

Spanish Years of Education

Marque abajo el número que indica cuántos años de escuela completó.

0 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22
básico (primaria) *secundaria* *superior* *maestría/doctorado*

Scoring

Score the highest number indicated.

Characteristics

Tested on 266 Spanish-speaking subjects with chronic conditions.

No. of items	Observed Range	Mean	Standard Deviation	Internal Consistency Reliability	Test-Retest Reliability
1	1-19	8.72	4.48	—	NA

Source of Psychometric Data

Stanford Spanish Outcome Measures Study. Psychometrics reported in: González V, Stewart A, Ritter P, Lorig K, Translation and validation of arthritis outcome measures into Spanish. *Arthritis and Rheumatism*, 38(10),1995, pp.1432.

Comments

Education is often used in research as a surrogate for socioeconomic status, and is less objectionable to subjects than asking income. For researchers outside of the U.S. educational system, this item should be adjusted to reflect their own educational system.
