## Index

A	В
absences, prolonged, 65	Bayh-Dole Act, 33, 187
abstracts	behavior
for grant applications, 165	modifying for leadership development, 51
for research papers, 179, 180	rules for, 63–67
academic health center, 28–29	benchwork, planning, 131–132
accommodating, in managing conflicts, 70	benefits, employee, 20
accomplishment, measures of, 100	best practices, in consulting agreements, 197–198
active assessments, for large lectures, 223, 242–244	billable hours, for physician-scientists, 21
active learning	Blackboard, course management systems from, 229
in the classroom, 216–220	Blanchard and Hershey model, 55-56
defining, 216	bloodborne pathogens, requirements for using, 32
in the lab, 220–221, 233	Bloom's Taxonomy, 224, 225, 245–246
at a medical school, 221–222	board of trustees, 26
principles of, 215–221	bottlenecks, identifying in project management, 132
reviewing with teaching assistants, 231	budgeting, 32, 168–170
setting the stage for, 220	C
in small and large settings, 216	C
tools of, 216	Career Awards in Biomedical Sciences (CABS), 19
activities, in project management, 129, 131	career development, for junior faculty, 213
activities plan, 131, 141	career summary, for job interview, 9
administrative budget supplement, 169	career trajectory, for tenure-track physician-
administrative structure, of medical school, 29	scientists, 45
administrators, getting acquainted with, 30	case-based learning, 222
admissions committees, 36 advance preparation, for job interviews, 11–12	case-based problems, 218–219 Center for Scientific Review (CSR), 154
advertising for staff, 79	chalk talk, 15
adviser	championing a project, 134
versus mentor, 99–100	chancellor, university, 26
relationship with, 11	chemicals, requirements for using, 32
American Association of University Professors	chief executive officers, of academic health
(AAUP), 17, 20	centers, 29
American Chemical Society, salary survey, 20	childcare arrangements, 122–123
analysis questions, 245	choices, time management, 115
animal studies, requirements for, 32	citation index, 176
application questions, 245	classroom, active learning in, 216–220
archival software, for storing data, 152	classroom clickers. See clickers
archiving data, 148, 150, 152	classroom time, controlling, 120
assertiveness, in managing conflict, 70	clickers, 219, 223, 242
assessments	clinical duties, of tenure-track physician-scientists, 45
by the instructor, 216	clinical settings, research in. See physician-scientists
of student learning, 223–225	clinical time, "buying out" of, 21
Association of American Medical Colleges, salary	coaching behavior, 56
survey, 20	collaborating, in managing conflicts, 70–71
assumptions, of a statement of work, 128	collaborations, 201–210
"at will" appointments, 18	agreements, 204–205
audience, for a project, 128–129	assessing opportunities for, 202–203
authority, delegating, 56–57	failure of, 209
authorship, 9. See also journals; papers and collaborations, 206–207	ingredients of successful, 205–207 international, 208–209
first, 179–180	resources, 210
guidelines for, 65	setting up, 2, 203–205
and postdoc qualifications, 82	special challenges for beginning
setting expectations for, 65	investigator, 207–208
avoiding, managing conflicts, 70	and sponsored research agreements, 196
	and technology transfer issues, 205–207
	and tenure issues, 203, 207
	varieties of, 201
	collaborator, personal qualities of a good, 207

colleagues, meeting potential, 15	determining what to teach, 227–228
college laboratory. See laboratory	dividing into pieces, 230
college-level responsibility, within university	goals for, 228
structure, 27–28	to improve leadership skills, 52
comments, soliciting from trainees, 40	improving existing, 226–227
commercialization	planning to teach, 215
of research results, 187	structure of, 229
as step in technology transfer, 188	teaching several times, 234
university record on, 192	themes of, 228
committees, 30–31	course syllabus, preparing, 230
accepting responsibilities for, 42	cover letters
and gender equity issues, 109, 120	grant application, 165
strategy for joining, 36–37	job application, 8–9
committee work, 35–37. See also service	for publication submissions, 179, 180
and time management, 120	creativity, encouragement of, 100–101
communication	CRISP database (NIH), 164
between collaborators, 203-205	cultural diversity, 86, 109. See also diversity
family, 121–122	cultural issues, in mentoring, 108–109
within the lab, 57–60	curricula, borrowing or adapting, 234
communication formats, in journals, 175–176	curriculum vitae (CV), 9
community service, of tenure-track physician-	compared to a teaching portfolio, 235
scientists, 45	as part of tenure dossier, 40
competing	
budget supplements, 169	D
as a conflict-handling mode, 70	database programs, for lab protocol tracking, 150
comprehension questions, 245	databases, for data management, 151
compromising, in managing conflicts, 71	data management, 2, 143–152
concept maps, in active assessment, 243	resources, 144, 145, 152
confidentiality, in mentoring, 98	data management system
confirmation letters, for grant applications, 170	assigning responsibility for, 148
conflict of commitment, 198	developing, 147–148
conflict of interest (COI)	how long to keep information in, 148, 150
and consulting agreements, 198	selecting, 150–152
and multiple collaborations, 208	what to store, 148, 150
with technology transfer, 198-199	data storage, 150–152
conflict resolution, 107	date of discovery, documentation of, 144
conflicts	deans
management of, 69	medical school, 29
resolving, 71–72	university, 27
styles of handling, 69–72	decisions, making
constraints section, of a statement of work, 128	in complete isolation, 62
consulting, 37–38	consulting with other individuals, 63
agreements, 197–198	with the group, 63
when making a decision, 63	passing on to others, 63
contingency plans, for projects, 135	as the principal investigator, 62–63
contracts office, 32–33	steps in making, 63
contractual requirements, 144	delegating responsibility, 56–57
cooperative learning, 216	departmental administrators, 30
cooperativeness, in managing conflicts, 70	departmental business manager, 30
copyright, 191	departmental committees, 31
core concepts, within course themes, 228	department chairs
core facilities, university, 31	of medical school, 29
costs, direct versus indirect, 168	receiving feedback from, 62
cost sharing, and equipment, 170	role in review process, 40, 43
The Council of Graduate Schools, 99	at a university, 28
couples, two-academic career, 9	design patents, 189
course design, 226–230	development office, 33
course management systems (CMSs), 229	direct costs, versus indirect, 168
courses	directive behavior, 55–56
designing new, 227–230	directive questions, for interviewing, 83
determining how to teach, 229-230	disclosure, invention, 189, 190
determining if students are learning, 230	disconnecting, in time management, 115

discrimination	faculty appointments, 18, 23
avoiding, 78	at medical centers, 23
employment, 78	to more than one department, 18
and gender and minority issues, 108–109	obtaining details about, 18
discussion, in technology transfer, 188	partner-hire packages, 9
dismissals, staff, 91–94, 104	at will, 18
diversity. See also cultural diversity	faculty facilitator. See facilitator
and science, 212	faculty governing bodies, 30–31
division chiefs, of medical school, 29	faculty handbook, 27
documentation. See also laboratory notebooks; record	faculty mentor, 42
keeping	faculty position
and dismissal proceedings, 93–94	interview for, 11–16
laboratory, 101	negotiating, 2, 16–23, 191, 197, 235
document-naming protocols, 148–149	obtaining, 2, 191, 197
dossier, tenure, 40–41	obtaining and negotiating, 5–23
dress code, for job interview, 12	faculty recruitment, technology transfer and, 192
drivers, of a project, 129	faculty senate, 30
TC	family responsibilities
E	and gender equity issues, 109
editorial guidelines, 179	and time management, 121–123
editors, journal, 129, 176	Federal Advisory Committee Act, 157
electronic document file names, 149	feedback
electronic keypads. See clickers	about learning, 242
electronic laboratory notebooks (ELNs), 145	giving and receiving in the lab, 60–62
electronic records, 145, 148	providing to teaching assistants, 231
electronic submission of papers, 180–181	staff performance, 75–76
e-mail	on teaching, 214
managing, 115	figures, in research proposals, 10
to potential collaborators, 203–204	FileMaker Pro, 151
employee benefits, 20	filing decisions, as step in technology transfer, 188
employees, versus students, 77–78	financial support. See funding
employment discrimination, 78	five-year plan, for tenure, 41–45
employment termination, 93–94, 104	focus, maintaining, 116
environmental health and safety office, 32	follow-up, to job interview, 16
equipment	Food and Drug Administration (FDA), data storage
and grant applications, 170	guidelines, 144, 145, 152
maintenance, 150	foreign applicants, 88, 91, 94
equity income, 192	foreign patent rights, 190, 192
errors, documentation of, 146	forms
essay questions, 224–225	materials request and transfer, 150
ethics. See research ethics	performance review, 75–76
evaluation, in technology transfer, 188	telephone interview, 84, 96
evaluation questions, 246	fraud, avoiding, 144
events, in project management, 129–131	front matter (publication format), 176
examination questions, developing, 224–225	funding, 153–174. See also R01 grant
examinations, types of, 225	and collaboration agreements, 205
examples, real-world	for international collaborations, 208–209
in active learning, 219	obtaining, 2
in project management, 137	resources, 170, 172, 173–174
exercises, in-class, 218–219	and staff recruitment, 80
expectations	university, 26, 32
communicating to lab members, 57–58, 61	G
examples of, 63–67	
F	Gantt chart, in project management, 131, 142
	gender issues, in mentoring, 108–109
facilitator, teacher as, 216, 222	genomics, record-keeping methods for, 144
faculty	giving feedback, in the lab, 60–61
career development for, 213	goals
getting acquainted with, 30	of accomplishment, for lab members, 100
meeting with, 15	of a course, 215
professional responsibilities of, 25	for course content, 228
recruitment, and technology transfer, 192	defining, 113–114

in a lab mission statement, 54	ownership of at the university level, 191
for leadership development, 51	and sponsored research agreements, 196
governing board	isolation, making decisions in, 62
role in review process, 40	
university, 26	Ţ
governing bodies, faculty, 30–31	job application, 8–11
grading, by teaching assistants, 232	job descriptions, 79
graduate students. See also students; teaching	job flexibility, and staff recruitment, 80
assistants (TAs)	job interviews, 11–16. <i>See also</i> staff interviews
