## Stress Visual Numeric

We are interested in learning whether or not you are affected by stress. Please circle the number below that describes your stress in the past week:

## Scoring

The score is the number circled or histogram marked (radio buttons below the numbers are used on the Internet version). Scores range from 0 to 10, with the higher score indicating more stress. If two consecutive numbers are circled, score the higher (more stress) number, if two non-consecutive numbers are circled, do not score.

## Characteristics

Tested on 954 subjects with chronic conditions.

| No. of <br> items | Observed <br> Range | Mean | Standard <br> Deviation | Internal Consistency <br> Reliability | Test-Retest <br> Reliability |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | $0-10$ | 4.34 | 3.08 | - | NA |

## Source of Psychometric Data

English language participants in the U.S. National Chronic Disease Self-Management Study. Study described in Ory MG, Ahn S, Jiang L, et al. National study of chronic disease self-management: six month outcome findings. Journal of Aging and Health. 2013 [in press].

## Comments

This scale is a modified version of the visual analog scale. We found that this scale is easier for subjects to use, resulting in less missing and unclear responses. Available in Spanish.
