

Popular Pediatric Clinical Topics 2015

November 10-13, 2015

Mauna Lani Bay Hotel, Kohala Coast, Hawaii

Presented by the Department of Pediatrics at Stanford University School of Medicine
and Lucile Packard Children's Hospital Stanford

Sponsored by Stanford University School of Medicine

A Continuing Medical Education Activity

Course Overview and Objectives

Continuous advances in clinical science require pediatric and family primary care practitioners to obtain comprehensive, up-to-date information on a wide variety of both medical and surgical issues that may be encountered in daily practice in the care of newborns, children and adolescents. *Popular Pediatric Clinical Topics 2015* is based on identified clinical challenges of physician learners combined with recommendations from Stanford Children's Health expert faculty. The course will focus on clinical management strategies of conditions in pediatric gastroenterology, urology, otolaryngology, neuroscience, ophthalmology, pulmonology and orthopedics. The changing face of eating disorders and optimizing bone health will also be covered.

Course Objectives:

- Assess and manage the patient with chronic abdominal pain and/or constipation
- Formulate treatment strategies for stridor and chronic rhinitis
- Utilize clinical guidelines in the treatment of RSV bronchiolitis
- Identify and manage neurological issues in the newborn
- Evaluate treatment options for eating disorders in children and adolescents
- Incorporate clinical recommendations for bone health based on current AAP best practices
- Evaluate, treat and/or refer adolescent males with testicular disease
- Assess common eye conditions and provide treatment and/or referral to an ophthalmologist
- Identify and refer the child with craniosynostosis and plagiocephaly to appropriate specialist
- Identify the signs and symptoms of post concussive syndrome and manage according to best practices
- Evaluate sports injuries of the teenage hip through physical exam and formulate a treatment plan

Who Should Attend?

This activity is designed for pediatricians, family physicians, primary care practitioners, nurse practitioners, nurses and allied health professionals who care for infants, children and adolescents.
