/P system. Enrollment in a clinic is binding; once selected into a clinic to which he or she has applied, a student may not later drop the course except in limited and exceptional cases. Requests for withdrawal are processed through the formal petition and clinical faculty review process described in the clinic policy document posted on the SLS website. Students may not enroll in

LAW 620B. Criminal Prosecution Clinic: Clinical Methods. 4 Units.

Prosecution Clinic students prosecute cases at the San Jose Superior Court under the guidance of Santa Clara County prosecutors and a faculty supervisor. They formulate case strategy, identify and interview witnesses, and advocate before the court at evidentiary motions and preliminary hearings. The cases, almost all felonies, include drug offenses, thefts, burglaries, assaults, and a range of less common crimes. Police witnesses are most common, though students sometimes offer testimony from crime victims. When defendants testify or offer other witnesses, they face cross-examination by clinic students. Students spend three full days a week in the D.A.'s office. All six students must spend all day Tuesdays and Fridays on site. LAW 621. Sentencing and Corrections. 3 Units.

This introductory course will familiarize students with the history, structure, and performance of America's sentencing and corrections system. Sentencing is the process by which criminal sanctions are imposed in individual cases following criminal convictions. Corrections deals with the implementation and evaluation of criminal sentences after they are handed down. In fact, the two subject areas are inseparable. The course will examine sentencing and corrections from global and historical views, from theoretical and policy perspectives, and with close attention to many problem-specific areas. We will explore sentencing theories and their application, the nature, scope and function of corrections, the impact of mass incarceration on crime and communities, the effectiveness of rehabilitation, the relationship between sanctions and crime, and the consequences of prisoner reentry. These topics will be considered as they play out in current political and policy debates. Guest lectures may include presentations by legal professionals, victims, offenders, and correctional leaders. Written Work. Each student will write two essays over the course of the quarter. Each of these essays will respond to a specific question I pose to you and the due dates will be contained in the course syllabus. The two questions will ask you to critically assess the issues, methods, and policy implications in the readings and class discussions. This course meets the SLS writing (W) graduation requirement. Special Instructions: Writing (W) credit is for 3Ls only. Elements Used in Grading: Final grades will be based on the two essays (40% each) and class participation (20%).

LAW 622A. Environmental Law Clinic: Clinical Practice. 4 Units.

Students enrolled in the Clinic provide legal assistance to national, regional and grassroots non-profit organizations on a variety of environmental issues, with a focus on complex natural resource conservation and biodiversity matters at the interface of law, science and policy. Working under the direct supervision of practicing environmental attorneys, Clinic students help screen new matters and potential clients; formulate strategies; research and develop factual and legal issues; and prosecute administrative and litigation proceedings. During the term, students may meet with clients, opposing counsel or agency decision makers; review administrative records; develop expert testimony; draft comment letters, petitions, pleading or briefs; and/or attend and participate in administrative and court hearings. In regular one-on-one meetings with supervising faculty, there is a heavy emphasis on polishing persuasive writing and oral advocacy skills. In addition, students participate in a weekly seminar where we examine strategic, ethical and substantive issues arising out of the Clinic's work. No prior substantive experience or background in the environmental/natural resource field is necessary, but an interest in learning about these areas of the law is important. Special Instructions: General Structure of Clinical Courses The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students will be awarded three separate grades for their clinical quarter, each reflecting four credits. The three grades are broken into the following categories: clinical practice; clinical methods; and clinical coursework. Grading is pursuant to the H/P system. Enrollment in a clinic is binding; once selected into a clinic to which he or she has applied, a student may not later drop the course except in limited and exceptional cases. Requests for withdrawal are processed through the formal petition and clinical faculty review process described in the clinic policy document posted on the SLS website. Students may not enroll in any clinic (full-time or advanced) which would result in them earning more than 27 clinical credits during their law school career. The rules described here do not apply to advanced clinics for students who are continuing with a clinic in which they were previously enrolled. For information about advanced clinics, please see the course descriptions for those courses. For more information about clinic enrollment and operations, please see the clinic policy document posted on the SLS website. Elements used in grading: Attendance and participation in class, professionalism, timeliness, initiative, and follow-through on project work and other class requirements. Writing (W) credit is for 3Ls only.

LAW 622B. Environmental Law Clinic: Clinical Methods. 4 Units.

Students enrolled in the Clinic provide legal assistance to national, regional and grassroots non-profit organizations on a variety of environmental issues, with a focus on complex natural resource conservation and biodiversity matters at the interface of law, science and policy. Working under the direct supervision of practicing environmental attorneys, Clinic students help screen new matters and potential clients; formulate strategies; research and develop factual and legal issues; and prosecute administrative and litigation proceedings. During the term, students may meet with clients, opposing counsel or agency decision makers; review administrative records; develop expert testimony; draft comment letters, petitions, pleading or briefs; and/or attend and participate in administrative and court hearings. Writing (W) credit is for 3Ls only.

LAW 622D. Environmental Law Clinic: Clinical Practice. 3-4 Units.

This section of the Clinic is open only to Law students who are also pursuing graduate degrees in schools other than the School of Law. Students enrolled in the Clinic provide legal assistance to national, regional and grassroots non-profit organizations on a variety of environmental issues, with a focus on complex natural resource conservation and biodiversity matters at the interface of law, science and policy. Working under the direct supervision of practicing environmental attorneys, Clinic students help screen new matters and potential clients; formulate strategies; research and develop factual and legal issues; and prosecute administrative and litigation proceedings. During the term, students may meet with clients, opposing counsel or agency decision makers; review administrative records; develop expert testimony; draft comment letters, petitions, pleading or briefs; and/or attend and participate in administrative and court hearings. In regular one-on-one meetings with supervising faculty, there is a heavy emphasis on polishing persuasive writing and oral advocacy skills. In addition, students participate in a weekly seminar where we examine strategic, ethical and substantive issues arising out of the Clinic's work. The Law School's clinical courses are offered for 9- 12 credits, as agreed upon with the instructor. Students may not enroll in any clinic (basic or advanced) that would result in their earning more than 27 clinical credits during their law school career.

LAW 622E. Environmental Law Clinic: Clinical Methods. 3-4 Units.

This section of the Clinic is open only to Law students who are also pursuing graduate degrees in schools other than the School of Law. Students enrolled in the Clinic provide legal assistance to national, regional and grassroots non-profit organizations on a variety of environmental issues, with a focus on complex natural resource conservation and biodiversity matters at the interface of law, science and policy. Working under the direct supervision of practicing environmental attorneys, Clinic students help screen new matters and potential clients; formulate strategies; research and develop factual and legal issues; and prosecute administrative and litigation proceedings. During the term, students may meet with clients, opposing counsel or agency decision makers; review administrative records; develop expert testimony; draft comment letters, petitions, pleading or briefs; and/or attend and participate in administrative and court hearings. In regular one-on-one meetings with supervising faculty, there is a heavy emphasis on polishing persuasive writing and oral advocacy skills. In addition, students participate in a weekly seminar where we examine strategic, ethical and substantive issues arising out of the Clinic's work. The Law School's clinical courses are offered for 9- 12 credits, as agreed upon with the instructor. Students may not enroll in any clinic (basic or advanced) that would result in their earning more than 27 clinical credits during their law school career.

LAW 622F. Environmental Law Clinic: Clinical Coursework. 3-4 Units.

This section of the Clinic is open only to Law students who are also pursuing graduate degrees in schools other than the School of Law. Students enrolled in the Clinic provide legal assistance to national, regional and grassroots non-profit organizations on a variety of environmental issues, with a focus on complex natural resource conservation and biodiversity matters at the interface of law, science and policy. Working under the direct supervision of practicing environmental attorneys, Clinic students help screen new matters and potential clients; formulate strategies; research and develop factual and legal issues; and prosecute administrative and litigation proceedings. During the term, students may meet with clients, opposing counsel or agency decision makers; review administrative records; develop expert testimony; draft comment letters, petitions, pleading or briefs; and/or attend and participate in administrative and court hearings. In regular one-on-one meetings with supervising faculty, there is a heavy emphasis on polishing persuasive writing and oral advocacy skills. In addition, students participate in a weekly seminar where we examine strategic, ethical and substantive issues arising out of the Clinic's work. The Law School's clinical courses are offered for 9- 12 credits, as agreed upon with the instructor. Students may not enroll in any clinic (basic or advanced) that would result in their earning more than 27 clinical credits during their law school career.

LAW 623. Advanced Environmental Law Clinic. 2-7 Units.

The Advanced Environmental Law Clinic provides an opportunity for students who have already taken the Environmental Law Clinic to continue intense individual project work on cases or matters in which they have previously been involved. Advanced students will work closely with the supervising clinic attorney on their designated projects and are expected to take increasing responsibility for managing the necessary work and representation of clients. In addition, advanced students are expected to serve as mentors to less experienced clinic students enrolled in the basic Environmental Law Clinic course and will thereby receive additional training in basic team building and supervision skills. Advanced students may arrange with the instructor to receive between two and seven units. No student may receive more than 27 overall clinical credits, however, during the course of the student's law school career. Writing (W) credit is for 3Ls only. Elements used in grading: Attendance and participation in class, professionalism, timeliness, initiative, and follow-through on project work and other class requirements.

LAW 626. Legislative Simulation: The Federal Budget. 3 Units.

How does a bill really become a law? This course is about the formal and informal American legislative and budget process. The course is part lecture, part simulation. You will learn the formal processes that govern legislating and White House policymaking, including: how a President decides what policy to propose; Congressional committee markups; House and Senate floor debate, rules, and the amendment process; conference committees; and Presidential signatures and vetoes. You will then learn how legislative coalitions are built and broken, how and why bargaining occurs, the roles of interest groups and lobbyists, how an Executive Branch tries to influence Congress, how political parties and elections influence legislative behavior, and how the press and personalities influence all of the above. While this is primarily a class about policymaking process, we will learn enough about federal budget policy to make your participation in budget legislative simulations more effective. Can your class solve America's long-term budget problems when your counterparts in Washington have so far been ineffective at doing so? Elements used in grading: Class participation (for lectures and the simulations), attendance and written assignments (memos).

LAW 628A. Oral Argument Workshop. 2 Units.

Building on the skills developed in Federal Litigation, this simulation course will give students the unique opportunity to argue and judge pretrial motions from actual federal court cases. The instructor will provide the written briefs, and each week half the class will argue and half the class will judge a motion. Preparation will require reading the cases cited in the briefs and coming to class ready either to present an argument (attorneys) or interrogate counsel (judges). Students will critique each other both orally and in writing, and the instructor will provide oral critiques of all arguments. The goals of this class are: to train students to argue in court; to provide them with a chance to polish their public speaking skills and practice thinking on their feet; to prepare students to engage in challenging dialogue with both colleagues and future clients; and to improve self-confidence. Thus, while the context of the course is litigation, the objectives are much broader than the mastery of litigation technique. This course is not open to first year Law School students. Priority will be given to those students who commit to taking the class if given consent to enroll. Please indicate your commitment on the consent form. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline. This course is not open to first year Law School students. Elements used in grading: Class attendance, participation, and preparation.

LAW 628B. Oral Argument Workshop. 1 Unit.

This course is offered in conjunction with "OAP" (Law 628-A-01). All students registered in Law 628-A-01 have the option to take an additional unit. The focus of this component will be on oral presentation skills and will consist primarily of interactive exercises designed to enhance voice and body control, increase poise, reduce anxiety, and improve overall effectiveness in public speaking. Doree Allen, the Director of the Oral Communication Program at Stanford's Center for Teaching and Learning, along with guest lecturers from throughout the university, will lead these classes with the goal of giving students an opportunity to improve their oral presentation skills in a supportive and fun environment.

LAW 629. Spanish For Lawyers. 3 Units.

The Spanish and Cultural Competency for Lawyers course offers an opportunity for students to enhance their existing Spanish communication skills in legal practice. The course will cover specific Spanish vocabulary necessary to communicate in a variety of legal settings from direct client representation in administrative and judicial proceedings to community education and policy reform efforts. The course will also provide exposure to the linguistic and cultural diversity of Latino communities and improve cultural competency for client interaction and communication. The course will emphasize speaking and listening skills, however, students will also be responsible for reading and writing assignments. Student Eligibility: Students must already have basic proficiency in Spanish. The goal of the class is to strengthen existing Spanish language skills. The class is aimed at learning Spanish legal vocabulary and developing culturally competent communication skills. To verify basic Spanish proficiency, the instructor may seek to speak with students by phone prior to admitting them.

LAW 632A. Religious Liberty Clinic: Practice. 4 Units.

The Religious Liberty Clinic will offer participating students a dynamic, real-world experience representing a diverse group of clients in disputes arising from a wide range of religious beliefs, practices, and customs in a variety of circumstances. Students will learn in class and apply in practice the laws affecting religious liberty, whether statutory or constitutional, and will be expected to counsel individual or institutional clients and litigate on their behalf with technical excellence, professionalism, and maturity. During the term, students can expect to handle a discrete accommodation project-e.g., represent a prisoner, student, or employee facing obstacles in the exercise of his or her faith-and likely also participate in a longer-term project involving religion in the public square-e.g., represent a small church, synagogue, or mosque with zoning issues, or a faith-based group seeking access to public facilities. Opportunities to draft amicus briefs may also arise. The clinic will involve administrative, trial, and appellate practice-though time constraints may not permit each student to work in all areas-united under the theme of "religious liberty for all." Students may also help in marketing and outreach efforts to the religious and wider communities. Special Instructions: General Structure of Clinical Courses. The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students will be awarded three separate grades for their clinical quarter, each reflecting four credits. The three grades are broken into the following categories: clinical practice; clinical methods; and clinical coursework. Grading is pursuant to the H/P system. Enrollment in a clinic is binding; once selected into a clinic to which he or she has applied, a student may not later drop the course except in limited and exceptional cases. Requests for withdrawal are processed through the formal petition and clinical faculty review process described in the clinic policy document posted on the SLS website. Students may not enroll in any clinic (full-time or advanced) which would result in them earning more than 27 clinical credits during their law school career. The rules described here do not apply to advanced clinics for students who are continuing with a clinic in which they were previously enrolled. For information about advanced clinics, please see the course descriptions for those courses. For more information about clinic enrollment and operations, please see the clinic policy document posted on the SLS website. Special Instructions: Religious Liberty Clinic - Clinical Practice. See "Special Instructions" section in the course description above. Writing (W) credit is for 3Ls only. Elements Used in Grading: Clinical case/project work, clinical performance, seminar preparation and participation.

LAW 632B. Religious Liberty Clinic: Clinical Methods. 4 Units.

See Law 632-A-01 for a detailed course description and enrollment instructions. Special Instructions: Religious Liberty Clinic - Clinical Methods. See "Special Instructions" in the course description Law 632-A-01. Elements Used in Grading: See Law 632-A-01.

LAW 632C. Religious Liberty Clinic: Clinical Coursework. 4 Units.

See Law 632-A-01 for a detailed course description and enrollment instructions. Special Instructions: Religious Liberty Clinic - Clinical Coursework. See "Special Instructions" in the course description Law 632-A-01. Elements Used in Grading: See Law 632-A-01.

LAW 635. The Future of Labor Law & Policy. 2 Units.

The course covers the current and past NLRB political crises, with particular focus upon rule making initiatives; union tactics and efforts to organize domestics, home care workers, agricultural and white collar workers, independent contractors and the problems peculiar to such; right-to-work legislation, particularly recent initiatives in Michigan and Indiana; the impact of recent Supreme Court and other decisions on union ability to participate in the political process; new legislation restricting public employee union activity, with particular focus on Wisconsin and union efforts to invoke the First Amendment; the First Amendment rights of free speech in the workplace in the public sector, and social media and free speech in the private sector; new and innovative dispute resolution procedures involving union recognition and discrimination issues as well as rights and interest arbitration and mediation; the globalization of labor disputes. Students will write a final paper. There are no prerequisites to this seminar, and students need not have had basic Labor Law to take it. This course prerequisite Sports Law. Students who complete this seminar will have preference for enrollment in Sports Law when it is next offered in 2014-15. This course is open to first year Law School students. Elements used in grading: Class participation and a final paper. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

LAW 638. Mediation. 3 Units.

In recent years, individuals and their lawyers have increasingly turned to mediation to resolve disputes. In mediation, the parties to the dispute, who may be represented by lawyers, are in charge of the outcome. With the assistance of a mediator they may be able to reach agreements at any stage in a dispute, in some cases avoiding litigation altogether, in other cases agreeing when the case is on appeal. This course will introduce you to the theory and practice of mediation. You will learn about the mediation process primarily by experiencing it in roleplay and hands-on exercises. The course also includes readings and discussions, brief lectures, demonstrations, student presentations, and videotapes. You will mediate disputes based on actual cases, and be coached in small groups by Bay Area mediators. The course goals are to understand the nature of conflict and principles of conflict management, to develop the communication skills essential to effective mediation, to evaluate various mediation models and mediator styles, to consider the policy and ethical implications of the expanding use of mediation, and to develop the skills necessary to represent clients in mediation. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline. Prerequisite: Negotiation (LAW 615). Mandatory attendance at first class and attendance as required by the instructor. Elements used in grading: Class participation, attendance, assignments.

LAW 639. Lawyering and Social Intelligence. 3 Units.

Building a successful legal career or practice involves both technical expertise as well as relational skills. Becoming a trusted advisor or effective advocate is essentially an interpersonal process that relies upon social and emotional skills, such as listening in ways that gain client trust and engagement or delivering tough messages in ways that reduce defensiveness and increase mutual problem solving. These skills can be learned. Unlike conceptual knowledge, they are acquired through practicing new behaviors that expand skills or undo old habits. Adult learning is strengthened through experiencing the concept in action, reflecting upon the experience and practicing it. I will construct such exercises for use in class as well as in workgroups outside of class. This course will introduce students to simple frameworks that raise awareness and understanding of social intelligence and expose them to a process of learning they can employ in their everyday interactions for continued growth and development. Special Instructions: This course develops student skills and not simply conceptual knowledge. Learning will come from consistent class attendance and a willingness to participate actively - not only in occasional role plays but primarily as one's self, practicing new behaviors that build skill sets. Written assignments will be brief weekly reflections on personal learning. Since I will establish workgroups following the first day of class, all students who are interested in taking this course (whether enrolled or on the wait-list) need to be present for the first class. (Students who are not present will be dropped from the class or waiting list unless they have made previous arrangements with the professor.) Add-drop decisions need to be made at the conclusion of the first class; no drops will be permitted thereafter as learning will depend upon intact workgroups throughout the quarter. Once you commit to the class, you must complete it or receive a failing grade. Exceptions to this rule will be made by petition only. Elements used in grading: Class participation, attendance, written assignments.

LAW 640A. Community Law Clinic: Clinical Practice. 4 Units.

The CLC is the closest thing to a general legal services office among Stanford's clinical offerings. Based in East Palo Alto, the CLC provides students with the opportunity to provide direct legal services to low-income residents, while thinking critically about the role of lawyers and lawyering in solving the problems of America's so-called "working poor." The Clinic's practice is in three areas: (1) housing (eviction defense and Section 8 termination); (2) wage and hour and related workers' rights; and (3) criminal record expungement. The practice areas are selected and designed to lie at the intersection where the community's unmet legal needs and students' learning needs correspond; the cases enable students to engage in a wide-range of conventional lawyering activities (interviewing, counseling, negotiation, fact investigation, legal research), while also working on the very pressing problems of Stanford's low-income neighbors. Students are responsible for their cases from intake through disposition, which can be reached through negotiation or adversarial proceeding at an administrative agency or in court. Students also have the chance to participate in outreach or policy-level projects, such as representing the clinic on a state or regional committee on a substantive issue, doing community education workshops at sites around the Peninsula, and/or legislative research and advocacy. In the clinic seminar and in regular supervision, students are encouraged to interrogate the effectiveness of the legal system at delivering "justice" for their clients and to explore creative ways that legal knowledge can be deployed to attack the social problems attendant to low wages, substandard and unstable housing, and other features of low-income life in Silicon Valley.

Special Instructions: General Structure of Clinical Courses
The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students will be awarded three separate grades for their clinical quarter, each reflecting four credits. The three grades are broken into the following categories: clinical practice; clinical methods; and clinical coursework. Grading is pursuant to the H/P system. Enrollment in a clinic is binding; once selected into a clinic to which he or she has applied, a student may not later drop the course except in limited and exceptional cases. Requests for withdrawal are processed through the formal petition and clinical faculty review process described in the clinic policy document posted on the SLS website. Students may not enroll in any clinic (full-time or advanced) which would result in them earning more than 27 clinical credits during their law school career. The rules described here do not apply to advanced clinics for students who are continuing with a clinic in which they were previously enrolled. For information about advanced clinics, please see the course descriptions for those courses. For more information about clinic enrollment and operations, please see the clinic policy document posted on the SLS website. Elements used in grading: Clinical case/project work, seminar preparation and participation, attendance, reflection papers and project. Writing (W) credit is for 3Ls

LAW 640B. Community Law Clinic: Clinical Methods. 4 Units.

The CLC is the closest thing to a general legal services office among Stanford's clinical offerings. Based in East Palo Alto, the CLC provides students with the opportunity to provide direct legal services to low-income residents, while thinking critically about the role of lawyers and lawyering in solving the problems of America's so-called "working poor." The Clinic's practice is in three areas: (1) housing (eviction defense and Section 8 termination); (2) wage and hour and related workers' rights; and (3) criminal record expungement. The practice areas are selected and designed to lie at the intersection where the community's unmet legal needs and students' learning needs correspond; the cases enable students to engage in a wide-range of conventional lawyering activities (interviewing, counseling, negotiation, fact investigation, legal research), while also working on the very pressing problems of Stanford's low-income neighbors. Students are responsible for their cases from intake through disposition, which can be reached through negotiation or adversarial proceeding at an administrative agency or in court. Students also have the chance to participate in outreach or policy-level projects, such as representing the clinic on a state or regional committee on a substantive issue, doing community education workshops at sites around the Peninsula, and/or legislative research and advocacy. In the clinic seminar and in regular supervision, students are encouraged to interrogate the effectiveness of the legal system at delivering "justice" for their clients and to explore creative ways that legal knowledge can be deployed to attack the social problems attendant to low wages, substandard and unstable housing, and other features of low-income life in Silicon Valley.

Special Instructions: General Structure of Clinical Courses
The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. For information about advanced clinics, please see the course descriptions for those courses. For more information about clinic enrollment and operations, please see the clinic policy document posted on the SLS website. Elements used in grading: Clinical case/project work, seminar preparation and participation, attendance, reflection papers and project. Writing (W) credit is for 3Ls only.

LAW 641. Constitutional Litigation. 3 Units.

This is a course in advanced and applied constitutional law. It focuses on one of the central ways in which constitutional claims are actually litigated: in lawsuits against public officials and local governments. The bulk of the course looks at litigation under 42 U.S.C. § 1983. We will consider topics such as what it means to act "under color of state law;" absolute and qualified immunities; government liability for the acts of individual officials; remedies for constitutional violations, including monetary and injunctive relief; and the remedial issue nearest and dearest to many lawyers' hearts: attorney's fees awards. In addition, we will briefly examine Bivens and Federal Tort Claims Act litigation. This course is particularly useful for students who plan to clerk in Federal courts, as much of their dockets involves §1983 litigation. This course complements Federal Courts (Law 283) and students who plan to clerk will benefit from taking both courses. This course is not open to 1Ls. Prerequisite - Constitutional Law I (Law 203). Elements used in grading: Class participation, attendance, and final exam.

LAW 642. Advanced Community Law Clinic. 2-7 Units.

The Advanced Community Law Clinic offers law students who already have some significant civil clinical experience the opportunity to work under supervision on more advanced projects and cases being handled by the Stanford Community Law Clinic, including litigation and other matters. Advanced Clinic students will also work with Clinical Supervising Attorneys to provide direction and guidance to those enrolled in the Community Law Clinic for the first time, in areas in which Advanced Clinic students have already acquired some expertise. In addition, Advanced Clinic students may function as team leaders on larger projects in which the Clinic is engaged. Advanced students may arrange with the instructor to receive between two and seven units. No student may receive more than 27 overall clinical credits, however, during the course of the student's law school career. Special Instructions: Completion of the Community Law Clinic (Law 640) or its equivalent is a prerequisite for the advanced clinic. Elements used in grading: Participation, reflective paper and project. Writing (W) credit is for 3Ls only.

LAW 643. Medical-Legal Issues in Children's Health. 4 Units.

(Same as PEDS211) This service-learning seminar is open to law and medical students interested in exploring the link between poverty and children's health, and how the professions can work together to improve health outcomes for low-income children. The course consists of four components: (1) weekly class meetings in which we will discuss a series of medical-legal issues (e.g., asthma, immigration, health insurance, etc.) with guest lecturers from the medical and legal fields, selected for their expertise on each topic.; (2) intake interviews with patient families at Lucile Packard Children's Hospital or the Ravenswood Family Health Center in East Palo Alto, and an analysis of their medical-legal issues; (3) a group project focused on a local or state-level medical-legal policy issue (e.g., obesity prevention); and (4) a final paper that law and medical students will co-write in pairs. The course is linked to the Peninsula Family Advocacy Program. You can learn more about it at www.peninsulafap.org.

LAW 644. Disability Rights. 3 Units.

This is a survey course of disability rights law, with an emphasis on landmark federal and state legislation and jurisprudence in the areas of employment, government services, public accommodations, education, housing and personal autonomy. It includes a review of such statutes as the Americans with Disabilities Act (ADA), Section 504 of the Rehabilitation Act, Individuals with Disabilities Education Act (IDEA), fair Housing Act Amendments and the California Developmental Services ("Lanterman") Act. The course has a "cross-disability" orientation insofar as it addresses the rights and treatment of persons with mobility and communication impairments, as well as developmental and psychiatric disabilities. The course looks at disability from a civil and human rights perspective-- rather than a medical or welfare viewpoint. Some of the issues to be covered are: institutional mistreatment, de-institutionalization, social integration, educational equity, international customary disability law, peer advocacy and self-determination, the right to refuse treatment and assisted suicide. There will be frequent guest speakers and legal skills in-class simulation exercises.

LAW 645. Reading The Constitution. 2 Units.

This seminar is devoted to a careful reading of the entire text of the U.S. Constitution, from the Preamble to the 27th Amendment. From "We the People," through the structure of government, to the Bill of Rights, the Reconstruction amendments, and Progressive and Modern Era Amendments, the text of the Constitution tells an overall story about America's supreme law that is rich, intricate, and surprising, yet too often neglected, even in law school. In addition to the text itself, we will consult historical materials from the drafting and ratification of the parts under consideration each week. And throughout the seminar, we will occasionally step back to consider and assess various classic statements by scholars, judges, and presidents about how to best read the Constitution. The goal of the course is the title of the course: to read the Constitution with attentive and open eyes; to become familiar with its text, even the parts that are rarely litigated; to learn some of the history of its creation, even the stories that do not fill amicus briefs; to consider how the different clauses and sections may relate to each other; and to examine several different methods of reading the Constitution as a whole. Elements used in grading: Class Participation, Written Assignments, Final Paper.

LAW 649A. Cyberlaw/Fair Use Clinic: Advanced. 4 Units.

This is a hands-on, project-oriented seminar, in which students work on a wide range of cyberlaw projects with lawyers from the Center for Internet and Society's Fair Use Project and with lawyers from the Electronic Frontier Foundation. There are significant faculty-student interactions through meetings to discuss the projects and an associated bi-monthly discussion seminar covering advanced cyberlaw topics. This clinical program provides law students with the opportunity to represent clients in cutting-edge issues of intellectual property and technology law, in the public interest. Through the hands-on experience of representing clients (under the supervision of the faculty) in various fora, students learn professional responsibility and advocacy skills, substantive law and procedural rules related to their projects, and examine the concept of the public interest in intellectual property and technology law. Clients vary widely, and may be individual artists; technologists; non-profit institutions; coalitions; etc. In the past, students have drafted amicus briefs, counseled nonprofits on public-interest initiatives, created a patent licensing scheme, represented independent and documentary filmmakers who are pursuing legislation in Congress, and counseled artists developing new technology-based art forms, among other projects. Thus, the skills each student learns also vary according to project. The classroom component explores public interest practice in tech law in various fora, and spends significant time on student projects.

LAW 649B. Cyberlaw/Fair Use Clinic: Advanced. 3 Units.

This is a hands-on, project-oriented seminar, in which students work on a wide range of cyberlaw projects with lawyers from the Center for Internet and Society's Fair Use Project and with lawyers from the Electronic Frontier Foundation. There are significant faculty-student interactions through meetings to discuss the projects and an associated bi-monthly discussion seminar covering advanced cyberlaw topics. This clinical program provides law students with the opportunity to represent clients in cutting-edge issues of intellectual property and technology law, in the public interest. Through the hands-on experience of representing clients (under the supervision of the faculty) in various fora, students learn professional responsibility and advocacy skills, substantive law and procedural rules related to their projects, and examine the concept of the public interest in intellectual property and technology law. Clients vary widely, and may be individual artists; technologists; non-profit institutions; coalitions; etc. In the past, students have drafted amicus briefs, counseled nonprofits on public-interest initiatives, created a patent licensing scheme, represented independent and documentary filmmakers who are pursuing legislation in Congress, and counseled artists developing new technology-based art forms, among other projects. Thus, the skills each student learns also vary according to project. The classroom component explores public interest practice in tech law in various fora, and spends significant time on student projects. After completing the initial 7-unit Cyberlaw/Fair Use Clinic: Advanced course, students may enroll again for either 3 or 4 credits by consent of the instructor.

LAW 650. Advanced Negotiation: Public Policy. 3 Units.

Advanced Negotiation courses are designed to take students beyond the two-party, lawyer-client negotiations that were the focus of the Negotiation Seminar, to examine many facets of negotiation complexity, both in terms of the participants and topics. This section will focus on multi-party negotiations, working in teams, decision-making in groups, and negotiating on behalf of stakeholder organizations to solve complex problems, achieve meaningful results on behalf of constituencies or the public good, or to impact or make policy-related decisions or agreements. We will study a diverse set of case studies and simulations addressing policy issues including natural resources management, land use and water disputes, economic development, political logjams on Capitol Hill, implementation of the 9/11 Commission recommendations, and efforts to mitigate and adapt to climate change. The goal of the class is for each student to become more expert and adept: (a) In understanding, analyzing, and mapping multiparty public policy negotiations, for purposes of strategic intervention, negotiation preparation, or policy analysis; (b) In participating skillfully and effectively, whether directly as a party or a stakeholder, as a lawyer representing a client, or an organizational officer; and (c) In designing and facilitating successful stakeholder dialogue and consensus building processes. As in all Gould Center courses, class sessions are highly interactive, the curriculum and readings highly interdisciplinary, and the relationship between experiential and analytical learning highly integrated. Students will be engaged in a number of negotiation exercises and simulations requiring a significant level of engagement and providing an equivalent level of personal, professional and intellectual development rewards. Special Instructions: Attendance at and participation in the simulations is required. Passing is dependent upon active participation and submission of several group and individual short papers. Prerequisite: Negotiation Seminar (Law 615) or its substantial equivalent. Advanced degree students (and graduate students in other departments and programs) are encouraged to enroll provided that they have previous negotiation training or equivalent practice experience. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Students approved for "R" credit will be graded on the H/P/R/F system. Elements used in grading: Class participation and engagement, including simulations; attendance; preparation for and contributions to discussion; short written assignments; final paper and oral presentation.

LAW 652. Animal Law. 2 Units.

This course presents a survey of the historical and current status of this rapidly developing specialty. In brief, animal law encompasses all areas of the law in which the nature -- legal, social or biological -- of nonhuman animals is an important factor. It is an objective and logical specialization of a challenging area -- one with a growing number of cases and laws, increasing public and practical interest, and significantly different historical, legal and philosophical foundations than most other courses. Topics covered include animal cruelty, animals as property, tort claims regarding animals, farm animals, animals in entertainment, and federal issues regarding animals. The Animal Law course has been described as intellectually stimulating and ethically challenging, and synthesizes a wide range of legal concepts, and the course materials apply traditional ideas to animals in new ways. Students have called it a great bar review class, because concepts from many areas of law are covered with respect to their application to animals and their interests. More and more firms, large and small, are providing pro bono (and paying) work in the animal law area, as the field gains momentum and reputability in the legal community. Mr. Wagman is a partner at Schiff Hardin in San Francisco, with a full-time animal law practice, representing organizations and individuals in a wide range of cases. He is one of the authors of the Animal Law casebook, and has been practicing animal law for most of his 20-year career. His practice includes litigation, consultation, legislative work, and extensive writing and lecturing on various animal law topics. The class includes regular updates on his current cases, as well as real-life experiences from the front lines of the animal law frontier. Special Instructions: Students have the option to write an independent research paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: Final exam or 18 page independent research paper.

LAW 653. Corporate Law: Theory and Practice. 2 Units.

This class will bring leading academics and members of the corporate bar, business and investment communities, judges and regulators to the law school to discuss new research, as well as new practice and regulatory issues. The idea is to engage students in the theoretical and policy debates and to understand how these concerns affect business and the practice of law.

LAW 654. Law and Biosciences Workshop. 2-3 Units.

This workshop seminar will provide students with the opportunity to examine and critique cutting-edge research and work in the field of law and the biosciences. Although it is open to all students, the seminar is designed especially for those with an interest in the field who wish to stay abreast of current issues, work, and ideas. In each class, an academic expert, policy maker, or practitioner will present his or her current research or work and engage in a robust discussion. Special Instructions: Grades will be based on class participation and; Option 1 (Section 01, 2 units) - You will receive a course credit satisfying the Writing (W) credit if you choose to prepare discussion questions and to write a short reflection paper for a total of six workshop dates. Grading for this option is Mandatory P/R/F. Option 2 (Section 02, 3 units) - Ten students will have the option, on top of the extra preparation, to write a longer independent research paper for Research (R) credit, with consent of the instructor. Students may receive three units for this option and will be graded on the H/P/R/F system. Students approved for "R" credit will be enrolled in Section 02. Elements used in grading: Class participation, attendance, written assignments and final paper. This course is open to first-year Law School students. Writing (W) credit is for 3Ls only.

LAW 656. International Conflict Resolution. 3 Units.

This seminar examines the challenges of managing and resolving violent inter-group and international conflicts. Employing an interdisciplinary approach drawing on social psychology, political science, game theory, and international law, the course identifies various tactical, psychological, and structural barriers that can impede the achievement of efficient solutions to conflicts. We will explore a conceptual framework for conflict management and resolution that draws not only on theoretical insights, but also builds on historical examples and practical experience in the realm of conflict resolution. This approach focuses on the following questions: (1) how can the parties to conflict develop a vision of a mutually bearable shared future; (2) how can parties develop trust in the enemy; (3) how can each side be persuaded, as part of a negotiated settlement, to accept losses that it will find very painful; and (4) how do we overcome the perceptions of injustice that each side are likely to have towards any compromise solution? Among the conceptual issues we will examine include the problem of spoilers who seek to sabotage agreements, the role of mediators, the role international legal rules can play in facilitating or impeding conflict resolution, and the advantages and disadvantages of unilateral versus and reciprocal measures in advancing conflict resolution efforts. Particular conflicts we will explore include the Northern Ireland conflict, the Israeli-Palestinian conflict, and the U.S.-Soviet Cold War rivalry. Special Instructions: Total enrollment in this course will be limited to 20. Initial Law student enrollment will be limited to 10. International Policy Studies students will be given priority to enroll in this course. The remaining spaces will be filled (and the number of Law School students to be admitted will be determined) after the first class. Students may not add this class after the first class without the consent of the instructor. This course is cross-listed with the International Policy Studies and Psychology Departments (Same as IPS 250 and PSYCH 383). Special Instructions: Section 01: Grades will be based on class presentation, short presentation paper, class participation, and final paper. Section 02: Five students will have the option, to write an independent research paper for Research (R) credit, with consent of the instructor, in lieu of the final paper for section 01. Other course requirements -- class presentation, short presentation paper and class participation. Elements used in grading: Class presentation, short presentation paper, class participation, and final paper. This course is open to first-year Law School students.

LAW 658A. International Human Rights and Conflict Resolution Clinic: Clinical Practice. 4 Units.

In the past half-century, human rights advocates have transformed a marginal utopian ideal into a central element of global discourse, if not practice. This course examines the actors and organizations behind this remarkable development, as well as the vast challenges faced by advocates in the recent past and today. Increasingly, human rights as a framework has become essential to a broad range of situations of tension and conflict. This course interrogates the nature of engagement by human rights practitioners, as well as approaches adopted by those focused on the management of violent conflict. What are the origins of the human rights movement and where is it headed? What does it mean to be a human rights activist? What are the main challenges and dilemmas facing those engaged in rights promotion and defense? How is conflict resolution consistent with human rights advocacy? When and where are these approaches in tension? The course also develops advocacy skills through in-class sessions, role play exercises and engagement in, and critical assessment of clinical projects in human rights.

Class sessions introduce students to human rights advocacy and conflict management techniques through discussion of the readings and related issues, as well as through student presentations critiquing their participation in supervised clinical projects. The readings and seminar sessions expose students to some of the practical manifestations of the main debates and dilemmas within the human rights and conflict resolution movement(s). These include several of the ethical and strategic issues that arise in the course of doing fact-finding and advocacy and balancing the often differing agendas of western international nongovernmental organizations (INGOs) and their counterparts in the (frequently non-western) developing world. The readings also consider tensions within the field of conflict resolution, as well as between conflict resolution and human rights.

Several class sessions will focus on fact-finding and advocacy skills. One or more of these sessions will be full-day, role play exercises. In these full-day sessions, students will engage in human rights research, documentation, negotiation and dispute management exercises, and advocacy role-playing.

In some sessions, part of the class will be devoted to presentations by students and clinical 'rounds'. These presentations will consider one or more issues that arise in the course of students' own engagement in advocacy projects through the International Human Rights and Conflict Resolution Clinic.

During the course of the quarter, students will also be required to draft several brief fact-finding/advocacy pieces (these will be explained in class), and write short, critical reflection papers (2-4 pages, double-spaced, or 500-1,000 words, thought pieces) on the readings.

Special Instructions: General Structure of Clinical Courses

The Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers.

Students enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis.

Clinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor.

The work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours."

Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students will be awarded three separate grades for their clinical quarter,

LAW 658B. International Human Rights and Conflict Resolution Clinic: Clinical Methods. 4 Units.

In the past half-century, human rights advocates have transformed a marginal utopian ideal into a central element of global discourse, if not practice. This course examines the actors and organizations behind this remarkable development, as well as the vast challenges faced by advocates in the recent past and today. Increasingly, human rights as a framework has become essential to a broad range of situations of tension and conflict. This course interrogates the nature of engagement by human rights practitioners, as well as approaches adopted by those focused on the management of violent conflict. LAW 659. Advanced Negotiation: Transactions. 3 Units.

Complex and multi-party negotiations permeate law practice and life. Advanced Negotiation is designed to take students beyond the two-party, lawyer-client negotiations that were the focus of the Negotiation Seminar, to examine many facets of negotiation complexity, both in terms of the participants and topics. Advanced Negotiation: Transactions will focus on more complex negotiations, as well as multi-party negotiations, working in teams, and negotiating on behalf of complex organizations (e.g., governments, corporations, unions) on diverse issues, including: intellectual property; cross-border and public-private transactions; restructuring agreements. The goals of the class are twofold, for students (1) to acquire an added theoretical base beyond what was covered in the Negotiation Seminar through which to analyze and prepare for negotiations, and (2) to expand their skills through deeper examination of various actual negotiation cases and complex simulations. Special Instructions: Attendance at and participation in the simulations is required. Passing is dependent upon active participation, a series of short papers and in-class presentation. Prerequisite: Negotiation Seminar (Law 615) or its substantial equivalent. Elements used grading: Attendance, participation, in-class negotiations and out-of-class preparation, and short papers.

LAW 660A. Youth and Education Advocacy Clinic: Clinical Practice. 4 Units.

The Youth and Education Advocacy Clinic offers students the opportunity to participate in a wide variety of educational rights and reform work, including direct representation of youth and families in special education and school discipline matters, community outreach and education, school reform litigation, and/or policy research and advocacy. All students will have an opportunity to represent elementary and high school students with disabilities in special education proceedings, to represent students in school discipline proceedings, or to work with community groups in advocating for the provision of better and more equitable educational opportunities to their children. In addition, the clinic may pursue a specific policy research and advocacy project that will result in a written policy brief and policy proposal. nStudents working on special education matters will have the opportunity to handle all aspects of their clients' cases. Students working in this area will interview and counsel clients, investigate and develop facts, work with medical and mental health professionals and experts, conduct legal and educational research, create case plans, and represent clients at individual education program (IEP) team meetings, mediation or special education due process hearings. This work will offer students a chance to study the relationship between individual special education advocacy and system-wide reform efforts such as impact litigation.nStudents working on school discipline matters will interview and counsel clients, investigate and develop facts, interview witnesses, conduct legal and educational research, create case plan, and represent clients at school discipline hearings such as expulsion hearings. Such hearings provide the opportunity to present oral and written argument, examine witnesses, and present evidence before a hearing officer. If appropriate and necessary, such proceedings also present the opportunity to represent students on appeal before the school district board of trustees or the county board of education.nThe education clinic includes two or three mandatory training sessions to be held at the beginning of the term, a weekly seminar that focuses on legal skills and issues in law and education policy, regular case review, and a one hour weekly meeting with the clinic instructor. Admission is by consent of instructor. nSpecial Instructions: nGeneral Structure of Clinical Courses nThe Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. nStudents enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. nClinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. LAW 660C. Youth and Education Law Project: Clinical Coursework. 4 Units.

The Youth and Education Advocacy Clinic offers students the opportunity to participate in a wide variety of educational rights and reform work, including direct representation of youth and families in special education and school discipline matters, community outreach and education, school reform litigation, and/or policy research and advocacy. All students will have an opportunity to represent elementary and high school students with disabilities in special education proceedings, to represent students in school discipline proceedings, or to work with community groups in advocating for the provision of better and more equitable educational opportunities to their children. In addition, the clinic may pursue a specific policy research and advocacy project that will result in a written policy brief and policy proposal. nStudents working on special education matters will have the opportunity to handle all aspects of their clients' cases. Students working in this area will interview and counsel clients, investigate and develop facts, work with medical and mental health professionals and experts, conduct legal and educational research, create case plans, and represent clients at individual education program (IEP) team meetings, mediation or special education due process hearings. This work will offer students a chance to study the relationship between individual special education advocacy and system-wide reform efforts such as impact litigation.nStudents working on school discipline matters will interview and counsel clients, investigate and develop facts, interview witnesses, conduct legal and educational research, create case plan, and represent clients at school discipline hearings such as expulsion hearings. Such hearings provide the opportunity to present oral and written argument, examine witnesses, and present evidence before a hearing officer. If appropriate and necessary, such proceedings also present the opportunity to represent students on appeal before the school district board of trustees or the county board of education.nThe education clinic includes two or three mandatory training sessions to be held at the beginning of the term, a weekly seminar that focuses on legal skills and issues in law and education policy, regular case review, and a one hour weekly meeting with the clinic instructor. Admission is by consent of instructor. nSpecial Instructions: nGeneral Structure of Clinical Courses nThe Law School's clinical courses are offered on a full-time basis for 12 credits. This allows students to immerse themselves in the professional experience without the need to balance clinical projects with other classes, exams and papers. nStudents enrolled in a clinic are not permitted to enroll in any other classes, seminars, directed research or other credit-yielding activities within the Law School or University during the quarter in which they are enrolled in a clinic. Nor are they allowed to serve as teaching assistants who are expected to attend a class on a regular basis. There is a limited exception for joint degree students who are required to take specific courses each quarter and who would be foreclosed from ever taking a clinic unless allowed to co-register. These exceptions are approved on a case-by-case basis. nClinic students are expected to work in their clinical office during most business hours Monday through Friday. Students are also expected to be available by e-mail or cell phone when elsewhere during those hours. Because students have no other courses (and hence no exams or papers), the clinical quarter begins the first day of classes and runs through the final day of the examination period. Students should not plan personal travel during the Monday to Friday work week without prior authorization from the clinical supervisor. nnThe work during a typical week in a clinic is divided into three components. First, as they are for practicing attorneys, most of the hours of any week are taken up by work on client matters or case work (this time includes meetings with instructors to discuss the work). Again, as is the case for practicing lawyers, in some weeks these responsibilities demand time above and beyond "normal business hours." Second, students will spend approximately five-to-seven hours per week preparing for and participating in weekly discussions or other group work in their individual clinic (scheduling varies by clinic). Third, over the course of the quarter each clinic student (with the exception of those enrolled in the Criminal Prosecution Clinic) is required to prepare for and attend approximately five inter-clinic group sessions. Students will be awarded three separate grades for their clinical quarter, each reflecting four credits. The three grades are broken into the following categories: clinical practice; clinical methods; and clinical coursework. Grading is pursuant to the H/P system. nEnrollment in a clinic is binding; once selected into a clinic, a student may not later drop the course except in limited and exceptional cases. Requests for withdrawal are processed through the formal petition and clinical faculty review process described in the clinic policy document posted on the SLS

LAW 661. Advanced Negotiation: International. 3 Units.

Building on skills developed, tools acquired and theory learned in the Gould Center's basic negotiation course, this advanced seminar explores how lawyers, diplomats, NGOs and citizen advocates can successfully negotiate bilateral agreements and multilateral agreements in the international field. We will study the unique process dynamics of international treaty-making, cross-border agreement negotiations, and multi-party consensus building processes. We will explore the role of power, culture, agency, and strategy in international negotiation, and we will analyze the design and conduct of effective negotiation campaigns. We will examine negotiation processes in the context of geopolitical relations, nuclear arms control, US-Mexico border management, environmental regimes, foreign investment, natural resource development, human rights, commercial disputes, and corporate social responsibility. Our approach will involve analysis of in-depth case studies and participation in complex role-playing exercises (including at one intensive simulation to be negotiated out of class over several weeks). These cases and exercises involve negotiations between state parties as well as negotiations, although our study will also include some attention to negotiations involving non-state actors, including business corporations, NGOs, and indigenous communities. A number of class sessions will include interaction with guest participants including international lawyers, scholarly experts, diplomats, senior corporate officers and NGO leaders. Prerequisite: Negotiation Seminar (LAW 615), its substantial academic equivalent, or substantial experience in the field.

LAW 662. Advanced Youth and Education Advocacy Clinic. 2-7 Units.

The Youth and Education Advocacy Advanced Clinic provides an opportunity for students who have already successfully completed the Youth and Education Advocacy Clinic to continue their advocacy work in the Clinic and/or to pursue a discrete project related to educational equity advocacy. Examples of projects include policy research on specific topics (e.g., the provision of mental health services to youth with disabilities in the schools, the impact of school discipline policies on youth of color, or equal educational opportunities for English Language Learners); investigation and preparation for impact litigation; and community education and outreach on a specific education-related issue. All projects will be jointly designed by the instructor and the advanced student. Advanced students will also continue to participate in the Clinic's discussion of cases during case rounds.nSpecial instructions: Admission is by consent of instructor. Advanced students may arrange with the instructor to receive between two and seven units. No student may receive more than 27 overall clinical credits, however, during the course of the student's law school career. Elements used in grading: Projects and class participation. Writing (W) credit is for 3Ls only.

LAW 663. Advanced International Human Rights and Conflict Resolution Clinic. 2-7 Units.

The International Human Rights and Conflict Resolution Advanced Clinic offers the opportunity for students who have already successfully completed an International Human Rights and Development Clinic to pursue one or more specific projects in conjunction with the Clinic, either independently or in collaboration with colleague(s) enrolled in the regular clinic. Any travel will be strictly contingent on the Advanced Clinical student's availability and the needs of the project. Advanced Clinical students are expected to participate in as much of the regular clinical seminar and seminar simulations as possible given pre-existing scheduling constraints. Advanced students may arrange with the instructor to receive between two and seven units. No student may receive more than 27 overall clinical credits, however, during the course of the student's law school career. Writing (W) credit is for 3Ls only. Elements used in grading: Project work, writing assignments, case preparation, attendance and class participation.

LAW 664. Advanced Legal Writing: Business Transactions. 3 Units.

This course is designed to give students practical preparation in drafting and analyzing contracts and managing business transactions. It should especially appeal to students interested in working in a law firm and practicing transactional law (be it corporate, finance, intellectual property, environmental, real estate, etc.). It will also appeal to those interested in business litigation who would like to gain some basics in contract analysis and those curious about the work of transactional lawyers. The course offers a wide range of realistic legal writing and drafting problems--completed both inside and outside of class. These drafting assignments will help students improve their writing, drafting, and editing skills and develop their sensitivity to the expectations of the attorneys and clients for whom they will be working. In the course, students will learn the foundational tools necessary to analyze a variety of business agreements. Students will learn how to write clear, effective, plain language contracts. Students will also be exposed to other transactional writing and learn how to manage complex business transactions. Special Instructions: Students on the waitlist for the course will be admitted if spots are available on the basis of priority and Degree of Study. Students may not drop this course after the second day of class. Corporations (Law 242) is a prerequisite for all but LLM (CGP) students. A substantial mark-up of a contract is due on the last day of class. Assignment deadlines. Late papers are subject to grading penalties. Writing credit is for 3Ls only. Elements used in grading: Class participation, attendance, written assignments and final paper.

LAW 668. Legal Technology and Informatics. 2-3 Units.

Legal technology is rapidly transforming both the practice and nature of law. This class seeks to explore both the current trends and the future possibilities of this transformation, as we begin to train the future generation of technology savvy lawyers, and technologists who understand the intricacies and potential of what the law could be. Legal informatics could be defined as a computational perspective of law: where does legal information reside, how is it manipulated, and which algorithms and data structures are used in various legal functions? Note that there are no prerequisites for this class beyond an interest in the subject. There are numerous examples of technologically driven legal transformation. Case law search has moved from hard copy to closed digital systems such as Westlaw and LexisNexis, and into free cloud-based systems such as Google Scholar and Wikipedia. More and more statutes are available online. Changes can be seen in e-discovery, privacy, the delivery of (online) legal services, and the budding legal technology startup community. As a result, questions arise as to the proper statutory and ethical boundaries between humans and machines in implementing legal activities. Beyond the current and near-term technologies, however, are core academic and philosophical questions that will have increasing import as machines gain in sophistication and capability. For example, although the law differentiates between the responsibility assignable to minors compared to adults, we are far from identifying the point at which an agent or robot is morally responsible for its own actions, as opposed to the responsibility being assigned to its creator.

LAW 669. Narrative Skills and the Law. 3 Units.

A lawyer who communicates not only in a cerebrally persuasive way, but also in an emotionally gripping way, has an enormous strategic advantage. Judges, jurors, and clients are all human beings, susceptible to compelling stories like everyone else. This course - conducted by a television and film writer who is also a lawyer with experience in all three branches of government, private practice, political campaigns, and a labor union - teaches how to compose an engaging story and how to apply those skills to a variety of legal situations. The first part of the course will cover the art of storytelling on both a theoretical and a practical track. On the theoretical track, students will study story drive; narrative structure; beginnings, middles, and ends; openings; plot and character; exposition; and transitions. The class will have a healthy amount of assigned reading and viewing that illustrate each of these components in literature, drama, and film. On the practical track, students will undertake writing exercises that parallel the theoretical discussion, to develop a first-hand facility with those facets of storytelling. In the second part of the course, students will apply their storytelling insights and skills to specific legal situations: A criminal case. An appellate case. A legislative proposal. A labor negotiation. A public relations crisis. Students will discuss in depth their narrative approaches to these situations, along with those taken by lawyers in other cases in the respective areas. By the end of the course students will have a powerful tool few of their peers will possess, and be able to approach their day-to-day professional challenges in a more effective and confident way.

LAW 670. White Collar Crime. 3 Units.

This course explores the law of economic and political crimes associated with the rubic "white collar crime." The class is divided thematically between mens rea issues and substantive issues. Among the substantive areas which are covered are: obstruction of justice, perjury, bribery and gratuities, mail and wire fraud, securities fraud, and money laundering. We will study specific federal statutes in considerable detail, while also speculating about the jurisprudence underlying these crimes, and related issues of prosecutorial discretion and attorney ethics. Special instructions: Students may write a paper in lieu of the final exam for Research credit. Elements used in grading: Class participation and final exam or paper. This course is open to first-year Law School students.

LAW 671. Critical Theory. 3 Units.

This course will review the most important developments in critical theory as it relates to law and jurisprudence. It will begin with a brief review of the critical tradition in Western philosophy including thinkers such as Friedrich Nietzsche, Karl Marx, Max Weber, Jean Paul Sartre and Michel Foucault. We will then look at the influence of this critical tradition in American legal theory, tracing the critical turn through the American legal realists, Critical Legal Studies and the emergence of identity based critical movements such as Critical Race Theory, Critical Feminist Theory and Critical Approaches to Sexual Orientation.

LAW 673. Advanced Legal Writing: Drafting and Negotiating Sports Law Transactions. 3 Units.

This seminar focuses on the drafting and negotiation of certain sports law transaction documents. Examples of documents to be discussed in the seminar are suite license agreements, sponsorship agreements, naming rights agreements, sports team acquisition agreements and media rights agreements. This seminar is intended to be "hands-on" with all students having the opportunity to experience being a "sports law attorney." The class room environment is intended to simulate the experiences that a junior attorney would encounter in a law firm or corporate legal setting. The major emphasis of this seminar will be on how sports transaction documents are drafted, negotiated, revised and finalized. In addition to a discussion of some of the specific sports transaction documents and the drafting and negotiation techniques related to those documents, there will be general discussions of other sports law related issues. Depending on availability and timing, the seminar may also feature periodic sports practitioners (e.g., general counsel for professional sports teams or organizations) as guest speakers to discuss their sports law experiences and their perspective on some of the documentation covered by this seminar. There will be no exams but instead there will be three independent writing assignments which will require the students to draft transaction documents based on forms from actual sports transactions. The final assignment will be a group assignment consisting of drafting, negotiating and finalizing a sports transaction document. There will also be periodic negotiation sessions. Special Instructions: Attendance at all class sessions is mandatory. Enrolled and waitlisted students must attend the first class meeting to be enrolled in the course and waitlisted students must continue to attend classes until they are either enrolled or until the final determination of their waitlist status is made. Late papers are subject to grading penalties. Elements used in grading: Class participation (quality not quantity), attendance, written drafting assignments, and the final negotiation/drafting assignment.

LAW 674. Advanced Legal Writing: Litigation. 3 Units.

Building on the skills developed in Federal Litigation, this course will give students additional practice with legal analysis, argument structure, and writing in the pre-trial litigation context. Students will draft pleadings, briefs, and documentary evidence in support of and opposition to pre-trial motions in a hypothetical case set in federal district court. Students also will complete short writing exercises in and out of class (these will consist of drills such as omitting surplus words, preferring active voice, using concrete words, punctuating carefully, etc). The goals of this class are to help students organize facts and principles in a succinct and logical way and to deepen their understanding of the legal reasoning process. In particular, students will develop proficiencies in critical reading and thinking (dissecting and synthesizing cases); legal problem solving (identifying legal issues and interpreting authority); legal analysis (accurately deriving rules and applying authority to a client's situation); and legal drafting (organizing and explaining ideas clearly using appropriate conventions). The course should appeal to students interested in litigation practice and those wishing to hone their writing skills. To apply for this course, students must complete and e-mail a Consent Application Form to the instructor at wright@stanford.edu by Monday, July 15, 2013. Consent application forms will be available on the SLS Registrar's Office website (See Registration and Selection of Classes for Stanford Law Students) when pre-registration opens each term.

LAW 675. Human Trafficking: Historical, Legal, and Medical Perspectives. 3 Units.

(Same as History 105C / 5C, SOMGEN 205) Interdisciplinary approach to understanding the extent and complexity of the global phenomenon of human trafficking, especially for forced prostitution and labor exploitation, focusing on human rights violations and remedies. Provides a historical context for the development and spread of human trafficking. Analyzes the current international and domestic legal and policy frameworks to combat trafficking and evaluates their practical implementation. Examines the medical, psychological, and public health issues involved. Uses problem-based learning and offers an optional service component.

LAW 676. Rethinking Refugee Communities. 2 Units.

Tens of millions of people have been forcibly uprooted by conflict or persecution worldwide. Although some of these people obtain asylum in advanced industrialized countries, a far larger number remain as refugees and internally-displaced people living in hastily-built refugee communities in the developing world. This project-based, interdisciplinary class is focused on exploring alternatives to improve the planning, design, and governance of refugee communities. It considers some of the legal, design, engineering, and governance challenges associated with communities of refugees and other forced migrants. The goal is to exercise and enhance students' ability to deal with multifaceted complex issues by developing recommendations that can be implemented by the Office of the United Nations High Commissioner for Refugees (UNHCR).

LAW 677. Professional Responsibility. 3 Units.

This course introduces students to the goals, rules and responsibilities of the American legal profession and its members. The course is designed around the premise that the subject of professional responsibility is the single most relevant to students' future careers as members of the bar. These issues come up on a constant basis and it is critical that lawyers be alert to spotting them when they arise and be educated in the methods of resolving them. As such, the course will address many of the most commonly recurring issues that arise, such as confidentiality, conflicts of interest, candor to the courts and others, the role of the attorney as counselor, the structure of the attorney-client relationship, issues around billing, the tension between "cause lawyering" and individual representation, and lawyers' duty to serve the underrepresented. In addition, we will delve into some more personal ethical issues that reflect on why students have chosen law as a profession and how lawyers compose careers that promote or frustrate those goals. Students will be responsible for submitting a reflection paper (three-to-five pages each) after each week of the course. Each memo will be due by the Friday of the following week. Special Instructions: Grades will be based on the papers submitted, with the instructor retaining the right to take class participation into account. Attendance is mandatory. This course is geared primarily to foreign graduate students. It is taught on an accelerated basis over the course of three weeks between the beginning of 1L classes and the beginning of 2L and 3L classes. Thus, we will meet on average nine hours per week. The exactly meeting times will be set once the graduate students' schedules are set. Elements used in grading: Attendance, class participation and written memos. Limited to LLMs, JSMs and exchange students. Required for LLMs.

LAW 678. Introduction to Microeconomics. 3 Units.

COURSE SUBSTANCE: It is no secret that economic ideas are being used increasingly in law school courses, in law practice, and in a wide variety of other fields that a law school graduate might choose to pursue - antitrust, corporate, environmental, tax, labor, and securities are just some of the immediate examples that come to mind. While many Stanford Law School students have already taken courses in economics as undergraduates, or might even have majored in economics, many of you have not. This course is offered to "bring you up to speed" so that you will not be at a disadvantage in other courses at the Law School that draw on economic ideas (or, just as importantly, not be at a disadvantage when you graduate and you encounter economic ideas and arguments on the job or in life.) So, what is economics, exactly? All societies face the problem of scarcity - there are not enough resources to satisfy people's desires for all things. Economics studies how individuals and societies deal with scarcity and the mechanisms for deciding what to produce, how to produce it, and who gets the output. It is as simple and complex as that! As you can imagine, the practical applications are nearly endless. Please note that the course focus will be microeconomics - the branch of economics that focuses on the economic behavior of individual decision-making units, such as households and firms, and how these individual decisions fit together. (I will not discuss macroeconomics in this course - i.e. the behavior of the economy as a whole, particularly inflation, unemployment, and business cycles.) More specifically, I will spend the vast majority of the course taking you through the basic supply and demand model of markets - what it is, where it came from, how and when it works, and when it does not work so well. With that base, I can branch out accordingly to help you apply it to a wide variety of relevant issues. Though I will not focus specifically on how economic ideas have been used in a legal context (there is another course and seminar that does that), I will make some effort to link the economic ideas we discuss directly to legal topics. **COURSE PROCEDURE:** My primary goal is to teach you the fundamental principles of microeconomics by (1) providing you the relevant schema to understand the basic tools of economic analysis; and by (2) drilling you extensively with problems, cases, current events, and other applied materials so as to help you develop the ability to use these tools and truly make them your own. A heavy emphasis will be placed on building a conceptual understanding of some key economic models, looking closely at the underlying assumptions of those models, and engaging in the process of questioning and relaxing those assumptions in the context of actual "real life" issues. Please do not mistake the analytical rigor I will require, to mean that we will use sophisticated mathematics. To the contrary, I believe that most powerful economic principles should be highly intuitive and non-quantitative.

LAW 679. The Rule of Law - The Foundation of Functional Communities. 2 Units.

We will seek to determine a useful meaning of the notion of the rule of law, a much diluted concept, and the importance of the rule of law in the development and security of communities of opportunity and equity around the world. We will focus on accountable government; just laws; open process for the enactment, administration and enforcement of laws and effective dispute resolution. Readings and discussion will include the works of ancient philosophers, political theorists and jurists from the 17th to the 20th century, modern political economists and contemporary scholars. This seminar will feature several experts in the field as guest lecturers and require three reaction papers from all participants. **Special Instructions:** Writing (W) credit is for 3Ls only. Elements Used in Grading: Class participation, written assignments and series of short reaction papers.

LAW 680. Pivotal Moments in American Institutions and Public Law, 1791-Present. 3 Units.

(Same as PoliSci 323) American lawyers and policymakers work today in a system of institutions that are strikingly unique in comparative and historical terms. With some exceptions, that system is characterized by relatively stable political and legal institutions, low levels of explicit corruption, high bureaucratic capacity in public organizations, and relatively open, impersonal access to political, policymaking, and legal institutions. Although these characteristics are now often taken for granted, the process through which they emerged remains remarkably opaque. In the 1780s under the Articles of Confederation, the United States was a poor developing country on the fringe of the Atlantic community with limited capacity and a striking inability to provide basic public goods, such as security. One hundred years later, it well along the way to becoming the richest nation in the world. How did this transformation occur? Drawing on judicial opinions, legal scholarship, political science, economics, and history, this course explores how institutions evolved to create such a system. It traces the problem of institutional development through several critical periods in the history of American public law, including the emergence of the Constitution, the events leading up to and following the Civil War, the Progressive era, World War II, institutional changes occurring roughly during 1964-75, and the emergence of the modern administrative state. Although the primary focus is on the American experience, we place these developments in comparative context as well.

LAW 681A. Better: Improving Decision-Making, Achievement, and Performance. 1 Unit.

This discussion group will explore how recent insights from psychology and related fields can help make us better students, better professionals, better leaders, and better people. We will consider works dealing with happiness, decision-making, learning, success, and persuasion. The reading list will include some or all of the following: Jonathan Haidt, *The Happiness Hypothesis*; Daniel Gilbert, *Stumbling on Happiness*; Atul Gawande, *Better: A Surgeon's Notes on Performance*; Paul Tough, *How Children Succeed: Grit, Curiosity, and the Hidden Power of Character*; Richard Thaler & Cass Sunstein, *Nudge: Improving Decisions about Health, Wealth, and Happiness*; Annie Murphy Paul, *Brilliant: The New Science of Smart*; and Sheryl Sandberg, *Lean In*. **Class meeting dates:** Oct 22, Nov 12, Jan 14, Feb 11, and Mar 4. **Elements used in grading:** Class attendance at all sessions and class participation. **Discussions in Ethical and Professional Values Courses Ranking Form:** To apply for this course, students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students). See Ranking Form for instructions and submission deadline.

LAW 681B. Can Philosophical Insights or Empirical Knowledge Help Us Make Hard Choices?. 1 Unit.

We will explore both two overarching themes and five specific problems that I hope are intrinsically interesting. The first general question is whether philosophical inquiries on big issues - e.g. what it means to be well-off; what obligations do we have to strangers who are radically worse off than we are; when should we observe rights-based limits on our pursuit of aggregate welfare; what does it mean to coerce another party - help us make choices when it is not obvious what we should do. The second, related question is whether empirical knowledge - e.g. psychological, economic - might help us, in addition, instead, or no more than philosophical insight. The specific questions we will focus on have little in common, other than that they are not easily answered. Some refer to decisions that seem wholly self-regarding, others that seem to refer to obligations to others. Some involve acting in professional role, some out of role. Some seem plainly important, others might seem more trivial. And it is possible, of course, that you will come to believe that philosophers or empiricists may have more to say about some of the issues that we discuss than others. The five questions I tentatively plan on exploring are: (a) how a late adolescent patient (or a doctor advising that patient) ought to choose between an operation that will significantly improve various aspects of her life over the next thirty years but poses a substantial risk of leaving her wheelchair-dependent in middle age and an operation that will lead to impaired functioning for the next few decades but mobile without mechanical aids past the age of 50 (b) how we can evaluate claims that virtually all of us living in economically prosperous countries are obliged to give away a substantial chunk of our income to save the lives of very poor people around the world (c) how we should evaluate the propriety of torture designed to elicit information about planned criminal/terrorist activities that might arguably save those who would be harmed if the plans came to fruition (d) how an attorney in a big law firm ought to determine when and whether it is appropriate to ask an administrative assistant to do work that is not directly related to the production of legal services (e.g. pick up laundry from the cleaners) and whether (and if so, why) the answer to that question is sensitive to the gender of the attorney and the attorney's administrative assistant, and finally, (e) whether existing rules governing the conduct of war that draw significant distinctions between killing soldiers and killing civilians and between killing civilians intentionally rather than knowingly are sensible. Class meeting dates: To be determined by instructor. Elements used in grading: Class attendance at all sessions and class participation. Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students). See Ranking Form for instructions and submission deadline.

LAW 681C. Group Behavior. 1 Unit.

This discussion group will look at how ethical choices are shaped by organizational and group cultures. We'll read about some famous psychological experiments such as the Milgram and Zimbardo experiments; and some studies of decisions made in corporate organizations, government bureaucracies, and a battalion of ordinary middle-class Germans tasked with hunting down Jews; and talk about what insights from this work may be relevant to lawyers' ethics and working lives. Class meeting dates: To be determined by instructor. Elements used in grading: Class attendance at all sessions and class participation. Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students). See Ranking Form for instructions and submission deadline.

LAW 681D. How Can You Represent Those People?. 1 Unit.

This discussion group will consider why a lawyer might devote herself or himself to representing people accused of crime. We will explore a range of possible answers, from guaranteeing procedural fairness to appreciating the factual indeterminacy inherent in our world to fighting racial or class-based injustice. Course materials will likely include fiction (such as *Atonement* by Ian McEwan); nonfiction essays; as well as a couple of recent films (*Bernie* and *The House I Live In*). Lisa Douglass, lecturer and staff attorney in the Stanford Community Law Clinic, will help lead the discussions. Class meeting dates: To be determined by instructor. Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students). See Ranking Form for instructions and submission deadline.

LAW 681E. Human Rights and Film. 1 Unit.

This 'Discussion' group will focus on the treatment of human rights issues in films. After reviewing brief, selected readings that provide essential background, the group will view a film (one per session, for five sessions) that focuses on issues of social conflict and human rights. The film showings will be held at Prof. Cavallaro's home (near campus). Afterwards, students will consider the human rights matters addressed in the film. Films include 'Battle of Algiers' and 'La Historia Oficial' (The Official Story, Argentina 1985).

LAW 681F. Law, Narrative, and Boundaries. 1 Unit.

As citizens and as professionals, lawyers work in a world marked and shaped by salient social boundaries. Some kinds of differences - of politics, religion/religiosity, race, ethnicity, language, wealth, gender, sexuality and other attributes - can be profoundly divisive. Broadly speaking, this class is inspired by the complex cultural and political challenge of managing these differences; a challenge that lawyers have a unique opportunity to address. The particular lens through which we will investigate this issue involves those who cross, or reflect upon in novel ways, some of these boundaries. As we read and discuss narrative accounts, we will consider what light they shed on how social and legal boundaries are created, evolve, and take on particular meanings. We will ask how law constructs or enforces lines, and how those practices change when the line itself gets blurry. Materials will include fiction and nonfiction, prose and film, on subjects such as: stories of "passing" (involving race and gender); the Thomas Jefferson-Sally Hemings relationship; attempts by Palestinians and Israelis to live peacefully with one another in the cooperative village of Wahat al-Salam/Neve Shalom; various narratives about life on both sides of the U.S.-Mexican border; and stories about the intersection of religion and sexuality. We will supplement the narratives with some theoretical material that looks at how law can shape, define, and enforce boundaries.

LAW 681G. Searching for Balance. 1 Unit.

This discussion group will explore the topic of work-life balance, in particular how women and men in law and other demanding professions negotiate the demands of work and family. Readings will include a wide range of perspectives - current social science research, contemporary fiction, feminist theory, debate in the popular media, comparative studies of other countries. We will consider the factors that make work-life balance so elusive, including government policies (eg, maternity leave and child care); gender roles in the family; the institutional culture and structure of particular workplaces; differences related to race, ethnicity and economic status; and individual choices that men and women make about how to lead lives that they find meaningful.

LAW 681H. The Ethics of Philanthropy. 1 Unit.

We will consider the moral requirements of and for philanthropy and its practices and the role of philanthropy in a democratic society. Topics may include religious and moral imperatives and motives for charitable giving, arguments (such as Peter Singer's) that one is obligated to give away almost everything to save the lives of the poor, the justifications for publicly subsidizing philanthropy (through the tax system), the unintended problematic consequences of organized philanthropy, the role of corporate philanthropy, and the ethics of using psychological and behavioral economics techniques for fundraising. Along the way, we may consider contemporary practices such as venture philanthropy and policy advocacy, the idea that philanthropy should be rooted in strategies based on empirical evidence (and critics of these approaches), and the relationship between foundations and their grantees.

Class meeting dates: To be determined by instructor.

Elements used in grading: Class attendance at all sessions and class participation.

Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students). See Ranking Form for instructions and submission deadline.

LAW 681I. The Sea Around Us: Ethical, Physical, and Emotional Connections Between Humans and the Ocean. 1 Unit.

This colloquium examines current ocean law and policy issues through a series of readings of seminal works about ethical, physical, and emotional relationships of human beings to the marine world. Through the lenses offered by several classic readings, we will examine and reinterpret the challenges of fisheries collapse, climate change, shipping, marine spatial planning, biodiversity conservation, and the management of land-sea interactions. The course is open to all law students and will be particularly interesting for those interested in studying and solving key issues of ocean policy and management, from coastal adaptation to fisheries management to cumulative impacts assessments to the relationship of human beings and the sea.

Class meeting dates: To be determined by instructor.

Elements used in grading: Class attendance at all sessions and class participation.

Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students). See Ranking Form for instructions and submission deadline.

LAW 681J. When Bad Things are Done by Good People. 1 Unit.

Some people live their lives in a manner that would lead few to declare them good people. From Tony Soprano to Saddam Hussein to Bernie Madoff, we are all familiar with individuals who have made crime and violence a constant in their lives. There are far more people, though, who try generally to live good lives, but find themselves having acted or having failed to act in ways that are widely condemned as evil.

Over the course of our five meetings, we will be looking (through some books, reports and films) at case studies of such circumstances, ranging from clergy and others in authority who covered up evidence of sexual abuse, prosecutors who ignored evidence of wrongful convictions, lawyers who turned blind eyes to client misconduct, and soldiers who committed acts they would have once found unimaginable. We will also look at a contrasting case study of individuals who resisted great pressure and kept their moral compasses well-calibrated. Throughout our inquiry, we will reflect in particular on the power of institutions and authority in affecting ethical mores.

Class meeting dates: To be determined by instructor.

Elements used in grading: Class attendance at all sessions and class participation.

Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students). See Ranking Form for instructions and submission deadline.

LAW 681K. Why are people so sure?. 1 Unit.

Many people maintain strongly held beliefs or opinions, even when there is a reasonable possibility that they are wrong with respect to their understanding of the current state of affairs or their prediction of future states. For example, many arguments about politics or policy involve highly complex factual assumptions and predictions. Is Obamacare good or bad? Should we go to war with Iran? Should we reduce the federal deficit sooner or later? Despite the difficulty of assessing the validity of current factual assumptions or forecasting the consequences of any particular decision, many people maintain great confidence in the correctness of their beliefs.

Why? One explanation, of course, is that beliefs and opinions reflect not only factual judgments but deeply held values as well, and that those values trump facts. But here, again, why are people often so resistant to acknowledging and respecting the values that lead others to their opinions?

In law school, students learn to make arguments, and, more particularly, to be able to argue even opposing sides of an issue. That facility should sensitize us to the fragility of our opinions, to the complicated mix of fact and value that inform them. Yet does it? Does law school (and legal culture more generally) leave us more respectful of the views of others? Or more entrenched in our own?

In this discussion group, we will not try to resolve any of these questions, but we will read books that engage these issues in diverse ways. We plan to select four or five books. The following are some possibilities:

- Jonathan Haidt, *The Righteous Mind*
- Kathryn Shultz, *Being Wrong: Adventures in the Margin of Error*
- Daniel Kahneman, *Thinking, Fast and Slow*
- Jonah Lehrer, *How We Decide*
- T. M. Luhmann, *When God Talks Back: Understanding the American Evangelical Relationship with God*
- Harry Frankfurt, *On Bullshit*

Begin in Autumn Quarter and run through Winter Quarter.

Class meeting dates: To be determined by instructor.

Elements used in grading: Class attendance at all sessions and class participation.

Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline.

LAW 681L. Social Movements and Dilemmas for Lawyers. 1 Unit.

This discussion group will focus on the role of law in social movements and, more specifically, on dilemmas confronting lawyers. We will begin by reading some general work on the relationship between law and social movements, focusing here on race and sexual orientation. Then we will consider a set of questions confronting lawyers interested in furthering the aims of a social movement. These include questions about tactics (Litigation or legislation? Individual representation or institutional reform cases?); who decides (What if multiple clients and/or lawyers disagree about the wisdom or theory of litigation?); whether (and if so, why) law is better suited to advance some movements than others; and the role of lawyers outside the courtroom. Among other areas, we will include material about the role of law in addressing the problems of poverty and low-wage workers.

Class meeting Dates: Sunday, 3:00 to 5:00 on Jan 12, Feb 9, Feb 23, Apr 6 and May 4.

Elements used in grading: Class attendance at all sessions and class participation.

Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students). See Ranking Form for instructions and submission deadline.

LAW 681M. Legal Fictions. 1 Unit.

This discussion group will look at questions of value and meaning in the lives of lawyers through the window of works of fiction. We will discuss one book each evening. Subject to change, the list includes: Russell Banks, *The Sweet Hereafter*; Albert Camus, *The Fall*; James Gould Cozzens, *The Possessed*; Leo Tolstoy, *The Death of Ivan Ilyich*; and Scott Turow, *Presumed Innocent*.
Class meeting dates: To be determined by instructor.
Elements used in grading: Class attendance at all sessions and class participation.
Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students). See Ranking Form for instructions and submission deadline.

LAW 681N. Law and Performance. 1 Unit.

From the rhetorical fireworks of the classic American trial scene to the band Pussy Riot's "aesthetic resistance" in Russia, law and performance have been entangled in more and less officially sanctioned ways. This discussion seminar will address questions at the intersection of law and performance, such as: What are the ethical implications of performance in the legal context?; When does or should freedom of performance come into conflict with the norms of a well-ordered society?; Can examining methods of musical interpretation help us to adjudicate between originalism and living constitutionalism?; and; What can drama reveal to us about the law? Among other readings will be included Jack Balkin's work on opera and constitutional interpretation, Kenji Yoshino's "The City and the Poet," Hannah Arendt's Eichmann in Jerusalem, and Desmond Manderson's "Making a Point and Making a Noise: A Punk Prayer."
Class meeting dates: To be determined by instructor.
Elements used in grading: Class attendance at all sessions and class participation.
Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline.

LAW 681O. The Rules of Political Warfare. 1 Unit.

This seminar will cover topics in the general area of law and politics, specifically the law concerning elections. The discussions will focus on the following five case studies: Redistricting; *Bush v. Gore* and the 2000 election; Campaign Finance; Party Primaries and Conventions; and The Voting Rights Act. Although we will discuss court cases, much of the seminar will include "war stories" from those involved in the cases or legislative battles. Students who plan to enroll in "Regulation of the Political Process" are encouraged to take this discussion seminar as well. But that class is not a prerequisite for this seminar.
Note: Los Altos location is not walkable.
Class meeting dates: Jan. 15, Jan. 29, Feb. 12, Feb. 26 and Mar. 12.
Elements used in grading: Class attendance at all sessions and class participation.
Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline.

LAW 681P. Personal Satisfaction in Legal Practice. 1 Unit.

This discussion group will explore satisfaction in professional practice. Readings will explore the conditions of current practice, with an emphasis on law firms, and what can be learned from research on happiness. Books to be excerpted may include Nancy Levit and Douglas Linder, *The Happy Lawyer*, Steven Harper, *The Lawyer Bubble*, Sonja Lyubomirsky, *The How of Happiness*, Daniel Gilbert, *Stumbling on Happiness*, Martin Seligman, *Authentic Happiness*, Bryant Garth, *After the JD*, Milton Reagan, *Eat What You Kill*, and Nash and Stevenson, *Just Enough*.
Begin in Winter Quarter and run through Spring Quarter.
Class meeting dates: To be determined by instructor.
Elements used in grading: Class attendance at all sessions and class participation.
Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline.

LAW 681Q. Failure. 1 Unit.

Lawyers are charged with prosecuting and defending the civil and criminal failings of others. In client counseling and transactional representation, we are charged with helping our clients avoid failure. And as professionals, we are enjoined to avoid failures ourselves. So we spend our careers in and around failure - anticipating it, reconstructing it, and seeking to prevent and remedy it. This seminar explores the human experience of failure in both legal and non-legal settings. What are the circumstances (structural and cognitive) that appear to lead to personal, professional, legal, political, and moral failures? How does the law shape social understandings of what failure is? What kinds of failures appear to support the belief that failure is (almost always) avoidable, and thus the fault of individuals who experience failure? Why do other failures seem inevitable? What is the narrative structure and allure of representations of failure as a condition of success? How are failure and the harms that flow from the experience of failure remembered or forgotten by individuals and groups who cause failure and those who attempt to redress it? Sources for the seminar will range from cases dealing with professional malpractice and cultural histories of professional ideology to poetry, constitutional history, theories of creative destruction, and responses to mass atrocities.
Begin in Autumn Quarter and run through Winter Quarter.
Class meeting dates: To be determined by instructor.
Elements used in grading: Class attendance at all sessions and class participation.
Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline.

LAW 681R. The Arrest, Trial, and Execution of Jesus of Nazareth. 1 Unit.

Patterned on a seminar taught by Professor Joseph Weiler at NYU Law School, this discussion seminar will study the most famous criminal case in the history of the world: the arrest, trial, and execution of Jesus of Nazareth. In five two-hour sessions at Professor McConnell's home, we will cover (1) Jesus's arrest in the the Garden of Gethsemane, (2) his trial before Jewish authorities, (3) his trial before Roman authorities, and (4) his execution, with (5) one session left for general considerations. (We will not delve into the reports of his resurrection.) We will focus on the nature of the charges against Jesus, the legal procedures employed, the evidence and the defense, the relation between imperial and local authorities, the relation between religious and secular law, the ethical roles of the individuals involved, and the mode of execution. Our primary text will be Raymond E. Brown, *The Death of the Messiah* (Yale University Press 2004), a scholarly two-volume study drawing on all the extant historical sources. Among the questions we are likely to discuss are: Was the trial fair by the standards of the day? Was Jesus guilty of any of the charges? What were the authorities and particularly Pilate trying to accomplish? What was the role of the mob? Was Roman law a constraining influence, or the opposite? What was Jesus's own perspective on the proceedings? How reliable and/or plausible are the sources? Although this subject is of religious and spiritual concern to some, including (in all likelihood) some students taking the seminar, the seminar will not consider the material in a religious way, but instead as a legal event. The instructor hopes that the class will be religiously diverse, and especially encourages non-Christian students to enroll. Discussion will, of course, be conducted in a way that is comfortable for persons of all shades of belief and disbelief. Begin in Winter Quarter and run through Spring Quarter. Class meeting dates: To be determined by instructor. Elements used in grading: Class attendance at all sessions and class participation. Discussions in Ethical and Professional Values Courses Ranking Form: To apply for this course, 2L, 3L and Advanced Degree students must complete and submit a Ranking Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students and then see Consent of Instructor Forms). See Ranking Form for instructions and submission deadline.

LAW 682. Advanced Criminal Law and Public Policy II: A Research Practicum. 3 Units.

Written Work. Students will expand upon the research begun in Petersilia's Fall 2012 class, turning their fall research papers into academic journal articles, ready for submission. This course meets the SLS writing (W) graduation requirement. This course is a follow on to the Fall 2012 course taught by Professor Petersilia. In that course, each student conducted research on an aspect of California sentencing and/or corrections. The Winter 2013 class will be designed for students who wish to expand their research projects with an eye towards journal publication. This class will also devote significant time to developing policy recommendations and delivering formal briefings to high level policymakers.

LAW 683. The Future of Human Rights: Law, Politics, and Social Justice in a Multipolar, Multimedia World. 2 Units.

Human rights law and practice are being transformed by geopolitical, technological and economic forces that unsettle the actors, strategies, and legal standards that dominated the field in the twentieth century. In this seminar, we will take stock of key global developments that underlie such a transformation, and analyze their impact on the future of human rights, as follows: 1. The rise of emerging powers (such as Brazil, China and India) and the relative decline of Europe and the U.S. point to a multipolar world order. Together with the proliferation of international regulations (such as transnational corporations' codes of conduct, legal standards advanced by coalitions of NGOs, and decisions of international bodies such as the WTO and UN agencies), this trend results in a legal and political arena that is both broader and more fragmented. In this new context, states and NGOs in the Global North no longer control the creation and implementation of human rights standards, while new actors (from transnational social movements to Global South states and NGOs) emerge as influential voices. 2. Information and communication technologies present new challenges and opportunities for human rights. As the mobilizations catalyzed by the Arab Spring have shown, tools such as social networks, video documentaries, digital reporting, online learning and long-distance education can accelerate political change, reduce the informational disadvantages suffered by marginalized groups, and bring together national, regional and global groups capable of making a direct impact on the protection of rights. 3. The range of actors and legal and political strategies has been considerably expanded. Time-honored strategies such as naming and shaming recalcitrant states are being complemented with newer strategies for transnational research, information circulation, and training, which involve a host of different actors, including social movements, online media outlets, inter-governmental organizations, universities and virtual activist networks. The seminar will be divided into three sections, each dealing with one of these transformations. Each section, in turn, will be divided into two discussion sessions and one lecture by a leading scholar and/or practitioner. The seminar will revolve around the discussion of the assigned readings and materials, as well as presentations by students and guest speakers. Grades will be based on an in-class presentation and a final paper.

LAW 684. Conflicts, Ethics, and the Academy. 3 Units.

(Same as ETHICSOC 301) This experimental course looks at conflicts of interest and ethical issues as they arise within academic work. The participants will be drawn from schools and departments across the University in the hope that they will offer different examples of, and perspectives on, the issues we discuss. Topics will include the conflicts that arise from sponsored research, including choices of topics, shaping of conclusions, and nondisclosure agreements; issues of informed consent with respect to human subjects research, and the special issues raised by research conducted outside the United States; the ethics of the classroom and conflicts of interest implicating professor-student relationships. Representative readings will likely include Marcia Angell's work, *Drug Companies and Doctors: A Story of Corruption*, N.Y. Rev. Books, Jan. 15, 2009, and *Is Academic Medicine for Sale?* 342 N. Engl. J. Med. 1516 (2000) (and responses); William R. Freudenburg, *Seeding Science, Courting Conclusions: Reexamining the Intersection of Science, Corporate Cash, and the Law*, 20 Sociological Forum 3 (2005); Max Weber, *Science as a Vocation*; legal cases; the movie "Inside Job"; and conflict of interest policies adopted by various universities and professional organizations.

LAW 685. The American Legal Profession. 3 Units.

This course will deal with selected aspects of the history, organization, economics, ethics, and possible futures of the legal profession in the United States. Likely topics will include, in addition to the ABA's Model Rules of Professional Conduct: demographic changes in the profession, the evolution of law firms, bar associations, and law schools from the early twentieth century to the present; the development of corporate law, personal injury, mass torts, prosecutorial and criminal defense practices, and the "public-interest" bar; the dominant professional ethic of adversary-advocacy, and its critics; the regulation of lawyers; the economics of the market for legal services; the organization and culture of law firm practice; the role of the role of the lawyer as counselor; and the export of American lawyering models abroad.

LAW 686. Advanced Legal Writing: Business Transactions, Technology and Social Enterprise. 3 Units.

This course is designed to give students practical preparation in drafting and analyzing contracts and drafting with an eye toward addressing both client requirements and negotiation concerns. It should especially appeal to students interested in working in house and practicing transactional law (be it in a traditional for-profit or a social enterprise - with a focus on technology, telecom, social enterprise and collaborative arrangements.). The course offers a wide range of realistic legal writing and drafting problems--completed both inside and outside of class. These drafting assignments will help students improve their writing, drafting, and editing skills and develop their sensitivity to the expectations of the attorneys and clients for whom they will be working as well as the impact of their drafting on the other side. Students will also have an opportunity to collectively interview "clients" for the purpose of determining drafting priorities. In the course, students will learn the foundational tools necessary to analyze a variety of business agreements. Students will learn how to write clear, effective, plain language contracts. Special Instructions: Students on the waitlist for the course will be admitted if spots are available on the basis of priority and Degree of Study. Students may not drop this course after the second day of class. Corporations (Law 242) is a prerequisite for all but LLM (CGP) students. A substantial mark-up of a contract is due on the last day of class.

LAW 687. Three Strikes Project: Criminal Justice Reform in Action. 3 Units.

This past November, Californians overwhelmingly voted to reform California's "Three Strikes and You're Out" criminal sentencing law, making relief possible for thousands of prisoners sentenced to life for minor crimes. This is the first time in U.S. history that voters have reduced sentences for people in prison; now Stanford students have an opportunity to test the new law and put it into practice. This seminar will focus on criminal justice reform in real time. Students will read and discuss a variety of cases and articles, examining the evolution of the Three Strikes law as a case study in the history, politics, practical considerations and legal regulation of sentencing in the United States. In addition to studying the law, students will have an opportunity to test their skills in the field, representing an inmate sentenced to life in prison under the Three Strikes law for a minor crime. Students will visit the client in prison, conduct factual investigation in the field, write and file petitions on the client's behalf and argue the case in open court. The course offers the opportunity to both study the theory behind the law, and to hone practical litigation skills in and out of the courtroom. The seminar will meet for 3 hours per week. Students will also meet for 1 hour individually and in teams with Project director Mike Romano each week to discuss work on the litigation projects. Consent Application: Interested students must apply to enroll in the seminar by sending a one-page statement of interest, resume, and transcript to Mike Romano (mromano@stanford.edu). Applications will be considered on a rolling basis.

LAW 688. Advanced Religious Liberty Clinic. 2-7 Units.

Advanced clinic allows students who have taken the Religious Liberty Clinic to continue working on cases. Participation in rounds is required. Advanced clinic may be taken for 2-7 units; general rule of thumb is 4 hours of work per week per unit. Students may not enroll in any clinic (basic or advanced) which would result in earning more than 27 clinical credits during their law school enrollment. Special Instructions: Students must have taken Religious Liberty Clinic. Elements used in grading: Class participation, written assignments, and case work. Writing (W) credit is for 3Ls only.

LAW 690. Advanced Topics in Administrative Law. 2 Units.

This seminar will cover advanced topics in administrative law, including the law of government information, the role of cost benefit analysis, and schools of regulatory reform. Students electing "W" credit will write a series of response papers; students electing "R" credit will write a research paper pertaining to administrative law. Special Instructions: After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline. Prior course in Administrative Law required. Writing (W) credit is for 3Ls only. Elements used in grading: Class participation, attendance, written assignments and final paper.

LAW 691. Advanced Topics in Criminal Law and Policy. 3 Units.

This is an advanced seminar is for students interested in criminal law and public policy. This seminar will provide an opportunity for an in-depth discussion of contemporary crime policy issues, drawing on empirical, legal, and historical readings. Possible topics include: the politicization of crime policy; role of race and class in criminal justice decisionmaking; the causes and effects of prison growth in the U.S.; the relationship between criminal sentencing and crime rates; restorative justice and sentencing alternatives; incarceration and communities; mental health in prisons; juvenile justice and adult violence; and jail and prison litigation. Writing (W) credit for 3Ls only. Elements used in grading: Class participation, attendance, written assignments and independent research paper.

LAW 692. Modern Surveillance Law. 2 Units.

This seminar is an in depth look at modern government surveillance policies and practices. Taught by Richard Salgado, director of law enforcement and information security at Google, Inc, and a former prosecutor at the U.S. Department of Justice's Computer Crime and Intellectual Property Section and Jennifer Granick, Stanford Center for Internet and Society's Civil Liberties Director, the course will cover the technology, law and policy of government surveillance of the Internet and other communications technologies. We will focus on U.S. law, but other nations' interactions with U.S. companies will be addressed. Technologies covered will include wiretapping, stored data collection and mining, location tracking and drones and legal regimes will include the Fourth Amendment, Electronic Communications Privacy Act, the USA Patriot Act, CALEA and the Foreign Intelligence Surveillance Act.

LAW 693. Law and Politics Workshop. 2-3 Units.

This workshop will feature guest speakers who are political scientists or law professors specializing in the legal regulation of politics. Students will be responsible for response papers to each scholarly paper presented. On weeks without guest speakers, topics to be covered will include election law, administrative law, legislation, judicial behavior and public opinion, as well as the political science relevant to those areas of law. The final grade will be determined by class participation (10%), response papers (30%) and final research paper (60%). The course will be limited by instructor consent to 30 students: 15 from SLS, and 15 from political science. Students can take the course for R credit for either 2 or 3 units, depending on paper length. Elements used in grading: Class participation (10%), Response papers (30%) and final paper of no less than 18 pages for 2 units of credit and 26 pages for 3 units of credit (60%).

LAW 694. The Law of War. 3 Units.

The course explores the international law regime governing war, including the law that regulates when states may resort to force and the constraints on the conduct of warfare itself. We will begin by considering when states may permissibly use force, and how changing security threats, including terrorism, the proliferation of weapons of mass destruction, and the commission of widespread humanitarian atrocities challenge and are reshaping the legal framework on recourse to force. We will then explore the rules governing the conduct of military operations, including the constraints on the means and methods of war, the rules governing the treatment of detainees, and the protections extended to civilians and noncombatants in armed conflict. A particular focus of the class will be the application of these rules in non-traditional, asymmetric conflicts between states and terrorist and other non-state groups. Special Instructions: Any student may write a paper in lieu of the final exam with consent of instructor. After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements Used in Grading: Class participation, written assignments, research paper or final exam.

LAW 695. International Human Rights: Media and Education. 2 Units.

This course will explore the role of media and communications in the human rights field, and in particular human rights education. The central focus of the course will be the development by the students of an online education program in international human rights law, which will be made available on the Stanford Law School Human Rights Center website. Students will research effective methods of communication and presentation, as well as the applicable law and will work in small groups to develop multimedia online education modules. Enrollment is by consent of the instructor, and some prior coursework or experience in international law is required. Elements used in grading: Class participation and written assignments. nConsent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

LAW 696. Cybersecurity. 2 Units.

Over the past years, the debate over cyber-security has become one of the hottest debates in Internet and security policy. The term "cyber-security" captures a number of different problems: economic espionage by state actors, competitors or criminals; criminal activity such as fraud and the theft and exploitation of personal information; and attacks by state actors or terrorists on critical infrastructure. While these problems will often call for different solutions, they share a common root cause: as the Internet has permeated every area of our lives, we have become increasingly vulnerable to attacks on the computers and networks that make up the Internet. A growing stream of high-profile cyber attacks against firms, government organizations and networks (civilian and military), international organizations, and universities highlights this vulnerability. While policy makers and businesses have recognized the significance of the threat and have started to take action, potential solutions are hotly contested and far from clear. The seminar aims to enable students to participate in the ongoing policy debates over cyber-security and to take steps to improve cyber-security in their private and professional lives. We will discuss the economic, technical and psychological factors which make improving cyber-security such a hard problem and will explore how law and technology can be used to address it. We will explore whether private incentives can be leveraged to improve the level of security, what role the government should take, and whether there are solutions that improve security while protecting civil liberties and the factors that are at the core of the Internet's economic, social, cultural and political potential. Students will write a number of short reaction papers in response to the assigned readings and will be expected to participate in the class discussion. Class attendance is required. Instead of reaction papers, students can opt to write a final research paper with consent of the instructor, which meets the Research requirement. The class is open to law students and students from other parts of the university. It does not require any technical background. Special Instructions: After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Writing (W) credit is for 3Ls only. Elements used in grading: Class participation, attendance, several short reaction papers or final research paper.

LAW 697. Comparative Law and Society. 2 Units.

By the mid 20th century, the legal map of the world recognized four main traditions: civil law, common law, socialist, and Islamic law. In early 21st century, the main socialist countries have disappeared and globalization has produced a pronounced convergence between common law and civil law. We also became aware that comparative law has to compare more than law and has to include the social and political context of the law. The comparative method is important, but the substance to be compared has changed. This course introduces students to the main historical experiences of law using the comparative method and law and society materials. They will find a new way of looking at Roman, medieval, or 19th century law because its "monuments" are placed in social perspective. The method will be used to reconstruct the contemporary ideas of human rights and rule of law in the context of specific countries. Students will have two writing obligations: (1) brief reflective essays on assigned readings and (2) a research paper. Starting in session 2, students will prepare brief reflective essays on the required reading (or readings) for the session and submit them to the professors and other students 24 hours prior to the beginning of the session. Assigned readings will all be in English. Additional readings may be in other languages. For the research paper the student will, with professorial approval, choose a country and a topic and discuss the work in progress with the professors at least twice during the quarter. It should not exceed 5,000 words. Special Instructions: After the term begins, students accepted into the course can transfer from section (01) into section (02), which meets the R requirement, with consent of the instructor. Elements used in grading: The short essays or article presentations will be one leg of the students' evaluation (50%). The other leg will be the final research essay (50%). Writing (W) credit is for 3Ls only.

LAW 698. Education Law and Policy. 3 Units.

This seminar will explore the current state of education law and policy, with an emphasis on legal environment for charter schools. Students will have an opportunity to discuss cutting edge issues in education reform with leaders and policy-makers from charter school operators, union leaders, researchers, and innovators. The course is open to first-year Law School students. Elements used in grading: Research Paper.

LAW 699. Arbitration in America. 3 Units.

This course covers the history and development of alternative dispute resolution in the U.S., with an emphasis on arbitration. It describes how the federal and state governments have gradually come to accept and now favor the private settlement of commercial disputes based on consent of parties. It examines the many different contexts and industries in which arbitration is conducted, including government-mandated programs for labor disputes, systems established by specific industries such as the diamond trade and professional sports associations, the construction industry, and commercial disputes in general; more controversial is the use of arbitration for consumer, class action and employment disputes. This historic reversal of power over adjudication from government to the private sector has alleviated the delays and uncertainties of judicial litigation, and has created a huge and growing legal field of attorneys, arbitrators, and service providers fashioning and administering systems ranging in complexity from the most formal mega dispute with full discovery to the resolution of mini disputes through mechanically applied algorithms. Allowing private parties to agree on the law and procedures that govern their disputes has led, moreover, to numerous clashes of interests, including evasion of public policies established by legislation. How to deal with alleged violations of public policy, errors of law, erroneous findings of fact, unfair procedures, unequal negotiating power, and arbitrator bias are among the continuing and complex difficulties currently faced by courts and legislatures. The US Supreme Court's recent attempts to deal with several aspects of these difficulties will be considered. We will also examine the less heralded but highly significant use of mediation as a relatively speedy and inexpensive method for private dispute resolution, and the recent development of hybrid systems and other innovations. Elements used in grading: Class participation, attendance, written assignments and final exam.

LAW 701. SPILS Law and Society Seminar. 3 Units.

This seminar is restricted to students who are in the SPILS program. The seminar deals with the relationship between legal systems and the societies in which they are embedded. The materials are drawn from studies of many different societies. Among the issues dealt with are: What influence does culture have on the operation of legal systems? What are the social forces which produce particular forms of law? What impact do legal interventions have on society and on human behavior? Elements used in grading: Exam Enrollment is restricted to SPILS program students.

LAW 703. Corporate Governance and Practice Seminar. 2 Units.

The seminar on corporate governance meets in the Autumn and Winter quarters and forms the core of the LL.M. Program in Corporate Governance & Practice. Attendance and active participation are important to the success of the seminar and an important factor in the overall grade. Students are expected to have carefully read and reviewed assigned materials in advance of each session. Students will be required to submit reflection papers (2 to 3 pages in length) that evaluate, critique, and discuss some or all of the key topics reviewed in the previous week's session. Elements used in grading: Class participation, attendance and assignments. This course is required for and limited to students in the Corporate Governance and Practice LL.M. Program.

LAW 704. Law, Science, and Technology Colloquium. 2 Units.

The Law, Science & Technology Colloquium offers students in the Law, Science & Technology LLM Program the opportunity to discuss cutting-edge legal issues at the intersection of law and technology with leading experts in the field, including Stanford faculty, visiting scholars, technology and IP lawyers, entrepreneurs, and executives from Silicon Valley technology companies. During most class meetings, an invited guest lecturer will present research, a paper, or their experiences to the class on a specific topic related to law, science, and technology. Following these presentations, all students will participate with the lecturer in a class discussion based on assigned readings, the presentation, and students' own experience in the area. Attendance and preparation are vital to the success of the Colloquium and, accordingly, will constitute an important factor in the overall grade. Also, each student will individually write weekly commentary papers that evaluate, critique, and/or discuss key issues from the assigned reading. Satisfies the colloquium requirement for Law, Science, and Technology LLM (LST) candidates. Open to LLM students only. Elements used in grading: Class participation, attendance and weekly commentary papers.

LAW 705. SPILS Masters Thesis. 4 Units.

The writing of a work of original scholarship in the area of research of the student's choosing is necessary requirement of the JSM degree. During the winter quarter students are expected to submit two draft chapters: 1) any chapter of the fellow's choice by the end of January; and 2) a draft of the empirical research result's chapter by the appropriate date in the winter quarter as determined by the instructor. Elements used in grading: Thesis This course is exclusive to SPILS students. The thesis is required for JSM graduation.

LAW 706. Environmental Law and Policy Colloquium. 2 Units.

The Environmental Law & Policy Colloquium offers LLM students the opportunity to discuss cutting-edge legal topics related to, among others, the environment, natural resources management, or energy policy. The colloquium meets in all three quarters. During the autumn quarter, students will engage in group policy discussions. During the winter quarter, a leading expert in the field - a faculty member, a lawyer, a public official, a member of an advocacy groups, or an entrepreneur - will present his or her research, a paper, or his or her experiences to the class on a specific topic. Following these presentations, all students will participate with the lecturer in a class discussion based on assigned readings, the presentation, and students' own experience in the area. During the spring quarter, the students will present their research papers focused on the solution of an environmental or energy issue. Attendance and active participation are important to the success of the seminar and an important factor in the overall grade. Students are expected to have carefully read and reviewed assigned materials in advance of each session. During the first quarter, students will work in teams and will have to submit memos in preparation for the policy discussion. During the second quarter, students will individually write weekly commentary papers to be submitted before the lecture evaluating, critiquing, and/or discussing key issues from the assigned reading(s). In the third quarter, students are expected to present their papers and comment on the other students' research. Elements used in grading: Class Participation, Attendance, Written Assignments, Final Paper. This course is required for and limited to students in the Environmental Law & Policy LL.M. Program.

LAW 707. SPILS Research Methods Workshop. 2 Units.

This is a mandatory course for SPILS Fellows as part of the program's core curriculum. Its main goal is to offer students an interdisciplinary perspective about socio-legal research, and research tools for designing and implementing their individual research projects. This Winter term workshop will complement the Research Design for Empirical Legal Studies Seminar taken in the Autumn by 1) expanding and elaborating on some of the methods analyzed during the seminar; and 2) assisting students in using such methods towards their individual research project. The workshop will consist of specialized sessions, and the fellows are expected to attend those that are most relevant to their thesis data collection methods and analytical framework employed. In addition, the workshop will provide tools to facilitate the writing of the required SPILS thesis, including writing tutorials. During the quarter the fellows are expected to submit drafts of different chapters of their thesis. If appropriate, the workshop may also include group and/or individual sessions designed to address the very specific needs of the research undertaken by the SPILS Fellows. Elements used in grading: Class participation, attendance and written assignments. Enrollment is restricted to SPILS fellows. The seminar is required for JSM graduation.

LAW 708. Advanced Legal Writing for American Practice. 3 Units.

This course orients LLM and JSM students to a range of legal writing genres used by American lawyers in practice and by law students in papers and exams. At the core of these genres are the techniques of legal research, objective and persuasive legal writing, and related legal analysis, as practiced in American law offices and courts. The course presents students with realistic legal writing scenarios that they address in and out of class. Students prepare an analytical memorandum, advising a hypothetical corporate client, and a short brief for a mediator. The assignments are designed to help students adapt their writing skills by incorporating methods that American lawyers use to analyze typical legal problems and to advocate on behalf of their clients. Special Instructions: Students must participate in one conference with the instructor, outside regular class hours, to be arranged at a mutually convenient time. Only LLM and JSM students may enroll in this class via AXess. If the class is oversubscribed, a lottery system will be used the first week of class to determine the final class list. Elements used in grading: Class participation, attendance and written assignments.

LAW 709. Introduction to American Law. 3 Units.

This special course for international students in the Law School's LLM, SPILS, and Exchange Programs is offered during September, before the start of the regular law school quarter. The class introduces students to selected principles of American law and provides an overview of distinctive features of the U.S. legal system, including its procedures and institutions. The course also is designed to familiarize international students with U.S. legal materials and help them participate successfully in courses with their J.D. colleagues. Topics include American state and federal legal systems, common law and statutory analysis, civil and criminal justice, trial by jury, and federalism. Elements used in grading: Class participation, attendance, short written assignments and final exam. The class starts on September 6 and runs through September 18. Morning or afternoon sessions. Meeting times to be announced by instructor. Final exam will be scheduled on September 21.

LAW 712. Research Design for Empirical Legal Studies. 3-4 Units.

Empirical legal studies have become popular in the U.S. and are now spreading to non-U.S. law faculties as well. Usually the term applies to analyses of quantitative data and the researcher relies on data collected by others. But the term "empirical" properly encompasses both qualitative and quantitative data, including interviews, legal documents, survey research and experimental results. Analysts interested in using such data need to understand how they were collected, in order to decide what data can appropriately be used to answer different kinds of questions. Often to answer the questions of interest, a researcher needs to collect new data, which poses challenging questions about how to design an empirical research study. Answering these questions appropriately is important to ensure publication in a peer reviewed journal, which are becoming increasingly important to legal academia. This seminar will introduce students to the wide range of research methods that can be used to answer empirical questions, provide a framework for choosing among methods, and explain how to use the methods. The project for the quarter is to design an empirical research study on a topic of your choice. Special Instructions: JD students can take the class for 3-4 units. SPILS students must take this class for 4 units. Students taking the course for 4 units must attend the additional session on Thursday, which is optional for others. After the term begins, JD students accepted into the course can transfer from section (01) into section (02), which can potentially satisfy the R requirement, with consent of the instructor. Consent Application for JD students: To apply for this course, JD students must e-mail Lecturer Puig at spuig@stanford.edu. Elements used in grading: Class participation, attendance, written assignments and final paper. This course is REQUIRED for all SPILS fellows and BY CONSENT for all other students. See "Special Instructions" in course description above.

LAW 721. Private Equity Investing: Quantitative Skills Seminar. 1 Unit.

This course has been created to supplement Law 522, Private Equity Investing. The focus will be on the quantitative aspects of private equity investing. The primary pedagogical objective is to have students learn the skills required to do financial analysis and spreadsheet modeling. Students will develop a thorough understanding of the time value of money, and the concepts of present value, internal rates of return, and the discounting of cash flows and annuity streams. The key principles of entrepreneurial finance and deal arithmetic will be presented, including the implied valuation of an investment, blended returns, the math of multitiered capital structures, contingent claims analysis, DCF valuation techniques, investment fund economics, option mechanics and variable pricing mechanisms. Mastery of these fundamentals will allow students to develop and strengthen their ability to prepare forecasts, craft deal structures and run the numbers on real world transactions. Special Instructions: In order to enroll in PEI: Quantitative Skills students must concurrently enroll in Private Equity Investing (LAW 522). In other words, no student may enroll in either Law 522 or Law 721 without also enrolling in the other. Students accepted to enroll in Private Equity Investing (for which a Consent Application Form is required) will automatically be able to enroll in LAW 721. Law 721 will be graded on a Mandatory Pass/Restricted Credit/Fail (MP/R/F) basis. Elements used in grading: Class Participation, Attendance, Written Assignments.

LAW 723. Sanela Diana Jenkins International Human Rights Speaker Series: Health and Human Rights. 1 Unit.

Professor Michele Barry, Stanford Medical School; Professor Richard Steinberg, UCLA Law School and Visiting Professor, International and Comparative Area Studies, Stanford; Dr Helen Stacy, Program on Human Rights and Senior Fellow, Freeman Spogli Institute, Stanford. This course focuses on the relationship between global health and human rights. The course will feature leading human rights scholars and practitioners from around the world. We will examine the conceptual linkages between global health and human rights and explore both the promise of the field and the challenges inherent in implementing its norms on the ground. Health and human rights are interrelated in multiple ways: human rights abuses have negative health consequences; health policies and programs can enhance or hinder human rights; and health outcomes are improved by fulfilling the full range of human rights. Stanford students may enroll in the course for 1 Unit credit based upon attendance. The Series is also open to the Stanford community and the general public. This course is cross-listed with INTNLREL 110, IPS 271, POLISCI 204 and POLISCI 304.

LAW 724. Ethics Today: Business, Non-Profit, Government, and Individuals. 2-3 Units.

The objective of the course is to explore the current international emphasis on organizational ethics. Students will consider in-depth complex ethics matters across business, the non-profit sector, and government. We will unravel the factors contributing to the seemingly pervasive failure of ethics today, including commonalities and links among sectors, through a broad range of international case studies. Examples might include: the Bangladesh garment factory fire and collapse; corruption in Nigeria; the Libor rate-rigging scandal; the US military sex abuse scandal; the GlaxoSmithKline China corruption scandal; racism in international football; drones; social media; and a non-profit sector ethics challenge to be identified. Prominent guest speakers would attend certain sessions interactively. Questions of cultural context, how ethics lags behind technology, ethics and leadership, and ethics and global systemic risks (poverty, financial system meltdown, climate change, cyber terrorism) will be considered. Attendance required. Final project in lieu of exam on a topic of student's choice. Special Instructions: Attendance required. No prerequisites. Law students will have an opportunity to substitute certain readings for more legally-focused material and will have the option to choose a final project topic integrating legal analysis. NOTE: This course does not meet the SLS Ethics requirement. This course is cross-listed with the Public Policy (Same as PUBLPOL 134 and PUBLPOL 234). Elements used in grading: Class Participation, Attendance, Written Assignments, and Final Paper.

LAW 725. Finance and Society. 3 Units.

This interdisciplinary course will discuss the role of the financial system within the broader economy and its interactions with the rest of society. The course will provide an overview of the financial system, cover the basic economic principles essential for understanding the role of finance in the economy, and discuss policy issues around financial regulation. It seeks to mix students from GSB, Law School, and other departments. Topics to be discussed include: (i) The financial system, from microfinance to global megabanks: how and why finance can benefit society as well as endanger and harm; (ii) Financial regulation: why and how? (iii) Other people's money: the challenge of effective control, governance, and trust; (iv) The politics of banking and finance; (v) Ethical issues in finance. Special Instructions: This course is cross-listed with the Graduate School of Business (Finance 332). Law student enrollment may be subject to lottery if over-subscribed. Course involves minimal mathematical content that does not go beyond high-school math. Elements used in grading: Class Participation, Attendance, Final Paper. Class meets at GSB.

LAW 726. Negotiation on the Ground: Discussions at the Intersection of Theory and Practice. 1 Unit.

We can read any number of books about negotiation, but how do the concepts and principles play out in the real world? This dinner colloquium will meet with distinguished negotiators working in a variety of fields to reflect on and draw lessons from their deep and diverse experience. Our speakers will include: (1) Michael Wheeler, Professor of Management Practice at Harvard Business School, with extensive legal practice in the private and public sectors. His newly-released book, will provide the basis for our discussion: *The Art of Negotiation: How to Improve Agreement in a Chaotic World*. (2) Ambassador Richard Williamson, will focus on his experience in multilateral and international negotiations at the United Nations and more broadly. (3) Ms. Jody Weinberg, Pixar Animation Studios and Mr. David Matlof, Hirsch, Wallerstein, Hayum, Matlof + Fishman, will share an insider's view from the studio and talent sides of the entertainment negotiating table. (4) (to be confirmed), the business and legal perspective in negotiations by high technology companies. Special Instructions: Prerequisite: Negotiation Seminar. Class sessions will begin in Winter Quarter and run through Spring Quarter for 4 seminar+dinner sessions. Admitted students will be given permission to officially register for this course in Spring Quarter (1 unit). Schedule: WINTER: Tuesday 4:15-7:15pm on 1/28/14 and 2/11/14. SPRING: Wednesday 4:15-7:15pm on 4/23/14 and one date in May. Consent Application: To apply for this course, students must complete and e-mail the Consent Application Form available on the SLS Registrar's Office website (see Registration and Selection of Classes for Stanford Law Students) to the instructors. See Consent Application Form for submission deadline.

LAW 802. TGR: Dissertation. 0 Units.**Law, Nonprofessional Courses****LAWGEN 103Q. Depth Psychology. 3 Units.**

Powerful unconscious forces impact human and social life. Depth psychology, founded by Sigmund Freud, Carl Jung, Wilhelm Reich, and others, studies these forces and how they shape inner life, personal relationships, religion, politics, art, and many other domains. The course draws from the founders, particularly Jung, and then goes on to include materials from modern theorists, primarily neo-Jungian. The starting point is how the unconscious and conscious mind interact in the individual person's life. We consider the implications of this interaction for psychotherapy and pathology as well as for ordinary life. On the social side, several sessions focus on religion and, to a lesser extent, mythology from a depth psychology perspective. The inquiry is open-ended throughout, encouraging personal reflection and engagement.

LAWGEN 105Q. Law and Popular Culture. 3 Units.

(Same as AMSTUD 105Q) This seminar focuses on the interface between two important subjects: law and popular culture. Before class, students will see a series of films or television shows relating to law, lawyers, and the legal system. There is also a weekly homework assignment based on materials in the assigned text and the assigned film or TV show. We will discuss the pop culture treatment of subjects such as the adversary system, good and bad lawyers, female and gay lawyers, the work life of lawyers, legal education, ethical issues, the jury system, and criminal and civil justice. The seminar discussions will draw on film theory and film-making technique to deepen understanding of the interrelationship between law and popular culture. The discussions will illuminate the ways in which pop culture products both reflect and change social views about law and lawyers. The assigned text is Michael Asimow & Shannon Mader, "Law & Popular Culture: A Course Book" (Peter Lang, 2d edition, 2013).

LAWGEN 111Q. Introduction to International Human Rights. 3 Units.

This course will study the main international human rights declarations, treaties, covenants, committees, courts and tribunals. It will look at the effect of nation states, regional bodies, and key economic and military organizations upon human rights. Categories of rights -- civil, political, social, economic and cultural -- will be analyzed, with a particular focus on the rights of women and children, and the right to culture.

LAWGEN 112Q. Law and Inequality. 3 Units.

Most Americans know that discrimination on the basis of race, sex and religion is unlawful. Seems simple enough. But advertisements in the back of newspapers still announce: Single White Female Seeks Single White Male? Isn't that discrimination on the basis of race and sex? Most businesses don't consider men for women's locker room or bathroom attendant. And why aren't those men and women's bathrooms and locker rooms illegal segregation? After all we know what would happened if some business set up separate bathrooms for blacks and whites. Isn't it discrimination for an employer to insist that men wear a jacket and tie and women to wear nylons and a skirt? Why are some forms of discrimination unlawful and others not? Why is discrimination against short people, overweight people or people with annoying personalities not against the law? We'll answer these and many other questions by looking court cases, legal theory and philosophy. We may also have conversations with guest lecturers who work in civil rights enforcement and the seminar may include a field trip to visit the offices of civil rights lawyers (lawyers tend to be busy people so these opportunities will depend on their schedules.) No prerequisites other than an open mind and a willingness to delve into unfamiliar material. Evaluation will be based on class participation and a short final paper.

LAWGEN 206Q. Thinking Like a Lawyer. 3-4 Units.

(Same as GSBGEN 382.) Open to and limited to non-Law graduate students at the University, this course will provide non-law students an analytical framework for understanding the core concepts of the law and familiarize students with how lawyers analyze and structure their work. This course will be taught by Vice Dean Mark Kelman and Law School faculty in their areas of expertise, with one to two classes devoted to each topic. It will introduce students to some of the foundational principles of law and will review topics such as contracts, litigation, intellectual property, securities and employment law. Students must also attend an additional TA-led discussion section each week. There will be no final exam, but completion of problem sets on various topics as well as class and section participation will be used to determine grading. 3 problem sets are required for all students. For 4 units, an additional assignment must be completed. All readings will be provided on Coursework. TGR students welcome. TGR students welcome. Elements used in grading: Class attendance and written assignments.

LAWGEN 209Q. Community Police Academy. 1 Unit.

This nine-week course aims to demystify public safety, build trust, and develop partnerships between the police department and the community it serves. Each session is taught by a different deputy and is designed to expand each participant's knowledge of the duties, responsibilities, decisions, and constraints that law enforcement officers face. Topics include laws of arrest / search & seizure, alcohol laws / DUI wet lab, patrol procedures, safety & vehicle stops, CSI vs. reality, emergency communications and defensive tactics & deadly force. In addition to the weekly class, participants are invited to attend field trips to see behind the scenes of 911 dispatch at Palo Alto Communications, practice pursuit in the driving simulators at The Academy in San Jose, visit the Santa Clara Coroner's office, and tour the San Jose Main Jail. The course is open to all Stanford students, staff, and residents. While this course is open to all students throughout the University, the units will not accrue to Law Degree Candidates for credit toward a degree in Law (JD, JSM, JSD, or LL.M). Prerequisites: minimum 18 years of age; valid driver's license; pass basic background check. Special Instructions: Live Scan Check.

Linguistics Courses

LINGUIST 1. Introduction to Linguistics. 4 Units.

The cognitive organization of linguistic structure and the social nature of language use. Why language learning is difficult. Why computers have trouble understanding human languages. How languages differ from one another. How and why speakers of the same language speak differently. How language is used strategically.

LINGUIST 3. Glamour of Grammar. 3-4 Units.

In this course, we will dispel many a mystery of English grammar, often presented as a dull and dreary subject in schools: we will see that the words 'glamorous' and 'grammar' come from the same root meaning 'mysterious or occult' and we will ask: Why is there 'stupidity' but not 'smartity'? Why can we 'blacken' fish or 'whiten' teeth, but not 'pinken' or 'greenen' anything? Who makes up new words anyway? How do we put words together into meaningful sentences? And how do we understand the nuances of English without much direct instruction? While the focus of this course is on English grammar, we will also see that other languages possess grammars that are based on the same principles and constraints.

LINGUIST 5N. What's Your Accent? Investigations in Acoustic Phonetics. 3 Units.

Preference to freshmen. Phonetic variation across accents of English; experimental design; practical experience examining accents of seminar participants; acoustic analysis of speech using Praat.

LINGUIST 10N. Experimental Phonetics. 4 Units.

Everyday, we face variation in language. As readers, we see words printed in different fonts, sizes, and typefaces, typically static on a page. As listeners, we hear a speech signal riddled with variation. We are exposed to words, but a single word is produced differently each time it is uttered. These words stream by listeners at a rate of about 5 syllables per second, further complicating the listeners' task. How listeners map a speech signal into meaning despite massive variation is an issue central to linguistic theory. The field of experimental phonetics investigates how listeners take words that often vary drastically and understand them as quickly and adeptly as they do. This class introduces students to acoustic and auditory phonetics. As a class, we will carry out a project in experimental phonetics aimed at understanding how different realizations of words are able to be understood by listeners. Throughout the course, students will read background literature, become familiar with the Stanford Linguistics Lab, and learn to use software integral to the design, data collection, and data analysis of experiments. Each week, we will have two meetings: one in a seminar setting and one in the lab.

LINGUIST 36. The Arabic Language and Culture. 3 Units.

(Formerly AMELANG 36). Arabic language from historical, social, strategic, and linguistic perspectives. History of the Arabic language and the stability of classical Arabic over the last 15 centuries. Why the functionality of classical Arabic has not changed as Latin, Old English, and Middle English have. Social aspects of the Arabic language, Ferguson's notion of diglossia. The main varieties of Arabic, differences among them, and when and where they are spoken. Role of Arabic and culture in current world politics, culture, and economy. Linguistic properties of Arabic such as root-based morphology, lexical ambiguity, and syntactic structure relating it to current linguistic theories.

Same as: LINGUIST 270.

LINGUIST 44N. Living with Two Languages. 3 Units.

Preference to freshmen. The nature of bi- and multilingualism with emphasis on the social and educational effects in the U.S. and worldwide, in individual versus society, and in child and adult. The social, cognitive, psycholinguistic, and neurological consequences of bilingualism. Participation in planning and carrying out a research project in language use and bilingualism.

LINGUIST 47N. Languages, Dialects, Speakers. 3 Units.

Preference to freshmen. Variation and change in languages from around the world; the roots, historical development, and linguistic and social structures of variation; how languages differ from one another and how issues in linguistics connect to other social and cultural issues; the systematic study of language.

LINGUIST 52N. Spoken Sexuality: Language and the Social Construction of Sexuality. 3 Units.

the many ways language is used in the construction of sexuality and sexual identity. How language is used as a resource for performing and perceiving sexual identity. Drawing on linguistic analyses of pronunciation, word choice, and grammar, questions such as: Is there a gay accent? Why isn't there a lesbian accent? How do transgendered people modify their linguistic behavior when transitioning? How are unmarked (heterosexual) identities linguistically constructed? Sexuality as an issue of identity, as well as of desire. Iconic relations between elements of language such as breathy voice quality and high pitch, and aspects of desire such as arousal and excitement. How language encodes ideologies about sexuality; how language is used to talk about sexuality in public discourses about gay marriage and bullying, as well as in personal narratives of coming out. How language encodes dominant ideologies about sexuality, evident in labels for sexual minorities as well as terminology for sex acts. Discussions of readings, explorations of how sexuality is portrayed in popular media, and analyses of primary data. Final research paper on a topic of student choice.

Same as: FEMGEN 52N.

LINGUIST 63N. The Language of Comics. 3 Units.

This seminar will explore language as represented in cartoons and comics such as Bizarro, Dilbert and Zits, how we interpret it, and why we find comics funny. We will explore and analyze language play, genderspeak and teenspeak; peeing about usage; new and spreading usages.

LINGUIST 65. African American Vernacular English. 3-5 Units.

The English vernacular spoken by African Americans in big city settings, and its relation to Creole English dialects spoken on the S. Carolina Sea Islands (Gullah), in the Caribbean, and in W. Africa. The history of expressive uses of African American English (in soundin' and rappin'), and its educational implications. Service Learning Course (certified by Haas Center).

Same as: AFRICAAM 21, LINGUIST 265.

LINGUIST 66. Vernacular English and Reading. 4-5 Units.

Discusses some of the literature on the relation between use of vernacular English varieties (e.g. African American Vernacular English, Chicano English) and the development of literacy (especially in Standard English). But our primary focus is on improving the reading skills of African American and Latino students in local schools through the Reading Road program developed at the University of Pennsylvania. Students must commit to tutoring one or more elementary students weekly, using the program. L65 AAVE recommended, but not required.

Same as: LINGUIST 266.

LINGUIST 83Q. Translation. 3 Units.

Preference to sophomores. What is a translation? The increased need for translations in the modern world due to factors such as tourism and terrorism, localization and globalization, diplomacy and treaties, law and religion, and literature and science. How to meet this need; different kinds of translation for different purposes; what makes one translation better than another; why some texts are more difficult to translate than others. Can some of this work be done by machines? Are there things that cannot be said in some languages?.

LINGUIST 90. Teaching Spoken English. 3-4 Units.

Practical approach to teaching English to non-native speakers. Teaching principles and the features of English which present difficulties. Preparation of lessons, practice teaching in class, and tutoring of non-native speaker.

LINGUIST 105. Phonetics. 3-4 Units.

The study of speech sounds: how to produce them, how to perceive them, and their acoustic properties. The influence of production and perception systems on sound change and phonological patterns. Acoustic analysis and experimental techniques. Lab exercises. Prerequisite: 110 or equivalent, or consent of instructor.

Same as: LINGUIST 205A.

LINGUIST 106. Introduction to Speech Perception. 4 Units.

Basics of acoustic phonetics and audition. What do listeners perceive when they perceive speech. Examine current research including: the categorical perception of speech, cross-language speech perception, infant speech perception. Theoretical questions of interest to speech perception researchers and experimental methods used in the field.

LINGUIST 110. Introduction to Phonetics and Phonology. 4 Units.

Differences in the sounds of the world's languages and how these sounds are made by the human vocal tract. Theories that account for cross-linguistic similarities in the face of differences.

LINGUIST 112. Seminar in Phonology. 2-4 Units.

Topics vary each year. Previous topics include variation in the phonology of words according to their contexts within larger expressions and the place of these phenomena in a theory of grammar. May be repeated for credit.

Same as: LINGUIST 212A.

LINGUIST 116. Morphology. 4 Units.

A survey of words including their structures, pronunciations, meanings, and syntactic possibilities in a wide sampling of languages to provide a laboratory for investigating the nature of morphology.

LINGUIST 120. Introduction to Syntax. 4 Units.

Grammatical constructions, primarily English, and their consequences for a general theory of language. Practical experience in forming and testing linguistic hypotheses, reading, and constructing rules.

LINGUIST 121. Crosslinguistic Syntax. 3-4 Units.

A data-driven introduction to the methods of syntactic analysis, and their results. Emphasis is on understanding how languages are systematically alike and different in their basic sentence structure. Focuses on building up syntactic argumentation skills via the collective development of a partial formal theory of sentence structure, which attempts to model native speaker knowledge. Draws on data from a diverse array of the world's languages, including but not limited to English.

LINGUIST 124. Introduction to Lexical Function Grammar. 2-4 Units.

Presentation of a formal model of grammar designed to allow precise, computationally tractable descriptions of cross-linguistic variation in syntactic structure. Concentration on the formal properties of the model, its flexibility in teasing out language specific and possibly universal characteristics of natural languages and the place of syntax as a component within a larger linguistic architecture. Prerequisite: 120 or consent of instructor

Same as: LINGUIST 224.

LINGUIST 130A. Introduction to Semantics and Pragmatics. 4 Units.

Linguistic meaning and its role in communication. Topics include ambiguity, vagueness, presupposition, intonational meaning, and Grice's theory of conversational implicature. Applications to issues in politics, the law, philosophy, advertising, and natural language processing. Those who have not taken logic, such as PHIL 150 or 151, should also enroll in 130C. Pre- or corequisite: 120, 121, consent of instructor, or graduate standing in Linguistics.

Same as: LINGUIST 230A.

LINGUIST 130B. Introduction to Lexical Semantics. 3-4 Units.

Introduction to basic concepts and issues in the linguistic study of word meaning. The course focuses on the core semantic properties and internal organization of the four major word classes in natural languages: nouns, adjectives, prepositions, verbs. This course draws on material from English and other languages to illustrate the range of word meanings found across languages and to investigate possible word meanings. Prerequisites: Linguist 1 or equivalent or permission of the instructor. Linguist 130A is not a prerequisite for this course.

LINGUIST 130C. Logic Laboratory. 1 Unit.

Typically taken in conjunction with 130A/230A.
Same as: LINGUIST 230E.

LINGUIST 134A. The Structure of Discourse: Theory and Applications. 2-4 Units.

The organization of language above the sentence level, and the manifestation of language in context. Practical experience in working with discourse data.

Same as: LINGUIST 234.

LINGUIST 140. Language Acquisition I. 4 Units.

Processes of language acquisition in early childhood; stages in development; theoretical issues and research questions. Practical experience in data collection.

Same as: LINGUIST 240.

LINGUIST 141. Language and Gesture. 3 Units.

History of work on gesture, gestural systems associated with particular languages/cultures, and with specific activities - music, sports, traffic management, stock exchanges, etc. Examine gesture developmentally and how gesture is represented in painting and animation.

LINGUIST 142. Heritage Languages. 3-4 Units.

The linguistic and cultural properties of Heritage languages, which are partially acquired and supplanted by a dominant language in childhood. Topics: Syntactic, phonological and morphological properties of heritage languages, implications from experimental HL research for language universals, cultural vs. linguistic knowledge, the role of schooling in HL competence, influence of the dominant language on the HL, and pedagogical issues for HL learners in the classroom.

Same as: LINGUIST 242.

LINGUIST 143. Sign Languages. 4 Units.

The linguistic structure of sign languages. How sign languages from around the world differ, and what properties they share. Accents and dialects in sign languages. How sign languages are similar to and different from spoken languages. How and why sign languages have emerged.

LINGUIST 144. Introduction to Cognitive and Information Sciences. 4 Units.

The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major.

Same as: PHIL 190, PSYCH 35, SYMSYS 100.

LINGUIST 150. Language in Society. 4 Units.

How language and society affect each other. Class, age, ethnic, and gender differences in speech. Prestige and stigma associated with different ways of speaking and the politics of language. The strategic use of language. Stylistic practice; how speakers use language to construct styles and adapt their language to different audiences and social contexts.

LINGUIST 152. Sociolinguistics and Pidgin Creole Studies. 2-4 Units.

Introduction to pidgins and creoles, organized around the main stages in the pidgin-creole life cycle: pidginization, creolization, and decreolization. Focus is on transformations in the English language as it was transported from Britain to Africa, Asia, the Caribbean, and the Pacific. Resultant pidginized and creolized varieties such as Nigerian Pidgin English, Chinese Pidgin English, New Guinea Tok Pisin, Suriname Sranan, and the creole continua of Guyana, Jamaica, and Hawaii. Also French, Dutch, Portuguese, Chinook, Motu, and Sango.

Same as: LINGUIST 252.

LINGUIST 153. Language, Power & Politics. 3-4 Units.

The integral role language plays in politics; how power operates in linguistic practices and political interaction. Critical examination of how language is used to articulate, maintain and subvert relations of power in society, emphasizing language in the media, the political rhetoric associated with war, and the construction of `truth` in politics. The role of ethnographic analysis in aiding sociolinguistic understandings of how social actors use and (re)interpret political language.

LINGUIST 154. Sociolinguistics of Language Contact. 2-4 Units.

The role of contact between speakers of different languages in processes of language borrowing, convergence, and shift. Attending both to linguistic aspects and social contexts, examine: second-language acquisition, bilingualism, code-switching, lexical and grammatical borrowing, first language attrition, language death, and the creation of new contact varieties such as jargons, mixed languages, pidgins, and creoles. Prerequisite: background in linguistics, at least one course in linguistics.

Same as: LINGUIST 254.

LINGUIST 155. Hip Hop, Youth Identities, and the Politics of Language. 3-4 Units.

Focus is on issues of language, identity, and globalization, with a focus on Hip Hop cultures and the verbal virtuosity within the Hip Hop nation. Beginning with the U.S., a broad, comparative perspective in exploring youth identities and the politics of language in what is now a global Hip Hop movement. Readings draw from the interdisciplinary literature on Hip Hop cultures with a focus on sociolinguistics and youth culture.

Same as: AFRICAAM 121X, AMSTUD 121X, ANTHRO 121A, CSRE 121X, EDUC 121X.

LINGUIST 156. Language and Gender. 4 Units.

The role of language in the construction of gender, the maintenance of the gender order, and social change. Field projects explore hypotheses about the interaction of language and gender. No knowledge of linguistics required.

LINGUIST 157. Sociophonetics. 1-4 Unit.

The study of phonetic aspects of sociolinguistic variation and the social significance of phonetic variation. Acoustic analysis of vowels, consonants, prosody, and voice quality. Hands-on work on collaborative research project. Prerequisite: 110 or equivalent, or consent of instructor.

Same as: LINGUIST 257.

LINGUIST 160. Introduction to Language Change. 4 Units.

Principles of historical linguistics; the nature of language change. Kinds and causes of change, variation and diffusion of changes through populations, differentiation of dialects and languages, determination and classification of historical relationships among languages, rates of change, the reconstruction of ancestral languages and intermediate changes, parallels with cultural and genetic evolutionary theory, and implications of variation and change for the description and explanation of language in general. Prerequisite: introductory course in linguistics or evolutionary theory.

LINGUIST 162. HISTORY THROUGH LANGUAGE. 3-4 Units.

What we can learn about the human past through human language, especially where proper historical records are absent. Studying population migrations through language spread. Different types of change in different social environments: grammatical "simplification" of imperial languages vs. complexity of tribal languages. Effects of contact on languages. Methods for reconstructing linguistic past: comparative method, linguistic paleontology, computational phylogenetic methods.

LINGUIST 162. History Through Language. 3-4 Units.

Discussion of recent proposals about how to enhance work on grammaticalization and lexicalization by adopting a construction grammar perspective.

Same as: LINGUIST 262.

LINGUIST 163. History of the English Language. 5 Units.

This course traces the history of the English language from its roots through its earliest written records into the present. It will trace the fundamental changes that English has undergone in terms of morphology, phonology, syntax, semantics, and vocabulary. It will also explore some of the social, cultural, and historical forces that affect language. The course emphasizes the pre-modern history of English.

Same as: ENGLISH 171H.

LINGUIST 167. Languages of the World. 3-4 Units.

The diversity of human languages, their sound systems, vocabularies, and grammars. Tracing historical relationships between languages and language families. Parallels with genetic evolutionary theory. Language policy, endangered languages and heritage languages. Classification of sign languages.

LINGUIST 171. Iberian Languages: Structure, Variation & Context. 3 Units.

The course will center on Iberian languages with a special focus on Catalan. We will consider the relation between language structure and other factors, such as language variation in space and time, and sociological and political factors. Topics will include a contrastive analysis of selected features of Iberian languages, a survey of dialectal variation in some of the languages of the area and of their external linguistic history.

LINGUIST 173. The Structure of Russian. 2-4 Units.

A synchronic overview of contemporary standard Russian, including its sound system, word formation and grammatical structure. Emphasis is on problems presented by Russian for current linguistic theory. The acquisition of Russian as a first language.

Same as: LINGUIST 273.

LINGUIST 180. From Languages to Information. 3-4 Units.

Automated processing of less structured information: human language text and speech, web pages, social networks, genome sequences, with goal of automatically extracting meaning and structure. Methods include: string algorithms, automata and transducers, hidden Markov models, graph algorithms, XML processing. Applications such as information retrieval, text classification, social network models, machine translation, genomic sequence alignment, word meaning extraction, and speech recognition.

Prerequisite: CS103, CS107, CS109.

Same as: CS 124, LINGUIST 280.

LINGUIST 181. Grammar Engineering. 1-4 Unit.

Hands-on techniques for implementation of linguistic grammars, drawing on grammatical theory and engineering skills. The implementation of constraints in morphology, syntax, and semantics, working within a unification-based lexicalist framework. Focus is on developing small grammars for English and at least one other language. Prerequisite: basic syntactic theory or 120. No programming skills required.

Same as: LINGUIST 281.

LINGUIST 182. Computational Theories of Syntax. 3-4 Units.

Salient features of modern syntactic theories, including HPSG, LFG, and TAG, motivated by computational concerns. Impact of work within these frameworks on the design of algorithms in computational linguistics, and its influence in both linguistics and computer science. Topics include: notions of unification; unification algorithms and their relation to linguistic theory; agenda-driven chart processing for analysis and synthesis; the interface with morphology, the lexicon, and semantics; and applications, notably machine translation.

Same as: LINGUIST 282.

LINGUIST 183. Programming and Algorithms for Natural Language Processing. 3-4 Units.

Construction of computer programs for linguistic processes such as string search, morphological, syntactic, and semantic analysis and generation, and simple machine translation. Emphasis is on the algorithms that have proved most useful for solving such problems.

Same as: LINGUIST 283.

LINGUIST 185. Writing Systems in a Digital Age. 2-3 Units.

Introduction to the variety of writing systems and their behaviors. Classification of all existing scripts as alphabetic, syllabic, ideographic; unifying and differentiating features within each group. How writing captures human language in various ways. The development of the alphabet, from ancient Semitic scripts to modern times. How writing systems are extended to additional languages. Chinese writing, its characteristics and sphere of influence. Japanese writing as a hybrid system that includes Chinese. Korean writing as an ideally designed script. The Indian system of writing as the foundation of numerous Asian syllabic scripts. Unicode as global standard for encoding text in all languages. Font technology: the emulation of human writing in the digital realm. nBasic knowledge of phonetics recommended. Knowledge of foreign languages helpful.

Same as: LINGUIST 284A.

LINGUIST 188. Natural Language Understanding. 3-4 Units.

Machine understanding of human language. Computational semantics (determination of word sense and synonymy, event structure and thematic roles, time, aspect, causation, compositional semantics, scopal operators), and computational pragmatics and discourse (coherence, coreference resolution, information packaging, dialogue structure). Theoretical issues, online resources, and relevance to applications including question answering and summarization. Prerequisites: one of LINGUIST 180 / CS 124 / CS 224N,S; and logic such as LINGUIST 130A or B, CS 157, or PHIL150).

Same as: CS 224U, LINGUIST 288.

LINGUIST 191. Linguistics and the Teaching of English as a Second/ Foreign Language. 4-5 Units.

Methodology and techniques for teaching languages, using concepts from linguistics and second language acquisition theory and research. Focus is on teaching English, but most principles and techniques applicable to any language. Optional 1-unit seminar in computer-assisted language learning.

Same as: LINGUIST 291.

LINGUIST 195A. Undergraduate Research Workshop. 1 Unit.

Designed for undergraduates beginning or working on research projects in linguistics. Participants present and receive feedback on their projects and receive tips on the research and writing process.

LINGUIST 196. Introduction to Research for Undergraduates. 1 Unit.

Research seminar for undergraduate students interested in linguistics. Presentations by Stanford linguistics faculty and graduate students who will discuss their own research projects.

LINGUIST 197A. Undergraduate Research Seminar. 1-3 Unit.

May be repeat for credit.

LINGUIST 198. Honors Research. 1-15 Unit.**LINGUIST 199. Independent Study. 1-15 Unit.**

LINGUIST 200. Foundations of Linguistic Theory. 4 Units.

Theories that have shaped contemporary linguistics; recurrent themes and descriptive practice. Strong background in Linguistics or permission of instructor.

LINGUIST 204. Philosophy of Linguistics. 4 Units.

Philosophical issues raised by contemporary work in linguistics. Topics include: the subject matter of linguistics (especially internalism vs. externalism), methodology and data (especially the role of quantitative methods and the reliance on intuitions), the relationship between language and thought (varieties of Whorfianism and anti-Whorfianism), nativist arguments about language acquisition, and language evolution. Same as: PHIL 369, SYMSYS 204.

LINGUIST 205A. Phonetics. 3-4 Units.

The study of speech sounds: how to produce them, how to perceive them, and their acoustic properties. The influence of production and perception systems on sound change and phonological patterns. Acoustic analysis and experimental techniques. Lab exercises. Prerequisite: 110 or equivalent, or consent of instructor.

Same as: LINGUIST 105.

LINGUIST 205B. Advanced Phonetics. 2-4 Units.

Prerequisite: LINGUIST 205A.

LINGUIST 207. Seminar in Phonetics: The perception and recognition of clear and casual speech.. 2-4 Units.

Through readings and discussion, we will focus on two questions in this seminar: (1) Is the balance of top-down versus bottom-up information different when processing careful vs. casual speech? (2) What provides more information to a listener - Half of a clearly-articulated word, or an entire reduced word? This is not a project-based seminar, but the seminar is linked to an ongoing research project, and we will use that project to ground how a researcher might go about addressing the above questions. We will refer to our in-progress project to provide concrete examples of (a) testable, theoretically-grounded hypotheses, (b) appropriately matched methods/design, (c) benefits/costs of different types of statistical methods, and (d) supported vs. speculative accounts. The seminar is heavily based on reading and discussion, but will be supplemented by the practical issues associated with a related project. At the end of the seminar, students will have a basic understanding of the literature related to the topic, what gaps/inconsistencies exist in that work, and how to pursue those gaps, if interested. A research proposal is required at the end of the quarter.

LINGUIST 210A. Phonology. 2-4 Units.

Introduction to phonological theory and analysis based on cross-linguistic evidence. Topics: phonological representations including features, syllables, metrical structure; phonological processes including assimilation and dissimilation; and phonological typology and universals; Optimality Theory.

LINGUIST 210B. Advanced Phonology. 4 Units.

A comparison of Stratal OT, Transderivational OT, and rule-based approaches, primarily on the empirical basis of stress, syllable structure, and prosodic organization. Course may be repeated once.

LINGUIST 211. Metrics. 1-4 Unit.

Principles of versification from a linguistic point of view. Traditional and optimality-theoretic approaches. The canonical system of English metrics, and its varieties and offshoots. The typology of metrical systems and its linguistic basis. The ideology of normative prosodic discourse in relation to changing poetic practice.

LINGUIST 212A. Seminar in Phonology. 2-4 Units.

Topics vary each year. Previous topics include variation in the phonology of words according to their contexts within larger expressions and the place of these phenomena in a theory of grammar. May be repeated for credit. Same as: LINGUIST 112.

LINGUIST 212B. Seminar in Phonology. 1-4 Unit.

May be repeated for credit.

LINGUIST 213. Corpus Phonology. 2-4 Units.

An introduction to constructing and using phonologically annotated corpora to test phonological hypotheses. Hands-on experience in corpus manipulation and phonological modeling.

LINGUIST 214. Phonology Workshop. 1-2 Unit.

May be repeated for credit.

LINGUIST 217. Morphosyntax. 2-4 Units.

The role of morphology in grammar: how word structure serves syntax in the expression of meaning. Lexical semantics, Theta-roles, argument structure, and grammatical relations. Licensing: case, agreement, word order, and their interaction.

LINGUIST 218. Seminar on Morphological Theories. 2-4 Units.

Word formation and the lexicon: empirical generalizations and theoretical approaches. Lexicalist and Distributed Morphology. How words are built and interpreted: constituency and headedness, morpheme order and scope, the mirror principle, bracketing paradoxes, the hierarchy of functional categories. Paradigms, blocking, gaps, periphrasis, syncretism. Locality, head movement vs. selection, constraints on allomorphy, incorporation, polysynthesis, cliticization and prosodic re-ordering phenomena.

LINGUIST 219. Frequency and the Grammar of Alternations. 1-4 Unit.

Variationist, and psycholinguistic studies of how syntactic alternations (for example, the English dative, genitive, and passive) develop in time and space.

LINGUIST 221A. Foundations of English Grammar. 1-4 Unit.

A systematic introduction to the formal analysis of English grammar using the framework of head-driven phrase structure grammar (HPSG). Topics: feature structure modeling, lexical and phrasal organization in terms of type hierarchies and constraint inheritance, clausal types, patterns of complementation, the auxiliary system, extraction dependencies, wh-constructions, and the syntax-semantics interface.

LINGUIST 221B. Studies in Universal Grammar. 1-4 Unit.

Focus is on grammatical analysis of individual languages. Builds directly on the theoretical foundations presented in 221A. Topics vary each year.

LINGUIST 222A. Foundations of Syntactic Theory I. 3-4 Units.

The roles of the verb and the lexicon in the determination of sentence syntax and their treatment in modern grammatical theories. Empirical underpinnings of core phenomena, including the argument/adjunct distinction, argument structure and argument realization, control and raising, operations on argument structure and grammatical function changing rules. Motivations for a lexicalist approach rooted in principles of lexical expression and subcategorization satisfaction. Prerequisite: 120 or permission of instructor.

LINGUIST 222B. Foundations of Syntactic Theory II. 2-4 Units.

The nature of unbounded dependency constructions and their treatment in modern grammatical theories. Filler-gap dependencies, island constraints, and the relation between grammar and processing. Prerequisite: 222A.

LINGUIST 223. Introduction to Minimalist Syntax. 3-4 Units.

Introduces the basics of Minimalist architecture and structure-building operations, with attention to the communication of syntax with the phonological and semantic interfaces. Topics include phrase structure, locality and phases, phrasal and head movement, functional categories, and features. A previous graduate-level syntax course, or permission of the instructor required.

LINGUIST 224. Introduction to Lexical Function Grammar. 2-4 Units.

Presentation of a formal model of grammar designed to allow precise, computationally tractable descriptions of cross-linguistic variation in syntactic structure. Concentration on the formal properties of the model, its flexibility in teasing out language specific and possibly universal characteristics of natural languages and the place of syntax as a component within a larger linguistic architecture. Prerequisite: 120 or consent of instructor. Same as: LINGUIST 124.

LINGUIST 224A. From Text to Natural Reasoning. 1-4 Unit.

To reason about textual information we rely extensively on extra-linguistic information but the syntactic structure and lexical items used also play a role in guiding us to conclusions. In by now traditional semantic practice the contributions of those are treated in model theoretic terms. But formulas of first or higher order logic do not come with effective procedures for the reasoning that is required to draw inferences or answer questions given some natural language input. Natural Reasoning is a cover term we use for a family of proof-theoretic formal approaches that are currently used by computational linguists. The course will give an overview of proof-theoretic logic as applied to natural language, discuss some of the computational systems that incorporate this view (Stanford's NatLog, Bar Ilan's Biutee, Parc's Bridge) and conclude with a critical view of the linguistic generalizations that underlie these approaches and means to improve them or mitigate their shortcomings. The examples of natural reasoning will mainly be in the domain of monotonicity reasoning and reasoning about the factuality of events.

LINGUIST 224B. Advanced Topics in Lexical Functional Grammar. 1-4 Unit.

May be repeated for credit.

LINGUIST 225. Seminar in Syntax: Binding Theory. 2-4 Units.

The course begins with a review of classic generative theories of anaphora, from early transformational analyses to GB Binding Theory and its competitors. We then survey the empirical typology of referentially dependent expressions and binding domains, including obviation, logophoricity, and the different binding properties of affixal, pronominal, and complex reflexives and reciprocals. We conclude by exploring how the cross-linguistic variation and generalizations can be addressed in the three principal current theoretical approaches: pragmatic, minimalist, and optimality-theoretic. May be repeated for credit.

LINGUIST 227C. Projects in Syntax. 2-4 Units.

Group research projects using quantitative syntactic data from texts, recordings, experiments, or historical records. Skills in extracting, graphically exploring, and analyzing naturalistic syntactic data, and in presenting results. May be repeated for credit. Prerequisite: 229A, B, or D, or equivalent.

LINGUIST 229A. Laboratory Syntax I. 1-4 Unit.

Critiques of the empirical foundations of syntax. The roles of introspective, usage-based, experimental, and typological evidence. Modern methods of data collection and analysis used in syntax. Hands-on, practical work with data sets. May be repeated for credit.

LINGUIST 229B. Laboratory Syntax II. 1-4 Unit.

Hands-on use of methods for handling syntactic data, including corpus work on ecologically natural data and controlled experimental paradigms. Explanatory models of syntactic processing and their relation to theories of grammar. May be repeated for credit.

LINGUIST 229C. Laboratory Syntax III. 1-4 Unit.

Hands-on use of methods for handling syntactic data, including corpus work on ecologically natural data and controlled experimental paradigms. Explanatory models of syntactic processing and their relation to theories of grammar. May be repeated for credit.

LINGUIST 229D. Empirical Syntax Research Seminar. 1-2 Unit.

Recent work in syntax that employs data-rich methods like corpora and laboratory studies, emphasizing research by seminar participants. May be repeated for credit.

LINGUIST 230A. Introduction to Semantics and Pragmatics. 4 Units.

Linguistic meaning and its role in communication. Topics include ambiguity, vagueness, presupposition, intonational meaning, and Grice's theory of conversational implicature. Applications to issues in politics, the law, philosophy, advertising, and natural language processing. Those who have not taken logic, such as PHIL 150 or 151, should also enroll in 130C. Pre- or corequisite: 120, 121, consent of instructor, or graduate standing in Linguistics.

Same as: LINGUIST 130A.

LINGUIST 230B. Semantics and Pragmatics I. 2-4 Units.

Expands on 130A/230A. Detailed study of selected topics in formal semantics and pragmatics. Prerequisites: LINGUIST 130A/230A or permission from instructor.

LINGUIST 230C. Semantics and Pragmatics II. 1-4 Unit.**LINGUIST 230E. Logic Laboratory. 1 Unit.**

Typically taken in conjunction with 130A/230A.

Same as: LINGUIST 130C.

LINGUIST 232A. Lexical Semantics. 2-4 Units.

Introduction to issues in word meaning, focused primarily around verbs. Overview of the core semantic properties of verbs and the organization of the verb lexicon. Approaches to lexical semantic representation, including semantic role lists, proto-roles, and causal and aspectual theories of event conceptualization.

LINGUIST 232B. Seminar in Lexical Semantics: Lexical Categories. 1-4 Unit.

Current topic: A review of recent research into the nature of lexical categories. Topics include languages said to lack lexical category distinctions, languages lacking full lexical category inventories, and methodological issues facing investigations of lexical categories. Data will be drawn from various languages and several semantic domains. May be repeated for credit with different content. May be repeated for credit.

LINGUIST 234. The Structure of Discourse: Theory and Applications. 2-4 Units.

The organization of language above the sentence level, and the manifestation of language in context. Practical experience in working with discourse data.

Same as: LINGUIST 134A.

LINGUIST 235. Semantic Fieldwork. 2-4 Units.

Techniques for evidence from less well-studied languages within formal semantic theory. Semantic phenomena, and techniques for investigating them, including scope, quantifiers, pronouns, focus, tense, aspect, mood, evidentiality, and information structure. Practical work on a language.

LINGUIST 236. SEM IN SEMANTICS: Representations of meaning. 3 Units.

Representations of meaning from psychological, linguistic, and computational viewpoints. Topics include lambda calculus, probabilistic programming, and vector spaces. Special emphasis on the challenges of semantic composition. May be repeated for credit.

Same as: PSYCH 236C.

LINGUIST 237. Seminar in Semantics: Gradation & Modality. 1-4 Unit.

Discussion of major semantic theories of modality and gradation, with special attention to empirical and logical issues that arise from the study of gradable modals.

LINGUIST 239. Semantics and Pragmatics Research Seminar. 1-2 Unit.

Presentation of ongoing research in semantics. May be repeated for credit.

LINGUIST 240. Language Acquisition I. 4 Units.

Processes of language acquisition in early childhood; stages in development; theoretical issues and research questions. Practical experience in data collection.

Same as: LINGUIST 140.

LINGUIST 241. Language Acquisition II. 4 Units.

Pragmatics and acquisition. May be repeated for credit.

LINGUIST 242. Heritage Languages. 3-4 Units.

The linguistic and cultural properties of Heritage languages, which are partially acquired and supplanted by a dominant language in childhood. Topics: Syntactic, phonological and morphological properties of heritage languages, implications from experimental HL research for language universals, cultural vs. linguistic knowledge, the role of schooling in HL competence, influence of the dominant language on the HL, and pedagogical issues for HL learners in the classroom.

Same as: LINGUIST 142.

LINGUIST 245. Experimental Design for Linguistics. 4 Units.

Hypothesis formation, confound avoidance, power, general methods, and analysis of results. Students complete a pilot experiment; write-up; peer review; presentation.

LINGUIST 249. Language Processing. 2-4 Units.

Understanding spoken or written language requires the rapid, incremental processing of novel compositional structures, as well as the integration of the incoming language stream with multiple sources of information, such as the prior discourse, physical context, social information, etc. How are humans able to efficiently accomplish this task? To address this question, this course will consider principles of sentence and discourse processing that guide language understanding and features of sentence & discourse structure that facilitate comprehension. Specific topics are likely to include reference processing, memory & forgetting, individual differences in comprehension ability, the role of context, and computational models of language comprehension.

LINGUIST 250. Sociolinguistic Theory and Analysis. 2-4 Units.

Methods of modeling the patterned variation of language in society. Emphasis is on variation, its relation to social structure and practice, and its role in linguistic change. Intersection between quantitative and qualitative analysis, combining insights of sociology and linguistic anthropology with quantitative linguistic data. Prerequisite: graduate standing in Linguistics or consent of instructor.

LINGUIST 251. Sociolinguistic Field Methods. 3-5 Units.

Strengths and weaknesses of the principal methods of data collection in sociolinguistics.

LINGUIST 252. Sociolinguistics and Pidgin Creole Studies. 2-4 Units.

Introduction to pidgins and creoles, organized around the main stages in the pidgin-creole life cycle: pidginization, creolization, and decreolization. Focus is on transformations in the English language as it was transported from Britain to Africa, Asia, the Caribbean, and the Pacific. Resultant pidginized and creolized varieties such as Nigerian Pidgin English, Chinese Pidgin English, New Guinea Tok Pisin, Suriname Sranan, and the creole continua of Guyana, Jamaica, and Hawaii. Also French, Dutch, Portuguese, Chinook, Motu, and Sango.

Same as: LINGUIST 152.

LINGUIST 253. Race, Ethnicity, and Language. 3-4 Units.

This seminar explores the linguistic construction of race and ethnicity across a wide variety of contexts and communities. Throughout the course, we will take a comparative perspective and highlight how different racial/ethnic formations participate in similar, yet different, ways of "doing race" through language, interaction and culture. Readings draw heavily from perspectives in (linguistic) anthropology and sociolinguistics. Prerequisite: consent of instructor.

Same as: ANTHRO 320A, EDUC 389X.

LINGUIST 254. Sociolinguistics of Language Contact. 2-4 Units.

The role of contact between speakers of different languages in processes of language borrowing, convergence, and shift. Attending both to linguistic aspects and social contexts, examine: second-language acquisition, bilingualism, code-switching, lexical and grammatical borrowing, first language attrition, language death, and the creation of new contact varieties such as jargons, mixed languages, pidgins, and creoles. Prerequisite: background in linguistics, at least one course in linguistics.

Same as: LINGUIST 154.

LINGUIST 255A. Seminar in Sociolinguistics: California Dialectology. 2-5 Units.

Topics vary by quarter. Current topic is based on sociolinguistic interviews gathered in the first two field seasons of the Voices of California project. May be repeated for credit.

LINGUIST 255B. Sociolinguistics Classics and Community Studies. 3-5 Units.

This course discusses some of the major community studies in sociolinguistics (e.g. Labov in NYC, Wolfram in Detroit, Trudgill in Norwich, Milroy in Belfast, and a selection of others up to the present) and the work of other classic sociolinguistic figures (e.g. Romaine, Hymes) who contributed in other ways. Our goal is to reach a deep understanding and critique of their methods, findings and ideas, to improve our own research and our responses to new developments in the field.

LINGUIST 256. Language, Gender and Sexuality. 1-4 Unit.

The role of language in constructing gender and sexuality. Historical overview of major theoretical perspectives and debates (difference vs. dominance, identity vs. desire) and discussion of new directions (affect, embodiment, figures of personhood, experimental approaches). Previous coursework in sociolinguistics recommended. Prerequisites: LING 250 and 110 or the equivalent.

LINGUIST 257. Sociophonetics. 1-4 Unit.

The study of phonetic aspects of sociolinguistic variation and the social significance of phonetic variation. Acoustic analysis of vowels, consonants, prosody, and voice quality. Hands-on work on collaborative research project. Prerequisite: 110 or equivalent, or consent of instructor. Same as: LINGUIST 157.

LINGUIST 258. Analysis of Variation. 1-4 Unit.

The quantitative study of linguistic variability in time, space, and society emphasizing social constraints in variation. Hands-on work with variable data. Prerequisites: 105/205 and 250, or consent of instructor.

LINGUIST 259. Topics in Sociolinguistics. 2-4 Units.

Topics vary by quarter. Current topic is Sociophonetics. Repeatable for credit. This seminar explores new methods of collecting and analyzing sociophonetic data in an experimental setting, including electroglottography, aerodynamic measures, speech resynthesis, and perception study tasks. Requirements include both collaborative and individual research projects.

LINGUIST 260A. Historical Morphology and Phonology. 4 Units.

Sound change and analogical change in the perspective of linguistic theory. Internal and comparative reconstruction.

LINGUIST 260B. Historical Morphosyntax. 2-4 Units.

Morphological and syntactic variation and change. Reanalysis, grammaticalization. The use of corpora and quantitative evidence.

LINGUIST 262. History Through Language. 3-4 Units.

Discussion of recent proposals about how to enhance work on grammaticalization and lexicalization by adopting a construction grammar perspective.

Same as: LINGUIST 162.

LINGUIST 264. English Transplanted, English Transformed: Pidgins and Creoles. 2-4 Units.

English varieties around the world, including white vernacular dialects and creole, pidgin, and indiginized Englishes. Emphasis is on the historical circumstances of origin, linguistic characteristics, and social setting in colonial and postcolonial societies. Theoretical issues pertaining to language contact, language shift, and pidgin and creole formation.

LINGUIST 265. African American Vernacular English. 3-5 Units.

The English vernacular spoken by African Americans in big city settings, and its relation to Creole English dialects spoken on the S. Carolina Sea Islands (Gullah), in the Caribbean, and in W. Africa. The history of expressive uses of African American English (in soundin' and rappin'), and its educational implications. Service Learning Course (certified by Haas Center).

Same as: AFRICAAM 21, LINGUIST 65.

LINGUIST 266. Vernacular English and Reading. 4-5 Units.

Discusses some of the literature on the relation between use of vernacular English varieties (e.g. African American Vernacular English, Chicano English) and the development of literacy (especially in Standard English). But our primary focus is on improving the reading skills of African American and Latino students in local schools through the Reading Road program developed at the University of Pennsylvania. Students must commit to tutoring one or more elementary students weekly, using the program. L65 AAVE recommended, but not required.

Same as: LINGUIST 66.

LINGUIST 270. The Arabic Language and Culture. 3 Units.

(Formerly AMELANG 36). Arabic language from historical, social, strategic, and linguistic perspectives. History of the Arabic language and the stability of classical Arabic over the last 15 centuries. Why the functionality of classical Arabic has not changed as Latin, Old English, and Middle English have. Social aspects of the Arabic language, Ferguson's notion of diglossia. The main varieties of Arabic, differences among them, and when and where they are spoken. Role of Arabic and culture in current world politics, culture, and economy. Linguistic properties of Arabic such as root-based morphology, lexical ambiguity, and syntactic structure relating it to current linguistic theories.

Same as: LINGUIST 36.

LINGUIST 271. Structure of Basque. 2-4 Units.

Introduction to key topics in Basque morphology, syntax, semantics and how they bear on current theoretical debates. Topics covered may include basic clause structure and word order, case-marking and ergativity, the expression of motion and location.

LINGUIST 272. Structure of Finnish. 2-4 Units.

Central topics in Finnish morphology, syntax, and semantics and how they bear on current theoretical debates. Topics: clause structure; case; aspect; word order.

LINGUIST 273. The Structure of Russian. 2-4 Units.

A synchronic overview of contemporary standard Russian, including its sound system, word formation and grammatical structure. Emphasis is on problems presented by Russian for current linguistic theory. The acquisition of Russian as a first language.

Same as: LINGUIST 173.

LINGUIST 274B. Field Methods II. 3-4 Units.

First course in series with 274C, with a focus on phonetic topics in a targeted language. Prerequisite: one quarter of phonology and one quarter of syntax or permission of instructor. Graduate students are heavily encouraged to make a commitment to both 274B and 274C in the same year.

LINGUIST 274C. Linguistic Field Methods: Syntax. 3-4 Units.

Prerequisites include one quarter of phonology and one quarter of syntax or permission of instructor. Graduate students are heavily encouraged to make a commitment to both 274B and 274C in the same year.

LINGUIST 275. Research Projects Practicum. 1-2 Unit.

Forum for students with ongoing linguistic research projects, intended to provide participants with feedback on issues of study design, data collection and analysis. Some sessions will provide brief introductions to specific topics in research methodology, chosen based on student interest.

LINGUIST 276. Quantitative Methods in Linguistics. 2-4 Units.

Introduction to methods for collecting and analyzing quantitative linguistic data, with a primary focus on the use of corpora in exploring theoretical questions in various areas of linguistics. Topics include the access and retrieval of corpus data (including web-based corpora), data annotation, and statistical modeling. Practical experience with R, Python scripting, and setting up online experiments through Amazon Mechanical Turk.

LINGUIST 277. Laboratory Methods in Psycholinguistics. 2-4 Units.

Issues that commonly arise in the design and implementation of linguistic experiments and in the statistical analysis of empirical results. Topics in experimental design include selection of stimuli, blocking, and power analysis and sample size calculation. How to fit and interpret statistical models using the multilevel regression and Bayesian inference, as implemented in software packages R and Bugs. Topics include interpretation of model coefficients for fixed and random effects, collinearity, model criticism, as well as comparison and reporting of models. Theoretical issues worked out at lab sessions using examples from experiments and corpus studies, including those provided by students.

LINGUIST 278. Programming for Linguists. 1-4 Unit.

Computer programming techniques for collecting and analyzing data in linguistic research. Introduction to the UNIX, regular expressions, and Python scripting. Hands-on experience gathering, formatting, and manipulating corpus, field, and experimental data, combining data from multiple sources, and working with existing tools. Knowledge of computer programming not required.

LINGUIST 280. From Languages to Information. 3-4 Units.

Automated processing of less structured information: human language text and speech, web pages, social networks, genome sequences, with goal of automatically extracting meaning and structure. Methods include: string algorithms, automata and transducers, hidden Markov models, graph algorithms, XML processing. Applications such as information retrieval, text classification, social network models, machine translation, genomic sequence alignment, word meaning extraction, and speech recognition. Prerequisite: CS103, CS107, CS109.

Same as: CS 124, LINGUIST 180.

LINGUIST 281. Grammar Engineering. 1-4 Unit.

Hands-on techniques for implementation of linguistic grammars, drawing on grammatical theory and engineering skills. The implementation of constraints in morphology, syntax, and semantics, working within a unification-based lexicalist framework. Focus is on developing small grammars for English and at least one other language. Prerequisite: basic syntactic theory or 120. No programming skills required.

Same as: LINGUIST 181.

LINGUIST 282. Computational Theories of Syntax. 3-4 Units.

Salient features of modern syntactic theories, including HPSG, LFG, and TAG, motivated by computational concerns. Impact of work within these frameworks on the design of algorithms in computational linguistics, and its influence in both linguistics and computer science. Topics include: notions of unification; unification algorithms and their relation to linguistic theory; agenda-driven chart processing for analysis and synthesis; the interface with morphology, the lexicon, and semantics; and applications, notably machine translation.

Same as: LINGUIST 182.

LINGUIST 283. Basic Algorithms for Computational Linguistics. 2-4 Units.

Foundational algorithms of non-statistical computational linguistics, including string searching, suffix trees and suffix arrays, finite-state technology for phonology, morphology and dictionary access, classical back-tracking programs for sentence analysis, the use of charts in parsing, generation and translation. Students complete a programming project in one of these areas.

LINGUIST 283. Programming and Algorithms for Natural Language Processing. 3-4 Units.

Construction of computer programs for linguistic processes such as string search, morphological, syntactic, and semantic analysis and generation, and simple machine translation. Emphasis is on the algorithms that have proved most useful for solving such problems.

Same as: LINGUIST 183.

LINGUIST 284. Natural Language Processing. 3-4 Units.

Methods for processing human language information and the underlying computational properties of natural languages. Syntactic and semantic processing from linguistic and algorithmic perspectives. Focus is on modern quantitative techniques in NLP: using large corpora, statistical models for acquisition, translation, and interpretation; and representative systems.

Prerequisites: CS124 or CS121/221.

Same as: CS 224N.

LINGUIST 284A. Writing Systems in a Digital Age. 2-3 Units.

Introduction to the variety of writing systems and their behaviors. Classification of all existing scripts as alphabetic, syllabic, ideographic; unifying and differentiating features within each group. How writing captures human language in various ways. The development of the alphabet, from ancient Semitic scripts to modern times. How writing systems are extended to additional languages. Chinese writing, its characteristics and sphere of influence. Japanese writing as a hybrid system that includes Chinese. Korean writing as an ideally designed script. The Indian system of writing as the foundation of numerous Asian syllabic scripts. Unicode as global standard for encoding text in all languages. Font technology: the emulation of human writing in the digital realm. nBasic knowledge of phonetics recommended. Knowledge of foreign languages helpful.

Same as: LINGUIST 185.

LINGUIST 285. Spoken Language Processing. 2-4 Units.

Introduction to spoken language technology with an emphasis on dialogue and conversational systems. Automatic speech recognition, extraction of affect and social meaning from speech, speech synthesis, dialogue management, and applications to digital assistants, search, and recommender systems. Prerequisites: CS 124, 221, 224N, or 229.

Same as: CS 224S.

LINGUIST 286. Information Retrieval and Web Search. 3 Units.

Text information retrieval systems; efficient text indexing; Boolean, vector space, and probabilistic retrieval models; ranking and rank aggregation; evaluating IR systems. Text clustering and classification: classification algorithms, latent semantic indexing, taxonomy induction; Web search engines including crawling and indexing, link-based algorithms, and web metadata. Prerequisites: CS 107, CS 109, CS 161.

Same as: CS 276.

LINGUIST 287. Extracting Social Meaning and Sentiment. 3 Units.

Methods for extracting social meaning (speaker perspectives, emotions and attitudes) from text and speech. Topics include sentiment analysis and summarization, detection of deception, sarcasm, emotion, and personality. nAnalysis of meaning-bearing characteristics of the speaker and topic, including text, discourse, prosodic and other cues. Prerequisite: CS 124 or 221 or 229 or permission of instructors.

LINGUIST 288. Natural Language Understanding. 3-4 Units.

Machine understanding of human language. Computational semantics (determination of word sense and synonymy, event structure and thematic roles, time, aspect, causation, compositional semantics, scopal operators), and computational pragmatics and discourse (coherence, coreference resolution, information packaging, dialogue structure). Theoretical issues, online resources, and relevance to applications including question answering and summarization. Prerequisites: one of LINGUIST 180 / CS 124 / CS 224N,S: and logic such as LINGUIST 130A or B, CS 157, or PHIL150).

Same as: CS 224U, LINGUIST 188.

LINGUIST 289. Topics in Computational Linguistics: History of Computational Linguistics. 3-4 Units.

Intellectual history of computational linguistics and natural language processing, together with related aspects of dialogue and speech processing, using primary sources. Reading of seminal early papers, interviews with historical figures, with the goal of understanding the origins and intellectual development of the field. Prerequisites: at least one of LING 180, 281, 283, 284, 286, or 288.

LINGUIST 291. Linguistics and the Teaching of English as a Second/ Foreign Language. 4-5 Units.

Methodology and techniques for teaching languages, using concepts from linguistics and second language acquisition theory and research. Focus is on teaching English, but most principles and techniques applicable to any language. Optional 1-unit seminar in computer-assisted language learning. Same as: LINGUIST 191.

LINGUIST 294. Linguistic Research Discussion Group. 1 Unit.

Restricted to first-year Linguistics Ph.D. students.

LINGUIST 390. M.A. Project. 1-6 Unit.**LINGUIST 394. TA Training Workshop. 1 Unit.**

For second-year graduate students in Linguistics.

LINGUIST 395. Research Workshop. 1-2 Unit.

Restricted to students in the doctoral program. Student presentations of research toward qualifying papers. May be repeated for credit.

LINGUIST 395C. Research Workshop III. 1-2 Unit.

Restricted to students in the doctoral program. Student presentations of ongoing research plus professional development sessions.

LINGUIST 396. Research Projects in Linguistics. 2-3 Units.

Mentored research project for first-year graduate students in linguistics.

LINGUIST 397. Directed Reading. 1-15 Unit.**LINGUIST 398. Directed Research. 1-15 Unit.****LINGUIST 399. Dissertation Research. 1-15 Unit.**

Management Science & Engineering Courses

MS&E 20. Discrete Probability Concepts And Models. 4 Units.

Concepts and tools for the analysis of problems under uncertainty, focusing on structuring, model building, and analysis. Examples from legal, social, medical, and physical problems. Topics include axioms of probability, probability trees, belief networks, random variables, conditioning, and expectation.

MS&E 22Q. The Flaw of Averages. 3 Units.

Uncertain assumptions in business and public policy are often replaced with single "best guess" or average numbers. This leads to a fallacy as fundamental as the belief that the earth is flat, which I call the Flaw of Averages. It states, in effect, that: plans based on average assumptions are wrong on average. This class will discuss mitigations of the flaw of averages using simulation and other methods from probability management.

MS&E 41. Financial Literacy. 1 Unit.

Practical knowledge about personal finance and money management including budgeting, pay checks, credit cards, banking, insurance, taxes, and saving. Class especially appropriate for those soon to be self-supporting. Limited enrollment. Admission by order of enrollment in Axxess.

MS&E 52. Introduction to Decision Making. 3 Units.

Experienced management consultants share lessons and war stories. Case studies, disguised examples from real engagements, and movie clips illustrate theories and concepts of decision analysis. Student teams critique decisions made in actual organizations. Topics include what makes a good decision, how decisions can be made better, framing and structuring techniques, modeling and analysis tools, biases and probability assessment, evaluation and appraisal methods, decision psychology, creativity and organizational leadership, and effective presentation styles. Not intended for MS&E majors.

MS&E 92Q. International Environmental Policy. 3 Units.

Preference to sophomores. Science, economics, and politics of international environmental policy. Current negotiations on global climate change, including actors and potential solutions. Sources include briefing materials used in international negotiations and the U.S. Congress.

MS&E 93Q. Nuclear Weapons, Energy, Proliferation, and Terrorism. 3 Units.

Preference to sophomores. What are nuclear weapons; what do they do? How are they different from other weapons? What drives proliferation of nuclear weapons? Why do countries want them? Can they be eliminated? What about Iran and North Korea? What role does nuclear energy play? Can it help combat global climate change? What are the risks of nuclear terrorism? Recommended: a course in international relations, engineering, or physical science.

MS&E 101. Undergraduate Directed Study. 1-15 Unit.

Subject of mutual interest to student and faculty member. Prerequisite: faculty sponsor.

MS&E 107. Interactive Management Science. 3 Units.

Analytical techniques such as linear and integer programming, Monte Carlo simulation, forecasting, decision analysis, and Markov chains in the environment of the spreadsheet. Probability management. Materials include spreadsheet add-ins for implementing these and other techniques. Emphasis is on building intuition through interactive modeling, and extending the applicability of this type of analysis through integration with existing business data structures.

Same as: MS&E 207.

MS&E 108. Senior Project. 5 Units.

Restricted to MS&E majors in their senior year. Students carry out a major project in groups of four, applying techniques and concepts learned in the major. Project work includes problem identification and definition, data collection and synthesis, modeling, development of feasible solutions, and presentation of results. Service Learning Course (certified by Haas Center).

MS&E 111. Introduction to Optimization. 4 Units.

Formulation and analysis of linear optimization problems. Solution using Excel solver. Polyhedral geometry and duality theory. Applications to contingent claims analysis, production scheduling, pattern recognition, two-player zero-sum games, and network flows. Prerequisite: MATH 51.

Same as: ENGR 62.

MS&E 120. Probabilistic Analysis. 5 Units.

Concepts and tools for the analysis of problems under uncertainty, focusing on focusing on structuring, model building, and analysis. Examples from legal, social, medical, and physical problems. Topics include axioms of probability, probability trees, random variables, distributions, conditioning, expectation, change of variables, and limit theorems. Prerequisite: MATH 51.

MS&E 121. Introduction to Stochastic Modeling. 4 Units.

Stochastic processes and models in operations research. Discrete and continuous time parameter Markov chains. Queuing theory, inventory theory, simulation. Prerequisite: 120 or Statistics 116.

MS&E 130. Information Networks and Services. 3 Units.

Architecture of the Internet and performance engineering of computer systems and networks. Switching, routing and shortest path algorithms. Congestion management and queueing networks. Peer-to-peer networking. Wireless and mobile networking. Information service engineering and management. Search engines and recommendation systems. Reputation systems and social networking technologies. Security and trust. Information markets. Select special topics and case studies. Prerequisites: 111, 120, and CS 106A.

MS&E 140. Accounting for Managers and Entrepreneurs. 3-4 Units.

Non-majors and minors who have taken or are taking elementary accounting should not enroll. Introduction to accounting concepts and the operating characteristics of accounting systems. The principles of financial and cost accounting, design of accounting systems, techniques of analysis, and cost control. Interpretation and use of accounting information for decision making. Designed for the user of accounting information and not as an introduction to a professional accounting career. Enrollment limited. Admission by order of enrollment. Same as: MS&E 240.

MS&E 142. Introductory Financial Analysis. 3 Units.

Evaluation and management of money, complicated by temporary distributions and uncertainty. The "time-value of money" and its impact on economic decisions (both personal and corporate) with the introduction of interest rate (constant or varying over time); several approaches critically examined and made consistent as suitable metrics of comparison. The concept of investment diversification in the presence of uncertainty; portfolio selection and efficient frontier analysis leading to the formulation of the Capital Asset Pricing Model; practical implementation of the concepts, including comparison of loan (e.g., house and auto) terms, credit card financial terms, interest rate term structure and its relationship to rate-of-return analysis, and graphical presentation of uncertain investment alternatives; and current economic news of interest. Critical thinking, discussion, and interaction, using group and computer labs assignments. Prerequisites: differential calculus and probability. Recommended: optimization.

MS&E 146. Corporate Financial Management. 4 Units.

Key functions of finance in both large and small companies, and the core concepts and key analytic tools that provide their foundation. Making financing decisions, evaluating investments, and managing cashflow, profitability and risk. Designing performance metrics to effectively measure and align the activities of functional groups and individuals within the firm. Structuring relationships with key customers, partners and suppliers. Prerequisite: 142 or 245G or equivalent.

MS&E 152. Introduction to Decision Analysis. 3-4 Units.

How to make good decisions in a complex, dynamic, and uncertain world. People often make decisions that on close examination they regard as wrong. Decision analysis uses a structured conversation based on actional thought to obtain clarity of action in a wide variety of domains. Topics: distinctions, possibilities and probabilities, relevance, value of information and experimentation, relevance and decision diagrams, risk attitude. Students seeking to fulfill the Writing in the Major requirement should register for MS&E 152W. Same as: MS&E 152W.

MS&E 152W. Introduction to Decision Analysis. 3-4 Units.

How to make good decisions in a complex, dynamic, and uncertain world. People often make decisions that on close examination they regard as wrong. Decision analysis uses a structured conversation based on actional thought to obtain clarity of action in a wide variety of domains. Topics: distinctions, possibilities and probabilities, relevance, value of information and experimentation, relevance and decision diagrams, risk attitude. Students seeking to fulfill the Writing in the Major requirement should register for MS&E 152W. Same as: MS&E 152.

MS&E 175. Innovation, Creativity, and Change. 3-4 Units.

Problem solving in organizations; creativity and innovation skills; thinking tools; creative organizations, teams, individuals, and communities. Limited enrollment. (Katila).

MS&E 178. The Spirit of Entrepreneurship. 3 Units.

Is there more to entrepreneurship than inventing the better mouse trap? This course uses the speakers from the Entrepreneurial Thought Leader seminar (MS&E472) to drive research and discussion about what makes an entrepreneur successful. Topics include venture financing, business models, and interpersonal dynamics in the startup environment. Students meet before and after MS&E 472 to prepare for and debrief after the sessions. Enrollment limited to 50 students. Admission by application.

MS&E 180. Organizations: Theory and Management. 4 Units.

For undergraduates only; preference to MS&E majors. Classical and contemporary organization theory; the behavior of individuals, groups, and organizations. Limited enrollment. Admission by application. Students must attend first session.

MS&E 181. Issues in Technology and Work for a Postindustrial Economy. 3 Units.

How changes in technology and organization are altering work and lives. Approaches to studying and designing work. How understanding work and work practices can assist engineers in designing better technologies and organizations. Topics include job design, distributed and virtual organizations, the blurring of boundaries between work and family life, computer supported cooperative work, trends in skill requirements and occupational structures, monitoring and surveillance in the workplace, downsizing and its effects on work systems, project work and project-based lifestyles, the growth of contingent employment, telecommuting, electronic commerce, and the changing nature of labor relations. Enrollment limited to 50 students. Preference to MS&E, STS, and CEE seniors, followed by MS&E, STS, and CEE juniors.

MS&E 185. Global Work. 4 Units.

Issues, challenges, and opportunities facing workers, teams, and organizations working across national boundaries. Topics include geographic distance, time zones, language and cultural differences, technologies to support distant collaboration, team dynamics, and corporate strategy. Limited enrollment. Admission by application.

MS&E 187. FEED the Change: Redesigning Food Systems. 2-3 Units.

Introductory course to design and systems thinking, with an emphasis on food systems. Series of diverse experiences (lectures, workshops, teaching, field trips, storytelling, and more) teaching how to use human-centered design to approach problem solving, how to begin analyzing complex systems, and how to work effectively in teams. Explore passions and interests, as well as different elements of the design process. Work in teams on real projects, and teach other students about food and design thinking. Admission is by application: <http://feedcollaborative.org/classes/>. Same as: EARTHSYS 187.

MS&E 189. Social Networks - Theory, Methods, and Applications. 3 Units.

Introduces students to the theoretical, substantive, and methodological foundations of social networks. The social network paradigm seeks to explain how social relations facilitate and constrain an actor's opportunities, behaviors, and cognitions. Topics include: network concepts and principles; network data collection, measurement, and analysis; and applications in management, engineering, and related disciplines.

MS&E 190. Methods and Models for Policy and Strategy Analysis. 3 Units.

Guest lectures by departmental practitioners. Emphasis is on links among theory, application, and observation. Environmental, national security, and health policy; marketing, new technology, and new business strategy analyses. Comparisons between domains and methods.

MS&E 193. Technology and National Security. 3 Units.

The interaction of technology and national security policy from the perspective of history to implications for the new security imperative, homeland defense. Key technologies in nuclear and biological weapons, military platforms, and intelligence gathering. Policy issues from the point of view of U.S. and other nations. The impact of terrorist threat. Guest lecturers include key participants in the development of technology and/or policy. Students seeking to fulfill the WIM requirement should register for 193W.

Same as: MS&E 193W, MS&E 293.

MS&E 193W. Technology and National Security. 3 Units.

The interaction of technology and national security policy from the perspective of history to implications for the new security imperative, homeland defense. Key technologies in nuclear and biological weapons, military platforms, and intelligence gathering. Policy issues from the point of view of U.S. and other nations. The impact of terrorist threat. Guest lecturers include key participants in the development of technology and/or policy. Students seeking to fulfill the WIM requirement should register for 193W.

Same as: MS&E 193, MS&E 293.

MS&E 197. Ethics and Public Policy. 5 Units.

Ethical issues in science- and technology-related public policy conflicts. Focus is on complex, value-laden policy disputes. Topics: the nature of ethics and morality; rationales for liberty, justice, and human rights; and the use and abuse of these concepts in policy disputes. Case studies from biomedicine, environmental affairs, technical professions, communications, and international relations.

MS&E 201. Dynamic Systems. 3-4 Units.

Goal is to think dynamically in decision making, and recognize and analyze dynamic phenomena in diverse situations. Concepts: formulation and analysis; state-space formulation; solutions of linear dynamic systems, equilibria, dynamic diagrams; eigenvalues and eigenvectors of linear systems, the concept of feedback; nonlinear dynamics, phase plane analysis, linearized analysis, Liapunov functions, catastrophe theory. Examples: grabber-holder dynamics, technology innovation dynamics, creation of new game dynamics in business competition, ecosystem dynamics, social dynamics, and stochastic exchange dynamics. Prerequisite: MATH 51 or equivalent.

MS&E 206. Art of Mathematical Modeling. 3 Units.

Practicum. Students build mathematical models of real-life, ill-framed problems. Emphasis is on framing the issues, articulating modeling components logically (drawing from student's mathematical background), and analyzing the resulting model. Hands-on modeling. Project work in small groups. Prerequisites: basic analysis, calculus and algebra, and probability theory. Recommended: decision analysis, optimization and dynamic systems.

MS&E 207. Interactive Management Science. 3 Units.

Analytical techniques such as linear and integer programming, Monte Carlo simulation, forecasting, decision analysis, and Markov chains in the environment of the spreadsheet. Probability management. Materials include spreadsheet add-ins for implementing these and other techniques. Emphasis is on building intuition through interactive modeling, and extending the applicability of this type of analysis through integration with existing business data structures.

Same as: MS&E 107.

MS&E 208A. Practical Training. 1 Unit.

MS&E students obtain employment in a relevant industrial or research activity to enhance professional experience, consistent with the degree program they are pursuing. Students submit a one-page statement showing relevance to degree program along with offer letter before the start of the quarter, and a 2-3 page final report documenting the work done and relevance to degree program at the conclusion of the quarter. Students may take each of A, B, and C once.

MS&E 208B. Practical Training. 1 Unit.

MS&E students obtain employment in a relevant industrial or research activity to enhance professional experience, consistent with the degree program they are pursuing. Students submit a one-page statement showing relevance to degree program along with offer letter before the start of the quarter, and a 2-3 page final report documenting the work done and relevance to degree program at the conclusion of the quarter. Students may take each of A, B, and C once.

MS&E 208C. Practical Training. 1 Unit.

MS&E students obtain employment in a relevant industrial or research activity to enhance professional experience, consistent with the degree program they are pursuing. Students submit a one-page statement showing relevance to degree program along with offer letter before the start of the quarter, and a 2-3 page final report documenting the work done and relevance to degree program at the conclusion of the quarter. Students may take each of A, B, and C once.

MS&E 211. Linear and Nonlinear Optimization. 3-4 Units.

Optimization theory and modeling. The role of prices, duality, optimality conditions, and algorithms in finding and recognizing solutions.

Perspectives: problem formulation, analytical theory, computational methods, and recent applications in engineering, finance, and economics. Theories: finite dimensional derivatives, convexity, optimality, duality, and sensitivity. Methods: simplex and interior-point, gradient, Newton, and barrier. Prerequisite: MATH 51.

MS&E 220. Probabilistic Analysis. 3-4 Units.

Concepts and tools for the analysis of problems under uncertainty, focusing on model building and communication: the structuring, processing, and presentation of probabilistic information. Examples from legal, social, medical, and physical problems. Spreadsheets illustrate and solve problems as a complement to analytical closed-form solutions. Topics: axioms of probability, probability trees, random variables, distributions, conditioning, expectation, change of variables, and limit theorems. Prerequisite: MATH 51. Recommended: knowledge of spreadsheets.

MS&E 221. Stochastic Modeling. 3 Units.

Focus is on time-dependent random phenomena. Topics: discrete and continuous time Markov chains, renewal processes, queueing theory, and applications. Emphasis is on building a framework to formulate and analyze probabilistic systems. Prerequisite: 220 or consent of instructor.

MS&E 223. Simulation. 3 Units.

Discrete-event systems, generation of uniform and non-uniform random numbers, Monte Carlo methods, programming techniques for simulation, statistical analysis of simulation output, efficiency-improvement techniques, decision making using simulation, applications to systems in computer science, engineering, finance, and operations research. Prerequisites: working knowledge of a programming language such as C, C++, Java, Python, or FORTRAN; calculus-based probability; and basic statistical methods.

MS&E 233. Networked Markets. 3 Units.

An introduction to economic analysis for modern online services and systems. Topics include: Examples of networked markets. Online advertising. Recommendation and reputation systems. Pricing digital media. Network effects and network externalities. Social learning and herd behavior. Markets and information. Prerequisites: Math 51 and probability at the level of MS&E 220 or equivalent. No prior economics background will be assumed; requisite concepts will be introduced as needed.

MS&E 237. The Social Data Revolution: Data Mining and Electronic Business. 3 Units.

Hands-on exploration of current and emergent data sources and their impact on individuals, business and society: recommendation engines, reputation systems, social network analysis, and engagement metrics. Guest speakers, homework assignments and group projects (e.g., Twitter and Facebook apps) combine data strategy, machine learning, modern and traditional marketing, behavioral economics, and incentive design. Cases include Amazon.com, BestBuy, MySpace, Lufthansa, and startups. Prerequisites: intellectual curiosity, entrepreneurial spirit, some programming experience (details attn.wiwend.com/teaching), and willingness to implement in the real world.

MS&E 238. Leading Trends in Information Technology. 3 Units.

Focuses on new trends and disruptive technologies in IT. Emphasis on the way technologies create a competitive edge and generate business value. Broad range of views presented by guest speakers, including top level executives of technology companies, and IT executives (e.g. CIOs) of Fortune 1000 companies. Special emphasis in technologies such as Virtualization, Cloud Computing, Security, Mobility and Unified Communications.

MS&E 238A. Leading Trends in Information Technology. 1 Unit.

Focuses on new trends and disruptive technologies in IT. Emphasis on the way technologies create a competitive edge and generate business value. Broad range of views presented by guest speakers, including top level executives of technology companies, and IT executives (e.g. CIOs) of Fortune 1000 companies. Special emphasis in technologies such as Virtualization, Cloud Computing, Security, Mobility and Unified Communications.

MS&E 239. Computational Advertising. 3 Units.

Computational, economic, and optimization issues in online advertising, in contexts including web search, social networks, web surfing, and online multimedia. Overview of scientific and engineering issues arising in building online advertising platforms for Internet advertising formats, as well as ad pricing, ad auctions, and ad optimization. Research frontiers of this young discipline. Limited enrollment. Prerequisites: elementary probability and linear algebra.

MS&E 240. Accounting for Managers and Entrepreneurs. 3-4 Units.

Non-majors and minors who have taken or are taking elementary accounting should not enroll. Introduction to accounting concepts and the operating characteristics of accounting systems. The principles of financial and cost accounting, design of accounting systems, techniques of analysis, and cost control. Interpretation and use of accounting information for decision making. Designed for the user of accounting information and not as an introduction to a professional accounting career. Enrollment limited. Admission by order of enrollment. Same as: MS&E 140.

MS&E 241. Economic Analysis. 3-4 Units.

Principal methods of economic analysis of the production activities of firms, including production technologies, cost and profit, and perfect and imperfect competition; individual choice, including preferences and demand; and the market-based system, including price formation, efficiency, and welfare. Practical applications of the methods presented. See 341 for continuation of 241. Recommended: 211, ECON 50.

MS&E 242. Investment Science. 3 Units.

Theory and application of modern quantitative investment analysis from an engineering perspective. How investment concepts are used to evaluate and manage opportunities, portfolios, and investment products including stocks, bonds, mortgages, and annuities. Topics: deterministic cash flows (term structure of interest rates, bond portfolio immunization, project optimization); mean-variance theory (Markowitz model, capital asset pricing); and arbitrage pricing theory. Group project. Prerequisites: 120, MATH 51, or equivalents. Recommended: 111, 140, knowledge of spreadsheets. Limited enrollment.

MS&E 242H. Investment Science Honors. 3 Units.

Concepts of modern quantitative finance and investments. Basic concepts under certainty including arbitrage, term structure of interest rates, and bond portfolio immunization. A situation of uncertainty in one period. Topics: arbitrage; theorems of asset pricing; pricing measures; derivative securities; applications and estimating of financial risk measures; mean-variance portfolio analysis; and equilibrium and the capital asset pricing model. Group projects involving financial market data. Enrollment limited. Prerequisites: basic probability, statistics, and economics such as MS&E 120, 121, MATH 51, or equivalents. No prior knowledge of finance required.

MS&E 242S. Investment Science. 3 Units.

Emphasis is on a cash flow approach. Topics include deterministic cash flow analysis (time value of money, present value, internal rate of return, taxes, inflation), fixed income securities, duration and bond portfolio immunization, term structure of interest rates (spot rates, discount factors, forward rates), Fisher-Weill duration and immunization, capital budgeting, dynamic optimization problems, investments under uncertainty, mean-variance portfolio theory, capital asset pricing, and basic options theory. Goal is to create a link between engineering analysis and business decision making.

MS&E 243. Energy and Environmental Policy Analysis. 3 Units.

Concepts, methods, and applications. Energy/environmental policy issues such as automobile fuel economy regulation, global climate change, research and development policy, and environmental benefit assessment. Group project. Prerequisite: MS&E 241 or ECON 50, 51.

MS&E 245G. Finance for Non-MBAs. 3 Units.

For graduate students and advanced undergraduates. The foundations of finance; applications in corporate finance and investment management. Financial decisions made by corporate managers and investors with focus on process valuation. Topics include criteria for investment decisions, valuation of financial assets and liabilities, relationships between risk and return, market efficiency, and the valuation of derivative securities. Corporate financial instruments including debt, equity, and convertible securities. Equivalent to core MBA finance course, FINANCE 220. Prerequisites: ECON 51, or ENGR 60, or equivalent; ability to use spreadsheets, and basic probability and statistics concepts including random variables, expected value, variance, covariance, and simple estimation and regression. Same as: ECON 135.

MS&E 247S. International Investments. 3 Units.

International financial markets, their comparative behavior and interrelations. Focus is on assets traded in liquid markets: currencies, equities, bonds, swaps, and derivatives. Topics: institutional arrangements, taxation and regulation, international arbitrage and parity conditions, valuation of target firms for cross-border acquisitions, direct foreign investment, international diversification and portfolio management, derivative instruments and dynamic investment strategies, international performance analysis, international capital flows and financial crises, and topics of current relevance and importance.

MS&E 248. Economics of Natural Resources. 3 Units.

Intertemporal economic analysis of natural resource use, particularly energy, and including air, water, and other depletable mineral and biological resources. Emphasis is on an integrating theory for depletable and renewable resources. Stock-flow relationships; optimal choices over time; short- and long-run equilibrium conditions; depletion/extinction conditions; market failure mechanisms (common-property, public goods, discount rate distortions, rule-of-capture); policy options. Prerequisite: 241 or ECON 51.

MS&E 249. Economic Growth and Development. 3 Units.

What generates economic growth. Emphasis is on theory accompanied by intuition, illustrated with country cases. Topics: the equation of motion of an economy; optimal growth theory; calculus of variations and optimal control approaches; deriving the Euler and Pontryaguine equations from economic reasoning. Applications: former planned economies in Russia and E. Europe; the present global crisis: causes and consequences; a comparative study of India and China. The links between economic growth and civilization; the causes of the rise and decline of civilizations; lessons for the future. Intended for graduate students. Prerequisite: multivariate calculus and permission of instructor.

MS&E 250A. Engineering Risk Analysis. 3 Units.

The techniques of analysis of engineering systems for risk management decisions involving trade-offs (technical, human, environmental aspects). Elements of decision analysis; probabilistic risk analysis (fault trees, event trees, systems dynamics); economic analysis of failure consequences (human safety and long-term economic discounting); and case studies such as space systems, nuclear power plants, and medical systems. Public and private sectors. Prerequisites: probability, decision analysis, stochastic processes, and convex optimization.

MS&E 250B. Project Course in Engineering Risk Analysis. 3 Units.

Students, individually or in groups, choose, define, formulate, and resolve a real risk management problem, preferably from a local firm or institution. Oral presentation and report required. Scope of the project is adapted to the number of students involved. Three phases: risk assessment, communication, and management. Emphasis is on the use of probability for the treatment of uncertainties and sensitivity to problem boundaries. Limited enrollment. Prerequisites: MS&E 250A and consent of instructor.

MS&E 251. Stochastic Control. 3 Units.

Efficient formulation and computational solution of sequential decision problems under uncertainty. Markov decision chains and stochastic programming. Maximum expected present value and rate of return. Optimality of simple policies: myopic, linear, index, acceptance limit, and (s,S). Optimal stationary and periodic infinite-horizon policies. Applications to investment, options, overbooking, inventory, production, purchasing, selling, quality, repair, sequencing, queues, capacity, transportation. MATLAB is used. Prerequisites: probability, linear programming.

MS&E 252. Decision Analysis I: Foundations of Decision Analysis. 3-4 Units.

Coherent approach to decision making, using the metaphor of developing a structured conversation having desirable properties, and producing actional thought that leads to clarity of action. Socratic instruction; computational problem sessions. Emphasis is on creation of distinctions, representation of uncertainty by probability, development of alternatives, specification of preference, and the role of these elements in creating a normative approach to decisions. Information gathering opportunities in terms of a value measure. Relevance and decision diagrams to represent inference and decision. Principles are applied to decisions in business, technology, law, and medicine. See 352 for continuation.

MS&E 254. The Ethical Analyst. 1-3 Unit.

The ethical responsibility for consequences of professional analysts who use technical knowledge in support of any individual, organization, or government. The means to form ethical judgments; questioning the desirability of physical coercion and deception as a means to reach any end. Human action and relations in society in the light of previous thought, and research on the desired form of social interactions. Attitudes toward ethical dilemmas through an explicit personal code.

MS&E 256. Technology Assessment and Regulation of Medical Devices. 3 Units.

(Formerly 475.) Regulatory approval and reimbursement for new medical technologies as a key component of product commercialization. The regulatory and payer environment in the U.S. and abroad, and common methods of health technology assessment. Framework to identify factors relevant to adoption of new medical devices, and the management of those factors in the design and development phases. Case studies; guest speakers from government (FDA) and industry.

MS&E 256A. Technology Assessment and Regulation of Medical Devices. 1 Unit.

Regulatory approval and reimbursement for new medical technologies as a key component of product commercialization. The regulatory and payer environment in the U.S. and abroad, and common methods of health technology assessment. Framework to identify factors relevant to adoption of new medical devices, and the management of those factors in the design and development phases. Case studies; guest speakers from government (FDA) and industry.

MS&E 260. Introduction to Operations Management. 3-4 Units.

Operations management focuses on the effective planning, scheduling, and control of manufacturing and service entities. This course introduces students to a broad range of key issues in operations management. Topics include determination of optimal facility location, production planning, optimal timing and sizing of capacity expansion, and inventory control. Prerequisites: basic knowledge of Excel spreadsheets, probability, and optimization.

MS&E 261. Inventory Control and Production Systems. 3 Units.

Topics in the planning and control of manufacturing systems. The functions of inventory, determination of order quantities and safety stocks, alternative inventory replenishment systems, item forecasting, production-inventory systems, materials requirements planning (MRP), just-in-time systems, master and operations scheduling, supply chain management, and service operations. Limited enrollment. Prerequisite: 120, or STATS 116, or equivalent.

MS&E 262. Supply Chain Management. 3 Units.

Definition of a supply chain; coordination difficulties; pitfalls and opportunities in supply chain management; inventory/service tradeoffs; performance measurement and incentives. Global supply chain management; mass customization; supplier management. Design and redesign of products and processes for supply chain management; tools for analysis; industrial applications; current industry initiatives. Enrollment limited to 50. Admission determined in the first class meeting. Prerequisite: 260 or 261.

MS&E 263. Healthcare Operations Management. 3 Units.

With healthcare spending in the US exceeding 17% of GDP and growing, improvements in the quality and efficiency of healthcare services are urgently needed. This class focuses on the use of analytical tools to support efficient and effective delivery of health care. Topics include quality control and management, capacity planning, resource allocation, management of patient flows, and scheduling. Prerequisites: basic knowledge of Excel spreadsheets, probability, and optimization.

MS&E 264. Sustainable Product Development and Manufacturing. 3-4 Units.

Strategies and techniques for development of sustainable products and manufacturing processes. Topics: strategic decisions in new product development when environmental and resource externalities are accounted for; effect of regulatory requirements on ability of a firm to achieve its business objectives; contributions of sustainable products/processes to the firm's competitive advantage and operational efficiency and to enabling entrepreneurial opportunities; industrial ecology and life cycle analysis techniques in integrating traditional product development requirements with those of the environment and society. Maybe repeatable for credit once.

MS&E 266. Management of New Product Development. 3 Units.

Techniques of managing or leading the process of new product development that have been found effective. Emphasis is placed on how much control is desirable and how that control can be exercised in a setting where creativity has traditionally played a larger role than discipline. Topics: design for manufacturability, assessing the market, imposing discipline on the new product development process, selecting the appropriate portfolio of new product development projects, disruptive technology, product development at internet speed, uncertainty in product development, role of experimentation in new product development, creating an effective development organization, and developing products to hit cost targets.

MS&E 268. Operations Strategy. 3 Units.

The development and implementation of the operations functional strategy. The integration of operations strategy with business and corporate strategies of a manufacturing-based firm. Topics: types and characteristics of manufacturing technologies, quality management, capacity planning and facilities choice, organization and control of operations, and operations' role in corporate strategy. Prerequisites: 260 or 261, or equivalent experience.

MS&E 270. Strategy in Technology-Based Companies. 3-4 Units.

For graduate students only. Introduction to the basic concepts of strategy, with emphasis on high technology firms. Topics: competitive positioning, resource-based perspectives, co-opetition and standards setting, and complexity/evolutionary perspectives. Limited enrollment.

MS&E 271. Global Entrepreneurial Marketing. 3-4 Units.

Skills needed to market new technology-based products to customers around the world. Case method discussions. Cases include startups and global high tech firms. Course themes: marketing toolkit, targeting markets and customers, product marketing and management, partners and distribution, sales and negotiation, and outbound marketing. Team-based take-home final exam. Limited enrollment. Admission by application.

MS&E 272. Startup Boards. 3 Units.

Accelerate your startup through hands-on guidance from your own "board of directors" comprised of venture capitalists and experienced entrepreneurs. Like real startup boards, your board will help your team identify critical milestones, assist in achieving them, and hold your team accountable through regular board meetings. Learn how to avoid common mistakes that lead to ineffective board meetings, fired CEOs, and startup failures. Experience the other side of the table as a board member for another startup and learn the principles of effective board services. Topics include building boards, managing board meetings, making strategic decisions, executing board responsibilities, and replacing CEOs. Limited enrollment. Admission by application. Preference given to teams with demonstrated commitment to a viable startup business.

MS&E 273. Technology Venture Formation. 3-4 Units.

Open to graduate students interested in technology driven start-ups. Provides the experience of an early-stage entrepreneur seeking initial investment, including: team building, opportunity assessment, customer development, go-to-market strategy, and IP. Teaching team includes serial entrepreneurs and venture capitalists. Student teams validate the business model using R&D plans and financial projections, and define milestones for raising and using venture capital. Final exam is an investment pitch delivered to a panel of top tier VC partners. In addition to lectures, teams interact with mentors and teaching team weekly. Enrollment by application: <http://www.stanford.edu/class/msande273>. Recommended: 270, 271, or equivalent.

MS&E 274. Dynamic Entrepreneurial Strategy. 3 Units.

Primarily for graduate students. How entrepreneurial strategy focuses on creating structural change or responding to change induced externally. Grabber-holder dynamics as an analytical framework for developing entrepreneurial strategy to increase success in creating and shaping the diffusion of new technology or product innovation dynamics. Topics: First mover versus follower advantage in an emerging market; latecomer advantage and strategy in a mature market; strategy to break through stagnation; and strategy to turn danger into opportunity. Modeling, case studies, and term project.

MS&E 276. Entrepreneurial Management and Finance. 3 Units.

For graduate students only with a preference for engineering and science majors. Emphasis on managing the challenges high-growth ventures experience, especially those based on technology products and services. Students develop a set of skills and approaches to becoming effective entrepreneurial managers. Topics include business model management, deal structure and negotiation, raising capital and financial management, venture operations and organizational administration, managing the interplay between ownership and growth, and handling adversity as well as failure. Limited enrollment. Admission by application. Prerequisite: 140/240, or equivalent.

MS&E 277. Creativity and Innovation. 3-4 Units.

Experiential course explores factors that promote and inhibit creativity and innovation in individuals, teams, and organizations. Teaches creativity tools using workshops, case studies, field trips, expert guests, and team design challenges. Enrollment limited to 40. Admission by application. See <http://dschool.stanford.edu/classes>.

MS&E 278. Patent Law and Strategy for Innovators and Entrepreneurs. 2-3 Units.

Inventors and entrepreneurs have four concerns related to patent law: protecting their inventions in the very early stages of product development, determining the patentability of their invention, avoiding infringement of a competitor's patent, and leveraging their patent as a business asset. This course will address each of these concerns through the application of law cases and business cases to an invention of the Student's choice. Although listed as a ME/MSE course, the course is not specific to any discipline or technology. Same as: ME 208.

MS&E 279. The Founder's Dilemmas. 3 Units.

Within high-potential ventures, the biggest source of failure is 'people problems': The tensions among the founders, or between the founders and the non-founders (e.g., hires and investors) who join them. Topics include choice of cofounders, splitting the roles and equity within the team, whether and how to involve investors, why and how founders are replaced, and exit dilemmas. We will examine the potential pitfalls introduced by the decisions to involve cofounders, hires, and investors. We will delve into the ways to anticipate and avoid those pitfalls, and use experiential exercises and role plays to develop your skills at dealing with those challenges. To understand the common founding decisions that heighten the chances of failure, we will also tap a large-scale dataset collected on 15,000 founders over the last 14 years. Participation in case discussions required. Limited enrollment. Admission by application.

MS&E 280. Organizational Behavior: Evidence in Action. 3-4 Units.

Organization theory; concepts and functions of management; behavior of the individual, work group, and organization. Emphasis is on cases and related discussion. Enrollment limited; priority to MS&E students.

MS&E 282. Transformational Leadership. 3 Units.

The personal, team-based and organizational skills needed to become a transformative leader. Case method discussions and lectures. Themes include: personal transformation; the inside-out effect, group transformation; cross-functional teams; re-engineering; rapid - non-profit and for profit - organizational transformation; and social transformation. Course includes a group project that is defined and approved during the first two weeks of class. Limited enrollment. Graduate students only. Admission by application. Prerequisite: 180 or 280.

MS&E 283. Scaling up Excellence in Organizations. 4 Units.

A problem for every manager is to make 'good' behaviors spread quickly and to shrink 'undesirable' behaviors quickly. This course provides you practical frameworks to accomplish these managerial goals. We will examine issues such as scaling Idea generation, scaling knowledge sharing, scaling the adoption of ideas across firms, scaling change in global firms. We will be using a newly written series of cases for this course and also draw on guest speakers.

MS&E 284. Work Design in Modern Organizations. 3 Units.

Experiential lab course teaches concepts and tools for analyzing work activities and designing contemporary organizations. Topics include team vs. individual work; information flows; networks; knowledge workers in hi-tech, service, creative, or entrepreneurial fields; production systems; flex-time; millennials. Uses case studies, expert guests from industry, and a field-based final project to analyze and (re)design a real-world work system. Limited to 25. Admission by application.

MS&E 289. Designing for Sustainable Abundance. 3-4 Units.

Hands-on, team-based, multidisciplinary class, uses radically human-centered approach to tackle sustainability challenges in areas like food and transportation. Teams develop solutions that improve environmental and economic sustainability as well as physical and emotional well-being. Students benefit from close interaction with the teaching team, support from project sponsors, and the varied perspectives of numerous guest speakers. Application required. Limited enrollment. Design Institute class; see <http://dschool.stanford.edu>.

MS&E 292. Health Policy Modeling. 3 Units.

Primarily for master's students; also open to undergraduates and doctoral students. The application of mathematical, statistical, economic, and systems models to problems in health policy. Areas include: disease screening, prevention, and treatment; assessment of new technologies; bioterrorism response; and drug control policies.

MS&E 293. Technology and National Security. 3 Units.

The interaction of technology and national security policy from the perspective of history to implications for the new security imperative, homeland defense. Key technologies in nuclear and biological weapons, military platforms, and intelligence gathering. Policy issues from the point of view of U.S. and other nations. The impact of terrorist threat. Guest lecturers include key participants in the development of technology and/or policy. Students seeking to fulfill the WIM requirement should register for 193W.

Same as: MS&E 193, MS&E 193W.

MS&E 294. Climate Policy Analysis. 3 Units.

Design and application of formal analytical methods in climate policy development. Issues include instrument design, technology development, resource management, multiparty negotiation, and dealing with complexity and uncertainty. Links among art, theory, and practice. Emphasis is on integrated use of modeling tools from diverse methodologies and requirements for policy making application. Prerequisites: ECON 50, MS&E 211, MS&E 252, or equivalents, or permission of instructor.

MS&E 295. Energy Policy Analysis. 3 Units.

Design and application of formal analytical methods for policy and technology assessments of energy efficiency and renewable energy options. Emphasis is on integrated use of modeling tools from diverse methodologies and requirements for policy and corporate strategy development. Prerequisites: ECON 50, MS&E 211, MS&E 252, or equivalents, or permission of instructor.

MS&E 299. Voluntary Social Systems. 1-3 Unit.

Ethical theory, feasibility, and desirability of a social order in which coercion by individuals and government is minimized and people pursue ends on a voluntary basis. Topics: efficacy and ethics; use rights for property; contracts and torts; spontaneous order and free markets; crime and punishment based on restitution; guardian-ward theory for dealing with incompetents; the effects of state action-hypothesis of reverse results; applications to help the needy, armed intervention, victimless crimes, and environmental protection; transition strategies to a voluntary society.

MS&E 300. Ph.D. Qualifying Tutorial or Paper. 1-3 Unit.

Restricted to Ph.D. students assigned tutorials as part of the MS&E Ph.D. qualifying process. Enrollment optional.

MS&E 301. Dissertation Research. 1-15 Unit.

Prerequisite: doctoral candidacy.

MS&E 310. Linear Programming. 3 Units.

Formulation of standard linear programming models. Theory of polyhedral convex sets, linear inequalities, alternative theorems, and duality. Variants of the simplex method and the state of art interior-point algorithms. Sensitivity analyses, economic interpretations, and primal-dual methods. Relaxations of harder optimization problems and recent convex conic linear programs. Applications include game equilibrium facility location. Prerequisite: MATH 113 or consent of instructor.

MS&E 311. Optimization. 3 Units.

Applications, theories, and algorithms for finite-dimensional linear and nonlinear optimization problems with continuous variables. Elements of convex analysis, first- and second-order optimality conditions, sensitivity and duality. Algorithms for unconstrained optimization, and linearly and nonlinearly constrained problems. Modern applications in communication, game theory, auction, and economics. Prerequisites: MATH 113, 115, or equivalent.

MS&E 312. Advanced Methods in Numerical Optimization. 3 Units.

Topics include interior-point methods, relaxation methods for nonlinear discrete optimization, sequential quadratic programming methods, optimal control and decomposition methods. Topic chosen in first class; different topics for individuals or groups possible. Individual or team projects. May be repeated for credit. Same as: CME 334.

MS&E 313. Vector Space Optimization. 3 Units.

Optimization theory from the unified framework of vector space theory: treating together problems of mathematical programming, calculus of variations, optimal control, estimation, and other optimization problems. Emphasis is on geometric interpretation. Duality theory. Topics: vector spaces including function spaces; Hilbert space and the projection theorem; dual spaces and the separating hyperplane theorem; linear operators and adjoints; optimization of functionals, including theory of necessary conditions in general spaces, and convex optimization theory; constrained optimization including Fenchel duality theory. Prerequisite: MATH 115.

MS&E 314. Linear and Conic Optimization with Applications. 3 Units.

Linear, semidefinite, conic, and convex nonlinear optimization problems as generalizations of classical linear programming. Algorithms include the interior-point, barrier function, and cutting plane methods. Related convex analysis, including the separating hyperplane theorem, Farkas lemma, dual cones, optimality conditions, and conic inequalities. Complexity and/or computation efficiency analysis. Applications to combinatorial optimization, sensor network localization, support vector machine, and graph realization. Prerequisite: MS&E 211 or equivalent. Same as: CME 336.

MS&E 315. Numerical Optimization. 3 Units.

Solution of nonlinear equations; unconstrained optimization; linear programming; quadratic programming; global optimization; general linearly and nonlinearly constrained optimization. Theory and algorithms to solve these problems. Prerequisite: background in analysis and numerical linear algebra. Same as: CME 304.

MS&E 316. Discrete Mathematics and Algorithms. 3 Units.

Topics: enumeration such as Cayley's theorem and Prufer codes, SDR, flows and cuts (deterministic and randomized algorithms), probabilistic methods and random graphs, asymptotics (NP-hardness and approximation algorithms). Topics illustrated with EE, CS, and bioinformatics applications. Prerequisites: CME100 or MATH 51 or equivalents. Same as: CME 305.

MS&E 317. Algorithms for Modern Data Models. 3 Units.

We traditionally think of algorithms as running on data available in a single location, typically main memory. In many modern applications including web analytics, search and data mining, computational biology, finance, and scientific computing, the data is often too large to reside in a single location, is arriving incrementally over time, is noisy/uncertain, or all of the above. Paradigms such as map-reduce, streaming, sketching, Distributed Hash Tables, Bulk Synchronous Processing, and random walks have proved useful for these applications. This course will provide an introduction to the design and analysis of algorithms for these modern data models. Prerequisite: Algorithms at the level of CS 261. Same as: CS 263.

MS&E 318. Large-Scale Numerical Optimization. 3 Units.

The main algorithms and software for constrained optimization emphasizing the sparse-matrix methods needed for their implementation. Iterative methods for linear equations and least squares. The simplex method. Basic factorization and updates. Interior methods. The reduced-gradient method, augmented Lagrangian methods, and SQP methods. Prerequisites: Basic numerical linear algebra, including LU, QR, and SVD factorizations, and an interest in MATLAB, sparse-matrix methods, and gradient-based algorithms for constrained optimization. Recommended: MS&E 310, 311, 312, 314, or 315; CME 108, 200, 302, 304, 334, or 335. Same as: CME 338.

MS&E 319. Approximation Algorithms. 3 Units.

Combinatorial and mathematical programming techniques to derive approximation algorithms for NP-hard optimization problems. Possible topics include: greedy algorithms for vertex/set cover; rounding LP relaxations of integer programs; primal-dual algorithms; semidefinite relaxations. May be repeated for credit. Prerequisites: 112 or CS 161.

MS&E 321. Stochastic Systems. 3 Units.

Topics in stochastic processes, emphasizing applications. Markov chains in discrete and continuous time; Markov processes in general state space; Lyapunov functions; regenerative process theory; renewal theory; martingales, Brownian motion, and diffusion processes. Application to queueing theory, storage theory, reliability, and finance. Prerequisites: 221 or STATS 217; MATH 113, 115. (Glynn).

MS&E 322. Stochastic Calculus and Control. 3 Units.

Ito integral, existence and uniqueness of solutions of stochastic differential equations (SDEs), diffusion approximations, numerical solutions of SDEs, controlled diffusions and the Hamilton-Jacobi-Bellman equation, and statistical inference of SDEs. Applications to finance and queueing theory. Prerequisites: 221 or STATS 217; MATH 113, 115.

MS&E 335. Queueing and Scheduling in Processing Networks. 3 Units.

Advanced stochastic modeling and control of systems involving queueing and scheduling operations. Stability analysis of queueing systems. Key results on single queues and queueing networks. Controlled queueing systems. Dynamic routing and scheduling in processing networks. Applications to modeling, analysis and performance engineering of computing systems, communication networks, flexible manufacturing, and service systems. Prerequisite: 221 or equivalent.

MS&E 336. Topics in Game Theory with Engineering Applications. 3 Units.

Seminar. Recent research applying economic methods to engineering problems. Recent topics include: incentives in networked systems; mechanism design in engineered systems; and dynamics and learning in games. Prerequisites: mathematics at the level of MATH 115; game theory at the level of 246 or ECON 203; probability at the level of 220; optimization at the level of 211. May be repeated for credit.

MS&E 337. Information Networks. 3 Units.

Network structure of the Internet and the web. Modeling, scale-free graphs, small-world phenomenon. Algorithmic implications in searching and inter-domain routing; the effect of structure on performance. Game theoretic issues, routing games, and network creation games. Security issues, vulnerability, and robustness. Prerequisite: basic probability and graph theory.

MS&E 338. Advanced Topics in Information Science and Technology. 3 Units.

Advanced material in this area is sometimes taught for the first time as a topics course. Prerequisite: consent of instructor.

MS&E 342. Advanced Investment Science. 3 Units.

Topics: forwards and futures contracts, continuous and discrete time models of stock price behavior, geometric Brownian motion, Ito's lemma, basic options theory, Black-Scholes equation, advanced options techniques, models and applications of stochastic interest rate processes, and optimal portfolio growth. Computational issues and general theory. Teams work on independent projects. Prerequisite: 242.

MS&E 347. Credit Risk: Modeling and Management. 3 Units.

Credit risk modeling, valuation, and hedging emphasizing underlying economic, probabilistic, and statistical concepts. Point processes and their compensators. Structural, incomplete information and reduced form approaches. Single name products: corporate bonds, equity, equity options, credit and equity default swaps, forwards and swaptions. Multiname modeling: index and tranche swaps and options, collateralized debt obligations. Implementation, calibration and testing of models. Industry and market practice. Data and implementation driven group projects that focus on problems in the financial industry.

MS&E 348. Optimization of Uncertainty and Applications in Finance. 3 Units.

How to make optimal decisions in the presence of uncertainty, solution techniques for large-scale systems resulting from decision problems under uncertainty, and applications in finance. Decision trees, utility, two-stage and multi-stage decision problems, approaches to stochastic programming, model formulation; large-scale systems, Benders and Dantzig-Wolfe decomposition, Monte Carlo sampling and variance reduction techniques, risk management, portfolio optimization, asset-liability management, mortgage finance. Projects involving the practical application of optimization under uncertainty to financial planning.

MS&E 349. Capital Deployment. 3 Units.

Methods for efficiently allocating capital among alternatives, constructing business plans, determining the value of risky projects, and creating alternatives that enhance value. Prerequisites: 242, 342.

MS&E 351. Dynamic Programming and Stochastic Control. 3 Units.

Markov population decision chains in discrete and continuous time. Risk posture. Present value and Cesaro overtaking optimality. Optimal stopping. Successive approximation, policy improvement, and linear programming methods. Team decisions and stochastic programs; quadratic costs and certainty equivalents. Maximum principle. Controlled diffusions. Examples from inventory, overbooking, options, investment, queues, reliability, quality, capacity, transportation. MATLAB. Prerequisites: MATH 113, 115; Markov chains; linear programming.

MS&E 352. Decision Analysis II: Professional Decision Analysis. 3-4 Units.

How to organize the decision conversation, the role of the decision analysis cycle and the model sequence, assessing the quality of decisions, framing decisions, the decision hierarchy, strategy tables for alternative development, creating spare and effective decision diagrams, biases in assessment, knowledge maps, uncertainty about probability. Sensitivity analysis, approximations, value of revelation, joint information, options, flexibility, bidding, assessing and using corporate risk attitude, risk sharing and scaling, and decisions involving health and safety. See 353 for continuation. Prerequisite: 252.

MS&E 353. Decision Analysis III: Frontiers of Decision Analysis. 3 Units.

The concept of decision composite; probabilistic insurance and other challenges to the normative approach; the relationship of decision analysis to classical inference and data analysis procedures; the likelihood and exchangeability principles; inference, decision, and experimentation using conjugate distributions; developing a risk attitude based on general properties; alternative decision aiding practices such as analytic hierarchy and fuzzy approaches. Student presentations on current research. Goal is to prepare doctoral students for research. Prerequisite: 352.

MS&E 355. Influence Diagrams and Probabilistic Networks. 3 Units.

Network representations for reasoning under uncertainty: influence diagrams, belief networks, and Markov networks. Structuring and assessment of decision problems under uncertainty. Learning from evidence. Conditional independence and requisite information. Node reductions. Belief propagation and revision. Simulation. Linear-quadratic-Gaussian decision models and Kalman filters. Dynamic processes. Bayesian meta-analysis. Prerequisites: 220, 252, or equivalents, or consent of instructor.

MS&E 364. Multi-echelon Inventory Models. 3 Units.

Theoretical treatment of control problems arising in inventory management, production, and distribution systems. Inventory control for single and multi-location systems. Emphasis is on operating characteristics, performance measures, and optimal operating and control policies. Dynamic programming and applications in inventory control. Prerequisite: STATS 217 or equivalent, linear programming.

MS&E 365. Advanced Models in Operations Management. 3 Units.

Primarily for doctoral students. Focus on quantitative models dealing with sustainability and related to operations management. Prerequisite: consent of instructor. May be repeated for credit.

MS&E 371. Innovation and Strategic Change. 2-3 Units.

Doctoral research seminar, limited to Ph.D. students. Current research on innovation strategy. Topics: scientific discovery, innovation search, organizational learning, evolutionary approaches, and incremental and radical change. Topics change yearly. Recommended: course in statistics or research methods.

MS&E 372. Entrepreneurship Doctoral Research Seminar. 1-3 Unit.

Classic and current research on entrepreneurship. Limited enrollment, restricted to PhD students. Prerequisites: SOC 363 or equivalent, and permission of instructor.

MS&E 374. Dynamic Corporate Strategy. 3 Units.

Restricted to Ph.D. students. Research on the creation and shaping of disruptive industry dynamics and how companies can formulate and implement strategies to excel in such changing environments. Dynamic system model approach; case studies. Prerequisites: 201 or equivalent, 274.

MS&E 375. Research on Entrepreneurship. 3 Units.

Restricted to Ph.D. students. Organization theory, economics, and strategy perspectives. Limited enrollment. Prerequisites: SOC 360 or equivalent, and consent of instructor.

MS&E 376. Strategy Doctoral Research Seminar. 3 Units.

Classic and current research on business and corporate strategy. Limited enrollment, restricted to PhD students. Prerequisites: SOC 363 or equivalent, and permission of instructor. Course may be repeated for credit.

MS&E 380. Doctoral Research Seminar in Organizations. 3 Units.

Limited to Ph.D. students. Topics from current published literature and working papers. Content varies. Prerequisite: consent of instructor.

MS&E 381. Doctoral Research Seminar in Work, Technology, and Organization. 2-3 Units.

Enrollment limited to Ph.D. students. Topics from current published literature and working papers. Content varies. Prerequisite: consent of instructor.

MS&E 383. Doctoral Seminar on Ethnographic Research. 3 Units.

For graduate students; upper-level undergraduates with consent of instructor. Ethnosemantic interviewing and participant observation. Techniques for taking, managing, and analyzing field notes and other qualitative data. 15 hours per week outside class collecting and analyzing own data. Methods texts and ethnographies offer examples of how to analyze and communicate ethnographic data. Prerequisite: consent of instructor. (Barley).

MS&E 384. Groups and Teams. 3 Units.

Research on groups and teams in organizations from the perspective of organizational behavior and social psychology. Topics include group effectiveness, norms, group composition, diversity, conflict, group dynamics, temporal issues in groups, geographically distributed teams, and intergroup relations.

MS&E 389. Seminar on Organizational Theory. 5 Units.

The social science literature on organizations assessed through consideration of the major theoretical traditions and lines of research predominant in the field.
Same as: EDUC 375A, SOC 363A.

MS&E 390. Doctoral Research Seminar in Health Systems Modeling. 1-3 Unit.

Restricted to PhD students, or by consent of instructor. Doctoral research seminar covering current topics in health policy, health systems modeling, and health innovation. May be repeated for credit.

MS&E 391. Doctoral Research Seminar in Energy-Environmental Systems Modeling and Analysis. 1-3 Unit.

Restricted to PhD students, or by consent of instructor. Doctoral research seminar covering current topics in energy and environmental modeling and analysis. Current emphasis on approaches to incorporation of uncertainty and technology dynamics into complex systems models. May be repeated for credit.

MS&E 408. Directed Reading and Research. 1-15 Unit.

Directed study and research on a subject of mutual interest to student and faculty member. Prerequisite: faculty sponsor.nn (Staff).

MS&E 444. Investment Practice. 3-4 Units.

Theory of real options, soft derivatives, and related ideas. Problems from financial engineering and risk management. Examples from industry. Small group projects formulate and design solutions to actual industry problems. Enrollment limited to 30. Admission by application.

MS&E 445. Projects in Wealth Management. 3-4 Units.

Recent theory and standard practice in portfolio design for institutions, individuals, and funds. Student projects and case studies derived from the financial industry.

MS&E 446. Policy and Economics Research Roundtable. 1 Unit.

Research in progress or contemplated in policy and economics areas. Emphasis depends on research interests of participants, but is likely to include energy, environment, transportation, or technology policy and analysis. May be repeated for credit.
Same as: PERR.

MS&E 448. Big Financial Data and Algorithmic Trading. 3 Units.

Project course emphasizing the connection between data, models, and reality. Vast amounts of high volume, high frequency observations of financial quotes, orders and transactions are now available, and poses a unique set of challenges. This type of data will be used as the empirical basis for modeling and testing various ideas within the umbrella of algorithmic trading and quantitative modeling related to the dynamics and micro-structure of financial markets. Due to the fact that it is near impossible to perform experiments in finance, there is a need for empirical inference and intuition, any model should also be justified in terms of plausibility that goes beyond pure econometric and data mining approaches. Introductory lectures, followed by real-world type projects to get a hands-on experience with realistic challenges and hone skills needed in the work place. Work in groups on selected projects that will entail obtaining and cleaning the raw data and becoming familiar with techniques and challenges in handling big data sets. Develop a framework for modeling and testing (in computer languages such as Python, C++ , Matlab and R) and prepare presentations to present to the class. Example projects include optimal order execution, developing a market making algorithm, design of an intra-day trading strategy, and modeling the dynamics of the bid and ask. Prerequisites: MS&E 211, 242, 342, or equivalents, some exposure to statistics and programming.

MS&E 450. Lessons in Decision Making. 1 Unit.

Entrepreneurs, senior management consultants, and executives from Fortune 500 companies share real-world stories and insights from their experience in decision making.

MS&E 452. Decision Analysis Projects: Helping Real Leaders Make Real Decisions. 3 Units.

A virtual consulting firm directed by professional decision analysts who offer advice and guidance as student teams help local organizations make a current business strategy or public policy decision. Projects for businesses, governments, or other institutions typically include start-up venture funding, R&D portfolio planning, new product or market entry, acquisition or partnering, cost reduction, program design, or regulatory policy decisions. Emphasis is on developing clarity of action and delivering insights to clients. Satisfies MS&E project course requirement. Prerequisite: 252. Recommended: 352.

MS&E 453. Decision Analysis Applications: Business Strategy and Public Policy. 2-3 Units.

What are the most essential, efficient, and effective ways that important decisions are being made in the real world? Experienced practitioners provide insights from technically challenging and organizationally complex decisions that they helped analyze for decision makers in businesses, nonprofits, and governments. Both the process and content of such decisions are discussed. Process includes disciplined qualitative and quantitative approaches for framing, structuring, modeling, assessing, evaluating, appraising, and communicating decisions. Content broadly covers business and corporate strategy, venture capital investing, financial derivatives and hedging, R&D portfolio management, new product design, technology manufacturing alternatives, business renewal, real estate investment and development, intellectual property litigation risk, interplanetary contamination risk, energy economics and policies, electric power production, nuclear waste disposal, environmental cleanup of mines, marine fisheries and resource protection, medical diagnosis and treatment options, health insurance plans, hospital risk management, pharmaceutical drug trials and backups, behavioral economics lessons, effective interaction techniques, and implications of social psychology for improved organizational decision making. Prerequisite: 252.

MS&E 454. Decision Analysis Seminar. 1 Unit.

Current research and related topics presented by doctoral students and invited speakers. May be repeated for credit. Prerequisite: 252.

MS&E 464. Global Project Coordination. 3-4 Units.

Students engage in projects that are global in nature and related to the planning, design, and operations of supply chains, marketing, manufacturing, and product development processes. Stanford students work with students from an overseas university in teams of 6-8, using email, teleconferencing, and videoconferencing to meet on a regular basis. As part of the course, students travel to Hong Kong during Stanford's spring break. Applications due by November 15. Information session on October 29. Please see https://stanford.qualtrics.com/SE/?SID=SV_3a8ZBx2NWB8p73T for more information.

MS&E 472. Entrepreneurial Thought Leaders' Seminar. 1 Unit.

Entrepreneurial leaders share lessons from real-world experiences across entrepreneurial settings. ETL speakers include entrepreneurs, leaders from global technology companies, venture capitalists, and best-selling authors. Half-hour talks followed by half hour of class interaction. Required web discussion. May be repeated for credit.

MS&E 474. Innovation Scholars Seminar. 1-2 Unit.

For Ph.D. students selected to the Accel Innovation Scholars (AIS) at Stanford. Content is focused on technology commercialization, opportunity evaluation, and entrepreneurial leadership. The Accel Innovation Scholars meet for a three hour session each week, from July through June. AIS features a rich collection of educational experiences, including case studies, guest speakers, projects, field trips, and workshops. Participating students will have industry mentors related to their field of study.

MS&E 488. Prototyping and Rapid Experiment Lab. 4 Units.

Gain a deeper understanding of the prototyping and user feedback parts of the design thinking process with a focus on rapid experimentation. Explore prototyping and user feedback that happens in later stages of iteration when design ideas are somewhat gelled, but designers are still uncertain about whether the design will meet the need and evoke the response intended. Introduce and generate creative ways to discover what users will do in the real world with the designs we envision. For seasoned students who thoroughly understand the design thinking process or, more broadly, human-centered design and now want to focus on one later stage aspect of it in more depth. An application process will happen in Fall Quarter. Please contact the d.school for more details.

MS&E 491. Clean Energy Development. 3 Units.

Clean energy project class for graduate students committed to clean energy and entrepreneurship, strong analytic and communication skills, and serious individual and group work. Teams will conceive, prepare and present business plan for a clean energy project or company. Class sessions devoted to guidance necessary for team projects and outside guest speakers. Grades based on team performance in development and presentation of a business concept, outline and plan. Enrollment limited to 30. Admission by application.

MS&E 802. TGR Dissertation. 0 Units.

Marketing Courses

MKTG 240. Marketing Management. 3 Units.

The objectives of this course are to introduce students to the substantive and procedural aspects of marketing management and to sharpen skills for critical analytical thinking and effective communication. Specifically, the goals are to introduce students to marketing strategy and to the elements of marketing analysis: customer analysis, competitor analysis, and company analysis; to familiarize students with the elements of the marketing mix (product strategy, pricing, advertising and promotion, and distribution), and to enhance problem solving and decision-making abilities in these operational areas of marketing; and to provide students with a forum (both written and verbal) for presenting and defending their own recommendations, and for critically examining and discussing the recommendations of others.

MKTG 249. MSx: Marketing. 3 Units.

Every business has two kinds of problems: 1) Not having customers and 2) everything else. Marketing addresses the first problem. With increased access to information and fast-changing technology the role of marketing has broadened significantly. To attract and retain profitable customers, managers must identify and measure consumers' needs and wants, assess the competitive environment, select the most appropriate customer targets, and then develop multi-faceted marketing programs that satisfy consumers' needs better than the competition. The objective of this class is to provide you with perspectives on classical and modern day marketing, and to teach you how to take a high level strategic approach towards contemporary marketing challenges.

MKTG 335. Product Launch. 3 Units.

Our focus is on the question, "When launching a product, what are the framing issues that will help determine success?" In particular, we will provide you with tools to analyze market situations and determine whether it makes sense to launch a product or engage in a marketing-related investment. The course is not designed to cover issues such as execution of a strategy (although we will touch on this a bit), but on whether to enter a market to begin with. Thus, the course is decision oriented; we want you to think about market entry decisions and how you would make them. The tools that you will be provided won't consist of equations; instead, we'll arm you with a set of questions to ask, whose answers will help you make better decisions. This course is an advanced applications marketing course. Unlike the base core course that is designed to cover every basic topic in marketing, here we focus on a number of basic questions and explore them in depth. Although we will have some lectures for background, the bulk of this endeavor will be accomplished through case discussions. In other words, we can't and won't cover everything, as this course is not designed to be comprehensive. We are going to rely on your academic background in marketing to cover the basics; here and there, it is possible that some material will be a review of what you've done before (there's nothing wrong with a little *de ja vu*). Unfortunately, due to the tight schedule we will not be able to cover any of the basics that are not already included in the course material. The course includes, cases, lectures, and guest lectures.

MKTG 344. Marketing Research. 3 Units.

Market intelligence is of value to firms. To understand their markets, firms need to answer questions such as: How large is the market for a product, what is important for the target segment? How does change in the product design affect profits? This course aims to help students ask relevant questions and find data-driven answers to them. The main objectives are to equip students with: 1) an understanding of the value of data - what intelligence it can and cannot provide, 2) exposure to state-of-the-art quantitative tools such as conjoint analysis and cluster analysis to analyze the data, and 3) sufficient hands-on experience with these tools for answering students' own marketing research questions from the perspective of an entrepreneur, marketer or a consultant. The course is designed to address substantive marketing problems such as: market segmentation, targeting, forecasting demand, pricing, and developing new products. We will use a mix of lectures, exercises, cases and a project to learn the material.

MKTG 353. Social Brands. 4 Units.

As savvy consumers are increasingly participating in brands rather than merely receiving their messages, how do leading organizations stoke conversations, co-create experiences and stories, and build engaging relationships with consumers? Moreover, how do they harness social media to build a brand, and empower employees and consumers to share these brand stories with others? Social Brands is a hands-on, project-based course that will draw brain power from the GSB, School of Engineering, and other Stanford graduate programs to collaboratively and creatively explore these questions. While we examine various inspiring examples of social brands, we will find that the rules are yet to be written. This emerging genre of social commerce and marketing is the "Wild West" and students working in mixed teams will be challenged to design and launch their own social experiments to form their own hypotheses. Assignments will push student teams to audit a brand, focus on a strategic goal, and design a social interaction that invites people on campus to participate in an extraordinary personal experience with that brand. Teams will then capture this experience in short videos and compile them into a story -- one that highlights the brand experience they orchestrated, its impact, and their key learnings. This course will integrate approaches from the d.school and marketing curriculum - including brand strategy, storytelling fundamentals, human-centered methods, rapid prototyping, and a bias toward action. This is a class for those that want to learn by doing and creating. MKTG 353 - Social Brands class website: <http://www.stanford.edu/class/mktg353/>.

MKTG 355. Designing for Happiness. 4 Units.

We assume happiness is stable, an endpoint to achieve or goal to chase. It's not. What we think drives our happiness often doesn't. So what does? And how can knowing this help us create strong companies and brands? Understanding happiness is crucial to building successful relationships, products, and organizations. Yet recent research suggests that our definition of happiness is often confused and misguided. In this class, we explore new data on happiness, focusing on: re-thinking happiness (a happy you) designing happiness (a happy company) spreading happiness (a happy brand) Students will work together to use an iterative design-thinking approach to understand our own definitions of happiness, uncover what really makes us happy (vs. what we think makes us happy), prototype solutions/products to increase our happiness, and design happy companies and brands. The class will be data-driven, drawing on multiple methodologies both quantitative and ethnographic. Throughout the quarter, students will build a class-wide database to investigate real-world happiness data via an Designing Happiness app, and test hypotheses about what truly makes them, their teams and their customers happy. This class is recommended for students who plan to be a future entrepreneur building a strong brand, an employee who finds meaning in their work, or someone who wants to understand happiness.

MKTG 365. Marketing Analytics. 4 Units.

Firms operate in an increasingly challenging business environment, with greater competition, more informed customers and rapidly changing market trends. Simultaneously, they also have access to more information about their customers, the marketplace and their competitors than ever before. In this environment, knowing how to use this information to make optimal business decisions is a crucial competitive advantage. Firms often have access to data that they do not know how to use. The objectives of this course are to introduce students to state-of-the-art marketing analytics and to teach them how to practically apply these analytics to real-world business decisions. The following are examples of the types of questions that the course will address: How should a firm determine the prices for its products and services? What is the effect of television advertising on a brand's sales and how should advertising be optimized? What can a firm learn about its customers from online browsing behavior and how can this knowledge be used for targeted advertising and promotions? How should a firm allocate its sales force? How should a firm manage the allocation of its promotional budget in order to maximize its returns? How should the mailing of catalogs or direct mail be targeted to increase response rates? The course will use a mix of lectures, cases, homework assignments and a course project to learn the material. Students do not need to have an advanced statistical background to take this course. Familiarity with the material in an introductory marketing course and an introductory statistics course will be assumed, but necessary material will be reviewed during the course of the quarter as necessary.

MKTG 375. Consumer Behavior. 4 Units.

Contemporary approaches to marketing emphasize the importance of adopting a consumer focus, from determining consumers' wants and needs to shaping their attitudes and ensuring their loyalty. This course provides insight into consumer psychology and the means by which consumer behavior can be influenced or altered. The course has both theoretical and practical objectives in that it will: (1) explore theory and research that is relevant to understanding consumer psychology and behavior, and (2) apply these theories and findings to generate ideas for developing effective marketing techniques and tactics. By shedding light on the psychological underpinnings of consumers' thoughts, attitudes, preferences, needs, and decision-making styles, this course will help students make more insightful and effective marketing decisions. Moreover, because this course takes a broad psychological perspective, it highlights novel ideas for grabbing attention, shaping behavior, and changing people's minds both within and outside of traditional marketing contexts.

MKTG 526. Customer Acquisition for New Ventures. 2 Units.

The focus of this course is on the strategies and methods used by early-stage companies to acquire customers (through outbound or inbound marketing) and to activate them (i.e., to encourage repeat behavior and/or increase the frequency of interaction). Throughout the course, we will examine topics such as search engine marketing (SEM), content marketing, affiliate marketing, social media campaigns, mobile applications, freemium strategies, and the use of web analytics for tracking customer acquisition and conversion. The focus will be mainly on digital marketing channels, and the emphasis will be more B2C than B2B. Instruction will consist of case discussion and guest lectures, with students working in groups to apply their learning to improve the process of customer acquisition.

MKTG 532. Persuasion. 2 Units.

The aim of this course is to provide insight into the psychology of persuasion. We will hear from industry experts to discover what they believe makes for an effective persuasive appeal (e.g., a successful pitch to investors), and we will supplement those sessions with class discussions about persuasion theory and research. The goal is provide you with deep and diverse insight into persuasion strategy. Over the course of two weeks, we will have speakers from a number of fields - giving us a broad perspective on persuasion, what constitutes (or qualifies as) persuasion, and what makes a particular persuasive message or strategy successful.

MKTG 536. Entrepreneurial Ventures in Luxury Markets. 2 Units.

The broad goal of this Bass Seminar is to apply the key concepts covered in *The Frinky Science of the Human Mind* (GSBGEN 520)* for identifying and proposing new ventures in the "luxury" space. For this course, "luxury" will be viewed in a broader than usual fashion, namely creating distinctive differences to fundamentally change an otherwise mundane product category. An example of such a view will be the venture, Mr., an upscale barbershop in San Francisco, started by two GSB alums, Kumi Walker and Sean Heywood. Another example will be Voss, an upscale brand in the bottled water category. Students in this course will work in groups to identify promising opportunities in the "luxury" space early in the quarter. The groups will then hone their new venture ideas through meetings with entrepreneurs, experts in private equity, product design, etc., who will serve as guest speakers in this course. In this regard, each session will be structured to begin with a guest speaker followed by a brainstorming/ discussion session. The final deliverable will be a business plan that is put together by each group for a new venture in the "luxury" space. Students who could not take GSBGEN 520 are strongly encouraged to attend preparatory sessions that will be scheduled in the first week of December. Such students may also contact the instructor (shiv_baba@gsb.stanford.edu) to see if they can sit in on some of the GSBGEN 520 sessions that will be relevant for this Bass Seminar.

MKTG 541. Social Brands. 2 Units.

A hands-on two-week survey of Marketing's cutting edge, where bold brands are becoming ever more open, participatory, experiential & experimental. Inspired by a smattering of provocative real-world examples and mind-blowing guests, diverse student teams will employ design methods to conceive of and visualize their own creative proposals for how the Stanford GSB itself might engage with the world in radical new ways. Teams will ultimately pitch their final concepts to the GSB's Chief Marketing Officer for consideration, feedback and potential real-world implementation.

MKTG 547. Strategic Marketing Communication - Compressed. 2 Units.

The course is designed to sharpen students' grasp of the strategic and tactical aspects of Marketing Communications that lead to competitive advantages in the marketplace. The course will begin a focus on strategy and introduce students to frameworks that address two broad goals of any firm: (1) Establish a competitive advantage by offering a superior customer value proposition and (2) Generate sustainable organic growth. The course will then segue into marketing communication tactics that will enable the firm effectively accomplish its strategic objectives. Here, the concepts and frameworks will only be applicable to traditional approaches (such as the use of television, print, and point-of-purchase promotions) but also to emergent approaches (such as the use of the internet, mobile media, etc.). Designed from the perspective of executives who are often involved in making strategic as well as tactical marketing decisions to solve contemporary business problems, this course is intended for students whose career plans include consulting and entrepreneurial ventures, apart from those thinking of careers in marketing.

MKTG 555. Designing Happiness. 2 Units.

We assume happiness is stable, an endpoint to achieve or a goal to "chase." It's not. Recent research suggests that the meaning of happiness changes every 3-4 years. Understanding happiness is crucial to building successful products, organizations and relationships. In this MBA seminar, we explore the data-driven research on happiness, revealing insights about (a) anticipating, (b) understanding, (c) visualizing, (d) spreading, (e) remembering, and (f) creating happiness. Students will work together to use an iterative design-thinking approach to understand our own current definition of happiness, uncover what really makes us happy (vs. what we think makes us happy), prototype solutions/products to increase our present happiness, and develop tools to continually understand and foster happiness as our lives change. The seminar will be data-driven, drawing on multiple methodologies including blogs (<http://www.wefeelfine.org/>), experiments and surveys.

MKTG 575. Consumer Behavior. 2 Units.

Contemporary approaches to marketing emphasize the importance of adopting a consumer focus, from determining consumers' wants and needs, understanding their motivation, to shaping their attitudes and ensuring their loyalty. This course provides insight into consumer psychology and the means by which consumer behavior can be influenced or altered. The course has both theoretical and practical objectives in that we will: (1) explore theory and research that is relevant to understanding consumer psychology, (2) apply these theories and findings to generate novel ideas for effective marketing techniques, and (3) hear from guest speakers whose work touches upon course topics. By shedding light on the psychological underpinnings of consumers' motivation, attitudes, preferences, and decision-making styles, this course will help students make more insightful and effective marketing decisions, as well as developing novel ideas for grabbing attention, shaping behavior, and changing people's minds.

MKTG 641. Behavioral Research in Marketing I. 3 Units.

This course prepares the student to do empirical behavioral research. It will cover all aspects of the research process, from hypothesis generation to experimental design to data analysis to writing up your results.

MKTG 642. Behavioral Research in Marketing II: Consumer Behavior. 3 Units.

This Ph.D. seminar provides coverage of the major research carried out in consumer research both in marketing and psychology. A vast set of topic will be covered including conscious and non-conscious consumer goals, motivations, emotions, attention and perception and consumer decision processes. The course will help students hone their ability to conceptualize, operationalize, and develop research idea and will provide a grasp of what it takes to be a successful academic in the field of consumer behavior.

MKTG 644. Quantitative Research in Marketing. 4 Units.

The goal of this seminar is to familiarize students with the quantitative marketing literature and develop the process of generating research ideas and topics. Sessions will involve a mix of: (i) a discussion of papers in a particular area in quantitative marketing; and/or (ii) a discussion of students' research ideas with respect to topics. The format will mix student presentations of papers with lectures by the instructor(s). When discussing papers in the literature, the focus will be on the topic and research question and not the methodological approach. When discussing research ideas, students should be able to articulate why their question is interesting, where it fits in the literature and how they would address their question.

MKTG 645. Empirical Analysis of Dynamic Decision Contexts. 3 Units.

This course will focus on empirical tools for analyzing dynamic decision contexts, wherein current actions of firms or consumers have effects on future payoffs, profits and/or competitive conduct. The course will build the relevant material generally, but our applications will be mostly focused on empirical marketing and industrial organization problems. We will have an applied focus overall, emphasizing the practical aspects of implementation, especially programming. The overall aim of the class is to help students obtain the skills to implement these methods in their research. By the end of the class, students are expected to be able to formulate a dynamic decision problem, program it in a language such as Matlab or C, and to estimate the model from data. The course starts with an overview of consumer theory and static models of consumer choice. We build on this material and introduce discrete choice markovian decision problems, and continuous markovian decision problems, and focus on building the computational toolkit for the numerical analysis of these problems. We then move on to specific applications, and discuss multi-agent dynamic equilibrium models. Finally, we discuss recently proposed advanced methods for alleviating computational burden in dynamic models.

MKTG 646. Bayesian Inference: Methods and Applications. 3 Units.

The course aims to develop a thorough understanding of Bayesian inference, with a special focus on empirical applications in marketing. The course will start with a brief theoretical foundation to Bayesian inference and will subsequently focus on empirical methods. Initial topics would include Bayesian linear regression, multivariate regression, importance sampling and its applications. Subsequently, the course will focus on Markov Chain Monte Carlo (MCMC) methods including the Gibbs Sampler and the Metropolis-Hastings algorithm and their applications. The overall focus of the course will be on applying these methods for empirical research using a programming language such as R.

MKTG 661. Attitudes and Persuasion. 3 Units.

This course will provide an overview of recent research on attitudes and persuasion. Content will include broad coverage of the issues of major importance to attitude theory, but will focus on more recent issues and controversies that have captured the interest of researchers in the field. The class will cover research areas such as attitude change, persuasion, and resistance processes; implicit versus explicit attitudes; attitude certainty; cognitive versus affective influences; dissonance and attitudinal ambivalence; selective exposure and biased processing; metacognition; and others. Students who take this course will become familiar with research methods and major issues in attitudes research and will have a better understanding of how individuals form, maintain, and change their evaluations. Throughout the course, students will be encouraged to critique existing research and formulate new research ideas.

MKTG 691. PhD Directed Reading. 1-15 Unit.

This course is offered for students requiring specialized training in an area not covered by existing courses. To register, a student must obtain permission from the faculty member who is willing to supervise the reading.

Same as: ACCT 691, FINANCE 691, GSBGEN 691, HRMGT 691, MGTECON 691, OB 691, OIT 691, POLECON 691, STRAMGT 691.

MKTG 692. PhD Dissertation Research. 1-15 Unit.

This course is elected as soon as a student is ready to begin research for the dissertation, usually shortly after admission to candidacy. To register, a student must obtain permission from the faculty member who is willing to supervise the research.

Same as: ACCT 692, FINANCE 692, GSBGEN 692, HRMGT 692, MGTECON 692, OB 692, OIT 692, POLECON 692, STRAMGT 692.

MKTG 695. Directed Research. 0 Units.

This course is designed to prepare new marketing PhD students for conducting rigorous, independent research. In this course, the student will work closely with a faculty member in collaborative research activities and will become familiar with various aspects of the research process, including developing hypotheses, designing and conducting experiments and/or analyses, and reporting results.

MKTG 802. TGR Dissertation. 0 Units.

Same as: ACCT 802, FINANCE 802, GSBGEN 802, HRMGT 802, MGTECON 802, OB 802, OIT 802, POLECON 802, STRAMGT 802.

Materials Science & Engineer Courses

MATSCI 10SC. Diamonds from Peanut Butter: Material Technologies and Human History. 2 Units.

Technological importance of materials in history is captured in names: the Stone Age, Bronze Age, Iron Age, and now the Information Age or the Silicon Age. How materials have played, and continue to play, pivotal roles in the development of new technologies.

MATSCI 11SC. Energy Technologies for a Sustainable Future. 2 Units.

Wondering what the buzz is about sustainability, renewable energy, and clean fuels? Meeting the world's growing energy needs in a sustainable fashion is one of the most pressing problems of our time. This class will introduce the scope of the energy problem and define some of the options for sustainable energy. We will look into the scientific basis of sustainable energy technologies, such as solar cells, which convert the energy of the sun directly into electricity, and fuel cells, which convert chemical energy directly into electricity. Other topics will include biofuels, i.e., fuel derived from plant matter, and clean fuels such as hydrogen. The course will emphasize the fundamental science behind the devices and highlight some of the cutting-edge technological issues that are currently being explored. Assigned reading will include books on global energy issues as well as technical reading on the science and engineering of sustainable energy technologies. We will visit several local energy-technology companies, and students will have hands-on lab experience with solar cells, fuel cells, and generators. Students are expected to participate in classroom discussions, attend field trips, carry out laboratory experiments, and complete homework assignments, including a term paper.

MATSCI 81N. Bioengineering Materials to Heal the Body. 3 Units.

Preference to freshmen. How scientists and engineers are designing new materials for surgeon to use in replacing body parts such as heart tissue or the spinal cord. How cells, in the body and transplanted stem cells, communicate with implanted materials. Real-world examples of materials developed for tissue engineering and regenerative medicine therapies. Students identify a clinically important disease or injury that requires a better material, research approaches to the problem, and debate possible engineering solutions.

MATSCI 82N. Science of the Impossible. 3 Units.

Imagine a world where cancer is cured with light, objects can be made invisible, and teleportation is allowed through space and time. The future once envisioned by science fiction writers is now becoming a reality, thanks to advances in materials science and engineering. This seminar will explore 'impossible' technologies - those that have shaped our past and those that promise to revolutionize the future. Attention will be given to both the science and the societal impact of these technologies. We will begin by investigating breakthroughs from the 20th century that seemed impossible in the early 1900s, such as the invention of integrated circuits and the discovery of chemotherapy. We will then discuss the scientific breakthroughs that enabled modern 'impossible' science, such as photodynamic cancer therapeutics, invisibility, and psychokinesis through advanced mind-machine interfaces. Lastly, we will explore technologies currently perceived as completely impossible and brainstorm the breakthroughs needed to make such science fiction a reality. The course will include introductory lectures and in-depth conversations based on readings. Students will also be given the opportunity to lead class discussions on a relevant 'impossible science' topic of their choosing.

MATSCI 100. Undergraduate Independent Study. 1-3 Unit.

Independent study in materials science under supervision of a faculty member.

MATSCI 150. Undergraduate Research. 3-6 Units.

Participation in a research project.

MATSCI 151. Microstructure and Mechanical Properties. 3-4 Units.

Primarily for students without a materials background. Mechanical properties and their dependence on microstructure in a range of engineering materials. Elementary deformation and fracture concepts, strengthening and toughening strategies in metals and ceramics. Topics: dislocation theory, mechanisms of hardening and toughening, fracture, fatigue, and high-temperature creep. Prerequisite: MATSCI 163. Undergraduates register in 151 for 4 units; graduates register for 251 in 3 units. Same as: MATSCI 251.

MATSCI 152. Electronic Materials Engineering. 4 Units.

Materials science and engineering for electronic device applications. Kinetic molecular theory and thermally activated processes; band structure; electrical conductivity of metals and semiconductors; intrinsic and extrinsic semiconductors; elementary p-n junction theory; operating principles of light emitting diodes, solar cells, thermoelectric coolers, and transistors. Semiconductor processing including crystal growth, ion implantation, thin film deposition, etching, lithography, and nanomaterials synthesis. Prerequisite: MATSCI 164.

MATSCI 153. Nanostructure and Characterization. 4 Units.

The structure of materials at the nanoscale is in most cases the same crystalline form as the natural phase. Structures of materials such as semiconductors, ceramics, metals, and nanotubes; classification of these materials according to the principles of crystallography. Primary methods of structural characterization, X-ray diffraction, and electron microscopy; their applications to study such nanostructures. Prerequisite: MATSCI 161.

MATSCI 154. Thermodynamic Evaluation of Green Energy Technologies. 4 Units.

Understand the thermodynamics and efficiency limits of modern green technologies such as carbon dioxide capture from air, fuel cells, batteries, and solar-thermal power.

MATSCI 155. Nanomaterials Synthesis. 4 Units.

The science of synthesis of nanometer scale materials. Examples including solution phase synthesis of nanoparticles, the vapor-liquid-solid approach to growing nanowires, formation of mesoporous materials from block-copolymer solutions, and formation of photonic crystals. Relationship of the synthesis phenomena to the materials science driving forces and kinetic mechanisms. Materials science concepts including capillarity, Gibbs free energy, phase diagrams, and driving forces.

MATSCI 156. Solar Cells, Fuel Cells, and Batteries: Materials for the Energy Solution. 3-4 Units.

Operating principles and applications of emerging technological solutions to the energy demands of the world. The scale of global energy usage and requirements for possible solutions. Basic physics and chemistry of solar cells, fuel cells, and batteries. Performance issues, including economics, from the ideal device to the installed system. The promise of materials research for providing next generation solutions. Undergraduates register in 156 for 4 units; graduates register in 256 for 3 units. Same as: EE 293A, ENERGY 293A, MATSCI 256.

MATSCI 157. Quantum Mechanics of Nanoscale Materials. 4 Units.

Introduction to quantum mechanics and its application to the properties of materials. No prior background beyond a working knowledge of calculus and high school physics is presumed. Topics include: The Schrodinger equation and applications to understanding of the properties of quantum dots, semiconductor heterostructures, nanowires, and bulk solids. Tunneling processes and applications to nanoscale devices; the scanning tunneling microscope, and quantum cascade lasers. Simple models for the electronic properties and band structure of materials including semiconductors, insulators and metals and applications to semiconductor devices. Time-dependent perturbation theory and interaction of light with materials with applications to laser technology.

MATSCI 159Q. Japanese Companies and Japanese Society. 3 Units.

Preference to sophomores. The structure of a Japanese company from the point of view of Japanese society. Visiting researchers from Japanese companies give presentations on their research enterprise. The Japanese research ethic. The home campus equivalent of a Kyoto SCTI course. Same as: ENGR 159Q.

MATSCI 160. Nanomaterials Laboratory. 4 Units.

Preference to sophomores and juniors. Hands-on approach to synthesis and characterization of nanoscale materials. How to make, pattern, and analyze the latest nanotech materials, including nanoparticles, nanowires, and self-assembled monolayers. Techniques such as soft lithography, self-assembly, and surface functionalization. The VLS mechanism of nanowire growth, nanoparticle size control, self-assembly mechanisms, and surface energy considerations. Laboratory projects. Enrollment limited to 24.

MATSCI 161. Nanocharacterization Laboratory. 3-4 Units.

Nanocharacterization techniques, such as: optical and electron microscopy, x-ray photoelectron spectroscopy and atomic force microscopy, will be explained in class and used in lab to determine structure of materials and understand why they have certain properties. This WIM class includes instruction on writing, statistics, generating effective plots with curve fits, using databases to find information and giving oral scientific presentations. Prerequisite: ENGR 50 or equivalent. 75 min. lecture + 3 hr. lab most weeks. Undergraduates register for 161 for 4 units; graduates register for 171 for 3 units.

Same as: MATSCI 171.

MATSCI 162. X-Ray Diffraction Laboratory. 3-4 Units.

Experimental x-ray diffraction techniques for microstructural analysis of materials, emphasizing powder and single-crystal techniques. Diffraction from epitaxial and polycrystalline thin films, multilayers, and amorphous materials using medium and high resolution configurations. Determination of phase purity, crystallinity, relaxation, stress, and texture in the materials. Advanced experimental x-ray diffraction techniques: reciprocal lattice mapping, reflectivity, and grazing incidence diffraction. Enrollment limited to 20. Undergraduates register for 162 for 4 units; graduates register for 172 for 3 units.

Same as: MATSCI 172, PHOTON 172.

MATSCI 163. Mechanical Behavior Laboratory. 3-4 Units.

Experimental techniques for the study of the mechanical behavior of engineering materials in bulk and thin film form, including tension testing, nanoindentation, and wafer curvature stress analysis. Metallic and polymeric systems. Prerequisite: ENGR 50. Undergraduates register for 163 in 4 units; graduates register in 173 for 3 units.

Same as: MATSCI 173.

MATSCI 164. Electronic and Photonic Materials and Devices Laboratory. 3-4 Units.

Lab course. Current electronic and photonic materials and devices. Device physics and micro-fabrication techniques. Students design, fabricate, and perform physical characterization on the devices they have fabricated. Established techniques and materials such as photolithography, metal evaporation, and Si technology; and novel ones such as soft lithography and organic semiconductors. Prerequisite: 152 or 199 or consent of instructor. Undergraduates register in 164 for 4 units; graduates register in 174 for 3 units.

Same as: MATSCI 174.

MATSCI 165. Nanoscale Materials Physics Computation Laboratory. 3-4 Units.

Computational exploration of fundamental topics in materials science using Java-based computation and visualization tools. Emphasis is on the atomic-scale origins of macroscopic materials phenomena. Simulation methods include molecular dynamics and Monte Carlo with applications in thermodynamics, kinetics, and topics in statistical mechanics. Required prerequisites: Freshman-level physics, undergraduate thermodynamics. Undergraduates register for 165 for 4 units; graduates register for 175 for 3 units.

Same as: MATSCI 175.

MATSCI 171. Nanocharacterization Laboratory. 3-4 Units.

Nanocharacterization techniques, such as: optical and electron microscopy, x-ray photoelectron spectroscopy and atomic force microscopy, will be explained in class and used in lab to determine structure of materials and understand why they have certain properties. This WIM class includes instruction on writing, statistics, generating effective plots with curve fits, using databases to find information and giving oral scientific presentations. Prerequisite: ENGR 50 or equivalent. 75 min. lecture + 3 hr. lab most weeks. Undergraduates register for 161 for 4 units; graduates register for 171 for 3 units.

Same as: MATSCI 161.

MATSCI 172. X-Ray Diffraction Laboratory. 3-4 Units.

Experimental x-ray diffraction techniques for microstructural analysis of materials, emphasizing powder and single-crystal techniques. Diffraction from epitaxial and polycrystalline thin films, multilayers, and amorphous materials using medium and high resolution configurations. Determination of phase purity, crystallinity, relaxation, stress, and texture in the materials. Advanced experimental x-ray diffraction techniques: reciprocal lattice mapping, reflectivity, and grazing incidence diffraction. Enrollment limited to 20. Undergraduates register for 162 for 4 units; graduates register for 172 for 3 units.

Same as: MATSCI 162, PHOTON 172.

MATSCI 173. Mechanical Behavior Laboratory. 3-4 Units.

Experimental techniques for the study of the mechanical behavior of engineering materials in bulk and thin film form, including tension testing, nanoindentation, and wafer curvature stress analysis. Metallic and polymeric systems. Prerequisite: ENGR 50. Undergraduates register for 163 in 4 units; graduates register in 173 for 3 units.

Same as: MATSCI 163.

MATSCI 174. Electronic and Photonic Materials and Devices Laboratory. 3-4 Units.

Lab course. Current electronic and photonic materials and devices. Device physics and micro-fabrication techniques. Students design, fabricate, and perform physical characterization on the devices they have fabricated. Established techniques and materials such as photolithography, metal evaporation, and Si technology; and novel ones such as soft lithography and organic semiconductors. Prerequisite: 152 or 199 or consent of instructor. Undergraduates register in 164 for 4 units; graduates register in 174 for 3 units.

Same as: MATSCI 164.

MATSCI 175. Nanoscale Materials Physics Computation Laboratory. 3-4 Units.

Computational exploration of fundamental topics in materials science using Java-based computation and visualization tools. Emphasis is on the atomic-scale origins of macroscopic materials phenomena. Simulation methods include molecular dynamics and Monte Carlo with applications in thermodynamics, kinetics, and topics in statistical mechanics. Required prerequisites: Freshman-level physics, undergraduate thermodynamics. Undergraduates register for 165 for 4 units; graduates register for 175 for 3 units.

Same as: MATSCI 165.

MATSCI 190. Organic and Biological Materials. 3-4 Units.

Unique physical and chemical properties of organic materials and their uses. The relationship between structure and physical properties, and techniques to determine chemical structure and molecular ordering. Examples include liquid crystals, dendrimers, carbon nanotubes, hydrogels, and biopolymers such as lipids, protein, and DNA. Prerequisite: Thermodynamics and ENGR 50 or equivalent. Undergraduates register for 190 for 4 units; graduates register for 210 for 3 units.

Same as: MATSCI 210.

MATSCI 192. Materials Chemistry. 3-4 Units.

An introduction to the fundamental physical chemical principles underlying materials properties. Beginning from basic quantum chemistry, students will learn how the electronic configuration of molecules and solids impacts their structure, stability/reactivity, and spectra. Topics for the course include molecular symmetry, molecular orbital theory, solid-state chemistry, coordination compounds, and nanomaterials chemistry. Using both classroom lectures and journal discussions, students will gain an understanding of and be well-positioned to contribute to the frontiers of materials chemistry, ranging from solar-fuel generation to next-generation cancer treatments. Undergraduates register in 192 for 4 units; graduates register in 202 for 3 units.

Same as: MATSCI 202.

MATSCI 193. Atomic Arrangements in Solids. 3-4 Units.

Atomic arrangements in perfect and imperfect solids, especially important metals, ceramics, and semiconductors. Elements of formal crystallography, including development of point groups and space groups. Undergraduates register in 193 for 4 units; graduates register in 203 for 3 units.

Same as: MATSCI 203.

MATSCI 194. Thermodynamics and Phase Equilibria. 3-4 Units.

The principles of heterogeneous equilibria and their application to phase diagrams. Thermodynamics of solutions; chemical reactions; non-stoichiometry in compounds; first order phase transitions and metastability; thermodynamics of surfaces, elastic solids, dielectrics, and magnetic solids. Undergraduates register for 194 for 4 units; graduates register for 204 for 3 units.

Same as: MATSCI 204.

MATSCI 195. Waves and Diffraction in Solids. 3-4 Units.

The elementary principals of x-ray, vibrational, and electron waves in solids. Basic wave behavior including Fourier analysis, interference, diffraction, and polarization. Examples of wave systems, including electromagnetic waves from Maxwell's equations. Diffracted intensity in reciprocal space and experimental techniques such as electron and x-ray diffraction. Lattice vibrations in solids, including vibrational modes, dispersion relationship, density of states, and thermal properties. Free electron model. Basic quantum mechanics and statistical mechanics including Fermi-Dirac and Bose-Einstein statistics. Prerequisite: 193/203 or consent of instructor. Undergraduates register for 195 for 4 units; graduates register for 205 for 3 units.

Same as: MATSCI 205, PHOTON 205.

MATSCI 196. Defects in Crystalline Solids. 3-4 Units.

Thermodynamic and kinetic behaviors of 0-D (point), 1-D (line), and 2-D (interface and surface) defects in crystalline solids. Influences of these defects on the macroscopic ionic, electronic, and catalytic properties of materials, such as batteries, fuel cells, catalysts, and memory-storage devices. Prerequisite: 193/203. Undergraduates register for 196 for 4 units; graduates register for 206 for 3 units.

Same as: MATSCI 206.

MATSCI 197. Rate Processes in Materials. 3-4 Units.

Diffusion and phase transformations in solids. Diffusion topics: Fick's laws, atomic theory of diffusion, and diffusion in alloys. Phase transformation topics: nucleation, growth, diffusional transformations, spinodal decomposition, and interface phenomena. Material builds on the mathematical, thermodynamic, and statistical mechanical foundations in the prerequisites. Prerequisites: 194/204. Undergraduates register for 197 for 4 units; graduates register for 207 for 3 units.

Same as: MATSCI 207.

MATSCI 198. Mechanical Properties of Materials. 3-4 Units.

Introduction to the mechanical behavior of solids, emphasizing the relationships between microstructure and mechanical properties. Elastic, anelastic, and plastic properties of materials. The relations between stress, strain, strain rate, and temperature for plastically deformable solids. Application of dislocation theory to strengthening mechanisms in crystalline solids. The phenomena of creep, fracture, and fatigue and their controlling mechanisms. Prerequisites: 193/203. Undergraduates register for 198 for 4 units; graduates register for 208 for 3 units.

Same as: MATSCI 208.

MATSCI 199. Electronic and Optical Properties of Solids. 3-4 Units.

The concepts of electronic energy bands and transports applied to metals, semiconductors, and insulators. The behavior of electronic and optical devices including p-n junctions, MOS-capacitors, MOSFETs, optical waveguides, quantum-well lasers, light amplifiers, and metallo-dielectric light guides. Emphasis is on relationships between structure and physical properties. Elementary quantum and statistical mechanics concepts are used. Prerequisite: 195/205 or equivalent. Undergraduates register for 199 for 4 units; graduates register for 209 for 3 units.

Same as: MATSCI 209.

MATSCI 200. Master's Research. 1-15 Unit.

Participation in a research project.

MATSCI 202. Materials Chemistry. 3-4 Units.

An introduction to the fundamental physical chemical principles underlying materials properties. Beginning from basic quantum chemistry, students will learn how the electronic configuration of molecules and solids impacts their structure, stability/reactivity, and spectra. Topics for the course include molecular symmetry, molecular orbital theory, solid-state chemistry, coordination compounds, and nanomaterials chemistry. Using both classroom lectures and journal discussions, students will gain an understanding of and be well-positioned to contribute to the frontiers of materials chemistry, ranging from solar-fuel generation to next-generation cancer treatments. Undergraduates register in 192 for 4 units; graduates register in 202 for 3 units.

Same as: MATSCI 192.

MATSCI 203. Atomic Arrangements in Solids. 3-4 Units.

Atomic arrangements in perfect and imperfect solids, especially important metals, ceramics, and semiconductors. Elements of formal crystallography, including development of point groups and space groups. Undergraduates register in 193 for 4 units; graduates register in 203 for 3 units.

Same as: MATSCI 193.

MATSCI 204. Thermodynamics and Phase Equilibria. 3-4 Units.

The principles of heterogeneous equilibria and their application to phase diagrams. Thermodynamics of solutions; chemical reactions; non-stoichiometry in compounds; first order phase transitions and metastability; thermodynamics of surfaces, elastic solids, dielectrics, and magnetic solids. Undergraduates register for 194 for 4 units; graduates register for 204 for 3 units.

Same as: MATSCI 194.

MATSCI 205. Waves and Diffraction in Solids. 3-4 Units.

The elementary principals of x-ray, vibrational, and electron waves in solids. Basic wave behavior including Fourier analysis, interference, diffraction, and polarization. Examples of wave systems, including electromagnetic waves from Maxwell's equations. Diffracted intensity in reciprocal space and experimental techniques such as electron and x-ray diffraction. Lattice vibrations in solids, including vibrational modes, dispersion relationship, density of states, and thermal properties. Free electron model. Basic quantum mechanics and statistical mechanics including Fermi-Dirac and Bose-Einstein statistics. Prerequisite: 193/203 or consent of instructor. Undergraduates register for 195 for 4 units; graduates register for 205 for 3 units.

Same as: MATSCI 195, PHOTON 205.

MATSCI 206. Defects in Crystalline Solids. 3-4 Units.

Thermodynamic and kinetic behaviors of 0-D (point), 1-D (line), and 2-D (interface and surface) defects in crystalline solids. Influences of these defects on the macroscopic ionic, electronic, and catalytic properties of materials, such as batteries, fuel cells, catalysts, and memory-storage devices. Prerequisite: 193/203. Undergraduates register for 196 for 4 units; graduates register for 206 for 3 units.

Same as: MATSCI 196.

MATSCI 207. Rate Processes in Materials. 3-4 Units.

Diffusion and phase transformations in solids. Diffusion topics:

Fick's laws, atomic theory of diffusion, and diffusion in alloys. Phase transformation topics: nucleation, growth, diffusional transformations, spinodal decomposition, and interface phenomena. Material builds on the mathematical, thermodynamic, and statistical mechanical foundations in the prerequisites. Prerequisites: 194/204. Undergraduates register for 197 for 4 units; graduates register for 207 for 3 units.

Same as: MATSCI 197.

MATSCI 208. Mechanical Properties of Materials. 3-4 Units.

Introduction to the mechanical behavior of solids, emphasizing the relationships between microstructure and mechanical properties. Elastic, anelastic, and plastic properties of materials. The relations between stress, strain, strain rate, and temperature for plastically deformable solids. Application of dislocation theory to strengthening mechanisms in crystalline solids. The phenomena of creep, fracture, and fatigue and their controlling mechanisms. Prerequisites: 193/203. Undergraduates register for 198 for 4 units; graduates register for 208 for 3 units.

Same as: MATSCI 198.

MATSCI 209. Electronic and Optical Properties of Solids. 3-4 Units.

The concepts of electronic energy bands and transports applied to metals, semiconductors, and insulators. The behavior of electronic and optical devices including p-n junctions, MOS-capacitors, MOSFETs, optical waveguides, quantum-well lasers, light amplifiers, and metallo-dielectric light guides. Emphasis is on relationships between structure and physical properties. Elementary quantum and statistical mechanics concepts are used. Prerequisite: 195/205 or equivalent. Undergraduates register for 199 for 4 units; graduates register for 209 for 3 units.

Same as: MATSCI 199.

MATSCI 210. Organic and Biological Materials. 3-4 Units.

Unique physical and chemical properties of organic materials and their uses. The relationship between structure and physical properties, and techniques to determine chemical structure and molecular ordering. Examples include liquid crystals, dendrimers, carbon nanotubes, hydrogels, and biopolymers such as lipids, protein, and DNA. Prerequisite: Thermodynamics and ENGR 50 or equivalent. Undergraduates register for 190 for 4 units; graduates register for 210 for 3 units.

Same as: MATSCI 190.

MATSCI 230. Materials Science Colloquium. 1 Unit.

May be repeated for credit.

MATSCI 231. Mathematical Methods in Materials Science. 3 Units.

A study of two of the more important partial differential equations of interest to materials scientists, namely, the diffusion/heat conduction equation and the wave equation. Methods of solution emphasized will include eigenfunction expansions and error function solutions (including transformations between the two), method of images, Laplace transforms, and an introduction to simple finite difference techniques.

MATSCI 251. Microstructure and Mechanical Properties. 3-4 Units.

Primarily for students without a materials background. Mechanical properties and their dependence on microstructure in a range of engineering materials. Elementary deformation and fracture concepts, strengthening and toughening strategies in metals and ceramics. Topics: dislocation theory, mechanisms of hardening and toughening, fracture, fatigue, and high-temperature creep. Prerequisite: MATSCI 163. Undergraduates register in 151 for 4 units; graduates register for 251 in 3 units.

Same as: MATSCI 151.

MATSCI 256. Solar Cells, Fuel Cells, and Batteries: Materials for the Energy Solution. 3-4 Units.

Operating principles and applications of emerging technological solutions to the energy demands of the world. The scale of global energy usage and requirements for possible solutions. Basic physics and chemistry of solar cells, fuel cells, and batteries. Performance issues, including economics, from the ideal device to the installed system. The promise of materials research for providing next generation solutions. Undergraduates register in 156 for 4 units; graduates register in 256 for 3 units. Same as: EE 293A, ENERGY 293A, MATSCI 156.

MATSCI 299. Practical Training. 3 Units.

Educational opportunities in high-technology research and development labs in industry. Qualified graduate students engage in internship work and integrate that work into their academic program. Following the internship, students complete a research report outlining their work activity, problems investigated, key results, and any follow-on projects they expect to perform. Student is responsible for arranging own employment. See department student services manager before enrolling.

MATSCI 300. Ph.D. Research. 1-15 Unit.

Participation in a research project.

MATSCI 302. Solar Cells. 3 Units.

Theory of conventional pn junction and excitonic solar cells. Design, fabrication and characterization of crystalline silicon, CdTe, CIGS, tandem and organic solar cells. The device simulator PC1D is used to predict the performance of solar cells with various designs, recombination lifetime and surface recombination rates. The materials science aspects of solar cells research is emphasized, but module design and economic hurdles that must be overcome for solar cell technology to generate a significant fraction of the world's electricity are also addressed.

MATSCI 303. Principles, Materials and Devices of Batteries. 3 Units.

Thermodynamics and electrochemistry for batteries. Emphasis on lithium ion batteries, but also different types including lead acid, nickel metal hydride, metal air, sodium sulfur and redox flow. Battery electrode materials, electrolytes, separators, additives and electrode-electrolyte interface. Electrochemical techniques; advanced battery materials with nanotechnology; battery device structure. Prerequisites: undergraduate chemistry.

MATSCI 307. Green's Function Methods in Engineering. 3 Units.

The concept of Green's Functions used to recast ordinary and partial dislocations as integral equations with built-in boundary conditions will be developed, including the inclusion of modified Green's Functions, where appropriate. Applications to the solutions of ODE's and elliptic, hyperbolic, and parabolic partial differential equations will be studied, including Laplace's equation, the wave and reduced wave equation, the diffusion/heat conduction equation, and the equations of motion of linear elastic theory. The course will be self-contained, so that a working knowledge of simple ODE's and the separation of variables method is the only prerequisite. Class notes will be provided.

Same as: ME 307.

MATSCI 311. Lasers in Materials Processing. 3 Units.

Principles of laser operation. Optically and electrically pumped lasers. Materials for solid-state lasers. Fundamentals of laser/materials interactions. Applications in thin film technology and microfabrication; laser annealing of defects and crystallization of amorphous films. Laser-induced shock waves. Extreme non-equilibrium laser processing; ultra-fast (femtosecond) lasers and their novel uses; micro- and nanofabrication of fluidic and photonic devices; intracellular nano-surgery.

MATSCI 312. New Methods in Thin Film Synthesis. 3 Units.

Materials base for engineering new classes of coatings and devices. Techniques to grow thin films at atomic scale and to fabricate multilayers/superlattices at nanoscale. Vacuum growth techniques including evaporation, molecular beam epitaxy (MBE), sputtering, ion beam assisted deposition, laser ablation, chemical vapor deposition (CVD), and electroplating. Future direction of material synthesis such as nanocluster deposition and nanoparticles self-assembly. Relationships between deposition parameters and film properties. Applications of thin film synthesis in microelectronics, nanotechnology, and biology. SCPD offering.

MATSCI 316. Nanoscale Science, Engineering, and Technology. 3 Units.

This course covers important aspects of nanotechnology in nanomaterials synthesis and fabrication, novel property at the nanoscale, tools and applications: a variety of nanostructures including nanocrystal, nanowire, carbon nanotube, graphene, nanoporous material, block copolymer, and self-assembled monolayer; nanofabrication techniques developed over the past 20 years; thermodynamic, electronic and optical property; applications in solar cells, batteries, biosensors and electronics. Other nanotechnology topics may be explored through a group project. SCPD offering.

MATSCI 320. Nanocharacterization of Materials. 3 Units.

Current methods of directly examining the microstructure of materials. Topics: optical microscopy, scanning electron and focused ion beam microscopy, field ion microscopy, transmission electron microscopy, scanning probe microscopy, and microanalytical surface science methods. Emphasis is on the electron-optical techniques. Recommended: 193/203.

MATSCI 321. Transmission Electron Microscopy. 3 Units.

Image formation and interpretation. The contrast phenomena associated with perfect and imperfect crystals from a physical point of view and from a formal treatment of electron diffraction theory. The importance of electron diffraction to systematic analysis and recent imaging developments. Recommended: 193/203, 195/205, or equivalent.

MATSCI 322. Transmission Electron Microscopy Laboratory. 3 Units.

Experimental application of electron microscopy to typical materials science studies. Topics include microscope operation and alignment, diffraction modes and analysis, bright-field/dark-field analysis of defects, high resolution imaging, and analytical techniques for compositional analysis (EDAX). Enrollment limited to 12. Prerequisites: 321, consent of instructor.

MATSCI 323. Thin Film and Interface Microanalysis. 3 Units.

The science and technology of microanalytical techniques, including Auger electron spectroscopy (AES), Rutherford backscattering spectroscopy (RBS), secondary ion mass spectroscopy (SIMS), ion scattering spectroscopy (ISS), and x-ray photoelectron spectroscopy (XPS or ESCA). Generic processes such as sputtering and high-vacuum generation. Prerequisite: some prior exposure to atomic and electronic structure of solids. SCPD offering.

MATSCI 326. X-Ray Science and Techniques. 3 Units.

X-ray interaction with matter; diffraction from ordered and disordered materials; x-ray absorption, photoemission, and coherent scattering; x-ray microscopy. Sources including synchrotrons, high harmonic generation, x-ray lasers. Time-resolved techniques and detector technology. Same as: PHOTON 326.

MATSCI 331. Atom-based computational methods for materials. 3 Units.

Introduction to atom-based computational methods for materials with emphasis on quantum methods. Topics include density functional theory, tight-binding and empirical approaches. Computation of optical, electronic, phonon properties. Bulk materials, interfaces, nanostructures. Molecular dynamics. Prerequisites - undergraduate quantum mechanics.

MATSCI 343. Organic Semiconductors for Electronics and Photonics. 3 Units.

The science of organic semiconductors and their use in electronic and photonic devices. Topics: methods for fabricating thin films and devices; relationship between chemical structure and molecular packing on properties such as band gap, charge carrier mobility and luminescence efficiency; doping; field-effect transistors; light-emitting diodes; lasers; biosensors; photodetectors and photovoltaic cells.

MATSCI 346. Nanophotonics. 3 Units.

Recent developments in micro- and nanophotonic materials and devices. Basic concepts of photonic crystals. Integrated photonic circuits. Photonic crystal fibers. Superprism effects. Optical properties of metallic nanostructures. Sub-wavelength phenomena and plasmonic excitations. Meta-materials. Prerequisite: Electromagnetic theory at the level of 242. Same as: EE 336.

MATSCI 347. Introduction to Magnetism and Magnetic Nanostructures. 3 Units.

Atomic origins of magnetic moments, magnetic exchange and ferromagnetism, types of magnetic order, magnetic anisotropy, domains, domain walls, hysteresis loops, hard and soft magnetic materials, demagnetization factors, and applications of magnetic materials, especially magnetic nanostructures and nanotechnology. Tools include finite-element and micromagnetic modeling. Design topics include electromagnet and permanent magnet, electronic article surveillance, magnetic inductors, bio-magnetic sensors, and magnetic drug delivery. Design projects, team work, and computer-aided design. Prerequisites: PHYSICS 29 and 43, or college-level electricity and magnetism.

MATSCI 353. Mechanical Properties of Thin Films. 3 Units.

The mechanical properties of thin films on substrates. The mechanics of thin films and of the atomic processes which cause stresses to develop during thin film growth. Experimental techniques for studying stresses in and mechanical properties of thin films. Elastic, plastic, and diffusional deformation of thin films on substrates as a function of temperature and microstructure. Effects of deformation and fracture on the processing of thin film materials. Prerequisite: 198/208.

MATSCI 358. Fracture and Fatigue of Materials and Thin Film Structures. 3 Units.

Linear-elastic and elastic-plastic fracture mechanics from a materials science perspective, emphasizing microstructure and the micromechanisms of fracture. Plane strain fracture toughness and resistance curve behavior. Mechanisms of failure associated with cohesion and adhesion in bulk materials, composites, and thin film structures. Fracture mechanics approaches to toughening and subcritical crack-growth processes, with examples and applications involving cyclic fatigue and environmentally assisted subcritical crack growth. Prerequisite: 151/251, 198/208, or equivalent. SCPD offering.

MATSCI 380. Nano-Biotechnology. 3 Units.

Literature based. Principles that make nanoscale materials unique, applications to biology, and how biological systems can create nanomaterials. Molecular sensing, drug delivery, bio-inspired synthesis, self-assembling systems, and nanomaterial based therapies. Interactions at the nanoscale. Applications and opportunities for new technology.

MATSCI 381. Biomaterials in Regenerative Medicine. 3 Units.

Materials design and engineering for regenerative medicine. How materials interact with cells through their micro- and nanostructure, mechanical properties, degradation characteristics, surface chemistry, and biochemistry. Examples include novel materials for drug and gene delivery, materials for stem cell proliferation and differentiation, and tissue engineering scaffolds. Prerequisites: undergraduate chemistry, and cell/molecular biology or biochemistry. Same as: BIOE 361.

MATSCI 382. Bio-chips, Imaging and Nanomedicine. 3 Units.

The course covers state-of-the-art and emerging bio-sensors, bio-chips, imaging modalities, and nano-therapies which will be studied in the context of human physiology including the nervous system, circulatory system and immune system. Medical diagnostics will be divided into bio-chips (in-vitro diagnostics) and medical and molecular imaging (in-vivo imaging). In-depth discussion on cancer and cardiovascular diseases and the role of diagnostics and nano-therapies.

Same as: EE 225, SBIO 225.

MATSCI 399. Graduate Independent Study. 1-10 Unit.

Under supervision of a faculty member.

MATSCI 400. Participation in Materials Science Teaching. 1-3 Unit.

May be repeated for credit.

MATSCI 801. TGR Project for MS Students. 0 Units.**MATSCI 802. TGR Dissertation for Ph.D Students. 0 Units.**

Mathematical & Computational Science Courses

Mathematics Courses

MATH 16. Mathematics and Statistics in the Real World. 3 Units.

This is an introductory quantitative literacy course, that offers an introduction to the mathematics (outside of calculus) used in real-world problems. Topics include: (a) Exponential functions, compound interest, population growth. (b) Geometric series, applications to mortgage payments, amortization of loans, present value of money, drug doses and blood levels. (c) First-order approximation, estimating areas and volumes. (d) Basic probability: Bayes's rule, false positives in disease detection and drug testing. (e) Basic descriptive statistics: mean, median, standard deviation f) Least squares and linear regression. Same as: STATS 90.

MATH 19. Calculus. 3 Units.

Introduction to differential calculus of functions of one variable. Topics: review of elementary functions including exponentials and logarithms, limits, rates of change, the derivative, and applications. Math 19, 20, and 21 cover the same material as Math 41 and 42, but in three quarters rather than two. Prerequisites: precalculus, including trigonometry, advanced algebra, and analysis of elementary functions.

MATH 20. Calculus. 3 Units.

Continuation of 19. Applications of differential calculus; introduction to integral calculus of functions of one variable, including: the definite integral, methods of symbolic and numerical integration, applications of the definite integral. Prerequisites: 19 or equivalent.

MATH 21. Calculus. 4 Units.

Continuation of 20. Applications of integral calculus, introduction to differential equations, infinite series. Prerequisite: 20 or equivalent.

MATH 41. Calculus. 5 Units.

Introduction to differential and integral calculus of functions of one variable. Topics: limits, rates of change, the derivative and applications, introduction to the definite integral and integration. Math 41 and 42 cover the same material as Math 19-20-21, but in two quarters rather than three. Prerequisites: trigonometry, advanced algebra, and analysis of elementary functions, including exponentials and logarithms. Same as: accelerated.

MATH 41A. Calculus ACE. 6 Units.

Students attend MATH 41 lectures with different recitation sessions, four hours instead of two, emphasizing engineering applications. Prerequisite: application; see <http://soe.stanford.edu/edp/programs/ace.html>.

MATH 42. Calculus. 5 Units.

Continuation of 41. Methods of symbolic and numerical integration, applications of the definite integral, introduction to differential equations, infinite series. Prerequisite: 41 or equivalent.

Same as: Accelerated.

MATH 42A. Calculus ACE. 6 Units.

Students attend MATH 42 lectures with different recitation sessions, four hours instead of two, emphasizing engineering applications. Prerequisite: application; see <http://soe.stanford.edu/edp/programs/ace.html>.

MATH 51. Linear Algebra and Differential Calculus of Several Variables. 5 Units.

Geometry and algebra of vectors, systems of linear equations, matrices and linear transformations, diagonalization and eigenvectors, vector valued functions and functions of several variables, parametric curves, partial derivatives and gradients, the derivative as a matrix, chain rule in several variables, constrained and unconstrained optimization. Prerequisite: 21, or 42, or a score of 4 on the BC Advanced Placement exam or 5 on the AB Advanced Placement exam, or consent of instructor.

MATH 51A. Linear Algebra and Differential Calculus of Several Variables, ACE. 6 Units.

Students attend MATH 51 lectures with different recitation sessions: four hours per week instead of two, emphasizing engineering applications. Prerequisite: application; see <http://soe.stanford.edu/edp/programs/ace.html>.

MATH 51H. Honors Multivariable Mathematics. 5 Units.

For prospective Mathematics majors in the honors program and students from other areas of science or engineering who have a strong mathematics background. Three quarter sequence covers the material of 51, 52, 53, and additional advanced calculus and ordinary and partial differential equations. Unified treatment of multivariable calculus, linear algebra, and differential equations with a different order of topics and emphasis from standard courses. Students should know one-variable calculus and have an interest in a theoretical approach to the subject. Prerequisite: score of 5 on BC Advanced Placement exam, or consent of instructor.

MATH 51M. Introduction to MATLAB for Multivariable Mathematics. 1 Unit.

Corequisite: MATH 51.

MATH 52. Integral Calculus of Several Variables. 5 Units.

Iterated integrals, line and surface integrals, vector analysis with applications to vector potentials and conservative vector fields, physical interpretations. Divergence theorem and the theorems of Green, Gauss, and Stokes. Prerequisite: 51 and 42 or equivalents.

MATH 52H. Honors Multivariable Mathematics. 5 Units.

Continuation of 51H. Prerequisite: 51H.

MATH 53. Ordinary Differential Equations with Linear Algebra. 5 Units.

Ordinary differential equations and initial value problems, systems of linear differential equations with constant coefficients, applications of second-order equations to oscillations, matrix exponentials, Laplace transforms, stability of non-linear systems and phase plane analysis, numerical methods. Prerequisite: 51 and 42 or equivalents.

MATH 53H. Honors Multivariable Mathematics. 5 Units.

Continuation of 52H. Prerequisite: 52H.

MATH 70SI. The Game of Go: Strategy, Theory, and History. 1 Unit.

Strategy and mathematical theories of the game of Go, with guest appearance by a professional Go player.

MATH 78SI. Speedcubing: History, Theory, and Practice. 1 Unit.

History of the Rubik's cube; the current cubing community; basic mathematical theory; concepts to improve speed solving skill. Prior ability to solve cube not required.

MATH 80Q. Capillary Surfaces: Explored and Unexplored Territory. 3 Units.

Preference to sophomores. Capillary surfaces: the interfaces between fluids that are adjacent to each other and do not mix. Recently discovered phenomena, predicted mathematically and subsequently confirmed by experiments, some done in space shuttles. Interested students may participate in ongoing investigations with affinity between mathematics and physics.

MATH 87Q. Mathematics of Knots, Braids, Links, and Tangles. 3 Units.

Preference to sophomores. Types of knots and how knots can be distinguished from one another by means of numerical or polynomial invariants. The geometry and algebra of braids, including their relationships to knots. Topology of surfaces. Brief summary of applications to biology, chemistry, and physics.

MATH 88Q. The Mathematics of the Rubik's Cube. 3 Units.

Preference to sophomores. Group theory through topics that can be illustrated with the Rubik's cube: subgroups, homomorphisms and quotient groups, the symmetric and alternating groups, conjugation, commutators, and Sylow subgroups.

MATH 100. Mathematics for Elementary School Teachers. 4 Units.

Mathematics and pedagogical strategies. Core mathematical content in grades K-6, classroom presentation, how to handle student errors, and mathematical issues that come up during instruction.

MATH 104. Applied Matrix Theory. 3 Units.

Linear algebra for applications in science and engineering: orthogonality, projections, the four fundamental subspaces of a matrix, spectral theory for symmetric matrices, the singular value decomposition, the QR decomposition, least-squares, the condition number of a matrix, algorithms for solving linear systems. Prerequisites: MATH 51 and MATH 52 or 53.

MATH 106. Functions of a Complex Variable. 3 Units.

Complex numbers, analytic functions, Cauchy-Riemann equations, complex integration, Cauchy integral formula, residues, elementary conformal mappings. Prerequisite: 52.

MATH 108. Introduction to Combinatorics and Its Applications. 3 Units.

Topics: graphs, trees (Cayley's Theorem, application to phylogeny), eigenvalues, basic enumeration (permutations, Stirling and Bell numbers), recurrences, generating functions, basic asymptotics. Prerequisites: 51 or equivalent.

MATH 109. Applied Group Theory. 3 Units.

Applications of the theory of groups. Topics: elements of group theory, groups of symmetries, matrix groups, group actions, and applications to combinatorics and computing. Applications: rotational symmetry groups, the study of the Platonic solids, crystallographic groups and their applications in chemistry and physics. WIM.

MATH 110. Applied Number Theory and Field Theory. 3 Units.

Number theory and its applications to modern cryptography. Topics: congruences, finite fields, primality testing and factorization, public key cryptography, error correcting codes, and elliptic curves, emphasizing algorithms. WIM.

MATH 111. Computational Commutative Algebra. 3 Units.

Introduction to the theory of commutative rings, ideals, and modules. Systems of polynomial equations in several variables from the algorithmic viewpoint. Groebner bases, Buchberger's algorithm, elimination theory. Applications to algebraic geometry and to geometric problems.

MATH 113. Linear Algebra and Matrix Theory. 3 Units.

Algebraic properties of matrices and their interpretation in geometric terms. The relationship between the algebraic and geometric points of view and matters fundamental to the study and solution of linear equations. Topics: linear equations, vector spaces, linear dependence, bases and coordinate systems; linear transformations and matrices; similarity; eigenvectors and eigenvalues; diagonalization.

MATH 115. Functions of a Real Variable. 3 Units.

The development of real analysis in Euclidean space: sequences and series, limits, continuous functions, derivatives, integrals. Basic point set topology. Honors math majors and students who intend to do graduate work in mathematics should take 171. Prerequisite: 51.

MATH 116. Complex Analysis. 3 Units.

Analytic functions, Cauchy integral formula, power series and Laurent series, calculus of residues and applications, conformal mapping, analytic continuation, introduction to Riemann surfaces, Fourier series and integrals. Prerequisites: 52, and 115 or 171.

MATH 118. Mathematics of Computation. 3 Units.

Notions of analysis and algorithms central to modern scientific computing: continuous and discrete Fourier expansions, the fast Fourier transform, orthogonal polynomials, interpolation, quadrature, numerical differentiation, analysis and discretization of initial-value and boundary-value ODE, finite and spectral elements. Prerequisites: MATH 51 and 53.

MATH 120. Groups and Rings. 3 Units.

Groups acting on sets, examples of finite groups, Sylow theorems, solvable and simple groups. Fields, rings, and ideals; polynomial rings over a field; PID and non-PID. Unique factorization domains. WIM.

MATH 121. Galois Theory. 3 Units.

Field of fractions, splitting fields, separability, finite fields. Galois groups, Galois correspondence, examples and applications. Prerequisite: Math 120 and (also recommended) 113.

MATH 122. Modules and Group Representations. 3 Units.

Modules over PID. Group representations and group rings. Tensor algebra over a field. Maschke's theorem and character theory. Character tables, construction of representations. Prerequisite: Math 120. Also recommended: 113.

MATH 131P. Partial Differential Equations I. 3 Units.

An introduction to PDE; particularly suitable for non-Math majors. Topics include physical examples of PDE's, method of characteristics, D'Alembert's formula, maximum principles, heat kernel, Duhamel's principle, separation of variables, Fourier series, Harmonic functions, Bessel functions, spherical harmonics. Students who have taken MATH 171 should consider taking MATH 173 rather than 131p. Prerequisite: 53.

MATH 132. Partial Differential Equations II. 3 Units.

Laplace's equation and properties of harmonic functions. Green's functions. Distributions and Fourier transforms. Eigenvalue problems and generalized Fourier series. Numerical solutions. Prerequisite: 131P.

MATH 136. Stochastic Processes. 3 Units.

Introduction to measure theory, L_p spaces and Hilbert spaces. Random variables, expectation, conditional expectation, conditional distribution. Uniform integrability, almost sure and L_p convergence. Stochastic processes: definition, stationarity, sample path continuity. Examples: random walk, Markov chains, Gaussian processes, Poisson processes, Martingales. Construction and basic properties of Brownian motion. Prerequisite: STATS 116 or MATH 151 or equivalent. Recommended: MATH 115 or equivalent. Same as: STATS 219.

MATH 137. Mathematical Methods of Classical Mechanics. 3 Units.

Newtonian mechanics. Lagrangian formalism. E. Noether's theorem. Oscillations. Rigid bodies. Introduction to symplectic geometry. Hamiltonian formalism. Legendre transform. Variational principles. Geometric optics. Introduction to the theory of integrable systems. Prerequisites: 51, 52, 53, or 51H, 52H, 53H.

MATH 138. Celestial Mechanics. 3 Units.

Mathematically rigorous introduction to the classical N-body problem: the motion of N particles evolving according to Newton's law. Topics include: the Kepler problem and its symmetries; other central force problems; conservation theorems; variational methods; Hamilton-Jacobi theory; the role of equilibrium points and stability; and symplectic methods. Prerequisites: 53, and 115 or 171.

MATH 143. Differential Geometry. 3 Units.

Geometry of curves and surfaces in three-space and higher dimensional manifolds. Parallel transport, curvature, and geodesics. Surfaces with constant curvature. Minimal surfaces.

MATH 144. Riemannian Geometry. 3 Units.

Smooth manifolds, tensor fields, geometry of Riemannian and Lorentz metrics, the Levi-Civita connection and curvature tensor, Ricci curvature, scalar curvature, and Einstein manifolds, spaces of constant curvature. Prerequisites: Math 51, 52, and 53.

MATH 145. Algebraic Geometry. 3 Units.

Hilbert's nullstellensatz, complex affine and projective curves, Bezout's theorem, the degree/genus formula, blow-up, Riemann-Roch theorem. Prerequisites: 120, and 121 or knowledge of fraction fields. Recommended: familiarity with surfaces equivalent to 143, 146, 147, or 148.

MATH 146. Analysis on Manifolds. 3 Units.

Differentiable manifolds, tangent space, submanifolds, implicit function theorem, differential forms, vector and tensor fields. Frobenius' theorem, DeRham theory. Prerequisite: 52 or 52H.

MATH 147. Differential Topology. 3 Units.

Smooth manifolds, transversality, Sard's theorem, embeddings, degree of a map, Borsuk-Ulam theorem, Hopf degree theorem, Jordan curve theorem. Prerequisite: 115 or 171.

MATH 148. Algebraic Topology. 3 Units.

Fundamental group, covering spaces, Euler characteristic, homology, classification of surfaces, knots. Prerequisite: 109 or 120.

MATH 149. Applied Algebraic Topology. 3 Units.

Introduction to algebraic topology and its applications, in particular persistent homology as a tool for shape and pattern recognition from high dimensional data sets, with examples analyzed using state-of-the-art software. Prerequisite: linear algebra.

MATH 151. Introduction to Probability Theory. 3 Units.

Counting; axioms of probability; conditioning and independence; expectation and variance; discrete and continuous random variables and distributions; joint distributions and dependence; central limit theorem and laws of large numbers. Prerequisite: 52 or consent of instructor.

MATH 152. Elementary Theory of Numbers. 3 Units.

Euclid's algorithm, fundamental theorems on divisibility; prime numbers; congruence of numbers; theorems of Fermat, Euler, Wilson; congruences of first and higher degrees; quadratic residues; introduction to the theory of binary quadratic forms; quadratic reciprocity; partitions.

MATH 154. Algebraic Number Theory. 3 Units.

Properties of number fields and Dedekind domains, quadratic and cyclotomic fields, applications to some classical Diophantine equations; introduction to elliptic curves. Prerequisites: 120 and 121, especially modules over principal ideal domains and Galois theory of finite fields.

MATH 155. Analytic Number Theory. 3 Units.

Topics in analytic number theory such as the distribution of prime numbers, the prime number theorem, twin primes and Goldbach's conjecture, the theory of quadratic forms, Dirichlet's class number formula, Dirichlet's theorem on primes in arithmetic progressions, and the fifteen theorem. Prerequisite: 152, or familiarity with the Euclidean algorithm, congruences, residue classes and reduced residue classes, primitive roots, and quadratic reciprocity.

MATH 159. Discrete Probabilistic Methods. 3 Units.

Modern discrete probabilistic methods suitable for analyzing discrete structures of the type arising in number theory, graph theory, combinatorics, computer science, information theory and molecular sequence analysis. Prerequisite: STATS 116/MATH 151 or equivalent.

MATH 161. Set Theory. 3 Units.

Informal and axiomatic set theory: sets, relations, functions, and set-theoretical operations. The Zermelo-Fraenkel axiom system and the special role of the axiom of choice and its various equivalents. Well-orderings and ordinal numbers; transfinite induction and transfinite recursion. Equinumerosity and cardinal numbers; Cantor's Alephs and cardinal arithmetic. Open problems in set theory. Prerequisite: students should be comfortable doing proofs.

MATH 162. Philosophy of Mathematics. 4 Units.

(Graduate students register for PHIL 262.) 20th-century approaches to the foundations and philosophy of mathematics. The background in mathematics, set theory, and logic. Schools and programs of logicism, predicativism, platonism, formalism, and constructivism. Readings from leading thinkers. Prerequisite: PHIL151 or consent of instructor. Same as: PHIL 162, PHIL 262.

MATH 163. The Greek Invention of Mathematics. 3-5 Units.

How was mathematics invented? A survey of the main creative ideas of ancient Greek mathematics. Among the issues explored are the axiomatic system of Euclid's Elements, the origins of the calculus in Greek measurements of solids and surfaces, and Archimedes' creation of mathematical physics. We will provide proofs of ancient theorems, and also learn how such theorems are even known today thanks to the recovery of ancient manuscripts.

MATH 171. Fundamental Concepts of Analysis. 3 Units.

Recommended for Mathematics majors and required of honors Mathematics majors. Similar to 115 but altered content and more theoretical orientation. Properties of Riemann integrals, continuous functions and convergence in metric spaces; compact metric spaces, basic point set topology. Prerequisite: 51H or 115 or consent of the instructor. WIM.

MATH 172. Lebesgue Integration and Fourier Analysis. 3 Units.

Similar to 205A, but for undergraduate Math majors and graduate students in other disciplines. Topics include Lebesgue measure on Euclidean space, Lebesgue integration, L^p spaces, the Fourier transform, the Hardy-Littlewood maximal function and Lebesgue differentiation. Prerequisite: 171 or consent of instructor.

MATH 173. Theory of Partial Differential Equations. 3 Units.

A rigorous introduction to PDE accessible to advanced undergraduates. Elliptic, parabolic, and hyperbolic equations in many space dimensions including basic properties of solutions such as maximum principles, causality, and conservation laws. Methods include the Fourier transform as well as more classical methods. The Lebesgue integral will be used throughout, but a summary of its properties will be provided to make the course accessible to students who have not had 172 or 205A. Prerequisite: 171 or equivalent.

MATH 174. Calculus of Variations. 3 Units.

An introductory course emphasizing the historical development of the theory, its connections to physics and mechanics, its independent mathematical interest, and its contacts with daily life experience. Applications to minimal surfaces and to capillary surface interfaces. Prerequisites: Math 171 or equivalent.

MATH 175. Elementary Functional Analysis. 3 Units.

Linear operators on Hilbert space. Spectral theory of compact operators; applications to integral equations. Elements of Banach space theory. Prerequisite: 115 or 171.

MATH 180. Introduction to Financial Mathematics. 3 Units.

Financial derivatives: contracts and options. Hedging and risk management. Arbitrage, interest rate, and discounted value. Geometric random walk and Brownian motion as models of risky assets. Initial boundary value problems for the heat and related partial differential equations. Self-financing replicating portfolio. Black-Scholes pricing of European options. Dividends. Implied volatility. Optimal stopping and American options. Prerequisite: 53. Corequisites: 131, 151 or STATS 116.

MATH 193. Polya Problem Solving Seminar. 1 Unit.

Topics in mathematics and problem solving strategies with an eye towards the Putnam Competition. Topics may include parity, the pigeonhole principle, number theory, recurrence, generating functions, and probability. Students present solutions to the class. Open to anyone with an interest in mathematics.

MATH 196. Undergraduate Colloquium. 1 Unit.

Weekly lectures by different experts on topics in pure and applied mathematics that go beyond the standard curriculum. May be repeated for credit for up to 3 units. Does not count toward the math major or minor.

MATH 197. Senior Honors Thesis. 1-6 Unit.

(Staff) May be repeated 3 times for a max of 9 units.

MATH 198. Practical Training. 1 Unit.

Only for students majoring in mathematics. Students obtain employment in a relevant industrial or research activity to enhance their professional experience. Students submit a concise report detailing work activities, problems worked on, and key results. May be repeated for credit up to 3 units. Prerequisite: qualified offer of employment and consent of advisor or instructor.

MATH 199. Independent Work. 1-3 Unit.

Undergraduates pursue a reading program; topics limited to those not in regular department course offerings. Credit can fulfill the elective requirement for math majors. Approval of Undergraduate Affairs Committee is required to use credit for honors majors area requirement.

MATH 205A. Real Analysis. 3 Units.

Basic measure theory and the theory of Lebesgue integration. Prerequisite: 171 or equivalent.

MATH 205B. Real Analysis. 3 Units.

Point set topology, basic functional analysis, Fourier series, and Fourier transform. Prerequisites: 171 and 205A or equivalent.

MATH 210A. Modern Algebra I. 3 Units.

Basic commutative ring and module theory, tensor algebra, homological constructions, linear and multilinear algebra, introduction to representation theory. Prerequisite: 122 or equivalent.

MATH 210B. Modern Algebra II. 3 Units.

Continuation of 210A. Topics in Galois theory, commutative algebra, and algebraic geometry. Prerequisites: 210A, and 121 or equivalent.

MATH 210C. Lie Theory. 3 Units.

Topics in Lie groups, Lie algebras, and/or representation theory. Prerequisite: math 210B. May be repeated for credit.

MATH 215A. Complex Analysis, Geometry, and Topology. 3 Units.

Analytic functions, complex integration, Cauchy's theorem, residue theorem, argument principle, conformal mappings, Riemann mapping theorem, Picard's theorem, elliptic functions, analytic continuation and Riemann surfaces.

MATH 215B. Complex Analysis, Geometry, and Topology. 3 Units.

Topics: fundamental group and covering spaces, homology, cohomology, products, basic homotopy theory, and applications. Prerequisites: 113, 120, and 171, or equivalent; 215A is not a prerequisite for 215B.

MATH 215C. Complex Analysis, Geometry, and Topology. 3 Units.

Differentiable manifolds, transversality, degree of a mapping, vector fields, intersection theory, and Poincare duality. Differential forms and the DeRham theorem. Prerequisite: 215B or equivalent.

MATH 216A. Introduction to Algebraic Geometry. 3 Units.

Algebraic curves, algebraic varieties, sheaves, cohomology, Riemann-Roch theorem. Classification of algebraic surfaces, moduli spaces, deformation theory and obstruction theory, the notion of schemes. May be repeated for credit. Prerequisites: 210ABC or equivalent.

MATH 216B. Introduction to Algebraic Geometry. 3 Units.

Continuation of 216A. May be repeated for credit.

MATH 216C. Introduction to Algebraic Geometry. 3 Units.

Continuation of 216B. May be repeated for credit.

MATH 217A. Differential Geometry. 3 Units.

Smooth manifolds and submanifolds, tensors and forms, Lie and exterior derivative, DeRham cohomology, distributions and the Frobenius theorem, vector bundles, connection theory, parallel transport and curvature, affine connections, geodesics and the exponential map, connections on the principal frame bundle. Prerequisite: 215C or equivalent.

MATH 220. Partial Differential Equations of Applied Mathematics. 3 Units.

First-order partial differential equations; method of characteristics; weak solutions; elliptic, parabolic, and hyperbolic equations; Fourier transform; Fourier series; and eigenvalue problems. Prerequisite: foundation in multivariable calculus and ordinary differential equations. Same as: CME 303.

MATH 221A. Mathematical Methods of Imaging. 3 Units.

Image denoising and deblurring with optimization and partial differential equations methods. Imaging functionals based on total variation and L-1 minimization. Fast algorithms and their implementation. Same as: CME 321A.

MATH 221B. Mathematical Methods of Imaging. 3 Units.

Array imaging using Kirchhoff migration and beamforming, resolution theory for broad and narrow band array imaging in homogeneous media, topics in high-frequency, variable background imaging with velocity estimation, interferometric imaging methods, the role of noise and inhomogeneities, and variational problems that arise in optimizing the performance of array imaging algorithms. Same as: CME 321B.

MATH 222. Computational Methods for Fronts, Interfaces, and Waves. 3 Units.

High-order methods for multidimensional systems of conservation laws and Hamilton-Jacobi equations (central schemes, discontinuous Galerkin methods, relaxation methods). Level set methods and fast marching methods. Computation of multi-valued solutions. Multi-scale analysis, including wavelet-based methods. Boundary schemes (perfectly matched layers). Examples from (but not limited to) geometrical optics, transport equations, reaction-diffusion equations, imaging, and signal processing.

MATH 224. Topics in Mathematical Biology. 3 Units.

Mathematical models for biological processes based on ordinary and partial differential equations. Topics: population and infectious diseases dynamics, biological oscillators, reaction diffusion models, biological waves, and pattern formation. Prerequisites: 53 and 131, or equivalents.

MATH 226. Numerical Solution of Partial Differential Equations. 3 Units.

Hyperbolic partial differential equations: stability, convergence and qualitative properties; nonlinear hyperbolic equations and systems; combined solution methods from elliptic, parabolic, and hyperbolic problems. Examples include: Burger's equation, Euler equations for compressible flow, Navier-Stokes equations for incompressible flow. Prerequisites: MATH 220A or CME 302. Same as: CME 306.

MATH 227. Partial Differential Equations and Diffusion Processes. 3 Units.

Parabolic and elliptic partial differential equations and their relation to diffusion processes. First order equations and optimal control. Emphasis is on applications to mathematical finance. Prerequisites: MATH 131 and MATH 136/STATS 219, or equivalents.

MATH 228. Stochastic Methods in Engineering. 3 Units.

Review of basic probability; Monte Carlo simulation; state space models and time series; parameter estimation, prediction, and filtering; Markov chains and processes; stochastic control; and stochastic differential equations. Examples from various engineering disciplines. Prerequisites: exposure to probability; background in real variables and analysis. Same as: CME 308.

MATH 230A. Theory of Probability. 2-4 Units.

Mathematical tools: sigma algebras, measure theory, connections between coin tossing and Lebesgue measure, basic convergence theorems. Probability: independence, Borel-Cantelli lemmas, almost sure and L_p convergence, weak and strong laws of large numbers. Large deviations. Weak convergence; central limit theorems; Poisson convergence; Stein's method. Prerequisites: 116, MATH 171. Same as: STATS 310A.

MATH 230B. Theory of Probability. 2-3 Units.

Conditional expectations, discrete time martingales, stopping times, uniform integrability, applications to 0-1 laws, Radon-Nikodym Theorem, ruin problems, etc. Other topics as time allows selected from (i) local limit theorems, (ii) renewal theory, (iii) discrete time Markov chains, (iv) random walk theory, (v) ergodic theory. Prerequisite: 310A or MATH 230A. Same as: STATS 310B.

MATH 230C. Theory of Probability. 2-4 Units.

Continuous time stochastic processes: martingales, Brownian motion, stationary independent increments, Markov jump processes and Gaussian processes. Invariance principle, random walks, LIL and functional CLT. Markov and strong Markov property. Infinitely divisible laws. Some ergodic theory. Prerequisite: 310B or MATH 230B. Same as: STATS 310C.

MATH 231A. An Introduction to Random Matrix Theory. 3 Units.

Patterns in the eigenvalue distribution of typical large matrices, which also show up in physics (energy distribution in scattering experiments), combinatorics (length of longest increasing subsequence), first passage percolation and number theory (zeros of the zeta function). Classical compact ensembles (random orthogonal matrices). The tools of determinantal point processes. Same as: STATS 351A.

MATH 231C. Free Probability. 3 Units.

Background from operator theory, addition and multiplication theorems for operators, spectral properties of infinite-dimensional operators, the free additive and multiplicative convolutions of probability measures and their classical counterparts, asymptotic freeness of large random matrices, and free entropy and free dimension. Prerequisite: STATS 310B or equivalent.

MATH 232. Topics in Probability: Percolation Theory. 3 Units.

An introduction to some of the most important theorems and open problems in percolation theory. Topics include some of the difficult early breakthroughs of Kesten, Menshikov, Aizenman and others, and recent fields-medal winning works of Schramm, Lawler, Werner and Smirnov. Prerequisites: graduate-level probability.

MATH 233. Probabilistic Methods in Analysis. 3 Units.

Proofs and constructions in analysis obtained from basic results in Probability Theory and a 'probabilistic way of thinking.' Topics: Rademacher functions, Gaussian processes, entropy.

MATH 234. Large Deviations Theory. 3 Units.

Combinatorial estimates and the method of types. Large deviation probabilities for partial sums and for empirical distributions, Cramer's and Sanov's theorems and their Markov extensions. Applications in statistics, information theory, and statistical mechanics. Prerequisite: MATH 230A or STATS 310. Same as: STATS 374.

MATH 236. Introduction to Stochastic Differential Equations. 3 Units.
Brownian motion, stochastic integrals, and diffusions as solutions of stochastic differential equations. Functionals of diffusions and their connection with partial differential equations. Random walk approximation of diffusions. Prerequisite: 136 or equivalent and differential equations.

MATH 238. Mathematical Finance. 3 Units.
Stochastic models of financial markets. Forward and futures contracts. European options and equivalent martingale measures. Hedging strategies and management of risk. Term structure models and interest rate derivatives. Optimal stopping and American options. Corequisites: MATH 236 and 227 or equivalent.
Same as: STATS 250.

MATH 239. Computation and Simulation in Finance. 3 Units.
Monte Carlo, finite difference, tree, and transform methods for the numerical solution of partial differential equations in finance. Emphasis is on derivative security pricing. Prerequisite: 238 or equivalent.

MATH 243. Functions of Several Complex Variables. 3 Units.

MATH 244. Riemann Surfaces. 3 Units.
Compact Riemann surfaces and algebraic curves; cohomology of sheaves; Serre duality; Riemann-Roch theorem and application; Jacobians; Abel's theorem. May be repeated for credit.

MATH 245A. Topics in Algebraic Geometry: Moduli Theory. 3 Units.
Topics in the study of moduli spaces: Basic of algebraic surfaces, Hodge structure of surfaces, moduli of K3 surfaces, cycles and rational curves in K3 surfaces, Torelli for K3 surfaces.

MATH 245B. Topics in Algebraic Geometry: Intersection Theory. 3 Units.
Topics such as intersection theory on surfaces, toric varieties, and homogeneous spaces; numerical criteria for positivity; Chow groups and rings. May be repeated for credit.

MATH 245C. Topics in Algebraic Geometry: Alterations. 3 Units.

MATH 247. Topics in Group Theory. 3 Units.
Topics include the Burnside basis theorem, classification of p -groups, regular and powerful groups, Sylow theorems, the Frattini argument, nilpotent groups, solvable groups, theorems of P. Hall, group cohomology, and the Schur-Zassenhaus theorem. The classical groups and introduction to the classification of finite simple groups and its applications. May be repeated for credit.

MATH 248. Ergodic Theory and Szemerédi's Theorem. 3 Units.
An introduction to ergodic theory leading to (and proving) Szemerédi's theorem and its multidimensional extension. Prerequisite: 205a and some knowledge of Hilbert spaces.

MATH 248A. Algebraic Number Theory. 3 Units.
Structure theory and Galois theory of local and global fields, finiteness theorems for class numbers and units, adelic techniques. Prerequisites: MATH 210A,B.

MATH 249A. Topics in number theory. 3 Units.

MATH 249B. Topics in Number Theory. 3 Units.

MATH 249C. Topics in Number Theory. 3 Units.

MATH 252. Algebraic Groups. 3 Units.
Smooth affine groups over general fields, quotients, tori, solvable groups, reductive groups, root systems, Existence and Isomorphism theorem, structure theory. If time permits, classification theory over interesting fields. Prerequisites: 210A, 210B, and familiarity with algebraic varieties over general fields.

MATH 254. Geometric Methods in the Theory of Ordinary Differential Equations. 3 Units.
Topics may include: structural stability and perturbation theory of dynamical systems; hyperbolic theory; first order PDE; normal forms, bifurcation theory; Hamiltonian systems, their geometry and applications. May be repeated for credit.

MATH 256A. Partial Differential Equations. 3 Units.
The theory of linear and nonlinear partial differential equations, beginning with linear theory involving use of Fourier transform and Sobolev spaces. Topics: Schauder and L^2 estimates for elliptic and parabolic equations; De Giorgi-Nash-Moser theory for elliptic equations; nonlinear equations such as the minimal surface equation, geometric flow problems, and nonlinear hyperbolic equations.

MATH 256B. Partial Differential Equations. 3 Units.
Continuation of 256A.

MATH 257A. Symplectic Geometry and Topology. 3 Units.
Linear symplectic geometry and linear Hamiltonian systems. Symplectic manifolds and their Lagrangian submanifolds, local properties. Symplectic geometry and mechanics. Contact geometry and contact manifolds. Relations between symplectic and contact manifolds. Hamiltonian systems with symmetries. Momentum map and its properties. May be repeated for credit.

MATH 257B. Symplectic Geometry and Topology. 3 Units.
Continuation of 257A. May be repeated for credit.

MATH 257C. Symplectic Geometry and Topology. 3 Units.
Continuation of 257B. May be repeated for credit.

MATH 258. Topics in Geometric Analysis. 3 Units.
May be repeated for credit.

MATH 259. mirror symmetry. 3 Units.

MATH 261A. Functional Analysis. 3 Units.
Geometry of linear topological spaces. Linear operators and functionals. Spectral theory. Calculus for vector-valued functions. Operational calculus. Banach algebras. Special topics in functional analysis. May be repeated for credit.

MATH 262. Applied Fourier Analysis and Elements of Modern Signal Processing. 3 Units.
Introduction to the mathematics of the Fourier transform and how it arises in a number of imaging problems. Mathematical topics include the Fourier transform, the Plancherel theorem, Fourier series, the Shannon sampling theorem, the discrete Fourier transform, and the spectral representation of stationary stochastic processes. Computational topics include fast Fourier transforms (FFT) and nonuniform FFTs. Applications include Fourier imaging (the theory of diffraction, computed tomography, and magnetic resonance imaging) and the theory of compressive sensing.

MATH 263A. Infinite-dimensional Lie Algebras. 3 Units.
Basics of Kac-Moody Lie algebras, which include both finite dimensional semisimple Lie algebras and their infinite-dimensional analogs, up to the Kac-Weyl character formula and Macdonald identities, and the Boson-Fermion correspondence. May be repeated for credit. Prerequisite: 210 or equivalent.

MATH 264. Infinite Dimensional Lie Algebra. 3 Units.

MATH 266. Computational Signal Processing and Wavelets. 3 Units.
Theoretical and computational aspects of signal processing. Topics: time-frequency transforms; wavelet bases and wavelet packets; linear and nonlinear multiresolution approximations; estimation and restoration of signals; signal compression. May be repeated for credit.

MATH 269. Topics in symplectic geometry. 3 Units.
May be repeated for credit.

MATH 270. Geometry and Topology of Complex Manifolds. 3 Units.
Complex manifolds, Kahler manifolds, curvature, Hodge theory, Lefschetz theorem, Kahler-Einstein equation, Hermitian-Einstein equations, deformation of complex structures. May be repeated for credit.

MATH 271. The H-Principle. 3 Units.

The language of jets. Thom transversality theorem. Holonomic approximation theorem. Applications: immersion theory and its generalizations. Differential relations and Gromov's h-principle for open manifolds. Applications to symplectic geometry. Microflexibility. Mappings with simple singularities and their applications. Method of convex integration. Nash-Kuiper C^1 -isometric embedding theorem.

MATH 272. Topics in Partial Differential Equations. 3 Units.**MATH 273A. Quantum Mechanics I. 3 Units.****MATH 273B. QUANTUM MECHANICS II. 3 Units.****MATH 280. Evolution Equations in Differential Geometry. 3 Units.****MATH 282A. Low Dimensional Topology. 3 Units.**

The theory of surfaces and 3-manifolds. Curves on surfaces, the classification of diffeomorphisms of surfaces, and Teichmüller space. The mapping class group and the braid group. Knot theory, including knot invariants. Decomposition of 3-manifolds: triangulations, Heegaard splittings, Dehn surgery. Loop theorem, sphere theorem, incompressible surfaces. Geometric structures, particularly hyperbolic structures on surfaces and 3-manifolds. May be repeated for credit up to 6 total units.

MATH 282B. Homotopy Theory. 3 Units.

Homotopy groups, fibrations, spectral sequences, simplicial methods, Dold-Thom theorem, models for loop spaces, homotopy limits and colimits, stable homotopy theory. May be repeated for credit up to 6 total units.

MATH 282C. Fiber Bundles and Cobordism. 3 Units.

Possible topics: principal bundles, vector bundles, classifying spaces. Connections on bundles, curvature. Topology of gauge groups and gauge equivalence classes of connections. Characteristic classes and K-theory, including Bott periodicity, algebraic K-theory, and indices of elliptic operators. Spectral sequences of Atiyah-Hirzebruch, Serre, and Adams. Cobordism theory, Pontryagin-Thom theorem, calculation of unoriented and complex cobordism. May be repeated for credit up to 6 total units.

MATH 283. Topics in Algebraic and Geometric Topology. 3 Units.

May be repeated for credit.

MATH 283A. Topics in Topology. 3 Units.**MATH 284. Topics in Geometric Topology. 3 Units.**

Incompressible surfaces, irreducible manifolds, prime decomposition, Morse theory, Heegaard diagrams, Heegaard splittings, the Thurston norm, sutured manifold theory, Heegaard Floer homology, sutured Floer homology.

MATH 284A. Geometry and Topology in Dimension 3. 3 Units.

The Poincaré conjecture and the uniformization of 3-manifolds. May be repeated for credit.

MATH 284B. Geometry and Topology in Dimension 3. 3 Units.

The Poincaré conjecture and the uniformization of 3-manifolds. May be repeated for credit.

MATH 286. Topics in Differential Geometry. 3 Units.

May be repeated for credit.

MATH 287. Introduction to optimal transportation. 3 Units.

This will be an introductory course on Optimal Transportation theory. We will study Monge's problem, Kantorovich's problem, c -concave functions (also in the Riemannian setting), Wasserstein distance and geodesics (including a PDE formulation), applications to inequalities in convex analysis, as well as other topics, time permitting.

MATH 290B. Model Theory B. 1-3 Unit.

Decidable theories. Model-theoretic background. Dense linear orders, arithmetic of addition, real closed and algebraically closed fields, o-minimal theories.

Same as: PHIL 350B.

MATH 292A. Set Theory. 3 Units.

The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL151 and MATH 161, or equivalents. Same as: PHIL 352A.

MATH 293A. Proof Theory. 3 Units.

Gentzen's natural deduction and sequential calculi for first-order propositional and predicate logics. Normalization and cut-elimination procedures. Relationships with computational lambda calculi and automated deduction. Prerequisites: 151, 152, and 161, or equivalents. Same as: PHIL 353A.

MATH 295. Computation and Algorithms in Mathematics. 3 Units.

Use of computer and algorithmic techniques in various areas of mathematics. Computational experiments. Topics may include polynomial manipulation, Groebner bases, computational geometry, and randomness. May be repeated for credit.

MATH 301. Advanced Topics in Convex Optimization. 3 Units.

Modern developments in convex optimization: semidefinite programming; novel and efficient first-order algorithms for smooth and nonsmooth convex optimization. Emphasis on numerical methods suitable for large scale problems arising in science and engineering. Prerequisites: convex optimization (EE 364), linear algebra (Math 104), numerical linear algebra (CME 302); background in probability, statistics, real analysis and numerical optimization.

MATH 310. Top Ten Algorithms of the 20th Century. 3 Units.

A high-level survey course covering one algorithm per week: metropolis, simplex method, conjugate gradient, QR, quicksort, fast fourier transform, maxcut, fast multipole method, integer relation detection, and convex/semi-definite programming. Same as: CME 329.

MATH 355. Graduate Teaching Seminar. 1 Unit.

Required of and limited to first-year Mathematics graduate students.

MATH 360. Advanced Reading and Research. 1-10 Unit.

MATH 361. Research Seminar Participation. 1-3 Unit.
Participation in a faculty-led seminar which has no specific course number.

MATH 381. Seminar in Analysis. 1-3 Unit.**MATH 382. Qualifying Examination Seminar. 1-3 Unit.****MATH 384. Seminar in Geometry. 1 Unit.****MATH 385. Seminar in Topology. 1-3 Unit.****MATH 388. Seminar in Probability and Stochastic Processes. 1-3 Unit.****MATH 389. Seminar in Mathematical Biology. 1-3 Unit.****MATH 391. Research Seminar in Logic and the Foundations of Mathematics. 1-3 Unit.**

Contemporary work. May be repeated a total of three times for credit. Math 391 students attend the logic colloquium in 380-381T. Same as: PHIL 391.

MATH 394. Classics in Analysis. 3 Units.

Original papers in analysis.

MATH 395. Classics in Geometry and Topology. 3 Units.

Original papers in geometry and in algebraic and geometric topology. May be repeated for credit.

MATH 396. Graduate Progress. 1 Unit.

Results and current research of graduate and postdoctoral students. May be repeated for credit.

MATH 802. TGR Dissertation. 0 Units.

Mechanical Engineering Courses

ME 10AX. Design Thinking and the Art of Innovation. 2 Units.

This seminar will introduce students to techniques that designers use to create highly innovative solutions to wicked problems that cross domains. The project-based class will emphasize approaches to problem identification and problem solving. Along with a survey of tools such as need finding, structured brainstorming, synthesis, rapid prototyping, and visual communication, the class will include field trips to a local design firm, a robotics lab, and a prototyping lab. A secondary goal of the seminar is to introduce students to the pleasures of creative design and hands-on development of tangible solutions. Design has a unique approach to looking at both the problem domain and the solution domain in issues where technology, social issues, human behavior, and business needs overlap.

ME 10N. Form and Function of Animal Skeletons. 3 Units.

Preference to freshmen. The biomechanics and mechanobiology of the musculoskeletal system in human beings and other vertebrates on the level of the whole organism, organ systems, tissues, and cell biology. Field trips to labs.

Same as: BIOE 10N.

ME 11SC. The Art and Science of Measuring Fluid Flows. 2 Units.

The roles of fluid flows in natural systems such as swimming protozoa and planet-forming nebulae, and technologies such as biomolecular assay devices and jet engines. The analytical background for fluid sciences. Phenomena such as shock waves and vortex formation that create flow patterns while challenging engineers. Visualization and measurement techniques to obtain full-field flow pattern information. The physics behind these technologies. Field trips; lab work. (Eaton).

ME 12N. The Jet Engine. 3 Units.

Preference to freshmen. How a jet engine works; the technologies and analytical techniques required to understand them. Dynamics, thermodynamics, turbomachinery, combustion, advanced materials, cooling technologies, and control systems. Visits to research laboratories, examination of a partially disassembled engine, and probable operation of a small jet engine. Prerequisites: high school physics.

ME 12SC. Hands-on Jet Engines. 2 Units.

How jet engines transformed the world through intercontinental travel causing internationalization in daily life. Competition driving improvements in fuel economy, engine lifetime, noise, and emissions.

ME 14N. How Stuff Is Made. 3 Units.

The design and engineering of products and processes, such as machining, fabric, food, and electrical goods. Tradeoffs in choice of materials, features, and process selection. Final project: students research and redesign the engineering and manufacturing aspects of a product and its processes with an eye toward sustainability. Includes several field trips to manufacturing facilities.

ME 15. Pre-field Course for Alternative Spring Break: Design for a Sustainable World. 1 Unit.

Preparation for Alternative Spring Break trip Design for a Sustainable World: Using the design method to create human-centered solutions to address the challenges of global poverty and sustainability. Limited to students participating in the Alternative Spring Break program. See <http://asb.stanford.edu> for more information.

ME 16. Alternative Spring Break - From Classroom to Community: Science Education and Environmental Literacy. 1 Unit.

This Alternative Spring Break course and trip will examine K-12 science education in California. Though centered in the San Francisco Bay Area, we will be exploring different institutions throughout the state - schools, science museums, non-profit organizations - and their current contributions to the education of California's youth in STEM (Science, Technology, Engineering, Mathematics) fields. These institutions will help us explore the interaction between in-school and out-of-school learning, and the benefits of each. We will particularly focus on disparities (socioeconomic, regional, etc.) present in Californian science education, discussing their effects and how they can be remedied. The trip will involve conversations with teachers, students, and other professional educators centered around improvement to the current science education system in California. All told, we hope to explore the best methods for developing lasting interest and aptitude for science in California students to promote a brighter future.

ME 16N. The Science of Flames. 3 Units.

Preference to freshmen. The roles that chemistry and fluid dynamics play in governing the behaviors of flames. Emphasis is on factors that affect flame microstructure, external appearance, and on the fundamental physical and chemical processes that cause flames and fires to propagate. Topics: history, thermodynamics, and pollutant formation in flames. Trips to labs where flames are studied. Prerequisites: high school physics.

ME 17N. Robotics Imitating Nature. 3 Units.

Preference to freshmen. The dream of constructing robots that duplicate the functional abilities of humans and/or other animals has been promulgated primarily by science fiction writers. But biological systems provide models for the designers of robots. Building electromechanical devices that perform locomotory and sensing functions similar to those of an animal as a way of learning about how biological systems function. Walking and running machines, and the problem of giving a robot the capability to respond to its environment.

ME 18Q. Teamology: Creative Teams and Individual Development. 3 Units.

Preference to sophomores. Roles on a problem solving team that best suit individual creative characteristics. Two teams are formed for teaching experientially how to develop less conscious abilities from teammates creative in those roles. Reinforcement teams have members with similar personalities; problem solving teams are composed of people with maximally different personalities.

ME 19. Pre-field Course for Alternative Spring Break: Design for Social Change. 1 Unit.

Focus is on applying design, technology and innovation to catalyze social change. Topics include identifying social needs, learning different brainstorming methods, developing an applicable service model or product, prototyping, implementation, and reiteration. Reading and service components, followed by week-long Alternative Spring Break trip. See <http://d4sc.blogspot.com>. Enrollment limited to 12. May be repeated for credit.

ME 20N. Haptics: Engineering Touch. 3 Units.

Students in this class will learn how to build, program, and control haptic devices, which are mechatronic devices that allow users to feel virtual or remote environments. In the process, students will gain an appreciation for the capabilities and limitations of human touch, develop an intuitive connection between equations that describe physical interactions and how they feel, and gain practical interdisciplinary engineering skills related to robotics, mechanical engineering, electrical engineering, bioengineering, and computer science. In-class laboratories will give students hands-on experience in assembling mechanical systems, making circuits, programming Arduino microcontrollers, testing their haptic creations, and using Stanford's student prototyping facilities. The final project for this class will involve creating a novel haptic device that could be used to enhance human interaction with computers, mobile devices, or remote-controlled robots.

ME 21N. Renaissance Machine Design. 3 Units.

Preference to freshmen. Technological innovations of the 1400s that accompanied the proliferation of monumental art and architecture by Brunelleschi, da Vinci, and others who designed machines and invented novel construction, fresco, and bronze-casting techniques. The social and political climate, from the perspective of a machine designer, that made possible and demanded engineering expertise from prominent artists. Hands-on projects to provide a physical understanding of Renaissance-era engineering challenges and introduce the pleasure of creative engineering design. Technical background not required.

ME 23Q. The Worldly Engineer. 3 Units.

Preference given to sophomores. Engineering, its practice and products placed in multi-disciplinary context. Topics include the history of the engineering profession and engineering education; cultural influences on design; the role of national and international public policy and economics; dependence on natural resources; environmental impact; contemporary workforce development. Emphasis is on cultivating an appreciation of these issues to enrich the educational and professional pursuit of engineering.

ME 24N. Designing the Car of the Future. 3 Units.

Preference to freshmen. Automotive design drawing from all areas of mechanical engineering. The state of the art in automotive design and the engineering principles to understand vehicle performance. Future technologies for vehicles. Topics include vehicle emissions and fuel consumption, possibilities of hydrogen, drive-by-wire systems, active safety and collision avoidance, and human-machine interface issues.

ME 25N. Energy Sustainability and Climate Change. 3 Units.

One of the primary global challenges of the 21st century is providing the energy required to meet increasing demands due to population growth and economic development. A related challenge is mitigation of the effect of this energy growth on climate. This seminar will examine various scenarios for the energy resources required to meet future demand and the potential consequences on climate. The scientific issues underlying climate change and the coupling of energy use with changes in the global atmosphere that impact climate will be discussed.

ME 26N. Think Like a Designer. 3 Units.

Introduces students to techniques designers use to create highly innovative solutions across domains. The project-based class will emphasize approaches to problem identification and problem solving. Topics include need-finding, structured brainstorming, synthesis, rapid prototyping, and visual communication; field trips to a local design firm, a robotics lab, and a machining lab. A secondary goal of the seminar is to introduce students to the pleasures of creative design and hands-on development of tangible solutions.

ME 27SI. Needfinding for Underserved Populations. 2 Units.

The heart of any design process resides in empathy with users and their needs. Working in the realm of public service may engage a population to which the designer might not have been exposed. How different needfinding techniques can help designers to understand users from underserved populations and inspire them to create products and services that serve user needs.

ME 28SI. Professional Design Practices. 1 Unit.

Lab. Professional skills are developed through web-based portfolio and resume building. Additionally, visits to local design consulting firms and in house design groups will help solidify students understanding of the designer in the professional workplace. May be repeated for credit.

ME 29D. Design for Diversity: Collaboration by difference in digital age. 2 Units.

The focus of this course is on applying design, technology, and social innovation to create an environment that fosters collaboration by difference. Students will learn how in a digital age their identities amplify and create unique opportunities for them to bring about social change. They will learn resocializing skills through somatic literacy to understand the other's point of view. By the end of the quarter they will demonstrate literacy in collaboration by difference and use design thinking tools to prototype a collaboratorium, a portable structure and process to create an appreciation of voice and value to be effective global leaders.

ME 29SI. Cars: A Crash Course. 1 Unit.

Focus is on the basic mechanics and significance of cars. Topics include a basic, real-world understanding of automobile workings, histories, industries, cultural impact, and related media. Field trips to Tesla Motors and Go-Kart Racer will be organized, and there will be guest appearances by local automotive historians and enthusiasts. Students will get hands on experience with maintaining real cars, see high performance engines run, and have the opportunity to learn how to drive a manual transmission.

ME 70. Introductory Fluids Engineering. 4 Units.

Elements of fluid mechanics as applied to engineering problems. Equations of motion for incompressible ideal flow. Hydrostatics. Control volume laws for mass, momentum, and energy. Bernoulli equation. Dimensional analysis and similarity. Flow in ducts. Boundary layer flows. Lift and drag. Lab experiment demonstrations. Prerequisites: ENGR 14 and 30.

ME 80. Mechanics of Materials. 4 Units.

Mechanics of materials and deformation of structural members. Topics include stress and deformation analysis under axial loading, torsion and bending, column buckling and pressure vessels. Introduction to stress transformation and multiaxial loading. Prerequisite: ENGR 14.

ME 101. Visual Thinking. 4 Units.

Lecture/lab. Visual thinking and language skills are developed and exercised in the context of solving design problems. Exercises for the mind's eye. Rapid visualization and prototyping with emphasis on fluent and flexible idea production. The relationship between visual thinking and the creative process. Enrollment limited to 60.

ME 103D. Engineering Drawing and Design. 1 Unit.

Designed to accompany 203. The fundamentals of engineering drawing including orthographic projection, dimensioning, sectioning, exploded and auxiliary views, assembly drawings, and SolidWorks. Homework drawings are of parts fabricated by the student in the lab. Assignments in 203 supported by material in 103D and sequenced on the assumption that the student is enrolled in both courses simultaneously.

ME 103Q. Product Realization: Making is Thinking. 3 Units.

Product Realization? encompasses those processes required to transform a concept into the creation of a functional, useful, and beautiful product. In this project-based seminar, students develop product realization confidence and intuition using the rich array of tools available in the Product Realization Lab as well as industry-standard design engineering software programs and course readings in design/realization philosophy. Students develop a portfolio of products including soft goods, composite utensils, wearable electronics, mechatronics devices, and a final project of their own choosing. Interactions with the Stanford design engineering community as well as field trips to iconic Bay area design engineering firms round out students' experience. Learning Goals - Build confidence in transforming concepts into products through foundational texts and rigorous exercises - Master integrated design/realization software and tools through hands-on learning and practice - Engage with the Stanford design engineering community on campus and well beyond.

ME 104. The Designer's Voice. 1 Unit.

Course helps students develop a point of view about their design career that will enable them to articulate their design vision, inspire a design studio, or infect a business with a culture of design-thinking. Focus on the integration of work and worldview, professional values, design language, and the development of the designer's voice. Includes seminar-style discussions, role-playing, short writing assignments, guest speakers, and individual mentoring and coaching. Participants will be required to keep a journal.

ME 104B. Designing Your Life. 2 Units.

The course employs a design thinking approach to help students develop a point of view about their career. The course focuses on an introduction to design thinking, the integration of work and worldview, and practices that support vocation formation. Includes seminar-style discussions, role-playing, short writing assignments, guest speakers, and individual mentoring and coaching. Open to juniors and seniors of all majors. Admission to be confirmed by email to Axxess registered students prior to first class session. More information at <http://www.designingyourlife.org>. Effective Autumn 2012, course is no longer repeatable for credit.

ME 104S. Designing Your Stanford. 2 Units.

DYS uses a Design Thinking approach to help Freshmen and Sophomores learn practical tools and ideas to make the most of their Stanford experience. Topics include the purpose of college, major selection, educational wayfinding, and innovating college outcomes - all applied through an introduction to Design Thinking. This seminar class incorporates small group discussion, in-class activities, field exercises, personal reflection, and individual coaching. More information at www.designingyourstanford.org.

ME 110. Design Sketching. 1 Unit.

Freehand sketching, rendering, and design development. Students develop a design sketching portfolio for review by program faculty. May be repeated for credit.

ME 112. Mechanical Systems Design. 4 Units.

Lecture/lab. Characteristics of machine elements including gears, bearings, and shafts. Design for fatigue life. Electric motor fundamentals. Transmission design for maximizing output power or efficiency. Mechanism types, linkage analysis and kinematic synthesis. Team-based design projects emphasizing the balance of physical with virtual prototyping based on engineering analysis. Lab for dissection of mechanical systems and project design reviews. Prerequisites: 80, 101. Recommended: 203, ENGR 15.

ME 113. Mechanical Engineering Design. 4 Units.

Capstone course. Mechanical engineering design is experienced by students as they work on team projects obtained from industry or other organizations. Prerequisites: 80,101,112, 203. Enrollment priority to ME majors.

ME 115A. Introduction to Human Values in Design. 3 Units.

Lecture/lab. Introduces the central philosophy of the product design program, emphasizing the relation between technical and human values, the innovation process, and design methodology. Lab exercises include development of simple product concepts visualized in rapidly executed three-dimensional mockups. Prerequisite: 101.

ME 115B. Product Design Methods. 3 Units.

Problem-finding, problem-solving, intermediate creativity methods and effective techniques for researching and presenting product concepts. Individual- and team-based design projects emphasizing advanced visual thinking and prototyping skills. Prerequisite: ME115A.

ME 115C. Design and Business Factors. 3 Units.

Design and Business Factors: Introduces business concepts critical to determining the success of new products and services. Students will learn to estimate the cost of R&D for new product development. Using financial analysis, ROI, and tollgates to reduce development risk will be explored using case studies and simulations. Students will develop a bill of materials and a profit and loss statement for a sample product concept, prototype a design consultancy, and create a business proposal for a proposed new product company.

ME 120. History and Philosophy of Design. 3 Units.

Major schools of 19th- and 20th-century design (Arts and Crafts movement, Bauhaus, Industrial Design, and postmodernism) are analyzed in terms of their continuing cultural relevance. The relation of design to art, technology, and politics; readings from principal theorists, practitioners, and critics; recent controversies in industrial and graphic design, architecture, and urbanism. Enrollment limited to 65.

ME 131A. Heat Transfer. 3-5 Units.

The principles of heat transfer by conduction, convection, and radiation with examples from the engineering of practical devices and systems. Topics include transient and steady conduction, conduction by extended surfaces, boundary layer theory for forced and natural convection, boiling, heat exchangers, and graybody radiative exchange. Prerequisites: 70, ENGR 30. Recommended: intermediate calculus, ordinary differential equations.

ME 131B. Fluid Mechanics: Compressible Flow and Turbomachinery. 4 Units.

Engineering applications involving compressible flow: aircraft and rocket propulsion, power generation; application of mass, momentum, energy and entropy balance to compressible flows; variable area isentropic flow, normal shock waves, adiabatic flow with friction, flow with heat addition. Operation of flow systems: the propulsion system. Turbomachinery: pumps, compressors, turbines. Angular momentum analysis of turbomachine performance, centrifugal and axial flow machines, effect of blade geometry, dimensionless performance of turbomachines; hydraulic turbines; steam turbines; wind turbines. Compressible flow turbomachinery: the aircraft engine. Prerequisites: 70, ENGR 30.

ME 139. Educating Young STEM Thinkers. 3-5 Units.

The course will introduce students to the design thinking process, the national conversations about the future of STEM careers, and provide opportunities to work with middle school students and K-12 teachers in STEM-based after-school activities and intercession camps. The course will be both theory and practice focused. The purpose is twofold; to provide reflection and mentoring opportunities for students to learn about pathways to STEM careers and to introduce mentoring opportunities with young STEM thinkers. Same as: EDUC 139X, EDUC 239X, ME 231.

ME 140. Advanced Thermal Systems. 5 Units.

Capstone course. Thermal analysis and engineering emphasizing integrating heat transfer, fluid mechanics, and thermodynamics into a unified approach to treating complex systems. Mixtures, humidity, chemical and phase equilibrium, and availability. Labs apply principles through hands-on experience with a turbojet engine, PEM fuel cell, and hybrid solid/oxygen rocket motor. Use of MATLAB as a computational tool. Prerequisites: ENGR 30, ME 70, and 131A,B.

ME 161. Dynamic Systems, Vibrations and Control. 3-4 Units.

(Graduate students only enroll in 261.) Modeling, analysis, and measurement of mechanical and electromechanical systems. Numerical and closed form solutions of ordinary differential equations governing the behavior of single and multiple degree of freedom systems. Stability, resonance, amplification and attenuation, and control system design. Prerequisite: background in dynamics and calculus such as ENGR 15 and MATH 43. Recommended: CME 102, and familiarity with differential equations, linear algebra, and basic electronics. Same as: ME 261.

ME 177. Global Engineers' Education. 3 Units.

A project based course for those who would like to use their engineering backgrounds to address real world challenges faced by underserved communities globally. In direct collaboration with an underserved community from a rural village in India, students will develop engineering solutions to the challenge of sanitation and hygiene. Focus will be on working with the community rather than for them. Concepts covered will include designing with what designers care about at the center, articulating and realizing individual and community aspirations, ethics of engaging with underserved communities, and methodology of working sustainably with an underserved community.

ME 185. Electric Vehicle Design. 3 Units.

This project based class focuses on the design and prototyping of electric vehicles. Students learn the fundamentals of vehicle design in class and apply the knowledge as they form teams and work on projects involving concept, specifications, structure, systems, integration, assembly, testing, etc. The class meets once a week to learn about the fundamentals, exchange their experiences, and coordinate between projects. The teams of 3-5 will work on their projects independently.

ME 190. Ethical Issues in Mechanical Engineering. 4 Units.

Moral rights and responsibilities of engineers in relation to society, employers, colleagues, and clients; cost-benefit-risk analysis, safety, and informed consent; whistle blowing; engineers as expert witnesses, consultants, and managers; ethical issues in engineering design, manufacturing, and operations, and engineering work in foreign countries; and ethical implications of the social and environmental contexts of contemporary engineering. Case studies and field research. Enrollment limited to 25 Mechanical Engineering majors.

ME 191. Engineering Problems and Experimental Investigation. 1-5 Unit.

Directed study and research for undergraduates on a subject of mutual interest to student and staff member. Student must find faculty sponsor and have approval of adviser.

ME 191H. Honors Research. 1-5 Unit.

Student must find faculty honors adviser and apply for admission to the honors program.nn (Staff).

ME 196. Design and Manufacturing Forum. 1 Unit.

Invited speakers address issues of interest to design and manufacturing engineering and business students. Sponsored by the Product Realization Laboratory at Stanford.

Same as: ME 396.

ME 199A. Practical Training. 1 Unit.

For undergraduate students. Educational opportunities in high technology research and development labs in industry. Students engage in internship work and integrate that work into their academic program. Following internship work, students complete a research report outlining work activity, problems investigated, key results, and follow-up projects they expect to perform. Meets the requirements for curricular practical training for students on F-1 visas. Student is responsible for arranging own internship/employment and faculty sponsorship. Register under faculty sponsor's section number. All paperwork must be completed by student and faculty sponsor, as the Student Services Office does not sponsor CPT. Students are allowed only two quarters of CPT per degree program. Course may be repeated twice.

ME 200. Judging Historical Significance Through the Automobile. 1 Unit.

This seminar is for students to learn how to assess the impact of historical importance through the lens of the automobile. Students will participate in discussions about measuring and judging historical importance from a number of perspectives - engineering, aesthetic, historical, etc. They will then decide on criteria and use these to be a part of a judging team at the Pebble Beach Concours d'Elegance. The Pebble Beach event is the leading concours for automobiles in the United States. Using the criteria established by the students, the judging team, including the students, will decide the recipient of the Stanford/Revs Automotive History Trophy for 2013 and have the opportunity to present it on the lawn at Pebble Beach Lodge on August 18th.

ME 201. Dim Sum of Mechanical Engineering. 1 Unit.

Introduction to research in mechanical engineering for M.S. students and upper-division undergraduates. Weekly presentations by current ME Ph.D. and second-year fellowship students to show research opportunities across the department. Strategies for getting involved in a research project.

ME 202. Mechaphonics: Smart Phone-Enabled Mechatronic Systems. 3 Units.

Explore the use of smartphones and tablets as enabling components within modern mechatronic systems. Emphasis on leveraging Android resources (user interface, communications, sensors) in combination with the Arduino microcontroller platform to design and build complex mechatronic devices. Topics include: basic Android application development, Android communications, sensors, Arduino, Arduino peripherals. Large, open-ended team project. Android device and programming hardware required. Limited enrollment. Prerequisites: ME210, ME218, or permission of instructor.

ME 203. Design and Manufacturing. 4 Units.

Integrated experience involving need finding, product definition, conceptual design, detail design, prototype manufacture, public presentation of outcomes, archiving and interpreting the product realization process and its results. Presents an overview of manufacturing processes crucial to the practice of design. Corequisite: 103D or CAD experience. Recommended: 101.

ME 203X. Prototyping and Process Capture. 1 Unit.

Concepts and methods for low resolution prototyping as an integral activity in engineering design process. Class meetings include presentations by faculty and design oriented exercises by students. Assignments will be Blog Posts. ME203X is designed to work in phase with ME203 and offers greater depth in prototyping strategy, technique, and resultant insights. Concurrent enrollment in ME203 is required. Enrollment is optional and capped at 6 students.

ME 204A. Bicycle Design and Frame-Building. 1 Unit.

Lecture/lab. The engineering and artistic execution of designing and building a bicycle frame. Fundamentals of bicycle dynamics, handling, and sizing. Manufacturing processes. Films, guest lecturers, field trips. Each student designs and fabricates a custom bicycle frame. This course is now a two part course series ME204A&B. Limited enrollment. Prerequisite: 203 or equivalent.

ME 204B. Bicycle Design and Frame-Building. 3 Units.

The engineering and artistic execution of designing and building a bicycle frame. The fundamentals of bicycle dynamics, handling, and sizing. Manufacturing processes. Films, guest lecturers, field trips. Each student designs a custom bicycle frame that they continue from ME204A in winter quarter. Limited enrollment, admission by consent of instructors. Attendance at first lecture is required. Both ME204A and ME204B must be taken. Prerequisite: 203 or equivalent.

ME 205. Flexible Part Design. 3 Units.

Project based course. Students design and fabricate tooling to create and refine elastomeric parts using RTV silicone rubber. Focus is on the development of elastomeric part design intuition through iteration. Fabrication techniques include manual/CNC machining and additive manufacturing, and molding liquid silicone. Prerequisites: ME203 or instructor consent. Recommended: ME318. Admission is by consent of the instructor. Class size limited to 10, must attend first lecture.

ME 206A. Entrepreneurial Design for Extreme Affordability. 4 Units.

Project course jointly offered by School of Engineering and Graduate School of Business. Students apply engineering and business skills to design product prototypes, distribution systems, and business plans for entrepreneurial ventures in developing countries for a specified challenge faced by the world's poor. Topics include user empathy, appropriate technology design, rapid prototype engineering and testing, social technology entrepreneurship, business modeling, and project management. Weekly design reviews; final course presentation. Industry and adviser interaction. Limited enrollment via application; see <http://www.stanford.edu/class/me206>.

ME 206B. Entrepreneurial Design for Extreme Affordability. 4 Units.

Part two of two-quarter project course jointly offered by School of Engineering and Graduate School of Business. Second quarter emphasizes prototyping and implementation of specific projects identified in first quarter. Students work in cross-disciplinary project teams. Industry and adviser interaction, weekly design reviews; final course presentation. Prerequisite: 206A. (Jointly offered as GSB OIT333B) Design Institute class; see <http://dschool.stanford.edu>.

ME 208. Patent Law and Strategy for Innovators and Entrepreneurs. 2-3 Units.

Inventors and entrepreneurs have four concerns related to patent law: protecting their inventions in the very early stages of product development, determining the patentability of their invention, avoiding infringement of a competitor's patent, and leveraging their patent as a business asset. This course will address each of these concerns through the application of law cases and business cases to an invention of the Student's choice. Although listed as a ME/MSE course, the course is not specific to any discipline or technology. Same as: MS&E 278.

ME 209. Imperfections in Crystalline Solids. 3 Units.

The purpose of this course is to develop a basic quantitative understanding of the behavior of point, line and planar defects in crystalline solids. Particular attention is focused on those defects that control the thermodynamic, structural and mechanical properties of crystalline materials. Prerequisites: Engr. 50 (or other introduction to Materials Science); MSE 203 (or other introduction to crystallography); MSE 204 (or other introduction to thermodynamics); ME80 (or other introduction to mechanics of materials).

ME 210. Introduction to Mechatronics. 4 Units.

Technologies involved in mechatronics (intelligent electro-mechanical systems), and techniques to apply this technology to mechatronic system design. Topics include: electronics (A/D, D/A converters, op-amps, filters, power devices); software program design, event-driven programming; hardware and DC stepper motors, solenoids, and robust sensing. Large, open-ended team project. Limited enrollment. Prerequisites: ENGR 40, CS 106, or equivalents.

ME 211. ReMake: Design Lessons from Restoration. 1 Unit.

Focus is on the restoration of the 1962 Cadillac DeVille project car as a design investigation. Topics include: What makes a car a classic? How does this car express luxury, and how is that different from contemporary luxury products? What does the car say about the American identity, and how has that changed over the past half-century? Every student can expect to get their hands dirty; prior automotive experience is not required. Goal is to have the car operational again by the end of Autumn Quarter. Preference to early graduate and advanced undergraduate students. Enrollment limited to 15.

ME 212. Calibrating the Instrument. 1 Unit.

For first-year graduate students in the Joint Program in Design. Means for calibrating the designer's mind/body instrument through tools including improvisation, brainstorming, creative imaging, educational kinesiology, and Brain Gym. Current design issues; guest speakers; shared stories; and goal setting.

ME 213. Design for Exploration. 3-4 Units.

A collaboration with the Exploratorium in San Francisco. Students investigate and experiment with all aspects of the creation of interactive museum exhibits. On-site exhibit floor sessions and prototyping workshops. Lectures from museum staff on exhibit design. Students design and construct exhibits for temporary placement on the floor of the Exploratorium. To be considered for admission to the course, student must fill out an application form at <http://stanford.edu/~edmark/application.htm> no later than Nov 30th, 2013. Same as: ARTSTUDI 265.

ME 214. Good Products, Bad Products. 3-4 Units.

The characteristics of industrial products that cause them to be successes or failures: the straightforward (performance, economy, reliability), the complicated (human and cultural fit, compatibility with the environment, craftsmanship, positive emotional response of the user), the esoteric (elegance, sophistication, symbolism). Engineers and business people must better understand these factors to produce more successful products. Projects, papers, guest speakers, field trips. Same as: ME 314.

ME 216A. Advanced Product Design: Needfinding. 3-4 Units.

Human needs that lead to the conceptualization of future products, environments, systems, and services. Field work in public and private settings; appraisal of personal values; readings on social ethnographic issues; and needfinding for a corporate client. Emphasis is on developing the flexible thinking skills that enable the designer to navigate the future. Prerequisites for undergraduates: ME115A, ME115B and ME203, or consent of the instructor.

ME 216B. Advanced Product Design: Implementation 1. 4 Units.

Summary project using knowledge, methodology, and skills obtained in Product Design major. Students implement an original design concept and present it to a professional jury. Prerequisite: 216A.

ME 216C. Advanced Product Design: Implementation 2. 4 Units.

ME216C: Implementation II is a continuation of ME216B. Students would develop project from ME216B to a further state of completion. Design will be completed, details about manufacturing, cost and production will be developed. Students will validate their projects by making them real in the world. Prerequisites for class are ME216A and ME216B. Prerequisite: 216A and 216B.

ME 217. Design & Construction in Wood. 1-3 Unit.

Explore the design and construction of objects using wood. Taught in the Product Realization Lab. Enrollment by consent of instructor.

ME 218A. Smart Product Design Fundamentals. 4-5 Units.

Lecture/Lab. Team design project series on programmable electromechanical systems design. Topics: transistors as switches, basic digital and analog circuits, operational amplifiers, comparators, software design, state machines, programming in C. Lab fee. Limited enrollment.

ME 218B. Smart Product Design Applications. 4-5 Units.

Lecture/lab. Second in team design project series on programmable electromechanical systems design. Topics: user I/O, timer systems, interrupts, signal conditioning, software design for embedded systems, statecharts, sensors, actuators, noise, and power supplies. Lab fee. Limited enrollment. Prerequisite: 218A or passing the smart product design fundamentals proficiency examination.

ME 218C. Smart Product Design Practice. 4-5 Units.

Lecture/lab. Advanced level in series on programmable electromechanical systems design. Topics: inter-processor communication, system design with multiple microprocessors, architecture and assembly language programming for the PIC microcontroller, controlling the embedded software tool chain, A/D and D/A techniques, electronic manufacturing technology. Team project. Lab fee. Limited enrollment. Prerequisite: 218B.

ME 218D. Smart Product Design: Projects. 3-4 Units.

Lecture/lab. Industrially sponsored project is the culmination of the Smart Product Design sequence. Student teams take on an industrial project requiring application and extension of knowledge gained in the prior three quarters, including prototyping of a final solution with hardware, software, and professional documentation and presentation. Lectures extend the students' knowledge of electronic and software design, and electronic manufacturing techniques. Topics: chip level design of microprocessor systems, real time operating systems, alternate microprocessor architectures, and PCB layout and fabrication. Prerequisite: 218C.

ME 219. The Magic of Materials and Manufacturing. 3 Units.

Intended for design-oriented students who anticipate imagining and then creating new products with a focus on materiality and brand or design and business. Assumes basic knowledge of materials and manufacturing processes which results from taking ENGR 50, ME 203, or equivalent course/life experience. Goal is to acquire professional foundation information about materials and materiality from a product design point-of-view, manufacturing processes and business systems inside a factory, and story-telling by book authorship, essay writing, and multimedia presentation. Goal is for students to exhibit a deep and life-long love of materials and manufacturing in order to make great products and tell a good story about each one.

ME 220. Introduction to Sensors. 3-4 Units.

Sensors are widely used in scientific research and as an integral part of commercial products and automated systems. The basic principles for sensing displacement, force, pressure, acceleration, temperature, optical radiation, nuclear radiation, and other physical parameters. Performance, cost, and operating requirements of available sensors. Elementary electronic circuits which are typically used with sensors. Lecture demonstration of a representative sensor from each category elucidates operating principles and typical performance. Lab experiments with off-the-shelf devices.

ME 221. Green Design Strategies and Metrics. 2 Units.

Foundation in sustainable product design principles, reinforced by conceptual design projects. Discuss what aspects of sustainability matter most for different products. Application of dozens of strategies to improve product sustainability. Frameworks, measurements, and decision-making tools to navigate the complexities of designing greener products. Life-cycle analysis, materials, energy use, biomimicry, product-service systems, persuasive design, design for end-of-life, and systems thinking.

ME 222. Design for Sustainability. 2-3 Units.

Lecture/lab. Role of design in building a sustainable world. How to include sustainability in the design process considering environmental, cultural, and social impacts. Focus is on a proactive design approach, and the tools and techniques needed to translate theory into artifact.

ME 223. Innovating Water Solutions for Developing Countries. 2-3 Units.

Primarily for graduate students and seniors with strong design and mechanical engineering backgrounds. Currently 1.1 billion people lack safe drinking water and 2.6 billion people lack adequate sanitation. The FAO states that by 2025 1.9 billion people will be living in countries or regions with absolute water scarcity, and two-thirds of the world population could be under stress conditions. The Stanford ChangeLabs has initiated a project called the 100 Liter Water project, designed to form strategies to deliver a minimum of 100 liters of water per day per family to the poorest communities in the world. This is a self-directed project class restricted to 15 students selected through an application process. Students work individually and in teams on water related technologies such as solar based low flow pumping systems, rainwater catchment systems, and storage systems. The studio class entails working on the design of solar powered low flow pumps, rainwater catchment systems, and very low cost storage systems designed for sparsely distributed communities in water stressed regions of the world. Students expected to work with autonomy and self-direction, going through multiple rounds of prototyping to generate breakthrough technologies designed to make deep impact.

ME 225. Mystery of Manufacturing. 3 Units.

Mystery of Manufacturing is intended for design- and engineering-oriented students who anticipate or have an interest in launching products. Where the cousin of this class, ME219, is an overview of fabrication and factory systems, this course will look at manufacturing systems more holistically: what does it take to get a product from your idea into peoples' hands? We'll look at factors that drive location, distribution, and supply chain decisions, and we'll look closely at the inner workings of factories. This course assumes basic knowledge of materials and manufacturing processes resulting from ENGR 50, ME 203, ME 219 or equivalent course/life experience. The goal is to acquire a professional foundation in factory manufacturing systems and the business of manufacturing through storytelling, essay writing, and multimedia presentation. We hope students will exhibit a deep and life-long love of the complexity and flexibility of manufacturing systems in order to launch great products into the world.

ME 226. Designing Sustainable Behavior. 1 Unit.

How do you design a product so people will use it in the most sustainable way? Through practical design exercises you experience how selected design tools can help you affect the behavior of your target group. The course consists of an 8-hour workshop on Saturday April 6th in Studio2 at the d.school, followed by a group project finishing April 24th. Students may request to only audit the workshop by emailing jdaae@stanford.edu. The course builds upon and contributes to an ongoing research project. Prerequisite: training in product design.

ME 227. Vehicle Dynamics and Control. 3 Units.

The application of dynamics, kinematics, and control theory to the analysis and design of ground vehicle behavior. Simplified models of ride, handling, and braking, their role in developing intuition, and limitations in engineering design. Suspension design fundamentals. Performance and safety enhancement through automatic control systems. In-car laboratory assignments for model validation and kinesthetic understanding of dynamics. Limited enrollment. Prerequisites: ENGR 105, consent of instructor.

ME 229. Design Evangelism. 1-2 Unit.

Students work with Ambidextrous staff and magazine professionals to edit and produce Ambidextrous, Stanford University's Journal of Design. Topics include design processes and innovation, storytelling, writing and editing for an audience, magazine production and project leadership. Hands-on projects, in-class exercises, and guest lectures.

ME 231. Educating Young STEM Thinkers. 3-5 Units.

The course will introduce students to the design thinking process, the national conversations about the future of STEM careers, and provide opportunities to work with middle school students and K-12 teachers in STEM-based after-school activities and intercession camps. The course will be both theory and practice focused. The purpose is twofold; to provide reflection and mentoring opportunities for students to learn about pathways to STEM careers and to introduce mentoring opportunities with young STEM thinkers.

Same as: EDUC 139X, EDUC 239X, ME 139.

ME 233. Making it Big: Crossing the Entrepreneur's Gap. 3 Units.

Students learn to take novel designs into entrepreneurial production and prepare for market production. Education, resources, and community are provided to help students cross the gap, founding ideas and making them real, in volume. Topics include entrepreneurial production methods and initiation, vendor selection and engagement, cost, design transfer, quality and testing, manufacturing planning and execution. Course prepares students for leadership roles in entrepreneurial as well as large production-oriented companies. Case studies, regular project reviews, final presentation, industry interaction.

ME 235. Understanding Superfans and their Heroes. 2-3 Units.

Harness the power of the hero coefficient through a radical team-based, hands-on, multidisciplinary class. Students will learn and utilize the principles of Empathy-Define-Ideate-Prototype-Test components of the d.thinking process. Why do superfans love their heroes? You'll get to prototype and explore how superfans connect with their heroes, understanding this connective tissue works will give your own ideas a boost. We'll be studying heroes the likes of Dale Earnhardt, Michael Jordan and Stephen Colbert. Expect to leave this class ready to spread the word about heroes and superfans and make everyone at your company or on your team feel like one. You will hear from special guests and take a field trip to a racetrack. Sponsored by the Revs Program. Limited enrollment. FAQ and apply here: <http://revs.stanford.edu/course/693>.

ME 236. Tales to Design Cars By. 1-3 Unit.

Investigating a personal relationship with cars through the application of research and with a generative storytelling focus will provide inspiration for designing a new automotive experience. This course will use ethnographic research, interviews, and a variety of narrative methods including verbal, non-verbal, cinema, and sound, and short collaborative projects to inform the creation of a physical prototype for a new car experience and the story around it. Restricted to co-term and graduate students. Restricted to co-term and graduate students. Class size limited to 18.

ME 238. Patent Prosecution. 2 Units.

The course follows the patent application process through the important stages: inventor interviews, patentability analysis, drafting claims, drafting a specification, filing a patent application, and responding to an office action. The subject matter and practical instruction relevant to each stage are addressed in the context of current rules and case law. The course includes four written assignments: an invention capture, a claim set, a full patent application, and an Office Action response. Pre-requisites: Law 326 (IP:Patents), Law 409 (Intro IP), or ME 208.

ME 239. Mechanics of the Cell. 3 Units.

Kinematical description of basic structural elements used to model parts of the cell: rods, ropes, membranes, and shells. Formulation of constitutive equations: nonlinear elasticity and entropic contributions. Elasticity of polymeric networks. Applications to model basic filaments of the cytoskeleton: actin, microtubules, intermediate filaments, and complete networks. Applications to biological membranes.

ME 240. Introduction to Nanotechnology. 3 Units.

Nanotechnology as multidisciplinary with contributions from physical sciences, engineering, and industry. Current topics in nanotechnology research; developments in nanomaterials, mechanics, electronics, and sensors; and applications. Nanoscale materials building blocks, fabrication and assembly processes, characterization and properties, and novel system architectures. Implications for future development.

ME 243. Designing Emotion-Reactive Car Interfaces. 3 Units.

How to design in car interfaces that take into account the emotional state of the driver in the moment of driving? Participants will be prototyping and testing interfaces for an industry partner. The challenge is to take real time physiological data to infer the emotional state of a driver and to lever these to improve the driving experience. We will cover topics on design methodology, psychology of emotions, and human machine interaction. The class meets at VAIL, the Stanford automotive innovation facility, for prototyping, discussions and presentations. Participants will have access to tools, prototyping materials, physiological sensors, and a car. Students from all ENG majors but also beyond are encouraged to join, bring your drivers license.

ME 244. Mechanotransduction in Cells and Tissues. 3 Units.

Mechanical cues play a critical role in development, normal functioning of cells and tissues, and various diseases. This course will cover what is known about cellular mechanotransduction, or the processes by which living cells sense and respond to physical cues such as physiological forces or mechanical properties of the tissue microenvironment. Experimental techniques and current areas of active investigation will be highlighted. Same as: BIOE 283.

ME 247A. @Stanford Studio. 4 Units.

The d.school is working with the University to re-invent the on-campus experience. Huge shifts are disrupting education in unprecedented ways, questioning what it means to learn and live on campus. It's time to harness those changes and re-invent what it means to be a student right here at Stanford. You will delve into design, dig into the most adventurous educational experiments happening around the country, immerse yourself in mind-blowing experiences both on- and off-campus, and create short films and wild prototypes that demonstrate the future of campus life. Your work may be seen or experienced by faculty, deans, and the Stanford community at-large; the opportunity for impact is very real.

ME 247B. @Stanford Studio. 4 Units.

Re-imagine the Stanford experience for the year 2020. Fall quarter the d.school's @Stanford Project will mount @Stanford Studio, an opportunity for students to design, develop, execute, and iterate immersive prototypes that allow experimentation into many facets of the future student experience. Because of the nature of prototypes and the subject matter, significant time outside of scheduled class meetings will be required. Students will work closely with design mentors, campus stakeholders, and inspiration partners (innovative educators, artists, museums, companies and/or topical experts from beyond Stanford) to create live, testable, learning experiences. Course will involve fast-paced team work and rely on strong, consistent participation and perfect attendance. Admission by application. Please see dschool.stanford.edu for application information.

ME 247C. @Stanford Studio. 4 Units.

Re-imagine the future Stanford experience. @Stanford Studio is an opportunity for students to design, develop, execute, and iterate immersive prototypes that allow experimentation into many facets of the future student experience. Students enrolled in @Stanford Studio in winter quarter will be responsible for running quarter-long independent experiments. This is an advanced studio for continuing students only. Admission by application.

ME 250. Internal Combustion Engines. 1-5 Unit.

Internal combustion engines including conventional and turbocharged spark ignition, and diesel engines. Lectures: basic engine cycles, engine components, methods of analysis of engine performance, pollutant emissions, and methods of engine testing. Lab involves hands-on experience with engines and test hardware. Limited enrollment. Prerequisites: 140.

ME 257. Turbine and Internal Combustion Engines. 3 Units.

Principles of design analysis for aircraft gas turbines and automotive piston engines. Analysis for aircraft engines performed for Airbus A380 type aircraft. Design parameters determined considering aircraft aerodynamics, gas turbine thermodynamics, compressible flow physics, and material limitations. Additional topics include characteristics of main engine components, off-design analysis, and component matching. Performance of automotive piston engines including novel engine concepts in terms of engine thermodynamics, intake and exhaust flows, and in-cylinder flow. Same as: ME 357.

ME 260. Fuel Cell Science and Technology. 3 Units.

Emphasis on proton exchange membrane (PEM) and solid oxide fuel cells (SOFC), and principles of electrochemical energy conversion. Topics in materials science, thermodynamics, and fluid mechanics. Prerequisites: MATH 43, PHYSICS 55, and ENGR 30 or ME 140, or equivalents.

ME 261. Dynamic Systems, Vibrations and Control. 3-4 Units.

(Graduate students only enroll in 261.) Modeling, analysis, and measurement of mechanical and electromechanical systems. Numerical and closed form solutions of ordinary differential equations governing the behavior of single and multiple degree of freedom systems. Stability, resonance, amplification and attenuation, and control system design. Prerequisite: background in dynamics and calculus such as ENGR 15 and MATH 43. Recommended: CME 102, and familiarity with differential equations, linear algebra, and basic electronics. Same as: ME 161.

ME 264. d.science: Design for Science. 3-4 Units.

Where does design fit into scientific research? In this class, we will design for how data are collected, how data are communicated, and how to apply scientific insights to community-based projects. This year's projects are inspired by the Citizen Science movement and The Year of the Bay. We will use human-centered design methods to understand the needs of bay area citizens through hands-on data collection, public data exploration and collaboration with local industry, government and research partners. With guest lectures from the design and science community, research mentors, and skills workshops, you will develop an actionable understanding of the challenges of collecting good data, the complexities of creating engaging stories with quantitative data, and the challenges of balancing insights from both human-centered design research and scientific research. One of the three class projects will involve visualizing and mapping big data. No prior programming or statistics experience required. Enrollment limited to 24. This course is open to graduate students from all schools and departments. Apply the first day of class.

ME 265. Technology Licencing and Commercialization. 3 Units.

How to profit from technology; processes and strategies to commercialize functional or artistic inventions and creations (not limited to mechanical engineering). Business and legal aspects of determining what can be owned and licensed, how to determine commercial value, and what agreements are necessary. Contract and intellectual property law; focus is on provisions of license agreements and their negotiation.

ME 266. Introduction to Physiology and Biomechanics of Hearing. 3 Units.

Hearing is fundamental to our ability to communicate, yet in the US alone over 30 million people suffer some form of hearing impairment. As engineers and scientists, it is important for us to understand the underlying principles of the auditory system if we are to devise better ways of helping those with hearing loss. The goal of this course is to introduce undergraduate and graduate students to the anatomy, physiology, and biomechanics of hearing. Principles from acoustics, mechanics, and hydrodynamics will be used to build a foundational understanding of one of the most complex, interdisciplinary, and fascinating areas of biology. Topics include the evolution of hearing, computational modeling approaches, fluid-structure interactions, ion-channel transduction, psychoacoustics, diagnostic tools, and micrometer to millimeter scale imaging methods. We will also study current technologies for mitigating hearing loss via passive and active prostheses, as well as future regenerative therapies.

ME 277. Graduate Design Research Techniques. 3-4 Units.

Students from different backgrounds work on real-world design challenges. The Design Thinking process with emphasis on: ethnographic techniques, need finding, framing and concept generation. The Design Thinking process as a lens to explore ways to better understand people and their culture. Cultural differences as a source of design inspiration, with the understanding that design itself is a culturally embedded practice.

ME 280. Skeletal Development and Evolution. 3 Units.

The mechanobiology of skeletal growth, adaptation, regeneration, and aging is considered from developmental and evolutionary perspectives. Emphasis is on the interactions between mechanical and chemical factors in the regulation of connective tissue biology. Prerequisites: BIO 42, and ME 80 or BIOE 42. Same as: BIOE 280.

ME 281. Biomechanics of Movement. 3 Units.

Experimental techniques to study human and animal movement including motion capture systems, EMG, force plates, medical imaging, and animation. The mechanical properties of muscle and tendon, and quantitative analysis of musculoskeletal geometry. Projects and demonstrations emphasize applications of mechanics in sports, orthopedics, and rehabilitation. Same as: BIOE 281.

ME 283. Introduction to Biomechanics. 3 Units.

Introduction to the application of mechanical engineering analysis to understand human physiology and disease. Topics include basics of musculoskeletal force analysis, cell mechanics, blood flow, and mechanical behaviors of tissues. Undergraduates should have taken ME 70 and ME 80 or equivalents.

ME 287. Mechanics of Biological Tissues. 3 Units.

Introduction to the mechanical behaviors of biological tissues in health and disease. Overview of experimental approaches to evaluating tissue properties and mathematical constitutive models. Elastic behaviors of hard tissues, nonlinear elastic and viscoelastic models for soft tissues.

ME 288. ReDesigning Theater: Live & Digital Performance. 3 Units.

This quarter's version of ReDesigning Theater looks at Live and Digital Performance. We will examine the use of digital technology in collaboration with live performance. Students will learn and employ the design thinking process as well as improv and theatrical techniques. We aim to create user-centric, interactive experiences where technology enables the audience to become part of and/or influence the outcome of the story or its presentation. Student projects will begin with the concepts enabled by personal technology such as smart phones and expand to animation, video projection, and other media. Students will work in small groups to investigate and experiment with formats that blur the lines between live and digital, performer and audience, and physical and virtual platforms. This project-based course is accessible to students of all backgrounds interested in exploring and transforming the frontiers of technology, art, and live performance.

Same as: TAPS 130.

ME 289A. Interactive Art / Performance Design. 2 Units.

This class is for those who want the experience of designing and creating interactive art and performance pieces for public audiences, using design thinking as the method, and supported by guest speakers, artist studio visits and needfinding trips to music festivals, museums and performances. Drawing on the fields of design, art, performance, and engineering, each student will ideate, design, plan and lead a team to build an interactive art and/or performance piece to be showcased to audience of 5000 at the Frost Music and Art Festival held on the Stanford campus on May 17th 2014. Projects can range from interactive art to unconventional set design, and from site-specific sculpture to immersive performance. This is a two-quarter long commitment during which students will first learn the design, planning, story boarding, budgeting, engineering, proposal creation and concept pitching of projects for applying for grants and presenting to funders. The second quarter will concentrate on prototyping, maquette making, testing, team forming, project management, creative leadership, construction, site installation and documentation. Part one of a two course series: ME 289A&B.

ME 289B. Interactive Art / Performance Creation. 3-4 Units.

This class is the continuation of ME289A where students experience the designing and creating of interactive art and performance pieces for public audiences, using design thinking as the method, and supported by guest speakers, artist studio visits and needfinding trips to music festivals, museums and performances. Drawing on the fields of design, art, performance, and engineering, each student will ideate, design, plan and lead a team to build an interactive art and/or performance piece to be showcased to audience of 5000 at the Frost Music and Art Festival held on the Stanford campus on May 17th 2014. Projects can range from interactive art to unconventional set design, and from site-specific sculpture to immersive performance. During this second quarter students will concentrate on prototyping, maquette making, testing, team forming, project management, creative leadership, construction, site installation and documentation. Part two of a two course series : ME 289A&B.

ME 294. Medical Device Design. 1 Unit.

In collaboration with the School of Medicine. Introduction to medical device design for undergraduate and graduate engineering students. ME294 is the lecture portion of the class. For involvement with design and projects, co-enroll in the lab portion, ME294L.

ME 294L. Medical Device Design Lab. 3 Units.

In collaboration with the School of Medicine. This is the lab portion of ME294, which must be taken concurrently. Introduction to medical device design for undergraduate and graduate engineering students. Design, prototyping and labs. Medical device environments may include hands-on device testing; and field trips to operating rooms and local device companies. Prerequisite: 203.

ME 297. Forecasting for Innovators: Technology, Tools & Social Change. 3 Units.

Technologies from the steam engine to the microprocessor have been mixed gifts, at once benefitting humankind and creating many of the problems facing humanity today. This class will explore how innovators can use forecasting methods to identify new challenges, develop responsive innovations and anticipate unintended consequences. Students will produce a long-range forecast project, applying a variety of methodologies including research, expert interviews and graphical exploration.

ME 298. Silversmithing and Design. 3-4 Units.

Skills involved in working with precious metals at a small scale. Investment casting and fabrication techniques such as reticulation, granulations, filigree, and mokume gane.

ME 299A. Practical Training. 1 Unit.

For master's students. Educational opportunities in high technology research and development labs in industry. Students engage in internship work and integrate that work into their academic program. Following internship work, students complete a research report outlining work activity, problems investigated, key results, and follow-up projects they expect to perform. Meets the requirements for curricular practical training for students on F-1 visas. Student is responsible for arranging own internship/employment and faculty sponsorship. Register under faculty sponsor's section number. All paperwork must be completed by student and faculty sponsor, as the Student Services Office does not sponsor CPT. Students are allowed only two quarters of CPT per degree program. Course may be repeated twice.

ME 299B. Practical Training. 1 Unit.

For Ph.D. students. Educational opportunities in high technology research and development labs in industry. Students engage in internship work and integrate that work into their academic program. Following internship work, students complete a research report outlining work activity, problems investigated, key results, and follow-up projects they expect to perform. Meets the requirements for curricular practical training for students on F-1 visas. Student is responsible for arranging own internship/employment and faculty sponsorship. Register under faculty sponsor's section number. All paperwork must be completed by student and faculty sponsor, as the student services office does not sponsor CPT. Students are allowed only two quarters of CPT per degree program. Course may be repeated twice.

ME 300A. Linear Algebra with Application to Engineering Computations. 3 Units.

Computer based solution of systems of algebraic equations obtained from engineering problems and eigen-system analysis, Gaussian elimination, effect of round-off error, operation counts, banded matrices arising from discretization of differential equations, ill-conditioned matrices, matrix theory, least square solution of unsolvable systems, solution of non-linear algebraic equations, eigenvalues and eigenvectors, similar matrices, unitary and Hermitian matrices, positive definiteness, Cayley-Hamilton theory and function of a matrix and iterative methods. Prerequisite: familiarity with computer programming, and MATH51.

Same as: CME 200.

ME 300B. Partial Differential Equations in Engineering. 3 Units.

Geometric interpretation of partial differential equation (PDE) characteristics; solution of first order PDEs and classification of second-order PDEs; self-similarity; separation of variables as applied to parabolic, hyperbolic, and elliptic PDEs; special functions; eigenfunction expansions; the method of characteristics. If time permits, Fourier integrals and transforms, Laplace transforms. Prerequisite: CME 200/ME 300A, equivalent, or consent of instructor.

Same as: CME 204.

ME 300C. Introduction to Numerical Methods for Engineering. 3 Units.

Numerical methods from a user's point of view. Lagrange interpolation, splines. Integration: trapezoid, Romberg, Gauss, adaptive quadrature; numerical solution of ordinary differential equations: explicit and implicit methods, multistep methods, Runge-Kutta and predictor-corrector methods, boundary value problems, eigenvalue problems; systems of differential equations, stiffness. Emphasis is on analysis of numerical methods for accuracy, stability, and convergence. Introduction to numerical solutions of partial differential equations; Von Neumann stability analysis; alternating direction implicit methods and nonlinear equations. Prerequisites: CME 200/ME 300A, CME 204/ME 300B. Same as: AA 214A, CME 206.

ME 301. LaunchPad:Design and Launch your Product or Service. 4 Units.

Apply principles of design thinking to the real-life challenge of imagining, prototyping, testing and iterating, building, marketing, and selling your product or service. Work will be in teams (you apply as an intact team) or alone. You must submit a proposal and team for approval. Proposal can be a physical good or service of any kind. Projects are treated as real start-ups, so the work will be intense. Proposal submitted by Feb 15, 2010 acceptance by March 1. Design Institute class; see <http://dschool.stanford.edu>.

ME 302. The Future of the Automobile. 1 Unit.

This quarter, the seminar will take a specific focus on "Advanced Driver Assistance Systems", which help drivers to maneuver their vehicles through traffic. Those systems range from navigation systems, adaptive cruise control, night vision, lane departure warning over automated parking, traffic jam assistance, to self-driving cars. With this breadth of applications, advanced driver assistance systems play an important role in making traffic safer, more efficient, and more enjoyable. This course, lectured by an industry expert, will introduce students to technology behind the systems, the benefits, challenges, and future perspectives of this exciting field. At the end of the quarter, students will have developed a technical understanding as well as an understanding for the interactions of the technology, business, and society with a specific automotive focus.

ME 303. Biomechanics of Flight. 3 Units.

Study of biological flight as an inspiration for designing robots. The goal is to give students a broad understanding of the biomechanics of natural flight, and an in-depth understanding of bird flight. This course elucidates how students can pick and choose exciting biological questions, use biological and engineering techniques to answer them, and use the results to identify bio-inspired design applications. Prerequisites: Fluid mechanics OR Aerodynamics AND Fluent Matlab skills. Course website URL: http://lentinklab.stanford.edu/impact/stanford_teaching.

ME 304. The Designer's Voice. 1 Unit.

This course for Masters students in the Stanford Design Program helps students develop a point of view about their design career that will enable them to articulate their design vision, inspire a design studio, or infect a business with a culture of design-thinking. This class focuses on the integration of work and worldview, professional values, design language, and the development of the designer's voice. Includes seminar-style discussions, role-playing, short writing assignments, guest speakers, and individual mentoring and coaching.

ME 307. Green's Function Methods in Engineering. 3 Units.

The concept of Green's Functions used to recast ordinary and partial dislocations as integral equations with built-in boundary conditions will be developed, including the inclusion of modified Green's Functions, where appropriate. Applications to the solutions of ODE's and elliptic, hyperbolic, and parabolic partial differential equations will be studied, including Laplace's equation, the wave and reduced wave equation, the diffusion/heat conduction equation, and the equations of motion of linear elastic theory. The course will be self-contained, so that a working knowledge of simple ODE's and the separation of variables method is the only prerequisite. Class notes will be provided. Same as: MATSCI 307.

ME 308. Spatial Motion. 3 Units.

The geometry of motion in Euclidean space. Fundamentals of theory of screws with applications to robotic mechanisms, constraint analysis, and vehicle dynamics. Methods for representing the positions of spatial systems of rigid bodies with their inter-relationships; the formulation of Newton-Euler kinetics applied to serial chain systems such as industrial robotics.

ME 309. Finite Element Analysis in Mechanical Design. 3 Units.

Basic concepts of finite elements, with applications to problems confronted by mechanical designers. Linear static, modal, and thermal formulations emphasized; nonlinear and dynamic formulations introduced. Application of a commercial finite element code in analyzing design problems. Issues: solution methods, modeling techniques, features of various commercial codes, basic problem definition. Individual projects focus on the interplay of analysis and testing in product design/development. Prerequisites: Math 51, or equivalent. Recommended: ME80 or CEE101A, or equivalent in structural and/or solid mechanics; some exposure to principles of heat transfer.

ME 310A. Product-Based Engineering Design, Innovation, and Development. 4 Units.

Three quarter sequence; for engineering graduate students intending to lead projects related to sustainability, automotive, biomedical devices, communication, and user interaction. Student teams collaborate with academic partners in Europe, Asia, and Latin America on product innovation challenges presented by global corporations to design requirements and construct functional prototypes for consumer testing and technical evaluation. Design loft format such as found in Silicon Valley consultancies. Typically requires international travel. Prerequisites: undergraduate engineering design project; consent of instructor.

ME 310B. Product-Based Engineering Design, Innovation, and Development. 4 Units.

Three quarter sequence; for engineering graduate students intending to lead projects related to sustainability, automotive, biomedical devices, communication, and user interaction. Student teams collaborate with academic partners in Europe, Asia, and Latin America on product innovation challenges presented by global corporations to design requirements and construct functional prototypes for consumer testing and technical evaluation. Design loft format such as found in Silicon Valley consultancies. Typically requires international travel. Prerequisites: undergraduate engineering design project; consent of instructor.

ME 310C. Project-Based Engineering Design, Innovation, and Development. 4 Units.

Three quarter sequence; for engineering graduate students intending to lead projects related to sustainability, automotive, biomedical devices, communication, and user interaction. Student teams collaborate with academic partners in Europe, Asia, and Latin America on product innovation challenges presented by global corporations to design requirements and construct functional prototypes for consumer testing and technical evaluation. Design loft format such as found in Silicon Valley consultancies. Typically requires international travel. Prerequisites: undergraduate engineering design project; consent of instructor.

ME 310X. New Product Management. 1 Unit.

Restricted to graduate students. Focus is on the role of the product manager in industry. Topics include product management skills, leadership and team management, getting a product management job, corporate and project finance for engineers, sales and marketing for engineers and business strategy. Seminar with in-class exercises and guest speakers from industry. Limited to 50. Prerequisite: Enrolled ME310 students only.

ME 312. Advanced Product Design: Formgiving. 3 Units.

Lecture/lab. Small- and medium- scale design projects carried to a high degree of aesthetic refinement. Emphasis is on form development, design process, and model making.

ME 313. Human Values and Innovation in Design. 3 Units.

Introduction to the philosophy, spirit, and tradition of the product design program. Hands-on design projects used as vehicles for design thinking, visualization, and methodology. The relationships among technical, human, aesthetic, and business concerns. Drawing, prototyping, and design skills. Focus is on tenets of design philosophy: point of view, user-centered design, design methodology, and iterative design.

ME 314. Good Products, Bad Products. 3-4 Units.

The characteristics of industrial products that cause them to be successes or failures: the straightforward (performance, economy, reliability), the complicated (human and cultural fit, compatibility with the environment, craftsmanship, positive emotional response of the user), the esoteric (elegance, sophistication, symbolism). Engineers and business people must better understand these factors to produce more successful products. Projects, papers, guest speakers, field trips.
Same as: ME 214.

ME 315. The Designer in Society. 3 Units.

For graduate students. Career objectives and psychological orientation compared with existing social values and conditions. Emphasis is on assisting individuals in assessing their roles in society. Readings on political, social, and humanistic thought are related to technology and design. Experiential, in-class exercises, and term project. Enrollment limited to 24.

ME 316A. Product Design Master's Project. 2-6 Units.

For graduate Product Design or Design (Art) majors only. Student teams, under the supervision of the design faculty, spend the quarter researching master's project topics. Students are expected to demonstrate mastery of design thinking methods including; needfinding, brainstorming, field interviews and synthesis during this investigation. Masters projects are selected that involve the synthesis of aesthetics and technological concerns in the service of human need. Design Institute class; see <http://dschool.stanford.edu>. Prereq: ME277, ME312, ME313.

ME 316B. Product Design Master's Project. 2-4 Units.

Design Garage is a Winter/Spring class (a two quarter commitment is required). The class is a deep dive in design thinking that uses student-lead projects to teach design process and methods. The projects come from investigations conducted during the Fall quarter where the preliminary need finding, customer research, and product or service ideas have been developed to provide the "seed" projects for the student design teams. Students will learn the methodologies of design thinking by bringing a product, service, or experience to market. Students apply to Design Garage in the Fall, and teams are formed after interviews and applications are reviewed. Prerequisite: graduate student standing.

ME 316C. Product Design Master's Project. 2-4 Units.

This is the second half of the two quarter Design Garage sequence. Students will complete projects begun in ME316B the prior quarter. Prerequisite: ME316B and graduate student standing. Design Institute class; see <http://dschool.stanford.edu>.

ME 317A. Design Methods: Product Definition. 4 Units.

Systematic methodologies to define, develop, and produce world-class products. Student team projects to identify opportunities for improvement and develop a comprehensive product definition. Topics include value engineering, quality function deployment, design for assembly and producibility, design for variety and supply chain, design for life-cycle quality, and concurrent engineering. Students must take 317B to complete the project and obtain a letter grade. On-campus enrollment limited to 20; SCPD class size limited to 50, and each site must have at least 3 students to form a project team.

ME 317B. Design Methods: Quality By Design. 4 Units.

Building on 317A, focus is on the implementation of competitive product design. Student groups apply structured methods to optimize the design of an improved product, and plan for its manufacture, testing, and service. The project deliverable is a comprehensive product and process specification. Topics: concept generation and selection (Pugh's Method), FMEA applied to the manufacturing process, design for robustness, Taguchi Method, SPC and six sigma process, tolerance analysis, flexible manufacturing, product testing, rapid prototyping. Enrollment limited to 40, not including SCPD students. Minimum enrollment of two per SCPD viewing site; single student site by prior consent of instructor. On-campus class limited to 20. For SCPD students, limit is 50 and each site must have a minimum of three students to form a project team and define a project on their own. Prerequisite: 317A.

ME 318. Computer-Aided Product Creation. 4 Units.

Design course focusing on an integrated suite of computer tools: rapid prototyping, solid modeling, computer-aided machining, and computer numerical control manufacturing. Students choose, design, and manufacture individual products, emphasizing individual design process and computer design tools. Field trips demonstrate Stanford Product Realization Lab's relationship to the outside world. Structured lab experiences build a basic CAD/CAM/CNC proficiency. Limited enrollment. Prerequisite: consent of instructor.

ME 319. Fundamentals of Design for Design Thinkers. 2-4 Units.

This course is an introduction to the fundamental principles of Design, geared toward graduate students involved and invested in innovation and design thinking. Core concepts include Contrast, Color, Materiality, Form, Proportion, Transitions, and more. Students will be introduced to the major philosophical concepts of design in readings and in class, and will practice techniques in class and via weekly hands-on projects out of class, culminating in a final personal project. Students will also be introduced to many hands-on prototyping and making skills via access to the Product Realization Lab and Room 36 (webshop.stanford.edu).

ME 320. Introduction to Robotics. 3 Units.

Robotics foundations in modeling, design, planning, and control. Class covers relevant results from geometry, kinematics, statics, dynamics, motion planning, and control, providing the basic methodologies and tools in robotics research and applications. Concepts and models are illustrated through physical robot platforms, interactive robot simulations, and video segments relevant to historical research developments or to emerging application areas in the field. Recommended: matrix algebra.
Same as: CS 223A.

ME 321. Optofluidics: Interplay of Light and Fluids at the Micro and Nanoscale. 3 Units.

Many optical systems in biology have sophisticated designs with functions that conventional optics cannot achieve: no synthetic materials, for example, can provide the camouflage capability exhibited by some animals. This course overviews recent efforts--some inspired by examples in biology--in using fluids, soft materials and nanostructures to create new functions in optics. Topics include electrowetting lenses, electronic inks, colloidal photonic crystals, bioinspired optical nanostructures, nanophotonic biosensors, lens-less optofluidic microscopes. The use of optics to control fluids is also discussed: optoelectronic tweezers, particle trapping and transport, microrheology, optofluidic sorters, fabrication and self-assembly of novel micro and nanostructures.

ME 322. Kinematic Synthesis of Mechanisms. 3 Units.

The rational design of linkages. Techniques to determine linkage proportions to fulfill design requirements using analytical, graphical, and computer based methods.

ME 323. Modeling and Identification of Mechanical Systems for Control. 3 Units.

Lecture/Lab. The art and science behind developing mathematical models for control system design. Theoretical and practical system modeling and parameter identification. Frequency domain identification, parametric modeling, and black-box identification. Analytical work and laboratory experience with identification, controller implementation, and the implications of unmodeled dynamics and non-linearities. Prerequisites: linear algebra and system simulation with MATLAB/SIMULINK; ENGR 105.

ME 324. Precision Engineering. 4 Units.

Advances in engineering are often enabled by more accurate control of manufacturing and measuring tolerances. Concepts and technology enable precision such that the ratio of overall dimensions to uncertainty of measurement is large relative to normal engineering practice. Typical application areas: non-spherical optics, computer information storage devices, and manufacturing metrology systems. Application experience through design and manufacture of a precision engineering project, emphasizing the principles of precision engineering. Structured labs; field trips. Prerequisite: consent of instructors.

ME 326. Telerobotics and Human-Robot Interactions. 3 Units.

Focus is on dynamics and controls. Evaluation and implementation of required control systems. Topics include master-slave systems, kinematic and dynamic similarity; control architecture, force feedback, haptics, sensory substitutions; stability, passivity, sensor resolution, servo rates; time delays, prediction, wave variables. Hardware-based projects encouraged, which may complement ongoing research or inspire new developments. Limited enrollment. Prerequisites: ENGR 205, 320 or CS 223A, or consent of instructor. (Niemeyer).

ME 327. Design and Control of Haptic Systems. 3 Units.

Study of the design and control of haptic systems, which provide touch feedback to human users interacting with virtual environments and teleoperated robots. Focus is on device modeling (kinematics and dynamics), synthesis and analysis of control systems, design and implementation, and human interaction with haptic systems. Coursework includes homework/laboratory assignments and a research-oriented project. Directed toward graduate students and advanced undergraduates in engineering and computer science. Prerequisites: dynamic systems and MATLAB programming. Suggested experience with C/C++ programming and feedback control design.

ME 328. Medical Robotics. 3 Units.

Study of the design and control of robots for medical applications. Focus is on robotics in surgery and interventional radiology, with introduction to other healthcare robots. Delivery is through instructor lectures and weekly guest speakers. Coursework includes homework and laboratory assignments, an exam, and a research-oriented project. Directed toward graduate students and advanced undergraduates in engineering and computer science; no medical background required. Prerequisites: dynamic systems and MATLAB programming. Suggested experience with C/C++ programming, feedback control design, and linear systems. Cannot be taken concurrently with CS 571.

ME 330. Advanced Kinematics. 3 Units.

Kinematics from mathematical viewpoints. Introduction to algebraic geometry of point, line, and plane elements. Emphasis is on basic theories which have potential application to mechanical linkages, computational geometry, and robotics.

ME 331A. Advanced Dynamics & Computation. 3 Units.

Newton, Euler, momentum, and road-map methods and computational tools for 3-D force and motion analysis of multibody systems. Power, work, and energy. Numerical solutions (e.g., MATLAB, etc.) of nonlinear algebraic and differential equations governing the static and dynamic behavior of multiple degree of freedom systems.

ME 331B. Advanced Dynamics, Simulation & Control. 3 Units.

Advanced methods and computational tools for the efficient formulation of equations of motion for multibody systems. D'Alembert principle. Power, work, and energy. Kane's method. Lagrange's method. Computed torque control. Systems with constraints. Quaternions Numerical solutions of nonlinear algebraic and differential equations governing the behavior of multiple degree of freedom systems.

ME 333. Mechanics. 3 Units.

Goal is a common basis for advanced mechanics courses. Introduction to variation calculus. Formulation of the governing equations from a Lagrangian perspective for finite and infinite dimensional mechanical systems. Examples include systems of particles and linear elastic solids. Introduction to tensors. Definition and interpretation of Cauchy stress tensor.

ME 335A. Finite Element Analysis. 3 Units.

Fundamental concepts and techniques of primal finite element methods. Method of weighted residuals, Galerkin's method and variational equations. Linear elliptic boundary value problems in one, two and three space dimensions; applications in structural, solid and fluid mechanics and heat transfer. Properties of standard element families and numerically integrated elements. Implementation of the finite element method using Matlab, assembly of equations, and element routines. Lagrange multiplier and penalty methods for treatment of constraints. The mathematical theory of finite elements.

ME 335B. Finite Element Analysis. 3 Units.

Finite element methods for linear dynamic analysis. Eigenvalue, parabolic, and hyperbolic problems. Mathematical properties of semi-discrete (t-continuous) Galerkin approximations. Modal decomposition and direct spectral truncation techniques. Stability, consistency, convergence, and accuracy of ordinary differential equation solvers. Asymptotic stability, over-shoot, and conservation laws for discrete algorithms. Mass reduction. Applications in heat conduction, structural vibrations, and elastic wave propagation. Computer implementation of finite element methods in linear dynamics. Implicit, explicit, and implicit-explicit algorithms and code architectures.

ME 335C. Finite Element Analysis. 3 Units.

Newton's method for nonlinear problems; convergence, divergence and bifurcation; consistent linearization of nonlinear variational forms by directional derivative; tangent operator and residual vector; variational formulation and finite element discretization of nonlinear boundary value problems (e.g. nonlinear heat equation, nonlinear elasticity); enhancements of Newton's method: line-search techniques, quasi-Newton and arc-length methods.

ME 337. Mechanics of Growth. 3 Units.

Introduction to continuum theory and computational simulation of living matter. Kinematics of finite growth. Balance equations in open system thermodynamics. Constitutive equations for living systems. Custom-designed finite element solution strategies. Analytical solutions for simple model problems. Numerical solutions for clinically relevant problems such as: bone remodeling; wound healing; tumor growth; atherosclerosis; heart failure; tissue expansion; and high performance training.

ME 338. Continuum Mechanics. 3 Units.

Linear and nonlinear continuum mechanics for solids. Introduction to tensor algebra and tensor analysis. Kinematics of motion. Balance equations of mass, linear and angular momentum, energy, and entropy. Constitutive equations of isotropic and anisotropic hyperelasticity. Recommended as prerequisite for Finite Element Methods.

ME 338B. Continuum Mechanics. 3 Units.

Constitutive theory; equilibrium constitutive relations; material frame indifference and material symmetry; finite elasticity; formulation of the boundary value problem; linearization and well-posedness; symmetries and configurational forces; numerical considerations.

ME 339. Introduction to parallel computing using MPI, openMP, and CUDA. 3 Units.

This class will give hands on experience with programming multicore processors, graphics processing units (GPU), and parallel computers. Focus will be on the message passing interface (MPI, parallel clusters) and the compute unified device architecture (CUDA, GPU). Topics will include: network topologies, modeling communication times, collective communication operations, parallel efficiency, MPI, dense linear algebra using MPI. Symmetric multiprocessing (SMP), pthreads, openMP. CUDA, combining MPI and CUDA, dense linear algebra using CUDA, sort, reduce and scan using CUDA. Pre-requisites include: C programming language and numerical algorithms (solution of differential equations, linear algebra, Fourier transforms). Same as: CME 213.

ME 340. Theory and Applications of Elasticity. 3 Units.

This course provides an introduction to the elasticity theory and its application to material structures at microscale. The basic theory includes the definition of stress, strain and elastic energy; equilibrium and compatibility conditions; and the formulation of boundary value problems. We will mainly discuss the stress function method to solve 2D problems and will briefly discuss the Green's function approach for 3D problems. The theory and solution methods are then applied to contact problems as well as microscopic defects in solids, such as voids, inclusions, cracks, and dislocations. Computer programming in Matlab is used to aid analytic derivation and numerical solutions of elasticity problems.

ME 342. Theory and Application of Inelasticity. 3 Units.

Theories of plasticity and fracture phenomena from both phenomenological and micromechanical viewpoints. Yield surface, flow rules, strain hardening models, and applications to creep. Plastic zone near crack tip. Linear fracture mechanics and other criteria for crack initiation and growth. Application to fatigue. Classical analytic solutions will be discussed together with numerical solutions of plane elastoplastic problems by Matlab.

ME 342A. MEMS Laboratory. 3-4 Units.

Practice and theory of MEMS device design and fabrication, orientation to fabrication facilities, and introduction to techniques for design and evaluation of MEMS devices in the context of designed projects. Emphasis on MEMS design (need finding, brainstorming, evaluation, and design methodology), characterization, and fabrication, including photolithography, etching, oxidation, diffusion, and ion implantation. Limited enrollment. Prerequisite: engineering or science background and consent of instructor.

ME 342D. MEMS Fabrication/Projects. 1-3 Unit.

Emphasis is on process planning, in process testing, nanofabrication training, exposure to MEMS industry applications. Prerequisite: ENGR 341.

ME 343. An Introduction to Waves in Elastic Solids. 3 Units.

One-dimensional motion of an elastic continuum, the linearized theory of elasticity and elastodynamic theory, elastic waves in an unbounded medium, plane harmonic waves in elastic half-spaces including reflection and refraction, slowness, energy velocity and anisotropic effects. Text is first five chapters of Achenbach's *Wave Propagation in Elastic Solids*. (Barnett).

ME 345. Fatigue Design and Analysis. 3 Units.

The mechanism and occurrences of fatigue in service. Methods for predicting fatigue life and for protecting against premature fatigue failure. Use of elastic stress and inelastic strain analyses to predict crack initiation life. Use of linear elastic fracture mechanics to predict crack propagation life. Effects of stress concentrations, manufacturing processes, load sequence, irregular loading, multi-axial loading. Subject is treated from the viewpoints of the engineer seeking up-to-date methods of life prediction and the researcher interested in improving understanding of fatigue behavior. Prerequisite: undergraduate mechanics of materials.

ME 346A. Introduction to Statistical Mechanics. 3 Units.

The main purpose of this course is to provide students with enough statistical mechanics background to the Molecular Simulations classes (ME 346B,C), including the fundamental concepts such as ensemble, entropy, and free energy, etc. The main theme of this course is how the laws at the macroscale (thermodynamics) can be obtained by analyzing the spontaneous fluctuations at the microscale (dynamics of molecules). Topics include thermodynamics, probability theory, information entropy, statistical ensembles, phase transition and phase equilibrium. Recommended: PHYSICS 110 or equivalent.

ME 346B. Introduction to Molecular Simulations. 3 Units.

Algorithms of molecular simulations and underlying theories. Molecular dynamics, time integrators, modeling thermodynamic ensembles (NPT, NVT), free energy, constraints. Monte Carlo simulations, parallel tempering. Stochastic equations, Langevin and Brownian dynamics. Applications in solids, liquids, and biomolecules (proteins). Programming in Matlab.

ME 346C. Advanced Techniques for Molecular Simulations. 3 Units.

Advanced methods for computer simulations of solids and molecules. Methods for long-range force calculation, including Ewald methods and fast multipole method. Methods for free energy calculation, such as thermodynamic integration. Methods for predicting rates of rare events (e.g. nucleation), including nudged elastic band method and umbrella sampling method. Students will work on projects in teams.

ME 347. Mathematical Theory of Dislocations. 3 Units.

The mathematical theory of straight and curvilinear dislocations in linear elastic solids. Stress fields, energies, and Peach-Koehler forces associated with these line imperfections. Anisotropic effects, Green's function methods, and the geometrical techniques of Brown and Indenborn-Orlov for computing dislocation fields and for studying dislocation interactions. Continuously distributed dislocations and cracks and inclusions.

ME 348. Experimental Stress Analysis. 3 Units.

Theory and applications of photoelasticity, strain gages, and holographic interferometry. Comparison of test results with theoretical predictions of stress and strain. Discussion of other methods of stress and strain determination (optical fiber strain sensors, acoustoelasticity, thermoelasticity, brittle coating, Moire interferometry, residual stress determination). Six labs plus mini-project. Limited enrollment. Lab fee.

ME 349. Variational Methods in Elasticity and Plate Theory. 3 Units.

An introduction to variational calculus methods and their applications to the theories of elasticity and plates.

ME 351A. Fluid Mechanics. 3 Units.

Exact and approximate analysis of fluid flow covering kinematics, global and differential equations of mass, momentum, and energy conservation. Forces and stresses in fluids. Euler's equations and the Bernoulli theorem applied to inviscid flows. Vorticity dynamics. Topics in irrotational flow: stream function and velocity potential for exact and approximate solutions; superposition of solutions; complex potential function; circulation and lift. Some boundary layer concepts.

ME 351B. Fluid Mechanics. 3 Units.

Laminar viscous fluid flow. Governing equations, boundary conditions, and constitutive laws. Exact solutions for parallel flows. Creeping flow limit, lubrication theory, and boundary layer theory including free-shear layers and approximate methods of solution; boundary layer separation. Introduction to stability theory and transition to turbulence, and turbulent boundary layers. Prerequisite: 351A.

ME 352A. Radiative Heat Transfer. 3 Units.

The fundamentals of thermal radiation heat transfer; blackbody radiation laws; radiative properties of non-black surfaces; analysis of radiative exchange between surfaces and in enclosures; combined radiation, conduction, and convection; radiative transfer in absorbing, emitting, and scattering media. Advanced material for students with interests in heat transfer, as applied in high-temperature energy conversion systems. Take 352B,C for depth in heat transfer. Prerequisites: graduate standing and undergraduate course in heat transfer. Recommended: computer skills.

ME 352B. Fundamentals of Heat Conduction. 3 Units.

Physical description of heat conduction in solids, liquids, and gases. The heat diffusion equation and its solution using analytical and numerical techniques. Data and microscopic models for the thermal conductivity of solids, liquids, and gases, and for the thermal resistance at solid-solid and solid-liquid boundaries. Introduction to the kinetic theory of heat transport, focusing on applications for composite materials, semiconductor devices, micromachined sensors and actuators, and rarefied gases. Prerequisite: consent of instructor.

ME 352C. Convective Heat Transfer. 3 Units.

Prediction of heat and mass transfer rates based on analytical and numerical solutions of the governing partial differential equations. Heat transfer in fully developed pipe and channel flow, pipe entrance flow, laminar boundary layers, and turbulent boundary layers. Superposition methods for handling non-uniform wall boundary conditions. Approximate models for turbulent flows. Comparison of exact and approximate analyses to modern experimental results. General introduction to heat transfer in complex flows. Prerequisite: 351B or equivalent.

ME 354. Experimental Methods in Fluid Mechanics. 4 Units.

Experimental methods associated with the interfacing of laboratory instruments, experimental control, sampling strategies, data analysis, and introductory image processing. Instrumentation including point-wise anemometers and particle image tracking systems. Lab. Prerequisites: previous experience with computer programming and consent of instructor. Limited enrollment.

ME 355. Compressible Flow. 3 Units.

Topics include quasi-one-dimensional isentropic flow in variable area ducts, normal shock waves, oblique shock and expansion waves, flow in ducts with friction and heat transfer, unsteady one-dimensional flow, and steady two-dimensional supersonic flow.

ME 357. Turbine and Internal Combustion Engines. 3 Units.

Principles of design analysis for aircraft gas turbines and automotive piston engines. Analysis for aircraft engines performed for Airbus A380 type aircraft. Design parameters determined considering aircraft aerodynamics, gas turbine thermodynamics, compressible flow physics, and material limitations. Additional topics include characteristics of main engine components, off-design analysis, and component matching. Performance of automotive piston engines including novel engine concepts in terms of engine thermodynamics, intake and exhaust flows, and in-cylinder flow. Same as: ME 257.

ME 358. Heat Transfer in Microdevices. 3 Units.

Application-driven introduction to the thermal design of electronic circuits, sensors, and actuators that have dimensions comparable to or smaller than one micrometer. The impact of thin-layer boundaries on thermal conduction and radiation. Convection in microchannels and microscopic heat pipes. Thermal property measurements for microdevices. Emphasis is on Si and GaAs semiconductor devices and layers of unusual, technically-promising materials such as chemical-vapor-deposited (CVD) diamond. Final project based on student research interests. Prerequisite: consent of instructor.

ME 359A. Advanced Design and Engineering of Space Systems I. 4 Units.

The application of advanced theory and concepts to the development of spacecraft and missile subsystems; taught by experts in their fields. Practical aspects of design and integration. Mission analysis, systems design and verification, radiation and space environments, orbital mechanics, space propulsion, electrical power and avionics subsystems, payload communications, and attitude control. Subsystem-oriented design problems focused around a mission to be completed in groups. Tours of Lockheed Martin facilities. Limited enrollment. Prerequisites: undergraduate degree in related engineering field or consent of instructor.

ME 359B. Advanced Design and Engineering of Space Systems II. 4 Units.

Continuation of 359A. Topics include aerospace materials, mechanical environments, structural analysis and design, finite element analysis, mechanisms, thermal control, probability and statistics. Tours of Lockheed Martin facilities. Limited enrollment. Prerequisites: undergraduate degree in related field, or consent of instructor.

ME 361. Turbulence. 3 Units.

The nature of turbulent flows, statistical and spectral description of turbulence, coherent structures, spatial and temporal scales of turbulent flows. Averaging, two-point correlations and governing equations. Reynolds averaged equations and stresses. Free shear flows, turbulent jet, turbulent kinetic energy and kinetic energy dissipation, and kinetic energy budget. Kolmogorov's hypothesis and energy spectrum. Wall bounded flows, viscous scales, and law of the wall. Turbulence closure modeling for Reynolds averaged Navier Stokes equations. Direct and large eddy simulation of turbulent flows. Subgrid scale modeling.

ME 362A. Physical Gas Dynamics. 3 Units.

Concepts and techniques for description of high-temperature and chemically reacting gases from a molecular point of view. Introductory kinetic theory, chemical thermodynamics, and statistical mechanics as applied to properties of gases and gas mixtures. Transport and thermodynamic properties, law of mass action, and equilibrium chemical composition. Maxwellian and Boltzmann distributions of velocity and molecular energy. Examples and applications from areas of current interest such as combustion and materials processing.

ME 362B. Nonequilibrium Processes in High-Temperature Gases. 3 Units.

Chemical kinetics and energy transfer in high-temperature gases. Collision theory, transition state theory, and unimolecular reaction theory. Prerequisite: 362A or consent of instructor.

ME 363. Partially Ionized Plasmas and Gas Discharges. 3 Units.

Introduction to partially ionized gases and the nature of gas discharges. Topics: the fundamentals of plasma physics emphasizing collisional and radiative processes, electron and ion transport, ohmic dissipation, oscillations and waves, interaction of electromagnetic waves with plasmas. Applications: plasma diagnostics, plasma propulsion and materials processing. Prerequisite: 362A or consent of instructor.

ME 364. Optical Diagnostics and Spectroscopy. 3 Units.

The spectroscopy of gases and laser-based diagnostic techniques for measurements of species concentrations, temperature, density, and other flow field properties. Topics: electronic, vibrational, and rotational transitions; spectral lineshapes and broadening mechanisms; absorption, fluorescence, Rayleigh and Raman scattering methods; collisional quenching. Prerequisite: 362A or equivalent.

ME 366. Creative Gym: A Design Thinking Skills Studio. 1 Unit.

Build your creative confidence and sharpen your design thinking skills. Train your intuition and expand the design context from which you operate every day. This experimental studio will introduce the d.school to fast-paced experimental exercises that lay the mental and physical foundation for a potent bias toward action, and a deeper knowledge of the personal skills that expert design thinkers utilize in all phases of their process. Exercises will be offered by a number of the d.school's most creatively confident design thinkers. Apply at the first day of class.

ME 367. Optical Diagnostics and Spectroscopy Laboratory. 4 Units.

Principles, procedures, and instrumentation associated with optical measurements in gases and plasmas. Absorption, fluorescence and emission, and light-scattering methods. Measurements of temperature, species concentration, and molecular properties. Lab. Enrollment limited to 16. Prerequisite: 362A or 364.

ME 368. d.Leadership: Design Leadership in Context. 1-3 Unit.

d.Leadership is a course that teaches the coaching and leadership skills needed to drive good design process in groups. d.leaders will work on real projects driving design projects within organizations, and gain real world skills as they experiment with their leadership style while coaching innovation projects. Take this course if you are inspired by past design classes and want skills to lead design projects beyond Stanford. Preference given to students who have taken other Design Group or d.school classes. Admission by application; see dschool.stanford.edu.

ME 368A. Biodesign Innovation: Needs Finding and Concept Creation. 4 Units.

This is the first quarter of a two-quarter course series (OIT 384/OIT 385). In this course, students learn how to develop comprehensive solutions (most commonly medical devices) to some of the most significant medical problems. The first quarter includes an introduction to needs finding methods, brainstorming and concept creation. Students learn strategies for understanding and interpreting clinical needs, researching literature and searching patents. Working in small entrepreneurial multidisciplinary teams, students gain exposure to clinical and scientific literature review, techniques of intellectual property analysis and feasibility, basic prototyping and market assessment. Students create, analyze and screen medical technology ideas, and select projects for future development. Final presentations at the end of the winter quarter to a panel of prominent inventors and investors in medical technology provide the impetus for further work in the spring quarter. Course format includes expert guest lecturers (Thu: 4:15 to 6:05 pm), faculty-led practical demonstrations and coaching sessions and interactive team meetings under the mentorship of Biodesign fellows (Tues: 4:15 to 6:05 pm). Projects from previous years included: prevention of hip fractures in the elderly; methods to accelerate healing after surgery; less invasive techniques for bariatric surgery; point of care diagnostics to improve emergency room efficiency; novel devices to bring specialty-type of care to primary care community doctors. More than 4,000 patients have been treated to date with technologies developed as part of this program and more than ten venture-backed companies were started by alums of the program. Students must apply and be accepted into the course. The application is available online at <http://biodesign.stanford.edu/bdn/courses/bioe374.jsp>.

Same as: BIOE 374A, MED 272A.

ME 368B. Biodesign Innovation: Concept Development and Implementation. 4 Units.

Two quarter sequence (continuation of OIT385 - see OIT384 for complete description of the sequence). The second quarter focuses on how to take a conceptual solution to an important medical need forward from early concept to technology translation, development and possible commercialization. Students expand on the topics they learned in OIT384 to learn about prototyping; patent strategies; advanced planning for reimbursement and FDA approval; choosing translation and commercialization route (licensing vs. start-up); marketing, sales and distribution strategies; ethical issues including conflict of interest; fundraising approaches and cash requirements; financial modeling; essentials of writing a business or research plan; strategies for assembling a development team. Students continue to work in multidisciplinary teams to select a final concept and develop a business plan. Final presentations are made to a panel of prominent venture investors and serve the role of a VC pitch. New students (i.e. students who did not take OIT384 in the winter quarter) will need to submit an application at <http://www.stanford.edu/group/biodesign/courseapplication11.html>. Students who took OIT384 in the winter quarter are automatically accepted into the spring quarter. Same as: BIOE 374B, MED 272B.

ME 369. Cracks, Dislocations, and Waves. 3 Units.

The 6-dimensional formalism of A. N. Stroh will be developed to treat two-dimensional problems in elastically anisotropic media. Stress fields of straight dislocations will be developed, from which the elastic fields of line cracks (treated as continuous distributions of straight dislocations) will be obtained along with stress intensity factors and energy release rates. Steady waves including plane waves, Rayleigh waves, and Stoneley waves will be treated along with problems of reflection and refraction of incident plane waves in joined anisotropic half-spaces. Anisotropic boundary element methods will be discussed. Assignments will include both analytical and semi-analytical work as well as simple numerical methods to implement Stroh's formalism. Class notes and readings will be provided.

ME 370A. Energy Systems I: Thermodynamics. 3 Units.

Thermodynamic analysis of energy systems emphasizing systematic methodology for and application of basic principles to generate quantitative understanding. Exergy, mixtures, reacting systems, phase equilibrium, chemical exergy, and modern computational methods for analysis. Prerequisites: undergraduate engineering thermodynamics and computer skills such as Matlab.

ME 370B. Energy Systems II: Modeling and Advanced Concepts. 4 Units.

Development of quantitative device models for complex energy systems, including fuel cells, reformers, combustion engines, and electrolyzers, using thermodynamic and transport analysis. Student groups work on energy systems to develop conceptual understanding, and high-level, quantitative and refined models. Advanced topics in thermodynamics and special topics associated with devices under study. Prerequisite: 370A.

ME 370C. Energy Systems III: Projects. 3-5 Units.

Refinement and calibration of energy system models generated in ME 370B carrying the models to maturity and completion. Integration of device models into a larger model of energy systems. Prerequisites: 370A,B, consent of instructor.

ME 371. Combustion Fundamentals. 3 Units.

Heat of reaction, adiabatic flame temperature, and chemical composition of products of combustion; kinetics of combustion and pollutant formation reactions; conservation equations for multi-component reacting flows; propagation of laminar premixed flames and detonations. Prerequisite: 362A or 370A, or consent of instructor.

ME 372. Combustion Applications. 3 Units.

The role of chemical and physical processes in combustion; ignition, flammability, and quenching of combustible gas mixtures; premixed turbulent flames; laminar and turbulent diffusion flames; combustion of fuel droplets and sprays. Prerequisite: 371.

ME 374. Dynamics and Kinetics of Nanoparticles. 3 Units.

Part 1: Thermodynamics, transport theories and properties, aerosol dynamics and reaction kinetics of nanoparticles in fluids. Nucleation, gas kinetic theory of nanoparticles, the Smoluchowski equation, gas-surface reactions, diffusion, thermophoresis, conservation equations and useful solutions. Part 2: Introduction to soot formation, nanoparticles in reacting flows, particle transport and kinetics in flames, atmospheric heterogeneous reactions, and nanocatalysis.

ME 375A. StoryViz: Storytelling and Visual Communication. 2-3 Units.

StoryViz is about creating authentic & compelling communication in many media: this year's topics include sketching, video, visual design & performance. Fantastic guests and a bevy of assignments will prepare students to communicate their work and ideas genuinely, concisely, and with a keen sense of wit. Limited enrollment; application required; see <http://dschool.stanford.edu/classes>. Please see notes.

ME 375B. Institute of Design Project 2. 1-6 Unit.

Hands-on, project-based series for d.school students emphasizing innovation and design thinking. Resolving constraints among technical, business, and human concerns to create solutions that benefit society. Real-world design projects in areas such as K-12 education, social entrepreneurship, business prototyping, sustainability, and health and wellness. Design reviews and final course presentations. Industry and adviser interaction. Limited enrollment; application required; see <http://dschool.stanford.edu/classes>.

ME 375C. Institute of Design Project 3. 1-6 Unit.

Hands-on, project-based series for d.school students emphasizing innovation and design thinking. Resolving constraints among technical, business, and human concerns to create solutions that benefit society. Real-world design projects in areas such as K-12 education, social entrepreneurship, business prototyping, sustainability, and health and wellness. Design reviews and final course presentations. Industry and adviser interaction. Limited enrollment; application required; see <http://dschool.stanford.edu/classes>.

ME 376A. Imagining the Future of Learning: SparkTruck - Designing Mobile Interventions for Education. 4 Units.

Created at the d.school last year, SparkTruck has traveled over 15,000 miles across the USA, teaching thousands of kids how to build stuff and unleash their creativity. In this class, students will explore the potential of a mobile platform for affecting change in the educational ecosystem. Topics will include introductions to the design process, modern prototyping tools, and the complex education ecosystem. Students will work in teams in this project-based class, and an emphasis will be placed on real-world prototyping through hands-on field work in local schools. Interested and qualified students will have the opportunity to embark on a cross-country road trip in the SparkTruck this summer. Open to all graduate students and well-qualified undergrads of any major. Enrollment is limited. Apply at www.sparktruck.org/apply. Same as: EDUC 333B.

ME 376C. Institute of Design Project 2. 1-6 Unit.

Hands-on, project-based series for d.school students. Design thinking, design processes, innovation methodologies, need finding, human factors, rapid prototyping, team dynamics, negotiation, and project management. Focus is on resolving constraints among technical, business, and human concerns to create solutions that benefit society. Real-world design projects. Weekly design reviews, final course presentations. Industry and adviser interaction. Limited enrollment; application required; see <http://dschool.stanford.edu/classes>.

ME 377. Design Thinking Bootcamp: Experiences in Innovation and Design. 3-4 Units.

Bootcamp is a fast-paced immersive experience in design thinking. You'll progress through four full cycles of the process, working with a diverse team to solve real world challenges. Field work and deep collaboration with teammates are required of all students. Tenets of design thinking including being human-centered, prototype-driven, and mindful of process. Topics include design processes, innovation methodologies, need finding, human factors, visualization, rapid prototyping, team dynamics, storytelling, and project leadership. Limited enrollment. APPLICATION REQUIRED. See <http://bit.ly/dbootcamp>.

ME 378. Tell, Make, Engage: Action Stories for Entrepreneurship. 1-3 Unit.

Guest discussion leaders with entrepreneurship experience give the course an evolving framework of evaluative methods, formed and reformed by collaborative development within the class. Stories attached to an idea or a discovery, are considered through practice exercises, artifacts, design challenges, short papers, and presentations.

ME 381. Orthopaedic Bioengineering. 3 Units.

Engineering approaches applied to the musculoskeletal system in the context of surgical and medical care. Fundamental anatomy and physiology. Material and structural characteristics of hard and soft connective tissues and organ systems, and the role of mechanics in normal development and pathogenesis. Engineering methods used in the evaluation and planning of orthopaedic procedures, surgery, and devices. Same as: BIOE 381.

ME 382. Biomedical Engineering in Research and Development. 4 Units.

This project based course will cover the application of engineering methods to real world biomedical problems ranging from translational biomedical research to medical device design. Topics will include the emerging importance of preventative strategies, and the biomedical challenges of an aging population. A key element of the course will be the identification of the underlying scientific principles (computational and/or experimental) for solving biomedical problems. The students will gain experience in the formation of project teams; interdisciplinary communication skills; forming testable hypothesis with biological, anatomical, and physiological considerations; testing standards for medical devices; regulatory issues; and intellectual property.

ME 382A. Biomedical Engineering in Research and Development. 4 Units.

This project based course will cover the application of engineering methods to real world biomedical problems ranging from translational biomedical research to medical device design. Topics will include the emerging importance of preventative strategies, and the biomedical challenges of an aging population. A key element of the course will be the identification of the underlying scientific principles (computational and/or experimental) for solving biomedical problems. The students will gain experience in the formation of project teams; interdisciplinary communication skills; forming testable hypothesis with biological, anatomical, and physiological considerations; testing standards for medical devices; regulatory issues; and intellectual property.

ME 382B. Medical Device Design. 4 Units.

Continuation of the projects from 382A. With the assistance of faculty and expert consultants, students finalize research projects or device designs. Strategies for funding biomedical research and new medical ventures will also be covered.

ME 385. Tissue Engineering Lab. 1-2 Unit.

Hands-on experience in the fabrication of living engineered tissues. Techniques include sterile technique, culture of mammalian cells, creation of cell-seeded scaffolds, and the effects of mechanical loading on the metabolism of living engineered tissues. Theory, background, and practical demonstration for each technique. Lab.

ME 387. Soft Tissue Mechanics. 3 Units.

Structure/function relationships and mechanical properties of soft tissues, including nonlinear elasticity, viscoelasticity, and poroelasticity.

ME 388. Transport Modeling for Biological Systems. 3 Units.

Introduction to electric fields, fluid flows, transport phenomena and their application to biological systems. Maxwell's equations, electrostatics, electro-chemical-mechanical driving forces in physiological systems. Ionic diffusion in electrolytes and membrane transport. Fluid and solid continua theory for porous, hydrated biological tissues. Applications include ionic and molecular transport in tissues and cells, electrophoresis, electromechanical and physicochemical interactions in cells and the extracellular matrix of connective tissue.

ME 389. Biomechanical Research Symposium. 1 Unit.

Guest speakers present contemporary research on experimental and theoretical aspects of biomechanical engineering and bioengineering. May be repeated for credit.

ME 390. Thermosciences Research Project Seminar. 1 Unit.

Review of work in a particular research program and presentations of other related work.

ME 390A. High Temperature Gasdynamics Laboratory Research Project Seminar. 1 Unit.

Review of work in a particular research program and presentations of other related work.

ME 391. Engineering Problems. 1-10 Unit.

Directed study for graduate engineering students on subjects of mutual interest to student and staff member. May be used to prepare for experimental research during a later quarter under 392. Faculty sponsor required.

ME 392. Experimental Investigation of Engineering Problems. 1-10 Unit.

Graduate engineering students undertake experimental investigation under guidance of staff member. Previous work under 391 may be required to provide background for experimental program. Faculty sponsor required.

ME 393. Topics in Biologically Inspired or Human Interactive Robotics. 1 Unit.

Application of observations from human and animal physiology to robotic systems. Force control of motion including manipulation, haptics, and locomotion. Weekly literature review forum led by student. May be repeated for credit. (Cutkosky, Waldron, Niemeyer).

ME 395. Seminar in Solid Mechanics. 1 Unit.

Required of Ph.D. candidates in solid mechanics. Guest speakers present research topics related to mechanics theory, computational methods, and applications in science and engineering. May be repeated for credit. See <http://mc.stanford.edu>.

ME 396. Design and Manufacturing Forum. 1 Unit.

Invited speakers address issues of interest to design and manufacturing engineering and business students. Sponsored by the Product Realization Laboratory at Stanford. Same as: ME 196.

ME 397. Design Theory and Methodology Seminar. 1-3 Unit.

What do designers do when they do design? How can their performance be improved? Topics change each quarter. May be repeated for credit.

ME 399. Fuel Cell Seminar. 1 Unit.

Interdisciplinary research in engineering, chemistry, and physics. Talks on fundamentals of fuel cells by speakers from Stanford, other academic and research institutions, and industry. The potential to provide high efficiency and zero emissions energy conversion for transportation and electrical power generation.

ME 400. Thesis. 2-15 Units.

Investigation of some engineering problems. Required of Engineer degree candidates
Same as: Engineer Degree.

ME 405. Asymptotic Methods in Computational Engineering. 3 Units.

This course is not a standard teaching of asymptotic methods as thought in the applied math programs. Nor does it involve such elaborate algebra and analytical derivations. Instead, the class relies on students' numerical programming skills and introduces improvements on numerical methods using standard asymptotic and scaling ideas. The main objective of the course is to bring physical insight into numerical programming. Majority of the problems to be explored involve one- and two-dimensional transient partial differential equations. Topics include: 1-Review of numerical discretization and numerical stability, 2-Implicit versus explicit methods, 3-Introduction to regular and singular perturbation problems, 4-Method of matched asymptotic expansions, 5-Stationary thin interfaces: boundary layers, Debye layers, 6-Moving thin interfaces: shocks, phase-interfaces, 7-Reaction-diffusion problems, 8-Directional equilibrium and lubrication theory.

ME 406. Turbulence Physics and Modeling Using Numerical Simulation Data. 2 Units.

Prerequisite: consent of instructor.

ME 408. Spectral Methods in Computational Physics. 3 Units.

Data analysis, spectra and correlations, sampling theorem, nonperiodic data, and windowing; spectral methods for numerical solution of partial differential equations; accuracy and computational cost; fast Fourier transform, Galerkin, collocation, and Tau methods; spectral and pseudospectral methods based on Fourier series and eigenfunctions of singular Sturm-Liouville problems; Chebyshev, Legendre, and Laguerre representations; convergence of eigenfunction expansions; discontinuities and Gibbs phenomenon; aliasing errors and control; efficient implementation of spectral methods; spectral methods for complicated domains; time differencing and numerical stability. Same as: CME 322.

ME 409. Advanced Design Studies in Product Realization. 3-5 Units.

Advanced Design Studies in Product Realization provides advanced engineering design graduate students with the technical and intellectual resources necessary to produce an unambiguously professional-quality project in an area of individual specialization. Emphasis is on integrated design and manufacture of a project in a diverse range of processes and materials. Students will meet bi-weekly to receive collegial support and critique from the instructor, interdisciplinary faculty mentor team, practitioners in the field, and students enrolled in the course. Prerequisites: Students will be accepted into the program on the basis of a portfolio review and a brief essay describing the proposed project. Students will be asked to name a faculty member who can provide a reference upon request. Instructor consent required.

ME 410A. Foresight and Innovation. 3-5 Units.

Three quarter sequence. Learn how to develop technology-based visions and make them succeed. This course provides an intensive and hands-on approach to multiple foresight and strategy methods that teach you how to develop radical innovation. Students build an innovation model and prototype. Prerequisite: consent of instructor.

ME 410B. Foresight and Innovation. 1-5 Unit.

Continuation of ME410A. With model prototype in hand, students have the opportunity to further develop their innovation.

ME 410C. Foresight and Innovation. 1-5 Unit.

Continuation of ME410B. With model prototype in hand, students have the opportunity to further develop their innovation.

ME 411. Advanced Topics in Computational Solid Mechanics. 3 Units.

Discussion of the use of computational simulation methods for analyzing and optimizing production processes and for developing new products, based on real industrial applications in the metal forming industry. Brief review of linear and nonlinear continuum mechanics and the use of finite element methods to model solid mechanics problems, constitutive relations for metals, coupled thermo-elasto-plastic (viscoplastic) problems, modeling metal production processes: bulk metal forming processes using rigid/viscoplastic material models, application examples: hot rolling of plates and the Mannesmann piercing processes and modeling the service behavior of steel pipes. Prerequisites: ME 338A, ME 335A,B,C, or consent of instructor.

ME 412. Engineering Functional Analysis and Finite Elements. 3 Units.

Concepts in functional analysis to understand models and methods used in simulation and design. Topology, measure, and integration theory to introduce Sobolev spaces. Convergence analysis of finite elements for the generalized Poisson problem. Extensions to convection-diffusion-reaction equations and elasticity. Upwinding. Mixed methods and LBB conditions. Analysis of nonlinear and evolution problems. Prerequisites: 335A,B, CME 200, CME 204, or consent of instructor. Recommended: 333, MATH 171. Same as: CME 356.

ME 413. Quantum Confinement Structures: Physics and Fabrication. 3 Units.

Quantum mechanics principles and the thermodynamics of confinement structures. Focus is on potential applications such as solar cells and catalysis. Student presentations. Lab demonstrations. Prerequisite: background in quantum mechanics and statistical thermodynamics.

ME 414. Solid State Physics for Mechanical Engineering Experiments. 3 Units.

Introductory overview of principles of statistical mechanics, quantum mechanics and solid-state physics. Provides graduate Mechanical Engineering students with the understanding needed to work on devices or technologies which rely on solid-state physics. (Alternate years, not offered summer 2012).

ME 417. Total Product Integration Engineering. 4 Units.

For students aspiring to be product development executives and leaders in research and education. Advanced methods and tools beyond the material covered in 217: quality design across global supply chain, robust product architecture for market variety and technology advances, product development risk management. Small teams or individuals conduct a practical project that produces a case study or enhancement to produce development methods and tools. May be repeated for credit. Enrollment limited to 12. Prerequisites: 317A,B.

ME 420. Applied Electrochemistry at Micro- and Nanoscale. 3 Units.

The class is an introduction to applied electrochemistry with focus on micro- and nanoscale applications. Basic concepts of physical chemistry are presented, of which the fundamentals of electrochemistry are built. Theory of electrochemical methods for material analyses and material modifications are discussed with emphasis on the scaling behaviors. This year electrochemical energy generation/storage devices with focus on batteries will be discussed in class. Journals articles are reviewed within the framework of the course with focus on current problems and needs in and energy conversion and storage.

ME 421. European Entrepreneurship and Innovation Thought Leaders Seminar. 1 Unit.

Lessons from real-world experiences and challenges in European startups, corporations, universities, non-profit research institutes and venture finance organizations. Speakers include entrepreneurs, leaders from global technology companies, university researchers, venture capitalists, legal experts, senior policy makers and other guests from selected European countries and regions. Geographic scope encompasses Ireland to Russia, and Scandinavia to the Mediterranean region. Enrollment open to undergraduates and graduates in any school or department at Stanford.

ME 423. D.HEALTH: Design Thinking for Better Health. 3 Units.

In the U.S., 75% of medical expenditures are for illnesses that are lifestyle related such as diabetes and heart disease. If patients could change their lifestyles, medical problems could be avoided and a healthier and happier life achieved. Class employs design thinking in teams. Individual projects and small and large team projects with multiple milestones. Students work in the field, and present in class. Design Institute class; see <http://dschool.stanford.edu>.

ME 429. COMMERCIAL MEMS DESIGN. 3 Units.

This course, taught by Dr. Gary O'Brien of the Bosch RTC, will provide insight into the issues and challenges in designing MEMS device for commercial and automotive applications. Topics to be covered in the class will include device simulation and design, design of experiments, compensation for cross-wafer and wafer-to-wafer fabrication variations, design for extreme environments, analysis and management of reliability issues including package stress, shock, drift, cost analysis of manufacturing processes, and some discussion of the unique challenges for consumer and automotive customers and markets. Student teams will develop a device design, fabrication process, and manufacturing analysis in response to a specification.

ME 440. Electronic States and Transitions In Quantum Confined Structures. 3 Units.

Summary of selected quantum mechanical concepts with focus on phenomena related to charge separation and transfer. The physics and thermodynamics of excitons described and related to experimental observations. The energy state of electrons as function of confinement size and strength. Presentations include on electron tunneling, measuring the density of electronic states, dielectric behavior of materials, Bose Einstein condensation of quasi particles, and excitons in quantum wells and dots.

ME 450. Advances in Biotechnology. 3 Units.

Guest academic and industrial speakers. Latest developments in fields such as bioenergy, green process technology, production of industrial chemicals from renewable resources, protein pharmaceutical production, industrial enzyme production, stem cell applications, medical diagnostics, and medical imaging. Biotechnology ethics, business and patenting issues, and entrepreneurship in biotechnology.

ME 451B. Advanced Fluid Mechanics. 3 Units.

Waves in fluids: surface waves, internal waves, inertial and acoustic waves, dispersion and group velocity, wave trains, transport due to waves, propagation in slowly varying medium, wave steepening, solitons and solitary waves, shock waves. Instability of fluid motion: dynamical systems, bifurcations, Kelvin-Helmholtz instability, Rayleigh-Benard convection, energy method, global stability, linear stability of parallel flows, necessary and sufficient conditions for stability, viscosity as a destabilizing factor, convective and absolute instability. Focus is on flow instabilities. Prerequisites: graduate courses in compressible and viscous flow.

ME 451C. Advanced Fluid Mechanics. 3 Units.

Compressible flow: governing equations, Crocco-Vazsonyi's equations, creation and destruction of vorticity by compressibility effects, shock waves. Modal decomposition of compressible flow, linear and nonlinear modal interactions, interaction of turbulence with shock waves. Energetics of compressible turbulence, effects of compressibility on free-shear flows, turbulent boundary layers, Van Driest transformation, recovery temperature, and shock/boundary layer interaction. Strong Reynolds analogy, modeling compressible turbulent flows. Prerequisites: 355, 361A, or equivalents.

ME 451D. Microhydrodynamics. 3 Units.

Transport phenomena on small-length scales appropriate to applications in microfluidics, complex fluids, and biology. The basic equations of mass, momentum, and energy, derived for incompressible fluids and simplified to the slow-flow limit. Topics: solution techniques utilizing expansions of harmonic and Green's functions; singularity solutions; flows involving rigid particles and fluid droplets; applications to suspensions; lubrication theory for flows in confined geometries; slender body theory; and capillarity and wetting. Prerequisites: 120A,B, 300, or equivalents.

Same as: CHEMENG 310.

ME 453A. Finite Element-Based Modeling and Simulation of Linear Fluid/Structure Interaction Problems. 3 Units.

Basic physics behind many fluid/structure interaction phenomena.

Finite element-based computational approaches for linear modeling and simulation in the frequency domain. Vibrations of elastic structures. Linearized equations of small movements of inviscid fluids. Sloshing modes. Hydroelastic vibrations. Acoustic cavity modes. Structural-acoustic vibrations. Applications to liquid containers and underwater signatures. Prerequisite: graduate course in the finite element method or consent of instructor.

ME 453B. Computational Fluid Dynamics Based Modeling of Nonlinear Fluid/Structure Interaction Problems. 3 Units.

Basic physics behind many high-speed flow/structure interaction phenomena. Modern computational approaches for nonlinear modeling and simulation in the time domain. Dynamic equilibrium of restrained and unrestrained elastic structures. Corotational formulation for large structural displacements and rotations. Arbitrary Lagrangian-Eulerian description of inviscid and viscous flows. Time-accurate CFD on moving and deforming grids. Discrete geometric conservation laws. Discretization of transmission conditions on non-matching discrete fluid/structure interfaces. Coupled fluid/mesh-motion/structure time integration schemes. Application to divergence, flutter, and buffeting. Prerequisites: graduate course in the finite element method, and in computational fluid dynamics.

ME 455. Complex Fluids and Non-Newtonian Flows. 3 Units.

Definition of a complex liquid and microrheology. Division of complex fluids into suspensions, solutions, and melts. Suspensions as colloidal and non-colloidal. Extra stress and relation to the stresslet. Suspension rheology including Brownian and non-Brownian fibers. Microhydrodynamics and the Fokker-Planck equation. Linear viscoelasticity and the weak flow limit. Polymer solutions including single mode (dumbbell) and multimode models. Nonlinear viscoelasticity. Intermolecular effects in nondilute solutions and melts and the concept of reptation. Prerequisites: low Reynolds number hydrodynamics or consent of instructor. Same as: CHEMENG 462.

ME 457. Fluid Flow in Microdevices. 3 Units.

Physico-chemical hydrodynamics. Creeping flow, electric double layers, and electrochemical transport such as Nernst-Planck equation; hydrodynamics of solutions of charged and uncharged particles. Device applications include microsystems that perform capillary electrophoresis, drug dispensation, and hybridization assays. Emphasis is on bioanalytical applications where electrophoresis, electro-osmosis, and diffusion are important. Prerequisite: consent of instructor.

ME 458. Advanced Topics in Electrokinetics. 3-5 Units.

Electrokinetic theory and electrokinetic separation assays. Electroneutrality approximation and weak electrolyte electrophoresis theory. Capillary zone electrophoresis, field amplified sample stacking, isoelectric focusing, and isotachopheresis. Introduction to general electrohydrodynamics (EHD) theory including the leaky dielectric concept, the Ohmic model formulation, and electrokinetic flow instabilities. Prerequisite: ME 457.

ME 461. Advanced Topics in Turbulence. 3 Units.

Turbulence phenomenology; statistical description and the equations governing the mean flow; fluctuations and their energetics; turbulence closure problem, two-equation turbulence models, and second moment closures; non-local effect of pressure; rapid distortion analysis and effect of shear and compression on turbulence; effect of body forces on turbulent flows; buoyancy-generated turbulence; suppression of turbulence by stratification; turbulent flows of variable density; effect of rotation on homogeneous turbulence; turbulent flows with strong vortices. Prerequisites: 351B and 361A, or consent of instructor.

ME 463. Advanced Topics in Plasma Science and Engineering. 3 Units.

Research areas such as plasma diagnostics, plasma transport, waves and instabilities, and engineering applications.

ME 468. Experimental Research in Advanced User Interfaces. 1-5 Unit.

Project-based course involves small (3-4) person teams going through all parts of the experimental process: question generation, experiment design, running, and data analysis. Each team creates an original, publishable project that represents a contribution to the research and practicum literatures. All experiments involve interaction between people and technology, including cars, mobile phones, websites, etc. Prerequisite: consent of instructor.

Same as: COMM 168, COMM 268, COMM 368.

ME 469. Computational Methods in Fluid Mechanics. 3 Units.

The last two decades have seen the widespread use of Computational Fluid Dynamics (CFD) for analysis and design of thermal-fluids systems in a wide variety of engineering fields. Numerical methods used in CFD have reached a high degree of sophistication and accuracy. The objective of this course is to introduce *classical* approaches and algorithms used for the numerical simulations of incompressible flows. In addition, some of the more recent developments are described, in particular as they pertain to unstructured meshes and parallel computers. An in-depth analysis of the procedures required to certify numerical codes and results will conclude the course.

ME 469B. Computational Methods in Fluid Mechanics. 3 Units.

Advanced CFD codes. Geometry modeling, CAD-CFD conversion. Structured and unstructured mesh generation. Solution methods for steady and unsteady incompressible Navier-Stokes equations. Turbulence modeling. Conjugate (solid/fluid) heat transfer problems. Development of customized physical models. Batch execution for parametric studies. Final project involving solution of a problem of student's choosing. Prerequisite: ME 300C/CME 206.

ME 470. Uncertainty Quantification. 3 Units.

Uncertainty analysis in computational science. Probabilistic data representation, propagation techniques and validation under uncertainty. Mathematical and statistical foundations of random variables and processes for uncertainty modeling. Focus is on state-of-the-art propagation schemes, sampling techniques, and stochastic Galerkin methods. The concept of model validation under uncertainty and the determination of confidence bounds estimates. Prerequisite: basic probability and statistics at the level of CME 106 or equivalent.

ME 471. Turbulent Combustion. 3 Units.

Basis of turbulent combustion models. Assumption of scale separation between turbulence and combustion, resulting in Reynolds number independence of combustion models. Level-set approach for premixed combustion. Different regimes of premixed turbulent combustion with either kinematic or diffusive flow/chemistry interaction leading to different scaling laws and unified expression for turbulent velocity in both regimes. Models for non-premixed turbulent combustion based on mixture fraction concept. Analytical predictions for flame length of turbulent jets and NO_x formation. Partially premixed combustion. Analytical scaling for lift-off heights of lifted diffusion.

ME 484. Computational Methods in Cardiovascular Bioengineering. 3 Units.

Lumped parameter, one-dimensional nonlinear and linear wave propagation, and three-dimensional modeling techniques applied to simulate blood flow in the cardiovascular system and evaluate the performance of cardiovascular devices. Construction of anatomic models and extraction of physiologic quantities from medical imaging data. Problems in blood flow within the context of disease research, device design, and surgical planning.

Same as: BIOE 484.

ME 485. Modeling and Simulation of Human Movement. 3 Units.

Direct experience with the computational tools used to create simulations of human movement. Lecture/labs on animation of movement; kinematic models of joints; forward dynamic simulation; computational models of muscles, tendons, and ligaments; creation of models from medical images; control of dynamic simulations; collision detection and contact models.

Prerequisite: 281, 331A,B, or equivalent.

Same as: BIOE 485.

ME 491. Ph.D. Teaching Experience. 3 Units.

Required of Ph.D. students. May be repeated for credit.

ME 492. Mechanical Engineering Teaching Assistance Training. 1 Unit.**ME 495A. ME Seminar Series: Theoretical and Computational Fluid Dynamics. 1 Unit.**

Seminars will feature early career mechanical engineers working on leading edge problems in theoretical and computational fluid mechanics and related disciplines. Guest speakers will come from top universities within the U.S. and internationally and will discuss both their past research and plans for building a research program in the future.

ME 495B. ME Seminar Series: At the Interface between Mechanical Engineering and Biology. 1 Unit.

Seminars will feature early career mechanical engineers working on leading edge problems in biomechanical engineering. Topics include mechanobiology, cell mechanics, transport phenomena in biological systems, bio-inspired design, design and analysis of biodevices or bioinstrumentation, biomaterials, and modeling of physiological systems. Guest speakers will come from top universities within the U.S. and internationally, and will discuss both their past research and plans for building a research program in the future.

ME 500. Thesis. 1-15 Unit.

Same as: Ph.D.

ME 801. TGR Project. 0 Units.**ME 802. TGR Dissertation. 0 Units.**

Medicine Courses

MED 1A. Leadership in Multicultural Health. 2 Units.

Designed for undergraduates serving as staff for the Stanford Medical Youth Science Summer Residential Program (SRP). Structured opportunities to learn, observe, participate in, and evaluate leadership development, multicultural health theories and practices, and social advocacy. Utilizes service learning as a pedagogical approach to developing an understanding of the intersections between identity, power and privilege and disparities (health, education, environment), fostering knowledge and skills to become social advocates to address forms of inequities. Students explore approaches for identifying and tackling issues of equity (health and education) as well as learn fundamental skills necessary to implement activities for the Summer Residential Program.

MED 1B. Identity, Power and Privilege in Multicultural Health. 1 Unit.

An independent study service learning course designed to develop students' understanding of the intersection between identity, power, privilege, and disparities (health, education, environment). Students submit a written reflective term paper based on their experience as staff for the Summer Residential Program as well as their understanding of how constructs of identity, power and privilege impact low-income and underrepresented students in their pursuit of higher education. Prerequisite MED 1A.

MED 10SC. Responses to the AIDS Epidemic. 2 Units.

This course focuses on the HIV epidemic, in particular the history of HIV in San Francisco and the Bay Area. We will meet the people and visit the institutions which played key roles in the Public Health prevention, care, and treatment of HIV. This will include key locations in the City, including the AIDS Grove, San Francisco General Hospital, the San Francisco Department of Public Health, the Castro, and local AIDS service organizations. Students will hear from patients, physicians, and activists who are living with AIDS. We will also meet with scientists at UCSF, Stanford, and local pharmaceutical companies who are at the forefront of new prevention, therapeutic, and diagnostic research. The course will emphasize the multi-disciplinary and multi-sector approach to epidemic infectious disease and how physicians, patients, epidemiologists, pharmaceutical companies, and policymakers developed effective responses to the AIDS epidemic. AIDS experts from the Stanford community and elsewhere will be invited to share their perspectives with us. In preparation for the seminar, you will be required to read Barnett and Whiteside's AIDS in the Twenty-First Century and selected scientific articles. As part of a group, you will also develop an AIDS-related project of your choice which you will present on the last day of class.

MED 50Q. Respiration. 3 Units.

Preference to sophomores. Topics include: the biological basis for use of oxygen for aerobic metabolism in animals, human lung physiology and pathophysiology, comparative physiology of respiration in fish, birds and mammals, new insights into mammalian lung development, current challenges in human respiratory health including air pollution and lung cancer. Student presentations on specific topics based on literature research developed in consultation with the instructor. Application required.

MED 70Q. Cancer and the Immune System. 2 Units.

Preference to sophomores. Myths and facts surrounding the idea that the immune system is capable of recognizing malignant cells. The biological basis and function of effector arms of the immune system; how these mechanisms may be used to investigate the biological basis and potential therapy of cancer. How the immune system functions.

MED 71N. Hormones in a Performance-Enhanced Society. 3 Units.

(Formerly 117Q) Preference to freshmen. Explores how the availability of hormone therapy has affected various aspects of daily lives. Topics include the controversies concerning menopause and its treatment; use of hormones in athletics; cosmetic use of hormones to enhance growth, strength, and libido; use of hormones as anti-aging drugs; and how the hormone system has influenced our notions of gender. Includes the biochemistry and physiology of the human endocrine system; how hormones influence behavior, and how to read a scientific paper.

MED 87Q. Women and Aging. 5 Units.

Preference to sophomores. Biology, clinical issues, social and health policies of aging; relationships, lifestyles, and sexuality; wise women and grandmothers. Sources include scientific articles, essays, poetry, art, and film. Service-learning experience with older women. Service Learning Course (certified by Haas Center). Same as: HUMBIO 87Q.

MED 88Q. Dilemmas in Current Medical Practice. 3 Units.

Preference to sophomores. Social, political, scientific, and economic forces influencing medical practice. Spiraling costs, impaired access to health care, and disillusionment toward the health care system. Attempts by government and medical insurers to control costs through managed care and health maintenance organizations. Medical education and how it has affected the practice of medicine. Alternative health care, preventive medicine, and the doctor-patient relationship. The paradox of health in America: why do so many people who are healthy feel unhealthy? Mandatory observation of instructors in their medical practices.

MED 108Q. Human Rights and Health. 3 Units.

Preference to sophomores. History of human-rights law. International conventions and treaties on human rights as background for social and political changes that could improve the health of groups and individuals. Topics such as: regional conflict and health, the health status of refugees and internally displaced persons; child labor; trafficking in women and children; HIV/AIDS; torture; poverty, the environment and health; access to clean water; domestic violence and sexual assault; and international availability of drugs. Possible optional opportunities to observe at community sites where human rights and health are issues. Guest speakers from national and international NGOs including Doctors Without Borders; McMaster University Institute for Peace Studies; UC Berkeley Human Rights Center; Kiva. PowerPoint presentation on topic of choice required.

MED 120N. Pathophysiology of Diseases of the Heart. 3 Units.
