APPENDIX B – HAZARDOUS WASTE REPORT ANNOTATED FORMS..... B-1

INTRODUCTION

This document describes the file specifications for reporting data for the 2013 Hazardous Waste Report (also called the Biennial Report). The material in this guide covers submissions by States and Regions to EPA Headquarters (HQ). The file specifications in this guide are not intended to be used to cover submissions by individual reporting sites. Also, this guide is only intended to specify the file and data formats for the submission and is not intended to cover any procedural or EPA programmatic issues.

This document is designed to be used in conjunction with the *2013 Hazardous Waste Report, Instructions and Forms*, EPA Form 8700-13A/B that is referenced throughout this document. You should have a complete copy of the *2013 Hazardous Waste Report, Instructions and Forms* in your possession while using this guide. Copies of the *2013 Hazardous Waste Report, Instructions and Forms* are available at <http://www.epa.gov/epaoswer/hazwaste/data/biennialreport/>.

OVERVIEW OF DOCUMENT

The *File Specification Guide for 2013 Hazardous Waste Report Submissions* is divided into five sections:

Section 1 (Introduction) defines the intended audience for this guide, offers a brief description of the forms contained in the *2013 Hazardous Waste Report, Instructions and Forms*, and describes the general purpose and outline of this document.

Section 2 (Changes from Previous Cycles) outlines the major changes to the file specifications from previous Biennial Report cycles.

Section 3 (Data Submission Overview) describes the overall characteristics for a data submission.

Section 4 (Technical Specifications) discusses the technical details of the data files and programs necessary for data submission.

Section 5 (Submission and Status Report Instructions) will provide detailed instructions on how to submit Biennial Report flat files to RCRAInfo via the RCRAInfo production application. This section will be provided once the RCRAInfo interface has been created.

Several appendices are included with this document. These appendices provide background material as well as detailed technical information necessary to properly prepare file submissions.

INTENDED AUDIENCE

The intended audience for this guide is any State or EPA Region that is using its own software and procedures to extract hazardous waste data from a State or Regional system for submission to EPA HQ for inclusion in the RCRAInfo database for the 2013 Hazardous Waste Report; or any commercial software vendor who is preparing software for use/purchase by States and Regions for preparation of State or Regional submission of data for the 2013 Hazardous Waste Report.

(Note: States or Regions who use a data collection instrument different than the *Hazardous Waste Report, Instructions and Forms* developed by EPA HQ are called translators. This guide will serve as guidance for both translators and commercial software vendors.)

This document was written assuming the reader 1) is familiar with the *2013 Hazardous Waste Report, Instructions and Forms* and 2) understands basic computer concepts and terminology.

HAZARDOUS WASTE REPORT FORMS

The *2013 Hazardous Waste Report, Instructions and Forms* document captures information on the following forms:

RCRA SUBTITLE C SITE IDENTIFICATION FORM

The Site Identification Form collects information on the site completing the Biennial Report forms package. The form is divided into fourteen items and an addendum. States and Regions submit Site ID form information via the SI1, SI2, SI3, SI4, SI5, SI6, SI7, SI9, SIA, and SIB flat files.

Note: The SI8 flat file allows implementers to include State-specific activities in their Biennial Report submission. This information is not found on the RCRA Subtitle C Site Identification Form, but rather is implementer-defined to meet the State's regulatory requirements.

GM FORM

The Waste Generation and Management Form (GM Form) is used for reporting on-site hazardous waste generation, management, and off-site shipment. The GM Form is divided into three sections that document 1) the source, characteristics, and quantity of hazardous waste generated; 2) the quantity of hazardous waste managed on-site along with the management method used; and 3) the quantity of hazardous waste shipped off-site for treatment, disposal, or recycling along with the off-site management method used. States and Regions submit GM form information via the GM1, GM2, GM3, GM4, and GM5 flat files.

WR FORM

The Waste Received from Off-site Form (WR Form) identifies hazardous wastes that were received from other hazardous waste sites and the method(s) used to manage them. The WR Form is divided into three identical parts (i.e., waste blocks), labeled Waste 1, Waste 2, and Waste 3, that collect information on the quantities and characteristics of each hazardous waste received from an off-site source during 2013 and managed on-site. States and Regions submit WR form information via the WR1, WR2, and WR3 flat files.

OI FORM

The Off-site Identification Form (OI Form) captures the names and addresses of off-site installations and transporters. OI information is not loaded into the RCRAInfo database, but a file specification has been included to facilitate data sharing.

DATA FILES

Information gathered from the Hazardous Waste Report is submitted to EPA HQ via a series of flat files. Each form contains information that relates to the form in a one-to-one (1:1) relationship (e.g., GM Form, Section 1, Block D, source code). These data elements are captured in the primary flat file for that form (e.g., SI1, GM1, and WR1). Information that relates to the form in a many-to-one (*n*:1) relationship (e.g., GM Form, Section 1, Block B, EPA hazardous waste codes) is captured in secondary flat files (e.g., GM2, GM3, GM4, GM5, WR2, WR3).

The remainder of this document describes in detail the steps necessary to ensure a successful data submission including identifying which sites should be reported, the types of files that must be included with each submission, and technical aspects of the file creation process.

QUESTIONS/COMMENTS

Questions about this document should be directed to the RCRAInfo team via the User Support Issue Tracking System (USITS) utility in RCRAInfo. Questions submitted must only concern the file specification for submission of data from the States or EPA Regions to the RCRAInfo database. Questions on submissions of data by individual sites should be directed to the appropriate State or EPA Regional personnel. For a list of the appropriate contacts see:

<http://www.epa.gov/osw/inforesources/data/form8700/contact.pdf>.

CHANGES FROM PREVIOUS CYCLES

MANAGEMENT METHOD CODES

Some management method codes have been consolidated in order to ease reporting. As a result, some management method codes have been added and removed for the 2013 Biennial Report cycle.

ADDITIONS

H070 - Chemical treatment (reduction/destruction/oxidation/precipitation); do not include immediate treatment in an exempted wastewater treatment unit with discharge to a NPDES-POTW (unless required by state).

H100 – Physical treatment only (adsorption/absorption/separation/stripping/dewatering); do not include immediate treatment in an exempted wastewater treatment unit with discharge to a NPDES-POTW (unless required by state)

H120 – Combination of chemical, biological, and/or physical treatment; do not include immediate treatment in an exempted wastewater treatment unit with discharge to a NPDES-POTW (unless required by state).

DELETIONS

H071 – Chemical reduction with or without precipitation (includes any preparation or final processes for consolidation of residuals).

H073 – Cyanide destruction with or without precipitation (includes any preparation or final processes for consolidation of residuals).

H075 – Chemical oxidation (includes any preparation or final processes for consolidation of residuals).

H075 – Wet air oxidation (includes any preparation or final processes for consolidation of residuals).

H077 – Other chemical precipitation with or without pre-treatment (includes processes for consolidation of residuals).

H082 – Adsorption (as the major component of treatment).

H083 – Air or steam stripping (as the major component of treatment).

H101 – Sludge treatment and/or dewatering (as the major component of treatment; not H071-H075, H077, or H082)

H103 – Absorption (as the major component of treatment).

H111 – Stabilization or chemical fixation prior to disposal at another site (as the major component of treatment; not H071-H075, H077, or H082).

H112 – Macro-encapsulation prior to disposal at another site (as the major component of treatment; not reportable as H071-H075, H077, or H082).

H123 – Settling or clarification (as the major component of treatment; not reportable as H071-H083).

H124 – Phase separation (as the major component of treatment; not reportable as H071-H083).

WASTE MINIMIZATION CODES

The waste minimization codes have been revised in order to assist filers with reporting their waste minimization activities. The new waste minimization codes identify when waste minimization activities occurred (whether initiated prior to the reporting year or during the reporting year) and also provide examples of types of waste minimization activities. Notes are no longer required for waste minimization code “N” or “Y”.

ADDITIONS

A – Continued initiatives to reduce quantity and/or toxicity of this waste.

B – Continued initiatives to recycle the waste either on-site or off-site.

C – Implemented new initiatives to reduce quantity and/or toxicity of this waste.

D – Implemented new initiatives to recycle the waste either on-site or off-site.

DELETIONS

S – Began to ship waste off-site for recycling.

R – Recycling on-site was implemented and was successful.

Y – Waste minimization was implemented and was successful in reducing quantity and/or toxicity.

REVISIONS

N – Waste minimization efforts found to be economically or technically impracticable.

SOURCE CODE DESCRIPTIONS

Editorial changes were made to the description of some source codes in order to improve clarity for filers.

REVISIONS

G25 – Treatment, disposal, or recycling of hazardous wastes – indicate in Item H the management method (enter the related H code) that produced the residuals.

G27 – Treatment or recovery of universal waste.

G44 – Cleanup under State or voluntary program.

G45 – Cleanup of underground storage tank.

NORTH AMERICAN INDUSTRY CLASSIFICATION SYSTEM (NAICS) CODES

In completing the 2013 Hazardous Waste Report, sites should use the new 2012 NAICS codes established by the U.S. Census Bureau. Significant changes were made to the NAICS codes in 2012. The new 2012 NAICS code table can be found at <http://www.census.gov/eos/www/naics>. Note: As with previous cycles, the NAICS codes provided must be either 5 or 6 digits, however, 6-digit codes may now end in zero.

DATE BECAME CURRENT

The Change Management Group recommendation dated June 26, 2012, indicated that the Date Became Current field in SI2 would be optional, rather than required. Edit SI2-050 has been changed to say that the Date the Owner/Operator Became Current must be a valid date greater than or equal to January 1, 1600 or blank.

DATA SUBMISSION OVERVIEW

DATA REQUIREMENTS

Data collected via the *2013 Hazardous Waste Report, Instructions and Forms* may or may not be required to be included in the Hazardous Waste Report submission. For the purposes of this document, “required” refers to data elements that must be provided and cannot have a value of blank.

States and Regions are encouraged to provide as much data (required or not required) as possible. This information enhances the analytical usefulness of the Hazardous Waste Report data within RCRAInfo.

State, Regional, and commercial software packages must provide data for required data elements. Flat files containing required data elements include:

- Site ID Form data (RCRA Subtitle C Site Identification Form):
Flat Files SI1, SI2, SI3, SI4, SI6, SI7
- GM Form data (Waste Generation and Management):
Flat Files GM1, GM2, GM4, and GM5
- WR Form data (Waste Received from Off-site):
Flat Files WR1 and WR2

Additionally, States who allow facilities to manage hazardous secondary material under 40 CFR 261.2(a)(2)(ii), 40 CFR 261.4(a)(23), (24), or (25) may submit their required re-notification of hazardous secondary material activity using the following flat files:

- Site ID Form Addendum data (Hazardous Secondary Material):
Flat Files SI9, SIA, and SIB

All data elements must be properly formatted and meet required data quality standards to be loaded into RCRAInfo. The data quality standards for these elements are presented in Appendix A.

To successfully load data into RCRAInfo, all data elements for every submitted flat file must meet formatting and data quality standards. See Appendix A for specifications on standards and formats for all flat files.

DATA SUBMISSION

It is the responsibility of the State, Regional, or commercial software package to produce a complete set of correctly formatted files for a given State for inclusion in the RCRAInfo database. The RCRAInfo application can only accommodate submissions containing all data for a given State, that is, data for a single site cannot be loaded into RCRAInfo.

Flat files are submitted to RCRAInfo in accordance with the Memorandum of Understanding between the Region and the State. The data is transferred to RCRAInfo in the form of Windows-compatible ZIP files. The RCRAInfo File Transfer Process extracts the files from these zip files and stores the data in Oracle database “staging” tables for further processing.

USER ACCESS AND PERMISSIONS

The user must have the following access and permissions to successfully submit flat files to RCRAInfo:

- User ID and password for the RCRAInfo production application;
- Granted the translation “role” within the database;
- Have Level 4 (read, add, update, and delete) permissions for the Biennial Report module;
- Be the implementer of record for the information being submitted.

Please contact your State or Regional system administrator to obtain a RCRAInfo ID and password, to receive the required permissions, and/or to set implementer of record settings. To obtain the translation “role”, please contact Idali Gotay (gotay.idali@epa.gov).

FLAT FILE SUBMISSIONS

The RCRAInfo application provides an interface for submitters to upload a ZIP file from their local file location to the RCRAInfo staging tables. The uploaded file must be in the form of a ZIP file. These files must be:

- flat files;
- column delimited;
- formatted such that each record in the file is followed by a carriage return/line feed;
- formatted per the flat file specification's documented in this booklet.

A submitter is limited to filing data for one State per ZIP file.

Before the file is uploaded, the RCRAInfo interface will validate the zip file name by the following criteria:

- the first three (3) characters are the program abbreviation: RCR
- the next four (4) characters are program-specific: 2-letter State abbreviation followed by the submission number (e.g., KS01)
- the last three (3) characters are the TSSMS ID of the user submitting the files.

An example file name would be RCRKS01SIX.ZIP. Note: The activity location (state code) embedded in the file name must match the state code associated with the RCRAInfo agency of the submitter that is filing the information.

If the file name does not pass validation, the RCRAInfo interface will provide the submitter with a message describing the error and prompt the submitter to correct the error in order to complete the file upload process.

AMOUNT OF DATA IN A SINGLE SUBMISSION

Each data submission must contain **ALL** data for the State being submitted. Each data submission will overwrite **ALL** existing 2013 Hazardous Waste Report data for the State in the RCRAInfo database. Note: If you provide data for a handler with an incorrect Handler ID, you **cannot** delete this Handler ID from RCRAInfo simply by excluding the Handler ID from your next submission. Rather, you will need to submit a USITS issue through RCRAInfo, requesting EPA Headquarters to delete the Handler ID.

STATES/REGIONS NOT USING THE 2013 HAZARDOUS WASTE REPORT, INSTRUCTIONS AND FORMS

The information contained in this guide is equally applicable to States and Regions who use a different data collection package than the *2013 Hazardous Waste Report, Instructions and Forms*. Translators are required to provide data equivalent to that collected by the *2013 Hazardous Waste Report, Instructions and Forms* (required data elements). The following information is provided to help translators become familiar with the steps necessary to ensure a successful data submission:

- Identify all sites for which information is to be translated.
- Access information that is equivalent to the 2013 Hazardous Waste Report data.
- Validate that the equivalent data conforms to the appropriate data quality standards.
- Write translated data to appropriate flat files.

IDENTIFY SITES

The State/Region must submit information for sites required to file the *2013 Hazardous Waste Report, Instructions and Forms*. The criterion that defines these sites is presented in the *2013 Hazardous Waste Report, Instructions and Forms* under “Sites Required to File the Hazardous Waste Report.” States and Regions are not precluded from submitting information for sites not required to file the *2013 Hazardous Waste Report, Instructions and Forms*.

ACCESS EQUIVALENT DATA

The required data elements for the sites being reported must be provided. The translator State/Region must identify, in their system, the data elements and relationships equivalent to the data elements/relationships represented by the flat file specifications provided in Appendix A.

The GM Form, WR Form, and OI Form allow for multiple form submissions by a handler. Translator States/Regions must also accommodate multiple “forms” by a handler as follows:

GM FORM

The GM Form collects data associated with a single reported waste. Translators must provide records in the GM1 – GM5 files for each waste generated or managed during the reporting cycle. Thus, each page number for the GM flat file records represents a **single** reported waste. All GM flat file records containing data associated with the same waste reported for the same EPA ID will have the same page number. Page number takes the value of "00001" for the first reported waste on the GM Form and is incremented by one (1) with each following reported waste. (Note: The instructions on assignment of page number for translators are different than for those States/Regions/commercial software vendors supporting the *2013 Hazardous Waste Report, Instructions and Forms*. For vendors supporting the *2013 Hazardous Waste Report, Instructions and Forms*, page number should be the same as the number assigned by the respondent to the actual form.)

WR FORM

The WR Form collects data associated with each reported waste received from off-site. Translators must provide records in the WR1 – WR3 files for each waste received from off-site. All WR flat file records containing data associated with the same received waste reported for the same handler will have the same page number. Page number takes the value of "00001" for the first received waste on the WR Form and is incremented by one (1) with each separate received waste reported. The sub-page number for the WR Form data must always be assigned the value of "1". (Note: The instructions on assignment of page number and sub-page number for translators are different than for those States/Regions/commercial software vendors supporting the *2013 Hazardous Waste Report, Instructions and Forms*. For vendors supporting the *2013 Hazardous Waste Report, Instructions and Forms*, page number and sub-page number should be the same as the number assigned by the respondent to the actual form. Sub-page number is '1' for the waste reported in the "Waste 1" block of the WR form, '2' for the waste reported in the "Waste 2" block of the WR form, and '3' for the waste reported in the "Waste 3" block of the WR form.)

OI FORM

The OI Form collects data identifying 1) handlers from whom waste was received and to whom waste was shipped and 2) all transporters used to ship waste during the reporting cycle. These source, destination, and transporting entities are identified by their EPA ID, name, and address. The page number for the OI flat file records represents a single handler record. Page number takes the value of "00001" for the first handler record and is incremented by one (1) with each separate handler record reported.

DATA QUALITY/EQUIVALENCY

The State/Region's translator data must provide an accurate representation of hazardous waste activity for that State. In addition, the translator's data must pass a minimum set of data edits (see Appendix A) in order to provide information comparable to data gathered with the *2013 Hazardous Waste Report, Instructions and Forms* and to be properly loaded into the RCRAInfo database. Any data failing to conform to the appropriate data quality edits will result in the entire data submission to RCRAInfo being rejected.

Appendix B contains an annotated copy of the *2013 Hazardous Waste Report* forms showing in which flat file each data element is located. In addition, all codes used in the submission must conform to acceptable data values as specified in Appendix A.

WRITE TRANSLATED DATA TO FLAT FILES

Translator States/Regions must extract data from their State/Regional system and re-produce the data in the flat file formats outlined in Appendix A. A complete translation may not necessarily include all flat files. For example, a translator submitting SI Form data is not required to include the "SI8" flat file (state activity) since it is non-required data. However, the State/Region is encouraged to include in the Hazardous Waste Report data submission all data (required and non-required) that the State/Region currently collects.

The flat file specifications for the Hazardous Waste Report data are based on a series of parent-child relationships. A parent file (i.e., S11, GM1, WR1) may have one or more child relationships with other flat files (i.e., SI2-SI8, GM2-GM5, WR2-WR3). Child records may not exist without the existence of the parent record (e.g., a record for site XYZ cannot exist in the GM2 file if a corresponding record does not exist in the GM1 file).

Data for a site should only be included in the Hazardous Waste Report data submission after all records for that site pass all appropriate edit checks. If a site's data is incomplete, then the site's information must not be included in the State's Hazardous Waste Report data submission. **It is not sufficient to eliminate the data element in error and submit the remainder of the site's data.**

TECHNICAL SPECIFICATIONS

This section contains the standards that must be met when producing flat files for the Hazardous Waste Report data submission. Failure to meet these specifications will result in the rejection of the flat files and failure to load the data into the RCRAInfo database.

INCLUDE IN NATIONAL REPORT FLAGS

SI1, GM1, and WR1 file specifications include a field labeled INCLUDE_IN_NATIONAL_REPORT. The purpose of this field is to allow implementers to submit additional Hazardous Waste Report data (for purposes of data sharing) but keep that data from being included in the National Biennial Hazardous Waste Report. The field is defined as follows: If the INCLUDE_IN_NATIONAL_REPORT flag in the SI1 file is 'N' (No), then all the INCLUDE_IN_NATIONAL_REPORT flags for the site must also equal 'N' (No) else the submission will be in error. If the INCLUDE_IN_NATIONAL_REPORT flag in the SI1 file is 'Y' (Yes), implementers may set the flag in the GM1 and WR1 file as either 'Y' (Yes) or 'N' (No) to indicate whether that particular waste should be included in the National Biennial Hazardous Waste Report. It is anticipated that many implementers will default the value for these flags to 'Y' (Yes) in all cases, however the specific implementation of how these flags are populated is determined by the implementer.

STATE GENERATOR STATUS

Implementers are required to furnish both the State-specific generator status and the Federal generator status for each site in their submission. Appropriate fields are included in the SI1 file specification for this purpose. It is anticipated that many States whose regulations closely match the federal regulations, either by reference or by inclusion, will choose for the values of these fields to be the same. The method to populate these fields is determined by the implementer, however both fields must be provided or the submission will be rejected.

RULES AND FORMAT CONVENTIONS REQUIRED FOR DATA FLAT FILES

The following sub-sections detail the correct field formats for the data in the flat files.

ALPHANUMERIC FIELDS

Alphanumeric fields are identified in Appendix A as Data Type "A" fields. Data Type "A" fields must be left-justified with all trailing spaces filled with the space character (i.e., ASCII HEX 0x20 or ASCII Decimal 32).

Valid characters for alphanumeric fields are limited to:

~!@#\$%^&*()_+={}| \;:",".?/1234567890ABCDEFGHIJKLMNPOQRSTUVWXYZ

Invalid characters for alphanumeric fields include:

<>

If the "<" or ">" symbols are used to indicate less than or greater than, it is recommended that these symbols be replaced with "LT" or "GT".

As part of the RCRAInfo load routines, all lowercase letters (a-z) will be converted to uppercase characters (A-Z). Lowercase letters will not cause a submission to be rejected, however the lowercase letters will be converted to uppercase characters.

INTEGER FIELDS

Integer fields are identified in Appendix A as Data Type "I" fields.

Allowed values for integer fields are numbers 0-9 and the space character (ASCII Hex 0x20 or ASCII Decimal 32).

Examples of incorrect and correct entries for an integer field defined with a length of five (5) are presented in Exhibit 2 below.

INCORRECT	CORRECT
1A	1
10,000	10000
750.25	750

Exhibit 2. Incorrect and Correct Integer Entries

FIXED DECIMAL FIELDS

Fixed place decimal fields are identified in Appendix A as Data Type "D" fields.

For all "D" field entries, the flat file specifications indicate the number of digits that the data element is allowed before the decimal and after the decimal. For example, D11.6 indicates that the number may have up to 11 digits before the decimal and 6 digits after the decimal (9999999999.999999). The field length includes the decimal character.

Allowed values for fixed decimal fields are numbers 0-9, the decimal character ".", and the space character (ASCII Hex 0x20 or ASCII Decimal 32).

Although some data blocks on the *2013 Hazardous Waste Report, Instructions and Forms* provide for only one decimal place, the translator flat files may allow additional decimal places to be represented in "D" fields. Exhibit 3 shows incorrect and correct entries in a type "D5.2" field.

INCORRECT	CORRECT
10,032.1	10032.10
10,032A	10032

Exhibit 3. Incorrect and Correct Fixed Decimal Entries

SEQUENCE NUMBER FIELDS

Some of the files in Appendix A require a sequence number to be provided for each record. The SI3 file, for example, requires a sequence number (NAICS_SEQ) for the NAICS codes. The sequence number is needed for data elements, such as the NAICS code, which may have more than one value. The sequence number should be assigned the value "0001" for the first occurrence of the sequenced data element for the EPA ID and should then be incremented by one with each successive occurrence of that same EPA ID.

NEGATIVE NUMBERS

Negative numbers are not allowed in the data submission.

RECORD TERMINATION

Each flat file record must be terminated by a line feed character (ASCII Hex 0x0A or ASCII Decimal 010), or a carriage return character (ASCII Hex 0x0D or ASCII Decimal 013) followed by a line feed character.

EMPTY FIELDS

For fields that require no response, the field should be filled with the space character (i.e., blanks).

CONFIDENTIAL BUSINESS INFORMATION (CBI)

Under existing RCRA statutes, sites may claim that certain items of information submitted as part of their Hazardous Waste Report contain Confidential Business Information (CBI). The procedures for handling CBI can be found in *Procedures for Handling RCRA Confidential Business Information* (available from the EPA HQ RCRA Document Control Officer). A subset of these procedures is documented in *Procedures for Handling RCRA Confidential Business Information Submitted for the Biennial Report*. (Copies of these documents can be requested using the USITS utility in RCRAInfo). In brief, it is not allowable to mingle CBI data with non-CBI data. In addition, CBI data must be handled on a secure computer (either a computer that is kept in a secure environment or a computer that uses removable media where the media is kept in a secure environment). CBI data must be submitted separately from non-CBI data using data handling methods outlined in the *Procedures for Handling RCRA Confidential Business Information* documentation.

In previous Biennial Report cycles, some States/Regions that have received CBI have masked the CBI data (in other words, changed the CBI data so it no longer is CBI). This practice is not a requirement of EPA HQ, but as long as the masking is acceptable to the site and the implementer, and the data meets the minimum edit standards as detailed in the appendices, this solution is acceptable.

SUBMISSION AND STATUS REPORT INSTRUCTIONS

STEP-BY-STEP INSTRUCTIONS FOR BR SUBMISSIONS

The following step-by-step submission instructions assume that you have obtained the necessary user ID / passwords and access for the RCRAInfo application. The steps provided below illustrate how to submit a BR flat file into the RCRAInfo production environment.

- Step 1 - Open Internet Explorer and go to the RCRAInfo URL – <https://rcrainfo.epa.gov> (Production RCRAInfo website) or <https://rcrainfopreprod.epa.gov> (Pre-production RCRAInfo website)
- Step 2 - On the Warning Notice page click “here” to agree to the terms and continue
- Step 3 - On the RCRAInfo page, provide your RCRAInfo user ID and password and click “Log on”
- Step 4 - From the RCRAInfo Main Menu, click “Translate Data”

- Step 5 - From the Load Translation Files screen, select a Module Type of “Biennial Report”, an Upload Type of “Full Replace”, and a Report Cycle of “BR 2013”.

Module Type	Upload Type	Report Cycle
<input checked="" type="radio"/> Biennial Report	<input type="radio"/> Transactional	Report Cycle: BR 2011
<input type="radio"/> Compliance, Monitoring & Enforcement	<input type="radio"/> Partial	
<input type="radio"/> Corrective Action	<input checked="" type="radio"/> Full Replace	
<input type="radio"/> Financial Assurance	<input type="radio"/> Delete	
<input type="radio"/> GIS		
<input type="radio"/> Handler		
<input type="radio"/> Permitting		

Step 6 - Provide the name of the zip file containing the BR data (i.e., c:\flatfiles\rcrf101six.zip) by typing it in the “File Name:” or using the “Browse” button

Upload Data (Please use the Browse button to select the file to upload.)

File Name:

Step 7 - Click the “Load Data” button

Step 8 - You will receive the message “File Upload is Valid” and the name of the flat files found in the zip file will be displayed

File Upload is Valid

File Names Found: flwr2001.fil flgm1001.fil flgm2001.fil flgm4001.fil flgm5001.fil flsi1001.fil flsi2001.fil flsi3001.fil flsi4001.fil flsi6001.fil flsi7001.fil flwr1001.fil

Step 9 - Click “Initialize and Load Staging Tables”

Step 10 - A message will appear indicating that the staging tables are being loaded

Loading Tables. Please wait ...

Thu Feb 11 10:39:01 EST 2010

Step 11 - The “Confirmation of Biennial Report Upload” screen will be displayed showing each file in the submission and the number of records received for each file. It will also indicate if any load errors were encountered by adding “with errors” after the record count. Click the “with errors” link to determine what load errors were encountered.

Total Number of Records Received
83181 WR2 (BWR_WASTE_CODE [EPA]) record(s) received.
5599 GM1 (BGM_BASIC) record(s) received.
15830 GM2 (BGM_WASTE_CODE [EPA]) record(s) received.
6056 GM4 (BGM_OFFSITE_SHIPMENT) record(s) received.
45 GM5 (BGM_ONSITE_TREATMENT) record(s) received.
364 SI1 (HHANDLER5) record(s) received.
745 SI2 (HOWNER_OPERATOR5) record(s) received.
411 SI3 (HNAICS5) record(s) received.
5577 SI4 (HWASTE_CODE5 [EPA]) record(s) received.
36 SI6 (HUNIVERSAL_WASTE5) record(s) received.
372 SI7 (HCERTIFICATION5) record(s) received.
24893 WR1 (BWR_BASIC) record(s) received.
12 Control Records Were Built

Step 12 - Click “Continue”

Step 13 - The Status Report screen will be displayed (depending on the size of the load, it may take several minutes for the Status Report screen to be displayed)

Step 14 - Click the “Biennial Report Load” radio button and use the drop-down list to specify you state. Click “Run Report”.

Biennial Report Load
 Translator Load
 Universe Calculations
 GPRA Update

For BR or Translator Status Reports, please select a State to view:
FLORIDA

For Translator Status Reports, please select a Module:
Select a Module

Step 15 - At the bottom of the Status Report you should see the message “Translation has finished successfully” or “Translation has FAILED – Please review your error messages”. If you get the “Translation has finished successfully” message, your submission was successful and your data was loaded into RCRAInfo. If you get the “Translation has FAILED...” message, your submission was not successful and you need to proceed to Step 16.

Step 16 - Review the Status Report to see the errors that were detected. You must correct the errors in the flat files and go back to Step 1.

STATUS REPORT

The Status Report provides the user with information regarding the processing of the BR load. See Step 14 above to access the Status Report in RCRAInfo.

The Status Report contains information on the files submitted, the errors detected, and the status of loading data into RCRAInfo.

FILES SUBMITTED

The top portion of the Status Report shows the flat files submitted and the number of records received. You should see one record for each file submitted. The record counts are provided so that you know how much data was received by RCRAInfo. If these record counts are not correct, you will need to resubmit all of your files.

11/28/2011 01:06:24	Translating BR 2011 data for FL
11/28/2011 01:06:24	File: SI1. Records: 364 received.
11/28/2011 01:06:24	File: SI2. Records: 745 received.
11/28/2011 01:06:24	File: SI3. Records: 411 received.
11/28/2011 01:06:24	File: SI4. Records: 5577 received.
11/28/2011 01:06:24	File: SI6. Records: 36 received.
11/28/2011 01:06:24	File: SI7. Records: 372 received.
11/28/2011 01:06:24	File: GM1. Records: 5599 received.
11/28/2011 01:06:24	File: GM2. Records: 15830 received.
11/28/2011 01:06:24	File: GM4. Records: 6056 received.
11/28/2011 01:06:24	File: GM5. Records: 45 received.
11/28/2011 01:06:24	File: WR1. Records: 24893 received.
11/28/2011 01:06:24	File: WR2. Records: 83181 received.

The status report will then show every file within the module (including files that were not submitted) indicating the number of records in each file, the number of records which do not have any edit errors, and the number of records that do have edit errors. If any of the files contain data edit errors, then **NO** data from the submission will be loaded into RCRAInfo. If the data does contain errors, you will have to correct the errors in the flat files and resubmit the entire load.

11/28/2011 01:25:42	Completed edit checks for SI1. 0 records have errors.
11/28/2011 01:25:42	Processing edit checks for file SI2.

11/28/2011 01:25:59	Processing edit checks for file GM5.
11/28/2011 01:26:00	Completed edit checks for GM5. 0 records have errors.
11/28/2011 01:26:00	Processing edit checks for file WR1.
11/28/2011 01:26:01	Completed edit checks for WR1. 0 records have errors.
11/28/2011 01:26:01	Processing edit checks for file WR2.
11/28/2011 01:26:03	Completed edit checks for WR2. 0 records have errors.
11/28/2011 01:26:03	FL has no records in file WR3.

ERRORS DETECTED

The status report will show all of the errors detected within the BR load, reporting the flat file in error, the record number in error, and the key fields for the record. Additionally, information regarding the error will be given, often making references to the error numbers in the BR Flat File Specification. All errors must be corrected and the flat files resubmitted before any data will be moved to the RCRAInfo tables.

The BR load process attempts to detect all errors so that the user can correct as many errors as possible before reloading the data. However, to make the report manageable to the user, only the first 200 errors are reported. Additionally, correcting an error may create another error, so it is very important to always verify that your load is error-free in the status report.

11/28/2011 02:38:32	File:SI1 Rec:207 Key: FLD982083115, Receive Date: 01-11-2012. RECEIVE DATE must be >= 1/1/2011 and <= Today. See SI1-016.
11/28/2011 02:38:32	File:SI1 Rec:211 Key: FLD060249547. The HANDLER NAME must be provided. See SI1-020.
11/28/2011 02:38:32	File:SI1 Rec:217 Key: FLD064675978, Location State:XX. LOCATION STATE does not equal the first two characters of the HANDLER ID. See SI1-050.
11/28/2011 02:38:32	File:SI1 Rec:247 Key: FLD004059861. The LOCATION CITY must be provided. See SI1-040.

LOADING DATA

Once the load is error free, the data in the SI files will be moved to the RCRAInfo production tables and a BR staging environment. The GM and WR files will be moved to the BR staging environment but will NOT be moved to the RCRAInfo production tables until the BR Cycle is final. The status report will show if the data has been successfully moved to the RCRAInfo production and BR staging tables.

11/28/2011 01:28:59	Loading 2011 BR data into RCRAINFORM tables
11/28/2011 01:29:01	Completed translation load into HBASIC from SI1
11/28/2011 01:29:01	Loading data from SI1 into HHANDLER5.
11/28/2011 01:29:02	Completed loading data from SI1 into HHANDLER5.
11/28/2011 01:29:02	Loading data from SI2 into HOWNER_OPERATOR5.
11/28/2011 01:29:03	Completed loading data from SI2 into HOWNER_OPERATOR5.
11/28/2011 01:29:03	Loading data from SI3 into HNAICS5.
11/28/2011 01:29:03	Completed loading data from SI3 into HNAICS5.

Upon completion of the BR load process (either successful or unsuccessful), the status report will indicate that process has been completed.

Flat File Specifications and Data Edits

This Page Intentionally Left Blank

KEY FOR FLAT FILE TABLES

Data Type

A	Alphanumeric
I	Integer
D	Fixed Decimal

FLAT FILE NAMING CONVENTION

Flat files names are constructed in the following manner:

SSFFNNN.FIL

Where:

SS	=	State Postal Code
FFF	=	Flat file identifier (for example, GM1 or GM2)
NNN	=	Julian Date when file was created

Files must be named using all **uppercase** characters.

Note: The three-character file ID distinguishes each flat file produced during the translation. For example, the correct name for the SI3 file, containing KS data, produced on January 4th, is KSSI3004.FIL.

FLAT FILE SPECIFICATIONS AND DATA EDITS

FLAT FILE ID# - SI1

Source Form: Site ID **Description:** Handler Identification, Address, and Hazardous Waste Activities Information

This file must contain one and only one record for each Handler ID reporting. Also, any Handler ID appearing as the key in ANY of the “GM” or “WR” files must also be present in this file.

Key Fields: Handler ID (HANDLER_ID). Each record in the SI1 file must contain a unique Handler ID.

Note: The SI1 file is REQUIRED. One record must be provided for each handler.

Field Name	Starting Column	Field Length	Data Type	Description	Location on Form	Required / Cond. Required	Edit Number(s)
HANDLER_ID	1	12	A	EPA Identification Number	SI-2	Required	SI1-010, SI1-015, SI1-490, SI1-500, SI1-510, SI1-520

FLAT FILE ID# - SIB

Source Form: Site ID **Description:** Hazardous Secondary Material Waste Codes

This file captures the information contained in Item 2.C of the Addendum to the Site ID form. The relationship of these data records to the reported site is *n:1*, that is, there can be multiple waste codes for each site / HSM sequence number.

Key Fields: Handler ID (HANDLER_ID); HSM Sequence Number (HSM_SEQUENCE_NUMBER), Waste Code (WASTE_CODE). Each record in the SIB file must contain a unique combination of the Handler ID, HSM Sequence Number, and Waste Code.

Note: The SIB file is REQUIRED for handlers that will manage, are managing, or have stopped managing hazardous secondary material under 40 CFR 261.2(a)(2)(ii), 261.4(a)(23), (24), or (25).

Field Name	Starting Column	Field Length	Data Type	Description	Location on Form	Required / Cond. Required	Edit Number(s)
HANDLER_ID	1	12	A	EPA Identification Number	SI-2	Required	SIB-010
HSM_SEQ_NUMBER	13	2	I	Hazardous Secondary Material Sequence Number		Required	SIB-010
WASTE_CODE	15	4	A	EPA Hazardous Waste Code	ADD-2-C	Required	SIB-020

SIB-020	Waste Code must equal a headquarters-defined waste code in LU_WASTE_CODE.	WASTE_CODE = headquarters-defined waste code in LU_WASTE_CODE.

FLAT FILE ID# - GM1

Source Form: GM **Description:** Waste Generation and Management Information

This file captures data elements that have 1:1 relationship to the reported waste. These data elements are as follows: GM Items 1.A, and 1.D through 1.G.

Key Fields: Handler ID (HANDLER_ID); Page Number (HZ_PG). Each record in the GM1 file must contain a unique combination of the Handler ID and Page Number.

Note: The GM1 file is REQUIRED for handlers that generated RCRA hazardous waste that, in 2013, was accumulated on-site; managed on-site in a treatment, storage, or disposal unit; and/or shipped off-site for management.

Field Name	Starting Column	Field Length	Data Type	Description	Location on Form	Required / Cond. Required	Edit Number(s)

APPENDIX B

Hazardous Waste Report Annotated Forms

This Page Intentionally Left Blank

10. Type of Regulated Waste Activity (at your site)
 Mark "Yes" or "No" for all current activities (as of the date submitting the form); complete any additional boxes as instructed.

A. Hazardous Waste Activities; Complete all parts 1-10. SI1 File

- Y N **1. Generator of Hazardous Waste** **FED_WASTE_GENERATOR**
 If "Yes", mark only one of the following – a, b, or c.
- a. LQG: Generates, in any calendar month, 1,000 kg/mo (2,200 lbs./mo.) or more of hazardous waste; or Generates, in any calendar month, or accumulates at any time, more than 1 kg/mo (2.2 lbs./mo) of acute hazardous waste; or Generates, in any calendar month, or accumulates at any time, more than 100 kg/mo (220 lbs./mo) of acute hazardous spill cleanup material.
- b. SQG: 100 to 1,000 kg/mo (220 – 2,200 lbs./mo) of non-acute hazardous waste.
- c. CESQG: Less than 100 kg/mo (220 lbs./mo) of non-acute hazardous waste.

If "Yes" above, indicate other generator activities in 2-4.

- Y N **2. Short-Term Generator** (generate from a short-term or one-time event and not from on-going processes). If "Yes", provide an explanation in the Comments section.
SHORT_TERM_GENERATOR
- Y N **3. United States Importer of Hazardous Waste**
IMPORTER_ACTIVITY
- Y N **4. Mixed Waste (hazardous and radioactive) Generator**
MIXED_WASTE_GENERATOR

- Y N **5. Transporter of Hazardous Waste**
 If "Yes", mark all that apply.
- a. Transporter **TRANSPORTER**
- b. Transfer Facility (at your site) **TRANSFER_FACILITY**
- Y N **6. Treater, Storer, or Disposer of Hazardous Waste** Note: A hazardous waste Part B permit is required for these activities. **TSO_ACTIVITY**
- Y N **7. Recycler of Hazardous Waste**
RECYCLER_ACTIVITY

- Y N **8. Exempt Boiler and/or Industrial Furnace**
 If "Yes", mark all that apply.
- a. Small Quantity On-site Burner Exemption **ONSITE_BURNER_EXEMPTION**
- b. Smelting, Melting, and Refining Furnace Exemption **FURNACE_EXEMPTION**

- Y N **9. Underground Injection Control**
UNDERGROUND_INJECTION_ACTIVITY

- b. Marketer Who First Claims the Used Oil Meets the Specifications **USED_OIL_SPEC_MARKETER**

D. Eligible Academic Entities with Laboratories—Notification for opting into or withdrawing from managing laboratory hazardous wastes pursuant to 40 CFR Part 262 Subpart K [S11 File](#)

❖ You can **ONLY** Opt into Subpart K if:

- you are at least one of the following: a college or university; a teaching hospital that is owned by or has a formal affiliation agreement with a college or university; or a non-profit research institute that is owned by or has a formal affiliation agreement with a college or university; AND
- you have checked with your State to determine if 40 CFR Part 262 Subpart K is effective in your state

Y N 1. Opting into or currently operating under 40 CFR Part 262 Subpart K for the management of hazardous wastes in laboratories
See the item-by-item instructions for definitions of types of eligible academic entities. Mark all that apply:

- a. College or University
[SUBPART_K_COLLEGE](#)
- b. Teaching Hospital that is owned by or has a formal written affiliation agreement with a college or university
[SUBPART_K_HOSPITAL](#)
- c. Non-profit Institute that is owned by or has a formal written affiliation agreement with a college or university
[SUBPART_K_NONPROFIT](#)

Y N 2. Withdrawing from 40 CFR Part 262 Subpart K for the management of hazardous wastes in laboratories
[SUBPART_K_WITHDRAWAL](#)

11. Description of Hazardous Waste

A. Waste Codes for Federally Regulated Hazardous Wastes. Please list the waste codes of the Federal hazardous wastes handled at your site. List them in the order they are presented in the regulations (e.g., D001, D003, F007, U112). Use an additional page if more spaces are needed. [S14 File](#)

EPA_WASTE_CODE						

B. Waste Codes for State-Regulated (i.e., non-Federal) Hazardous Wastes. Please list the waste codes of the State-Regulated hazardous wastes handled at your site. List them in the order they are presented in the regulations. Use an additional page if more spaces are needed. [S15 File](#)

STATE_WASTE_CODE						

12. Notification of Hazardous Secondary Material (HSM) Activity

Y N Are you notifying under 40 CFR 260.42 that you will begin managing, are managing, or will stop managing hazardous secondary material under 40 CFR 261.2(a)(2)(ii), 40 CFR 261.4(a)(23), (24), or (25)?

If "Yes", you must fill out the Addendum to the Site Identification Form: Notification for Managing Hazardous Secondary Material.

13. Comments [S11 File](#)

NOTES

14. Certification. I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations. For the RCRA Hazardous Waste Part A Permit Application, all owner(s) and operator(s) must sign (see 40 CFR 270.10(b) and 270.11). [S17 File](#)

ADDENDUM TO THE SITE IDENTIFICATION FORM: NOTIFICATION OF HAZARDOUS SECONDARY MATERIAL ACTIVITY

ONLY fill out this form if:

- ❖ You are located in a State that allows you to manage excluded hazardous secondary material (HSM) under 40 CFR 261.2(a)(2)(ii), 261.4(a)(23), (24), or (25) (or state equivalent). See <http://www.epa.gov/epawaste/hazard/dsw/statespf.htm> for a list of eligible states; **AND**
- ❖ You are or will be managing excluded HSM in compliance with 40 CFR 261.2(a)(2)(ii), 261.4(a)(23), (24), or (25) (or state equivalent) **or** you have stopped managing excluded HSM in compliance with the exclusion(s) and do not expect to manage any amount of excluded HSM under the exclusion(s) for at least one year. Do not include any information regarding your hazardous waste activities in this section.

1. Indicate reason for notification. Include dates where requested. S19 File

REASON_FOR_NOTIFICATION

- Facility will begin managing excluded HSM as of _____ (mm/dd/yyyy). **HSM_EFFECTIVE_DATE**
- Facility is still managing excluded HSM/re-notifying as required by March 1 of each even-numbered year.
- Facility has stopped managing excluded HSM as of _____ (mm/dd/yyyy) and is notifying as required.

2. Description of excluded HSM activity. Please list the appropriate codes and quantities in **short tons** to describe your excluded HSM activity ONLY (do not include any information regarding your hazardous wastes). Use additional pages if more space is needed.

a. Facility code (answer using codes listed in the Code List section of the instructions) <i>SIA File</i>	b. Waste code(s) for HSM <i>SIB File</i>	c. Estimated short tons of excluded HSM to be managed annually <i>SIA File</i>	d. Actual short tons of excluded HSM that was managed during the most recent odd-numbered year <i>SIA File</i>	e. Land-based unit code (answer using codes listed in the Code List section of the instructions) <i>SIA File</i>
FACILITY_CODE	WASTE_CODE	ESTIMATE_SHORT_TONS	ACTUAL_SHORT_TONS	LAND_BASED_UNITS

3. Facility has financial assurance pursuant to 40 CFR 261.4(a)(24)(vi). (Financial assurance is required for reclaimers and intermediate facilities managing excluded HSM under 40 CFR 261.4(a)(24) and (25)) *S19 File*

Y N Does this facility have financial assurance pursuant to 40 CFR 261.4(a)(24)(vi)? **HSM_FA**
