

Spanish Quality of Life Visual Numeric

¿En general cómo Ud. calificaría su calidad de vida? Por favor marque el número que describa su **calidad de vida** durante la **semana pasada**:

Scoring

The score is the number circled or histogram marked (radio buttons below the numbers are used on the Internet version). Scores range from 0 to 10, with the higher score indicating better quality of life. If two consecutive numbers are circled, score the lower (less QOL) number, if two non-consecutive numbers are circled, do not score.

Characteristics

Tested on 213 subjects with chronic conditions.

No. of items	Observed Range	Mean	Standard Deviation	Internal Consistency Reliability	Test-Retest Reliability
1	0-10	6.62	2.20	—	NA

Source of Psychometric Data

Spanish-speaking participants in the U.S. National Chronic Disease Self-Management Study. Study described in Ory MG, Ahn S, Jiang L, et al. National study of chronic disease self-management: six month outcome findings. Journal of Aging and Health. 2013 [in press].

Comments

This scale is a modified version of the visual analog scale. We found that this scale is easier for subjects to use, resulting in less missing and unclear responses.
