Welcome to Universal Studios Hollywood–The Entertainment Capital of L.A.™!

We've designed this information guide with the goal of ensuring that guests are able to make informed decisions about their ability to safely, comfortably and conveniently experience our attractions. It is a supplement to the Studio Guide map, which is available at all Main Entrance turnstiles and Guest Relations. Please note that all information is subject to change.

Additionally, we have included information for guests with disabilities such as the accommodations at each attraction, its physical requirements for entering or exiting ride vehicles and other attraction areas. It is important to note that although all of our Attraction Attendants are eager to make your day as pleasant as possible, they are not trained in lifting or carrying techniques and therefore cannot provide physical assistance. We suggest that guests with disabilities bring a companion who can provide any physical assistance needed.

We want everyone to enjoy their visit. Please show common courtesy and respect to fellow Park guests. Do not use profanity or engage in unsafe, illegal or offensive behavior. Please abide by all safety warnings and posted signage. Proper attire – including shoes and shirts – must be worn at all times.

For your safety while on attractions, please keep your hands, arms, feet and legs inside the vehicle and supervise children at all times.

If you have any questions or concerns, please stop by Guest Relations or feel free to speak with any one of our Attraction Attendants.

Have a great time at Universal Studios Hollywood–
The Entertainment Capital of L.A.™!

Explanation of Terms

All of the attractions at Universal Studios HollywoodSM incorporate safety systems designed to accommodate people of average physical stature and body proportion. Therefore, certain restrictions may apply for some guests at each attraction based on the nature and dynamics of the experience. This includes restrictions based on body shape or size, height, medical conditions, or other physical conditions which could be aggravated by the experience. Our prime consideration is the ability of each person to endure the dynamics of each attraction without risk of injury to that person or others.

We have used a standard set of terms to describe each of our attractions. Our intent is to provide you with a clear understanding of each attraction's dynamics and physical requirements so that you can make an informed decision about experiencing them.
