(Same as MATSCI 207) Diffusion and phase transformations in solids. Diffusion topics: Fick's laws, atomic theory of diffusion, and diffusion in alloys. Phase transformation topics: nucleation, growth, diffusional transformations, spinodal decomposition, and interface phenomena. Material builds on the mathematical, thermodynamic, and statistical mechanical foundations in the prerequisites. Prerequisites: 194/204. GER:DB-EngrAppSci

3-4 units, Spr (McIntyre, P)

**MATSCI 198. Mechanical Properties of Materials**

(Same as MATSCI 208) Introduction to the mechanical behavior of solids, emphasizing the relationships between microstructure and mechanical properties. Elastic, anelastic, and plastic properties of materials. The relations between stress, strain, strain rate, and temperature for plastically deformable solids. Application of dislocation theory to strengthening mechanisms in crystalline solids. The phenomena of creep, fracture, and fatigue and their controlling mechanisms. Prerequisites: 193/203. GER:DB-EngrAppSci

3-4 units, Spr (Dauskardt, R)

**MATSCI 199. Electronic and Optical Properties of Solids**

(Same as MATSCI 209) The concepts of electronic energy bands and transports applied to metals, semiconductors, and insulators. The behavior of electronic and optical devices including p-n junctions, MOS-capacitors, MOSFETs, optical waveguides, quantum-well lasers, light amplifiers, and metallo-dielectric light guides. Emphasis is on relationships between structure and physical properties. Elementary quantum and statistical mechanics concepts are used. Prerequisite: 195/205 or equivalent. GER:DB-EngrAppSci

3-4 units, Spr (Brongersma, M)

**GRADUATE COURSES IN MATERIALS SCIENCE AND ENGINEERING**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**MATSCI 171. Nanocharacterization Laboratory**

(Same as MATSCI 161) Nanocharacterization techniques, such as: optical and electron microscopy, x-ray photoelectron spectroscopy and atomic force microscopy, will be explained in class and used in lab to determine structure of materials and understand why they have certain properties. This WIM class includes instruction on writing, statistics, generating effective plots with curve fits, using databases to find information and giving oral scientific

presentations. Prerequisite: ENGR 50 or equivalent. (75 min. lecture + 3 hr. lab most weeks.)

3-4 units, Spr (McGehee, M)

**MATSCI 172. X-Ray Diffraction Laboratory**

(Same as MATSCI 162) Experimental x-ray diffraction techniques for microstructural analysis of materials, emphasizing powder and single-crystal techniques. Diffraction from epitaxial and polycrystalline thin films, multilayers, and amorphous materials using medium and high resolution configurations. Determination of phase purity, crystallinity, relaxation, stress, and texture in the materials. Advanced experimental x-ray diffraction techniques: reciprocal lattice mapping, reflectivity, and grazing incidence diffraction. Enrollment limited to 20.

3-4 units, Win (Vailionis, A)

**MATSCI 173. Mechanical Behavior Laboratory**

(Same as MATSCI 163) Experimental techniques for the study of the mechanical behavior of engineering materials in bulk and thin film form, including tension testing, nanoindentation, and wafer curvature stress analysis. Metallic and polymeric systems. Prerequisite: ENGR 50.

3-4 units, Aut (Earhart, C)

**MATSCI 200. Master's Research**

Participation in a research project.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MATSCI 202. Materials Chemistry**

(Same as MATSCI 192) Chemical principles of materials: atomic and molecular bonding; acid and base chemistry; redox and electrochemistry; colloidal and surface chemistry; materials synthesis; and nanoscale chemistry.

3-4 units, Aut (Dionne, J)

**MATSCI 203. Atomic Arrangements in Solids**

(Same as MATSCI 193) Atomic arrangements in perfect and imperfect solids, especially important metals, ceramics, and semiconductors. Elements of formal crystallography, including development of point groups and space groups.

3-4 units, Aut (Reed, E)

**MATSCI 204. Thermodynamics and Phase Equilibria**

(Same as MATSCI 194) The principles of heterogeneous equilibria and their application to phase diagrams. Thermodynamics of solutions; chemical reactions; non-stoichiometry in compounds; first order phase transitions and metastability; thermodynamics of surfaces, elastic solids, dielectrics, and magnetic solids.

3-4 units, Win (Salleo, A)

**MATSCI 205. Waves and Diffraction in Solids**

(Same as MATSCI 195) The elementary principals of x-ray, vibrational, and electron waves in solids. Basic wave behavior including Fourier analysis, interference, diffraction, and polarization. Examples of wave systems, including electromagnetic waves from Maxwell's equations. Diffracted intensity in reciprocal space and experimental techniques such as electron and x-ray diffraction. Lattice vibrations in solids, including vibrational modes, dispersion relationship, density of states, and thermal properties. Free electron model. Basic quantum mechanics and statistical mechanics including Fermi-Dirac and Bose-Einstein statistics. Prerequisite: 193/203 or consent of instructor.

3-4 units, Win (Clemens, B)

**MATSCI 206. Imperfections in Solids**

(Same as MATSCI 196) Atomic and molecular scale defects and their importance to the physical and mechanical properties of bulk and nanoscale materials. Point defects and dislocations in crystals. Imperfections in amorphous solids. Structure and properties of interfaces. Prerequisite: 193/203.

3-4 units, Win (Staff)

**MATSCI 207. Rate Processes in Materials**

(Same as MATSCI 197) Diffusion and phase transformations in solids. Diffusion topics: Fick's laws, atomic theory of diffusion, and diffusion in alloys. Phase transformation topics: nucleation, growth, diffusional transformations, spinodal decomposition, and interface phenomena. Material builds on the mathematical, thermodynamic, and statistical mechanical foundations in the prerequisites. Prerequisites: 194/204.

3-4 units, Spr (McIntyre, P)

**MATSCI 208. Mechanical Properties of Materials**

(Same as MATSCI 198) Introduction to the mechanical behavior of solids, emphasizing the relationships between microstructure and mechanical properties. Elastic, anelastic, and plastic properties of materials. The relations between stress, strain, strain rate, and temperature for plastically deformable solids. Application of dislocation theory to strengthening mechanisms in crystalline solids. The phenomena of creep, fracture, and fatigue and their controlling mechanisms. Prerequisites: 193/203.

3-4 units, Spr (Dauskardt, R)

**MATSCI 209. Electronic and Optical Properties of Solids**

(Same as MATSCI 199) The concepts of electronic energy bands and transports applied to metals, semiconductors, and insulators. The behavior of electronic and optical devices including p-n junctions, MOS-capacitors, MOSFETs, optical waveguides, quantum-well lasers, light amplifiers, and metallo-dielectric light guides. Emphasis is on relationships between structure and physical properties. Elementary quantum and statistical mechanics concepts are used. Prerequisite: 195/205 or equivalent.

3-4 units, Spr (Brongersma, M)

**MATSCI 210. Organic and Biological Materials**

(Same as MATSCI 190) Unique physical and chemical properties of organic materials and their uses. The relationship between structure and physical properties, and techniques to determine chemical structure and molecular ordering. Examples include liquid crystals, dendrimers, carbon nanotubes, hydrogels, and biopolymers such as lipids, protein, and DNA. Prerequisite: Thermodynamics and ENGR 50 or equivalent.

3-4 units, Spr (Heilshorn, S)

**MATSCI 230. Materials Science Colloquium**

May be repeated for credit.

1 unit, Aut (Salleo, A; Brongersma, M), Win (Dionne, J; Melosh, N), Spr (Lindenberg, A; Reed, E)

**MATSCI 251. Microstructure and Mechanical Properties**

(Same as MATSCI 151) Primarily for students without a materials background. Mechanical properties and their dependence on microstructure in a range of engineering materials. Elementary deformation and fracture concepts, strengthening and toughening strategies in metals and ceramics. Topics: dislocation theory, mechanisms of hardening and toughening, fracture, fatigue, and high-temperature creep. Prerequisite: ENGR 50 or equivalent.

3-4 units, Aut (Dauskardt, R)

**MATSCI 256. Solar Cells, Fuel Cells, and Batteries: Materials for the Energy Solution**

(Same as MATSCI 156) Operating principles and applications of emerging technological solutions to the energy demands of the world. The scale of global energy usage and requirements for possible solutions. Basic physics and chemistry of solar cells, fuel cells, and batteries. Performance issues, including economics, from the ideal device to the installed system. The promise of materials research for providing next generation solutions.

3-4 units, Aut (Clemens, B)

**MATSCI 299. Practical Training**

Educational opportunities in high-technology research and development labs in industry. Qualified graduate students engage in internship work and integrate that work into their academic program. Following the internship, students complete a research report outlining their work activity, problems investigated, key results, and any follow-on projects they expect to perform. Student is responsible for arranging own employment. See department student services manager before enrolling.

3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MATSCI 300. Ph.D. Research**

Participation in a research project.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MATSCI 302. Solar Cells**

Theory of conventional p-n junction and excitonic solar cells. Design, fabrication, and characterization of crystalline silicon, amorphous silicon, CdTe, CIGS, and tandem and organic solar cells. Emerging solar cell concepts such as intermediate band gap and bioinspired solar cells. Emphasis is on the materials science aspects of solar cells research. Module design and economic hurdles that must be overcome for solar cell technology to generate a significant fraction of the world's electricity. Group project to

explore one solar cell approach in depth. SCPD offering.

3 units, Aut (McGehee, M)

**MATSCI 303. Principles, Materials and Devices of Batteries**

Thermodynamics and electrochemistry for batteries. Emphasis on lithium ion batteries, but also different types including lead acid, nickel metal hydride, metal air, sodium sulfur and redox flow. Battery electrode materials, electrolytes, separators, additives and electrode-electrolyte interface. Electrochemical techniques; advanced battery materials with nanotechnology; battery device structure. Prerequisites: undergraduate chemistry.

3 units, Aut (Cui, Y)

**MATSCI 311. Lasers in Materials Processing**

Principles of laser operation. Optically and electrically pumped lasers. Materials for solid-state lasers. Fundamentals of laser/materials interactions. Applications in thin film technology and microfabrication; laser annealing of defects and crystallization of amorphous films. Laser-induced shock waves. Extreme non-equilibrium laser processing; ultra-fast (femtosecond) lasers and their novel uses; micro- and nanofabrication of fluidic and photonic devices; intracellular nano-surgery.

3 units, not given this year

**MATSCI 312. New Methods in Thin Film Synthesis**

Materials base for engineering new classes of coatings and devices. Techniques to grow thin films at atomic scale and to fabricate multilayers/superlattices at nanoscale. Vacuum growth techniques including evaporation, molecular beam epitaxy (MBE), sputtering, ion beam assisted deposition, laser ablation, chemical vapor deposition (CVD), and electroplating. Future direction of material synthesis such as nanocluster deposition and nanoparticles self-assembly. Relationships between deposition parameters and film properties. Applications of thin film synthesis in microelectronics, nanotechnology, and biology. SCPD offering.

3 units, not given this year

**MATSCI 316. Nanoscale Science, Engineering, and Technology**

Sample application areas: renewable energy including nanoscaled photovoltaic cells, hydrogen storage, fuel cells, and nanoelectronics. Nanofabrication techniques including: self-assembly of amphiphilic molecules, block copolymers, organic-inorganic mesostructures, colloidal crystals, organic monolayers, proteins, DNA and abalone shells; biologically inspired growth of materials; photolithography, electron beam lithography, and scanning probe lithography; and synthesis of carbon nanotubes, nanowire, and nanocrystals. Other nanotechnology topics may be explored through a group project. SCPD offering.

3 units, Spr (Cui, Y)

**MATSCI 320. Nanocharacterization of Materials**

Current methods of directly examining the microstructure of materials. Topics: optical microscopy, scanning electron and focused ion beam microscopy, field ion microscopy, transmission electron microscopy, scanning probe microscopy, and microanalytical surface science methods. Emphasis is on the electron-optical techniques. Recommended: 193/203.

3 units, Win (Sinclair, R), alternate years, not given next year

**MATSCI 321. Transmission Electron Microscopy**

Image formation and interpretation. The contrast phenomena associated with perfect and imperfect crystals from a physical point of view and from a formal treatment of electron diffraction theory. The importance of electron diffraction to systematic analysis and recent imaging developments. Recommended: 193/203, 195/205, or equivalent.

3 units, alternate years, not given this year

**MATSCI 322. Transmission Electron Microscopy Laboratory**

Experimental application of electron microscopy to typical materials science studies. Topics include microscope operation and alignment, diffraction modes and analysis, bright-field/dark-field analysis of defects, high resolution imaging, and analytical techniques for compositional analysis (EDAX). Enrollment limited to 12. Prerequisites: 321, consent of instructor.

3 units, Spr (Marshall, A)

**MATSCI 323. Thin Film and Interface Microanalysis**

The science and technology of microanalytical techniques, including Auger electron spectroscopy (AES), Rutherford backscattering spectroscopy (RBS), secondary ion mass

spectroscopy (SIMS), ion scattering spectroscopy (ISS), and x-ray photoelectron spectroscopy (XPS or ESCA). Generic processes such as sputtering and high-vacuum generation. Prerequisite: some prior exposure to atomic and electronic structure of solids. SCPD offering.

3 units, not given this year

### **MATSCI 325. X-Ray Diffraction**

Diffraction theory and its relationship to structural determination in solids. Focus is on applications of x-rays; concepts can be applied to neutron and electron diffraction. Topics: Fourier analysis, kinematic theory, Patterson functions, diffraction from layered and amorphous materials, single crystal diffraction, dynamic theory, defect determination, surface diffraction, techniques for data analysis, and determination of particle size and strain. Prerequisites: 193/203, 195/205.

3 units, not given this year

### **MATSCI 326. X-Ray Science and Techniques**

X-ray interaction with matter; diffraction from ordered and disordered materials; x-ray absorption, photoemission, and coherent scattering; x-ray microscopy. Sources including synchrotrons, high harmonic generation, x-ray lasers. Time-resolved techniques and detector technology.

3 units, Aut (Lindenberg, A)

### **MATSCI 331. Atom-based computational methods for materials**

Introduction to atom-based computational methods for materials with emphasis on quantum methods. Topics include density functional theory, tight-binding and empirical approaches. Computation of optical, electronic, phonon properties. Bulk materials, interfaces, nanostructures. Molecular dynamics. Prerequisites - undergraduate quantum mechanics.

3 units, Win (Reed, E)

### **MATSCI 343. Organic Semiconductors for Electronics and Photonics**

The science of organic semiconductors and their use in electronic and photonic devices. Topics: methods for fabricating thin films and devices; relationship between chemical structure and molecular packing on properties such as band gap, charge carrier mobility and luminescence efficiency; doping; field-effect transistors; light-emitting diodes; lasers; biosensors; photodetectors and photovoltaic cells. SCPD offering.

3 units, Spr (Salleo, A)

### **MATSCI 346. Nanophotonics**

(Same as EE 336) Recent developments in micro- and nanophotonic materials and devices. Basic concepts of photonic crystals. Integrated photonic circuits. Photonic crystal fibers. Superprism effects. Optical properties of metallic nanostructures. Sub-wavelength phenomena and plasmonic excitations. Meta-materials. Prerequisite: electromagnetic theory at the level of 242.

3 units, Aut (Brongersma, M; Fan, S)

### **MATSCI 347. Introduction to Magnetism and Magnetic Nanostructures**

Atomic origins of magnetic moments, magnetic exchange and ferromagnetism, types of magnetic order, magnetic anisotropy, domains, domain walls, hysteresis loops, hard and soft magnetic materials, demagnetization factors, and applications of magnetic materials, especially magnetic nanostructures and nanotechnology. Tools include finite-element and micromagnetic modeling. Design topics include electromagnet and permanent magnet, electronic article surveillance, magnetic inductors, bio-magnetic sensors, and magnetic drug delivery. Design projects, team work, and computer-aided design. Prerequisites: PHYSICS 29 and 43, or college-level electricity and magnetism.

3 units, Spr (Wang, S; White, R)

### **MATSCI 351. Failure Analysis for Emerging Technologies**

Introduction to root cause failure analysis investigation of emerging technologies such as high tech electronic and medical devices. Real case studies illustration of design errors, manufacturing defects, misuse and environmental degradation that resulted in fracture, fatigue, cracking or corrosion. Understanding material degradation modes and mechanisms. Examples on analytical characterization techniques such as scanning electron microscopy (SEM), X-ray photoelectron spectroscopy (XPS), Fourier transform infrared spectroscopy (FTIR), time of flight

secondary ion mass spectroscopy (TOF-SIMS), mechanical testing, finite element analysis (FEA) and electrochemical testing.

3 units, not given this year

### **MATSCI 353. Mechanical Properties of Thin Films**

The mechanical properties of thin films on substrates. The mechanics of thin films and of the atomic processes which cause stresses to develop during thin film growth. Experimental techniques for studying stresses in and mechanical properties of thin films. Elastic, plastic, and diffusional deformation of thin films on substrates as a function of temperature and microstructure. Effects of deformation and fracture on the processing of thin film materials. Prerequisite: 198/208.

3 units, not given this year

### **MATSCI 358. Fracture and Fatigue of Materials and Thin Film Structures**

Linear-elastic and elastic-plastic fracture mechanics from a materials science perspective, emphasizing microstructure and the micromechanisms of fracture. Plane strain fracture toughness and resistance curve behavior. Mechanisms of failure associated with cohesion and adhesion in bulk materials, composites, and thin film structures. Fracture mechanics approaches to toughening and subcritical crack-growth processes, with examples and applications involving cyclic fatigue and environmentally assisted subcritical crack growth. Prerequisite: 151/251, 198/208, or equivalent. SCPD offering.

3 units, Win (Dauskardt, R)

### **MATSCI 359. Crystalline Anisotropy**

(Same as ME 336) Matrix and tensor analysis with applications to the effects of crystal symmetry on elastic deformation, thermal expansion, diffusion, piezoelectricity, magnetism, thermodynamics, and optical properties of solids, on the level of J. F. Nye's Physical Properties of Crystals. Homework sets use Mathematica.

3 units, not given this year

### **MATSCI 380. Nano-Biotechnology**

Literature based. Principles that make nanoscale materials unique, applications to biology, and how biological systems can create nanomaterials. Molecular sensing, drug delivery, bio-inspired synthesis, self-assembling systems, and nanomaterial based therapies. Interactions at the nanoscale. Applications and opportunities for new technology.

3 units, Win (Melosh, N)

### **MATSCI 381. Biomaterials in Regenerative Medicine**

(Same as BIOE 361) Materials design and engineering for regenerative medicine. How materials interact with cells through their micro- and nanostructure, mechanical properties, degradation characteristics, surface chemistry, and biochemistry. Examples include novel materials for drug and gene delivery, materials for stem cell proliferation and differentiation, and tissue engineering scaffolds. Prerequisites: undergraduate chemistry, and cell/molecular biology or biochemistry.

3 units, not given this year

### **MATSCI 382. Bio-chips, Imaging and Nanomedicine**

(Same as EE 225) The course covers state-of-the-art and emerging bio-sensors, bio-chips, imaging modalities, and nano-therapies which will be studied in the context of human physiology including the nervous system, circulatory system and immune system. Medical diagnostics will be divided into bio-chips (in-vitro diagnostics) and medical and molecular imaging (in-vivo imaging). In-depth discussion on cancer and cardiovascular diseases and the role of diagnostics and nano-therapies.

3 units, Win (Wang, S; de la Zerda, A; Akin, D)

### **MATSCI 399. Graduate Independent Study**

Under supervision of a faculty member.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### **MATSCI 400. Participation in Materials Science Teaching**

May be repeated for credit.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

### **MATSCI 801. TGR Project for MS Students**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### **MATSCI 802. TGR Dissertation for Ph.D Students**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

# MATHEMATICAL AND COMPUTATIONAL SCIENCE (MCS) COURSES

## UNDERGRADUATE COURSES IN MATHEMATICAL AND COMPUTATIONAL SCIENCE

Primarily for undergraduates; graduate students may enroll with consent of adviser.

### MCS 100. Mathematics of Sports

(Same as STATS 50) The use of mathematics, statistics, and probability in the analysis of sports performance, sports records, and strategy. Topics include mathematical analysis of the physics of sports and the determinations of optimal strategies. New diagnostic statistics and strategies for each sport. Corequisite: STATS 116. GER:DB-Math

3 units, Aut (Cover, T)

## MATHEMATICS (MATH) COURSES

### UNDERGRADUATE COURSES IN MATHEMATICS

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### MATH 19. Calculus

Introduction to differential calculus of functions of one variable. Topics: review of elementary functions including exponentials and logarithms, limits, rates of change, the derivative, and applications. Math 19, 20, and 21 cover the same material as Math 41 and 42, but in three quarters rather than two. Prerequisites: precalculus, including trigonometry, advanced algebra, and analysis of elementary functions. GER:DB-Math

3 units, Aut (Bahuaud, E), Win (Rhoades, R), Sum (Staff)

#### MATH 20. Calculus

Continuation of 19. Applications of differential calculus; introduction to integral calculus of functions of one variable, including: the definite integral, methods of symbolic and numerical integration, applications of the definite integral. Prerequisites: 19 or equivalent. GER:DB-Math

3 units, Win (Bahuaud, E), Spr (Van Horn-Morris, J)

#### MATH 21. Calculus

Continuation of 20. Applications of integral calculus, introduction to differential equations, infinite series. Prerequisite: 20 or equivalent. GER:DB-Math

4 units, Spr (Bahuaud, E)

#### MATH 41. Calculus (accelerated)

Introduction to differential and integral calculus of functions of one variable. Topics: limits, rates of change, the derivative and applications, introduction to the definite integral and integration. Math 41 and 42 cover the same material as Math 19-20-21, but in two quarters rather than three. Prerequisites: trigonometry, advanced algebra, and analysis of elementary functions, including exponentials and logarithms. GER:DB-Math

5 units, Aut (Rodriguez, N)

#### MATH 41A. Calculus ACE

Students attend MATH 41 lectures with different recitation sessions, four hours instead of two, emphasizing engineering applications. Prerequisite: application; see <http://soe.stanford.edu/edp/programs/ace.html>. GER:DB-Math

6 units, Aut (Cantarero Lopez, J; Nance, T)

#### MATH 42. Calculus (Accelerated)

Continuation of 41. Methods of symbolic and numerical integration, applications of the definite integral, introduction to differential equations, infinite series. Prerequisite: 41 or equivalent. GER:DB-Math

5 units, Aut (Zvonkine, D), Win (Lucianovic, M)

#### MATH 42A. Calculus ACE

Students attend MATH 41 lectures with different recitation sessions, four hours instead of two, emphasizing engineering applications. Prerequisite: application; see

<http://soe.stanford.edu/edp/programs/ace.html>. GER:DB-Math  
6 units, Aut (Zvonkine, D; Jerison, D), Win (Lucianovic, M)

#### MATH 50V. Multivariable Differential Calculus

Differential calculus for functions of two or more variables. Topics: vectors and vector-valued functions in 2-space and 3-space, tangent and normal vectors, curvature, functions of two or more variables, partial derivatives and differentiability, directional derivatives and gradients, maxima and minima, and optimization using Lagrange multipliers. Prerequisites: two quarters of single variable calculus, or consent of instructor. GER:DB-Math

4 units, Sum (Staff)

#### MATH 51. Linear Algebra and Differential Calculus of Several Variables

Geometry and algebra of vectors, systems of linear equations, matrices and linear transformations, diagonalization and eigenvectors, vector valued functions and functions of several variables, parametric curves, partial derivatives and gradients, the derivative as a matrix, chain rule in several variables, constrained and unconstrained optimization. Prerequisite: 21, or 42, or a score of 4 on the BC Advanced Placement exam or 5 on the AB Advanced Placement exam, or consent of instructor. GER:DB-Math

5 units, Aut (Rubinstein, Y), Win (Staff), Spr (Lucianovic, M), Sum (Staff)

#### MATH 51A. Linear Algebra and Differential Calculus of Several Variables, ACE

Students attend MATH 51 lectures with different recitation sessions: four hours per week instead of two, emphasizing engineering applications. Prerequisite: application; see <http://soe.stanford.edu/edp/programs/ace.html>. GER:DB-Math

6 units, Aut (Mazzeo, R; Goodman, E), Win (Staff), Spr (Lucianovic, M)

#### MATH 51H. Honors Multivariable Mathematics

For prospective Mathematics majors in the honors program and students from other areas of science or engineering who have a strong mathematics background. Three quarter sequence covers the material of 51, 52, 53, and additional advanced calculus and ordinary and partial differential equations. Unified treatment of multivariable calculus, linear algebra, and differential equations with a different order of topics and emphasis from standard courses. Students should know one-variable calculus and have an interest in a theoretical approach to the subject. Prerequisite: score of 5 on BC Advanced Placement exam, or consent of instructor. GER:DB-Math

5 units, Aut (Simon, L; Malkiewich, C)

#### MATH 51M. Introduction to MATLAB for Multivariable Mathematics

Corequisite: MATH 51.

1 unit, Aut (Fouladgar, K)

#### MATH 52. Integral Calculus of Several Variables

Iterated integrals, line and surface integrals, vector analysis with applications to vector potentials and conservative vector fields, physical interpretations. Divergence theorem and the theorems of Green, Gauss, and Stokes. Prerequisite: 51 and 42 or equivalents. GER:DB-Math

5 units, Aut (Wieczorek, W), Win (Wieczorek, W), Spr (Wise, J)

#### MATH 52H. Honors Multivariable Mathematics

Continuation of 51H. Prerequisite: 51H. GER:DB-Math

5 units, Win (Eliashberg, Y; Petrow, I)

#### MATH 52V. Multivariable Integral Calculus

Integral calculus for functions of two or more variables. Topics: double and triple integrals, change of variables and the Jacobian, vector fields, line integrals, independence of path and the fundamental theorem of line integrals, Green's theorem, divergence theorem, Stokes's theorem. Prerequisites: one quarter of multivariable differential calculus (comparable to 50V or 51), or consent of instructor. GER:DB-Math

5 units, Sum (Staff)

#### MATH 53. Ordinary Differential Equations with Linear

**Algebra**

Ordinary differential equations and initial value problems, systems of linear differential equations with constant coefficients, applications of second-order equations to oscillations, matrix exponentials, Laplace transforms, stability of non-linear systems and phase plane analysis, numerical methods. Prerequisite: 51 and 42 or equivalents. GER:DB-Math

5 units, Aut (Ionel, E), Win (Brendle, S), Spr (Staff), Sum (Staff)

**MATH 53H. Honors Multivariable Mathematics**

Continuation of 52H. Prerequisite: 52H. GER:DB-Math

5 units, Spr (Eliashberg, Y; Hough, R)

**MATH 70SI. The Game of Go: Strategy, Theory, and History**

Strategy and mathematical theories of the game of Go, with guest appearance by a professional Go player.

1 unit, Spr (Bump, D)

**MATH 78SI. Speedcubing: History, Theory, and Practice**

History of the Rubik's cube; the current cubing community; basic mathematical theory; concepts to improve speed solving skill. Prior ability to solve cube not required.

1 unit, not given this year

**MATH 80Q. Capillary Surfaces: Explored and Unexplored Territory**

Preference to sophomores. Capillary surfaces: the interfaces between fluids that are adjacent to each other and do not mix. Recently discovered phenomena, predicted mathematically and subsequently confirmed by experiments, some done in space shuttles. Interested students may participate in ongoing investigations with affinity between mathematics and physics.

3 units, not given this year

**MATH 87Q. Mathematics of Knots, Braids, Links, and Tangles**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Types of knots and how knots can be distinguished from one another by means of numerical or polynomial invariants. The geometry and algebra of braids, including their relationships to knots. Topology of surfaces. Brief summary of applications to biology, chemistry, and physics.

3 units, Win (Wieczorek, W)

**MATH 88Q. The Mathematics of the Rubik's Cube**

Preference to sophomores. Group theory through topics that can be illustrated with the Rubik's cube: subgroups, homomorphisms and quotient groups, the symmetric and alternating groups, conjugation, commutators, and Sylow subgroups.

3 units, not given this year

**MATH 100. Mathematics for Elementary School Teachers**

Mathematics and pedagogical strategies. Core mathematical content in grades K-6, classroom presentation, how to handle student errors, and mathematical issues that come up during instruction.

4 units, not given this year

**MATH 102. Mathematics and magic tricks**

Performance magic tricks based on combinatorics, number theory, and topology; open mathematical problems related to magic tricks; history of magic and methods of inventing new tricks (and new mathematics.) Students are expected to learn performable skills.

3 units, Spr (Diaconis, P)

**MATH 104. Applied Matrix Theory**

Linear algebra for applications in science and engineering: orthogonality, projections, the four fundamental subspaces of a matrix, spectral theory for symmetric matrices, the singular value decomposition, the QR decomposition, least-squares, the condition number of a matrix, algorithms for solving linear systems. Prerequisites: MATH 51 and MATH 52 or 53. GER:DB-Math

3 units, Aut (Mukamel, R), Win (Candes, E), Sum (Staff)

**MATH 106. Functions of a Complex Variable**

Complex numbers, analytic functions, Cauchy-Riemann equations, complex integration, Cauchy integral formula, residues, elementary conformal mappings. Prerequisite: 52. GER:DB-Math

3 units, Win (Luu, M), Sum (Staff)

**MATH 108. Introduction to Combinatorics and Its Applications**

Topics: graphs, trees (Cayley's Theorem, application to

phylogony), eigenvalues, basic enumeration (permutations, Stirling and Bell numbers), recurrences, generating functions, basic asymptotics. Prerequisites: 51 or 103 or equivalent. GER:DB-Math

3 units, Spr (Bump, D)

**MATH 109. Applied Group Theory**

Applications of the theory of groups. Topics: elements of group theory, groups of symmetries, matrix groups, group actions, and applications to combinatorics and computing. Applications: rotational symmetry groups, the study of the Platonic solids, crystallographic groups and their applications in chemistry and physics. WIM. GER:DB-Math, WIM

3 units, Win (Venkatesh, A)

**MATH 110. Applied Number Theory and Field Theory**

Number theory and its applications to modern cryptography. Topics: congruences, finite fields, primality testing and factorization, public key cryptography, error correcting codes, and elliptic curves, emphasizing algorithms. WIM. GER:DB-Math, WIM

3 units, Spr (McNamara, P)

**MATH 111. Computational Commutative Algebra**

Introduction to the theory of commutative rings, ideals, and modules. Systems of polynomial equations in several variables from the algorithmic viewpoint. Groebner bases, Buchberger's algorithm, elimination theory. Applications to algebraic geometry and to geometric problems. GER:DB-Math

3 units, not given this year

**MATH 113. Linear Algebra and Matrix Theory**

Algebraic properties of matrices and their interpretation in geometric terms. The relationship between the algebraic and geometric points of view and matters fundamental to the study and solution of linear equations. Topics: linear equations, vector spaces, linear dependence, bases and coordinate systems; linear transformations and matrices; similarity; eigenvectors and eigenvalues; diagonalization. GER:DB-Math

3 units, Win (Ionel, E), Spr (Li, J)

**MATH 113V. Linear Algebra**

Topics: matrices, linear equations, vector spaces, linear dependence, bases and coordinates, linear transformations, similarity, eigenvectors and eigenvalues, and diagonalization. Prerequisites: two quarters of single variable calculus, or consent of instructor. GER:DB-Math

3 units, Sum (Staff)

**MATH 115. Functions of a Real Variable**

The development of real analysis in Euclidean space: sequences and series, limits, continuous functions, derivatives, integrals. Basic point set topology. Honors math majors and students who intend to do graduate work in mathematics should take 171.

Prerequisite: 51. GER:DB-Math

3 units, Aut (Camilier, I), Spr (Abrantes Andrade, R), Sum (Staff)

**MATH 116. Complex Analysis**

Analytic functions, Cauchy integral formula, power series and Laurent series, calculus of residues and applications, conformal mapping, analytic continuation, introduction to Riemann surfaces, Fourier series and integrals. Prerequisites: 52, and 115 or 171. GER:DB-Math

3 units, Spr (Li, J)

**MATH 120. Modern Algebra**

Groups acting on sets, examples of finite groups, Sylow theorems, solvable and simple groups. Fields, rings, and ideals; polynomial rings over a field; PID and non-PID. Unique factorization domains. WIM. GER:DB-Math, WIM

3 units, Aut (Galatius, S), Spr (McNamara, P)

**MATH 121. Modern Algebra II**

Continuation of 120. Field of fractions, field theory and Galois theory. Modules over a PID, quotient modules, non-free modules. Canonical forms, generalized eigenspaces, quotients and duality for vector spaces. Prerequisite: Math 120. GER:DB-Math

3 units, Win (Luu, M)

**MATH 122. GROUP REPRESENTATIONS**

Group representations and group rings, tensor algebra, character theory. Bilinear and quadratic forms, semisimplicity. Induced representations. Classification of representations, applications.

Prerequisite: Math 120, and either Math 121 or permission of instructor.

3 units, Spr (Venkatesh, A)

### MATH 131P. Partial Differential Equations I

An introduction to PDE; particularly suitable for non-Math majors. Topics include physical examples of PDE's, method of characteristics, D'Alembert's formula, maximum principles, heat kernel, Duhamel's principle, separation of variables, Fourier series, Harmonic functions, Bessel functions, spherical harmonics. Students who have taken MATH 171 should consider taking MATH 173 rather than 131p. Prerequisite: 53. GER:DB-Math

3 units, Aut (Garapon, P), Win (Garapon, P)

### MATH 132. Partial Differential Equations II

Laplace's equation and properties of harmonic functions. Green's functions. Distributions and Fourier transforms. Eigenvalue problems and generalized Fourier series. Numerical solutions. Prerequisite: 131P. GER:DB-Math

3 units, Spr (Garapon, P)

### MATH 136. Stochastic Processes

(Same as STATS 219) Introduction to measure theory,  $L_p$  spaces and Hilbert spaces. Random variables, expectation, conditional expectation, conditional distribution. Uniform integrability, almost sure and  $L_p$  convergence. Stochastic processes: definition, stationarity, sample path continuity. Examples: random walk, Markov chains, Gaussian processes, Poisson processes, Martingales. Construction and basic properties of Brownian motion. Prerequisite: STATS 116 or MATH 151 or equivalent. Recommended: MATH 115 or equivalent. GER:DB-Math

3 units, Aut (Ding, J)

### MATH 137. Mathematical Methods of Classical Mechanics

Newtonian mechanics. Lagrangian formalism. E. Noether's theorem. Oscillations. Rigid bodies. Introduction to symplectic geometry. Hamiltonian formalism. Legendre transform. Variational principles. Geometric optics. Introduction to the theory of integrable systems. Prerequisites: 51, 52, 53, or 51H, 52H, 53H. GER:DB-Math

3 units, not given this year

### MATH 138. Celestial Mechanics

Mathematically rigorous introduction to the classical N-body problem: the motion of N particles evolving according to Newton's law. Topics include: the Kepler problem and its symmetries; other central force problems; conservation theorems; variational methods; Hamilton-Jacobi theory; the role of equilibrium points and stability; and symplectic methods. Prerequisites: 53, and 115 or 171. GER:DB-Math

3 units, not given this year

### MATH 143. Differential Geometry

Geometry of curves and surfaces in three-space and higher dimensional manifolds. Parallel transport, curvature, and geodesics. Surfaces with constant curvature. Minimal surfaces. GER:DB-Math

3 units, Win (Schoen, R)

### MATH 145. Algebraic Geometry

Hilbert's nullstellensatz, complex affine and projective curves, Bezout's theorem, the degree/genus formula, blow-up, Riemann-Roch theorem. Prerequisites: 120, and 121 or knowledge of fraction fields. Recommended: familiarity with surfaces equivalent to 143, 146, 147, or 148. GER:DB-Math

3 units, Win (Conrad, B)

### MATH 146. Analysis on Manifolds

Differentiable manifolds, tangent space, submanifolds, implicit function theorem, differential forms, vector and tensor fields. Frobenius' theorem, DeRham theory. Prerequisite: 52 or 52H. GER:DB-Math

3 units, alternate years, not given this year

### MATH 147. Differential Topology

Smooth manifolds, transversality, Sard's theorem, embeddings, degree of a map, Borsuk-Ulam theorem, Hopf degree theorem, Jordan curve theorem. Prerequisite: 115 or 171. GER:DB-Math

3 units, Spr (Mukamel, R), alternate years, not given next year

### MATH 148. Algebraic Topology

Fundamental group, covering spaces, Euler characteristic, homology, classification of surfaces, knots. Prerequisite: 109 or

120. GER:DB-Math

3 units, alternate years, not given this year

### MATH 151. Introduction to Probability Theory

Counting; axioms of probability; conditioning and independence; expectation and variance; discrete and continuous random variables and distributions; joint distributions and dependence; central limit theorem and laws of large numbers. Prerequisite: 52 or consent of instructor. GER:DB-Math

3 units, Win (Carlsson, G)

### MATH 152. Elementary Theory of Numbers

Euclid's algorithm, fundamental theorems on divisibility; prime numbers; congruence of numbers; theorems of Fermat, Euler, Wilson; congruences of first and higher degrees; quadratic residues; introduction to the theory of binary quadratic forms; quadratic reciprocity; partitions. GER:DB-Math

3 units, Aut (Rhoades, R)

### MATH 154. Algebraic Number Theory

Properties of number fields and Dedekind domains, quadratic and cyclotomic fields, applications to some classical Diophantine equations; introduction to elliptic curves. Prerequisites: 120 and 121, especially modules over principal ideal domains and Galois theory of finite fields. GER:DB-Math

3 units, alternate years, not given this year

### MATH 155. Analytic Number Theory

Topics in analytic number theory such as the distribution of prime numbers, the prime number theorem, twin primes and Goldbach's conjecture, the theory of quadratic forms, Dirichlet's class number formula, Dirichlet's theorem on primes in arithmetic progressions, and the fifteen theorem. Prerequisite: 152, or familiarity with the Euclidean algorithm, congruences, residue classes and reduced residue classes, primitive roots, and quadratic reciprocity. GER:DB-Math

3 units, Spr (Soundararajan, K), alternate years, not given next year

### MATH 159. Discrete Probabilistic Methods

Modern discrete probabilistic methods suitable for analyzing discrete structures of the type arising in number theory, graph theory, combinatorics, computer science, information theory and molecular sequence analysis. Prerequisite: STATS 116/MATH 151 or equivalent.

3 units, not given this year

### MATH 161. Set Theory

Informal and axiomatic set theory: sets, relations, functions, and set-theoretical operations. The Zermelo-Fraenkel axiom system and the special role of the axiom of choice and its various equivalents. Well-orderings and ordinal numbers; transfinite induction and transfinite recursion. Equinumerosity and cardinal numbers; Cantor's Alephs and cardinal arithmetic. Open problems in set theory. Prerequisite: students should be comfortable doing proofs. GER:DB-Math

3 units, Aut (Sommer, R)

### MATH 162. Philosophy of Mathematics

(Same as PHIL 162, PHIL 262) (Graduate students register for PHIL 262.) 20th-century approaches to the foundations and philosophy of mathematics. The background in mathematics, set theory, and logic. Schools and programs of logicism, predicativism, platonism, formalism, and constructivism. Readings from leading thinkers. Prerequisite: PHIL151 or consent of instructor. GER:DB-Math

4 units, Spr (Mumma, J)

### MATH 171. Fundamental Concepts of Analysis

Recommended for Mathematics majors and required of honors Mathematics majors. Similar to 115 but altered content and more theoretical orientation. Properties of Riemann integrals, continuous functions and convergence in metric spaces; compact metric spaces, basic point set topology. Prerequisites: 51 and 52, or 51H and 52H. WIM GER:DB-Math, WIM

3 units, Aut (Simon, L), Spr (Vasy, A)

### MATH 172. Lebesgue Integration and Fourier Analysis

Similar to 205A, but for undergraduate Math majors and graduate students in other disciplines. Topics include Lebesgue measure on Euclidean space, Lebesgue integration,  $L^p$  spaces, the Fourier transform, the Hardy-Littlewood maximal function and Lebesgue

differentiation. Prerequisite: 171 or consent of instructor. GER:DB-Math

3 units, Win (Bamler, R)

**MATH 173. Theory of Partial Differential Equations**

A rigorous introduction to PDE accessible to advanced undergraduates. Elliptic, parabolic, and hyperbolic equations in many space dimensions including basic properties of solutions such as maximum principles, causality, and conservation laws. Methods include the Fourier transform as well as more classical methods. The Lebesgue integral will be used throughout, but a summary of its properties will be provided to make the course accessible to students who have not had 172 or 205A. Prerequisite: 171 or equivalent.

3 units, Win (Mazzeo, R)

**MATH 174. Calculus of Variations**

An introductory course emphasizing the historical development of the theory, its connections to physics and mechanics, its independent mathematical interest, and its contacts with daily life experience. Applications to minimal surfaces and to capillary surface interfaces. Prerequisites: Math 171 or equivalent.

3 units, not given this year

**MATH 174A. Topics in Analysis and Differential Equations with Applications**

For students planning graduate work in mathematics or physics, and for honors math majors and other students at ease with rigorous proofs and qualitative discussion. Topics may include: geometric theory of ODEs with applications to dynamics; mathematical foundations of classical mechanics including variational principles, Lagrangian and Hamiltonian formalisms, theory of integrable systems; theorems of existence and uniqueness; Sturm-Liouville theory. Prerequisite: 53H or 171, or consent of instructor. GER:DB-Math

3 units, not given this year

**MATH 174B. Honors Analysis**

Continuation of 174A. Topics may include: introduction to PDEs including transport equations, Laplace, wave, and heat equations; techniques of solution including separation of variables and Green's functions; Fourier series and integrals; introduction to the theory of distributions; mathematical foundations of quantum mechanics. Prerequisite: 174A. GER:DB-Math

3 units, not given this year

**MATH 175. Elementary Functional Analysis**

Linear operators on Hilbert space. Spectral theory of compact operators; applications to integral equations. Elements of Banach space theory. Prerequisite: 115 or 171. GER:DB-Math

3 units, Spr (Bamler, R)

**MATH 180. Introduction to Financial Mathematics**

Financial derivatives: contracts and options. Hedging and risk management. Arbitrage, interest rate, and discounted value. Geometric random walk and Brownian motion as models of risky assets. Initial boundary value problems for the heat and related partial differential equations. Self-financing replicating portfolio. Black-Scholes pricing of European options. Dividends. Implied volatility. Optimal stopping and American options. Prerequisite: 53. Corequisites: 131, 151 or STATS 116. GER:DB-Math

3 units, Aut (Camilleri, I)

**MATH 193. Polya Problem Solving Seminar**

Topics in mathematics and problem solving strategies with an eye towards the Putnam Competition. Topics may include parity, the pigeonhole principle, number theory, recurrence, generating functions, and probability. Students present solutions to the class. Open to anyone with an interest in mathematics.

1 unit, Aut (Soundararajan, K)

**MATH 196. Undergraduate Colloquium**

Weekly lectures by different experts on topics in pure and applied mathematics that go beyond the standard curriculum. May be repeated for credit for up to 3 units. Does not count toward the math major or minor.

1 unit, Aut (Conrad, B), Win (Conrad, B), Spr (Conrad, B)

**MATH 197. Senior Honors Thesis**

(Staff)

1-6 units, Aut (Staff), Win (Staff), Spr (Staff)

**MATH 198. Category Theory and Functional Programming**

An introduction to category theory and its applications in computer science: in particular to Haskell, a programming language with many language elements inspired by category theory. Students should have some familiarity with linear algebra, discrete mathematics and functional programming. Recommended corequisite: CS 242.

1 unit, not given this year

**MATH 199. Independent Work**

Undergraduates pursue a reading program; topics limited to those not in regular department course offerings. Credit can fulfill the elective requirement for math majors. Approval of Undergraduate Affairs Committee is required to use credit for honors majors area requirement.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**GRADUATE COURSES IN MATHEMATICS**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**MATH 205A. Real Analysis**

Basic measure theory and the theory of Lebesgue integration. Prerequisite: 171 or equivalent.

3 units, Aut (Ryzhik, L)

**MATH 205B. Real Analysis**

Point set topology, basic functional analysis, Fourier series, and Fourier transform. Prerequisites: 171 and 205A or equivalent.

3 units, Win (Mazzeo, R)

**MATH 210A. Modern Algebra**

Basic commutative ring and module theory, tensor algebra, homological constructions, linear and multilinear algebra, introduction to representation theory. Prerequisite: 121 or equivalent.

3 units, Aut (Brumfiel, G)

**MATH 210B. Modern Algebra**

Continuation of 210A. Topics in group theory, Galois theory, commutative algebra, introductions to algebraic number theory and algebraic geometry.

3 units, Win (Conrad, B)

**MATH 210C. Modern Algebra**

Continuation of 210B. Semisimple rings and modules, representation theory, Lie algebras, Lie groups and their representations.

3 units, Spr (Bump, D)

**MATH 215A. Complex Analysis, Geometry, and Topology**

Analytic functions, complex integration, Cauchy's theorem, residue theorem, argument principle, conformal mappings, Riemann mapping theorem, Picard's theorem, elliptic functions, analytic continuation and Riemann surfaces.

3 units, Aut (Soundararajan, K)

**MATH 215B. Complex Analysis, Geometry, and Topology**

Topics: fundamental group and covering spaces, homology, cohomology, products, basic homotopy theory, and applications. Prerequisites: 113, 120, and 171, or equivalent; 215A is not a prerequisite for 215B.

3 units, Win (Cantarero Lopez, J)

**MATH 215C. Complex Analysis, Geometry, and Topology**

Differentiable manifolds, transversality, degree of a mapping, vector fields, intersection theory, and Poincare duality. Differential forms and the DeRham theorem. Prerequisite: 215B or equivalent.

3 units, Spr (Mirzakhani, M)

**MATH 216A. Introduction to Algebraic Geometry**

Algebraic curves, algebraic varieties, sheaves, cohomology, Riemann-Roch theorem. Classification of algebraic surfaces, moduli spaces, deformation theory and obstruction theory, the notion of schemes. May be repeated for credit. Prerequisites: 210ABC or equivalent.

3 units, Aut (Vakil, R)

**MATH 216B. Introduction to Algebraic Geometry**

Continuation of 216A. May be repeated for credit.

3 units, Win (Vakil, R)

**MATH 216C. Introduction to Algebraic Geometry**

Continuation of 216B. May be repeated for credit.

3 units, Spr (Vakil, R)

### MATH 217A. Differential Geometry

Smooth manifolds and submanifolds, tensors and forms, Lie and exterior derivative, DeRham cohomology, distributions and the Frobenius theorem, vector bundles, connection theory, parallel transport and curvature, affine connections, geodesics and the exponential map, connections on the principal frame bundle. Prerequisite: 215C or equivalent.

3 units, Spr (Brendle, S)

### MATH 220. Partial Differential Equations of Applied Mathematics

(Same as CME 303) First-order partial differential equations; method of characteristics; weak solutions; elliptic, parabolic, and hyperbolic equations; Fourier transform; Fourier series; and eigenvalue problems. Prerequisite: foundation in multivariable calculus and ordinary differential equations.

3 units, Aut (Ryzhik, L)

### MATH 221. Mathematical Methods of Imaging

Mathematical methods of imaging: array imaging using Kirchhoff migration and beamforming, resolution theory for broad and narrow band array imaging in homogeneous media, topics in high-frequency, variable background imaging with velocity estimation, interferometric imaging methods, the role of noise and inhomogeneities, and variational problems that arise in optimizing the performance of imaging algorithms and the deblurring of images. Prerequisite: 220.

3 units, not given this year

### MATH 222. Computational Methods for Fronts, Interfaces, and Waves

High-order methods for multidimensional systems of conservation laws and Hamilton-Jacobi equations (central schemes, discontinuous Galerkin methods, relaxation methods). Level set methods and fast marching methods. Computation of multi-valued solutions. Multi-scale analysis, including wavelet-based methods. Boundary schemes (perfectly matched layers). Examples from (but not limited to) geometrical optics, transport equations, reaction-diffusion equations, imaging, and signal processing.

3 units, not given this year

### MATH 224. Topics in Mathematical Biology

Mathematical models for biological processes based on ordinary and partial differential equations. Topics: population and infectious diseases dynamics, biological oscillators, reaction diffusion models, biological waves, and pattern formation. Prerequisites: 53 and 131, or equivalents.

3 units, not given this year

### MATH 226. Numerical Solution of Partial Differential Equations

(Same as CME 306) Hyperbolic partial differential equations: stability, convergence and qualitative properties; nonlinear hyperbolic equations and systems; combined solution methods from elliptic, parabolic, and hyperbolic problems. Examples include: Burger's equation, Euler equations for compressible flow, Navier-Stokes equations for incompressible flow. Prerequisites: MATH 220A or CME 302.

3 units, Spr (Garapon, P)

### MATH 227. Partial Differential Equations and Diffusion Processes

Parabolic and elliptic partial differential equations and their relation to diffusion processes. First order equations and optimal control. Emphasis is on applications to mathematical finance. Prerequisites: MATH 131 and MATH 136/STATS 219, or equivalents.

3 units, Win (Ryzhik, L)

### MATH 228. Stochastic Methods in Engineering

(Same as CME 308) Review of basic probability; Monte Carlo simulation; state space models and time series; parameter estimation, prediction, and filtering; Markov chains and processes; stochastic control; and stochastic differential equations. Examples from various engineering disciplines. Prerequisites: exposure to probability; background in real variables and analysis.

3 units, Spr (Papanicolaou, G)

### MATH 230A. Theory of Probability

(Same as STATS 310A) Mathematical tools: sigma algebras,

measure theory, connections between coin tossing and Lebesgue measure, basic convergence theorems. Probability: independence, Borel-Cantelli lemmas, almost sure and  $L_p$  convergence, weak and strong laws of large numbers. Large deviations. Weak convergence; central limit theorems; Poisson convergence; Stein's method. Prerequisites: 116, MATH 171.

2-4 units, Aut (Diaconis, P)

### MATH 230B. Theory of Probability

(Same as STATS 310B) Conditional expectations, discrete time martingales, stopping times, uniform integrability, applications to 0-1 laws, Radon-Nikodym Theorem, ruin problems, etc. Other topics as time allows selected from (i) local limit theorems, (ii) renewal theory, (iii) discrete time Markov chains, (iv) random walk theory, (v) ergodic theory. Prerequisite: 310A or MATH 230A.

2-3 units, Win (Siegmund, D)

### MATH 230C. Theory of Probability

(Same as STATS 310C) Continuous time stochastic processes: martingales, Brownian motion, stationary independent increments, Markov jump processes and Gaussian processes. Invariance principle, random walks, LIL and functional CLT. Markov and strong Markov property. Infinitely divisible laws. Some ergodic theory. Prerequisite: 310B or MATH 230B.

2-4 units, Spr (Dembo, A)

### MATH 231A. An Introduction to Random Matrix Theory

(Same as STATS 351A) Patterns in the eigenvalue distribution of typical large matrices, which also show up in physics (energy distribution in scattering experiments), combinatorics (length of longest increasing subsequence), first passage percolation and number theory (zeros of the zeta function). Classical compact ensembles (random orthogonal matrices). The tools of determinantal point processes.

3 units, not given this year

### MATH 231B. The Spectrum of Large Random Matrices

Asymptotics of eigenvalues of large random matrices, focusing on Wigner matrices and the Gaussian unitary ensemble: the combinatorics of non-crossing partitions and word graphs, concentration inequalities, Cauchy-Stieltjes transform, Hermite polynomials, Fredholm determinants, Laplace asymptotic method, special functions (Airy, Painleve), and stochastic calculus. Prerequisites: STATS 310A or MATH 205A.

3 units, Spr (Dembo, A)

### MATH 231C. Free Probability

Background from operator theory, addition and multiplication theorems for operators, spectral properties of infinite-dimensional operators, the free additive and multiplicative convolutions of probability measures and their classical counterparts, asymptotic freeness of large random matrices, and free entropy and free dimension. Prerequisite: STATS 310B or equivalent.

3 units, not given this year

### MATH 232. Topics in Probability: Malliavin Calculus, Fractional Brownian Motion and Applications

Malliavin calculus: derivative and divergence operators, Skorohod integral. Fractional Brownian motion: relevance for financial mathematics, Ito and Tanaka formula, driving force for the heat equation. Ito formula for irregular Gaussian processes and other applications of Malliavin calculus. May be repeated for credit. Prerequisites: MATH 236, STATS 310C or equivalent.

3 units, not given this year

### MATH 233. Probabilistic Methods in Analysis

Proofs and constructions in analysis obtained from basic results in Probability Theory and a 'probabilistic way of thinking.' Topics: Rademacher functions, Gaussian processes, entropy.

3 units, not given this year

### MATH 234. Large Deviations

(Same as STATS 374) Combinatorial estimates and the method of types. Large deviation probabilities for partial sums and for empirical distributions, Cramer's and Sanov's theorems and their Markov extensions. Applications in statistics, information theory, and statistical mechanics. Prerequisite: MATH 230A or STATS 310.

3 units, not given this year

**MATH 236. Introduction to Stochastic Differential Equations**  
Brownian motion, stochastic integrals, and diffusions as solutions of stochastic differential equations. Functionals of diffusions and their connection with partial differential equations. Random walk approximation of diffusions. Prerequisite: 136 or equivalent and differential equations.

3 units, Win (Papanicolaou, G)

**MATH 237. Default and Systemic Risk**

Introduction to mathematical models of complex static and dynamic stochastic systems that undergo sudden regime change in response to small changes in parameters. Examples from materials science (phase transitions), power grid models, financial and banking systems. Special emphasis on mean field models and their large deviations, including computational issues of uncertainty quantification.

3 units, Spr (Papanicolaou, G)

**MATH 238. Mathematical Finance**

(Same as STATS 250) Stochastic models of financial markets. Forward and futures contracts. European options and equivalent martingale measures. Hedging strategies and management of risk. Term structure models and interest rate derivatives. Optimal stopping and American options. Corequisites: MATH 236 and 227 or equivalent.

3 units, Win (Papanicolaou, G)

**MATH 239. Computation and Simulation in Finance**

Monte Carlo, finite difference, tree, and transform methods for the numerical solution of partial differential equations in finance. Emphasis is on derivative security pricing. Prerequisite: 238 or equivalent.

3 units, Spr (Camilier, I)

**MATH 240. Topics in Financial Mathematics: Fixed Income Models**

Introduction to continuous time models for arbitrage-free pricing of interest rate derivatives. Bonds, yields, and the construction of yield curves. Caps, floors, swaps, swaptions, and bond options. Short rate models. Yield curve models. Forward measures. Forward and futures. LIBOR and swap market models. Prerequisite: MATH 238.

3 units, Spr (Camilier, I)

**MATH 243. Functions of Several Complex Variables**

3 units, not given this year

**MATH 244. Riemann Surfaces**

Compact Riemann surfaces and algebraic curves; cohomology of sheaves; Serre duality; Riemann-Roch theorem and application; Jacobians; Abel's theorem. May be repeated for credit.

3 units, not given this year

**MATH 245A. Topics in Algebraic Geometry: Moduli Theory**

Topics in the study of moduli spaces: Grothendieck's Quot scheme, Hilbert scheme, boundedness, semistable reduction, fine and coarse moduli space, geometric invariant theory, deformation theory, and universal families. Examples of moduli spaces including moduli of curves, moduli of vector bundles and moduli of maps. May be repeated for credit.

3 units, not given this year

**MATH 245B. Topics in Algebraic Geometry: Intersection Theory**

Topics such as intersection theory on surfaces, toric varieties, and homogeneous spaces; numerical criteria for positivity; Chow groups and rings. May be repeated for credit.

3 units, not given this year

**MATH 245C. Topics in Algebraic Geometry: Alterations**

3 units, not given this year

**MATH 247. Topics in Group Theory**

Topics include the Burnside basis theorem, classification of  $p$ -groups, regular and powerful groups, Sylow theorems, the Frattini argument, nilpotent groups, solvable groups, theorems of P. Hall, group cohomology, and the Schur-Zassenhaus theorem. The classical groups and introduction to the classification of finite simple groups and its applications. May be repeated for credit.

3 units, not given this year

**MATH 248. Ergodic Theory and Szemerédi's Theorem**

An introduction to ergodic theory leading to (and proving) Szemerédi's theorem and its multidimensional extension.

Prerequisite: 205a and some knowledge of Hilbert spaces.

3 units, Win (Katznelson, Y)

**MATH 248A. Algebraic Number Theory**

Structure theory and Galois theory of local and global fields, finiteness theorems for class numbers and units, adelic techniques. Prerequisites: MATH 210A,B.

3 units, not given this year

**MATH 249A. Topics in number theory**

3 units, Aut (Conrad, B)

**MATH 249B. Topics in Number Theory**

3 units, Win (Venkatesh, A)

**MATH 249C. Topics in Number Theory**

3 units, Spr (Soundararajan, K)

**MATH 250. Elliptic Curves in Cryptography**

(Same as CS 259C) Discusses the mathematics of elliptic curves and their applications in cryptography. Studies crypto-systems based on elliptic curves and discuss their security. Studies algorithmic aspects of elliptic curves related to crypto-system construction and security. Topics include: elliptic curves over finite fields, attacks on elliptic curve crypto-systems, point counting, pairing-based cryptography. Suggested background: Math 120 or 152, or CS255.

3 units, Aut (Freeman, D)

**MATH 252. Algebraic Groups**

Smooth affine groups over general fields, quotients, tori, solvable groups, reductive groups, root systems, Existence and Isomorphism theorem, structure theory. If time permits, classification theory over interesting fields. Prerequisites: 210A, 210B, and familiarity with algebraic varieties over general fields.

3 units, not given this year

**MATH 254. Geometric Methods in the Theory of Ordinary Differential Equations**

Topics may include: structural stability and perturbation theory of dynamical systems; hyperbolic theory; first order PDE; normal forms, bifurcation theory; Hamiltonian systems, their geometry and applications. May be repeated for credit.

3 units, not given this year

**MATH 256A. Partial Differential Equations**

The theory of linear and nonlinear partial differential equations, beginning with linear theory involving use of Fourier transform and Sobolev spaces. Topics: Schauder and L2 estimates for elliptic and parabolic equations; De Giorgi-Nash-Moser theory for elliptic equations; nonlinear equations such as the minimal surface equation, geometric flow problems, and nonlinear hyperbolic equations.

3 units, Spr (Vasy, A)

**MATH 256B. Partial Differential Equations**

Continuation of 256A.

3 units, Win (Vasy, A)

**MATH 257A. Symplectic Geometry and Topology**

Linear symplectic geometry and linear Hamiltonian systems. Symplectic manifolds and their Lagrangian submanifolds, local properties. Symplectic geometry and mechanics. Contact geometry and contact manifolds. Relations between symplectic and contact manifolds. Hamiltonian systems with symmetries. Momentum map and its properties. May be repeated for credit.

3 units, not given this year

**MATH 257B. Symplectic Geometry and Topology**

Continuation of 257A. May be repeated for credit.

3 units, not given this year

**MATH 258. Topics in Geometric Analysis**

May be repeated for credit.

3 units, Spr (White, B)

**MATH 259. mirror symmetry**

3 units, Aut (Subotic, A)

**MATH 261A. Functional Analysis**

Geometry of linear topological spaces. Linear operators and functionals. Spectral theory. Calculus for vector-valued functions. Operational calculus. Banach algebras. Special topics in functional analysis. May be repeated for credit.

3 units, not given this year

**MATH 263A. Lie Groups and Lie Algebras**

Definitions, examples, properties. Semi-simple Lie algebras, their structure and classification. Cartan decomposition: real Lie algebras. Representation theory: Cartan-Stiefel diagram, weights. Weyl character formula. Orthogonal and symplectic representations. May be repeated for credit. Prerequisite: 210 or equivalent.

*3 units, not given this year*

**MATH 263B. Lie Groups and Lie Algebras**

Continuation of 263A. May be repeated for credit.

*3 units, Win (Bump, D)*

**MATH 264. Infinite Dimensional Lie Algebra**

*3 units, not given this year*

**MATH 266. Computational Signal Processing and Wavelets**

Theoretical and computational aspects of signal processing. Topics: time-frequency transforms; wavelet bases and wavelet packets; linear and nonlinear multiresolution approximations; estimation and restoration of signals; signal compression. May be repeated for credit.

*3 units, not given this year*

**MATH 269. Topics in symplectic geometry**

May be repeated for credit.

*3 units, not given this year*

**MATH 270. Geometry and Topology of Complex Manifolds**

Complex manifolds, Kahler manifolds, curvature, Hodge theory, Lefschetz theorem, Kahler-Einstein equation, Hermitian-Einstein equations, deformation of complex structures. May be repeated for credit.

*3 units, not given this year*

**MATH 271. The H-Principle**

The language of jets. Thom transversality theorem. Holonomic approximation theorem. Applications: immersion theory and its generalizations. Differential relations and Gromov's h-principle for open manifolds. Applications to symplectic geometry. Microflexibility. Mappings with simple singularities and their applications. Method of convex integration. Nash-Kuiper  $C^1$ -isometric embedding theorem.

*3 units, Win (Eliashberg, Y)*

**MATH 272. Topics in Partial Differential Equations**

*3 units, not given this year*

**MATH 280. Evolution Equations in Differential Geometry**

*3 units, Aut (Brendle, S)*

**MATH 282A. Low Dimensional Topology**

The theory of surfaces and 3-manifolds. Curves on surfaces, the classification of diffeomorphisms of surfaces, and Teichmüller space. The mapping class group and the braid group. Knot theory, including knot invariants. Decomposition of 3-manifolds: triangulations, Heegaard splittings, Dehn surgery. Loop theorem, sphere theorem, incompressible surfaces. Geometric structures, particularly hyperbolic structures on surfaces and 3-manifolds.

*3 units, Aut (Kerckhoff, S)*

**MATH 282B. Homotopy Theory**

Homotopy groups, fibrations, spectral sequences, simplicial methods, Dold-Thom theorem, models for loop spaces, homotopy limits and colimits, stable homotopy theory.

*3 units, Win (Carlsson, G)*

**MATH 282C. Fiber Bundles and Cobordism**

Possible topics: principal bundles, vector bundles, classifying spaces. Connections on bundles, curvature. Topology of gauge groups and gauge equivalence classes of connections. Characteristic classes and K-theory, including Bott periodicity, algebraic K-theory, and indices of elliptic operators. Spectral sequences of Atiyah-Hirzebruch, Serre, and Adams. Cobordism theory, Pontryagin-Thom theorem, calculation of unoriented and complex cobordism. May be repeated for credit.

*3 units, Spr (Abrantes Andrade, R)*

**MATH 283. Topics in Algebraic and Geometric Topology**

May be repeated for credit.

*3 units, Aut (Cohen, R), Win (Cantarero Lopez, J), Spr (Carlsson, G)*

**MATH 283A. Topics in Topology**

*3 units, not given this year*

**MATH 284. Topics in Geometric Topology: Heegaard splittings and three-manifolds**

Incompressible surfaces, irreducible manifolds, prime decomposition, Morse theory, Heegaard diagrams, Heegaard splittings, the Thurston norm, sutured manifold theory, Heegaard Floer homology, sutured Floer homology.

*3 units, not given this year*

**MATH 284A. Geometry and Topology in Dimension 3**

The Poincaré conjecture and the uniformization of 3-manifolds. May be repeated for credit.

*3 units, not given this year*

**MATH 284B. Geometry and Topology in Dimension 3**

The Poincaré conjecture and the uniformization of 3-manifolds. May be repeated for credit.

*3 units, not given this year*

**MATH 286. Topics in Differential Geometry**

May be repeated for credit.

*3 units, Win (Schoen, R)*

**MATH 290B. Model Theory B**

(Same as PHIL 350B) Decidable theories. Model-theoretic background. Arithmetic of addition, real closed and algebraically closed fields, weak second order arithmetic, theories of terms, theories of arrays, temporal logic. Combining decision procedures. May be repeated for credit. Prerequisite: 151, 152 or equivalents.

*1-3 units, not given this year*

**MATH 292A. Set Theory**

(Same as PHIL 352A) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL 151 and MATH 161, or equivalents.

*3 units, not given this year*

**MATH 293A. Proof Theory**

(Same as PHIL 353A) Gentzen's natural deduction and sequential calculi for first-order propositional and predicate logics. Normalization and cut-elimination procedures. Relationships with computational lambda calculi and automated deduction. Prerequisites: 151, 152, and 161, or equivalents.

*3 units, Aut (Mints, G)*

**MATH 295. Computation and Algorithms in Mathematics**

Use of computer and algorithmic techniques in various areas of mathematics. Computational experiments. Topics may include polynomial manipulation, Groebner bases, computational geometry, and randomness. May be repeated for credit.

*3 units, not given this year*

**MATH 301. Advanced Topics in Convex Optimization**

Modern developments in convex optimization: semidefinite programming; novel and efficient first-order algorithms for smooth and nonsmooth convex optimization. Emphasis on numerical methods suitable for large scale problems arising in science and engineering. Prerequisites: convex optimization (EE 364), linear algebra (Math 104), numerical linear algebra (CME 302); background in probability, statistics, real analysis and numerical optimization.

*3 units, not given this year*

**MATH 355. Graduate Teaching Seminar**

Required of and limited to first-year Mathematics graduate students.

*1 unit, Spr (Simon, L; Lucianovic, M)*

**MATH 360. Advanced Reading and Research**

(Staff)

*1-9 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**MATH 361. Research Seminar Participation**

Participation in a faculty-led seminar which has no specific course number. (Staff)

*1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**MATH 381. Seminar in Analysis**

*1-3 units, by arrangement*

**MATH 384. Seminar in Geometry***1 unit, by arrangement***MATH 385. Seminar in Topology***1-3 units, by arrangement***MATH 388. Seminar in Probability and Stochastic Processes***1-3 units, by arrangement***MATH 389. Seminar in Mathematical Biology***1-3 units, by arrangement***MATH 391. Research Seminar in Logic and the Foundations of Mathematics**

(Same as PHIL 391) Contemporary work. May be repeated a total of three times for credit.

*1-3 units, Aut (Mints, G; Feferman, S), Win (Mints, G; Feferman, S), Spr (Mints, G; Feferman, S)***MATH 394. classics in analysis**

Original papers in analysis.

*3 units, Win (Vasy, A)***MATH 395. Classics in Geometry and Topology**

Original papers in geometry and in algebraic and geometric topology. May be repeated for credit.

*3 units, Spr (Mirzakhani, M)***MATH 396. Graduate Progress**

Results and current research of graduate and postdoctoral students. May be repeated for credit.

*1 unit, not given this year***MATH 802. TGR Dissertation***0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## MECHANICAL ENGINEERING (ME) COURSES

### UNDERGRADUATE COURSES IN MECHANICAL ENGINEERING

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**ME 10N. Form and Function of Animal Skeletons**

(Same as BIOE 10N) Preference to freshmen. The biomechanics and mechanobiology of the musculoskeletal system in human beings and other vertebrates on the level of the whole organism, organ systems, tissues, and cell biology. Field trips to labs. GER:DB-EngrAppSci

*3 units, not given this year***ME 11SC. The Art and Science of Measuring Fluid Flows**

The roles of fluid flows in natural systems such as swimming protozoa and planet-forming nebulae, and technologies such as biomolecular assay devices and jet engines. The analytical background for fluid sciences. Phenomena such as shock waves and vortex formation that create flow patterns while challenging engineers. Visualization and measurement techniques to obtain full-field flow pattern information. The physics behind these technologies. Field trips; lab work. (Eaton)

*2 units, not given this year***ME 12N. The Jet Engine**

Preference to freshmen. How a jet engine works; the technologies and analytical techniques required to understand them. Dynamics, thermodynamics, turbomachinery, combustion, advanced materials, cooling technologies, and control systems. Visits to research laboratories, examination of a partially disassembled engine, and probable operation of a small jet engine. Prerequisites: high school physics. GER:DB-EngrAppSci

*3 units, not given this year***ME 12SC. Hands-on Jet Engines**

How jet engines transformed the world through intercontinental travel causing internationalization in daily life. Competition driving improvements in fuel economy, engine lifetime, noise, and emissions.

*2 units, not given this year***ME 14N. How Stuff Is Made**

(F,Sem) Stanford Introductory Seminar. The design and engineering of products and processes, such as machining, fabric, food, and electrical goods. Tradeoffs in choice of materials, features, and process selection. Final project: students research and redesign the engineering and manufacturing aspects of a product and its processes with an eye toward sustainability. Includes several field trips to manufacturing facilities. GER:DB-EngrAppSci

*3 units, Aut (Pruitt, B)***ME 15. Growing creativity: Education Reform in New York City**

Preparation for Alternative Spring Break program. Current issues in education with a focus on the New York City area. Emphasis will be placed on design thinking and the creative process. Enrollment limited to Growing Creativity ASB 2011 participants.

*1 unit, not given this year***ME 16N. The Science of Flames**

Preference to freshmen. The roles that chemistry and fluid dynamics play in governing the behaviors of flames. Emphasis is on factors that affect flame microstructure, external appearance, and on the fundamental physical and chemical processes that cause flames and fires to propagate. Topics: history, thermodynamics, and pollutant formation in flames. Trips to labs where flames are studied. Prerequisites: high school physics. GER:DB-EngrAppSci

*3 units, not given this year***ME 17N. Robotics Imitating Nature**

Preference to freshmen. The dream of constructing robots that duplicate the functional abilities of humans and/or other animals has been promulgated primarily by science fiction writers. But biological systems provide models for the designers of robots. Building electromechanical devices that perform locomotory and sensing functions similar to those of an animal as a way of learning about how biological systems function. Walking and running machines, and the problem of giving a robot the capability to respond to its environment.

*3 units, not given this year***ME 18Q. Teamology: Creative Teams and Individual Development**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Roles on a problem solving team that best suit individual creative characteristics. Two teams are formed for teaching experientially how to develop less conscious abilities from teammates creative in those roles. Reinforcement teams have members with similar personalities; problem solving teams are composed of people with maximally different personalities.

*3 units, Aut (Wilde, D)***ME 19. Pre-field Course for Alternative Spring Break: Design for Social Change**

Focus is on applying design, technology and innovation to catalyze social change. Topics include identifying social needs, learning different brainstorming methods, developing an applicable service model or product, prototyping, implementation, and reiteration. Reading and service components, followed by week-long Alternative Spring Break trip. See <http://d4sc.blogspot.com>. Enrollment limited to 12. May be repeated for credit.

*1 unit, not given this year***ME 21N. Renaissance Machine Design**

Preference to freshmen. Technological innovations of the 1400s that accompanied the proliferation of monumental art and architecture by Brunelleschi, da Vinci, and others who designed machines and invented novel construction, fresco, and bronze-casting techniques. The social and political climate, from the perspective of a machine designer, that made possible and demanded engineering expertise from prominent artists. Hands-on projects to provide a physical understanding of Renaissance-era engineering challenges and introduce the pleasure of creative engineering design. Technical background not required. GER:DB-EngrAppSci

*3 units, not given this year***ME 24N. Designing the Car of the Future**

Preference to freshmen. Automotive design drawing from all areas of mechanical engineering. The state of the art in automotive design and the engineering principles to understand vehicle

performance. Future technologies for vehicles. Topics include vehicle emissions and fuel consumption, possibilities of hydrogen, drive-by-wire systems, active safety and collision avoidance, and human-machine interface issues. GER:DB-EngrAppSci

3 units, not given this year

**ME 25N. Global Warming and Climate Change: Fact or Fiction**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Scientific arguments concerning debates between the view that anthropogenic activities are not causing global warming versus the view that these activities are responsible for a global warming that results in significant climate change. Consequences of increased demand for energy. Prerequisites: high school physics, chemistry, and biology.

3 units, Win (Bowman, C)

**ME 26N. Think Like a Designer**

(F,Sem) Stanford Introductory Seminar. Introduces students to techniques designers use to create highly innovative solutions across domains. The project-based class will emphasize approaches to problem identification and problem solving. Topics include need-finding, structured brainstorming, synthesis, rapid prototyping, and visual communication; field trips to a local design firm, a robotics lab, and a machining lab. A secondary goal of the seminar is to introduce students to the pleasures of creative design and hands-on development of tangible solutions.

3 units, Aut (Banerjee, S)

**ME 27SI. Needfinding for Underserved Populations**

The heart of any design process resides in empathy with users and their needs. Working in the realm of public service may engage a population to which the designer might not have been exposed. How different needfinding techniques can help designers to understand users from underserved populations and inspire them to create products and services that serve user needs.

2 units, not given this year

**ME 28SI. Professional Design Practices**

Lab. Professional skills are developed through web-based portfolio and resume building. Additionally, visits to local design consulting firms and in house design groups will help solidify students understanding of the designer in the professional workplace.

1 unit, not given this year

**ME 29SI. Cars: A Crash Course**

Focus is on the basic mechanics and significance of cars. Topics include a basic, real-world understanding of automobile workings, histories, industries, cultural impact, and related media. Field trips to Tesla Motors and Go-Kart Racer will be organized, and there will be guest appearances by local automotive historians and enthusiasts. Students will get hands on experience with maintaining real cars, see high performance engines run, and have the opportunity to learn how to drive a manual transmission.

1 unit, not given this year

**ME 70. Introductory Fluids Engineering**

Elements of fluid mechanics as applied to engineering problems. Equations of motion for incompressible ideal flow. Hydrostatics. Control volume laws for mass, momentum, and energy. Bernoulli equation. Dimensional analysis and similarity. Flow in ducts. Boundary layer flows. Lift and drag. Lab experiment demonstrations. Prerequisites: ENGR 14 and 30. GER:DB-EngrAppSci

4 units, Win (Cappelli, M), Spr (Tang, S)

**ME 80. Mechanics of Materials**

Mechanics of materials and deformation of structural members. Topics include stress and deformation analysis under axial loading, torsion and bending, column buckling and pressure vessels. Introduction to stress transformation and multiaxial loading. Prerequisite: ENGR 14. GER:DB-EngrAppSci

4 units, Aut (Cai, W), Spr (Mitiguy, P)

**ME 101. Visual Thinking**

Lecture/lab. Visual thinking and language skills are developed and exercised in the context of solving design problems. Exercises for the mind's eye. Rapid visualization and prototyping with emphasis on fluent and flexible idea production. The relationship between visual thinking and the creative process. Enrollment limited to 60. GER:DB-EngrAppSci

4 units, Aut (Kessin, J; Luomanen, C; Feng, A), Win (Gleason, P; Silver, J), Spr (Northway, D; Pauwels, D)

**ME 103D. Engineering Drawing and Design**

Designed to accompany 203. The fundamentals of engineering drawing including orthographic projection, dimensioning, sectioning, exploded and auxiliary views, and assembly drawings. Homework drawings are of parts fabricated by the student in the lab. Assignments in 203 supported by material in 103D and sequenced on the assumption that the student is enrolled in both courses simultaneously.

1 unit, Aut (Milroy, J; Dreissigacker, M), Win (Milroy, J; Dreissigacker, M), Spr (Milroy, J; Dreissigacker, M)

**ME 104. The Designer's Voice**

Course helps students develop a point of view about their design career that will enable them to articulate their design vision, inspire a design studio, or infect a business with a culture of design-thinking. Focus on the integration of work and worldview, professional values, design language, and the development of the designer's voice. Includes seminar-style discussions, role-playing, short writing assignments, guest speakers, and individual mentoring and coaching. Participants will be required to keep a journal.

1 unit, Aut (Evans, D; Burnett, W)

**ME 104B. Designing Your Life**

The course employs a design thinking approach to help students develop a point of view about their career. The course focuses on an introduction to design thinking, the integration of work and worldview, and practices that support vocation formation. The course will include seminar-style discussions, role-playing, short writing assignments, guest speakers, and individual mentoring and coaching. Enrollment limited to: Jrs. and Srs., all majors. Admission confirmed by email to Axxess registered students prior to first class session. See [www.designingyourlife.org](http://www.designingyourlife.org)

2 units, Aut (Burnett, W; Evans, D), Win (Burnett, W; Evans, D), Spr (Evans, D; Burnett, W)

**ME 110. Design Sketching**

Freehand sketching, rendering, and design development. Students develop a design sketching portfolio for review by program faculty. May be repeated for credit.

1 unit, Aut (Li, W; Scott, W), Win (Li, W; Scott, W), Spr (Li, W; Scott, W)

**ME 112. Mechanical Systems Design**

Lecture/lab. Characteristics of machine elements including gears, bearings, and shafts. Design for fatigue life. Electric motor fundamentals. Transmission design for maximizing output power or efficiency. Mechanism types, linkage analysis and kinematic synthesis. Team-based design projects emphasizing the balance of physical with virtual prototyping based on engineering analysis. Lab for dissection of mechanical systems and project design reviews. Prerequisites: 80, 101. Recommended: 203, ENGR 15. GER:DB-EngrAppSci

4 units, Win (Gerdes, C)

**ME 113. Mechanical Engineering Design**

Capstone course. Mechanical engineering design is experienced by students as they work on team projects obtained from industry or other organizations. Prerequisites: 80,101,112, 203. Enrollment priority to ME majors. GER:DB-EngrAppSci

4 units, Spr (Nelson, D)

**ME 115A. Introduction to Human Values in Design**

Lecture/lab. Introduces the central philosophy of the product design program, emphasizing the relation between technical and human values, the innovation process, and design methodology. Lab exercises include development of simple product concepts visualized in rapidly executed three-dimensional mockups. Prerequisite: 101.

3 units, Aut (Kelley, D; Fields, B)

**ME 115B. Product Design Methods**

Problem-finding, problem-solving, intermediate creativity methods and effective techniques for researching and presenting product concepts. Individual- and team-based design projects emphasizing advanced visual thinking and prototyping skills. Prerequisite: ME115A GER:DB-EngrAppSci

3 units, Win (Edson, J)

**ME 115C. Design and Business Factors**

Design and Business Factors: Introduces business concepts critical to determining the success of new products and services. Students will learn to estimate the cost of R&D for new product development. Using financial analysis, ROI, and tollgates to reduce development risk will be explored using case studies and simulations. Students will develop a bill of materials and a profit and loss statement for a sample product concept, prototype a design consultancy, and create a business proposal for a proposed new product company.

3 units, Spr (Burnett, W; Siddiqui, O)

**ME 116. Advanced Product Design: Formgiving**

Small- and medium-scale design projects are carried to a high degree of aesthetic refinement. Emphasis is on form development, design process, and model making. Prerequisites: ME 115B, ARTSTUDI 160. GER:DB-EngrAppSci

4 units, Aut (Burnett, W; Staff, I)

**ME 120. History and Philosophy of Design**

Major schools of 19th- and 20th-century design (Arts and Crafts movement, Bauhaus, Industrial Design, and postmodernism) are analyzed in terms of their continuing cultural relevance. The relation of design to art, technology, and politics; readings from principal theorists, practitioners, and critics; recent controversies in industrial and graphic design, architecture, and urbanism. Enrollment limited to 65.

3 units, Spr (Katz, B)

**ME 131A. Heat Transfer**

The principles of heat transfer by conduction, convection, and radiation with examples from the engineering of practical devices and systems. Topics include transient and steady conduction, conduction by extended surfaces, boundary layer theory for forced and natural convection, boiling, heat exchangers, and graybody radiative exchange. Prerequisites: 70, ENGR 30. Recommended: intermediate calculus, ordinary differential equations. GER:DB-EngrAppSci

3-4 units, Aut (Asheghi, M)

**ME 131B. Fluid Mechanics: Compressible Flow and Turbomachinery**

Engineering applications involving compressible flow: aircraft and rocket propulsion, power generation; application of mass, momentum, energy and entropy balance to compressible flows; variable area isentropic flow, normal shock waves, adiabatic flow with friction, flow with heat addition. Operation of flow systems: the propulsion system. Turbomachinery: pumps, compressors, turbines. Angular momentum analysis of turbomachine performance, centrifugal and axial flow machines, effect of blade geometry, dimensionless performance of turbomachines; hydraulic turbines; steam turbines; wind turbines. Compressible flow turbomachinery: the aircraft engine. Prerequisites: 70, ENGR 30. GER:DB-EngrAppSci

4 units, Win (Eaton, J)

**ME 140. Advanced Thermal Systems**

Capstone course. Thermal analysis and engineering emphasizing integrating heat transfer, fluid mechanics, and thermodynamics into a unified approach to treating complex systems. Mixtures, humidity, chemical and phase equilibrium, and availability. Labs apply principles through hands-on experience with a turbojet engine, PEM fuel cell, and hybrid solid/oxygen rocket motor. Use of MATLAB as a computational tool. Prerequisites: ENGR 30, ME 70, and 131A,B. GER:DB-EngrAppSci

5 units, Spr (Mitchell, R)

**ME 161. Dynamic Systems, Vibrations and Control**

(Same as ME 261) (Graduate students only enroll in 261.) Modeling, analysis, and measurement of mechanical and electromechanical systems. Numerical and closed form solutions of ordinary differential equations governing the behavior of single and multiple degree of freedom systems. Stability, resonance, amplification and attenuation, and control system design. Prerequisites: Calculus (differentiation and integration), ordinary differential equations, and basic linear algebra (determinants and solving linear equations). Should be familiar with dynamics ( $F=m*a$ ) and simple electronics ( $V=i*R$ ). GER:DB-EngrAppSci

3-4 units, Aut (Mitiguy, P)

**ME 185. Electric Vehicle Design**

This project based class focuses on the design and prototyping of electric vehicles. Students learn the fundamentals of vehicle design in class and apply the knowledge as they form teams and work on projects involving concept, specifications, structure, systems, integration, assembly, testing, etc. The class meets once a week to learn about the fundamentals, exchange their experiences, and coordinate between projects. The teams of 3-5 will work on their projects independently.

3 units, Spr (Gerdes, C; Beiker, S)

**ME 190. Ethical Issues in Mechanical Engineering**

Moral rights and responsibilities of engineers in relation to society, employers, colleagues, and clients; cost-benefit-risk analysis, safety, and informed consent; whistle blowing; engineers as expert witnesses, consultants, and managers; ethical issues in engineering design, manufacturing, and operations, and engineering work in foreign countries; and ethical implications of the social and environmental contexts of contemporary engineering. Case studies and field research. Enrollment limited to 25 Mechanical Engineering majors.

4 units, not given this year

**ME 191. Engineering Problems and Experimental Investigation**

Directed study and research for undergraduates on a subject of mutual interest to student and staff member. Student must find faculty sponsor and have approval of adviser.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ME 191H. Honors Research**

Student must find faculty honors adviser and apply for admission to the honors program. (Staff)

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ME 196. Design and Manufacturing Forum**

(Same as ME 396) Invited speakers address issues of interest to design and manufacturing engineering and business students. Sponsored by the Product Realization Network at Stanford.

1 unit, Spr (Reis, R)

**ME 214. Good Products, Bad Products**

(Same as ME 314) The characteristics of industrial products that cause them to be successes or failures: the straightforward (performance, economy, reliability), the complicated (human and cultural fit, compatibility with the environment, craftsmanship, positive emotional response of the user), the esoteric (elegance, sophistication, symbolism). Engineers and business people must better understand these factors to produce more successful products. Projects, papers, guest speakers, field trips. GER:DB-EngrAppSci

4 units, Win (Beach, D)

**GRADUATE COURSES IN MECHANICAL ENGINEERING**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**ME 201. Dim Sum of Mechanical Engineering**

Introduction to research in mechanical engineering for M.S. students and upper-division undergraduates. Weekly presentations by current ME Ph.D. and second-year fellowship students to show research opportunities across the department. Strategies for getting involved in a research project. (Sheppard)

1 unit, Aut (Gardella, I)

**ME 203. Design and Manufacturing**

Integrated experience involving need finding, product definition, conceptual design, detail design, prototype manufacture, public presentation of outcomes, archiving and interpreting the product realization process and its results. Presents an overview of manufacturing processes crucial to the practice of design. Corequisite: 103D or CAD experience. Corequisite for WIM for Mechanical Engineering and Product Design undergraduate majors: ENGR102M. Recommended: 101.

4 units, Aut (Beach, D), Win (Beach, D), Spr (Milroy, J)

**ME 203X. Prototyping and Process Capture**

Concepts and methods for low resolution prototyping as an integral activity in engineering design process. Class meetings include presentations by faculty and design oriented exercises by students.

Assignments will be Blog Posts. ME203X is designed to work in phase with ME203 and offers greater depth in prototyping strategy, technique, and resultant insights. Concurrent enrollment in ME203 is required. Enrollment is optional and capped at 6 students.

*1 unit, not given this year*

#### **ME 204. Bicycle Design and Frame-Building**

Lecture/lab. The engineering and artistic execution of designing and building a bicycle frame. Fundamentals of bicycle dynamics, handling, and sizing. Manufacturing processes. Films, guest lecturers, field trips. Each student designs and fabricates a custom bicycle frame. Limited enrollment. Prerequisite: 203 or equivalent.

*3 units, Spr (Staff)*

#### **ME 206A. Entrepreneurial Design for Extreme Affordability**

Project course jointly offered by School of Engineering and Graduate School of Business. Students apply engineering and business skills to design product prototypes, distribution systems, and business plans for entrepreneurial ventures in developing countries for a specified challenge faced by the world's poor. Topics include user empathy, appropriate technology design, rapid prototype engineering and testing, social technology entrepreneurship, business modeling, and project management. Weekly design reviews; final course presentation. Industry and adviser interaction. Limited enrollment via application; see <http://www.stanford.edu/class/me206>.

*4 units, Win (Patell, J; Beach, D)*

#### **ME 206B. Entrepreneurial Design for Extreme Affordability**

Part two of two-quarter project course jointly offered by School of Engineering and Graduate School of Business. Second quarter emphasizes prototyping and implementation of specific projects identified in first quarter. Students work in cross-disciplinary project teams. Industry and adviser interaction, weekly design reviews; final course presentation. Prerequisite: 206A. (Jointly offered as GSB OIT333B) Design Institute class; see <http://dschool.stanford.edu>.

*4 units, Spr (Patell, J; Beach, D)*

#### **ME 208. Patent Law and Strategy for Innovators and Entrepreneurs**

How to build a patent portfolio and avoid patent infringement. How to conduct a patent search. How to file a provisional patent application.

*2-3 units, Aut (Schox, J)*

#### **ME 210. Introduction to Mechatronics**

Technologies involved in mechatronics (intelligent electromechanical systems), and techniques to apply this technology to mecatronic system design. Topics include: electronics (A/D, D/A converters, op-amps, filters, power devices); software program design, event-driven programming; hardware and DC stepper motors, solenoids, and robust sensing. Large, open-ended team project. Limited enrollment. Prerequisites: ENGR 40, CS 106, or equivalents.

*4 units, Win (Ohline, R; Kenny, T)*

#### **ME 212. Calibrating the Instrument**

For first-year graduate students in the Joint Program in Design. Means for calibrating the designer's mind/body instrument through tools including improvisation, brainstorming, creative imaging, educational kinesiology, and Brain Gym. Current design issues; guest speakers; shared stories; and goal setting.

*1 unit, Aut (Edmark, J)*

#### **ME 216A. Advanced Product Design: Needfinding**

Human needs that lead to the conceptualization of future products, environments, systems, and services. Field work in public and private settings; appraisal of personal values; readings on social ethnographic issues; and needfinding for a corporate client. Emphasis is on developing the flexible thinking skills that enable the designer to navigate the future. Prerequisites for undergraduates: 116 and 203, or consent of the instructor.

*3-4 units, Win (Patnaik, D; O'Meara, I)*

#### **ME 216B. Advanced Product Design: Implementation**

Summary project using knowledge, methodology, and skills obtained in Product Design major. Students implement an original design concept and present it to a professional jury. Prerequisite: 216A.

*3-4 units, Spr (Burnett, W)*

#### **ME 218A. Smart Product Design Fundamentals**

Lecture/lab. Team design project series on programmable electromechanical systems design. Topics: transistors as switches, digital and analog circuits, operational amplifiers, comparators, software design, programming in C. Lab fee. Limited enrollment.

*4-5 units, Aut (Carryer, J)*

#### **ME 218B. Smart Product Design Applications**

Lecture/lab. Second in team design project series on programmable electromechanical systems design. Topics: user I/O, timer systems, interrupts, signal conditioning, software design for embedded systems, sensors, actuators, noise, and power supplies. Lab fee. Limited enrollment. Prerequisite: 218A or passing the smart product design fundamentals proficiency examination.

*4-5 units, Win (Carryer, J)*

#### **ME 218C. Smart Product Design Practice**

Lecture/lab. Advanced level in series on programmable electromechanical systems design. Topics: inter-processor communication, system design with multiple microprocessors, architecture and assembly language programming for the PIC microcontroller, controlling the embedded software tool chain, A/D and D/A techniques, electronic manufacturing technology. Team project. Lab fee. Limited enrollment. Prerequisite: 218B.

*4-5 units, Spr (Carryer, J)*

#### **ME 218D. Smart Product Design: Projects**

Lecture/lab. Industrially sponsored project is the culmination of the Smart Product Design sequence. Student teams take on an industrial project requiring application and extension of knowledge gained in the prior three quarters, including prototyping of a final solution with hardware, software, and professional documentation and presentation. Lectures extend the students' knowledge of electronic and software design, and electronic manufacturing techniques. Topics: chip level design of microprocessor systems, real time operating systems, alternate microprocessor architectures, and PCB layout and fabrication. Prerequisite: 218C.

*3-4 units, Aut (Carryer, J)*

#### **ME 219. The Magic of Materials and Manufacturing**

Lecture/lab. Methods for market-quantity manufacturing of parts and products from a product designer's point of view. Materials including metals, plastics, ceramics, fibers, and foams, and processes that manipulate, exploit, transform, and modify these materials. Visual descriptions of processes, product examples, relevant material details, cost information, and manufacturability rules-of-thumb. Imagining and creating new products. Manufacturing site visits; laboratory projects. Enrollment limited to 20.

*3 units, Aut (Beach, D; Johnson, K), Spr (Beach, D; Johnson, K)*

#### **ME 220. Introduction to Sensors**

Sensors are widely used in scientific research and as an integral part of commercial products and automated systems. The basic principles for sensing displacement, force, pressure, acceleration, temperature, optical radiation, nuclear radiation, and other physical parameters. Performance, cost, and operating requirements of available sensors. Elementary electronic circuits which are typically used with sensors. Lecture demonstration of a representative sensor from each category elucidates operating principles and typical performance. Lab experiments with off-the-shelf devices.

*3-4 units, Spr (Kenny, T)*

#### **ME 221. Green Design Strategies and Metrics**

Foundation in sustainable product design principles, reinforced by conceptual design projects. Discuss what aspects of sustainability matter most for different products. Application of dozens of strategies to improve product sustainability. Frameworks, measurements, and decision-making tools to navigate the complexities of designing greener products. Life-cycle analysis, materials, energy use, biomimicry, product-service systems, persuasive design, design for end-of-life, and systems thinking.

*2 units, not given this year*

#### **ME 222. Design for Sustainability**

Lecture/lab. Role of design in building a sustainable world. How to include sustainability in the design process considering environmental, cultural, and social impacts. Focus is on a proactive design approach, and the tools and techniques needed to translate theory into artifact.

2-3 units, not given this year

### ME 227. Vehicle Dynamics and Control

The application of dynamics, kinematics, and control theory to the analysis and design of ground vehicle behavior. Simplified models of ride, handling, and braking, their role in developing intuition, and limitations in engineering design. Suspension design fundamentals. Performance and safety enhancement through automatic control systems. In-car laboratory assignments for model validation and kinesthetic understanding of dynamics. Limited enrollment. Prerequisites: ENGR 105, consent of instructor.

3 units, Spr (Gerdes, C)

### ME 229. Design Evangelism

Students work with Ambidextrous staff and magazine professionals to edit and produce Ambidextrous, Stanford University's Journal of Design. Topics include design processes and innovation, storytelling, writing and editing for an audience, magazine production and project leadership. Hands-on projects, in-class exercises, and guest lectures.

1-2 units, not given this year

### ME 233. Making it Big: Crossing the Entrepreneur's Gap

Students take novel designs into entrepreneurial production and prepare for market production. Education, resources, and community to help cross the gap, found ideas and make them real in volume. Topics include entrepreneurial production methods and initiation, vendor selection and engagement, cost, design transfer, quality and testing, and manufacturing planning and execution. Leadership roles in entrepreneurial and large production-oriented companies. Case studies, project reviews, final presentation, industry interaction.

3 units, Aut (Theeuwes, M)

### ME 238. Patent Prosecution

Stages of the patent application process: identifying, capturing, and evaluating inventions; performing a patentability investigation, analyzing the documents, and the scope of the patent protection; composing claims that broadly cover the invention; creating a specification that supports the claims; filing a patent application with the U.S. Patent and Trademark Office; and analyzing an office action and preparing an appropriate response. Current rules and case law. Strategic decisions within each stage, such as: how does a patent application advance the patent portfolio; and in what countries should a patent application be filed? Same as Law 231.

2 units, Spr (Staff)

### ME 239. Mechanics of the Cell

Kinematical description of basic structural elements used to model parts of the cell: rods, ropes, membranes, and shells. Formulation of constitutive equations: nonlinear elasticity and entropic contributions. Elasticity of polymeric networks. Applications to model basic filaments of the cytoskeleton: actin, microtubules, intermediate filaments, and complete networks. Applications to biological membranes.

3 units, not given this year

### ME 243. Designing Emotion-Reactive Car Interfaces

How to design in car interfaces that take into account the emotional state of the driver in the moment of driving? Participants will be prototyping and testing interfaces for an industry partner. The challenge is to take real time physiological data to infer the emotional state of a driver and to lever these to improve the driving experience. We will cover topics on design methodology, psychology of emotions, and human machine interaction. The class meets at VAIL, the Stanford automotive innovation facility, for prototyping, discussions and presentations. Participants will have access to tools, prototyping materials, physiological sensors, and a car. Students from all ENGR majors but also beyond are encouraged to join, bring your drivers license.

3 units, Aut (Steinert, R; Jung, M)

### ME 250. Internal Combustion Engines

Internal combustion engines including conventional and turbocharged spark ignition, and diesel engines. Lectures: basic engine cycles, engine components, methods of analysis of engine performance, pollutant emissions, and methods of engine testing. Lab involves hands-on experience with engines and test hardware. Limited enrollment. Prerequisites: 140.

3 units, Aut (Edwards, C)

### ME 257. Turbine and Internal Combustion Engines

(Same as ME 357) Principles of design analysis for aircraft gas turbines and automotive piston engines. Analysis for aircraft engines performed for Airbus A380 type aircraft. Design parameters determined considering aircraft aerodynamics, gas turbine thermodynamics, compressible flow physics, and material limitations. Additional topics include characteristics of main engine components, off-design analysis, and component matching. Performance of automotive piston engines including novel engine concepts in terms of engine thermodynamics, intake and exhaust flows, and in-cylinder flow.

3 units, not given this year

### ME 260. Fuel Cell Science and Technology

Emphasis on proton exchange membrane (PEM) and solid oxide fuel cells (SOFC), and principles of electrochemical energy conversion. Topics in materials science, thermodynamics, and fluid mechanics. Prerequisites: MATH 43, PHYSICS 55, and ENGR 30 or ME 140, or equivalents.

3 units, Spr (Cha, S)

### ME 261. Dynamic Systems, Vibrations and Control

(Same as ME 161) (Graduate students only enroll in 261.) Modeling, analysis, and measurement of mechanical and electromechanical systems. Numerical and closed form solutions of ordinary differential equations governing the behavior of single and multiple degree of freedom systems. Stability, resonance, amplification and attenuation, and control system design. Prerequisites: Calculus (differentiation and integration), ordinary differential equations, and basic linear algebra (determinants and solving linear equations). Should be familiar with dynamics ( $F=m*a$ ) and simple electronics ( $V=i*R$ ).

3-4 units, Aut (Mitiguy, P)

### ME 265. Technology Licencing and Commercialization

How to profit from technology; processes and strategies to commercialize functional or artistic inventions and creations (not limited to mechanical engineering). Business and legal aspects of determining what can be owned and licensed, how to determine commercial value, and what agreements are necessary. Contract and intellectual property law; focus is on provisions of license agreements and their negotiation.

3 units, Spr (Hustein, J)

### ME 266. Introduction to Physiology and Biomechanics of Hearing

Hearing is fundamental to our ability to communicate, yet in the US alone over 30 million people suffer some form of hearing impairment. As engineers and scientists, it is important for us to understand the underlying principles of the auditory system if we are to devise better ways of helping those with hearing loss. The goal of this course is to introduce undergraduate and graduate students to the anatomy, physiology, and biomechanics of hearing. Principles from acoustics, mechanics, and hydrodynamics will be used to build a foundational understanding of one of the most complex, interdisciplinary, and fascinating areas of biology. Topics include the evolution of hearing, computational modeling approaches, fluid-structure interactions, ion-channel transduction, psychoacoustics, diagnostic tools, and micrometer to millimeter scale imaging methods. We will also study current technologies for mitigating hearing loss via passive and active prostheses, as well as future regenerative therap

3 units, Spr (Puria, S)

### ME 277. Advanced Product Design: Needfinding - Advanced Product Design- Needfinding

Human needs that lead to the conceptualization of future products, environments, systems, and services. Field work in public and private settings; appraisal of personal values; readings on social ethnographic issues; and needfinding for a corporate client. Emphasis is on developing the flexible thinking skills that enable the designer to navigate the future. Prerequisites: 203 and 313, or consent of instructor.

3-4 units, Win (Barry, M; Fletcher, A)

### ME 280. Skeletal Development and Evolution

(Same as BIOE 280, BIOE 280) The mechanobiology of skeletal growth, adaptation, regeneration, and aging is considered from developmental and evolutionary perspectives. Emphasis is on the interactions between mechanical and chemical factors in the

regulation of connective tissue biology. Prerequisites: BIO 42, and ME 80 or BIOE 42.

3 units, not given this year

**ME 281. Biomechanics of Movement**

(Same as BIOE 281) Experimental techniques to study human and animal movement including motion capture systems, EMG, force plates, medical imaging, and animation. The mechanical properties of muscle and tendon, and quantitative analysis of musculoskeletal geometry. Projects and demonstrations emphasize applications of mechanics in sports, orthopedics, and rehabilitation.

3 units, Win (Delp, S)

**ME 283. Introduction to Biomechanics**

Introduction to the application of mechanical engineering analysis to understand human physiology and disease. Topics include basics of musculoskeletal force analysis, cell mechanics, blood flow, and mechanical behaviors of tissues. Undergraduates should have taken ME70 and ME80 or equivalents.

3 units, Aut (Levenston, M)

**ME 284B. Cardiovascular Bioengineering**

(Same as BIOE 284B) Continuation of ME/BIOE 284A. Integrative cardiovascular physiology, blood fluid mechanics, and transport in the microcirculation. Sensing, feedback, and control of the circulation. Overview of congenital and adult cardiovascular disease, diagnostic methods, and treatment strategies. Engineering principles to evaluate the performance of cardiovascular devices and the efficacy of treatment strategies.

3 units, not given this year

**ME 287. Mechanics of Biological Tissues**

Introduction to the mechanical behaviors of biological tissues in health and disease. Overview of experimental approaches to evaluating tissue properties and mathematical constitutive models. Elastic behaviors of hard tissues, nonlinear elastic and viscoelastic models for soft tissues.

3 units, Spr (Levenston, M)

**ME 294. Medical Device Design**

In collaboration with the School of Medicine. Introduction to medical device design for undergraduate and graduate engineering students. Design and prototyping. Labs; medical device environments may include hands-on device testing; and field trips to operating rooms and local device companies. Limited enrollment. Prerequisite: 203.

1 unit, Aut (Milroy, J; Srivastava, S)

**ME 294L. Medical Device Design Lab**

In collaboration with the School of Medicine. This is the lab portion of ME294, which must be taken concurrently. Introduction to medical device design for undergraduate and graduate engineering students. Design, prototyping and labs. Medical device environments may include hands-on device testing; and field trips to operating rooms and local device companies. Prerequisite: 203.

3 units, Aut (Srivastava, S; Milroy, J)

**ME 297. Forecasting for Innovators: Technology, Tools & Social Change**

Technologies from the steam engine to the microprocessor have been mixed gifts, at once benefitting humankind and creating many of the problems facing humanity today. This class will explore how innovators can use forecasting methods to identify new challenges, develop responsive innovations and anticipate unintended consequences. Students will produce a long-range forecast project, applying a variety of methodologies including research, expert interviews and graphical exploration.

3 units, Win (Saffo, P; Benjamin, C)

**ME 298. Silversmithing and Design**

Skills involved in working with precious metals at a small scale. Investment casting and fabrication techniques such as reticulation, granulations, filigree, and mokume gane.

3-4 units, Win (Shaughnessy, S; Knox Sather, A)

**ME 299A. Practical Training**

For master's students. Educational opportunities in high technology research and development labs in industry. Students engage in internship work and integrate that work into their academic program. Following internship work, students complete a research report outlining work activity, problems investigated, key results, and follow-up projects they expect to perform. Meets the

requirements for curricular practical training for students on F-1 visas. Student is responsible for arranging own internship/employment and faculty sponsorship. Register under faculty sponsor's section number. All paperwork must be completed by student and faculty sponsor, as the Student Services Office does not sponsor CPT. Students are allowed only one quarter of CPT per degree program.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ME 299B. Practical Training**

For Ph.D. students. Educational opportunities in high technology research and development labs in industry. Students engage in internship work and integrate that work into their academic program. Following internship work, students complete a research report outlining work activity, problems investigated, key results, and follow-up projects they expect to perform. Meets the requirements for curricular practical training for students on F-1 visas. Student is responsible for arranging own internship/employment and faculty sponsorship. Register under faculty sponsor's section number. All paperwork must be completed by student and faculty sponsor, as the student services office does not sponsor CPT. Students are allowed only one quarter of CPT per degree program.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ME 300A. Linear Algebra with Application to Engineering Computations**

(Same as CME 200) Computer based solution of systems of algebraic equations obtained from engineering problems and eigen-system analysis, Gaussian elimination, effect of round-off error, operation counts, banded matrices arising from discretization of differential equations, ill-conditioned matrices, matrix theory, least square solution of unsolvable systems, solution of non-linear algebraic equations, eigenvalues and eigenvectors, similar matrices, unitary and Hermitian matrices, positive definiteness, Cayley-Hamilton theory and function of a matrix and iterative methods. Prerequisite: familiarity with computer programming, and MATH103, 130, or equivalent.

3 units, Aut (Gerritsen, M)

**ME 300B. Partial Differential Equations in Engineering**

(Same as CME 204) Geometric interpretation of partial differential equation (PDE) characteristics; solution of first order PDEs and classification of second-order PDEs; self-similarity; separation of variables as applied to parabolic, hyperbolic, and elliptic PDEs; special functions; eigenfunction expansions; the method of characteristics. If time permits, Fourier integrals and transforms, Laplace transforms. Prerequisite: CME 200/ME 300A, equivalent, or consent of instructor.

3 units, Win (Lele, S)

**ME 300C. Introduction to Numerical Methods for Engineering**

(Same as AA 214A, CME 206) Numerical methods from a user's point of view. Lagrange interpolation, splines. Integration: trapezoid, Romberg, Gauss, adaptive quadrature; numerical solution of ordinary differential equations: explicit and implicit methods, multistep methods, Runge-Kutta and predictor-corrector methods, boundary value problems, eigenvalue problems; systems of differential equations, stiffness. Emphasis is on analysis of numerical methods for accuracy, stability, and convergence. Introduction to numerical solutions of partial differential equations; Von Neumann stability analysis; alternating direction implicit methods and nonlinear equations. Prerequisites: CME 200/ME 300A, CME 204/ME 300B.

3 units, Spr (Iaccarino, G)

**ME 301. Design and Launch your Product or Service**

Apply principles of design thinking to the real-life challenge of imagining, prototyping, testing and iterating, building, marketing, and selling your product or service. Work will be in teams (you apply as an intact team) or alone. You must submit a proposal and team for approval. Proposal can be a physical good or service of any kind. Projects are treated as real start-ups, so the work will be intense. Proposal submitted by Feb 15, 2010 acceptance by March 1. Design Institute class; see <http://dschool.stanford.edu>.

4 units, Spr (Klebahn, P; Dearing, M)

**ME 302. The Future of the Automobile**

Guest speakers from academia and industry present their research results, share their visions, explain challenges, and offer solutions

regarding individual transportation. Students are requested to draft brief write-ups on selected topics that will be discussed in class to develop an understanding of the interactions of technology, business, and society with a specific automotive focus. No specific technical background is required as it is encouraged that everyone brings in specific expertise regarding the automobile as a student, researcher, and/or consumer.

*1 unit, Win (Beiker, S; Gerdes, C), Spr (Beiker, S; Gerdes, C)*

### ME 304. The Designer's Voice

Course helps students develop a point of view about their design career that will enable them to articulate their design vision, inspire a design studio, or infect a business with a culture of design-thinking. Focus on the integration of work and worldview, professional values, design language, and the development of the designer's voice. Includes seminar-style discussions, role-playing, short writing assignments, guest speakers, and individual mentoring and coaching. Participants will be required to keep a journal.

*1 unit, Win (Evans, D; Burnett, W)*

### ME 308. Spatial Motion

The geometry of motion in Euclidean space. Fundamentals of theory of screws with applications to robotic mechanisms, constraint analysis, and vehicle dynamics. Methods for representing the positions of spatial systems of rigid bodies with their inter-relationships; the formulation of Newton-Euler kinetics applied to serial chain systems such as industrial robotics.

*3 units, alternate years, not given this year*

### ME 309. Finite Element Analysis in Mechanical Design

Basic concepts of finite elements, with applications to problems confronted by mechanical designers. Linear static, modal, and thermal formulations; nonlinear and dynamic formulations. Students implement simple element formulations. Application of a commercial finite element code in analyzing design problems. Issues: solution methods, modeling techniques, features of various commercial codes, basic problem definition. Individual projects focus on the interplay of analysis and testing in product design/development. Prerequisite: MATH 103, or equivalent. Recommended: 80, or equivalent in structural and/or solid mechanics; some exposure to principles of heat transfer.

*3 units, Spr (Sheppard, S)*

### ME 310A. Project-Based Engineering Design, Innovation, and Development

Three quarter sequence; for engineering graduate students intending to lead projects related to sustainability, automotive, biomedical devices, communication, and user interaction. Student teams collaborate with academic partners in Europe, Asia, and Latin America on product innovation challenges presented by global corporations to design requirements and construct functional prototypes for consumer testing and technical evaluation. Design loft format such as found in Silicon Valley consultancies. Typically requires international travel. Prerequisites: undergraduate engineering design project; consent of instructor.

*4 units, Aut (Cutkosky, M)*

### ME 310B. Project-Based Engineering Design, Innovation, and Development

Three quarter sequence; for engineering graduate students intending to lead projects related to sustainability, automotive, biomedical devices, communication, and user interaction. Student teams collaborate with academic partners in Europe, Asia, and Latin America on product innovation challenges presented by global corporations to design requirements and construct functional prototypes for consumer testing and technical evaluation. Design loft format such as found in Silicon Valley consultancies. Typically requires international travel. Prerequisites: undergraduate engineering design project; consent of instructor.

*4 units, Win (Cutkosky, M)*

### ME 310C. Project-Based Engineering Design, Innovation, and Development

Three quarter sequence; for engineering graduate students intending to lead projects related to sustainability, automotive, biomedical devices, communication, and user interaction. Student teams collaborate with academic partners in Europe, Asia, and Latin America on product innovation challenges presented by global corporations to design requirements and construct

functional prototypes for consumer testing and technical evaluation. Design loft format such as found in Silicon Valley consultancies. Typically requires international travel. Prerequisites: undergraduate engineering design project; consent of instructor.

*4 units, Spr (Cutkosky, M)*

### ME 310X. New Product Management

Restricted to graduate students. Focus is on the role of the product manager in industry. Topics include product management skills, leadership and team management, getting a product management job, corporate and project finance for engineers, sales and marketing for engineers and business strategy. Seminar with in-class exercises and guest speakers from industry. Limited to 50. Prerequisite: ME310a and ME310b.

*1 unit, Aut (Schar, M), Win (Leifer, L), Spr (Leifer, L)*

### ME 311. Design Strategy & Leadership

The class covers the topics of the business of design, design as strategy and design research. In addition, students will learn to lead brainstorming, needfinding, and design strategy workshops with peers and industry leaders. Prerequisite: ME313, ME312

*3 units, Spr (Burnett, W)*

### ME 312. Advanced Product Design: Formgiving

Lecture/lab. Small- and medium-scale design projects carried to a high degree of aesthetic refinement. Emphasis is on form development, design process, and model making. Prerequisites: 203, 313. Corequisite: ARTSTUDI 160.

*3 units, Win (Burnett, W)*

### ME 313. Human Values and Innovation in Design

Introduction to the philosophy, spirit, and tradition of the product design program. Hands-on design projects used as vehicles for design thinking, visualization, and methodology. The relationships among technical, human, aesthetic, and business concerns. Drawing, prototyping, and design skills. Focus is on tenets of design philosophy: point of view, user-centered design, design methodology, and iterative design.

*3 units, Aut (Banerjee, S; Newman, M)*

### ME 314. Good Products, Bad Products

(Same as ME 214) The characteristics of industrial products that cause them to be successes or failures: the straightforward (performance, economy, reliability), the complicated (human and cultural fit, compatibility with the environment, craftsmanship, positive emotional response of the user), the esoteric (elegance, sophistication, symbolism). Engineers and business people must better understand these factors to produce more successful products. Projects, papers, guest speakers, field trips.

*4 units, Win (Beach, D)*

### ME 315. The Designer in Society

For graduate students. Career objectives and psychological orientation compared with existing social values and conditions. Emphasis is on assisting individuals in assessing their roles in society. Readings on political, social, and humanistic thought are related to technology and design. Experiential, in-class exercises, and term project. Enrollment limited to 24.

*3 units, Aut (Roth, B; Klebahn, P)*

### ME 316A. Product Design Master's Project

For graduate Product Design or Design (Art) majors only. Student teams, under the supervision of the design faculty, spend the quarter researching master's project topics. Students are expected to demonstrate mastery of design thinking methods including: needfinding, brainstorming, field interviews and synthesis during this investigation. Masters projects are selected that involve the synthesis of aesthetics and technological concerns in the service of human need. Prerequisites: ME216B, ME313, ME 311, ARTSTUDIO 360.

*2-6 units, Aut (Burnett, W; Kelley, D; Klebahn, P)*

### ME 316B. Product Design Master's Project

Design Garage is a Winter/Spring class (a two quarter commitment is required). The class is a deep dive in design thinking that uses student-lead projects to teach design process and methods. The projects come from investigations conducted during the Fall quarter where the preliminary need finding, customer research, and product or service ideas have been developed to provide the seed projects for the student design teams. Students will learn the methodologies of design thinking by bringing a product, service, or experience to market. Students apply to Design Garage in the Fall,

and teams are formed after interviews and applications are reviewed. Prerequisite: graduate student standing.

*2-6 units, Win (Burnett, W; Kelley, D; Klebahn, P)*

### **ME 316C. Product Design Master's Project**

This is the second half of the two quarter Design Garage sequence. Students will complete projects begun in ME316B the prior quarter. Prerequisite: ME316C and graduate student standing. Design Institute class; see <http://dschool.stanford.edu>.

*2-6 units, Spr (Burnett, W; Kelley, D)*

### **ME 317A. Design Methods: Product Definition**

Systematic methodologies to define, develop, and produce world-class products. Student team projects to identify opportunities for improvement and develop a comprehensive product definition. Topics include value engineering, quality function deployment, design for assembly and producibility, design for variety and supply chain, design for life-cycle quality, and concurrent engineering. Students must take 317B to complete the project and obtain a letter grade. On-campus enrollment limited to 20; SCPD class size limited to 50, and each site must have at least 3 students to form a project team.

*4 units, Win (Beiter, K)*

### **ME 317B. Design Methods: Quality By Design**

Building on 317A, focus is on the implementation of competitive product design. Student groups apply structured methods to optimize the design of an improved product, and plan for its manufacture, testing, and service. The project deliverable is a comprehensive product and process specification. Topics: concept generation and selection (Pugh's Method), FMEA applied to the manufacturing process, design for robustness, Taguchi Method, SPC and six sigma process, tolerance analysis, flexible manufacturing, product testing, rapid prototyping. Enrollment limited to 40, not including SCPD students. Minimum enrollment of two per SCPD viewing site; single student site by prior consent of instructor. On-campus class limited to 20. For SCPD students, limit is 50 and each site must have a minimum of three students to form a project team and define a project on their own. Prerequisite: 317A.

*4 units, Spr (Beiter, K)*

### **ME 318. Computer-Aided Product Creation**

Design course focusing on an integrated suite of computer tools: rapid prototyping, solid modeling, computer-aided machining, and computer numerical control manufacturing. Students choose, design, and manufacture individual products, emphasizing individual design process and computer design tools. Field trips demonstrate Stanford Product Realization Lab's relationship to the outside world. Structured lab experiences build a basic CAD/CAM/CNC proficiency. Limited enrollment. Prerequisite: consent of instructor.

*4 units, Aut (Milroy, J), Win (Milroy, J), Spr (Milroy, J)*

### **ME 320. Introduction to Robotics**

(Same as CS 223A) Robotics foundations in modeling, design, planning, and control. Class covers relevant results from geometry, kinematics, statics, dynamics, motion planning, and control, providing the basic methodologies and tools in robotics research and applications. Concepts and models are illustrated through physical robot platforms, interactive robot simulations, and video segments relevant to historical research developments or to emerging application areas in the field. Recommended: matrix algebra.

*3 units, Win (Khatib, O)*

### **ME 321. Optofluidics: Interplay of Light and Fluids at the Micro and Nanoscale**

Many optical systems in biology have sophisticated designs with functions that conventional optics cannot achieve: no synthetic materials, for example, can provide the camouflage capability exhibited by some animals. This course overviews recent efforts--some inspired by examples in biology--in using fluids, soft materials and nanostructures to create new functions in optics. Topics include electrowetting lenses, electronic inks, colloidal photonic crystals, bioinspired optical nanostructures, nanophotonic biosensors, lens-less optofluidic microscopes. The use of optics to control fluids is also discussed: optoelectronic tweezers, particle trapping and transport, microrheology, optofluidic sorters, fabrication and self-assembly of novel micro and nanostructures.

*3 units, Aut (Tang, S)*

### **ME 322. Kinematic Synthesis of Mechanisms**

The rational design of linkages. Techniques to determine linkage proportions to fulfill design requirements using analytical, graphical, and computer based methods.

*3 units, not given this year*

### **ME 323. Modeling and Identification of Mechanical Systems for Control**

Lecture/Lab. The art and science behind developing mathematical models for control system design. Theoretical and practical system modeling and parameter identification. Frequency domain identification, parametric modeling, and black-box identification. Analytical work and laboratory experience with identification, controller implementation, and the implications of unmodeled dynamics and non-linearities. Prerequisites: linear algebra and system simulation with MATLAB/SIMULINK; ENGR 105.

*3 units, not given this year*

### **ME 324. Precision Engineering**

Advances in engineering are often enabled by more accurate control of manufacturing and measuring tolerances. Concepts and technology enable precision such that the ratio of overall dimensions to uncertainty of measurement is large relative to normal engineering practice. Typical application areas: non-spherical optics, computer information storage devices, and manufacturing metrology systems. Application experience through design and manufacture of a precision engineering project, emphasizing the principles of precision engineering. Structured labs; field trips. Prerequisite: consent of instructors.

*4 units, Spr (Beach, D; DeBra, D)*

### **ME 325. Introduction to High Performance Computing**

An introduction to the use of advanced computing resources with real-world examples of large-scale, multidisciplinary, simulation-based science as related to academic and applied research.

*1 unit, Sum (Staff)*

### **ME 326. Telerobotics and Human-Robot Interactions**

Focus is on dynamics and controls. Evaluation and implementation of required control systems. Topics include master-slave systems, kinematic and dynamic similarity; control architecture, force feedback, haptics, sensory substitutions; stability, passivity, sensor resolution, servo rates; time delays, prediction, wave variables. Hardware-based projects encouraged, which may complement ongoing research or inspire new developments. Limited enrollment. Prerequisites: ENGR 205, 320 or CS 223A, or consent of instructor. (Niemeyer)

*3 units, not given this year*

### **ME 330. Advanced Kinematics**

Kinematics from mathematical viewpoints. Introduction to algebraic geometry of point, line, and plane elements. Emphasis is on basic theories which have potential application to mechanical linkages, computational geometry, and robotics.

*3 units, Aut (Roth, B)*

### **ME 331A. Advanced Dynamics & Computation**

Newton, Euler, momentum, and road-map methods and computational tools for 3-D force and motion analysis of multibody systems. Power, work, and energy. Numerical solutions (e.g., MATLAB, etc.) of nonlinear algebraic and differential equations governing the static and dynamic behavior of multiple degree of freedom systems.

*3 units, Win (Mitiguy, P)*

### **ME 331B. Advanced Dynamics & Simulation**

Advanced methods and computational tools for the efficient formulation of equations of motion for multibody systems. D'Alembert principle. Power, work, and energy. Kane's method. Lagrange's method. Computed torque control. Systems with constraints. Quaternions Numerical solutions of nonlinear algebraic and differential equations governing the behavior of multiple degree of freedom systems.

*3 units, Spr (Mitiguy, P)*

### **ME 333. Mechanics**

Goal is a common basis for advanced mechanics courses. Formulation of the governing equations from a Lagrangian perspective. Examples include systems of particles and linear elastic solids. Waves in discrete and continuous media. Linear

elasticity formulation in the static and dynamic cases, and elementary measures of stress and strain. Tensor and variational calculus.

3 units, Aut (Lew, A)

### ME 335A. Finite Element Analysis

Fundamental concepts and techniques of primal finite element methods. Method of weighted residuals, Galerkin's method and variational equations. Linear elliptic boundary value problems in one, two and three space dimensions; applications in structural, solid and fluid mechanics and heat transfer. Properties of standard element families and numerically integrated elements. Implementation of the finite element method using Matlab, assembly of equations, and element routines. Lagrange multiplier and penalty methods for treatment of constraints. The mathematical theory of finite elements.

3 units, Win (Pinsky, P)

### ME 335B. Finite Element Analysis

Finite element methods for linear dynamic analysis. Eigenvalue, parabolic, and hyperbolic problems. Mathematical properties of semi-discrete (t-continuous) Galerkin approximations. Modal decomposition and direct spectral truncation techniques. Stability, consistency, convergence, and accuracy of ordinary differential equation solvers. Asymptotic stability, over-shoot, and conservation laws for discrete algorithms. Mass reduction. Applications in heat conduction, structural vibrations, and elastic wave propagation. Computer implementation of finite element methods in linear dynamics. Implicit, explicit, and implicit-explicit algorithms and code architectures.

3 units, Spr (Pinsky, P)

### ME 335C. Finite Element Analysis

Variational formulation of nonlinear elliptic, parabolic and hyperbolic problems. Newton's method for solving nonlinear algebraic systems; load-stepping, convergence, divergence and bifurcation. Enhancement of Newton's method including line-search, quasi-Newton and arc-length methods. Finite element approximation and consistent linearization; definition of the tangent operator and residual vector. Data structures for nonlinear finite element analysis. Examples drawn from nonlinear (rigid) heat conduction, nonlinear elasticity and contact mechanics.

3 units, not given this year

### ME 336. Crystalline Anisotropy

(Same as MATSCI 359) Matrix and tensor analysis with applications to the effects of crystal symmetry on elastic deformation, thermal expansion, diffusion, piezoelectricity, magnetism, thermodynamics, and optical properties of solids, on the level of J. F. Nye's Physical Properties of Crystals. Homework sets use Mathematica.

3 units, not given this year

### ME 337. Mechanics of Growth

Introduction to continuum theory and numerical solutions or biomechanical problems. Kinematics of finite growth. Balance equations in open system thermodynamics. Constitutive equations for biological tissues. Enhanced finite element models in biomechanics. Analytical solutions for simple model problems. Numerical solutions for more advanced problems such as: bone remodeling; wound healing; muscle regeneration; tumor growth; atherosclerosis; in-stent restenosis; and tissue engineering.

3 units, not given this year

### ME 338A. Continuum Mechanics

Nonlinear continuum mechanics for solids and fluids. Kinematics of finite deformations. Measures of strain and stress. Finite rotations. Linearized kinematics and infinitesimal measures of deformations. Rates. Conservation laws for mass, momenta, and energy. Boundary value problem in continuum mechanics. Prerequisites: 333 and 300, or equivalent background with consent of instructor.

3 units, Win (Lew, A)

### ME 338B. Continuum Mechanics

Constitutive theory; equilibrium constitutive relations; material frame indifference and material symmetry; finite elasticity; formulation of the boundary value problem; linearization and well-posedness; symmetries and configurational forces; numerical considerations.

3 units, alternate years, not given this year

### ME 339. Introduction to parallel computing using MPI, openMP, and CUDA

(Same as CME 213) This class will give hands on experience with programming multicore processors, graphics processing units (GPU), and parallel computers. Focus will be on the message passing interface (MPI, parallel clusters) and the compute unified device architecture (CUDA, GPU). Topics will include: network topologies, modeling communication times, collective communication operations, parallel efficiency, MPI, dense linear algebra using MPI. Symmetric multiprocessing (SMP), pthreads, openMP. CUDA, combining MPI and CUDA, dense linear algebra using CUDA, sort, reduce and scan using CUDA. Pre-requisites include: C programming language and numerical algorithms (solution of differential equations, linear algebra, Fourier transforms).

3 units, Spr (Darve, E)

### ME 340A. Theory and Applications of Elasticity

Elasticity theory and application to material structures at microscale. Theories: stress, strain, and energy; equilibrium and compatibility conditions; boundary value problem. Solution methods: stress function, Green's function, Fourier transformation. Numerical exercises using Matlab. Applications to defects in solids, thin films, and biomembranes.

3 units, not given this year

### ME 340B. Elasticity in Microscopic Structures

This course provides analytic tools, notably the Green's function method, to solve elasticity problems (stress, strain, energy) of microscopic structures under deformation. Students shall be able to apply the theory of elasticity to study the interaction of defects in solids, such as inclusions, inhomogeneities, cracks, dislocations and interfaces.

3 units, alternate years, not given this year

### ME 342A. MEMS Laboratory

Practice and theory of MEMS device design and fabrication, orientation to fabrication facilities, and introduction to techniques for design and evaluation of MEMS devices in the context of designed projects. Emphasis on MEMS design (need finding, brainstorming, evaluation, and design methodology), characterization, and fabrication, including photolithography, etching, oxidation, diffusion, and ion implantation. Limited enrollment. Prerequisite: engineering or science background and consent of instructor.

3-4 units, not given this year

### ME 342D. MEMS Laboratory Assignments

Prerequisite: consent of instructor.

1-3 units, Sum (Staff)

### ME 343. An Introduction to Waves in Elastic Solids

One-dimensional motion of an elastic continuum, the linearized theory of elasticity and elastodynamic theory, elastic waves in an unbounded medium, plane harmonic waves in elastic half-spaces including reflection and refraction, slowness, energy velocity and anisotropic effects. Text is first five chapters of Achenbach's Wave Propagation in Elastic Solids. (Barnett)

3 units, Win (Barnett, D)

### ME 345. Fatigue Design and Analysis

The mechanism and occurrences of fatigue in service. Methods for predicting fatigue life and for protecting against premature fatigue failure. Use of elastic stress and inelastic strain analyses to predict crack initiation life. Use of linear elastic fracture mechanics to predict crack propagation life. Effects of stress concentrations, manufacturing processes, load sequence, irregular loading, multi-axial loading. Subject is treated from the viewpoints of the engineer seeking up-to-date methods of life prediction and the researcher interested in improving understanding of fatigue behavior. Prerequisite: undergraduate mechanics of materials.

3 units, Win (Nelson, D)

### ME 346A. Introduction to Statistical Mechanics

The main purpose of this course is to provide students with enough statistical mechanics background to the Molecular Simulations classes (ME 346B,C), including the fundamental concepts such as ensemble, entropy, and free energy, etc. The main theme of this course is how the laws at the macroscale (thermodynamics) can be obtained by analyzing the spontaneous fluctuations at the microscale (dynamics of molecules). Topics include

thermodynamics, probability theory, information entropy, statistical ensembles, phase transition and phase equilibrium. Recommended: PHYSICS 110 or equivalent.

3 units, Win (Cai, W)

#### ME 346B. Introduction to Molecular Simulations

Algorithms of molecular simulations and underlying theories. Molecular dynamics, time integrators, modeling thermodynamic ensembles (NPT, NVT), free energy, constraints. Monte Carlo simulations, parallel tempering. Stochastic equations, Langevin and Brownian dynamics. Applications in solids, liquids, and biomolecules (proteins). Programming in Matlab.

3 units, Spr (Cai, W)

#### ME 346C. Advanced Techniques for Molecular Simulations

Advanced methods for computer simulation of proteins. Symplectic time integrators, multiple-time stepping, energy conservation. Long-range force calculation, particle mesh Ewald, fast multipole method, multigrid. Free energy methods, umbrella sampling, acceptance ratio, thermodynamic integration, non equilibrium methods, adaptive biasing force. Prerequisites: ME 346A,B or equivalent, Matlab, and C++.

3 units, alternate years, not given this year

#### ME 347. Mathematical Theory of Dislocations

The mathematical theory of straight and curvilinear dislocations in linear elastic solids. Stress fields, energies, and Peach-Koehler forces associated with these line imperfections. Anisotropic effects, Green's function methods, and the geometrical techniques of Brown and Indenborn-Orlov for computing dislocation fields and for studying dislocation interactions. Continuously distributed dislocations and cracks and inclusions.

3 units, not given this year

#### ME 348. Experimental Stress Analysis

Theory and applications of photoelasticity, strain gages, and holographic interferometry. Comparison of test results with theoretical predictions of stress and strain. Discussion of other methods of stress and strain determination (optical fiber strain sensors, acoustoelasticity, thermoelasticity, brittle coating, Moire interferometry, residual stress determination). Six labs plus mini-project. Limited enrollment. Lab fee.

3 units, Spr (Nelson, D)

#### ME 349. Variational Methods in Elasticity and Plate Theory

An introduction to variational calculus methods and their applications to the theories of elasticity and plates.

3 units, not given this year

#### ME 351A. Fluid Mechanics

Exact and approximate analysis of fluid flow covering kinematics, global and differential equations of mass, momentum, and energy conservation. Forces and stresses in fluids. Euler's equations and the Bernoulli theorem applied to inviscid flows. Vorticity dynamics. Topics in irrotational flow: stream function and velocity potential for exact and approximate solutions; superposition of solutions; complex potential function; circulation and lift. Some boundary layer concepts.

3 units, Aut (Su, L)

#### ME 351B. Fluid Mechanics

Laminar viscous fluid flow. Governing equations, boundary conditions, and constitutive laws. Exact solutions for parallel flows. Creeping flow limit, lubrication theory, and boundary layer theory including free-shear layers and approximate methods of solution; boundary layer separation. Introduction to stability theory and transition to turbulence, and turbulent boundary layers. Prerequisite: 351A.

3 units, Win (Eaton, J)

#### ME 352A. Radiative Heat Transfer

The fundamentals of thermal radiation heat transfer; blackbody radiation laws; radiative properties of non-black surfaces; analysis of radiative exchange between surfaces and in enclosures; combined radiation, conduction, and convection; radiative transfer in absorbing, emitting, and scattering media. Advanced material for students with interests in heat transfer, as applied in high-temperature energy conversion systems. Take 352B,C for depth in heat transfer. Prerequisites: graduate standing and undergraduate course in heat transfer. Recommended: computer skills.

3 units, not given this year

#### ME 352B. Fundamentals of Heat Conduction

Physical description of heat conduction in solids, liquids, and gases. The heat diffusion equation and its solution using analytical and numerical techniques. Data and microscopic models for the thermal conductivity of solids, liquids, and gases, and for the thermal resistance at solid-solid and solid-liquid boundaries. Introduction to the kinetic theory of heat transport, focusing on applications for composite materials, semiconductor devices, micromachined sensors and actuators, and rarefied gases. Prerequisite: consent of instructor.

3 units, Win (Goodson, K)

#### ME 352C. Convective Heat Transfer

Prediction of heat and mass transfer rates based on analytical and numerical solutions of the governing partial differential equations. Heat transfer in fully developed pipe and channel flow, pipe entrance flow, laminar boundary layers, and turbulent boundary layers. Superposition methods for handling non-uniform wall boundary conditions. Approximate models for turbulent flows. Comparison of exact and approximate analyses to modern experimental results. General introduction to heat transfer in complex flows. Prerequisite: 351B or equivalent.

3 units, Spr (Eaton, J)

#### ME 354. Experimental Methods in Fluid Mechanics

Experimental methods associated with the interfacing of laboratory instruments, experimental control, sampling strategies, data analysis, and introductory image processing. Instrumentation including point-wise anemometers and particle image tracking systems. Lab. Prerequisites: previous experience with computer programming and consent of instructor. Limited enrollment.

4 units, Aut (Santiago, J)

#### ME 355. Compressible Flow

Topics include quasi-one-dimensional isentropic flow in variable area ducts, normal shock waves, oblique shock and expansion waves, flow in ducts with friction and heat transfer, unsteady one-dimensional flow, and steady two-dimensional supersonic flow.

3 units, not given this year

#### ME 357. Turbine and Internal Combustion Engines

(Same as ME 257) Principles of design analysis for aircraft gas turbines and automotive piston engines. Analysis for aircraft engines performed for Airbus A380 type aircraft. Design parameters determined considering aircraft aerodynamics, gas turbine thermodynamics, compressible flow physics, and material limitations. Additional topics include characteristics of main engine components, off-design analysis, and component matching. Performance of automotive piston engines including novel engine concepts in terms of engine thermodynamics, intake and exhaust flows, and in-cylinder flow.

3 units, not given this year

#### ME 358. Heat Transfer in Microdevices

Application-driven introduction to the thermal design of electronic circuits, sensors, and actuators that have dimensions comparable to or smaller than one micrometer. The impact of thin-layer boundaries on thermal conduction and radiation. Convection in microchannels and microscopic heat pipes. Thermal property measurements for microdevices. Emphasis is on Si and GaAs semiconductor devices and layers of unusual, technically-promising materials such as chemical-vapor-deposited (CVD) diamond. Final project based on student research interests. Prerequisite: consent of instructor.

3 units, Spr (Asheghi, M)

#### ME 359A. Advanced Design and Engineering of Space Systems I

The application of advanced theory and concepts to the development of spacecraft and missile subsystems; taught by experts in their fields. Practical aspects of design and integration. Mission analysis, systems design and verification, radiation and space environments, orbital mechanics, space propulsion, electrical power and avionics subsystems, payload communications, and attitude control. Subsystem-oriented design problems focused around a mission to be completed in groups. Tours of Lockheed Martin facilities. Limited enrollment. Prerequisites: undergraduate degree in related engineering field or consent of instructor.

4 units, not given this year

#### ME 359B. Advanced Design and Engineering of Space Systems

**II**

Continuation of 359A. Topics include aerospace materials, mechanical environments, structural analysis and design, finite element analysis, mechanisms, thermal control, probability and statistics. Tours of Lockheed Martin facilities. Limited enrollment. Prerequisites: undergraduate degree in related field, or consent of instructor.

*4 units, not given this year*

**ME 361. Turbulence**

The nature of turbulent flows, statistical and spectral description of turbulence, coherent structures, spatial and temporal scales of turbulent flows. Averaging, two-point correlations and governing equations. Reynolds averaged equations and stresses. Free shear flows, turbulent jet, turbulent kinetic energy and kinetic energy dissipation, and kinetic energy budget. Kolmogorov's hypothesis and energy spectrum. Wall bounded flows, viscous scales, and law of the wall. Turbulence closure modeling for Reynolds averaged Navier Stokes equations. Direct and large eddy simulation of turbulent flows. Subgrid scale modeling.

*3 units, Spr (Moin, P)*

**ME 362A. Physical Gas Dynamics**

Concepts and techniques for description of high-temperature and chemically reacting gases from a molecular point of view. Introductory kinetic theory, chemical thermodynamics, and statistical mechanics as applied to properties of gases and gas mixtures. Transport and thermodynamic properties, law of mass action, and equilibrium chemical composition. Maxwellian and Boltzmann distributions of velocity and molecular energy. Examples and applications from areas of current interest such as combustion and materials processing.

*3 units, Aut (Bowman, C)*

**ME 362B. Nonequilibrium Processes in High-Temperature Gases**

Chemical kinetics and energy transfer in high-temperature gases. Collision theory, transition state theory, and unimolecular reaction theory. Prerequisite: 362A or consent of instructor.

*3 units, Win (Hanson, R)*

**ME 363. Partially Ionized Plasmas and Gas Discharges**

Introduction to partially ionized gases and the nature of gas discharges. Topics: the fundamentals of plasma physics emphasizing collisional and radiative processes, electron and ion transport, ohmic dissipation, oscillations and waves, interaction of electromagnetic waves with plasmas. Applications: plasma diagnostics, plasma propulsion and materials processing. Prerequisite: 362A or consent of instructor.

*3 units, Spr (Cappelli, M)*

**ME 364. Optical Diagnostics and Spectroscopy**

The spectroscopy of gases and laser-based diagnostic techniques for measurements of species concentrations, temperature, density, and other flow field properties. Topics: electronic, vibrational, and rotational transitions; spectral lineshapes and broadening mechanisms; absorption, fluorescence, Rayleigh and Raman scattering methods; collisional quenching. Prerequisite: 362A or equivalent.

*3 units, Win (Hanson, R)*

**ME 365. The Structure of Design Research**

Restricted to second-year Joint Program in Design graduate students; prerequisite for ME 316A,B,C. How to shape individual research plans, identify tools for design research, and develop a vocabulary for research through design. Students present proposals for master's theses. Case studies.

*1-3 units, not given this year*

**ME 366. Creative Gym: A Design Thinking Skills Studio**

Build your creative confidence and sharpen your design thinking skills. Train your intuition and expand the design context from which you operate every day. This experimental studio will introduce the d.school to fast-paced experimental exercises that lay the mental and physical foundation for a potent bias toward action, and a deeper knowledge of the personal skills that expert design thinkers utilize in all phases of their process. Exercises will be offered by a number of the d.school's most creatively confident design thinkers. Apply at the first day of class.

*1 unit, Win (Burgess-Auburn, C; Hawthorne, G)*

**ME 367. Optical Diagnostics and Spectroscopy Laboratory**

Principles, procedures, and instrumentation associated with optical measurements in gases and plasmas. Absorption, fluorescence and emission, and light-scattering methods. Measurements of temperature, species concentration, and molecular properties. Lab. Enrollment limited to 16. Prerequisite: 362A or 364.

*4 units, Spr (Hanson, R)*

**ME 368A. Biodesign Innovation: Needs Finding and Concept Creation**

(Same as BIOE 374A, MED 272A) (Same as OIT 384) Two quarter sequence. Inventing new medical devices and instrumentation, including: methods of validating medical needs; techniques for analyzing intellectual property; basics of regulatory (FDA) and reimbursement planning; brainstorming and early prototyping. Guest lecturers and practical demonstrations.

*4 units, Win (Yock, P; Zenios, S; Milroy, J; Brinton, T)*

**ME 368B. Biodesign Innovation: Concept Development and Implementation**

(Same as BIOE 374B, MED 272B) (Same as OIT 385) Two quarter sequence. How to take a medical device invention forward from early concept to technology translation and development. Topics include prototyping; patent strategies; advanced planning for reimbursement and FDA approval; choosing translation route (licensing versus start-up); ethical issues including conflict of interest; fundraising approaches and cash requirements; essentials of writing a business or research plan; strategies for assembling a development team. Prerequisite: MED 272A, ME368A, OIT 384 or BIOE 374A.

*4 units, Spr (Yock, P; Zenios, S; Milroy, J; Brinton, T)*

**ME 370A. Energy Systems I: Thermodynamics**

Thermodynamic analysis of energy systems emphasizing systematic methodology for and application of basic principles to generate quantitative understanding. Availability, mixtures, reacting systems, phase equilibrium, chemical availability, and modern computational methods for analysis. Prerequisites: undergraduate engineering thermodynamics and computer skills such as Matlab.

*3 units, Aut (Mitchell, R)*

**ME 370B. Energy Systems II: Modeling and Advanced Concepts**

Development of quantitative device models for complex energy systems, including fuel cells, reformers, combustion engines, and electrolyzers, using thermodynamic and transport analysis. Student groups work on energy systems to develop conceptual understanding, and high-level, quantitative and refined models. Advanced topics in thermodynamics and special topics associated with devices under study. Prerequisite: 370A.

*4 units, Win (Edwards, C)*

**ME 370C. Energy Systems III: Projects**

Refinement and calibration of energy system models generated in ME 370B carrying the models to maturity and completion. Integration of device models into a larger model of energy systems. Prerequisites: 370A,B, consent of instructor.

*3-5 units, Spr (Edwards, C)*

**ME 371. Combustion Fundamentals**

Heat of reaction, adiabatic flame temperature, and chemical composition of products of combustion; kinetics of combustion and pollutant formation reactions; conservation equations for multi-component reacting flows; propagation of laminar premixed flames and detonations. Prerequisite: 362A or 370A, or consent of instructor.

*3 units, Win (Zheng, X)*

**ME 372. Combustion Applications**

The role of chemical and physical processes in combustion; ignition, flammability, and quenching of combustible gas mixtures; premixed turbulent flames; laminar and turbulent diffusion flames; combustion of fuel droplets and sprays. Prerequisite: 371.

*3 units, Spr (Bowman, C)*

**ME 377. Design Thinking Bootcamp: Experiences in Innovation and Design**

Bootcamp is a fast-paced immersive experience in design thinking. You'll progress through four full cycles of the process, working with a diverse team to solve real world challenges. Field work and

deep collaboration with teammates are required of all students. Tenets of design thinking including being human-centered, prototype-driven, and mindful of process. Topics include design processes, innovation methodologies, need finding, human factors, visualization, rapid prototyping, team dynamics, storytelling, and project leadership. Limited enrollment. APPLICATION REQUIRED by 9/21/11. See <http://bit.ly/dbootcamp>.

3-4 units, Aut (Kembel, G; Staff, 1)

**ME 378. Tell, Make, Engage: Action Stories for Entrepreneurship**

Guest discussion leaders with entrepreneurship experience give the course an evolving framework of evaluative methods, formed and reformed by collaborative development within the class. Stories attached to an idea or a discovery, are considered through practice exercises, artifacts, design challenges, short papers, and presentations.

1-3 units, Win (Karanian, B), Spr (Karanian, B)

**ME 380. Collaborating with the Future: Launching Large Scale Sustainable Transformations**

(Same as ENVRES 380) This project-based d.school class combines Design Thinking Processes, Behavioral Sciences, and elements of Diffusion Theory. Tools and theories introduced in class will be used to structure large-scale transformations that simultaneously create value on environmental, societal, and economic fronts. We encourage students to use this class as a launching pad for real initiatives. Primarily meant for Graduate Students. (Especially qualified/motivated Seniors will be considered). Admission to the class is through an application process which ends on March 3. Please find instructions and applications at

<https://dschool.stanford.edu/groups/targettransformations/>.

3-4 units, Spr (Banerjee, S; Staff, 1)

**ME 381. Orthopaedic Bioengineering**

(Same as BIOE 381) Engineering approaches applied to the musculoskeletal system in the context of surgical and medical care. Fundamental anatomy and physiology. Material and structural characteristics of hard and soft connective tissues and organ systems, and the role of mechanics in normal development and pathogenesis. Engineering methods used in the evaluation and planning of orthopaedic procedures, surgery, and devices.

3 units, Spr (Levenston, M)

**ME 382A. Biomedical Engineering in Research and Development**

Project based class studying real world biomedical problems ranging from translational biomedical research to medical device design. Topics include preventative strategies and biomedical challenges of an aging population. Identifying underlying scientific principles (computational and/or experimental) for solving biomedical problems is a key element. Students will form project teams and develop interdisciplinary communication skills; form testable hypotheses with biological, anatomical and physiological considerations; test standards for medical devices and learn about regulatory issues and intellectual property.

4 units, Win (Andriacchi, T)

**ME 382B. Medical Device Design**

Continuation of industry sponsored projects from 382A. With the assistance of faculty and expert consultants, students finalize product designs or complete detailed design evaluations of new medical products. Bioethics issues and strategies for funding new medical ventures.

4 units, Spr (Andriacchi, T)

**ME 385. Tissue Engineering Lab**

Hands-on experience in the fabrication of living engineered tissues. Techniques include sterile technique, culture of mammalian cells, creation of cell-seeded scaffolds, and the effects of mechanical loading on the metabolism of living engineered tissues. Theory, background, and practical demonstration for each technique. Lab.

1-2 units, not given this year

**ME 386. Neuromuscular Biomechanics**

(Same as BIOE 386) The interplay between mechanics and neural control of movement. State of the art assessment through a review of classic and recent journal articles. Emphasis is on the application of dynamics and control to the design of assistive

technology for persons with movement disorders.

3 units, not given this year

**ME 387. Soft Tissue Mechanics**

Structure/function relationships and mechanical properties of soft tissues, including nonlinear elasticity, viscoelasticity, and poroelasticity.

3 units, not given this year

**ME 388. Transport Modeling for Biological Systems**

Introduction to electric fields, fluid flows, transport phenomena and their application to biological systems. Maxwell's equations, electrostatics, electro-chemical-mechanical driving forces in physiological systems. Ionic diffusion in electrolytes and membrane transport. Fluid and solid continua theory for porous, hydrated biological tissues. Applications include ionic and molecular transport in tissues and cells, electrophoresis, electromechanical and physicochemical interactions in cells and the extracellular matrix of connective tissue.

3 units, not given this year

**ME 389. Biomechanical Research Symposium**

Guest speakers present contemporary research on experimental and theoretical aspects of biomechanical engineering and bioengineering. May be repeated for credit.

1 unit, Aut (Levenston, M), Spr (Levenston, M)

**ME 390. Thermosciences Research Project Seminar**

Review of work in a particular research program and presentations of other related work.

1 unit, not given this year

**ME 390A. High Temperature Gasdynamics Laboratory Research Project Seminar**

Review of work in a particular research program and presentations of other related work.

1 unit, Aut (Mitchell, R), Win (Staff), Spr (Cappelli, M)

**ME 391. Engineering Problems**

Directed study for graduate engineering students on subjects of mutual interest to student and staff member. May be used to prepare for experimental research during a later quarter under 392. Faculty sponsor required.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ME 392. Experimental Investigation of Engineering Problems**

Graduate engineering students undertake experimental investigation under guidance of staff member. Previous work under 391 may be required to provide background for experimental program. Faculty sponsor required.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ME 393. Topics in Biologically Inspired or Human Interactive Robotics**

Application of observations from human and animal physiology to robotic systems. Force control of motion including manipulation, haptics, and locomotion. Weekly literature review forum led by student. May be repeated for credit. (Cutkosky, Waldron, Niemeyer)

1 unit, not given this year

**ME 395. Seminar in Solid Mechanics**

Required of Ph.D. candidates in solid mechanics. Guest speakers present research topics related to mechanics theory, computational methods, and applications in science and engineering. May be repeated for credit. See <http://mc.stanford.edu>.

1 unit, Aut (Pinsky, P), Win (Pinsky, P), Spr (Pinsky, P)

**ME 396. Design and Manufacturing Forum**

(Same as ME 196) Invited speakers address issues of interest to design and manufacturing engineering and business students. Sponsored by the Product Realization Network at Stanford.

1 unit, Spr (Reis, R)

**ME 397. Design Theory and Methodology Seminar**

What do designers do when they do design? How can their performance be improved? Topics change each quarter. May be repeated for credit.

1-3 units, Aut (Steinert, R), Win (Steinert, R), Spr (Steinert, R)

**ME 399. Fuel Cell Seminar**

Interdisciplinary research in engineering, chemistry, and physics. Talks on fundamentals of fuel cells by speakers from Stanford, other academic and research institutions, and industry. The

potential to provide high efficiency and zero emissions energy conversion for transportation and electrical power generation.

*1 unit, not given this year*

**ME 400. Thesis (Engineer Degree)**

Investigation of some engineering problems. Required of Engineer degree candidates

*2-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**ME 405. Asymptotic Methods and Applications**

Asymptotic versus convergent expansions, approximation of integrals, method of matched asymptotics, WKB method and turning points, method of multiple scales. Applications: viscous and potential flow, wave propagation, combustion, and electrostatics. Prerequisites: ME 300B, graduate-level fluid mechanics.

*3 units, not given this year*

**ME 406. Turbulence Physics and Modeling Using Numerical Simulation Data**

Prerequisite: consent of instructor.

*2 units, Sum (Staff)*

**ME 408. Spectral Methods in Computational Physics**

Data analysis, spectra and correlations, sampling theorem, nonperiodic data, and windowing; spectral methods for numerical solution of partial differential equations; accuracy and computational cost; fast Fourier transform, Galerkin, collocation, and Tau methods; spectral and pseudospectral methods based on Fourier series and eigenfunctions of singular Sturm-Liouville problems; Chebyshev, Legendre, and Laguerre representations; convergence of eigenfunction expansions; discontinuities and Gibbs phenomenon; aliasing errors and control; efficient implementation of spectral methods; spectral methods for complicated domains; time differencing and numerical stability.

*3 units, not given this year*

**ME 410A. Foresight and Innovation**

Learn what makes technical innovations succeed long-term. This course provides an intensive and hands-on overview to multiple foresight methods and anticipatory design techniques that teach you how to find and plan for future opportunities. Students build a portfolio of innovation ideas and prototypes. Prerequisite: consent of instructor.

*3-5 units, Aut (Cockayne, W)*

**ME 410B. Foresight and Innovation**

The art, science, and practice of design innovation. Tools such as critical foresight and anticipatory research that assist organizations in improving the quality and speed of research and design innovation programs. The path from idea to market. How to communicate a developing idea through scenarios, business pitches, and product prototypes.

*1-5 units, Win (Cockayne, W)*

**ME 410C. Foresight and Innovation**

The art, science, and practice of design innovation. Tools such as critical foresight and anticipatory research that assist organizations in improving the quality and speed of research and design innovation programs. The path from idea to market. How to communicate a developing idea through scenarios, business pitches, and product prototypes.

*1-5 units, Spr (Cockayne, W)*

**ME 411. Advanced Topics in Computational Solid Mechanics**

Discussion of the use of computational simulation methods for analyzing and optimizing production processes and for developing new products, based on real industrial applications in the metal forming industry. Brief review of linear and nonlinear continuum mechanics and the use of finite element methods to model solid mechanics problems, constitutive relations for metals, coupled thermo-elasto-plastic (viscoplastic) problems, modeling metal production processes: bulk metal forming processes using rigid/viscoplastic material models, application examples: hot rolling of plates and the Mannesmann piercing processes and modeling the service behavior of steel pipes. Prerequisites: ME 338A, ME 335A,B,C, or consent of instructor.

*3 units, not given this year*

**ME 412. Engineering Functional Analysis and Finite Elements**

(Same as CME 356) Concepts in functional analysis to understand models and methods used in simulation and design. Topology,

measure, and integration theory to introduce Sobolev spaces. Convergence analysis of finite elements for the generalized Poisson problem. Extensions to convection-diffusion-reaction equations and elasticity. Upwinding. Mixed methods and LBB conditions. Analysis of nonlinear and evolution problems. Prerequisites: 335A,B, CME 200, CME 204, or consent of instructor. Recommended: 333, MATH 171.

*3 units, not given this year*

**ME 413. Quantum Confinement Structures: Physics and Fabrication**

Quantum mechanics principles and the thermodynamics of confinement structures. Focus is on potential applications such as solar cells and catalysis. Student presentations. Lab demonstrations. Prerequisite: background in quantum mechanics and statistical thermodynamics.

*3 units, not given this year*

**ME 414. Solid State Physics Issues for Mechanical Engineering Experiments**

A basic understanding of concepts and issues in the area of Solid State Physics which underlie standard mechanical properties. This course will review some basic Quantum Mechanics and Statistical Thermodynamics, and then cover the first 50% of a standard overview of Solid State Physics. The goal is to provide some fundamental understanding of the principles involved in these mechanical phenomena, and the background necessary to participate in interdisciplinary research

*3 units, Sum (Staff)*

**ME 417. Total Product Integration Engineering**

For students aspiring to be product development executives and leaders in research and education. Advanced methods and tools beyond the material covered in 217: quality design across global supply chain, robust product architecture for market variety and technology advances, product development risk management. Small teams or individuals conduct a practical project that produces a case study or enhancement to produce development methods and tools. Enrollment limited to 12. Prerequisites: 317A,B.

*4 units, Aut (Beiter, K)*

**ME 420. Applied Electrochemistry at Micro- and Nanoscale**

The class is an introduction to applied electrochemistry with focus on micro- and nanoscale applications. Basic concepts of physical chemistry are presented, of which the fundamentals of electrochemistry are built. Theory of electrochemical methods for material analyses and material modifications are discussed with emphasis on the scaling behaviors. This year electrochemical energy generation/storage devices with focus on batteries will be discussed in class. Journals articles are reviewed within the framework of the course with focus on current problems and needs in and energy conversion and storage.

*3 units, Sum (Staff)*

**ME 421. Thought Leaders Seminar for European Entrepreneurship and Innovation**

Lessons from real-world experiences and challenges in European startups, corporations, universities, non-profit research institutes and venture finance organizations. Speakers include entrepreneurs, leaders from global technology companies, university researchers, venture capitalists, legal experts, senior policy makers and other guests from selected European countries and regions. Geographic scope encompasses Ireland to Russia, and Scandinavia to the Mediterranean region. Enrollment open to undergraduates and graduates in any school or department at Stanford.

*1 unit, Win (Leifer, L; Lee, B)*

**ME 423. D.HEALTH: Design Thinking for Health**

In the U.S., 75% of medical expenditures are for illnesses that are lifestyle related such as diabetes and heart disease. If patients could change their lifestyles, medical problems could be avoided and a healthier and happier life achieved. Class employs design thinking in teams. Individual projects and small and large team projects with multiple milestones. Students work in the field, and present in class. Design Institute class; see <http://dschool.stanford.edu>.

*3 units, Win (Klebahn, P; Boyle, D; Kelley, D)*

**ME 429. COMMERCIAL MEMS DESIGN**

This course, taught by Dr. Gary O'Brien of the Bosch RTC, will provide insight into the issues and challenges in designing MEMS

device for commercial and automotive applications. Topics to be covered in the class will include device simulation and design, design of experiments, compensation for cross-wafer and wafer-to-wafer fabrication variations, design for extreme environments, analysis and management of reliability issues including package stress, shock, drift, cost analysis of manufacturing processes, and some discussion of the unique challenges for consumer and automotive customers and markets. Student teams will develop a device design, fabrication process, and manufacturing analysis in response to a specification.

3 units, Spr (O'Brien, G)

#### **ME 440. Electronic States and Transitions In Quantum Confined Structures**

Summary of selected quantum mechanical concepts with focus on phenomena related to charge separation and transfer. The physics and thermodynamics of excitons described and related to experimental observations. The energy state of electrons as function of confinement size and strength. Presentations include on electron tunneling, measuring the density of electronic states, dielectric behavior of materials, Bose Einstein condensation of quasi particles, and excitons in quantum wells and dots.

3 units, not given this year

#### **ME 450. Advances in Biotechnology**

Guest academic and industrial speakers. Latest developments in fields such as bioenergy, green process technology, production of industrial chemicals from renewable resources, protein pharmaceutical production, industrial enzyme production, stem cell applications, medical diagnostics, and medical imaging. Biotechnology ethics, business and patenting issues, and entrepreneurship in biotechnology.

3 units, not given next year

#### **ME 451A. Advanced Fluid Mechanics Multiphase Flows**

Single particle and multi-particle fluid flow phenomena, mass, momentum and heat transfer, characteristic time and length scales, non-dimensional groups; collection of dispersed-phase elements: instantaneous and averaged descriptions for multiphase flow, Eulerian-Eulerian and Lagrangian-Eulerian statistical representations, mixture theories; models for drag, heat and mass transfer; dilute to dense two-phase flow, granular flows; computer simulation approaches for multiphase flows, emerging research topics. Prerequisites: graduate level fluid mechanics and engineering mathematics, and undergraduate engineering mechanics and thermodynamics.

3 units, Win (Staff)

#### **ME 451B. Advanced Fluid Mechanics**

Waves in fluids: surface waves, internal waves, inertial and acoustic waves, dispersion and group velocity, wave trains, transport due to waves, propagation in slowly varying medium, wave steepening, solitons and solitary waves, shock waves. Instability of fluid motion: dynamical systems, bifurcations, Kelvin-Helmholtz instability, Rayleigh-Benard convection, energy method, global stability, linear stability of parallel flows, necessary and sufficient conditions for stability, viscosity as a destabilizing factor, convective and absolute instability. Focus is on flow instabilities. Prerequisites: graduate courses in compressible and viscous flow.

3 units, alternate years, not given this year

#### **ME 451C. Advanced Fluid Mechanics**

Compressible flow: governing equations, Crocco-Vazsonyi's equations, creation and destruction of vorticity by compressibility effects, shock waves. Modal decomposition of compressible flow, linear and nonlinear modal interactions, interaction of turbulence with shock waves. Energetics of compressible turbulence, effects of compressibility on free-shear flows, turbulent boundary layers, Van Driest transformation, recovery temperature, and shock/boundary layer interaction. Strong Reynolds analogy, modeling compressible turbulent flows. Prerequisites: 355, 361A, or equivalents.

3 units, not given this year

#### **ME 451D. Microhydrodynamics**

(Same as CHEMENG 310) Transport phenomena on small-length scales appropriate to applications in microfluidics, complex fluids, and biology. The basic equations of mass, momentum, and energy, derived for incompressible fluids and simplified to the slow-flow

limit. Topics: solution techniques utilizing expansions of harmonic and Green's functions; singularity solutions; flows involving rigid particles and fluid droplets; applications to suspensions; lubrication theory for flows in confined geometries; slender body theory; and capillarity and wetting. Prerequisites: 120A,B, 300, or equivalents.

3 units, Win (Fuller, G)

#### **ME 453A. Finite Element-Based Modeling and Simulation of Linear Fluid/Structure Interaction Problems**

Basic physics behind many fluid/structure interaction phenomena. Finite element-based computational approaches for linear modeling and simulation in the frequency domain. Vibrations of elastic structures. Linearized equations of small movements of inviscid fluids. Sloshing modes. Hydroelastic vibrations. Acoustic cavity modes. Structural-acoustic vibrations. Applications to liquid containers and underwater signatures. Prerequisite: graduate course in the finite element method or consent of instructor.

3 units, not given this year

#### **ME 453B. Computational Fluid Dynamics Based Modeling of Nonlinear Fluid/Structure Interaction Problems**

Basic physics behind many high-speed flow/structure interaction phenomena. Modern computational approaches for nonlinear modeling and simulation in the time domain. Dynamic equilibrium of restrained and unrestrained elastic structures. Corotational formulation for large structural displacements and rotations. Arbitrary Lagrangian-Eulerian description of inviscid and viscous flows. Time-accurate CFD on moving and deforming grids. Discrete geometric conservation laws. Discretization of transmission conditions on non-matching discrete fluid/structure interfaces. Coupled fluid/mesh-motion/structure time integration schemes. Application to divergence, flutter, and buffeting. Prerequisites: graduate course in the finite element method, and in computational fluid dynamics.

3 units, not given this year

#### **ME 455. Complex Fluids and Non-Newtonian Flows**

(Same as CHEMENG 462) Definition of a complex liquid and microrheology. Division of complex fluids into suspensions, solutions, and melts. Suspensions as colloidal and non-colloidal. Extra stress and relation to the stresslet. Suspension rheology including Brownian and non-Brownian fibers. Microhydrodynamics and the Fokker-Planck equation. Linear viscoelasticity and the weak flow limit. Polymer solutions including single mode (dumbbell) and multimode models. Nonlinear viscoelasticity. Intermolecular effects in nondilute solutions and melts and the concept of reptation. Prerequisites: low Reynolds number hydrodynamics or consent of instructor.

3 units, not given this year

#### **ME 457. Fluid Flow in Microdevices**

Physico-chemical hydrodynamics. Creeping flow, electric double layers, and electrochemical transport such as Nernst-Planck equation; hydrodynamics of solutions of charged and uncharged particles. Device applications include microsystems that perform capillary electrophoresis, drug dispensation, and hybridization assays. Emphasis is on bioanalytical applications where electrophoresis, electro-osmosis, and diffusion are important. Prerequisite: consent of instructor.

3 units, Spr (Santiago, J)

#### **ME 458. Advanced Topics in Electrokinetics**

Electrokinetic theory and electrokinetic separation assays. Electroneutrality approximation and weak electrolyte electrophoresis theory. Capillary zone electrophoresis, field amplified sample stacking, isoelectric focusing, and isotachopheresis. Introduction to general electrohydrodynamics (EHD) theory including the leaky dielectric concept, the Ohmic model formulation, and electrokinetic flow instabilities. Prerequisite: ME 457.

3-5 units, not given this year

#### **ME 461. Advanced Topics in Turbulence**

Turbulence phenomenology; statistical description and the equations governing the mean flow; fluctuations and their energetics; turbulence closure problem, two-equation turbulence models, and second moment closures; non-local effect of pressure; rapid distortion analysis and effect of shear and compression on turbulence; effect of body forces on turbulent flows; buoyancy-generated turbulence; suppression of turbulence by stratification;

turbulent flows of variable density; effect of rotation on homogeneous turbulence; turbulent flows with strong vortices. Prerequisites: 351B and 361A, or consent of instructor.

3 units, Aut (Lele, S)

**ME 463. Advanced Topics in Plasma Science and Engineering**  
Research areas such as plasma diagnostics, plasma transport, waves and instabilities, and engineering applications.

3 units, not given this year

**ME 468. Experimental Research in Advanced User Interfaces**  
(Same as COMM 168, COMM 268, COMM 368) Project-based course involves small (3-4) person teams going through all parts of the experimental process: question generation, experiment design, running, and data analysis. Each team creates an original, publishable project that represents a contribution to the research and practicum literatures. All experiments involve interaction between people and technology, including cars, mobile phones, websites, etc. Prerequisite: consent of instructor.

1-5 units, not given this year

**ME 469. Computational Methods in Fluid Mechanics**

The last two decades have seen the widespread use of Computational Fluid Dynamics (CFD) for analysis and design of thermal-fluids systems in a wide variety of engineering fields. Numerical methods used in CFD have reached a high degree of sophistication and accuracy. The objective of this course is to introduce classical approaches and algorithms used for the numerical simulations of incompressible flows. In addition, some of the more recent developments are described, in particular as they pertain to unstructured meshes and parallel computers. An in-depth analysis of the procedures required to certify numerical codes and results will conclude the course.

3 units, Aut (Iaccarino, G)

**ME 469B. Computational Methods in Fluid Mechanics**

Advanced CFD codes. Geometry modeling, CAD-CFD conversion. Structured and unstructured mesh generation. Solution methods for steady and unsteady incompressible Navier-Stokes equations. Turbulence modeling. Conjugate (solid/fluid) heat transfer problems. Development of customized physical models. Batch execution for parametric studies. Final project involving solution of a problem of student's choosing. Prerequisite: ME 300C/CME 206.

3 units, not given this year

**ME 470. Uncertainty Quantification**

Uncertainty analysis in computational science. Probabilistic data representation, propagation techniques and validation under uncertainty. Mathematical and statistical foundations of random variables and processes for uncertainty modeling. Focus is on state-of-the-art propagation schemes, sampling techniques, and stochastic Galerkin methods. The concept of model validation under uncertainty and the determination of confidence bounds estimates. Prerequisite: basic probability and statistics at the level of CME 106 or equivalent.

3 units, not given this year

**ME 471. Turbulent Combustion**

Basis of turbulent combustion models. Assumption of scale separation between turbulence and combustion, resulting in Reynolds number independence of combustion models. Level-set approach for premixed combustion. Different regimes of premixed turbulent combustion with either kinematic or diffusive flow/chemistry interaction leading to different scaling laws and unified expression for turbulent velocity in both regimes. Models for non-premixed turbulent combustion based on mixture fraction concept. Analytical predictions for flame length of turbulent jets and NO<sub>x</sub> formation. Partially premixed combustion. Analytical scaling for lift-off heights of lifted diffusion.

3 units, Spr (Urzay Lobo, J)

**ME 484. Computational Methods in Cardiovascular Bioengineering**

(Same as BIOE 484) Lumped parameter, one-dimensional nonlinear and linear wave propagation, and three-dimensional modeling techniques applied to simulate blood flow in the cardiovascular system and evaluate the performance of cardiovascular devices. Construction of anatomic models and extraction of physiologic quantities from medical imaging data. Problems in blood flow within the context of disease research,

device design, and surgical planning.

3 units, not given this year

**ME 485. Modeling and Simulation of Human Movement**

(Same as BIOE 485) Direct experience with the computational tools used to create simulations of human movement. Lecture/labs on animation of movement; kinematic models of joints; forward dynamic simulation; computational models of muscles, tendons, and ligaments; creation of models from medical images; control of dynamic simulations; collision detection and contact models. Prerequisite: 281, 331A,B, or equivalent.

3 units, Spr (Delp, S)

**ME 491. Ph.D. Teaching Experience**

Required of Ph.D. students. May be repeated for credit.

3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ME 492. Mechanical Engineering Teaching Assistance Training**

1 unit, Aut (Edwards, C; Gardella, I), Win (Staff), Spr (Staff)

**ME 495. Mechanical Engineering Lecture Series**

This seminar will feature a series of early career mechanical engineers working on leading edge problems in controls, dynamics, fluid mechanics, biomechanics, combustion, and related disciplines. The visitors will come from top universities both within the US and internationally, and will be discussing both their past research and plans for building a research program in the future.

1 unit, Spr (Staff)

**ME 500. Thesis (Ph.D.)**

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ME 801. TGR Project**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ME 802. TGR Dissertation**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## MEDICINE (MED) COURSES

### UNDERGRADUATE COURSES IN MEDICINE

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**MED 1A. Leadership in Multicultural Health**

First of a three-quarter sequence designed for undergraduates serving as staff for the Stanford Medical Youth Science Summer Residential Program (SRP). Structured opportunities for SRP staff to learn, observe, participate in, and evaluate leadership development, multicultural health theories and practices, and social advocacy. Students explore approaches for tracking multicultural health and equity issues, foster relationships with campus and community partners, and learn fundamental skills necessary to implement activities for the biomedical Summer Residential Program.

2 units, Spr (Staff)

**MED 1B. Leadership In Multicultural Health**

Second of a three quarter sequence for undergraduates serving as staff for the Stanford Medical Youth Science Program Summer Residential Program (SRP). Provides experiences in conducting Community Based Participatory Research (CBPR). Utilizes service learning as a pedagogical approach to developing an understanding of the intersections between power and privilege and health disparities, fostering the knowledge and skills to become social advocates to address forms of inequities. Hands-on learning through CBPR; opportunities to conduct community assessments, collect and analyze data, and develop evaluation tools. Prerequisite: MED 1A.

3 units, Aut (Ned, J; Winkleby, M)

**MED 1C. Leadership in Multicultural Health**

Last of a three quarter sequence for students who served as staff for the Stanford Medical Youth Science Program Summer Residential Program (SRP). An individual study service learning course designed to develop understanding of the intersection between power and privilege, and health disparities. Students

submit a written reflective term paper based on their experience as staff for the Summer Residential Program as it relates to service learning and Community Based Participatory Research (CBPR). Prerequisite: MED 1A,B.

*1 unit, Win (Ned, J; Winkleby, M)*

**MED 24SI. Alternative Spring Break: A Veteran's Affair - Issues and Policies Affecting American Veterans**

As we celebrate Veterans Day with storewide sales, our veteran population commemorates years of armed service with mental illness, homelessness, and substance abuse. One of every three homeless persons has served our country in uniform; half of all veterans are mentally ill. Through a combination of academic and service learning, this course addresses the public health and socio-economic status of our veterans and evaluates how current government actions are shaping veterans' rights. Weekly forums with clinicians, policy makers, and economists complement direct discussions with veterans and current Iraqi service men and women. Optional field trips to homeless shelters in the San Francisco area. Prerequisite: Acceptance into the Alternative Spring Break Program.

*1 unit, Win (Staff)*

**MED 27SI. Alternative Spring Break: Healthcare of Underserved Communities in Central California**

Pre-field group directed reading for Alternative Spring Break: Healthcare of Underserved Communities in Central California.

*1 unit, Win (Garcia, G)*

**MED 30SI. Alternative Spring Break: Step Up From the Streets - Helping the Homeless**

The paradox of homelessness in our moderately wealthy society. Explores factors that contribute to homelessness, what the current homeless situation is like in the US, what is being done about homelessness through nonprofit and government work. Promotes a better understanding of the homeless community through connecting with the Night Outreach Program and the Palo Alto Opportunities Center. Student-directed reading prepares students for ASB trip to Washington D.C. Prerequisite: acceptance into SUFTS ASB 2011.

*1 unit, Win (Staff)*

**MED 70Q. Cancer and the Immune System**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Myths and facts surrounding the idea that the immune system is capable of recognizing malignant cells. The biological basis and function of effector arms of the immune system; how these mechanisms may be used to investigate the biological basis and potential therapy of cancer. How the immune system functions.

*3 units, Win (Negrin, R)*

**MED 86Q. Seeing the Heart**

(F,Dial) Stanford Introductory Dialogue. Introduction to biomedical technology, science, clinical medicine, and public policy through cardiovascular imaging. Invasive and noninvasive techniques to detect early stage heart disease and to see inside the heart and blood vessels. Topics include: common forms of heart disease, how they develop, and why they affect so many people; imaging technologies such as ultrasound, CT, MRI, PET, and optical; a cost-effective public screening program. Field trips to Stanford Medical Center imaging centers.

*2 units, Win (McConnell, M)*

**MED 87Q. Women and Aging**

(S,Sem) (Same as HUMBIO 87Q) Stanford Introductory Seminar. Preference to sophomores. Biology, clinical issues, social and health policies of aging; relationships, lifestyles, and sexuality; wise women and grandmothers. Sources include scientific articles, essays, poetry, art, and film. Service-learning experience with older women. Service Learning Course (certified by Haas Center). GER:EC-Gender

*5 units, Spr (Winograd, C)*

**MED 88Q. Dilemmas in Current Medical Practice**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Social, political, scientific, and economic forces influencing medical practice. Spiraling costs, impaired access to health care, and disillusionment toward the health care system. Attempts by government and medical insurers to control costs through managed care and health maintenance organizations. Medical education and how it has affected the practice of medicine. Alternative health

care, preventive medicine, and the doctor-patient relationship. The paradox of health in America: why do so many people who are healthy feel unhealthy? Mandatory observation of instructors in their medical practices.

*3 units, Aut (Croke, J; Jones, E)*

**MED 93Q. The AIDS Epidemic: Biology, Behavior, and Global Responses**

Preference to sophomores. How the discovery of the causative agent and the modes of transmission of HIV fueled a quest for prevention, treatments, and a vaccine. Discoveries in biology, biotechnology, epidemiology, and medicine during the last 20 years. Hypotheses about the origins of HIV as a human disease; the spread of AIDS and HIV; social, political, and economic consequences of the epidemic; and national and global responses.

*3 units, not given this year*

**MED 94Q. Hormones, Health, and Disease**

Preference to sophomores. The role of hormones in maintaining health; how abnormalities in hormones cause disease. Topics include: the pituitary, the master gland; thyroid hormones and metabolism; insulin and diabetes; adrenal steroids and hypertension; vitamin D, parathyroid hormone, and osteoporosis; sex hormones, birth control, pregnancy, and menopause; androgens, erectile dysfunction, and athletic performance; cholesterol, obesity, and cardiovascular risk. Recommended: background in human biology and physiology.

*3 units, alternate years, not given this year*

**MED 108Q. Human Rights and Health**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. History of human-rights law. International conventions and treaties on human rights as background for social and political changes that could improve the health of groups and individuals. Topics such as: regional conflict and health, the health status of refugees and internally displaced persons; child labor; trafficking in women and children; HIV/AIDS; torture; poverty, the environment and health; access to clean water; domestic violence and sexual assault; and international availability of drugs. Possible optional opportunities to observe at community sites where human rights and health are issues. Guest speakers from national and international NGOs including Doctors Without Borders; McMaster University Institute for Peace Studies; UC Berkeley Human Rights Center; Kiva. PowerPoint presentation on topic of choice required.

*3 units, Spr (Laws, A)*

**MED 120Q. Pathophysiology and Clinical Aspects of Diseases of the Heart and Blood Vessels**

Preference to sophomores. Anatomy, physiology, pathology, and clinical aspects that comprise the discipline of cardiovascular medicine. Anatomy and physiology of the heart and blood vessels as an introduction to pathology states such as heart attack, stroke, congestive heart failure, rhythm disturbances of the heart, and sudden cardiac death. Underlying principles of diagnosis and treatment of the disease.

*3 units, not given this year*

**MED 130. YES+Empowerment Course**

Adapted for Residential Education from the national YES+ workshop program, an innovative, dynamic, and fun life skills program which empowers students with tools to eliminate stress, increase energy, handle negative emotions, increase mental focus, heighten awareness, and develop strong social and leadership skills. Students learn a set of powerful breath-based meditation techniques which clear the mind and enhance success in school, work, and interpersonal relationships. See <http://us.yesplus.org/> for further insight into the program. Enrollment limited; priority to residents of Castano Hall; others selected by application.

*1 unit, Aut (Sengupta, D; Molfino, M; Kao, P), Win (Sengupta, D; Kao, P; Molfino, M), Spr (Staff)*

**MED 143A. Patient Health Education in Community Clinics**

(Same as MED 243A) Open to undergraduate, graduate, and medical students. Principles of health education, theories of behavior change, methods for risk reduction. Presentations of health education modules, focusing on topics prevalent among underserved populations. Students apply theoretical frameworks to health education activities in the Cardinal Free Clinics. Pre- or corequisite: MED 157. Application required. Contact [evelynh@stanford.edu](mailto:evelynh@stanford.edu)

2 units, Aut (Martin, M; Osterberg, L)

**MED 143B. Patient Health Education in Community Clinics - Practicum**

(Same as MED 243B) Open to undergraduate, graduate, and medical students. For students who have completed MED 143A/243A and currently volunteer in one of the course-affiliated clinic sites. Objective is to expand health education skills, discuss more complex health education topics, and reflect upon experiences in the clinic. Prerequisite: successful completion of MED 143A/243A.

2 units, Win (Martin, M; Osterberg, L)

**MED 143C. Patient Health Education in Community Clinics - Practicum**

(Same as MED 243C) Open to undergraduate, graduate, and medical students. For students currently volunteering in one of the course-affiliated clinic sites. Students apply health education skills, discuss more complex health education topics, and reflect upon experiences in the clinic. Pre-requisites: MED 143A/243A, Med 143B/243B.

2 units, Spr (Staff)

**MED 147. Methods in Community Assessment, Evaluation, and Research**

(Same as MED 247) Development of pragmatic skills for design, implementation, and analysis of structured interviews, focus groups, survey questionnaires, and field observations. Topics include: principles of community-based participatory research, including importance of dissemination; strengths and limitations of different study designs; validity and reliability; construction of interview and focus group questions; techniques for moderating focus groups; content analysis of qualitative data; survey questionnaire design; and interpretation of commonly-used statistical analyses.

3 units, Spr (Staff)

**MED 149. Medical Interpreting: Skills and Etiquette**

(Same as MED 249) Open to medical students, graduate students, and undergraduates. The skills and etiquette of medical interpreting from a crosscultural perspective. All students are required to volunteer at the Pacific or Arbor Free Clinic. Completion qualifies students to become volunteer interpreters at the Pacific or Arbor Free Clinic. Service Learning Course (certified by Haas Center). Prerequisite: fluency in a language other than English.

1 unit, Aut (Pompei, P; Osterberg, L; Londono Tobon, A), Spr (Staff)

**MED 157. Foundations for Community Health Engagement**

Open to undergraduate, graduate, and MD students. Examination and exploration of community health principles and their application at the local level. Designed to prepare students to make substantive contributions in a variety of community health settings (e.g. clinics, government agencies, non-profit organization, advocacy groups). Topics include community health assessment; health disparities; health promotion and disease prevention; strategies for working with diverse, low-income, and underserved populations; and principles of ethical and effective community engagement.

3 units, Aut (Garcia, G; Heaney, C)

**MED 160. Physician Shadowing: Stanford Immersion in Medicine Series (SIMS)**

Undergraduates are paired with a physician mentor at Stanford Hospital and Clinics, Lucile Packard Children's Hospital, or the Veteran's Administration Hospital. May be repeated for credit. Prerequisite: Application and acceptance to the SIMS program.

1 unit, Aut (Gesundheit, N; Lewis, P; Williams, R), Win (Gesundheit, N; Lewis, P; Williams, R), Spr (Staff)

**MED 199. Undergraduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**GRADUATE COURSES IN MEDICINE**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**MED 201. Internal Medicine: Body as Text**

Body as Text refers to the idea that every patient's body tells a story. The narrative includes the past and present of a person's social and medical condition; it is a demonstration of the phenotype. The art of reading the body as text was at its peak in the first half of the 20th century, but as technology has become ascendant, bedside skills and the ability to read the text have faded. Beyond scientific knowledge and medical facts, it is this often forgotten craft which is at the heart of the excitement of being an internist. This course introduces students to the art of the clinical exam, to developing a clinical eye, and learning to see the body in a completely different way.

1 unit, Aut (Verghese, A; Shah, A; Kita, R)

**MED 202. Alternative Spring Break: Rural and American Indian Health Disparities**

Open to MD, graduate, and undergraduate students. Classroom preparation followed by a one week spring break service learning experience on a reservation in South Dakota. Introduces students to the challenges and promise of Native American and rural health care, and the role of communities as leaders and problem solvers. Includes lectures, discussion and readings pertaining to Native American culture, current research in Native American health, and the methods and practice of community based participatory research. Culminates in formulation of a plan for communicating with and engaging community partners in South Dakota: Indian Health Services, Habitat for Humanity, Porcupine Clinic, Teach for America, and Sinte Gleska University.

3 units, Win (Garcia, G; Morrison, S)

**MED 203. Stanford - Papua New Guinea Medical Project**

Discussion group focused on ethnography and global health education opportunities in rural settings of Papua New Guinea. Students who have or are interested in working in Papua New Guinea to expand health education are invited to participate. Topics include empowerment of clients to stay healthy through intelligent nutrition and exercise, and through safe sexual practices.

1 unit, Spr (Staff)

**MED 204. Access and Delivery of Essential Medicines to Poor and Underserved Communities**

Student initiated lecture series. Guest speakers. Topics include: neglected diseases, underserved and impoverished markets, disease profiles of lower and middle income countries, pricing and distribution of biomedical end products, intellectual property in medicine and its effect on delivery of healthcare.

1 unit, Aut (Vogel, L; Barry, M)

**MED 206. Meta-research: Appraising Research Findings, Bias, and Meta-analysis**

(Same as HRP 206, STATS 211) Open to graduate, medical, and undergraduate students. Appraisal of the quality and credibility of research findings; evaluation of sources of bias. Meta-analysis as a quantitative (statistical) method for combining results of independent studies. Examples from medicine, epidemiology, genomics, ecology, social/behavioral sciences, education. Collaborative analyses. Project involving generation of a meta-research project or reworking and evaluation of an existing published meta-analysis. Prerequisite: knowledge of basic statistics.

3 units, Win (Olkin, I; Ioannidis, J)

**MED 207. History of Medicine**

Weekly lectures that trace the development of Western medical tradition from Babylonian, Egyptian, and Greek ancient cultures to the present.

1 unit, Win (Camargo, C)

**MED 217. Technological Frontiers in Digestive Diseases**

Focused on introducing engineering, bioengineering, and physical sciences students to technologies used in the clinical setting. Topics include: endoscopes to detect and remove cancer; minimally invasive surgery to treat obesity; measurements of propulsion through the intestine; and technologies to detect and stop internal bleeding. Observations in the clinical setting; visits to laboratories engaged in the development of new technologies.

1 unit, Spr (Friedland, S)

**MED 223. Cardiovascular and Pulmonary Sciences Seminar**

Weekly modified journal club primarily for CVP Scholarly

Application students, Cardiovascular Institute graduate students, clinical and research fellows, and faculty. Open to other graduate students and medical students (Advanced undergraduate students with permission of instructor). Each meeting begins with an overview of a particular area by a faculty member, followed by presentation of a seminal paper in that area by a postdoctoral fellow or a graduate student. Discussion follows the presentation, after which the faculty moderator meets separately with the medical students for further questions and discussion.

2 units, Aut (Cooke, J; Rabinovitch, M; Rockson, S; Tsao, P), Win (Cooke, J; Rabinovitch, M; Rockson, S; Tsao, P), Spr (Staff)

#### **MED 227. Bedside Ultrasound**

For pre-clinical or clinical medical students, and others with permission. Introduces students to diagnostic ultrasound at the bedside. The normal anatomy of the heart, abdomen, and pelvis pertinent to ultrasound is taught. Some pathology involving these areas is also introduced. As the students' proficiency increases, those electing to can visit the Pacific Free Clinic to be introduced to scanning patients. 1 unit for class attendance only; 2 units for class attendance and participation in the Pacific Free Clinic.

1-2 units, Aut (Kao, P; Thompson, N; Tran, P), Win (Kao, P; Thompson, N; Tran, P), Spr (Staff)

#### **MED 228. Physicians and Social Responsibility**

Social and political context of the roles of physicians and health professionals in social change; policy, advocacy, and shaping public attitudes. How physicians have influenced governmental policy on nuclear arms proliferation; environmental health concerns; physicians in government; activism through research; the effects of poverty on health; homelessness; and gun violence. Guest speakers from national and international NGOs.

1 unit, Aut (Laws, A; Vilendrer, S)

#### **MED 230. Rethinking Global Health**

(Same as HRP 240) Challenges for those seeking to improve global health include contending with: a dynamic balance between infectious and chronic non-communicable disease that differs across and within countries; issues relating to the proximate and more removed causes of disease and illness, including nutrition, infrastructure, governance, economic development, and environmental changes; diverse proposed responses with arguments for particular courses of action appealing to cost-effectiveness, egalitarian, and rights-based principles. The course goal is to begin to make sense of these challenging issues, requiring data and evidence derived via multiple methodologies, critical thinking, and sound reasoning. Prerequisite: a course dealing with global health, such as HUMBIO 129S, or consent of instructor.

3 units, Spr (Staff)

#### **MED 231. Measuring Global Health**

(Same as HRP 241) Open to MD, graduate, and undergraduate students. Assessing the global burden of disease, its distribution among and within countries, its causes, and appropriate interventions requires rigorous quantitative approaches. This course develops skills in these areas by critically examining questions like: How do we know who is sick and where? How are risk factors incorporated into our projections of future disease trends? How do we combine mortality and morbidity in a meaningful way? What works for improving health efficiently? Workshops build familiarity with relevant data and their analysis. Prerequisite: Course in statistics, biostatistics, econometrics, or equivalent.

4 units, Spr (Bendavid, E; Goldhaber-Fiebert, J)

#### **MED 240. Sex Differences in Human Physiology and Disease**

(Same as OBGYN 240, HUMBIO 140) Chromosomal and hormonal influences on cells, tissues, and organs that underlie the development of reproductive organs and sexual dimorphism of the neuroendocrine system. Effects of endogenous and exogenous sex hormones and environmental factors that differ between men and women on the musculoskeletal, neurological, cardiovascular, and immunological systems over the lifecourse, from conception to puberty, through reproductive phases (including changes during the menstrual cycle up to and beyond menopause in women and with aging in men). Transgender health issues. Guest lecturers. Prerequisite: Human Biology core or equivalent, or consent of instructor

2-3 units, Win (Stefanick, M)

#### **MED 241. Context and Practice of Health Care in Free Clinics**

Preparation for working in free clinics, awareness of health care context and health disparities among underinsured patients, and introduction to key skills for patient care. Topics include: patient history, screening tests, health insurance, cultural sensitivity, role of interpreters, and tuberculosis testing. Meets at either Arbor or Pacific free clinic to increase familiarity with free clinic operations and environment. Integrates with concurrent Practice of Medicine course.

1 unit, not given this year

#### **MED 242. Physicians and Human Rights**

Weekly lectures on how human rights violations affect health. Topics include: regional conflict and health, the health status of refugees and internally displaced persons; child labor; trafficking in women and children; HIV/AIDS; torture; poverty, the environment and health; access to clean water; domestic violence and sexual assault; and international availability of drugs. Guest speakers from national and international NGOs including Doctors Without Borders; McMaster University Institute for Peace Studies; UC Berkeley Human Rights Center; Kiva.

1 unit, Win (Laws, A; Anand, P)

#### **MED 243A. Patient Health Education in Community Clinics**

(Same as MED 143A) Open to undergraduate, graduate, and medical students. Principles of health education, theories of behavior change, methods for risk reduction. Presentations of health education modules, focusing on topics prevalent among underserved populations. Students apply theoretical frameworks to health education activities in the Cardinal Free Clinics. Pre- or corequisite: MED 157. Application required. Contact evelynh@stanford.edu

2 units, Aut (Martin, M; Osterberg, L)

#### **MED 243B. Patient Health Education in Community Clinics - Practicum**

(Same as MED 143B) Open to undergraduate, graduate, and medical students. For students who have completed MED 143A/243A and currently volunteer in one of the course-affiliated clinic sites. Objective is to expand health education skills, discuss more complex health education topics, and reflect upon experiences in the clinic. Prerequisite: successful completion of MED 143A/243A.

2 units, Win (Martin, M; Osterberg, L)

#### **MED 243C. Patient Health Education in Community Clinics - Practicum**

(Same as MED 143C) Open to undergraduate, graduate, and medical students. For students currently volunteering in one of the course-affiliated clinic sites. Students apply health education skills, discuss more complex health education topics, and reflect upon experiences in the clinic. Pre-requisites: MED 143A/243A, MED 143B/243B.

2 units, Spr (Staff)

#### **MED 246. The Medical Interview for Spanish Speakers**

Student led forum for practicing and learning medical Spanish related specifically to the medical interview. Prepares clinical students to interact more effectively with Spanish speaking patients in clinics. Classes are topical; each class includes a demonstration, medical vocabulary practice, and conversational practice on the topic of the day.

1 unit, Aut (Garcia, G; Londono Tobon, A), Win (Garcia, G; Londono Tobon, A), Spr (Staff)

#### **MED 247. Methods in Community Assessment, Evaluation, and Research**

(Same as MED 147) Development of pragmatic skills for design, implementation, and analysis of structured interviews, focus groups, survey questionnaires, and field observations. Topics include: principles of community-based participatory research, including importance of dissemination; strengths and limitations of different study designs; validity and reliability; construction of interview and focus group questions; techniques for moderating focus groups; content analysis of qualitative data; survey questionnaire design; and interpretation of commonly-used statistical analyses.

3 units, Spr (Staff)

**MED 248. Student Rounds**

Teams of preclinical students meet weekly with a clinical student to hear the history and physical of a recent case the clinical student encountered on the wards. Following the presentation, the preclinical students work together under the guidance of the clinical student to develop a problem list and plan, which are then compared with the problem list, plan, and orders made by the actual admitting team. In the course of presenting the cases, the clinical student describes personal experiences and practical components of ward work and daily clinical routine.

*1 unit, Aut (Kenny, K), Win (Kenny, K), Spr (Kenny, K), Sum (Kenny, K)*

**MED 249. Medical Interpreting: Skills and Etiquette**

(Same as MED 149) Open to medical students, graduate students, and undergraduates. The skills and etiquette of medical interpreting from a crosscultural perspective. All students are required to volunteer at the Pacific or Arbor Free Clinic. Completion qualifies students to become volunteer interpreters at the Pacific or Arbor Free Clinic. Service Learning Course (certified by Haas Center). Prerequisite: fluency in a language other than English.

*1 unit, Aut (Pompei, P; Osterberg, L; Londono Tobon, A), Spr (Staff)*

**MED 253. The Impact of Multinationals Upon Global Health**

(Same as GSBGEN 553) Open to medical, graduate, and undergraduate students. The role of global industries and multinational organizations in shaping the health of individuals around the globe. Explores the salient debates on the impact of industries such as food, tobacco, and aluminum; the role of global health initiatives and foreign aid industries they spawned; how the changing landscape of human health and disease is affected by these industries; historical legacies and future prospects. Illustrative cases and lectures with a distinguished roster of guest speakers including: Sir Richard Feachem, former director of the Global Fund to Fight AIDS, Tuberculosis and Malaria, on the link between the aid industry and health; FDA commissioner David Kessler on the tobacco industry evasion and its impact on health; Mark Cullen, Stanford Professor of Medicine, on Alcoa's aluminum multinational taking on a health mission; Derek Yach, Director of Global Health at Pepsico on how Pepsi and the

*2 units, not given this year*

**MED 255. The Responsible Conduct of Research**

Forum. How to identify and approach ethical dilemmas that commonly arise in biomedical research. Issues in the practice of research such as in publication and interpretation of data, and issues raised by academic/industry ties. Contemporary debates at the interface of biomedical science and society regarding research on stem cells, bioweapons, genetic testing, human subjects, and vertebrate animals. Completion fulfills NIH/ADAMHA requirement for instruction in the ethical conduct of research. Prerequisite: research experience recommended.

*1 unit, Aut (Karkazis, K), Win (Karkazis, K), Spr (Staff)*

**MED 255C. The Responsible Conduct of Research for Clinical Researchers**

Engages clinical researchers in discussions about ethical issues commonly encountered during their clinical research careers and addresses contemporary debates at the interface of biomedical science and society. Graduate students required to take RCR who are or will be conducting clinical research are encouraged to enroll in this version of the course. Prerequisite: research experience recommended.

*1 unit, Aut (Karkazis, K), Spr (Staff)*

**MED 256. Global HIV/AIDS**

(Same as HUMBIO 156) Public health, policy, and research issues. Identify resources at Stanford, and from government, NGOs, and pharmaceutical, advocacy, and international organizations. Sources include biomedical, social, and behavioral sciences. Emphasis on student projects which feature methodologies in the development and design of Operational Research and Implementation Science in AIDS/TB and Malaria in response to PEPFAR and Global Fund programs. Guest lectures. Prerequisite: Human Biology core or equivalent, or consent of instructor.

*3 units, Aut (Katzenstein, D)*

**MED 257A. Community Health Advocacy**

A three quarter service-learning practicum designed to provide students with concrete skills for working in community-based clinics and to broaden and deepen their understanding of the context of this work and the populations being served. The social role of physicians is a central theme. Students must make a commitment to weekly shifts in one of the course-affiliated clinic sites throughout the academic year and must take responsibility for integrating clinic and classroom experiences. Full participation in the classroom is required; students must come to class prepared to reflect on clinic shifts and to practice skills through role-playing and other exercises. Pre-or co-requisite: MED 157; application required prior to start of autumn quarter. Contact cburks@stanford.edu. Service Learning Course (certified by Haas Center).

*2 units, Aut (Garcia, G; Banchoff, A)*

**MED 257B. Community Health Advocacy**

Second quarter of a three quarter service-learning practicum designed to provide students with concrete skills for working in community-based clinics and to broaden and deepen their understanding of the context of this work and the populations being served. The social role of physicians is a central theme. Students must make a commitment to weekly shifts in one of the course-affiliated clinic sites throughout the academic year and must take responsibility for integrating clinic and classroom experiences. Full participation in the classroom is required; students must come to class prepared to reflect on clinic shifts and to practice skills through role-playing and other exercises. Students who complete a clinic-identified service project are required to enroll for 4 units. Prerequisites: MED 257A, and instructor approval. Service Learning Course (certified by Haas Center).

*3-4 units, Win (Garcia, G)*

**MED 257C. Community Health Advocacy**

Third quarter of a three quarter service-learning practicum designed to provide students with concrete skills for working in community-based clinics and to broaden and deepen their understanding of the context of this work and the populations being served. The social role of physicians is a central theme. Students must make a commitment to weekly shifts in one of the course-affiliated clinic sites throughout the academic year and must take responsibility for integrating clinic and classroom experiences. Full participation in the classroom is required; students must come to class prepared to reflect on clinic shifts and to practice skills through role-playing and other exercises. Students who complete a clinic-identified service project are required to enroll for 4 units. Prerequisites: MED 257A,B and instructor approval. Service Learning Course (certified by Haas Center).

*3-4 units, Spr (Staff)*

**MED 258A. Advanced Community Health Advocacy**

A three quarter course for students who have completed at least one full year in the Community Health Advocacy Program (MED 257A,B,C); designed to augment the individual- and systems-level advocacy skills developed in the MED 257 series, with a focus on policy and media advocacy. The course also provides a forum for leadership development and continued growth in the clinic-based community advocate role. Students are expected to assist in the training and mentoring of MED 257 students at partner sites, and to act as a liaison between the clinic partner and the course directors. Equal dedication to both advocacy skills development and program leadership role fulfillment is expected. Class time includes guest speakers, discussions on current events related to community health, case studies of clinical experiences, and coordinator check-ins. Service Learning Course (certified by Haas Center). Unit value based on extent of clinic participation. Prerequisite: MED 257A,B,C.

*2-3 units, Aut (Garcia, G; Banchoff, A)*

**MED 258B. Advanced Community Health Advocacy**

Second quarter of a three quarter course for students who have completed at least one full year in the Community Health Advocacy Program (MED 257A,B,C); designed to augment the individual- and systems-level advocacy skills developed in the MED 257 series, with a focus on policy and media advocacy. The course also provides a forum for leadership development and continued growth in the clinic-based community advocate role. Students are expected to assist in the training and mentoring of

MED 257 students at partner sites, and to act as a liaison between the clinic partner and the course directors. Equal dedication to both advocacy skills development and program leadership role fulfillment is expected. Class time includes guest speakers, discussions on current events related to community health, case studies of clinical experiences, and coordinator check-ins. Service Learning Course (certified by Haas Center). Unit value based on extent of clinic participation. Prerequisite: MED 257A,B,C;  
2-3 units, Win (Garcia, G)

#### **MED 258C. Advanced Community Health Advocacy**

Third quarter of a three quarter course for students who have completed at least one full year in the Community Health Advocacy Program (MED 257A,B,C); designed to augment the individual- and systems-level advocacy skills developed in the MED 257 series, with a focus on policy and media advocacy. The course also provides a forum for leadership development and continued growth in the clinic-based community advocate role. Students are expected to assist in the training and mentoring of MED 257 students at partner sites, and to act as a liaison between the clinic partner and the course directors. Equal dedication to both advocacy skills development and program leadership role fulfillment is expected. Class time includes guest speakers, discussions on current events related to community health, case studies of clinical experiences, and coordinator check-ins. Service Learning Course (certified by Haas Center). Unit value based on extent of clinic participation. Prerequisite: MED 257A,B,C;  
2-3 units, Spr (Staff)

#### **MED 259. Oaxacan Health on Both Sides of the Border**

Required for students participating in the Community Health in Oaxaca summer program. Introduction to the health literacy and health-seeking behaviors of Oaxacan and other Mexican migrants; the health challenges these groups face. Through discussion and reflection, students prepare for clinical work and community engagement in Oaxaca, while also gaining knowledge and insight to make connections between their experiences in Mexico and their health-related work with Mexican immigrants in the Bay Area. Service Learning Course (certified by Haas Center). Prerequisite: application and acceptance into the Community Health in Oaxaca Summer Program (<http://och.stanford.edu/oaxaca.html>).  
2 units, Spr (Staff)

#### **MED 260. HIV: The Virus, the Disease, the Research**

(Same as IMMUNOL 260) Open to medical students, graduate students in biological sciences, undergraduates with strong biological background. Topics: immunopathogenesis immune deficits, opportunistic infections including TB, and malignancies; genomics viral genetic analyses that have traced the origin of HIV-1 and HIV-2 to primates, dated the spread of infection in humans, and characterized the evolution of the virus within infected individuals; antiretroviral drug development identification of drug targets, structure-based drug design, overcoming drug resistance, pivotal clinical trials, and role of community activism; clinical management solutions in high- and low-income countries; vaccine development learning from past failures and the future of engineering the human immune response. 4 units includes a final project assigned in consultation with the instructor to fit the individual student's background and area of HIV interest.  
3-4 units, Spr (Staff)

#### **MED 262. Economics of Health Improvement in Developing Countries**

(Same as ECON 127) Application of economic paradigms and empirical methods to health improvement in developing countries. Emphasis is on unifying analytic frameworks and evaluation of empirical evidence. How economic views differ from public health, medicine, and epidemiology; analytic paradigms for health and population change; the demand for health; the role of health in international development. Prerequisites: ECON 50 and 102B.  
5 units, Win (Miller, N)

#### **MED 263. Advanced Decision Science Methods and Modeling in Health**

(Same as HRP 263) Advanced methods currently used in published model-based cost-effectiveness analyses in medicine and public health, both theory and technical applications. Topics include: Markov and microsimulation models, model calibration and evaluation, and probabilistic sensitivity analyses. Prerequisites: a course in probability, a course in statistics or biostatistics, a course

on cost-effectiveness such as HRP 392, a course in economics, and familiarity with decision modeling software such as TreeAge.

3 units, Spr (Staff)

#### **MED 271. Global Biodesign: Medical Technology in an International Context**

(Same as BIOE 371) (Same as OIT 587) Seminar examines the development and commercialization of medical technologies in the global setting focusing primarily on Europe, India and China. Faculty and guest speakers from industry and government discuss the status of the industry, as well as opportunities in and challenges to medical technology innovation unique to each geography. Topics related to development of technologies for bottom of the pyramid markets are also addressed. Students enrolling for 2 units are required to write and deliver a final paper. Application may be required due to high demand.

1-2 units, Spr (Doshi, R; Shen, C; Yock, P; Pietzsch, J)

#### **MED 272A. Biodesign Innovation: Needs Finding and Concept Creation**

(Same as BIOE 374A, ME 368A) (Same as OIT 384) Two quarter sequence. Inventing new medical devices and instrumentation, including: methods of validating medical needs; techniques for analyzing intellectual property; basics of regulatory (FDA) and reimbursement planning; brainstorming and early prototyping. Guest lecturers and practical demonstrations.

4 units, Win (Yock, P; Zenios, S; Milroy, J; Brinton, T)

#### **MED 272B. Biodesign Innovation: Concept Development and Implementation**

(Same as BIOE 374B, ME 368B) (Same as OIT 385) Two quarter sequence. How to take a medical device invention forward from early concept to technology translation and development. Topics include prototyping; patent strategies; advanced planning for reimbursement and FDA approval; choosing translation route (licensing versus start-up); ethical issues including conflict of interest; fundraising approaches and cash requirements; essentials of writing a business or research plan; strategies for assembling a development team. Prerequisite: MED 272A, ME368A, OIT 384 or BIOE 374A.

4 units, Spr (Yock, P; Zenios, S; Milroy, J; Brinton, T)

#### **MED 274. Design for Service Innovation**

(Same as HRP 274) (Same as OIT 344) Open to graduate students from all schools and departments. An experiential course in which students work in multidisciplinary teams to design new services (including, but not limited to, web services) to address the needs of an underserved population of users. Students learn to identify the key needs of the target population and to design services to address these needs. Projects in 2012 will focus on services for young adult survivors of severe childhood diseases such as cystic fibrosis, rheumatoid arthritis, major cardiac repairs, organ transplants, genetic metabolic disorders, and cancer. The first wave of survivors is reaching young adulthood (ages 18-25). Many aspects of the young adult world are not yet user-friendly for them: applying to and entering college, adherence to required medication and diet, prospects for marriage and parenthood, participation in sports, driving, drinking, drugs, and more. The aspiration is to develop services to improve these young

4 units, Spr (Staff)

#### **MED 275. Introduction to Biopharmaceutical Innovation**

Open to all students. Biotechnology and the pharmaceutical industry. Topics include the biopharmaceutical industry, historical trends and experiences; research and development; intellectual property; drug approval: regulatory issues and agencies; business development; marketing; manufacturing; capital structure and financing; careers in biopharmaceutical industry. 2-unit option, lectures and weekly assignments, MED or S/NC grading only. 3-unit option, including a group project and final presentation, may be taken for a letter grade. May be repeated for credit.

2-3 units, Win (Gardner, P)

#### **MED 276. Careers in Medical Technology**

Career tracks in biomedical technology for medical, life science, engineering, business, and law students of all levels. Industry professionals describe career tracks, current roles, and industry perspectives. 2-unit option, lectures and weekly assignments, MED or S/NC grading only. 3-unit option, including a group project and final presentation, may be taken for a letter grade. May be repeated

for credit.

2-3 units, *Spr (Gardner, P)*

### **MED 282. Early Clinical Experience at the Cardinal Free Clinics**

Students provide health care in a student-run clinic for the homeless and uninsured. Student volunteers are guided in the practice of medical interviews, history-taking and physical examinations as appropriate. Clinical students and attending physicians provide support and guidance as the team arrives at a diagnosis and management plan. One unit for students who volunteer a minimum of twice a month. Two units of credit for Steering Committee members or students whose volunteer commitment is greater than twice a month.

1-2 units, *Aut (Osterberg, L), Win (Martin, M; Osterberg, L), Spr (Martin, M; Osterberg, L), Sum (Martin, M; Osterberg, L)*

### **MED 289. Introduction to Bioengineering Research**

(Same as BIOE 390) Preference to medical and bioengineering graduate students with first preference given to Bioengineering Scholarly Concentration medical students. Bioengineering is an interdisciplinary field that leverages the disciplines of biology, medicine, and engineering to understand living systems, and engineer biological systems and improve engineering designs and human and environmental health. Students and faculty will make presentations during the course. Students will be expected to make presentations, complete a short paper, read selected articles, and take quizzes on the material.

1-2 units, *Aut (Gold, G; Wang, P)*

### **MED 295. Advanced Cardiac Life Support**

(For clinical MD students only) Prepares students to manage the victim of a cardiac arrest. Knowledge and skills necessary for resuscitation of critically-ill patients. Clinical scenarios and small group discussions address cardiovascular pharmacology, arrhythmia recognition and therapy, acute coronary syndrome including myocardial infarction, ventricular dysrhythmias and defibrillation, and acute ischemic stroke. Requires pre-course preparation and an intensive two-day session on a Friday and Saturday. Students should get the approval of their Clerkship Coordinator before registering for the course. Recommended prerequisites: Medicine 300A, Pediatrics 300A, or Surgery 300A.

2 units, *Aut (Giacomini, J), Win (Giacomini, J), Spr (Giacomini, J)*

### **MED 299. Directed Reading in Medicine**

Prerequisite: consent of instructor.

1-18 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **MED 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **MED 399. Graduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## **MEDICINE INTERDISCIPLINARY (INDE) COURSES**

### **GRADUATE COURSES IN MEDICINE INTERDISCIPLINARY**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **INDE 200. The Future of Academic Medicine**

Required for first-year MSTP students; limited to MSTP. Presentations of research directions and opportunities by chairs of basic science, clinical departments, and PhD programs. Prerequisite: instructor consent.

1 unit, *Aut (Kim, S; Utz, P), Win (Kim, S; Utz, P)*

#### **INDE 201. Practice of Medicine I**

Six quarter series extending throughout the first two years of the

MD program, interweaving core skills training in medical interviewing and the physical examination with other major threads addressing the context of medical practice: information literacy, nutrition principles, clinical epidemiology and biostatistics, evidence-based practice, psychiatry, biomedical ethics, health policy, population health. Core clinical skills are acquired through hands-on practice, and evaluated through an extensive program of simulated medical encounters, in which students interview, examine, and manage patients in a mock clinic. The information literacy thread introduces students to informatics and knowledge management, biomedical informatics, and evidence-based medicine searching. Nutrition principles are acquired through interactive, web-based instruction, and reinforced through problem-based learning cases, which run in parallel to the basic science components over the first year. In epidemiology

11 units, *Aut (Basaviah, P)*

#### **INDE 202. Practice of Medicine II**

Medical interview and physical examination skills, information literacy, nutrition principles, evidence-based practice, health policy, and population health are covered. At the end of this quarter, students participate in a performance-based assessment of their medical interview and physical examination skills. See INDE 201 for a complete description of the Practice of Medicine course series.

8 units, *Win (Basaviah, P)*

#### **INDE 203. Practice of Medicine III**

Medical interview and physical examination skills, biomedical literature retrieval and appraisal, nutrition principles, evidence-based practice, biomedical ethics, and population health are covered. Students begin clinical problem-solving sessions to learn the approach to common and important clinical problems. Cases integrate other course themes of population health, evidence-based practice, clinical ethics, nutrition, health policy, and behavioral medicine. Students begin transition from comprehensive to problem-focused patient encounters. Students also gain exposure to geriatrics, pediatrics, and interprofessional healthcare teams, and practice mental health interview skills. At the end of this quarter, students participate in a performance-based assessment of their medical interview and physical examination skills. See INDE 201 for a complete description of the Practice of Medicine course series.

8 units, *Spr (Staff)*

#### **INDE 204. Practice of Medicine IV**

In second-year POM, there are two major educational categories: clinical reasoning and clinical exam skills. These two components are taught within five curricular components that include Clinical Reasoning teaching rounds and small group, Clinical Practicum, Clinical Procedures / Introduction to the Management of the Ill Patient simulation (IMIP), Advanced Clinical Skills, and Psychiatry. Within Clinical Reasoning sessions, students analyze case vignettes that integrate course themes described above with clinical medicine scenarios. Within Practicum, students spend alternate one-half day(s) per week in a clinical setting with a supervising faculty member, practicing medical interview and physical examination skills. Advanced Clinical Skills sessions provide hands-on practice working with faculty and patients on particular clinical themes that correlate with the basic science curriculum as well as the clinical curriculum. Specialists often co-teach these sessions, providing a focused

*8 units, Win (Basaviah, P)*

**INDE 206. Practice of Medicine VI**

Prep for the Clerkships is a month-long curriculum focused on preparing students with skills, knowledge, and approaches directly applicable to their upcoming clinical rotations. The experience provides hands-on workshops, simulated sessions, patient encounters, small group sessions, and a few large group sessions comprising a capstone for the two-year longitudinal curriculum in POM. In general, the individual sessions are tied to clinically relevant themes, including: procedural skills (cadaver lab, EMED); clinical skills (Master Clinician session, bedside rounds, advanced presentations, patient safety, abuse and reporting responsibilities with survivor panel); clinical specialty sessions (dermatology, palliative medicine, ophthalmology); clinical essentials (EKG, interventional radiology, fluid and electrolytes, electronic medical records); and professionalism (Everyday Professionalism session, ethics sessions).

*9 units, Spr (Staff)*

**INDE 207A. Medical Mandarin I: Beginning**

Develops essential medical vocabularies and conversational communication skills. Teaches the pinyin pronunciation system, which provides an accessible method of learning basic phrases. The foundations of taking a comprehensive patient history in Mandarin and doing medical interviews at individual hospital divisions, including making introductions, soliciting symptoms, explaining health concepts (e.g. diseases and prescriptions). Main goals are to improve rapport with Chinese patients through Mandarin fluency in the medical setting and to promote understanding of Chinese culture in the context of health care. Students registering for 3 units participate in clinic visits and field activities.

*2-3 units, Aut (Wang, X; So, S)*

**INDE 207B. Medical Mandarin II: Intermediate**

For students who already have a basic command of spoken Chinese. Conversational communication skills practiced in a more advanced setting, including more sophisticated assessment of patient history and cultural components that influence diseases found in Chinese-speaking patients. Builds working vocabulary for organ system disease processes to conduct a full physical exam, and to describe treatment modalities for Chinese-speaking patients (diagnostic and therapeutic). Students registering for 3 units participate in clinic visits and field activities. Prerequisite: one quarter of college-level Chinese or instructor assessment of fluency.

*2-3 units, Aut (Wang, X; So, S)*

**INDE 207C. Medical Mandarin III: Advanced**

Access advanced professional medical vocabulary, conduct medical research, and engage in discussions in Chinese. Aims at a proficiency level of medical interpreting or doing other independent work in Chinese. Students are also assisted in doing a project or projects related to a specific field of medicine. 3 units Includes clinic visits and field activities. Prerequisite: completion of Medical Mandarin II, or advanced Chinese proficiency.

*2-3 units, Aut (Wang, X; So, S)*

**INDE 207D. Mandarin for Medical Professionals I**

Designed for students who have completed Advanced Medical Mandarin and want to seek further professional development with respect to medical Mandarin. Coursework includes selected research and projects, clinic visits and field activities, via Mandarin. Students choose to enroll for 2 units or 3 units depending upon an agreed upon workload approved by the instructor. Prerequisite: completion of Advanced Medical Mandarin, INDE 209C.

*2-3 units, Aut (Wang, X; So, S)*

**INDE 208A. Medical Mandarin I: Beginning**

Continuation of 207A. See description for 207A. Students participating in classroom and online instruction only register for 2 units. Students registering for 3 units participate in clinic visits and field activities as well.

*2-3 units, Win (Wang, C; So, S)*

**INDE 208B. Medical Mandarin II: Intermediate**

Continuation of 207B. See description for 207B. Students

participating in classroom and online instruction only register for 2 units. Students registering for 3 units participate in clinic visits and field activities as well.

*2-3 units, Win (Wang, C; So, S)*

**INDE 208C. Medical Mandarin III: Advanced**

Access advanced professional medical vocabulary, conduct medical research, and engage in discussions in Chinese. Aims at a proficiency level of medical interpreting or doing other independent work in Chinese. Students are also assisted in doing a project or projects related to a specific field of medicine. 3 units Includes clinic visits and field activities. Prerequisite: completion of 207C, or advanced Chinese proficiency.

*2-3 units, Win (Wang, C; So, S)*

**INDE 208D. Mandarin for Medical Professionals II**

Continuation of INDE 207D. Designed for students who have completed Advanced Medical Mandarin and want to seek further professional development with respect to medical Mandarin. Coursework includes selected research and projects, clinic visits and field activities, via Mandarin. Students choose to enroll for 2 units or 3 units depending upon an agreed upon workload approved by the instructor. Prerequisite: INDE 207D.

*2-3 units, Win (Wang, C; So, S)*

**INDE 209A. Medical Mandarin III: Beginning**

Continuation of 207A/208A. See description for 207A. Students participating only in classroom and online instruction register for 2 units. Students registering for 3 units participate in clinic visits and field activities as well.

*2-3 units, Spr (Staff)*

**INDE 209B. Medical Mandarin III: Intermediate**

Continuation of 207B/208B. See description for 207B. Students participating only in classroom and online instruction register for 2 units. Students registering for 3 units participate in clinic visits and field activities as well.

*2-3 units, Spr (Staff)*

**INDE 209C. Medical Mandarin III: Advanced**

Access advanced professional medical vocabulary, conduct medical research, and engage in discussions in Chinese. Aims at a proficiency level of medical interpreting or doing other independent work in Chinese. Students are also assisted in doing a project or projects related to a specific field of medicine. 3 units Includes clinic visits and field activities. Prerequisite: completion of 208C or advanced Chinese proficiency.

*2-3 units, Spr (Staff)*

**INDE 209D. Mandarin for Medical Professionals III**

Continuation of INDE 208D. Designed for students who have completed Advanced Medical Mandarin and want to seek further professional development with respect to medical Mandarin. Coursework includes selected research and projects, clinic visits and field activities, via Mandarin. Students choose to enroll for 2 units or 3 units depending upon an agreed upon workload approved by the instructor. Prerequisite: INDE 208D.

*2-3 units, Spr (Staff)*

**INDE 211. Creative Writing**

For medical students - all levels of writing skill. Examines uses of creative writing, including understanding the experience of medical training. May be repeated for credit.

*1 unit, Win (Shafer, A)*

**INDE 212. The Human Condition: Medicine, Arts, and Humanities**

The interdisciplinary field of medical humanities: the use of the arts and humanities to examine medicine in personal, social, and cultural contexts. Topics include the doctor/patient relationship, the patient perspective, the meaning of doctoring, and the meaning of illness. Sources include visual and performing arts, film, and literary genres such as poetry, fiction, and scholarly writing. Designed for medical students in the Biomedical Ethics and Medical Humanities Scholarly Concentration, but all students are welcome.

*2 units, Spr (Staff)*

**INDE 214. Stanford Medical Student Journal**

Provides an opportunity for editors of all levels to cultivate their skills and assist in preparing pieces submitted by colleagues for publication in the Stanford Medical Student Journal. Students

enrolled in the course work closely with student authors as well as other editors. Editors examine multiple categories of writing, including opinion pieces, poetry, memoirs, book reviews, case reports and investigative reports. The Journal is published two to three times per year and highlights the diverse talents of Stanford medical students in both scientific writing and the humanities.

*1 unit, Aut (Connolly, A; Shafer, A), Win (Shafer, A; Connolly, A), Spr (Staff)*

**INDE 215. Queer Health and Medicine**

Explores specific, pertinent, and timely issues impacting the health of the lesbian, gay, bisexual, and transgender community; examines the role of the primary care physician in addressing the health care needs of this community. Guest lecturers provide a gender-sensitive approach to the medical care of the LGBT patient, breaking down homophobic barriers and reaffirming patient diversity. May be repeated for credit.

*1 unit, Spr (Staff)*

**INDE 216. Cells to Tissues**

Focuses on the cell biology and structural organization of human tissues as self-renewing systems. Topics include identification and differentiation of stem cells, regulation of the cell cycle and apoptosis in normal and cancerous cells, cell adhesion and polarity in epithelial tissues, intracellular transport, and cell migration. Histology laboratory sessions examine normal and abnormal samples of blood, epithelia, connective tissue, muscle, bone and cartilage. Patient presentations and small group discussions of current medical literature illustrate how cell biology influences medical practice.

*3 units, Aut (Connolly, A; Theriot, J)*

**INDE 220. Human Health and Disease I**

Establishes the foundation for the Human Health and Disease block which spans Q3 (Spring quarter Year One) through Q5 (Winter quarter Year Two). The Human Health and Disease block presents organ system-based histology, pathology, physiology, pharmacology, and infectious disease in a sequence of interdisciplinary courses. Each organ-specific integrated course includes a review of the anatomy and related histology, normal function of that organ system, how the organ system is affected by and responds to disease including infection, and how diseases of that organ system are treated (therapeutics).

*3 units, Win (Siegel, R; Whitlock, J; Regula, D)*

**INDE 221. Human Health and Disease II**

Structure, function, disease, and therapeutics of the respiratory system and the cardiovascular system. See INDE 220 for a description of the Human Health and Disease block .

*12 units, Spr (Staff)*

**INDE 222. Human Health and Disease III**

Structure, function, disease, and therapeutics of the renal/genitourinary system, the gastrointestinal system, the endocrine system, male and female reproductive systems, and women's health. See INDE 220 for a description of the Human Health and Disease block .

*15 units, Aut (Bhalla, V; Connolly, A; Gesundheit, N; Hillard, P; Lowe, A; Pao, A; Regula, D; Siegel, R)*

**INDE 223. Human Health and Disease IV**

Structure, function, disease, and therapeutics of the central nervous system, hematologic system and multi-systemic diseases. See INDE 220 for a description of the Human Health and Disease block.

*11 units, Win (Connolly, A; DeBattista, C; Glader, B; Regula, D; Schwartz, N; Siegel, R)*

**INDE 225. Popular and Clinical Nutrition: Food Facts, Fads, and Pharmacology**

Designed for medical students and other health care professionals. Lunchtime lectures review the epidemiological and clinical research related to eating patterns and misconceptions of the public, the mechanisms of pharmacological effects of food, and related topics common to patient nutritional concerns. Topics include fad diets, the impact of dietary addiction, longevity associated with caloric restriction, toxins in foods and the action of phytonutrients. Epidemiological, clinical, and biochemical studies are reviewed in the discussion of these and other topics.

*1 unit, not given this year*

**INDE 226. History of Medicine Online**

Via Internet. Topics include: ancient medicine, Egypt and Babylonia, ancient Greece and Rome, Europe in the Middle Ages and the Renaissance, 18th-century schools of thought, and technological medicine. Sources include Kleinman's core clinical functions, and text, pictures, hypertext links, and sound clips. For assistance accessing the course, email: cwpsupport@lists.stanford.edu. Enroll in Axess, then ask cwpsupport to be added to the course site as a student

*1 unit, Aut (Shafer, A), Win (Shafer, A), Spr (Shafer, A)*

**INDE 227. Careers in Medicine: Pathways in the Medical Sciences**

Open to medical students, graduate and undergraduate students. Interactive, seminar-style sessions expose students to diverse career opportunities and the challenges of developing work-life balance in medicine. Recognized experts in clinical medicine and biomedical research who have been innovators in their careers discuss their work, decision-points in their career pathways, and lifestyle aspects of their choices.

*1 unit, Spr (Staff)*

**INDE 228. Career Transition Planning: Taking Action Today for a Successful Tomorrow**

Open to School of Medicine MD and graduate students; post-docs and clinical fellows may audit by consent of instructor. How to prioritize career goals and develop an effective job search campaign. Topics: translating scientific and clinical training into a variety of workplace environments, professional network development, professional interest assessment, recruiters' perspectives, credentials development, and creating a marketing plan. Guest speakers from myriad career fields. May be repeated for credit.

*1 unit, Spr (Staff)*

**INDE 229. Managing Difficult Conversations**

(Same as GSBGEN 568) Dealing effectively with difficult interpersonal situations in medical contexts. Focus is on improving students' judgment as to how to prepare for and confront difficult discussions in medical situations. Relevant principles of professionalism, leadership, and psychology underlie the course pedagogy. Case-based; student-to-student and student-to-instructor role-playing in actual medical situations. Patient and physician-expert participation as class guests. Enrollment limited to 20 medical students (2nd year and beyond) and 15 2nd year MBA students.

*1 unit, Aut (Grousbeck, I; Prober, C)*

**INDE 230. Scientific Management Series**

Designed for postdocs and advanced graduate students. Reviews management skills necessary for successfully assuming leadership roles in scientific research. Addresses some of the most difficult aspects of developing, directing, and managing people and projects and running a research group, especially issues that new faculty have traditionally learned by trial and error over a number of years. Topics include: the faculty job search process and strategies, key elements in starting a lab, basic principles regarding legal dimensions of scientific activity (intellectual property, royalties, links with industry), leading a team, communication and negotiation skills, and writing and securing grants.

*1 unit, Win (Sanford, R; Pringle, J)*

**INDE 231. Future Faculty Seminar**

(Same as CTL 231) For graduate students from all disciplines who are considering faculty careers. Postdoctoral fellows, TGR students, and research/clinical trainees may audit by consent of instructor. Explores the broad spectrum of duties and opportunities presented through faculty positions beyond the research-related aspects. Develops awareness of resources and skills that lead to faculty success; answers field-specific and related faculty job questions through discussions with representatives of a variety of academic institutions and fellow course participants. Topics include: finding and obtaining faculty positions, negotiating and navigating the first year, and working toward tenure. May be repeated for credit.

*1 unit, Aut (Eberle, S; Puglisi, J; Wright-Dunbar, R)*

**INDE 232. Introduction to Academic Medicine for Physician-Scientists**

Open only to accepted MSTP students. Presentations by Stanford

faculty on professional development topics, including: choosing a dissertation advisor, giving oral presentations, writing a grant proposal, attending scientific meetings, developing a research career. Substantial writing component.

*3 units, not given this year*

#### **INDE 233. Medical Education Seminar Series**

For pre-clinical and clinical medical students. A series of sessions rotating among the following formats: Medical Education journal club; education works-in-progress; topics in medical education design, implementation, and evaluation; teaching M&M; hot topics and controversies in medical education. May be repeated for credit.

*1 unit, Aut (Braddock, C; Irvine, C; Violanti, M), Win (Braddock, C; Violanti, M; Irvine, C), Spr (Staff)*

#### **INDE 234. Introduction to Writing Research Proposals**

Practical instruction in proposal writing. Suitable for advanced graduate students. Substantial writing component. Enrollment by instructor approval only.

*3 units, not given this year*

#### **INDE 235. Wilderness Leadership and Mentorship Skills for Medical Students**

For MD/Master of Medicine wilderness pre-orientation trip (SWEAT) leaders. Training to engage with and prepare incoming first-year medical students for the rigors of medical school. Topics include: fundamentals of wilderness survival, wilderness equipment use, wilderness first aid, camping, outdoor leadership, mentorship, team building, improvisation, risk management, cultural competency, professionalism as a physician, reflection and resiliency, first-year curriculum, stress management and coping. Guest lectures from Stanford faculty, emergency medicine physicians, National Outdoor Leadership School wilderness instructors, learning strategy specialists, and mentorship development specialists.

*1 unit, Spr (Staff)*

#### **INDE 236. Introduction to Teaching and Mentoring**

Enrollment limited to medical students. An introduction to medical education teaching principles and skills. Topics include assessment of current teaching skills, reviews of performance, giving appropriate learner feedback, and best practices for interactive teaching. Also introduces the literature around the value of peer mentoring in the medical setting and how to apply this information. Recommended for medical students interested in or currently serving as teaching assistants or interested in future academic positions.

*1 unit, Aut (Selig, S; Braddock, C)*

#### **INDE 255A. Health Policy, Finance and Economics I**

Open to medical students and resident physicians. Introduction to basic concepts and current issues in health policy, health finance, and health economics. Goals are to promote understanding of the forces that shape healthcare; to integrate medical students with graduate medical education (residents); to motivate participants to pursue further scholarly activity in these subjects through coursework, graduate programs or research. Team taught by world-renowned experts in their respective fields. Prerequisite: instructor consent.

*1 unit, not given this year*

#### **INDE 255B. Health Policy, Finance and Economics II**

Continuation of INDE 255A. Open to medical students and resident physicians. Introduction to basic concepts and current issues in health policy, health finance, and health economics. Goals are to promote understanding of the forces that shape healthcare; to integrate medical students with graduate medical education (residents); to motivate participants to pursue further scholarly activity in these subjects through coursework, graduate programs or research. Team taught by world-renowned experts in their respective fields. For medical students 255A is not prerequisite to 255B. Prerequisite: instructor consent.

*1 unit, not given this year*

#### **INDE 297. Reflections, Research, and Advances in Patient Care**

For clinical MD students. Two-year curriculum designed to provide structured time for students to step back from clerkships, in order to promote reflection on and reinforcement for their learning in the clinical environment. Goals are: to discuss and reflect upon critical experiences in clerkships; to provide

continuity of instruction in translational science topics across the curriculum; to reinforce and extend the study of behavioral, cultural, ethical, social and socioeconomic topics introduced in the Practice of Medicine course sequence; to expose students to recent advances in medical discoveries, emphasizing their application to clinical practice (translational medicine); and to develop research and critical thinking skills, acquiring new information in areas related to the Scholarly Concentrations. Components of this curriculum include Doctoring with CARE small groups, the Translating Discoveries lecture/seminar series, and Scholarly Concentration breakout groups. Prerequisite:

*4 units, Aut (Shafer, A; Prober, C), Win (Staff), Spr (Staff), Sum (Staff)*

#### **INDE 298. Women's Health Independent Project**

Required for Women's Health Scholarly Concentration. Students pursue individual projects under the supervision of a faculty member. Prerequisite: consent of instructor.

*1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## MICROBIOLOGY AND IMMUNOLOGY (MI) COURSES

### UNDERGRADUATE COURSES IN MICROBIOLOGY AND IMMUNOLOGY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **MI 17SC. Smallpox: Lethal Legacy, Forbidding Future**

Case studies related to the evolutionary origins of smallpox, monkeypox, and other emerging pox infections. Topics include public health policy, socio-cultural factors related to pox eradication, research funding, and the use of pox viruses in bioterrorism and as vectors for gene therapy. Fieldtrips and guest speakers on the development of novel drugs, personal accounts of the eradication efforts, current clinical trials for pox vaccines, and current laboratory studies of pox.

*2 units, not given this year*

#### **MI 70Q. Photographing Nature**

(S,Sem) Stanford Introductory Seminar. Utilizes the idiom of photography to learn about nature, enhance observation, and explore scientific concepts. Builds upon the pioneering photographic work of Eadweard J. Muybridge on human and animal locomotion. A secondary goal is to learn the grammar, syntax, composition, and style of nature photography to enhance the use of this medium as a form of scientific communication and also to explore the themes of change across time and space. Scientific themes to be explored include: taxonomy, habitat preservation, climate change; species diversity; survival and reproductive strategies; ecological niches and coevolution, carrying capacity and sustainability, population densities, predation, and predator-prey relationships, open-space management, the physics of photography. Extensive use of field trips and class critique.

*3 units, Aut (Siegel, R)*

#### **MI 104. Innate Immunology**

(Same as IMMUNOL 204, MI 204) Innate immune mechanisms as the only defenses used by the majority of multicellular organisms. Topics include Toll signaling, NK cells, complement, antimicrobial peptides, phagocytes, neuroimmunity, community responses to infection, and the role of native flora in immunity. How microbes induce and defeat innate immune reactions, including examples from vertebrates, invertebrates, and plants.

*3 units, Spr (Staff)*

#### **MI 115B. The Vaccine Revolution**

(Same as HUMBIO 155B) Advanced seminar. Human aspects of viral disease, focusing on recent discoveries in vaccine development and emerging infections. Journal club format: students choose articles from primary scientific literature, write formal summaries, and synthesize them into a literature review. Emphasis is on analysis, experimental design, and interpretation of data. Oral presentations. Enrollment limited to 10. Prerequisites: HUMBIO 155H, MI 155V.

6 units, Aut (Siegel, R)

### MI 116. The Human Virosphere

(Same as MI 216) Focus on interaction of humans and viruses from a number of perspectives: historical, cultural, political, and demographic. Organismal, molecular biological, biochemical, human and viral interactions; clinical aspects of viral disease, epidemiology and risk factors, public and international health, aspects of virology including emerging viruses and biological weapons. Case studies involving particular viruses: human herpes viruses, retroviruses, oncogenic viruses; vaccination and disease eradication, evolution of viruses as tools for research and therapy. Emphasis on general principles of biology and matters of decision making policy. Prerequisite: Biology core, Human Biology core, or consent of instructor.

5 units, not given this year

### MI 155H. Humans and Viruses I

(Same as HUMBIO 155H) Introduction to human virology integrating epidemiology, molecular biology, clinical sciences, social sciences, history, and the arts. Emphasis is on host pathogen interactions and policy issues. Topics: polio and vaccination, smallpox and eradication, yellow fever and history, influenza and genomic diversity, rubella and childhood infections, adenovirus and viral morphology, ebola and emerging infection, lassa fever and immune response.

6 units, Aut (Siegel, R)

### MI 155V. Humans and Viruses II

Introduction to human virology integrating epidemiology, molecular biology, clinical sciences, social sciences, history, and the arts. Emphasis on host pathogen interactions and policy issues. Topics: measles and viral epidemiology, rotavirus and world health, rabies and infections of the brain, HPV and cancer-causing viruses, herpes simplex and viral latency, CMV and viral teratogenesis, retrovirology and endogenous viral sequences, HIV and viral treatment, viral hepatitis and chronic infections, prions and diseases of life style. Prerequisite: MI155H.

6 units, Aut (Staff)

### MI 185. Topics in Microbiology

(Same as MI 285) For advanced undergraduates and graduate students. 1/3rd of the course consists of lectures by the instructor/colleagues. These cover, at an advanced level, with emphasis on bacteria, topics not covered elsewhere, e.g., phylogeny, molecular regulation, and bioenergetics. The remainder of the course involves interactive discussion of a topic of current interest in microbiology, chosen with student participation, and includes student presentations. (The topic last year was: Gene therapy.) Satisfies Central Menu Area 3 for BIO majors. Prerequisites: CHEM 31X, Biology core.

3 units, Win (Mattin, A)

### MI 198. Directed Reading in Microbiology and Immunology

Fields of study are decided in consultation with sponsoring professor. Prerequisite: consent of instructor.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### MI 199. Undergraduate Research

Investigations sponsored by individual faculty members. Possible fields: microbial molecular biology and physiology, microbial pathogenicity, immunology, virology, and molecular parasitology. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN MICROBIOLOGY AND IMMUNOLOGY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### MI 204. Innate Immunology

(Same as IMMUNOL 204, MI 104) Innate immune mechanisms as the only defenses used by the majority of multicellular organisms. Topics include Toll signaling, NK cells, complement, antimicrobial peptides, phagocytes, neuroimmunity, community responses to infection, and the role of native flora in immunity. How microbes induce and defeat innate immune reactions, including examples from vertebrates, invertebrates, and plants.

3 units, Spr (Staff)

### MI 209. Advanced Pathogenesis of Bacteria, Viruses, and

### Eukaryotic Parasites: Part I

For graduate students and advanced undergraduates; required of first-year graduate students in Microbiology and Immunology. Emphasis is on mechanisms to establish infection in the host and responses of the host to infection. Current literature. Prerequisite: background in biochemistry and molecular biology.

4 units, not given this year

### MI 210. Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites

For graduate and medical students, and advanced undergraduates; required of first-year graduate students in Microbiology and Immunology. The molecular mechanisms by which microorganisms invade animal and human hosts, express their genomes, interact with macromolecular pathways in the infected host, and induce disease. Current literature.

4 units, Win (Monack, D)

### MI 211. Advanced Immunology I

(Same as IMMUNOL 201) For graduate students, medical students and advanced undergraduates. Topics include the innate and adaptive immune systems; genetics, structure, and function of immune molecules; lymphocyte activation and regulation of immune responses. Prerequisites: undergraduate course in Immunology and familiarity with experimental approaches in biochemistry, molecular biology, and cell biology.

3 units, Win (Chien, Y)

### MI 215. Principles of Biological Technologies

(Same as IMMUNOL 215) The principles underlying novel as well as commonly utilized techniques to answer biological questions. Lectures and primary literature critiques on topics such as fluorescence microscopy, including applications such as FRET and single-cell analysis; human and murine genetic analysis; FACS; proteomics and analysis of noncoding RNAs. Class participation is emphasized. Prerequisite: biochemistry. Required of first-year graduate students in Microbiology and Immunology and the Immunology program.

3 units, Spr (Staff)

### MI 216. The Human Virosphere

(Same as MI 116) Focus on interaction of humans and viruses from a number of perspectives: historical, cultural, political, and demographic. Organismal, molecular biological, biochemical, human and viral interactions; clinical aspects of viral disease, epidemiology and risk factors, public and international health, aspects of virology including emerging viruses and biological weapons. Case studies involving particular viruses: human herpes viruses, retroviruses, oncogenic viruses; vaccination and disease eradication, evolution of viruses as tools for research and therapy. Emphasis on general principles of biology and matters of decision making policy. Prerequisite: Biology core, Human Biology core, or consent of instructor.

5 units, not given this year

### MI 233. The Biology of Small Modulatory RNAs

(Same as GENE 233, PATH 233) Open to graduate and medical students. Explores recent progress and unsolved questions in the field of RNA interference and microRNA biology. Students are required to read assigned primary literature before each class and actively participate in guided discussions on related technical and conceptual issues during class meetings. Assignments include critiques of assigned papers and developing a novel research proposal.

2 units, alternate years, not given this year

### MI 234. Fundamentals of RNA Biology

(Same as GENE 234, PATH 234) For graduate or medical students and (if space allows) to active participants from other segments of the Stanford Community (e.g., TGR students); undergraduates by instructor consent. Fundamental issues of RNA biology, with the goal of setting a foundation for students to explore the expanding world of RNA-based regulation. Each week a topic is covered by a faculty lecture and journal club presentations by students.

2 units, Aut (Fire, A; Chen, C)

### MI 245. Computational Modeling of Microbial Communities

(Same as BIOE 45) Innovative new sequencing technologies are permitting the generation of massive amounts of sequence data and changing the way we think about and pursue biological questions. Coupled to these opportunities are tremendous challenges for

biologists to grapple with the manipulation and analysis of large datasets and to address quantitative questions on a systems scale. The goal of this course is to provide biologists with basic computational tools and knowledge to confront large datasets in a quantitative manner. Students will learn basic programming skills in Matlab and Perl. Covered material will include: image analysis, bioinformatics algorithms, reaction-diffusion modeling, Monte Carlo algorithms, and population dynamics. Students will apply computational skills to a miniature research project studying the human microbiome or biofuel-related photosynthetic microbial communities. Spr 2012, (Huang, K., Sonnenburg, J., and Vora, T.)  
4 units, Spr (Huang, K.; Sonnenburg, J.; Vora, T)

#### MI 250. Frontiers in Microbiology and Immunology

Required of first- and second-year students in Microbiology and Immunology. How to evaluate biological research. Held in conjunction with the Microbiology and Immunology Friday noon seminar series. Before the seminar, students and faculty discuss one or more papers from the speaker's primary research literature on a related topic. After the seminar, students meet informally with the speaker to discuss their research.

1 unit, Aut (Schneider, D), Win (Schneider, D), Spr (Schneider, D)

#### MI 285. Topics in Microbiology

(Same as MI 185) For advanced undergraduates and graduate students. 1/3rd of the course consists of lectures by the instructor/colleagues. These cover, at an advanced level, with emphasis on bacteria, topics not covered elsewhere, e.g., phylogeny, molecular regulation, and bioenergetics. The remainder of the course involves interactive discussion of a topic of current interest in microbiology, chosen with student participation, and includes student presentations. (The topic last year was: Gene therapy.) Satisfies Central Menu Area 3 for BIO majors. Prerequisites: CHEM 31X, Biology core.

3 units, Win (Matin, A)

#### MI 299. Directed Reading in Microbiology and Immunology

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### MI 370. Medical Scholars Research

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### MI 399. Graduate Research

Students who have completed the necessary foundation courses undertake investigations in general bacteriology, bacterial physiology and ecology, bacterial genetics, microbial pathogenicity, immunology, parasitology, or virology sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### MI 801. TGR Master's Project

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### MI 802. TGR PhD Dissertation

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## MODERN THOUGHT AND LITERATURE (MTL) COURSES

### UNDERGRADUATE COURSES IN MODERN THOUGHT AND LITERATURE

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### MTL 130. Introduction to Environmental Humanities: Cultures of Nature in the American West

(Same as AMSTUD 130) What do we mean when we use the terms nature and culture? This course examines these two complex ideas in the context of the nineteenth, twentieth, and twenty-first century American West. Topics include Los Angeles as a lived space and its place in the national spatial imaginary, urban environmental movements, mining cultures, toxics legacies,

geographies of social difference, animal studies, and biodiversity and Native American DNA databases. The approach is interdisciplinary, and includes environmental history, cultural geography, critical race studies, literature, and documentary film methodologies and texts. GER:DB-Hum

3-5 units, not given this year

### GRADUATE COURSES IN MODERN THOUGHT AND LITERATURE

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### MTL 210. Critical Theory and The Environment

(Same as AMSTUD 210, ANTHRO 210B) Critical theoretical approaches (such as cultural studies, Marxism, postcolonial theory, cultural geography, feminism, and science studies) have generally been underutilized as methodologies for grappling with environmental situations, yet they hold much promise for addressing their complexity. This course asks: How does critical theory about the environment construe the current situation? What kinds of political or technological solutions do these theories call for or imply? The first half of the seminar introduces critical approaches and methodologies in relation to the environment. In the second section, we will use a variety of theoretical approaches to address Native American environmental politics, water, agriculture, toxics, and animals.

3-5 units, Spr (Koelle, A)

#### MTL 299. Edgework: New Directions in the Study of Culture

Workshop. Required of first-year students in the doctoral program. Methodologies of different disciplines, the possibility and difficulty of interdisciplinary work within these disciplines, and their connection with the individual projects of students in Modern Thought and Literature. May be repeated for credit.

1-3 units, Spr (Moya, P)

#### MTL 334A. Concepts of Modernity 1: Philosophical Foundations

Modernism, modernity the obsessive question (asked since the age that we call 'Renaissance') of what is 'now' will be approached from the perspective of historically changing 'chronotopes' (i.e. 'social constructions of time'). The different ways in which different cultures shape the horizons of past, present, and future determine changing modalities of experience and perception, action and behavior, and they thus offer a complex access to and understanding of cultural institutions and discourses. Works by (among others) Kant, Hume, Baudelaire, Marx, Nietzsche, Apollinaire, Heidegger, Beauvoir, Arendt, Lyotard.

5 units, Aut (Gumbrecht, H)

#### MTL 334B. Concepts of Modernity 2: The Study of Culture in the Age of Globalization

(Same as ENGLISH 334B) A survey of 20th-century theory with focus on the concept of culture and methods of studying it from diverse disciplines including sociology, anthropology, history, literary and cultural studies. Discussions will emphasize modernization, postmodernization and globalization processes in their relations to culture broadly understood, cultures in their regional, national and diasporic manifestations, and cultures as internally differentiated (high and low culture, subcultures, media cultures).

5 units, Win (Moya, P)

#### MTL 390. Qualifying Paper

Preparation and writing of the qualifying paper for the Ph.D. in Modern Thought and Literature. (Staff)

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### MTL 398. Graduate Independent Study

Students pursue a special subject of investigation under supervision of a member of the committee or another faculty member. May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### MTL 399. Reading for Orals

Reading in preparation for the University Oral Examination. May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### MTL 802. TGR Dissertation

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

# MOLECULAR AND CELLULAR PHYSIOLOGY (MCP) COURSES

## UNDERGRADUATE COURSES IN MOLECULAR AND CELLULAR PHYSIOLOGY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

### MCP 126. Neurons and Disease

Diseases of the nervous system. First lecture of each week focuses on the clinical, epidemiological and behavioral aspects of a selected disease or syndrome. Second lecture exposes the cell biological, electrophysiological, biochemical and/or molecular biological processes that underlie each disease presented. Instructors maintain some flexibility in the diseases chosen for elucidation, but students can expect those covered to range from the relatively straightforward, for example Multiple Sclerosis (MS) or Amyotrophic Lateral Sclerosis (ALS), to the more complex, for example, Schizophrenia or Obsessive Compulsive Disorder (OCD). 3 units for lecture and discussion only; 4 units includes a paper. Prerequisite: Biology or Human Biology core.

3-4 units, not given this year

### MCP 156. How Cells Work: Energetics, Compartments, and Coupling in Cell Biology

(Same as MCP 256) Open to graduate and medical students, and advanced undergraduates. Dynamic aspects of cell behavior and function, including cellular energetics, homeostasis, heterogeneity of membranes, structure and function of organelles, solute and water transport, signaling and motility. Emphasis is on the principles of how coupling of molecular processes gives rise to essential functions at the cellular level. Mathematical models of cell function. Student presentations.

4 units, alternate years, not given this year

### MCP 199. Undergraduate Research

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN MOLECULAR AND CELLULAR PHYSIOLOGY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### MCP 200. Cardiovascular Physiology

Offered jointly with the Department of Medicine. Lectures, small group instruction, clinical presentations, and lab demonstrations of normal and disordered human cardiovascular physiology. Prerequisite: understanding of general biochemistry.

5 units, Spr (Staff)

### MCP 202. Advanced Immunology II

(Same as IMMUNOL 202) Readings of immunological literature. Classic problems and emerging areas based on primary literature. Student and faculty presentations. Prerequisite: IMMUNOL 201/MI 211.

3 units, Spr (Staff)

### MCP 216. Genetic Analysis of Behavior

(Same as NBIO 216) Advanced seminar. Findings and implications of behavioral genetics as applied to invertebrate and vertebrate model systems. Topics include biological clocks, and sensation and central pattern generators. Relevant genetic techniques and historical perspective. Student presentation.

4 units, alternate years, not given this year

### MCP 221. Advanced Cell Biology

(Same as BIO 214, BIOC 224) For Ph.D. students. Current research on cell structure, function, and dynamics. Topics include complex cell phenomena such as cell division, apoptosis, compartmentalization, transport and trafficking, motility and adhesion, differentiation, and multicellularity. Current papers from the primary literature. Prerequisite for advanced undergraduates: BIO 129A,B, and consent of instructor.

2-5 units, Win (Kopito, R; Nachury, M; Straight, A; Pfeffer, S; Theriot, J)

### MCP 222. Imaging: Biological Light Microscopy

(Same as BIO 152) Survey of instruments which use light and other radiation for analysis of cells in biological and medical research. Topics: basic light microscopy through confocal fluorescence and video/digital image processing. Lectures on physical principles; involves partial assembly and extensive use of lab instruments. Lab. Prerequisites: some college physics, Biology core.

3 units, Spr (Lewis, R; Smith, S)

### MCP 232. Advanced Imaging Lab in Biophysics

(Same as APPPHYS 232, BIO 132, BIO 232, BIOPHYS 232) Laboratory and lectures. Advanced microscopy and imaging, emphasizing hands-on experience with state-of-the-art techniques. Students construct and operate working apparatus. Topics include microscope optics, Koehler illumination, contrast-generating mechanisms (bright/dark field, fluorescence, phase contrast, differential interference contrast), and resolution limits. Laboratory topics vary by year, but include single-molecule fluorescence, fluorescence resonance energy transfer, confocal microscopy, two-photon microscopy, and optical trapping. Limited enrollment. Recommended: basic physics, Biology core or equivalent, and consent of instructor.

4 units, Spr (Block, S; Smith, S; Stearns, T; Schnitzer, M)

### MCP 256. How Cells Work: Energetics, Compartments, and Coupling in Cell Biology

(Same as MCP 156) Open to graduate and medical students, and advanced undergraduates. Dynamic aspects of cell behavior and function, including cellular energetics, homeostasis, heterogeneity of membranes, structure and function of organelles, solute and water transport, signaling and motility. Emphasis is on the principles of how coupling of molecular processes gives rise to essential functions at the cellular level. Mathematical models of cell function. Student presentations.

4 units, alternate years, not given this year

### MCP 299. Directed Reading in Molecular and Cellular Physiology

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### MCP 370. Medical Scholars Research

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### MCP 399. Graduate Research

Students undertake investigations sponsored by individual faculty members. Research fields include endocrinology, neuroendocrinology, and topics in molecular and cellular physiology. Prerequisite: consent of instructor. (Staff)

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### MCP 801. TGR Project

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### MCP 802. TGR Dissertation

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## MUSIC (MUSIC) COURSES

### UNDERGRADUATE COURSES IN MUSIC

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### MUSIC 1A. Music, Mind, and Human Behavior

An introductory exploration of the question of why music is a pervasive and fundamental aspect of human existence. The class will introduce aspects of music perception and cognition as well as anthropological and cultural considerations. GER:DB-Hum

3 units, not given this year

#### MUSIC 2C. An Introduction to Opera

The lasting appeal of opera as a lavishly hybrid genre from the 1600s to the present. How and why does opera set its stories to

music? What is operatic singing? Who is the audience? How do words, music, voices, movement, and staging collaborate in different operatic eras and cultures? Principal works by Monteverdi, Handel, Mozart, Verdi, Wagner, Strauss, Britten, and Adams. We will also study and attend two works performed by the San Francisco Opera. GER:DB-HUM

3 units, Aut (Grey, T)

#### **MUSIC 5G. Introduction to Guzheng**

Introduction to Chinese music through learning how to play guzheng, a 21-stringed traditional Chinese instrument. The cultural, social, and historical significance of guzheng. 15 guzheng techniques, how to read Chinese music and guzheng notation, and two simple classic guzheng pieces. May be repeated for credit a total of 14 times. (AU)

1 unit, Aut (You, H), Win (You, H), Spr (You, H)

#### **MUSIC 7B. Musical Cultures of the World**

An overview of selected musical cultures from Africa, Asia, Europe, and the Americas. Course objectives: cultivate an appreciation for the diversity of human musical expression; discover how music is used to shape social interactions and systems of meaning; develop active listening skills that can be used when encountering any music; gain a preliminary understanding of ethnomusicological concepts and vocabulary. No musical experience is necessary. Class format: Lecture, discussion, listening, guest performances, musical participation, and a concert analysis. GER:DB-Hum, EC-GlobalCom

3 units, Win (Schultz, A)

#### **MUSIC 8A. Rock, Sex, and Rebellion**

Development of critical listening skills and musical parameters through genres in the history of rock music. Focus is on competing aesthetic tendencies and subcultural forces that shaped the music. Rock's significance in American culture, and the minority communities that have enriched rock's legacy as an expressively diverse form. Lectures, readings, listening, and video screenings. GER:DB-Hum, EC-AmerCul

3 units, Spr (Staff), alternate years, not given next year

#### **MUSIC 10AX. Sound Art**

The course will explore the use of sound as a medium for artistic expression, from recording and manipulating environmental sounds to studio-created and processed sounds and musical instrument recordings. We will study the physics of sound, how sound is perceived, how to record and manipulate sound, and how to combine all of this knowledge into the creation of sound art. Instruction will include using portable sound recorders, using the recording studio, and how to think about sound as a medium of expression. A final project will combine these elements in the creation of a presentation of the works we produce in the class.

2 units, Aut (Kadis, J; Leitman, S)

#### **MUSIC 11N. A View from the Podium: The Art of Conducting**

(F,Sem) Stanford Introductory Seminar. How a conductor interprets music, realizes a personal vision through the rehearsal process, and communicates with orchestra and audience. Conducting as based on human communication skills. How to apply these lessons to other fields of endeavor. GER:DB-Hum

3 units, Aut (Cai, J)

#### **MUSIC 12A. Introductory Piano Class**

(A=level 1; B=level 2; C=level 3)

1 unit, Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T), Sum (Staff)

#### **MUSIC 12B. Introductory Piano Class**

(A=level 1; B=level 2; C=level 3)

1 unit, Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T), Sum (Staff)

#### **MUSIC 12C. Introductory Piano Class**

(A=level 1; B=level 2; C=level 3.) May be repeated for credit a total of 14 times.

1 unit, Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T), Sum (Staff)

#### **MUSIC 12SC. Musical Collisions and Radical Creativity**

The margins of musical culture; nonconformist, maverick, and eccentric creative impulses that expand the definition of art. Laboratory atmosphere and daily rehearsals in which students create collaborative works with a final public concert involving

collaborations with local musicians and presentations of student-composed works created during the course.

2 units, not given this year

#### **MUSIC 13N. South Asian Regional and Popular Music on the Move**

(F,Sem) Stanford Introductory Seminar. Introduction to regional and popular musical styles of India and Pakistan, including Marathi kirtan, Punjabi bhangra, Manganiyar music of Rajasthan, Bhojpuri wedding songs, Tamil drum ensembles, Baul music of Bengal, Sufi qawwali, and Hindi film music, and explores how these musics are woven into the fabric of social life in South Asia and its diaspora. How people perform music to: articulate relationship to the divine; make social commentary; effect political change; bring families together; celebrate rites of passage; and, cope with rapid socio-economic changes. GER:DB-Hum

3 units, Aut (Schultz, A)

#### **MUSIC 13Q. Classical Music and Politics: Western Music in Modern China**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Social history, cultural studies, China studies, international relations, and music. From the Italian Jesuit, Matteo Ricci who presented a clavichord to the Chinese emperor to the emergence of a modern generation of Chinese musicians. GER:DB-Hum, EC-GlobalCom

3 units, Spr (Cai, J)

#### **MUSIC 15N. The Aesthetics of Data**

(F,Sem) Stanford Introductory Seminar. Focus on visual and auditory display of data, specifically, the importance of aesthetic principles in effective data display, and the creative potential of scientific, biological, environmental and other data as inspiration for artistic expression. GER:DB-Hum

3 units, Win (Berger, J)

#### **MUSIC 16N. Music, Myth, and Modernity: Wagner's Ring Cycle and Tolkien's Lord of the Rings**

(Same as GERLIT 16N) Preference to freshmen. Roots of Wagner's operatic cycle and Tolkien's epic trilogy in a common core of Norse, Germanic, and Anglo-Saxon mythology. The role of musical motive and characterization in Wagner's music dramas and the film version of Tolkien's trilogy. Music as a key element in the psychological, political, and cultural revision of ancient myth in modern opera and film. GER:DB-Hum, EC-GlobalCom

3 units, not given this year

#### **MUSIC 17Q. Perspectives in North American Taiko**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Taiko, or Japanese drum, is a newcomer to the American music scene. Emergence of the first N. American taiko groups coincided with increased Japanese American activism, and to some it is symbolic of Japanese American identity. N. American taiko is associated with Japanese American Buddhism. Musical, cultural, historical, and political perspectives of taiko. Hands-on drumming. Japanese music and Japanese American history, and relations among performance, cultural expression, community, and identity. GER:DB-Hum, EC-AmerCul

4 units, Win (Sano, S; Uyechi, L)

#### **MUSIC 18A. Jazz History: Ragtime to Bebop, 1900-1940**

From the beginning of jazz to the war years. GER:DB-Hum, EC-AmerCul

3 units, Win (Berry, F)

#### **MUSIC 18B. Jazz History: Bebop to Present, 1940-Present**

Modern jazz styles from Bebop to the current scene. Emphasis is on the significant artists of each style. GER:DB-Hum, EC-AmerCul

3 units, Spr (Berry, F)

#### **MUSIC 19A. Introduction to Music Theory I**

For non-music majors and Music majors or minors unable to pass the proficiency test for entry to MUSIC 21. The fundamentals of music theory and notation, basic sight reading, sight singing, ear training, keyboard harmony; melodic, rhythmic, and harmonic dictation. Skill oriented, using piano and voice as basic tools to develop listening and reading skills. GER:DB-Hum

3 units, Aut (Berger, T)

#### **MUSIC 19B. Intermediate Music Theory**

This course is an introduction to music theory geared toward

students who have basic literacy skills (i.e. fundamental notation, identifying major and minor scales, keys, etc). Using musical materials from repertoire selected from campus and area concerts, and incorporating the opportunity to attend these concerts, the course will introduce elements of harmony, melody, form, orchestration and arrangement. The course is an appropriate successor to Music 19A. Students who successfully complete Music 19B can go on directly to Music 21.

3 units, Spr (Berger, T)

#### **MUSIC 20A. Jazz Theory**

Introduces the language and sounds of jazz through listening, analysis, and compositional exercises. Students apply the fundamentals of music theory to the study of jazz. Prerequisite: 19 or consent of instructor. GER:DB-Hum

3 units, Aut (Nadel, J)

#### **MUSIC 20B. Advanced Jazz Theory**

Approaches to improvisation through listening and transcribing, and developing familiarity with important contributors to this music. Topics: scale theory, altered dominants, and substitute harmony. Prerequisite: 20A or consent of instructor. GER:DB-Hum

3 units, alternate years, not given this year

#### **MUSIC 20C. Jazz Arranging and Composition**

Jazz arranging and composition for small ensembles. Foundation for writing for big band. Prerequisite: 20A or consent of instructor.

3 units, Win (Nadel, J)

#### **MUSIC 21. Elements of Music I**

Preference to majors. Introduction to tonal theory. Practice and analysis. Diatonic harmony focusing on melodic and harmonic organization, functional relationships, voice-leading, and tonal structures. Ear-training and keyboard-harmony skills; analytical methods and listening strategies. Enrollment limited to 40. Prerequisites: (1) Piano Proficiency Exam (must be passed within the first two weeks of the term) or MUSIC 12A (may be taken concurrently); (2) Passing grade on a basic musical skills proficiency examination on the first day of class or MUSIC 19. GER:DB-Hum

4 units, Aut (Aquilanti, G), Win (Berger, T)

#### **MUSIC 22. Elements of Music II**

Preference to majors. Introduction to chromatic harmony focusing on secondary functions, modulations, harmonic sequences, mode mixture, and the Neapolitan, and augmented sixth chords. Analysis of musical forms and harmonizations complemented by harmonic and melodic dictation, sight singing, and other practical skills. Prerequisites: (1) MUSIC 21; (2) Piano Proficiency Exam or MUSIC 12B (may be taken concurrently). GER:DB-Hum

4 units, Win (Aquilanti, G), Spr (Berger, T)

#### **MUSIC 23. Elements of Music III**

Preference to majors. Continuation of chromatic harmony, complex forms, and introduction to early 20th-century techniques. Satisfactory passage of ear-training proficiency exam, part of the course's final, is a requirement for course completion and for continuation in the major sequence. Prerequisites: (1) MUSIC 22; (2) Piano Proficiency Exam or MUSIC 12C (may be taken concurrently). GER:DB-Hum

4 units, Aut (Berger, T), Spr (Ulman, E)

#### **MUSIC 34N. Performing America: The Broadway Musical from Little Johnny Jones to American Idiot**

(F,Sem) Stanford Introductory Seminar. 20th C. musical comedy in dialogue with American culture at large. How themes, characters, stories, and songs of the Broadway musical reflect, and construct, ideas of American identity over the last hundred years. Intersections with jazz, movies, rock, and popular song. Social themes of race, class, gender roles, and sexual identity. Works of Gershwin, Cole Porter, Irving Berlin, Rodgers and Hammerstein, and Lerner and Lowe. Includes opportunities to perform, arrange, direct scenes, as well as to attend one or more local productions. GER:DB-Hum

3-4 units, Spr (Staff)

#### **MUSIC 36N. Humor in Music**

(F,Sem) Stanford Introductory Seminar. Through theoretical readings the course will touch on psychological and neurological bases of humor, explore contingent, tactical, modal, and ontological difficulties in the apprehension of humor, and address

ethical issues surrounding humor in music. In addition to in-class listening and screening sessions, analytic discussions will be led by students who will find and present examples of humor in music. Students will also be invited to compose original humorous song lyrics and to create collaborative works of musical humor. GER:DB-Hum

3 units, Aut (Applebaum, M)

#### **MUSIC 38N. Singing Early Music**

Preference to freshmen. 15th- and 16th-century musical repertoires and their contexts; performance practice. GER:DB-Hum

3 units, not given this year

#### **MUSIC 39N. The Beatles**

Preference to freshmen. The music of the Beatles and their contributions as musical innovators and experimentalists. Their artistic antecedents, subsequent musical influence, and cultural impact; the emergence of the supergroup identity and development of new modes of musical production and collaborative songwriting; notions of commoditization, uniqueness and originality, and the perceived boundary of art and pop; speculations on the exportation and appropriation of an African American cultural legacy. GER:DB-Hum

3 units, not given this year

#### **MUSIC 40. Music History to 1600**

Pre- or corequisite: 21. GER:DB-Hum

4 units, Aut (Sargent, J)

#### **MUSIC 41. Music History 1600-1830**

Pre- or corequisite: 22. GER:DB-Hum

4 units, Win (Hadlock, H)

#### **MUSIC 42. Music History Since 1830**

Pre- or corequisite: 23. GER:DB-Hum

4 units, Spr (Kronengold, C)

#### **MUSIC 65A. Voice Class I**

Group (7 students to a section) beginning voice for the non-major (A = level 1; B = level 2). May be repeated for credit.

1 unit, Aut (Giovannetti, C), Win (Giovannetti, C), Spr (Giovannetti, C), Sum (Staff)

#### **MUSIC 65B. Voice Class II**

Group (7 students to a section) beginning voice for the non-major (A = level 1; B = level 2). May be repeated for credit.

1 unit, Aut (Giovannetti, C), Win (Giovannetti, C), Spr (Giovannetti, C), Sum (Staff)

#### **MUSIC 72A. Intermediate Piano Class**

For intermediate students. May be repeated for credit a total of 14 times. Prerequisites: 12C or equivalent, audition.

1 unit, Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T), Sum (Staff)

#### **MUSIC 72C. Harpsichord Class**

For beginning harpsichord students who have keyboard skills. May be repeated for credit a total of 14 times.

1 unit, Aut (Thornburgh, E), Win (Thornburgh, E), Spr (Thornburgh, E)

#### **MUSIC 72D. Jazz Piano Class**

By invitation only; priority to majors and jazz-ensemble participants. May be repeated for credit a total of 14 times.

1 unit, Aut (Low, M), Win (Low, M), Spr (Low, M)

#### **MUSIC 73. Intermediate Voice Class**

For intermediate students. Admission by audition. May be repeated for credit a total of 14 times.

1 unit, Aut (Giovannetti, C), Win (Giovannetti, C), Spr (Giovannetti, C)

#### **MUSIC 74C. Classical Guitar Class**

May be repeated for credit a total of 14 times.

1 unit, Aut (Ferguson, C), Win (Ferguson, C), Spr (Ferguson, C)

#### **MUSIC 74D. Harp Class**

May be repeated for credit a total of 14 times.

1 unit, Aut (Chauvel, M), Win (Chauvel, M), Spr (Chauvel, M)

#### **MUSIC 75B. Renaissance Wind Instruments Class**

May be repeated for credit.

1 unit, Aut (Myers, H), Win (Myers, H), Spr (Myers, H)

**MUSIC 76. Brass Instruments Class**

May be repeated for credit a total of 14 times.

*1 unit, Aut (Kenley, M), Win (Kenley, M), Spr (Kenley, M)*

**MUSIC 77. Percussion Class**

May be repeated for credit a total of 14 times.

*1 unit, Aut (Veregge, M), Win (Veregge, M), Spr (Veregge, M)*

**MUSIC 120. Sonification Seminar**

A project-based seminar on the use of sound, and in particular, musical sound, to represent scientific, medical, atmospheric, and other types of data, including time-critical data such as physical motion, and sonification of still and moving images.

*1-3 units, Win (Berger, J)*

**MUSIC 121. Analysis of Tonal Music**

Complete movements, or entire shorter works of the 18th and 19th centuries, are analyzed in a variety of theoretical approaches. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum

*4 units, Win (Ulman, E)*

**MUSIC 122A. Renaissance and Baroque Counterpoint**

Analysis and composition of contrapuntal styles from the Renaissance and Baroque periods. Use of keyboard, ear training, and sight singing underlies all written work. Prerequisites: 23 and successful completion of the ear-training and piano-proficiency examinations. GER:DB-Hum

*4 units, not given this year*

**MUSIC 122B. Harmonic Materials of 19th Century**

Analysis of 19th-century music, with compositional exercises based on 19th-century models. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum

*4 units, Spr (Ulman, E)*

**MUSIC 122C. Introduction to 20th-Century Composition**

Contemporary works, with emphasis on music since 1945. Projects in free composition based on 20th-century models. Prerequisites: 23 or consent of instructor; and pass the ear-training and piano-proficiency examinations. GER:DB-Hum

*4 units, Aut (Ferneyhough, B)*

**MUSIC 123. Undergraduate Seminar in Composition**

Current trends in composition. May be repeated for credit a total of 7 times. Prerequisites: Music major; 23 or consent of instructor. GER:DB-Hum

*3 units, Aut (Kapuscinski, J), Win (Ulman, E)*

**MUSIC 125. Individual Undergraduate Projects in Composition**

May be repeated for credit a total of 14 times. Prerequisites: music major, and one quarter of 123.

*1-3 units, Aut (Staff), Win (Staff), Spr (Staff)*

**MUSIC 126. Introduction to Thoroughbass**

The development of continuo techniques and skills for figured-bass realization. Performance and analysis of selected repertoire, using thoroughbass principles and exercises based on historical theoretical treatises. Prerequisite: 21.

*1-3 units, Win (Berger, T)*

**MUSIC 127. Instrumentation and Orchestration**

Individual instruments, instrumental groups within the orchestra, and combinations of groups. Arrangements from piano to orchestral music. Score analysis with respect to orchestration. Practical exercises using chamber ensembles and school orchestra. Prerequisite: 23. GER:DB-Hum

*3 units, Aut (Aquilanti, G), alternate years, not given next year*

**MUSIC 128. Stanford Laptop Orchestra: Composition, Coding, and Performance**

(Same as CS 170) Classroom instantiation of the Stanford Laptop Orchestra (SLOrk) which includes public performances. An ensemble of more than 20 humans, laptops, controllers, and special speaker arrays designed to provide each computer-mediated instrument with its sonic identity and presence. Topics and activities include issues of composing for laptop orchestras, instrument design, sound synthesis, programming, and live performance. May be repeated four times for credit.

*1-5 units, Spr (Wang, G)*

**MUSIC 130A. Introduction to Conducting**

Baton techniques and rehearsal procedures. The development of coordination of the members of the body involved in conducting; fluency in beat patterns and meters; dynamics, tempi, cueing, and use of the left hand in conducting. Prerequisites: 121 and diagnostic musicianship exam given first day of class; preference to students who have completed 122B.

*3 units, alternate years, not given this year*

**MUSIC 130B. Elementary Orchestral Conducting**

Prerequisites: 127 or previous orchestral performance experience, 130A.

*3 units, alternate years, not given this year*

**MUSIC 130C. Elementary Choral Conducting**

Techniques specific to the conducting of choral ensembles: warm-ups, breathing, balance, blend, choral tone, isolation principles, recitative conducting, preparation, and conducting of choral/orchestral works. Prerequisite: 130A.

*3 units, alternate years, not given this year*

**MUSIC 140. Studies in Medieval Music**

(Same as MUSIC 240) Prerequisites: MUSIC 21, MUSIC 40. (WIM at 4-unit level only.) GER:DB-Hum

*3-4 units, Aut (Mahrt, W)*

**MUSIC 141. Studies in Renaissance Music**

(Same as MUSIC 241) Prerequisites: MUSIC 21, MUSIC 40. (WIM at 4-unit level only.) GER:DB-Hum

*2-4 units, alternate years, not given this year*

**MUSIC 142. Studies in Baroque Music**

(Same as MUSIC 242) Prerequisites: MUSIC 22, MUSIC 41. (WIM at 4-unit level only.) GER:DB-Hum

*3-4 units, alternate years, not given this year*

**MUSIC 143. Studies in Classic Music**

(Same as MUSIC 243) Prerequisites: MUSIC 22, MUSIC 41. (WIM at 4-unit level only.) GER:DB-Hum

*3-4 units, alternate years, not given this year*

**MUSIC 144. Studies in Romantic Music**

(Same as MUSIC 244) Prerequisites: MUSIC 23, MUSIC 42. (WIM at 4-unit level only.) GER:DB-Hum

*3-4 units, Win (Grey, T)*

**MUSIC 145. Studies in Modern Music**

(Same as MUSIC 245) Prerequisites: MUSIC 23, MUSIC 42. (WIM at 4-unit level only.) GER:DB-Hum

*3-4 units, not given this year*

**MUSIC 146. Music and Urban Film**

(Same as MUSIC 246) How music and sound work in urban cinema. What happens when music's capacity to transform everyday reality combines with the realism of urban films? Provides an introduction to traditional theories of film music and film sound; considers how new technologies and practices have changed the roles of music in film. Readings discuss film music, realistic cinema, urban musical practices and urban culture. Viewing includes action/adventure, Hindi film, documentary, film noir, hip hop film, the musical, and borderline cases by Jean-Luc Godard, Spike Lee, Wong Kar-Wai and Tsai Ming-Liang. Pre- or corequisite (for music majors): MUSIC 22. (WIM at 4 unit level only.) GER:DB-Hum, EC-GlobalCom

*3-4 units, Spr (Kronengold, C)*

**MUSIC 147. The Soul Tradition in African American Music**

(Same as MUSIC 247) The African American tradition of soul music from its origins in blues, gospel, and jazz to its influence on today's r&b, hip hop, and dance music. Style such as rhythm and blues, Motown, Southern soul, funk, Philadelphia soul, disco, Chicago house, Detroit techno, trip hop, and neo-soul. Soul's cultural influence and global reach; its interaction with politics, gender, place, technology, and the economy. Pre-/corequisite (for music majors): MUSIC 22. (WIM at 4 units only.) GER:DB-Hum, EC-AmerCul

*3-4 units, not given this year*

**MUSIC 147A. Music Ethnography of the Bay Area**

(Same as MUSIC 247A) An introduction to music ethnography through student research on musical life in the Bay Area. Focus is on the intersections of music, social life, and cultural practice by engaging with people as they perform music and culture in situ. Techniques taught include participant-observation, interviewing

and oral history, writing fieldnotes, recording, transcription, analysis, and ethnographic writing. Pre-/corequisite (for music majors): MUSIC 22. (WIM at 4- or 5-unit level only.) GER:DB-Hum

3-5 units, *Spr* (Schultz, A)

**MUSIC 148. Musical Shakespeare: Theater, Song, Opera, and Film**

(Same as MUSIC 248) The role of music in productions, adaptations, and interpretations of Shakespeare's plays as theater, opera, and film from the Elizabethan era through the present. Emphasis is on the role of songs, stage music, and music in operatic and film adaptations. Incidental music, orchestral tone poems, and art-song settings of lyrics from the plays. Plays include *Romeo and Juliet*, *Othello*, *Macbeth*, *Hamlet*, *The Tempest*, *Midsummer Night's Dream*, and *Twelfth Night*. Pre-/corequisite (for music majors): MUSIC 22. (WIM at 4- or 5-unit level only.) GER:DB-Hum

3-5 units, *not given this year*

**MUSIC 149. Reactions to the Record: Early Recordings, Lost Styles, and Music's Future**

(Same as MUSIC 249) Seminar. The transformation of musical style, audience expectations, the composer-performer relationship, and the musical score from the late 1800s to the present. Sources include: recordings from Stanford's Archive of Recorded Sound; recordings of (Brahms, Debussy, Rachmaninoff, Saint-Saëns, Prokofiev, Bartók; concert programs; interviews; and reviews. Readings include Hamilton's *After the Golden Age* and Philip's *Performing Music in the Age of Recording*. Emphasis is on voice, strings, piano, chamber music, and orchestra. Guest residencies in conjunction with April 2012 symposium; see <http://music.stanford.edu/Events/StanfordMusicSymposium/>. May be repeated for credit. Pre-/corequisite (for music majors): MUSIC 22. (WIM at 4-unit level only.) GER:DB-Hum

3-4 units, *Aut* (Barth, G; Arul, K)

**MUSIC 150. Musical Acoustics**

The physics of vibrating systems, waves, and wave motion. Time- and frequency-domain analysis of sound. Room acoustics, reverberation, and spatialization. The acoustics of musical instruments: voice, strings, and winds. Emphasis is on the practical aspects of acoustics in making music. Hands-on and computer-based lab. See <http://ccrma.stanford.edu/courses/150/>. Prerequisites: music performance/composition experience, basic algebra, calculus, and physics. GER:DB-EngrAppSci

3 units, *Win* (Rossing, T)

**MUSIC 150G. Wagnerian Echos: A Cultural History from Modernism to Popular Culture**

(Same as GERGEN 161) The afterlives of mythological themes from the operas and music dramas of Richard Wagner (*The Flying Dutchman*, *Tannhäuser*, *Lohengrin*, *Ring Cycle*, *Parsifal*) in literature, modernist aesthetics, fascist politics, film, philosophy, and contemporary media. GER:DB-Hum

3-5 units, *not given this year*

**MUSIC 154. Composition and Performance of Instrumental Music with Electronics**

Aesthetic and analytical issues from the pioneers of *Musique Concrète* to the electro of the 2000's. Electroacoustic scholarship over the past 60 years discussing problems and development of the genre. Emphasis on listening, writing, tools development, space, serendipity, concert ritual, interdisciplinarity, relationship with other styles of music, gesture, and sound/image. Considered composers include: Schaeffer, Henry, Varese, Xenakis, Stockhausen, Messiaen, Boulez, Ferrari, Risset, Berio, Chowning, Parmegiani, Bayle, Chion, Dhomont. Focus on one or a few works leading to a public performance at the end of the quarter. Prerequisite: experience in analysis of contemporary music and in electronic music. May be repeated for credit once.

1-5 units, *not given this year*

**MUSIC 155. INTERMEDIA WORKSHOP**

(Same as ARTSTUDI 239, MUSIC 255) Students develop and produce intermedia works. Musical and visual approaches to the conceptualization and shaping of time-based art. Exploration of sound and image relationship. Study of a wide spectrum of audiovisual practices including experimental animation, video art, dance, performance, non-narrative forms, interactive art and

installation art. Focus on works that use music/sound and image as equal partners. Limited enrollment. Prerequisites: consent of instructors, and one of FILMPROD 114, ARTSTUDI 131, 138, 167, 177, 179, or MUSIC 123, or equivalent.

3-4 units, *Win* (DeMarinis, P; Kapuscinski, J)

**MUSIC 156. sic: Improvisation Collective**

Small ensemble devoted to learning trans-idiomatic improvisation techniques and composing indeterminate pieces in a workshop setting. One major concert. Prerequisite: access to an instrument and successful small group audition during the prior quarter. Improvisational experience and conventional instrumental virtuosity not required. May be repeated for credit for a total of 3 times.

1 unit, *Win* (Applebaum, M)

**MUSIC 157. Introduction to Mariachi Ensemble**

Introduction to the practice of mariachi music, tradition, and history. Focus is on learning traditional *sones*, *rancheras*, *huapangos*, and *boleros*. Requirements: ability to play and access to instruments (violin, trumpet, guitar, *vihuela*, and *guitarrón*). May be repeated for credit.

1 unit, *Aut* (Clark, J), *Win* (Clark, J), *Spr* (Clark, J)

**MUSIC 158. Soundwire Ensemble**

Stanford's Internet2-based Soundwire Ensemble rehearses with the East Coast Tintinnabulate Ensemble directed by Pauline Oliveros, Rensselaer Polytechnic Institute. Concerts, composition, and improvisation projects using resources available when connecting with remote musicians. State-of-the-art audio and video technology developed by ensemble participants. May be repeated for credit.

2-3 units, *not given this year*

**MUSIC 159. Early Music Singers**

Small choir specializing in Medieval, Renaissance, and early Baroque vocal music. One major concert per quarter. May be repeated for credit for a total of 14 times.

1 unit, *Aut* (Mahrt, W), *Win* (Mahrt, W), *Spr* (Mahrt, W)

**MUSIC 160. Stanford Symphony Orchestra**

70- to 100-member ensemble performing major orchestral works; minimum one concert per quarter. May be repeated for credit a total of 14 times.

1 unit, *Aut* (Cai, J), *Win* (Cai, J), *Spr* (Cai, J)

**MUSIC 160A. Stanford Philharmonia Orchestra**

Prerequisite: audition, one year of 160, or consent of instructor. May be repeated for credit.

1 unit, *Aut* (Cai, J), *Win* (Cai, J), *Spr* (Cai, J)

**MUSIC 160B. Stanford New Ensemble**

Performing compositions of the 20th century, recent works of this century, and new works by Stanford faculty and student composers. Musicians collaborate with composers and artists visiting and performing at Stanford. One concert per quarter. May be repeated for credit.

1 unit, *Aut* (Cai, J), *Win* (Cai, J), *Spr* (Cai, J)

**MUSIC 160S. Summer Orchestra**

50- to 100-member ensemble performing major orchestral works. Auditions on June 24-26. First rehearsal on June 28th. Program: Tchaikovsky's *Serenade for Strings Op.48*, Piazzolla's *Tangazo*, and Brahms *Symphony no.1*. Concert: Friday, July 15th 8:00PM. See <http://music.stanford.edu/Ensembles/SummerSSO.html> for additional information. Questions: Contact Martín Fraile, music director and conductor at: <mailto:mfraile@stanford.edu>. May be repeated for credit.

1 unit, *Sum* (Staff)

**MUSIC 161A. Stanford Wind Ensemble**

40- to 50-member ensemble performing transcriptions of symphonic music, brass band music, and repertoire composed specifically for symphonic band. One concert per quarter. May be repeated for credit a total of 14 times.

1 unit, *Aut* (Aquilanti, G), *Win* (Aquilanti, G), *Spr* (Aquilanti, G)

**MUSIC 161B. Jazz Orchestra**

Big band format. Repertoire drawn primarily from the contemporary jazz-ensemble literature. One formal concert per quarter. May be repeated for credit a total of 14 times.

1 unit, *Aut* (Berry, F), *Win* (Berry, F), *Spr* (Berry, F)

**MUSIC 161C. Red Vest Band**

A small ensemble of the Leland Stanford Junior University Marching Band open to members of the LSJUMB by audition and consent of instructor. Members perform at all men's and women's home basketball games and travel to some away and post-season games. Twice-weekly rehearsals focus on introduction of new student arrangements and the LSJUMB's repertoire of rock, funk, and traditional styles. May be repeated for credit a total of 7 times.

*1 unit, Win (Aquilanti, G), Spr (Aquilanti, G)*

**MUSIC 161D. Stanford Brass Ensemble**

Performance of works for full brass choir and for smaller ensembles of brass instruments. Once weekly rehearsals. May be repeated for credit. Prerequisite: audition and consent of instructor.

*1 unit, Aut (Kenley, M), Win (Kenley, M), Spr (Kenley, M)*

**MUSIC 162. Symphonic Chorus**

180- to 200-voice choral ensemble, performing major choral masterworks with orchestra. One concert per quarter. May be repeated for credit a total of 14 times.

*1 unit, Aut (Sano, S), Win (Sano, S), Spr (Sano, S)*

**MUSIC 163. Memorial Church Choir**

Official choir of Memorial Church, furnishing music for Sunday services and special occasions in the church calendar. May be repeated for credit a total of 14 times.

*1 unit, Aut (Morgan, R), Win (Morgan, R), Spr (Morgan, R)*

**MUSIC 165. Chamber Chorale**

Select 24-voice choral ensemble, specializing in virtuoso choral repertoire from all periods of Western art music. Annual touring commitment required. May be repeated for credit a total of 14 times.

*1 unit, Aut (Sano, S), Win (Sano, S), Spr (Sano, S)*

**MUSIC 167. University Singers**

Select, 50-voice choral ensemble, performing choral repertoire from all periods of Western art music. May be repeated for credit a total of 14 times.

*1 unit, Aut (Morgan, R), Win (Morgan, R), Spr (Morgan, R)*

**MUSIC 167S. Summer Chorus**

80- to 100-voice non-auditioned ensemble, performing major choral masterworks and choral repertoire from all periods of Western art music.

*1 unit, Sum (Staff)*

**MUSIC 169. Stanford Taiko**

Select 15- to 18-member North American taiko ensemble, performing all-original repertoire for Japanese drums. Multiple performances in Winter and Spring quarters, also touring; instrument construction and maintenance. Admission by audition in Autumn Quarter only. May be repeated for credit a total of 14 times.

*1 unit, Aut (Sano, S; Uyechi, L), Win (Sano, S; Uyechi, L), Spr (Sano, S; Uyechi, L)*

**MUSIC 170. Collaborative Piano**

Performance class in a workshop setting. Techniques of collaboration with vocalists and instrumentalists in repertoire ranging from songs and arias to sonatas and concertos. Prerequisite: private-lesson proficiency level in piano, or consent of instructor.

*1 unit, Aut (Dahl, L)*

**MUSIC 171. Chamber Music**

Audition required. Weekly one-hour coachings from Music department faculty. Classical string quartets and piano/string groups are supervised by the St. Lawrence String Quartet and require attendance at a weekly Wednesday 4:15 p.m. master class. May be repeated for credit.

*1 unit, Aut (Staff), Win (Staff), Spr (Staff)*

**MUSIC 172A. Piano**

Private lessons and group master class weekly. May be repeated for credit a total of 14 times.

*1-3 units, Aut (Barth, G), Win (Barth, G), Spr (Barth, G)*

**MUSIC 172B. Organ**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Morgan, R), Win (Morgan, R), Spr (Morgan, R)*

**MUSIC 172C. Harpsichord**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Thornburgh, E), Win (Thornburgh, E), Spr (Thornburgh, E)*

**MUSIC 172D. Jazz Piano**

By invitation only; priority to majors and jazz-ensemble participants. May be repeated for credit a total of 14 times.

*1-3 units, Aut (Low, M), Win (Low, M), Spr (Low, M)*

**MUSIC 172E. Fortepiano**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Barth, G), Win (Barth, G), Spr (Barth, G)*

**MUSIC 172F. Carillon**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T)*

**MUSIC 173. Voice**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Giovannetti, C), Win (Giovannetti, C), Spr (Giovannetti, C)*

**MUSIC 174A. Violin**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Staff), Win (Staff), Spr (Staff)*

**MUSIC 174B. Viola**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Robertson, L), Win (Robertson, L), Spr (Robertson, L)*

**MUSIC 174C. Violoncello**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Harrison, S), Win (Harrison, S), Spr (Harrison, S)*

**MUSIC 174D. Contrabass**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Moyer, B), Win (Moyer, B), Spr (Moyer, B)*

**MUSIC 174E. Viola Da Gamba**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Dornenburg, J), Win (Dornenburg, J), Spr (Dornenburg, J)*

**MUSIC 174F. Classical Guitar**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Ferguson, C), Win (Ferguson, C), Spr (Ferguson, C)*

**MUSIC 174G. Harp**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Chauvel, M), Win (Chauvel, M), Spr (Chauvel, M)*

**MUSIC 174H. Baroque Violin**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Martin, A), Win (Martin, A), Spr (Martin, A)*

**MUSIC 174I. Jazz Bass**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (McCain, J), Win (McCain, J), Spr (McCain, J)*

**MUSIC 174J. Jazz Guitar**

Individual lessons in jazz guitar.

*1-3 units, Aut (Vandivier, R), Win (Vandivier, R), Spr (Vandivier, R)*

**MUSIC 175A. Flute**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Hawley, A), Win (Hawley, A), Spr (Hawley, A)*

**MUSIC 175B. Oboe**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Mitchell, P), Win (Matheson, J), Spr (Matheson, J)*

**MUSIC 175C. Clarinet**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Brandenburg, M), Win (Brandenburg, M), Spr (Brandenburg, M)*

**MUSIC 175D. Bassoon**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Olivier, R), Win (Olivier, R), Spr (Olivier, R)*

**MUSIC 175E. Recorder/Renaissance Wind Instruments**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Myers, H), Win (Myers, H), Spr (Myers, H)*

**MUSIC 175F. Saxophone**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (McCarthy, C), Win (McCarthy, C), Spr (McCarthy, C)*

**MUSIC 175G. Baroque Flute**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Staff), Win (Staff), Spr (Staff)*

**MUSIC 176A. French Horn**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Ragent, L), Win (Ragent, L), Spr (Ragent, L)*

**MUSIC 176B. Trumpet**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Johnson-Hamilton, J), Win (Johnson-Hamilton, J), Spr (Johnson-Hamilton, J)*

**MUSIC 176C. Trombone**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Kenley, M), Win (Kenley, M), Spr (Kenley, M)*

**MUSIC 176D. Tuba**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Clements, A), Win (Clements, A), Spr (Clements, A)*

**MUSIC 177. Percussion**

May be repeated for credit a total of 14 times.

*1-3 units, Aut (Veregge, M), Win (Veregge, M), Spr (Veregge, M)*

**MUSIC 182. Diction for Singers**

The international phonetic alphabet and its application to German, French, and Italian vocal literature. Open also to pianists interested in vocal coaching and choral conducting.

*1 unit, Win (Dahl, L)*

**MUSIC 183A. German Art Song Interpretation**

By audition only. For advanced singers and pianists as partners. Performance class in a workshop setting. Composers include Beethoven, Schubert, Wolf and Strauss. May be repeated for credit a total of 2 times. Enrollment limit: 20 (ten singers maximum). Prerequisite: consent of instructor. Recommended prerequisite: 170 (pianists) or 182 (singers).

*1 unit, Spr (Dahl, L)*

**MUSIC 183B. French Art Song Interpretation**

By audition only. For advanced singers and pianists as partners. Performance class in a workshop setting. Composers include Fauré, Debussy, Ravel and Poulenc. May be repeated for credit a total of 2 times. Enrollment limit: 20 (ten singers maximum). Prerequisite: consent of instructor. Recommended prerequisite: 170 (pianists) or 182 (singers).

*1 unit, alternate years, not given this year*

**MUSIC 184. Vocal Repertory Workshop**

This course is a practical workshop in vocal repertoire. Each quarter, offering emphasizes a specific genre or period, therefore the course can be repeated with permission of the instructor. In addition to broadening the student's knowledge of vocal repertoire, the following skills are developed: text preparation, foreign language translation and diction; historically informed performance practice; editorial practice through comparison or preparation; rehearsal for performance and/or recording. Prerequisite: vocal or instrumental instruction, as the class is open to singers or collaborative artists.

*1-3 units, Aut (Catsalis, M), Win (Catsalis, M), Spr (Catsalis, M)*

**MUSIC 192A. Foundations of Sound-Recording Technology**

For upper division undergraduates and graduate students; preference given to Music majors with MST specialization. Topics: elementary electronics; the physics of sound transduction and microphone operation, selection, and placement; mixing consoles; connectors and device interconnection; grounding and shielding; principles of analog magnetic recording; operation maintenance of recording equipment; and principles of recording engineering. Enrollment limited. Prerequisites: MUSIC 150, algebra, physics basics, and consent of instructor. GER:DB-EngrAppSci

*3 units, Aut (Kadis, J)*

**MUSIC 192B. Advanced Sound Recording Technology**

Topics: noise reduction techniques; dynamics and time-delay audio effects; the principles of digital audio; disk- and tape-based digital recorders; digital audio workstations and editing; advanced multitrack techniques; SMPTE and MIDI time code and device synchronization; MIDI sequencing and synchronization. See <http://ccrma.stanford.edu/courses/>. Prerequisite: 192A. GER:DB-EngrAppSci, DB-Hum

*3 units, Win (Kadis, J)*

**MUSIC 192C. Session Recording**

Independent engineering of recording sessions. May be repeated for credit a total of 14 times. Prerequisites: 192A,B.

*1-2 units, Aut (Kadis, J), Win (Kadis, J), Spr (Kadis, J)*

**MUSIC 197. Undergraduate Teaching Apprenticeship**

Work in an apprentice-like relationship with faculty teaching a student-initiated course. Prerequisite: consent of instructor. (Staff)

*1-2 units, Aut (Staff), Win (Sano, S), Spr (Sano, S)*

**MUSIC 198. Concentrations Project**

For concentration program participants only. Must be taken in senior year. Multiple concentrators may enroll in one section of 198 per concentration.

*4 units, Aut (Staff), Win (Staff), Spr (Staff)*

**MUSIC 199. Independent Study**

For advanced undergraduates and graduate students who wish to do work outside the regular curriculum. Before registering, student must present specific project and enlist a faculty sponsor. May be repeated for credit a total of 14 times.

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**MUSIC 201. CCRMA Colloquium**

Weekly review of work being done in the field, research taking place at CCRMA, and tools to make the most of the CCRMA technical facilities.

*1 unit, Aut (Leitman, S; Wilkerson, C)*

**MUSIC 222. Sound in Space**

Historical background, techniques and theory on the use of space in music composition and diffusion. Listening and analysis of relevant pieces. Experimental work in spatialization techniques leading to short studies to be diffused in concert at the end of the quarter.

*1-4 units, not given this year*

**MUSIC 251. Psychophysics and Music Cognition**

Lecture, lab and experiment-based course in perception, psychoacoustics, cognition, and neuroscience of music. (WIM at 4 or 5 units only.) GER:DB-Hum

*1-5 units, Spr (Staff)*

**MUSIC 252. Music Notation Software: An Introduction**

Learn to use music notation programs Finale®, Sibelius® and open-source alternatives.

*1-2 units, alternate years, not given this year*

**GRADUATE COURSES IN MUSIC**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**MUSIC 200. Graduate Proseminar**

Required of first-year graduate students in music. Introduction to research in music, bibliographical materials, major issues in the field, philosophy, and methods in music history. Guest lecturers and individual research topics.

*3-4 units, Aut (Hadlock, H; McBride, J)*

**MUSIC 220A. Fundamentals of Computer-Generated Sound**

Techniques for digital sound synthesis, effects, and reverberation. Topics: summary of digital synthesis techniques (additive, subtractive, nonlinear, wavetable, spectral-modeling, and physical-modeling); digital effects algorithms (phasing, flanging, chorus, pitch-shifting, and vocoding); and techniques for digital reverberation. Majors (undergraduate or graduate) must take for 4 units. See <http://ccrma.stanford.edu/>.

*2-4 units, Aut (Chafe, C)*

**MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Computational Music**

The use of high-level programming language as a compositional aid in creating musical structures. Advanced study of sound

synthesis techniques. Simulation of a reverberant space and control of the position of sound within the space. See <http://ccrma.stanford.edu/>. Prerequisite: 220A.

2-4 units, *Win (Wang, G)*

**MUSIC 220C. Research Seminar in Computer-Generated Music**

Individual projects in composition, psychoacoustics, or signal processing. See <http://ccrma.stanford.edu/>. May be repeated for credit. Prerequisite: 220B.

2-4 units, *Spr (Chafe, C)*

**MUSIC 220D. Research in Computer-Generated Music**

Independent research projects in composition, psychoacoustics, or signal processing. See <http://ccrma.stanford.edu/>. May be repeated for credit. Prerequisite: 220C.

1-10 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**MUSIC 221. Topics in the History of Theory**

The intersection of music theory and compositional practice in different eras of Western music history. Primary sources in music theory and issues such as notation, rhythm, mode, dissonance treatment, counterpoint, tonality, form, rhetoric, affect and imitation, expression, linear analysis, 12-tone and set theory, in light of relevant repertoire and modern scholarship. May be repeated for credit a total of 5 times.

3-5 units, *Win (Kronengold, C), not given next year*

**MUSIC 223. Composition for Electronic Musicians**

Composition for any combination of acoustic and electroacoustic instrumentation, computer-generated sound, invented instruments, sound-sculptures, and multi-disciplinary elements including theater and visual media. Project-based laboratory to advance original student works, supported by lectures on the fundamentals of composition. Concert performance of final works. Taught at CCRMA with a focus on engendering deliberate conversation on the enrichment of a cultural context for new media. Open to undergraduates and graduates.

1-4 units, *Spr (Applebaum, M)*

**MUSIC 230. Advanced Orchestral Conducting**

May be repeated for credit a total of 8 times. Prerequisite: 130B.

2-4 units, *Aut (Cai, J), Win (Cai, J), Spr (Cai, J)*

**MUSIC 231. Advanced Choral Conducting**

Individual instruction continuing trajectory of Music 130C. Focus on gestural technique and analysis of works by genre and historical period. May be repeated for credit a total of 8 times. Prerequisite: 130C.

2-4 units, *Aut (Sano, S), Win (Sano, S), Spr (Sano, S)*

**MUSIC 240. Studies in Medieval Music**

(Same as MUSIC 140) Prerequisites: MUSIC 21, MUSIC 40. (WIM at 4-unit level only.)

3-4 units, *Aut (Mahrt, W)*

**MUSIC 241. Studies in Renaissance Music**

(Same as MUSIC 141) Prerequisites: MUSIC 21, MUSIC 40. (WIM at 4-unit level only.)

2-4 units, *alternate years, not given this year*

**MUSIC 242. Studies in Baroque Music**

(Same as MUSIC 142) Prerequisites: MUSIC 22, MUSIC 41. (WIM at 4-unit level only.)

3-4 units, *alternate years, not given this year*

**MUSIC 243. Studies in Classic Music**

(Same as MUSIC 143) Prerequisites: MUSIC 22, MUSIC 41. (WIM at 4-unit level only.)

3-4 units, *alternate years, not given this year*

**MUSIC 244. Studies in Romantic Music**

(Same as MUSIC 144) Prerequisites: MUSIC 23, MUSIC 42 (WIM at 4-unit level only.)

3-4 units, *Win (Grey, T)*

**MUSIC 245. Studies in Modern Music**

(Same as MUSIC 145) Prerequisites: MUSIC 23, MUSIC 42. (WIM at 4-unit level only.)

3-4 units, *not given this year*

**MUSIC 246. Music and Urban Film**

(Same as MUSIC 146) How music and sound work in urban cinema. What happens when music's capacity to transform everyday reality combines with the realism of urban films?

Provides an introduction to traditional theories of film music and film sound; considers how new technologies and practices have changed the roles of music in film. Readings discuss film music, realistic cinema, urban musical practices and urban culture. Viewing includes action/adventure, Hindi film, documentary, film noir, hip hop film, the musical, and borderline cases by Jean-Luc Godard, Spike Lee, Wong Kar-Wai and Tsai Ming-Liang. Pre- or corequisite (for music majors): MUSIC 22. (WIM at 4 unit level only.)

3-4 units, *Spr (Kronengold, C)*

**MUSIC 247. The Soul Tradition in African American Music**

(Same as MUSIC 147) The African American tradition of soul music from its origins in blues, gospel, and jazz to its influence on today's r&b, hip hop, and dance music. Style such as rhythm and blues, Motown, Southern soul, funk, Philadelphia soul, disco, Chicago house, Detroit techno, trip hop, and neo-soul. Soul's cultural influence and global reach; its interaction with politics, gender, place, technology, and the economy. Pre-/corequisite (for music majors): MUSIC 22. (WIM at 4 units only.)

3-4 units, *not given this year*

**MUSIC 247A. Music Ethnography of the Bay Area**

(Same as MUSIC 147A) An introduction to music ethnography through student research on musical life in the Bay Area. Focus is on the intersections of music, social life, and cultural practice by engaging with people as they perform music and culture in situ. Techniques taught include participant-observation, interviewing and oral history, writing fieldnotes, recording, transcription, analysis, and ethnographic writing. Pre-/corequisite (for music majors): MUSIC 22. (WIM at 4- or 5-unit level only.)

3-5 units, *Spr (Schultz, A)*

**MUSIC 248. Musical Shakespeare: Theater, Song, Opera, and Film**

(Same as MUSIC 148) The role of music in productions, adaptations, and interpretations of Shakespeare's plays as theater, opera, and film from the Elizabethan era through the present. Emphasis is on the role of songs, stage music, and music in operatic and film adaptations. Incidental music, orchestral tone poems, and art-song settings of lyrics from the plays. Plays include Romeo and Juliet, Othello, Macbeth, Hamlet, The Tempest, Midsummer Night's Dream, and Twelfth Night. Pre-/corequisite (for music majors): MUSIC 22. (WIM at 4- or 5-unit level only.)

3-5 units, *not given this year*

**MUSIC 249. Reactions to the Record: Early Recordings, Lost Styles, and Music's Future**

(Same as MUSIC 149) Seminar. The transformation of musical style, audience expectations, the composer-performer relationship, and the musical score from the late 1800s to the present. Sources include: recordings from Stanford's Archive of Recorded Sound; recordings of (Brahms, Debussy, Rachmaninoff, Saint-Saëns, Prokofiev, Bartók; concert programs; interviews; and reviews. Readings include Hamilton's *After the Golden Age* and Philip's *Performing Music in the Age of Recording*. Emphasis is on voice, strings, piano, chamber music, and orchestra. Guest residencies in conjunction with April 2012 symposium; see <http://music.stanford.edu/Events/StanfordMusicSymposium/>. May be repeated for credit. Pre-/corequisite (for music majors): MUSIC 22. (WIM at 4-unit level only.)

3-4 units, *Aut (Barth, G; Arul, K)*

**MUSIC 250A. HCI Theory and Practice**

HCI issues as they relate to music applications in composition and performance. Project-oriented, examining issues from the technical and theoretical perspectives of computer science, haptics, and music theory. See <http://ccrma.stanford.edu/>.

3-4 units, *Aut (Ju, W; Berdahl, E)*

**MUSIC 250B. HCI Performance Systems**

Continuation of 250A, concentrating on interactive computer-music performance systems. See <http://ccrma.stanford.edu/courses/250b/>. Prerequisite: 250A.

1-4 units, *alternate years, not given this year*

**MUSIC 253. Music Notation and Representation Software**

Focus on symbolic data for music applications including advanced notation systems, optical music recognition, musical data conversion, and internal structure of MIDI files.

2-4 units, *alternate years, not given this year*

**MUSIC 254. Symbolic Music Analysis and Retrieval**

Leveraging off three synchronized sets of symbolic data resources for notation and analysis, the lab portion introduces students to the open-source Humdrum Toolkit for music representation and analysis. Issues of data content and quality as well as methods of information retrieval, visualization, and summarization are considered in class. Grading based primarily on student projects. Prerequisite: 253 or consent of instructor.

2-4 units, alternate years, not given this year

**MUSIC 255. INTERMEDIA WORKSHOP**

(Same as ARTSTUDI 239, MUSIC 155) Students develop and produce intermedia works. Musical and visual approaches to the conceptualisation and shaping of time-based art. Exploration of sound and image relationship. Study of a wide spectrum of audiovisual practices including experimental animation, video art, dance, performance, non-narrative forms, interactive art and installation art. Focus on works that use music/sound and image as equal partners. Limited enrollment. Prerequisites: consent of instructors, and one of FILMPROD 114, ARTSTUDI 131, 138, 167, 177, 179, or MUSIC 123, or equivalent.

3-4 units, Win (DeMarinis, P; Kapuscinski, J)

**MUSIC 256A. Music, Computing, and Design I: Software Paradigms for Computer Music**

(Same as CS 476A) Software design and implementation for computer audio. Strategies, best practices, and tradeoffs in building audio software systems of various sizes (S, M, L, XL), with a focus on interactive (real-time) systems. Lectures examine high-level designs as well as dissect code in a hands-on manner. Course work includes small programming assignments and a final software project. This course is the prerequisite for MUSIC 256B. Prerequisite: experience in C/C++ and/or Java.

1-4 units, Aut (Wang, G)

**MUSIC 256B. Music, Computing, Design II: Mobil Music**

(Same as CS 476B) Aesthetic, design, and implementation of mobile music, centered around the modern super smartphones such as the iPhone). Similarities and intrinsic differences between mobile and traditional computing and design for music. Topics include mobile software design, social and cloud computing, mobile interface design, and programming phones, in the service of music. Prerequisite: MUSIC 256A.

1-4 units, Win (Wang, G)

**MUSIC 260. Music of South Asia**

Focuses on the history, theory, and practice of South Asian music with particular emphasis on the classical traditions of North and South India. Also addresses regional folk, popular, and devotional musical styles of India, Pakistan, and Afghanistan. Topics include: raga, tala, vocal and instrumental genres, improvisation, aesthetics, music transmission, musical nationalism, social organization of musicians, music and ritual, music and gender, and technology. Lecture with discussion, some singing (no experience necessary), guest performances, reading, listening, and analysis.

3-4 units, not given this year

**MUSIC 269. Research in Performance Practices**

Directed reading and research. May be repeated for credit a total of 5 times.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**MUSIC 272A. Advanced Piano**

Private lessons and group masterclass weekly. May be repeated for credit a total of 14 times.

1-3 units, Aut (Barth, G), Win (Barth, G), Spr (Barth, G)

**MUSIC 272B. Advanced Organ**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Morgan, R), Win (Morgan, R), Spr (Morgan, R)

**MUSIC 272C. Advanced Harpsichord**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Thornburgh, E), Win (Thornburgh, E), Spr (Thornburgh, E)

**MUSIC 272D. Advanced Jazz Piano**

By invitation only; priority to majors and jazz-ensemble participants. May be repeated for credit a total of 14 times.

1-3 units, Aut (Low, M), Win (Low, M), Spr (Low, M)

**MUSIC 272E. Advanced Fortepiano**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Barth, G), Win (Barth, G), Spr (Barth, G)

**MUSIC 272F. Advanced Carillon**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Zerlang, T), Win (Zerlang, T), Spr (Zerlang, T)

**MUSIC 273. Advanced Voice**

May be repeated for credit.

1-3 units, Aut (Giovannetti, C), Win (Giovannetti, C), Spr (Giovannetti, C)

**MUSIC 274A. Advanced Violin**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**MUSIC 274B. Advanced Viola**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Robertson, L), Win (Robertson, L), Spr (Robertson, L)

**MUSIC 274C. Advanced Violoncello**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Harrison, S), Win (Harrison, S), Spr (Harrison, S)

**MUSIC 274D. Advanced Contrabass**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Moyer, B), Win (Moyer, B), Spr (Moyer, B)

**MUSIC 274E. Advanced Viola da Gamba**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Dornenburg, J), Win (Dornenburg, J), Spr (Dornenburg, J)

**MUSIC 274F. Advanced Classical Guitar**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Ferguson, C), Win (Ferguson, C), Spr (Ferguson, C)

**MUSIC 274G. Advanced Harp**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Chauvel, M), Win (Chauvel, M), Spr (Chauvel, M)

**MUSIC 274H. Advanced Baroque Violin**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Martin, A), Win (Martin, A), Spr (Martin, A)

**MUSIC 274I. Advanced Jazz Bass**

1-3 units, Aut (McCain, J), Win (McCain, J), Spr (McCain, J)

**MUSIC 274J. Advanced Jazz Guitar**

Individual lessons in jazz guitar

1-3 units, Aut (Vandivier, R), Win (Vandivier, R), Spr (Vandivier, R)

**MUSIC 275A. Advanced Flute**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Hawley, A), Win (Hawley, A), Spr (Hawley, A)

**MUSIC 275B. Advanced Oboe**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Mitchell, P), Win (Matheson, J), Spr (Matheson, J)

**MUSIC 275C. Advanced Clarinet**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Brandenburg, M), Win (Brandenburg, M), Spr (Brandenburg, M)

**MUSIC 275D. Advanced Bassoon**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Olivier, R), Win (Olivier, R), Spr (Olivier, R)

**MUSIC 275E. Advanced Recorder/Renaissance Wind Instruments**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Myers, H), Win (Myers, H), Spr (Myers, H)

**MUSIC 275F. Advanced Saxophone**

May be repeated for credit a total of 14 times.

1-3 units, Aut (McCarthy, C), Win (McCarthy, C), Spr (McCarthy, C)

**MUSIC 275G. Advanced Baroque Flute**

May be repeated for credit a total of 14 times.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**MUSIC 276A. Advanced French Horn**

May be repeated for credit a total of 14 times.  
*1-3 units, Aut (Ragent, L), Win (Ragent, L), Spr (Ragent, L)*

**MUSIC 276B. Advanced Trumpet**

May be repeated for credit a total of 14 times.  
*1-3 units, Aut (Johnson-Hamilton, J), Win (Johnson-Hamilton, J), Spr (Johnson-Hamilton, J)*

**MUSIC 276C. Advanced Trombone**

May be repeated for credit a total of 14 times.  
*1-3 units, Aut (Kenley, M), Win (Kenley, M), Spr (Kenley, M)*

**MUSIC 276D. Advanced Tuba**

May be repeated for credit a total of 14 times.  
*1-3 units, Aut (Clements, A), Win (Clements, A), Spr (Clements, A)*

**MUSIC 277. Advanced Percussion**

May be repeated for credit a total of 14 times.  
*1-3 units, Aut (Veregge, M), Win (Veregge, M), Spr (Veregge, M)*

**MUSIC 280. TA Training Course**

Required for doctoral students serving as teaching assistants. Orientation to resources at Stanford, guest presentations on the principles of common teaching activities, supervised teaching experience. Students who entered in the Autumn should take 280 in the Spring prior to the Autumn they begin teaching.  
*1 unit, Spr (Sloan, N; Saiki, J)*

**MUSIC 300A. Medieval Notation**

Western notation of the Middle Ages and Renaissance: principles, purposes, and transcription.  
*4 units, Spr (Mahrt, W), alternate years, not given next year*

**MUSIC 300B. Renaissance Notation**

Western notation of the Middle Ages and Renaissance: principles, purposes, and transcription.  
*4 units, alternate years, not given this year*

**MUSIC 301A. Analysis of Music: Modal**

*4 units, Win (Mahrt, W)*

**MUSIC 301B. Analysis of Music: Tonal**

*4 units, Aut (Barth, G)*

**MUSIC 301C. Analysis of Music: Post-Tonal**

Current analytical trends, issues, and methods.  
*4 units, Spr (Ferneyhough, B)*

**MUSIC 302. Research in Musicology**

Directed reading and research. May be repeated for credit a total of 14 times.  
*1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**MUSIC 310. Research Seminar in Musicology**

For graduate students. Topics vary each quarter. May be repeated for credit a total of 8 times.  
*3-5 units, Aut (Schulz, A), Win (Hadlock, H), Spr (Hinton, S)*

**MUSIC 312A. Aesthetics and Criticism of Music, Ancients and Moderns: Plato to Nietzsche**

For graduate students. Primary texts focusing on the nature, purposes, and uses of music and other arts.  
*4 units, alternate years, not given this year*

**MUSIC 312B. Aesthetics and Criticism of Music, Contemporaries: Heidegger to Today**

For graduate students. Primary texts focusing on the nature, purposes, and uses of music and other arts.  
*4 units, alternate years, not given this year*

**MUSIC 318. Advanced Acoustics**

Current topics. May be repeated for credit.  
*1-5 units, not given this year*

**MUSIC 319. Research Seminar on Computational Models of Sound Perception**

All aspects of auditory perception, often with emphasis on computational models. Topics: music perception, signal processing, auditory models, pitch perception, speech, binaural hearing, auditory scene analysis, basic psychoacoustics, and neurophysiology. See <http://ccrma.stanford.edu/courses/>. May be repeated for credit a total of 14 times.  
*1-3 units, Aut (Slaney, M), Win (Slaney, M), Spr (Slaney, M)*

**MUSIC 320. Introduction to Digital Audio Signal Processing**

Digital signal processing for music and audio research. Topics: complex numbers, sinusoids, spectrum representation, sampling and aliasing, digital filters, frequency response, z transforms, transfer-function analysis, and associated Matlab software. See <http://ccrma.stanford.edu/courses/320/>.  
*3-4 units, Aut (Abel, J; Berners, D)*

**MUSIC 321. Readings in Music Theory**

Directed reading and research. May be repeated for credit a total of 5 times.  
*1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**MUSIC 323. Doctoral Seminar in Composition**

Illustrated discussions of compositional issues and techniques. Presentation of relevant topics, including students' own compositional practice. May be repeated for credit a total of 14 times.  
*3-4 units, Aut (Applebaum, M), Win (Ferneyhough, B), Spr (Berger, J)*

**MUSIC 325. Individual Graduate Projects in Composition**

May be repeated for credit.  
*1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**MUSIC 330. Musicology Dissertation Colloquium**

Weekly meetings for all musicology students 4th year and beyond to discuss research and writing strategies, share and critique work in progress, and discuss issues in professional development (preparing abstracts, conference papers, C.V. and job interviews, book reviews, submitting articles for publication). Open to 3rd-year students.  
*1-4 units, Spr (Grey, T)*

**MUSIC 341. Ph.D Dissertation**

May be repeated for credit a total of 5 times.  
*1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**MUSIC 351. Seminar in Music Perception and Cognition**

A seminar on topics in music perception and cognition. Students will study and discuss recent research as well as design and implement experiments.  
*1-3 units, Aut (Berger, J), Win (Berger, J), Spr (Berger, J)*

**MUSIC 390. Practicum Internship**

On-the-job training under the guidance of experienced, on-site supervisors. Meets the requirements for curricular practical training for students on F-1 visas. Students submit a concise report detailing work activities, problems worked on, and key results. May be repeated for credit. Prerequisite: qualified offer of employment and consent of adviser.  
*1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**MUSIC 399. D.M.A. Final Project**

May be repeated for credit a total of 5 times.  
*1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**MUSIC 420A. Signal Processing Models in Musical Acoustics**

Computational methods in musical sound synthesis and digital audio effects based on acoustic physical models. Topics: acoustic simulation with delay lines, digital filters, and nonlinear elements; comb filters; allpass filters; artificial reverberation; delay-line interpolation and sampling-rate conversion; phasing, flanging, and chorus effects; efficient computational models of strings, woodwinds, brasses, and other musical instruments. See <http://ccrma.stanford.edu/courses/420/>. Prerequisites: 320 or equivalent; PHYSICS 21 or equivalent course applying Newton's laws of motion; and CS 106B or equivalent programming in C and C++.  
*3-4 units, alternate years, not given this year*

**MUSIC 420B. Software for Sound Synthesis and Audio Effects**

Preferred software embodiments for digital sound synthesis and audio effects. Topics: The Faust language for audio signal processing, effects programming, plugin generation for various platforms, software components for stringed and wind musical instruments, delay effects, variable filters, and nonlinear effects such as compression and distortion. The principal activity is a software project due at the end of the quarter. Prerequisite: Music 420A or equivalent experience with audio signal processing in C++.  
 Recommended Corequisite: Music 424  
*1-10 units, alternate years, not given this year*

**MUSIC 421A. Audio Applications of the Fast Fourier**

**Transform (FFT)**

Spectrum analysis and signal processing using Fast Fourier Transforms (FFTs) with emphasis on audio applications. Topics: Fourier theorems; FFT windows; spectrum analysis; spectrograms; sinusoidal modeling; spectral modeling synthesis; FFT convolution; FIR filter design and system identification; overlap-add and filter-bank-summation methods for short-time Fourier analysis, modification, and resynthesis. See <http://ccrma.stanford.edu/courses/421/>. Prerequisite: Music 320 or equivalent background in spectrum analysis and linear systems.

3-4 units, Win (Smith, J)

**MUSIC 421B. Projects in Spectral Audio Signal Processing**

Frequency-domain methods for analysis and/or synthesis of sound. The principal activity is a software project. Continuing 421A, additional frequency-domain techniques for analysis, modification, and/or synthesis of audio signals will be discussed.

1-10 units, Spr (Smith, J), alternate years, not given next year

**MUSIC 422. Perceptual Audio Coding**

History and basic principles: development of psychoacoustics-based data-compression techniques; perceptual-audio-coder applications (radio, television, film, multimedia/internet audio, DVD, EMD). In-class demonstrations: state-of-the-art audio coder implementations (such as AC-3, MPEG) at varying data rates; programming simple coders. Topics: audio signals representation; quantization; time to frequency mapping; introduction to psychoacoustics; bit allocation and basic building blocks of an audio codec; perceptual audio codecs evaluation; overview of MPEG-1, 2, 4 audio coding and other coding standards (such as AC-3). Prerequisites: knowledge of digital audio principles, familiarity with C programming. Recommended: 320, EE 261. See <http://ccrma.stanford.edu/>.

3 units, Win (Bosi-Goldberg, M)

**MUSIC 423. Signal Processing Research**

Graduate research seminar. Problems in music and/or audio signal processing. Presentation of research-in-progress by graduate students, visiting scholars, and CCRMA faculty. See <http://ccrma.stanford.edu/courses/423/>. May be repeated for credit a total of 11 times.

1-4 units, Aut (Abel, J; Berners, D)

**MUSIC 424. Signal Processing Techniques for Digital Audio Effects**

Techniques for dynamic range compression, reverberation, equalization and filtering, panning and spatialization, digital emulation of analog processors, and implementation of time-varying effects. Single-band and multiband compressors, limiters, noise gates, de-essers, convolutional reverberators, parametric and linear-phase equalizers, wah-wah and envelope-following filters, and the Leslie. Students develop effects algorithms of their own design in labs. Prerequisites: digital signal processing, sampling theorem, digital filtering, and the Fourier transform at the level of 320 or EE 261; Matlab and modest C programming experience. Recommended: 420 or EE 264; audio effects in mixing and mastering at the level of 192.

3-4 units, Spr (Berners, D; Abel, J)

## NATIVE AMERICAN STUDIES (NATIVEAM) COURSES

### UNDERGRADUATE COURSES IN NATIVE AMERICAN STUDIES

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**NATIVEAM 16. Native Americans in the 21st Century: Encounters, Identity, and Sovereignty in Contemporary America**

(Same as ANTHRO 16) What does it mean to be a Native American in the 21st century? Beyond traditional portrayals of military conquests, cultural collapse, and assimilation, the relationships between Native Americans and American society. Focus is on three themes leading to in-class moot court trials:

colonial encounters and colonizing discourses; frontiers and boundaries; and sovereignty of self and nation. Topics include gender in native communities, American Indian law, readings by native authors, and Indians in film and popular culture. GER:DB-SocSci, EC-AmerCul

5 units, Win (Wilcox, M)

**NATIVEAM 109B. Indian Country Economic Development**

(Same as CSRE 109B) The history of competing tribal and Western economic models, and the legal, political, social, and cultural implications for tribal economic development. Case studies include mineral resource extraction, gaming, and cultural tourism. 21st-century strategies for sustainable economic development and protection of political and cultural sovereignty.

5 units, Spr (Biestman, K)

**NATIVEAM 117S. History of California Indians**

(Same as CSRE 117S, HISTORY 250A) Demographic, political, and economic history of California Indians, 1700s-1950s. Processes and events leading to the destruction of California tribes, and their effects on the groups who survived. Geographic and cultural diversity. Spanish, Mexican, and Anglo-American periods. The mission system. GER:EC-AmerCul

5 units, not given this year

**NATIVEAM 120. Native American Writers, 1880-1920**

(Same as CSRE 120) The period of time-1880 to 1920-is a time when many important events in American Indian history occurred. Hoxie's historical work provides a framework for analyzing what effects these policies had on American Indian people. His work does not provide an American Indian perspective; he stated at the onset, that this was not an objective in this study. His main objective was to present a study that shows Indians' relations with whites as a clash of two complex cultures from a white point of view (Hoxie xxi). Three American Indians writing during this time period provide the needed Indian perspective lacking in Hoxie's work.

5 units, not given this year

**NATIVEAM 124. Gender in Native American Societies**

Seminar examines the impact of colonialism on gender roles & gender relations in American Indian communities beginning with the 17th century. Topics include demographic changes, social transformations associated with major subsistence and settlement changes, biological and spiritual assaults, economic transformations and the dynamism of native societies. Sources include history, ethnography, biography, autobiography and the novel.

5 units, Aut (Anderson, J)

**NATIVEAM 138. American Indians in Comparative Historical Perspective**

(Same as SOC 138, SOC 238) (Graduate students register for 238.) Demographic, political, and economic processes and events that shaped relations between Euro-Americans and American Indians, 1600-1890. How the intersection of these processes affected the outcome of conflicts between these two groups, and how this conflict was decisive in determining the social position of American Indians in the late 19th century and the evolution of the doctrine of tribal sovereignty. GER:DB-SocSci, EC-AmerCul

5 units, Win (Staff)

**NATIVEAM 139. American Indians in Contemporary Society**

(Same as SOC 139, SOC 239) (Graduate students register for 239.) The social position of American Indians in contemporary American society, 1890 to the present. The demographic resurgence of American Indians, changes in social and economic status, ethnic identification and political mobilization, and institutions such as tribal governments and the Bureau of Indian Affairs. Recommended: 138 or a course in American history. GER:DB-SocSci, EC-AmerCul

5 units, not given this year

**NATIVEAM 143A. American Indian Mythology, Legend, and Lore**

(Same as ENGLISH 43A, ENGLISH 143A) (English majors and others taking 5 units, register for 143A.) Readings from American Indian literatures, old and new. Stories, songs, and rituals from the 19th century, including the Navajo Night Chant. Tricksters and trickster stories; war, healing, and hunting songs; Aztec songs from the 16th century. Readings from modern poets and novelists

including N. Scott Momaday, Louise Erdrich, and Leslie Marmon Silko, and the classic autobiography, *Black Elk Speaks*. GER:DB-Hum

3-5 units, Aut (Fields, K)

**NATIVEAM 200R. Directed Research**

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**NATIVEAM 200W. Directed Reading**

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

## GRADUATE COURSES IN NATIVE AMERICAN STUDIES

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**NATIVEAM 240. Psychology and American Indian Mental Health**

(Same as EDUC 340) Western medicine's definition of health as the absence of sickness, disease, or pathology; Native American cultures' definition of health as the beauty of physical, spiritual, emotional, and social things, and sickness as something out of balance. Topics include: historical trauma; spirituality and healing; cultural identity; values and acculturation; and individual, school, and community-based interventions. Prerequisite: experience working with American Indian communities.

3-5 units, not given this year

## NEUROBIOLOGY (NBIO) COURSES

### UNDERGRADUATE COURSES IN NEUROBIOLOGY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**NBIO 101. Social and Ethical Issues in the Neurosciences**

(Same as NBIO 201) Influences on public debate and policy of scientific advances in the study of the brain and behavior: theories of brain function; philosophical and scientific approaches; advances in the neurosciences, possible uses in medical therapy, and interventions involving genetic screening, genetic selection, enhancement of neurological functioning, and manipulation of behavior; questions related to medical therapy, social policy, and broader considerations of human nature such as consciousness, free will, personal identity, and moral responsibility. May be taken for 2 units without a research paper. Prerequisite: Neuroscience, Biology, or Symbolic Systems major; or Human Biology core; or consent of instructor.

2-4 units, Spr (Staff)

**NBIO 198. Directed Reading in Neurobiology**

Prerequisite: consent of instructor. (Staff)

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**NBIO 199. Undergraduate Research**

Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GRADUATE COURSES IN NEUROBIOLOGY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**NBIO 201. Social and Ethical Issues in the Neurosciences**

(Same as NBIO 101) Influences on public debate and policy of scientific advances in the study of the brain and behavior: theories of brain function; philosophical and scientific approaches; advances in the neurosciences, possible uses in medical therapy, and interventions involving genetic screening, genetic selection, enhancement of neurological functioning, and manipulation of behavior; questions related to medical therapy, social policy, and broader considerations of human nature such as consciousness, free will, personal identity, and moral responsibility. May be taken

for 2 units without a research paper. Prerequisite: Neuroscience, Biology, or Symbolic Systems major; or Human Biology core; or consent of instructor.

2-4 units, Spr (Staff)

**NBIO 206. The Nervous System**

Structure and function of the nervous system, including neuroanatomy, neurophysiology, and systems neurobiology. Topics include the properties of neurons and the mechanisms and organization underlying higher functions. Framework for general work in neurology, neuropathology, clinical medicine, and for more advanced work in neurobiology. Lecture and lab components must be taken together.

7-8 units, Win (Moore, T)

**NBIO 216. Genetic Analysis of Behavior**

(Same as MCP 216) Advanced seminar. Findings and implications of behavioral genetics as applied to invertebrate and vertebrate model systems. Topics include biological clocks, and sensation and central pattern generators. Relevant genetic techniques and historical perspective. Student presentation.

4 units, alternate years, not given this year

**NBIO 218. Neural Basis of Behavior**

Advanced seminar. The principles of information processing in the nervous system and the relationship of functional properties of neural systems with perception, behavior, and learning. Original papers; student presentations. Prerequisite: NBIO 206 or consent of instructor.

5 units, alternate years, not given this year

**NBIO 220. Central Mechanisms in Vision-based Cognition**

Contemporary visual neuroscience, emphasizing the neural mechanisms underlying primate vision and visually guided behavior. Seven foundational topics in visual neuroscience; current papers concerning each topic. Student presentations. Computer-based demonstration exercises.

2-4 units, alternate years, not given this year

**NBIO 221. Frontiers in Translational Medicine**

Small group course for first year MSTP and Master's in Medicine students only. Focus is on pathways for combining science and medicine during graduate and postdoctoral training and in one's career, and practical aspects of translational medicine. Guest lecturers are physician-scientists who have advanced the frontiers of translational medicine. Previous lecturers have included Drs. Gilbert Chu, Jamie Topper, Irv Weissman, Beverly Mitchell, Geoff Duyk, William Mobley, Judy Shizuru, Carla Shatz, Linda Boxer and David Cox. Prerequisite: consent of instructor.

1 unit, Spr (Staff)

**NBIO 227. Understanding Techniques in Neuroscience**

Techniques commonly used in the field of neuroscience, including molecular/genetic, electrophysiological, and whole brain imaging. Presentations by senior graduate students and examples from the literature. Optional laboratory demonstrations.

2 units, Aut (Pradhan, S; Adelson, J; Squire, R; Newsome, W)

**NBIO 228. Mathematical Tools for Neuroscience**

Student-instructed. For students with no math background beyond basic calculus, or as a review for more advanced students. Techniques useful for analysis of neural data including linear algebra, Fourier transforms, probability and statistics, signal detection, Bayesian inference, and information theory.

1-3 units, not given this year

**NBIO 254. Molecular and Cellular Neurobiology**

(Same as BIO 254) For graduate students. Includes lectures for BIO 154. Cellular and molecular mechanisms in the organization and functions of the nervous system. Topics: wiring of the neuronal circuit, synapse structure and synaptic transmission, signal transduction in the nervous system, sensory systems, molecular basis of behavior including learning and memory, molecular pathogenesis of neurological diseases.

5 units, alternate years, not given this year

**NBIO 258. Information and Signaling Mechanisms in Neurons and Circuits**

How synapses, cells, and neural circuits process information relevant to a behaving organism. How phenomena of information processing emerge at several levels of complexity in the nervous system, including sensory transduction in molecular cascades,

information transmission through axons and synapses, plasticity and feedback in recurrent circuits, and encoding of sensory stimuli in neural circuits.

*4 units, Aut (Baccus, S)*

#### **NBIO 299. Directed Reading in Neurobiology**

Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **NBIO 300. Professional Development and Integrity in Neuroscience**

Required of Neurosciences Ph.D. students every quarter. Develops professional skills in critical assessment and oral presentation of findings from current neuroscience literature in the visual presentation of quantitative data and writing research grants. The role of animals in lab research, fraud in science, the responsibility of authors and reviewers, science in a multicultural environment, and the relationship between student and mentor. Student and faculty presentations and discussions.

*1-2 units, Aut (Baccus, S), Win (Baccus, S), Spr (Baccus, S)*

#### **NBIO 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

*4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **NBIO 399. Graduate Research**

Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## NEUROLOGY AND NEUROLOGICAL SCIENCES (NENS) COURSES

### UNDERGRADUATE COURSES IN NEUROLOGY AND NEUROLOGICAL SCIENCES

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **NENS 25SI. Discoveries and Debates in Neuroscience Research**

Contradictory results and models in the accelerating field of neuroscience research. Critical examination of controversial topics: the genetic determination of intelligence, the neurobiological correlates of consciousness, adult neural stem cell function and therapeutic potential, interpretation of cognitive tests in animals, the origin of brain tumors, the biology of addiction, and gender differences in brain function and disease. How to analyze scientific experiments and models with a critical eye.

*1-2 units, Win (Staff)*

#### **NENS 67N. Intracellular Trafficking and Neurodegeneration**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Cell structures and functions, the intracellular trafficking system that maintains exchanges of materials and information inside cells, and clinical features and pathologies of neurodegenerative diseases. Techniques for examining cellular and subcellular structures, especially cytoskeletons; functional insights generated from structural explorations. Prerequisite: high school biology.

*3 units, Spr (Yang, Y)*

#### **NENS 199. Undergraduate Research**

Students undertake research sponsored by an individual faculty member. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### GRADUATE COURSES IN NEUROLOGY AND NEUROLOGICAL SCIENCES

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **NENS 202. Longevity**

(Same as HUMBIO 149L, PSYCH 102) Interdisciplinary. Challenges to and solutions for the young from increased human life expectancy: health care, financial markets, families, work, and politics. Guest lectures from engineers, economists, geneticists, and physiologists.

*4 units, Win (Carstensen, L; Rando, T)*

#### **NENS 204. Stroke Seminar**

Standing at the intersection of many fields of medicine, including neurology, internal medicine, cerebrovascular surgery, diagnostic and interventional radiology, and emergency medicine, as the third leading cause of death and the leading cause of disability, stroke is a critical topic for all practitioners of medicine. This seminar draws upon Stanford's leaders in stroke research to present and discuss the causes, presentation, treatment, and imaging characteristics of the disease.

*1 unit, Win (Lansberg, M)*

#### **NENS 205. Neurobiology of Disease Seminar**

Case demonstrations of selected disorders, discussion of the pathophysiological basis of the disorder, presentation of the basic principles underlying modern diagnostic and therapeutic management, and a discussion of recent research advances for each disease entity. Prerequisite: Neurobiology 206 or consent of instructor.

*3 units, alternate years, not given this year*

#### **NENS 206. Introduction to Neurology Seminar**

Exploration of aspects of neurology, including subspecialties. Current issues, clinical cases, and opportunities in the field.

*1 unit, Aut (Reimer, R; Jafari, A)*

#### **NENS 220. Computational Neuroscience**

Computational approaches to neuroscience applied at levels ranging from neurons to networks. Addresses two central questions of neural computation: How do neurons compute; and how do networks of neurons encode/decode and store information? Focus is on biophysical (Hodgkin-Huxley) models of neurons and circuits, with emphasis on application of commonly available modeling tools (NEURON, MATLAB) to issues of neuronal and network excitability. Issues relevant to neural encoding and decoding, information theory, plasticity, and learning. Fundamental concepts of neuronal computation; discussion focus is on relevant literature examples of proper application of these techniques. Final project. Recommended for Neuroscience Program graduate students; open to graduate, medical, and advanced undergraduate students with consent of instructor. Prerequisite: NBIO 206. Recommended: facility with linear algebra and calculus.

*4 units, alternate years, not given this year*

#### **NENS 230. Analysis Techniques for Neuroscience Using MATLAB**

Data analysis and visualization techniques commonly encountered in neuroscience research. Fundamentals of the MATLAB computing environment, programming and debugging, data import/export, data structures, plotting, simple image processing, introduction to statistical tools. Assumes no programming background. Examples and assignments draw from a range of topics in neuroscience, for example, event detection in patch-clamp recordings, spike-triggered averages, spike rasters and PSTHS, cell counting in fluorescence images, regressions, and PCA. Assignments are practical in nature, demonstrating how to implement specific analyses that a neuroscience student is likely to encounter. The skills taught are broadly applicable and a neuroscience background is not necessary.

*2 units, Aut (O'Shea, D; Stavisky, S; Huguenard, J)*

#### **NENS 267. Molecular Mechanisms of Neurodegenerative Disease**

(Same as BIO 267) The epidemic of neurodegenerative disorders such as Alzheimer's and Parkinson's disease occasioned by an aging human population. Genetic, molecular, and cellular mechanisms. Clinical aspects through case presentations.

*4 units, Win (Kopito, R; Wyss-Coray, A; Reimer, R), alternate years, not given next year*

#### **NENS 299. Directed Reading in Neurology and Neurological Science**

Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **NENS 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

*4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **NENS 399. Graduate Research**

Students undertake research sponsored by individual faculty members. Includes laboratory work in neurophysiology and neurochemistry.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **NENS 801. TGR Project**

*0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **NENS 802. TGR Dissertation**

*0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## NEUROSCIENCES PROGRAM (NEPR) COURSES

### **GRADUATE COURSES IN NEUROSCIENCES PROGRAM**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **NEPR 299. Directed Reading in Neurosciences**

Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **NEPR 399. Graduate Research**

Student Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **NEPR 801. TGR Project**

*0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **NEPR 802. TGR Dissertation**

*0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## NEUROSURGERY (NSUR) COURSES

### **UNDERGRADUATE COURSES IN NEUROSURGERY**

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **NSUR 70Q. Experimental Stroke**

(F,Dial) Stanford Introductory Dialogue. Preference to sophomores. How stroke is studied in the laboratory; advances in stroke research over the last two decades; and future directions. Topics include: cellular and molecular mechanisms of neuronal death and survival in the brain after stroke, including necrosis, apoptosis, inflammation, and cell signaling pathways; experimental tools for stroke treatment, such as gene therapy, cell therapy, hypothermia, preconditioning, postconditioning, and other pharmacological treatments; the gap and barrier between laboratory research and clinical translation.

*2 units, Spr (Zhao, H)*

#### **NSUR 199. Undergraduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **GRADUATE COURSES IN NEUROSURGERY**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **NSUR 261. Principles and Practice of Stem Cell Engineering**

(Same as BIOE 261) Quantitative models used to characterize incorporation of new cells into existing tissues emphasizing pluripotent cells such as embryonic and neural stem cells. Molecular methods to control stem cell decisions to self-renew, differentiate, die, or become quiescent. Practical, industrial, and ethical aspects of stem cell technology application. Final projects: team-reviewed grants and business proposals.

*3 units, not given this year*

#### **NSUR 278A. From Science to Business: Innovation in Neurologic Disease Beyond Neurosurgery**

For medical, business, and engineering students. The process of innovation and company building in the medical field, emphasizing the neurosciences. Overview of neurological diseases; business and regulatory aspects of device and biotech product development. Guest speakers on healthcare entrepreneurship. Venture capital and entrepreneurial mentors guide interdisciplinary student teams in evaluating a solution to an unmet clinical need or a project within a biotech company. May be taken for 2 units without the team project.

*2-4 units, Win (Kallmeyer, V)*

#### **NSUR 278B. Independent Study on Healthcare Innovation and Entrepreneurship**

Continuation of NSUR 278A for students wishing to work on actual strategy and implementation of their idea developed in 278A or, more generally, for students who wish to develop a strategic plan for a specific healthcare (drug or device) venture. May be taken concurrently with 278A.

*2-4 units, Win (Kallmeyer, V), Spr (Staff)*

#### **NSUR 279. Concepts in Drug Delivery and Drug Device Combinations**

Open to all graduate students. Issues relating to drug-device combination products, including review of recently approved products such as cardiac stent, and development, regulatory, and reimbursement issues. Emphasis is on market evaluation, product development, and regulatory strategies. Lecture only for 2 units; project for 4 units.

*2-4 units, not given this year*

#### **NSUR 280. Early Clinical Experience in Neurosurgery**

Provides an observational experience as formulated by the instructor and student. Prerequisite: consent of instructor.

*1-2 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **NSUR 299. Directed Reading in Neurosurgery**

Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **NSUR 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

*4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **NSUR 399. Graduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## OBSTETRICS AND GYNECOLOGY (OBGYN) COURSES

### **UNDERGRADUATE COURSES IN OBSTETRICS AND GYNECOLOGY**

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **OBGYN 27SI. Alternative Spring Break: For the Sake of Women- Disparities in Women's Health and Health Policy**

Examines health disparities that uniquely affect women from the perspectives of health care providers, health educators, advocates, and policymakers. Current research in women's health, ranging from traditional women's issues such as reproductive and maternal

health to nontraditional topics including cardiovascular and autoimmune diseases; accessibility and quality concerns; allocation of resources dedicated to the health of women.

*1 unit, Win (Staff)*

#### **OBGYN 199. Undergraduate Research in Reproductive Biology**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **GRADUATE COURSES IN OBSTETRICS AND GYNECOLOGY**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **OBGYN 202. Assisted Reproductive Technologies**

(Same as DBIO 202, HUMBIO 150A) Primary and current literature in basic and clinical science aspects of assisted reproductive technologies (ART), and demonstrations of current ART techniques including in vitro fertilization and embryo culture, and micromanipulation procedures such as intracytoplasmic sperm injection and embryo biopsy and cryopreservation. Class only may be taken for 1 unit. 2 units includes papers and attendance at clinical demonstrations. 3 units includes a term paper. Recommended: DBIO 201, or consent of instructors.

*1-3 units, Win (Staff)*

#### **OBGYN 216. Current Issues in Reproductive Health**

Reproductive Health is a broad subject encompassing many concepts and practices. Issues and services within the context of reproductive health include such diverse topics as fertility, pregnancy, contraception, abortion, sexuality, menopause and parenting. This course focuses on topics related to abortion services, fertility and contraception; current research and practices in family planning; legislation and issues of access. Sponsored by Medical Students for Choice.

*1 unit, Win (Druzin, M)*

#### **OBGYN 230. Women's Health Medical Forum**

Required for the Women's Health Scholarly Concentration. Ten seminars featuring a Women's Health research presentation (by faculty or student), followed by discussion. Emphasis is on topics related to the five Stanford Institutes of Medicine (cardiovascular; cancer; stem cell; neurosciences; and immunity), and the subspecialties of Obstetrics & Gynecology. Assigned readings and related papers.

*1 unit, Aut (Westphal, L), Win (Westphal, L), Spr (Staff)*

#### **OBGYN 240. Sex Differences in Human Physiology and Disease**

(Same as HUMBIO 140, MED 240) Chromosomal and hormonal influences on cells, tissues, and organs that underlie the development of reproductive organs and sexual dimorphism of the neuroendocrine system. Effects of endogenous and exogenous sex hormones and environmental factors that differ between men and women on the musculoskeletal, neurological, cardiovascular, and immunological systems over the lifecourse, from conception to puberty, through reproductive phases (including changes during the menstrual cycle up to and beyond menopause in women and with aging in men). Transgender health issues. Guest lecturers. Prerequisite: Human Biology core or equivalent, or consent of instructor

*2-3 units, Win (Stefanick, M)*

#### **OBGYN 256. Current Controversies in Women's Health**

(Same as HUMBIO 125) Interdisciplinary. Focus is on the U.S. Topics include: health research; bioethical, legal, and policy issues; scientific and cultural perspectives; social influences; environmental and lifestyle effects on health; and issues related to special populations. Guest lecturers; student debates. Prerequisite: Human Biology core or equivalent, or consent of instructor.

*2-3 units, Spr (Jacobson, M; Stefanick, M)*

#### **OBGYN 280. Early Clinical Experience in Obstetrics and Gynecology**

Provides an observational experience as determined by the instructor and student. Prerequisite: consent of instructor.

*1-2 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **OBGYN 282. Pregnancy, Birth, and Infancy**

(Same as PEDS 282) Comprehensive clinical experience where pre-clinical medical students follow pregnant women receiving care at Stanford hospitals to attend prenatal visits, delivery, and postnatal visits. Continuity clinic format, combined with didactic lessons and discussion seminars. Students are exposed to clinical activities in a meaningful context, bolstering classroom studies in anatomy, physiology, embryology and human development, and emphasizing social, economic, and personal issues related to medicine. This program spans one quarter, covering topics related to pregnancy, labor and delivery and newborn care. In addition to clinic experiences, students are expected to spend 1-2 hours/week in lectures and to complete a reflection of their experiences in the course. Prerequisite: pre-clinical medical student.

*3 units, Spr (Staff)*

#### **OBGYN 299. Directed Reading in Obstetrics and Gynecology**

Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **OBGYN 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

*4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **OBGYN 399. Graduate Research in Reproductive Biology**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## **OPHTHALMOLOGY (OPHT) COURSES**

### **UNDERGRADUATE COURSES IN OPHTHALMOLOGY**

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **OPHT 199. Undergraduate Research**

Allows for qualified students to undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **GRADUATE COURSES IN OPHTHALMOLOGY**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **OPHT 201. Clinical Topics in Ophthalmology**

Introduction to the professional opportunities available to the ophthalmologist in the areas of clinical research, community health, biotech and pharmaceutical development, international blindness prevention, graduate and post-graduate education.

*1 unit, Aut (Fredrick, D)*

#### **OPHT 202. Clinical Topics in Ophthalmology**

(Continuation of 201) Professional opportunities available to the ophthalmologist in the areas of clinical research, community health, biotech and pharmaceutical development, international blindness prevention, graduate and post-graduate education.

*1 unit, not given this year*

#### **OPHT 203. Introduction to Ophthalmology**

(Continuation of 202) Introduction to the practical skills used within the field of ophthalmology. Diagnostic tools and instruments; applications of these tools; practice using instruments under the guidance of faculty and residents; practice in microsurgical techniques with one-on-one guidance.

*1 unit, Spr (Staff)*

#### **OPHT 280. Early Clinical Experience in Ophthalmology**

Provides an observational experience as formulated by the instructor and student. Prerequisite: consent of instructor.

*1-2 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**OPHT 299. Directed Reading in Ophthalmology**

Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**OPHT 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

*4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**OPHT 399. Graduate Research**

Students to undertake investigations sponsored by individual faculty members. Opportunities are available at both predoctoral and postdoctoral levels. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## ORTHOPEDIC SURGERY (ORTHO) COURSES

### UNDERGRADUATE COURSES IN ORTHOPEDIC SURGERY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**ORTHO 97Q. Sport, Exercise, and Health: Exploring Sports Medicine**

(S,Sem) (Same as HUMBIO 97Q) Stanford Introductory Seminar. Preference to sophomores. Sports medicine is the practice of clinical medicine at the interface between health and performance, competition and well-being. While sports medicine had its origins in providing care to athletes, medical advances developed in care of athletes exerted a great effect on the nature and quality of care to the broader community. Topics include sports injuries, medical conditions associated with sport and exercise, ethics, coaching, women's issues, fitness and health, and sports science. Case studies.

*3 units, Aut (Matheson, G), Win (Matheson, G), Spr (Matheson, G)*

**ORTHO 102. Orthopaedic Surgical Anatomy**

(Same as ORTHO 202) Open to medical, graduate and undergraduate students. Opportunity to enhance knowledge of anatomy as it pertains to the practice of Orthopaedic Surgery and to improve dissection skills. Follows the surgical anatomy syllabus used by the Stanford Orthopaedic Surgery Residency Program. Sessions led by Stanford Orthopaedic Surgery attendings and residents. Didactic sessions, prosection review, dissection.

*2 units, Sum (Staff)*

**ORTHO 110. Practical Sports Medicine and Orthopaedic Examination Skills**

(Same as ORTHO 210) Designed for students considering a career in sports medicine, orthopaedics, physical medicine and rehabilitation, emergency medicine, internal medicine or family practice. Focused physical exam skills for common sports and musculoskeletal complaints: shoulder and upper arm; elbow and forearm; hand and wrist; pelvis, hip and thigh; knee; lower leg, foot, and ankle; cervical and thoracic spine; lumbar spine. Each session consists of a lecture and relevant case for that week's topic, including interactive review of anatomy and demonstration and practice of physical exam skills, culminating in an assessment and a plan for the case presented. 1 unit requires preparation for and participation in 5 sessions; 2 units requires preparation for and participation in 8 sessions.

*1-2 units, Spr (Staff)*

**ORTHO 199. Undergraduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### GRADUATE COURSES IN ORTHOPEDIC SURGERY

Primarily for graduate students; undergraduates may enroll with

consent of instructor.

**ORTHO 201. Musculoskeletal Exam Practicum**

Student initiated course. Opportunity to enhance knowledge and skills for conducting musculoskeletal exams. Sessions led by Stanford Orthopaedic Surgery attendings and residents. Didactic introductions followed by hands-on practice of specific aspects of the musculoskeletal exam.

*1 unit, Win (Staff)*

**ORTHO 202. Orthopaedic Surgical Anatomy**

(Same as ORTHO 102) Open to medical, graduate and undergraduate students. Opportunity to enhance knowledge of anatomy as it pertains to the practice of Orthopaedic Surgery and to improve dissection skills. Follows the surgical anatomy syllabus used by the Stanford Orthopaedic Surgery Residency Program. Sessions led by Stanford Orthopaedic Surgery attendings and residents. Didactic sessions, prosection review, dissection.

*2 units, Sum (Staff)*

**ORTHO 210. Practical Sports Medicine and Orthopaedic Examination Skills**

(Same as ORTHO 110) Designed for students considering a career in sports medicine, orthopaedics, physical medicine and rehabilitation, emergency medicine, internal medicine or family practice. Focused physical exam skills for common sports and musculoskeletal complaints: shoulder and upper arm; elbow and forearm; hand and wrist; pelvis, hip and thigh; knee; lower leg, foot, and ankle; cervical and thoracic spine; lumbar spine. Each session consists of a lecture and relevant case for that week's topic, including interactive review of anatomy and demonstration and practice of physical exam skills, culminating in an assessment and a plan for the case presented. 1 unit requires preparation for and participation in 5 sessions; 2 units requires preparation for and participation in 8 sessions.

*1-2 units, Spr (Staff)*

**ORTHO 220. Introduction to Lifestyle Medicine**

Lifestyle medicine is an exciting new movement to empower practicing clinicians and aspiring physicians to facilitate behavioral change and promote a culture of health and wellness in patients. Focus is on both concrete, evidence-based findings and tangible, practical tools to readily translate into everyday clinical practice. A series of leading experts and guest lectures guide students through interactive, patient-focused activities in topics including, but not limited to: nutrition, exercise, sleep, motivational interviewing, meditation, and acupuncture.

*1 unit, Win (Fredericson, M; Chin, J)*

**ORTHO 222. Anatomy of Movement**

Musculoskeletal and neuromuscular anatomy and physiology form the foundation of this multi-disciplinary course. Examines normal motor function and functional deficit from disease or injury. Clinical and scientific perspectives include orthopaedic surgery, neurology, mechanical engineering, computer science, anthropology, and art. Bioengineering challenges that assist or emulate human movement, such as design of an artificial joint or simulation of orthopaedic surgery for cerebral palsy are discussed. Evolution of upright walking and hand anatomy, as it became an instrument of purpose are discussed along with the expression of human movement throughout history in art masterpieces, photography, and animation. Student team projects. Lecture only for 3 units; project for 4 units.

*3-4 units, not given this year*

**ORTHO 260. Tissue Engineering**

(Same as BIOE 260) Principles of tissue engineering and design strategies for practical applications for tissue repair. Topics include tissue components and dynamics, morphogenesis, stem cells, cellular fate processes, cell and tissue characterization, controlled drug and gene delivery, bioreactors, cell-materials interactions, and host integration. Present research proposal to solve a real life tissue engineering problem.

*3 units, Spr (Staff)*

**ORTHO 270. Orthopaedic Tissue Engineering**

Biological principles underlying the use of engineering strategies and biocompatible materials for tissue repair and regeneration. Structure, physiology, and mechanics of articular cartilage, bone, and dense soft connective tissues. Current ideas, approaches, and applications being implemented as therapeutic regimens for

arthritis, spinal deformities, and limb salvage. Multidisciplinary constraints on the design and creation of tissue constructs. Prerequisite: familiarity with basic cell and molecular mechanisms underlying tissue differentiation.

3 units, Win (Staff)

#### **ORTHO 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## OTOLARYNGOLOGY (OTOHNS) COURSES

### UNDERGRADUATE COURSES IN OTOLARYNGOLOGY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **OTOHNS 199. Undergraduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GRADUATE COURSES IN OTOLARYNGOLOGY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **OTOHNS 200. Introduction to Otolaryngology-Head and Neck Surgery**

Seminar series designed to expose students to the field, including its subspecialties and commonly performed procedures. Goals: supplement anatomical knowledge with clinical correlates; understand basic diagnosis, pathophysiology, and management of ENT problems commonly seen in primary care practice; how to perform a thorough head and neck examination. Seminars, given by faculty experts, cover major topics relating to each of the subdivisions within ENT. May be repeated for credit.

1 unit, Spr (Staff)

#### **OTOHNS 299. Directed Reading in Otolaryngology**

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **OTOHNS 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **OTOHNS 399. Graduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## OVERSEAS STUDIES: AUSTRALIA (OSPAUSTL) COURSES

### UNDERGRADUATE COURSES IN OVERSEAS STUDIES: AUSTRALIA

#### **OSPAUSTL 10. Coral Reef Ecosystems—**

Key organisms and processes, and the complexity of coral reef ecosystems. Students explore the Great Barrier Reef from the southern end which demonstrates the physical factors that limit coral reefs, to the northern reef systems which demonstrate key aspects of these high biodiversity ecosystems. Human-related changes. Emphasis is on research experiences and development of

analytical skills. Two units only counted for the Biology major. GER:DB-EngrAppSci

3 units, Aut (Ward, S; Arrigo, K)

#### **OSPAUSTL 20. Coastal Resource Management—**

Problem solving, research, communication, teamwork, and social assessment skills in sustainable coastal zone management. Issues include: ecosystem functions and values at risk under the proposed development in case study; environmental outcomes most desirable for the local stakeholders and how those are defined; features of the human communities and their function as they relate to the management options; tools or mechanisms for a sustainable management outcome. Taught by multidisciplinary team that includes Australian and developing country experts. Two units only counted for the Biology major. GER:DB-EngrAppSci

3 units, Aut (Johnstone, R)

#### **OSPAUSTL 30. Coastal Forest Ecosystems—**

Prehistory of Australian rainforest and how rainforest structure and biodiversity change with altitude, latitude, and geology. Tropical coastal marine wetlands, mangrove forests, and the relationship between land- and sea-based biota. Biology and ecology of marine plants, mangroves, and tropical salt marsh. Introduction to specialized fields of marine plant biology and ecology including biogeography and evolution, aquatic plant ecophysiology, water quality and bioindicator techniques, pollution and eutrophication, and environmental control of marine plant distribution and productivity. Two units only counted for the Biology major. GER:DB-EngrAppSci

3 units, Aut (Baker, C; Lovelock, C)

#### **OSPAUSTL 40. Australian Studies—**

Introduction to Australian society, history, culture, politics, and identity. Social and cultural framework and working understanding of Australia in relationship to the focus on coastal environment in other program courses. Field trips. GER:DB-SocSci, EC-GlobalCom

3 units, Aut (Lilley, I)

#### **OSPAUSTL 50. Targeted Research Project—**

Prior to arriving in Australia, students establish a link with University of Queensland faculty to develop project ideas that combine personal interests and career goals with opportunities presented by the Australian Coastal Studies program, such as how mangrove roots find sediment rich zones of the shore, or the dynamics of ecotourism in southern and northern coastal Queensland. Project report and presentation in Australia.

4 units, Aut (Staff)

#### **OSPBARCL 101. Language and Culture in Catalonia—**

Preparation for students to function in the academic and social environment of Barcelona. Basic listening, reading, and comprehension in Catalan; review of Spanish with focus on writing academic papers and listening to lectures. Introduction to Barcelona with emphasis on contemporary history, culture, and politics. Bilingualism; multiculturalism; varieties of nationalism and globalization in context of Barcelona.

4 units, Aut (Staff)

## OVERSEAS STUDIES: BARCELONA (CASB) (OSPBARCL) COURSES

### UNDERGRADUATE COURSES IN OVERSEAS STUDIES: BARCELONA

#### **OSPBARCL 112. History of Spanish Cinema—**

Socio-political and cultural films as well as some major indigenous films. Meet with Catalan cinema professionals including a filmmaker, a director and a young veteran producer.

5 units, Aut (Staff)

#### **OSPBARCL 121. Unequal Experiences: Women's Lives in Spanish History—**

Analysis of Spanish women's life experiences in past 500 years. Relationship between gender, society, culture, politics and progress in the Spanish context; additionally current debates and perspectives. Use of individual biographies known as life

5 units, Aut (Staff)

**OSPBARCL 164C. Universitat Pompeu Fabra: Natural Science 3—**

Student selection from catalog of Universitat Pompeu Fabra.  
5 units, Aut (Staff)

**OSPBARCL 166A. Universitat Pompeu Fabra: Engineering 1—**

Student selection from catalog of Universitat Pompeu Fabra.  
5 units, Aut (Staff)

**OSPBARCL 166B. Universitat Pompeu Fabra: Engineering 2—**

Student selection from catalog of Universitat Pompeu Fabra.  
5 units, Aut (Staff)

**OSPBARCL 166C. Universitat Pompeu Fabra: Engineering 3—**

Student selection from catalog of Universitat Pompeu Fabra.  
5 units, Aut (Staff)

## OVERSEAS STUDIES: BEIJING (OSPBEIJ) COURSES

### UNDERGRADUATE COURSES IN OVERSEAS STUDIES: BEIJING

**OSPBEIJ 1C. First-Year Modern Chinese, First Quarter—**

Conversation, grammar, reading, elementary composition.  
5 units, Aut (Zhu, X)

**OSPBEIJ 3C. First-Year Modern Chinese, Third Quarter—**

5 units, Spr (Zhu, X)

**OSPBEIJ 6C. Beginning Conversational Chinese, First Quarter—**

Three quarter sequence. Basic language skills in Mandarin to function abroad.  
2 units, Aut (Staff, 1)

**OSPBEIJ 9. Chinese Language Tutorial—**

2 units, Aut (Wang, Y), Spr (Wang, Y)

**OSPBEIJ 10. Beijing Past and Present—**

Introduction to the history, culture, and people of Beijing via field trips to historical sites, old and new neighborhoods, art district and local museums, film and performance in and around Beijing.  
1 unit, Aut (Sun, C)

**OSPBEIJ 17. Chinese Film Studies—**

Stages of Chinese cinema from the establishment of P.R. China in 1949 to the present. State policies, filmmaking trends, representative filmmakers and films, and the state of the industry in the different periods, with close readings of some important films. Historical perspective and broad knowledge of Chinese cinema; academic approaches to film studies. GER:DB-Hum  
4 units, Aut (Qin, L)

**OSPBEIJ 20. Communication, Culture, and Society: The Chinese Way—**

How people communicate, what they achieve through their communications, and the social and cultural consequences of these communicative behaviors. Focus on the interactive relationship between communication, culture and society in China. How communication habits are influenced by the individual's culture and how communication acts help to change and transform the society in which we live. GER:DB-SocSci  
4 units, Spr (Gong, W)

**OSPBEIJ 21C. Second-Year Modern Chinese—**

5 units, Aut (Qian, H)

**OSPBEIJ 23C. Second-Year Modern Chinese—**

5 units, Spr (Chen, L)

**OSPBEIJ 28. Chinese Language, Culture, and Society—**

Introduction to fundamental aspects of Chinese language and culture. Socio-linguistic issues covered include: legends of origin; sound system of modern Standard Chinese; the making of the national standard; dialects; word-formation strategies; the writing

system; language contacts, and neologism. Develop awareness of diverse cultural underpinnings associated with various expressions of the language. Enhance ability to be a more effective learner of Chinese by learning to use the right language at the right time and avoid social awkwardness from saying the wrong thing at the wrong place/time. Prerequisite: CHINLANG 3. GER:DB-SocSci, EC-GlobalCom

4 units, Aut (Sun, C)

**OSPBEIJ 30. History of U.S.-China Relations—**

United States-China relations from the early 19th century to the recent past. Understand the relationship in actual time and circumstance while identifying enduring patterns and relevance for interpreting contemporary problems. Emphasis on the American side of the relationship, with Chinese perspectives included; special attention to the interaction of the two countries. Social and cultural dimensions emphasized to understand the mental context of high-level decision-making and politics. Appreciation of the importance of the human dimension, not just political or military events, in understanding the dynamics between the two countries. GER:DB-Hum

5 units, Spr (Chang, G)

**OSPBEIJ 32. Site, Memory, History: Beijing as Place—**

Examine specific sites in and around Beijing taking advantage of historical sites that offer a unique experience in understanding history. Relationship between sites, current memory, and historical understanding. Textual research and personal interview. Sites include the Foreign Legation quarter, the Marco Polo Bridge, the grave site of Edgar Snow, Tian'anmen Gate, the old and new Summer Palaces. GER:DB-Hum

5 units, Spr (Chang, G)

**OSPBEIJ 40. Research Projects in Chinese Language—**

In-depth sociolinguistic projects on topics, ranging from language change to language loss. Topics may also include an aspect of language policy, language contact, the sound system of a Chinese dialect, or an ethnic language, in-depth study of a certain linguistic construction, its writing system, or any topic of interest that can be sufficiently studied within a time span of three months. Enrollment in OSPBEIJ 28 encouraged. Prerequisite: CHINLANG 23.

3 units, Aut (Staff)

**OSPBEIJ 41. Chinese Society and Business Culture—**

Key features of Chinese society and their applications to Chinese business culture from a sociological perspective. Structural differences between Chinese and U.S. societies and their social, economic, and cultural implications. Emerging patterns in areas such as retailing and consumer behaviors, work relations and management, and business negotiation and collaboration. GER:DB-SocSci, EC-GlobalCom

4 units, Spr (Li, B)

**OSPBEIJ 42. Chinese Media Studies—**

Fundamental changes in Chinese media. Issues such as: how Chinese media emerge and evolve against the background of modern Chinese history; how they interact with government, sponsors, receivers, and other social institutions; and implications for Chinese social development. GER:DB-SocSci, EC-GlobalCom

4 units, Aut (Li, K)

**OSPBEIJ 48. Chinese Literature: Tradition in Transformation—**

Classical Chinese literature from the beginning (ca. 1000 BC) to the 14th century. Primary texts in translation with attention to the poetic works that feature Chinese literary tradition. Understanding of past experience of Chinese people living in another cultural space through observation, analysis, and reconstruction. GER:DB-Hum

4 units, Spr (Zhang, P)

**OSPBEIJ 55. Chinese Economy in Transition—**

From planned regime to market economy: political economy and institutional aspects of China's economic transition and open-door policy. How can China achieve economic success given disadvantages in natural resources, human capital stock, and institutional arrangements? Theoretical economic analysis, empirical data, and case studies. Emergence of China as an economic superpower; major challenges ahead. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Zhou, L)

**OSPBEIJ 66. Essentials of China's Criminal Justice System—** Criminal laws and cases. Topics include criminal legal thinking, liability, prosecution and defense in criminal litigation, death penalty debates, evidence and compulsory measures, and the Chinese prison system. Comparisons with other systems. Human rights protection. GER:DB-SocSci, EC-GlobalCom  
5 units, Aut (Wang, S)

**OSPBEIJ 67. China-Africa and Middle East Relations—** China's relations with the outside world, with a focus on Africa and the Middle East. Historically contextualized relations; evolution of relations within the international climate during different periods, especially in the present; impact of geopolitical and geoeconomic relations on the existing international order. GER:DB-SocSci, EC-GlobalCom  
4 units, Aut (Wang, S; Li, A)

**OSPBEIJ 101C. Third-Year Modern Chinese—**  
5 units, Aut (Zhu, X)

**OSPBEIJ 103C. Third-Year Modern Chinese—**  
5 units, Spr (Zhu, X)

**OSPBEIJ 199A. Directed Reading A—**  
1-4 units, Aut (Staff), Spr (Staff)

**OSPBEIJ 199B. Directed Reading B—**  
1-4 units, Aut (Staff), Spr (Staff)

**OSPBEIJ 211C. Advanced Modern Chinese—**  
5 units, Aut (Wang, Y)

## OVERSEAS STUDIES: BERLIN (OSPBER) COURSES

### UNDERGRADUATE COURSES IN OVERSEAS STUDIES: BERLIN

**OSPBER 1Z. Accelerated German: First and Second Quarters—**  
A jump start to the German language, enabling students with no prior German to study at the Berlin Center. Covers GERLANG 1 and 2 in one quarter.  
8 units, Aut (Wohlfeil, J), Win (Wohlfeil, J)

**OSPBER 2Z. Accelerated German, Second and Third Quarters—**  
Qualifies students for participation in an internship following the study quarter. Emphasis is on communicative patterns in everyday life and in the German work environment, including preparation for interviews.  
8 units, Spr (Wohlfeil, J)

**OSPBER 12. The Politics of Memory—**  
Politics of memorializing WW II focusing on Berlin. How the memory of WW II and its representation became constitutive to the self-consciousness of democratic culture in Germany. What constitutes the nature of collective memory; who has the authority to represent the war; the function of the memorial in public consciousness; and limits of representation of terror or genocide. Theoretical literature on politics of memory. Field trips to memorials. GER:DB-SocSci, EC-GlobalCom  
3 units, Aut (Fonrobert, C)

**OSPBER 13. Jewish and Muslim Berlin—**  
History of Jewish life in Berlin leading up to WW II, focusing on moments of literary and cultural creativity: the Jewish Enlightenment in Berlin; forms of protest against bourgeois German-Jewish culture; and literary, artistic, and political productivity of the interwar period. Cultural relationship between Germans and Jews. These historical dynamics as background to current discussion about the place of Islam and Muslim culture in contemporary Germany and Berlin. Site visits in Berlin. GER:DB-SocSci, EC-GlobalCom  
3 units, Aut (Fonrobert, C)

**OSPBER 14. Clausewitz and Sunzi—**  
Comparison of the basic ideas about warfare and the art of command in the western world with those in China through Clausewitz's *On War* and Sunzi's *Art of War*. Questions include:

how the two texts relate to the respective philosophical traditions from which they emerge; how the nature of both texts is influenced by their position within the long-term, historical development of writings about warfare in the West and the East; why the two texts take a very different approach to violence as an intellectual problem.

3-5 units, Spr (Lewis, M)

**OSPBER 15. Shifting Alliances? The European Union and the U.S.—**

The development of European integration, a model for global security and peace, and a possible replacement for the U.S. position as unilateral superpower. Competing arguments about the state of transatlantic relations. GER:DB-SocSci, EC-GlobalCom  
4-5 units, Spr (Brueckner, U)

**OSPBER 17. Split Images: A Century of Cinema—**  
20th-century German culture through film. The silent era, Weimar, and the instrumentalization of film in the Third Reich. The postwar era: ideological and aesthetic codes of DEFA, new German cinema, and post-Wende filmmaking including *Run Lola Run* and *Goodbye Lenin*. Aesthetic aspects of the films including image composition, camera and editing techniques, and relation between sound and image. GER:DB-Hum, EC-GlobalCom  
4 units, Aut (Kramer, K)

**OSPBER 20. German Film and the Berlin Film Festival—**  
German cinema from the silent era to *das neue Kino*. Weekly screenings with readings on the history of cinema, specific directors, and the larger social and political backdrop. Topics include: Ruttman's modernist look at Berlin; socialist/leftist perspectives of (early) Lang and Brecht; pro-Nazi documentaries of Riefenstahl; *das neue Kino* principals Shlöndorff, Herzog and Fassbinder. During the Berlin Film Festival, we will see over 20 films, focusing on documentaries dealing with global issues (environment, human rights, economic inequality, and liberation movements).  
3-5 units, Win (Rehm, R)

**OSPBER 21B. Intermediate German—**  
Grammar review, vocabulary building, writing, and discussion of German culture, literature, and film. Corequisite: OSPBER 100B.  
5 units, Aut (Biege, M), Win (Boebe, D), Spr (Boebe, D)

**OSPBER 23. Opera in Berlin—**  
Introduction to opera in Berlin. Lectures and discussion preceding opera attendance (at the Deutsche Oper, Staatsoper, and Komische Oper) place the operas in their musical, historical, and cultural contexts, and post-opera discussions deal with specifics of the production, performance, and interpretation in question. No previous knowledge of opera is required, nor must students read music. GER:DB-Hum  
3-5 units, Win (Rehm, R)

**OSPBER 30. Berlin vor Ort: A Field Trip Module—**  
The cultures of Berlin as preserved in museums, monuments, and architecture. Berlin's cityscape as a narrative of its history from baroque palaces to vestiges of E. German communism, from 19th-century industrialism to grim edifices of the Sachsenhausen concentration camp.  
1 unit, Aut (Jander, M), Win (Pabsch, M), Spr (Jander, M)

**OSPBER 40B. Introductory Electronics—**  
Electrical quantities and their measurement, including operation of the oscilloscope. Function of electronic components including resistor, capacitor, and inductor. Analog circuits including the operational amplifier and tuned circuits. Digital logic circuits and their functions. Lab assignments. Prerequisite: PHYSICS 43. GER:DB-EngrAppSci  
5 units, Aut (Howe, R), Win (Howe, R), Spr (Wong, S)

**OSPBER 50. Female Divinities in Europe & China—**  
Forms in which women figured in the spirit world in medieval and early modern Europe compared to the same period in China. The Virgin Mary and the bodhisattva Guanyin provide the primary point of comparison. Points of contrast include: motherhood as a divergent value; relations between the household and the broader social order; distinction between a bad death and martyrdom as a route to divinity; sex as a problem versus the concern with ritual pollution. GER:DB-Hum, EC-Gender  
3-5 units, Spr (Lewis, M)

**OSPBER 50B. Introductory Science of Materials—**

GER:DB-EngrAppSci

4 units, Aut (Staff, I)

**OSPBER 50M. Introductory Science of Materials—**

Topics include: the relationship between atomic structure and macroscopic properties of man-made and natural materials; mechanical and thermodynamic behavior of surgical implants including alloys, ceramics, and polymers; and materials selection for biotechnology applications such as contact lenses, artificial joints, and cardiovascular stents. No prerequisite.

4 units, Win (Staff), Spr (Staff)

**OSPBER 60. Cityscape as History: Architecture and Urban****Design in Berlin—**

Diversity of Berlin's architecture and urban design resulting from its historical background. Architect Ludwig Mies van der Rohe and his artistic ancestors. Role of the cultural exchange between Germany and the U.S. Changing nature of the city from the 19th century to the present. GER:DB-Hum

5 units, Aut (Pabsch, M)

**OSPBER 66. Theory from the Bleachers: Reading German Sports and Culture—**

German culture past and present through the lens of sports. Intellectual, societal, and historical-political contexts. Comparisons to Britain, France, and the U.S. The concepts of Körperkultur, Leistung, Show, Verein, and Haltung. Fair play, the relation of team and individual, production and deconstruction of sports heroes and heroines, and sports nationalism. Sources include sports narrations and images, attendance at sports events, and English and German texts. GER:DB-SocSci

3 units, Win (Junghanns, W)

**OSPBER 70. The Long Way to the West: German History from the 18th Century to the Present—**

Battles still current within Germany's collective memory. Sources include the narrative resources of museums, and experts on the German history in Berlin and Potsdam. Field trips. GER:DB-Hum, EC-GlobalCom

5 units, Win (Jander, M)

**OSPBER 100B. Berlin Heute—**

Required for students enrolled in OSPBER 21B; open to students in other German language classes. Active use of German, including vocabulary from a variety of fields and disciplines, and discussion of current issues.

2 units, Aut (Tat, C), Win (Tat, C), Spr (Tat, C)

**OSPBER 101A. Contemporary Theater—**

Texts of plays supplemented by theoretical texts or reviews. Weekly theater visits, a tour of backstage facilities, and discussions with actors, directors, or other theater professionals. In German. Prerequisite: completion of GERLANG 3 or equivalent. GER:DB-Hum

5 units, Spr (Kramer, K)

**OSPBER 101B. Advanced German—**

For intermediate and advanced students. Focus is on Berlin through film, literature, music, live performance, news media, and field trips. Essay writing, vocabulary building, and in-class presentations. Reading literature and news stories, essay writing, vocabulary building, and in-class presentations.

5 units, Aut (Biege, M), Win (Biege, M), Spr (Biege, M)

**OSPBER 115X. The German Economy: Past and Present—**

The history of the German economy in the Wilhelmine Empire, the Weimar Republic, the Third Reich, the postwar real socialism of the GDR, and the free market economy of the FRG. The processes of economic transition since unification and current challenges faced by united Germany. GER:DB-SocSci, DB-SocSci, EC-GlobalCom

4-5 units, Aut (Klein, I)

**OSPBER 126X. A People's Union? Money, Markets, and Identity in the EU—**

The institutional architecture of the EU and its current agenda. Weaknesses, strengths, and relations with partners and neighbors. Discussions with European students. Field trips; guest speakers. GER:DB-SocSci, DB-SocSci, EC-GlobalCom

4-5 units, Aut (Brueckner, U)

**OSPBER 161X. The German Economy in the Age of****Globalization—**

Germany's role in the world economy: trade, international financial markets, position within the European Union; economic relations with Eastern Europe, Russia, the Third World, and the U.S. International aspects of German economic and environmental policies. The globalization of the world's economy and Germany's competitiveness as a location for production, services, and R&D, focusing on the German car industry. GER:DB-SocSci, DB-SocSci, EC-GlobalCom

4-5 units, Win (Klein, I)

**OSPBER 174. Sports, Culture, and Gender in Comparative Perspective—**

Theory and history of mass spectator sports and their role in modern societies. Comparisons with U.S., Britain, and France; the peculiarities of sports in German culture. Body and competition cultures, with emphasis on the entry of women into sports, the modification of body ideals, and the formation and negotiation of gender identities in and through sports. The relationship between sports and politics, including the 1936 Berlin Olympic Games. GER:DB-SocSci, EC-Gender

5 units, Spr (Junghanns, W)

**OSPBER 177A. Culture and Politics in Modern Germany—**

Key paradigms of modern Germany: German romanticism, the belated state and national identity, National Socialism and the Holocaust, Germany divided and unified. Literary, analytical, and theoretical texts; newspaper articles; film and TV; oral history. GER:DB-SocSci, EC-Gender

4-5 units, Win (Kramer, K)

**OSPBER 198D. Humboldt Universität: Humanities 2—**

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBER 198F. Humboldt Universität: Social Sciences 2—**

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBER 198H. Freie Universität: Humanities 3—**

1-5 units, Spr (Staff)

**OSPBER 198K. Weissensee Art University 1—**

1-4 units, Spr (Staff)

**OSPBER 198L. Weissensee Art University 2—**

1-4 units, Spr (Staff)

**OSPBER 198M. Weissensee Art University 3—**

1-4 units, Spr (Staff)

**OSPBER 199A. Directed Reading A—**

2-4 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBER 199B. Directed Reading B—**

2-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBER 199D. Humboldt Universität: Humanities—**

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBER 199F. Humboldt Universität: Social Sciences—**

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBER 199G. Freie Universität: Social Sciences 1—**

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBER 199H. Freie Universität: Humanities 1—**

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBER 199J. Freie Universität: Natural Sciences 1—**

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBER 199K. Freie Universität: Social Sciences 2—**

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBER 199L. Freie Universität: Humanities 2—**

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPBER 199M. Freie Universität: Natural Sciences 2—**

1-3 units, Aut (Staff), Win (Staff), Spr (Staff)

## OVERSEAS STUDIES: CAPETOWN (OSPCPTWNL) COURSES

### UNDERGRADUATE COURSES IN OVERSEAS STUDIES: CAPETOWN

#### OSPCPTWN 10. Minding Opportunity Gaps: Educational & Social Policy in South Africa—

Focuses on economic and social relations in South Africa through an examination of research and policies to reduce inequality in contemporary South Africa. Examines an array of explanations and perspectives about various social, economic, and political outcomes as they reflect in the current status of communities, the economy, government, and schools in contemporary South Africa. GER:DB-SocSci

4 units, Win (Carter, P)

#### OSPCPTWN 11. Education & Schooling in Post-Apartheid South Africa—

Examines the evolution of South African education and schools since the advent of democracy in 1994. Focuses on key sociological paradigms and approaches to the study of education and its role in the modern world, applied to South African society. Identifies sources of educational change, the organizational context of schooling, the interplay between social stratification and schooling, and the factors attributable to differences in academic achievement outcomes among different social groups. Includes option of service-learning in a South African school. GER:DB-SocSci

4-5 units, Win (Carter, P)

#### OSPCPTWN 16. South Africa Sites of Memory—

Required Course. Relation between conventional histories and different kinds of individual and collective memory that are focused on places and spaces, testing the relation between grand narratives and more particularized pasts. Questions of cultural heritage, in particular its contestations among individual, familial, local, national, and international interests.

2 units, Win (Stanton, T)

#### OSPCPTWN 17. Western Cape Sites of Memory—

Required Course. Relation between conventional histories and different kinds of individual and collective memory that are focused on places and spaces, testing the relation between grand narratives and more particularized pasts. Questions of cultural heritage, in particular its contestations among individual, familial, local, national, and international interests.

1 unit, Spr (Stanton, T)

#### OSPCPTWN 18. Xhosa Language and Culture—

History of the Xhosa language; understanding Xhosa culture and way of life. Listening, speaking, reading and writing, combined with the social uses of the language in everyday conversations and interactions. Intercultural communication. Content drawn from the students' experiences in local communities through their service learning/volunteer activities to support the building of the relationships in these communities. How language shapes communication and interaction strategies.

2 units, Win (Tyam, N), Spr (Tyam, N)

#### OSPCPTWN 22. Preparation for Community-Based Research in Community Health and Development—

For students intending to engage in community-based research in South Africa in the summer following spring study quarter in Cape Town. Approaches and methods of collaborative, community-based research; qualitative data gathering and analysis methods in community-based research; effective collaboration with community partners and data sources; race and privilege in community-based research. Identifying research partners and sponsors; articulating potential research questions; and planning research projects.

3 units, Spr (Stanton, T)

#### OSPCPTWN 24A. Targeted Research Project in Community Health and Development—

Two-quarter sequence for students engaging in Cape Town-sponsored community based research. Introduction to approaches,

methods and critical issues of partnership-based, community-engaged research and to the community-based research partners. Qualitative data gathering and analysis methods in community-based research; effective collaboration with community partners and data sources; race and privilege in community-based research. Preparation of research proposals and plans for research carried out during spring quarter through OSPCPTWN 24B.

3 units, Win (Stanton, T)

#### OSPCPTWN 24B. Targeted Research Project in Community Health and Development—

Two-quarter sequence for students engaging in Cape Town-sponsored community-based research. Substantive community health or development investigations in collaboration with the Stanford Centre's community partners: Western Cape NGOs or government agencies, or community-based organizations or groups. Students' research supported through methods workshops, sharing of progress and problems, and data and findings presentations. Prerequisite: OSPCPTWN 24A.

5 units, Spr (Stanton, T)

#### OSPCPTWN 31. Theory and Politics of Foreign Aid—

Political economy approach to foreign aid. Context of debate on development: differences between developed and less developed countries, concept of poverty, how to measure development. History of foreign aid; main actors and characteristics of official development assistance. Theoretical and empirical impact of aid with regard to economic growth and governance. Benefits and problems associated with aid.

3 units, Spr (Klingebiel, S)

#### OSPCPTWN 32. Learning, Development, and Social Change: Service Learning in the Contemporary South African Context—

Adult learning and its role in community social action; development; service learning. Micro contexts of people's daily lives and experiences in the context of an emergent democracy; understanding possibilities of community action and mobilisation for social change. Service in a historically marginalised community near Cape Town to understand realities of everyday life in informal settlements, to engage with education in a developmental context, and to gain insight into sociopolitical factors that shape social action and learning. GER:DB-SocSci, EC-GlobalCom

3-5 units, Win (McMillan, J), Spr (McMillan, J)

#### OSPCPTWN 33. From Apartheid to Democracy: Namibia and South Africa—

Comparison of the transition from apartheid to democracy in Namibia and South Africa. Focus on peaceful process involving negotiated settlement in South Africa. Significance of democracy in Namibia post 1990 and in South Africa post 1994; South Africa's truth and reconciliation commission and post-1994 economic policy. GER:EC-GlobalCom

4 units, Win (Saunders, C)

#### OSPCPTWN 36. The Archaeology of Southern African Hunter Gatherers—

Archaeology, history and ethnography of the aboriginal hunter gatherers of southern Africa, the San people. Formative development of early modern humans and prehistory of hunters in southern Africa before the advent of herding societies; rock paintings and engravings of the subcontinent as situated in this history. Spread of pastoralism throughout Africa. Problems facing the descendants of recent hunter gatherers and herders in southern Africa, the Khoisan people. GER:DB-SocSci, EC-GlobalCom

4 units, Spr (Parkington, J)

#### OSPCPTWN 38. Genocide: The African Experience—

Genocide as a major social and historical phenomenon, contextualized within African history. Time frame ranging from the extermination of indigenous Canary Islanders in the fourteenth and fifteenth centuries to more recent mass killings in Rwanda and Darfur. Emphasis on southern African case studies such Cape San communities and the Herero people in Namibia. Themes include: roles of racism, colonialism and nationalism in the making of African genocides. Relevance of other social phenomena such as modernity, Social Darwinism, ethnicity, warfare and revolution. Comparative perspective to elucidate global dimensions. GER:DB-SocSci, EC-GlobalCom

3-5 units, Win (Adhikari, M)

**OSPCTWN 43. Public and Community Health in Sub-Saharan Africa—**

Introduction to concept of public health as compared with clinical medicine. Within a public health context, the broad distribution of health problems in sub-Saharan Africa as compared with U.S. and Europe. In light of South Africa's status as a new democracy, changes that have occurred in health legislation, policy, and service arenas in past 16 years. Topics include: sector health care delivery, current distribution of infectious and chronic diseases, and issues related to sexual and reproductive health in South Africa. Site visits to public sector health services and health related NGOs.

4 units, Win (Cooper, D), Spr (Cooper, D)

**OSPCTWN 44. Negotiating Home, Citizenship and the South African City—**

Material and socio-cultural dimensions of the multiple spaces making up South African cities. The gendered, placed, sexual, and racial character of homes, neighborhoods, and cities. Ways in which crises such as housing shortages and tenure insecurity are materially and socially embodied in economically impoverished families and communities; lives. Interplay of this body politic with economic and political contexts in which the meaning of citizenship is crafted. Urban fieldwork with the Valhalla Park United Civic Front, a community-based organization in Cape Town. GER:DB-SocSci, EC-GlobalCom

4 units, Win (Oldfield, S)

**OSPCTWN 68. Cities in the 21st Century: Urbanization, Globalization and Security—**

Cities in a globalizing world. Themes: challenges posed by globalization; general and specific responses of cities to these challenges; security issues created by globalization and urbanization. Concerns related to food security, resource availability, and threat of political instability. Policies recommended by World Bank. Case study method. GER:DB-SocSci

4 units, Spr (Simons, M)

**OSPCTWN 199A. Directed Reading A—**

2-4 units, Win (Staff), Spr (Staff)

**OSPCTWN 199B. Directed Reading B—**

1-5 units, Spr (Staff)

## OVERSEAS STUDIES: FLORENCE (OSPFLOR) COURSES

### UNDERGRADUATE COURSES IN OVERSEAS STUDIES: FLORENCE

**OSPFLOR 21F. Accelerated Second-Year Italian, Part A—**

Review of grammatical structures; grammar in its communicative context. Listening, speaking, reading, and writing skills practiced and developed through authentic material such as songs, newspaper articles, video clips, and literature. Insight into the Italian culture and crosscultural understanding.

5 units, Aut (Quercioli, F), Win (Quercioli, F), Spr (Quercioli, F)

**OSPFLOR 22F. Accelerated Second-Year Italian Part B,—**

Grammatical structures, listening, reading, writing, speaking skills, and insight into the Italian culture through authentic materials. Intermediate to advanced grammar. Content-based course, using songs, video, and literature, to provide cultural background for academic courses.

5 units, Aut (Quercioli, F), Win (Quercioli, F), Spr (Quercioli, F)

**OSPFLOR 31F. Advanced Oral Communication: Italian—**

Refine language skills and develop insight into Italian culture using authentic materials. Group work and individual meetings with instructor. Minimum enrollment required. Prerequisite: ITALLANG 22A, 23 or placement.

3 units, Aut (Quercioli, F), Win (Quercioli, F), Spr (Quercioli, F)

**OSPFLOR 34. The Woman in Florentine Art—**

Influence and position of women in the history of Florence as revealed in its art. Sculptural, pictorial, and architectural sources from a social, historical, and art historical point of view. Themes: the virgin mother (middle ages); the goddess of beauty (Botticelli to mannerism); the grand duchess (late Renaissance, Baroque); the lady, the woman (19th-20th centuries). GER:DB-Hum, EC-Gender

4 units, Aut (Verdon, T)

**OSPFLOR 35. European Economic and Monetary Integration—**

Historical overview of economic and monetary integration process in Western Europe. European Union institutions: the Commission, the Parliament, the European Council, the Council of Ministers, and the Court of Justice. Microeconomic theory of inter-industry and intra-industry trade and the case of EU. Microeconomics of integration: the costs and benefits, also applicable to NAFTA. The Lisbon Strategy as a European response to the challenges of globalization. The euro, the dollar and the international monetary system. Monetary and fiscal policies in EMU: the European Central Bank and the Stability and Growth Pact. Prerequisites: ECON 51, 52 or equivalent. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Della Posta, P)

**OSPFLOR 41. The Contemporary Art Scene in Tuscany: Theory and Practice—**

The ever-changing and multifaceted scene of contemporary art through visual and sensorial stimulation. How art is thought of and produced in Italy today. Hands-on experience. Sketching and exercises on-site at museums and exhibits, plus workshops on techniques. Limited enrollment.

3-5 units, Aut (Rossi, F)

**OSPFLOR 42. Academic Internship—**

Mentored internships in banking, education, the fine arts, health, media, not-for-profit organizations, publishing, and retail. May be repeated for credit.

1-5 units, Aut (Campani, E), Win (Campani, E), Spr (Campani, E)

**OSPFLOR 44. The Revolution in Science: Galileo and the Birth of Modern Scientific Thought—**

Galileo's life and scientific progress starting from his student years at the University of Pisa. Departure from traditional natural philosophy leading to radical reformation of cosmology and physics, emphasizing the science of motion. His innovative use of observation and measurement instruments, emphasizing the telescope. Cultural and social context. GER:DB-Hum

5 units, Win (Galluzzi, P)

**OSPFLOR 48. Sharing Beauty: Florence and the Western Museum Tradition—**

The city's art and theories of how art should be presented. The history and typology of world-class collections. Social, economic, political, and aesthetic issues in museum planning and management. Collections include the Medici, English and American collectors of the Victorian era, and modern corporate and public patrons. GER:DB-Hum

4 units, Win (Rossi, F; Verdon, T)

**OSPFLOR 49. The Cinema Goes to War: Fascism and World War II as Represented in Italian and European Cinema—**

Structural and ideological attributes of narrative cinema, and theories of visual and cinematic representation. How film directors have translated history into stories, and war journals into visual images. Topics: the role of fascism in the development of Italian cinema and its phenomenology in film texts; cinema as a way of producing and reproducing constructions of history; film narratives as fictive metaphors of Italian cultural identity; film image, ideology, and politics of style. GER:DB-Hum

5 units, Win (Campani, E)

**OSPFLOR 50F. Introductory Science of Materials—**

GER:DB-EngrAppSci

4 units, Aut (Staff, 1)

**OSPFLOR 50M. Introductory Science of Materials—**

Topics include: the relationship between atomic structure and macroscopic properties of man-made and natural materials; mechanical and thermodynamic behavior of surgical implants including alloys, ceramics, and polymers; and materials selection

for biotechnology applications such as contact lenses, artificial joints, and cardiovascular stents. No prerequisite.

4 units, Win (Staff)

**OSPFLOR 51. Italian Foreign Policy and the Global Players—** Reshaping of foreign policy and its governing principles with the new balance of power of the early 21st century. Strategies underlying a country's long-term foreign policy, especially with respect to diplomatic models. Role of need for energy resources in foreign policy. Geographical and historical boundaries behind a foreign policy vision. Effect of foreign policy stance on the outcome of elections. Foreign policy shaping in Italy and its relationship between the Mediterranean and the rest of Europe. GER:DB-SocSci

5 units, Aut (Pistelli, L)

**OSPFLOR 53. Law and the Use of Force: An Historical Appraisal—**

Efforts by individuals, groups, and governments to control the use of force in human history through legal rules. Review of current laws, looking at both the right to engage in armed conflict and the manner in which armed conflict may be conducted. The UN Charter, relevant Geneva Conventions, and developments in humanitarian law related to non-combatants. Appraisal of whether and in what ways current legal rules and regimes have been effective. GER:DB-SocSci

3 units, Aut (Sofaer, A)

**OSPFLOR 54. High Renaissance and Maniera—**

The development of 15th- and early 16th-century art in Florence and Rome. Epochal changes in the art of Michelangelo and Raphael in the service of Pope Julius II. The impact of Roman High Renaissance art on masters such as Fra' Bartolomeo and Andrea del Sarto. The tragic circumstances surrounding the early maniera: Pontormo and Rosso Fiorentino and the transformation of early Mannerism into the elegant style of the Medicean court. Contemporary developments in Venice. GER:DB-Hum

5 units, Spr (Verdon, T)

**OSPFLOR 55. Academy of Fine Arts: Studio Art—**

Courses through the Accademia delle Belle Arti. Details upon arrival. Minimum Autumn and Winter Quarter enrollment required; 1-3 units in Autumn. May be repeated for credit.

1-5 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

**OSPFLOR 56. University of Florence Courses—**

1-5 units, Aut (Campani, E), Win (Campani, E), Spr (Campani, E)

**OSPFLOR 57. Global Change and Italian Ecosystems: Management and Conservation for Mitigation—**

Introduction to state of the art of global climate change science, with a focus on the effects of global change on ecosystem functions and services, and on Europe as a regional case study. Conservation and management issues related to vulnerable Italian ecosystems through both lectures and field trips. Conservation practices and specific management issues focused on Tuscany, with ecosystems, ranging from the Tyrrhenian shores, surrounded by the typical Mediterranean chaparral to the sub-alpine environments on the Apennine mountains. GER:DB-NatSci

4 units, Spr (Cannicci, S)

**OSPFLOR 58. Space as History: Urban Change and Social Vision in Florence 1059 to the Present—**

A thousand years of intentional change in Florence. Phases include programmatic enlargement of ecclesiastical structures begun in the 11th century; aggressive expansion of religious and civic space in the 13th and 14th centuries; aggrandizement of private and public buildings in the 15th century; transformation of Florence into a princely capital from the 16th through the 18th centuries; traumatic remaking of the city's historic core in the 19th century; and development of new residential areas on the outskirts and in neighboring towns in the 20th and 21st centuries. GER:DB-Hum

4 units, Spr (Rossi, F; Verdon, T)

**OSPFLOR 59. Comparative Analysis of Entrepreneurship and Innovation: Italy & Silicon Valley—**

How entrepreneurship in Italy compares to Silicon Valley and other similar innovation clusters around the globe. Link to weekly seminar series with expert guest speaker series. Independent research and analysis of historical, current, and future potential for high-growth entrepreneurship in Italy and surrounding region.

2 units, Aut (Byers, T)

**OSPFLOR 63. Technology Entrepreneurship—**

How do you create a successful start-up? What is entrepreneurial leadership in a large firm? What are the differences between an idea and true opportunity? How does an entrepreneur form a team and gather the resources necessary to create a great enterprise? Formation and growth of high-impact start-ups in areas such as information, green/clean, medical and consumer technologies as well as social venture. Illustrations from early stages of Silicon Valley technology firms and similar firms in Europe. GER:DB-SocSci

4 units, Aut (Byers, T)

**OSPFLOR 66. Da Vinci: Renaissance Understanding of Anatomy—**

Da Vinci's work from the perspectives of modern anatomy. How knowledge of anatomy gained during the Renaissance period compares with modern concepts. Human anatomy depicted in da Vinci's notebooks and art compared with advanced renderings and modern studies with advanced imaging methods. The human figure from both biological and artistic perspectives. Museum visits including Uffizi and il Museo della Specola.

5 units, Win (Gold, G)

**OSPFLOR 67. Women in Italian Cinema: Maternity, Sexuality, and the Image—**

Film in the social construction of gender through the representation of the feminine, the female, and women. Female subjects, gaze, and identity through a historical, technical, and narrative frame. Emphasis is on gender, identity, and sexuality with references to feminist film theory from the early 70s to current methodologies based on semiotics, psychoanalysis, and cultural studies. Advantages and limitations of methods for textual analysis and the theories which inform them. Primarily in Italian. GER:DB-Hum, EC-Gender

4 units, Spr (Campani, E)

**OSPFLOR 69. The You No One Knows: Self Expression through Abstract Art—**

Overview of the birth and evolution of abstract art with visual background necessary to produce works of art free of a realistic representation. Movements and trends in abstract art; experimentation with different media and techniques.

4 units, Win (Rossi, F)

**OSPFLOR 70. Investigating In/exclusion: Study of Embodiment and Consumption in Italy—**

How do social anthropologists study belonging and marginalization? An introduction to anthropological methods, this course explores means by which, in contemporary Italy, bodies and consumer consumption mediate participation in/exclusion from social life. For instance, over the quarter together, we may examine how in Florence people and industries manage social ties to (a) family through health-inducing goods, (b) friendship circles by way of sartorial adornment, (c) gender status via cigarette use, and (d) ethnicity through food and eating. GER:DB-SocSci

5 units, Spr (Kohrman, M)

**OSPFLOR 71. Becoming an Artist in Florence: Contemporary Art in Tuscany and New Tendencies in the Visual Future—**

Recent trends in art, current Italian artistic production, differences and the dialogue among visual arts. Events, schools, and movements of the 20th century. Theoretical background and practical training in various media. Work at the Stanford Center and on site at museums, exhibits, and out in the city armed with a sketchbook and camera. Emphasis is on drawing as the key to the visual arts. Workshops to master the techniques introduced. Limited enrollment.

3-5 units, Spr (Rossi, F)

**OSPFLOR 72. Independent Study Projects: Mini-ethnographies—**

Fieldwork based extension of OSPFLOR 70, Investigating In-/Exclusion. Mini ethnographies on themes from seminar conducted first in host household, then neighborhoods near residence and beyond in an expanding radius. Focus on belonging/exclusion and its relationship to market modulated forms of corporeality.

5 units, Spr (Staff)

**OSPFLOR 75. Florence in the Renaissance—**

Using a series of texts written by 14th and 15th century Florentines, look at the urban values of the city's citizens. Topics include: thinking about urban space; social relations; the values attached to politics, money, family, religion. How meanings of words such as *state*, *government*, and *family* might have changed over time. GER:DB-Hum

5 units, Spr (Molho, A)

**OSPFLOR 76. Da Vinci to Morgagni: Development of Modern Medicine and Pathology—**

Project-based exploration of the development of modern concepts of medicine and pathology. The Renaissance masters' understanding of medicine and pathology and how it evolved into modern concepts of pathology and disease. Visits to University of Florence Museum of Pathological Anatomy and La Specola.

3 units, Win (Gold, G)

**OSPFLOR 78. An Extraordinary Experiment: Politics and Policies of the New European Union—**

Institutional design of EU, forthcoming changes, and comparison of the old and new designs. Interactions between the EU, member states, organized interests, and public opinion. Major policies of the EU that affect economics such as competition or cohesion policies, market deregulation, and single currency. Consequences of the expansion eastwards. The role of institutions as a set of constraints and opportunities for the economic actors; relationships between political developments and economic change in the context of regional integration; lessons for other parts of the world. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Morlino, L)

**OSPFLOR 79. Migrations and Migrants: The Sociology of a New Phenomenon—**

Interdisciplinary approach to the study of immigration. Typology of forms of migration through politics put into action by the EU and within single nations. Related cultural and religious questions which elicit symbolic borders, territorialization of cultural identities, and the often spatial differentiation of immigrants and locals. The politics of integration and the instruments necessary to manage it. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Allam, L)

**OSPFLOR 111Y. From Giotto to Michelangelo: Introduction to the Renaissance in Florence—**

Lectures, site visits, and readings reconstruct the circumstances that favored the flowering of architecture, sculpture, and painting in Florence and Italy, late 13th to early 16th century. Emphasis is on the classical roots; the particular relationship with nature; the commitment to human expressiveness; and rootedness in the real-world experience, translated in sculpture and painting as powerful plasticity, perspective space, and interest in movement and emotion. GER:DB-Hum

4 units, Win (Verdon, T)

**OSPFLOR 115Y. The Duomo and Palazzo della Signoria: Symbols of a Civilization—**

The history, history of art, and symbolism of the two principal monuments of Florence: the cathedral and the town hall. Common meaning and ideological differences between the religious and civic symbols of Florence's history from the time of Giotto and the first Guelf republic to Bronzino and Giovanni da Bologna and the Grand Duchy. GER:DB-Hum

4 units, Aut (Verdon, T)

**OSPFLOR 134F. Modernist Italian Cinema—**

As the embodiment of modernity, cinema develops in the wake of modernism proper, but can be understood as one of its technological and aesthetic expressions. Topics: cinema's archaeology in futurist texts and theories with their nationalistic political flavor and their iconoclastic, radical, and interdisciplinary rethinking of the language and form of all the arts (Marinetti, Pirandello, D'Annunzio). GER:DB-Hum

5 units, Aut (Campani, E)

**OSPFLOR 199A. Directed Reading A—**

1-4 units, Aut (Staff), Win (Staff), Spr (Staff)

**OSPFLOR 199B. Directed Reading B—**

1-4 units, Aut (Staff), Win (Staff), Spr (Staff)

## OVERSEAS STUDIES: KYOTO-KCJS (OSPKYOCT) COURSES

### UNDERGRADUATE COURSES IN OVERSEAS STUDIES: KYOTO-KCJS

**OSPKYOCT 103A. Third-Year Japanese I—**

Preparation for function beyond basic level in a Japanese-speaking environment by developing and enhancing communicative competence through: review of basic grammar; new grammar; reading short essays and articles with help of dictionary; short writing and speaking assignments using formal style to describe, explain, and discuss sociocultural topics; enhancing listening comprehension.

12 units, Aut (Staff)

**OSPKYOCT 103B. Third-Year Japanese II—**

Preparation for function beyond basic level in a Japanese-speaking environment by developing and enhancing communicative competence through: review of basic grammar; new grammar; reading short essays and articles with help of dictionary; short writing and speaking assignments using formal style to describe, explain, and discuss sociocultural topics; enhancing listening comprehension.

12 units, Win (Staff)

**OSPKYOCT 104A. Fourth-Year Japanese I—**

Emphasis on applications of correct grammar and strengthening academic communication skills through: reading longer essays, articles, and novels with some dictionary work; reading and writing assignments in paragraph format using formal style to describe, explain and discuss sociocultural topics; developing listening comprehension.

12 units, Aut (Staff)

**OSPKYOCT 104B. Fourth-Year Japanese II—**

Emphasis on applications of correct grammar and strengthening academic communication skills through: reading longer essays, articles, and novels with some dictionary work; reading and writing assignments in paragraph format using formal style to describe, explain and discuss sociocultural topics; developing listening comprehension.

12 units, Win (Staff)

**OSPKYOCT 105A. Fifth-Year Japanese I—**

For students with advanced proficiency. Goals include advanced command of grammar, composition, and stylistics. Emphasis is on academic Japanese preparing students to audit classes at a Japanese university.

12 units, Aut (Staff)

**OSPKYOCT 105B. Fifth-Year Japanese II—**

For students with advanced proficiency. Goals include advanced command of grammar, composition, and stylistics. Emphasis is on academic Japanese preparing students to audit classes at a Japanese university.

12 units, Win (Staff)

**OSPKYOCT 107. Language Use in the Anime of Miyazaki****Hayao—**

Japanese language in action. How language usage can vary by situation such as relative social distance between participants, type of interaction or event, in/out group membership, and attitudinal stance on discussion topic. How linguistic behavior of a character contributes to overall portrayal and identity in a film. Film dubbings and subtitles. Multimedia projects.

6 units, Aut (Staff)

**OSPKYOCT 108. Lost in Translation—**

The art and practice of translating literary texts from a variety of periods and genres. Strategies for translation and essays on translation by literary translators and theorists. Notable translations of Japanese literature in connection with the original texts. Students develop individual translation projects.

6 units, Spr (Staff)

**OSPKYOCT 109. Exploring Language and Food in Kyoto—**

How local Kyoto food purveyors use language to market and present their wares and how they communicate with customers.

Readings on Japanese food culture from anthropology, history and literature as well as topics in linguistics. Students will also take notes on spoken language use by staff and customers and gather samples of written language from selected shops and restaurants.

6 units, Spr (Staff)

**OSPKYOCT 118. Politics and Political Economy of Japan—**

Post-World War II politics and political economy of Japan. Examine policymaking related to economic development, employment, and equal opportunity, as well as political institutions such as party politics and voting systems. Major theme is apparent disjuncture in policymaking performance before and after 1990.

6 units, Spr (Staff)

**OSPKYOCT 127. Outside the Mainstream: The Minority Experience in Japan—**

Historical analysis of how minority communities came into existence and struggled to maintain a distinctive lifestyle in Japan's homogeneous society. Japan's 1979 ratification of UN International Covenant on Civil and Political Rights.

6 units, Aut (Staff), Win (Staff)

**OSPKYOCT 128. Families and Work in Post-war Japan—**

Factors that promoted both change and continuity in the social division of labor between the interdependent spheres of work and family. How cultural strategies for organizing contemporary Japanese social life were conditioned 1) by rapid industrialization and growth and 2) by later economic stasis. Class, gender, and regional variations; role of social psychology in Japanese responses to work-family conflicts.

6 units, Aut (Staff), Win (Staff)

**OSPKYOCT 132. Japanese Growth and Business Development—**

History, structure, and operation of the Japanese economy and business. Emphasis is on structural and institutional factors in the maturity and decline of Japan's international competitiveness since the early 80s. Field trips and films complement lectures and student presentations.

6 units, Aut (Staff), Win (Staff)

**OSPKYOCT 154. History and Culture of Japan—**

Survey of cultural, political, and economic history of Japan. Fundamental values and aspirations of Japanese who lived in different historical periods; analysis of political, social, and economic systems developed to represent beliefs and ambitions of different eras. Impact on domestic events from inclusion in the East Asia cultural zone and from interactions with the West.

6 units, Aut (Staff), Win (Staff)

**OSPKYOCT 164. Kansai Area Arts—**

Kansai area, in particular the golden triangle formed by cities of Kyoto, Osaka, and Nara, as the center of Japanese art production from 4th century until the 17th century when patronage shifted to Tokyo. Focus is on painting and sculpture through readings, classroom discussion, and field trips.

6 units, Spr (Staff)

**OSPKYOCT 168. Japan in the Middle Ages—**

Topics central to Japan's medieval revolution: construction of new forms of political authority; emergence of fresh cultural norms; appearance of Zen and popular religious sects; intersection of innovative Zen arts with samurai government; new visibility of commoners and women in written and visual records; interactions with others in Asia.

6 units, Spr (Staff)

**OSPKYOCT 185. Noh and Kyogen—**

Noh drama as a mirror of Muromachi period culture. Broad literary heritage and Buddhist precepts reflected in plays. Performance traditions such as Shinto ritual, court dance, harvest festivals, exorcism rites, and narrative entertainment. Wider context of world drama and dramatic theories of the creators of Noh. Close reading of representative plays and first hand experience of performance.

6 units, Aut (Staff), Win (Staff)

**OSPKYOCT 197. Independent Studies—**

Focused research using the Japanese language and taking advantage of local Kyoto resources. Directed reading and research, weekly meetings with professor, and final research paper. For full-year students with language skills adequate for the proposed

research.

6 units, Spr (Staff)

**OSPKYOCT 198. Women's Issues in Japan—**

Women's issues as related to men's issues in Japan. The house system and the legalized prostitution system in modern Japan. Topics include marriage, gender division of labor, child bearing, contraception, and domestic violence. How the private sphere is influenced by the public sphere including politics, economy, and culture.

6 units, Spr (Staff)

## OVERSEAS STUDIES: KYOTO (OSPKYOTO) COURSES

### UNDERGRADUATE COURSES IN OVERSEAS STUDIES: KYOTO

**OSPKYOTO 9K. First-Year Japanese Language, Culture, and Communication B—**

5 units, Spr (Tanaka, K; Asami, N)

**OSPKYOTO 10. Gamelan to Kabuki: Musical Traditions of Far East Asia—**

Introduction to traditional musical cultures of the Far East with an emphasis on Japan. Listening, viewing and study of prominent musical examples. Survey of unique traditional instruments and ensembles in a range of performance contexts, from sacred rituals to secular dance and theater. Traditional genres and their impact on local and global musical culture of today. Development of critical listening skills. Live performances and encounters with local masters; early morning monastery chanting; visits to Bunraku and Kabuki theaters. GER:DB-Hum, EC-GlobalCom

4 units, Spr (Kapuscinski, J)

**OSPKYOTO 11. Experiencing Ma: Time & Space in Japanese Arts—**

The study, experience, and expression of Ma, a key concept in Japanese art, through field trips, meetings with artists, empirical research, presentations, and creative projects. Exploration and comparative examination of landscape gardens, architecture, calligraphy, ikebana, tea ceremony, poetry, theater, classical music, media art, installation art, dance, and cuisine. Visits to gardens, temples, museums, concerts, and events in Kyoto and nearby cities as catalysts for discussion of Japanese cultural identity and its distinctiveness within the global community. GER:DB-Hum

4 units, Spr (Kapuscinski, J)

**OSPKYOTO 17K. Second-Year Japanese Language, Culture, and Communication B—**

5 units, Spr (Fujiwara, T; Ueda, H)

**OSPKYOTO 17R. Religion and Japanese Culture—**

Major religious traditions of Japan. Topics include: relation between religion and culture; ancient Japanese religion and Shinto; Buddhist schools of Heian Japan; Zen Buddhism as it flourished in the Kamakura period; Confucianism, as originally conceived in ancient China and as transmitted to Japan in the Edo period in its neo-Confucian form; characteristic modern practices. Field trips to religious centers to observe current religious practices. GER:DB-Hum, EC-GlobalCom

4-5 units, Spr (Ludvik, C)

**OSPKYOTO 19K. Second-Year Japanese Language, Culture, and Communication B—**

5 units, Spr (Kawahara, Y; Tanaka, K)

**OSPKYOTO 33. Digital Systems II—**

The design of processor-based digital systems. Instruction sets, addressing modes, data types. Assembly language programming, low-level data structures, introduction to operating systems and compilers. Processor microarchitecture, microprogramming, pipelining. Memory systems and caches. Input/output, interrupts, buses and DMA. System design implementation alternatives, software/hardware tradeoffs. Labs involve the design of processor subsystems and processor-based embedded systems. Prerequisite: 108A, CS 106B. GER:DB-EngrAppSci

3-4 units, Spr (Kozyrakis, C)

**OSPKYOTO 40K. Introductory Electronics—**

Electrical quantities and their measurement, including operation of the oscilloscope. Function of electronic components including resistor, capacitor, and inductor. Analog circuits including the operational amplifier and tuned circuits. Digital logic circuits and their functions. Lab assignments. Prerequisite: PHYSICS 43. GER:DB-EngrAppSci

5 units, Spr (Wong, S)

**OSPKYOTO 62. Japan and America: A Historical Survey—**

How various segments of Japanese society view the war in Asia, where fault lines lie, and what attempts have been made to achieve reconciliation. Topics include: origins of the Asia-Pacific War; foreign and domestic images of Japan's wartime actions; American Occupation policy and the Tokyo war crimes trial; impact of peace movements and the Cold War; the emergence of conflicting postwar narratives about the war; Asian perceptions of postwar Japan; the institutionalization of public memory; attempts and failures at reconciliation with Japan's neighbors; comparisons with Europe. GER:DB-SocSci

4-5 units, Spr (Duus, P)

**OSPKYOTO 119K. Third-Year Japanese Language, Culture, and Communication—**

5 units, Spr (Tomiyama, Y)

**OSPKYOTO 199. Directed Reading—**

1-4 units, Spr (Staff)

**OSPKYOTO 210K. Advanced Japanese—**

5 units, Spr (Ueda, H)

**OSPKYOTO 215X. The Political Economy of Japan—**

Institutions and processes in the political organization of economic activity in modern Japan. The interaction of public and private sector institutions in the growth of Japan's postwar economy. The organization and workings of key economic ministries and agencies of the government, private sector business groupings, government interaction, and public policy making. The transformation of Japanese industrial policy from the rapid growth of heavy and chemical industries to the promotion of high technology and communications industries. The international, political, and economic ramifications of the structure and importance of Japanese capitalism. GER:DB-SocSci

4-5 units, Spr (Hayashi, T)

## OVERSEAS STUDIES: MADRID (OSPMADRD) COURSES

### UNDERGRADUATE COURSES IN OVERSEAS STUDIES: MADRID

**OSPMADRD 10. Research Methods in Social and Motivational Psychology—**

Stages of the empirical research process in social psychology. Concrete experience in hypothesis generation, experimental design, and scientific writing. Devise research study to explore how social psychological and motivational concepts map onto a culture or social or educational problem. Key objective: formalize students' curiosity about a culture or problem through translation into scientifically testable research hypotheses. Provides opportunity to supplement OSPMADRD 23, Social Psychology, Social Change and Culture.

1-4 units, Aut (Staff)

**OSPMADRD 11. Independent Study in Chemistry—**

Possible independent study topics include: 1. Plastics: Modern Marvels or A Curse? 2. Chemistry and Art. 3. Science in the News, Ethics and Responsibility in Science. Weekly meetings to review progress and discuss goals. Field trips to local laboratories and research institutes to provide the perspective of Spanish scientists on the role of Chemistry, Science and Technology.

2 units, Win (Staff)

**OSPMADRD 12M. Accelerated Second-Year Spanish I—**

Intensive sequence integrating language, culture, and

geo/sociopolitics of Spain. Emphasis is on achieving advanced proficiency in oral and written discourse, including formal and informal situations, presentational language, and appropriate forms in academic and professional contexts. Prerequisite: one year of college Spanish or 11 or 21B more than two quarters (six months) prior to arriving in Madrid.

5 units, Aut (Cambolor Portilla, M), Win (Cambolor Portilla, M), Spr (Cambolor Portilla, M)

**OSPMADRD 13M. Accelerated Second-Year Spanish II—**

Intensive sequence integrating language, culture, and geo/sociopolitics of Spain. Emphasis is on achieving advanced proficiency in oral and written discourse, including formal and informal situations, presentational language, and appropriate forms in academic and professional contexts. Prerequisite: 11 or 21B within two quarters (six months) of arriving in Madrid or 12 or 22B.

5 units, Aut (Cambolor Portilla, M), Win (Cambolor Portilla, M), Spr (Cambolor Portilla, M)

**OSPMADRD 14. Introduction to Spanish Culture—**

Required for Madrid students. Spain's historical, physical, and sociocultural diversity. Includes a weekend study trip and other cultural encounters. Linguistic skills and cultural knowledge through museum visits, readings, and writing a paper in Spanish. Study trips: Autumn Quarter to Cantabria-Léon and Basque country; Winter Quarter to Andalusia and Extremadura; Spring Quarter to Catalonia and Galacia.

1 unit, Aut (Tejerina-Canal, S), Win (Tejerina-Canal, S), Spr (Tejerina-Canal, S)

**OSPMADRD 15. Flamenco Dance—**

Practical instruction. The rhythms and styles of flamenco and the expression of feelings proper to this art form which synthesizes song, music, and dance. Zapateado (footwork), braceo (arm positions and movement technique), and choreographies, including Rumba flamenca and Sevillanas. Enrollment limited. May be repeated for credit.

1 unit, Aut (Murcia Canovas, L), Win (Murcia Canovas, L), Spr (Murcia Canovas, L)

**OSPMADRD 17. Molecules Matter—**

Using the themes of energy, the environment, and human health, gain an understanding of chemical reactivity, energy conversion and the molecular basis of life processes and disease. Supplementary reading, class-presentations and discussion forums to foster a conceptual understanding. Field trips to local laboratories and research institutes to provide a perspective on the role of Chemistry, Science and Technology in addressing critical societal challenges from the perspective of Spanish scientists. General science course for non-majors.

3 units, Win (Waymouth, R)

**OSPMADRD 23. Social Psychology, Intervention, and Culture—**

Major ideas, theories, and findings of social psychology and their relevance to social problems, ethnicity, and culture. Special attention to historical issues, classic studies, seminal theories, and the methodological traditions of experimental social psychology. Contemporary research also discussed. Focus on the three major intellectual contributions of social psychology; emphasis on situational rather than dispositional causes of behavior; recognition of the role of subjective construal in human affairs; appreciation of the complexity in social systems; and their importance in understanding human behavior, groups, culture, and inequality. GER:DB-SocSci

3-4 units, Aut (Cohen, G)

**OSPMADRD 33. Spanish Language Tutorial—**

May be repeated for credit. Prerequisite: three years of Spanish at Stanford or placement.

2 units, Aut (Cambolor Portilla, M), Win (Cambolor Portilla, M), Spr (Cambolor Portilla, M)

**OSPMADRD 41. Dissidence and Continuity: Spanish Theater, 1907 to the Present—**

Tradition, transformation, experimentation, rupture, renovation, and innovation in the theater in Spain as a reflection of the artistic, social and historical commotion that led to the Spanish Civil War, Franco, and the present democratic monarchy. Ortega y Gasset, Benavente, Grau, Valle-Inclán, García Lorca, Buero Vallejo,

Sastre, Arrabal, Fernán Gómez, Paloma Pedrero, Yolanda Pallín or other playwrights who may be staged in Madrid theaters. GER:DB-Hum

4-5 units, *Win (Tejerina-Canal, S)*

**OSPMADR 42. A European Model of Democracy: The Case of Spain—**

Current Spanish political system, its main judicial and political institutions, outstanding actors' and the political process of the last decade. Historic antecedents; immediate precedents; and the current political system and life. Relation between the elements that constitute a political system; results of the process of democratization; integration to the EU. GER:DB-SocSci

5 units, *Win (Bobillo de la Peña, F)*

**OSPMADR 43. The Jacobean Star Way and Europe: Society, Politics and Culture—**

The Saint James' Way as a tool to understand historic dynamics from a global perspective. Its effect on the structures that form a political and institutional system, and its society, economy, and ideology. GER:DB-Hum, EC-GlobalCom

5 units, *Spr (Larranaga Zulueta, M)*

**OSPMADR 45. Women in Art: Case Study in the Madrid Museums—**

Viewing the collections at the Prado Museum through study and analysis of the representations of women. Contemporary literary texts and images that situate paintings in the historical, social, and political conditions that produced the works. GER:DB-Hum, EC-Gender

4 units, *Win (Domenech Lopez, J)*

**OSPMADR 46. Drawing with Four Spanish Masters: Goya, Velázquez, Picasso and Dalí—**

Approaches, techniques, and processes in drawing. Visits to Madrid museums to study paintings and drawings by Goya, Velázquez, Picasso, and Dalí and to explore the experience of drawing. Subject matter: the figure, still life, interiors, landscape, and non-representational drawing. No previous experience required. Enrollment limited.

3 units, *Aut (Sanchez Fuster, O)*

**OSPMADR 47. Independent Studies in Modern Peninsular Spanish Literature—**

Introduction to dominant trends of twentieth-century Spanish poetry and a new mode of poetic composition that characterizes the first three decades of Peninsular Spanish poetry. Topics for independent study include: 1) Major works of Antonio Machado: *Soledades, galerías y otros poemas* and *Campos de Castilla*; 2) Cycle of interrelated symbolic poetry of Juan Ramón Jiménez, extending from *Sonetos espirituales* to *Piedra y cielo*; 3) Major poetic works of Federico García Lorca, including *Canciones, Romancero gitano*, and *Poeta en Nueva York*.

3-5 units, *Spr (Staff)*

**OSPMADR 50. Flirting with Spanish Metafiction: Cervantes, Velázquez, Fuentes, Almodóvar—**

Literary theory and critical analysis of peninsular and Latin American texts. Emphasis is on the origins and development of self-conscious fiction (metafiction). Works by Cervantes, Velázquez, Unamuno, Borges, Fuentes, Torrente Ballester, and Almodóvar. Attendance at music, art, cinema, and Spanish novelist events. In Spanish. GER:DB-Hum

4-5 units, *Spr (Tejerina-Canal, S)*

**OSPMADR 54. Contemporary Spanish Economy and the European Union—**

Concepts and methods for analysis of a country's economy with focus on Spain and the EU. Spain's growth and structural change; evolution of Spain's production sectors, agriculture, industry, and services; institutional factors such as the labor market and public sector; Spain's economic international relations, in particular, development of the EU, institutional framework, economic and monetary union, policies related to the European economic integration process, and U.S.-EU relationship. GER:DB-SocSci

5 units, *Aut (Bunuel, M)*

**OSPMADR 55. Dissidence and Nationalisms in Modern Iberian Literature—**

Modern Iberian literature from the 1830s to the 1930s. Topics: Romanticism and the Enlightenment; Realism; the Generation of

1898 and modernism; and the Generation of 1927 leading up to the Spanish Civil War. Themes: Spain within the democratic tradition of Iberian liberalism; origins of modern nationalisms and their cultural renaissance as expressed through major intellectual and literary figures: Rosalía de Castro, Valle-Inclán, Unamuno, Baroja, Verdaguier, Galdós, and A. Machado. GER:DB-Hum

3-5 units, *Spr (Predmore, M)*

**OSPMADR 57. Health Care: A Contrastive Analysis between Spain and the U.S.—**

History of health care and evolution of the concept of universal health care based on need not wealth. Contrast with system in U.S. Is there a right to health care and if so, what does it encompass? The Spanish health care system; its major successes and shortcomings. Issues and challenges from an interdisciplinary perspective combining scientific facts with moral, political, and legal philosophy. GER:DB-SocSci

5 units, *Spr (Perez Blanco, A)*

**OSPMADR 60. Integration into Spanish Society: Service Learning and Professional Opportunities—**

Engagement with the real world of Madrid through public service work with NGOs and public service professions such as teaching. Depending on availability, topics relevant to present-day Spain may include: the national health plan, educational system, immigration, prostitution, refugees, youth, and fair trade. Fieldwork, lectures, and research paper. Limited enrollment. May be repeated for credit. Prerequisite: two years of college level Spanish or equivalent.

5 units, *Aut (Klaiber, S), Win (Klaiber, S), Spr (Klaiber, S)*

**OSPMADR 61. Society and Cultural Change: The Case of Spain—**

Complexity of socio-cultural change in Spain during the last three decades. Topics include: cultural diversity in Iberian world; social structure; family in Mediterranean cultures; ages and generations; political parties and ideologies; communication and consumption; religion; and leisure activities. GER:DB-SocSci

5 units, *Aut (Munoz Carrion, A)*

**OSPMADR 62. Spanish California: Historical Issues—**

Spanish exploration and colonization of California from the 16th century to the end of the Spanish colonial period in 1821. Themes include: geographical explorations in the context of European colonial expansion; demographic evolution of Native American inhabitants and immigrant population; general social and economic development of the colony; controversies surrounding the mission system; role of the Pacific coasts of North America in the Spanish enlightenment and in strategies for imperial defense and development in the revolutionary era of the late 18th and early 19th centuries.

5 units, *Spr (Hilton, S)*

**OSPMADR 71. Sociology of Communication—**

Understanding the sociocultural diversity of communication in Spain with the help of theoretical and practical tools. How communication happens through language and other means; significance of images in today's world; vision of the world produced by media; problems of social communication from perspective of reception. Offered at the Universidad Complutense with an additional tutorial for Stanford students.

5 units, *Spr (Munoz Carrion, A)*

**OSPMADR 72. Issues in Bioethics Across Cultures—**

Ethical dilemmas concerning the autonomy and dignity of human beings and other living creatures; principles of justice that rule different realms of private and public life. Interdisciplinary approach to assessing these challenges, combining scientific facts, health care issues, and moral philosophy. Sources include landmark bioethics papers.

5 units, *Win (Perez Blanco, A)*

**OSPMADR 74. Islam in Spain and Europe: 1300 Years of Contact—**

Primary problems and conflicts in the contemporary Islamic world and its relations with the West, as well as the relationship between Spain and Islam throughout history. Special attention to the history of al-Andalus, an Islamic state in the Iberian Peninsula during the Middle Ages, evaluating the importance of its legacy in Europe and in contemporary Spain. Spain's leading role in relations between Europe and the Mediterranean Islamic states from the

Modern Era to the present day.

5 units, Aut (*Ariza Armada, A*)

**OSPMADR 75. Sefarad: The Jewish Community in Spain—**

The legacy of Sefarad, the Jewish community in Spain. Historical evolution of the Sephardic community, under both Muslim and Christian rule, including the culmination of Anti-Semitism in 1492 with the expulsion of the Jews. Cultural contribution of the Hebrew communities in their condition as a social minority, both in al-Andalus, the peninsular Islamic State, and in the peninsular Christian kingdoms.

5 units, Win (*Ariza Armada, A*)

**OSPMADR 102M. Composition and Writing Workshop for Students in Madrid—**

Advanced. Writing as craft and process, emphasizing brainstorming, planning, outlining, drafting, revising, style, diction, and editing. Students choose topics related to their studies. Prerequisite: 13, 23B, or equivalent placement.

3-5 units, Aut (*Camblor Portilla, M*), Win (*Camblor Portilla, M*), Spr (*Camblor Portilla, M*)

**OSPMADR 199A. Directed Reading—**

1-5 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPOXFRD 74. History and Architecture of Oxford—**

History of the city and university of Oxford through its physical fabric. Oxford's buildings within the context of British and European architectural history; growth and development of Oxford. Lectures paired with visits to buildings with additional discussion on site.

3-4 units, Spr (*Tyack, G*)

## OVERSEAS STUDIES: MOSCOW (OSPMOSC) COURSES

### UNDERGRADUATE COURSES IN OVERSEAS STUDIES: MOSCOW

**OSPMOSC 10M. Intensive First-Year Russian—**

8 units, Aut (*Boldyreva, T; Kurganova, L*)

**OSPMOSC 12. Moscow in 20th Century Russian Literature: Bulgakov's *The Master and Margarita* & Boris—**

Close reading of these two major Russian novels in which the theme of Moscow plays a most significant role. The place of both works in Soviet culture of Stalin's age. Contrast of artistic manners of the two authors in context of the different 19th century literary traditions they adhered to and their relation to the doctrine of Socialist realism imposed on Soviet writers during this epoch. The way historical events and conditions are addressed and reflected in these works.

3 units, Aut (*Fleishman, L*)

**OSPMOSC 15. Academic Internship—**

Placements in areas such as banking, finances, consulting, journalism, language teaching, and technology. Introduction to Russian society and work experience. Evaluation and analysis of experience in final academic paper.

2-3 units, Aut (*Abashkin, A*)

**OSPMOSC 18. Poetry, Painting and Music of the Russian Avant-garde—**

Interrelationships between poetry and other arts in Russia from 1905-1930; pursuit of synthesis of arts; modernist agenda of life-creation and immortality. Parallel developments in literature, painting and music. Works of Russian modernist poetry (Mayakovsky, Khlebnikov, Pasternak, Tsvetaeva and others) in the context of changes in the language of visual arts (Cubism, Futurism, Suprematism) and music (Scriabin, Stravinsky, Prokofiev). Role of women-poets and women-artists in avant-garde currents. Impact of scientific discoveries and technological inventions on character of artistic experimentation. Readings in English. GER:DB-Hum

3 units, Aut (*Fleishman, L*)

**OSPMOSC 51M. Second-Year Russian—**

5 units, Aut (*Sidyganova, A*)

**OSPMOSC 62. Economic Reform and Economic Policy in Modern Russia—**

Russian economic history in the 20th century. Reasons and logic for economic transformation, major components of postcommunist economic transformation doctrine, and results of practical implementation. Mechanisms of economic policy decision making in modern Russia, and patterns of and alternatives in economic development. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (*Mau, V; Novikov, V*)

**OSPMOSC 67. Building Skolkovo: Designing an Innovation Ecosystem—**

Examine Skolkovo as the realization of the current generation of urban policy initiatives for innovation. Innovation ecosystem incentives and politics, science infrastructure and innovation investment, business interest, and sociological responses to these policy incentives. Symbolism of Skolkovo for development and the incentives and outcomes expected by various experts.

5 units, Aut (*Leonard, C*)

**OSPMOSC 72. Space, Politics, and Modernity in Russia—**

The idea of space as a key to understanding Russian politics and governance, economy, society, and culture. Phenomenology of Russian space: structure, topology, and features, including notions of enormity. Space in its relation to state power; how geography shaped Russian history and politics. Reification of space-state relationship on levels such as economy, politics and administration, security and social mobility, nationalism and imperialism, culture and language, and habits and ways. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (*Medvedev, S*)

**OSPMOSC 74. Post-Soviet Eurasia and SCO: Society, Politics, Integration—**

Analysis of the opportunities and challenges for political, economic, and military cooperation within the Shanghai Cooperation Organization (SCO). Likelihood of SCO's aspirations being realized and the potential of its becoming a political and military counterbalance to the West. Issues related to national security and security perceptions of post-Soviet states and China, their economic and energy ambitions and needs, and the role of external players in the region. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (*Bratersky, M*)

**OSPMOSC 78. Russian-American Relations: from the War of Independence to the War on Terror—**

Relations between Russia and the U.S. since the eighteenth century with an introduction covering the period prior to the American Revolution. GER:DB-SocSci

5 units, Aut (*Ivanian, E*)

**OSPMOSC 111M. Third-Year Russian—**

5 units, Aut (*Filatova, G*)

**OSPMOSC 177M. Fourth-Year Russian—**

5 units, Aut (*Rubailo, A*)

**OSPMOSC 199A. Directed Reading—**

2-5 units, Aut (*Staff*)

## OVERSEAS STUDIES: OXFORD (OSPOXFRD) COURSES

### UNDERGRADUATE COURSES IN OVERSEAS STUDIES: OXFORD

**OSPOXFRD 16. Cultural Studies, Media, Literacy—**

Background to British Cultural Studies and adaptation to contemporary British culture. Everyday life through the lens of the mid-twentieth century British cultural studies critique. Differences between everyday life of that time and today, looking at topics including the increased number of racial and religious minorities in Britain and the virtual world of today's culture. Is it possible to answer the question, What is British?

4-5 units, Aut (*Palumbo-Liu, D*)

**OSPOXFRD 17. Novels of Sensation: Gothic, Detective Story, Prohibition, and Transgression in Victorian Fiction—**

Literary and moral value of transgressive sub-genres of the novel; what they reveal about Victorian society's anxiety over prohibited elements in the domestic and public spheres. Sources include gothic and detective novels. GER:DB-Hum

5 units, Win (Plaskitt, E)

**OSPOXFRD 18. Making Public Policy: An Introduction to Political Philosophy, Politics, and Economics—**

UK and U.S. What should society look like? How should incomes be distributed? How should it be taxed? How much inequality is acceptable? The overlap of economics with practical politics through political philosophy behind the government decisions; how public policy ought to be formulated. Issues include poverty, environmental policy, trade and globalization, and transport. GER:DB-SocSci

4-5 units, Win (McMahon, R)

**OSPOXFRD 19. The Historical Novel - Fact, Fiction, and Writing—**

History and historical fiction. Contemporary historical fiction as a genre in which authors blend traditional styles with new ones to inquire into contemporary history. We will look at the ways national and global shifts in history have disrupted and reconfigured societies and cultures. Titles include Scott, Waverly, O'Brien, Master and Commander, Ishiguro, Remains of the Day, McEwan, Atonement, Carpentier, Kingdom of This World, Ghosh, The Shadow Lines.

4-5 units, Aut (Palumbo-Liu, D)

**OSPOXFRD 23. William Blake: Poet and Painter—**

In a stunning array of illuminated poetry William Blake taught the power of the human imagination to transform the world and the power of critical thinking. Students will study the work of this major Romantic figure in philosophical and cultural context, with an emphasis on gender and sexuality, class and race, and produce a creative or original critical research work of their own. Blake walking tour in London and visit to Tate Gallery. GER:DB-Hum

5 units, Win (Gigante, D)

**OSPOXFRD 24. British and American Constitutional Systems in Comparative Perspective—**

Introduction to the study of constitutions and constitutional systems of government. The workings of the British and American systems of government. Comparative study of the most important constitutional issues facing Britain and the U.S. such as how suspected terrorists should be treated in a time of war. How to think about fundamental constitutional questions. GER:DB-SocSci

4-5 units, Spr (McMahon, R)

**OSPOXFRD 35. Modern UK and European Government and Politics—**

Background of main political systems in Europe and recent developments in European politics. Topics: Blair's constitutional reforms; the consequences of the German reunification; Berlusconi's rise to power in Italy; the extreme right in France and elsewhere; the single currency; the enlargement of the EU; and proposals for a constitution and their recent rejection by the French and Dutch electorates. GER:DB-SocSci

4-5 units, Aut (Capocchia, G)

**OSPOXFRD 39. Romantic Poetry—**

Introduction to the major Romantic poets: William Wordsworth, Samuel Taylor Coleridge, William Blake, Percy Bysshe Shelley, Lord Byron, and John Keats. Emphasis on innovative use of verse form, from lyrical ballads to conversation poems to closet drama, and poetic theory. Visit to The Keats House, London and National Portrait Gallery, London. GER:DB-Hum

5 units, Win (Gigante, D)

**OSPOXFRD 41. Europe and US Foreign Policy—**

Relationship between the United States and Europe, with an emphasis on developments since 1990. Sources of conflict and cooperation in this relationship; how governments on both sides of the Atlantic manage contradictory tendencies of friendship and mistrust. Topics include: U.S.-European defense cooperation; influence of European states on American decisions to use force; origin and nature of special relationship between Britain and the United States; European responses to U.S. power; sources and consequences of anti-Americanism in European publics. GER:DB-

SocSci

5 units, Spr (Schultz, K)

**OSPOXFRD 43. Anthropology, Material Culture, and the Meanings of Space—**

Local and global consequences of the use of space. Effects of transition; experiences of individual and societal realms of perception and reception of material culture. Material culture found in museums and archive collections in Oxford, including objects, paintings, photographs and film footage, as well as the structures that house them. Notion of representation, how we interact with tangible and intangible spaces, and how we position ourselves in the process.

4 units, Win (Kahn, A)

**OSPOXFRD 45. British Economic Policy since World War II—**

Development of British economic policy making from 1945, focusing on political economy including: ideological motives of governments; political business cycle; and the influence of changing intellectual fashions. Policy areas: attitude to the pound; control of the business cycle; and the role of the state in the economy. Prerequisite: ECON 50. GER:DB-SocSci

5 units, Aut (Forder, J)

**OSPOXFRD 57. The Rise of the Woman Writer 1660-1860—**

Emergence and rise of the professional woman writer from playwright and Royalist spy Aphra Behn (1640-89) to novelist and proto-feminist Charlotte Bronte (1816-55). How women writers dealt with criticism for writing publicly, placing each author and text in its historical and literary context. Range of poets, playwrights, and novelists including Eliza Haywood, Frances Burney, and Mary Elizabeth Braddon. Topics: gender roles and proto-feminism, the public versus the private sphere, sexuality, courtship and marriage. GER:DB-Hum, EC-Gender

5 units, Spr (Plaskitt, E)

**OSPOXFRD 70. The History of London—**

London's physical growth, emphasizing characteristics which set it apart from other capitals, and its economic, social and political development, including the problems of poverty and the inner city, the provision of public services, and the growth of suburbs and public transport. Challenges facing London in modern times. Walking tours, especially less frequented areas. GER:DB-SocSci, EC-GlobalCom

4-5 units, Win (Tyack, G)

**OSPOXFRD 73. Atlantic Rivals: Britain and America, 1783-1914—**

Roles of the United States in British culture. Challenge of democracy and fears of `Americanisation'; imperial rivalries and military confrontations; influence of America on religious, racial and colonial thought in Britain. Impact of American politics on British radical groups; role played by U.S. in the Irish question; and the late-nineteenth century dream of a `Greater Britain across the seas'. Exploring travel literature and political commentary, diplomatic exchanges and social analyses, reassess the Atlantic World in the long nineteenth century, and the Victorian backdrop to the `Special Relationship'. GER:DB-SocSci

5 units, Spr (Saunders, R)

**OSPOXFRD 75. Islam in the Public Sphere: the Dialogue Between the Sacred and the Secular—**

Preparation for participation in the BOSP Autumn workshop in Spain: Islam in Europe 711-2011: 1300 Years of Contact & [Mis]Understanding. Case studies from different European countries addressing topics including success or failure of each country in responding to different religious traditions; influence of movements such as Sufism; debate over multi-culturalism.

3 units, Aut (Talib, M)

**OSPOXFRD 98. Creative Writing Workshop—**

Selection and combination; poetic language; metaphor and cohesion; setting and the pathetic fallacy; sentence variety; genres; dialogue; point of view; narrative positions; colors and senses; time management; plotting. Limited enrollment based on writing sample.

3 units, Spr (Kidd, H)

**OSPOXFRD 99. Independent Study Projects in European and US Foreign Policy—**

Independent study projects on subjects related to U.S. and European foreign policy. Possible topics include: public attitudes towards the United States and its policies; differences in U.S. and British media coverage of international events; effect of U.S. foreign policy on politics and elections in Britain and other European countries; effect of U.S. foreign policy on relations between European states, including Britain's relations with the EU, and the prospects of European defense cooperation.

3-5 units, *Spr (Staff)*

**OSPOXFRD 117W. Gender and Social Change in Modern Britain—**

Changes in the social institutions, attitudes, and values in Britain over the past 20 years with specific reference to shifts in gender relations. Demographic, economic and social factors; review of theoretical ideas. Men's and women's shifting roles in a fast-moving society. GER:DB-SocSci, DB-SocSci, EC-Gender

4-5 units, *Spr (Palmer, A)*

**OSPOXFRD 163X. Shakespeare: Critical Commentary—**

For English majors or minors only. Topics include the use of soliloquy, epilogues, alternation of prose and verse, rhetoric, meta-theatricality. Close reading technique. GER:DB-Hum

5 units, *Aut (Rowley, R)*

**OSPOXFRD 195A. Tutorial in Anthropology—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195B. Tutorial in Biology—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195C. Tutorial in Classics—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195E. Tutorial in Drama—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195F. Tutorial in Economics—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195G. Tutorial in Economic History—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195J. Tutorial in Jurisprudence—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195L. Tutorial in Health Care—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195M. Tutorial in History of Science—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195N. Tutorial in Human Biology—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195P. Tutorial: Interdisciplinary—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195R. Tutorial in International Relations—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195T. Tutorial in Literature—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195U. Tutorial in Music—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195V. Tutorial in Philosophy—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 195W. Tutorial in Physics—**

6-7 units, *Spr (Staff)*

**OSPOXFRD 195Z. Tutorial in Political Science—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 196A. Tutorial in Psychology—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 196B. Tutorial in Religion—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 196C. Tutorial in Sociology—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 196E. Tutorial in History—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 196F. Tutorial in History of Art—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 196G. Tutorial in Chemistry—**

6-7 units, *Aut (Staff), Spr (Staff)*

**OSPOXFRD 196K. Tutorial in Zoology—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 196M. Tutorial in Public Policy—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 196N. Tutorial in Mathematics—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 197A. Tutorial in Anthropology—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 197B. Tutorial in Biology—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 197C. Tutorial in Classics—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 197E. Tutorial in Drama—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 197F. Tutorial in Economics—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 197J. Tutorial in Jurisprudence—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 197L. Tutorial in Health Care—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 197M. Tutorial in History of Science—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 197N. Tutorial in Human Biology—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 197P. Tutorial: Interdisciplinary—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 197R. Tutorial in International Relations—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 197T. Tutorial in English Literature—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 197U. Tutorial in Music—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 197V. Tutorial in Philosophy—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 197Z. Tutorial in Political Science—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 198A. Tutorial in Psychology—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 198B. Tutorial in Religion—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 198C. Tutorial in Sociology—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 198E. Tutorial in History—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 198F. Tutorial in History of Art—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 198K. Tutorial in Zoology—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 198M. Tutorial in Public Policy—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 198N. Tutorial in Mathematics—**

6-7 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 199A. Directed Reading A—**

2-4 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 199B. Directed Reading B—**

2-5 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**OSPOXFRD 199D. Directed Reading—**

1-3 units, *Win (Staff), Spr (Staff)*

**OSPOXFRD 221Y. Art and Society in Britain—**

Themes in 18th-, 19th-, and 20th-century British art. Painting, sculpture, and design. Comparisons between the British experience and that of continental Europe and the U.S. Readings address questions related to the role of art in modern society. Limited Enrollment. GER:DB-Hum

4-5 units, Aut (Tyack, G)

## OVERSEAS STUDIES: PARIS (OSPPARIS) COURSES

### UNDERGRADUATE COURSES IN OVERSEAS STUDIES: PARIS

#### OSPPARIS 10. Engineering Research Internship—

For Paris Program students with academic experience in electronics, telecommunications or signal and image processing. Under direct guidance of researchers at Institut Supérieur d'Electronique de Paris (ISEP), and where applicable, in collaboration with other French and international graduate students, contribute to the ISEP's ongoing research projects.

6 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

#### OSPPARIS 11. Special Internship—

Often initiated by special contacts between students and professionals in France. Involvement may be based more on field work, and activity, rather than on fulfilling traditional academic requirements. Prerequisites: Written permission from the program director.

1-6 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

#### OSPPARIS 12. Paris Photography Workshop—

Exploration of Paris through camera and lab techniques. Both theoretical and practical aspects of creative photography. Extensive field work. Enrollment limited.

3 units, Aut (Villegas-Paez, O)

#### OSPPARIS 12B. Music Workshop: Singing in French—

French culture through group singing. Collaborative project provides practice in pronunciation, exposure to subtleties of the language, and an introduction to French culture. French songs from the past one hundred years. Possible performance at the end.

3 units, Win (Morgand, J)

#### OSPPARIS 13. Biology Research Internship—

Laboratory of the National Museum of Natural History. Work with international research team on project elucidating the origin of the diversity of animal form. Modern techniques in functional genomics. Applied questions on human development in an environment where embryology, paleontology and medicine converge. Two days a week commitment required.

6 units, Aut (Levi, G), Win (Levi, G), Spr (Levi, G)

#### OSPPARIS 14. Media Internship—

Case studies and independent research as groundwork for comparative analysis of media on both sides of the Atlantic. Nature of media in the U.S and in France. Media as a means for understanding culture.

3 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

#### OSPPARIS 15. Hospital Internship—

Observation of medical services in Paris hospitals. How hospital teams work in France; how medical decisions are made; how patients are treated by nurses and doctors.

3 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

#### OSPPARIS 16A. French Schooling Internship—

Working with French schoolchildren in one of three settings: a public school in Paris; a neighborhood support association in the outskirts of Paris; an after-school support association in the city. Commitment for a minimum of three hours a week on site plus meetings with internship instructor and a final paper. Number of placements depends on the needs of the sponsoring institutions. Previous work with children advised.

2-3 units, Aut (Staff), Win (Staff), Spr (Staff)

#### OSPPARIS 18. French in the Working Environment—

Preparation for internships in Paris. Understanding cultural differences between the U.S. and France in the business world: formality/familiarity; written/spoken language; sense of time and space. Vocabulary and jargon specific to French business world. Official letter writing in French.

1 unit, Aut (Ricci, M), Win (Ricci, M)

#### OSPPARIS 19. Arranged Internship 1—

Two-quarter stay required. Internships can be arranged in a number of areas including the arts, architecture, politics, engineering, marketing and PR, media and journalism, health and psychological services, IT, NGO's, research, and hospitality administration.

3-6 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

#### OSPPARIS 19B. Arranged Internship 2—

Two-quarter stay required. Internships can be arranged in a number of areas including the arts, architecture, politics, engineering, marketing and PR, media and journalism, health and psychological services, IT, NGO's, research, and hospitality administration.

3-6 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

#### OSPPARIS 22P. Intermediate French I—

4 units, Aut (Reychman, P), Win (Molkou, E), Spr (Reychman, P)

#### OSPPARIS 23P. Intermediate French II—

4 units, Aut (Molkou, E), Win (Ricci, M), Spr (Gourevitch, S)

#### OSPPARIS 24. Introduction to French Society—

Required of Paris program participants. Engagement with French society through language immersion, volunteer work, projects with French students, encounters with prominent figures, and visits to French political and cultural institutions.

1 unit, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

#### OSPPARIS 28. Performing in French—

Students participate in every aspect of theater presentation, including study of texts, scene work, stage management, and acting. Possible end-of quarter performance in a Parisian theater house. Objectives: explore French theater and texts through dramatic processes; improve French language skills and pronunciation; immersion in a collaborative and bicultural project with French students from other institutions in Paris. No experience required. In French. Minimum enrollment of five students.

3 units, Spr (Poirson, M)

#### OSPPARIS 29. Colonization, Decolonization and Immigration in France—

Social and historical phenomena of colonization and decolonization in France during the 20th century, and their relation to the migratory movements that took shape after the Second World War. Case study of Algeria. Topics include: phenomenon of colonization in its administrative, judicial, social, economic and political context; conflicts leading to independence of colonized territories; migration of population before and after decolonization.

GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Hmed, C)

#### OSPPARIS 30. The Avant Garde in France through Literature, Art, and Theater—

Multiple artistic trends and esthetic theories from Baudelaire to the Nouveau Roman, from the Surrealists to Oulipo, from the theater of cruelty to the theater of the absurd, from the Impressionists to Yves Klein. Interdisciplinary approach to reflect on the meaning of avant garde and modernity in general, and on the question of why revolutionary artists in France remained in search of institutional recognition, nonetheless.

GER:DB-Hum

4 units, Aut (Karsenti, T)

#### OSPPARIS 32. Understanding French Politics—

Key aspects of French politics including the constitutional framework, institutions, political parties and ideology, elections, political cultures, religion and politics, political elites and public policy-making, grass-root citizen participation, decentralization and local politics, and the major issues that structure and inform public debate, including attitudes and policies vis-à-vis the U.S.

GER:DB-SocSci

4-5 units, Aut (Strudel, S)

#### OSPPARIS 33. The Economics of Climate Change: Policies in Theory and Practice in the EU and the U.S.—

Economic tools for tackling climate change. Analytical bases of existing cap-and-trade schemes. The European greenhouse gas Emission Trading Scheme within the frame of the Kyoto Protocol, and emerging regulatory or voluntary markets in the U.S. Carbon-pricing mechanisms with focus on power and gas markets.

Possibilities of linking carbon pricing mechanisms on both sides of the Atlantic and conditions for integrating these markets into an international post-Kyoto agreement. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Staff)

**OSPPARIS 36. French Writing Workshop—**

Offered upon request for students who have completed an Advanced French course. Focus on French writing style, enabling students to understand and master the subtleties of French writing.

3 units, Aut (Molkou, E), Win (Molkou, E), Spr (Molkou, E)

**OSPPARIS 40P. Introductory Electronics—**

Electrical quantities and their measurement, including operation of the oscilloscope. Function of electronic components including resistor, capacitor, and inductor. Analog circuits including the operational amplifier and tuned circuits. Digital logic circuits and their functions. Lab assignments. Prerequisite: PHYSICS 43. GER:DB-EngrAppSci

5 units, Aut (Howe, R), Spr (Wong, S)

**OSPPARIS 41. EAP: Perspective, Volume, and Design—**

May be repeated for credit.

2 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

**OSPPARIS 42. EAP: Drawing with Live Models—**

May be repeated for credit.

2 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

**OSPPARIS 43. EAP: Painting and Use of Color—**

May be repeated for credit.

2 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

**OSPPARIS 44. EAP: Analytical Drawing and Graphic Art—**

May be repeated for credit.

2 units, Aut (Staff, 1), Win (Staff, 1), Spr (Staff, 1)

**OSPPARIS 46. The Baroque—**

Literary, cultural and political implications of the Baroque as a seventeenth-century phenomenon formed in response to the conditions of the sixteenth century (such as humanism, absolutism, and early capitalism) and dispersed throughout Europe, the Americas, and Asia. If the Baroque is a universal code of this period, how do its several vehicles—such as tragic drama, Ciceronian prose, and metaphysical poetry—converse with one another? Authors include Donne, Calderón, Corneille, Racine, Pascal, Vieira, and Sor Juana Inés de la Cruz. GER:DB-Hum

5 units, Spr (Greene, R)

**OSPPARIS 50M. Introductory Science of Materials—**

Topics include: the relationship between atomic structure and macroscopic properties of man-made and natural materials; mechanical and thermodynamic behavior of surgical implants including alloys, ceramics, and polymers; and materials selection for biotechnology applications such as contact lenses, artificial joints, and cardiovascular stents. No prerequisite.

4 units, Win (Staff), Spr (Staff)

**OSPPARIS 50P. Introductory Science of Materials—**

GER:DB-EngrAppSci

4 units, Aut (Staff, 1)

**OSPPARIS 54. The Artist's World: The Workshop, Patronage and Public in 19th and 20th Century France—**

Synergy between artists, their workshops, patrons, models and the public in 19th and 20th century France. Weekly sessions in museums, artists' studios, and special venues within and around Paris, attempting to understand the world of the artist, and how, in many cases, this world became not only a place of refuge, but a metaphor of the artistic creation itself. GER:DB-Hum

4 units, Win (Halevi, E)

**OSPPARIS 57. Human Rights in Comparative Perspective—**

Human rights arose from Enlightenment principles but their status in the American and French constitutions differ. Have European court decisions created a transatlantic human rights model giving more weight to Anglo-Saxon legal tradition? Philosophical, historical, and legal resources; recent case studies from both sides of the Atlantic. GER:DB-SocSci, EC-GlobalCom

4-5 units, Win (Boussaguet, L)

**OSPPARIS 60. Representations of Women in Christian Art: Boldness and Virtue—**

Representation of women as biblical heroes and saints in Christian

art. Codes of iconography and the attributes of women saints from the Renaissance to the 19th century; underlying social and moral force of these women figures throughout history. Class sessions in Paris museums. GER:DB-Hum, EC-Gender

4 units, Spr (Gallini, B)

**OSPPARIS 64. Afterlife of the Middle Ages—**

Works of literature and film that evoke a medieval past in contrast to a historical present, including criticism that treats aspects of the medieval or medievalism. The concept of medievalism emerging and evolving through the ages. The impact of the Enlightenment and Romanticism, the study of Gothic cathedrals, and the use of the term medieval in modern political discourse. Authors include Chrétien de Troyes, Mâle, Michelet, Chateaubriand, Hugo, Bataille, Holsinger. Field trips to museums and cathedrals in Paris. GER:DB-Hum

3-5 units, Spr (Galvez, M)

**OSPPARIS 65. Independent Study—**

Suggested Topics for Individual Study include: Historical Population Trends in France - growth, urbanization, immigration; Measuring French Public Opinion - design and analyses of opinion polls; Counting Parisians - learning to observe demographics on streets and Metro lines; Statistical Summaries of the Content of French Newspapers

2-3 units, Aut (Staff)

**OSPPARIS 68. Cultures of Graphic Literature—**

Study of graphic literature in and around Europe. European history, social science literature, and politics. Contemporary European graphic production by understanding historical and political context. Technologies of reproduction and distribution, Cold War politics, global and local political events, art historical movement, graphic and industrial design, racial and immigration politics, gender, and gender performance. Field trips to museums, bookshops, and the International Conference on Bande Dessinée in Angouleme, France. Visits from graphic novelists. Short, weekly responses and final group presentation. GER:DB-SocSci

3-5 units, Win (Jain, S)

**OSPPARIS 69. Science, Technology, and Culture of Medicine—**

Study of healthcare within societies, specifically within the USA and Europe. Case studies such as organ donation, surgery, randomized control trials and the historical context of evidence-based medicine, social movements, and mental illness to enable better understanding of issues of race, inequity, and medical practices. Comparative approach to understand the stakes in debates about healthcare in the USA and Europe. Students will develop a topic of their choice that focuses on a dimension of European healthcare. GER:DB-SocSci

3-5 units, Win (Jain, S)

**OSPPARIS 81. France During the Second World War: Between History and Memory—**

French politics and society from the causes of the collapse of the French Third Republic and the emergence of the French State at Vichy. The political and cultural measures of this regime in the shadow of Nazi Germany. Anti-Jewish laws and action; deportations by Vichy, the Germans, the French Fascists, and reactions to the fate of the Jews. Visions of the Resistance, the combat for liberation, and WW II in the collective memory of France. GER:DB-SocSci

5 units, Win (Virgili, F)

**OSPPARIS 85. Statistical Thinking—**

Fundamental ideas of reasoning under uncertainty using probabilities and statistical analyses. Origins of probabilistic reasoning in games of chance and its development in France during the 18th and 19th centuries. Topics include: debate between Fermat and Pascal on probabilities for games of chance, the rules of statistical inference of Laplace, and the probability models for rare events of Poisson. Original sources alongside modern interpretations, such as Laplace's non-technical *Essai sur les Probabilités*. GER:DB-Math

3 units, Aut (Switzer, P)

**OSPPARIS 91. Globalization and Its Effect on France and the European Union—**

Economic and political impact of globalization on France and the EU and influence of France and the EU on the process of

globalization. Issues of sovereignty and national identity for France; protection from versus integration into the network of globalization. GER:DB-SocSci, EC-GlobalCom

5 units, Win (*Le Cacheux, J; Laurent, E*)

**OSPPARIS 92. Building Paris: Its History, Architecture, and Urban Design—**

The development of Parisian building and architecture from the 17th century to the present. Interaction of tradition and innovation in its transformation and its historical, political, and cultural underpinnings. Visits and case studies throughout Paris illustrate the formation of the city landscape and its culture. GER:DB-Hum

4 units, Spr (*Halevi, E*)

**OSPPARIS 103A. French Lecture Series 1—**

1 unit, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 104A. French Lecture Series 2—**

1 unit, Aut (*Halevi, E*), Win (*Halevi, E*), Spr (*Halevi, E*)

**OSPPARIS 105A. French Lecture Series 3—**

1 unit, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 107Y. The Age of Cathedrals: Religious Art and Architecture in Medieval France—**

The major artistic and cultural movements that changed the face of France from the period of Suger in the 12th century through the reign of St. Louis in the 13th century. Monastic spirituality progressively gave way to an urban culture focused on man and secular knowledge, which developed daring and sophisticated building techniques. The years 1150-1250 represented a period of architectural renaissance and l'Île-de-France was its birthplace. GER:DB-Hum

4 units, Aut (*Deremble, C; Deremble, J*)

**OSPPARIS 122X. Challenges of Integration in the European Union—**

European integration is now an economic, social, and political reality. This integration has a history of mutation and a transformation of its very foundation. Topics: the evolution of welfare states, elites, political parties, and systems in Europe; lobbies, trade unions, voluntary associations, social movements, popular protest, citizenship, democracy. GER:DB-SocSci

4-5 units, Spr (*Strudel, S*)

**OSPPARIS 124P. Advanced French I—**

4 units, Aut (*Ricci, M*)

**OSPPARIS 124X. Building the European Economy: Economic Policies and Challenges Ahead—**

Issues and challenges of European economic construction. The European Economic Union at the end of the 50s; European industrial, agricultural, social, and monetary economic policies. Topics: wider definitions of Europe, its relations with industrial and developing countries, and its challenges in confronting global economic crises. GER:DB-SocSci

5 units, Aut (*Le Cacheux, J; Laurent, E*)

**OSPPARIS 125P. Advanced French II—**

4 units, Win (*Guedon, P*), Spr (*Mercier, F*)

**OSPPARIS 153X. Health Systems and Health Insurance:**

**France and the U.S., a Comparison across Space and Time—**

Should health systems be organized or left to the free market? What is the role of the state in the delivery of health care? The evolution of the health profession, health policy, and reform in France and the U.S.; measures restraining professional autonomy such as prescription guidelines in the French Medical Convention. Is the solution to the increase of health expenditures and reduced access to health care the end of autonomy for the medical profession? GER:DB-SocSci, EC-GlobalCom

4-5 units, Aut (*Fessler, J*)

**OSPPARIS 180. Paris Special Topics—**

1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 186F. Contemporary African Literature in French—**

Focus is on African writers and those of the diaspora, bound together by a common history of slave trade, bondage, colonization, and racism. Their works belong to the past, seeking to save an oral heritage of proverbs, story tales, and epics, but they are also contemporary. GER:DB-Hum, EC-GlobalCom

4 units, Win (*Mercier, F*)

**OSPPARIS 195C. Paris University: Health and Science 1—**  
1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 195D. Paris University: Health and Science 2—**  
1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 196C. Paris University: Humanities 1—**  
1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 196D. Paris University: Humanities 2—**  
1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 196E. Paris University: Humanities 3—**  
1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 197C. Paris University: Social Science 1—**  
1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 197D. Paris University: Social Science 2—**  
1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 198C. Paris University: Engineering 1—**  
1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

**OSPPARIS 198D. Paris University: Engineering 2—**  
1-6 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

## OVERSEAS STUDIES: SANTIAGO (OSPSANTG) COURSES

### UNDERGRADUATE COURSES IN OVERSEAS STUDIES: SANTIAGO

**OSPSANTG 10. Borges and Argentina—**

His work and readings of other key figures of Argentine literature during the period. Close reading technique. Readings in the context of the main developments in Argentine history, and in relationship to the major literary and philosophical trends of the 20th century. Topics include Borges' rejection of the novel, storytelling as a reaction against romanticism, philosophical concerns, paradoxical plot devices, humor, and influence in Latin America. Readings include short stories such as *The Library of Babel* and *The Aleph*, poems and essays, and texts by key Argentine writers of the period including Arlt, Bioy Casares, Silvina Ocampo, and Cortázar. GER:DB-Hum

4-5 units, Spr (*Missana, S*)

**OSPSANTG 11. Dance and Culture in Latin America—**

Selected dance forms of Latin America viewed as aspects of human behavior. Emphasis on cultural influences (e.g., European, African, and indigenous), which have shaped ritual and social dance forms of Mexico, Cuba, Brazil, Argentina, Peru, Chile, and Puerto Rico. The key issue to be explored is how Latino cultures use dance to reflect cultural values and belief systems.

4 units, Win (*Cashion, S*)

**OSPSANTG 12S. Accelerated Second-Year Spanish, Part I: Chilean Emphasis—**

Intensive sequence integrating language, culture, and sociopolitics of Chile. Emphasis is on achieving advanced proficiency in oral and written discourse including formal and informal situations, presentational language, and appropriate forms in academic and professional contexts. Prerequisite: one year of college Spanish, or 11 or 21B if taken more than two quarters prior to arriving in Santiago.

5 units, Aut (*Abad, M*), Win (*Abad, M*), Spr (*Abad, M*)

**OSPSANTG 13S. Accelerated Second-Year Spanish, Part II: Chilean Emphasis—**

Intensive sequence integrating language, culture, and sociopolitics of Chile. Emphasis is on achieving advanced proficiency in oral and written discourse including formal and informal situations, presentational language, and appropriate forms in academic and professional contexts. Prerequisite: 11 or 21B within two quarters of arriving in Santiago, or 12 or 22B.

5 units, Aut (*Abad, M*), Win (*Abad, M*), Spr (*Abad, M*)

**OSPSANTG 14. Women Writers of Latin America in the 20th Century—**

Key figures in poetry, narrative fiction, theater, and testimonio, such as Mistral, Garro, Lispector, Poniatowska, Valenzuela, Eltit

and Menchú. Close reading technique. Issues raised in literary texts that reflect the evolution of the condition of women in Latin America during the period. Topics include gender differences and relationships, tradition versus transgression, relationship between changes in the status of women and other egalitarian transformations, and women writers and the configuration of literary canons. GER:DB-Hum, EC-Gender

4-5 units, Aut (*Missana, S*), Win (*Missana, S*)

**OSPSANTG 15. Dances of Latin America—**

Movement class on Latin American dance. Social dances, such as Salsa, Tejano, Banda, Samba, Cumbia, Argentine Tango, and Chilean Cueca. Dance etiquette and gender roles prescribed by the cultural context. Field trips to Santiago nightclub and/or a festival site.

2 units, Win (*Cashion, S*)

**OSPSANTG 33. Spanish Language Tutorial—**

Prerequisite: two years of college Spanish or equivalent placement.

2 units, Aut (*Toledo, G*), Win (*Rivano, P*), Spr (*Toledo, G*)

**OSPSANTG 40. Academic Internship—**

2-3 units, Aut (*Jaksic, I*), Win (*Jaksic, I*), Spr (*Staff, I*)

**OSPSANTG 58. Living Chile: A Land of Extremes—**

Physical, ecological, and human geography of Chile. Perceptions of the Chilean territory and technologies of study. Flora, fauna, and human adaptations to regional environments. Guest lectures; field trips; workshops. GER:DB-EngrAppSci

5 units, Aut (*Reid, S*), Win (*Reid, S*)

**OSPSANTG 62. Topics in Chilean History—**

Independent study topic concerning any aspect of Chilean history such as independence and nation building, social and economic development, ideas and culture, dictatorship and democracy. Research paper based on primary and secondary sources. GER:DB-Hum

4-5 units, Win (*Staff*)

**OSPSANTG 68. The Emergence of Nations in Latin America—**

Major themes of 19th-century Latin American history, including independence from Spain, the emergence of nation states, and the development of a new social, political, and economic order. GER:DB-SocSci

4-5 units, Aut (*Jaksic, I*), Spr (*Jaksic, I*)

**OSPSANTG 71. Santiago: Urban Planning, Public Policy, and the Built Environment—**

Santiago's growth and development over time and in comparison to other mega cities in the world; impact of urban highways on the built environment; shopping malls and the development of new urban sub-centers. Topics: brief history of the city, from 1541 to 1940; urban development since 1940; the 1960 Inter-communal Urban Plan; planning and the configuration of modern Santiago; housing policy as an instrument to combat poverty; social housing policy and Santiago's built environment.

4-5 units, Spr (*Galetovic Potsch, A*)

**OSPSANTG 85. Marine Ecology of Chile and the South Pacific—**

Relationships among physical processes in the ocean, biological productivity, and the exploitation of resources by high-trophic-level predators including human beings. Characterization of ecological patterns; identification of processes operating on marine systems. Open ocean ecosystems, intertidal and benthic regions of the world's oceans, and ecological research developed along coastal regions, focusing on Chile's 4,000 km coastline. GER:DB-NatSci

5 units, Spr (*Palma, A*)

**OSPSANTG 102S. Composition and Writing Workshop for Students in Santiago—**

Advanced. Writing as craft and process: brainstorming, planning, outlining, drafting, revising, style, diction, and editing. Non-Spanish majors or minors may choose topics related to their studies. Prerequisite: SPANLANG 13C, 13R, 13S, 23B, or equivalent.

3-5 units, Aut (*Bobbert, A*), Win (*Rivano, P*), Spr (*Bobbert, A*)

**OSPSANTG 104X. Modernization and Culture in Latin America—**

Intellectual and cultural expressions of Latin America against the

background of modernization viewed as a constant tension between rationalization and subjectification, change and identity preservation, and the logic of development or economic expansion and the logic of the culture. Readings include Morande, *Cultura y modernización en América Latina* and Sarlo, *Una modernidad periférica*. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (*Subercaseaux, B*)

**OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century—**

Chile's strides towards becoming a developed country have engendered high levels of alienation and disaffection among significant sectors of the population. The roots of this apparent paradox of modernization, focusing on newly emerging actors in the Chilean political scene: Mapuche organizations, women's groups, the environmental movement, and new features of the established ones like trade unions and human rights activists.

GER:DB-SocSci

5 units, Spr (*Correa, G*)

**OSPSANTG 118X. Artistic Expression in Latin America—**

Elite, mass-media, and popular cultural changes in Chile under conditions of economic and political liberalization. The reception of cultural meanings from the center of the world social system (U.S., EU, and Japan), reformulation to respond to local conditions, and export in the shape of cultural artifacts. Innovative elements rooted in the regional and local culture. GER:DB-SocSci, EC-GlobalCom

5 units, Win (*Albornoz, C*)

**OSPSANTG 119X. The Chilean Economy: History, International Relations, and Development Strategies—**

The Chilean economy in five stages, taking into account: the international economic position of Chile; internal economic structures closely related to the inherited historical conditions and to the changing international economic position of the country; and the economic strategies prevalent during the period and the concrete development policies conducted by government authorities. GER:DB-SocSci

5 units, Spr (*Staff, I*)

**OSPSANTG 129X. Latin America in the International System—**

Latin America's role in world politics, with emphasis on the history of and models for explaining U.S.-Latin American relations. Latin America's evolving relationship in the international system. GER:DB-SocSci

4-5 units, Win (*Fuentes, C*)

**OSPSANTG 130X. The Chilean Economy in Comparative Perspective—**

Introduction to the main debates and approaches developed to understand and analyze the economies of Latin America. Recent processes of transition to market economies. Common characteristics among countries of the region; the differences and special traits of individual countries. Historical, analytical, and empirical perspectives on topics at the center of controversies and specific policy problems over several decades. Recommended: ECON 1, 51, and 52. GER:DB-SocSci

5 units, Aut (*Luders, R*), Win (*Staff, I*)

**OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective—**

The dynamics of the Chilean transition. Topics: challenges faced by democratic governments in the 90s framed by the legacy of military rule, 1973-90; political culture; institutional traditions of democracy; and the Chilean process within the broader context of Latin American political development. GER:DB-SocSci

5 units, Aut (*Micco, S*)

## PATHOLOGY (PATH) COURSES

### UNDERGRADUATE COURSES IN PATHOLOGY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**PATH 101. Cancer Biology**

(Same as C BIO 101) Experimental approaches to understanding the origins, diagnosis, and treatment of cancer. Focus on key experiments and discoveries with emphasis on genetics, molecular biology, and cell biology. Topics include carcinogens, tumor virology, oncogenes, tumor suppressor genes, cell cycle regulation, angiogenesis, invasion and metastasis, cancer genomics, cancer epidemiology, and cancer therapies. Discussion sections based on primary research articles that describe key experiments in the field. Satisfies Central Menu Areas 1 or 2 for Bio majors. Prerequisite: Biology or Human Biology core or equivalent, or consent of instructor.

4 units, Win (Lipsick, J)

**PATH 103Q. Lymphocyte Migration**

(F,Dial) Stanford Introductory Dialogue. Preference to sophomores. Lymphocytes migrate from blood vessels into tissues to participate in immune surveillance and the development of inflammation. The lymphocyte and blood vessel endothelia molecules that control lymphocyte migration, and are implicated in the development of human diseases such as asthma, type 1 diabetes, and multiple sclerosis are discussed.

1 unit, Aut (Michie, S)

**PATH 105Q. Final Analysis: The Autopsy as a Tool of Medical Inquiry**

Preference to sophomores. Based on review of patient medical histories and examination of formalin-fixed and unfixed tissues from autopsy. Student-directed problem-solving; students develop learning objectives for each case, and present findings. The effect of disease on normal structure and function, ethics of patient care, allocation of medical resources, efficiency of therapy, and medical error. Prerequisite: hepatitis-B vaccination; free vaccinations during the winter for accepted students.

3 units, not given this year

**PATH 199. Undergraduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**GRADUATE COURSES IN PATHOLOGY**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**PATH 206. Epigenetics**

(Same as BIO 156, BIO 256, GENE 206) For graduate students in the Biosciences and upper level Biology undergraduates. Mechanisms by which phenotypes not determined by the DNA sequence are stably inherited in successive cell divisions. From the discovery of position-effect variegation in *Drosophila* in the 1920s to present-day studies of covalent modifications of histones and DNA methylation. Topics include: position effect, gene silencing, heterochromatin, centromere identity, genomic imprinting, histone code, variant histones, and the role of epigenetics in cancer. Prerequisite: BIO41 and BIO42, or GENE 203, or consent of instructor.

2 units, alternate years, not given this year

**PATH 210. Stem Cells in Development and Disease**

Molecular and cellular mechanisms underlying the basic self-renewal and differentiation properties of stem cells in multiple tissues and organisms. How abnormal stem cell behavior may contribute to diseases such as cancer. How to manipulate stem cell behavior in vitro or in vivo for therapeutic purposes. Classical papers and recent literatures in the field of stem cell biology. Open to graduate, medical, and advanced undergraduate students. Prerequisite: consent of instructor.

1-2 units, Aut (Lu, B)

**PATH 213. Gross Autopsy Pathology Laboratory**

Examine/discuss unfixed dissected organs from current autopsies and correlate morphologic findings with the clinical history. Students view postmortem examinations and may participate (in a small group) in one postmortem examination with the assistance of residents and staff, and present the case to the class. Class scheduling is flexible. Additional unit for participation in a postmortem examination. Class may not be repeated. Prerequisite: HHD221.

2-3 units, Aut (Regula, D), Win (Regula, D)

**PATH 218. Computational Analysis of Biological Images**

(Same as GENE 218) Physical and computational tools for acquisition, processing, interpretation, and archiving of biological images. Emphasis is on digital microscopy.

2 units, not given this year

**PATH 233. The Biology of Small Modulatory RNAs**

(Same as GENE 233, MI 233) Open to graduate and medical students. Explores recent progress and unsolved questions in the field of RNA interference and microRNA biology. Students are required to read assigned primary literature before each class and actively participate in guided discussions on related technical and conceptual issues during class meetings. Assignments include critiques of assigned papers and developing a novel research proposal.

2 units, alternate years, not given this year

**PATH 234. Fundamentals of RNA Biology**

(Same as GENE 234, MI 234) For graduate or medical students and (if space allows) to active participants from other segments of the Stanford Community (e.g., TGR students); undergraduates by instructor consent. Fundamental issues of RNA biology, with the goal of setting a foundation for students to explore the expanding world of RNA-based regulation. Each week a topic is covered by a faculty lecture and journal club presentations by students.

2 units, Aut (Fire, A; Chen, C)

**PATH 240. Clinical Studies in Pathology I**

A broad exposure to the practice of pathology in an academic medical center. Students are assigned a faculty mentor and work closely with pathology residents, fellows and faculty. Two months are spent in surgical pathology where students help examine surgical resection specimens and biopsies and participate in making a final diagnosis. One month is spent in autopsy pathology where students perform autopsy prosections and formulate final anatomic diagnoses under the supervision of faculty. This course must be combined with Clinical Studies in Pathology II, and two additional quarters of PATH 399, Directed Research, to fulfill a 12 month Post-Sophomore year Fellowship in Pathology. Prerequisite: MD candidate; instructor consent.

3-9 units, Aut (Connolly, A; Higgins, J), Win (Connolly, A; Higgins, J), Spr (Higgins, J; Connolly, A), Sum (Natkunam, Y; Higgins, J)

**PATH 241. Clinical Studies in Pathology II**

An in-depth exposure to the practice of pathology for students who have completed Clinical Studies in Pathology I. Students are assigned a faculty mentor and work closely with pathology residents, fellows and faculty. Two months are spent in surgical pathology where students help examine surgical resection specimens and biopsies and participate in making a final diagnosis. One month is spent in sub-specialty areas of pathology that include dermatopathology, neuropathology, renal pathology, lymph node pathology or cytology. This course must be combined with Clinical Studies in Pathology I and two additional quarters of PATH 399, Directed Research, to fulfill a 12-month Post-Sophomore year Fellowship in Pathology. Prerequisite: consent of instructor and successful completion of Clinical Studies in Pathology I (PATH 240).

3-9 units, Aut (Connolly, A; Higgins, J), Win (Connolly, A; Higgins, J), Spr (Higgins, J; Connolly, A), Sum (Higgins, J; Natkunam, Y)

**PATH 280. Early Clinical Experience in Pathology**

Provides an observational experience as determined by the instructor and student. Prerequisite: consent of instructor.

1-2 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PATH 299. Directed Reading in Pathology**

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PATH 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PATH 399. Graduate Research**

Students undertake investigations sponsored by individual faculty members. Opportunities at the molecular, cellular, and

clinicopathologic levels. Prerequisite: consent of instructor.  
*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## PEDIATRICS (PEDS) COURSES

### UNDERGRADUATE COURSES IN PEDIATRICS

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **PEDS 65N. Understanding Children's Health Disparities**

(F,Sem) Stanford Introductory Seminar. The social and economic factors that affect children and their health status. The principal sources of disparities in the health of children in the U.S. are not biologic, but social and economic. Topics include ethnic, cultural, and behavioral factors that affect children's health, both directly and indirectly; lack of health insurance; and current proposals for health care reform, focusing specifically on how they will impact existing health disparities among children.

*3 units, Win (Barr, D)*

#### **PEDS 65Q. Understanding Children's Health Disparities**

(S,Sem) Stanford Introductory Seminar. The social and economic factors that affect children and their health status. The principal sources of disparities in the health of children in the U.S. are not biologic, but social and economic. Topics include ethnic, cultural, and behavioral factors that affect children's health, both directly and indirectly; lack of health insurance; and current proposals for health care reform, focusing specifically on how they will impact existing health disparities among children. Includes instruction addressing written assignments and required oral presentations.

*3 units, Aut (Barr, D)*

#### **PEDS 105. Health Promotion and the Campus Culture**

(Same as PEDS 215) Multidisciplinary perspectives of public health and health psychology. The prevalence of health risk behaviors on the contemporary college campus and the challenges of risk reduction. Students apply theoretical frameworks to peer health promotion campus projects. Limited enrollment. Prerequisite: consent of instructor following first meeting.

*4 units, Spr (Pertofsky, C; Friedman, I)*

#### **PEDS 106. Pursuit of Happiness and Health**

(Same as PEDS 206) Evidence-based correlations between health and quality of life measures: core theoretical concepts and research findings. Topics include cognitive neuroscience and positive emotion, genetics and set point theory, psychological research and subjective well-being. Emphasis on issues relevant to high-achieving adolescents and young adults.

*3 units, Win (Friedman, I; Pertofsky, C; Luskin, F)*

#### **PEDS 111Q. Issues of Race and Ethnicity in the Health of Children**

Preference to sophomores. Medicine and pediatrics from a public-health, evidence-based perspective. How research methods unmask health issues for at-risk racial and ethnic groups of children. Determinants of health with regard to race and ethnicity and ideas for changes in public policy. Students identify an area of interest and proposed intervention.

*3-4 units, not given this year*

#### **PEDS 116. Alcohol Issues and the Campus Culture**

Multidisciplinary perspectives of public health, health psychology, and sociology. The prevalence and scope of alcohol-related problems; challenges of risk reduction and intervention strategies. Students apply theoretical frameworks to alcohol-related research topics and projects. Limited enrollment. Prerequisite: consent of instructor following first meeting.

*4 units, not given this year*

#### **PEDS 199. Undergraduate Directed Reading/Research**

Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### GRADUATE COURSES IN PEDIATRICS

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **PEDS 201. Medical Leadership Development**

A condensed leadership curriculum for medical students. Concepts and practices of leadership development. Topics include: defining leadership, modeling the way, the value of teams, communication and emotional intelligence, diversity, and conflict management.

*1 unit, not given this year*

#### **PEDS 206. Pursuit of Happiness and Health**

(Same as PEDS 106) Evidence-based correlations between health and quality of life measures: core theoretical concepts and research findings. Topics include cognitive neuroscience and positive emotion, genetics and set point theory, psychological research and subjective well-being. Emphasis on issues relevant to high-achieving adolescents and young adults.

*3 units, Win (Friedman, I; Pertofsky, C; Luskin, F)*

#### **PEDS 211. Medical-Legal Issues in Children's Health**

(Same as LAW 643) Explores the link between poverty and children's health and how the medical and legal fields can work together to improve health outcomes for low income children. Weekly class meetings covering medical legal issues such as asthma immigration, health insurance; intake interviews with patient families and analysis of their medical legal issues; group project focused on a medical legal policy issue; final paper cowritten by law and medical students. May be taken for 2 units (weekly 2.5 hour seminar meetings only), 3 units (participation in either intake interviews or policy work) or 4 units (full participation in all course components). Prerequisite: instructor consent. Preference to students committed to full participation.

*2-4 units, Spr (Staff)*

#### **PEDS 212. Challenges of Human Migration: Health and Health Care of Migrants and Autochthonous Populations**

(Same as HUMBIO 122M) An emerging area of inquiry. Topics include: global migration trends, health Issues/aspects of migration, healthcare and the needs of immigrants in the US, and migrants as healthcare providers: a new area of inquiry in the US. Class is structured to include: lectures lead by the instructor and possible guest speakers; seminar, discussion and case study sessions led by students.

*3 units, Spr (Rodriguez, E)*

#### **PEDS 214. Introduction to Pediatrics Lecture Series**

Introduction to the various aspects of pediatrics, directed at pre-clinical MD students, undergraduates, or graduate students. Course composed of interactive lectures conducted by pediatric faculty on subjects ranging from normal development to topics in different pediatric subspecialties. current issues in the field, and opportunities for students considering this specialty. Speakers also touch on their career paths and choices and are available to answer questions about their areas of interest. By special arrangement students may have the opportunity to shadow general pediatricians or pediatric specialists. Intended to stimulate interest in pediatrics and to inform students about the breadth of the field.

*1 unit, Win (Heninger, C)*

#### **PEDS 215. Health Promotion and the Campus Culture**

(Same as PEDS 105) Multidisciplinary perspectives of public health and health psychology. The prevalence of health risk behaviors on the contemporary college campus and the challenges of risk reduction. Students apply theoretical frameworks to peer health promotion campus projects. Limited enrollment. Prerequisite: consent of instructor following first meeting.

*4 units, Spr (Pertofsky, C; Friedman, I)*

#### **PEDS 222. Beyond Health Care: Seeking Health in Society**

(Same as HUMBIO 122) Available evidence at the national and cross-country level linking social welfare interventions and health outcomes. If and how non-health programs and policies could have an impact on positive health outcomes. Evaluation of social programs and policies that buffer the negative health impact of economic instability and unemployment among adult workers and their children. Examination of safety nets, including public health insurance, income maintenance programs, and disability insurance. Prerequisites: HUMBIO 4B or equivalent, and background in research methods and statistics.

*3 units, Aut (Rodriguez, E)*

#### **PEDS 223. Human Rights and Global Health**

Open to medical students, graduate students, and advanced undergraduates. A survey of the field of human rights and global

health issues, with an emphasis on issues relevant to health professionals. Topics include the basic international conventions of human rights law, the origins and evolution of the legal notion of health as a human right, the role of health professionals in documenting the health consequences of conflict and human rights violations, health and women's human rights, health and children's human rights, the health status of refugees and displaced persons, torture, bioethics and human rights, and the worldwide availability of medicinal drugs.

3 units, Spr (Patenaude, B; Magnus, D)

**PEDS 224. Genocide and Humanitarian Intervention**

Open to medical students, graduate students, and undergraduate students. Traces the history of genocide in the 20th century and the question of humanitarian intervention to stop it, a topic that has been especially controversial since the end of the Cold War. The pre-1990s discussion begins with the Armenian genocide during the First World War and includes the Holocaust and Cambodia under the Khmer Rouge in the 1970s. Coverage of genocide and humanitarian intervention since the 1990s includes the wars in Bosnia, Rwanda, Kosovo, the Congo and Sudan.

3 units, Win (Magnus, D; Patenaude, B)

**PEDS 230. Pediatrics Journal Club**

Each session focuses on a current article in pediatric medicine. Discussions led by faculty experts in the area covered that session. Topics may range widely, depending on the available literature and students' interests. Students are expected to review the chosen article before class and participate in discussion. Discussion includes methodology and statistical analysis of each study and its relevance to pediatric practice.

1 unit, Spr (Staff)

**PEDS 231. Medicine for Innovators and Entrepreneurs**

(Same as IMMUNOL 231) Interdisciplinary, project-based course in which bioscience, bioinformatics, biodesign, bioengineering students learn concepts and principles to understand human disease and work together to propose solutions to medical problems. Diabetes mellitus is used as a paradigm for understanding human disease. Guest medical school and outside faculty. Field trips to Stanford clinics and biotechnology companies. Prerequisite: college level biology.

3-4 units, not given this year

**PEDS 240. The Use of Race in Clinical Decision-Making**

Addresses the question of when it is appropriate for a physician to use a patient's race as a factor in making medical decisions. With growing frequency, published clinical guidelines and approved indications of pharmaceuticals define different approaches to treatment for patients of different races. Covers the scientific basis of using race as a biologic category and the scientific evidence on which clinical guidelines and pharmaceutical indications have been developed.

1 unit, not given this year

**PEDS 246. Developmental Disabilities: From Biology to Policy**

(Same as HUMBIO 146D) Changes in science and societal attitudes have resulted in an increased prevalence of individuals with disabilities in our communities. This course focuses on Down syndrome, cerebral palsy, Fragile X, and autism. Topics include medical and social definitions of disability; the impact of attitudes, beliefs, and values; advances in biological sciences that may lead to novel therapies to improve functioning; and federal policies, laws, and regulations such as IDEA that increase opportunities for community participation. A field experience complements classroom discussion. Prerequisite: HUMBIO core or equivalent, and consent of instructor.

3 units, Win (Feldman, H)

**PEDS 250. Social and Environmental Determinants of Health**

How race/ethnicity and SES contribute to health disparities, how vulnerable populations are uniquely at health risk, and how the built environment relates to health and wellness. Topics include: gender, age, race/ethnicity, language, education, individual SES and neighborhood SES as related to health; individual and structural race bias; health needs of vulnerable populations (e.g., the homeless, the incarcerated, immigrant populations, children, and uninsured/underinsured); and environmental forces (e.g., urban design/planning, traffic/car culture, green space, housing, food access/culture, law enforcement, and media).

3 units, Aut (Chamberlain, L)

**PEDS 251A. Medical Ethics I**

Required for Scholarly Concentration in Biomedical Ethics and Medical Humanities. The field of bioethics, including theoretical approaches to bioethical problems. Contemporary controversies and clinical cases. Values that arise in different situations and clinical encounters. Issues include: genetics and stem cell research, rationing, ethical issues in care at the end of life, organ transplantation issues.

2 units, Win (Magnus, D)

**PEDS 251B. Medical Ethics II**

The integration of ethical theory with applications of theory or conceptual issues in medicine, health care, and the life and social sciences. Topic varies by year. Possible topics include: ethical issues in stem cell research; death and dying; genetics and ethics; concepts of health and disease; the ethics of international research; and ethical implications of new reproductive technology.

2 units, Aut (Magnus, D)

**PEDS 252. Partnering with Community-based Organizations and Coalitions to Reach Underserved Populations**

Principles of community engagement for improving community health, including appreciation of complexities. Discussion by experienced health professionals about incorporating community engagement activities into careers in medicine. Work in small groups to partner with a local community-based organization, coalition, clinic, or school to develop and conduct a community health assessment project. Development of skills in formative research to inform design of health assessment tool. Completion of project assessment plan and assessment tool, including strategies for data collection and analysis. Data collection and analysis of community health assessment project. Following analysis, completion of a summary report/product that best meets needs of community partner. Dissemination of findings to relevant community groups/coalitions per request of community partner. Preparation of oral presentation to academic colleagues and faculty leaders. Completion of one of the following: an individual

2 units, not given this year

**PEDS 253. Applied Grant-Writing Skills for Community and Clinical Research**

Skill-building in writing scientific research proposals. Topics include: grant proposal preparation; scientific literature review; developing research aims; decision-making on study design & methodology; planning statistical analyses; determining research compliances, timelines and resources. Students develop drafts of potential projects, peer-review and critique writing samples, and receive detailed feedback from instructor on all aspects of research projects.

2 units, not given this year

**PEDS 254. Pediatric Physical Findings Rounds**

Pediatric patients with specific physical findings and hospitalized at LPOCH are identified and introduced to students. Students in small groups examine patients at the bedside to note the physical finding and discuss it within the context of the patient's clinical problem. Emphasis is on basic science discussion to understand the cause of the finding.

1 unit, Aut (Prober, C), Win (Prober, C), Spr (Prober, C)

**PEDS 280. Early Clinical Experience**

Provides students an opportunity to see patients and correlate clinical findings with preclinical coursework. Students spend a half day or a full day in a pediatric subspecialty clinic (e.g., infectious diseases, endocrine, gastroenterology), participate in conferences and accompany attending physicians. Students have directed reading and meet with faculty for one hour per week to discuss their reading.

2-4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PEDS 281. Childhood Chronic Illness: Impact on Family Development**

The Pals Program is a volunteer activity serving Lucile Packard Children's Hospital chronically ill patients and their siblings. Modeled after the Big Brother/Big Sister Program, Pals matches first- and second-year medical students with pediatric patients or their siblings. The patients and/or their siblings enjoy the support and companionship of their Pals, and the medical students learn firsthand about the emotional and social aspects of chronic illness

during childhood. Pals meet regularly throughout the year to participate in fun activities such as movies, ball games, museums, and picnics. The activities and personal relationships are overseen by the LPCH Pals social worker. Bimonthly class meetings introduce the students to pediatric diseases such as leukemia, hemophilia and cancer. The class brings in physicians to give the medical perspective, but also pediatric patients to get their perspective as well. Prerequisite: approval of the LPCH social worker for Pals.

*1 unit, Aut (Berquist, W; Madhok, J), Win (Berquist, W), Spr (Staff)*

### **PEDS 282. Pregnancy, Birth, and Infancy**

(Same as OBGYN 282) Comprehensive clinical experience where pre-clinical medical students follow pregnant women receiving care at Stanford hospitals to attend prenatal visits, delivery, and postnatal visits. Continuity clinic format, combined with didactic lessons and discussion seminars. Students are exposed to clinical activities in a meaningful context, bolstering classroom studies in anatomy, physiology, embryology and human development, and emphasizing social, economic, and personal issues related to medicine. This program spans one quarter, covering topics related to pregnancy, labor and delivery and newborn care. In addition to clinic experiences, students are expected to spend 1-2 hours/week in lectures and to complete a reflection of their experiences in the course. Prerequisite: pre-clinical medical student.

*3 units, Spr (Staff)*

### **PEDS 299. Directed Reading in Pediatrics**

Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **PEDS 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

*4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **PEDS 399. Graduate Research**

Students undertake investigations sponsored by individual faculty members.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## PHILOSOPHY (PHIL) COURSES

### UNDERGRADUATE COURSES IN PHILOSOPHY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **PHIL 1. Introduction to Philosophy**

Is there one truth or many? Does science tell us everything there is to know? Can our minds be purely physical? Do we have free will? Is faith rational? Should we always be rational? What is the meaning of life? Are there moral truths? What are truth, reality, rationality, and knowledge? How can such questions be answered? Intensive introduction to theories and techniques in philosophy from various contemporary traditions. GER:DB-Hum

*5 units, Aut (Hussain, N)*

#### **PHIL 2. Introduction to Moral Philosophy**

(Same as ETHICSOC 20) What is the basis of moral judgment? What makes right actions right and wrong actions wrong? What makes a state of affairs good or worth promoting? What is it to have a good or virtuous character? Answers to classic questions in ethics through the works of traditional and contemporary authors. Fulfills the Philosophy ethical reasoning requirement. GER:DB-Hum, EC-EthicReas

*5 units, Win (Dannenberg, J)*

#### **PHIL 7N. What is Truth**

(F,Sem) Stanford Introductory Seminar. This question can be answered precisely in some important cases. We begin with the language of propositional logic where truth is defined by simple tables. This is already sufficient for description of many important problems and leads to a famous (\$1 000 000) problem  $P=NP$ . We use Sudoku puzzles for illustration. Close connection between

propositional truth and proof is established by the resolution method forming a basis of most automated theorem provers. The language of predicate logic covers much more and illustrates the notion of completeness. Register machines provide connection with computations and lead to a fundamental classification of problems of truth with respect to decidability. The language of arithmetic exhibits a new phenomenon of incompleteness that changed significant part of philosophy in 20-th century. GER:DB-Hum

*3 units, Spr (Mints, G)*

#### **PHIL 8N. Free Will and Responsibility**

In what sense are we, or might we be free agents? Is our freedom compatible with our being fully a part of the same natural, causal order that includes other physical and biological systems? What assumptions about freedom do we make when we hold people accountable morally and/or legally? When we hold people accountable, and so responsible, can we also see them as part of the natural, causal order? Or is there a deep incompatibility between these two ways of understanding ourselves? What assumptions about our freedom do we make when we deliberate about what to do? Are these assumptions in conflict with seeing ourselves as part of the natural, causal order? We will explore these and related questions primarily by way of careful study of recent and contemporary philosophical research on these matters. GER:DB-Hum

*4 units, not given this year*

#### **PHIL 9N. Philosophical Classics of the 20th Century**

Last century's best and most influential philosophical writings. Topics include ethics (what is the nature of right and wrong?), language (how do meaning, reference, and truth arise in the natural world?), science (can science claim objectively accurate descriptions of reality?), existence (are there things that don't exist?), and the mind (could robots ever be conscious?). Authors include Bertrand Russell, Ludwig Wittgenstein, Rudolf Carnap, Willard Quine, Thomas Kuhn, John Rawls, and Saul Kripke. The lay of the land in contemporary philosophy. GER:DB-Hum

*4 units, not given this year*

#### **PHIL 10N. Traveling Through Time**

Is time travel possible? Yes. We do it every day, at the rate of one minute per minute. Relativity theory even suggests a sense in which we could travel to the distant future. But could we travel to the past? If so, why aren't there any time travelers around? If not, is that because of some law of physics or because the very idea of time travel is incoherent? Suppose I were to go back in time and try to save JFK. Would I be bound to fail? What would stop me? Couldn't I just try again? If I eventually succeeded, would I thereby create a new branch in time? Or can we make sense of the idea of changing the past? What would happen if I tried to prevent my parents from having kids? What went on in the last season of *Lost*? We'll try to answer questions like these by looking at classic and contemporary work in the physics and philosophy of time, as well as pertinent case studies in fiction and film. Special guest speakers from the future are hereby invited.

*3 units, not given this year*

#### **PHIL 11N. Skepticism**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Historical and contemporary philosophical perspectives on the limits of human knowledge of a mind-independent world and causal laws of nature. The nature and possibility of a priori knowledge. GER:DB-Hum

*3 units, Win (De Pierris, G)*

#### **PHIL 15N. Freedom, Community, and Morality**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Does the freedom of the individual conflict with the demands of human community and morality? Or, as some philosophers have maintained, does the freedom of the individual find its highest expression in a moral community of other human beings? Readings include Camus, Mill, Rousseau, and Kant. GER:DB-Hum, EC-EthicReas

*3 units, Aut (Friedman, M)*

#### **PHIL 20S. Introduction to Moral Philosophy**

What makes right actions right and wrong actions wrong? Must right actions promote some further good? What is the role of consequences in the evaluation of actions as right or good? Focus

is on traditional attempts to account for what determines which actions are right, what is worth promoting, and what kind of person one ought to be. Readings from primarily historical figures such as Aristotle, Hume, Kant, Mill, and others.

*3 units, not given this year*

### PHIL 22. Ethics in Theory and Practice

(Same as ETHICSOC 10) Weekly talks by Stanford faculty on important questions of ethics that arise in private and public life. These questions arise in all disciplines and are central to many of the main problems confronting humanity today. Such questions include: what is our obligation to future generations? are there any human rights? what is the appropriate role of religion in politics? is capital punishment ever justified? what are the ethical obligations of a researcher? should the university teach moral values? what principles of justice should govern the distribution of K-12 education? Class meets Fridays from noon to 1:05. Format is an informal talk of about 35- 40 minutes, followed by discussion.

*1 unit, Aut (Sockness, B), Win (Sockness, B), Spr (Sockness, B)*

### PHIL 23C. Counterfactuals

Reasoning about counterfactual conditionals plays an important role in contemporary philosophy. Not only have counterfactual analyses been proposed for central philosophical notions, including causation, laws of nature, free will, and knowledge, but also counterfactuals have become objects of interest in their own right, both in the philosophy of language and in logic. This tutorial will introduce the standard approaches to the semantics of counterfactuals, focusing on the work of David Lewis and Robert Stalnaker. Prerequisite: one logic course (e.g., 50, 150, or 151) or consent of instructor.

*2 units, not given this year*

### PHIL 23E. Embodied Cognition

Where does the mind stop and the world begin? A standard assumption is that thinking is somehow local to the central nervous system; that is, cognition just amounts to brain activity. A wave of recent work in philosophy and cognitive science has questioned this assumption, insisting that the mind cannot be understood outside the context of a living body interacting dynamically with an environment. To put it more dramatically, the mind extends out into the world. We shall read some of the main proponents of this move toward embodied and embedded cognition, and try to assess the extent to which it seriously calls into question more traditional views about how mind, brain, body, and world fit together.

*2 units, not given this year*

### PHIL 23F. Forgive and Punish

Are we ever justified in forgiving those who wrong us? Do we have more reason to seek revenge and/or punishment than we do to forgive? Does it matter if wrongdoers apologize and repent for their offenses? Are there some acts and/or persons that shouldn't be forgiven? This tutorial will take up these questions by examining (mostly recent) philosophical writings about: forgiveness, retribution, the reactive attitudes (such as resentment and hatred), and, more generally, how humans should (and shouldn't) respond to wrongdoing.

*2 units, not given this year*

### PHIL 23G. Psychological Pessimism and Human Nature

In different ways, Thucydides, Hobbes, Rousseau, Kant, and Schopenhauer all take themselves to be emphasizing a just so, descriptive pessimism about human nature in order to highlight the more pressing question concerning what humankind can make itself to be. In other words, for these thinkers pessimism represents a sort of intellectual honesty about human nature, but these insights invariably underscore a profound optimism in spite of their pessimism. Our guiding question will be to explore whether and how each of these thinkers reconciles their philosophical optimism with their psychological pessimism about human nature.

*2 units, Aut (McLuckie, A)*

### PHIL 23H. Perfectionism: The Idea of the Perfect in Nature, Ethics, and Politics

Perfection is the full realization of what is best or most excellent. In this tutorial course we will explore philosophical thought on perfection in three different contexts: natural teleology, individual ethical life, and utopian and anti-utopian social thought. Throughout the course, we will ask the following questions: What is a perfect being? Why is perfection per se good or desirable? Do

evaluative comparisons presuppose some absolute standard of perfection? Does it make sense to aim at perfection in ethical and political life? What are the virtues of imperfection? What are the hazards of pursuing perfection in the political realm? Is perfectionism compatible with pluralism about values? Is perfectionism compatible with government based on popular will? The primary emphasis is on close reading and discussion of classic texts in ethical theory, including selections from Plato, Aristotle, Aquinas, Rousseau, Kant, and Tocqueville, accompanied by contemporary selections.

*2 units, Win (Staff)*

### PHIL 23J. Respect

The notion of respect plays a crucial role in a variety of human contexts. We respect many different things and we respect them in many different ways: from parents and elders, to public institutions and the law, and other people's dignity, feelings and rights. Many, in fact, claim that all people deserve respect some way or another. Public conversations lately have been plagued with calls to respect the environment, life in all of its forms, citizens, sexual orientation, etc. Additionally, it is also urged that public debates should take place under conditions of mutual respect: that above and beyond our differences and our interests, we should respect each other as persons. In particular, philosophers working in moral and political theory focus on what respect for persons might mean including oneself and possibly other entities. Such a notion is frequently issued inter alia in discussions about justice and legitimacy, equality and exploitation, multiculturalism and pluralism, etc.

*2 units, Win (Jimenez de la Gama, P)*

### PHIL 23K. Race and Gender

Are race and gender interesting biological categories, or are they in some way socially constructed? How are race and gender similar and different? Are legal restrictions on racist or sexist speech morally acceptable? What about racial profiling? This tutorial will explore theoretical questions about race and gender drawn from metaphysics and the philosophy of science, as well as the pressing moral and political questions these topics raise. Readings will consist of recent articles by prominent philosophers, including Elizabeth Anderson, Sally Haslanger, Tommie Shelby, Rae Langton, and Laurence Thomas.

*2 units, Spr (Asarnow, S; Persad, G)*

### PHIL 23L. Love and Friendship

People as different as Jesus Christ and Justin Timberlake think that love is crucial to living the good life. But what is love? What part should it play in our lives? Is it just one value among many? This course will consider questions about the nature of love, the role it plays in moral philosophy, and its effect on individual autonomy. Readings will be from both contemporary and historical sources.

*2 units, not given this year*

### PHIL 23N. Neuroscience and the Self

The Self: Fiction or reality? Bundle of perceptions? Pragmatic role-concept? Fleeting moment of consciousness? Social invention? Narrative construct? Various philosophical conceptions of the self will be explored with a particular focus on the notion of the 'narrative self.' Literature from neuroscience, psychology and philosophy will be considered.

*2 units, not given this year*

### PHIL 23T. Intellectual trust in oneself and others

Most people have many false beliefs. Yet, one routinely relies on one's own beliefs and on the views of others. Does that mean that one takes oneself to be exceptionally good at forming true beliefs, and exceptionally good at detecting false beliefs in others? When is it justified to place intellectual trust in oneself and in others?

*2 units, not given this year*

### PHIL 25SI. The Animal-Human Relationship: Interdisciplinary Perspectives

The ethical, scientific, and spiritual problems that arise from the interaction between humans and other animals. Can animals have empathy? What does it mean for an animal to feel pain? How did humans come to dominate other animals? What moral obligations do humans have towards animals? Where do animals fit in religious thought? Is animal research ethical, and is it effective? What role does meat consumption play in modern society? How can the environmental impacts of livestock production be

mitigated? Guest lecturers from philosophy, literature, biology, neuroscience, religious studies, psychology, anthropology, and environmental science.

1 unit

**PHIL 30S. Justifying justice at home and abroad**

Is the war against Osama bin Laden just or justifiable? Does America have the right to intervene in Libya or Afghanistan? Are Wall Street regulations justified based on the good consequences that result for society? Is health care reform warranted? The goal of this course is to provide the student with a framework with which to approach, argue about, justify and/or condemn things that take place in the contemporary socio-political arena. Main topics in socio-political philosophy. Rights. Are rights justified based on the good consequences that result for a society that has them; or by virtue of being a rational being one has certain rights. Property. According to the Lockean school of thought, property consists in a direct, metaphysical relation between an object (owned) and a person (owner); according to the Kantian school of thought, property consists in an agreement among members of a community to the effect that an individual (owner) has the right to exclusive use of an object

3 units, Sum (Staff)

**PHIL 41Q. Truth**

Preference to sophomores. Central issues animating current work in the philosophy of truth. What is truth? What is it about a statement or judgment that makes it true rather than false? Are there any propositions that are neither true nor false? Could truth be relative to individuals or communities? Do people have different notions of truth for different enterprises such as mathematics and ethics? Might truth be a matter of degree? Sources include the instructor's book manuscript and other contemporary writers. GER:DB-Hum

3 units, not given this year

**PHIL 42. Philosophy through Theater: Choice and Chance**

Dramatic literature as a window into philosophical work on freedom of the will and indeterminism. Students participate in the production of original one-act plays. GER:DB-Hum

4 units, not given this year

**PHIL 43S. Happiness: Positive Psychology and Philosophy**

The connection between research in positive psychology to determine what happiness is and the conditions under which human beings are happy with issues in moral philosophy regarding whether we should aim at happiness or think of it as a good. The assumptions about happiness made by positive psychologists. The philosophical insight into the question of how people should live that is gained by looking at the empirical results provided by psychologists.

3 units, not given this year

**PHIL 45S. Is it always good to 'be yourself'? Issues in Ethics and Moral Psychology**

It may seem obvious that it is good to 'be yourself,' to be 'who you really are,' or to do what you 'really' want to do 'but is it? Some believe that we are our true, or real, selves when we act on our values, what we love, or what we care most about. But if that is true, then is it still good to be yourself when what you value and care most about involves a commitment to acts of terrorism, torturing others, or a life of pain and boredom? We will look at contemporary philosophical attempts to make sense of the idea of 'being yourself,' and what the nature of the value of this authenticity is. Authors include Bratman, Frankfurt, Korsgaard, Millgram and Williams.

3 units, Sum (Staff)

**PHIL 50. Introductory Logic**

Propositional and predicate logic; emphasis is on translating English sentences into logical symbols and constructing derivations of valid arguments. GER:DB-Math

4 units, Aut (Duarte, S), Spr (Wishon, D)

**PHIL 50S. Introductory Logic**

Propositional and predicate logic. Themes include: translations of English sentences into logical symbols; semantics of and proof rules for propositional and predicate logic. Emphasis is on evaluating arguments with the syntax and semantics of contemporary logic. Special attention to the properties of the languages studied.

3 units, not given this year

**PHIL 60. Introduction to Philosophy of Science**

(Same as HPS 60) 20th-century views on the nature of scientific knowledge. Logical positivism and Popper; the problem of induction; Kuhn, Feyerabend, and radical philosophies of science; subsequent attempts to rebuild moderate empiricist and realist positions. GER:DB-Hum

5 units, Win (Ryckman, T)

**PHIL 61. Science, Religion, and the Birth of Modern Philosophy**

(Same as HPS 61) Galileo's defense of the Copernican world-system that initiated the scientific revolution of the 17th century, led to conflict between science and religion, and influenced the development of modern philosophy. Readings focus on Galileo and Descartes. GER:DB-Hum

5 units, not given this year

**PHIL 63S. Introduction to Bioethics**

If I am at least partly at fault for my own illness, should I lose priority for treatment? Is there a moral difference between killing and letting die? Focus is on understanding recent issues in applied ethics that arise from the biological and medical sciences. Readings are centralized around human life. Topics may include pre-birth, cloning, killing and letting die, and organ markets.

3 units, Sum (Staff)

**PHIL 71H. Philosophy and the Real World**

Introduction to the humanities as an applied discipline; how literary and philosophical ideas illuminate and change how people live their lives as individuals and members of society. Focus is on short texts that illustrate how literary and philosophical ideas arise from social problems and attempt to confront those problems. Methods and approaches: how to read such texts; how to make arguments about them; how such texts shed light on contemporary situations.

2 units, not given this year

**PHIL 72. Contemporary Moral Problems**

(Same as ETHICSOC 185M) As individuals and as members of societies, we make choices that can be assessed from the moral point of view. What choices should we make, and how should we make them? Is it ok to buy iThings when others lack basic nutrition? Does a preference for the taste of meat justify killing animals? When is deceptive seduction seriously wrong and when is it just sketchy? Topics include exploitation, poverty, sexual and reproductive autonomy, commercialization, homelessness, citizenship, education, stereotypes, affirmative action, and social responsibility. GER:EC-EthicReas

4 units, Aut (Dougherty, T)

**PHIL 76. Introduction to Global Justice**

(Same as ETHICSOC 136R, INTNLREL 136R, POLISCI 136R, POLISCI 336) Recent work in political theory on global justice. Topics include global poverty, human rights, fair trade, immigration, climate change. Do developed countries have a duty to aid developing countries? Do rich countries have the right to close their borders to economic immigrants? When is humanitarian intervention justified? Readings include Charles Beitz, Thomas Pogge, John Rawls.

5 units, Spr (Satz, D)

**PHIL 77S. Philosophy of Religion**

Key philosophical questions concerning the nature of the divine and the religious through a close reading of some classic philosophical texts, while aiming to develop critical thinking about these issues. Topics include: the existence and nature of God, the problem of evil, the justification of religious belief, the nature of and relationship between faith and reason, and the function(s) of religion. Key texts will include Plato, St. Anselm, Hume, and Nietzsche.

3 units, Sum (Staff)

**PHIL 80. Mind, Matter, and Meaning**

Central topics in philosophy emphasizing development of analytical writing skills. What are human beings? Are human beings free? How do human minds and bodies interact? What does it all mean? Prerequisite: introductory philosophy course. GER:DB-Hum, WIM

5 units, Aut (Lawlor, K), Spr (Crimmins, M)

**PHIL 81. Philosophy and Literature**

(Same as CLASSGEN 81, COMPLIT 181, ENGLISH 81, FRENCH 181, ITALGEN 181, GERGEN 181) Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum  
4-5 units, Win (Staff)

**PHIL 90A. The Philosophy of John Perry**

John Perry is among the most influential philosophers of the last several decades, making important contributions to the philosophy of language, metaphysics, and the philosophy of mind. Focus on Perry's work on indexicality, belief reports, reference, pragmatics, identity, personal identity, modality, and consciousness. Perry's work in these areas will be studied in conjunction with that of some key figures in the surrounding literatures, including Kaplan, Lewis, Stalnaker, Kripke, and Chalmers.  
4 units, not given this year

**PHIL 90B. The Ethics of War**

(Same as ETHICSOC 175M) Issues both in contemporary just war theory and political philosophy. Relevant questions include: Can conscription ever be justified? If not, is there anything wrong with targeting poor people as part of efforts to recruit a 'volunteer' military? If, during war itself, combatants act in ways prohibited by the moral requirements governing war's conduct, then does it make any moral difference whether they were acting as ordered? And how do we identify these moral requirements in the first place? For example, what distinguishes a legitimate target from an illegitimate one? What determines whether military action is disproportionate? What, if anything, is morally distinctive about terrorism? Explores the complexities behind these questions and others, with a view to evaluating the potential answers to them.  
4 units, not given this year

**PHIL 90C. Predicting the Future: Puzzles of Induction**

Can we know that the future is likely to resemble the past? Do we have reason to believe that the Sun is even remotely likely to rise again tomorrow? Are we rationally justified in accepting the confident predictions of science and commonsense, based on well-observed regularities? Consider several paradoxes of induction (that is, extrapolation from observed to unobserved), including those raised by Hume, Hempel, and Goodman, the Doomsday and Sleeping Beauty paradoxes, as well as some attempts to solve or cope with them.  
4 units, not given this year

**PHIL 90D. What do Philosophers do?**

4 units, Win (Lewin, M)

**PHIL 90E. Introduction to Business Ethics**

Business strives to make a profit. Ethics counsels that people should avoid acting in ways that are greedy, deceptive, or unjust. But some greedy, deceptive, or unjust business practices are quite profitable. This dilemma is the foundation of the discipline known as business ethics. The course investigates four relationships relevant to concerns about greed, deception, injustice, and profit--between businesses and society, businesses and their shareholders, businesses and their employees, and businesses and their customers--with the aim of clarifying the foundational dilemma.  
4 units, Aut (Scharding, T)

**PHIL 90F. Consciousness and Reference**

Many philosophers see conscious experience as playing an important role in our thought and talk about things. But just what role does it play in reference and cognition? Does it provide us with a capacity to think and talk about things directly? Or does it simply provide us with descriptive conceptions through which we can think and talk about things in some less direct manner? And what about our thought and talk about conscious experience itself? Is it different in kind from our thought and talk about other sorts of

objects? Does consciousness actually play an important role in thought and talk? We will begin by reading seminal works by Frege and Russell on the role of conscious experience in reference and cognition. Then we will turn to contemporary work by Kaplan, Evans, Perry, Taylor, Campbell, Recanati, Jeshion, and Chalmers on the subject. Lastly, we will consider how these various views bear on recent debates about the so-called 'phenomenal concepts; we use to think and talk abo

4 units, Aut (Wishon, D)

**PHIL 90G. Native American Philosophy**

Examine traditional philosophical questions like How do we know? What exists? What is a person? and What is the good life? from the perspectives of classical and contemporary Native American thinkers. We will look at Native American beliefs about respect for persons and places; reactions to colonial doctrines of conversion, treaties, and removal; and the importance of the themes of circularity and performance in classical and contemporary Native philosophical thought. Also of importance will be to contrast some Native American approaches to philosophical questions against Western attempts to answer these same questions. How are the approaches the same? How are they different? What assumptions about the natures of reality or humanity account for the similarities or differences?  
4 units, Spr (Burns, S)

**PHIL 100. Greek Philosophy**

Greek philosophical thought, covering Socrates, Plato, Aristotle, and the Hellenistic schools (the Epicureans, the Stoics, and the Skeptics). Topics: the nature of the soul, virtue and happiness, knowledge, and reality. (Bobonich) GER:DB-Hum  
4 units, Win (Duarte, S)

**PHIL 101. Introduction to Medieval Philosophy**

(Same as PHIL 201) Classics of Western philosophy by Augustine, Boethius, Anselm, Abelard, Aquinas, and Ockham. Explore the puzzles facing someone seeking to lead a good life and to understand herself and her world. A theory of will and human motivation, a theory of ethics based on the agent's intention, and a theory of divine omniscience and omnipotence consistent with divine goodness and human freedom. Works include On Free Choice, The Consolation of Philosophy, Ethics, Summa theologiae, and the Connection of the Virtues. GER:DB-Hum, EC-EthicReas  
4 units, Spr (Duarte, S)

**PHIL 101A. Medieval Religious Philosophy**

(Same as RELIGST 167) (Same as PHIL 101A.) Survey of medieval philosophy, focusing on God, world and words. A pervasive assumption about the structure of the world, that it reflected the categories of God's mind and emerged from an act of divine speech, gave impetus to the interest in the nature of language and its relation to the world. Scripture served as one kind of divine communication to human beings, and The Book of the World as another. The problem of universals, the question of how words relate to God, epistemology, theories of reference, semiotics, are some of the topics discussed. Readings from Augustine, Anselm, Aquinas, Scotus, and Ockham, etc. GER:DB-Hum  
4 units, not given this year

**PHIL 102. Modern Philosophy, Descartes to Kant**

Major figures in early modern philosophy in epistemology, metaphysics, and philosophy of mind. Writings by Descartes, Locke, Leibniz, Berkeley, Hume, and Kant. GER:DB-Hum  
4 units, Aut (Duarte, S)

**PHIL 103. 19th-Century Philosophy**

Focus is on ethics and the philosophy of history. Works include Mill's Utilitarianism, Hegel's The Philosophy of World History, Marx's Economic and Philosophic Manuscripts, Kierkegaard's The Sickness Unto Death, and Nietzsche's On the Genealogy of Morals. GER:DB-Hum  
4 units, not given this year

**PHIL 104. Philosophy of Religion**

Key issues in the philosophy of religion. Topics include the relationship between faith and reason, the concept of God, proofs of God's existence, the meaning of religious language, arguments for and against divine command theory in ethics and the role of religious belief in a liberal society. GER:DB-Hum

4 units, Win (Staff)

**PHIL 106. Ancient Skepticism**

(Same as PHIL 206) The ancient Pyrrhonian skeptics who think that for any claim there is no more reason to assert it than deny it and that a life without any beliefs is the best route to happiness. Some ancient opponents of the Pyrrhonian skeptics and some relations between ancient and modern skepticism. GER:DB-Hum

4 units, not given this year

**PHIL 107. Plato's Metaphysics and Epistemology**

(Same as PHIL 207) Examine Plato's views on the nature of reality and knowledge by reading the relevant parts of dialogues such as the Parmenides, the Phaedo, the Philebus, and the Republic. GER:DB-Hum

4 units, not given this year

**PHIL 108. Topics in Aristotle: Aristotle's Ethics and Contemporary Moral Theory**

(Same as PHIL 208) Examine the fundamentals of Aristotle's psychological views and read the De Anima (On the Soul) and some of his other psychological works. GER:DB-Hum

4 units, Win (Bobonich, C)

**PHIL 109. Topics in Ancient Philosophy: Plato and Aristotle on Art and Rhetoric**

(Same as PHIL 209) Plato's and Aristotle's views on the nature of art and rhetoric and their connections with the emotions, reason and the good life. Readings include Plato's Gorgias, Ion and parts of the Republic and the Laws and Aristotle's Poetics and Rhetoric. GER:DB-Hum

4 units, Aut (Bobonich, C)

**PHIL 110. Plato**

(Same as PHIL 210) Plato's Republic. GER:DB-Hum

4 units, not given this year

**PHIL 111. Aristotle and Contemporary Ethics**

(Same as PHIL 211) Aristotle's Nicomachean Ethics, focusing on virtue, happiness, pleasure, practical reasoning, and particularism. Sources include the Eudemian Ethics, contemporary philosophers who have taken many of these topics up again, and contemporary material such as that by Anscombe, Foot, Hursthouse, Korsgaard, and McDowell. GER:DB-Hum

4 units, not given this year

**PHIL 113. Hellenistic Philosophy**

(Same as PHIL 213) Epicureans, skeptics, and stoics on epistemology, ethics, metaphysics, and psychology. GER:DB-Hum

4 units, not given this year

**PHIL 115. Problems in Medieval Philosophy: Islamic Aristotelianism and Western Scholasticism**

(Same as PHIL 215) The western world adopted Aristotle's metaphysics and natural philosophy as the foundation of its educational system and scholarly life between 1210 and 1255. Christian Europe was thereby following the example set by Islam in Spain and the Near East. Today some people believe that this development was independent, and others think that the scholastics copied even their methods from Arabic philosophers. Historical evaluation of those claims. GER:DB-Hum

3-5 units, not given this year

**PHIL 117. Descartes**

(Same as PHIL 217) (Formerly 121/221.) Descartes's philosophical writings on rules for the direction of the mind, method, innate ideas and ideas of the senses, mind, God, eternal truths, and the material world. GER:DB-Hum

4 units, not given this year

**PHIL 118. British Empiricism, 1660s-1730s**

(Same as PHIL 218) GER:DB-Hum

4 units, not given this year

**PHIL 118A. Origins of Empiricism: Gassendi, Locke, and Berkeley**

(Same as PHIL 218A) Particular light is shed on both the strengths and weaknesses of empiricism by studying it as it first arose during the 17th century revolution in philosophy and the sciences initiated by Descartes. Three philosophers of that period helped to advance empiricism: Pierre Gassendi (1592-1655), John Locke (1632-1704), and George Berkeley (1685-1753). Focus on Locke's theory of ideas, mind, language, reality, and natural philosophy

expounded in his An Essay concerning Human Understanding (Fourth Edition, 1689). Study Gassendi's early influence on, and Berkeley's later reaction to Locke.

4 units, not given this year

**PHIL 119. Rationalists**

(Same as PHIL 219) (Formerly 143/243.) Developments in 17th-century continental philosophy. Descartes's views on mind, necessity, and knowledge. Spinoza and Leibniz emphasizing their own doctrines and their criticism of their predecessors. Prerequisite: 102. GER:DB-Hum

4 units, not given this year

**PHIL 120A. The Leibniz-Clarke Correspondence**

(Same as PHIL 220A) Correspondence on metaphysics, theology, and science. GER:DB-Hum

4 units, not given this year

**PHIL 122. Hume**

(Same as PHIL 222) (Formerly 120/220; graduate students enroll in 222.) Hume's theoretical philosophy, in particular, skepticism and naturalism, the theory of ideas and belief, space and time, causation and necessity, induction and laws of nature, miracles, a priori reasoning, the external world, and the identity of the self. GER:DB-Hum

4 units, not given this year

**PHIL 124. Topics in Early Modern Philosophy**

Philosophical views of the highly influential rationalist philosophers Benedict (or Baruch) Spinoza (1632-1677) and G. W. Leibniz (1646-1716). Topics to be treated include: the nature of God and the question of his providential care for human beings, the concept of substance and its extension, the ontological relation of finite beings to God, the mental and its relation to the corporeal, and the nature of human freedom. GER:DB-Hum

4 units, not given this year

**PHIL 125. Kant's First Critique**

(Same as PHIL 225) (Graduate students register for 225.) The founding work of Kant's critical philosophy emphasizing his contributions to metaphysics and epistemology. His attempts to limit metaphysics to the objects of experience. Prerequisite: course dealing with systematic issues in metaphysics or epistemology, or with the history of modern philosophy. GER:DB-Hum

4 units, Aut (De Pierris, G)

**PHIL 126B. Kant's Ethical Theory**

(Same as PHIL 226B) (Graduate students register for 226B.) Kant's moral philosophy based primarily on the Groundwork of Metaphysics of Morals, Critique of Practical Reason, and The Metaphysics of Morals. GER:DB-Hum

2-4 units, not given this year

**PHIL 127A. Kant's Value Theory**

(Same as PHIL 227A) (Graduate students register for 227A.) The role of autonomy, principled rational self-governance, in Kant's account of the norms to which human beings are answerable as moral agents, citizens, empirical inquirers, and religious believers. Relations between moral values (goodness, rightness) and aesthetic values (beauty, sublimity). GER:DB-Hum

4 units, Spr (Hills, D)

**PHIL 127B. Kant's Anthropology and Philosophy of History**

(Same as PHIL 227B) Kant's conception of anthropology or human nature, based on his philosophy of history, which influenced and anticipated 18th- and 19th-century philosophers of history such as Herder, Fichte, Hegel, and Marx. Texts include Idea for a Universal History, Conjectural Beginning of Human History, and Anthropology from a Pragmatic Point of View. Topics include: Kant's pragmatic approach to the study of human nature; the difficulty of human self knowledge; the role of regulative and teleological principles in studying human history; and Kant's theory of race.

4 units, not given this year

**PHIL 128. Fichte's Ethics**

(Same as PHIL 228) (Graduate students register for 228.) The founder of the German Idealist movement who adopted but revised Kant's project of transcendental philosophy basing it on the principle of awareness of free self-activity. The awareness of other selves and of ethical relations to them as a necessary condition for self-awareness. His writings from 1793-98 emphasizing the place

of intersubjectivity in his theory of experience. GER:DB-Hum  
4 units, not given this year

**PHIL 130. Hegel**

(Same as PHIL 230) (Formerly 122/222; graduate students register for 230.) Introduction to Hegel's philosophy, emphasizing his moral and political philosophy, through study of his last major work (1821). May be repeated for credit. Prerequisite: course in the history of modern philosophy. GER:DB-Hum  
4 units, not given this year

**PHIL 134. Phenomenology and Intersubjectivity**

(Same as PHIL 234) (Graduate students register for 234.) Readings from Husserl, Stein, Heidegger, Sartre, and Merleau-Ponty on subjects related to awareness of others. Topics include solipsism, collective experience, empathy, and objectification of the other. GER:DB-Hum

4 units, not given this year

**PHIL 135. Existentialism**

(Same as PHIL 235) (Formerly 132/232.) Focus is on the existentialist preoccupation with human freedom. What constitutes authentic individuality? What is one's relation to the divine? How can one live a meaningful life? What is the significance of death? A rethinking of the traditional problem of freedom and determinism in readings from Rousseau, Kierkegaard, and Nietzsche, and the extension of these ideas by Sartre, Beauvoir, and Camus, including their social and political consequences in light of 20th-century fascism and feminism. GER:DB-Hum

4 units, Aut (Anderson, L)

**PHIL 136. History of Analytic Philosophy**

(Same as PHIL 236) (Formerly 147/247; graduate students register for 236.) Theories of knowledge in Frege, Carnap, and Quine. Emphasis is on conceptions of analyticity and treatment of logic and mathematics. Prerequisite: 50 and one course numbered 150-165 or 181-90. GER:DB-Hum

4 units, not given this year

**PHIL 137. Wittgenstein**

(Same as PHIL 237) (Graduate students register for 237.) The main themes and claims in Wittgenstein's later work concentrating on his views about meaning, mind, knowledge, the nature of philosophical perplexity, and the nature of philosophical progress in his Philosophical Investigations. Emphasis is on the relationship between the novel arguments of the Investigations and its ways of writing up the results of philosophical questioning. GER:DB-Hum

4 units, not given this year

**PHIL 138. Recent European Philosophy: Between Nature and History**

(Same as PHIL 238) A critical introduction to the novel understandings of time, language, and cultural power developed by 20th-century continental thinkers, with close attention to work by Heidegger, Saussure, Benjamin, and Foucault. GER:DB-Hum

4 units, not given this year

**PHIL 143. Quine**

(Same as PHIL 243) (Formerly 183/283; graduate students register for 243.) The philosophy of Quine: meaning and communication; analyticity, modality, reference, and ontology; theory and evidence; naturalism; mind and the mental. GER:DB-Hum

4 units, not given this year

**PHIL 150. Basic Concepts in Mathematical Logic**

(Same as PHIL 250) (Formerly 159.) The concepts and techniques used in mathematical logic, primarily through the study of the language of first order logic. Topics: formalization, proof, propositional logic, quantifiers, sets, mathematical induction, and enumerability. GER:DB-Math

4 units, Aut (Wasow, T)

**PHIL 150X. Basic Concepts in Mathematical Logic**

Equivalent to the second half of 150. Students attend the first meeting of 150 and rejoin the class on October 30. Prerequisite: CS 103A or X, or PHIL 50.

2 units, Aut (Wasow, T)

**PHIL 151. First-Order Logic**

(Same as PHIL 251) (Formerly 160A.) The syntax and semantics of sentential and first-order logic. Concepts of model theory. Gödel's completeness theorem and its consequences: the Löwenheim-Skolem theorem and the compactness theorem.

Prerequisite: 150 or consent of instructor. GER:DB-Math  
4 units, Win (Sommer, R)

**PHIL 152. Computability and Logic**

(Same as PHIL 252) Approaches to effective computation: recursive functions, register machines, and programming styles. Proof of their equivalence, discussion of Church's thesis. Elementary recursion theory. These techniques used to prove Gödel's incompleteness theorem for arithmetic, whose technical and philosophical repercussions are surveyed. Prerequisite: 151. GER:DB-Math

4 units, Spr (Casanovas, E)

**PHIL 153. Feminist Theories and Methods Across the Disciplines**

(Same as FEMST 103, FEMST 203, PHIL 253) The interdisciplinary foundations of feminist thought. The nature of disciplines and of interdisciplinary work. Challenges of feminism for scholarship and research. GER:EC-Gender

4-5 units, Win (Longino, H)

**PHIL 154. Modal Logic**

(Same as PHIL 254) (Graduate students register for 254.) Syntax and semantics of modal logic, and technical results like completeness and correspondence theory. Applications to philosophy and computer science. Prerequisite: 150 or preferably 151. GER:DB-Math

4 units, Spr (van Benthem, J)

**PHIL 155. General Interest Topics in Mathematical Logic**

Introduction to formalization using language of logic and to problems of philosophical logic and computer science that can be handled this way. Propositional calculus, Sudoku puzzles, resolution rule, problem  $P=NP$ . Possible worlds, modal logic with emphasis on individuation problems. May be repeated for credit.

4 units, not given this year

**PHIL 157. Topics in Philosophy of Logic**

(Same as PHIL 257) (Graduate students register for 257.) Disputed foundational issues in logic; the question of what the subject matter and boundaries of logic are, such as whether what is called second-order logic should be counted as logic. What is the proper notion of logical consequence? May be repeated for credit. Pre- or corequisite: 151, or consent of instructor.

3 units, not given this year

**PHIL 160A. Newtonian Revolution**

(Same as PHIL 260A) (Graduate students register for 260A.) 17th-century efforts in science including by Kepler, Galileo, Descartes, and Huygens, that formed the background for and posed the problems addressed in Newton's Principia. GER:DB-Hum

4 units, not given this year

**PHIL 160B. Newtonian Revolution**

(Same as PHIL 260B) (Graduate students register for 260B.) Newton's Principia in its historical context, emphasizing how it produced a revolution in the conduct of empirical research and in standards of evidence in science. GER:DB-Hum

4 units, not given this year

**PHIL 162. Philosophy of Mathematics**

(Same as MATH 162, PHIL 262) (Graduate students register for PHIL 262.) 20th-century approaches to the foundations and philosophy of mathematics. The background in mathematics, set theory, and logic. Schools and programs of logicism, predicativism, platonism, formalism, and constructivism. Readings from leading thinkers. Prerequisite: PHIL151 or consent of instructor. GER:DB-Math

4 units, Spr (Mumma, J)

**PHIL 163. Significant Figures in Philosophy of Science**

(Same as PHIL 263) (Graduate students register for 263.) Directed study of two or more thinkers, past or present, who have made a lasting impact on contemporary philosophy of science. Subjects last year were Henri Poincaré, Pierre Duhem, and Gaston Bachelard. GER:DB-Hum

4 units, not given this year

**PHIL 163H. The History of Scientific Methods, Pythagoras to Popper**

(Same as HPS 154) History of scientific methods and associated science from ancient Greece to the 20th century. Case studies include Pythagoras, Plato, and Euclid; Aristotle; medieval science;

scientific Renaissance of the 1540s; methodological clashes involving the Church, Galileo, Bacon, and Descartes; Newton; Faraday; Darwin; rise of statistical methods; beginnings of modern physics; Popper. The mutual influences of method and practice. What does and does not qualify as science. Recommended: background in history, philosophy, or a technical field such as mathematics, science, or engineering. GER:DB-Hum

*4 units, Spr (McCaskey, J)*

**PHIL 164. Central Topics in the Philosophy of Science: Theory and Evidence**

(Same as PHIL 264) (Graduate students register for 264.) The relation of theory to evidence and prediction, problems of induction, empirical under-determination of theory by evidence, and theory choice. Hypothetico-deductive, Bayesian, pragmatic, and inference to the best explanation models of explanation. The semantic approach to theories. GER:DB-Hum

*4 units, not given this year*

**PHIL 164A. Central Topics in Philosophy of Science: Causation**

(Same as PHIL 264A) (Graduate Students register for 264A.) Establishing causes in science, engineering, and medicine versus establishing them in Anglo-American law, considered in the context of Hume and Mill on causation. May be repeated for credit.

*4 units, not given this year*

**PHIL 165. Philosophy of Physics**

(Same as PHIL 265) (Graduate students register for 265.) Central topic alternates annually between space-time theories and philosophical issues in quantum mechanics. Topics last year: absolute and relational theories of space, time, and motion. Newton's critique of Descartes and debate with Leibniz. The principle of relativity and space-time formulations of Aristotelian, Galilean, and relativity physics. Mach's principle and the theory of general relativity. Einstein's struggles with the principle of general covariance. Space-time substantivalism, and the meaning of background independence. May be repeated for credit if content is different. GER:DB-Hum

*4 units, Spr (Ryckman, T)*

**PHIL 166. Probability: Ten Great Ideas About Chance**

(Same as PHIL 266, STATS 167, STATS 267) Foundational approaches to thinking about chance in matters such as gambling, the law, and everyday affairs. Topics include: chance and decisions; the mathematics of chance; frequencies, symmetry, and chance; Bayes great idea; chance and psychology; misuses of chance; and harnessing chance. Emphasis is on the philosophical underpinnings and problems. Prerequisite: exposure to probability or a first course in statistics at the level of STATS 60 or 116. GER:DB-Math

*4 units, Spr (Diaconis, P; Skyrms, B)*

**PHIL 167A. Philosophy of Biology**

(Same as PHIL 267A) (Graduate students register for 267A.) Evolutionary theory and in particular, on characterizing natural selection and how it operates. We examine debates about fitness, whether selection is a cause or force, the levels at which selection operates, and whether cultural evolution is a Darwinian process. GER:DB-Hum

*2-4 units, not given this year*

**PHIL 167B. Philosophy, Biology, and Behavior**

(Same as PHIL 267B) (Graduate students register for 267B.) Continuation of 167A/267A. Further philosophical study of key theoretical ideas in biology, focusing on problems involving explanation of behavior. Topics: evolutionary versus proximate causal explanations of behavior; genetic and other determinisms; and classification and measurement of behavior. Prerequisites: 167A; or one PHIL course and either one BIO course or Human Biology core; or equivalent with consent of instructor. GER:DB-Hum

*4 units, Aut (Longino, H)*

**PHIL 167C. Associative Theories of Mind and Brain**

(Same as PHIL 267C) After a historical survey of associative theories from Hume to William James, current versions will be analyzed including the important early ideas of Karl Lashley. Emphasis will be on the computational power of associative networks and their realization in the brain. GER:DB-Hum

*4 units, not given this year*

**PHIL 168. Theories of Truth**

(Same as PHIL 268) (Graduate students register for 268.) The correspondence, coherence, pragmatist and deflationary theories of truth. Tarski's semantic conception of truth and hierarchical truth definitions. The problems posed by the liar paradox for non-hierarchical theories. Formal theories of truth proposed since the 70s to deal with these problems.

*4 units, not given this year*

**PHIL 169. Evolution of the Social Contract**

(Same as PHIL 269) Explore naturalizing the social contract. Classroom presentations and term papers. Texts: Binmore - Natural Justice Skyrms - Evolution of the Social Contract. GER:DB-Hum

*4 units, not given this year*

**PHIL 170. Ethical Theory**

(Same as ETHICSOC 170, PHIL 270) Major strands in contemporary ethical theory. Readings include Bentham, Mill, Kant, and contemporary authors. GER:DB-Hum, EC-EthicReas

*4 units, Spr (Dannenberg, J)*

**PHIL 170B. Metaphor**

(Same as PHIL 270B) Think and talk about two things at once: two different subject matters are mingled to rich and unpredictable effect. Close critical study of the main modern accounts of metaphors nature and interest, drawing on the work of writers, linguists, philosophers, and literary critics. Attention to how understanding, appreciation, and pleasure connect with one another in the experience of metaphor. Consideration of the possibility that metaphor or something very like it can occur in nonverbal media: gesture, dance, painting, music. GER:DB-Hum

*4 units, not given this year*

**PHIL 170E. Sexual Ethics**

(Same as PHIL 270E) What is sex? What are the implications of different conceptions of sex for sexual ethics? Are there any distinctively sexual ethical principles or virtues or are principles and virtues that govern the sexual domain specific instances of principles and virtues that govern human activity more generally? Readings will range from historical to contemporary sources. GER:DB-Hum

*4 units, Spr (Staff)*

**PHIL 171. Justice**

(Same as ETHICSOC 171, IPS 208, PHIL 271, POLISCI 3P, POLISCI 136S) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas

*4-5 units, Aut (Dougherty, T)*

**PHIL 172. History of Modern Ethics**

(Same as PHIL 272) Major strands in the history of modern, pre-Kantian moral philosophy. Emphasis is on the dialogue between empiricists and rationalists on the subject of the relationship between the natural and the normative. Authors include Frances Hutcheson, David Hume, Adam Smith, Samuel Clarke, and Richard Price. GER:DB-Hum

*4 units, not given this year*

**PHIL 172B. Recent Ethical Theory**

(Same as PHIL 272B) Study the works of several prominent contemporary moral philosophers. Possible authors include: Scanlon, Darwall, Nagel, Williams, Blackburn, Gibbard, Korsgaard. Prerequisite: students should have taken an introduction to moral philosophy (Phil. 20, Phil. 170 or equivalent). GER:DB-Hum

*4 units, not given this year*

**PHIL 173A. Aesthetics: Metaphor across the Arts**

What if a metaphor is an instructively compact work of art, or if finding a metaphor apt is an instructively simple case of finding something aesthetically valuable? What does this reveal about the nature of art and language? Introduction to the philosophical study of art and aesthetic value, organized around metaphor. Contemporary accounts of metaphor as a verbal device. Arguments

for the existence of nonverbal metaphor in nonliterary arts. The power and appeal of metaphors drawn from art, art criticism, theoretical inquiry, and everyday life. GER:DB-Hum

*4 units, not given this year*

**PHIL 173B. Metaethics**

(Same as PHIL 273B) (Graduate students register for 273B.) Can moral and ethical values be justified or is it just a matter of opinion? Is there a difference between facts and values? Are there any moral truths? Does it matter if there are not? Focus is not on which things or actions are valuable or morally right, but what is value or rightness itself. Contemporary metaethics. Prerequisites: 80, 181, and an ethics course. GER:DB-Hum

*4 units, Aut (Hussain, N)*

**PHIL 174. Freedom and the Practical Standpoint**

(Same as PHIL 274) (Graduate students register for 274.) Confronted with the question of how to act, people think of themselves as freely determining their own conduct. Natural science poses a challenge to this by explaining all events, including human actions, in terms of causal processes. Are people justified in thinking of themselves as free? Major philosophical approaches to this question: incompatibilism, compatibilism, and the two-standpoint view. GER:DB-Hum

*4 units, not given this year*

**PHIL 174A. Moral Limits of the Market**

(Same as ETHICSOC 174A, PHIL 274A) Morally controversial uses of markets and market reasoning in areas such as organ sales, procreation, education, and child labor. Would a market for organ donation make saving lives more efficient; if it did, would it thereby be justified? Should a nation be permitted to buy the right to pollute? Readings include Walzer, Arrow, Rawls, Sen, Frey, Titmuss, and empirical cases. GER:DB-Hum

*4 units, not given this year*

**PHIL 174L. Betrayal and Loyalty, Treason and Trust**

(Same as ETHICSOC 174L, ETHICSOC 274L, PHIL 274L) The main topic of the seminar is Betrayal: its meaning as well as its moral, legal and political implications. We shall discuss various notions of betrayal: Political (military) betrayal such as treason, Religious betrayal with Judas as its emblem, but also apostasy (converting one's religion) which is regarded both as a basic human right and also as an act of betrayal, social betrayal - betraying class solidarity as well as Ideological betrayal - betraying a cause. On top of political betrayal we shall deal with personal betrayal, especially in the form of infidelity and in the form of financial betrayal of the kind performed by Madoff. The contrasting notions to betrayal, especially loyalty and trust, will get special consideration so as to shed light or cast shadow, as the case may be, on the idea of betrayal. The seminar will focus not only on the normative aspect of betrayal - moral or legal, but also on the psychological motivations for betraying others. The seminar will revolve

*2 units, Win (Staff)*

**PHIL 175. Philosophy of Law**

(Same as PHIL 275) Philosophical foundations of law and the legal system. The justifiability of patterns of assigning legal responsibility within criminal law. Prerequisite: PHIL 80 and one additional PHIL course. GER:DB-Hum

*4 units, not given this year*

**PHIL 175A. Ethics and Politics of Public Service**

(Same as CSRE 178, ETHICSOC 133, HUMBIO 178, PHIL 275A, POLISCI 133) Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford. GER:DB-SocSci

*5 units, Win (Mitchell, T)*

**PHIL 175M. Two Ethical Theories and Being a Person**

(Same as PHIL 275M) The distinction between the ethics of being a person and the ethics of rules as opposed to the distinction between Kantian ethics and utilitarianism or consequentialism

consequentialism. Comparison of these two types of ethics with respect to their relationship to agency and being a good person. Relations between Western ethics and those of other continents. GER:DB-Hum

*4 units, not given this year*

**PHIL 176. Political Philosophy: The Social Contract Tradition**

(Same as PHIL 276) (Graduate students register for 276.) Why and under what conditions do human beings need political institutions? What makes them legitimate or illegitimate? What is the nature, source, and extent of the obligation to obey the legitimate ones, and how should people alter or overthrow the others? Answers by political theorists of the early modern period: Hobbes, Locke, Rousseau, and Kant. GER:DB-Hum

*4 units, Win (Hills, D)*

**PHIL 176A. Classical Seminar: Origins of Political Thought**

(Same as CLASSHIS 133, CLASSHIS 333, PHIL 276A, POLISCI 230A, POLISCI 330A) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change. GER:DB-Hum

*4-5 units, Win (Ober, J)*

**PHIL 176B. The Economic Individual in the Behavioral Sciences**

(Same as PHIL 276B) (Graduate students register for 276B.)

*4 units, not given this year*

**PHIL 177M. Human Rights and Moral Question**

(Same as ETHICSOC 177M, ETHICSOC 277M, PHIL 277M) The proliferation of human rights in the discourse of international justice has raised a number of important questions in both moral and legal theory. What are human rights? How should they be conceptualized? Who ought to bear the duties associated with them? Can their protection justify military interventions into sovereign states? This course will cover topics in moral and legal theory surrounding human rights. The course has three main focuses. The first concerns the question of what these rights are. The second focus is on the various substantive moral justifications for the protection of human rights. The third is on the moral issues raised by the dominance of human rights in international law and relations: can any rights be universal? How are these rights to be framed in the light of cross-cultural values and claims about cultural dominance? A theme throughout will be the connections between these questions. The way we answer the question of what human rights are, and how they c GER:EC-EthicReas

*4-5 units, Spr (Thomas, J)*

**PHIL 178. Ethics in Society Honors Seminar**

(Same as ETHICSOC 190) For students planning honors in Ethics in Society. Methods of research. Students present issues of public and personal morality; topics chosen with advice of instructor.

*3 units, Win (Sockness, B)*

**PHIL 178A. The Ethics of Environmental Choices**

(Same as EARTHSYS 178, EARTHSYS 278, PHIL 278A) (Formerly PHIL 278/378.) The institutional and individual dimensions of environmental choices. On the institutional side, examine externalities, the tragedy of the commons, sustainable development and environmental policy. On the individual side, discuss individual responsibility, intrinsic value, and moral pluralism. Focus is on decision making including the role of risk analysis, the rate of discount for effects on future generations, cost-benefit analysis, and scientific epistemology. GER:DB-Hum

*4 units, not given this year*

**PHIL 178M. Justice and the Environment**

(Same as ETHICSOC 178M, ETHICSOC 278M, PHIL 278M, POLISCI 134L) Explores the normative questions that arise in environmental policy debates, including arguments over pollution permit markets, conservation regulations, and global warming mitigation efforts. What are the morally relevant ways in which the environment is different from other economic resources? How should the environment be valued? What are our obligations to conserve for future generations? How should the burdens of conservation be distributed? Engages with a variety of philosophical traditions including utilitarianism, deep ecology, liberalism, and communitarianism. GER:EC-EthicReas

5 units, Win (Mazor, J)

**PHIL 179S. Moral Psychology, Reasons for Action, and Moral Theory**

(Same as PHIL 279S) What sorts of considerations does an ethical agent take to be good reasons for action? Work in moral psychology to illuminate the theory of practical reasons, and the theory of practical reasons to test the prospects for systematic moral theory. Can any systematic moral theory be reconciled with the moral psychology of ordinary, morally respectable agents? Reading include Bernard Williams, Rosalind Hursthouse, Peter Railton, T.M. Scanlon, and Barbara Herman.

4 units, not given this year

**PHIL 180. Metaphysics**

(Same as PHIL 280) Does God exist? If not, then what are we even talking about when we debate his/her/its existence? What does it take for a thought, existential or otherwise, to be true? It's true that this sentence is too long, but does that entail that there's a property (or feature or attribute) that this sentence has, namely: being too long? If so, what are such properties like? Are they located where and when the objects that have them are located? Are objects just bundles of properties? How exactly are they related to the molecules that make them up? How can objects persist through time, if they're constantly changing their parts and properties? Do human beings persist in the same way? Does time really flow, or is it just another "static" dimension alongside the spatial ones? If it's the latter, does that mean everything that will ever happen is already determined now? Is determinism compatible with free will? What does it even mean to say that something could have happened differently? GER:DB-Hum

4 units, Spr (Malmgren, A)

**PHIL 180A. Realism, Anti-Realism, Irrealism, Quasi-Realism**

(Same as PHIL 280A) Realism and its opponents as options across a variety of different domains: natural science, mathematics, ethics, and aesthetics. Clarify the various conceptions that fall under these terms and outline the reasons for and against adopting realism for the various domains. Highlight the general issues involved. Prerequisites: 80, 181 GER:DB-Hum

4 units, Win (Hussain, N)

**PHIL 181. Philosophy of Language**

(Same as PHIL 281) The study of conceptual questions about language as a focus of contemporary philosophy for its inherent interest and because philosophers see questions about language as behind perennial questions in other areas of philosophy including epistemology, philosophy of science, metaphysics, and ethics. Key concepts and debates about the notions of meaning, truth, reference, and language use, with relations to psycholinguistics and formal semantics. Readings from philosophers such as Frege, Russell, Wittgenstein, Grice, and Kripke. Prerequisites: 80 and background in logic. GER:DB-Hum

4 units, Aut (Crimmins, M)

**PHIL 181B. Philosophy of Language: Contemporary Debates**

(Same as PHIL 281B) This course builds on the material of 181/281, focusing on debates and developments in the pragmatics of conversation, the semantics/pragmatics distinction, the contextuality of meaning, the nature of truth and its connection to meaning, and the workings of particular linguistic constructions of special philosophical relevance. Students who have not taken 181/281 should seek the instructor's advice as to whether they have sufficient background.

4 units, Win (Crimmins, M)

**PHIL 182. Truth**

(Same as PHIL 282) Philosophical debates about the place in human lives and the value to human beings of truth and its pursuit. The nature and significance of truth-involving virtues such as accuracy, sincerity, and candor. GER:DB-Hum

4 units, Aut (Hills, D)

**PHIL 184. Theory of Knowledge**

(Same as PHIL 284) Competing theories of epistemic justification (foundationalism, coherentism, and externalism) against the background of radical scepticism. Readings from contemporary sources. Prerequisite: 80 or consent of instructor. GER:DB-Hum

4 units, Spr (Malmgren, A)

**PHIL 184B. Philosophy of the Body**

How essential is the body to people's conception of themselves as

individuals and as human beings? What role does embodiment play in shaping cognitive capacities? How much or what kind of somatic awareness is required for agency? Embodiment theories of cognition. Readings from Plato, Descartes, Nietzsche, Merleau-Ponty, Parfit, novelist Michel Houellebecq, and contemporary philosophy of mind and cognitive science. GER:DB-Hum

4 units, not given this year

**PHIL 184C. Epistemology of Testimony**

(Same as PHIL 284C) Many of our beliefs come from others, and not from direct experience. Is testimony a source of fundamental reasons? reasons that do not have to be supported or validated by other sources like perception or inference? What sort of responsibility does one have to one's hearers, when one gives testimony?

4 units, Win (Lawlor, K)

**PHIL 184F. Feminist Theories of Knowledge**

(Same as FEMST 166, PHIL 284F) Feminist critique of traditional approaches in epistemology and alternative feminist approaches to such topics as reason and rationality, objectivity, experience, truth, the knowing subject, knowledge and values, knowledge and power. GER:DB-Hum, EC-Gender

4 units, not given this year

**PHIL 184P. Probability and Epistemology**

Confirmation theory and various ways of trying to understand the concept of evidence. Discuss a series of issues in epistemology including probabilism (the view that you should assign degrees of belief to various propositions), conditionalization, confirmational holism, reliabilism and justification, and disagreement. GER:DB-Hum

4 units, not given this year

**PHIL 185. Memory**

Structure, content, functional role, and epistemic authority of human memories. Sources include philosophical and psychological literature from different schools and historical periods. GER:DB-Hum

4 units, not given this year

**PHIL 185B. Philosophy of Perception**

(Same as PHIL 285B) The nature of perceptual experience and the role it plays in securing empirical knowledge. Focus will be on what is sometimes called the problem of perception: the question of how perception could provide us with direct awareness of the surrounding environment given the possibility of illusions or hallucinations. Topics, include the relationship between perception and belief, the nature of perceptual phenomenology, whether or not perceptual experiences are representational states, and the philosophical relevance of empirical research on perception. GER:DB-Hum

4 units, Win (Genone, J)

**PHIL 186. Philosophy of Mind**

(Same as PHIL 286) (Graduate students register for 286.) Debates concerning the nature of mental states, their relation to physical states of the human body, how they acquire their content, how people come to know about them in themselves and others, and the roles they play in the explanation of human conduct. GER:DB-Hum

4 units, Spr (Taylor, K)

**PHIL 187. Philosophy of Action**

(Same as PHIL 287) (Graduate students register for 287.) Contemporary research in the philosophy of action. Topics include: What is it to be an agent? Is there a philosophically defensible contrast between being an agent and being a locus of causal forces to which one is subject? What is it to act purposively? What is intention? What is the relation between intention and belief? What is it to act intentionally? What is it to act for a reason? What is the relation between explaining why someone acted by citing the reasons for which she acted and causal explanation of her action? What is the relation between theoretical and practical rationality? What is the nature of our knowledge of our own intentional activity? What is it to act autonomously? What is shared cooperative activity? Prerequisite: 80.. GER:DB-Hum

4 units, Spr (Bratman, M)

**PHIL 188. Personal Identity**

(Same as PHIL 288) Do you persist through time the way that a skyscraper persists through space, by having different parts at

different locations? Or are you wholly present at every moment of your life, in something more like the way that an elevator is present in each place as it travels up to the top floor? What criteria determine whether you now are the very same person as some unique person located at some time in the past? Is the continuity of your memories or other mental states sufficient for your survival? Can you survive the loss or destruction of your body? Do you really exist for more than just the present moment? How do different answers to these questions bear on your moral, personal, and professional obligations? What kinds of considerations could possibly help us to answer these questions? This course explores these and related issues. Readings include a mix of introductory survey, historical, and contemporary material. GER:DB-Hum  
4 units, not given this year

**PHIL 189. Examples of Free Will**

(Same as PHIL 289) Examples drawn from three domains: choice, computation, and conflict of norms. Conceptually, a distinction is made between examples that are predictable and those that are not, but skepticism about making a sharp distinction between determinism and indeterminism is defended. GER:DB-Hum  
4 units, not given this year

**PHIL 190. Introduction to Cognitive and Information Sciences**

(Same as LINGUIST 144, PSYCH 132, SYMSYS 100) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci  
4 units, Spr (Goodman, N)

**PHIL 193H. The Art of the Movies: Story, Drama, and Image**

A philosophical study of how movies coordinate and transform elements they borrow from older arts of literary narrative, live theater, and graphic illustration. Examples from the career of Alfred Hitchcock. GER:DB-Hum  
4 units, not given this year

**PHIL 193W. Nietzsche, Dostoevsky, and Sartre**

Literary works in which philosophical ideas and issues are put forward, such as prose poems, novels, and plays. Ideas and issues and the dramatic or narrative structures through which they are presented. Texts include: Nietzsche, Thus Spoke Zarathustra; Dostoevsky, The Brothers Karamazov; and Sartre, Nausea and No Exit. GER:DB-Hum  
4 units, not given this year

**PHIL 194A. Empiricism and the Philosophy of Mind**

Priority to majors. 20th-century analytic and early modern philosophy of mind and epistemology. Main text is Wilfrid Sellars's Empiricism and the Philosophy of Mind; source materials and commentary. Enrollment limited to 12.  
4 units, not given this year

**PHIL 194B. The Ethics of Belief**

Priority to majors. Are beliefs subject to moral evaluation? Can it be right or wrong to believe or disbelieve something? Are people morally required to believe only that for which there is sufficient evidence; or can the good consequences of believing something justify the belief, irrespective of the evidence? Contemporary and historical sources. Enrollment limited to 12.  
4 units, not given this year

**PHIL 194C. Time and Free Will**

Classic and contemporary reading on free will, with special attention to the consequence argument for incompatibilism, and issues involving causation and time. GER:DB-Hum  
4 units, not given this year

**PHIL 194E. Beauty and Other Forms of Value**

The nature and importance of beauty and of our capacity to discern it and respond to it, as discussed by philosophers and artists from various traditions and historical periods. Attempts to think out the relations between beauty and ethical values (such as goodness) on the one hand and cognitive values (such as truth) on the other. Fulfills capstone seminar requirement for the Philosophy and Literature tracks. GER:DB-Hum  
4 units, not given this year

**PHIL 194L. Montaigne**

Preference to Philosophy seniors. Philosophical and literary

aspects of Montaigne's Essays including the nature of the self and self-fashioning, skepticism, fideism, and the nature of Montaigne's philosophical project. Montaigne's development of the essay as a literary genre. GER:DB-Hum

4 units, Win (Anderson, L; Landy, J)

**PHIL 194N. Philosophical Issues in Cognitive Science**

Philosophers generally do not perform systematic empirical observations or construct computational models. But philosophy remains important to cognitive science because it deals with fundamental issues that underlie the experimental and computational approach to mind. Abstract questions such as the nature of representation and computation. Relation of mind and body and methodological questions such as the nature of explanations found in cognitive science. Normative questions about how people should think as well as with descriptive ones about how they do. In addition to the theoretical goal of understanding human thinking, cognitive science can have the practical goal of improving it, which requires normative reflection on what we want thinking to be. Philosophy of mind does not have a distinct method, but should share with the best theoretical work in other fields a concern with empirical results. GER:DB-Hum

4 units, not given this year

**PHIL 194P. Naming and Necessity**

Saul Kripke's lectures on reference, modal metaphysics, and the mind/body problem. GER:DB-Hum

4 units, not given this year

**PHIL 194R. Epistemic Paradoxes**

Paradoxes that arise from concepts of knowledge and rational belief, such as the skeptical paradox, the preface paradox, and Moore's paradox. Can one lose knowledge without forgetting anything? Can one change one's mind in a reasonable way without gaining new evidence? GER:DB-Hum

4 units, not given this year

**PHIL 194S. Skepticism**

Modern arguments for skepticism are hard to combat, but also curiously inert in ordinary life. We will look at a variety of contemporary attempts to come to terms with skepticism about the external world, each of which seeks to exploit the curious inertness of skeptical hypotheses.

4 units, Spr (Lawlor, K)

**PHIL 194T. Practical Reason**

Contemporary research on practical reason, practical rationality, and reasons for action. Enrollment limited to 12. Priority given to undergraduate Philosophy majors.

4 units, Aut (Bratman, M)

**PHIL 195A. Unity of Science**

Primarily for seniors.

4-5 units, not given this year

**PHIL 195B. Donor Seminar: Practical Reasoning**

Primarily for seniors. Relationships among action, deliberation, reasons, and rationality. On what basis do people decide what to do? What norms or rules structure reasoning? What constitutes rationality?

4 units, not given this year

**PHIL 196. Tutorial, Senior Year**

(Staff)

5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PHIL 197. Individual Work, Undergraduate**

May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PHIL 198. The Dualist**

Weekly meeting of the editorial board of The Dualist, a national journal of undergraduate work in philosophy. Open to all undergraduates. May be taken 1-3 quarters. (AU) (Potochnik, Yap)  
1 unit, Aut (Miller, B; Asarnow, S), Win (Asarnow, S; Miller, B), Spr (Miller, B; Asarnow, S)

**PHIL 199. Seminar for Prospective Honors Students**

Open to juniors intending to do honors in philosophy. Methods of research in philosophy. Topics and strategies for completing honors project. May be repeated for credit.

2 units, Spr (Darmalingum, M)

**PHIL 249. Evidence and Evolution**

(Same as PHIL 349) The logic behind the science. The concept of evidence and how it is used in science with regards to testing claims in evolutionary biology and using tools from probability theory, Bayesian, likelihoodist, and frequentist ideas. Questions about evidence that arise in connection with evolutionary theory. Creationism and intelligent design. Questions that arise in connection with testing hypotheses about adaptation and natural selection and hypotheses about phylogenetic relationships.

3-5 units, not given this year

**PHIL 265C. Philosophy of Physics: Probability and Relativity**

Conceptual puzzles in formulating probability concepts to be invariant in the sense of the Lorentz transformation of special relativity. Problems arise in both classical and quantum physics.

4 units, not given this year

**GRADUATE COURSES IN PHILOSOPHY**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**PHIL 201. Introduction to Medieval Philosophy**

(Same as PHIL 101) Classics of Western philosophy by Augustine, Boethius, Anselm, Abelard, Aquinas, and Ockham. Explore the puzzles facing someone seeking to lead a good life and to understand herself and her world. A theory of will and human motivation, a theory of ethics based on the agent's intention, and a theory of divine omniscience and omnipotence consistent with divine goodness and human freedom. Works include *On Free Choice*, *The Consolation of Philosophy*, *Ethics*, *Summa theologiae*, and *The Connection of the Virtues*.

4 units, Spr (Duarte, S)

**PHIL 206. Ancient Skepticism**

(Same as PHIL 106) The ancient Pyrrhonian skeptics who think that for any claim there is no more reason to assert it than deny it and that a life without any beliefs is the best route to happiness. Some ancient opponents of the Pyrrhonian skeptics and some relations between ancient and modern skepticism.

4 units, not given this year

**PHIL 207. Plato's Metaphysics and Epistemology**

(Same as PHIL 107) Examine Plato's views on the nature of reality and knowledge by reading the relevant parts of dialogues such as the *Parmenides*, the *Phaedo*, the *Philebus*, and the *Republic*.

4 units, not given this year

**PHIL 208. Topics in Aristotle: Aristotle's Ethics and****Contemporary Moral Theory**

(Same as PHIL 108) Examine the fundamentals of Aristotle's psychological views and read the *De Anima* (*On the Soul*) and some of his other psychological works.

4 units, Win (Bobonich, C)

**PHIL 209. Topics in Ancient Philosophy: Plato and Aristotle on Art and Rhetoric**

(Same as PHIL 109) Plato's and Aristotle's views on the nature of art and rhetoric and their connections with the emotions, reason and the good life. Readings include Plato's *Gorgias*, *Ion* and parts of the *Republic* and the *Laws* and Aristotle's *Poetics* and *Rhetoric*.

4 units, Aut (Bobonich, C)

**PHIL 210. Plato**

(Same as PHIL 110) Plato's *Republic*.

4 units, not given this year

**PHIL 211. Aristotle and Contemporary Ethics**

(Same as PHIL 111) Aristotle's *Nicomachean Ethics*, focusing on virtue, happiness, pleasure, practical reasoning, and particularism. Sources include the *Eudemian Ethics*, contemporary philosophers who have taken many of these topics up again, and contemporary material such as that by Anscombe, Foot, Hursthouse, Korsgaard, and McDowell.

4 units, not given this year

**PHIL 213. Hellenistic Philosophy**

(Same as PHIL 113) Epicureans, skeptics, and stoics on epistemology, ethics, metaphysics, and psychology.

4 units, not given this year

**PHIL 215. Problems in Medieval Philosophy: Islamic Aristotelianism and Western Scholasticism**

(Same as PHIL 115) The western world adopted Aristotle's metaphysics and natural philosophy as the foundation of its educational system and scholarly life between 1210 and 1255. Christian Europe was thereby following the example set by Islam in Spain and the Near East. Today some people believe that this development was independent, and others think that the scholastics copied even their methods from Arabic philosophers. Historical evaluation of those claims.

3-5 units, not given this year

**PHIL 217. Descartes**

(Same as PHIL 117) (Formerly 121/221.) Descartes's philosophical writings on rules for the direction of the mind, method, innate ideas and ideas of the senses, mind, God, eternal truths, and the material world.

4 units, not given this year

**PHIL 218. British Empiricism, 1660s-1730s**

(Same as PHIL 118)

4 units, not given this year

**PHIL 218A. Origins of Empiricism: Gassendi, Locke, and Berkeley**

(Same as PHIL 118A) Particular light is shed on both the strengths and weaknesses of empiricism by studying it as it first arose during the 17th century revolution in philosophy and the sciences initiated by Descartes. Three philosophers of that period helped to advance empiricism: Pierre Gassendi (1592-1655), John Locke (1632-1704), and George Berkeley (1685-1753). Focus on Locke's theory of ideas, mind, language, reality, and natural philosophy expounded in his *An Essay concerning Human Understanding* (Fourth Edition, 1689). Study Gassendi's early influence on, and Berkeley's later reaction to Locke.

4 units, not given this year

**PHIL 219. Rationalists**

(Same as PHIL 119) (Formerly 143/243.) Developments in 17th-century continental philosophy. Descartes's views on mind, necessity, and knowledge. Spinoza and Leibniz emphasizing their own doctrines and their criticism of their predecessors. Prerequisite: 102.

4 units, not given this year

**PHIL 220A. The Leibniz-Clarke Correspondence**

(Same as PHIL 120A) Correspondence on metaphysics, theology, and science.

4 units, not given this year

**PHIL 222. Hume**

(Same as PHIL 122) (Formerly 120/220; graduate students enroll in 222.) Hume's theoretical philosophy, in particular, skepticism and naturalism, the theory of ideas and belief, space and time, causation and necessity, induction and laws of nature, miracles, a priori reasoning, the external world, and the identity of the self.

4 units, not given this year

**PHIL 224. Kant's Philosophy of Physical Science**

Kant's *Metaphysical Foundations of Natural Science* (1786), published between the first (1781) and second (1787) editions of the *Critique of Pure Reason*, in the scientific and philosophical context provided by Newtonian natural philosophy and the Leibnizian tradition. The place of this work in the development of Kant's thought. Prerequisite: acquaintance with either Kant's theoretical philosophy or the contemporaneous scientific context, principally Newton, Leibniz, and Euler.

4 units, Win (Friedman, M)

**PHIL 224A. Mathematics in Kant's Philosophy**

Recent work in Kant's philosophy of mathematics, examined with a view to the role of mathematics, both pure and applied, within Kant's philosophy more generally. Particular attention to the Schematism chapter of the *Critique of Pure Reason*. Prerequisite: prior acquaintance with Kant's theoretical philosophy and the *Critique of Pure Reason*.

4 units, not given this year

**PHIL 225. Kant's First Critique**

(Same as PHIL 125) (Graduate students register for 225.) The founding work of Kant's critical philosophy emphasizing his contributions to metaphysics and epistemology. His attempts to

limit metaphysics to the objects of experience. Prerequisite: course dealing with systematic issues in metaphysics or epistemology, or with the history of modern philosophy.

4 units, Aut (*De Pierris, G*)

**PHIL 226B. Kant's Ethical Theory**

(Same as PHIL 126B) (Graduate students register for 226B.) Kant's moral philosophy based primarily on the Groundwork of Metaphysics of Morals, Critique of Practical Reason, and The Metaphysics of Morals.

2-4 units, not given this year

**PHIL 227A. Kant's Value Theory**

(Same as PHIL 127A) (Graduate students register for 227A.) The role of autonomy, principled rational self-governance, in Kant's account of the norms to which human beings are answerable as moral agents, citizens, empirical inquirers, and religious believers. Relations between moral values (goodness, rightness) and aesthetic values (beauty, sublimity).

4 units, Spr (*Hills, D*)

**PHIL 227B. Kant's Anthropology and Philosophy of History**

(Same as PHIL 127B) Kant's conception of anthropology or human nature, based on his philosophy of history, which influenced and anticipated 18th- and 19th-century philosophers of history such as Herder, Fichte, Hegel, and Marx. Texts include Idea for a Universal History, Conjectural Beginning of Human History, and Anthropology from a Pragmatic Point of View. Topics include: Kant's pragmatic approach to the study of human nature; the difficulty of human self knowledge; the role of regulative and teleological principles in studying human history; and Kant's theory of race.

4 units, not given this year

**PHIL 228. Fichte's Ethics**

(Same as PHIL 128) (Graduate students register for 228.) The founder of the German Idealist movement who adopted but revised Kant's project of transcendental philosophy basing it on the principle of awareness of free self-activity. The awareness of other selves and of ethical relations to them as a necessary condition for self-awareness. His writings from 1793-98 emphasizing the place of intersubjectivity in his theory of experience.

4 units, not given this year

**PHIL 230. Hegel**

(Same as PHIL 130) (Formerly 122/222; graduate students register for 230.) Introduction to Hegel's philosophy, emphasizing his moral and political philosophy, through study of his last major work (1821). May be repeated for credit. Prerequisite: course in the history of modern philosophy.

4 units, not given this year

**PHIL 233. Husserl**

Husserl's phenomenology. Main themes in his philosophy and their interconnections, including consciousness, perception, intersubjectivity, lifeworld, ethics, mathematics and the sciences, and time and space. Works in English translation.

4 units, not given this year

**PHIL 234. Phenomenology and Intersubjectivity**

(Same as PHIL 134) (Graduate students register for 234.) Readings from Husserl, Stein, Heidegger, Sartre, and Merleau-Ponty on subjects related to awareness of others. Topics include solipsism, collective experience, empathy, and objectification of the other.

4 units, not given this year

**PHIL 235. Existentialism**

(Same as PHIL 135) (Formerly 132/232.) Focus is on the existentialist preoccupation with human freedom. What constitutes authentic individuality? What is one's relation to the divine? How can one live a meaningful life? What is the significance of death? A rethinking of the traditional problem of freedom and determinism in readings from Rousseau, Kierkegaard, and Nietzsche, and the extension of these ideas by Sartre, Beauvoir, and Camus, including their social and political consequences in light of 20th-century fascism and feminism.

4 units, Aut (*Anderson, L*)

**PHIL 236. History of Analytic Philosophy**

(Same as PHIL 136) (Formerly 147/247; graduate students register for 236.) Theories of knowledge in Frege, Carnap, and Quine. Emphasis is on conceptions of analyticity and treatment of logic

and mathematics. Prerequisite: 50 and one course numbered 150-165 or 181-90.

4 units, not given this year

**PHIL 237. Wittgenstein**

(Same as PHIL 137) (Graduate students register for 237.) The main themes and claims in Wittgenstein's later work concentrating on his views about meaning, mind, knowledge, the nature of philosophical perplexity, and the nature of philosophical progress in his Philosophical Investigations. Emphasis is on the relationship between the novel arguments of the Investigations and its ways of writing up the results of philosophical questioning.

4 units, not given this year

**PHIL 238. Recent European Philosophy: Between Nature and History**

(Same as PHIL 138) A critical introduction to the novel understandings of time, language, and cultural power developed by 20th-century continental thinkers, with close attention to work by Heidegger, Saussure, Benjamin, and Foucault.

4 units, not given this year

**PHIL 239. Teaching Methods in Philosophy**

For Ph.D. students in their first or second year who are or are about to be teaching assistants for the department. May be repeated for credit.

1-4 units, Aut (*Greene, A*), Spr (*Greene, A*)

**PHIL 240. Individual Work for Graduate Students**

May be repeated for credit.

1-15 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*), Sum (*Staff*)

**PHIL 241. Dissertation Development Seminar**

Required of second-year Philosophy Ph.D. students; restricted to Stanford Philosophy Ph.D. students. Prerequisite: consent of instructor.

1-4 units, Sum (*Staff*)

**PHIL 243. Quine**

(Same as PHIL 143) (Formerly 183/283; graduate students register for 243.) The philosophy of Quine: meaning and communication; analyticity, modality, reference, and ontology; theory and evidence; naturalism; mind and the mental.

4 units, not given this year

**PHIL 248. Medieval Latin Paleography**

The history of medieval scripts and medieval abbreviation. Dating and placing Latin European medieval manuscripts. Editing medieval texts in philosophy, psychology, physics, and theology. Class project: an early 13th century encyclopedia (with entries citing both Plato and Aristotle). Intellectually exciting, easy to read (textualis script).

3-5 units, not given this year

**PHIL 250. Basic Concepts in Mathematical Logic**

(Same as PHIL 150) (Formerly 159.) The concepts and techniques used in mathematical logic, primarily through the study of the language of first order logic. Topics: formalization, proof, propositional logic, quantifiers, sets, mathematical induction, and enumerability.

4 units, Aut (*Wasow, T*)

**PHIL 251. First-Order Logic**

(Same as PHIL 151) (Formerly 160A.) The syntax and semantics of sentential and first-order logic. Concepts of model theory. Gödel's completeness theorem and its consequences: the Löwenheim-Skolem theorem and the compactness theorem. Prerequisite: 150 or consent of instructor.

4 units, Win (*Sommer, R*)

**PHIL 252. Computability and Logic**

(Same as PHIL 152) Approaches to effective computation: recursive functions, register machines, and programming styles. Proof of their equivalence, discussion of Church's thesis. Elementary recursion theory. These techniques used to prove Gödel's incompleteness theorem for arithmetic, whose technical and philosophical repercussions are surveyed. Prerequisite: 151.

4 units, Spr (*Casanovas, E*)

**PHIL 253. Feminist Theories and Methods Across the Disciplines**

(Same as FEMST 103, FEMST 203, PHIL 153) The interdisciplinary foundations of feminist thought. The nature of disciplines and of interdisciplinary work. Challenges of feminism

for scholarship and research.

4-5 units, *Win (Longino, H)*

**PHIL 254. Modal Logic**

(Same as PHIL 154) (Graduate students register for 254.) Syntax and semantics of modal logic, and technical results like completeness and correspondence theory. Applications to philosophy and computer science. Prerequisite: 150 or preferably 151.

4 units, *Spr (van Benthem, J)*

**PHIL 257. Topics in Philosophy of Logic**

(Same as PHIL 157) (Graduate students register for 257.) Disputed foundational issues in logic; the question of what the subject matter and boundaries of logic are, such as whether what is called second-order logic should be counted as logic. What is the proper notion of logical consequence? May be repeated for credit. Pre- or corequisite: 151, or consent of instructor.

3 units, *not given this year*

**PHIL 258. Minds and Machines**

Readings on arguments concerning mechanical models of the mind including Turing machine models to which Gödel's incompleteness theorems are relevant, and connectionist (neural net) models. Prerequisites: 151 (formerly 160A), 152, or equivalents. Recommended: 389. (Feferman)

4 units, *not given this year*

**PHIL 260A. Newtonian Revolution**

(Same as PHIL 160A) (Graduate students register for 260A.) 17th-century efforts in science including by Kepler, Galileo, Descartes, and Huygens, that formed the background for and posed the problems addressed in Newton's *Principia*.

4 units, *not given this year*

**PHIL 260B. Newtonian Revolution**

(Same as PHIL 160B) (Graduate students register for 260B.) Newton's *Principia* in its historical context, emphasizing how it produced a revolution in the conduct of empirical research and in standards of evidence in science.

4 units, *not given this year*

**PHIL 262. Philosophy of Mathematics**

(Same as MATH 162, PHIL 162) (Graduate students register for PHIL 262.) 20th-century approaches to the foundations and philosophy of mathematics. The background in mathematics, set theory, and logic. Schools and programs of logicism, predicativism, platonism, formalism, and constructivism. Readings from leading thinkers. Prerequisite: PHIL151 or consent of instructor.

4 units, *Spr (Mumma, J)*

**PHIL 263. Significant Figures in Philosophy of Science**

(Same as PHIL 163) (Graduate students register for 263.) Directed study of two or more thinkers, past or present, who have made a lasting impact on contemporary philosophy of science. Subjects last year were Henri Poincaré, Pierre Duhem, and Gaston Bachelard.

4 units, *not given this year*

**PHIL 264. Central Topics in the Philosophy of Science: Theory and Evidence**

(Same as PHIL 164) (Graduate students register for 264.) The relation of theory to evidence and prediction, problems of induction, empirical under-determination of theory by evidence, and theory choice. Hypothetico-deductive, Bayesian, pragmatic, and inference to the best explanation models of explanation. The semantic approach to theories.

4 units, *not given this year*

**PHIL 264A. Central Topics in Philosophy of Science: Causation**

(Same as PHIL 164A) (Graduate Students register for 264A.) Establishing causes in science, engineering, and medicine versus establishing them in Anglo-American law, considered in the context of Hume and Mill on causation. May be repeated for credit.

4 units, *not given this year*

**PHIL 265. Philosophy of Physics**

(Same as PHIL 165) (Graduate students register for 265.) Central topic alternates annually between space-time theories and philosophical issues in quantum mechanics. Topics last year:

absolute and relational theories of space, time, and motion. Newton's critique of Descartes and debate with Leibniz. The principle of relativity and space-time formulations of Aristotelian, Galilean, and relativity physics. Mach's principle and the theory of general relativity. Einstein's struggles with the principle of general covariance. Space-time substantivalism, and the meaning of background independence. May be repeated for credit if content is different.

4 units, *Spr (Ryckman, T)*

**PHIL 266. Probability: Ten Great Ideas About Chance**

(Same as PHIL 166, STATS 167, STATS 267) Foundational approaches to thinking about chance in matters such as gambling, the law, and everyday affairs. Topics include: chance and decisions; the mathematics of chance; frequencies, symmetry, and chance; Bayes great idea; chance and psychology; misuses of chance; and harnessing chance. Emphasis is on the philosophical underpinnings and problems. Prerequisite: exposure to probability or a first course in statistics at the level of STATS 60 or 116.

4 units, *Spr (Diaconis, P; Skyrms, B)*

**PHIL 267A. Philosophy of Biology**

(Same as PHIL 167A) (Graduate students register for 267A.) Evolutionary theory and in particular, on characterizing natural selection and how it operates. We examine debates about fitness, whether selection is a cause or force, the levels at which selection operates, and whether cultural evolution is a Darwinian process.

2-4 units, *not given this year*

**PHIL 267B. Philosophy, Biology, and Behavior**

(Same as PHIL 167B) (Graduate students register for 267B.) Continuation of 167A/267A. Further philosophical study of key theoretical ideas in biology, focusing on problems involving explanation of behavior. Topics: evolutionary versus proximate causal explanations of behavior; genetic and other determinisms; and classification and measurement of behavior. Prerequisites: 167A; or one PHIL course and either one BIO course or Human Biology core; or equivalent with consent of instructor.

4 units, *Aut (Longino, H)*

**PHIL 267C. Associative Theories of Mind and Brain**

(Same as PHIL 167C) After a historical survey of associative theories from Hume to William James, current versions will be analyzed including the important early ideas of Karl Lashley. Emphasis will be on the computational power of associative networks and their realization in the brain.

4 units, *not given this year*

**PHIL 268. Theories of Truth**

(Same as PHIL 168) (Graduate students register for 268.) The correspondence, coherence, pragmatist and deflationary theories of truth. Tarski's semantic conception of truth and hierarchical truth definitions. The problems posed by the liar paradox for non-hierarchical theories. Formal theories of truth proposed since the 70s to deal with these problems.

4 units, *not given this year*

**PHIL 269. Evolution of the Social Contract**

(Same as PHIL 169) Explore naturalizing the social contract. Classroom presentations and term papers. Texts: Binmore - Natural Justice Skyrms - Evolution of the Social Contract.

4 units, *not given this year*

**PHIL 270. Ethical Theory**

(Same as ETHICSOC 170, PHIL 170) Major strands in contemporary ethical theory. Readings include Bentham, Mill, Kant, and contemporary authors.

4 units, *Spr (Dannenberg, J)*

**PHIL 270B. Metaphor**

(Same as PHIL 170B) Think and talk about two things at once: two different subject matters are mingled to rich and unpredictable effect. Close critical study of the main modern accounts of metaphors nature and interest, drawing on the work of writers, linguists, philosophers, and literary critics. Attention to how understanding, appreciation, and pleasure connect with one another in the experience of metaphor. Consideration of the possibility that metaphor or something very like it can occur in nonverbal media: gesture, dance, painting, music.

4 units, *not given this year*

**PHIL 270E. Sexual Ethics**

(Same as PHIL 170E) What is sex? What are the implications of different conceptions of sex for sexual ethics? Are there any distinctively sexual ethical principles or virtues or are principles and virtues that govern the sexual domain specific instances of principles and virtues that govern human activity more generally? Readings will range from historical to contemporary sources.

*4 units, Spr (Staff)*

**PHIL 271. Justice**

(Same as ETHICSOC 171, IPS 208, PHIL 171, POLISCI 3P, POLISCI 136S) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality.

*4-5 units, Aut (Dougherty, T)*

**PHIL 272. History of Modern Ethics**

(Same as PHIL 172) Major strands in the history of modern, pre-Kantian moral philosophy. Emphasis is on the dialogue between empiricists and rationalists on the subject of the relationship between the natural and the normative. Authors include Frances Hutcheson, David Hume, Adam Smith, Samuel Clarke, and Richard Price.

*4 units, not given this year*

**PHIL 272B. Recent Ethical Theory**

(Same as PHIL 172B) Study the works of several prominent contemporary moral philosophers. Possible authors include: Scanlon, Darwall, Nagel, Williams, Blackburn, Gibbard, Korsgaard. Prerequisite: students should have taken an introduction to moral philosophy (Phil. 20, Phil. 170 or equivalent).

*4 units, not given this year*

**PHIL 273B. Metaethics**

(Same as PHIL 173B) (Graduate students register for 273B.) Can moral and ethical values be justified or is it just a matter of opinion? Is there a difference between facts and values? Are there any moral truths? Does it matter if there are not? Focus is not on which things or actions are valuable or morally right, but what is value or rightness itself. Contemporary metaethics. Prerequisites: 80, 181, and an ethics course.

*4 units, Aut (Hussain, N)*

**PHIL 274. Freedom and the Practical Standpoint**

(Same as PHIL 174) (Graduate students register for 274.) Confronted with the question of how to act, people think of themselves as freely determining their own conduct. Natural science poses a challenge to this by explaining all events, including human actions, in terms of causal processes. Are people justified in thinking of themselves as free? Major philosophical approaches to this question: incompatibilism, compatibilism, and the two-standpoint view.

*4 units, not given this year*

**PHIL 274A. Moral Limits of the Market**

(Same as ETHICSOC 174A, PHIL 174A) Morally controversial uses of markets and market reasoning in areas such as organ sales, procreation, education, and child labor. Would a market for organ donation make saving lives more efficient; if it did, would it thereby be justified? Should a nation be permitted to buy the right to pollute? Readings include Walzer, Arrow, Rawls, Sen, Frey, Titmuss, and empirical cases.

*4 units, not given this year*

**PHIL 274L. Betrayal and Loyalty, Treason and Trust**

(Same as ETHICSOC 174L, ETHICSOC 274L, PHIL 174L) The main topic of the seminar is Betrayal: its meaning as well as its moral, legal and political implications. We shall discuss various notions of betrayal: Political (military) betrayal such as treason, Religious betrayal with Judas as its emblem, but also apostasy (converting one's religion) which is regarded both as a basic human right and also as an act of betrayal, social betrayal - betraying class solidarity as well as Ideological betrayal - betraying a cause. On top of political betrayal we shall deal with personal betrayal, especially in the form of infidelity and in the form of financial betrayal of the kind performed by Madoff. The

contrasting notions to betrayal, especially loyalty and trust, will get special consideration so as to shed light or cast shadow, as the case may be, on the idea of betrayal. The seminar will focus not only on the normative aspect of betrayal - moral or legal, but also on the psychological motivations for betraying others. The seminar will revolve

*2 units, Win (Staff)*

**PHIL 275. Philosophy of Law**

(Same as PHIL 175) Philosophical foundations of law and the legal system. The justifiability of patterns of assigning legal responsibility within criminal law. Prerequisite: PHIL 80 and one additional PHIL course.

*4 units, not given this year*

**PHIL 275A. Ethics and Politics of Public Service**

(Same as CSRE 178, ETHICSOC 133, HUMBIO 178, PHIL 175A, POLISCI 133) Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford.

*5 units, Win (Mitchell, T)*

**PHIL 275M. Two Ethical Theories and Being a Person**

(Same as PHIL 175M) The distinction between the ethics of being a person and the ethics of rules as opposed to the distinction between Kantian ethics and utilitarianism or consequentialism. Comparison of these two types of ethics with respect to their relationship to agency and being a good person. Relations between Western ethics and those of other continents.

*4 units, not given this year*

**PHIL 276. Political Philosophy: The Social Contract Tradition**

(Same as PHIL 176) (Graduate students register for 276.) Why and under what conditions do human beings need political institutions? What makes them legitimate or illegitimate? What is the nature, source, and extent of the obligation to obey the legitimate ones, and how should people alter or overthrow the others? Answers by political theorists of the early modern period: Hobbes, Locke, Rousseau, and Kant.

*4 units, Win (Hills, D)*

**PHIL 276A. Classical Seminar: Origins of Political Thought**

(Same as CLASSHIS 133, CLASSHIS 333, PHIL 176A, POLISCI 230A, POLISCI 330A) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change.

*4-5 units, Win (Ober, J)*

**PHIL 276B. The Economic Individual in the Behavioral Sciences**

(Same as PHIL 176B) (Graduate students register for 276B.)

*4 units, not given this year*

**PHIL 277M. Human Rights and Moral Question**

(Same as ETHICSOC 177M, ETHICSOC 277M, PHIL 177M) The proliferation of human rights in the discourse of international justice has raised a number of important questions in both moral and legal theory. What are human rights? How should they be conceptualized? Who ought to bear the duties associated with them? Can their protection justify military interventions into sovereign states? This course will cover topics in moral and legal theory surrounding human rights. The course has three main focuses. The first concerns the question of what these rights are. The second focus is on the various substantive moral justifications for the protection of human rights. The third is on the moral issues raised by the dominance of human rights in international law and relations: can any rights be universal? How are these rights to be framed in the light of cross-cultural values and claims about cultural dominance? A theme throughout will be the connections between these questions. The way we answer the question of what human rights are, and how they c

*4-5 units, Spr (Thomas, J)*

**PHIL 278A. The Ethics of Environmental Choices**

(Same as EARTHSYS 178, EARTHSYS 278, PHIL 178A) (Formerly PHIL 278/378.) The institutional and individual dimensions of environmental choices. On the institutional side, examine externalities, the tragedy of the commons, sustainable development and environmental policy. On the individual side, discuss individual responsibility, intrinsic value, and moral pluralism. Focus is on decision making including the role of risk analysis, the rate of discount for effects on future generations, cost-benefit analysis, and scientific epistemology.

4 units, not given this year

**PHIL 278M. Justice and the Environment**

(Same as ETHICSOC 178M, ETHICSOC 278M, PHIL 178M, POLISCI 134L) Explores the normative questions that arise in environmental policy debates, including arguments over pollution permit markets, conservation regulations, and global warming mitigation efforts. What are the morally relevant ways in which the environment is different from other economic resources? How should the environment be valued? What are our obligations to conserve for future generations? How should the burdens of conservation be distributed? Engages with a variety of philosophical traditions including utilitarianism, deep ecology, liberalism, and communitarianism.

5 units, Win (Mazor, J)

**PHIL 279S. Moral Psychology, Reasons for Action, and Moral Theory**

(Same as PHIL 179S) What sorts of considerations does an ethical agent take to be good reasons for action? Work in moral psychology to illuminate the theory of practical reasons, and the theory of practical reasons to test the prospects for systematic moral theory. Can any systematic moral theory be reconciled with the moral psychology of ordinary, morally respectable agents? Reading include Bernard Williams, Rosalind Hursthouse, Peter Railton, T.M. Scanlon, and Barbara Herman.

4 units, not given this year

**PHIL 280. Metaphysics**

(Same as PHIL 180) Does God exist? If not, then what are we even talking about when we debate his/her/its existence? What does it take for a thought, existential or otherwise, to be true? It's true that this sentence is too long, but does that entail that there's a property (or feature or attribute) that this sentence has, namely: being too long? If so, what are such properties like? Are they located where and when the objects that have them are located? Are objects just bundles of properties? How exactly are they related to the molecules that make them up? How can objects persist through time, if they're constantly changing their parts and properties? Do human beings persist in the same way? Does time really flow, or is it just another 'static' dimension alongside the spatial ones? If it's the latter, does that mean everything that will ever happen is already determined now? Is determinism compatible with free will? What does it even mean to say that something could have happened differently?

4 units, Spr (Malmgren, A)

**PHIL 280A. Realism, Anti-Realism, Irrealism, Quasi-Realism**

(Same as PHIL 180A) Realism and its opponents as options across a variety of different domains: natural science, mathematics, ethics, and aesthetics. Clarify the various conceptions that fall under these terms and outline the reasons for and against adopting realism for the various domains. Highlight the general issues involved. Prerequisites: 80, 181

4 units, Win (Hussain, N)

**PHIL 281. Philosophy of Language**

(Same as PHIL 181) The study of conceptual questions about language as a focus of contemporary philosophy for its inherent interest and because philosophers see questions about language as behind perennial questions in other areas of philosophy including epistemology, philosophy of science, metaphysics, and ethics. Key concepts and debates about the notions of meaning, truth, reference, and language use, with relations to psycholinguistics and formal semantics. Readings from philosophers such as Frege, Russell, Wittgenstein, Grice, and Kripke. Prerequisites: 80 and background in logic.

4 units, Aut (Crimmins, M)

**PHIL 281B. Philosophy of Language: Contemporary Debates**

(Same as PHIL 181B) This course builds on the material of 181/281, focusing on debates and developments in the pragmatics of conversation, the semantics/pragmatics distinction, the contextuality of meaning, the nature of truth and its connection to meaning, and the workings of particular linguistic constructions of special philosophical relevance. Students who have not taken 181/281 should seek the instructor's advice as to whether they have sufficient background.

4 units, Win (Crimmins, M)

**PHIL 282. Truth**

(Same as PHIL 182) Philosophical debates about the place in human lives and the value to human beings of truth and its pursuit. The nature and significance of truth-involving virtues such as accuracy, sincerity, and candor.

4 units, Aut (Hills, D)

**PHIL 284. Theory of Knowledge**

(Same as PHIL 184) Competing theories of epistemic justification (foundationalism, coherentism, and externalism) against the background of radical scepticism. Readings from contemporary sources. Prerequisite: 80 or consent of instructor.

4 units, Spr (Malmgren, A)

**PHIL 284C. Epistemology of Testimony**

(Same as PHIL 184C) Many of our beliefs come from others, and not from direct experience. Is testimony a source of fundamental reasons? reasons that do not have to be supported or validated by other sources like perception or inference? What sort of responsibility does one have to one's hearers, when one gives testimony?

4 units, Win (Lawlor, K)

**PHIL 284F. Feminist Theories of Knowledge**

(Same as FEMST 166, PHIL 184F) Feminist critique of traditional approaches in epistemology and alternative feminist approaches to such topics as reason and rationality, objectivity, experience, truth, the knowing subject, knowledge and values, knowledge and power.

4 units, not given this year

**PHIL 285B. Philosophy of Perception**

(Same as PHIL 185B) The nature of perceptual experience and the role it plays in securing empirical knowledge. Focus will be on what is sometimes called the problem of perception: the question of how perception could provide us with direct awareness of the surrounding environment given the possibility of illusions or hallucinations. Topics, include the relationship between perception and belief, the nature of perceptual phenomenology, whether or not perceptual experiences are representational states, and the philosophical relevance of empirical research on perception.

4 units, Win (Genone, J)

**PHIL 286. Philosophy of Mind**

(Same as PHIL 186) (Graduate students register for 286.) Debates concerning the nature of mental states, their relation to physical states of the human body, how they acquire their content, how people come to know about them in themselves and others, and the roles they play in the explanation of human conduct.

4 units, Spr (Taylor, K)

**PHIL 287. Philosophy of Action**

(Same as PHIL 187) (Graduate students register for 287.) Contemporary research in the philosophy of action. Topics include: What is it to be an agent? Is there a philosophically defensible contrast between being an agent and being a locus of causal forces to which one is subject? What is it to act purposively? What is intention? What is the relation between intention and belief? What is it to act intentionally? What is it to act for a reason? What is the relation between explaining why someone acted by citing the reasons for which she acted and causal explanation of her action? What is the relation between theoretical and practical rationality? What is the nature of our knowledge of our own intentional activity? What is it to act autonomously? What is shared cooperative activity? Prerequisite: 80..

4 units, Spr (Bratman, M)

**PHIL 288. Personal Identity**

(Same as PHIL 188) Do you persist through time the way that a skyscraper persists through space, by having different parts at different locations? Or are you 'wholly present' at every moment

of your life, in something more like the way that an elevator is present in each place as it travels up to the top floor? What criteria determine whether you now are the very same person as some unique person located at some time in the past? Is the continuity of your memories or other mental states sufficient for your survival? Can you survive the loss or destruction of your body? Do you really exist for more than just the present moment? How do different answers to these questions bear on your moral, personal, and professional obligations? What kinds of considerations could possibly help us to answer these questions? This course explores these and related issues. Readings include a mix of introductory survey, historical, and contemporary material.

*4 units, not given this year*

**PHIL 289. Examples of Free Will**

(Same as PHIL 189) Examples drawn from three domains: choice, computation, and conflict of norms. Conceptually, a distinction is made between examples that are predictable and those that are not, but skepticism about making a sharp distinction between determinism and indeterminism is defended.

*4 units, not given this year*

**PHIL 300. Proseminar**

Typically focused seminar. Required of all first year Philosophy PhD students

*4 units, Aut (Taylor, K)*

**PHIL 301. Dissertation Development Proseminar**

Typically focused seminar. Optional of all second and third year Philosophy PhD students

*4 units, Win (De Pierris, G), Spr (De Pierris, G)*

**PHIL 312. Aristotle's Psychology**

De Anima and parts of Parva Naturalia.

*4 units, not given this year*

**PHIL 314. Practical Reasoning in Plato and Aristotle**

It is often said that the greatest difference between Plato's ethics and those of Aristotle is that the latter thinks that practical and theoretical reason are distinct, but the former does not. We shall read some of both Plato and Aristotle and ask whether the above claim is true and then consider what the implications the differences between their views of practical reason have for the rest of their ethics.

*2-4 units, not given this year*

**PHIL 317. Topics in Plato: Middle and Late Ethics & Politics**

Examine the fundamentals of Plato's political philosophy by reading the Politics as well relevant parts of some of his other ethical and political works.

*2-4 units, Win (Bobonich, C)*

**PHIL 318. Aristotle's Ethics**

Topics in Aristotle's ethical theory and related parts of his psychology.

*4 units, not given this year*

**PHIL 319. Aristotle's Metaphysics**

Aristotle's views about substance and the nature and possibility of metaphysics. Focus is on Categories and Metaphysics Book Zeta.

*3 units, not given this year*

**PHIL 321. Leibniz's Metaphysics**

Leibniz's metaphysical views during his so-called mature period (early 1680s to 1716). Topics will include Leibniz's conception of substance, his alleged idealism, his doctrine of possible worlds and his doctrine of pre-established harmony. Reading of the Discourse on Metaphysics (1686) and the correspondence with Arnauld (1686-1690).

*2-4 units, not given this year*

**PHIL 322. Hume**

Hume's theoretical philosophy emphasizing skepticism and naturalism, the theory of ideas and belief, space and time, causation and necessity, induction and laws of nature, miracles, a priori reasoning, the external world, and the identity of the self.

*2-4 units, Aut (De Pierris, G)*

**PHIL 323. Kant's Criticism of Metaphysics**

Motivations and strategies of Kant's criticisms of traditional metaphysics in the Critique of Pure Reason. Leibnizian and Wolffian versions of the concept containment theory of truth and the Wolffian ideal of a conceptual system of metaphysical knowledge. Kant's analytic/synthetic distinction, focusing on its

place in the rejection of metaphysics and in arguments about the ideas of reason in the transcendental dialectic. Prerequisite: course on the first Critique, or consent of instructor.

*4 units, Spr (Anderson, L)*

**PHIL 332. Nietzsche**

Preference to doctoral students. Nietzsche's later works emphasizing The Gay Science, Beyond Good and Evil, and On the Genealogy of Morals. The shape of Nietzsche's philosophical and literary projects, and his core doctrines such as eternal recurrence, will to power, and perspectivism. Problems such as the proper regulation of belief, and the roles of science, morality, art, and illusion in life.

*2-4 units, not given this year*

**PHIL 334. Habermas**

Does Habermas have a distinctive account of normativity and normative judgements?

*3-5 units, not given this year*

**PHIL 335. Topics in Aesthetics**

May be repeated for credit.

*4 units, not given this year*

**PHIL 340. Time and Free Will**

Free will and the consequence argument of Peter van Inwagen and others. Focus is on the principle that one cannot change the past and the problem of backtracking conditionals, and less on the problem raised by determinism. Hypotheses less drastic than determinism support backtrackers; given the backtracker, would someone's not having done something require that he change the past? Issues related to time, change, the phenomenology of agency, and McTaggart's argument about the reality of time.

*3-5 units, not given this year*

**PHIL 348. Evolution of Signals**

Explores evolutionary (and learning) dynamics applied to simple models of signaling, emergence of information and inference. Classroom presentations and term papers. Text: Skyrms - SIGNALS: EVOLUTION, LEARNING and INFORMATION and selected articles.

*2-4 units, Spr (Skyrms, B)*

**PHIL 349. Evidence and Evolution**

(Same as PHIL 249) The logic behind the science. The concept of evidence and how it is used in science with regards to testing claims in evolutionary biology and using tools from probability theory, Bayesian, likelihoodist, and frequentist ideas. Questions about evidence that arise in connection with evolutionary theory. Creationism and intelligent design. Questions that arise in connection with testing hypotheses about adaptation and natural selection and hypotheses about phylogenetic relationships.

*3-5 units, not given this year*

**PHIL 350A. Model Theory**

Back-and-forth arguments with applications to completeness, quantifier-elimination and omega-categoricity. Elementary extensions and the monster model. Preservation theorems. Interpolation and definability theorems. Imaginaries. Prerequisite: Phil151A or consent of the instructor.

*3 units, Spr (Casanovas, E)*

**PHIL 350B. Model Theory B**

(Same as MATH 290B) Decidable theories. Model-theoretic background. Arithmetic of addition, real closed and algebraically closed fields, weak second order arithmetic, theories of terms, theories of arrays, temporal logic. Combining decision procedures. May be repeated for credit. Prerequisite: 151,152 or equivalents.

*1-3 units, not given this year*

**PHIL 351A. Recursion Theory**

Theory of recursive functions and recursively enumerable sets. Register machines, Turing machines, and alternative approaches. Gödel's incompleteness theorems. Recursively unsolvable problems in mathematics and logic. Introduction to higher recursion theory. The theory of combinators and the lambda calculus. Prerequisites: 151, 152, and 161, or equivalents.

*3 units, not given this year*

**PHIL 351B. Proof Mining**

Uses of proof theory in analysis and number theory. Proof mining: extraction of bounds from non-effective proofs. May be repeated for credit. Prerequisite: 151,152 or equivalents, and a calculus

course.

*1-3 units, not given this year*

**PHIL 352A. Set Theory**

(Same as MATH 292A) The basics of axiomatic set theory; the systems of Zermelo-Fraenkel and Bernays-Gödel. Topics: cardinal and ordinal numbers, the cumulative hierarchy and the role of the axiom of choice. Models of set theory, including the constructible sets and models constructed by the method of forcing. Consistency and independence results for the axiom of choice, the continuum hypothesis, and other unsettled mathematical and set-theoretical problems. Prerequisites: PHIL151 and MATH 161, or equivalents.

*3 units, not given this year*

**PHIL 353A. Proof Theory**

(Same as MATH 293A) Gentzen's natural deduction and sequential calculi for first-order propositional and predicate logics. Normalization and cut-elimination procedures. Relationships with computational lambda calculi and automated deduction. Prerequisites: 151, 152, and 161, or equivalents.

*3 units, Aut (Mints, G)*

**PHIL 353B. Proof Theory B**

Consistency ordinal as a measure of the strength of a mathematical theory. The open problem of describing the ordinal of mathematical analysis (second order arithmetic). Present state of the problem and approaches to a solution. Prerequisites: Phil 151, 152 or equivalents

*3 units, Win (Mints, G)*

**PHIL 353C. Functional Interpretations**

Finite-type arithmetic. Gödel's functional interpretation and Kreisel's modified realizability. Systems based on classical logic. Spector's extension by bar-recursive functionals. Kohlenbach's monotone interpretation and the bounded functional interpretation. The elimination of weak König's lemma. Uniform boundedness. A look at Tao's hard/soft analysis distinction.

*4 units, not given this year*

**PHIL 354. Topics in Logic**

Epsilon-calculus. Syntax and semantics of first-order epsilon-calculus. Hilbert's epsilon substitution method. Recent progress and open problems. May be repeated for credit. Prerequisite: 151, 152 or equivalents

*1-3 units, not given this year*

**PHIL 355. Logic and Social Choice**

Topics in the intersection of social choice theory and formal logic. Voting paradoxes, impossibility theorems and strategic manipulation, logical modeling of voting procedures, preference versus judgment aggregation, role of language in social choice, and metatheory of social choice. May be repeated for credit. Prerequisite: 151 or consent of instructor.

*4 units, not given this year*

**PHIL 356. Applications of Modal Logic**

Applications of modal logic to knowledge and belief, and actions and norms. Models of belief revision to develop a dynamic doxastic logic. A workable modeling of events and actions to build a dynamic deontic logic on that foundation. (Staff)

*3 units, not given this year*

**PHIL 358. Rational Agency and Intelligent Interaction**

(Same as CS 222) For advanced undergraduates, and M.S. and beginning Ph.D. students. Logic-based methods for knowledge representation, information change, and games in artificial intelligence and philosophy. Topics: knowledge, certainty, and belief; time and action; belief dynamics; preference and social choice; games; and desire and intention. Prerequisite: propositional and first-order logic.

*3 units, not given this year*

**PHIL 359. Advanced Modal Logic**

Mathematical analysis of modal systems, including bisimulation and expressive power, correspondence theory, algebraic duality, completeness and incompleteness, and extended modal logics, up to guarded fragments of first-order logic, fixed-point logics, and second-order logic. Prerequisite: 151, 154/254, or equivalent background.

*2-4 units, Spr (van Benthem, J)*

**PHIL 360. Core Seminar in Philosophy of Science**

Limited to first- and second-year Philosophy Ph.D. students.

*4 units, not given this year*

**PHIL 365. Seminar in Philosophy of Science: Time**

*4 units, not given this year*

**PHIL 366. Evolution and Communication**

Topics include information bottlenecks, signaling networks, information processing, invention of new signals, teamwork, evolution of complex signals, teamwork. Sources include signaling games invented by David Lewis and generalizations thereof, using evolutionary and learning dynamics.

*4 units, not given this year*

**PHIL 370. Core Seminar in Ethics**

Limited to first- and second-year students in the Philosophy Ph.D. program.

*4 units, not given this year*

**PHIL 371D. Graduate Seminar on Equality**

(Same as POLISCI 431L) This seminar will focus on ideas of equality of opportunity, with readings from political theory, as well as American constitutional law, political science, economics, and sociology. The readings will address four main questions: What is equality of opportunity? Why is equality of opportunity an important requirement of justice? What are the principal sources of inequalities of opportunity? And how might those inequalities be remedied? Readings from: Hayek, Rawls, Dworkin, Okin, Roemer, Tawney, Bourdieu, Barry, Jencks, Mazumder, Alstott, McLanahan, and Heckman.

*5 units, not given this year*

**PHIL 372. Topics in Kantian Ethics**

Selected topics in ethics, considering both Kant's texts and recent writings by Kant interpreters and moral philosophers in the Kantian tradition. Among the topics covered will be: Practical reason, personal relationships, duties to oneself, evil, right and politics, lying, constructivism in ethics.

*4 units, not given this year*

**PHIL 372E. Graduate Seminar on Moral Psychology**

Recent philosophical works on desire, intention, the motivation of action, valuing, and reasons for action. Readings: Williams, Korsgaard, Smith, Blackburn, Velleman, Stampe, Frankfurt.

*3-5 units, not given this year*

**PHIL 372P. Korsgaard and her Critics**

Derek Parfit has characterized Christine Korsgaard's view as one whose complexity and scope make it unusually hard both to summarize and classify. Korsgaard combines Kantian, Humean, and existentialist ideas in unexpected, platitude-denying ways. Korsgaard's theory is at once a theory of morality, agency and personal identity. Present her view both by reading her latest and most mature formulation of it (Self-Constitution), and by examining prominent critiques of it (Parfit, Hussain, Enoch, Fitzpatrick, etc.). These critiques focus on several fundamental issues worthy of discussion in their own right. What is the relation between moral judgment and moral motivation? Does moral thinking trade in practical or descriptive concepts? In what sense does morality admit of analysis or explanation? What does it mean for a moral theory to be addressed to the deliberative rather than the scientific or anthropological point of view? If moral norms were constitutive of agency, would that account

*2-4 units, not given this year*

**PHIL 372R. Political Realism**

(Same as POLISCI 435R) This seminar will explore various articulations of political realism in their historical contexts. Realism is generally taken to be a pragmatic approach to a political world marked by the competition for material interests and the struggle for power. Yet beyond a shared critique of idealism and an insistence on the priority and autonomy of the political, realists tend to have very different normative visions and political projects. We will consider the works of several political realists from the history of political and international relations thought, including: Thucydides, Machiavelli, Hobbes, Carr, Niebuhr, and Morgenthau.

*3-5 units, Aut (McQueen, A)*

**PHIL 373. Moral Psychology: The Concept of Inclination**

The weight placed by Kantian and rationalist moral theories on the distinction between inclination and reason. The concept of inclination as that which inclines but does not determine how people act. How are inclinations related to the people who hold

them? Are they expressions of values, or more like internal weather? What is their nature? What does it mean to act from inclination? Are actions on inclination unchosen or just badly chosen? Historical and contemporary sources.

*4 units, not given this year*

**PHIL 374. Caring and Practical Reasoning**

What is it to care about something; how is caring related to desiring, emotions, and having policies; what is the relationship between caring and the will; why do people care about things; can attention to caring help explain the phenomenon of silencing reasons? Readings from contemporary literature, including Frankfurt, Watson, Bratman, Scanlon, Williams, Helm, and Kolodny. May be repeated for credit.

*4 units, not given this year*

**PHIL 374C. Democracy and the Constitution**

(Same as POLISCI 438) Connections between democratic theory and constitutional theory. Sources include literature from political philosophy, constitutional law, and jurisprudence, and arguments about freedom of expression, campaign finance, legislative apportionment, federalism, and separation of powers. Readings from Scalia, Breyer, Ely, Ackerman, Dahl, Rawls, Habermas, Dworkin, Riker, and Schumpeter, as well as constitutional cases.

*5 units, not given this year*

**PHIL 376. Agency and Personal Identity**

How philosophical theories of agency interact with philosophical accounts of personal identity. Readings include David Velleman and Harry Frankfurt.

*4 units, not given this year*

**PHIL 377. Rational and Social Agency**

(Same as POLISCI 333) Contemporary discussions of practical reason, individual rational agency, planning agency, diachronic agency, intention, belief, intentional action, shared agency, identification and self-governance. Tentative list of authors whose work will be studied includes: Michael Bratman, Margaret Gilbert, Richard Holton, Christine Korsgaard, Alfred Mele, Kieran Setiya, Scott Shapiro, Michael Smith, David Velleman, Jay Wallace, and Gary Watson.

*2-4 units, Win (Bratman, M)*

**PHIL 378. Amartya Sen's capability theory**

(Same as POLISCI 436R) Amartya Sen's pioneering work attempts to open up economics to missing informational and evaluative dimensions. This seminar will explore Sen's capability approach and its implications for the study of economics, gender, and justice. It will look at different ways that the capability approach has been developed, in particular, by Martha Nussbaum, but also by other political philosophers.

*2-4 units, not given this year*

**PHIL 379. Graduate Seminar in Metaethics**

Theories about the meaning of ethical terms and the content of ethical judgements. Do these theories fit with best accounts of human agency and practical deliberation? Readings from recent literature. Prerequisites: 173B/273B, 181, 187/287 or equivalent.

*2-4 units, Spr (Hussain, N)*

**PHIL 380. Core Seminar in Metaphysics and Epistemology**

Limited to first- and second-year students in the Philosophy Ph.D. program.

*4 units, not given this year*

**PHIL 381. Core Seminar in Philosophy of Language**

Limited to first- and second-year students in the Philosophy Ph.D. program.

*4 units, not given this year*

**PHIL 382. Seminar on Reference**

Philosophical issues concerning the relationship between linguistic expressions and the objects to which they refer. Is it possible to get one unified theory of reference for different kinds of referring expressions such as proper names, pronouns, demonstratives, and other kinds of indexicals? Unsolved problems and desiderata for a theory of reference?

*4 units, not given this year*

**PHIL 382A. Pragmatics and Reference**

Grice's theory of conversational implicatures, Relevance Theory and other contemporary pragmatic theories, focusing on issues involving singular reference, pragmatic intrusion, and the

semantics - pragmatics interface. Throughout the seminar will be developing the approach Kapa Korta and Perry call critical pragmatics.

*4 units, not given this year*

**PHIL 383. Philosophy of Mind Seminar**

May be repeated for credit.

*2-4 units, not given this year*

**PHIL 383B. What's an Inference?**

Fundamental issues in epistemology, philosophy of mind and language issues relating to the notion (or rather, notions) of an inference. What's inferential justification? What's an inferential reasoning process? What are inference rules and what distinguishes a good rule of inference from a bad rule? Subtopics to be discussed include: the problem of mental causation, the distinction between personal and subpersonal levels of explanation, preservation of content and warrant, the epistemic support relation, and time permitting the nature of perceptual justification.

*4 units, Win (Staff)*

**PHIL 384. Seminar in Metaphysics and Epistemology**

May be repeated for credit.

*4 units, not given this year*

**PHIL 385. Pragmatics and Reference**

Problems about reference have played a large role in the philosophy of language since the days of Frege and Russell. An approach to reference from the point of view of pragmatics, that Kapa Korta and John Perry have developed in their book CRITICAL PRAGMATICS. Rely on ideas from John Perry's book REFERENCE AND REFLEXIVITY. Also look at other approaches to reference, and to pragmatics.

*2-4 units, not given this year*

**PHIL 385B. Topics in Metaphysics and Epistemology:**

**Vagueness**

Contemporary proposals for how and whether to explain and accommodate vagueness in reality and in representation. Theories of mental and linguistic representation that struggle to explain imprecise representation, and metaphysical theories of the ultimate structure of reality that are threatened with incoherence if worldly boundaries are vague. May be repeated for credit.

*4 units, not given this year*

**PHIL 385C. Topics in Philosophy of Language: The Frege-Russell Problems**

Explore various approaches to the difficulties for semantic theories raised by the behavior of propositional attitude sentences. How, if Superman and Clark are the same person, can Lois have different beliefs about them? Classic treatments of the issues including Frege, Russell, Quine, Davidson, and Kripke. Contemporary debates about the most promising approaches, including naive Russellianism and unarticulated constituent accounts.

*2-4 units, not given this year*

**PHIL 385D. Topics in Philosophy of Language**

*4 units, Spr (Crimmins, M)*

**PHIL 385M. The Metaphysics of Meaning**

One central project in the philosophy of language is to explain the relationships between paradigmatically semantic phenomena like meaning, truth, and reference (as well as entailment, satisfaction, application, and others). Often the pursuit of this project generates orders of explanation in which some notions are privileged as more fundamental than others, in what is arguably a metaphysical sense of the expression. The dominant order of explanation in both philosophical and linguistic semantics seems to be Referentialism, according to which word/world relationships like reference and application are taken to be more fundamental than sentential truth or meaning. (Think: correspondence theory + model-theoretic semantics.) Alternatives to the orthodoxy include certain versions of conceptual-role semantics, Brandom's inferentialism, and Horwich's use theory of meaning. The aims of this seminar will be to acquaint ourselves with these and other going concerns in the theory of meaning,

*2-4 units, not given this year*

**PHIL 385R. Metaphysics of Reference**

*4 units, Win (Taylor, K)*

**PHIL 386B. Husserl and Adam Smith**

Readings from Husserl and others in the phenomenological tradition, and recent work on intentionality and consciousness by philosophers and cognitive scientists.

4 units, not given this year

**PHIL 386C. Subjectivity**

Continuation of 386B.

4 units, not given this year

**PHIL 387. Practical Rationality**

Contemporary research on practical reason, practical rationality and reasons for action. May be repeated for credit

2-4 units, not given this year

**PHIL 387C. Consistency and Coherence**

Some philosophers think that attitudes like belief and intention are subject to consistency and coherence requirements. Are there such general purpose cogency requirements on attitudes? If so, what is their nature and strength? What grounds these requirements; for instance, does the point or purpose of a belief or an intention ground consistency and coherence requirements on that attitude? How are such requirements on belief related to requirements on intention? How does the answer to such questions bear on understanding of the interrelations between theoretical and practical rationality?

2-4 units, not given this year

**PHIL 387S. Practical Reasons and Practical Reasoning**

Attempts to develop alternatives to Humean, instrumentalist conceptions of practical reasoning, and alternatives to Humean, non-cognitivist views of practical reasons. Readings include Aurel Kolnai, Bernard Williams, David Wiggins, Joseph Raz, Michael Bratman, Elijah Millgram, and T.M. Scanlon.

4 units, not given this year

**PHIL 388. Normativity**

May be repeated for credit.

2-4 units, not given this year

**PHIL 389. Advanced Topics in Epistemology**

Skepticism and contextualism, epistemic closure, and problems generated by closure.

3-5 units, Aut (Lawlor, K)

**PHIL 391. Research Seminar in Logic and the Foundations of Mathematics**

(Same as MATH 391) Contemporary work. May be repeated a total of three times for credit.

1-3 units, Aut (Mints, G; Feferman, S), Win (Mints, G; Feferman, S), Spr (Mints, G; Feferman, S)

**PHIL 450. Thesis**

(Staff)

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PHIL 470. Proseminar in Moral Psychology**

Restricted to Philosophy doctoral students. May be repeated for credit.

4 units, not given this year

**PHIL 500. Advanced Dissertation Seminar**

Presentation of dissertation work in progress by seminar participants. May be repeated for credit.

1 unit, Aut (Hills, D), Win (Hills, D), Spr (Hills, D)

**PHIL 801. TGR Project**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PHIL 802. TGR Dissertation**

(Staff)

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## PHYSICS (PHYSICS) COURSES

### UNDERGRADUATE COURSES IN PHYSICS

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**PHYSICS 15. The Nature of the Universe**

The structure, origin, and evolution of the major components of the Universe: planets, stars, and galaxies. Emphasis is on the

formation of the Sun and planets, the evolution of stars, and the structure and content of the Milky Way galaxy. Topics: cosmic enigmas (dark matter, black holes, pulsars, x-ray sources), star birth and death, and the origins of and search for life in the solar system and beyond. GER: DB-NatSci

3 units, Aut (Madejski, G), Sum (Staff)

**PHYSICS 16. Cosmic Horizons**

The origin and evolution of the universe and its contents: stars, galaxies, quasars. The overall structure of the cosmos and the physical laws that govern matter, space, and time. Topics include the evolution of the cosmos from the origin of the elements and the formation of stars and galaxies, exotic astronomical objects (black holes, quasars, supernovae, and gamma ray bursts), dark matter, inflationary cosmology, and the fate of the cosmos. GER: DB-NatSci

3 units, Win (Allen, S)

**PHYSICS 17. Black Holes**

Newton's and Einstein's theories of gravitation and their relationship to the predicted properties of black holes. Their formation and detection, and role in galaxies and high-energy jets. Hawking radiation and aspects of quantum gravity. GER: DB-NatSci

3 units, Spr (Michelson, P)

**PHYSICS 18N. Revolution in Concepts of the Cosmos**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The evolution of concepts of the cosmos and its origin, from the Copernican heliocentric model to the current view based on Hubble's discovery of expansion of the Universe. Recent cosmological observations and the relevance of laboratory experiments in particle physics. One night of observations at the Stanford Observatory. GER: DB-NatSci

3 units, Win (Roodman, A)

**PHYSICS 19. How Things Work: An Introduction to Physics**

Introduction to the principles of physics through familiar objects and phenomena, including airplanes, cameras, computers, engines, refrigerators, lighting, radio, microwave ovens, and fluorescent lights. Estimates of real quantities from simple calculations. Prerequisite: high school algebra and trigonometry. GER: DB-NatSci

3 units, Aut (Church, S)

**PHYSICS 21. Mechanics and Heat**

For biology, social science, and premedical students. Introduction to Newtonian mechanics, fluid mechanics, theory of heat. Prerequisite: high school algebra and trigonometry; calculus not required. GER: DB-NatSci

3 units, Aut (Michelson, P)

**PHYSICS 21S. Mechanics and Heat w/ laboratory**

Equivalent to 21 and 22. GER: DB-NatSci

4 units, Sum (Staff)

**PHYSICS 22. Mechanics and Heat Laboratory**

Guided hands-on exploration of concepts in classical mechanics and thermodynamics with an emphasis on student predictions, observations and explanations. Pre- or corequisite: 21.

1 unit, Aut (Michelson, P)

**PHYSICS 23. Electricity and Optics**

Electric charges and currents, magnetism, induced currents; wave motion, interference, diffraction, geometrical optics. Prerequisite: 21. GER: DB-NatSci

3 units, Win (Manoharan, H)

**PHYSICS 24. Electricity and Optics Laboratory**

Guided hands-on exploration of concepts in electricity and magnetism, circuits and optics with an emphasis on student predictions, observations and explanations. Introduction to multimeters and oscilloscopes. Pre- or corequisite: 23.

1 unit, Win (Manoharan, H)

**PHYSICS 25. Modern Physics**

Introduction to modern physics. Relativity, quantum mechanics, atomic theory, radioactivity, nuclear reactions, nuclear structure, high energy physics, elementary particles, astrophysics, stellar evolution, and the big bang. Prerequisite: 23 or consent of instructor. GER: DB-NatSci

3 units, Spr (Linde, A)

**PHYSICS 25S. Modern Physics with Laboratory**

Equivalent to 25 and 26. GER: DB-NatSci

*4 units, Sum (Staff)***PHYSICS 26. Modern Physics Laboratory**

Guided hands-on and simulation-based exploration of concepts in modern physics, including special relativity, quantum mechanics and nuclear physics with an emphasis on student predictions, observations and explanations. Pre- or corequisite: 25.

*1 unit, Spr (Linde, A)***PHYSICS 28. Mechanics, Heat, and Electricity**

For biology, social science, and premedical students. The sequence 28 and 29 fulfills, in ten weeks, the one-year college physics requirement with lab of most medical schools. Topics: Newtonian mechanics, fluid mechanics, theory of heat, electric charges, and currents. Calculus is used as a language and developed as needed. Prerequisite: high school algebra and trigonometry. GER: DB-NatSci

*6 units, Sum (Staff)***PHYSICS 29. Electricity and Magnetism, Optics, Modern Physics**

Magnetism, induced currents; wave motion, optics; relativity, quantum mechanics, atomic theory, radioactivity, nuclear structure and reactions, elementary particles, astrophysics, and cosmology. Prerequisite: 28. GER: DB-NatSci

*6 units, Sum (Staff)***PHYSICS 41. Mechanics**

Vectors, particle kinematics and dynamics, work, energy, momentum, angular momentum; conservation laws; rigid bodies; mechanical oscillations and waves. Discussions based on use of calculus. Prerequisite: High school physics or PHYSICS 19. MATH 19 or 41 or equivalent. Corequisite: MATH 20 or 42 or 51. GER: DB-NatSci

*4 units, Win (Burchat, P)***PHYSICS 41A. Mechanics Concepts, Calculations, and Context**

Additional assistance and applications for PHYSICS 41. In-class problems in physics and engineering. Exercises in the concepts and calculations of vectors, translational and rotational velocity and acceleration, equations of motion for particles and rigid bodies, and principles of energy and linear/angular momentum. In-class participation required. Limited enrollment.

*1 unit, Win (Mitiguy, P)***PHYSICS 41N. Mechanics: Insights, Applications, and Advances**

Preference to freshman. Additional topics for students in PHYSICS 41 such as tidal forces, gyroscopic effects, fractal dimensions, and chaos. Corequisite: 41 or advanced placement.

*1 unit, not given this year***PHYSICS 42. Classical Mechanics Laboratory**

Hand-on exploration of concepts in classical mechanics: Newton's laws, conservation laws, rotational motion. Introduction to laboratory techniques, experimental equipment and data analysis. Pre- or corequisite: 41

*1 unit, Win (Burchat, P)***PHYSICS 43. Electricity and Magnetism**

Electrostatics, Coulomb's law, electric fields and fluxes, electric potential, properties of conductors, Gauss's law, capacitors and resistors, DC circuits; magnetic forces and fields, Biot-Savart law, Faraday's law, Ampere's law, inductors, transformers, AC circuits, motors and generators, electric power, Galilean transformation of electric and magnetic fields, Maxwell's equations; limited coverage of electromagnetic fields and special relativity. Prerequisite: PHYSICS 41 or equivalent. MATH 20 or 42 or 51 or equivalent. Recommended corequisite: Math 52. GER: DB-NatSci

*4 units, Spr (Fisher, I)***PHYSICS 43N. Understanding Electromagnetic Phenomena**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Expands on the material presented in 43; applications of concepts in electricity and magnetism to everyday phenomena and to topics in current physics research. Corequisite: 43 or advanced placement.

*1 unit, Spr (Cabrera, B)***PHYSICS 44. Electricity and Magnetism Lab**

Hands-on exploration of concepts in electricity and magnetism and circuits. Introduction to multimeters, function generators, oscilloscopes, and graphing techniques. Pre- or corequisite: 43.

*1 unit, Spr (Fisher, I)***PHYSICS 45. Light and Heat**

Reflection and refraction, lenses and lens systems; polarization, interference, and diffraction; temperature, properties of matter and thermodynamics, introduction to kinetic theory of matter. Prerequisites: PHYSICS 41 or equivalent. MATH 20 or 42 or 51 or equivalent. GER: DB-NatSci

*4 units, Aut (Gratta, G), Sum (Staff)***PHYSICS 45N. Advanced Topics in Light and Heat**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Expands on the subject matter presented in 45 to include optics and thermodynamics in everyday life, and applications from modern physics and astrophysics. Corequisite: 45 or advanced placement.

*1 unit, Aut (Romani, R)***PHYSICS 46. Light and Heat Laboratory**

Hands-on exploration of concepts in geometrical optics, wave optics and thermodynamics. Pre- or corequisite: 45.

*1 unit, Aut (Gratta, G), Sum (Staff)***PHYSICS 50. Astronomy Laboratory and Observational Astronomy**

Introduction to observational astronomy emphasizing the use of optical telescopes. Observations of stars, nebulae, and galaxies in laboratory sessions with 16- and 24-inch telescopes at the Stanford Observatory. Meets one evening per week from dusk until well after dark at the Stanford Observatory. No previous physics required. Limited enrollment. Lab. GER: DB-NatSci

*3 units, Aut (Cabrera, B), Sum (Staff)***PHYSICS 59. Current Research Topics**

Recommended for prospective Physics majors. Presentations of current research topics by faculty with research interests related to physics, often including tours of experimental laboratories where the research is conducted.

*1 unit, Aut (Raghu, S)***PHYSICS 61. Mechanics and Special Relativity**

(First in a three-part series: 61, 63, 65.) Advanced freshman physics. For students with a strong high school mathematics and physics background contemplating a major in Physics or interested in a rigorous treatment of physics. Special theory of relativity and Newtonian mechanics with multi-variable calculus. Postulates of special relativity, simultaneity, time dilation, length contraction, the Lorentz transformation, causality, and relativistic mechanics. Central forces, contact forces, linear restoring forces. Momentum transport, work, energy, collisions. Angular momentum, torque, moment of inertia in three dimensions. Damped and forced harmonic oscillators. Recommended prerequisites: Mastery of mechanics at the level of AP Physics C and AP Calculus B/C or equivalent. Recommended corequisite: MATH 51. GER: DB-NatSci

*4 units, Aut (Susskind, L)***PHYSICS 62. Classical Mechanics Laboratory**

Introduction to laboratory techniques, experiment design, data collection and analysis simulations, and correlating observations with theory. Labs emphasize discovery with open-ended questions and hands-on exploration of concepts developed in PHYSICS 61 including Newton's laws, conservation laws, rotational motion. Pre- or corequisite 61

*1 unit, Aut (Susskind, L)***PHYSICS 63. Electricity, Magnetism, and Waves**

(Second in a three-part series: 61, 63, 65.) Advanced freshman physics. For students with a strong high school mathematics and physics background contemplating a major in Physics or interested in a rigorous treatment of physics. Electricity, magnetism and waves with some description of optics. Electrostatics and Gauss' law. Electric potential, electric field, conductors, image charges. Other theorems of vector calculus. Electric currents, DC circuits. Moving charges, magnetic field, Ampere's law. Solenoids, transformers, induction, AC circuits, resonance. Relativistic point of view for moving charges. Displacement current, Maxwell's equations. Electromagnetic waves, dielectrics. Diffraction, interference, refraction, reflection, polarization. Prerequisite:

PHYSICS 61 and MATH 51; Pre- or corequisite: MATH 52. GER: DB-NatSci

4 units, Win (Graham, P)

**PHYSICS 64. Electricity, Magnetism and Optics Laboratory**

Introduction to multimeters, breadboards, function generators and oscilloscopes. Emphasis on student-developed design of experimental procedure and data analysis for topics covered in PHYSICS 63: electricity, magnetism, circuits, and optics. Pre- or corequisite: 63

1 unit, Win (Graham, P)

**PHYSICS 65. Quantum and Thermal Physics**

(Third in a three-part series: 61, 63, 65.) Advanced freshman physics. For students with a strong high school mathematics and physics background contemplating a major in Physics or interested in a rigorous treatment of physics. Introduction to quantum mechanics: matter waves, atomic structure, Schrödinger's equation. Thermodynamics and statistical mechanics: entropy and heat, Boltzmann statistics, quantum statistics. Prerequisites: PHYSICS 61 & 63. Pre- or corequisite: MATH 53. GER: DB-NatSci

4 units, Spr (Romani, R)

**PHYSICS 67. Introduction to Laboratory Physics**

Methods of experimental design, data collection and analysis, statistics, and curve fitting in a laboratory setting. Experiments drawn from electronics, optics, heat, and modern physics. Lecture plus laboratory format. Required for 60 series Physics and Engineering Physics majors; recommended, in place of PHYSICS 44, for 40 series students who intend to major in Physics or Engineering Physics. Pre- or corequisite: 65 or 43.

2 units, Spr (Pam, R)

**PHYSICS 70. Foundations of Modern Physics**

Required for Physics majors who completed the 40 series, or the PHYSICS 60 series prior to 2005-06. Special relativity, the experimental basis of quantum theory, atomic structure, quantization of light, matter waves, Schrödinger equation. Prerequisites: 41, 43. Corequisite: 45. Recommended: prior or concurrent registration in MATH 53. GER: DB-NatSci

4 units, Aut (Kasevich, M)

**PHYSICS 70N. Modern Physics in Your Life**

(S,Sem) Stanford Introductory Seminar. How does modern physics intersect with your everyday life? Topics may include the quantum nature of light, atomic physics and an introduction to semiconductor physics, applications to light sources (incandescent, fluorescent, light-emitting diodes, lasers) and light sensors (photodiodes and solar cells), introduction to nuclear physics (e.g., fission, fusion, interaction of radiation with matter). Co- or pre-requisite: Physics 70, Physics 65, or similar high-school physics preparation.

1 unit, Aut (Raghu, S)

**PHYSICS 80N. The Technical Aspects of Photography**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen and sophomores with some background in photography. How cameras record photographic images on film and electronically. Technical photographic processes to use cameras effectively. Camera types and their advantages, how lenses work and their limitations, camera shutters, light meters and the proper exposure of film, film types, depth of focus, control of the focal plane and perspective, and special strategies for macro and night photography. View cameras and range finder technical cameras. Students take photographs around campus. Prerequisite: high school physics.

3 units, Spr (Osheroff, D)

**PHYSICS 83N. Physics in the 21st Century**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Current topics at the frontier of modern physics. Topics include subatomic particles and the standard model, symmetries in nature, extra dimensions of space, string theory, supersymmetry, the big bang theory of the origin of the universe, black holes, dark matter, and dark energy of the universe. Why the sun shines. Cosmology and inflation. GER: DB-NatSci

3 units, Aut (Kallosh, R)

**PHYSICS 87N. The Physics of One: Nanoscale Science and Technology**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Contemporary interdisciplinary research in nanoscience and

nanotechnology; the manipulation of nature's fundamental building blocks. Accomplishments and questions engendered by knowledge at the discrete limit of matter. Prerequisite: high school physics. GER: DB-NatSci

3 units, Spr (Goldhaber-Gordon, D)

**PHYSICS 91SI. PRACTICAL COMPUTING FOR SCIENTISTS**

Essential tools for researchers in the natural sciences. Helping students transition their computing skills from a classroom to a research environment. Topics include UNIX command line scripting, the Python programming language, version control with Mercurial, unit tests, data analysis and regular expressions, with more advanced topics as time allows. We will assume some experience with programming at the CS106A level or equivalent. Enrollment limited.

2 units, ONCEONLY

**PHYSICS 92SI. Physics of the Circus**

Investigate the physics behind circus acts including juggling, unicycling, tightrope walking and slacklining, trapeze swinging, cigar boxes, and diabolo. In addition to learning the math and mechanics behind these arts, students will learn the arts themselves, and for a final project will choose one art to practice and eventually present to the rest of the class. The course seeks to give students an appreciation of the circus from both a physics perspective and firsthand experience

2 units, ONCEONLY

**PHYSICS 100. Introduction to Observational and Laboratory Astronomy**

Designed for undergraduate physics majors but open to all students with a calculus-based physics background and some laboratory experience. Students make and analyse observations using telescopes at the Stanford Student Observatory. Topics include navigating the night sky, the physics of stars and galaxies, telescope instrumentation and operation, quantitative error analysis, and effective scientific communication. Limited enrollment. Prerequisites: prior completion of Physics 40 or 60 series. GER: DB-NatSci

4 units, Spr (Allen, S)

**PHYSICS 105. Intermediate Physics Laboratory I: Analog Electronics**

Analog electronics including Ohm's law, passive circuits and transistor and op amp circuits, emphasizing practical circuit design skills to prepare undergraduates for laboratory research. Short design project. Minimal use of math and physics, no electronics experience assumed beyond introductory physics. Prerequisite: PHYSICS 43 or 63.

3 units, Aut (Pam, R)

**PHYSICS 107. Intermediate Physics Laboratory II: Experimental Techniques and Data Analysis**

Experiments on lasers, Gaussian optics, and atom-light interaction, with emphasis on data and error analysis techniques. Students describe a subset of experiments in scientific paper format. Prerequisites: completion of 40 or 60 series, and 70 and 105. Recommended: 130, prior or concurrent enrollment in 120. WIM

4 units, Win (Kasevich, M)

**PHYSICS 108. Advanced Physics Laboratory: Project**

Small student groups plan, design, build, and carry out a single experimental project in low-temperature physics. Prerequisites 105, 107.

4 units, Win (Osheroff, D), Spr (Kuo, C)

**PHYSICS 110. Intermediate Mechanics**

Lagrangian and Hamiltonian mechanics. Principle of least action, Galilean relativity, Lagrangian mechanical systems, Euler-Lagrange equations. Central potential, Kepler's problem, planetary motion. Scattering problems, disintegration, Rutherford scattering cross section. Harmonic motion in the presence of rapidly oscillating field. Poisson's brackets, canonical transformations, Liouville's theorem, Hamilton-Jacoby equation. Prerequisites: 41 or 61, and MATH 53

4 units, Spr (Gratta, G)

**PHYSICS 112. Mathematical Methods of Physics**

Theory of complex variables, complex functions, and complex analysis. Fourier series and Fourier transforms. Special functions such as Laguerre, Legendre, and Hermite polynomials, and Bessel

functions. The uses of Green's functions. Covers material of MATH 106 and 132 most pertinent to Physics majors. Prerequisites: MATH 50 or 50H series, and MATH 131P or MATH 173.

4 units, Win (Kallosh, R)

### PHYSICS 113. Computational Physics

Numerical methods for solving problems in mechanics, electromagnetism, quantum mechanics, and statistical mechanics. Methods include numerical integration; solutions of ordinary and partial differential equations; solutions of the diffusion equation, Laplace's equation and Poisson's equation with relaxation methods; statistical methods including Monte Carlo techniques; matrix methods and eigenvalue problems. Short introduction to MatLab, used for class examples; class projects may be programmed in any language such as C. Prerequisites: MATH 53, prior or concurrent registration in 120. Previous programming experience not required. GER: DB-NatSci

4 units, Win (Franklin, J)

### PHYSICS 120. Intermediate Electricity and Magnetism I

(First in a two-part series: 120,121.) Vector analysis. Electrostatic fields, including boundary-value problems and multipole expansion. Dielectrics, static and variable magnetic fields, magnetic materials. Maxwell's equations. Prerequisites: PHYSICS 43 or 63; MATH 52 and 53. Pre- or corequisite: MATH 131P or MATH 173. Recommended corequisite: PHYSICS 112.

4 units, Win (Kahn, S)

### PHYSICS 121. Intermediate Electricity and Magnetism

(Second in a two-part series: 120,121.) Conservation laws and electromagnetic waves, Poynting's theorem, tensor formulation, potentials and fields. Plane wave problems (free space, conductors and dielectric materials, boundaries). Dipole and quadrupole radiation. Special relativity and transformation between electric and magnetic fields. Prerequisites: PHYSICS 120 and MATH 131P or MATH 173; Recommended: PHYSICS 112.

4 units, Spr (Hewett, J)

### PHYSICS 130. Quantum Mechanics

(First in a two part series: 130,131.) The origins of quantum mechanics and wave mechanics. Schrödinger equation and solutions for one-dimensional systems. Commutation relations. Generalized uncertainty principle. Time-energy uncertainty principle. Separation of variables and solutions for three-dimensional systems, application to hydrogen atom. Spherically symmetric potentials and angular momentum eigenstates. Spin angular momentum. Prerequisites: PHYSICS 65 or 70, and 110. Pre- or corequisites: PHYSICS 120, 121, and MATH 131P or MATH 173.

4 units, Aut (Burchat, P)

### PHYSICS 131. Quantum Mechanics II

(Second in a two-part series: 130,131.) Addition of angular momentum. Identical particles; Fermi and Bose statistics. Time-independent perturbation theory. Fine structure, the Zeeman effect and hyperfine splitting in the hydrogen atom. Variational principle. Prerequisite: PHYSICS 130. Pre- or corequisites: PHYSICS 120, 121, and MATH 131P or MATH 173.

4 units, Win (Blandford, R)

### PHYSICS 134. Advanced Topics in Quantum Mechanics

Time-dependent perturbation theory. Scattering theory, partial wave expansion, Born approximation. Additional topics may include WKB approximation; structure of multi-electron atoms (Hartree-Fock); nature of quantum measurement, EPR paradox and Bell's inequality; relativistic quantum mechanics (Dirac equation); quantum information science. Prerequisites: PHYSICS 130, 131.

4 units, Spr (Peskin, M)

### PHYSICS 150. Physics of the Cell Phone

(Same as PHYSICS 250) This course surveys the physics involved in present-day high technology, as prototyped by a common cell phone. Specific technical topics covered include semiconduction, optical sensing, organic optics, flash memory, light-emitting diodes, twisted liquid crystals, mechanical transducers, radio detection and transmission, and Li-ion batteries. This is fundamentally a writing course. Its chief requirement is the delivery of two short written reports on topics chosen by students and released by them for use on the Internet. Examples of such reports may be found at

<http://large.stanford.edu/courses/2010/ph240>. The material is designed to be broadly accessible. Students outside physics are encouraged to enroll, as are undergraduates. There are no formal prerequisites. A strong background in undergraduate-level quantum mechanics, electromagnetism and statistical mechanics is desirable, and some familiarity with solid state physics is also helpful.

3 units, Spr (Laughlin, R)

### PHYSICS 152A. Introduction to Particle Physics I

(Same as PHYSICS 252A) Elementary particles and the fundamental forces. Quarks and leptons. The mediators of the electromagnetic, weak and strong interactions. Interaction of particles with matter; particle acceleration, and detection techniques. Symmetries and conservation laws. Bound states. Decay rates. Cross sections. Feynman diagrams. Introduction to Feynman integrals. The Dirac equation. Feynman rules for quantum electrodynamics and for chromodynamics. Prerequisite: 130. Pre- or corequisite: 131.

3 units, Spr (Dimopoulos, S)

### PHYSICS 152B. Introduction to Particle Physics II

(Same as PHYSICS 252B) Discoveries and observations in experimental particle physics and relation to theoretical developments. Asymptotic freedom. Charged and neutral weak interactions. Electroweak unification. Weak isospin. Gauge theories, spontaneous symmetry breaking and the Higgs mechanism. Quark and lepton mixing. CP violation. Neutrino oscillations. Prerequisites: 152 or 152A, 130, 131.

3 units, not given this year

### PHYSICS 153A. Introduction to String Theory, Quantum Gravity, and Black Holes

This course will begin with a basic introduction to the physics and mathematics of string theory and its relation to gravity. Following that we will study the quantum mechanics of black holes, and how string theory has impacted our understanding of these extreme gravitational objects. Prerequisites: 130 and 131.

4 units, Win (Susskind, L)

### PHYSICS 160. Introduction to Stellar and Galactic Astrophysics

Observed characteristics of stars and the Milky Way galaxy. Physical processes in stars and matter under extreme conditions. Structure and evolution of stars from birth to death. White dwarfs, planetary nebulae, supernovae, neutron stars, pulsars, binary stars, x-ray stars, and black holes. Galactic structure, interstellar medium, molecular clouds, HI and HII regions, star formation, and element abundances. Prerequisites: 40 or 60 series, and 70.

3 units, Win (Romani, R)

### PHYSICS 161. Introduction to Extragalactic Astrophysics and Cosmology

Observations of the distances and compositions of objects on cosmic scales: galaxies, galaxy clusters, quasars, and diffuse matter at high red shift. Big bang cosmology, physical processes in the early universe, the origin of matter and the elements, inflation, and creation of structure in the Universe. Observational evidence for dark matter and dark energy. Future of the Universe. Prerequisites: calculus and college physics at the level of the 40 or 60 series, and 70.

3 units, Spr (Church, S)

### PHYSICS 169A. Independent Study in Astrophysics and Honors Thesis: Selection of the Problem

Description of the problem, its background, work planned in the subsequent two quarters, and development of the theoretical apparatus or initial interpretation of the problem.

1-9 units, Aut (Staff)

### PHYSICS 169B. Independent Study in Astrophysics and Honors Thesis: Continuation of Project

Substantial completion of the required computations or data analysis for the research project selected.

1-9 units, Win (Staff)

### PHYSICS 169C. Independent Study in Astrophysics and Honors Thesis: Completion of Project

Completion of research and writing of a paper presenting methods used and results.

1-9 units, Spr (Staff)

**PHYSICS 170. Thermodynamics, Kinetic Theory, and Statistical Mechanics I**

(First in a two-part series: 170,171.) Basic probability and statistics for random processes such as random walks. The derivation of laws of thermodynamics from basic postulates; the determination of the relationship between atomic substructure and macroscopic behavior of matter. Temperature; equations of state, heat, internal energy, equipartition; entropy, Gibbs paradox; equilibrium and reversibility, heat engines; applications to various properties of matter; absolute zero and low temperature phenomena. Distribution functions, fluctuations, the partition function for classical and quantum systems, irreversible processes. Pre- or corequisite: PHYSICS 130.

4 units, Aut (Kivelson, S)

**PHYSICS 171. Thermodynamics, Kinetic Theory, and Statistical Mechanics II**

(Second in a two-part series: 170,171.) Maxwell-Boltzmann distribution, Debye model and phonons. Transport phenomena, fluctuations, equilibrium between phases, phase changes, Bose-Einstein condensation, and the electron gas. Cooperative phenomena including ferromagnetism, the Ising model, and lattice gas. Irreversible processes. Prerequisite: PHYSICS 170. Pre- or corequisite: PHYSICS 131.

4 units, Win (Zhang, S)

**PHYSICS 172. Solid State Physics**

(Same as APPPHYS 272) Introduction to the properties of solids. Crystal structures and bonding in materials. Momentum-space analysis and diffraction probes. Lattice dynamics, phonon theory and measurements, thermal properties. Electronic structure theory, classical and quantum; free, nearly-free, and tight-binding limits. Electron dynamics and basic transport properties; quantum oscillations. Properties and applications of semiconductors. Reduced-dimensional systems. Undergraduates should register for PHYSICS 172 and graduate students for APPPHYS 272. Prerequisites: PHYSICS 170 and 171, or equivalents.

3 units, Spr (Manoharan, H; Hwang, H)

**PHYSICS 190. Independent Research and Study**

Undergraduate research in experimental or theoretical physics under the supervision of a faculty member. Prerequisites: superior work as an undergraduate Physics major and consent of instructor.

1-9 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PHYSICS 204A. Seminar in Theoretical Physics**

This course plans to give a basic introduction to topological insulators and superconductors. Graduates students and postdocs are welcome to attend the class. The course materials will be based on a recent review article on the subject by Qi and Zhang, to be published in Review of Modern Physics. Basic knowledge in quantum mechanics and solid state physics is required. Prerequisites: 130, 172.

3 units, Win (Zhang, S)

**PHYSICS 204B. Seminar in Theoretical Physics**

Topics including quantum computing, Berry phase, and quantum Hall effect. May be repeated for credit.

3 units, Win (Doniach, S)

**PHYSICS 205. Senior Thesis Research**

Long-term experimental or theoretical project and thesis in Physics under supervision of a faculty member. Planning of the thesis project is recommended to begin as early as middle of the junior year. Successful completion of a senior thesis requires a minimum of 3 units for a letter grade completed during the senior year, along with the other formal thesis and physics major requirements. Students doing research for credit prior to senior year should sign up for Physics 190. Prerequisites: superior work as an undergraduate Physics major and approval of the thesis application.

1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**GRADUATE COURSES IN PHYSICS**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**PHYSICS 210. Advanced Particle Mechanics**

The Lagrangian and Hamiltonian dynamics of particles. Beyond small oscillations. Phase portraits, Hamilton-Jacobi theory, action-

angle variables, adiabatic invariance. Nonlinear dynamical systems, continuous and discrete. Behavior near the fixed points, stability of solutions, attractors, chaotic motion. Transition to continuum mechanics. Prerequisite: 110 or equivalent.

3 units, Aut (Goldhaber-Gordon, D)

**PHYSICS 211. Continuum Mechanics**

Elasticity, fluids, turbulence, waves, gas dynamics, shocks, and MHD plasmas. Examples from everyday phenomena, geophysics, and astrophysics.

3 units, Win (Abel, T)

**PHYSICS 212. Statistical Mechanics**

Principles, ensembles, statistical equilibrium. Thermodynamic functions, ideal and near-ideal gases. Fluctuations. Mean-field description of phase-transitions and associated critical exponents. One-dimensional Ising model and other exact solutions. Renormalization and scaling relations. Prerequisites: 130, 131, 171, or equivalents.

3 units, Spr (Kivelson, S)

**PHYSICS 216. Back of the Envelope Physics**

Techniques such as scaling and dimensional analysis, useful to make order-of-magnitude estimates of physical effects in different settings. Goals are to promote a synthesis of physics through solving problems, some not included in a standard curriculum. Applications include properties of materials, fluid mechanics, geophysics, astrophysics, and cosmology. Prerequisites: undergraduate mechanics, statistical mechanics, electricity and magnetism, and quantum mechanics.

3 units, Aut (Blandford, R)

**PHYSICS 220. Classical Electrodynamics I**

Special relativity: The principles of relativity, Lorentz transformations, four vectors and tensors, relativistic mechanics and the principle of least action. Lagrangian formulation, charges in electromagnetic fields, gauge invariance, the electromagnetic field tensor, covariant equations of electrodynamics and mechanics, four-current and continuity equation. Noether's theorem and conservation laws, Poynting's theorem, stress-energy tensor. Constant electromagnetic fields: conductors and dielectrics, magnetic media, electric and magnetic forces, and energy. Electromagnetic waves: Plane and monochromatic waves, spectral resolution, polarization, electromagnetic properties of matter, dispersion relations, wave guides and cavities. Prerequisites: PHYSICS 121 and 210, or equivalent; MATH 106 or 116, and 132 or equivalent.

3 units, Win (Senatore, L)

**PHYSICS 221. Classical Electrodynamics II**

Electromagnetic waves in dielectric and conducting materials, causality and analyticity, negative index of refraction and metamaterials. Waveguides and cavities, nonlinear solitons and optical fibers. Maxwell's equations in fluids: hydromagnetics, bulk and surface plasmons, plasmonics. Non-relativistic radiation: dipole and quadrupole radiation, scattering and diffraction. Spherical solutions for vector wave equation. Energy loss of moving particles in a medium, Cherenkov radiation. Relativistic radiation: Liénard-Wiechert potential, angular and frequency distribution, synchrotron radiation. Prerequisites: PHYSICS 220; MATH 106 or 116, and 132 or equivalent.

3 units, Spr (Senatore, L)

**PHYSICS 230. Quantum Mechanics**

Fundamental concepts. Introduction to Hilbert spaces and Dirac's notation. Postulates applied to simple systems, including those with periodic structure. Symmetry operations and gauge transformation. The path integral formulation of quantum statistical mechanics. Problems related to measurement theory. The quantum theory of angular momenta and central potential problems. Prerequisite: 131 or equivalent.

3 units, Aut (Shenker, S)

**PHYSICS 231. Quantum Mechanics**

Basis for higher level courses on atomic solid state and particle physics. Wigner-Eckart theorem and addition of angular momenta. Approximation methods for time-independent and time-dependent perturbations. Semiclassical and quantum theory of radiation, second quantization of radiation and matter fields. Systems of identical particles and many electron atoms and molecules. Prerequisite: 230.

3 units, Win (Hartnoll, S)

### PHYSICS 232. Quantum Mechanics

Special topics. Elementary excitations in solids (the free electron gas, electronic band structure, phonons). Elementary scattering theory (Born approximation, partial wave analyses, resonance scattering). Relativistic single-particle equations. Dirac equation applied to central potentials, relativistic corrections, and nonrelativistic limits.

3 units, Spr (Shenker, S)

### PHYSICS 240. Introduction to the Physics of Energy

Energy as a consumable. Forms and interconvertability. World joule budget. Equivalents in rivers, oil pipelines and nuclear weapons. Quantum mechanics of fire, batteries and fuel cells. Hydrocarbon and hydrogen synthesis. Fundamental limits to mechanical, electrical and magnetic strengths of materials. Flywheels, capacitors and high pressure tanks. Principles of AC and DC power transmission. Impossibility of pure electricity storage. Surge and peaking. Solar constant. Photovoltaic and thermal solar conversion. Physical limits on agriculture.

3 units, Aut (Laughlin, R)

### PHYSICS 241. Introduction to Nuclear Energy

Radioactivity. Elementary nuclear processes. Energetics of fission and fusion. Cross-sections and resonances. Fissionable and fertile isotopes. Neutron budgets. Light water, heavy water and graphite reactors. World nuclear energy production. World reserves of uranium and thorium. Plutonium, reprocessing and proliferation. Half lives of fission decay products and actinides made by neutron capture. Nuclear waste. Three Mile Island and Chernobyl. Molten sodium breeders. Generation-IV reactors. Inertial confinement and magnetic fusion. Laser compression. Fast neutron production and fission-fusion hybrids. PREREQUISITES: Strong undergraduate background in elementary chemistry and physics. PH240 and PH252A recommended but not required. Interested undergraduates encouraged to enroll, with permission of instructor.

3 units, Win (Laughlin, R)

### PHYSICS 250. Physics of the Cell Phone

(Same as PHYSICS 150) This course surveys the physics involved in present-day high technology, as prototyped by a common cell phone. Specific technical topics covered include semiconductor, optical sensing, organic optics, flash memory, light-emitting diodes, twisted liquid crystals, mechanical transducers, radio detection and transmission, and Li-ion batteries. This is fundamentally a writing course. Its chief requirement is the delivery of two short written reports on topics chosen by students and released by them for use on the Internet. Examples of such reports may be found at <http://large.stanford.edu/courses/2010/ph240>. The material is designed to be broadly accessible. Students outside physics are encouraged to enroll, as are undergraduates. There are no formal prerequisites. A strong background in undergraduate-level quantum mechanics, electromagnetism and statistical mechanics is desirable, and some familiarity with solid state physics is also helpful.

3 units, Spr (Laughlin, R)

### PHYSICS 252A. Introduction to Particle Physics I

(Same as PHYSICS 152A) Elementary particles and the fundamental forces. Quarks and leptons. The mediators of the electromagnetic, weak and strong interactions. Interaction of particles with matter; particle acceleration, and detection techniques. Symmetries and conservation laws. Bound states. Decay rates. Cross sections. Feynman diagrams. Introduction to Feynman integrals. The Dirac equation. Feynman rules for quantum electrodynamics and for chromodynamics. Prerequisite: 130. Pre- or corequisite: 131.

3 units, Spr (Dimopoulos, S)

### PHYSICS 252B. Introduction to Particle Physics II

(Same as PHYSICS 152B) Discoveries and observations in experimental particle physics and relation to theoretical developments. Asymptotic freedom. Charged and neutral weak interactions. Electroweak unification. Weak isospin. Gauge theories, spontaneous symmetry breaking and the Higgs mechanism. Quark and lepton mixing. CP violation. Neutrino oscillations. Prerequisites: 152 or 152A, 130, 131.

3 units, not given this year

### PHYSICS 260. Introduction to Astrophysics and Cosmology

The observed properties and theoretical models of stars, galaxies, and the universe. Physical processes for production of radiation from cosmic sources. Observations of cosmic microwave background radiation. Newtonian and general relativistic models of the universe. Physics of the early universe, nucleosynthesis, baryogenesis, nature of dark matter and dark energy and inflation. Prerequisites: 110, 121, and 171, or equivalents.

3 units, Aut (Petrosian, V)

### PHYSICS 262. Introduction to Gravitation

Introduction to general relativity. Curvature, energy-momentum tensor, Einstein field equations. Weak field limit of general relativity. Black holes, relativistic stars, gravitational waves, cosmology. Prerequisite: 121 or equivalent including special relativity.

3 units, Spr (Kallos, R)

### PHYSICS 275. Electrons in Nanostructures

The behavior of electrons in metals or semiconductors at length scales below 1 micron, smaller than familiar macroscopic objects but larger than atoms. Ballistic transport, Coulomb blockade, localization, quantum mechanical interference, and persistent currents. Topics may include quantum Hall systems, graphen, spin transport, spin-orbit coupling in nanostructures, magnetic tunnel junctions, Kondo systems, and 1-dimensional systems. Readings focus on the experimental research literature, and recent texts and reviews. Prerequisite: undergraduate quantum mechanics and solid state physics.

3 units, Win (Goldhaber-Gordon, D)

### PHYSICS 290. Research Activities at Stanford

Required of first-year Physics graduate students; suggested for junior or senior Physics majors for 1 unit. Review of research activities in the department and elsewhere at Stanford at a level suitable for entering graduate students.

1-3 units, Aut (Abel, T)

### PHYSICS 291. Practical Training

Opportunity for practical training in industrial labs. Arranged by student with the research adviser's approval. A brief summary of activities is required, approved by the research adviser.

3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### PHYSICS 293. Literature of Physics

Study of the literature of any special topic. Preparation, presentation of reports. If taken under the supervision of a faculty member outside the department, approval of the Physics chair required. Prerequisites: 25 units of college physics, consent of instructor.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### PHYSICS 294. Teaching of Physics Seminar

Required of all first-year Physics graduate students, plus other Teaching Assistants who are teaching Physics courses for the first time. Weekly seminar/discussions. Techniques for teaching physics, especially through interactive engagement. Review of Physics Education Research results. Simulated teaching situations. In-class observations and practice teaching.

1 unit, Aut (Pam, R)

### PHYSICS 301. Astrophysics Laboratory

Open to all graduate students with a calculus-based physics background and some laboratory experience. Students make and analyze observations using telescopes at the Stanford Student Observatory. Topics include navigating the night sky, the physics of stars and galaxies, telescope instrumentation and operation, quantitative error analysis, and effective scientific communication. The course also introduces a number of hot topics in astrophysics and cosmology. Limited enrollment.

3 units, not given this year

### PHYSICS 312. Basic Plasma Physics

For the nonspecialist who needs a working knowledge of plasma physics for space science, astrophysics, fusion, or laser applications. Topics: orbit theory, the Boltzmann equation, fluid equations, MHD waves and instabilities, EM waves, the Vlasov theory of ES waves and instabilities including Landau damping and quasilinear theory, the Fokker-Planck equation, and relaxation processes. Advanced topics in resistive instabilities and particle acceleration. Prerequisite: 210 and 220, or consent of instructor.

3 units, Spr (Petrosian, V)

**PHYSICS 321. Laser Spectroscopy**

Theoretical concepts and experimental techniques. Absorption, dispersion, Kramers-Kronig relations, line-shapes. Classical and laser linear spectroscopy. Semiclassical theory of laser atom interaction: time-dependent perturbation theory, density matrix, optical Bloch equations, coherent pulse propagation, multiphoton transitions. High-resolution nonlinear laser spectroscopy: saturation spectroscopy, polarization spectroscopy, two-photon and multiphoton spectroscopy, optical Ramsey spectroscopy. Phase conjugation. Four-wave mixing, harmonic generation. Coherent Raman spectroscopy, quantum beats, ultra-sensitive detection. Prerequisite: 230. Recommended: 231.

3 units, not given this year

**PHYSICS 323. Laser Cooling and Trapping**

Principles of laser cooling and atom trapping. Optical forces on atoms, forms of laser cooling, atom optics and atom interferometry, ultra-cold collisions, and introduction to Bose condensation of dilute gases. Emphasis is on the development of the general formalisms that treat these topics. Applications of the cooling and trapping techniques: atomic clocks, internal sensors, measurements that address high-energy physics questions, many-body effects, polymer science, and biology. Prerequisite: 231 or equivalent.

3 units, not given this year

**PHYSICS 330. Quantum Field Theory**

Quantization of scalar and Dirac fields. Introduction to supersymmetry. Feynman diagrams. Quantum electrodynamics. Elementary electrodynamic processes: Compton scattering; e<sup>+</sup>e<sup>-</sup> annihilation. Loop diagrams and electron (g-2). Prerequisites: 130, 131, or equivalents.

3 units, Aut (Devereaux, T)

**PHYSICS 331. Quantum Field Theory**

Functional integral methods. Local gauge invariance and Yang-Mills fields. Asymptotic freedom. Spontaneous symmetry breaking and the Higgs mechanism. Unified models of weak and electromagnetic interactions. Prerequisite: 330.

3 units, Win (Silverstein, E)

**PHYSICS 332. Quantum Field Theory**

Theory of renormalization. The renormalization group and applications to the theory of phase transitions. Renormalization of Yang-Mills theories. Applications of the renormalization group of quantum chromodynamics. Perturbation theory anomalies. Applications to particle phenomenology. Prerequisite: PHYSICS 330.

3 units, Spr (Silverstein, E)

**PHYSICS 351. Standard Model of Particle Physics**

Symmetries, group theory, gauge invariance, Lagrangian of the Standard Model, flavor group, flavor-changing neutral currents, CKM quark mixing matrix, GIM mechanism, rare processes, neutrino masses, seesaw mechanism, QCD confinement and chiral symmetry breaking, instantons, strong CP problem, QCD axion. Prerequisite: Physics 330; Physics 331 and 332 recommended.

3 units, Win (Dimopoulos, S)

**PHYSICS 360. Physics of Astrophysics**

Theoretical concepts and tools for modern astrophysics. Radiation transfer equations; emission, scattering, and absorption mechanisms: Compton, synchrotron and bremsstrahlung processes; photoionization and line emission. Equations of state of ideal, interacting, and degenerate gasses. Application to astrophysical sources such as HII regions, supernova remnants, cluster of galaxies, and compact sources such as accretion disks, X-ray, gamma-ray, and radio sources. Prerequisites: 121, 171 or equivalent.

3 units, Win (Petrosian, V)

**PHYSICS 361. Stellar and Galactic Astrophysics**

Astronomical data on stars, star clusters, interstellar medium, and the Milky Way galaxy. Theory of stellar structure; hydrostatic equilibrium, radiation balance, and energy production. Stellar formation, Jean's mass, and protostars. Evolution of stars to the main sequence and beyond to red giants, white dwarfs, neutron stars, and black holes. Supernovae and compact sources. Structure of the Milky Way: disk and spiral arms; dark matter and the halo mass; central bulge or bar; and black hole. Prerequisite: 221 or equivalent. Recommended: 260, 360.

3 units, NEXTYEAR

**PHYSICS 362. Advanced Extragalactic Astrophysics and Cosmology**

Observational data on the content and activities of galaxies, the content of the Universe, cosmic microwave background radiation, gravitational lensing, and dark matter. Models of the origin, structure, and evolution of the Universe based on the theory of general relativity. Test of the models and the nature of dark matter and dark energy. Physics of the early Universe, inflation, baryosynthesis, nucleosynthesis, and galaxy formation. Prerequisites: PHYSICS 210, 211, and 260 or 360.

3 units, Aut (Kuo, C)

**PHYSICS 363. Solar and Solar-Terrestrial Physics**

Structure, mechanisms, and properties of the Sun's interior and atmosphere. Tools for solar observations; magnetic fields and polarimetry. Solar oscillations and helioseismology. Differential rotation and turbulent convection. Solar MHD, Alfven and magneto-acoustic waves. Solar cycle and dynamo. Magnetic energy release, reconnection, particle acceleration. Solar activity, sunspots, flares, coronal mass ejections; UV, X-ray, and high-energy particle emissions. The interaction of the solar wind with Earth's magnetosphere and its terrestrial effects; space weather. Prerequisite: 221 or equivalent.

3 units, not given this year

**PHYSICS 364. Advanced Gravitation**

Introduction to quantum fields in curved space-times, with applications to phenomena in cosmology and quantum gravity. Free scalar fields in curved space-time; quantum fields in an expanding universe; de Sitter space and fluctuations in inflationary cosmology; the Unruh effect; Hawking radiation and black hole thermodynamics. Recommended: 330, some familiarity with general relativity.

3 units, Spr (Hartnoll, S)

**PHYSICS 370. Theory of Many-Particle Systems**

Application of quantum field theory to the nonrelativistic, many-body problem, including methods of temperature-dependent Green's functions and canonical transformations. Theory of finite-temperature, interacting Bose and Fermi systems with applications to superfluidity, superconductivity, and electron gas. Prerequisite: 232.

3 units, not given this year

**PHYSICS 372. Condensed Matter Theory I**

Fermi liquid theory, many-body perturbation theory, response function, functional integrals, interaction of electrons with impurities. Prerequisite: APPPHYS 273 or equivalent.

3 units, Win (Qi, X)

**PHYSICS 373. Condensed Matter Theory II**

Superfluidity and superconductivity. Quantum magnetism. Prerequisite: 372.

3 units, Spr (Qi, X)

**PHYSICS 376. Superfluidity and Superconductivity**

Introduction to superfluid He: two-fluid model, phonons, and rotons, Feynman description, vortices, Bogoliubov theory. Phenomenology of superconductors: London description, Ginzburg-Landau model, type-I vs. type-II materials, Josephson effects, thin films, Kosterlitz-Thouless behavior, electron-phonon coupling. BCS theory: bulk systems, tunneling, strong-coupling materials, dirty and gapless superconductivity, fluctuation effects, Ginzburg criterion. Recommended: APPPHYS 272, 273, or equivalents.

3 units, not given this year

**PHYSICS 450. Primordial Cosmology**

Early universe cosmology. Overview of the thermal history of the universe, big bang nucleosynthesis, and the physics of recombination and the CMB. Inflationary cosmology and generation of density perturbations. Ultraviolet sensitivity of inflation and its CMB predictions to Planck-suppressed operators, mechanisms for inflation in the context of string theory, and their observational signatures. Wilsonian naturalness arguments and shift symmetries; axion inflation in field theory and string theory as a case study. Overview of the relevant upcoming measurements from satellite and ground-based detectors. Recommended prerequisites: PHYSICS 262, 330, 331, 332

3 units, Aut (Linde, A)

**PHYSICS 451. Topics in String Theory**

We will cover a few different topics in string theory, each in a mini-course of 4-8 lectures. Likely topics include string compactifications and 4d physics; string theory and black holes; AdS/CFT correspondence and its applications to strongly coupled gauge theories and condensed matter systems. Prereqs: Physics 262, 330

3 units, Win (Kachru, S)

**PHYSICS 452. Physics Beyond the Standard Model**

A general introduction to what we know and don't know about physics beyond the Standard Model. In particular, the implications of results from the LHC, dark matter, astrophysical, and cosmological experiments. Theories of physics beyond the Standard Model including supersymmetry and its many variants, the axion, large extra dimensions, and theories of flavor. Discussion of the problems with the Standard Model including naturalness and the hierarchy, cosmological constant, and flavor problems. Prerequisites: PHYSICS 330, 331, 332, 351

3 units, Spr (Graham, P)

**PHYSICS 453B. The Renormalization Group Perspective on Physics**

This course outlines the basic concepts of the Renormalization Group and illustrates them with examples. It begins with a philosophical overview, then turns to the ideas of block spins, fixed points and universality. Then the gaussian model, the epsilon and 1/N expansions and Kosterlitz Thouless theory are explained. Prerequisites: Physics 212 or equivalent.

3 units, Win (Kivelson, S; Shenker, S)

**PHYSICS 463. Special Topics in Astrophysics: Theoretical Cosmology**

The application of general relativity to physical phenomena associated with spinning black holes and neutron stars to provide illustrations and tests of the theory of strong field gravity. Topics include: stationary axisymmetric metrics and stellar structure, orbits and rays, accretion disks, stellar companions, electromagnetic effects, gravitational radiation. Emphasis is on developing practical calculational techniques. Prerequisite: PHYSICS 262 or equivalent.

3 units, not given this year

**PHYSICS 490. Research**

Open only to Physics graduate students, with consent of instructor. Work is in experimental or theoretical problems in research, as distinguished from independent study of a non-research character in 190 and 293.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PHYSICS 801. TGR Project**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PHYSICS 802. TGR Dissertation**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## POLITICAL SCIENCE (POLISCI) COURSES

### UNDERGRADUATE COURSES IN POLITICAL SCIENCE

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**POLISCI 1. Introduction to International Relations**

(Same as INTNLREL 1) Approaches to the study of conflict and cooperation in world affairs. Applications to war, terrorism, trade policy, the environment, and world poverty. Debates about the ethics of war and the global distribution of wealth. GER:DB-SocSci

5 units, Spr (Fearon, J)

**POLISCI 2. Introduction to American National Government and Politics**

(Same as AMSTUD 2) The role and importance of the ideal of democracy in the evolution of the American political system. American political institutions (the Presidency, Congress, and the

Court) and political processes (the formation of political attitudes and voting) are examined against the backdrop of American culture and political history. The major areas of public policy in the current practice of the ideal of democracy. GER:DB-SocSci

5 units, Win (Fiorina, M; Frisby, T)

**POLISCI 3P. Justice**

(Same as ETHICSOC 171, IPS 208, PHIL 171, PHIL 271, POLISCI 136S) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas

4-5 units, Aut (Dougherty, T)

**POLISCI 4. Introduction to Comparing Political Systems**

Politics in major regime types including democratic, authoritarian, and communist; how types of politics affect economic development and state/society relations. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Weinstein, J)

**POLISCI 15N. Explaining Ethnic Violence**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Over the last twenty years, more than one third of all countries had a violent civil conflict ongoing in which at least 1,000 people had died. More than half of these conflicts killed tens of thousands and produced massive refugee flows, and some caused mass starvation. Analysts describe the violence in many of these conflicts as ethnic and the parties to the violence as ethnic groups. In ordinary language, however, the term ethnic violence can be used to refer to an extraordinary range of phenomena, from certain barroom brawls to the Nazi genocide. This course begins with an examination of the meaning of ethnic violence and related terms like ethnic group. We will consider case histories of three large-scale civil conflicts commonly described as ethnic. These case materials will then be used to work through a range of possible explanations, from the individual psychology of ethnic violence to various political, military, GER:DB-SocSci

5 units, Win (Fearon, J)

**POLISCI 24N. The Politics of Communication**

(F,Sem) Stanford Introductory Seminar. This course will explore how elected officials present and explain their work to constituents and how this communication shapes American politics. Elected officials use press releases, newsletters, press conferences, and public events to connect with their constituents. While almost none of this communication is formally required, it can have important consequences on what elected officials do in office and how constituents perceive their representatives' activities. We will explore the strategies elected officials use when communicating with constituents and identify the consequences of these strategies on the process of representation. GER:DB-SocSci

3 units, Win (Grimmer, J)

**POLISCI 24Q. Law and Order**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The role of law in promoting social order. What is the rule of law? How does it differ from the rule of men? What institutions best support the rule of law? Is a state needed to ensure that laws are enforced? Should victims be allowed to avenge wrongs? What is the relationship between justice and mercy? GER:DB-SocSci

3 units, Aut (Rutten, A)

**POLISCI 25N. The US Congress in Historical and Comparative Perspective**

(F,Sem) Stanford Introductory Seminar. This course traces the development of legislatures from their medieval European origins to the present, with primary emphasis on the case of the U.S. Congress. Students will learn about the early role played by assemblies in placing limits on royal power, especially via the power of the purse. About half the course will then turn to a more detailed consideration of the U.S. Congress's contemporary performance, analyzing how that performance is affected by procedural legacies from the past that affect most democratic legislatures worldwide. GER:DB-SocSci

3 units, Spr (Cox, G)

**POLISCI 26N. American Transportation Politics**

(F,Sem) Stanford Introductory Seminar. Politics has been defined as who gets what, when, and how. In the process of resolving this question, the political process also ends up deciding who goes where, and how. This course will draw upon American debates over transportation policy to guide an exploration of major research themes in American politics. We'll examine how American transportation controversies from debates over 19th century canal financing to the 21st-century fight over high-speed rail have cast into relief the major problems that shape decision making in a representative democracy. GER:DB-SocSci

3 units, Aut (Nall, C)

**POLISCI 43N. Oil, Regime Change, and Conflict**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Relationships among dependence on oil export, democratization and authoritarian rule, and rising conflict. Case studies including Venezuela, Nigeria, Iran, Iraq, Chad, and Indonesia. The resource curse: the impact of oil on a country's political economy. The relationship between such economic dependence and regime type. Why oil exporting countries are more prone to conflict and civil war than other countries. Research paper. GER:DB-SocSci

5 units, Win (Karl, T)

**POLISCI 110C. America and the World Economy**

(Same as INTNLREL 110C, POLISCI 110X) Examination of contemporary US foreign economic policy. Areas studied: the changing role of the dollar; mechanism of international monetary management; recent crises in world markets including those in Europe and Asia; role of IMF, World Bank and WTO in stabilizing world economy; trade politics and policies; the effects of the globalization of business on future US prosperity. GER:DB-SocSci

5 units, Aut (Goldstein, J)

**POLISCI 110D. War and Peace in American Foreign Policy**

(Same as INTNLREL 110D, POLISCI 110Y) (Students not taking this course for WIM, register for 110Y.) The causes of war in American foreign policy. Issues: international and domestic sources of war and peace; war and the American political system; war, intervention, and peace making in the post-Cold War period. GER:DB-SocSci, DB-SocSci

5 units, Win (Schultz, K)

**POLISCI 110X. America and the World Economy**

(Same as INTNLREL 110C, POLISCI 110C) Examination of contemporary US foreign economic policy. Areas studied: the changing role of the dollar; mechanism of international monetary management; recent crises in world markets including those in Europe and Asia; role of IMF, World Bank and WTO in stabilizing world economy; trade politics and policies; the effects of the globalization of business on future US prosperity. GER:DB-SocSci

5 units, Aut (Goldstein, J)

**POLISCI 110Y. War and Peace in American Foreign Policy**

(Same as INTNLREL 110D, POLISCI 110D) (Students not taking this course for WIM, register for 110Y.) The causes of war in American foreign policy. Issues: international and domestic sources of war and peace; war and the American political system; war, intervention, and peace making in the post-Cold War period. GER:DB-SocSci, DB-SocSci

5 units, Win (Schultz, K)

**POLISCI 114D. Democracy, Development, and the Rule of Law**

(Same as IPS 230, INTNLREL 114D, POLISCI 314D) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts. GER:DB-SocSci

5 units, Aut (Diamond, L; Stoner-Weiss, K)

**POLISCI 114S. International Security in a Changing World**

(Same as IPS 241) The major international and regional security problems in the modern world. Interdisciplinary faculty lecture on the political and technical issues involved in nuclear proliferation, terrorism and homeland security, civil wars and insurgencies, and future great power rivalries. GER:DB-SocSci

5 units, Win (Crenshaw, M)

**POLISCI 116. History of Nuclear Weapons**

(Same as HISTORY 103E) The development of nuclear weapons and policies. How existing nuclear powers have managed their relations with each other. How nuclear war has been avoided so far and whether it can be avoided in the future. GER:DB-SocSci

5 units, Spr (Holloway, D)

**POLISCI 118P. U.S. Relations in Iran**

The evolution of relations between the U.S. and Iran. The years after WW II when the U.S. became more involved in Iran. Relations after the victory of the Islamic republic. The current state of affairs and the prospects for the future. Emphasis is on original documents of U.S. diplomacy (White House, State Department, and the U.S. Embassy in Iran). Research paper. GER:DB-SocSci

5 units, Aut (Milani, A)

**POLISCI 120B. Campaigns, Voting, Media, and Elections**

(Same as COMM 162, COMM 262) This course examines the theory and practice of American campaigns and elections. First, we will attempt to explain the behavior of the key players -- candidates, parties, journalists, and voters -- in terms of the institutional arrangements and political incentives that confront them. Second, we will use current and recent election campaigns as laboratories for testing generalizations about campaign strategy and voter behavior. Third, we examine selections from the academic literature dealing with the origins of partisan identity, electoral design, and the immediate effects of campaigns on public opinion, voter turnout, and voter choice. As well, we'll explore issues of electoral reform and their more long-term consequences for governance and the political process. GER:DB-SocSci

4-5 units, Win (Iyengar, S)

**POLISCI 120C. American Political Institutions: Congress, the Executive Branch, and the Courts**

How politicians, once elected, work together to govern America. The roles of the President, Congress, and Courts in making and enforcing laws. Focus is on the impact of constitutional rules on the incentives of each branch, and on how they influence law. GER:DB-SocSci, DB-SocSci

5 units, Spr (Weingast, B; Bonica, A)

**POLISCI 122. Introduction to American Law**

(Same as AMSTUD 179, PUBLPOL 302A) For undergraduates. The structure of the American legal system including the courts; American legal culture; the legal profession and its social role; the scope and reach of the legal system; the background and impact of legal regulation; criminal justice; civil rights and civil liberties; and the relationship between the American legal system and American society in general. GER:DB-SocSci

3-5 units, Aut (Friedman, L)

**POLISCI 123. Politics and Public Policy**

(Same as PUBLPOL 101, PUBLPOL 201) How policies come to be formed. How interests compete within public institutions to turn ideas into policies. Examples of this process from contemporary policy areas, including tax, social welfare, and environmental policy; results evaluated using equity and efficiency criteria. Prerequisite: POLISCI 2 (or equivalent for Public Policy majors). GER:DB-SocSci

5 units, Spr (Frisby, T)

**POLISCI 124R. The Federal System: Judicial Politics and Constitutional Law**

The impact of constitutional rules on policy making in the U.S. with a focus on structural issues such as separation of powers and federalism. Topics such as: the role of unelected judges in a democracy; the rule of law; and the constitutionality of the war in Iraq. Prerequisites: 2 or equivalent, and sophomore standing. WIM GER:DB-SocSci, DB-SocSci, WIM

5 units, Win (Rutten, A)

**POLISCI 124S. Civil Liberties: Judicial Politics and Constitutional Law**

The role and participation of courts, primarily the U.S. Supreme Court, in public policy making and the political system. Judicial activity in civil liberty areas (religious liberty, free expression, race and sex discrimination, political participation, and rights of persons accused of crime). Prerequisites: 2 or equivalent, and sophomore standing. GER:DB-SocSci

5 units, Aut (Rutten, A)

**POLISCI 125S. Chicano/Latino Politics**

(Same as CHICANST 125S) The political position of Latinos and Latinas in the U.S.. Focus is on Mexican Americans, with attention to Cuban Americans, Puerto Ricans, and other groups. The history of each group in the American polity; their political circumstances with respect to the electoral process, the policy process, and government; the extent to which the demographic category Latino is meaningful; and group identity and solidarity among Americans of Latin American ancestry. Topics include immigration, education, affirmative action, language policy, and environmental justice. GER:DB-SocSci

5 units, not given this year

**POLISCI 125V. Minority Representation and the Voting Rights Act**

(Same as CSRE 125V) Focus is on whether and how racial and ethnic minorities including African Americans, Asian Americans, and Latinos are able to organize and press their demands on the political system. Topics include the political behavior of minority citizens, the strength and effect of these groups at the polls, the theory and practice of group formation among minorities, the responsiveness of elected officials, and the constitutional obstacles and issues that shape these phenomena. GER:DB-SocSci

5 units, Aut (Segura, G)

**POLISCI 128F. The Constitution: A Short History**

(Same as HISTORY 57) (Same as HISTORY 157. History majors and others taking 5 units, enroll in 157.) A broad survey of the Constitution, from its Revolutionary origins to the contemporary disputes over interpretation. Topics include the invention of the written constitution and interpretative canons; the origins of judicial review; the Civil War and Reconstruction as constitutional crises; the era of substantive due process; the rights revolution; and the Constitution in wartime. GER:DB-SocSci, EC-AmerCul

3 units, Win (Rakove, J)

**POLISCI 128S. The Constitution: A Brief History**

(Same as HISTORY 157) (Same as HISTORY 57. History majors and others taking 5 units, register for 157.) A broad survey of the Constitution, from its Revolutionary origins to the contemporary disputes over interpretation. Topics include the invention of the written constitution and interpretative canons; the origins of judicial review; the Civil War and Reconstruction as constitutional crises; the era of substantive due process; the rights revolution; and the Constitution in wartime. GER:DB-SocSci, EC-AmerCul

5 units, Win (Rakove, J)

**POLISCI 131L. Modern Political Thought**

This course offers an introduction to the history of political thought from the late fifteenth century through the nineteenth century. We will consider the changing relationship between the individual and society, the rise of consent-based forms of political authority, and the development and critiques of liberal conceptions of property. Thinkers covered will include: Machiavelli, Hobbes, Locke, Rousseau, Mill, and Marx.

5 units, Spr (McQueen, A)

**POLISCI 133. Ethics and Politics of Public Service**

(Same as CSRE 178, ETHICSOC 133, HUMBIO 178, PHIL 175A, PHIL 275A) Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford. GER:DB-SocSci

5 units, Win (Mitchell, T)

**POLISCI 134L. Justice and the Environment**

(Same as ETHICSOC 178M, ETHICSOC 278M, PHIL 178M, PHIL 278M) Explores the normative questions that arise in environmental policy debates, including arguments over pollution permit markets, conservation regulations, and global warming mitigation efforts. What are the morally relevant ways in which the environment is different from other economic resources? How should the environment be valued? What are our obligations to conserve for future generations? How should the burdens of

conservation be distributed? Engages with a variety of philosophical traditions including utilitarianism, deep ecology, liberalism, and communitarianism. GER:EC-EthicReas

5 units, Win (Mazor, J)

**POLISCI 136R. Introduction to Global Justice**

(Same as ETHICSOC 136R, INTNLREL 136R, PHIL 76, POLISCI 336) Recent work in political theory on global justice. Topics include global poverty, human rights, fair trade, immigration, climate change. Do developed countries have a duty to aid developing countries? Do rich countries have the right to close their borders to economic immigrants? When is humanitarian intervention justified? Readings include Charles Beitz, Thomas Pogge, John Rawls.

5 units, Spr (Satz, D)

**POLISCI 136S. Justice**

(Same as ETHICSOC 171, IPS 208, PHIL 171, PHIL 271, POLISCI 3P) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas

4-5 units, Aut (Dougherty, T)

**POLISCI 140L. China in World Politics**

(Same as POLISCI 340L) The implications of the rise of China in contemporary world politics and for American foreign policy, including issues such as arms and nuclear proliferation, regional security arrangements, international trade and investment, human rights, environmental problems, and the Taiwan and Tibet questions. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Miller, L)

**POLISCI 141. The Global Politics of Human Rights**

The global development and changing nature of human rights and the rise of an international human rights movement. Conflicts between national sovereignty and rights, and among types of rights. Case studies include genocide in Rwanda, holding torturers accountable in Chile and El Salvador, factory workers versus Nike, and the rights of women in S. Africa. GER:DB-SocSci

5 units, Win (Karl, T)

**POLISCI 148. Chinese Politics: The Transformation and the Era of Reform**

(Same as POLISCI 348) Overview of the reforms in China since 1978 that have made its economy one of the fastest growing in the world yet it still has the Chinese Communist Party at the helm wielding one party rule. Key questions addressed include the following: What has been the process and challenges of reform that have reshaped China's economic landscape? What are the political consequences of these dramatic economic changes? Why has the CCP remained strong while other communist regimes have failed? Markets have spread but what is the role of the state? What are the opportunities for political participation and prospects for political change? Materials will include readings, lectures, and selected films. This course has no prerequisites. (Graduate students register for 348.) WIM. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Oi, J)

**POLISCI 149S. Islam, Iran, and the West**

Changes in relative power and vitality of each side. The relationship in the Middle Ages revolved around power and domination, and since the Renaissance around modernity. Focus is on Muslims of the Middle East. GER:DB-SocSci, EC-GlobalCom

5 units, Win (Milani, A)

**POLISCI 149T. Middle Eastern Politics**

Topics in contemporary Middle Eastern politics including institutional sources of underdevelopment, political Islam, electoral authoritarianism, and the political economy of oil. GER:DB-SocSci

5 units, Aut (Blaydes, L)

**POLISCI 150A. Political Methodology I**

(Same as POLISCI 350A, PUBLPOL 303A) Introduction to probability and statistical inference, with applications to political science and public policy. Prerequisite: elementary calculus. GER:DB-Math

5 units, Aut (Grimmer, J)

**POLISCI 150B. Political Methodology II**

(Same as POLISCI 350B, PUBLPOL 303B) Understanding and using the linear regression model in a social-science context: properties of the least squares estimator; inference and hypothesis testing; assessing model fit; presenting results for publication; consequences and diagnosis of departures from model assumptions; outliers and influential observations, graphical techniques for model fitting and checking; interactions among exploratory variables; pooling data; extensions for binary responses. GER:DB-Math

5 units, Win (Rivers, D)

**POLISCI 150C. Political Methodology III**

(Same as POLISCI 350C) Models for discrete outcomes, time series, measurement error, and simultaneity. Introduction to nonlinear estimation, large sample theory. Prerequisite: 150B/350B.

3-5 units, Spr (Wand, J)

**POLISCI 152. Introduction to Game Theoretic Methods in Political Science**

(Same as POLISCI 352) Concepts and tools of non-cooperative game theory developed using political science questions and applications. Formal treatment of Hobbes' theory of the state and major criticisms of it; examples from international politics. Primarily for graduate students; undergraduates admitted with consent of instructor.

3-5 units, Win (Fearon, J)

**POLISCI 210. Special Topics: The Political Economy of Immigration**

The goal of this class is to explore the political economy of immigration in receiving states over the last two hundred years, with a special focus on the current debates over immigration in the US today. The course assumes some knowledge of international relations and a more limited background in economic theory and economic history. Course readings and lectures are designed to provide both a theoretical orientation and the substantive information necessary to understand and analyze a range of policy issues that now confront immigrant-receiving states.

5 units, Spr (Peters, M)

**POLISCI 212S. Ethics and War**

What ethical norms and laws influence decisions to go to war, the conduct of military operations in war, and post-war settlements and institutions? We will study the evolution of just war theory in law and in practice. What are the rules that protect civilians and noncombatants in armed conflict? How do these rules apply in non-traditional, asymmetric conflicts between states and terrorist and other non-state groups? How do we determine in which kinds of conflicts to apply the moral and legal framework that governs war? Research paper required.

5 units, Spr (Sagan, S; Weiner, A)

**POLISCI 213R. Political Economy of Financial Crisis**

(Same as POLISCI 313R) Political responses to domestic and international financial crises. Monetary and fiscal policy. The role of interest groups. International cooperation and the role of the IMF.

5 units, Spr (Lipsky, J)

**POLISCI 213S. A Post American Century? American Foreign Policy in a Multi-unipolar World**

This seminar examines recent policy from Bush to Obama in the context of two classic traditions: Wilsonianism vs. Realism. What is the role of the international system, what is the weight of domestic forces like ideology, history and identity? Prerequisite: junior or senior standing. GER:DB-SocSci

5 units, Aut (Joffe, J)

**POLISCI 214G. International Political Economy and International Organizations: Theory and Practice**

(Same as IPS 221) What is the appropriate balance between government regulation and market freedom? Introduction to important theoretical and policy debates in international political economy. Topics include: political economy of trade; exchange rate policy; the liberalization of trade and finance; the global move to openness; development, debt and aid; and the role of international organizations. Discussion of application of academic insights to key policy debates, including whether governments should offset the welfare costs of globalization, whether the IMF

and World Bank should be reformed to meet the needs of the 21st century, and how the international community should respond to financial crises. Students will research, write and orally present policy briefs on specific policy questions. GER:DB-SocSci

3-5 units, Win (Gould, E)

**POLISCI 214R. Challenges and Dilemmas in American Foreign Policy**

(Same as POLISCI 314R) This seminar will examine the complexities and trade offs involved in foreign policy decision-making at the end of the twentieth century and the dawn of the post-9/11 era. Students will analyze dilemmas confronting policymakers through case studies including post-conflict reconstruction and state-building, nuclear proliferation, democratization and peace negotiation. The seminar will conclude with a 48-hour crisis simulation. For advanced undergraduates and graduate students. Application for enrollment required. Pick up application in Political Science Department (Encina West 100).

5 units, Win (Rice, C)

**POLISCI 216E. International History and International Relations Theory**

(Same as HISTORY 202, HISTORY 306E, POLISCI 316) The relationship between history and political science as disciplines. Sources include studies by historians and political scientists on topics such as the origins of WW I, the role of nuclear weapons in international politics, the end of the Cold War, nongovernmental organizations in international relations, and change and continuity in the international system. GER:DB-SocSci

5 units, Win (Holloway, D)

**POLISCI 219. Directed Reading and Research in International Relations**

May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 220R. The Presidency**

(Same as POLISCI 320R) This course provides students with a comprehensive perspective on the American presidency and covers a range of topics: elections, policy making, control of the bureaucracy, unilateral action, war-making, and much more. But throughout, the goal is to understand why presidents behave as they do, and why the presidency as an institution has developed as it has; with special attention to the dynamics of the American political system and how they condition incentives, opportunities, and power.

5 units, Win (Moe, T)

**POLISCI 224L. The Psychology of Communication About Politics in America**

(Same as COMM 164, COMM 264, PSYCH 170) Focus is on how politicians and government learn what Americans want and how the public's preferences shape government action; how surveys measure beliefs, preferences, and experiences; how poll results are criticized and interpreted; how conflict between polls is viewed by the public; how accurate surveys are and when they are accurate; how to conduct survey research to produce accurate measurements; designing questionnaires that people can understand and use comfortably; how question wording can manipulate poll results; corruption in survey research. Preference to juniors, seniors, graduate students.

4 units, Spr (Krosnick, J)

**POLISCI 226U. Approaches to American Legal History**

(Same as HISTORY 253D) Legal history, once primarily devoted to exploring legal doctrines and key judicial opinions and thus of interest mainly to legal scholars and lawyers, now resembles historical writing more generally; the study of legal ideas and practices is increasingly integrated with social, intellectual, cultural, and political history. Recent writings in American legal history; how the field reflects developments in historical writing; and how the use of legal materials affects understanding of American history.

5 units, Win (Rakove, J)

**POLISCI 229. Directed Reading and Research in American Politics**

May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 230A. Classical Seminar: Origins of Political**

**Thought**

(Same as CLASSHS 133, CLASSHS 333, PHIL 176A, PHIL 276A, POLISCI 330A) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change. GER:DB-Hum

4-5 units, Win (Ober, J)

**POLISCI 232T. The Dialogue of Democracy**

(Same as AMSTUD 137, COMM 137W, COMM 237, POLISCI 332T) All forms of democracy require some kind of communication so people can be aware of issues and make decisions. This course looks at competing visions of what democracy should be and different notions of the role of dialogue in a democracy. Is it just campaigning or does it include deliberation? Small scale discussions or sound bites on television? Or social media? What is the role of technology in changing our democratic practices, to mobilize, to persuade, to solve public problems? This course will include readings from political theory about democratic ideals - from the American founders to J.S. Mill and the Progressives to Joseph Schumpeter and modern writers skeptical of the public will. It will also include contemporary examinations of the media and the internet to see how those practices are changing and how the ideals can or cannot be realized. GER:EC-EthicReas

4-5 units, Win (Fishkin, J)

**POLISCI 236. Theories of Civil Society, Philanthropy, and the Nonprofit Sector**

(Same as ETHICSOC 232T) What is the basis of private action for the public good? How are charitable dollars distributed and what role do nonprofit organizations and philanthropic dollars play in a modern democracy? How do nongovernmental organizations operate domestically and globally? The historical development and modern structure of civil society emphasizing philanthropy and the nonprofit sector. Readings in political philosophy, political sociology, and public policy.

5 units, Spr (Staff)

**POLISCI 237. Models of Democracy**

(Same as COMM 212, COMM 312, POLISCI 337) Ancient and modern varieties of democracy; debates about their normative and practical strengths and the pathologies to which each is subject. Focus is on participation, deliberation, representation, and elite competition, as values and political processes. Formal institutions, political rhetoric, technological change, and philosophical critique. Models tested by reference to long-term historical natural experiments such as Athens and Rome, recent large-scale political experiments such as the British Columbia Citizens' Assembly, and controlled experiments.

3-5 units, not given this year

**POLISCI 239. Directed Reading and Research in Political Theory**

May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 240C. The Comparative Political Economy of Post-Communist Transitions**

(Same as REES 340) Dominant theoretical perspectives of comparative democratization and marketization; focus is on the political economy of transition in Eastern Europe and Eurasia while comparing similar processes in Latin America and Asia. Topics include: meanings of democracy, synergy between democracies and markets, causes of the collapse of communism, paths to political liberalization and democracy, civil society, constitutions, parliaments, presidents, the rule of law, electoral systems, market requirements, strategies of reform, the Russian experience of market building, exporting democracy and the market, and foreign aid and assistance. GER:DB-SocSci

3-4 units, Aut (Staff)

**POLISCI 241S. Spatial Approaches to Social Science**

(Same as ANTHRO 130D, ANTHRO 230D) This multidisciplinary course combines different approaches to how GIS and spatial tools can be applied in social science research. We take a collaborative, project oriented approach to bring together technical expertise and substantive applications from several social

science disciplines. The course aims to integrate tools, methods, and current debates in social science research and will enable students to engage in critical spatial research and a multidisciplinary dialogue around geographic space.

5 units, Win (Rodden, J; Engel, C)

**POLISCI 242P. Politics of Corruption**

Causes, effects, and solutions to various forms of corruption in business and politics in both developing regions (e.g. Asia, E. Europe) and developed ones (the US and the EU). GER:DB-SocSci

5 units, Aut (Young, P)

**POLISCI 243L. POLITICS OF ECONOMIC REFORM**

5 units, Spr (Young, P)

**POLISCI 243T. The Politics of Globalization**

This seminar will critically examine contemporary debates about the political and economic impact of globalization with an emphasis on, but not restricted to, developing countries. Selected topics include the impact of enhanced economic integration on domestic and global governance, public policies to reduce poverty and inequality, the role of civil society in a global context, and new forms of political organization such as transnational networks. GER:DB-SocSci

5 units, Aut (Razo, A)

**POLISCI 244. An Introduction to Political Development**

Political development concerns the evolution of three categories of institutions: (1) the state itself; (2) the rule of law; and (3) accountable government. Focus on many of the major theories of political development, beginning with some classic social theorists and continuing up through the present.

5 units, Win (Fukuyama, Y)

**POLISCI 245R. Politics in Modern Iran**

Modern Iran has been a smithy for political movements, ideologies, and types of states. Movements include nationalism, constitutionalism, Marxism, Islamic fundamentalism, social democracy, Islamic liberalism, and fascism. Forms of government include Oriental despotism, authoritarianism, Islamic theocracy, and liberal democracy. These varieties have appeared in Iran in an iteration shaped by history, geography, proximity to oil and the Soviet Union, and the hegemony of Islamic culture. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Milani, A)

**POLISCI 246P. The Dynamics of Change in Africa**

(Same as AFRICAST 301A, HISTORY 346, POLISCI 346P) Crossdisciplinary colloquium; required for the M.A. degree in African Studies. Open to advanced undergraduates and PhD students. Addresses critical issues including patterns of economic collapse and recovery; political change and democratization; and political violence, civil war, and genocide. Focus on cross-cutting issues including the impact of colonialism; the role of religion, ethnicity, and inequality; and Africa's engagement with globalization.

4-5 units, Win (Weinstein, J)

**POLISCI 249. Directed Reading and Research in Comparative Politics**

May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 259. Directed Reading and Research in Political Methodology**

May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 291. Political Institutions**

This course focuses on the role of political institutions in shaping policy outcomes around the world, with special attention to the United States. Students will become familiar with a wide range of theoretical approaches to the study of institutions, and they will learn the basics of applied quantitative empirical analysis. Enrollment is restricted to Political Science Research Honors Track students.

5 units, Win (Rodden, J)

**POLISCI 292. Political Behavior**

This research seminar will survey important topics in the study of mass political behavior including public opinion, political participation, partisanship and voting. Open only to students in the

Political Science Research Honors Track.

5 units, Spr (Fiorina, M)

**POLISCI 293. Research Design**

This course is designed to teach students how to design a research project. The course emphasizes the specification of testable hypotheses, the building of data sets, and the inferences from that may be drawn from that evidence. It is only open to students in the PS Research Honors Track.

5 units, Spr (Haber, S)

**POLISCI 299A. Honors Thesis**

Students conduct independent research work towards a senior honors thesis. Restricted to students in the Research Track Honors Program in Political Science.

1-5 units, Aut (Staff)

**POLISCI 299B. Honors Thesis**

Students conduct independent research work towards a senior honors thesis.

1-5 units, Win (Staff)

**POLISCI 299C. Honors Thesis**

Students conduct independent research work towards a senior honors thesis.

1-5 units, Spr (Staff)

**GRADUATE COURSES IN POLITICAL SCIENCE**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**POLISCI 313R. Political Economy of Financial Crisis**

(Same as POLISCI 213R) Political responses to domestic and international financial crises. Monetary and fiscal policy. The role of interest groups. International cooperation and the role of the IMF.

5 units, Spr (Lipscy, P)

**POLISCI 314D. Democracy, Development, and the Rule of Law**

(Same as IPS 230, INTNLREL 114D, POLISCI 114D) Links among the establishment of democracy, economic growth, and the rule of law. How democratic, economically developed states arise. How the rule of law can be established where it has been historically absent. Variations in how such systems function and the consequences of institutional forms and choices. How democratic systems have arisen in different parts of the world. Available policy instruments used in international democracy, rule of law, and development promotion efforts.

5 units, Aut (Diamond, L; Stoner-Weiss, K)

**POLISCI 314R. Challenges and Dilemmas in American Foreign Policy**

(Same as POLISCI 214R) This seminar will examine the complexities and trade offs involved in foreign policy decision-making at the end of the twentieth century and the dawn of the post-9/11 era. Students will analyze dilemmas confronting policymakers through case studies including post-conflict reconstruction and state-building, nuclear proliferation, democratization and peace negotiation. The seminar will conclude with a 48-hour crisis simulation. For advanced undergraduates and graduate students. Application for enrollment required. Pick up application in Political Science Department (Encina West 100).

5 units, Win (Rice, C)

**POLISCI 314S. Decision Making in U.S. Foreign Policy**

(Same as IPS 314S) Priority to IPS students. Formal and informal processes involved in U.S. foreign policy decision making. The formation, conduct, and implementation of policy, emphasizing the role of the President and executive branch agencies. Theoretical and analytical perspectives; case studies.

5 units, Spr (Blacker, C)

**POLISCI 316. International History and International Relations Theory**

(Same as HISTORY 202, HISTORY 306E, POLISCI 216E) The relationship between history and political science as disciplines. Sources include studies by historians and political scientists on topics such as the origins of WW I, the role of nuclear weapons in international politics, the end of the Cold War, nongovernmental

organizations in international relations, and change and continuity in the international system.

5 units, Win (Holloway, D)

**POLISCI 319. Directed Reading in International Relations**

May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 320R. The Presidency**

(Same as POLISCI 220R) This course provides students with a comprehensive perspective on the American presidency and covers a range of topics: elections, policy making, control of the bureaucracy, unilateral action, war-making, and much more. But throughout, the goal is to understand why presidents behave as they do, and why the presidency as an institution has developed as it has, with special attention to the dynamics of the American political system and how they condition incentives, opportunities, and power.

5 units, Win (Moe, T)

**POLISCI 323R. The Press and the Political Process**

(Same as COMM 160, COMM 260) (Graduate students register for COMM 260.) The role of mass media and other channels of communication in political and electoral processes.

4-5 units, not given this year

**POLISCI 324. Graduate Seminar in Political Psychology**

(Same as COMM 308) For students interested in research in political science, psychology, or communication. Methodological techniques for studying political attitudes and behaviors. May be repeated for credit.

1-3 units, Aut (Krosnick, J), Win (Krosnick, J), Spr (Krosnick, J)

**POLISCI 327. Minority Behavior and Representation**

Politics of minorities in the U.S. Topics include: historic and contemporary struggles of Latinos, African Americans, and gays and lesbians for political power and social acceptance; group-level public opinion and electoral behavior; scholarship on group influence in the policy making process and policy issues of importance; and the jurisprudence shaping minority political access and civil rights.

5 units, Aut (Segura, G)

**POLISCI 329. Directed Reading and Research in American Politics**

May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 330A. Classical Seminar: Origins of Political Thought**

(Same as CLASSHIS 133, CLASSHIS 333, PHIL 176A, PHIL 276A, POLISCI 230A) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change.

4-5 units, Win (Ober, J)

**POLISCI 332T. The Dialogue of Democracy**

(Same as AMSTUD 137, COMM 137W, COMM 237, POLISCI 232T) All forms of democracy require some kind of communication so people can be aware of issues and make decisions. This course looks at competing visions of what democracy should be and different notions of the role of dialogue in a democracy. Is it just campaigning or does it include deliberation? Small scale discussions or sound bites on television? Or social media? What is the role of technology in changing our democratic practices, to mobilize, to persuade, to solve public problems? This course will include readings from political theory about democratic ideals - from the American founders to J.S. Mill and the Progressives to Joseph Schumpeter and modern writers skeptical of the public will. It will also include contemporary examinations of the media and the internet to see how those practices are changing and how the ideals can or cannot be realized.

4-5 units, Win (Fishkin, J)

**POLISCI 333. Rational and Social Agency**

(Same as PHIL 377) Contemporary discussions of practical reason, individual rational agency, planning agency, diachronic agency, intention, belief, intentional action, shared agency, identification and self-governance. Tentative list of authors whose work will be

studied includes: Michael Bratman, Margaret Gilbert, Richard Holton, Christine Korsgaard, Alfred Mele, Kieran Setiya, Scott Shapiro, Michael Smith, David Velleman, Jay Wallace, and Gary Watson.

2-4 units, *Win (Bratman, M)*

**POLISCI 334. Philanthropy and Civil Society**

(Same as EDUC 374, SOC 374) Associated with the Center for Philanthropy and Civil Society (PACS). Year-long workshop for doctoral students and advanced undergraduates writing senior theses on the nature of civil society or philanthropy. Focus is on pursuit of progressive research and writing contributing to the current scholarly knowledge of the nonprofit sector and philanthropy. Accomplished in a large part through peer review. Readings include recent scholarship in aforementioned fields. May be repeated for credit for a maximum of 9 units.

1-3 units, *Aut (Powell, W), Win (Powell, W), Spr (Powell, W)*

**POLISCI 336. Introduction to Global Justice**

(Same as ETHICSOC 136R, INTNLREL 136R, PHIL 76, POLISCI 136R) Recent work in political theory on global justice. Topics include global poverty, human rights, fair trade, immigration, climate change. Do developed countries have a duty to aid developing countries? Do rich countries have the right to close their borders to economic immigrants? When is humanitarian intervention justified? Readings include Charles Beitz, Thomas Pogge, John Rawls.

5 units, *Spr (Satz, D)*

**POLISCI 336S. Justice**

(Same as ETHICSOC 171, IPS 208, PHIL 171, PHIL 271, POLISCI 3P, POLISCI 136S) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality.

4-5 units, *Aut (Dougherty, T)*

**POLISCI 337. Models of Democracy**

(Same as COMM 212, COMM 312, POLISCI 237) Ancient and modern varieties of democracy; debates about their normative and practical strengths and the pathologies to which each is subject. Focus is on participation, deliberation, representation, and elite competition, as values and political processes. Formal institutions, political rhetoric, technological change, and philosophical critique. Models tested by reference to long-term historical natural experiments such as Athens and Rome, recent large-scale political experiments such as the British Columbia Citizens' Assembly, and controlled experiments.

3-5 units, *not given this year*

**POLISCI 337S. Seminar on Liberation Technologies**

(Same as CS 546) This one-unit seminar will present speakers relevant in a variety of ways to how various forms of information technology are being used to defend human rights, improve governance, deepen democracy, empower the poor, promote economic development, protect the environment, enhance public health, and pursue a variety of other social goods.

1 unit, *Aut (Winograd, T; Cohen, J), Win (Diamond, L; Winograd, T)*

**POLISCI 337T. Designing Liberation Technology**

(Same as CS 379L) Small project teams work with NGOs to design new technologies for promoting development and democracy. Students conduct observations to identify needs, generate concepts, create prototypes, and test their appropriateness. Some projects may continue past the quarter toward full-scale implementation. Taught through the Hasso Plattner Institute of Design at Stanford (<http://dschool.stanford.edu>). Enrollment limited. Application required. Prerequisites: consent of instructor(s). Design Institute class; see <http://dschool.stanford.edu>.

3-4 units, *Spr (Winograd, T)*

**POLISCI 339. Directed Reading and Research in Political Theory**

May be repeated for credit.

1-5 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**POLISCI 340L. China in World Politics**

(Same as POLISCI 140L) The implications of the rise of China in

contemporary world politics and for American foreign policy, including issues such as arms and nuclear proliferation, regional security arrangements, international trade and investment, human rights, environmental problems, and the Taiwan and Tibet questions.

5 units, *Win (Miller, L)*

**POLISCI 344. Politics and Geography**

The role of geography in topics in political economy, including development, political representation, voting, redistribution, regional autonomy movements, fiscal competition, and federalism.

3-5 units, *Win (Rodden, J; Nall, C)*

**POLISCI 344U. Political Culture**

An approach to culture emphasizing equilibrium attributes through relationships among culture, choice, coordination, and common knowledge. Implications for the study of political processes and institutions.

5 units, *Aut (Laitin, D)*

**POLISCI 346P. The Dynamics of Change in Africa**

(Same as AFRICAST 301A, HISTORY 346, POLISCI 246P) Crossdisciplinary colloquium; required for the M.A. degree in African Studies. Open to advanced undergraduates and PhD students. Addresses critical issues including patterns of economic collapse and recovery; political change and democratization; and political violence, civil war, and genocide. Focus on cross-cutting issues including the impact of colonialism; the role of religion, ethnicity, and inequality; and Africa's engagement with globalization.

4-5 units, *Win (Weinstein, J)*

**POLISCI 346S. The Logic of Authoritarian Government, Ancient and Modern**

(Same as HISTORY 378A) If authoritarianism is less economically efficient than democracy, and if authoritarianism is a less stable form of political organization than democracy, then why are there more authoritarian governments than democracies? To address this paradox, focus is on theoretical and empirical literature on authoritarian governments, and related literatures on the microeconomic analysis of property rights and credible commitments.

5 units, *not given this year*

**POLISCI 348. Chinese Politics: The Transformation and the Era of Reform**

(Same as POLISCI 148) Overview of the reforms in China since 1978 that have made its economy one of the fastest growing in the world yet it still has the Chinese Communist Party at the helm wielding one party rule. Key questions addressed include the following: What has been the process and challenges of reform that have reshaped China's economic landscape? What are the political consequences of these dramatic economic changes? Why has the CCP remained strong while other communist regimes have failed? Markets have spread but what is the role of the state? What are the opportunities for political participation and prospects for political change? Materials will include readings, lectures, and selected films. This course has no prerequisites. (Graduate students register for 348.) WIM.

5 units, *Aut (Oi, J)*

**POLISCI 349. Directed Reading and Research in Comparative Politics**

May be repeated for credit.

1-10 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**POLISCI 350A. Political Methodology I**

(Same as POLISCI 150A, PUBLPOL 303A) Introduction to probability and statistical inference, with applications to political science and public policy. Prerequisite: elementary calculus.

5 units, *Aut (Grimmer, J)*

**POLISCI 350B. Political Methodology II**

(Same as POLISCI 150B, PUBLPOL 303B) Understanding and using the linear regression model in a social-science context: properties of the least squares estimator; inference and hypothesis testing; assessing model fit; presenting results for publication; consequences and diagnosis of departures from model assumptions; outliers and influential observations, graphical techniques for model fitting and checking; interactions among exploratory variables; pooling data; extensions for binary responses.

5 units, Win (Rivers, D)

**POLISCI 350C. Political Methodology III**

(Same as POLISCI 150C) Models for discrete outcomes, time series, measurement error, and simultaneity. Introduction to nonlinear estimation, large sample theory. Prerequisite: 150B/350B.

3-5 units, Spr (Wand, J)

**POLISCI 351A. Foundations of Political Economy**

Introduction to political economy with an emphasis on formal models of collective choice, public institutions, and political competition. Topics include voting theory, social choice, institutional equilibria, agenda setting, interest group politics, bureaucratic behavior, and electoral competition.

4 units, Aut (Hatfield, J)

**POLISCI 351B. Economic Analysis of Political Institutions**

Applying techniques such as information economics, games of incomplete information, sequential bargaining theory, repeated games, and rational expectations of microeconomic analysis and game theory to political behavior and institutions. Applications include agenda formation in legislatures, government formation in parliamentary systems, the implications of legislative structure, elections and information aggregation, lobbying, electoral competition and interest groups, the control of bureaucracies, interest group competition, and collective choice rules.

4 units, Win (Shotts, K)

**POLISCI 351C. Testing Models of Governmental Decision Making**

(Same as POLECON 682) This course surveys applications of formal models to several stages of decision making, primarily in the U.S. national government and with an emphasis on the legislative branch. The course begins with explicit consideration of issues in philosophy of science and introduces an analytic framework to be applied to specific research throughout remaining sessions. Substantive topics and applications covered include strategies of committees, roll call voting, policy formation, effects of special rules, congressional-presidential relations, and congressional-agency relations. Students should have taken POLECON 680 and POLECON 681. Also listed as Political Science 351C.

4 units

**POLISCI 352. Introduction to Game Theoretic Methods in Political Science**

(Same as POLISCI 152) Concepts and tools of non-cooperative game theory developed using political science questions and applications. Formal treatment of Hobbes' theory of the state and major criticisms of it; examples from international politics. Primarily for graduate students; undergraduates admitted with consent of instructor.

3-5 units, Win (Fearon, J)

**POLISCI 353A. Workshop in Statistical Modeling**

Theoretical aspects and empirical applications of statistical modeling in the social sciences. Guest speakers. Students present a research paper. Prerequisite: 350B or equivalent.

1-2 units, Aut (Wand, J), Spr (Wand, J)

**POLISCI 359. Advanced Individual Study in Political Methodology**

May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 362. New Economics of Organization**

Survey of economic approaches to organization, emphasizing theory and application, with attention to politics.

5 units, Win (Weingast, B)

**POLISCI 369. Directed Reading and Research in Political Organizations**

Advanced individual study in public administration. (Staff)

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 400. Dissertation**

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 404. Dispute Resolution in International Economic Law**

(Same as LAW 356.) Topics include: theoretical work on international trade and investment disputes; empirical work on

WTO dispute resolution and the efficacy of developing country participation; and legal analysis of current, prominent disputes in the WTO and under international investment treaties. Substantial paper required. May be repeated for credit.

1 unit, not given this year

**POLISCI 410A. International Relations Theory, Part I**

First of a three-part graduate sequence. History of international relations, current debates, and applications to problems of international security and political economy.

5 units, Aut (Schultz, K)

**POLISCI 410B. International Relations Theory, Part II**

Second of a three-part graduate sequence. History of international relations theory, current debates, and applications to problems of international security and political economy. Prerequisite: 410A.

5 units, Win (Lipsy, P)

**POLISCI 410C. Research in International Relations**

Third of a three-part graduate sequence. Focus is on developing research papers begun in 410A or B, and exploring active areas of research in the field. Prerequisite: 410B.

5 units, Spr (Sagan, S)

**POLISCI 411A. Workshop in International Relations**

For graduate students. Contemporary work. Organized around presentation of research by students and outside scholars. May be repeated for credit.

1-2 units, Aut (Goldstein, J)

**POLISCI 411B. Workshop in International Relations**

For graduate students. Contemporary work. Organized around presentation of research by students and outside scholars. May be repeated for credit.

1-2 units, Win (Goldstein, J)

**POLISCI 420A. American Political Institutions**

Theories of American politics, focusing on Congress, the presidency, the bureaucracy, and the courts.

5 units, Aut (Moe, T)

**POLISCI 420B. Topics in American Political Behavior**

For graduate students with background in American politics embarking on their own research. Current research in American politics, emphasizing political behavior and public opinion. Possible topics: uncertainty and ambivalence in political attitudes, heterogeneity in public opinion, the structure of American political ideology, political learning, the media as a determinant of public opinion, and links between public opinion and public policy.

4-5 units, Win (Sniderman, P; Jackman, S)

**POLISCI 420C. Discovery in American Politics**

What are the novel facts being generated in the study of American politics, and how are these discoveries being made? Emphasis on strengths and limitations of emerging methodologies and review of the substantive contributions they yield. Student-led replication of extant research and development of original research ideas a key component of the course. Prerequisites: 420A,B.

5 units, Spr (Jackman, S)

**POLISCI 421R. American Political Development, 1865-present**

In this reading-intensive course, we will conduct a wide-ranging survey of major transformations in the American political system in the post-Civil War period. Our inquiries about these transformations will focus on the origins of the modern administrative state, the interactive role of the state and social movements, and changes in the party system. We will examine these developments not only to understand institutional change, but to learn how changing institutions have shaped the behavior of the American electorate.

5-5 units, Spr (Nall, C)

**POLISCI 422. Workshop in American Politics**

Research seminar. Frontiers in mass political behavior. Sources include data sets from the 2004 election cycle. Prerequisite: 420B or equivalent.

1-2 units, Aut (Sniderman, P; Iyengar, S), Win (Sniderman, P; Iyengar, S)

**POLISCI 422N. Campaign Finance**

5 units, Spr (Wand, J; Bonica, A)

**POLISCI 425. Political Communication**

(Same as COMM 360G) An overview of research in political

communication with particular reference to work on the impact of the mass media on public opinion and voting behavior. Limited to Ph.D. students. Prerequisite: 260 or consent of instructor.

1-5 units, Spr (Iyengar, S)

**POLISCI 431A. Ancient Greek Law**

(Same as CLASSHIS 335A) The development and practice of law and legal procedure in the ancient Greek world, emphasizing the well documented case of classical Athens. Constitutional, criminal, and civil law, approached through analysis of actual laws and speeches by litigants in Athenian courtrooms. Review of a growing scholarship juxtaposing Greek law to other prominent legal traditions and exploring the role of law in Greek social relations, economics, and literature.

5 units, Win (Ober, J)

**POLISCI 431B. Ancient Greek Law**

(Same as CLASSHIS 135B, CLASSHIS 335B) Workshop, which continues the work of the previous quarter. The development and practice of law and legal procedure in the ancient Greek world, emphasizing the well documented case of classical Athens. Constitutional, criminal, and civil law, approached through analysis of actual laws and speeches by litigants in Athenian courtrooms. Review of a growing scholarship juxtaposing Greek law to other prominent legal traditions and exploring the role of law in Greek social relations, economics, and literature.

5 units, Spr (Ober, J)

**POLISCI 431L. Graduate Seminar on Equality**

(Same as PHIL 371D) This seminar will focus on ideas of equality of opportunity, with readings from political theory, as well as American constitutional law, political science, economics, and sociology. The readings will address four main questions: What is equality of opportunity? Why is equality of opportunity an important requirement of justice? What are the principal sources of inequalities of opportunity? And how might those inequalities be remedied? Readings from: Hayek, Rawls, Dworkin, Okin, Roemer, Tawney, Bourdieu, Barry, Jencks, Mazumder, Alstott, McLanahan, and Heckman.

5 units, not given this year

**POLISCI 433. Workshop in Political Theory**

For graduate students. May be repeated for credit.

1-2 units, Aut (McQueen, A), Win (McQueen, A), Spr (McQueen, A)

**POLISCI 435R. Political Realism**

(Same as PHIL 372R) This seminar will explore various articulations of political realism in their historical contexts. Realism is generally taken to be a pragmatic approach to a political world marked by the competition for material interests and the struggle for power. Yet beyond a shared critique of idealism and an insistence on the priority and autonomy of the political, realists tend to have very different normative visions and political projects. We will consider the works of several political realists from the history of political and international relations thought, including: Thucydides, Machiavelli, Hobbes, Carr, Niebuhr, and Morgenthau.

3-5 units, Aut (McQueen, A)

**POLISCI 436R. Amartya Sen's capability theory**

(Same as PHIL 378) Amartya Sen's pioneering work attempts to open up economics to missing informational and evaluative dimensions. This seminar will explore Sen's capability approach and its implications for the study of economics, gender, and justice. It will look at different ways that the capability approach has been developed, in particular, by Martha Nussbaum, but also by other political philosophers.

2-4 units, not given this year

**POLISCI 438. Democracy and the Constitution**

(Same as PHIL 374C) Connections between democratic theory and constitutional theory. Sources include literature from political philosophy, constitutional law, and jurisprudence, and arguments about freedom of expression, campaign finance, legislative apportionment, federalism, and separation of powers. Readings from Scalia, Breyer, Ely, Ackerman, Dahl, Rawls, Habermas, Dworkin, Riker, and Schumpeter, as well as constitutional cases.

5 units, not given this year

**POLISCI 440A. Theories in Comparative Politics**

Required of Political Science Ph.D. students with comparative politics as first or second concentration; others by consent of

instructor. Theories addressing major concerns in the comparative field including democracy, regime change, the state, revolutions, national heterogeneity, and economic performance.

5 units, Aut (Laitin, D)

**POLISCI 440B. Political Economy of Development**

(Same as HISTORY 378E) Required of Political Science Ph.D. students with comparative politics as a first or second concentration; others by consent of the instructor. The origins of political and economic institutions and their impact on long run outcomes for growth and democracy. Emphasis is on the analysis of causal models, hypothesis testing, and the quality of evidence.

5 units, Win (Haber, S)

**POLISCI 440C. Methods in Comparative Politics**

Required of Political Science Ph.D. candidates with comparative politics as a first or second concentration; others by consent of instructor. Current methodological standards in comparative politics. Students develop their own research design that meets these standards.

5 units, Spr (Weinstein, J; Laitin, D)

**POLISCI 440D. Workshop in Comparative Politics**

Faculty, guest speakers, and graduate students conducting research in comparative politics present work-in-progress. Graduate students may enroll for up to 5 total units apportioned by quarter. Auditors welcome. Graduate students whose major or minor field is comparative politics must make at least one presentation to the seminar.

1-2 units, Aut (Magaloni, B; Blaydes, L), Win (Blaydes, L; Magaloni, B), Spr (Magaloni, B; Blaydes, L)

**POLISCI 443S. Political Economy of Reform in China**

Content, process, and problems of China's post-Mao reforms. Changes in property rights, markets, credit, and the role of the state in economic development. Comparative insights about reform in the Chinese communist system that distinguishes it from the experience of regimes in E. Europe and the former Soviet Union.

5 units, Aut (Oi, J)

**POLISCI 444. Comparative Political Economy: Advanced Industrial Societies**

(Same as PUBLPOL 304A) Political economy approaches to key policy outcomes including redistribution, the size of government, fiscal behavior, and pork-barrel politics. Theories related to institutions, interest groups, and geography, focusing on middle- and upper-income countries.

3-5 units, Spr (Cox, G)

**POLISCI 448R. Workshop: China Social Science**

(Same as SOC 368W) For Ph.D. students in the social sciences and history. Research on contemporary society and politics in the People's Republic of China. May be repeated for credit. Prerequisite: consent of instructor.

1 unit, Aut (Walder, A; Oi, J), Win (Walder, A; Oi, J), Spr (Walder, A; Zhou, X; Oi, J)

**POLISCI 451. Design and Analysis of Experiments**

Political scientists increasingly rely on experimental methods. This course covers the principles and logic of experimental design as applied to laboratory, field and survey experiments. We discuss the strengths and limitations of experiments in relation to observational methods. Design considerations include randomization, the construction of treatments, the use of deception, the ethical implications of deception, and new developments in subject recruitment. Turning to the analysis of experimental data, we describe the methods for estimating treatment effects, interactions, and more complex indirect effects stemming from either mediator or moderator variables. We also cover appropriate data analytic strategies for quasi-experimental designs including interrupted time series, matching and propensity scores.

3-5 units, Spr (Iyengar, S; Jackman, S)

**POLISCI 801. TGR Project**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**POLISCI 802. TGR Dissertation**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

# PORTUGUESE LANGUAGE (PORTLANG) COURSES

## UNDERGRADUATE COURSES IN PORTUGUESE LANGUAGE

Primarily for undergraduates; graduate students may enroll with consent of adviser.

### **PORTLANG 1A. Accelerated First-Year Portuguese, Part 1**

For students with two years of college level study of a Romance language, preferably Spanish. Goal is to use socially and culturally appropriate forms in conversations, providing and obtaining information, and expressing feelings, emotions, and opinions. Students learn the language as they contrast Brazilian culture with their own. Lab. Completion of 2A fulfills the University's foreign language requirement.

*4-5 units, Aut (Wiedemann, L; Morris, A), Win (Staff), Spr (Sotelino, K)*

### **PORTLANG 2A. Accelerated First-Year Portuguese, Part 2**

Continuation of 1A. For students with two years of college level study of a Romance language, preferably Spanish. Goal is to use socially and culturally appropriate forms in conversations, providing and obtaining information, describing and narrating, and expressing feelings, emotions, and opinions. Students learn the language as they contrast Brazilian culture with their own. Lab. Completion of 2A fulfills the University's foreign language requirement. Prerequisite: placement test, 1A or consent of instructor.

*4-5 units, Aut (Silveira, A; Wiedemann, L), Win (Staff), Spr (Wiedemann, L)*

### **PORTLANG 11A. Accelerated Second-Year Portuguese, Part 1**

Goal is to use linguistically and culturally appropriate forms in oral narrations, descriptions, and expression of ideas and opinions. Emphasis is on expository speech. Prerequisite: placement test, 2A, 3, or consent of instructor.

*4-5 units, Aut (Wiedemann, L; Silveira, A), Win (Wiedemann, L), Spr (Wiedemann, L)*

### **PORTLANG 12A. Accelerated Second-Year Portuguese, Part 2**

Continuation of 11A. Goal is to use linguistically and culturally appropriate forms in narrations, descriptions, and expression of ideas and opinions. Emphasis on expository writing. Prerequisite: placement tests, 11A, or consent of instructor.

*4-5 units, Aut (Wiedemann, L), Win (Staff), Spr (Wiedemann, L)*

### **PORTLANG 99. Language Specials**

Prerequisite: consent of instructor. (Staff)

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff)*

### **PORTLANG 101. Reading Brazil**

Short expository readings, guest lectures, discussions, compositions on Brazilian issues. Review of grammatical structures. Vocabulary building with emphasis on common idiomatic expressions and troublesome lexical distinctions. Prerequisite: 12A or equivalent, or consent of instructor.

*3-5 units, Aut (Wiedemann, L)*

### **PORTLANG 102. Brazil in Text: Advanced Grammar and Composition**

3rd year course. Further development of academic writing. Short fictional and expository readings, guest lectures, discussions, compositions on Brazilian issues. Emphasis is on building paragraphs, organizing arguments, and justifying positions. May be used as workshop to write papers in Portuguese for another course. May be repeated once for credit. Prerequisite: 12A or equivalent, or consent of instructor.

*3-5 units, Win (Wiedemann, L)*

### **PORTLANG 103. Advanced Conversation: Brazil Today**

3rd year course. Reading and discussions on issues from current newspapers and magazines, reading comprehension strategies with online news updates, and vocabulary building with emphasis on formal expository writing. Writing practice if desired. Students

prepare short presentations and lead subsequent discussions. May be repeated once for credit. Prerequisite: 12A or consent of instructor.

*3-5 units, Spr (Wiedemann, L)*

### **PORTLANG 161. Advanced Reading in Portuguese, Fourth-year Portuguese**

The course emphasizes high-level reading comprehension and leads to advanced development of communication skills for extended formal and informal discourse in Portuguese. Prerequisite: placement test, 101, or consent of instructor.

*3-5 units, Aut (Wiedemann, L)*

### **PORTLANG 162. Advanced Writing in Portuguese, Fourth-year Portuguese**

The course has two tracks, depending on the interest of the student: a) technical writing (business letters, technical reports, expressing/supporting opinions, etc.) and b) creative writing (crônicas; short stories, poems, etc.). Prerequisite: placement test, 102, or consent of instructor.

*3-5 units, Win (Wiedemann, L)*

### **PORTLANG 163. Contemporary Issues in the Lusophone World. Fourth-Year Portuguese**

The class emphasizes formal presentations/discussions in Portuguese, based on contemporary issues in the lusophone world. Students use as linguistic models newspaper and magazine articles, TV news broadcasts, online news services, films, art exhibits, news on scientific advances, etc. Focus is on mastering high-level vocabulary/structures, as well as reading and rhetorical strategies, for appropriate use in professional settings. Prerequisite: placement test, 103 or consent of instructor.

*3-5 units, Spr (Wiedemann, L)*

### **PORTLANG 164. Translating the Lusophone world, Fourth-Year Portuguese**

For advanced students. Literary and technical translation. Readings on theoretical topics on translation; discussion, analysis and comparison of existing translations (literary and technical); individual translation projects according to students field of study, and discussion and analysis of those projects in class. Final translation project to be undertaken individually. Prerequisite: PORTLANG 250, completion of Port completion of 3rd year sequence or consent of instructor.

*3-5 units, not given this year*

### **PORTLANG 193Q. Spaces and Voices of Brazil through Film**

(S,Sem) (Same as ILAC 193Q) Stanford Introductory Seminar. The manners in which a country is perceived and defines itself is a result of many complex forces, and involves the reproduction of social relations and complex social constructions both on the part of those who live there and those who see it from a distance. The perceptions of what Brazil is and what defines the country has changed throughout times, but has conserved some clear pervasive defining traits. This course is an introduction to the history, culture, politics and artistic production of Brazil as seen through feature films, documentaries and some complementary readings. Movies include, among others, Banana is my Business, Black Orpheus, Olga, They Don't Use Black-Tie, City of God, Central Station, Gaijin, and Four Days in September-among others. In English. GER:DB-Hum, EC-GlobalCom

*3-4 units, Aut (Wiedemann, L)*

## GRADUATE COURSES IN PORTUGUESE LANGUAGE

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### **PORTLANG 250. Reading in Portuguese**

Introductory class for students with superior reading proficiency in Spanish or another Romance language. Reading competence for research and courses in Luso-Brazilian studies. Literary, journalistic, and academic readings. Fulfills University reading requirement for advanced degrees. May be offered alternate years.

*4 units, Spr (Staff)*

### **PORTLANG 297. Directed Reading**

Prerequisite: consent of instructor. (Staff)

*1-4 units, Aut (Staff), Win (Staff), Spr (Staff)*

### **PORTLANG 394. Graduate Studies in Portuguese**

**Conversation**

Prerequisite: consent of instructor. (Staff)

1-3 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**PORTLANG 395. Graduate Studies in Portuguese**

Prerequisite: consent of instructor. (Staff)

2-5 units, *Aut (Staff), Win (Staff), Spr (Staff)*

## PSYCHIATRY (PSYC) COURSES

### UNDERGRADUATE COURSES IN PSYCHIATRY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**PSYC 28SI. Alt Spring Break: Changing Face of HIV/AIDS - Confronting a Shifting Epidemic in San Francisco**

Preparation for the 2011 HIV/AIDS spring break trip. Investigates the history of HIV/AIDS in the US and worldwide, with a specific focus on the city of San Francisco. Weekly discussions grapple with social and medical issues such as the discrimination HIV+ people face in obtaining access to care and housing, the huge stigma still attached to the disease, the nature and meaning of how one tiny virus could wipe out almost an entire generation of unsuspecting men and women of all ages, and the cutting-edge technology being developed to combat HIV. Prerequisite: acceptance into the Alternative Spring Break Program.

1 unit, *Win (Staff)*

**PSYC 32SI. Exploring Autism**

Examines autism and the issues, from neurobiology to education and the role of schools, surrounding its increasing prevalence - today one of every 110 children and one of every 70 boys. Researchers, politicians, teachers, and families are searching for answers. Weekly presentations by guest lecturers capped by a service-learning component visiting and assisting local autism-focused organizations.

2 units, *Spr (Staff)*

**PSYC 71Q. Eight Ages of Man**

Ways in which a psychologically-minded attitude can add to the appreciation of literature; how literature can be used to understand issues and themes of the developing personality. Using the well-known essay by psychoanalyst Erik Erikson, *The Eight Ages of Man*, as a foundation, works reflecting elements of an age or ages are read. *Wisdom of the Ego* by Dr. George Valliant serves as a resource to better understand this model, as well as offering a more contemporary theory of personality development.

3 units, *not given this year*

**PSYC 72Q. Traumatic Stress**

Effects of traumatic events; interventions to alleviate their psychosocial impact. Events include natural disasters, illness, interpersonal violence, war, the Holocaust, and terrorism. Resilience factors that protect individuals from adverse effects. Oral and multimedia presentation.

3 units, *not given this year*

**PSYC 76Q. Temperament and Creativity in Mood Disorders**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Western cultural notions of mad geniuses and artistic temperaments. How many individuals who suffer from depression, bipolar disorder, and related problems are nonetheless productively creative. Current psychological and neurobiological research, and assessment of mood, temperament, and creativity. Emphasis is on written and oral communications and multimedia presentations. Write 2. Prerequisite: PWR 1.

4 units, *Win (Ketter, T)*

**PSYC 77Q. Deviants in Literature**

(S,Sem) Stanford Introductory Seminar. Many literary works are enhanced by, in fact demand, a psychological perspective to achieve a fully informed reading. In *The Devils* Dostoevsky uses the issues and process of anarchy as a platform on which to develop some of the most unforgettable characters in literary history. *Death in Venice* contains among its many themes the darker dynamic of paraphilia. Guilt searches for a validating crime in Kafka's *The Penal Colony*. Capote uses a journalistic style to

manage horrible fact during *In Cold Blood*. Conrad shows that telling a story of the journey outward is more nearly an analysis of the journey inward in *Heart of Darkness*. Albee's *Zoo Story* asks whether the man on the street is prepared to confront his own worst nightmare. Close reading of works such as these presents opportunities to learn about character pathology and to expand traditional approaches to literary criticism by applying a psychological perspective.

3 units, *Aut (Van Natta, J)*

**PSYC 78Q. Mental Health in Collegiate Athletes**

(S,Sem) Stanford Introductory Seminar. Developmental, psychological, social, and performance issues in collegiate sports. Topics include transition to Stanford, time management, optimizing mental fitness, coping with injuries.

3 units, *Win (Steiner, H)*

**PSYC 81Q. Fate of Orphans and Vulnerable Children in Sub Saharan Africa: The HIV/AIDS Pandemic**

(S,Sem) Stanford Introductory Seminar. The complicated forces, shaped by geopolitical history and current events, that frame all social programs, the care of orphans in the context of the AIDS pandemic in particular; history of the care of orphans; developmental effects of deprivation of care and nurturing. Guest speakers.

2 units, *Win (Solvason, H; Reicherter, D)*

**PSYC 111Q. Madness and the Womb: Medical and Artistic Approaches to Mental Illness in Women Through the Ages**

(S,Sem) Stanford Introductory Seminar. Historical and current concepts of mental illness in women. Premenstrual dysphoric disorder (PMS), postpartum depression, menopausal mood disorders, and eating disorders. Historical biopsychosocial approach. Readings include women's diaries and advice books, physicians' casebooks, and 19th- and 20th-century medical texts. Guest speakers from art and literature departments. Literary and artistic images, and the social and cultural contexts of these disorders during the last 300 years.

3 units, *Win (Williams, K)*

**PSYC 135. Sleep and Dreams**

(Same as PSYC 235) Current research on how sleep affects our daily lives. Physiology of non-REM and REM sleep, dreams and dreaming, content, psychophysiological cause, lucid dreaming, sleep need, sleep debt, daytime alertness, and performance; biological clock and circadian rhythms; sleep disorders, insomnia, narcolepsy, sleep apnea, sleepwalking, jet lag, sleeping pills, sleep and mental illness, sleep and memory, and the impact of sleep deprivation and sleep disorders on academic and social life. Multimedia presentations, guest lectures, and projects.

3 units, *Win (Dement, W), Spr (Dement, W)*

**PSYC 136A. Valuescience: Shedding Illusion to Live Better**

(Same as PSYC 236A) Apply scientific methods and principles to discern and realize value. Read history, philosophy, ecology, economics, sociology, linguistics and psychology pertinent to emergence of valuescience as foundation for an increasing range of human action. Explore perceptual, cognitive, and cultural impediments to valuescience; strategies for overcoming these; and personal and social benefits of doing so. 4 units includes weekly practice (e.g., meditation, aerobic exercise).

3-4 units, *Aut (Schrom, D; Enge, N)*

**PSYC 136B. Valuescience: Shedding Illusion to Live Better**

(Same as PSYC 236B) Continuation of 136A/236A. Apply scientific methods and principles to discern and realize value. Read history, philosophy, ecology, economics, sociology, linguistics and psychology pertinent to emergence of valuescience as foundation for an increasing range of human action. Explore perceptual, cognitive, and cultural impediments to valuescience; strategies for overcoming these; and personal and social benefits of doing so. 4 units includes weekly practice (e.g., meditation, aerobic exercise).

3-4 units, *Spr (Schrom, D)*

**PSYC 139. Changing Relationships: A Couples and Family Therapy Perspective**

(Same as PSYC 239) Basic concepts underlying family-systems theory and practice, drawing on concepts from psychology, psychiatry, biology, anthropology, and sociology. Major theoretical premises of the family-systems approach to the assessment of intimate relationships, including family structure,

development, history, intimacy and sexuality, culture, and larger systems. Tools required for assessing and changing relationships are examined and videotaped case examples are used to develop case formulations and illustrate systemic intervention strategies of major contributors to the field. Finally, applications of the family-systems approach in educational, medical, business, and community settings are considered.

3 units, Spr (Staff)

### PSYC 195. Special Laboratory Projects

Assist Behavioral Neuroendocrinology Program with data entry, library organization, and study-related projects.

1-3 units, Aut (Rasgon, N), Win (Rasgon, N), Spr (Rasgon, N), Sum (Rasgon, N)

### PSYC 199. Undergraduate Research

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN PSYCHIATRY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### PSYC 211. Child and Adolescent Psychopathology

Common syndromes in child psychiatry. Topics include diagnosis, epidemiology, etiology, course, outcome and therapeutic interventions. Prerequisite: familiarity with the basics of psychiatric and psychological discourse; psychiatry clerkship or course in psychology.

1 unit, Aut (Hinman, K; Fielding, K; Rodriguez, B)

### PSYC 212. Pediatric Psychosomatic Medicine: Psychological Issues in the Physically Ill Child

Open to MD and graduate students; qualified undergraduates by consent of instructor. Diagnosis and management of emotional disorders and difficulties in physically ill children and adolescents. Topics include psychotherapeutic and psychopharmacologic approaches to psychiatric disorders encountered in the pediatric medical health care setting. Oral and multimedia presentations. Prerequisite: familiarity with basic principles of psychopathology.

1 unit, Sum (Brown, M; Shaw, R)

### PSYC 225. Stanford Klingenstein Fellowship Program

A mentoring program designed to expose first and second year medical students to the rewarding field of child and adolescent psychiatry, and to increase awareness and education about child and adolescent mental health issues. Offers a year-long program wherein medical students are paired with child and adolescent psychiatrists, meeting bimonthly for clinical experiences and mentoring. Also provides opportunities for the students to get involved in cutting-edge scientific research, networking opportunities, and opportunities to attend professional conferences.

1 unit, Aut (Joshi, S; Londono Tobon, A), Win (Joshi, S; Londono Tobon, A), Spr (Joshi, S; Londono Tobon, A), Sum (Joshi, S)

### PSYC 233. Mindfulness: An Awareness-Based Stress Reduction Program in Medicine

An experiential program in which the participants learn the techniques of mindfulness meditation. Modeled after the program started by Jon Kabat-Zinn and featured on Bill Moyers' *Healing and the Mind*, there are approximately 400 hospitals around the world that provide mindfulness-based programs. Courses are designed to work with the mind/body relationship to stress and chronic illness. Participants are involved in a class with patients and observe the impact of the program on a variety of medical conditions. Requires daily practice of mindfulness meditation, attendance at weekly class meetings and the all day retreat, home reading, and a final paper covering the student's observations.

3 units, Aut (Spiegel, D), Win (Staff), Spr (Staff), Sum (Staff)

### PSYC 235. Sleep and Dreams

(Same as PSYC 135) Current research on how sleep affects our daily lives. Physiology of non-REM and REM sleep, dreams and dreaming, content, psychophysiological cause, lucid dreaming, sleep need, sleep debt, daytime alertness, and performance; biological clock and circadian rhythms; sleep disorders, insomnia, narcolepsy, sleep apnea, sleepwalking, jet lag, sleeping pills, sleep and mental illness, sleep and memory, and the impact of sleep

deprivation and sleep disorders on academic and social life. Multimedia presentations, guest lectures, and projects.

3 units, Win (Dement, W), Spr (Dement, W)

### PSYC 236A. Valuescience: Shedding Illusion to Live Better

(Same as PSYC 136A) Apply scientific methods and principles to discern and realize value. Read history, philosophy, ecology, economics, sociology, linguistics and psychology pertinent to emergence of valuescience as foundation for an increasing range of human action. Explore perceptual, cognitive, and cultural impediments to valuescience; strategies for overcoming these; and personal and social benefits of doing so. 4 units includes weekly practice (e.g., meditation, aerobic exercise).

3-4 units, Aut (Schrom, D; Enge, N)

### PSYC 236B. Valuescience: Shedding Illusion to Live Better

(Same as PSYC 136B) Continuation of 136A/236A. Apply scientific methods and principles to discern and realize value. Read history, philosophy, ecology, economics, sociology, linguistics and psychology pertinent to emergence of valuescience as foundation for an increasing range of human action. Explore perceptual, cognitive, and cultural impediments to valuescience; strategies for overcoming these; and personal and social benefits of doing so. 4 units includes weekly practice (e.g., meditation, aerobic exercise).

3-4 units, Spr (Schrom, D)

### PSYC 239. Changing Relationships: A Couples and Family Therapy Perspective

(Same as PSYC 139) Basic concepts underlying family-systems theory and practice, drawing on concepts from psychology, psychiatry, biology, anthropology, and sociology. Major theoretical premises of the family-systems approach to the assessment of intimate relationships, including family structure, development, history, intimacy and sexuality, culture, and larger systems. Tools required for assessing and changing relationships are examined and videotaped case examples are used to develop case formulations and illustrate systemic intervention strategies of major contributors to the field. Finally, applications of the family-systems approach in educational, medical, business, and community settings are considered.

3 units, Spr (Staff)

### PSYC 247. Principles and Practices in Care of the Dying

Detailed, systematic survey of a generalized terminal illness and elaboration of the basic principles underlying approaches to the care of the dying. Particular attention is paid to problem areas involving medical ethics and multi-culture. Practical strategies for managing the special medical and emotional problems that arise in the care of the dying patient. There may be guest speakers and patient interviews. No final examination. (Minimum: 4 students)

1 unit, not given this year

### PSYC 250. Methodology of Research in Behavioral Sciences

Statistical and methodological issues in three major psychiatric research themes: clinical psychiatric research (Aut), neuroimaging research (Win) and genetic studies (Spr). Autumn series includes: basics of inferential statistics, group comparison, analysis of variance, regression analysis, multivariate analysis, and longitudinal analysis in the context of psychiatric and behavioral research. Also included are conceptual topics such as risk factors, mediation, moderation, and causal inference. Winter series includes: functional and structural neuroimaging research methods (e.g. functional magnetic resonance imaging (fMRI), structural MRI (sMRI), diffusion tensor imaging (DTI), transcranial magnetic stimulation (TMS), near-infrared spectroscopy (NIRS), electroencephalogram (EEG)). Basic principles, statistical analysis methods, advantages and limitations, and applications are discussed. Spring series covers statistical methods and issues encountered in genetic studies of human disease.

1-3 units, Aut (Jo, B), Win (Kesler, S)

### PSYC 290. Teaching in Psychiatry

Practical experience in teaching by serving as a teaching assistant in a psychiatry course. Unit values are allotted individually to reflect the level of teaching responsibility assigned to the student.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### PSYC 299. Directed Reading in Psychiatry

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PSYC 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PSYC 399. Graduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## PSYCHOLOGY (PSYCH) COURSES

### UNDERGRADUATE COURSES IN PSYCHOLOGY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**PSYCH 1. Introduction to Psychology**

Human behavior and mental processes including the nervous system, consciousness, learning, memory, development, emotion, psychopathology, interpersonal process, society, and culture. Current research. GER:DB-SocSci

5 units, Aut (Gross, J), Win (Knutson, B), Spr (Walton, G)

**PSYCH 7Q. Language Understanding by Children and Adults**

(S,Sem) Stanford Introductory Seminar. How do we first learn to find meaning in strings of speech sounds? Understanding spoken language requires the rapid integration of acoustic information with linguistic knowledge and with conceptual knowledge based on experience with how things happen in the world. Topics include research on early development of language understanding and laboratory methods of how young children make sense of speech. Observations of preschool children and visits to Stanford laboratories. Might be repeatable for credit.

3 units, Aut (Fernald, A)

**PSYCH 8N. The New Longevity**

Adult development from the perspective of life-span theory -- a conceptual framework that views development as a series of adaptations to physical, societal and individual resources and constraints. Students will learn about demographic and medical changes, ways that individuals typically change socially, emotionally and cognitively as they move through adulthood. An understanding of the conceptual foundations of the life-span approach and place aging of young people today in historical context. GER:DB-SocSci

3 units, not given this year

**PSYCH 10. Introduction to Statistical Methods: Precalculus**

(Same as STATS 60, STATS 160) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER:DB-Math

5 units, Aut (Walther, G), Win (Thomas, E), Spr (Staff), Sum (Staff)

**PSYCH 11N. Origin of Mental Life**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Mental life in infancy; how thinking originates. How do babies construe the objects, events, people, and language that surround them? Recent advances in psychological theory, hypotheses, and evidence about how the infant human mind develops. GER:DB-SocSci

3 units, Spr (Markman, E)

**PSYCH 12N. Self Theories**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The impact of people's belief in a growing versus fixed self on their motivation and performance in school, business, sports, and relationships. How such theories develop and can be changed. GER:DB-SocSci

3 units, Aut (Dweck, C)

**PSYCH 17N. Language and Society: How Languages Shape Lives**

Do people who speak different languages think differently? What role does language play in politics, law, and religion? The role of language in individual cognition and in society. Breaking news about language and society; the scientific basis for thinking about these broad issues. GER:DB-SocSci

3 units, not given this year

**PSYCH 25N. Psychology, Inequality, and the American Dream**

Despite legal prohibitions against discrimination and the fact that many people endorse egalitarian values, inequality persists in America. What role do psychological factors play in perpetuating inequality? How can psychologically wise reforms promote equal opportunity? Topics include prejudice and discrimination, school achievement, social class, and race/ethnicity.

3 units, not given this year

**PSYCH 26N. Language Acquisition: Exploring the Minds of Children**

(F,Sem) Stanford Introductory Seminar. Language is an extraordinary competence distinguishing humans from other species, yet there is debate about the role of biology in guiding language acquisition. Does language development follow an innate "bioprogram" or does it build on more general cognitive abilities, influenced by early experience? Topics include biological and experiential influences on the emergence of linguistic ability as children learn a first language. Discussions of theory and research, visits to Stanford laboratories and observations of very young language learners.

3 units, Win (Fernald, A)

**PSYCH 27N. The Psychology of Prejudice**

Preference to freshmen. Social psychological theories and research on stereotypes, prejudice, discrimination, and racism. Psychological perspectives include those emphasizing personologic, cognitive, motivational, and sociocultural contributions to prejudice. Emphasis is on applying each approach to understanding real-world contexts such as educational and occupational contexts, and to the implications of this research for efforts to reduce prejudice and discrimination.

3 units, not given this year

**PSYCH 28N. The Cultural Shaping of Mental Health and Illness**

(F,Sem) (Same as CSRE 28N) Stanford Introductory Seminar. This seminar examines how our cultural ideas and practices shape our conceptions, perceptions, experiences, and treatment of emotional wellness and distress. We will read and discuss empirical research and case studies from psychology, anthropology, sociology, and medicine. Course requirements include weekly reading and thought papers, weekly discussion, and a final research project and presentation.

3 units, Win (Tsai, J)

**PSYCH 29N. Growing Up in America**

(F,Sem) (Same as ENGLISH 64N) Stanford Introductory Seminar. Preference to freshmen. To what extent is it possible to describe an American experience? How are different people included in or excluded from the imagined community that is America? How do a person's race, class, gender and sexuality affect his or her experience of belonging to this country? These are just some of the questions we will consider as we familiarize ourselves with the great diversity of childhood and young adult experiences of people who have grown up in America. We will read and discuss narratives written by men and women, by urban, suburban, and rural Americans, and by Asian Americans, African Americans, Syrian Americans, Native Americans, Latina/os, and European Americans. Throughout the course, we will explore how these writers write the self in literature. GER:DB-Hum, EC-AmerCul

3 units, Spr (Markus, H; Moya, P)

**PSYCH 30. Introduction to Perception**

Behavioral and neural aspects of perception focusing on visual and auditory perception. Topics include: scientific methods for studying perception, anatomy and physiology of the visual and auditory systems, color vision, depth perception, motion perception, stereopsis, visual recognition, pitch and loudness perception, speech perception, and reorganization of the visual system in the blind. GER: DB-NatSci

3 units, Aut (Grill-Spector, K)

### PSYCH 45. Introduction to Learning and Memory

The literature on learning and memory including cognitive and neural organization of memory, mechanisms of remembering and forgetting, and why people sometimes falsely remember events that never happened. Cognitive theory and behavioral evidence integrated with data from patient studies and functional brain imaging. Recommended: 1.

3 units, Spr (Wagner, A)

### PSYCH 50. Introduction to Cognitive Neuroscience

Survey of topics relating brain activity to cognitive processes and behavior. The course begins with an overview of neurophysiology and techniques to measure brain activity. We then discuss perceptual and motor processes before investigating neural responses related to attention, memory, and cognitive control. The course concludes with a discussion of brain processes related to reward, decision making, and social cognition. GER: DB-NatSci

4 units, Win (McClure, S)

### PSYCH 55. Introduction to Cognition and the Brain

Major topics in cognitive psychology and neuroscience, including empirical approaches to perception, language, learning, memory, knowledge representation, problem solving, and reasoning.

4 units, Spr (Boroditsky, L)

### PSYCH 60. Introduction to Developmental Psychology

Psychological development from birth to adulthood, emphasizing infancy and the early and middle childhood years. The nature of change during childhood and theories of development. Recommended: 1. GER:DB-SocSci

3 units, Aut (Frank, M)

### PSYCH 60A. Introduction to Developmental Psychology Section

Guided observation of children age 2-5 at Bing Nursery School. Corequisite: 60.

2 units, Aut (Hartman, B; Lomangino, A)

### PSYCH 70. Introduction to Social Psychology

Topics related to the influence of other people on individuals' thoughts, emotions, and behaviors. Factors that affect the way that we perceive ourselves and others; how people influence others; how persuasion happens; what causes us to like, love, help, or hurt others; and how social psychology helps to understand questions about law, business, and health. Fulfills WIM requirement GER:DB-SocSci

4 units, Win (Eberhardt, J)

### PSYCH 75. Introduction to Cultural Psychology

The cultural sources of diversity in thinking, emotion, motivation, self, personality, morality, development, and psychopathology. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year

### PSYCH 80. Introduction to Personality and Affective Science

Current empirical and theoretical approaches to personality. How and why do people differ? Does personality change over time? Can people change their personalities? What makes people happy? What are the physical, mental, and social consequences of personalities? Prerequisite: 1. GER:DB-SocSci

4 units, Spr (Tsai, J)

### PSYCH 90. Introduction to Clinical Psychology

History of clinical psychology, models and assessment of personality, behavior, cognition, psychopathology, and approaches to the treatment of abnormal behavior. Emphasis is on current theory, research, issues in, and the role of clinical psychology in contemporary society. Recommended: 1. GER:DB-SocSci

3 units, Aut (Gotlib, I)

### PSYCH 95. Introduction to Abnormal Psychology

Theories of and approaches to understanding the phenomenology, etiology, and treatment of psychological disorders among adults and children. Research findings and diagnostic issues. Recommended: PSYCH 1. GER:DB-SocSci, DB-SocSci

3 units, Win (Haas, A)

### PSYCH 101. Community Health Psychology

(Same as HUMBIO 128) Social ecological perspective on health emphasizing how individual health behavior is shaped by social forces. Topics include: biobehavioral factors in health; health behavior change; community health promotion; and psychological

aspects of illness, patient care, and chronic disease management. Prerequisites: HUMBIO 3B or PSYCH 1, or equivalent.

4 units, Win (Heaney, C)

### PSYCH 102. Longevity

(Same as HUMBIO 149L, NENS 202) Interdisciplinary. Challenges to and solutions for the young from increased human life expectancy: health care, financial markets, families, work, and politics. Guest lectures from engineers, economists, geneticists, and physiologists. GER:DB-SocSci

4 units, Win (Carstensen, L; Rando, T)

### PSYCH 104. Uniquely Human

Are humans the only species that displays altruism, experiences uncertainty, and is capable of language and deception? Sources include empirical and theoretical papers in comparative psychology. Prerequisite: 1.

3 units, not given this year

### PSYCH 104S. Affective Neuroscience

New frontiers in neuroscience research on emotion. Topics such as neuroscience methodologies, genetic contributions to the experience of emotion, neural bases of emotion, animal models of emotion, and biological approaches to emotional or affective dysfunction.

3 units, not given this year

### PSYCH 105S. General Psychology

The scientific study of behavior and mental processes focusing on history, methods, and findings of the field of psychology. How psychology affects people's lives. How to evaluate psychological claims.

3 units, Sum (Staff)

### PSYCH 107S. Introduction to Social Psychology

A comprehensive overview of social psychology with in-depth lectures exploring the history of the field, reviewing major findings and highlighting areas of current research. Focus is on classic studies that have profoundly changed our understanding of human nature and social interaction, and, in turn, have triggered significant paradigm shifts within the field. Topics include: individuals and groups, conformity and obedience, attraction, intergroup relations, and judgment and decision-making.

3 units, not given this year

### PSYCH 108S. Social Psychology

The history of the field, major findings, and current research. Focus is on classic studies that have changed understanding of human nature and social interaction and significant paradigm shifts within the field. Topics include: individuals and groups; conformity and obedience; attraction; intergroup relations; and judgment and decision making.

3 units, Sum (Staff)

### PSYCH 109S. Cognitive Psychology

Theories and empirical findings in the field of cognitive psychology. How do people perceive? How do they remember? How do they think? How such questions are addressed in the areas of memory, language, perception, reasoning, judgment, and decision making.

3 units, Sum (Staff)

### PSYCH 110. Research Methods and Experimental Design

Structured research exercises and design of an individual research project. Prerequisite: consent of instructor. GER:DB-SocSci

5 units, not given this year

### PSYCH 111S. Abnormal Psychology

What is it like to be clinically depressed, to see things no one else sees, to be a victim of a traumatic experience? What are psychological, biological, and social factors involved in depression, schizophrenia, or post-traumatic stress disorder? The subjective experience, causal factors, clinical presentation, methods of assessment, treatment, and sociocultural context of psychological disorders.

3 units, Sum (Staff)

### PSYCH 113S. Developmental Psychology

A unified view of the developing child. How developmental psychology can be applied to the general understanding of children and the process of growing into adulthood. Findings in the areas of the child's cognitive, language, social, neurological, physical, emotional, personality, and moral development. Strengths and

weaknesses of various perspectives and approaches scientists use to learn about children.

3 units, Sum (Staff)

### **PSYCH 115S. Personality Psychology**

Focus on current empirical and theoretical approaches to personality. Lectures will be organized around the following questions central to personality research: How and why do people differ? How do we measure individual differences? Does personality change over time? How does personality interact with sociocultural factors to influence behavior? What makes people happy? What are the physical, mental, and social consequences of personalities?

3 units, Sum (Staff)

### **PSYCH 119. Psychology and Public Policy**

(Same as PUBLPOL 172) Applications of psychology to public and social policy. Factors that affect the influence of psychological research and individual psychology on the creation of policy, and the influence of policy on attitudes and behavior at the personal and societal levels. Topics include education, health care, and criminal justice.

5 units, not given this year

### **PSYCH 119S. The Psychology of Stigma**

What obese people, African Americans, people with physical disabilities, lesbians, and Muslims have in common: social stigma. The social and psychological experiences of individuals living with social stigmas. Classic and current theory and research. Topics include: function, nature, and types of stigma; how stigmatized individuals view their identities and cope; mental and cognitive consequences; and interactions between stigmatized and non-stigmatized. Literature employing research methods including neuroimaging and social interaction studies.

3 units, Sum (Staff)

### **PSYCH 120. Cellular Neuroscience: Cell Signaling and Behavior**

(Same as BIO 153) Neural interactions underlying behavior. Prerequisites: PSYCH 1 or basic biology. GER: DB-NatSci

4 units, Aut (Wine, J)

### **PSYCH 121. Ion Transport and Intracellular Messengers**

(Same as PSYCH 228) (Graduate students register for 228.) Ion channels, carriers, ion pumps, and their regulation by intracellular messengers in a variety of cell types. Recommended: 120, introductory course in biology or human biology.

1-3 units, Spr (Wine, J)

### **PSYCH 124S. Applying Psychology to Modern Life**

A scientific examination of everyday modern life. Topics include: how research on attention and memory can be applied to improve study strategies; how advertisers persuade and how their techniques can be resisted; how interpersonal conflicts can be avoided through knowledge of common errors in judging other people; and how studies on attraction and love can improve close relationships.

3 units, Sum (Staff)

### **PSYCH 125. Beyond Stereotype Threat: Claiming a Rightful Place in an Academic Community**

(Same as CTL 130) Stereotype threat as mitigating the quality of a student's test performance; its impact on academic success at Stanford. How to reduce the impact of stereotype threat on Stanford students.

3 units, not given this year

### **PSYCH 131. Language and Thought**

(Same as PSYCH 262) The psychology of language including: production and understanding in utterances; from speech sounds to speaker's meaning; children's acquisition of the first language; and the psychological basis for language systems. Language functions in natural contexts and their relation to the processes by which language is produced, understood, and acquired. Prerequisite: 1 or LINGUIST 1. GER:DB-SocSci

4 units, Aut (Clark, H)

### **PSYCH 132. Introduction to Cognitive and Information Sciences**

(Same as LINGUIST 144, PHIL 190, SYMSYS 100) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial

intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci

4 units, Spr (Goodman, N)

### **PSYCH 133. Human Cognitive Abilities**

(Same as EDUC 369) Psychological theory and research on human cognitive abilities; their nature, development, and measurement; and their importance in society. Persistent controversies and new areas of research, recent perspectives on the nature-nurture debate and the roles of genetics, health and education in shaping HCAs. Prerequisite: PSYCH 1 or equivalent. (PSE) GER:DB-SocSci, DB-SocSci

3 units, not given this year

### **PSYCH 134. Seminar on Language and Deception**

Deceptive, exploitative, and other noncooperative uses of language. How is language used to deceive or exploit? Where are these techniques practiced and why? What are the personal, ethical, and social consequences of these practices? Prerequisite: 131, LINGUIST 1, or PHIL 181. GER:DB-SocSci

3 units, Win (Clark, H)

### **PSYCH 138. Wise Interventions**

(Same as PSYCH 238) Classic and contemporary psychological interventions; the role of psychological factors in social reforms for social problems involving healthcare, the workplace, education, intergroup, relations, and the law. Topics include theories of intervention, the role of laboratory research, evaluation, and social policy.

4 units, not given this year

### **PSYCH 140S. Sport Psychology**

Focus is on research methods and findings and how to apply these findings to students' own performance. Topics include methods of performance enhancement, psychological characteristics of top performers, group dynamics and processes, effective leadership practices, the effects of stereotyping on sport participation and performance, and debates in the field. Emphasis will be on sports, although most topics can be applied to performance in general.

3 units, not given this year

### **PSYCH 141. Cognitive Development**

How children's thinking and mental abilities change from infancy on. The major theories and explanations of intellectual growth. Sources include classic findings and state-of-the-art research on cognitive development. Prerequisite: 1. GER:DB-SocSci

3 units, Aut (Markman, E)

### **PSYCH 141S. Health Psychology**

Why is it so difficult for people to stick to an exercise plan? Why don't people take their doctor's advice? Why aren't public health announcements more effective? This course addresses these questions by providing an overview of health psychology: the scientific study of behaviors and cognitive processes related to health states. In this course, we will discuss the mind/body connection, the influence of social/cultural and physical environments on our health, cognitive processing of health information, health belief models, and the link between emotion and health. Understanding the interactions between these biological, psychological, and social influences on individuals' health states is crucial for developing effective health communication and intervention programs. We will approach all course topics from both theory-driven and applied perspectives.

3 units, Sum (Staff)

### **PSYCH 142S. The Psychology of Social Media**

People interact with the world around them largely through mediated means: internet, television, radio, etc. This course will survey current social media: e.g. Facebook, Twitter, YouTube, etc. and popular culture in order to highlight the psychological processes at play. Topics will include: social belonging, interpersonal attraction, identity, bias, and cyberbullying. Students will be expected to learn how to study social media and popular culture using psychological methods.

3 units, Sum (Staff)

### **PSYCH 143. Developmental Anomalies**

For advanced students. Developmental disorders and impairments. What the sparing of mental abilities in otherwise devastating disorders (or vice versa) tells about the mind and its development in the normal case. Examples of disorders and impairments:

autism, congenital blindness, deafness, mental retardation, attachment disorder, and Williams syndrome. Limited enrollment. Prerequisite: consent of instructor. GER:DB-SocSci

*3 units, not given this year*

**PSYCH 145. Seminar on Infant Development**

For students preparing honors research. Conceptual and methodological issues related to research on developmental psycholinguistics; training in experimental design; and collection, analysis, and interpretation of data.

*1-2 units, Spr (Fernald, A)*

**PSYCH 146. Observation of Children**

Learning about children through guided observations at Bing Nursery School, Psychology's lab for research and training in child development. Physical, emotional, social, cognitive, and language development. Recommended: 60. GER:DB-SocSci

*3-5 units, Win (Hartman, B; Robinette, K; Lomangino, A), Spr (Staff)*

**PSYCH 147. Development in Early Childhood**

Supervised experience with young children at Bing Nursery School. 3 units require 4 hours per week in Bing classrooms throughout the quarter; 4 units require 7 hours per week; 5 units require 10.5 hours per week. Seminar on developmental issues in the Bing teaching/learning environment. Recommended: 60 or 146, or consent of instructor.

*3-5 units, Aut (Wise, B; O'Hanlon, E; Wise, B), Win (Winters, J; Chandra, P; O'Hanlon, E), Spr (Wise, B; Chandra, P; O'Hanlon, E)*

**PSYCH 148. Introduction to Counseling**

(Same as EDUC 130) The goal of counseling is to help others to create more satisfying lives for themselves. Clients learn to create and capitalize on unexpected events to open up new opportunities. The success of counseling is judged, not by the words and actions of the counselor, but by the progress that the client makes in the real world after counseling itself is ended. Students are encouraged to exert their full efforts within reasonable time limits to improve their competence. (PSE)

*3 units, Win (Krumboltz, J)*

**PSYCH 149. The Infant Mind: Cognitive Development over the First Year**

How do babies learn so much in so little time? Emphasis is on cognitive and perceptual development, and the relationship between brain and behavior in infancy. Prerequisite: 1. Recommended: 60 or 141. GER:DB-SocSci

*3 units, not given this year*

**PSYCH 150. Race and Crime**

The goal of this course is to examine social psychological perspectives on race, crime, and punishment in the United States. Readings will be drawn not only from psychology, but also from sociology, criminology, economics, and legal studies. We will consider the manner in which social psychological variables may operate at various points in the criminal justice system- from policing, to sentencing, to imprisonment, to re-entry. Conducted as a seminar.

*3 units, Aut (Eberhardt, J)*

**PSYCH 151. Emotion Regulation and Psychopathology**

A broad overview of specific emotion regulation impairments in various psychopathologies and discussion of how current treatment protocols are likely to aid recovery by forming more adaptive emotion regulation ability. Topics include: Foundations and Emotion regulation models, Emotion regulation impairments in Mood disorders (Unipolar Depression and Bipolar Disorder), Anxiety disorders (Social Phobia, Post Traumatic Stress Disorder, General Anxiety Disorder), Eating disorders (Anorexia and Bulimia Nervosa), and Personality Disorders (Narcissistic Personality Disorder, Borderline Personality Disorder).

*3 units, not given this year*

**PSYCH 152. Mediation for Dispute Resolution**

(Same as EDUC 131) Mediation as more effective and less expensive than other forms of settling disputes such as violence, lawsuits, or arbitration. How mediation can be structured to maximize the chances for success. Simulated mediation sessions.

*3 units, Aut (Krumboltz, J)*

**PSYCH 154. Judgment and Decision-Making**

Survey of research on how we make assessments and decisions particularly in situations involving uncertainty. Emphasis will be on instances where behavior deviates from optimality. Overview of recent works examining the neural basis of judgment and decision-making.

*3 units, not given this year*

**PSYCH 155. Introduction to Comparative Studies in Race and Ethnicity**

(Same as CSRE 196C, ENGLISH 172D, SOC 146) How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. GER:DB-SocSci, EC-AmerCul

*5 units, not given this year*

**PSYCH 157. Social Foundations of Expertise and Intelligence**

Psychological conceptions of expertise, ability, and intelligence and the research methods used to study these attributes. Topics include: research on how expertise in a diverse set of disciplines is developed; the role of practice in nurturing expertise; whether intelligence predicts life outcomes; the genetic and environmental determinants of intelligence; whether genes or environment explain racial differences such as the Black-White performance gap and the East Asian achievement advantage; and the Flynn effect.

*3 units, not given this year*

**PSYCH 158. Emotions: History, Theories, and Research**

(Same as PSYCH 259) Graduate students register for 259. Theoretical and empirical issues in the domain of emotions. The history of emotion theories, current approaches, and the interaction between emotion and cognition.

*1-3 units, not given this year*

**PSYCH 159. Psychology of Attitude Change and Social Influence**

Review of classic and current research on attitudes, attitude change and persuasion. Increase appreciation for the ways that our thoughts, actions, and feelings are shaped and manipulated by social influences.

*3 units, not given this year*

**PSYCH 161. Emotion**

(Same as PSYCH 261) (Graduate students register for 261.) The scientific study of emotion. Topics: models of emotion, emotion antecedents, emotional responses (facial, subjective, and physiological), functions of emotion, emotion regulation, individual differences, and health implications. Focus is on experimentally tractable ideas. GER:DB-SocSci

*3 units, not given this year*

**PSYCH 167. Seminar on Aggression**

The causes and modification of individual and collective aggression. Major issues in aggression: social labeling of injurious conduct, social determinants of aggression, effects of the mass media, institutionally sanctioned violence, terrorism, psychological mechanisms of moral disengagement, modification of aggressive styles of behavior, and legal sanctions and deterrence doctrines.

*3 units, not given this year*

**PSYCH 168. Emotion Regulation**

(Same as PSYCH 268) (Graduate students register for 268.) The scientific study of emotion regulation. Topics: historical antecedents, conceptual foundations, autonomic and neural bases, individual differences, developmental and cultural aspects, implications for psychological and physical health. Focus is on experimentally tractable ideas. GER:DB-SocSci

*3 units, Spr (Gross, J)*

**PSYCH 170. The Psychology of Communication About Politics in America**

(Same as COMM 164, COMM 264, POLISCI 224L) Focus is on how politicians and government learn what Americans want and how the public's preferences shape government action; how surveys measure beliefs, preferences, and experiences; how poll results are criticized and interpreted; how conflict between polls is viewed by the public; how accurate surveys are and when they are accurate; how to conduct survey research to produce accurate measurements; designing questionnaires that people can understand and use comfortably; how question wording can

manipulate poll results; corruption in survey research. Preference to juniors, seniors, graduate students.

4 units, Spr (Krosnick, J)

#### **PSYCH 171. Research Seminar on Aging**

Two quarter practicum exposes students to multiple phases of research by participating in a laboratory focusing on social behavior in adulthood and old age. Review of current research; participation in ongoing data collection, analysis, and interpretation. Prerequisites: 1, research experience, and consent of instructor.

4 units, Aut (Carstensen, L), Win (Carstensen, L), Spr (Carstensen, L)

#### **PSYCH 179. The Psychology of Everyday Morality**

(Same as PSYCH 270) (Graduate students register for 270.) For graduate students, coterminals, and senior Psychology majors. Traditional approaches focusing on how morality colors mundane human activities such as eating and on morality as defined by actors themselves rather than social scientists. Moral hypocrisy, food and disgust, taboo trade-offs, moral reproach, and prejudice with compunction. Limited enrollment. Prerequisite: 70 and consent of instructor.

4 units, not given this year

#### **PSYCH 183. Mind, Culture, and Society Research Core**

Required of students in the mind, culture, and society specialization track. Research training on a variety of projects that explore how social identities such as race, class, gender, and culture affect psychological experiences across domains including education, law, business and health. Must participate for two consecutive quarters. Permission of instructor required. May be repeated for credit.

2-3 units, Aut (Markus, H; Eberhardt, J), Win (Eberhardt, J; Markus, H), Spr (Markus, H; Eberhardt, J)

#### **PSYCH 186. The Psychology of Everyday Morality**

(Same as PSYCH 286) Recent literature on morality from a social psychological perspective. Topics include moral judgment, moral intuitions, moral hypocrisy, moral identity, moralization, moral reproach, shame and guilt, temptations, and self-regulation. Contemporary psychological research emphasizing descriptive approaches (what people actually do) rather than normative ones (what one should do).

3 units, not given this year

#### **PSYCH 189. Stanford Center on Longevity Practicum**

Student involvement in an interdisciplinary center aimed at changing the culture of human aging using science and technology.

3 units, Aut (Carstensen, L), Win (Carstensen, L), Spr (Carstensen, L), Sum (Staff)

#### **PSYCH 190. Special Research Projects**

May be repeated for credit. Prerequisite: consent of instructor.

1-6 units, Aut (Staff), Win (Staff), Spr (Staff)

#### **PSYCH 193. Special Laboratory Research**

May be repeated for credit. Prerequisites: 1, 10, and consent of instructor.

1-6 units, Aut (Dweck, C; Sullivan, M), Win (Dweck, C), Spr (Staff), Sum (Staff)

#### **PSYCH 194. Reading and Special Work**

Independent study. May be repeated for credit. Prerequisite: consent of instructor.

1-3 units, Aut (Wise, B), Win (Staff), Spr (Staff), Sum (Staff)

#### **PSYCH 195. Special Laboratory Projects**

Independent study. May be repeated for credit. Prerequisites: 1, 10, and consent of instructor.

1-6 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **PSYCH 196. Contemporary Psychology: Overview of Theory, Research, Applications**

Capstone experience for juniors and seniors that bridges course work with research opportunities. Lectures representing the department's areas: social, personality, developmental, neuroscience, and cognitive psychology. Faculty present current research. Discussions led by advanced graduate students in the field represented by that week's guest. Students write research proposals. Small grants available to students to conduct a pilot study of their proposed research. Limited enrollment. Prerequisite: consent of instructor. GER:DB-SocSci

3 units, Aut (Clark, H)

#### **PSYCH 197. Advanced Research**

Limited to students in senior honors program. Weekly research seminar, independent research project under the supervision of an appropriate faculty member. A detailed proposal is submitted at the end of Autumn Quarter. Research continues during Winter and Spring quarters as 198. A report demonstrating sufficient progress is required at the end of Winter Quarter.

1-4 units, Aut (Ross, L)

#### **PSYCH 198. Senior Honors Research**

Limited to students in the senior honors program. Finishing the research and data analysis, written thesis, and presentation at the Senior Honors Convention. May be repeated for credit.

1-4 units, Aut (Staff), Win (Ross, L), Spr (Ross, L)

#### **PSYCH 199. Temptations and Self Control**

(Same as PSYCH 299) (Graduate students register for 299.) Why do people do things that they come to regret? How can people minimize behavior such as exercise avoidance, angry words, overeating, unsafe sex, and dangerous driving? Sources include classical and current research from experimental psychology, neuroscience, behavioral economics, and neuroeconomics. Real-world applications.

2 units, not given this year

#### **PSYCH 289. Sensory Representations in Language and Memory**

Is recollecting an experience similar to re-experiencing it? How closely tied is our knowledge to the perceptual representations and processes that may have given rise to it? What role do perceptuo-motor representations play in understanding language? We will review the recent literature on perceptual re-activation in episodic memory, perceptual grounding in semantic representations, and neural reuse of perceptual mechanisms for abstract thought. Emphasis will be placed on recent research with an interdisciplinary scope, including discussion of theory, behavioral findings, neural mechanisms, and computational models. Prerequisite: Psych 207 or consent of instructor.

1-3 units, not given this year

## **GRADUATE COURSES IN PSYCHOLOGY**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **PSYCH 192. Career and Personal Counseling**

(Same as EDUC 134, EDUC 234) Theories and methods for helping people create more satisfying lives for themselves. Simulated counseling experiences.

3 units, Spr (Krumboltz, J)

#### **PSYCH 201. Social Psychology Lecture Series**

Required of social psychology graduate students. Guest lecturers from Stanford and other institutions. May be repeated for credit. (Miller)

3 units, not given this year

#### **PSYCH 202. Cognitive Neuroscience**

Graduate core course. The anatomy and physiology of the brain. Methods: electrical stimulation of the brain, neuroimaging, neuropsychology, psychophysics, single-cell neurophysiology, theory and computation. Neuronal pathways and mechanisms of attention, consciousness, emotion, language, memory, motor control, and vision. Prerequisite: 207 or consent of instructor.

3 units, Spr (McClure, S)

#### **PSYCH 203. MODELS OF LANGUAGE ACQUISITION**

How do children learn to understand and produce their native language? Language acquisition is a core topic in cognitive science and has been a key test case for formal approaches. Topics include: learnability theory, grammatical approaches, connectionist models, and probabilistic models.

3 units, not given this year

#### **PSYCH 204. Computation and cognition: the probabilistic approach**

This course will introduce the probabilistic approach to cognitive science, in which learning and reasoning are understood as inference in complex probabilistic models. Examples will be drawn from areas including concept learning, causal reasoning, social cognition, and language understanding. Formal modeling

ideas and techniques will be discussed in concert with relevant empirical phenomena.

*3-4 units, Win (Goodman, N)*

**PSYCH 204A. Human Neuroimaging Methods**

This course introduces the student to human neuroimaging using magnetic resonance scanners. The course is a mixture of lectures and hands-on software tutorials. The course begins by introducing basic MR principles. Then various MR measurement modalities are described, including several types of structural and functional imaging methods. Finally algorithms for analyzing and visualizing the various types of neuroimaging data are explained, including anatomical images, functional data, diffusion imaging (e.g., DTI) and magnetization transfer. Emphasis is on explaining software methods used for interpreting these types of data.

*3 units, Aut (Wandell, B; Dougherty, R)*

**PSYCH 204B. Computational Neuroimaging: Analysis Methods**

Neuroimaging methods with focus on data analysis techniques. Basic MR physics and BOLD signals. Methods for neuroimaging data using real and simulated data sets. Topics include: linearity of the fmri signal; time versus space resolution tradeoffs; noise in neuroimaging; correlation analysis; visualization methods; cortical reconstruction, inflation, and flattening; reverse engineering; can cognitive states be predicted from brain activation? Prerequisite: consent of instructor.

*1-3 units, Win (Grill-Spector, K)*

**PSYCH 205. Foundations of Cognition**

Topics: attention, memory, language, similarity and analogy, categories and concepts, learning, reasoning, and decision making. Emphasis is on processes that underlie the capacity to think and how these are implemented in the brain and modeled computationally. The nature of mental representations, language and thought, modular versus general purpose design, learning versus nativism. Prerequisite: 207 or consent of instructor.

*1-3 units, Spr (Staff)*

**PSYCH 206. Cortical Plasticity: Perception and Memory**

Seminar. Topics related to cortical plasticity in perceptual and memory systems including neural bases of implicit memory, recognition memory, visual priming, and perceptual learning. Emphasis is on recent research with an interdisciplinary scope, including theory, behavioral findings, neural mechanisms, and computational models. May be repeated for credit. Recommended: 30, 45

*1-3 units, not given this year*

**PSYCH 207. Professional Seminar for First-Year Ph.D.**

**Graduate Students**

Required of and limited to first-year Ph.D. students in Psychology. Major issues in contemporary psychology with historical backgrounds.

*2-3 units, Aut (McClelland, J)*

**PSYCH 207B. Professional Development Seminar in Psychology**

For graduate students who wish to gain professional development skills to pursue an academic career. May be repeated for credit. Course is intended for second year Ph.D. student in Psychology but open to all years.

*0-1 units, not given this year*

**PSYCH 208. Advanced Topics in Self-Defense**

Seminar. Threat to the self and how people deal with them. Readings from social psychological areas including social comparison, self-affirmation, self-completion, self-discrepancy, shame and guilt, terror management, dimensions of self-worth, self-regulation, self-presentation, psychophysiology, and moral identity. Enrollment limited to 15.

*1-3 units, not given this year*

**PSYCH 209A. The Neural Basis of Cognition: A Parallel Distributed Processing Approach**

Models and data to support the notion that brain representations are patterns of activity over widely dispersed populations of neurons, that mental processing involves coherent distributed engagement of neurons in these populations, and that learning and development occur primarily through the adjustment of the strengths of the connections between the neurons. How models may be used to explain aspects of human cognition, development,

and effects of brain damage on cognition. Prerequisites: linear algebra, differential equations, a programming course, and two courses in psychology or neuroscience.

*3-4 units, not given this year*

**PSYCH 209B. Applications of Parallel Distributed Processing Models to Cognition and Cognitive Neuroscience**

Research seminar. Builds on project proposal developed in 209A. Hands-on use of computational models to address phenomena in cognitive psychology and cognitive neuroscience. Classic and modern papers, and student presentations of their own projects. Final paper in the form of a journal article submission. Prerequisite: 209A.

*4 units, not given this year*

**PSYCH 210. Foundations of Memory**

Memory and human cognition. Behavioral and neural data indicate that memory is not a unitary faculty but consists of multiple systems that support learning and remembering, each with its own processing characteristics and neurobiological substrates. What is known about memory emphasizing the cognitive and neural architectures of working, declarative, and nondeclarative memory. Recommended: 45.

*3 units, Aut (Wagner, A)*

**PSYCH 211. Developmental Psychology**

Prerequisite: 207 or consent of instructor.

*1-3 units, Win (Markman, E; Dweck, C)*

**PSYCH 212. Social Psychology**

Classic studies in experimental social psychology. Group and group dynamics; compliance and social pressure; conformity, cooperation, conflict, and social dilemmas; attraction and preference; attitudes and attitude change; social comparison, emotion, and affiliation; dissonance, consistency, and self-justification; attribution and self-perception; judgment and decision making, motivation, automaticity, and culture. Prerequisite: 207 or consent of instructor.

*1-3 units, Aut (Lepper, M; Ross, L)*

**PSYCH 213. Affective Science**

This seminar is the core graduate course on affective science. We consider definitional issues, such as differences between emotion and mood, as well as issues related to the function of affect, such as the role affect plays in daily life. We review autonomic, neural, genetic, and expressive aspects of affective responding. Later in the course we discuss the role of affect in cognitive processing, specifically how affective states direct attention and influence memory, as well as the role of affect in decision making. We will also discuss emotion regulation and the strategic control of emotion; the cultural shaping of emotional experience and regulation; disorders of emotion; and developmental trajectories of experience and control from early to very late life. Meetings are discussion based. Attendance and active participation are required. Prerequisite: 207 or consent of instructor.

*3 units, Win (Gross, J)*

**PSYCH 215. Mind, Culture, and Society**

Social psychology from the context of society and culture. The interdependence of psychological and sociocultural processes: how sociocultural factors shape psychological processes, and how psychological systems shape sociocultural systems. Theoretical developments to understand social issues, problems, and polity. Works of Baldwin, Mead, Asch, Lewin, Burner, and contemporary theory and empirical work on the interdependence of psychology and social context as constituted by gender, ethnicity, race, religion, and region of the country and the world. Prerequisite: 207 or consent of instructor.

*3 units, Win (Staff)*

**PSYCH 217. Topics and Methods Related to Culture and Emotion**

Preference to graduate students. How cultural factors shape emotion and other feeling states. Empirical and ethnographic literature, theories, and research on culture and emotion. Applications to clinical, educational, and occupational settings. Research in psychology, anthropology, and sociology. May be repeated for credit.

*1-3 units, not given this year*

**PSYCH 218. Early Social Cognitive Development**

Current literature on social and cognitive development in infancy

emphasizing the interface between the two domains. May be repeated for credit. Prerequisite: consent of instructor.

*1-3 units, not given this year*

**PSYCH 220. Special Topics in Cognitive Development**

For graduate students and advanced undergraduates. How research from cognitive development, decision making, and preference change can inform interventions on important social issues. May be repeated for credit.

*1-3 units, not given this year*

**PSYCH 221. Applied Vision and Image Systems**

The design and control of color imaging devices (display, printers, cameras, and scanners). Aspects of human vision relevant to software and hardware design. Topics: digital halftoning, color calibration, color metrics, flicker sensitivity, motion compensation, human spatial resolution, visual masking, JPEG principles, printer design, scanner design, and color software architecture. Lab.

*1-3 units, Win (Wandell, B)*

**PSYCH 223. Social Norms**

(Same as OB 630) This course covers research and theory on the origins and function of social norms. Topics include the estimation of public opinion, the function of norms as ideals and standards of judgment, and the impact of norms on collective and individual behavior. In addition to acquainting students with the various forms and functions of social norms the course will provide students with experience in identifying and formulating tractable research questions.

*4 units, Win (Miller, D)*

**PSYCH 224. Research Topics in Emotion Regulation**

Current research findings and methods, ongoing student research, and presentations by visiting students and faculty. May be repeated for credit. Prerequisite: consent of instructor.

*1 unit, not given this year*

**PSYCH 225. Special Neuroscience Seminar with Dr. Shinobu Kitayama**

How will culture influence the human mind? Is culture a superficial overlay on the basic, universal computational machine called the mind? Alternatively, is culture a crucial constitutive element of the mind? If so, what are specific mechanisms underlying this constitution process? And what theoretical framework do we need to make a visible progress on these questions? More generally, how can we start discussing meaningfully and productively about various problematic dichotomies such as mind versus body, culture versus biology, and nurture versus nature? An emerging field of cultural neuroscience has the potential of addressing these and other important questions and thus bridging natural, behavioral, and social sciences of the human mind. This seminar reviews the field of cultural neuroscience. It starts with a discussion of some theoretical foundations of the field, including cultural psychology, cognitive and social neuroscience, evolutionary psychology, and population genetics (PA)

*1-2 units, Spr (Staff)*

**PSYCH 226. Models and Mechanisms of Memory**

Current topics in memory as explored through computational models addressing experimental findings and physiological and behavioral investigations. Topics include: explicit and implicit learning; role of MTL structures in learning and memory; and single versus dual processes approaches to recognition. May be repeated for credit.

*1-3 units, not given this year*

**PSYCH 228. Ion Transport and Intracellular Messengers**

(Same as PSYCH 121) (Graduate students register for 228.) Ion channels, carriers, ion pumps, and their regulation by intracellular messengers in a variety of cell types. Recommended: 120, introductory course in biology or human biology.

*1-3 units, Spr (Wine, J)*

**PSYCH 232. Brain and Decision Making**

Neuroeconomics combines experimental techniques from neuroscience, psychology, and experimental economics, such as electrophysiology, fMRI, eye tracking, and behavioral studies, and models from computational neuroscience and economics. May be repeated for credit. Prerequisite: consent of instructor.

*3 units, Spr (Knutson, B)*

**PSYCH 233. MATLAB and Psychtoolbox for the Behavioral Sciences**

Topics such as experiment design, stimulus presentation, counterbalancing, response collection, data analysis, and plotting. Programming experiments. Final project programming a complete behavioral experiment relevant to student's research. Prerequisite: introductory programming such as CS 105 or 106, or consent of instructor.

*1-3 units, Spr (Hoffmann Bion, R; Thibodeau, P; Tang, G)*

**PSYCH 234. Topics in Affective Disorders**

Current research topics including epidemiology and phenomenology of affective disorders, psychological theories of depression, gender differences in affective disorders, cognitive and social functioning of depressed persons, psychobiology of affective disorders, depression in children, postpartum depression, suicide issues in the treatment of depression, and cultural aspects of affective disorders. Prerequisite: graduate standing in Psychology or consent of instructor.

*1-3 units, Win (Gotlib, I)*

**PSYCH 236. The Social Self**

The psychological bases of complex social organization such as work teams and national and cultural identities. Topics include: the effect of social influence on perception, beliefs, attitudes, emotions, and behaviors; shared intentionality; and the relational bases of learning, motivation, and performance. Works of classic scholars (Asch, Lewin) and contemporary researchers in social, developmental, and comparative psychology. Prerequisite: graduate standing or consent of instructor.

*3 units, Aut (Walton, G)*

**PSYCH 238. Wise Interventions**

(Same as PSYCH 138) Classic and contemporary psychological interventions; the role of psychological factors in social reforms for social problems involving healthcare, the workplace, education, intergroup, relations, and the law. Topics include theories of intervention, the role of laboratory research, evaluation, and social policy.

*4 units, not given this year*

**PSYCH 239. Formal and Computational Approaches in Psychology and Cognitive Science**

Do psychology and cognitive science need formal theories and/or explicit computational models? What insights should such things provide? What is the proper relationship between different theoretical and modeling approaches? Between different levels or kinds of analysis? Where do informally stated theories fit in and what are the roles of formal and computational modeling approaches in relation to other less explicitly specified forms of theorizing? This seminar will explore these issues and compare different formal and computational model variants, especially connectionist and probabilistic models, within 3-4 different target domains. Possible target domains include categorization, property induction, causal learning, perceptual decision making, language acquisition, semantics and pragmatics, and mid-level vision.

*3 units, Spr (McClelland, J; Goodman, N)*

**PSYCH 243. General Development Seminar**

May be repeated for credit. Prerequisite: consent of instructors.

*1-2 units, Win (Markman, E; Dweck, C; Fernald, A)*

**PSYCH 244. Psychology of Aging**

Theory and research in gerontology. Normal and abnormal changes that occur in biological, cognitive, and psychological aging. Emphasis is on the environmental factors that influence the aging process. Prerequisite: graduate standing in Psychology or consent of instructor.

*1-3 units, Spr (Staff)*

**PSYCH 245. Social Psychological Perspectives on Stereotyping and Prejudice**

Classic and contemporary social psychological approaches to prejudice and stereotyping. Emphasis is on how stereotypes are employed and maintained, and the influence of stereotyping and prejudice on behavior in domains including education, employment, politics, and law. Limited enrollment.

*3 units, not given this year*

**PSYCH 246. Cognitive and Neuroscience Friday Seminar**

Participant presentations. May be repeated for credit. Prerequisite: graduate standing in psychology or neuroscience program.

1 unit, Aut (Wagner, A), Win (Wagner, A), Spr (Wagner, A)

**PSYCH 247. Fundamentals of Neuroscience for Non-Life-Scientists**

Human behavior and the human brain and how it enables perception, learning, decision making, planning, and action with a focus on how neuroscience may be presented or used in law, business, or education contexts. Neurotechnology and experimental methods used to conduct research.

2 units, not given this year

**PSYCH 249. Human Motivation**

Current research and theory including questions concerning the nature of human motives, intrinsic motivation, self-regulation, the roles of affect and cognition, and lifespan and cultural influences on motivation. Prerequisite: 207 or consent of instructors.

1-3 units, Spr (Lepper, M; Dweck, C)

**PSYCH 250. High-Level Vision: Object Representation**

(Same as CS 431) (Formerly CS423 High-Level Vision: Behaviors, Neurons, and Computational Models) Interdisciplinary seminar focusing on understanding how computations in the brain enable rapid and efficient object perception. Covers topics from multiple perspectives drawing on recent research in Psychology, Neuroscience, Computer Science and Applied Statistics. Emphasis on discussing recent empirical findings, methods and theoretical debates in the field. Topics include: theories of object perception, neural computations underlying invariant object perception, how visual exemplars and categories are represented in the brain, what information is present in distributed activations across neural populations and how it relates to object perception, what modern statistical and analytical tools there are for multi-variate analysis of brain activations.

1-3 units, Spr (Li, F; Grill-Spector, K)

**PSYCH 251. Affective Neuroscience**

Theory and research. Comparative and human research approaches map affective function to neuroanatomical and neurochemical substrates. Prerequisite: consent of instructor.

3 units, Spr (Knutson, B)

**PSYCH 252. Statistical Methods for Behavioral and Social Sciences**

For students who seek experience and advanced training in empirical research. Analysis of data from experimental through factorial designs, randomized blocks, repeated measures; regression methods through multiple regression, model building, analysis of covariance; categorical data analysis through two-way tables. Integrated with the use of statistical computing packages. Prerequisite: 10 or equivalent.

1-6 units, Aut (Monin, B; Thomas, E)

**PSYCH 253. Statistical Theory, Models, and Methodology**

Practical and theoretical advanced data analytic techniques such as loglinear models, signal detection, meta-analysis, logistic regression, reliability theory, and factor analysis. Prerequisite: 252 or EDUC 257.

3 units, Spr (Thomas, E)

**PSYCH 254. Lab in Experimental Methods**

Laboratory class in experimental methods for psychology, with a focus on technical/computer-based methods. Programming experience helpful although not required. Topics include data collection on the web, data management and data analysis.

3 units, Win (Frank, M)

**PSYCH 257. Individually Supervised Practicum**

Satisfies INS requirements for curricular practical training. Relevant experience for graduate students as part of their program of study. May be repeated for credit. Prerequisites: graduate standing in Psychology, consent of adviser. (Staff)

3-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**PSYCH 258. Graduate Seminar in Social Psychology Research**

For students who are already or are planning to become involved in research on social construal and the role that it plays in a variety of phenomena, notably the origin and escalation of conflict.

1-3 units, Aut (Walton, G), Win (Markus, H), Spr (Markus, H)

**PSYCH 259. Emotions: History, Theories, and Research**

(Same as PSYCH 158) Graduate students register for 259. Theoretical and empirical issues in the domain of emotions. The history of emotion theories, current approaches, and the interaction

between emotion and cognition.

1-3 units, not given this year

**PSYCH 260. Reinforcement Learning in the Brain**

Recent advances in neural and behavioral models of reinforcement learning. Reinforcement learning models. Key findings in applying models to brain activity and behavior.

2-3 units, Aut (McClure, S)

**PSYCH 261. Emotion**

(Same as PSYCH 161) (Graduate students register for 261.) The scientific study of emotion. Topics: models of emotion, emotion antecedents, emotional responses (facial, subjective, and physiological), functions of emotion, emotion regulation, individual differences, and health implications. Focus is on experimentally tractable ideas.

3 units, not given this year

**PSYCH 261A. Learning and Cognition in Activity**

(Same as EDUC 295) Methods and results of research on learning, understanding, reasoning, problem solving, and remembering, as aspects of participation in social organized activity. Principles of coordination that support cognitive achievements and learning in activity settings in work and school environments.

3 units, Spr (Pea, R)

**PSYCH 262. Language and Thought**

(Same as PSYCH 131) The psychology of language including: production and understanding in utterances; from speech sounds to speaker's meaning; children's acquisition of the first language; and the psychological basis for language systems. Language functions in natural contexts and their relation to the processes by which language is produced, understood, and acquired. Prerequisite: 1 or LINGUIST 1.

4 units, Aut (Clark, H)

**PSYCH 265. Social Psychology and Social Change**

(Same as EDUC 371X, PUBLPOL 305B) The course is intended an exploration of the major ideas, theories, and findings of social psychology and their applied status. Special attention will be given to historical issues, classic experiments, and seminal theories, and their implications for topics relevant to education. Contemporary research will also be discussed. Advanced undergraduates and graduate students from other disciplines are welcome.

2-3 units, Spr (Cohen, G)

**PSYCH 266. Current Debates in Learning and Memory**

Memory is not a unitary faculty, but consists of multiple forms of learning and remembering. The cognitive and neural architectures of memory, focusing on the application of functional brain imaging (primarily fMRI and ERP). Recommended: 45

1-3 units, Win (Wagner, A)

**PSYCH 267. Human Memory: Facts, Fallacies, and Fragile Powers**

Seminar. Applications of memory concepts in everyday life and in social and clinical settings. Topics include personal identity, childhood amnesia, autobiographic memory, emotions and memory, memory distortions, illusions, self-serving biases, recovery of repressed memories, false memories, implicit memories, and unconscious influences on social behavior, with applications to psychopathology.

1-3 units, not given this year

**PSYCH 268. Emotion Regulation**

(Same as PSYCH 168) (Graduate students register for 268.) The scientific study of emotion regulation. Topics: historical antecedents, conceptual foundations, autonomic and neural bases, individual differences, developmental and cultural aspects, implications for psychological and physical health. Focus is on experimentally tractable ideas.

3 units, Spr (Gross, J)

**PSYCH 269. Graduate Seminar in Affective Science**

May be repeated for credit. Prerequisite: graduate standing in Psychology. (Tsai)

1 unit, Aut (Gotlib, I), Win (Gotlib, I), Spr (Gotlib, I)

**PSYCH 270. The Psychology of Everyday Morality**

(Same as PSYCH 179) (Graduate students register for 270.) For graduate students, coterms, and senior Psychology majors. Traditional approaches focusing on how morality colors mundane human activities such as eating and on morality as defined by

actors themselves rather than social scientists. Moral hypocrisy, food and disgust, taboo trade-offs, moral reproach, and prejudice with compunction. Limited enrollment. Prerequisite: 70 and consent of instructor.

*4 units, not given this year*

**PSYCH 272. Special Topics in Psycholinguistics**

May be repeated for credit. Prerequisite: consent of instructor.

*1-3 units, Spr (Clark, H)*

**PSYCH 273. Graduate Seminar on Language, Cognition, and Perception**

Current topics and debates. Readings from psychology, linguistics, neuroscience, ethology, anthropology, and philosophy. May be repeated for credit.

*3 units, not given this year*

**PSYCH 274. Graduate Research Workshop on Psychological Interventions**

(Same as EDUC 287X) Psychological research has the potential to create novel interventions that promote the public good. This workshop will expose students to psychologically 'wise' intervention research and to support their efforts to conduct such interventions, especially in the context of education, broadly conceived, as well as other areas. The first part of the class will address classic interventions and important topics in intervention research, including effective delivery mechanisms, sensitive behavioral outcomes, the role of theory and psychological process, and considerations of the role of time and of mechanisms that can sustain treatment effects over time. In the second part of the class, students will present and receive feedback on their own ongoing and/or future intervention research. Prerequisite: Graduate standing in Psychology or Education, or consent of instructor.

*3 units, Win (Walton, G; Cohen, G)*

**PSYCH 275. Graduate Research**

Intermediate-level research undertaken with members of departmental faculty. Prerequisite: consent of instructor. (Staff)

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**PSYCH 279. Topics in Cognitive Control**

The processes that enable flexible behavior by biasing contextually relevant perceptual, mnemonic, and response representations or processing pathways. Cognitive control is central to volitional action, allowing work with memory, task/goal states, and overriding inappropriate responses. Current models of cognitive control, functional neuroimaging, and neuropsychological evidence. Recommended: 45.

*1-3 units, not given this year*

**PSYCH 281. Practicum in Teaching**

Enrollment limited to teaching assistants in selected Psychology courses. May be repeated for credit.

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**PSYCH 282. Practicum in Teaching PSYCH 1**

Logistical TA training including: preparing for sections; creating, correcting exams; grading an iterative writing assignment; office hours; review sessions; developing audiovisual expertise; communicating via coursework. Review of student evaluations with instructor to set goals and strategies. Second quarter focuses on pedagogical improvement. Limited to current PSYCH 1 TAs. May be repeated for credit.

*1-2 units, Aut (Gross, J), Win (Knutson, B), Spr (Walton, G)*

**PSYCH 283. International Conflict Resolution Colloquium**

(Same as IPS 250A) (Same as LAW 611.) Sponsored by the Stanford Center on International Conflict and Negotiation (SCICN). Conflict, negotiation, and dispute resolution with emphasis on conflicts and disputes with an international dimension, including conflicts involving states, peoples, and political factions such as the Middle East and Northern Ireland. Guest speakers. Issues including international law, psychology, and political science, economics, anthropology, and criminology.

*1 unit, Win (Weiner, A)*

**PSYCH 284. Computational Modeling of a Range of Neural Circuits**

Lectures, student presentations, and extensive software exercises. Focus on quantifiable models of neural signaling, starting with physical specification of input signals, sensory transductions, spiking, and mean electrical field potentials, and the inter-relation

to BOLD signals (fMRI). Applications will be drawn from many examples, but there will be a particular focus on the visual pathways and how measurements and models relate to visual perception.

*1-3 units, Spr (Staff)*

**PSYCH 286. The Psychology of Everyday Morality**

(Same as PSYCH 186) Recent literature on morality from a social psychological perspective. Topics include moral judgment, moral intuitions, moral hypocrisy, moral identity, moralization, moral reproach, shame and guilt, temptations, and self-regulation. Contemporary psychological research emphasizing descriptive approaches (what people actually do) rather than normative ones (what one should do).

*3 units, not given this year*

**PSYCH 288. Hierarchical Linear Modeling for Psychological Sciences**

HLM is a statistical theory and a computer program used to analyze multi-level data, such as trials within participants or students within classrooms. HLM allows researchers to analyze data at each level of analysis separately, to partition the total variance across different levels, to explain variance at each level separately using level-appropriate predictors, and to model cross-level interactions. How to use the HLM program and to model various types of multi-level data using it. May be repeated for credit.

*1-3 units, not given this year*

**PSYCH 290. Graduate Research Methods**

Primary tool use for psychologists: basics of experiment design; computer-based experiments; web-based experiments; data analysis packages and data presentation; exploratory statistics; eye-tracking methods; psychophysiology methods; survey construction; corpus and discourse analysis; and perhaps hypnosis. Prerequisite: Ph.D. student in Psychology.

*2 units, not given this year*

**PSYCH 291. Psychology Teaching Methods**

Open to graduate students and advanced undergraduates. Principles of good teaching. Students practice teaching skills.

*1-2 units, not given this year*

**PSYCH 297. Seminar for Coterminial Master of Arts**

Contemporary issues and student research. Student and faculty presentations.

*1-2 units, Spr (Staff)*

**PSYCH 299. Temptations and Self Control**

(Same as PSYCH 199) (Graduate students register for 299.) Why do people do things that they come to regret? How can people minimize behavior such as exercise avoidance, angry words, overeating, unsafe sex, and dangerous driving? Sources include classical and current research from experimental psychology, neuroscience, behavioral economics, and neuroeconomics. Real-world applications.

*2 units, not given this year*

**PSYCH 303. Human and Machine Hearing**

Topics: Linear and nonlinear system theory applied to sound and hearing; understanding how to model human hearing in the form of algorithms that can process general sounds efficiently; how to construct, display, and interpret auditory images; how to extract features compatible with machine-learning systems; how to build systems that extract information from sound to do a job; and example applications of machine hearing to speech, music, security and surveillance, personal sound diaries, smart house, etc. Prerequisites: basic calculus and algorithms.

*3 units, not given this year*

**PSYCH 373. Research Seminar: Mind, Brain, and Computation**

Faculty and student research presentations focusing on work linking cellular, systems, cognitive, behavioral, and computational neuroscience. Limited to affiliates of the Center for Mind, Brain and Computation. May be repeated for credit.

*1 unit, Aut (McClelland, J)*

**PSYCH 383. International Conflict: Management and Resolution**

(Same as IPS 250) (Same as LAW 656) Interdisciplinary. Theoretical insights and practical experience in resolving inter-

group and international conflicts. Sources include social psychology, political science, game theory, and international law. Personal, strategic, and structural barriers to solutions. How to develop a vision of a mutually bearable shared future, trust in the enemy, and acceptance of loss that a negotiated settlement may produce. Spoilers who seek to sabotage agreements. Advantages and disadvantages of unilateral versus reciprocal measures. Themes from the Stanford Center of International Conflict and Negotiation (SCICN). Prerequisite for undergraduates: consent of instructor.

3 units, Win (Weiner, A)

#### **PSYCH 459. Frontiers in Interdisciplinary Biosciences**

(Same as BIO 459, BIOC 459, BIOE 459, CHEMENG 459, CHEM 459) Students register through their affiliated department; otherwise register for CHEMENG 459. For specialists and non-specialists. Sponsored by the Stanford BioX Program. Three seminars per quarter address scientific and technical themes related to interdisciplinary approaches in bioengineering, medicine, and the chemical, physical, and biological sciences. Leading investigators from Stanford and the world present breakthroughs and endeavors that cut across core disciplines. Pre-seminars introduce basic concepts and background for non-experts. Registered students attend all pre-seminars; others welcome. See <http://biox.stanford.edu/courses/459.html>. Recommended: basic mathematics, biology, chemistry, and physics.

1 unit, Aut (Robertson, C), Win (Robertson, C), Spr (Robertson, C)

#### **PSYCH 801. Master's TGR Project**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **PSYCH 802. PhD TGR Dissertation**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## PUBLIC POLICY (PUBLPOL) COURSES

### UNDERGRADUATE COURSES IN PUBLIC POLICY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **PUBLPOL 53SI. Creating and Analyzing Public Policy**

How to get your work into the public discourse. Students work in groups to draft policy recommendations for local policymakers serving as project sponsors.

2 units, Win (Abrams, W)

#### **PUBLPOL 101. Politics and Public Policy**

(Same as POLISCI 123, PUBLPOL 201) How policies come to be formed. How interests compete within public institutions to turn ideas into policies. Examples of this process from contemporary policy areas, including tax, social welfare, and environmental policy; results evaluated using equity and efficiency criteria. Prerequisite: POLISCI 2 (or equivalent for Public Policy majors). GER:DB-SocSci

5 units, Spr (Frisby, T)

#### **PUBLPOL 102. Organizations and Public Policy**

(Same as PUBLPOL 202) Analysis of organizational processes emphasizing organizations that operate in a non-market environment. Prerequisite: ECON 1A. GER:DB-SocSci

5 units, Spr (Bendor, J)

#### **PUBLPOL 103B. Ethics and Public Policy**

(Same as MS&E 197, STS 110) Ethical issues in science- and technology-related public policy conflicts. Focus is on complex, value-laden policy disputes. Topics: the nature of ethics and morality; rationales for liberty, justice, and human rights; and the use and abuse of these concepts in policy disputes. Case studies from biomedicine, environmental affairs, technical professions, communications, and international relations. GER:DB-Hum, EC-EthicReas

5 units, Win (McGinn, R)

#### **PUBLPOL 103D. Ethics and Politics of Public Service**

(Same as CSRE 178, ETHICSOC 133, HUMBIO 178, PHIL

175A, PHIL 275A, POLISCI 133) Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford. GER:DB-SocSci

5 units, Win (Mitchell, T)

#### **PUBLPOL 104. Economic Policy Analysis**

(Same as ECON 150, PUBLPOL 204) The relationship between microeconomic analysis and public policy making. How economic policy analysis is done and why political leaders regard it as useful but not definitive in making policy decisions. Economic rationales for policy interventions, methods of policy evaluation and the role of benefit-cost analysis, economic models of politics and their application to policy making, and the relationship of income distribution to policy choice. Theoretical foundations of policy making and analysis, and applications to program adoption and implementation. Prerequisites: ECON 50, and 102B.

5 units, Win (Rosston, G; Clemens, J)

#### **PUBLPOL 106. Economics of Legal Rules and Institutions**

(Same as ECON 154, PUBLPOL 206) Design and consequences of laws, given alternative policy objectives. Welfareist approach to legal policy; deontological perspectives including Kant, Locke, Mill, and Rawls. Economic efficiency and agent rationality, law as mitigation of market and cognitive failures, effects of law on expectations and incentives, balancing costs of type I and type II legal errors. Empirical studies of law's effects. Applications: property, tort, contract, antitrust, discrimination, crime, legal procedure. Examples chiefly from U.S. law, but analytical tools of general applicability. Prerequisite: ECON 50. WIM

4-5 units, Aut (Owen, B)

#### **PUBLPOL 107. Public Finance and Fiscal Policy**

(Same as ECON 141) What role should and does government play in the economy? What are the effects of government spending, borrowing, and taxation on efficiency, equity and economic growth? The course covers economic analysis, statistical evidence and historical and current fiscal policy debates in the U.S. and around the world. Policy topics: budget surpluses/deficits; tax reform; social security, public goods, and externalities; fiscal federalism; public investment; and cost-benefit analysis. Prerequisites: 51, 52 (can be taken concurrently).

5 units, Spr (Boskin, M)

#### **PUBLPOL 121. Policy and Climate Change**

Science and economics, including recent findings. History and evolution of local, state, regional, national, and international policy. California's recent landmark climate change bill. Future policy prospects, emphasizing national and international levels.

4-5 units, not given this year

#### **PUBLPOL 122. Biosecurity and Bioterrorism Response**

(Same as PUBLPOL 222, SURG 222) Open to medical, graduate, and undergraduate students. Explores the questions of how well the US and global healthcare systems are prepared to withstand a bioterrorism attack, what the parallels are to withstanding a pandemic, what can be done to prevent an attack. How the medical/healthcare field, government, and the technology sectors are involved in biosecurity and bioterrorism response, how these sectors interface, and the multidisciplinary challenges involved. Focus is on current biosecurity challenges, including global bio-surveillance, making the medical diagnosis, isolation, containment, hospital surge capacity, stockpiling and distribution of countermeasures, food and agriculture biosecurity, new promising technologies for detection of bio-threats and countermeasures. 2 unit option for class participation and short paper. 4 unit option includes a research paper.

2-4 units, Win (Buchman, M)

#### **PUBLPOL 125. Law and Public Policy**

How lawyers argue and judges decide cases versus other forms of rhetoric and decision making. Legal reasoning and dispute resolution within Anglo-American common law and in comparative perspective across diverse societies. The relationship

between law and public policy on current issues related to culture, technology, race, education, sexuality, abortion, gun control, civil liberties, national security and the environment. Sources include judicial opinions, interdisciplinary legal scholarship, ethnography, literature, and film. GER:DB-SocSci

5 units, Spr (Greenberg, J)

**PUBLPOL 135. Regional Politics and Decision Making in Silicon Valley**

Dynamics of regional leadership and decision making in Silicon Valley, a complex region composed of 40 cities and four counties without any overarching framework for governance. Formal and informal institutions shaping outcomes in the region. Case studies include transportation, workforce development, housing and land use, and climate change.

3 units, Spr (Benest, F; Hancock, R)

**PUBLPOL 154. Politics and Policy in California**

State politics and policy making, including the role of the legislature, legislative leadership, the governor, special interests, campaign finance, the public, ballot initiatives, the state constitution, the media, and the role of research organizations. Case studies include pension reform, health care, term limits and other political reform measures, open primaries, infrastructure improvements, and the budget. Changes in constitutional and in state statutes that can improve policy making in California.

5 units, Win (Nation, J; Crane, D)

**PUBLPOL 156. Health Care Policy and Reform**

Competing health care reform proposals at the state and local levels. Focus is on California including proposals for expanding coverage for children, a single payer system, employer and individual mandates. Recent proposals in other states including Massachusetts, Maine, and Vermont; their relation to national efforts. Attention to local reform efforts, including in San Francisco. Prospects for future policy.

5 units, Spr (Nation, J)

**PUBLPOL 168. Global Organizations: Managing Diversity**

(Same as SOC 168, SOC 268) Analytical tools derived from the social sciences to analyze global organizations and projects, and applied to the tradeoffs between different designs of teams and organizations. Focus is on tribal mentality and how to design effective organizations and projects for policy implementation within and across institutional settings. Recommended: 102, MS&E 180, or SOC 160. GER:DB-SocSci

5 units, Win (Meyersson Milgrom, E)

**PUBLPOL 172. Psychology and Public Policy**

(Same as PSYCH 119) Applications of psychology to public and social policy. Factors that affect the influence of psychological research and individual psychology on the creation of policy, and the influence of policy on attitudes and behavior at the personal and societal levels. Topics include education, health care, and criminal justice.

5 units, not given this year

**PUBLPOL 183. Philanthropy and Social Innovation**

Philanthropy's role in modern society and the translation of its vision and capital into social action. Topics: individual giving; philanthropic landscape and models; foundation mission and infrastructure; philanthropic strategy and grantmaking; accountability and knowledge management; global and corporate philanthropy; and public policy engagement. Readings: business school cases and industry articles. Guest speakers include individual donors and foundation presidents. Mandatory discussion section. Enrollment limited. GER:DB-SocSci

4 units, Spr (Arrillaga, L)

**PUBLPOL 184. Poverty and Policies in Developing Economies**

Economic models of growth and poverty, differences in growth rates among countries, and the persistence of poverty. Models of physical and human capital accumulation, and recent theories of the importance of institutions, social capital, and political factors. The effectiveness of social policies in developing countries, emphasizing India, in the light of theories of growth and poverty, and in terms of immediate goals and long-term consequences. Policies include schooling and health, anti-poverty, banking, and political decentralization. Prerequisites: ECON 1A,B, and ECON 50. GER:DB-SocSci

5 units, Win (Kochar, A)

**PUBLPOL 194. Technology Policy**

(Same as PUBLPOL 294) How the U.S. federal government promotes, uses, and regulates new technologies; how it decides technology policies; and debates over how to use technology to advance national goals. Topics: American attitudes towards technology; technologies for defense, homeland security, energy, health, and economic competitiveness; and when and how to regulate nanotechnology, medical enhancements, government surveillance, and Internet privacy. Recommended: POLISCI 2.

4-5 units, Win (Windham, P)

**PUBLPOL 197. Junior Honors Seminar**

(Same as ECON 198) Primarily for students who expect to write an honors thesis. Weekly sessions discuss writing an honors thesis proposal (prospectus), submitting grant applications, and completing the honors thesis. Readings focus on writing skills and research design. Students select an adviser, outline a program of study for their senior year, and complete a prospectus by the end of the quarter. Enrollment limited to 25.

5 units, Spr (Rothwell, G)

**PUBLPOL 198. Directed Readings in Public Policy**

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**PUBLPOL 199. Senior Research**

May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff)

**PUBLPOL 200A. Senior Seminar**

Students conduct original research for oral presentations and a paper on a policy-related topic. Topic and methods of analysis determined by student in consultation with instructor. Goal is to improve analytical, research, writing, and communication skills. Prerequisites: core courses in Public Policy or consent of instructor.

3 units, Aut (Ito, K)

**PUBLPOL 200B. Senior Seminar: Conducting Policy Analysis for Local Agencies**

Small student teams conduct policy analyses requested by local policymakers. With guidance from the instructor and policymaker, each team researches a real-world problem and devises implementable policy recommendations to help address it. The project culminates in a professional report and presentation to the policymaker. Prerequisites: core courses in Public Policy or consent of instructor. GER:DB-SocSci

5 units, Win (Sprague, M)

**PUBLPOL 200C. Senior Seminar: Conducting Policy analysis for Local Agencies**

Small student teams conduct policy analyses requested by local policymakers. With guidance from the instructor and policymaker, each team researches a real-world problem and devises implementable policy recommendations to help address it. The project culminates in a professional report and presentation to the policymaker. Prerequisites: core courses in Public Policy or consent of instructor.

5 units, Spr (Windham, P)

**PUBLPOL 307. Justice**

(Same as ETHICSOC 171, IPS 208, PHIL 171, PHIL 271, POLISCI 3P, POLISCI 136S) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality. GER:DB-Hum, EC-EthicReas

4-5 units, Aut (Dougherty, T)

**GRADUATE COURSES IN PUBLIC POLICY**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**PUBLPOL 103C. Justice**

(Same as ETHICSOC 171, IPS 208, PHIL 171, PHIL 271, POLISCI 3P, POLISCI 136S) Focus is on the ideal of a just society, and the place of liberty and equality in it, in light of contemporary theories of justice and political controversies. Topics include protecting religious liberty, financing schools and

elections, regulating markets, assuring access to health care, and providing affirmative action and group rights. Issues of global justice including human rights and global inequality.

4-5 units, Aut (Dougherty, T)

#### **PUBLPOL 201. Politics and Public Policy**

(Same as POLISCI 123, PUBLPOL 101) How policies come to be formed. How interests compete within public institutions to turn ideas into policies. Examples of this process from contemporary policy areas, including tax, social welfare, and environmental policy; results evaluated using equity and efficiency criteria. Prerequisite: POLISCI 2 (or equivalent for Public Policy majors).

5 units, Spr (Frisby, T)

#### **PUBLPOL 202. Organizations and Public Policy**

(Same as PUBLPOL 102) Analysis of organizational processes emphasizing organizations that operate in a non-market environment. Prerequisite: ECON 1A.

5 units, Spr (Bendor, J)

#### **PUBLPOL 204. Economic Policy Analysis**

(Same as ECON 150, PUBLPOL 104) The relationship between microeconomic analysis and public policy making. How economic policy analysis is done and why political leaders regard it as useful but not definitive in making policy decisions. Economic rationales for policy interventions, methods of policy evaluation and the role of benefit-cost analysis, economic models of politics and their application to policy making, and the relationship of income distribution to policy choice. Theoretical foundations of policy making and analysis, and applications to program adoption and implementation. Prerequisites: ECON 50, and 102B.

5 units, Win (Rosston, G; Clemens, J)

#### **PUBLPOL 206. Economics of Legal Rules and Institutions**

(Same as ECON 154, PUBLPOL 106) Design and consequences of laws, given alternative policy objectives. Welfarist approach to legal policy; deontological perspectives including Kant, Locke, Mill, and Rawls. Economic efficiency and agent rationality, law as mitigation of market and cognitive failures, effects of law on expectations and incentives, balancing costs of type I and type II legal errors. Empirical studies of law's effects. Applications: property, tort, contract, antitrust, discrimination, crime, legal procedure. Examples chiefly from U.S. law, but analytical tools of general applicability. Prerequisite: ECON 50.

4-5 units, Aut (Owen, B)

#### **PUBLPOL 222. Biosecurity and Bioterrorism Response**

(Same as PUBLPOL 122, SURG 222) Open to medical, graduate, and undergraduate students. Explores the questions of how well the US and global healthcare systems are prepared to withstand a bioterrorism attack, what the parallels are to withstanding a pandemic, what can be done to prevent an attack. How the medical/healthcare field, government, and the technology sectors are involved in biosecurity and bioterrorism response, how these sectors interface, and the multidisciplinary challenges involved. Focus is on current biosecurity challenges, including global bio-surveillance, making the medical diagnosis, isolation, containment, hospital surge capacity, stockpiling and distribution of countermeasures, food and agriculture biosecurity, new promising technologies for detection of bio-threats and countermeasures. 2 unit option for class participation and short paper. 4 unit option includes a research paper.

2-4 units, Win (Buchman, M)

#### **PUBLPOL 231. Health Care Regulation, Finance and Policy**

(Same as HRP 391) (SAME AS LAW 348, MGTECON 331) Provides the legal, institutional, and economic background necessary to understand the financing and production of health services in the U.S. Potential topics include: health reform, health insurance (Medicare and Medicaid, employer-sponsored insurance, the uninsured), medical malpractice and quality regulation, pharmaceuticals, the corporate practice of medicine, regulation of fraud and abuse, and international comparisons.

3 units, Win (Bundorf, M; Kessler, D)

#### **PUBLPOL 236. Law and Public Policy: Issues in Implementation**

(Same as LAW 636). This seminar will focus on issues related to achieving successful implementation of the goals of legislation. It is widely recognized that the goals of legislation often are not realized and that the failure frequently rests in breakdowns in the

implementation process by the agencies and organizations charged with implementing the legislation. In response to problems in implementation, the institutional context of public policy implementation is changing. One category of innovations, known by names such as management-based regulation and evidence-based social service delivery, gives broad discretion to street-level service providers but subjects them to intensive monitoring and disciplined performance comparison. Another category applies market concepts to regulation or social services, for example, by creating tradeable rights (e.g., pollution allowances) or vouchers (for schools, housing, or healthcare). These, and other, new approaches are affecting bo

3 units, Win (Wald, M; Simon, W)

#### **PUBLPOL 294. Technology Policy**

(Same as PUBLPOL 194) How the U.S. federal government promotes, uses, and regulates new technologies; how it decides technology policies; and debates over how to use technology to advance national goals. Topics: American attitudes towards technology; technologies for defense, homeland security, energy, health, and economic competitiveness; and when and how to regulate nanotechnology, medical enhancements, government surveillance, and Internet privacy. Recommended: POLISCI 2.

4-5 units, Win (Windham, P)

#### **PUBLPOL 298. Directed Readings in Public Policy**

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **PUBLPOL 301A. Microeconomics**

(Same as IPS 204A) Microeconomic concepts relevant to decision making. Topics include: competitive market clearing, price discrimination; general equilibrium; risk aversion and sharing, capital market theory, Nash equilibrium; welfare analysis; public choice; externalities and public goods; hidden information and market signaling; moral hazard and incentives; auction theory; game theory; oligopoly; reputation and credibility. Prerequisites: ECON 50 and MATH 51 or equiv.

4 units, Aut (Bulow, J)

#### **PUBLPOL 301B. Cost-Benefit Analysis and Evaluation**

(Same as IPS 204B) Relationship between microeconomic analysis and public policy making. Economic rationales for policy interventions. Economic models of politics and application to policy making. Relationship of income distribution to policy choice. Welfare evaluation of public and private decisions. Education policy, social security, and health care. Prerequisites: PUBLPOL 301A (for graduate students) or ECON 50, and 102B (for undergraduates).

4-5 units, Spr (Ishii, J)

#### **PUBLPOL 302A. Introduction to American Law**

(Same as AMSTUD 179, POLISCI 122) For undergraduates. The structure of the American legal system including the courts; American legal culture; the legal profession and its social role; the scope and reach of the legal system; the background and impact of legal regulation; criminal justice; civil rights and civil liberties; and the relationship between the American legal system and American society in general.

3-5 units, Aut (Friedman, L)

#### **PUBLPOL 302B. Economic Analysis of Law**

(Same as LAW 277.) This course will provide a broad overview of the scholarly field known as law and economics. The focus will be on how legal rules and institutions can correct market failures. We will discuss the economic function of contracts and, when contracts fail or are not feasible, the role of legal remedies to resolve disputes. We will also discuss at some length the choice between encouraging private parties to initiate legal actions to correct externalities and governmental actors, such as regulatory authorities. Extensive attention will be given to the economics of litigation, and to how private incentives to bring lawsuits differs from the social value of litigation. The economic motive to commit crimes, and the optimal governmental response to crime, will be studied in depth. Specific topics within the preceding broad themes include: the Coase Theorem; the tradeoff between the certainty and severity of punishment; the choice between ex ante and ex post sanctions; neg

4 units, Win (Polinsky, M)

#### **PUBLPOL 303A. Political Methodology I**

(Same as POLISCI 150A, POLISCI 350A) Introduction to

probability and statistical inference, with applications to political science and public policy. Prerequisite: elementary calculus.

5 units, Aut (Grimmer, J)

### **PUBLPOL 303B. Political Methodology II**

(Same as POLISCI 150B, POLISCI 350B) Understanding and using the linear regression model in a social-science context: properties of the least squares estimator; inference and hypothesis testing; assessing model fit; presenting results for publication; consequences and diagnosis of departures from model assumptions; outliers and influential observations, graphical techniques for model fitting and checking; interactions among exploratory variables; pooling data; extensions for binary responses.

5 units, Win (Rivers, D)

### **PUBLPOL 303C. Bayesian Statistics and Econometrics**

(Same as LAW 243.) Linear and nonlinear regression, covariance structures, panel data, qualitative variable models, nonparametric and semiparametric methods, time series, Bayesian model averaging and variable selection. It explores Bayesian methodology including Markov Chain Monte Carlo methods, hierarchical models, model checking, mixture models, empirical Bayes approaches, approximations, and computational issues and gives some attention to foundations. Prerequisite: graduate-level econometrics or equivalent.

5 units, Spr (Strnad, J)

### **PUBLPOL 304A. Comparative Political Economy: Advanced Industrial Societies**

(Same as POLISCI 444) Political economy approaches to key policy outcomes including redistribution, the size of government, fiscal behavior, and pork-barrel politics. Theories related to institutions, interest groups, and geography, focusing on middle- and upper-income countries.

3-5 units, Spr (Cox, G)

### **PUBLPOL 305A. Judgment and Decision Making**

(Same as IPS 207A) (Same as LAW 333.) Theories and research on heuristics and biases in human inference, judgment, and decision making. Experimental and theoretical work in prospect theory emphasizing loss and risk aversion. Challenges that psychology offers to the rationalist expected utility model; attempts to meet this challenge through integration with modern behavioral economics. Decision making biases and phenomena of special relevance to public policy such as group polarization, group think, and collective action.

4 units, Win (Brest, P)

### **PUBLPOL 305B. Social Psychology and Social Change**

(Same as EDUC 371X, PSYCH 265) The course is intended an exploration of the major ideas, theories, and findings of social psychology and their applied status. Special attention will be given to historical issues, classic experiments, and seminal theories, and their implications for topics relevant to education. Contemporary research will also be discussed. Advanced undergraduates and graduate students from other disciplines are welcome.

2-3 units, Spr (Cohen, G)

### **PUBLPOL 306. Writing and Rhetoric for Policy Audiences**

This course offers hands-on learning of effective writing and presentation techniques for audiences that include policy makers, decision and stake-holders, interest groups, the media, and the public. Class time will be spent learning lessons in rhetoric, reviewing different written genres (op-ed, report, memo), editing and peer review using large screens and laptops, as well as analyzing and practicing presentations (PPT, elevator pitch, radio broadcast, board meeting). Sources include policy briefings, memos, model videos, rhetoric handouts, style manual. Students will write and make oral and multimedia arguments, individually and in teams; students will also be responsible for peer review, introducing speakers, and moderating discussions at the colloquia. Enrollment limited. Prerequisite: consent of instructor.

4 units, Win (O'Brien, A; Owen, B)

### **PUBLPOL 309. Practicum**

(Same as IPS 209) Applied policy exercises in various fields. Multidisciplinary student teams apply skills to a contemporary problem in a major policy exercise with a public sector client such as a government agency. Problem analysis, interaction with the client and experts, and presentations. Emphasis is on effective

written and oral communication to lay audiences of recommendations based on policy analysis.

1-10 units, Aut (Nation, J), Win (Nation, J)

### **PUBLPOL 309X. Public Policy Research Project**

Supervised research internship. Individual students perform policy research for outside client, applying analytical skills from core curriculum. Requires permission of program director.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff)

### **PUBLPOL 310. Master of Arts Thesis**

Restricted to students writing a master's thesis in Public Policy. May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

### **PUBLPOL 311. Public Policy Colloquium**

Weekly colloquia speaker series required for M.P.P. and M.A. in Public Policy students. Themes vary each quarter.

1 unit, Aut (Owen, B; Rosston, G), Win (Owen, B; Rosston, G), Spr (Owen, B; Rosston, G)

### **PUBLPOL 313. Issues in Science Policy**

Lecture series on significant issues in science and technology policy. Guest speakers will discuss issues including but not limited to: who should make science policy, educational dimension of science policy, manufacturing and science policy, California's stem cell policy, immigration and science policy, and the role of industry in science policy.

1 unit, not given this year

### **PUBLPOL 317. Comparing Institutional Forms: Public, Private, and Nonprofit**

(Same as EDUC 377, GSBGEN 346, SOC 377) For students interested in the nonprofit sector, those in the joint Business and Education program, and for Public Policy MA students. The focus is on the missions, functions, and capabilities of nonprofit, public, and private organizations, and the managerial challenges inherent in the different sectors. Focus is on sectors with significant competition among institutional forms, including health care, social services, the arts, and education. Sources include scholarly articles, cases, and historical materials.

4 units

### **PUBLPOL 321. Sentencing and Corrections**

(Same as LAW 621). This introductory course will familiarize students with the history, structure, and performance of America's sentencing and corrections system. Sentencing is the process by which criminal sanctions are imposed in individual cases following criminal convictions. Corrections deals with the implementation and evaluation of criminal sentences after they are handed down. In fact, the two subject areas are inseparable. The course will examine sentencing and corrections from global and historical views, from theoretical and policy perspectives, and with close attention to many problem-specific areas. We will explore sentencing theories and their application, the nature, scope and function of corrections, the impact of mass incarceration on crime and communities, the effectiveness of rehabilitation, the relationship between sanctions and crime, and the consequences of prisoner reentry. These topics will be considered as they play out in current political and policy debates.

3 units, Spr (Petersilia, J)

### **PUBLPOL 353. Science and Technology Policy**

U.S. policies for science and technology, political institutions that create and carry out these policies, processes for conducting science and developing technology, international aspects of science and technology, and the roles of scientists, engineers, and physicians in creating and implementing policy. Assignments: analyzing the politics of particular legislative proposals, assessing options for trying to reach a policy objective, and preparing mock memos and testimony.

4-5 units, Aut (Windham, P; White, R)

### **PUBLPOL 354. Economics of Innovation**

(Same as ECON 113) The modern, knowledge-based economy characterized by: rapid innovation; a dramatic increase in the rate of production of information and decline in the cost of producing it; and pervasive network externalities or increasing returns to scale. Emphasis is on the role of patents and alternative mechanisms for creating incentives for firms to innovate. Topics include: why there may be too much innovative activity; how patent laws may slow rather than help innovation; and the

interaction between public and private sector innovation. Prerequisites: 51,102B.

5 units, *Spr* (Moser, P)

### **PUBLPOL 355. Engineering Risk Analysis**

(Same as MS&E 250A) The techniques of analysis of engineering systems for risk management decisions involving trade-offs (technical, human, environmental aspects). Elements of decision analysis; probabilistic risk analysis (fault trees, event trees, systems dynamics); economic analysis of failure consequences (human safety and long-term economic discounting); and case studies such as space systems, nuclear power plants, and medical systems. Public and private sectors. Prerequisites: probability, decision analysis, stochastic processes, and convex optimization.

3 units, *NEXTYEAR*

## RADIATION ONCOLOGY (RADO) COURSES

### **UNDERGRADUATE COURSES IN RADIATION ONCOLOGY**

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **RADO 101. Readings in Radiation Biology**

1-18 units, *Aut* (Staff), *Win* (Staff), *Spr* (Staff), *Sum* (Staff)

#### **RADO 199. Undergraduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, *Aut* (Staff), *Win* (Staff), *Spr* (Staff), *Sum* (Staff)

### **GRADUATE COURSES IN RADIATION ONCOLOGY**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **RADO 202. The Basic Science of Radiation Therapy**

For residents or fellows in the training program in the Division of Radiation Therapy, and for interested medical students. Basic processes of radiation biology that underly the treatment of malignant diseases by radiation. Carcinogenesis and mutagenesis by radiation are also covered. Prerequisite: familiarity with cell biology and physiology; consent of instructor.

1 unit, *Spr* (Staff)

#### **RADO 280. Early Clinical Experience in Radiation Oncology**

Provides an observational experience as determined by the instructor and student. Prerequisite: consent of instructor.

1-2 units, *Aut* (Staff), *Win* (Staff), *Spr* (Staff), *Sum* (Staff)

#### **RADO 299. Directed Reading in Radiation Oncology**

Prerequisite: consent of instructor.

1-18 units, *Aut* (Staff), *Win* (Staff), *Spr* (Staff), *Sum* (Staff)

#### **RADO 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, *Aut* (Staff), *Win* (Staff), *Spr* (Staff), *Sum* (Staff)

#### **RADO 399. Graduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, *Aut* (Staff), *Win* (Staff), *Spr* (Staff), *Sum* (Staff)

## RADIOLOGY (RAD) COURSES

### **UNDERGRADUATE COURSES IN RADIOLOGY**

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **RAD 72Q. Fluorescence Imaging in Living Cells**

Preference to sophomores. Basic principles of fluorescent probes and their applications for live-cell imaging. Topics include: general classes of fluorescent probes together with their fluorescence mechanisms; strategies and methods for live cell labeling and imaging of specific proteins. Examples of applications of fluorescence imaging are presented. Provides students first-hand experience in fluorescence imaging research, and exploration of cutting edge techniques. Readings include current reviews and key original articles.

2 units, *not given this year*

#### **RAD 101. Readings in Radiology Research**

Prerequisite: consent of instructor.

1-18 units, *Aut* (Staff), *Win* (Staff), *Spr* (Staff), *Sum* (Staff)

#### **RAD 199. Undergraduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, *Aut* (Staff), *Win* (Staff), *Spr* (Staff), *Sum* (Staff)

### **GRADUATE COURSES IN RADIOLOGY**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **RAD 200. Imaging Anatomy and Pathology**

Supplements traditional dissection anatomy with modern cross-sectional imaging, and traditional examination of the cadaver with study of live subjects. Chest-abdominal and pelvic anatomy; congenital, traumatic, and neoplastic processes that affect these structures. Preparation for encounters with imaging tests in clinical medicine and surgery. Also open to graduate students in fields related to imaging sciences.

2 units, *not given this year*

#### **RAD 203. Introduction to Interventional Radiology**

Designed to expose pre-clinical and clinical MD students to minimally-invasive procedures using image guidance through a combination of didactics, simulation, and cathlab observation. Weekly organ-based and/or disease-based lectures are followed by simulation and faculty shadowing. Daily case-based presentations by faculty, technical demonstrations, and informal discussions reinforce the learning experience.

1 unit, *Aut* (Staff)

#### **RAD 220. Introduction to Imaging and Image-based Neuro Anatomy**

(Same as BIOE 220) The physics of medical imaging and human neuroanatomy through medical images. Emphasis is on normal anatomy, contrast mechanisms, and relative strengths of each imaging modality. Labs reinforce imaging techniques and anatomy. Prerequisites: basic biology, physics.

3 units, *Win* (Pauly, K; Zaharchuk, G)

#### **RAD 222A. Multimodality Molecular Imaging in Living Subjects I**

(Same as BIOE 222A) Focuses on instruments and chemistries for imaging of cellular and molecular processes in vivo. Basics of instrumentation physics, chemistry of molecular imaging probes, and an introduction to preclinical and clinical molecular imaging modalities.

4 units, *Aut* (Levin, C; Moseley, M)

#### **RAD 222B. Multimodality Molecular Imaging in Living Subjects II**

(Same as BIOE 222B) Focuses on molecular probes that target specific disease mechanisms. The ideal characteristics of molecular probes; how to optimize their design for use as effective imaging reagents that target specific steps in biological pathways and reveal the nature of disease through noninvasive assays.

4 units, *Win* (Levin, C; Moseley, M)

#### **RAD 222C. Multimodality Molecular Imaging in Living Subjects III**

(Same as BIOE 222C) Focuses on emerging chemistries and instruments that address unmet needs for improved diagnosis and disease management in cancer, neurological disease, cardiovascular medicine and musculoskeletal disorders. Objective is to identify problems or controversies in the field, and to resolve them through understanding the relevant primary literature.

4 units, *Spr* (Levin, C; Moseley, M)

**RAD 226. In Vivo Magnetic Resonance Spectroscopy and Imaging**

Collections of identical independent nuclear spins are described by the classical vector model of magnetic resonance imaging (MRI); however, interactions among spins, as occur in many in vivo processes, require a more complete description. Physics and engineering principles of these in vivo magnetic resonance phenomena with emphasis on current research questions and clinical applications. Topics: quantum mechanical description of magnetic resonance, density matrix theory, product operator formalism, relaxation theory and contrast mechanisms, spectroscopic imaging, spectral editing, and multinuclear studies. Prerequisites: EE 369B or familiarity with magnetic resonance, working knowledge of linear algebra.

3 units, Win (Spielman, D)

**RAD 227. Functional MRI Methods**

(Same as BIOPHYS 227) Basics of functional magnetic resonance neuroimaging, including data acquisition, analysis, and experimental design. Journal club sections. Cognitive neuroscience and clinical applications. Prerequisites: basic physics, mathematics; neuroscience recommended.

3 units, Win (Glover, G)

**RAD 228. Magnetic Resonance Imaging Programming Topics**

Primarily for students working on research projects involving MRI pulse sequence programming. Introductory and student-initiated topics in seminars and hands-on labs. Image contrast mechanisms achieved by pulse sequences that control radiofrequency and gradient magnetic fields in real time, while acquiring data in an organized manner for image reconstruction. Prerequisites: EE 369B and consent of instructor.

3 units, Sum (Hargreaves, B)

**RAD 260. Computational Methods for Biomedical Image Analysis and Interpretation**

(Same as BIOMEDIN 260) The latest biological and medical imaging modalities and their applications in research and medicine. Focus is on computational analytic and interpretive approaches to optimize extraction and use of biological and clinical imaging data for diagnostic and therapeutic translational medical applications. Topics include major image databases, fundamental methods in image processing and quantitative extraction of image features, structured recording of image information including semantic features and ontologies, indexing, search and content-based image retrieval. Case studies include linking image data to genomic, phenotypic and clinical data, developing representations of image phenotypes for use in medical decision support and research applications and the role that biomedical imaging informatics plays in new questions in biomedical science. Includes a project. Enrollment for 3 units with reduced project requirements requires instructor consent. Prerequisites: programming ability at the

3-4 units, Spr (Staff)

**RAD 261. Computational Methods for Biomedical Image Analysis and Interpretation: Lectures**

(Same as BIOMEDIN 261) Lecture component of RAD/BIOMEDIN 260. The latest biological and medical imaging modalities and their applications in research and medicine. Focus is on computational analytic and interpretive approaches to optimize extraction and use of biological and clinical imaging data for diagnostic and therapeutic translational medical applications. Topics include major image databases, fundamental methods in image processing and quantitative extraction of image features, structured recording of image information including semantic features and ontologies, indexing, search and content-based image retrieval. Case studies include linking image data to genomic, phenotypic and clinical data, developing representations of image phenotypes for use in medical decision support and research applications and the role that biomedical imaging informatics plays in new questions in biomedical science. Prerequisites: familiarity with statistics, basic biology. Knowledge of Matlab and programming recommended.

2 units, Spr (Staff)

**RAD 280. Early Clinical Experience in Radiology**

Provides an observational experience as determined by the instructor and student. Prerequisite: consent of instructor.

1-2 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**RAD 299. Directed Reading in Radiology**

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**RAD 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**RAD 399. Graduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## RELIGIOUS STUDIES (RELIGST) COURSES

### UNDERGRADUATE COURSES IN RELIGIOUS STUDIES

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**RELIGST 8N. Francis of Assisi: An Exemplary Saint**

Preference to freshmen. The making of a new model of saint at a time of cultural change in the Middle Ages. What Francis as a paradigm of the model self reveals about the ethical and religious imagination, past and present. Texts include Francis' writings and primary documents that chronicle the founding of the Franciscan order. GER:DB-Hum

3 units, not given this year

**RELIGST 10N. The Problem of God: Aquinas to the New Atheism**

Critical inquiry the meaning and credibility of theistic belief through exemplary classic formulations, modern critics, and contemporary defenders. What has the idea of God meant to serious minds in the past? And in the modern or postmodern world? GER:DB-Hum

4 units, not given this year

**RELIGST 11N. The Meaning of Life: Philosophical, Aesthetic, and Religious Perspectives**

(F,Sem) Stanford Introductory Seminar. Raise ultimate questions about life. Yes, the unexamined life is not worth living, but also the un-lived life is not worth examining. Students and professor examine their own lives in the light of questions that the readings and lectures bring up: 1. The big picture: Is there such a thing as the meaning of life? 2. What is entailed in making personal-existential sense of one's own life? 3. What constitutes the good life, lived in society? 4. How can a university education bear upon the search for a meaningful life? 5. What methods for or approaches to life can one learn from studies in the humanities? After introductory lectures, the seminar studies a series of artworks, poems, diverse texts, and a film, all of which bear on the questions mentioned above -- works such: 1. Plato's Allegory of the Cave, from The Republic 2. Manet's A bar at the Folies Bergere 3. A comparison/contrast of Monet's early (1862) Still Life and van Gogh's late (18

3 units, Win (Sheehan, T)

**RELIGST 11SC. Religion in Science Fiction and Fantasy**

How the literature of science fiction and fantasy explores current conceptions about religion. Religious themes such as free will and determinism, immortality, apocalypse, and redemption. How religion figures in the contemporary imagination.

2 units, not given this year

**RELIGST 12. Exploring Hinduism**

Hindu traditions, from approx. 1500 BCE to the present, will be selectively studied through multiple approaches, including texts, practices, rituals, arts, and politics. GER:DB-Hum, EC-GlobalCom

4 units, Aut (Hess, L)

**RELIGST 12N. Perspectives on the Good Life**

(F,Sem) Stanford Introductory Seminar. The question is how to

approach and evaluate different perspectives on the good life, especially when those perspectives are beautifully, and elusively, presented to us as texts. We will consider both classic and modern writers, from the West and from China; some are explicitly religious, some explicitly secular; some literary, some philosophical. Most of the class will revolve around our talk with each other, interpreting and questioning relatively short texts. The works we will read  $\frac{1}{2}$  by Dante, Dickenson, Zhuangzi, Shklar, and others - are not intended to be representative of traditions, of eras, or of disciplines. They do, however, present a range of viewpoint and of style that will help frame and re-frame our views on the good life. They will illustrate and question the role that great texts can play in a modern 'art of living.' Perhaps most important, they will develop and reward the skills of careful reading, attentive listening, and thoughtful disc GER:DB-Hum

3-4 units, Aut (Yearley, L)

#### **RELIGST 14. Exploring Buddhism**

From its beginnings to the 21st century. Principal teachings and practices, institutional and social forms, and artistic and iconographical expressions. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

#### **RELIGST 15A. The Bible and Archaeology**

(Same as CLASSGEN 15, JEWISHST 15A) An introduction to how archaeology has been used to illumine the Bible and biblical history. Did Abraham exist? Was there an Exodus? Did Joshua really conquer Canaan? What does archaeology reveal about ancient Israel beyond what is recorded in the Bible? This course will address such questions as it seeks to introduce biblical archaeology to students with no prior introduction to either the Bible or to archaeology.

4 units, Spr (Lederman, Z)

#### **RELIGST 15N. Travels through the Afterlife**

(F,Sem) (Same as JEWISHST 15N) Stanford Introductory Seminar. Since the beginning of civilization, humans have refused to believe that physical death is the end of life and have sought in various ways to travel into the afterlife. We cannot know what lies beyond death, but there are other kinds of insights to be learned from these otherworldly journeys. The first part of the course will explore the origins and history of the afterlife, going back in time to ancient Egypt, Mesopotamia, Israel, Greece, and medieval Europe to survey these cultures' view of death and what lies beyond it. The second part of the course will investigate what has happened to belief in the afterlife in modern American culture. Our ultimate goal is to confront one of the most difficult aspects of life--our fear of death and oblivion--and also to explore the power of thought and imagination to move beyond the confines of mortality. GER:DB-Hum

4 units, Win (Weitzman, S)

#### **RELIGST 16N. The Story of Human Virtues**

Bravery, Temperance, Generosity, Justice, Wisdom, and Friendship. Plato and Aristotle on human virtues, and select Muslim, Jewish, Christian, and secular appropriations and transformations of that Greek heritage. GER:DB-Hum

4 units, not given this year

#### **RELIGST 16SI. Religion and Spirituality: LGBTQ Perspectives,**

(Same as JEWISHST 16SI) Many lesbian, gay, bisexual, transgender, and queer (LGBTQ) people today are finding that mainstream religious institutions do not meet their unique spiritual needs, and they are looking elsewhere to create meaningful spiritual lives. Examine various ways that LGBTQ people are creating and practicing religion and spirituality in the United States. Explore the diversity of American LGBTQ religious and spiritual traditions, both within and beyond the boundaries of traditional religions. Religious and spiritual practices created by and for LGBTQ people and communities, rather than the responses of religious institutions towards the reality of LGBTQ people in their midst. Students will be required to attend an LGBTQ worship service in a tradition of their choice. By the end of the course, students will have a better understanding of, and appreciation for, the diversity of religious and spiritual traditions within LGBTQ communities.

1-2 units, not given this year

#### **RELIGST 18. Zen Buddhism**

Classical Zen thought in China, and its background, origins, and development. GER:DB-Hum, EC-GlobalCom

4 units, Spr (Bielefeldt, C)

#### **RELIGST 19S. Angels in America: Western Religion and Contemporary Culture**

How religion is presented in the media. Cultural representations that shape and disrupt this image of the relationship between being religious and being modern. How believers and doubters in Islam, Judaism, and Christianity are portrayed in popular culture. Sources include the music of Dar Williams and M.I.A., the plays of Tony Kushner, and the Canadian sitcom Little Mosque on the Prairie. How gay believers, agnostic leaders, terrorists, and born-again children of secular parents complicate the notion of religious belief in today's world.

3 units, not given this year

#### **RELIGST 20. Beyond Good and Evil: A Thematic Introduction to the Zoroastrian Religion**

Introduction to Zoroastrianism through a survey of its defining themes, including an examination of the figure of the prophet Zarathustra, modes of transmitting sacred knowledge, the nature of good and evil, and the importance of ritual practice and practitioners. Discuss how Zoroastrianism views the individual with respect to the body, the life cycle, and issues of gender and sexuality. Also discuss the intersection of religion and ethnicity that has defined Zoroastrianism from its origins in the 2nd millennium BCE in Central Asia up to the present day. GER:DB-Hum

3 units, not given this year

#### **RELIGST 20A. The Sun Also Shines on the Wicked: The Problem of Evil in Religious Thought**

If God is omnipotent, omniscient, and omnibenevolent, then why is there Evil in the world? We will read and discuss the key thinkers and foundational texts from Plato and the Book of Job to Nietzsche and Dostoevsky in order to appreciate the diverse responses to this question. We will survey approaches such as skepticism and theodicy in the works of the Classical authors and among Christian, Jewish, and Islamic thinkers like Augustine, Maimonides, and al-Ghazali. We will also engage with earlier dualist traditions such as Zoroastrianism and Manicheism, and with the responses of Enlightenment thinkers such as Leibniz, Hume, and Kant. We will conclude with the most strident atheistic responses from contemporary philosophers like Richard Dawkins and Daniel Dennett. GER:DB-Hum

3 units, Spr (Vevaina, Y)

#### **RELIGST 21. Religion in Science Fiction and Fantasy**

Science fiction and fantasy create alternate worlds that incorporate religious institutions and beliefs that illuminate how we think about religion now and for the future. Texts work off diverse religious traditions: Islam, Buddhism, Catholic and Protestant forms of Christianity, ancient Sumerian and Mayan religion, and Vodou are some that appear. Themes of free will and determinism, immortality, apocalypse and redemption. Myth, ritual, prophecy, the messianic hero, monasticism and mysticism. Texts like Dune, Snow Crash, Count Zero and the like explore religion in the contemporary imagination. Main assignment: write a short story. GER:DB-Hum

4 units, Spr (Gelber, H)

#### **RELIGST 23. Exploring Judaism**

Introduction to the varied beliefs, ritual practices, and sacred stories of Judaism, moving from foundational texts like the Bible and the Talmud to recent changes in Jewish religious life that have arisen in response to secular and feminist critiques, the Holocaust, and the emergence of the State of Israel. GER:DB-Hum

4 units, not given this year

#### **RELIGST 24. Exploring Christianity**

The historical development of Christian religious thought and practice from Jesus to the present. Emphasis is on the formation of Christianity's major teachings and their transformation and diverse expressions in the medieval, reformation, and modern periods. Readings focus on primary texts. GER:DB-Hum

4 units, not given this year

#### **RELIGST 27. Exploring Islam**

Introduction to Islam, its core beliefs and practices, through

architecture and the arts. Explore the visual language through which these have been expressed across diverse Muslim societies. GER:DB-Hum, EC-GlobalCom

*4 units, Win (Nanji, A)*

**RELIGST 29. Men and Masculinity in Islam: Through the Prism of Texts, Art, and Films**

Explore the meanings of manhood and constructions of masculine identity in Islamic tradition through major texts, art and films produced in Islamic societies and cultures. GER:DB-Hum

*4 units, Spr (Felek, O)*

**RELIGST 35. Introduction to Chinese Religions**

(Formerly 55.) Confucianism, Daoism, Buddhism, and the interchange among these belief systems and institutions. Set against the background of Chinese history, society, and culture, with attention to elite and popular religious forms. GER:DB-Hum, EC-GlobalCom

*4 units, not given this year*

**RELIGST 37. Introduction to Japanese Religions**

Major themes in Japanese religious culture, including gods, religious sites, and specialist and popular practices. Films and readings from literary, ethnographic, and historical sources in translation. GER:DB-Hum

*4 units, not given this year*

**RELIGST 46. Introduction to Daoism**

(Formerly 56.) Historical survey from origins to the present. Main schools, notions, communal rites, and individual practices, and the relation of Daoism to facets of Chinese culture. GER:DB-Hum

*4 units, not given this year*

**RELIGST 54. The Roots of Right and Wrong in Christianity, Judaism, and Islam**

What Christian, Jewish, and premodern Muslim thinkers have to say about these questions: what makes an act right or wrong; can a basis for right and wrong be identified independently of revealed religion; is observing commands and prohibitions sufficient to lead a life of virtue and refinement? Readings in primary texts. GER:DB-Hum

*4 units, not given this year*

**RELIGST 57. Millennium, Messiahs, and Mayhem**

How the apocalypse has captured the imaginations and influenced the behaviors of many Jews and Christians who predict the end of the world during their lifetimes, whether facilitated by the arrival of a human or divine emissary, preceded by a cataclysm, or announced by a renunciation of normative morals. Examples include the Book of Revelations, the Dead Sea Scrolls, the Brotherhood of the Free Spirit, Shabtai Tzvi, Jacob Frank, the Mormons, and Chabad Chasidism.

*4 units, not given this year*

**RELIGST 62. Philosophy of Religion**

Classic and modern questions in the philosophy of religion traced through Western and Eastern traditions: the coherence of theism, relativism, verification and ethics of belief, and mystical experience. Readings from traditional and modern texts. GER:DB-Hum

*4 units, not given this year*

**RELIGST 65. The Future of Christianity**

Developments affecting the world's largest religion in the new millennium: shifting demographics; declining numbers in mainline Christian denominations in North America and Europe; the emergence of global Christianity in Africa, Asia, and South America; Christianity after the baby boomer generation; flash point issues (sexuality, global economic system, politics, bioethics); religious pluralism. Will Christianity have a future? What kind of future? GER:DB-Hum, EC-GlobalCom

*4 units, Spr (Pitkin, B)*

**RELIGST 66SI. Catholic Social Teaching**

Catholic Social Teaching (CST) is a large and rapidly growing corpus of thought generated by the Catholic Church in its ongoing quest to understand and explore the proper role of the human person in society. In developing and promulgating CST, the Church seeks to apply the basic principles of Catholic theology and natural law to the various realms of human thought which touch on human communities and social interaction: political philosophy, economics, labor relations, war & peace, international

trade, and many others. CST seeks to explore this body of knowledge through the lens of the seven key themes of CST popularized by the United States Conference of Catholic Bishops. Study various papal encyclicals and pastoral letters associated with CST, read commentary on and criticism of CST in its various aspects, and discuss the varying interpretations of CST that have emerged over the past decades, especially in the United States. As CST puts great emphasis on engagement with the community

*1 unit, not given this year*

**RELIGST 67SI. Alternative Spring Break: Muslim Matters: Exploring the Muslim-American Identity**

In a post 9-11 world, Muslims in general have been misperceived and stereotyped. Samuel Huntington coined the phrase 'Clash of Civilizations,' when he predicted a conflict between cultures, specifically focusing on the potential clash between Western and Islamic cultures. Many believe that the Muslim American is conflicted in loyalty to the Muslim world and the West. This Alternative Spring Break trip will attempt to provide the students the tools needed to critically examine the Muslim American identity and how it perceives itself within America and the Muslim world. Through the winter course, this trip will focus on dispelling misconceptions about the monolithic nature of Muslims in America. For example, although the media frequently depicts Muslim and Arab people as interchangeable, the majority of Muslims in America and the world are not Arabs. The Muslim-American identity is shaped by a myriad of different political, social, and cultural issues. This trip will explore the social

*1 unit, not given this year*

**RELIGST 82. Approaches to the Study of Religion: Christianity**

Historical and contemporary Christianity from four viewpoints: ritual and prayer; sacred texts and creeds; ethics and life; and community governance. GER:DB-Hum

*4 units, not given this year*

**RELIGST 84. Mystics, Pilgrims, Monks, and Scholars: Religious Devotion in Medieval Christianity**

The variety and vitality of religious expression in medieval Christian Europe. How Christians sought God through mystical encounter, the structure of monastic life, visits to shrines, devotion to the saints, and the study of scripture and ancient Christian wisdom. Readings focus on primary texts. GER:DB-Hum

*4 units, not given this year*

**RELIGST 90. Buddhism and Gender**

In the Buddhist tradition there are contradictory approaches to gender: in some cases, gender is described as an illusion; in others, the female body is an impediment to enlightenment. How do Buddhists - men and women, lay and monastic - interpret these divergent views? Different Buddhist approaches to the category of gender. Values associated with masculinity and femininity in Buddhist philosophy, the gendered symbolism surrounding buddhahood, images of the masculine and feminine in Buddhist texts, and the experiences of lay and monastic men and women.

*4 units, not given this year*

**RELIGST 95. How to Read the Bible**

(Same as JEWISHST 95) What does the Bible mean? Seeks to help students answer this question for themselves by introducing some of the many ways in which the Bible has been read over the ages. The focus will be the book of Genesis, but the real subject is the history of biblical interpretation; how Genesis has been understood by theologians, writers, artists, scholars and others; and the ultimate goal is not merely to engage the Bible itself but to gain a better appreciation of the act of reading, why people read differently and the consequences of that difference for religious history. GER:DB-Hum

*4 units, not given this year*

**RELIGST 101. Who is Allah?**

Introduction to classical Islamic theology. How did notions about God's nature define theological communities? What made some ideas more likely than others to function as markers of group identity? Were the different sects distinguished by different methods of reading scriptures? Did differences in the interpretation of the Qur'an generate the communal divisions, or did differing communal identities generate different interpretations of the Qur'an? God's power (free will versus predestination) the age of

the Universe (pre-eternal world vs coming into being at some point) roots of ethics (what makes an act right or wrong.) Readings of the greatest philosophers and theologians in classical Islam. GER:DB-Hum

3 units, not given this year

#### RELIGST 102. Modern Islam

How Muslims have engaged in diverse ways with the Modern World and with new ethical, social and political challenges from the 19th century on. GER:DB-Hum

5 units, Win (Nanji, A)

#### RELIGST 103. War in Film: Psycho-spiritual Dimensions of Violence

A weekly lecture series - drawing upon experts in various disciplines, departments, and centers on campus and beyond - which seeks to understand and explain religion's renewed, and often violent, public and political relevance for global affairs at the beginning of the 21st century.

2 units, Aut (Hess, L)

#### RELIGST 104. The Daoist Body

The human body as seen in Daoist traditions and related areas, particularly cosmology and medicine. Major sources including images and charts, and the views of the human being that they reflect. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

#### RELIGST 107. Hindus and Muslims in South Asia

The history of Hindus and Muslims living together in S. Asia for over 1,000 years. Peace and conflict, composite cultures, and interdependent social worlds. Partition in 1947 and the creation of separate nations. Religion, arts, society, and politics. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

#### RELIGST 108. The Mahabharata

How the Sanskrit epic and its versions in other languages are interwoven with the history of Hinduism and S. Asian arts, philosophy, and social and political thought. How the text is interpreted through performance, including village ritual dramas, classical dance, and mass market television. GER:DB-Hum

4 units, not given this year

#### RELIGST 108A. Religious Epics of India: The Ramayana

The much-loved Ramayana story, from the ancient Sanskrit epic poem of Valmiki to other avatars through the ages--vernacular and Sanskrit poetry, theater, the chart-busting television serial of the late 1980s, classic comics, animated film. Religion, politics, cultural ideals, gender, media.. Recent battles over Ram's birthplace in Ayodhya and their effects on Hindu-Muslim relations and political power. GER:DB-Hum

4 units, not given this year

#### RELIGST 108C. Digital Codex: Religion, Literary Culture and Technology in South Asia

(Same as COMPLIT 145A) This course seeks to understand Hindu visual and performative culture through one epic Sanskrit narrative, that of the Mahabharata. It begins with the history of the epic's production and circulation in South Asian communities and continues with an exploration of its constructions of faith and duty. The course moves onto a consideration of the Mahabharata's latest avatars, especially in visual culture (paintings, theatre, graphic art, film and television). Lastly, the course explores questions of cannon formation, literary genres and knowledge production in the digital age. GER:DB-Hum

3-5 units, Aut (Tiwari, B)

#### RELIGST 109. Emperor, Explorer, and God: Alexander the Great in the Global Imagination

(Same as CLASSGEN 109) Survey of the image of Alexander the Great from the Hellenistic world to the contemporary. We shall discuss the appropriation of Alexander's life and legend and examine his reception as both a divine and a secular figure in a variety of cultures both East and West. Students will engage with a variety of media including texts (primary and secondary) and images (statues, coins, mosaics, illuminated manuscripts, film, and TV) in the Hellenistic, Roman, Byzantine, Jewish, Islamic, Medieval, Renaissance, and Early Modern contexts. Finally, we will evaluate contemporary representations of Alexander in TV, film and popular culture, such as William Shatner's and Adam West's 1968 TV pilot, Oliver Stone's 2004 film, and Andy

Warhol's Pop art. GER:DB-Hum

3 units, Aut (Vevaina, Y)

#### RELIGST 111. Religions of Mexico

Key issues in the study of religion and religions of Mexico. Sacred cities of the Aztec and Maya, the encounter between Christianity and indigenous religions and contemporary religious performances in Mexico and among Mexican Americans. Theoretical frames of Mircea Eliade, Emile Durkheim, and Victor Turner. Emphasis is on the recently recovered indigenous codex known as the Mapa de Cuauhtinchan #2. GER:DB-Hum

4 units, not given this year

#### RELIGST 112. Handmaids and Harlots: Biblical Women in Jewish and Christian Traditions

Miraculous births, wandering in the wilderness, encounters with angels: stories of Hagar, Sarah, Hannah, and Mary, and how their tales are read and re-told by later Jews and Christians. Sources include the Hebrew Bible and New Testament, Jewish and Christian commentary, and religious iconography. GER:DB-Hum, EC-Gender

4 units, not given this year

#### RELIGST 112D. Sociology of Judaism and Jewish Identity

(Same as JEWISHST 132D, SOC 112D) Examines the place of the Jewish people in society throughout various locales and historical periods to understand how interactions among Jews and with other groups have shaped Jewish identities. Topics include modernism, the Holocaust, Israel/nationhood, race/ethnicity, intermarriage, and assimilation. Uses theoretical, empirical, and historical material from multiple social scientific fields of study and explores the study of Judaism from several major sociological lenses.

5 units, Sum (Staff)

#### RELIGST 113B. Japanese Religion Through Film

Themes in premodern and modern Japanese religion through animations, movies and documentaries GER:DB-Hum

4 units, not given this year

#### RELIGST 114B. Religions of Korea

Religious traditions in Korea from antiquity to the present. An examination of texts including Buddha tales, official histories, spatial representations, popular literature, modern media reports and other primary sources. The impact of imperialism, modernity, and nationalism on the contemporary practice of religion.

1-4 units, not given this year

#### RELIGST 115. Hope and Prophetic Politics: Abraham Joshua Heschel and Martin Luther King, Jr.

The biblically informed prophetic tradition that has long shaped the history of American religious and political thought and that has often clashed with an impulse towards empire and the desire to accumulate power. Focus is on Abraham Joshua Heschel and Martin Luther King, Jr., 20th-century religious intellectuals whose lives and works draw on this tradition to raise and address questions basic to the role of religion in public life. GER:DB-Hum

4 units, not given this year

#### RELIGST 117. The Future of Christianity

Developments affecting the world's largest religion in the new millennium: shifting demographics; declining numbers in mainline Christian denominations in North America and Europe; the emergence of global Christianity; in Africa, Asia, and South America; Christianity after the baby boomer generation; flash point issues (sexuality, global economic system, politics, bioethics); religious pluralism. Will Christianity have a future? What kind of future? GER:DB-Hum

4 units, not given this year

#### RELIGST 118. Gandhi, King, and Nonviolence

(Same as HISTORY 105) Lives, times, theory, and practice of Mohandas Gandhi and Martin Luther King, Jr.; their significance to issues of violence and nonviolence today. GER:DB-Hum

4 units, not given this year

#### RELIGST 119. Violence and Nonviolence: Gandhi and His Legacy

Gandhi's life; his advocacy and practice of nonviolence in political movements in India and S. Africa; Indian religious sources of ahimsa or nonviolence; political interpretations of the Bhagavad Gita; Gandhian theory of nonviolence; adaptations of Gandhian nonviolence for conflict resolution in the world; critiques of

Gandhi. GER:DB-Hum, EC-GlobalCom

*5 units, Win (Hess, L)*

**RELIGST 123. Islam Today**

Case studies from the Muslim world to explore contemporary developments that affect Muslims in maintaining religious identity and continuity. GER:DB-Hum

*4 units, Spr (Nanji, A)*

**RELIGST 124. Sufi Islam**

The complex of Islamic intellectual and social perspectives subsumed under the term Sufism. Sufi mystical philosophies and historical and social evolution. Major examples include: Qushayrī, Rābī'a, Junayd, Hallāj, Sulamī, Ibn al-'Arabī, Rūmī, Nizām al-Dīn Awliyā'. Social and political roles of Sufi saints and communities. Readings include original prose and poetry in translation, secondary discussions, and ethnography. GER:DB-Hum

*4 units, not given this year*

**RELIGST 125. Authority of the Past in Islamic Thought**

(Same as RELIGST 331) How have Muslims thought about the past as a source for contextualizing the present and generating prescriptions for right conduct? What imaginations of time undergird major Islamic intellectual perspectives? A wide-ranging exploration based on readings from the Quran, lives of prophets, chronicles, philosophy of history, hagiography, epic and mythology, and ethnography.

*4 units, not given this year*

**RELIGST 126. Protestant Reformation**

16th-century evangelical reformers (Luther, Calvin, Zwingli) and reform movements (Lutheran, Reformed, Anabaptist) in their medieval context. GER:DB-Hum

*4 units, Aut (Pitkin, B)*

**RELIGST 127A. Kabbalah: The Mystical Teachings of Judaism**

Jewish mystical literature, especially the Zohar. Mystical concepts of the divine: masculine and feminine aspects of the Godhead, divine sonship; eroticism and sexuality; cosmogony and apocalypse; mystical secrecy and popularization, including the contemporary Kabbalah movement in the U.S. and figures such as Madonna and Roseanne. Guest lectures by scholars of Kabbalah including Moshe Idel from Jerusalem and Daniel Matt, the American translator of the Zohar.

*2 units, not given this year*

**RELIGST 129. Modern Jewish Thought**

From the early Enlightenment to the present. Universalism, subjectivity, and redemption within Judaism's encounter with modernity as reflected on by Jewish intellectuals within the Western philosophical tradition; how modern Jewish intellectuals have shaped and been shaped by current debates. Challenges to religious identity by secularism, capitalism, and the nation state. Messianism, mysticism, reactionary romanticism, critical theory, post-Holocaust philosophy, spirituality, and feminism. Thinkers include Spinoza, Marx, Freud, Buber, Strauss, the Frankfurt school, Benjamin, Arendt, and Levinas.

*4 units, not given this year*

**RELIGST 130. Genesis and Gender: Male and Female in Judaism, Christianity, and Islam**

(Same as JEWISHST 120) What does it mean to be a man or a woman? And what role have classical and religious traditions played in shaping understandings of gender differences? Investigation of the construction of gender identities, roles, and differences in Greek and Roman sources and three monotheistic faiths. Interpretation and retellings of the story of Adam and Eve in the Bible and the Qur'an, commentaries, lives and practices of religious communities, religious iconography down to the present. GER:DB-Hum, EC-Gender

*4 units, not given this year*

**RELIGST 132. Jesus the Christ**

How did Jesus of Nazareth, who never claimed to be Christ or divine, become the son of God after his death? Sources include the history of first-century Judaism and Christianity.

*4 units, not given this year*

**RELIGST 132B. Early Christianity, Early Judaism, and Gender**

(Same as CLASSGEN 134, JEWISHST 122B) An exploration of

gender in Early Christianity and Early Judaism. Possible topics include: an examination of Pre-Christian writings which are indicative of the foundational social contexts in which early Christian and Jewish writers operated; how women's preaching was portrayed in Paul's letters and the implications for what was actually going on in the community in Corinth; later interpretations of Paul's attitudes towards women and marriage, which diverge between a pro-marriage and further restrictive understanding of women's involvement in the Church in the pastorals (1 and 2 Timothy and Titus) and a pro-ascetic, cross-dressing, understanding of greater women's freedom in the Acts of Paul and Thecla; female Christian martyrs who had visions of themselves as men entering battle and male Rabbis who understood themselves as female virgins and who hid in warehouses to avoid martyrdom; and a survey of early Rabbinic laws pertaining to men and women and what they reveal about early Jew GER:DB-Hum

*4 units, Win (Copeland, K)*

**RELIGST 132C. The Historical Jesus**

Contemporary historical-critical methods in investigating how one might study Jewish and Christian texts of the 1st century CE. Social contexts including economic realities and elite ideological views. What can be known historically about 1st-century Judaism and Jesus' part in it. How Jewish apocalyptic messianism shaped the birth of Christianity and its trajectory through the 1st century. GER:DB-Hum

*4 units, Spr (Sheehan, T)*

**RELIGST 132D. Early Christian Gospels**

(Same as CLASSGEN 132) An exploration of Christian gospels of the first and second century. Emphasis on the variety of images and interpretations of Jesus and the good news, the broader Hellenistic and Jewish contexts of the gospels, the processes of developing and transmitting gospels, and the creation of the canon. Readings include the Gospel of John, the Gospel of Mark, the Gospel of Thomas, the Gospel of Mary and other canonical and non-canonical gospels. GER:DB-Hum

*4 units, not given this year*

**RELIGST 133. Inventing Christianity in Late Antiquity**

The transformation of an apocalyptic sect into an imperial religion from 200 to 600 C.E. Shifts in structures of authority, worship, and belief mapped against shifts in politics, economics and religion in the larger Roman empire. Cultural visions of this history including Edward Gibbon's Decline and Fall of the Roman Empire, Dan Brown's conspiracy theory in The Da Vinci Code, and Elaine Pagels' The Secret Gospel of Thomas. GER:DB-Hum

*4 units, not given this year*

**RELIGST 136. Buddhist Yoga**

Buddhist models of spiritual practice emphasizing issues in the interpretation of the contemplative path. GER:DB-Hum, EC-GlobalCom

*4 units, Win (Bielefeldt, C)*

**RELIGST 139. Nihilism**

The history of a religious specter. Examine the challenges and promises of nihilistic thinking in the wide context of European moral thought, focusing on the role it played in major 19th/20th century critiques of modernity (notably with the so-called end of metaphysics). Particular emphasis will be on the role of nothing as category of thought, and why so many religious thinkers and philosophers have tried to make something out of it. Readings to include Pascal, Jacobi, Kierkegaard, Nietzsche, Barth, Heidegger, Benjamin, Nishitani, Arendt, and the return to religion in late postmodern thought. Examples from literature/art and culture (Doestoevsky, Dada, contemporary culture critique) to enrich and ground the discussions.

*3-5 units, not given this year*

**RELIGST 144. John Calvin and Christian Faith**

Close reading and analysis of Calvin's Institutes of the Christian Religion as a classic expression of Christian belief. GER:DB-Hum

*4 units, Win (Pitkin, B)*

**RELIGST 146. Religious Mystery and Rational Reflection**

Explores the boundaries of rational knowledge about Christian faith through a careful reading of the transcendental project of Jesuit theologian Karl Rahner. Rahner's thought, informed by various sources (e.g., the mystics, Aquinas, Kant, Hegel and Ignatius Loyola), results in an interpretation of Christian faith that

strives for intellectual honesty in the face of challenges from science, atheism and post-modern culture. Yet it leaves room for a fundamental human openness to the source and goal of self-transcendence, what Rahner calls Holy Mystery. Weekly short position papers will be required to stir both reflection and discussion. GER:DB-Hum

*4 units, not given this year*

**RELIGST 148. From Jesus to Paul**

Jesus considered himself God's definitive prophet, but he did not think he was God, and had no intention of founding a new religion. How did this Jewish prophet become the gentle God and the founder of Christianity? The role of Paul. GER:DB-Hum

*4 units, not given this year*

**RELIGST 148A. St. Paul and the Politics of Religion**

The major letters written by Paul, the Apostle, and his biography, Acts of the Apostles. Historical context in first century Jewish cultural politics. Origins of Christianity, and the split into Judaism and Christianity. The relationship between Jews and non-Jews. The juxtaposition of law and faith. Origins of cultural universalism. Paul as Jewish radical versus Paul, the first Christian thinker and theologian. Recent philosophical readings of Paul (Taubes, Badiou, and Agamben). GER:DB-Hum

*4 units, not given this year*

**RELIGST 150. The Lotus Sutra: History of a Buddhist Book**

The Lotus school of Mahayana, and its Indian sources, Chinese formulation, and Japanese developments. GER:DB-Hum, DB-Hum, EC-GlobalCom

*4 units, not given this year*

**RELIGST 151. Devotion in India: Poetry, Performance, Politics**

In the 6th-18th centuries, Indian poet-singers in the vernacular languages produced passionate poetry focusing on God or Truth, but exploring human feeling and thought in wide-ranging, nuanced ways. Using examples from Tamil, Kannada, Punjabi, Hindi and Bengali, we will explore religious and psycho-spiritual meanings, related spiritual disciplines, performance in music and drama, and social-political issues. GER:DB-Hum

*4 units, Spr (Hess, L)*

**RELIGST 151A. Buddhist Art in a Cosmopolitan Environment**

The Buddhist art of Gandhara, historical Northwest India, was the product of a complex interplay of different cultures, religions and societies in the region. Gandharan art from the historic circumstances that led to its development in the first century AD to its gradual disappearance in its homeland around 500 AD. GER:DB-Hum

*4 units, not given this year*

**RELIGST 154. Buddhism Today: Responses to New Global Challenges**

How do the traditions of Buddhism cope with new social, ethical, and global challenges? Case studies from Sri Lanka, Japan, and the West. The historical position of Buddhist social thought. Buddhism's ascetic and meditative legacy: friend or foe of social engagement? GER:DB-Hum, EC-GlobalCom

*4 units, not given this year*

**RELIGST 156. Goddesses and Gender in Hinduism**

India's tradition of worshiping female forms of the divine, including Kali, Durga, Lakshmi, Saraswati, Radha, Sita, and local deities. The stories, histories, iconographies, theologies, arts, and practices associated with these goddesses. How the worship of goddesses impacts the lives of women. Readings include *Is the Goddess a Feminist?* GER:DB-Hum, EC-Gender

*4 units, not given this year*

**RELIGST 159. Music and Religion in South Asia**

Music and other arts in South Asia are often intertwined with religion. Guest teacher Tara Kini, a Hindustani classical singer from India, will join Prof. Hess in introducing history, theory and practice of music as it relates to religion, especially Hinduism and Islam, in South Asia. How is sound understood as revelation of divinity? How do songs express devotional emotion and theology? How do film songs show popular religious culture? How do musical performance and construction of history become arenas for political ideology? Students will do musical practice along with academic study. Guest artists will appear. No background required.

GER:DB-Hum, EC-GlobalCom

*4-5 units, not given this year*

**RELIGST 159A. Religion and Performance**

(Same as RELIGST 359A) What happens when religion is viewed through the lens of performance? Texts become dramas, songs, recitations, oral commentaries, dances, movies, and political appropriations. Beliefs become embodied enactments; doctrine puts on a costume and indulges in role play. Approaches to performance theory through religious enactments such as ritual, prayer, festival, drama, music, and film. Most examples from S. Asian religions; students may undertake research projects into other cultures and traditions. GER:DB-Hum

*4 units, not given this year*

**RELIGST 161. Religion and Its Modern Critics**

(Same as RELIGST 261) Philosophical critique of religion as it developed in the modern west. Looking primarily at Feuerbach, Marx, Nietzsche and Freud--the so-called masters of suspicion--consider the century-long effort to understand religious consciousness as a form of projection, ideology or illusion. Central concern will be to evaluate the major claim of the critics: that religion fosters a sense of alienation or estrangement within the human condition GER:DB-Hum

*4 units, not given this year*

**RELIGST 162. Spirituality and Nonviolent Urban and Social Transformation**

(Same as URBANST 126) A life of engagement in social transformation is often built on a foundation of spiritual and religious commitments. Case studies of nonviolent social change agents including Rosa Parks in the civil rights movement, César Chávez in the labor movement, and William Sloane Coffin in the peace movement; the religious and spiritual underpinnings of their commitments. Theory and principles of nonviolence. Films and readings. Service learning component includes placements in organizations engaged in social transformation. Service Learning Course (certified by Haas Center). GER:DB-Hum

*5 units, Win (Sanders, J; Karlin-Neumann, P)*

**RELIGST 167. Medieval Religious Philosophy**

(Same as PHIL 101A) (Same as PHIL 101A.) Survey of medieval philosophy, focusing on God, world and words. A pervasive assumption about the structure of the world, that it reflected the categories of God's mind and emerged from an act of divine speech, gave impetus to the interest in the nature of language and its relation to the world. Scripture served as one kind of divine communication to human beings, and The Book of the World as another. The problem of universals, the question of how words relate to God, epistemology, theories of reference, semiotics, are some of the topics discussed. Readings from Augustine, Anselm, Aquinas, Scotus, and Ockham, etc. GER:DB-Hum

*4 units, not given this year*

**RELIGST 170A. Biblical Hebrew, First Quarter**

(Same as JEWISHST 107A, AMELANG 170A) Establish a basic familiarity with the grammar and vocabulary of Biblical Hebrew and will begin developing a facility with the language. This course requires no prior knowledge of Hebrew and will begin with learning the alphabet. By the end of the quarter, students will be able to translate basic biblical texts, will be familiar with common lexica and reference grammars, and will have sufficient foundational knowledge to enable them to continue expanding their knowledge either in a subsequent course or own their own.

*2-4 units, Aut (Weitzman, S; DeBold, R)*

**RELIGST 170C. Reading in Biblical Hebrew**

Third of a three quarter sequence. Readings and translation of biblical narratives emphasizing grammar and literary techniques. Prerequisite: AMELANG 170B.

*4 units, not given this year*

**RELIGST 172. Sex, Body, and Gender in Medieval Religion**

Medieval conceptions of sex, body and of gender were both like and very unlike our own. Religious doctrines of the Incarnation and Eucharist, Virgin Birth and Immaculate Conception, as well as Christ's Passion, the martyrdom of saints, clerical celibacy, ideals of chastity and of ascetic self denial, put all sex, body and gender at the center of salvation and damnation. A variety of literary, monastic, and mystical texts as well as art will provide the context for exploring this cultural and religious intersection. GER:DB-

Hum, EC-Gender  
4 units, Win (Gelber, H)

**RELIGST 173. What is Enlightenment? Religion in the Age of Reason**

Many contemporary attitudes towards religion were forged in 17th- and 18th-century Europe in the midst of heated debates over the meaning and value of Christianity in a world 'come of age': Liberal calls for justice, toleration, and pluralism in matters religious; secular suspicions about religious superstition, fanaticism, and ideology; skepticism regarding the solubility of ultimate questions of meaning and metaphysics. Seminal readings on religion from Descartes, Pascal, Leibniz, Voltaire, Hume, Mendelssohn and Kant. GER:DB-Hum

4 units, not given this year

**RELIGST 174. Martyrdom in the Ancient World**

(Same as CLASSGEN 174) Jewish, pagan and Christian groups under Roman rule all told tales of persecution and resistance. How did they use these stories, and the historical experiences behind them, to form group identity? Emphasis is on ancient documents in translation, and modern scholarly interpretations, to examine the competing agendas of parties involved, group dynamics, individual motivation, symbolic violence, and the body as a locus of power and control. GER:DB-Hum

4 units, not given this year

**RELIGST 174E. Kierkegaard: Existentialism and Religion**

(Same as RELIGST 374E) Kierkegaard is rightly called one of the founders of existentialism. Like Socrates, the one philosopher in the western tradition to whom he felt consciously in debt, Kierkegaard sought to return philosophy to the work of thinking through the human condition in all its uncertainty and finitude. Although 20th century existentialists like Sartre and Camus were self-consciously atheist, Kierkegaard's existentialism has religious origins. Through readings of Kierkegaard's philosophical and religious texts, explore the possibility of an existentialist interpretation of the human condition that is religious in nature. Kierkegaard's development of a 'philosophy of existence' as a response to major trends in modern European thought, particularly in response to the philosophies of German idealism (Kant, Hegel) and romanticism. GER:DB-Hum

4 units, not given this year

**RELIGST 176. Religious Diversity: Theoretical and Practical Issues**

What does it mean for a religion to be true? If one religion is true, what about the truth of other religious possibilities? How, and why, should religious traditions be compared? Readings address tolerance and pluralism, relativism, comparative theory, and new religious virtues. GER:DB-Hum

4 units, not given this year

**RELIGST 182A. In Search of David and Solomon**

(Same as CLASSGEN 182, CLASSGEN 282, JEWISHST 182A, JEWISHST 382A, RELIGST 382A) In recent years, the existence of King David and Solomon has become a hotly contested subject, with some scholars questioning whether they were real-life historical figures and others claiming to have found evidence that corroborates their existence. Drawing on the most recent archaeological research, this course will involve students in the quest for the historical David and Solomon as a way to introduce them to the challenges of using the Bible as an historical source.

4 units, Spr (Lederman, Z)

**RELIGST 183. The Death of God: Between Hegel and Marx**

The radical transformations in Western notions of God between the death of Hegel and the birth of historical materialism, arguing that questions about theism and atheism, humanism, and history formulated in the period 1831-50 are still pertinent today. Texts from Hegel, the young Hegelians, Feuerbach, and Marx on issues of God, history, and the social dimensions of human nature. GER:DB-Hum

4 units, not given this year

**RELIGST 185. Prophetic Voices of Social Critique**

Judges, Samuel, Amos, and Isaiah depict and question power, strong leaders who inevitably fail, the societal inequities and corruption inevitable in prosperity, and the interplay between prophet as representative of God and the human king. How these texts succeed in their scrutiny of human power and societal

arrangements through attention to narrative artistry and poetic force, and condemnation of injustice. Includes service-learning component in conjunction with the Haas Center. GER:DB-Hum

4 units, not given this year

**RELIGST 188A. Issues in Liberation: El Salvador**

Permission of the instructor required. Within the context of US intervention in Central America the course investigates the history of liberation movements in El Salvador (including ¿liberation theology¿), as well as ethical questions relating economic, social, and political issues in that country.

3 units, Win (Sheehan, T)

**RELIGST 199. Individual Work**

Prerequisite: consent of instructor and department. May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**RELIGST 201. Classical Islamic Law**

(Same as RELIGST 301) Emphasis is on methods of textual interpretation. History of premodern Islamic law, including origins, formation of schools of law, and social and political contexts. Laws of sale, marriage, divorce, and the obligation to forbid wrong. GER:DB-Hum

3-5 units, not given this year

**RELIGST 202A. Monsters, Ghosts and Other Fantastic Beings: The Supernatural and the Mysterious in Japanese Culture**

Examine the development of strange and fantastic creatures in Japan. Mysterious creatures in folklore, literature, art, manga and movies. Through them see how the concept of the strange or mysterious have evolved and how they inform Japanese modernity. GER:DB-Hum

4 units, Aut (Lin, I)

**RELIGST 203. Myth, Place, and Ritual in the Study of Religion**

(Same as RELIGST 303) Sources include: ethnographic texts and theoretical writings; the approaches of Charles Long, Jonathan Z. Smith, Victor Turner, Michael D. Jackson, and Wendy Doniger; and lived experiences as recounted in Judith Sherman's Say the Name: A Survivor's Tale in Prose and Poetry, Jackson's At Home in the World, Marie Cardinal's The Words to Say It, and John Phillip Santos's Places Left Unfinished at the Time of Creation. GER:DB-Hum

3-5 units, not given this year

**RELIGST 205. Truthful Fictions: Religion in Popular Narratives**

What do St. Augustine's Confessions, Dante's Divine Comedy, and Joss Whedon's Buffy the Vampire Slayer have in common? What can Cylons tell us about character and free will? Examine how some of today's new mythologies explore religious themes like hope, transcendence, selfhood, ethics, spiritual crisis, and heroism. Materials will include novels, graphic novels, television, and film. GER:DB-Hum

4 units, not given this year

**RELIGST 207A. Modern African Islam through Literature**

(Same as RELIGST 307A) Read the works of Modern Muslim Literature in Africa. Explore the expressions and modes by which Islam and its contemporary condition are represented in African contexts. GER:DB-Hum

4 units, not given this year

**RELIGST 207B. Islam in Central Asia**

(Same as RELIGST 307B) The history and current status of Islam in Central Asia, addressing problems in prevailing approaches to the subject in light of historical patterns and critical analysis; it will consider how the study of religion in Central Asia before the region's incorporation into the Russian/Soviet and Chinese states can help us understand developments in Muslim religious life through the 20th century and today. Issues to be addressed include Islamization and communal identity; religion and national cultures; scales of religiosity and framing Muslim status; religious knowledge and practice in social context; the dichotomies of Sovietology; Sufism, shrines, and popular religion; and Islam and political discourse and practice. GER:DB-Hum

4 units, Aut (DeWeese, D)

**RELIGST 209. Priests, Prophets, and Kings: Religion and**

**Society in Late Antique Iran**

(Same as CLASSGEN 106, CLASSGEN 206, RELIGST 309) From India to the Levant and from the Caspian Sea to the Arabian Peninsula, the Sasanian Empire (224-651 CE) was the dominant power in the Middle East till the advent of Islam. Diverse religious institutions and social practices of the Zoroastrians, Manicheans, Jews, and Christians in late antique Iran. Complex relationships between the Zoroastrian priesthood, the Sasanian monarchs, and these minority religions within the context of imperial rule. Profound religious and social changes that occurred with the Islamic conquests of Iran as well as examine the rich cultural continuities that survived from the Pre-Islamic past. GER:DB-Hum

4-5 units, Aut (*Vevaina, Y*)

**RELIGST 209A. Sugar in the Milk: Modern Zoroastrianism as Race, Religion, and Ethnicity**

(Same as RELIGST 309A) Modern Zoroastrian experience of race, religion, and ethnic identity. Some 60,000 Zoroastrians now live in India and have resided there for a millennium. In the 19th century, these peoples from Persia became colonial elites yet were acutely aware that they were not quite Indian, British, or Persian. Diverse ways this experience of dislocation has served as a defining characteristic in Parsi communal identity and contrast these South Asian experiences with the minority socio-politics of those who remained in Iran. Survey the colonial and post-colonial communities in England, East Africa, Hong Kong, Australia, and North America and examine the expression of these global diasporic experiences in literature and the arts. GER:DB-Hum

4-5 units, Win (*Vevaina, Y*)

**RELIGST 210. Translating the Daode Jing**

One of the most frequently translated works in world literature. Challenges faced by translators, support from commentaries and related sources, and assumptions underlying translations into Western languages. Recommended: classical Chinese. GER:DB-Hum

4 units, not given this year

**RELIGST 212. Chuang Tzu**

The Chuang Tzu (Zhuangzi) in its original setting and as understood by its spiritual progeny. Limited enrollment. GER:DB-Hum

5 units, not given this year

**RELIGST 216. Japanese Buddhism**

Focus on the religious lives of lay people in medieval Japan, as evidenced in collections of Buddhist stories (setsuwashu), narrative picture scrolls (emaki), and related historical materials. All readings are in English, but the instructor will also work with students interested in reading the original Japanese. GER:DB-Hum

4 units, not given this year

**RELIGST 217. Japanese Studies of Religion in China**

(Same as RELIGST 317) (Graduate students register for 317.) Readings in Japanese secondary sources on Chinese religions.

3 units, not given this year

**RELIGST 220. Modern Islamic Thought: Philosophy, Politics, Society**

Focus is on major challenges of the modern period. Historicity and plurality. Questions concerning governance, law, development, and political and social order in majority and minority Muslim contexts. Readings include original works in English and in translation. GER:DB-Hum

5 units, Spr (*Nanji, A*)

**RELIGST 220B. Crypto-Muslim Culture in Early Modern Spain**

(Same as ILAC 214) What is known about the secret religious practice and culture of the Moriscos, Spain's large minority community of Muslim converts to Christianity (1500-1609)? What role did their handwritten literature (largely Islamic texts written in Castilian but copied out in Arabic script) play in the formation and maintenance of their culture? What can these Crypto-Muslim communities teach us regarding the place of Muslim culture in Western Europe today? The course will be taught in English; knowledge of Spanish and/or Arabic script is useful but not necessary.

3-5 units, not given this year

**RELIGST 220C. Islamic Manuscript Illumination: History,****Theory, and Practice**

Comprehensive introduction to the history, theory, and practice of Islamic manuscript illumination (tazhip). The class will begin with a review of this art in general and its relationship with other Islamic book arts, such as binding, miniature painting, and calligraphy, and then move on to study the symbolic language, classical motifs, symbols, and patterns in Islamic manuscript illumination. However, the emphasis will be on actual drawing and painting, employing traditional techniques used in Islamic manuscript illumination. No prerequisite. GER:DB-Hum

4 units, Spr (*Felek, O*)

**RELIGST 221. The Talmud**

(Same as RELIGST 321) Strategies of interpretation, debate, and law making. Historical contexts. Prerequisite: Hebrew. GER:DB-Hum

4 units, not given this year

**RELIGST 221A. Philology of Rabbinic Literature**

(Same as RELIGST 321A) The genesis of rabbinic texts as texts. Evolution from oral stage to manuscript to printed text. Questions of redaction versus edition. Focus on Palestinian and Babylonian Talmud, with excursions into midrashic texts. Prerequisite: strong background in Hebrew. Knowledge of Aramaic preferred.

3-5 units, not given this year

**RELIGST 221B. The Talmud as Literature**

(Same as RELIGST 321B) In what sense can Talmud be studied as literature? Which voices can be identified? Concepts of author, editor, or redactor. The basic textual units of Talmud: sugya, chapter, and tractate. The sugya as literary genre. The aesthetic of talmudic dialectics. Prerequisite: Strong Hebrew, Aramaic preferred. GER:DB-Hum

3-5 units, not given this year

**RELIGST 221C. Aramaic Jewish texts**

(Same as JEWISHST 221C, JEWISHST 321C, RELIGST 321C) Reading of Aramaic Jewish texts with special focus on grammar and syntax. Foundations of classical Aramaic, the two major dialects of rabbinic Aramaic, the Palestinian (Galilean) and the Babylonian. Readings from Midrash, Piyyut, Talmud and Geonic materials and attempt to follow the development of the language through time. The course is intended for students with substantial knowledge of Hebrew. GER:DB-Hum

2-5 units, not given this year

**RELIGST 222. Literature and Society in Medieval Islam**

The development of literary traditions, 600-1500. Major poetic and prose topoi through examples from Arabic, Persian, and Turkish literature in translation. Literature's place in Islamic societies and biographies of significant authors. The religious value of literary forms. Literary canons as unifying agents in different parts of the medieval Muslim world. Comparison between high and folk literatures. The role of aesthetic paradigms in the formation of Islamic religious and cultural identities. GER:DB-Hum

4 units, not given this year

**RELIGST 222B. Sufism Seminar**

(Same as RELIGST 322B) Sufism through original texts and specialized scholarship. Prerequisite: ability to read at least one major language of Islamic religious literature (Arabic, Persian, Turkish, Urdu). GER:DB-Hum

3-5 units, not given this year

**RELIGST 222C. Debauchery and asceticism**

(Same as RELIGST 322C) Arabic texts written by and about early Muslim figures famous either for their limitless self-indulgence or their rigorous self-denial. Language and style of these texts, their implied or explicit dialogue with religious values, and their possible relation to each other. Questions of representation, self-representation, and biographical fallacy. Intended for students with reading knowledge of Arabic.

3-5 units, not given this year

**RELIGST 222D. The Naqshbandi Sufi Tradition**

(Same as RELIGST 322D) History of the Naqshbandi Sufi tradition, from its origins in Central Asia and its spread to other parts of the Muslim world to its contemporary profile, with attention to aspects of Sufi doctrine and practice, modes of organization and succession, patterns of economic and political activity, and issues of continuity and coherence in an international Sufi order. Social and religious context for the

emergence of the Naqshbandiyya and its development in its native region; students will read a shared body of basic works on Naqshbandi history and will pursue individual projects focused on Naqshbandi groups in particular regions or periods. GER:DB-Hum  
4 units, Aut (DeWeese, D)

**RELIGST 223. Studying Islam: History, Methods, Debates**

Islam as a subject of academic inquiry since the 19th century. Origins and critiques of major methodological perspectives in Islamic studies such as philology, religious studies, history, art history, and anthropology. Landmarks in the development of the field and the work of major scholars. Academic debates regarding unity versus diversity, orientalism, fundamentalism and Islamism, Sufism, and gender. Current trends in scholarship on medieval and modern Muslim societies. Prerequisite: course work in Islamic studies or methodology in religious studies. GER:DB-Hum  
4 units, not given this year

**RELIGST 223A. The Arabic Qur'an**

(Same as RELIGST 323A) Early history, language, structure, style, chronology, motifs, themes, and interpretation. Knowledge of Arabic required. GER:DB-Hum  
3-5 units, not given this year

**RELIGST 224. Classical Islamic Texts**

(Same as RELIGST 324) Premodern Islamic scholarship. Genre-specific historical research methods. The hadith literature, tafsir, biographical dictionaries, fiqh, tarikh, and geographical works. Prerequisite: reading knowledge of Arabic. GER:DB-Hum  
3-5 units, not given this year

**RELIGST 224B. Unveiling the Sacred: Explorations in Islamic Religious Imagination**

(Same as RELIGST 324B) Poetry and prose in translation as well as historical studies. Islamic movements invested in the idea that the sensory world has a hidden or esoteric counterpart that can be understood or experienced through following particular religious programs. Various forms of Shi'ism and Sufism, millenarian and apocalyptic movements, the Nation of Islam and its offshoots. Philosophical propositions, historical contexts, and the role of ritual in the construction of religious systems. GER:DB-Hum  
3-5 units, not given this year

**RELIGST 226. Philosophy and Kabbalah in Jewish Society: Middle Ages and Early Modern Period**

(Same as RELIGST 326) Characteristics of religious philosophy from Saadia Gaon to Maimonides, Jewish opposition to and support of philosophy in the medieval Christian and Muslim world, texts from the early development of Kabbalah, the relationship between philosophy and Kabbalah, and conflicting views of Kabbalah from the 16th through 18th centuries.  
5 units, not given this year

**RELIGST 226A. Judaism and Hellenism**

(Same as RELIGST 326A) interactions and conflicts between Jews and Greeks in the centuries following the conquests of Alexander the Great and the cultural/religious repercussions of their encounter. In what ways were Jews influenced by Greek culture? In what ways, and for what reasons, did they resist it? And how the interaction of these cultures shape the subsequent development of Judaism and Christianity? Jewish texts in the Greco-Roman period, including Jewish-Greek writers like Philo of Alexandria, the Apocrypha, the Dead Sea Scrolls, selected writings from the New Testament, and the Passover Haggadah. GER:DB-Hum  
3-5 units, not given this year

**RELIGST 226B. Judaism and Christianity in the Mediterranean World: Contact, Competition, and Conflict**

(Same as CLASSGEN 126, CLASSGEN 226, JEWISHST 226B, JEWISHST 326B, RELIGST 326B) Jewish beginnings of Christianity in the first century C.E.; process of differentiation between various Jewish and Christian groups; effect of Roman-Jewish wars on Jewish and Christian identity formation; Jewish Christians, Christian Jews, and other heretics; rise of the discourse of orthodoxy and heresy; the emergence of the Adversus Iudaeos tradition; theology as a realm of mutual attraction and conflict. Readings include Epistles of Paul in the New Testament, Christian authors from Justin through Augustine, excerpts from Rabbinic Texts (Mishnah, Midrash and Talmud), along with current literature on religion, ethnicity, and identity in the Roman world. GER:DB-Hum

5 units, not given this year

**RELIGST 226C. Mystics and Merry-makers: Innovations in Modern Judaism**

(Same as JEWISHST 226C, JEWISHST 326C, RELIGST 326C) How does a tradition many thousands of years old make a space for itself in the dynamic landscape of contemporary America? Judaism has continually adapted to its surroundings, and in the twentieth century new movements have reconstructed, revised, and renewed Jewish practice. A space within has been claimed by a series of previously disenfranchised Jews including women, queer Jews, and Jews of color. Examine some of the most innovative of these changes from Jewish feminism to the Chabad Hasidic revival. GER:DB-Hum

3-4 units, not given this year

**RELIGST 226D. Jewish-Christian Relations in Antiquity**

(Same as CLASSGEN 126B, JEWISHST 226D) Constructions of identity, community, ethnicity: these considerations frame the investigation of ancient Christian rhetoric and theology contra Iudaeos. This historical project will be set within the larger intellectual and cultural context of a) learned Graeco-Roman traditions of ethnic stereotyping; b) forensic rhetoric; and c) philosophical paideia; and these traditions will be considered within their larger social context of the Mediterranean city (I-III). Specifically, various Christian, and especially Latin traditions contra Iudaeos (IV-VI) will be studied.  
1-2 units, not given this year

**RELIGST 227. The Qur'an**

(Same as RELIGST 327) Early history, themes, structure, chronology, and premodern interpretation. Relative chronology of passages. GER:DB-Hum

5 units, not given this year

**RELIGST 229. Winged Bulls and Sun Disks: Religion and Politics in the Persian Empire**

(Same as CLASSGEN 159, CLASSGEN 259, RELIGST 329) Since Herodotus in the 5th century BCE, the Persian Empire has been represented as the exemplar of oriental despotism and imperial arrogance, a looming presence and worthy foil for the West and Greek democracy. History of the Achaemenid Empire, beginning with the rise of the Medes in the 7th century BCE to the fall of the Achaemenids to Alexander the Great's armies in 331 BCE. Focus on the intimate relationship between religion and empire and will also survey the diverse cultural institutions and religious practices found within the Empire. Evaluate contemporary representations of the Persians in politics and popular culture, such as the recent film 300 and the graphic novel on which it is based, in an attempt to better appreciate the enduring cultural legacy of the Greco-Persian wars. GER:DB-Hum

3 units, not given this year

**RELIGST 230B. Zen Studies**

(Same as RELIGST 330B) Readings in recent English-language scholarship on Chan and Zen Buddhism GER:DB-Hum

4 units, not given this year

**RELIGST 237. Jewish and Christian Rome, 1st to 6th Centuries**

To what extent are Judaism and Christianity products of the Roman Empire, and shaped by its politics? Literature concerning Jewish and Christian perceptions of power, and archaeological and artistic traces of both religions in the imperial city of Rome. What roles did strategies of resistance and accommodation play in the formation of these religious communities; emerging identities? Possible optional field trip to Rome over Spring break. GER:DB-Hum

5 units, not given this year

**RELIGST 238. Christian Neo-Platonism, East and West**

(Same as RELIGST 338) Christianity's shift to neo-Platonic Greek philosophical categories and its significance for contemporary spirituality. Readings from Plotinus, Proclus, Greek fathers such as Pseudo-Dionysius, and from Ambrose and Augustine. GER:DB-Hum

3-5 units, not given this year

**RELIGST 239. Luther and the Reform of Western Christianity**

(Same as RELIGST 339) Luther's theology, ethics, biblical interpretation, and social reforms and their significance for the

remaking of Western Christianity. Readings include Luther's own writings and secondary sources about Luther and his world. GER:DB-Hum

*3-5 units, not given this year*

**RELIGST 241B. Mystics and Mysticism**

(Same as RELIGST 341B) Explore the varieties of meaning and significance the term mysticism takes on in religious studies though an exploration of accounts of mystical experiences: visions, bodily sensations, sense of the sacred, along with practices engaged in and texts written by those claiming such experiences for themselves or others. Focus will be on Medieval/Renaissance Christians but students are invited to explore examples from other times, traditions and places. GER:DB-Hum

*3-5 units, not given this year*

**RELIGST 245. Religion, Reason, and Romanticism**

The late 18th-century European cultural shift from rationalist to romantic modes of thought and sensibility. Debates about religion as catalysts for the new Zeitgeist. Readings include: the Jewish metaphysician, Mendelssohn; the dramatist, Lessing; the philosopher of language and history, Herder; the critical idealist, Kant; and the transcendental idealist, Fichte. GER:DB-Hum

*5 units, not given this year*

**RELIGST 247. Chinese Buddhist Texts**

(Same as RELIGST 347) Chinese Buddhist texts from the Han Dynasty onwards, including sutra translations, prefaces, colophons, story collections and biographies. Prerequisite: reading competence in Chinese. GER:DB-Hum

*3-5 units, Win (Harrison, P)*

**RELIGST 247B. Readings in Chinese Religious Texts: The Lingbao Scriptures**

(Same as RELIGST 347B) A survey of the original Lingbao scriptures. Composed in the late-4th / early 5th century, these texts radically revised Daoist practice, incorporated elements of Buddhist thought and practice, and created liturgies that are still used in Daoist communities today. (Reading knowledge of Literary Chinese 22 required). GER:DB-Hum

*4 units, not given this year*

**RELIGST 248. Chinese Buddhism in World Historical Perspective**

(Same as RELIGST 348) Shared cosmologies, trade routes, and political systems. Prerequisite: background in Chinese or Japanese.

*3-5 units, not given this year*

**RELIGST 248A. Chinese Buddhism Beyond the Great Wall**

(Same as RELIGST 348A) The thought, practice, and cultural resonance of the sorts of originally Chinese Buddhism that flourished to the north and northwest of China proper during the two to three centuries following the fall of the Tang - i.e., under the Khitan Liao (907-1125) and the Tangut Xixia (1032-1227) dynasties - with special emphasis on the later fortunes of the Huayan, Chan, and Mijiao (Esoteric) traditions. Prerequisite: reading knowledge of Chinese. GER:DB-Hum

*3-5 units, not given this year*

**RELIGST 248B. Buddhist Narratives and the Shaping of Medieval Chinese Religiosity**

*3-5 units, Spr (Ho, C)*

**RELIGST 248C. Buddhist Commentary Tradition in 4th Century China**

By focusing on several commentaries Chinese Buddhist exegetes wrote from the 4-8th centuries, one being the commentary on the Weimo Jing (Vimalakirtinirdesa) jointly composed by Kumarajiva (344-413), a translator of the sutra, and two of his most important disciples (Sengzhao [384-414] and Daosheng [360?-434]). This seminar aims at analyzing key characteristics and functions of Chinese Buddhist commentaries and the roles they played in the formation of Chinese Buddhist traditions in early Medieval China. GER:DB-Hum

*3-5 units, Spr (Chen, J)*

**RELIGST 250. Classics of Indian Buddhism**

Texts in English translation including discourses (sutras), philosophical treatises, commentaries, didactic epistles, hymns, biographies, and narratives. GER:DB-Hum

*4 units, not given this year*

**RELIGST 250B. Depictions of the Buddha**

(Same as RELIGST 350B) The image of the Buddha changes relatively little from its earliest conceptions. The role of the image and the notion of the Buddha do change fundamentally with time and place. South Asian depictions of the Buddha from the earliest symbolic representations to the wrathful and peaceful forms found in the esoteric Buddhism of India and the Himalayas, as well as the changing conceptions of the Buddha to which these depictions are related. GER:DB-Hum

*3-5 units, not given this year*

**RELIGST 251. Readings in Indian Buddhist Texts**

(Same as RELIGST 351) (Graduate students register for 351.) Introduction to Buddhist literature through reading original texts in Sanskrit. Prerequisite: Sanskrit. GER:DB-Hum

*3-5 units, Spr (Harrison, P)*

**RELIGST 251A. Buddhist Visions of Paradise**

(Same as RELIGST 351A) Textual and art-historical evidence for the early development in the greater Indian cultural area of the cult of the Buddhas of the present and their paradise worlds (Pure Land Buddhism). GER:DB-Hum

*3-5 units, not given this year*

**RELIGST 253. Mountains, Buddhist Practice, and Religious Studies**

(Same as RELIGST 353) The notion of the sacred mountain. Readings from ethnographic and theoretical works, and primary sources. GER:DB-Hum

*3-5 units, not given this year*

**RELIGST 254. Recent Contributions to Buddhist Studies**

May be repeated for credit.

*4 units, not given this year*

**RELIGST 257. Readings in Daoist Texts**

(Same as RELIGST 357) Readings from primary sources. Prerequisite: classical Chinese.

*4 units, not given this year*

**RELIGST 258. Japanese Buddhist Texts**

(Same as RELIGST 358) Readings in medieval Japanese Buddhist materials. May be repeated for credit. Prerequisite: background in Japanese or Chinese. GER:DB-Hum

*3-5 units, Aut (Bielefeldt, C)*

**RELIGST 261. Religion and Its Modern Critics**

(Same as RELIGST 161) Philosophical critique of religion as it developed in the modern west. Looking primarily at Feuerbach, Marx, Nietzsche and Freud--the so-called masters of suspicion--consider the century-long effort to understand religious consciousness as a form of projection, ideology or illusion. Central concern will be to evaluate the major claim of the critics: that religion fosters a sense of alienation or estrangement within the human condition GER:DB-Hum

*4 units, not given this year*

**RELIGST 263. Judaism and the Body**

Representations and discourses of the body in Jewish culture; theories of body and ritual. Case studies of circumcision, menstrual impurity, and intersexuality. Readings include classical texts in Jewish tradition and current discussions of these textual traditions. GER:DB-Hum, EC-Gender

*4 units, not given this year*

**RELIGST 265. Research Methods and Resources in Jewish Studies**

(Same as JEWISHST 225, JEWISHST 325, RELIGST 365) Enhance students' research skills in the interdisciplinary field of Jewish Studies, emphasizing electronic reference sources, but also archival resources and print publications. Coverage includes: Basic reference sources in Jewish Studies, History and bibliography of the Hebrew book, Hebrew Bible, Talmud, Religious studies (post-Talmudic), Jewish philosophy, Jewish history (by period; by region), Jewish languages, Hebrew literature, Yiddish literature, Zionism and Israel, Sephardic Jewry, women, Holocaust, miscellaneous topics (art, music, folklore and ethnography, sociology, genealogy, geography, pseudonyms, honorifics, abbreviations). Class sessions will also include special workshops on Hebrew / Yiddish / Ladino romanization (transliteration/transcription).

*1-3 units, not given this year*

**RELIGST 271A. Dante's Spiritual Vision**

Poetry, ethics, and theology in Dante's Divine Comedy. Supplementary readings from classical authors such as St. Thomas Aquinas, and from modern writers, such as Jorge Borges. Fulfills capstone seminar requirement for the Philosophy and Literature tracks. Students may take 271A without taking 271B. Consent of the instructor required. GER:DB-Hum

*4-5 units, not given this year*

**RELIGST 271B. Dante's Spiritual Vision**

Poetry, ethics, and theology in Dante's Divine Comedy. Supplementary readings from classical authors such as St. Thomas, and from modern writers, such as Jorge Borges. Fulfills capstone seminar requirement for the Philosophy and Literature tracks. Prerequisite: 271A GER:DB-Hum

*4-5 units, not given this year*

**RELIGST 272. Kant on Religion**

(Same as RELIGST 372) Critical examination of Kant's principle writings on religion against the background of his general theoretical and practical philosophy and guided by the hypothesis that his philosophy of religion continues to offer significant insights and resources to contemporary theories of religion. Recent reassessments of Kant on religion in the secondary literature will also be read and discussed

*3-5 units, not given this year*

**RELIGST 273. Historicism and Its Problems**

(Same as RELIGST 373) The emergence, varieties, and crises of historicism as a world view and approach to the study of religion in the 19th and 20th centuries. The implications of historical reason and historical consciousness for the philosophy of religion, ethics, and theology. GER:DB-Hum

*3-5 units, not given this year*

**RELIGST 274. From Kant to Kierkegaard**

(Same as RELIGST 374) (Graduate students register for 374.) The main currents of religious thought in Germany from Kant's critical philosophy to Kierkegaard's revolt against Hegelianism. Emphasis is on the theories of religion, the epistemological status of religious discourse, the role of history (especially the figure of Jesus), and the problem of alienation/reconciliation in seminal modern thinkers: Kant, Schleiermacher, Hegel, and Kierkegaard. GER:DB-Hum

*3-5 units, not given this year*

**RELIGST 275. Kierkegaard and Religious Existentialism**

(Same as RELIGST 375) (Graduate students register for 375.) Close reading of Kierkegaard's magnum opus, *Concluding Unscientific Postscript to Philosophical Fragments*, in its early 19th-century context. GER:DB-Hum

*3-5 units, not given this year*

**RELIGST 277. The Later Heidegger**

(Same as RELIGST 377) Lectures and seminar discussions of the problematic of the later Heidegger (1930 - 1976) in the light of his entire project. Readings from *Pathmarks*, *Four Seminars*, *On Time and Being*, and other texts. GER:DB-Hum

*3 units, not given this year*

**RELIGST 278. Heidegger: Confronting the Ultimate**

(Same as RELIGST 378) Heidegger's work on meaning, the self, and the sacred. Texts include *Being and Time*, courses and opuscula up to 1933, the *Letter on Humanism*, and *Contributions of Philosophy*. GER:DB-Hum

*3-5 units, not given this year*

**RELIGST 279. Heidegger and the Holy**

(Same as RELIGST 379) Heidegger's philosophy as opening a new door onto the possibility of experiencing the sacred after the collapse of traditional metaphysical theology. A close reading of *Being and Time* as an introduction to the question of the holy.

*4 units, not given this year*

**RELIGST 279A. Heidegger on human being and God**

This lecture-seminar first raises the question of essential characteristics of human being, such as temporality, mortality, hermeneutics and the relation to meaning, and then, via readings from Karl Rahner, asks whether human being is open to a possible relation to a supernatural divinity. GER:DB-Hum

*4 units, Spr (Sheehan, T)*

**RELIGST 280. Schleiermacher: Reconstructing Religion**

(Same as RELIGST 380) Idealist philosopher, Moravian pietist, early German Romantic, co-founder of the University of Berlin, head preacher at Trinity Church, translator of Plato's works, Hegel's opponent, pioneer in modern hermeneutics, father of modern theology. Schleiermacher's controversial reconception of religion and theology in its philosophical context. GER:DB-Hum

*3-5 units, not given this year*

**RELIGST 282. King Solomon and the Search for Wisdom**

(Same as JEWISHST 228, JEWISHST 328, RELIGST 382) What is wisdom according to the Bible? The course addresses this question by surveying various biblical and post-biblical texts associated with King Solomon. Other topics include the on-going debate over the historical existence of a Solomonic kingdom, the origins and history of the Jerusalem Temple, and Solomon's role in Jewish, Christian and Islamic tradition.

*4 units, not given this year*

**RELIGST 290. Majors Seminar**

Required of all majors and joint majors. The study of religion reflects upon itself. Representative modern and contemporary attempts to theorize, and thereby understand, the phenomena of religion in anthropology, psychology, sociology, cultural studies, and philosophy. WIM. WIM

*5 units, Win (Sockness, B)*

**RELIGST 297. Senior Essay/Honors Essay Research**

Guided by faculty adviser. May be repeated for credit. Prerequisite: consent of instructor and department.

*3-5 units, Aut (Staff), Win (Staff), Spr (Staff)*

**RELIGST 298. Senior Colloquium**

For Religious Studies majors writing the senior essay or honors thesis. Students present work in progress, and read and respond to others. Approaches to research and writing in the humanities.

*5 units, Spr (Pitkin, B)*

**GRADUATE COURSES IN RELIGIOUS STUDIES**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**RELIGST 204. Paleography of Medieval and Early Modern Manuscripts**

(Same as ENGLISH 209) Introductory course in the history of writing and of the book, from the late antique period until the advent of printing. Opportunity to learn to read and interpret medieval manuscripts through hands-on examination of original materials in Special Collections of Stanford Libraries as well as through digital images. Offers critical training in the reading of manuscripts for students from departments as diverse as Classics, History, Philosophy, Religious Studies, English, and the Division of Languages Cultures and Literatures.

*3-5 units, Win (Brown, G)*

**RELIGST 219. Buddhism and Death**

The role of pre and post mortem practices in ancient and modern Buddhist traditions; examples from India, China, and Japan. How the clergy and laity conceived of the process of dying, and how those beliefs were transformed into rituals.

*4 units, not given this year*

**RELIGST 301. Classical Islamic Law**

(Same as RELIGST 201) Emphasis is on methods of textual interpretation. History of premodern Islamic law, including origins, formation of schools of law, and social and political contexts. Laws of sale, marriage, divorce, and the obligation to forbid wrong.

*3-5 units, not given this year*

**RELIGST 302. Islamic Studies Proseminar**

Research methods and materials for the study of Islam.

*1-5 units, not given this year*

**RELIGST 303. Myth, Place, and Ritual in the Study of Religion**

(Same as RELIGST 203) Sources include: ethnographic texts and theoretical writings; the approaches of Charles Long, Jonathan Z. Smith, Victor Turner, Michael D. Jackson, and Wendy Doniger; and lived experiences as recounted in Judith Sherman's *Say the*

Name: A Survivor's Tale in Prose and Poetry, Jackson's At Home in the World, Marie Cardinal's The Words to Say It, and John Phillip Santos's Places Left Unfinished at the Time of Creation.

3-5 units, not given this year

**RELIGST 304A. Theories and Methods**

Required of graduate students in Religious Studies. Approaches to the study of religion. Prerequisite: consent of instructor.

4 units, Aut (Gelber, H)

**RELIGST 304B. Theories and Methods**

Required of graduate students in Religious Studies. Approaches to the study of religion. Prerequisite: consent of instructor.

4 units, not given this year

**RELIGST 307A. Modern African Islam through Literature**

(Same as RELIGST 207A) Read the works of Modern Muslim Literature in Africa. Explore the expressions and modes by which Islam and its contemporary condition are represented in African contexts.

4 units, not given this year

**RELIGST 307B. Islam in Central Asia**

(Same as RELIGST 207B) The history and current status of Islam in Central Asia, addressing problems in prevailing approaches to the subject in light of historical patterns and critical analysis; it will consider how the study of religion in Central Asia before the region's incorporation into the Russian/Soviet and Chinese states can help us understand developments in Muslim religious life through the 20th century and today. Issues to be addressed include Islamization and communal identity; religion and national cultures; scales of religiosity and framing Muslim status; religious knowledge and practice in social context; the dichotomies of Sovietology; Sufism, shrines, and popular religion; and Islam and political discourse and practice.

4 units, Aut (DeWeese, D)

**RELIGST 308. Medieval Japanese Buddhism**

Japanese religion and culture, including Buddhism, Shinto, popular religion, and new religions, through the medium of film.

3-5 units, not given this year

**RELIGST 309. Priests, Prophets, and Kings: Religion and Society in Late Antique Iran**

(Same as CLASSGEN 106, CLASSGEN 206, RELIGST 209) From India to the Levant and from the Caspian Sea to the Arabian Peninsula, the Sasanian Empire (224-651 CE) was the dominant power in the Middle East till the advent of Islam. Diverse religious institutions and social practices of the Zoroastrians, Manicheans, Jews, and Christians in late antique Iran. Complex relationships between the Zoroastrian priesthood, the Sasanian monarchs, and these minority religions within the context of imperial rule. Profound religious and social changes that occurred with the Islamic conquests of Iran as well as examine the rich cultural continuities that survived from the Pre-Islamic past.

4-5 units, Aut (Vevaina, Y)

**RELIGST 309A. Sugar in the Milk: Modern Zoroastrianism as Race, Religion, and Ethnicity**

(Same as RELIGST 209A) Modern Zoroastrian experience as race, religion, and ethnic identity. Some 60,000 Zoroastrians now live in India and have resided there for a millennium. In the 19th century, these peoples from Persia became colonial elites yet were acutely aware that they were not quite Indian, British, or Persian. Diverse ways this experience of dislocation has served as a defining characteristic in Parsi communal identity and contrast these South Asian experiences with the minority socio-politics of those who remained in Iran. Survey the colonial and post-colonial communities in England, East Africa, Hong Kong, Australia, and North America and examine the expression of these global diasporic experiences in literature and the arts.

4-5 units, Win (Vevaina, Y)

**RELIGST 312. Buddhist Studies Proseminar**

Research methods and materials for the study of Buddhism. May be repeated for credit. Prerequisite: reading knowledge of Chinese or Japanese.

1-5 units, not given this year

**RELIGST 317. Japanese Studies of Religion in China**

(Same as RELIGST 217) (Graduate students register for 317.) Readings in Japanese secondary sources on Chinese religions.

3 units, not given this year

**RELIGST 321. The Talmud**

(Same as RELIGST 221) Strategies of interpretation, debate, and law making. Historical contexts. Prerequisite: Hebrew.

4 units, not given this year

**RELIGST 321A. Philology of Rabbinic Literature**

(Same as RELIGST 221A) The genesis of rabbinic texts as texts. Evolution from oral stage to manuscript to printed text. Questions of redaction versus edition. Focus on Palestinian and Babylonian Talmud, with excursions into midrashic texts. Prerequisite: strong background in Hebrew. Knowledge of Aramaic preferred.

3-5 units, not given this year

**RELIGST 321B. The Talmud as Literature**

(Same as RELIGST 221B) In what sense can Talmud be studied as literature? Which voices can be identified? Concepts of author, editor, or redactor. The basic textual units of Talmud: sugya, chapter, and tractate. The sugya as literary genre. The aesthetic of talmudic dialectics. Prerequisite: Strong Hebrew, Aramaic preferred.

3-5 units, not given this year

**RELIGST 321C. Aramaic Jewish texts**

(Same as JEWISHST 221C, JEWISHST 321C, RELIGST 221C) Reading of Aramaic Jewish texts with special focus on grammar and syntax. Foundations of classical Aramaic, the two major dialects of rabbinic Aramaic, the Palestinian (Galilean) and the Babylonian. Readings from Midrash, Piyut, Talmud and Geonic materials and attempt to follow the development of the language through time. The course is intended for students with substantial knowledge of Hebrew.

2-5 units, not given this year

**RELIGST 322B. Sufism Seminar**

(Same as RELIGST 222B) Sufism through original texts and specialized scholarship. Prerequisite: ability to read at least one major language of Islamic religious literature (Arabic, Persian, Turkish, Urdu).

3-5 units, not given this year

**RELIGST 322C. Debauchery and asceticism**

(Same as RELIGST 222C) Arabic texts written by and about early Muslim figures famous either for their limitless self-indulgence or their rigorous self-denial. Language and style of these texts, their implied or explicit dialogue with religious values, and their possible relation to each other. Questions of representation, self-representation, and biographical fallacy. Intended for students with reading knowledge of Arabic.

3-5 units, not given this year

**RELIGST 322D. The Naqshbandi Sufi Tradition**

(Same as RELIGST 222D) History of the Naqshbandi Sufi tradition, from its origins in Central Asia and its spread to other parts of the Muslim world to its contemporary profile, with attention to aspects of Sufi doctrine and practice, modes of organization and succession, patterns of economic and political activity, and issues of continuity and coherence in an international Sufi order. Social and religious context for the emergence of the Naqshbandiyya and its development in its native region; students will read a shared body of basic works on Naqshbandi history and will pursue individual projects focused on Naqshbandi groups in particular regions or periods.

4 units, Aut (DeWeese, D)

**RELIGST 323A. The Arabic Qur'an**

(Same as RELIGST 223A) Early history, language, structure, style, chronology, motifs, themes, and interpretation. Knowledge of Arabic required.

3-5 units, not given this year

**RELIGST 324. Classical Islamic Texts**

(Same as RELIGST 224) Premodern Islamic scholarship. Genre-specific historical research methods. The hadith literature, tafsir, biographical dictionaries, fiqh, tarikh, and geographical works. Prerequisite: reading knowledge of Arabic.

3-5 units, not given this year

**RELIGST 324B. Unveiling the Sacred: Explorations in Islamic Religious Imagination**

(Same as RELIGST 224B) Poetry and prose in translation as well as historical studies. Islamic movements invested in the idea that

the sensory world has a hidden or esoteric counterpart that can be understood or experienced through following particular religious programs. Various forms of Shi'ism and Sufism, millenarian and apocalyptic movements, the Nation of Islam and its offshoots. Philosophical propositions, historical contexts, and the role of ritual in the construction of religious systems.

*3-5 units, not given this year*

**RELIGST 326. Philosophy and Kabbalah in Jewish Society: Middle Ages and Early Modern Period**

(Same as RELIGST 226) Characteristics of religious philosophy from Saadia Gaon to Maimonides, Jewish opposition to and support of philosophy in the medieval Christian and Muslim world, texts from the early development of Kabbalah, the relationship between philosophy and Kabbalah, and conflicting views of Kabbalah from the 16th through 18th centuries.

*5 units, not given this year*

**RELIGST 326A. Judaism and Hellenism**

(Same as RELIGST 226A) interactions and conflicts between Jews and Greeks in the centuries following the conquests of Alexander the Great and the cultural/religious repercussions of their encounter. In what ways were Jews influenced by Greek culture? In what ways, and for what reasons, did they resist it? And how the interaction of these cultures shape the subsequent development of Judaism and Christianity? Jewish texts in the Greco-Roman period, including Jewish-Greek writers like Philo of Alexandria, the Apocrypha, the Dead Sea Scrolls, selected writings from the New Testament, and the Passover Haggadah.

*3-5 units, not given this year*

**RELIGST 326B. Judaism and Christianity in the Mediterranean World: Contact, Competition, and Conflict**

(Same as CLASSGEN 126, CLASSGEN 226, JEWISHST 226B, JEWISHST 326B, RELIGST 226B) Jewish beginnings of Christianity in the first century C.E.; process of differentiation between various Jewish and Christian groups; effect of Roman-Jewish wars on Jewish and Christian identity formation; Jewish Christians, Christian Jews, and other heretics; rise of the discourse of orthodoxy and heresy; the emergence of the Adversus Judaeos tradition; theology as a realm of mutual attraction and conflict. Readings include Epistles of Paul in the New Testament, Christian authors from Justin through Augustine, excerpts from Rabbinic Texts (Mishnah, Midrash and Talmud), along with current literature on religion, ethnicity, and identity in the Roman world.

*5 units, not given this year*

**RELIGST 326C. Mystics and Merrymakers: Innovations in Modern Judaism**

(Same as JEWISHST 226C, JEWISHST 326C, RELIGST 226C) How does a tradition many thousands of years old make a space for itself in the dynamic landscape of contemporary America? Judaism has continually adapted to its surroundings, and in the twentieth century new movements have reconstructed, revised, and renewed Jewish practice. A space within has been claimed by a series of previously disenfranchised Jews including women, queer Jews, and Jews of color. Examine some of the most innovative of these changes from Jewish feminism to the Chabad Hasidic revival.

*3-4 units, not given this year*

**RELIGST 327. The Qur'an**

(Same as RELIGST 227) Early history, themes, structure, chronology, and premodern interpretation. Relative chronology of passages.

*5 units, not given this year*

**RELIGST 328S. The Study of the Midrash**

Two-week block seminar; four sessions. Talmudic philology; development and transmission of the Talmudic text and manuscripts. Relationship between Midrash and Mishnah and between Mishnah and Tosefta; development of talmudic sugiot; relationship between the Babylonian and Palestinian Talmud.

*1-2 units, OCCASIONAL*

**RELIGST 329. Winged Bulls and Sun Disks: Religion and Politics in the Persian Empire**

(Same as CLASSGEN 159, CLASSGEN 259, RELIGST 229) Since Herodotus in the 5th century BCE, the Persian Empire has been represented as the exemplar of oriental despotism and imperial arrogance, a looming presence and worthy foil for the

West and Greek democracy. History of the Achaemenid Empire, beginning with the rise of the Medes in the 7th century BCE to the fall of the Achaemenids to Alexander the Great's armies in 331 BCE. Focus on the intimate relationship between religion and empire and will also survey the diverse cultural institutions and religious practices found within the Empire. Evaluate contemporary representations of the Persians in politics and popular culture, such as the recent film 300 and the graphic novel on which it is based, in an attempt to better appreciate the enduring cultural legacy of the Greco-Persian wars.

*3 units, not given this year*

**RELIGST 330B. Zen Studies**

(Same as RELIGST 230B) Readings in recent English-language scholarship on Chan and Zen Buddhism

*4 units, not given this year*

**RELIGST 331. Authority of the Past in Islamic Thought**

(Same as RELIGST 125) How have Muslims thought about the past as a source for contextualizing the present and generating prescriptions for right conduct? What imaginations of time undergird major Islamic intellectual perspectives? A wide-ranging exploration based on readings from the Quran, lives of prophets, chronicles, philosophy of history, hagiography, epic and mythology, and ethnography.

*4 units, not given this year*

**RELIGST 338. Christian Neo-Platonism, East and West**

(Same as RELIGST 238) Christianity's shift to neo-Platonic Greek philosophical categories and its significance for contemporary spirituality. Readings from Plotinus, Proclus, Greek fathers such as Pseudo-Dionysus, and from Ambrose and Augustine.

*3-5 units, not given this year*

**RELIGST 339. Luther and the Reform of Western Christianity**

(Same as RELIGST 239) Luther's theology, ethics, biblical interpretation, and social reforms and their significance for the remaking of Western Christianity. Readings include Luther's own writings and secondary sources about Luther and his world.

*3-5 units, not given this year*

**RELIGST 341. Comparative Perspective on Confucian Texts**

Classical Confucian texts, in prose and poetry, interpreted through comparative perspectives drawn from both inside and outside China. Consent of the instructor required.

*4-5 units, not given this year*

**RELIGST 341B. Mystics and Mysticism**

(Same as RELIGST 241B) Explore the varieties of meaning and significance the term mysticism takes on in religious studies through an exploration of accounts of mystical experiences: visions, bodily sensations, sense of the sacred, along with practices engaged in and texts written by those claiming such experiences for themselves or others. Focus will be on Medieval/Renaissance Christians but students are invited to explore examples from other times, traditions and places.

*3-5 units, not given this year*

**RELIGST 347. Chinese Buddhist Texts**

(Same as RELIGST 247) Chinese Buddhist texts from the Han Dynasty onwards, including sutra translations, prefaces, colophons, story collections and biographies. Prerequisite: reading competence in Chinese.

*3-5 units, Win (Harrison, P)*

**RELIGST 347B. Readings in Chinese Religious Texts: The Lingbao Scriptures**

(Same as RELIGST 247B) A survey of the original Lingbao scriptures. Composed in the late-4th / early 5th century, these texts radically revised Daoist practice, incorporated elements of Buddhist thought and practice, and created liturgies that are still used in Daoist communities today. (Reading knowledge of Literary Chinese *ii* required).

*4 units, not given this year*

**RELIGST 348. Chinese Buddhism in World Historical Perspective**

(Same as RELIGST 248) Shared cosmologies, trade routes, and political systems. Prerequisite: background in Chinese or Japanese.

*3-5 units, not given this year*

**RELIGST 348A. Chinese Buddhism Beyond the Great Wall**

(Same as RELIGST 248A) The thought, practice, and cultural resonance of the sorts of originally Chinese Buddhism that flourished to the north and northwest of China proper during the two to three centuries following the fall of the Tang - i.e., under the Khitan Liao (907-1125) and the Tangut Xixia (1032-1227) dynasties - with special emphasis on the later fortunes of the Huayan, Chan, and Mijiao (Esoteric) traditions. Prerequisite: reading knowledge of Chinese.

*3-5 units, not given this year*

**RELIGST 349. Meditation and Mythology in Chinese Buddhism**

Readings in Chinese texts and English scholarly literature on issues such as specific techniques and hagiographical imagery in Chinese Buddhist traditions of self-cultivation. Prerequisite: background in Chinese or Japanese.

*3-5 units, not given this year*

**RELIGST 350. Modern Western Religious Thought****Proseminar**

Selected topics in recent and contemporary religious thought. May be repeated for credit.

*1-5 units, not given this year*

**RELIGST 350B. Depictions of the Buddha**

(Same as RELIGST 250B) The image of the Buddha changes relatively little from its earliest conceptions. The role of the image and the notion of the Buddha do change fundamentally with time and place. South Asian depictions of the Buddha from the earliest symbolic representations to the wrathful and peaceful forms found in the esoteric Buddhism of India and the Himalayas, as well as the changing conceptions of the Buddha to which these depictions are related.

*3-5 units, not given this year*

**RELIGST 351. Readings in Indian Buddhist Texts**

(Same as RELIGST 251) (Graduate students register for 351.) Introduction to Buddhist literature through reading original texts in Sanskrit. Prerequisite: Sanskrit.

*3-5 units, Spr (Harrison, P)*

**RELIGST 351A. Buddhist Visions of Paradise**

(Same as RELIGST 251A) Textual and art-historical evidence for the early development in the greater Indian cultural area of the cult of the Buddhas of the present and their paradise worlds (Pure Land Buddhism).

*3-5 units, not given this year*

**RELIGST 353. Mountains, Buddhist Practice, and Religious Studies**

(Same as RELIGST 253) The notion of the sacred mountain. Readings from ethnographic and theoretical works, and primary sources.

*3-5 units, not given this year*

**RELIGST 357. Readings in Daoist Texts**

(Same as RELIGST 257) Readings from primary sources. Prerequisite: classical Chinese.

*4 units, not given this year*

**RELIGST 358. Japanese Buddhist Texts**

(Same as RELIGST 258) Readings in medieval Japanese Buddhist materials. May be repeated for credit. Prerequisite: background in Japanese or Chinese.

*3-5 units, Aut (Bielefeldt, C)*

**RELIGST 359A. Religion and Performance**

(Same as RELIGST 159A) What happens when religion is viewed through the lens of performance? Texts become dramas, songs, recitations, oral commentaries, dances, movies, and political appropriations. Beliefs become embodied enactments; doctrine puts on a costume and indulges in role play. Approaches to performance theory through religious enactments such as ritual, prayer, festival, drama, music, and film. Most examples from S. Asian religions; students may undertake research projects into other cultures and traditions.

*4 units, not given this year*

**RELIGST 365. Research Methods and Resources in Jewish Studies**

(Same as JEWISHST 225, JEWISHST 325, RELIGST 265) Enhance students' research skills in the interdisciplinary field of

Jewish Studies, emphasizing electronic reference sources, but also archival resources and print publications. Coverage includes: Basic reference sources in Jewish Studies, History and bibliography of the Hebrew book, Hebrew Bible, Talmud, Religious studies (post-Talmudic), Jewish philosophy, Jewish history (by period; by region), Jewish languages, Hebrew literature, Yiddish literature, Zionism and Israel, Sephardic Jewry, women, Holocaust, miscellaneous topics (art, music, folklore and ethnography, sociology, genealogy, geography, pseudonyms, honorifics, abbreviations). Class sessions will also include special workshops on Hebrew / Yiddish / Ladino romanization (transliteration/transcription).

*1-3 units, not given this year*

**RELIGST 370. Comparative Religious Ethics**

The difference that the word religious makes in religious ethics and how it affects issues of genre. Theoretical analyses with examples from W. and E. Asia. Prerequisite: consent of instructor.

*4 units, not given this year*

**RELIGST 372. Kant on Religion**

(Same as RELIGST 272) Critical examination of Kant's principle writings on religion against the background of his general theoretical and practical philosophy and guided by the hypothesis that his philosophy of religion continues to offer significant insights and resources to contemporary theories of religion. Recent reassessments of Kant on religion in the secondary literature will also be read and discussed

*3-5 units, not given this year*

**RELIGST 373. Historicism and Its Problems**

(Same as RELIGST 273) The emergence, varieties, and crises of historicism as a world view and approach to the study of religion in the 19th and 20th centuries. The implications of historical reason and historical consciousness for the philosophy of religion, ethics, and theology.

*3-5 units, not given this year*

**RELIGST 374. From Kant to Kierkegaard**

(Same as RELIGST 274) (Graduate students register for 374.) The main currents of religious thought in Germany from Kant's critical philosophy to Kierkegaard's revolt against Hegelianism. Emphasis is on the theories of religion, the epistemological status of religious discourse, the role of history (especially the figure of Jesus), and the problem of alienation/reconciliation in seminal modern thinkers: Kant, Schleiermacher, Hegel, and Kierkegaard.

*3-5 units, not given this year*

**RELIGST 374E. Kierkegaard: Existentialism and Religion**

(Same as RELIGST 174E) Kierkegaard is rightly called one of the founders of existentialism. Like Socrates, the one philosopher in the western tradition to whom he felt consciously in debt, Kierkegaard sought to return philosophy to the work of thinking through the human condition in all its uncertainty and finitude. Although 20th century existentialists like Sartre and Camus were self-consciously atheist, Kierkegaard's existentialism has religious origins. Through readings of Kierkegaard's philosophical and religious texts, explore the possibility of an existentialist interpretation of the human condition that is religious in nature. Kierkegaard's development of a 'philosophy of existence' as a response to major trends in modern European thought, particularly in response to the philosophies of German idealism (Kant, Hegel) and romanticism.

*4 units, not given this year*

**RELIGST 375. Kierkegaard and Religious Existentialism**

(Same as RELIGST 275) (Graduate students register for 375.) Close reading of Kierkegaard's magnum opus, *Concluding Unscientific Postscript to Philosophical Fragments*, in its early 19th-century context.

*3-5 units, not given this year*

**RELIGST 377. The Later Heidegger**

(Same as RELIGST 277) Lectures and seminar discussions of the problematic of the later Heidegger (1930 - 1976) in the light of his entire project. Readings from *Pathmarks*, *Four Seminars*, *On Time and Being*, and other texts.

*3 units, not given this year*

**RELIGST 378. Heidegger: Confronting the Ultimate**

(Same as RELIGST 278) Heidegger's work on meaning, the self, and the sacred. Texts include *Being and Time*, courses and

opuscula up to 1933, the Letter on Humanism, and Contributions of Philosophy.

3-5 units, not given this year

**RELIGST 379. Heidegger and the Holy**

(Same as RELIGST 279) Heidegger's philosophy as opening a new door onto the possibility of experiencing the sacred after the collapse of traditional metaphysical theology. A close reading of Being and Time as an introduction to the question of the holy.

4 units, not given this year

**RELIGST 380. Schleiermacher: Reconstructing Religion**

(Same as RELIGST 280) Idealist philosopher, Moravian pietist, early German Romantic, co-founder of the University of Berlin, head preacher at Trinity Church, translator of Plato's works, Hegel's opponent, pioneer in modern hermeneutics, father of modern theology. Schleiermacher's controversial reconception of religion and theology in its philosophical context.

3-5 units, not given this year

**RELIGST 382. King Solomon and the Search for Wisdom**

(Same as JEWISHST 228, JEWISHST 328, RELIGST 282) What is wisdom according to the Bible? The course addresses this question by surveying various biblical and post-biblical texts associated with King Solomon. Other topics include the on-going debate over the historical existence of a Solomonic kingdom, the origins and history of the Jerusalem Temple, and Solomon's role in Jewish, Christian and Islamic tradition.

4 units, not given this year

**RELIGST 382A. In Search of David and Solomon**

(Same as CLASSGEN 182, CLASSGEN 282, JEWISHST 182A, JEWISHST 382A, RELIGST 182A) In recent years, the existence of King David and Solomon has become a hotly contested subject, with some scholars questioning whether they were real-life historical figures and others claiming to have found evidence that corroborates their existence. Drawing on the most recent archaeological research, this course will involve students in the quest for the historical David and Solomon as a way to introduce them to the challenges of using the Bible as an historical source.

4 units, Spr (Lederman, Z)

**RELIGST 385. Research in Buddhist Studies**

Independent study in Buddhism. May be repeated for credit. Prerequisite: consent of instructor.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**RELIGST 386. Research in Islamic Studies**

Independent study in Islamic Studies. May be repeated for credit. Prerequisite: consent of instructor.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**RELIGST 387. Research in Jewish Studies**

Independent study in Jewish Studies. May be repeated for credit. Prerequisite: consent of instructor.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**RELIGST 388. Research in Modern Religious Thought, Ethics, and Philosophy**

Independent study in Modern Religious Thought, Ethics, and Philosophy. May be repeated for credit. Prerequisite: consent of instructor.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**RELIGST 389. Individual Work for Graduate Students**

May be repeated for credit. Prerequisite: consent of instructor.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**RELIGST 390. Teaching Internship**

Required supervised internship for PhDs.

3-5 units, not given this year

**RELIGST 391. Teaching Religious Studies**

Workshop/seminar for doctoral students in Religious Studies and adjacent fields designed to cultivate methods for teaching Religious Studies in an academic setting.

3 units, Spr (Weitzman, S)

**RELIGST 392. Paper in the Field**

Prerequisite: consent of graduate director. May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff)

**RELIGST 395. Master of Arts Thesis**

2-9 units, Aut (Staff), Win (Staff), Spr (Staff)

**RELIGST 399. Recent Works in Religious Studies**

Readings in secondary literature for Religious Studies doctoral students. May be repeated for credit.

1-2 units, Spr (Sokness, B)

**RELIGST 801. TGR Project**

(Staff)

0 units, Aut (Staff), Win (Staff), Spr (Staff)

**RELIGST 802. TGR Dissertation**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## RUSSIAN, EAST EUROPEAN, AND EURASIAN STUDIES (REES) COURSES

### UNDERGRADUATE COURSES IN RUSSIAN, EAST EUROPEAN, AND EURASIAN STUDIES

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**REES 18. Understanding the Jews of Russia and Poland**

A preparatory course, for field trip to Moscow and Warsaw, that would cover Russian and Polish History, former Soviet Jewry, international relations, and current social realities

1 unit, not given this year

**REES 23. Issues in International Public Health**

Activity course features Stanford faculty and researchers who lecture weekly on their experiences working international health issues. Focus this year will be on the global region including Russia, East Europe, Central Asia.

1-3 units, Win (Staff)

**REES 35. Films of Central Asia**

Films with English subtitles from Tajikistan, Uzbekistan, Kazakhstan, Kyrgyzstan, and Turkmenistan. May be repeated once for credit. (AU)

1-2 units, Win (Kunanbaeva, A), Spr (Kunanbaeva, A)

**REES 100. Current Issues in Russian, East European, and Eurasian Studies**

Enrollment limited to REES students. Scholars present analyses of methodologies, challenges, and current issues in the study of Russia, E. Europe, and Eurasia.

1 unit, Win (Crews, R; Wessling, R), Spr (Crews, R; Wessling, R)

**REES 105. Central and East European Politics**

(Same as REES 205) Focus is on how the states of Central and East Europe, including the Baltic states, have moved from communism and the Soviet Bloc to democracy, NATO and the EU. Topics include the communist legacy, transitions and their legacies, ethnic issues, and the evolution of economic and social policies, and the comparison of democratization processes in these countries to democracies in other regions, such as Latin America and southern Europe. GER:DB-SocSci

5 units, not given this year

**REES 119. The Russian Economy**

(Same as ECON 119, REES 219) Brief introduction to the economic history of Russia, general overview of the modern Russian economy with analysis of its macroeconomic features and dynamics, industrial structure, and the major institutional features that are important for understanding Russian economic development. The period of transition from Soviet-type planned economy to a market economy and market reforms (1991-1998), the period of economic growth (1999-2007), and the economic development of Russia during the current global crisis of 2008-2010. Analysis of Russia's social structure and social policy, labor markets, the regional structure of the economy, the role of the state, and major Russian industries (oil, metals, machinery). Emphasis on the specific institutional aspects that have shaped Russia's economic development.

4-5 units, not given this year

**REES 130. With God in Russia: Orthodox Christianity in the 19th and 20th Centuries**

(Same as REES 330) The experience of religion, particularly Orthodoxy, under tsars and commissars. Religion as a lived experience; practice and belief in the provinces and villages, intertwining of religion and folk customs (the so-called double faith); condition of the Church before and after the Revolutions of 1917; religion under Soviet control; and liberation of the Church since the collapse of the Soviet Union.

4-5 units, not given this year

**REES 330. With God in Russia: Orthodox Christianity in the 19th and 20th Centuries**

(Same as REES 130) The experience of religion, particularly Orthodoxy, under tsars and commissars. Religion as a lived experience; practice and belief in the provinces and villages, intertwining of religion and folk customs (the so-called double faith); condition of the Church before and after the Revolutions of 1917; religion under Soviet control; and liberation of the Church since the collapse of the Soviet Union.

4-5 units, not given this year

**GRADUATE COURSES IN RUSSIAN, EAST EUROPEAN, AND EURASIAN STUDIES**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**REES 200. Current Issues in Russian, East European, and Eurasian Studies**

Enrollment limited to REES students. Scholars present analyses of methodologies, challenges, and current issues in the study of Russia, E. Europe, and Eurasia.

1 unit, *Win (Crews, R; Wessling, R), Spr (Crews, R; Wessling, R)*

**REES 205. Central and East European Politics**

(Same as REES 105) Focus is on how the states of Central and East Europe, including the Baltic states, have moved from communism and the Soviet Bloc to democracy, NATO and the EU. Topics include the communist legacy, transitions and their legacies, ethnic issues, and the evolution of economic and social policies, and the comparison of democratization processes in these countries to democracies in other regions, such as Latin America and southern Europe.

5 units, not given this year

**REES 207A. St. Petersburg, a Cultural Biography: Architecture, Urban Planning, the Arts**

(Same as ARTHIST 107A) The most premeditated city in the whole world, according to Dostoevsky; created in 1703 by Peter the Great as a counterpoise to Moscow and old Russian culture; planned as a rational, west-European-appearing capital city of the Russian Empire. St. Petersburg's history through works of its artists, architects, urban planners, writers, and composers.

4 units, *Spr (Kollmann, J)*

**REES 219. The Russian Economy**

(Same as ECON 119, REES 119) Brief introduction to the economic history of Russia, general overview of the modern Russian economy with analysis of its macroeconomic features and dynamics, industrial structure, and the major institutional features that are important for understanding Russian economic development. The period of transition from Soviet-type planned economy to a market economy and market reforms (1991-1998), the period of economic growth (1999-2007), and the economic development of Russia during the current global crisis of 2008-2010. Analysis of Russia's social structure and social policy, labor markets, the regional structure of the economy, the role of the state, and major Russian industries (oil, metals, machinery). Emphasis on the specific institutional aspects that have shaped Russia's economic development.

4-5 units, not given this year

**REES 247A. Folklore, Mythology, and Islam in Central Asia**

(Same as ANTHRO 147A) Central Asian cults, myths, and beliefs from ancient time to modernity. Life crisis rites, magic ceremonies, songs, tales, narratives, taboos associated with childbirth, marriage, folk medicine, and calendrical transitions. The nature and the place of the shaman in the region. Sources

include music from the fieldwork of the instructor and the Kyrgyz epoch Manas. The cultural universe of Central Asian peoples as a symbol of their modern outlook.

3-5 units, *Spr (Kunanbaeva, A)*

**REES 299. Directed Reading**

1-12 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**REES 301. An Introduction to Russian, East European and Eurasian Studies**

This seminar investigates the origins and evolution of the field and exposes students to major debates about the history, geography, politics, societies, economies, cultures, and languages of the region.

5 units, *Aut (Crews, R)*

**REES 320. State and Nation Building in Central Asia**

Issues of identity, development, and security following the dissolution of the Soviet Union and the emergence of independent states in Central Asia and the Southern Caucasus. Topics include the impact of 9/11, the spread of radical Islamist movements in the region, its growing role as a transit route for drugs, weapons, and possibly nuclear materials, the impact of the Soviet legacy, the nature of political and economic transformations, relations with neighboring countries, security challenges, and options facing U.S. policy makers.

5 units, *Win (Lapidus, G)*

**REES 340. The Comparative Political Economy of Post-Communist Transitions**

(Same as POLISCI 240C) Dominant theoretical perspectives of comparative democratization and marketization; focus is on the political economy of transition in Eastern Europe and Eurasia while comparing similar processes in Latin America and Asia. Topics include: meanings of democracy, synergy between democracies and markets, causes of the collapse of communism, paths to political liberalization and democracy, civil society, constitutions, parliaments, presidents, the rule of law, electoral systems, market requirements, strategies of reform, the Russian experience of market building, exporting democracy and the market, and foreign aid and assistance.

3-4 units, *Aut (Staff)*

**SCIENCE, TECHNOLOGY, AND SOCIETY (STS) COURSES****UNDERGRADUATE COURSES IN SCIENCE, TECHNOLOGY, AND SOCIETY**

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**STS 101. Science, Technology, and Contemporary Society**

(Same as ENGR 130, STS 201) Key social, cultural, and values issues raised by contemporary scientific and technological developments; distinctive features of science and engineering as sociotechnical activities; major influences of scientific and technological developments on 20th-century society, including transformations and problems of work, leisure, human values, the fine arts, and international relations; ethical conflicts in scientific and engineering practice; and the social shaping and management of contemporary science and technology. GER:DB-SocSci

4-5 units, *Aut (McGinn, R)*

**STS 101Q. Technology in Contemporary Society**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Introduction to the STS field. The natures of science and technology and their relationship, what is most distinctive about these forces today, and how they have transformed and been affected by contemporary society. Social, cultural, and ethical issues raised by recent scientific and technological developments. Case studies from areas such as information technology and biotechnology, with emphasis on the contemporary U.S. Unexpected influences of science and technology on contemporary society and how social forces shape scientific and technological enterprises and their products. Enrollment limited to 12. GER:DB-SocSci

4 units, Aut (McGinn, R)

### STS 110. Ethics and Public Policy

(Same as MS&E 197, PUBLPOL 103B) Ethical issues in science- and technology-related public policy conflicts. Focus is on complex, value-laden policy disputes. Topics: the nature of ethics and morality; rationales for liberty, justice, and human rights; and the use and abuse of these concepts in policy disputes. Case studies from biomedicine, environmental affairs, technical professions, communications, and international relations. GER:DB-Hum, EC-EthicReas, WIM

5 units, Win (McGinn, R)

### STS 112. Ten Things: An Archaeology of Design

(Same as CLASSART 113, CLASSART 213) Connections among science, technology, society and culture by examining the design of a prehistoric hand axe, Egyptian pyramid, ancient Greek perfume jar, medieval castle, Wedgwood teapot, Edison's electric light bulb, computer mouse, Sony Walkman, supersonic aircraft, and BMW Mini. Interdisciplinary perspectives include archaeology, cultural anthropology, science studies, history and sociology of technology, cognitive science, and evolutionary psychology. GER:DB-SocSci

3-5 units, Aut (Shanks, M)

### STS 115. Ethical Issues in Engineering

(Same as ENGR 131) Moral rights and responsibilities of engineers in relation to society, employers, colleagues, and clients; cost-benefit-risk analysis, safety, and informed consent; the ethics of whistle blowing; ethical conflicts of engineers as expert witnesses, consultants, and managers; ethical issues in engineering design, manufacturing, and operations; ethical issues arising from engineering work in foreign countries; and ethical implications of the social and environmental contexts of contemporary engineering. Case studies, guest practitioners, and field research. Limited enrollment. GER:DB-Hum

4 units, Spr (McGinn, R)

### STS 144. Game Studies: Issues in Design, Technology, and Player Creativity

What can be learned about innovation from digital games? Digital game technologies, communities, and cultures. Topics include game design, open source ideas and modding, technology studies, player/consumer-driven innovation, fan culture, transgressive play, and collaborative co-creation drawn from virtual worlds and online games.

4 units, not given this year

### STS 150. Car Culture

(Same as ANTHRO 146) Since at least the 50s, the U.S. has been notorious as a nation in love with the car. An examination of this premise, analyzing new methods of production brought by automobile manufacture, how automobiles shaped urban growth, debates about pollution and environmental degradation, and debates around auto safety. How the car has influenced American practices including courting, eating out, and suburban living.

5 units, not given this year

### STS 152. Nuclear Weapons, Risk and Hope

Recent research indicates that depending on nuclear weapons for our security is thousands of times riskier than society will tolerate with respect to nuclear power plants. This seminar explores methods for estimating the risk, why society ignores the danger, and what can be done to correct that imbalance. No prerequisites, and at a level understandable to non-majors, including in the humanities.

1 unit, Aut (Hellman, M)

### STS 190. STS Junior Seminar

Wired Space & Green Space: The Politics of Design. The technological development and social impact of design in the modern period, with a focus on California. Topics include transportation grids, information systems, wireless networks, urban parks, community gardens, and green buildings. Project-based course that introduces students to primary research methods. Open to both STS majors and non-majors with junior standing. A required course section will be determined at the first day of class.

4 units, Win (Carruth, A)

### STS 199. Individual Work

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### STS 200. STS Senior Colloquium

Food Studies: Science, Technology, and Social Change. The interplay of scientific research, technological innovation, and social movements within the global food system. Case studies on the Green Revolution, genetically-modified seeds, fast food, slow food, and fair trade. Writing-intensive course required of all STS majors. Prerequisite: STS major with senior standing and four STS core courses, or consent of instructor.

4 units, Aut (Carruth, A), Spr (Carruth, A)

### STS 210. Ethics, Science, and Technology

Ethical issues raised by advances in science and technology. Topics: biotechnology including agriculture and reproduction, the built environment, energy technologies, and information technology. Prerequisite: 110 or another course in ethics. Limited enrollment. GER:DB-Hum

4 units, not given this year

## GRADUATE COURSES IN SCIENCE, TECHNOLOGY, AND SOCIETY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### STS 201. Science, Technology, and Contemporary Society

(Same as ENGR 130, STS 101) Key social, cultural, and values issues raised by contemporary scientific and technological developments; distinctive features of science and engineering as sociotechnical activities; major influences of scientific and technological developments on 20th-century society, including transformations and problems of work, leisure, human values, the fine arts, and international relations; ethical conflicts in scientific and engineering practice; and the social shaping and management of contemporary science and technology.

4-5 units, Aut (McGinn, R)

### STS 299. Advanced Individual Work

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## SLAVIC GENERAL (SLAVGEN) COURSES

### UNDERGRADUATE COURSES IN SLAVIC GENERAL

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### SLAVGEN 13N. Russia and the Russian Experience

Preference to freshmen. The political and cultural history of Russia and the Russians: prominent persons, prominent events, and how they shape current attitudes and society. Short works by Russian authors. GER:DB-Hum

3-4 units, not given this year

#### SLAVGEN 77Q. Russia's Weird Classic: Nikolai Gogol

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The work and life of Nikolai Gogol, the eccentric founder of Fantastic Realism. The relationship between romanticism and realism in Russian literature, and between popular Ukrainian culture and high Russian and W. European traditions in Gogol's oeuvre. The impact of his work on 20th-century modernist literature, music, and art, including Nabokov, literature of the absurd, Shostakovich, Meyerhold, and Chagall. GER:DB-Hum

3-4 units, Win (Fleishman, L)

#### SLAVGEN 78N. Poetry to Prose: The Birth of the Great Russian Novel in Alexander Pushkin's Eugene Onegin

(F,Sem) Stanford Introductory Seminar. This course will be devoted to a close reading and detailed discussion of Alexander Pushkin's masterpiece, Eugene Onegin, in the context of nineteenth-century Russian and continental literary history. We will discuss major theoretical and literary-historical questions: What is realism in literature? How does it differ from other literary epochs, movements and styles? What is the novel and how does it relate to other genres? In what way does the novel in verse differ from the novel in prose? We will also explore the relationships

between the narrator and the author and between the narrator and the characters in the text. Through examination of the constituent elements of verse language, we will see Pushkin's inventive contributions to world literature. GER:IHUM-3

4 units, Spr (Fleishman, L)

**SLAVGEN 110. The Gogol Bordello: Ukraine as a Meeting House of Cultures**

(Same as SLAVGEN 210) The cohabitation of authors and cultural geography in multiethnic Ukraine. Comparison of Ukrainian texts, images of Ukraine and Ukrainians by their Polish, Jewish, German, and Russian cohabitants. Possible authors include : Andrukhovych, Aleichem, Babel, Celan, Franko, Gogol, Lewycka, Mickiewicz, Shevchenko, Pushkin, Schulz, Ukraina, and Zabuzhko. GER:DB-Hum

3-5 units, not given this year

**SLAVGEN 122. Yiddish Story**

(Same as SLAVGEN 222) The humor, drama, anger, and artistry of modern E. European and American Yiddish writers including Sholem Aleichem, I. L. Peretz, Isaac Bashevis Singer, Chaim Grade, and Yankev Glatshteyn. In English. GER:DB-Hum, EC-GlobalCom

5 units, not given this year

**SLAVGEN 123. The Yiddish Novel**

(Same as SLAVGEN 223) How Yiddish novels reveal changes in modern Jewish life and literature in Europe and the U.S. The influences of folklore, traditional Jewish culture, and European literature. Works by Isaac and Joshua Singer, Joseph Opatoshu, Der Nister, Chava Rosenfarb, Sholem Asch, and David Bergelson. Readings in English; optional sessions for close readings in Yiddish. GER:DB-Hum

3-4 units, not given this year

**SLAVGEN 133. Poles and Others: Literature and History in Modern Poland**

(Same as SLAVGEN 233) The physical and cultural territories of the former Polish-Lithuanian Commonwealth have long been objects of contest. The 20th century witnessed two or three rebirths of Poland and one or two deaths; a belated modernization of Polish society; the final inclusion of Polish-speaking peasants and burghers in a Polish national identity; and the exclusion of Jews, Germans, Lithuanians, Belarusians, Ukrainians, and others from the state and participation in a partially shared culture. GER:DB-Hum

3-4 units, not given this year

**SLAVGEN 141. Staging the Revolution: Russian Theater and Society, 1917-1937**

(Same as SLAVGEN 241) Between 1917 and 1937, artistic experimentation in the Russian theater coincided with political and social changes in Russian society. Modernist artists interpreted the revolution as an artistic possibility to demolish conventions of representation. Mass festivals, circus, and street performances replaced the old theater. In the time of the Great Terror and staged trials, theater and opera remained among the leading arts, but state patronage caused a major reorientation of artistic practices. Readings include plays by Mayakovsky, Bulgakov, Babel, Tretyakov, and Erdman. Readings in English. GER:DB-Hum

4 units, not given this year

**SLAVGEN 145. Age of Experiment: Russian Experiments in Short Fiction (1820-1905)**

(Same as SLAVGEN 245) Russian literature is identified with its great 19th c. novels, baggy monsters of 600-1200 pages. In this course we will instead investigate an array of short fictional forms (stories, novellas, tales, plays, and journalistic sketches) by Pushkin, Gogol, Lermontov, Tolstoy, Turgenev, Dostoevsky and Chekhov, in light of their competitive redefinitions of the tasks of art and consciousness, as well as their continuing technical and philosophical impact on modern narrative. No prerequisites. Course conducted in English. Students with Russian competence will have opportunity to read and work with texts in original GER:DB-Hum, EC-GlobalCom

3-5 units, Aut (Greenleaf, M)

**SLAVGEN 148. Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin**

(Same as SLAVGEN 248) Russian culture and society since 1953 through literature (in English translation). Topics: opposition and dissent; generational conflict; modernization; everyday life,

gender, ethnicity, class, citizenship, exit from communism. Literature of the Thaw, state-published and samizdat, village and cosmopolitan, the new emigration, Sots-Art, and the Russian post-modern. Solzhenistyn, Shalamov, Trifonov, Siniavsky-Tertz, Erofeev, Dovlatov, Brodsky, Petrushevskaya, Pelevin, Ulitskaya, Sorokin. Requirements: three reaction papers and final exam (UG); research paper for graduate credit (extra section for graduate students; may register for SLAVLIT 399) GER:DB-Hum, EC-GlobalCom

3-5 units, Spr (Freidin, G)

**SLAVGEN 150. Countercultures in Conversation: Russian and American Rock Music and Protest Poetry**

(Same as SLAVGEN 250) Non-conformist protest movements in contemporary Russian poetry; historical and cultural context; and comparison with similar processes in American social and cultural life. Sources include Russian and American poetry, songs, and DVDs. Fourth unit for readings in Russian. GER:DB-Hum

3-4 units, not given this year

**SLAVGEN 153. Russian Jewish Literature**

(Same as SLAVGEN 253) Russian Jewish experience inspired books and films in Hebrew, Yiddish, Russian and English that reveal a world of conflict, humor and beauty. From the mid-19th century to the 21st century. Authors include Haim Nahman Bialik, Sholem Aleichem, Isaac Babel, Osip Mandelstam, Joseph Brodsky, Leonid Tsypkin, Ludmila Ulitskaya, Gary Shteyngardt. GER:DB-Hum

3-4 units, not given this year

**SLAVGEN 156. Nabokov in the Transnational Context**

(Same as COMPLIT 115, COMPLIT 215, SLAVGEN 256) Nabokov's techniques of migration and camouflage as he inhabits the literary and historical contexts of St. Petersburg, Berlin, Paris, America, and Switzerland. His early and late stories, last Russian novel *The Gift*, *Lolita* (the novel and screenplay), and *Pale Fire*. Readings in English. Russian speakers will be encouraged to read Russian texts in original. GER:DB-Hum

3-5 units, Aut (Greenleaf, M)

**SLAVGEN 162. Gender Images in Film**

(Same as SLAVGEN 262) Film creates permanent new images of femininity. One of its conscious prerequisites is the notion of social stereotypes. The development of enduring images of the film heroine, 1914-90, through a comparison of the Russian, American, and W. European cinema, and analytical approaches to them from feminist film theory. GER:EC-Gender

3 units, not given this year

**SLAVGEN 163. Gender in Postwar Russian Culture**

(Same as SLAVGEN 263) Issues of femininity and masculinity in Russian literature, film, and popular culture from the 40s to the present. Readings include fiction, memoirs, poetry, drama, and theoretical works in gender studies. GER:EC-Gender

3-4 units, not given this year

**SLAVGEN 165. Poetry, Painting, and Music of the Russian Avant Garde**

(Same as SLAVGEN 265) Interrelationships between poetry and other arts in Russia, 1905-30. The pursuit of synthesis of arts and the modernist agenda of life creation and immortality. Parallel developments in literature, painting, and music, and style and poetics. Russian modernist poetry in the context of changes in the language of visual arts and music). Women poets and artists. Native sources and Western influences; non-Russian elements and transnational tendencies. The impact of scientific discoveries and technological inventions on artistic experimentation.

3-4 units, not given this year

**SLAVGEN 181. Philosophy and Literature**

(Same as CLASSGEN 81, COMPLIT 181, ENGLISH 81, FRENCH 181, ITALGEN 181, GERGEN 181) Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both

philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4-5 units, *Win (Staff)*

### SLAVGEN 185. CINEMATO-GRAPH

(Same as FILMSTUD 131, FILMSTUD 331, SLAVGEN 285) The term cinematography, which literally means inscribing motion, tends to lose the graphic part in modern use. However, several influential film-makers not only practiced the art of inscribing motion but also wrote texts discussing the aesthetic premises of cinematographic art. This course explores theories of cinema as propagated by the following film-makers: Vertov, Eisenstein, Godard, Bresson, Antonioni, Pasolini, Tarkovsky, Greenaway, and Lynch. Selected key texts will be supplemented by screenings of classic films, indicative of each director's work.

3-5 units, *Aut (Skakov, N)*

### SLAVGEN 190. Tolstoy's Anna Karenina in Dialogue with Contemporary Philosophical, Social, and Ethical Thought

(Same as COMPLIT 190, COMPLIT 290, SLAVGEN 290) Anna Karenina, the novel as a case study in the contest between modernity and tradition, their ethical order, ideology, cultural codes, and philosophies. Images of society, women and men in Tolstoy v. those of his contemporaries: Marx, Mill, Nietzsche, Weber, Durkheim, Freud. Open to juniors, seniors and graduate students. Requirements: three interpretive essays (500-1000 words each). Analysis of a passage from the novel; AK refracted through a philosophical prism and vice versa (30% each); class discussion and Forum (10%). GER:DB-Hum, DB-Hum, EC-EthicReas

3-5 units, *Win (Freidin, G)*

### SLAVGEN 195. RUSSIAN THEATER

(Same as SLAVGEN 295) Reading plays in juxtaposition with clips from performances and famous directors' writings (Stanislavsky, Meyerhold, and beyond). Evolution of Russian theatrical theory and practice, with particular attention to the present. Some knowledge of Russian desirable. GER:DB-Hum

3-4 units, *not given this year*

### SLAVGEN 196. Incarceration as Inspiration: Russian and American Prison Narratives

(Same as COMPLIT 196) This course will employ a multitude of prison-related texts (letters, memoirs, short stories, historical accounts, films, and theoretical criticism) to explore the connection between incarceration and inspiration. Together we will examine the following questions: what is the link between creativity and the penitentiary? What is the allure of crime and the function of prison? What effect does the restriction of space have on the mind? How does life-writing versus fictional writing capture the prison experience? The quarter will culminate with a visit to an area correctional facility. GER:DB-Hum

3-5 units, *Win (Draskoczy, J)*

## GRADUATE COURSES IN SLAVIC GENERAL

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### SLAVGEN 210. The Gogol Bordello: Ukraine as a Meeting House of Cultures

(Same as SLAVGEN 110) The cohabitation of authors and cultural geography in multiethnic Ukraine. Comparison of Ukrainian texts, images of Ukraine and Ukrainians by their Polish, Jewish, German, and Russian cohabitants. Possible authors include: Andrukhovych, Aleichem, Babel, Celan, Franko, Gogol, Lewycka, Mickiewicz, Shevchenko, Pushkin, Schulz, Ukraina, and Zabuzhko.

3-5 units, *not given this year*

### SLAVGEN 221. Modernism and the Jewish Voice in Europe

(Same as COMPLIT 247, GERGEN 221A) Some of the most haunting literary voices of the 20th century emerged from the Jewish communities of Eastern and Central Europe. The Jewishness of the modernists is thematized, asking whether it contributed to shared attitudes toward text, history, or identity. Their works are situated in specific linguistic traditions: Yiddish, Hebrew, Russian, Polish, or German. Primary readings from Ansky, Bialik, Mandelstam, Babel, Schulz, Kafka, Celan;

secondary readings in history, E. European literature, and theory, including Marx, Freud, Benjamin, and Arendt.

3-4 units, *not given this year*

### SLAVGEN 222. Yiddish Story

(Same as SLAVGEN 122) The humor, drama, anger, and artistry of modern E. European and American Yiddish writers including Sholem Aleichem, I. L. Peretz, Isaac Bashevis Singer, Chaim Grade, and Yankev Glatshteyn. In English.

5 units, *not given this year*

### SLAVGEN 223. The Yiddish Novel

(Same as SLAVGEN 123) How Yiddish novels reveal changes in modern Jewish life and literature in Europe and the U.S. The influences of folklore, traditional Jewish culture, and European literature. Works by Isaac and Joshua Singer, Joseph Opatoshu, Der Nister, Chava Rosenfarb, Sholem Asch, and David Bergelson. Readings in English; optional sessions for close readings in Yiddish.

3-4 units, *not given this year*

### SLAVGEN 233. Poles and Others: Literature and History in Modern Poland

(Same as SLAVGEN 133) The physical and cultural territories of the former Polish-Lithuanian Commonwealth have long been objects of contest. The 20th century witnessed two or three rebirths of Poland and one or two deaths; a belated modernization of Polish society; the final inclusion of Polish-speaking peasants and burghers in a Polish national identity; and the exclusion of Jews, Germans, Lithuanians, Belarusians, Ukrainians, and others from the state and participation in a partially shared culture.

3-4 units, *not given this year*

### SLAVGEN 241. Staging the Revolution: Russian Theater and Society, 1917-1937

(Same as SLAVGEN 141) Between 1917 and 1937, artistic experimentation in the Russian theater coincided with political and social changes in Russian society. Modernist artists interpreted the revolution as an artistic possibility to demolish conventions of representation. Mass festivals, circus, and street performances replaced the old theater. In the time of the Great Terror and staged trials, theater and opera remained among the leading arts, but state patronage caused a major reorientation of artistic practices. Readings include plays by Mayakovsky, Bulgakov, Babel, Tretyakov, and Erdman. Readings in English.

4 units, *not given this year*

### SLAVGEN 245. Age of Experiment: Russian Experiments in Short Fiction (1820-1905)

(Same as SLAVGEN 145) Russian literature is identified with its great 19th c. novels, baggy monsters of 600-1200 pages. In this course we will instead investigate an array of short fictional forms (stories, novellas, tales, plays, and journalistic sketches) by Pushkin, Gogol, Lermontov, Tolstoy, Turgenev, Dostoevsky and Chekhov, in light of their competitive redefinitions of the tasks of art and consciousness, as well as their continuing technical and philosophical impact on modern narrative. No prerequisites. Course conducted in English. Students with Russian competence will have opportunity to read and work with texts in original

3-5 units, *Aut (Greenleaf, M)*

### SLAVGEN 248. Dissent and Disenchantment: Russian Literature and Culture since the Death of Stalin

(Same as SLAVGEN 148) Russian culture and society since 1953 through literature (in English translation). Topics: opposition and dissent; generational conflict; modernization; everyday life, gender, ethnicity, class, citizenship, exit from communism. Literature of the Thaw, state-published and samizdat, village and cosmopolitan, the new emigration, Sots-Art, and the Russian post-modern. Solzhenistyn, Shalamov, Trifonov, Siniavsky-Tertz, Erofeev, Dovlatov, Brodsky, Petrushevskaya, Pelevin, Ulitskaya, Sorokin. Requirements: three reaction papers and final exam (UG); research paper for graduate credit (extra section for graduate students; may register for SLAVLIT 399)

3-5 units, *Spr (Freidin, G)*

### SLAVGEN 250. Countercultures in Conversation: Russian and American Rock Music and Protest Poetry

(Same as SLAVGEN 150) Non-conformist protest movements in contemporary Russian poetry; historical and cultural context; and comparison with similar processes in American social and cultural

life. Sources include Russian and American poetry, songs, and DVDs. Fourth unit for readings in Russian.

*3-4 units, not given this year*

#### **SLAVGEN 253. Russian Jewish Literature**

(Same as SLAVGEN 153) Russian Jewish experience inspired books and films in Hebrew, Yiddish, Russian and English that reveal a world of conflict, humor and beauty. From the mid-19th century to the 21st century. Authors include Haim Nahman Bialik, Sholem Aleichem, Isaac Babel, Osip Mandelstam, Joseph Brodsky, Leonid Tsygkin, Ludmila Ulitskaya, Gary Shteyngardt.

*3-4 units, not given this year*

#### **SLAVGEN 256. Nabokov in the Transnational Context**

(Same as COMPLIT 115, COMPLIT 215, SLAVGEN 156) Nabokov's techniques of migration and camouflage as he inhabits the literary and historical contexts of St. Petersburg, Berlin, Paris, America, and Switzerland. His early and late stories, last Russian novel *The Gift*, *Lolita* (the novel and screenplay), and *Pale Fire*. Readings in English. Russian speakers will be encouraged to read Russian texts in original.

*3-5 units, Aut (Greenleaf, M)*

#### **SLAVGEN 262. Gender Images in Film**

(Same as SLAVGEN 162) Film creates permanent new images of femininity. One of its conscious prerequisites is the notion of social stereotypes. The development of enduring images of the film heroine, 1914-90, through a comparison of the Russian, American, and W. European cinema, and analytical approaches to them from feminist film theory.

*3 units, not given this year*

#### **SLAVGEN 263. Gender in Postwar Russian Culture**

(Same as SLAVGEN 163) Issues of femininity and masculinity in Russian literature, film, and popular culture from the 40s to the present. Readings include fiction, memoirs, poetry, drama, and theoretical works in gender studies.

*3-4 units, not given this year*

#### **SLAVGEN 265. Poetry, Painting, and Music of the Russian Avant Garde**

(Same as SLAVGEN 165) Interrelationships between poetry and other arts in Russia, 1905-30. The pursuit of synthesis of arts and the modernist agenda of life creation and immortality. Parallel developments in literature, painting, and music, and style and poetics. Russian modernist poetry in the context of changes in the language of visual arts and music). Women poets and artists. Native sources and Western influences; non-Russian elements and transnational tendencies. The impact of scientific discoveries and technological inventions on artistic experimentation.

*3-4 units, not given this year*

#### **SLAVGEN 285. CINEMATOGRAPH**

(Same as FILMSTUD 131, FILMSTUD 331, SLAVGEN 185) The term cinematography, which literally means inscribing motion, tends to lose the graphic part in modern use. However, several influential film-makers not only practiced the art of inscribing motion but also wrote texts discussing the aesthetic premises of cinematographic art. This course explores theories of cinema as propagated by the following film-makers: Vertov, Eisenstein, Godard, Bresson, Antonioni, Pasolini, Tarkovsky, Greenaway, and Lynch. Selected key texts will be supplemented by screenings of classic films, indicative of each director's work.

*3-5 units, Aut (Skakov, N)*

#### **SLAVGEN 290. Tolstoy's Anna Karenina in Dialogue with Contemporary Philosophical, Social, and Ethical Thought**

(Same as COMPLIT 190, COMPLIT 290, SLAVGEN 190) Anna Karenina, the novel as a case study in the contest between modernity and tradition, their ethical order, ideology, cultural codes, and philosophies. Images of society, women and men in Tolstoy v. those of his contemporaries: Marx, Mill, Nietzsche, Weber, Durkheim, Freud. Open to juniors, seniors and graduate students. Requirements: three interpretive essays (500-1000 words each). Analysis of a passage from the novel; AK refracted through a philosophical prism and vice versa (30% each); class discussion and Forum (10%).

*3-5 units, Win (Freidin, G)*

#### **SLAVGEN 295. RUSSIAN THEATER**

(Same as SLAVGEN 195) Reading plays in juxtaposition with clips from performances and famous directors' writings

(Stanislavsky, Meyerhold, and beyond). Evolution of Russian theatrical theory and practice, with particular attention to the present. Some knowledge of Russian desirable.

*3-4 units, not given this year*

#### **SLAVGEN 313. Visuality and Literacy Workshop**

Relationships among visual arts, theater, and literature in the culture of modernity.

*1-2 units, not given this year*

## SLAVIC LANGUAGE (SLAVLANG) COURSES

### UNDERGRADUATE COURSES IN SLAVIC LANGUAGE

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **SLAVLANG 1. First-Year Russian, First Quarter**

Functionally-based communicative approach, including essential Russian grammar. Discussions of Russian culture and the Russian view of reality.

*5 units, Aut (Cieply, J)*

#### **SLAVLANG 2. First-Year Russian, Second Quarter**

Continuation of 1. Functionally-based communicative approach, including essential Russian grammar. Discussions of Russian culture and the Russian view of reality. Prerequisite: placement test, 1 or consent of instructor.

*5 units, Win (Staff)*

#### **SLAVLANG 3. First-Year Russian, Third Quarter**

Continuation of 2. Functionally-based communicative approach, including essential Russian grammar. Discussions of Russian culture and the Russian view of reality. Prerequisite: placement test, 2 or consent of instructor.

*5 units, Spr (Khassina, E)*

#### **SLAVLANG 6. Russian for Native Speakers, Second Quarter**

Self-paced. Reading and writing skills and communicating in formal and informal settings. Does not fulfill the University foreign language requirement. Prerequisite 5 or consent of instructor.

*2 units, Win (Staff)*

#### **SLAVLANG 7. Russian for Native Speakers, Third Quarter**

Continuation of 6. Self-paced. Reading and writing skills and communicating in formal and informal settings. Does not fulfill the University foreign language requirement. Prerequisite: 6 or consent of instructor.

*2 units, Spr (Khassina, E)*

#### **SLAVLANG 51. Second-Year Russian, First Quarter**

Proficiency development at the intermediate level, including more difficult grammar such as numbers, verb conjugation, and aspect. Vocabulary, speaking skills. Prerequisite: placement test, 3 or consent of instructor.

*5 units, Aut (Khassina, E)*

#### **SLAVLANG 52. Second-Year Russian, Second Quarter**

Continuation of 51. Proficiency development at the intermediate level, including more difficult grammar such as numbers, verb conjugation, and aspect. Vocabulary, speaking skills. Prerequisite: placement test, 51 or consent of instructor.

*5 units, Win (Khassina, E)*

#### **SLAVLANG 53. Second-Year Russian, Third Quarter**

Continuation of 52. Proficiency development at the intermediate level, including more difficult grammar such as numbers, verb conjugation, and aspect. Vocabulary, speaking skills. Prerequisite: placement test, 52 or consent of instructor.

*5 units, Spr (Khassina, E)*

#### **SLAVLANG 55. Intermediate Russian Conversation**

May be repeated for credit. Prerequisite: first-year Russian or equivalent placement.

*2 units, Win (Greenhill, R), Spr (Greenhill, R)*

#### **SLAVLANG 60A. Beginning Russian Conversation**

*1 unit, Win (Safran, G)*

**SLAVLANG 60B. Intermediate Russian Conversation***1 unit, Spr (Staff)***SLAVLANG 60C. Advanced Russian Conversation***1 unit, Spr (Staff)***SLAVLANG 60D. East European Breweries and Brewing***1 unit, Win (Safran, G), Spr (Staff)***SLAVLANG 60E. Russian Cooking***1 unit, Spr (Staff)***SLAVLANG 60F. Slavic Films Series***1 unit, Aut (Safran, G)***SLAVLANG 60H. Tour of Bulgaria***1 unit, Win (Safran, G), Spr (Staff)***SLAVLANG 60P. Slav Dom Theme Projects***1 unit, Aut (Safran, G), Win (Safran, G), Spr (Staff)***SLAVLANG 60T. Teaching Slavic Conversation***1 unit, Aut (Safran, G), Win (Safran, G), Spr (Safran, G)***SLAVLANG 99. Language Specials**

Prerequisite: consent of instructor.

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff)***SLAVLANG 111. Third-Year Russian, First Quarter**

A snapshot of Russian life. Reading comprehension, conversational competence, grammatical accuracy, and cultural sophistication. Prerequisite: placement test, 53 or consent of instructor.

*4 units, Aut (Greenhill, R)***SLAVLANG 112. Third-Year Russian, Second Quarter**

Continuation of 111. A snapshot of Russian life. Reading comprehension, conversational competence, grammatical accuracy, and cultural sophistication. Prerequisite: placement test, 111 or consent of instructor.

*4 units, Win (Greenhill, R)***SLAVLANG 113. Third-Year Russian, Third Quarter**

Continuation of 112. A snapshot of Russian life. Reading comprehension, conversational competence, grammatical accuracy, and cultural sophistication. Prerequisite: placement test, 112 or consent of instructor.

*4 units, Spr (Staff)***SLAVLANG 177. Fourth-Year Russian, First Quarter**

Culture, history, and current events. Films, classical and contemporary writers, newspaper articles, documentaries, radio and TV programs, and music. Review and fine-tuning of grammar and idiomatic usage. Prerequisite: placement test, 113 or consent of instructor.

*3 units, Aut (Greenhill, R)***SLAVLANG 178. Fourth-Year Russian, Second Quarter**

Continuation of 177. Culture, history, and current events. Films, classical and contemporary writers, newspaper articles, documentaries, radio and TV programs, and music. Review and fine-tuning of grammar and idiomatic usage. Prerequisite: placement test, 177 or consent of instructor.

*3 units, Win (Greenhill, R)***SLAVLANG 179. Fourth-Year Russian, Third Quarter**

Continuation of 178. Culture, history, and current events. Films, classical and contemporary writers, newspaper articles, documentaries, radio and TV programs, and music. Review and fine-tuning of grammar and idiomatic usage. Prerequisite: placement test, 178 or consent of instructor.

*3 units, Spr (Greenhill, R)***SLAVLANG 181. Fifth-Year Russian, First Quarter**

Language proficiency maintenance; appropriate for majors and non-majors with significant language experience overseas. Discussions, oral presentations, and writing essays on contemporary Russia. Prerequisite: placement test, 179 or consent of instructor

*3 units, Aut (Khassina, E)***SLAVLANG 182. Fifth-Year Russian, Second Quarter**

Continuation of 181. Language proficiency maintenance; appropriate for majors and non-majors with significant language experience overseas. Discussions, oral presentations, and writing essays on contemporary Russia. Prerequisite: placement test, 181 or consent of instructor.

*3 units, Win (Khassina, E)***SLAVLANG 183. Fifth-Year Russian, Third Quarter**

Continuation of 182. Language proficiency maintenance; appropriate for majors and non-majors with significant language experience overseas. Discussions, oral presentations, and writing essays on contemporary Russia. Prerequisite: placement test, 182 or consent of instructor.

*3 units, Spr (Khassina, E)***SLAVLANG 184A. Russian Reading Conversation and Composition**

Proficiency in reading, spoken and written Russian through literary and non-literary texts, movies, and contemporary media. Emphasis is on debate, oral presentations, and essay writing.

*2-3 units, not given this year***SLAVLANG 184A. Russian Reading Conversation and Composition**

Proficiency in reading, spoken and written Russian through literary and non-literary texts, movies, and contemporary media. Emphasis is on debate, oral presentations, and essay writing.

*2-3 units, not given this year***SLAVLANG 184B. Russian Advanced Conversation and Composition**

Proficiency in spoken and written Russian through literary and non-literary texts, movies, and contemporary media. Emphasis is on debate, oral presentations, and essay writing.

*2-3 units, Win (Greenhill, R)***SLAVLANG 184C. Russian Advanced Conversation and Composition**

Proficiency in spoken and written Russian through literary and non-literary texts, movies, and contemporary media. Emphasis is on debate, oral presentations, and essay writing.

*2-3 units, not given this year***SLAVLANG 199. Individual Work**

Prerequisite: consent of instructor.

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)***GRADUATE COURSES IN SLAVIC LANGUAGE**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**SLAVLANG 299. Independent Study***1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)***SLAVLANG 394. Graduate Studies in Russian Conversation***1-3 units, Aut (Staff), Win (Staff), Spr (Staff)***SLAVLANG 395. Graduate Studies in Russian**

Prerequisite: consent of instructor. (Staff)

*2-5 units, Aut (Staff), Win (Staff), Spr (Staff)***SLAVIC LITERATURE (SLAVLIT) COURSES****UNDERGRADUATE COURSES IN SLAVIC LITERATURE**

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**SLAVLIT 129. Poetry as System: Introduction to Theory and Practice of Russian Verse**

(Same as SLAVLIT 229) The history and theory of Russian versification from the 17th to the 20th century. Prerequisite: reading knowledge of Russian. GER:DB-Hum

*4 units, not given this year***SLAVLIT 167. Introduction to Russian Cultural Studies**

The fundamentals of literary analysis of poetics and rhetoric, as well as concepts and topics in Russian intellectual history. Goal is to improve students' comprehension and expression in Russian while building a conceptual vocabulary for understanding Russian literature and historical thought. In Russian. Prerequisite: third-

year Russian or equivalent. GER:DB-Hum

3-5 units, not given this year

**SLAVLIT 169. Advanced Russian Seminar: Reading Pushkin's Evgenii Onegin**

A close reading of Pushkin's masterpiece in the context of the changes that were taking place in literary life of his times. Eugene Onegin and the birth of modern Russian novel. The evolution of Pushkin's literary style and narrative techniques. Final paper. In Russian. Prerequisites: three years of Russian or consent of instructor.

2-4 units, not given this year

**SLAVLIT 182. Pushkin's Eugene Onegin**

Russian literature's central masterpiece. In Russian. (Fleishman)

4 units, not given this year

**SLAVLIT 183. Readings in the Russian Press**

(Same as SLAVLIT 283) For students at the fifth-year Russian level. Advanced language training based on Russian newspapers and magazines. Discussion of issues regarding the Russian media and reading articles of a typical Russian press format.

4 units, not given this year

**SLAVLIT 184. The History of the Russian Literary Language**

(Same as SLAVLIT 284) Major structural and semantic changes from the 10th to the 19th centuries. Recommended: 211, 212.

4-5 units, not given this year

**SLAVLIT 187. Russian Poetry of the 18th and 19th Centuries**

(Same as SLAVLIT 287) Required of majors in Russian language and literature; open to undergraduates who have completed three years of Russian, and to graduate students. The major poetic styles of the 19th century as they intersected with late classicism, the romantic movement, and the realist and post-realist traditions. Representative poems by Lomonosov, Derzhavin, Zhukovskii, Pushkin, Baratynskii, Lermontov, Tiutchev, Nekrasov, Fet, Soloviev. In Russian.

3-4 units, not given this year

**SLAVLIT 188. Russian Poetry**

Required of majors in Russian literature. Developments in 19th- and 20th-century Russian poetry including symbolism, acmeism, futurism, and literature of the absurd. Emphasis is on close readings of individual poems. Discussions in Russian.

3-5 units, Win (Fleishman, L)

**SLAVLIT 189A. Honors Research**

Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.

5 units, Win (Staff), Spr (Staff)

**SLAVLIT 189B. Honors Research**

Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.

2 units, Aut (Staff), Spr (Staff)

**SLAVLIT 198. Writing Between Languages: The Case of Eastern European Jewish Literature**

(Same as JEWISHST 148, JEWISHST 248, SLAVLIT 298) Eastern European Jews spoke and read Hebrew, Yiddish, and their co-territorial languages (Russian, Polish, etc.). In the modern period they developed secular literatures in all of them, and their writing reflected their own multilinguality and evolving language ideologies. We focus on major literary and sociolinguistic texts. Reading and discussion in English; students should have some reading knowledge of at least one relevant language as well. GER:DB-Hum

3-5 units, Spr (Safran, G)

**SLAVLIT 199. Individual Work for Undergraduates**

Open to Russian majors or students working on special projects. May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN SLAVIC LITERATURE

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**SLAVLIT 200. Proseminar in Literary Theory and Study of**

### Russian Literature

Required for graduate students and honors undergraduates in Slavic; first-year Slavic graduate students must enroll during their first quarter. Introduction to advanced study in Russian literature and culture: profession, discipline, scholarly method, and theoretical perspectives. Variety of approaches to the study of literature and culture. Practical exercises in the analysis of verse, narrative, and forms of visual representation. Four short papers (800 words), including the final (a review of a recent monograph of Russian Literatures and culture).

3-5 units, Aut (Freidin, G)

**SLAVLIT 200A. Introduction to Russian Literary Scholarship: Russian Formalism and Structuralism**

Required of first-year Slavic graduate students and honors students. Elements of literary work and principles of literary history. 20th-century Russian literary scholarship emphasizing Russian formalism and structuralism. The relationship of literary studies with the other areas of humanistic research such as linguistics, history, art criticism, semiotics, and cultural studies. Bibliographic and archival research.

3-4 units, not given this year

**SLAVLIT 200B. Research Tools and Professionalization Workshop for Slavic Graduate Students**

This course introduces graduate students in Slavic Studies to library, archival, and web resources for research, grant opportunities, publication strategies, and professional timelines. Open to PhD students in the Slavic Department and other departments and to MA students in CREEES.

1 unit, Aut (Safran, G)

**SLAVLIT 212. Old Russian and Old Church Slavic**

Continuation of 211. Readings in additional canonical Old Church Slavic texts, following the Church Slavic tradition as it develops in early Rus (Kiev, Novgorod). Selections from the Primary Chronicle, Boris and Gleb, The Life of Theodosius. The general issues of writing and the reception of Byzantine culture in early Rus.

3 units, not given this year

**SLAVLIT 215. Russian Poetry after Brodsky**

The Bronze Age of Russian poetry in the 70s-80s as a time of enthusiasm for poetic diction and achievement, attempts to reclaim connections with Russian and European traditions, and avant garde experimentation. The new metaphysics, the problem of the poet's self, new forms, and the limitations of the poetic domain. Poets include Leonid Aronzon, Victor Krivulin, Elena Shvartz, Ivan Zhdanov, Petr Cheigin, Gennadii Aigui, and Leonid Gubanov. Readings in Russian. Undergraduates require consent of instructor.

3-4 units, not given this year

**SLAVLIT 225. Readings in Russian Realism**

Open to graduate students and advanced undergraduates. Russian realist and naturalist prose emerged in a historical context that fostered specific ideas about the function and form of the literary word. Readings from Turgenev, Goncharov, Leskov, Saltykov-Shchedrin, Dostoevsky, Garshin, Tolstoy, Chekhov, Gorky, Bunin. Discussions in English.

4 units, not given this year

**SLAVLIT 226. Bakhtin and His Legacy**

(Same as COMPLIT 210) ¿Quests for my own word are in fact quests for a word that is not my own, a word that is more than myself,¿ writes Mikhail Bakhtin towards the end of his life. It was this ceaseless pursuit of another word that allowed Bakhtin, one of the most distinguished literary critics of the twentieth century, to author several influential literary theory concepts, many of which deal with the ideas of multiplicity, diversity and unfinalizability. The seminar explores these core concepts through close reading of key texts in English and investigates their reverberations in the writings of other thinkers such as Kristeva, de Man and Derrida

3-5 units, Spr (Skakov, N)

**SLAVLIT 229. Poetry as System: Introduction to Theory and Practice of Russian Verse**

(Same as SLAVLIT 129) The history and theory of Russian versification from the 17th to the 20th century. Prerequisite: reading knowledge of Russian.

4 units, not given this year

**SLAVLIT 251. Dostoevsky: Narrative Performance and**

**Literary Theory**

(Same as COMPLIT 219) This course is an in-depth engagement with a range of Dostoevsky's genres: early works (epistolary novella *Poor Folk* and experimental *Double*), major novels (*Crime and Punishment*, *The Idiot*), less-read shorter works (*A Faint Heart*, *Bobok* and *The Meek One*), and genre-bending *House of the Dead* and *Diary of a Writer*. We will apply recent theory of autobiography, performance, repetition and narrative gaps, to Dostoevsky's transformations of genre, philosophical and dramatic discourse, and narrative performance. For graduate students. Slavic students will read primary texts in Russian, other participants in translation. Course conducted in English. Undergraduates with advanced linguistic and critical competence may apply.

3-5 units, *Win (Greenleaf, M; Erman, I)*

**SLAVLIT 269. Pushkin and the Golden Age**

Graduate seminar. The formation of a simultaneously imperial and Enlightenment culture under Catherine the Great, and how Pushkin and his contemporaries realized its potentials and contradictions. Literary texts in light of other verbal discourses and artistic media; the field of 18th-century and imperial studies in Russia. Undergraduates require consent of instructor.

3 units, *not given this year*

**SLAVLIT 270. Pushkin**

Major poems and prose with detailed examination of his cultural milieu. Emphasis is on changes in the understanding of literary concepts relevant to this period of Russian literature (poetic genres, the opposition between poetry and prose, romanticism). (Staff)

2-3 units, *not given this year*

**SLAVLIT 283. Readings in the Russian Press**

(Same as SLAVLIT 183) For students at the fifth-year Russian level. Advanced language training based on Russian newspapers and magazines. Discussion of issues regarding the Russian media and reading articles of a typical Russian press format.

4 units, *not given this year*

**SLAVLIT 284. The History of the Russian Literary Language**

(Same as SLAVLIT 184) Major structural and semantic changes from the 10th to the 19th centuries. Recommended: 211, 212.

4-5 units, *not given this year*

**SLAVLIT 287. Russian Poetry of the 18th and 19th Centuries**

(Same as SLAVLIT 187) Required of majors in Russian language and literature; open to undergraduates who have completed three years of Russian, and to graduate students. The major poetic styles of the 19th century as they intersected with late classicism, the romantic movement, and the realist and post-realist traditions. Representative poems by Lomonosov, Derzhavin, Zhukovskii, Pushkin, Baratynskii, Lermontov, Tiutchev, Nekrasov, Fet, Soloviev. In Russian.

3-4 units, *not given this year*

**SLAVLIT 298. Writing Between Languages: The Case of Eastern European Jewish Literature**

(Same as JEWISHST 148, JEWISHST 248, SLAVLIT 198) Eastern European Jews spoke and read Hebrew, Yiddish, and their co-territorial languages (Russian, Polish, etc.). In the modern period they developed secular literatures in all of them, and their writing reflected their own multilinguality and evolving language ideologies. We focus on major literary and sociolinguistic texts. Reading and discussion in English; students should have some reading knowledge of at least one relevant language as well.

3-5 units, *Spr (Safran, G)*

**SLAVLIT 299. Individual Work for Graduate Students**

For graduate students in Slavic working on theses or engaged in special work. Prerequisite: written consent of instructor.

1-12 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**SLAVLIT 310. Civilizing Process: Paradigms of Society and Culture in Modern Russian Literature and Film**

Texts representing theoretical models of society and culture in confrontation with works of Russian fiction and film. Emphasis is on Norbert Elias's civilizing process and related theories. Topics: body and desire (Freud, Bakhtin); manners and civilizing process (Elias, Cuddihy, Lotman); symbolic forms, ritual, and systems (Geertz, Zorin); identities and practices (de Certeau, Bourdieu); subcultures (Hebdidge). Authors include Mayakovsky, Babel, Mandelstam, Bulgakov, Platonov, Zoshchenko, Erofeev, Pelevin,

Trifonov, and Petrushevskaja; film makers: Mamin and Rogozhkin. Recommended: knowledge of Russian.

2-4 units, *not given this year*

**SLAVLIT 349. LITERARY THEORY**

(Same as COMPLIT 349, DLCL 349, ILAC 349) Advanced survey course of key schools in literary theory, from formalism onwards. Emphasis is on the discussion of primary sources. Topics include structuralism, ideology critique, psychoanalysis, reception aesthetics, deconstruction, feminism, and post-colonialism. Readings by Barthes, Bakhtin, Benjamin, Borges, Derrida, de Man, Foucault, Freud, Iser, Lacan, Shklovsky, and Spivak, among others.

3-5 units, *Aut (Hoyos, H; Skakov, N)*

**SLAVLIT 349. LITERARY THEORY**

(Same as COMPLIT 349, DLCL 349, ILAC 349) Advanced survey course of key schools in literary theory, from formalism onwards. Emphasis is on the discussion of primary sources. Topics include structuralism, ideology critique, psychoanalysis, reception aesthetics, deconstruction, feminism, and post-colonialism. Readings by Barthes, Bakhtin, Benjamin, Borges, Derrida, de Man, Foucault, Freud, Iser, Lacan, Shklovsky, and Spivak, among others.

3-5 units, *Aut (Staff)*

**SLAVLIT 359. Cultural Critique & Cultural Construction in Soviet Russian Literature & Culture in the 1920s & 30s**

Introduction to the study of the literature and culture of the Soviet era from the heyday of the NEP, with its contesting view of the Revolution, everyday life, and high culture (e.g., debates around Formalism), through the Stalin revolution and the establishment of the Soviet cultural system in the landmark events of the 1930s (The First Congress of Soviet Writers, Campaign against Formalism, Pushkin Centenary, the fall and rehabilitation of Sergey Eisenstein). Two presentations and an essay (~3000 words).

3-5 units, *Win (Freidin, G)*

**SLAVLIT 399. Advanced Research Seminar in Russian Literature**

Follow-up to 200- or 300-series seminars, as needed. May be repeated for credit.

2-4 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**SLAVLIT 801. TGR Project**

0 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**SLAVLIT 802. TGR Dissertation**

0 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**SOCIOLOGY (SOC) COURSES****UNDERGRADUATE COURSES IN SOCIOLOGY**

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**SOC 1. Introduction to Sociology**

Concepts, methods, and theoretical orientations. Sociological imagination illustrated by recent theory and research. Possible topics: the persistence of class cleavages; ethnic, racial, and gender inequalities; religious beliefs and the process of secularization; functions and dysfunctions of educational institutions; criminology and social deviance; social movements and social protest; production and reproduction of culture; rise of organizational society. GER:DB-SocSci

5 units, *Spr (Snipp, C)*

**SOC 15N. The Transformation of Socialist Societies**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The impact of societal organization on the lives of ordinary people in socialist societies and in the new societies arising through the processes of political, economic, and social transformation. Do the concepts of democratization and marketization suffice to characterize ongoing changes? Enrollment limited to 16. GER:DB-SocSci, EC-GlobalCom

3 units, *Win (Tuma, N)*

**SOC 16N. African Americans and Social Movements**

(F,Sem) (Same as AFRICAAM 16N, CSRE 16N) Stanford Introductory Seminar. Theory and research on African Americans' roles in post-Civil Rights, US social movements. Topics include women's right, LGBT rights, environmental movement, and contemporary political conservatism. GER:DB-SocSci

3 units, Aut (Fields, C)

**SOC 22N. The Roots of Social Protest**

Preference to freshmen. The conditions under which social protest occurs and the emergence, success, and viability of contemporary social movements. Examples include women's civil rights, ecology, and antiwar and anti-globalization movements in the U.S. and elsewhere. Sociological theories to explain the timing, location, and causes of mobilization; how researchers evaluate these theories. Comparison of tactics, trajectories, and outcomes. GER:DB-SocSci, EC-GlobalCom

3 units, not given this year

**SOC 25N. Understanding the Sixties**

(F,Sem) (Same as AMSTUD 25N) Stanford Introductory Seminar. Preference to freshmen. The tendency of critics to view the 60s through ideological lenses as either the best or worst of times has made a balanced perspective difficult to achieve. Goal is to provide a sociological explanation for the political and cultural turbulence that marked the era. The confluence of demographic, political, economic, and cultural trends that date back to at least the 30s. The ambiguous legacy of the 60s. Using the 60s to shed light on the 80s and 90s. Enrollment limited to 16. GER:DB-SocSci

3 units, Win (Staff)

**SOC 45Q. Understanding Race and Ethnicity in American Society**

(S,Sem) (Same as CSRE 45Q) Stanford Introductory Seminar. Preference to sophomores. Historical overview of race in America, race and violence, race and socioeconomic well-being, and the future of race relations in America. Enrollment limited to 16. GER:DB-SocSci

5 units, Aut (Snipp, C)

**SOC 46N. Race, Ethnic, and National Identities: Imagined Communities**

Preference to freshmen. How new identities are created and legitimated. What does it mean to try on a different identity? National groups and ethnic groups are so large that one individual can know only an infinitesimal fraction of other group members. What explains the seeming coherence of groups? If identities are a product of the imagination, why are people willing to fight and die for them? Enrollment limited to 16. GER:DB-SocSci

3 units, not given this year

**SOC 100ASB. Pre-field Course for Alternative Spring Break**

Limited to students participating in the Alternative Spring Break program. See <http://asb.stanford.edu> for more information.

1 unit, not given this year

**SOC 100SI. Student Initiated Course**

1 unit, not given this year

**SOC 104. Economic Foundations of Everyday Life**

(Same as SOC 204) How the economy impacts other aspects of everyday life. Market as emancipatory, market as alienating, and critiques dualisms. How theories inform case studies of think tanks, reactionary movements, cultural authenticity, romantic relationships, and elite college admissions.

5 units, Spr (Staff)

**SOC 106. Political Sociology**

(Same as SOC 206) The body of state rules and institutions that work in generating legitimate and illegitimate policy claims. Interests and identities that challenged the capacity of the national state to produce effective policies. Economic processes above the national level have that undermine the role of the state as the arena for the composition of disparate interests. GER:DB-SocSci

5 units, Win (Parigi, P)

**SOC 107. China After Mao**

(Same as SOC 207) China's post-1976 recovery from the late Mao era; its reorientation toward an open market-oriented economy; the consequences of this new model and runaway economic growth for standards of living, social life, inequality, and local governance; the political conflicts that have accompanied these changes.

GER:DB-SocSci

5 units, not given this year

**SOC 108. Political & Historical Sociology**

(Same as SOC 208) The differences between historical and sociological analysis of past events. The difference between constructing sociological explanations and describing past events. Topics include: the rise of Christianity, the mafia in a Sicilian village, the trade network of the East India Company. GER:DB-SocSci

5 units, not given this year

**SOC 110. Politics and Society**

(Same as SOC 210) (Graduate students register for 210.) Themes of political sociology, conceptions of power and state structures throughout history, the origins and expansion of the modern state, linkages between state and society, impact of the modern world system on national policies, internal distribution of power and authority, structure of political group formation and individual participation in modern states, and future trends of politics and society in a globalized world. Emphasis is on developing conceptual understandings of state, society, and politics in the modern world. GER:DB-SocSci

5 units, not given this year

**SOC 111. State and Society in Korea**

(Same as SOC 211) 20th-century Korea from a comparative historical perspective. Colonialism, nationalism, development, state-society relations, democratization, and globalization with reference to the Korean experience. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Shin, G)

**SOC 111D. Social-Psychology and Economics**

Prediction of human behavior derived from economic theory versus social-psychological research. Topics include: decision-making, irrationality, happiness, attractiveness, the persistence of inequality, evaluation of outputs, motivation. Brief overview of economic theory. Seminar with focus on discussion and critical thinking.

5 units, Sum (Staff)

**SOC 112D. Sociology of Judaism and Jewish Identity**

(Same as JEWISHST 132D, RELIGST 112D) Examines the place of the Jewish people in society throughout various locales and historical periods to understand how interactions among Jews and with other groups have shaped Jewish identities. Topics include modernism, the Holocaust, Israel/nationhood, race/ethnicity, intermarriage, and assimilation. Uses theoretical, empirical, and historical material from multiple social scientific fields of study and explores the study of Judaism from several major sociological lenses.

5 units, Sum (Staff)

**SOC 114. Economic Sociology**

(Same as SOC 214) (Graduate students register for 214.) The sociological approach to production, distribution, consumption, and markets, emphasizing the impact of norms, power, social structure, and institutions on the economy. Comparison of classic and contemporary approaches to the economy among the social science disciplines. Topics: consumption, labor markets, organization of professions such as law and medicine, the economic role of informal networks, industrial organization, including the structure and history of the computer and popular music industries, business alliances, capitalism in non-Western societies, and the transition from state socialism in E. Europe and China. GER:DB-SocSci

5 units, Aut (Granovetter, M)

**SOC 115. Topics in Economic Sociology**

(Same as SOC 315) (Graduate students register for 315.) Discussion of topics initially explored in 114/214, with emphasis on countries and cultures outside N. America. Possible topics: families and ethnic groups in the economy, corporate governance and control, corporate strategy, relations among firms in industrial districts and business groups, the impact of national institutions and cultures on economic outcomes, transitions from state socialism and the role of the state in economic development. Possible case studies: the U.S., Germany, Italy, Britain, France, Brazil, Korea, India, Japan, and China. Prerequisite: 114/214 or 314. GER:DB-SocSci

5 units, Win (Granovetter, M)

**SOC 117A. China Under Mao**

(Same as SOC 217A) (Graduate students register for 217A.) The transformation of Chinese society from the 1949 revolution to the eve of China's reforms in 1978: creation of a socialist economy, reorganization of rural society and urban workplaces, emergence of new inequalities of power and opportunity, and new forms of social conflict during Mao's Cultural Revolution of 1966-69 and its aftermath. GER:DB-SocSci, EC-GlobalCom

5 units, Aut (Walder, A)

**SOC 118. Social Movements and Collective Action**

(Same as SOC 218) Why social movements arise, who participates in them, the obstacles they face, the tactics they choose, and how to gauge movement success or failure. Theory and empirical research. Application of concepts and methods to social movements such as civil rights, environmental justice, antiglobalization, and anti-war. GER:DB-SocSci

5 units, Spr (McAdam, D)

**SOC 119. Understanding Large-Scale Societal Change: The Case of the 1960s**

(Same as SOC 219) The demographic, economic, political, and cultural roots of social change in the 60s; its legacy in the present U.S. GER:DB-SocSci

5 units, not given this year

**SOC 120. Interpersonal Relations**

(Same as SOC 220) (Graduate students register for 220.) Forming ties, developing norms, status, conformity, deviance, social exchange, power, and coalition formation; important traditions of research have developed from the basic theories of these processes. Emphasis is on understanding basic theories and drawing out their implications for change in a broad range of situations, families, work groups, and friendship groups. GER:DB-SocSci

5 units, Win (Ridgeway, C)

**SOC 121. The Individual in Social Structure: Foundations in Sociological Social Psychology**

Dynamics of the relationship between the individual and social structure, the relationship between the individual and immediate social context, and relationships between individuals. Focus is on the dominant theoretical perspectives in sociological social psychology: social structure and personality, structural social psychology, and symbolic interactionism.

5 units, not given this year

**SOC 123. Sex and Love in Modern Society**

(Same as SOC 223) Social influences on private intimate relations involving romantic love and sexuality. Topics include the sexual revolution, contraception, dating, hook-ups, cohabitation, sexual orientation, and changing cultural meanings of marriage, gender, and romantic love. GER:DB-SocSci, EC-Gender

5 units, not given this year

**SOC 126. Introduction to Social Networks**

(Same as SOC 226) (Graduate students register for 226.) Theory, methods, and research. Concepts such as density, homogeneity, and centrality; applications to substantive areas. The impact of social network structure on individuals and groups in areas such as communities, neighborhoods, families, work life, and innovations. GER:DB-SocSci

5 units, not given this year

**SOC 127. Bargaining, Power, and Influence in Social Interaction**

(Same as SOC 227) (Graduate students register for 227.) Research and theoretical work on bargaining, social influence, and issues of power and justice in social settings such as teams, work groups, and organizations. Theoretical approaches to the exercise of power and influence in social groups and related issues in social interaction such as the promotion of cooperation, effects of competition and conflict, negotiation, and intergroup relations. Enrollment limited to 40. GER:DB-SocSci

5 units, not given this year

**SOC 128. Introduction to Social Network Analysis**

(Same as SOC 228) (Graduate students register for SOC 228.) Theory and methods of network analysis in sociology (with an emphasis on social movements), anthropology, history, social psychology, economics, political science, and public health.

Prerequisite: basic mathematics.

5 units, not given this year

**SOC 129X. Urban Education**

(Same as AFRICAAM 112, EDUC 112X, EDUC 212X, SOC 229X) (Graduate students register for EDUC 212X or SOC 229X). Combination of social science and historical perspectives trace the major developments, contexts, tensions, challenges, and policy issues of urban education. GER:DB-SocSci

3-4 units, Spr (Ball, A)

**SOC 130. Education and Society**

(Same as EDUC 120C, EDUC 220C, SOC 230) The effects of schools and schooling on individuals, the stratification system, and society. Education as socializing individuals and as legitimizing social institutions. The social and individual factors affecting the expansion of schooling, individual educational attainment, and the organizational structure of schooling. GER:DB-SocSci

4-5 units, NEXTYEAR

**SOC 132. Sociology of Education: The Social Organization of Schools**

(Same as EDUC 110, EDUC 310, SOC 332) Seminar. Key sociological theories and empirical studies of the links between education and its role in modern society, focusing on frameworks that deal with sources of educational change, the organizational context of schooling, the impact of schooling on social stratification, and the relationships between the educational system and other social institutions such as families, neighborhoods, and the economy. GER:DB-SocSci

4 units, Spr (Carter, P)

**SOC 133. Law and Wikinomics: The Economic and Social Organization of the Legal Profession**

(Same as SOC 333) (Graduate and Law students enroll in 333.) Seminar. Emphasis is on the labor market for large-firm lawyers, including the market for entry-level lawyers, attorney retention and promotion practices, lateral hiring of partners, and increased use of forms of employment such as the non-equity form of partnership. Race and gender discrimination and occupational segregation; market-based pressure tactics for organizational reform. Students groups collect and analyze data about the profession and its markets. Multimedia tools for analysis and for producing workplace reforms. May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Spr (Dauber, M)

**SOC 134. Education, Gender, and Development**

(Same as EDUC 197) Theories and perspectives from the social sciences relevant to the role of education in changing, modifying, or reproducing structures of gender differentiation and hierarchy. Cross-national research on the status of girls and women and the role of development organizations and processes. (SSPEP) GER:EC-Gender

4 units, Spr (Wotipka, C)

**SOC 135. Poverty, Inequality, and Social Policy in the United States**

(Same as SOC 235) Causes and consequences. Effects of antipoverty policies, and debates over effective social policies. Focus is on how poverty and inequality are experienced by families, children, and communities. Topics include welfare reform and labor market policies, education, and community-based antipoverty strategies. GER:DB-SocSci

5 units, Spr (Young, C)

**SOC 136. Sociology of Law**

(Same as SOC 236) (Graduate students register for 236) Major issues and debates. Topics include: historical perspectives on the origins of law; rationality and legal sanctions; normative decision making and morality; cognitive decision making; crime and deviance; the law in action versus the law on the books; organizational responses to law in the context of labor and employment; the roles of lawyers, judges, and juries; and law and social change emphasizing the American civil rights movement. GER:DB-SocSci

5 units, Spr (Dauber, M)

**SOC 136A. Law and Society**

(Same as SOC 236A) Law and social inequality. Major sociological perspectives on where the law comes from, what law and justice systems do, and how they work.

5 units, not given this year

**SOC 136B. Advanced Topics in Sociology of Law**

(Same as SOC 236B) (Same as LAW 538.) Historical perspectives on the origins of law, rationality and legal sanctions, law on the books versus the law in action, crime and deviance, school desegregation, privatization of prisons, American civil rights, file sharing, jury decision making, the role of lawyers and judges, and cynicism about the American legal system.

5 units, not given this year

**SOC 138. American Indians in Comparative Historical Perspective**

(Same as NATIVEAM 138, SOC 238) (Graduate students register for 238.) Demographic, political, and economic processes and events that shaped relations between Euro-Americans and American Indians, 1600-1890. How the intersection of these processes affected the outcome of conflicts between these two groups, and how this conflict was decisive in determining the social position of American Indians in the late 19th century and the evolution of the doctrine of tribal sovereignty. GER:DB-SocSci, EC-AmerCul

5 units, Win (Staff)

**SOC 139. American Indians in Contemporary Society**

(Same as NATIVEAM 139, SOC 239) (Graduate students register for 239.) The social position of American Indians in contemporary American society, 1890 to the present. The demographic resurgence of American Indians, changes in social and economic status, ethnic identification and political mobilization, and institutions such as tribal governments and the Bureau of Indian Affairs. Recommended: 138 or a course in American history. GER:DB-SocSci, EC-AmerCul

5 units, not given this year

**SOC 140. Introduction to Social Stratification**

(Same as SOC 240) (Graduate students register for 240.) The main classical and modern explanations of the causes of social, economic, and political inequality. Issues include: power; processes that create and maintain inequality; the central axes of inequality in contemporary societies (race, ethnicity, class, and gender); the consequences of inequality for individuals and groups; and how social policy can mitigate and exacerbate inequality. Cases include technologically simple groups, the Indian caste system, and the modern U.S. GER:DB-SocSci

5 units, Aut (Grusky, D)

**SOC 141. Controversies about Inequality**

(Same as SOC 241) (Graduate students register for 241.) Debate format involving Stanford and guest faculty. Forms of inequality including racial, ethnic, and gender stratification; possible policy interventions. Topics such as welfare reform, immigration policy, affirmative action, discrimination in labor markets, sources of income inequality, the duty of rich nations to help poor nations, and causes of gender inequality. GER:DB-SocSci

5 units, not given this year

**SOC 142. Sociology of Gender**

(Same as SOC 242) (Graduate students register for 242.) Gender inequality in contemporary American society and how it is maintained. The social and relative nature of knowledge and the problems this poses for understanding sex differences and gendered behavior in society. Analytical levels of explanation for gender inequalities: socialization, interaction processes, and socioeconomic processes; arguments and evidence for each approach. The social consequences of gender inequality such as the feminization of poverty, and problems of interpersonal relations. GER:EC-Gender

5 units, Win (Correll, S)

**SOC 144. Inequality and the Workplace**

(Same as SOC 244) How characteristics of workplaces, such as hiring practices, workforce diversity, organizational policies and legal mandates, produce variation in inequality. Examines the sources, extent, and consequences of workplace inequality across gender, racial and ethnic lines. Topics include earnings, social status, geographical location, and opportunities for people in the workforce.

5 units, not given this year

**SOC 145. Race and Ethnic Relations**

(Same as SOC 245) (Graduate students register for 245.) Race and

ethnic relations in the U.S. and elsewhere. The processes that render ethnic and racial boundary markers, such as skin color, language, and culture, salient in interaction situations. Why only some groups become targets of ethnic attacks. The social dynamics of ethnic hostility and ethnic/racial protest movements. GER:DB-SocSci, EC-AmerCul

5 units, Spr (Snipp, C)

**SOC 146. Introduction to Comparative Studies in Race and Ethnicity**

(Same as CSRE 196C, ENGLISH 172D, PSYCH 155) How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. GER:DB-SocSci, EC-AmerCul

5 units, not given this year

**SOC 147. Race and Ethnicity Around the World**

(Same as SOC 247) How race and ethnicity has been used to justify segregation, domination and genocide but also be used to create a sense of community, shared responsibility and belonging. Where do divisions come from? Are they hard-wired, or easy to manipulate for political or economic gain? Should governments use these divisions to categorize their citizens? Examining how the definitions, categories and consequences of race and ethnicity differ across time and place.

5 units, Spr (Saperstein, A)

**SOC 147A. Comparative Ethnic Conflict**

(Same as SOC 247A) Causes and consequences of racial and ethnic conflict, including nationalist movements, ethnic genocide, civil war, ethnic separatism, politics, indigenous peoples' movements, and minority rights movements around the world. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year

**SOC 148. Racial Identity**

(Same as SOC 248) The construction and meanings of racial identities in the U.S. Attention to multiracial identities and the shifting boundaries of racial categories in contemporary America. GER:DB-SocSci, EC-AmerCul

5 units, not given this year

**SOC 149. The Urban Underclass**

(Same as SOC 249, URBANST 112) (Graduate students register for 249.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor. GER:DB-SocSci, EC-AmerCul

5 units, Spr (Rosenfeld, M)

**SOC 150. Race and Political Sociology**

(Same as CSRE 150, SOC 250) How race informs the theories and research within political sociology. The state's role in creation and maintenance of racial categories, the ways in which racial identity motivates political actors, how race is used to legitimate policy decisions, comparisons across racial groups. Emphasis on understanding the ways race operates in the political arena. GER:DB-SocSci

5 units, Aut (Fields, C)

**SOC 152. The Social Determinants of Health**

(Same as SOC 252) How social differences, such as where we live, whether and how we work, or how much money we make, and our gender, race or ethnicity, also play a role in who gets sick and who does not.

5 units, Spr (Saperstein, A)

**SOC 155. The Changing American Family**

(Same as SOC 255) Family change from historical, social, demographic, and legal perspectives. Extramarital cohabitation, divorce, later marriage, interracial marriage, and same-sex cohabitation. The emergence of same-sex marriage as a political issue. Are recent changes in the American family really as dramatic as they seem? Theories about what causes family systems to change. GER:DB-SocSci, EC-AmerCul

5 units, not given this year

**SOC 160. Formal Organizations**

(Same as SOC 260) (Graduate students register for 260.) The roles

of formal organizations in production processes, market transactions, and social movements; and as sources of income and ladders of mobility. Relationships of modern organizations to environments and internal structures and processes. Concepts, models, and tools for analyzing organizational phenomena in contemporary societies. Sources include the literature and case studies. GER:DB-SocSci

5 units, Spr (Zhou, X)

#### **SOC 161. The Social Science of Entrepreneurship**

(Same as SOC 261) (Graduate students register for 261.) Who is likely to become an entrepreneur and where is entrepreneurship likely to occur? Classic and contemporary theory and research. Interaction with expert practitioners in creating entrepreneurial opportunities including venture and corporate capitalists. The role of culture, markets, hierarchies, and networks. Market creation and change, and factors that affect success of new organizations. Field projects on entrepreneurial environments such as technology licensing offices, entrepreneurial development organizations, venture capital firms, and corporate venturing groups. GER:DB-SocSci

5 units, not given this year

#### **SOC 162. Markets and Governance**

(Same as SOC 262) Social and political forces that shape market outcomes. The emergence and creation of markets, how markets go wrong, and the roles of government and society in structuring market exchange. Applied topics include development, inequality, globalization, and economic meltdown. GER:DB-SocSci

5 units, Spr (Young, C)

#### **SOC 163. Foundations of Organizational Theory**

(Same as SOC 263) Foundational material in organizational theory literature. GER:DB-SocSci

5 units, OCCASIONAL

#### **SOC 164. Immigration and the Changing United States**

(Same as CHICANST 164, CSRE 164, SOC 264) The role of race and ethnicity in immigrant group integration in the U.S. Topics include: theories of integration; racial and ethnic identity formation; racial and ethnic change; immigration policy; intermarriage; hybrid racial and ethnic identities; comparisons between contemporary and historical waves of immigration. GER:DB-SocSci

5 units, Aut (Jimenez, T)

#### **SOC 165. Seminar on the Everyday Lives of Immigrants**

(Same as SOC 265) Everyday experience of immigrants and the immigrant second generation through the ethnographic lens. Ethnographies that focus on the immigrant experience. Limited enrollment.

5 units, not given this year

#### **SOC 166. Mexicans, Mexican Americans, and Chicanos in American Society**

(Same as CHICANST 166, SOC 266) Contemporary sociological issues affecting Mexican-origin people in the U.S. Topics include: the immigrant experience, immigration policy, identity, socioeconomic integration, internal diversity, and theories of incorporation. GER:DB-SocSci

5 units, not given this year

#### **SOC 167A. Asia-Pacific Transformation**

(Same as SOC 267A) Post-WW II transformation in the Asia-Pacific region, with focus on the ascent of Japan, the development of newly industrialized capitalist countries (S. Korea and Taiwan), the emergence of socialist states (China and N. Korea), and the changing relationship between the U.S. and these countries. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year

#### **SOC 168. Global Organizations: Managing Diversity**

(Same as PUBLPOL 168, SOC 268) Analytical tools derived from the social sciences to analyze global organizations and projects, and applied to the tradeoffs between different designs of teams and organizations. Focus is on tribal mentality and how to design effective organizations and projects for policy implementation within and across institutional settings. Recommended: 102, MS&E 180, or SOC 160. GER:DB-SocSci

5 units, Win (Meyersson Milgrom, E)

#### **SOC 170. Classics of Modern Social Theory**

(Same as SOC 270) (Graduate students register for 270). Preference to Sociology majors. Contributions of Marx, Weber, and Durkheim to contemporary sociology. Topics: the problem of social order and the nature of social conflict; capitalism and bureaucracy; the relationship between social structure and politics; the social sources of religion and political ideology; and the evolution of modern societies. Examples from contemporary research illustrate the impact of these traditions. Limited enrollment. GER:DB-SocSci

5 units, Win (Staff)

#### **SOC 180A. Foundations of Social Research**

(Same as SOC 280A) Formulating a research question, developing hypotheses, probability and non-probability sampling, developing valid and reliable measures, qualitative and quantitative data, choosing research design and data collection methods, challenges of making causal inference, and criteria for evaluating the quality of social research. Emphasis is on how social research is done, rather than application of different methods. Limited enrollment; preference to Sociology and Urban Studies majors, and Sociology coterms. GER:DB-SocSci

5 units, Aut (Parigi, P), Spr (Cook, B)

#### **SOC 180B. INTRODUCTION TO DATA ANALYSIS**

(Same as SOC 280B) Methods for analyzing and evaluating data in sociological research: comparative historical methods, ethnographic observation, quantitative analysis of survey data, experimentation, and simulation. Emphasis is on application of these methods through small data analysis projects. Limited enrollment; preference to Sociology majors. GER:DB-SocSci

5 units, Win (Cumberworth, E)

#### **SOC 181B. Sociological Methods: Statistics**

(Same as SOC 281B) (Graduate students register for 281B.) Statistical methods of relevance to sociology: contingency tables, correlation, and regression.

5 units, not given this year

#### **SOC 190. Undergraduate Individual Study**

Prior arrangement required.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **SOC 191. Undergraduate Directed Research**

Work on a project of student's choice under supervision of a faculty member. Prior arrangement required.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **SOC 192. Undergraduate Research Apprenticeship**

Work in an apprentice-like relationship with faculty on an on-going research project. Prior arrangement required.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **SOC 193. Undergraduate Teaching Apprenticeship**

Prior arrangement required.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **SOC 196. Senior Thesis**

Work on an honors thesis project under faculty supervision (see description of honors program). Must be arranged early in the year of graduation or before.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **SOC 200. Junior/Senior Seminar for Majors**

For Sociology majors. Capstone course in which sociological problems are framed, linked to theories, and answers pursued through research designs. Independent research. How to formulate a research question; how to integrate theory and methods. Prerequisites: SOC 170, 180B.

5 units, Aut (Jimenez, T)

#### **SOC 201. Preparation for Senior Project**

(Same as URBANST 201) First part of capstone experience for Urban Studies majors pursuing an internship-based research project or honors thesis. Assignments culminate in a research proposal, which may be submitted for funding. Students also identify and prepare for a related internship, normally to begin in Spring Quarter in URBANST 201B or in Summer. Research proposed in the final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research. Service Learning Course (certified by Haas Center).

5 units, not given this year

**SOC 202. Preparation for Senior Research**

(Same as URBANST 202) Primarily for juniors in Sociology; sophomores who plan to be off-campus Winter Quarter of their junior year may register with consent of instructor. Students write a research prospectus and grant proposal, which may be submitted for funding. Research proposal in final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research. WIM

5 units, Win (McAdam, D)

**SOC 234. Research Seminar on Access to Justice**

(Same as SOC 334) The functions and dysfunctions of modern legal systems. Topics include: official statements of the U.S. and the EU about the rights of parties to civil disputes; the roles of lawyers as gatekeepers and facilitators; the filtering process by which injuries and experiences become the basis for legal claims; access to and use of courts; the balance of power and advantage between individual persons and organizations in disputes. Prerequisite: advanced undergraduate or graduate standing, or consent of instructor.

1-5 units, not given this year

**GRADUATE COURSES IN SOCIOLOGY**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**SOC 204. Economic Foundations of Everyday Life**

(Same as SOC 104) How the economy impacts other aspects of everyday life. Market as emancipatory, market as alienating, and critiques dualisms. How theories inform case studies of think tanks, reactionary movements, cultural authenticity, romantic relationships, and elite college admissions.

5 units, Spr (Staff)

**SOC 206. Political Sociology**

(Same as SOC 106) The body of state rules and institutions that work in generating legitimate and illegitimate policy claims. Interests and identities that challenged the capacity of the national state to produce effective policies. Economic processes above the national level have that undermine the role of the state as the arena for the composition of disparate interests.

5 units, Win (Parigi, P)

**SOC 207. China After Mao**

(Same as SOC 107) China's post-1976 recovery from the late Mao era; its reorientation toward an open market-oriented economy; the consequences of this new model and runaway economic growth for standards of living, social life, inequality, and local governance; the political conflicts that have accompanied these changes.

5 units, not given this year

**SOC 208. Political & Historical Sociology**

(Same as SOC 108) The differences between historical and sociological analysis of past events. The difference between constructing sociological explanations and describing past events. Topics include: the rise of Christianity, the mafia in a Sicilian village, the trade network of the East India Company.

5 units, not given this year

**SOC 210. Politics and Society**

(Same as SOC 110) (Graduate students register for 210.) Themes of political sociology, conceptions of power and state structures throughout history, the origins and expansion of the modern state, linkages between state and society, impact of the modern world system on national policies, internal distribution of power and authority, structure of political group formation and individual participation in modern states, and future trends of politics and society in a globalized world. Emphasis is on developing conceptual understandings of state, society, and politics in the modern world.

5 units, not given this year

**SOC 211. State and Society in Korea**

(Same as SOC 111) 20th-century Korea from a comparative historical perspective. Colonialism, nationalism, development, state-society relations, democratization, and globalization with reference to the Korean experience.

5 units, Spr (Shin, G)

**SOC 214. Economic Sociology**

(Same as SOC 114) (Graduate students register for 214.) The

sociological approach to production, distribution, consumption, and markets, emphasizing the impact of norms, power, social structure, and institutions on the economy. Comparison of classic and contemporary approaches to the economy among the social science disciplines. Topics: consumption, labor markets, organization of professions such as law and medicine, the economic role of informal networks, industrial organization, including the structure and history of the computer and popular music industries, business alliances, capitalism in non-Western societies, and the transition from state socialism in E. Europe and China.

5 units, Aut (Granovetter, M)

**SOC 216. Chinese Organizations and Management**

Seminar for advanced undergraduates and all graduate students.

5 units, Win (Zhou, X)

**SOC 217A. China Under Mao**

(Same as SOC 117A) (Graduate students register for 217A.) The transformation of Chinese society from the 1949 revolution to the eve of China's reforms in 1978: creation of a socialist economy, reorganization of rural society and urban workplaces, emergence of new inequalities of power and opportunity, and new forms of social conflict during Mao's Cultural Revolution of 1966-69 and its aftermath.

5 units, Aut (Walder, A)

**SOC 218. Social Movements and Collective Action**

(Same as SOC 118) Why social movements arise, who participates in them, the obstacles they face, the tactics they choose, and how to gauge movement success or failure. Theory and empirical research. Application of concepts and methods to social movements such as civil rights, environmental justice, antiglobalization, and anti-war.

5 units, Spr (McAdam, D)

**SOC 219. Understanding Large-Scale Societal Change: The Case of the 1960s**

(Same as SOC 119) The demographic, economic, political, and cultural roots of social change in the 60s; its legacy in the present U.S.

5 units, not given this year

**SOC 220. Interpersonal Relations**

(Same as SOC 120) (Graduate students register for 220.) Forming ties, developing norms, status, conformity, deviance, social exchange, power, and coalition formation; important traditions of research have developed from the basic theories of these processes. Emphasis is on understanding basic theories and drawing out their implications for change in a broad range of situations, families, work groups, and friendship groups.

5 units, Win (Ridgeway, C)

**SOC 223. Sex and Love in Modern Society**

(Same as SOC 123) Social influences on private intimate relations involving romantic love and sexuality. Topics include the sexual revolution, contraception, dating, hook-ups, cohabitation, sexual orientation, and changing cultural meanings of marriage, gender, and romantic love.

5 units, not given this year

**SOC 224A. Traditions of Microsociology**

(Same as EDUC 312A) The educational applications of sociological and social psychological theory and research to interaction processes in schools. Readings include: foundational works by Mead, Schutz, and Simmel; contemporary work by Goffman, Homans, Merton, Blau, and Harold. Readings span empirical settings such as work, classrooms, gangs, primate societies, and children's games. Topics: processes of influence, role differentiation, identity formation, social mechanisms, and intra/inter group dynamics of peer relations. Methods for observation and analysis of small groups. (SSPEP)

4 units, not given this year

**SOC 224B. Microsociology: Social Structure and Interaction**

(Same as EDUC 312B) How to interpret interpersonal situations using microsociological theories. Focuses on the role of intention, identity, routines, scripts, rituals, conceptual frameworks, talk and emotions in social interaction. Processes by which interactions reverberate outward to transform groups and social structures. Special consideration will be placed on organizational contexts like schools, workplaces and policy decision arenas.

4 units, not given this year

**SOC 226. Introduction to Social Networks**

(Same as SOC 126) (Graduate students register for 226.) Theory, methods, and research. Concepts such as density, homogeneity, and centrality; applications to substantive areas. The impact of social network structure on individuals and groups in areas such as communities, neighborhoods, families, work life, and innovations.

5 units, not given this year

**SOC 227. Bargaining, Power, and Influence in Social Interaction**

(Same as SOC 127) (Graduate students register for 227.) Research and theoretical work on bargaining, social influence, and issues of power and justice in social settings such as teams, work groups, and organizations. Theoretical approaches to the exercise of power and influence in social groups and related issues in social interaction such as the promotion of cooperation, effects of competition and conflict, negotiation, and intergroup relations. Enrollment limited to 40.

5 units, not given this year

**SOC 228. Introduction to Social Network Analysis**

(Same as SOC 128) (Graduate students register for SOC 228.) Theory and methods of network analysis in sociology (with an emphasis on social movements), anthropology, history, social psychology, economics, political science, and public health. Prerequisite: basic mathematics.

5 units, not given this year

**SOC 229X. Urban Education**

(Same as AFRICAAM 112, EDUC 112X, EDUC 212X, SOC 129X) (Graduate students register for EDUC 212X or SOC 229X.) Combination of social science and historical perspectives trace the major developments, contexts, tensions, challenges, and policy issues of urban education.

3-4 units, Spr (Ball, A)

**SOC 230. Education and Society**

(Same as EDUC 120C, EDUC 220C, SOC 130) The effects of schools and schooling on individuals, the stratification system, and society. Education as socializing individuals and as legitimizing social institutions. The social and individual factors affecting the expansion of schooling, individual educational attainment, and the organizational structure of schooling.

4-5 units, NEXTYEAR

**SOC 231. World, Societal, and Educational Change: Comparative Perspectives**

(Same as EDUC 136, EDUC 306D) Theoretical perspectives and empirical studies on the structural and cultural sources of educational expansion and differentiation, and on the cultural and structural consequences of educational institutionalization. Research topics: education and nation building; education, mobility, and equality; education, international organizations, and world culture.

4-5 units, Win (Ramirez, F)

**SOC 235. Poverty, Inequality, and Social Policy in the United States**

(Same as SOC 135) Causes and consequences. Effects of antipoverty policies, and debates over effective social policies. Focus is on how poverty and inequality are experienced by families, children, and communities. Topics include welfare reform and labor market policies, education, and community-based antipoverty strategies.

5 units, Spr (Young, C)

**SOC 236. Sociology of Law**

(Same as SOC 136) (Graduate students register for 236) Major issues and debates. Topics include: historical perspectives on the origins of law; rationality and legal sanctions; normative decision making and morality; cognitive decision making; crime and deviance; the law in action versus the law on the books; organizational responses to law in the context of labor and employment; the roles of lawyers, judges, and juries; and law and social change emphasizing the American civil rights movement.

5 units, Spr (Dauber, M)

**SOC 236A. Law and Society**

(Same as SOC 136A) Law and social inequality. Major sociological perspectives on where the law comes from, what law

and justice systems do, and how they work.

5 units, not given this year

**SOC 236B. Advanced Topics in Sociology of Law**

(Same as SOC 136B) (Same as LAW 538.) Historical perspectives on the origins of law, rationality and legal sanctions, law on the books versus the law in action, crime and deviance, school desegregation, privatization of prisons, American civil rights, file sharing, jury decision making, the role of lawyers and judges, and cynicism about the American legal system.

5 units, not given this year

**SOC 238. American Indians in Comparative Historical Perspective**

(Same as NATIVEAM 138, SOC 138) (Graduate students register for 238.) Demographic, political, and economic processes and events that shaped relations between Euro-Americans and American Indians, 1600-1890. How the intersection of these processes affected the outcome of conflicts between these two groups, and how this conflict was decisive in determining the social position of American Indians in the late 19th century and the evolution of the doctrine of tribal sovereignty.

5 units, Win (Staff)

**SOC 239. American Indians in Contemporary Society**

(Same as NATIVEAM 139, SOC 139) (Graduate students register for 239.) The social position of American Indians in contemporary American society, 1890 to the present. The demographic resurgence of American Indians, changes in social and economic status, ethnic identification and political mobilization, and institutions such as tribal governments and the Bureau of Indian Affairs. Recommended: 138 or a course in American history.

5 units, not given this year

**SOC 240. Introduction to Social Stratification**

(Same as SOC 140) (Graduate students register for 240.) The main classical and modern explanations of the causes of social, economic, and political inequality. Issues include: power; processes that create and maintain inequality; the central axes of inequality in contemporary societies (race, ethnicity, class, and gender); the consequences of inequality for individuals and groups; and how social policy can mitigate and exacerbate inequality. Cases include technologically simple groups, the Indian caste system, and the modern U.S.

5 units, Aut (Grusky, D)

**SOC 241. Controversies about Inequality**

(Same as SOC 141) (Graduate students register for 241.) Debate format involving Stanford and guest faculty. Forms of inequality including racial, ethnic, and gender stratification; possible policy interventions. Topics such as welfare reform, immigration policy, affirmative action, discrimination in labor markets, sources of income inequality, the duty of rich nations to help poor nations, and causes of gender inequality.

5 units, not given this year

**SOC 242. Sociology of Gender**

(Same as SOC 142) (Graduate students register for 242.) Gender inequality in contemporary American society and how it is maintained. The social and relative nature of knowledge and the problems this poses for understanding sex differences and gendered behavior in society. Analytical levels of explanation for gender inequalities: socialization, interaction processes, and socioeconomic processes; arguments and evidence for each approach. The social consequences of gender inequality such as the feminization of poverty, and problems of interpersonal relations.

5 units, Win (Correll, S)

**SOC 244. Inequality and the Workplace**

(Same as SOC 144) How characteristics of workplaces, such as hiring practices, workforce diversity, organizational policies and legal mandates, produce variation in inequality. Examines the sources, extent, and consequences of workplace inequality across gender, racial and ethnic lines. Topics include earnings, social status, geographical location, and opportunities for people in the workforce.

5 units, not given this year

**SOC 245. Race and Ethnic Relations**

(Same as SOC 145) (Graduate students register for 245.) Race and ethnic relations in the U.S. and elsewhere. The processes that

render ethnic and racial boundary markers, such as skin color, language, and culture, salient in interaction situations. Why only some groups become targets of ethnic attacks. The social dynamics of ethnic hostility and ethnic/racial protest movements.

5 units, Spr (Snipp, C)

### **SOC 247. Race and Ethnicity Around the World**

(Same as SOC 147) How race and ethnicity has been used to justify segregation, domination and genocide but also be used to create a sense of community, shared responsibility and belonging. Where do divisions come from? Are they hard-wired, or easy to manipulate for political or economic gain? Should governments use these divisions to categorize their citizens? Examining how the definitions, categories and consequences of race and ethnicity differ across time and place.

5 units, Spr (Saperstein, A)

### **SOC 247A. Comparative Ethnic Conflict**

(Same as SOC 147A) Causes and consequences of racial and ethnic conflict, including nationalist movements, ethnic genocide, civil war, ethnic separatism, politics, indigenous peoples' movements, and minority rights movements around the world.

5 units, not given this year

### **SOC 248. Racial Identity**

(Same as SOC 148) The construction and meanings of racial identities in the U.S. Attention to multiracial identities and the shifting boundaries of racial categories in contemporary America.

5 units, not given this year

### **SOC 249. The Urban Underclass**

(Same as SOC 149, URBANST 112) (Graduate students register for 249.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor.

5 units, Spr (Rosenfeld, M)

### **SOC 250. Race and Political Sociology**

(Same as CSRE 150, SOC 150) How race informs the theories and research within political sociology. The state's role in creation and maintenance of racial categories, the ways in which racial identity motivates political actors, how race is used to legitimate policy decisions, comparisons across racial groups. Emphasis on understanding the ways race operates in the political arena.

5 units, Aut (Fields, C)

### **SOC 252. The Social Determinants of Health**

(Same as SOC 152) How social differences, such as where we live, whether and how we work, or how much money we make, and our gender, race or ethnicity, also play a role in who gets sick and who does not.

5 units, Spr (Saperstein, A)

### **SOC 255. The Changing American Family**

(Same as SOC 155) Family change from historical, social, demographic, and legal perspectives. Extramarital cohabitation, divorce, later marriage, interracial marriage, and same-sex cohabitation. The emergence of same-sex marriage as a political issue. Are recent changes in the American family really as dramatic as they seem? Theories about what causes family systems to change.

5 units, not given this year

### **SOC 257. Causal Inference in Quantitative Educational and Social Science Research**

(Same as EDUC 255B) Quantitative methods to make causal inferences in the absence of randomized experiment including the use of natural and quasi-experiments, instrumental variables, regression discontinuity, matching estimators, longitudinal methods, fixed effects estimators, and selection modeling. Assumptions implicit in these approaches, and appropriateness in research situations. Students develop research proposals relying on these methods. Prerequisites: exposure to quantitative research methods; multivariate regression.

3-5 units, Win (Reardon, S)

### **SOC 258. Applied Quasi-Experimental Research in Education**

(Same as EDUC 255C) Course will provide hands-on practice in analysis of data from experimental and quasi-experimental research designs, including a) instrumental variables estimators; b)

regression discontinuity estimators; c) difference-in-difference estimators; d) matching estimators; e) fixed effects estimators; and f) panel data methods (including individual fixed effects models, lagged covariate adjustment models, growth models, etc.). Prerequisites: satisfactory completion of EDUC 255B, EDUC 257C or SOC 257.

3-5 units, Spr (Reardon, S)

### **SOC 260. Formal Organizations**

(Same as SOC 160) (Graduate students register for 260.) The roles of formal organizations in production processes, market transactions, and social movements; and as sources of income and ladders of mobility. Relationships of modern organizations to environments and internal structures and processes. Concepts, models, and tools for analyzing organizational phenomena in contemporary societies. Sources include the literature and case studies.

5 units, Spr (Zhou, X)

### **SOC 261. The Social Science of Entrepreneurship**

(Same as SOC 161) (Graduate students register for 261.) Who is likely to become an entrepreneur and where is entrepreneurship likely to occur? Classic and contemporary theory and research. Interaction with expert practitioners in creating entrepreneurial opportunities including venture and corporate capitalists. The role of culture, markets, hierarchies, and networks. Market creation and change, and factors that affect success of new organizations. Field projects on entrepreneurial environments such as technology licensing offices, entrepreneurial development organizations, venture capital firms, and corporate venturing groups.

5 units, not given this year

### **SOC 262. Markets and Governance**

(Same as SOC 162) Social and political forces that shape market outcomes. The emergence and creation of markets, how markets go wrong, and the roles of government and society in structuring market exchange. Applied topics include development, inequality, globalization, and economic meltdown.

5 units, Spr (Young, C)

### **SOC 263. Foundations of Organizational Theory**

(Same as SOC 163) Foundational material in organizational theory literature.

5 units, OCCASIONAL

### **SOC 264. Immigration and the Changing United States**

(Same as CHICANST 164, CSRE 164, SOC 164) The role of race and ethnicity in immigrant group integration in the U.S. Topics include: theories of integration; racial and ethnic identity formation; racial and ethnic change; immigration policy; intermarriage; hybrid racial and ethnic identities; comparisons between contemporary and historical waves of immigration.

5 units, Aut (Jimenez, T)

### **SOC 265. Seminar on the Everyday Lives of Immigrants**

(Same as SOC 165) Everyday experience of immigrants and the immigrant second generation through the ethnographic lens. Ethnographies that focus on the immigrant experience. Limited enrollment.

5 units, not given this year

### **SOC 266. Mexicans, Mexican Americans, and Chicanos in American Society**

(Same as CHICANST 166, SOC 166) Contemporary sociological issues affecting Mexican-origin people in the U.S. Topics include: the immigrant experience, immigration policy, identity, socioeconomic integration, internal diversity, and theories of incorporation.

5 units, not given this year

### **SOC 267A. Asia-Pacific Transformation**

(Same as SOC 167A) Post-WW II transformation in the Asia-Pacific region, with focus on the ascent of Japan, the development of newly industrialized capitalist countries (S. Korea and Taiwan), the emergence of socialist states (China and N. Korea), and the changing relationship between the U.S. and these countries.

5 units, not given this year

### **SOC 268. Global Organizations: Managing Diversity**

(Same as PUBLPOL 168, SOC 168) Analytical tools derived from the social sciences to analyze global organizations and projects, and applied to the tradeoffs between different designs of teams and

organizations. Focus is on tribal mentality and how to design effective organizations and projects for policy implementation within and across institutional settings. Recommended: 102, MS&E 180, or SOC 160.

5 units, Win (Meyersson Milgrom, E)

**SOC 270. Classics of Modern Social Theory**

(Same as SOC 170) (Graduate students register for 270). Preference to Sociology majors. Contributions of Marx, Weber, and Durkheim to contemporary sociology. Topics: the problem of social order and the nature of social conflict; capitalism and bureaucracy; the relationship between social structure and politics; the social sources of religion and political ideology; and the evolution of modern societies. Examples from contemporary research illustrate the impact of these traditions. Limited enrollment.

5 units, Win (Staff)

**SOC 273. Gender and Higher Education: National and International Perspectives**

(Same as EDUC 273) The effects of interactions between gender and the structures of higher education; policies seeking changes in those structures. Topics: undergraduate and graduate education, faculty field of specialization, rewards and career patterns, sexual harassment, and the development of feminist scholarship and pedagogy.

4 units, not given this year

**SOC 280A. Foundations of Social Research**

(Same as SOC 180A) Formulating a research question, developing hypotheses, probability and non-probability sampling, developing valid and reliable measures, qualitative and quantitative data, choosing research design and data collection methods, challenges of making causal inference, and criteria for evaluating the quality of social research. Emphasis is on how social research is done, rather than application of different methods. Limited enrollment; preference to Sociology and Urban Studies majors, and Sociology coterms.

5 units, Aut (Parigi, P), Spr (Cook, B)

**SOC 280B. INTRODUCTION TO DATA ANALYSIS**

(Same as SOC 180B) Methods for analyzing and evaluating data in sociological research: comparative historical methods, ethnographic observation, quantitative analysis of survey data, experimentation, and simulation. Emphasis is on application of these methods through small data analysis projects. Limited enrollment; preference to Sociology majors.

5 units, Win (Cumberworth, E)

**SOC 281B. Sociological Methods: Statistics**

(Same as SOC 181B) (Graduate students register for 281B.) Statistical methods of relevance to sociology: contingency tables, correlation, and regression.

5 units, not given this year

**SOC 300. Workshop: Teaching Development**

For first-year Sociology doctoral students only. The principles for becoming an effective instructor, adviser, and mentor to undergraduates. Topics: ethics, course organization and syllabus development, test construction and grading, conflict resolution, common classroom problems, and University policies related to matters such as sexual harassment. Technologies and other topics related to making effective presentations, and campus resources to improve classroom performance. Roundtable discussions with faculty and advanced graduate students known for teaching excellence. Students may be asked to give a demonstration lecture.

2 units, Spr (Seo, P)

**SOC 305. Graduate Proseminar**

For first-year Sociology doctoral students only. Introduction and orientation to the field of Sociology.

1 unit, Aut (Olzak, S)

**SOC 308. Social Demography**

For graduate students and advanced undergraduates. Topics: models of fertility behavior, migration models, stable population theory, life table analysis, data sources, and measurement problems. How population behavior affects social processes, and how social processes influence population dynamics. Recommended: sociological research methods; basic regression analysis and log linear models.

4-5 units, Aut (Snipp, C)

**SOC 309. Nations and Nationalism**

The nation as a form of collective identity in the modern era. Major works in the study of nations and nationalism from comparative perspectives with focus on Europe and E. Asia.

4-5 units, Win (Shin, G)

**SOC 310. Political Sociology**

Theory and research on the relationship between social structure and politics. Social foundations of political order, the generation and transformation of ideologies and political identities, social origins of revolutionary movements, and social consequences of political revolution. Prerequisite: doctoral student.

4-5 units, not given this year

**SOC 311A. Workshop: Comparative Studies of Educational and Political Systems**

(Same as EDUC 387A) Analysis of quantitative and longitudinal data on national educational systems and political structures. May be repeated for credit. Prerequisite: consent of instructor. (SSPEP/ICE)

1-5 units, Aut (Ramirez, F; Meyer, J)

**SOC 311B. Workshop: Comparative Systems of Educational and Political Systems**

(Same as EDUC 387B) Analysis of quantitative and longitudinal data on national educational systems and political structures. May be repeated for credit. Prerequisite: consent of instructor. (SSPEP/ICE)

1-5 units, Win (Ramirez, F; Meyer, J)

**SOC 311C. Workshop: Comparative Studies of Educational and Political Systems**

(Same as EDUC 387C) Analysis of quantitative and longitudinal data on national educational systems and political structures. Prerequisite: consent of instructor. May be repeated for credit. (SSPEP/ICE)

1-5 units, Spr (Ramirez, F; Meyer, J)

**SOC 312W. Workshop: Political Sociology, Social Movements, and Collective Action**

Faculty and student presentations of ongoing research on topics including: social movement and organizations, and the relationship between them; democracy movements; legislative and policy outcomes; and collective action tactics, strategies, and trajectories. May be repeated for credit. Restricted to Sociology doctoral students; others by consent of instructor.

1-2 units, Aut (McAdam, D; Olzak, S; Walder, A), Win (McAdam, D; Olzak, S; Walder, A), Spr (McAdam, D; Olzak, S; Walder, A)

**SOC 314. Economic Sociology**

Classical and contemporary literature covering the sociological approach to markets and the economy, and comparing it to other disciplines. Topics: consumption, labor, professions, industrial organization, and the varieties of capitalism; historical and comparative perspectives on market and non-market provision of goods and services, and on transitions among economic systems. The relative impact of culture, institutions, norms, social networks, technology, and material conditions. Prerequisite: doctoral student status or consent of instructor.

4-5 units, Aut (Granovetter, M)

**SOC 315. Topics in Economic Sociology**

(Same as SOC 115) (Graduate students register for 315.) Discussion of topics initially explored in 114/214, with emphasis on countries and cultures outside N. America. Possible topics: families and ethnic groups in the economy, corporate governance and control, corporate strategy, relations among firms in industrial districts and business groups, the impact of national institutions and cultures on economic outcomes, transitions from state socialism and the role of the state in economic development. Possible case studies: the U.S., Germany, Italy, Britain, France, Brazil, Korea, India, Japan, and China. Prerequisite: 114/214 or 314.

5 units, Win (Granovetter, M)

**SOC 315W. Workshop: Economic Sociology and Organizations**

Theory, methods, and research in the sociology of the economy and of formal organizations, through presentations of ongoing work by students, faculty, and guest speakers, and discussion of

recent literature and controversies. May be repeated for credit. Restricted to Sociology doctoral students; others by consent of instructor.

*1-2 units, Aut (Granovetter, M; Zhou, X; Parigi, P), Win (Granovetter, M; Zhou, X; Parigi, P), Spr (Granovetter, M; Zhou, X; Parigi, P)*

### **SOC 316. Historical and Comparative Sociology**

Theory and research on macro-historical changes of sociological significance such as the rise of capitalism, the causes and consequences of revolutions, and the formation of the modern nation state and global world system. Methodological issues in historical and comparative sociology.

*4-5 units, not given this year*

### **SOC 317W. Workshop: Networks, Histories, and Theories of Action**

(Same as EDUC 317X) Yearlong workshop where doctoral students are encouraged to collaborate with peers and faculty who share an interest in researching the network dynamics, histories and theories of action that help explain particular social phenomena. Students present their own research and provide helpful feedback on others' work. Presentations may concern dissertation proposals, grants, article submissions, book proposals, datasets, methodologies and other texts. Repeatable for credit.

*1-2 units, Aut (McFarland, D; Parigi, P), Win (McFarland, D; Parigi, P), Spr (McFarland, D; Parigi, P)*

### **SOC 318. Social Movements and Collective Action**

Topics: causes, dynamics, and outcomes of social movements; organizational dimensions of collective action; and causes and consequences of individual activism.

*4-5 units, not given this year*

### **SOC 320. Foundations of Social Psychology**

Major theoretical perspectives, and their assumptions and problems, in interpersonal processes and social psychology. Techniques of investigation and methodological issues. Perspectives: symbolic interaction, social structure and personality, and cognitive and group processes.

*4-5 units, Win (Ridgeway, C)*

### **SOC 321W. Workshop: Social Psychology and Social Structure**

Advanced graduate student workshop in social psychology. Current theories and research agendas, recent publications, and presentations of ongoing research by faculty and students. May be repeated for credit. Prerequisite: consent of instructor.

*1-2 units, Aut (Cook, K; Ridgeway, C; Correll, S), Win (Cook, K; Ridgeway, C; Correll, S), Spr (Cook, K; Ridgeway, C; Correll, S)*

### **SOC 322. Social Interaction, Social Structure, and Social Exchange**

Current theory and research on topics such as social cognition and identity, group processes, bargaining and negotiation, social justice, social dilemmas and exchange, and networks and collective action. The social exchange approach.

*4-5 units, Aut (Cook, K)*

### **SOC 323. Sociology of the Family**

Sociological research on changing family forms. Topics include courtship, marriage, fertility, divorce, conflict, relationship skills and satisfaction, gender patterns, power relations within the family, and class and race differences in patterns.

*4-5 units, Spr (Rosenfeld, M)*

### **SOC 324. Social Networks**

How the study of social networks contributes to sociological research. Application of core concepts to patterns of relations among actors, including connectivity and clusters, duality of categories and networks, centrality and power, balance and transitivity, structural equivalence, and blockmodels. Friendship and kinship networks, diffusion of ideas and infectious diseases, brokerage in markets and organizations, and patronage and political influence in historical contexts.

*3-5 units, not given this year*

### **SOC 327. Frontiers of Social Psychology**

Advanced topics, current developments, theory, and empirical research. Possible topics include social identity processes, status beliefs and processes, social exchange, affect and social cohesion, legitimacy, social difference and inequality, norms, and social

dilemmas.

*1-5 units, not given this year*

### **SOC 330. Sociology of Knowledge Creation**

(Same as EDUC 120X, EDUC 320X) The sociology of knowledge creation explores systematic relationships between thought and social structure in order to examine how human beings construct, interpret, and view reality. How knowledge is socially constructed, patterned, and used, and how everyday and tacit forms of knowledge are achieved. Emphasis is on the creation and patterning of scientific paradigms, social science disciplines, and the field of education.

*3-4 units, Aut (McFarland, D)*

### **SOC 331. The Conduct of Qualitative Inquiry**

(Same as EDUC 327A) Two quarter sequence for doctoral students to engage in research that anticipates, is a pilot study for, or feeds into their dissertations. Prior approval for dissertation study not required. Students engage in common research processes including: developing interview questions; interviewing; coding, analyzing, and interpreting data; theorizing; and writing up results. Participant observation as needed. Preference to students who intend to enroll in 327C.

*3-4 units, not given this year*

### **SOC 332. Sociology of Education: The Social Organization of Schools**

(Same as EDUC 110, EDUC 310, SOC 132) Seminar. Key sociological theories and empirical studies of the links between education and its role in modern society, focusing on frameworks that deal with sources of educational change, the organizational context of schooling, the impact of schooling on social stratification, and the relationships between the educational system and other social institutions such as families, neighborhoods, and the economy.

*4 units, Spr (Carter, P)*

### **SOC 333. Law and Wikinomics: The Economic and Social Organization of the Legal Profession**

(Same as SOC 133) (Graduate and Law students enroll in 333.) Seminar. Emphasis is on the labor market for large-firm lawyers, including the market for entry-level lawyers, attorney retention and promotion practices, lateral hiring of partners, and increased use of forms of employment such as the non-equity form of partnership. Race and gender discrimination and occupational segregation; market-based pressure tactics for organizational reform. Students groups collect and analyze data about the profession and its markets. Multimedia tools for analysis and for producing workplace reforms. May be repeated for credit. Prerequisite: consent of instructor.

*1-5 units, Spr (Dauber, M)*

### **SOC 334. Research Seminar on Access to Justice**

(Same as SOC 234) The functions and dysfunctions of modern legal systems. Topics include: official statements of the U.S. and the EU about the rights of parties to civil disputes; the roles of lawyers as gatekeepers and facilitators; the filtering process by which injuries and experiences become the basis for legal claims; access to and use of courts; the balance of power and advantage between individual persons and organizations in disputes. Prerequisite: advanced undergraduate or graduate standing, or consent of instructor.

*1-5 units, not given this year*

### **SOC 336. Sociology of Law**

Sociological examination of law as a mechanism of social regulation and as a field of knowledge. Explores classical and contemporary theoretical and empirical contributions to the sociology of law. Law and social control, law and social change, social reality of the law, the profession and practice of law, legal mobilization, and the influence of race, gender, and social status in legal decisions and processes.

*3-5 units, not given this year*

### **SOC 338W. Workshop: Sociology of Law**

(Same as LAW 581.) Required for joint degree J.D./Ph.D. students in Sociology in the first three years of program; open to Ph.D. students in Sociology and related disciplines. Empirical, sociological study of law and legal institutions. Topics such as the relation of law to inequality and stratification, social movements, organizations and institutions, political sociology and state

development, and the social construction of disputes and dispute resolution processes. Research presentations. Career development issues. May be repeated for credit.

*1-5 units, Win (Dauber, M)*

**SOC 339. Gender Meanings and Processes**

Current theories and research on the social processes, such as socialization, status processes, stereotyping, and cognition, that produce gender difference and inequality. Intersections of gender with race, class, and bodies. Applications to workplaces, schools, families, and intimate relationships. Prerequisite: Sociology doctoral student or consent of instructor

*1-5 units, not given this year*

**SOC 340. Social Stratification**

Classical and contemporary approaches to the unequal distribution of goods, status, and power. Modern analytic models of the effects of social contact, cultural capital, family background, and luck in producing inequality. The role of education in stratification. The causes and consequences of inequality by race and gender. The structure of social classes, status groupings, and prestige hierarchies in various societies. Labor markets and their role in inequality. The implications of inequality for individual lifestyles. The rise of the new class, the underclass, and other emerging forms of stratification. Prerequisite: Ph.D. student or consent of instructor.

*4-5 units, Spr (Grusky, D)*

**SOC 341W. Workshop: Inequality**

Causes, consequences, and structure of inequality; how inequality results from and shapes social classes, occupations, professions, and other aspects of the economy. Research presentations by students, faculty, and guest speakers. Discussion of controversies, theories, and recent writings. May be repeated for credit. Restricted to Sociology doctoral students; others by consent of instructor.

*1-2 units, Aut (Grusky, D; Correll, S), Win (Grusky, D; Correll, S; Tuma, N), Spr (Grusky, D; Correll, S)*

**SOC 342B. Gender and Social Structure**

The role of gender in structuring contemporary life. Social forces affecting gender at the psychological, interactional, and structural levels. Gender inequality in labor markets, education, the household, and other institutions. Theories and research literature.

*4-5 units, not given this year*

**SOC 345. Seminar in Comparative Race and Ethnic Relations**

Restricted to doctoral students. Factors that create, maintain, and diminish the salience of race and ethnic boundaries. Theoretical debates surrounding the emergence, persistence, and change in racial and ethnic boundaries, nationalism and sovereignty, and mobilization. Empirical evidence on race and ethnic tensions, conflict, and warfare. The relationship between democracy, immigration, and diversity.

*4-5 units, Win (Olzak, S)*

**SOC 346. Workshop: Ethnography**

Restricted to doctoral students. Student research employing ethnographic methods. May be repeated for credit. Prerequisite: consent of instructor.

*1-2 units, not given this year*

**SOC 347. Race and Ethnicity in Society and Institutions**

(Same as EDUC 315X) Primarily for doctoral students. Major theories and empirical research. Emphasis is on schooling and race, racial identity, urban issues, and the impact of immigration on race relations.

*1-5 units, not given this year*

**SOC 348. Advanced Topics in the Sociology of Gender**

Seminar for graduate students who have research projects in progress that focus on questions about gender and society. Research projects can be at any stage from the initial development to the final writing up of results. Focus is on questions posed by the research projects of the seminar participants. Readings include relevant background to each other's questions and present their own work in progress. A final paper reports the progress on the seminar member's research project.

*3-5 units, Spr (Staff)*

**SOC 350. Sociology of Race**

Emphasis on cultural approaches that focus on meaning and

meaning-making in the realm of race and race relations. Issues and complications in conceptualizing and theorizing race. Differentiation, organization, and stratification by race across a range of domains. Identity, political and economic participation, group solidarity.

*3-5 units, Spr (Fields, C)*

**SOC 350W. Workshop: Migration, Race, Ethnicity and Nation**

Current theories and research, recent publications, and presentations of ongoing research by faculty and students. May be repeated for credit. Prerequisite: consent of instructor.

*1-3 units, Aut (McDermott, M; Jimenez, T), Win (McDermott, M; Jimenez, T), Spr (Jimenez, T)*

**SOC 357. Immigration and Assimilation**

Major theoretical debates and empirical applications in the study of immigrant assimilation. Topics include racial and ethnic identity, socioeconomic integration, political participation, and national identity. Companion to SOC 358.

*3-5 units, not given this year*

**SOC 358. Sociology of Immigration**

Topics include: the process of migration; historical perspectives; immigrant integration; transnationalism; immigration policy; labor; nations and nationalism.

*1-5 units, not given this year*

**SOC 359. Organizations and Uncertainty**

Organizations and environments characterized by institutional uncertainty. Beliefs at the roots of shared routines and institutional myths are absent. Institutionalists and neo-institutionalists, organizations facing uncertain institutional environments.

*3-5 units, Aut (Parigi, P)*

**SOC 361. Social Psychology of Organizations**

Seminar. Social psychological theories and research relevant to organizational behavior. Current research topics; theories in micro-organizational behavior. Topics include models of attribution, choice and decision making, intergroup behavior, stereotyping, and social influence. Prerequisites: Ph.D student; graduate-level social psychology course.

*4 units, not given this year*

**SOC 361W. Workshop: Networks and Organizations**

(Same as EDUC 361) For students doing advanced research. Group comments and criticism on dissertation projects at any phase of completion, including data problems, empirical and theoretical challenges, presentation refinement, and job market presentations. Collaboration, debate, and shaping research ideas. Prerequisite: courses in organizational theory or social network analysis.

*1-3 units, Aut (Powell, W), Win (Powell, W), Spr (Powell, W)*

**SOC 362. Organization and Environment**

This seminar considers the leading sociological approaches to analyzing relations of organizations and environments, with a special emphasis on dynamics. Attention is given to theoretical formulations, research designs, and results of empirical studies. Prerequisite: Enrollment in a PhD program.

*4 units, Aut (Carroll, G)*

**SOC 363A. Seminar on Organizational Theory**

(Same as EDUC 375A, MS&E 389) The social science literature on organizations assessed through consideration of the major theoretical traditions and lines of research predominant in the field.

*5 units, Aut (Powell, W)*

**SOC 363B. Seminar on Organizations: Institutional Analysis**

(Same as EDUC 375B) Seminar. Key lines of inquiry on organizational change, emphasizing network, institutional, and evolutionary arguments.

*3-5 units, not given this year*

**SOC 366. Organization Studies: Theories and Analyses**

(Same as EDUC 288) Principles of organizational behavior and analysis; theories of group and individual behavior; organizational culture; and applications to school organization and design. Case studies.

*4-5 units, Aut (McFarland, D)*

**SOC 366A. Organizational Ecology**

(Same as OB 601) This seminar examines theoretical and methodological issues in the study of the ecology of organizations. Particular attention is given to the dynamics that characterize the

interface between organizational populations and their audiences.

4 units, Spr (Staff)

### **SOC 367. Institutional Analysis of Organizations**

Reading and research on the nature, origins, and effects of the modern institutional system. Emphasis is on the effects of institutional systems on organizational structure.

3-5 units, not given this year

### **SOC 368W. Workshop: China Social Science**

(Same as POLISCI 448R) For Ph.D. students in the social sciences and history. Research on contemporary society and politics in the People's Republic of China. May be repeated for credit. Prerequisite: consent of instructor.

1 unit, Aut (Walder, A; Oi, J), Win (Walder, A; Oi, J), Spr (Walder, A; Zhou, X; Oi, J)

### **SOC 369. Social Network Analysis**

(Same as EDUC 316) Introduction to social network theory, methods, and research applications in sociology. Network concepts of interactionist (balance, cohesion, centrality) and structuralist (structural equivalence, roles, duality) traditions are defined and applied to topics in small groups, social movements, organizations, communities. Students apply these techniques to data on schools and classrooms. (SSPEP)

4-5 units, Win (McFarland, D)

### **SOC 370A. Sociological Theory: Social Structure, Inequality, and Conflict**

Restricted to doctoral students. The traditions of structural analysis derived from the work of Marx, Weber, and related thinkers. Antecedent ideas in foundational works are traced through contemporary theory and research on political conflict, social stratification, formal organization, and the economy.

5 units, Aut (Olzak, S)

### **SOC 370B. Social Interaction and Group Process**

Theoretical strategies for the study of interaction, group, and network processes, including rational choice and exchange theory, the theory of action, symbolic interactionism, formal sociology, and social phenomenology. Antecedent ideas in foundational works and contemporary programs of theoretical research.

3-5 units, Win (Staff)

### **SOC 372. Theoretical Analysis and Design**

Theoretical analysis and the logical elements of design, including the systematic analysis of the logical structure of arguments, the relationship of arguments to more encompassing theoretical or metatheoretical assumptions, the derivation of logical implications from arguments, assessments of theoretically significant problems or gaps in knowledge.

3-5 units, not given this year

### **SOC 374. Philanthropy and Civil Society**

(Same as EDUC 374, POLISCI 334) Associated with the Center for Philanthropy and Civil Society (PACS). Year-long workshop for doctoral students and advanced undergraduates writing senior theses on the nature of civil society or philanthropy. Focus is on pursuit of progressive research and writing contributing to the current scholarly knowledge of the nonprofit sector and philanthropy. Accomplished in a large part through peer review. Readings include recent scholarship in aforementioned fields. May be repeated for credit for a maximum of 9 units.

1-3 units, Aut (Powell, W), Win (Powell, W), Spr (Powell, W)

### **SOC 376. Perspectives on Organization and Environment**

Sociologists and organizational scholars have increasingly come to recognize that networks are not simply relevant as conduits for the flow of information and resources, but are critical determinants of identity, shaping preferences and influencing perceptions of the qualities that inhere in actors. Research that informs the link between networks and identity based on intellectual traditions such as social exchange theory, role theory, and economic and historical sociology.

4 units, not given this year

### **SOC 377. Comparing Institutional Forms: Public, Private, and Nonprofit**

(Same as EDUC 377, GSBGEN 346, PUBLPOL 317) For students interested in the nonprofit sector, those in the joint Business and Education program, and for Public Policy MA students. The focus is on the missions, functions, and capabilities of nonprofit, public,

and private organizations, and the managerial challenges inherent in the different sectors. Focus is on sectors with significant competition among institutional forms, including health care, social services, the arts, and education. Sources include scholarly articles, cases, and historical materials.

4 units

### **SOC 378. Seminar on Institutional Theory and World Society**

Sociological analyses of the rise and impact of the expanded modern world order, with its internationalized organizations and globalized discourse. Consequences for national and local society: education, political organization, economic structure, the environment, and science. The centrality of the individual and the rationalized organization as legitimated actors.

1-5 units, Win (Meyer, J)

### **SOC 380. Qualitative Methods**

Priority to Sociology doctoral students. Emphasis is on observational and interview-based research. Limited enrollment.

3-5 units, Spr (Jimenez, T)

### **SOC 381. Sociological Methodology I: Introduction**

Enrollment limited to first-year Sociology doctoral students. Basic math and statistics. Types of variables, how to recode and transform variables, and how to manage different types of data sets. How to use and think about weights. Introduction to statistical packages and programming. Introduction to multiple regression, and introduction to the interpretation of regression results.

5 units, Aut (Rosenfeld, M)

### **SOC 382. Sociological Methodology II: Multivariate Regression**

Preference to Sociology doctoral students. Required for Ph.D. in Sociology. Enrollment limited to first-year Sociology doctoral students. Rigorous treatment of linear regression models, model assumptions, and various remedies for when these assumptions are violated. Introduction to panel data analysis. Enrollment limited to 15. Prerequisites: 381.

4-5 units, Win (Young, C)

### **SOC 383. Sociological Methodology III: Models for Discrete Outcomes**

Required for Ph.D. in Sociology; enrollment limited to first-year Sociology doctoral students. The rationale for and interpretation of static and dynamic models for the analysis of discrete variables. Prerequisites: 381 and 382, or equivalents.

5 units, Spr (Zhou, X)

### **SOC 384. New Models and Methods in the Social Sciences**

Two-week intensive introduction to new statistical approaches. Emphasis is on applications. Topics may include network models, multilevel models, latent class models, mixed methods, new qualitative methods, growth models, geostatistical tools, survey-based experiments, new methods for estimating causal effects, web-based surveys, advanced discrete choice models, and diffusion models.

2-5 units, Sum (Staff)

### **SOC 385B. Research Practicum II**

Continuation of 385A. Workshop on research methods for second year Sociology doctoral students. Ongoing student research, methodological problems, and possible solutions. Required for second year paper.

1 unit, not given this year

### **SOC 388. Log-Linear Models**

Analysis of categorical data with log-linear and negative binomial models. Measures of fit and hypothesis testing.

3-5 units, not given this year

### **SOC 389. Mixed Method Research Design and Analysis**

Research designs that incorporate qualitative and quantitative analyses in a single project. The tension between thinking case-wise and variable-wise; how the focus on relationships between variables that is the hallmark of the quantitative approach can be brought into qualitative work.

3-5 units, not given this year

### **SOC 390. Graduate Individual Study**

May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### **SOC 391. Graduate Directed Research**

May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### **SOC 392. Research Apprenticeship**

May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### **SOC 393. Teaching Apprenticeship**

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### **SOC 635. Social Movements and Organizations**

This research seminar is intended for students seeking to learn more about how collective action underpins institutional change in organizations and industries, and how the success of collective action, in turn, hinges on organizational structures and processes to recruit and mobilize individuals. The purpose of this course is to provide you a roadmap for you to roam the terrain of movements and organizations, and be prepared to generate original research ideas that extend inquiry in your chosen area of research.

4 units, Win (Rao, H)

### **SOC 670. Designing Social Research**

This is a course in the design of social research, with a particular emphasis on research field (i.e., non-laboratory) settings. As such, the course is a forum for discussing and developing an understanding of the different strategies social theorists employ to explain social processes, develop theories, and make these theories as believable as possible. In general, these issues will be discussed in the context of sociological research on organizations, but this will not be the exclusive focus of the course. A range of topics will be covered, for example: formulating and motivating research questions; varieties of explanation; experimental and quasi-experimental methods, including natural experiments; counterfactual models; conceptualization and measurement; sampling and case selection; qualitative and quantitative approaches. This course is particularly oriented toward developing an appreciation of the tradeoffs of different approaches. It is well suited to Ph.D. students working on q

4 units, Win (Sorensen, J)

### **SOC 802. TGR Dissertation**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## **SOPHOMORE COLLEGE (SCS) COURSES**

### **ANTHROPOLOGY SOPHOMORE COLLEGE COURSES**

#### **ANTHRO 10SC. Darwin, Evolution, and Galapagos**

(Same as HUMBIO 17SC) Lessons from the study of flora and fauna in Galapagos from Darwin's time to today. Adaptation, sexual selection, speciation, and adaptive radiation. The challenges the Galapagos Islands pose for conservation.

2 units, Aut (Durham, W)

#### **ANTHRO 12SC. Parks and Peoples: Dilemmas of Protected Area Conservation in East Africa**

(Same as HUMBIO 19SC) A September Studies course, offered in a special session before Autumn Quarter. Students participating in this course will have it added to their Autumn study list in late November. Pros and cons of parks and protected areas; the dilemma of achieving conservation in a way that creates local community benefits and is socially just. Case study approach to study protected area (PA) approaches, proponents, objectives, successes, benefits, costs, ways to increase compatibility of the interests of parks and people. Final paper on some aspect of conservation dilemmas in East Africa and presentation of paper.

2 units, Aut (Staff)

### **BIOLOGY SOPHOMORE COLLEGE COURSES**

#### **BIO 10SC. Natural History, Marine Biology, and Research**

Monterey Bay is home to the nation's largest marine sanctuary and also home to Stanford's Hopkins Marine Station. This course, which is based at Hopkins, explores the spectacular biology of Monterey Bay and the artistic and political history of the region.

The course focuses on issues of conservation, sanctuary, and stewardship of the oceans and coastal lands. We will meet with conservationists, filmmakers, artists, authors, environmentalists, politicians, land-use planners, and lawyers, as well as scientists and educators, to learn what is being done to appreciate, protect, and study the coastline and near-shore waters at local and national levels. We will take a look at the discipline of marine biology to discover the range of topics and methods of research it embraces and to help define some of the larger issues in biology that loom in our future. The course emphasizes interactions and discussions between individuals, groups, and our guests; it is a total immersion experience. We wi

2 units, Aut (Thompson, S)

### **COMPARATIVE LITERATURE SOPHOMORE COLLEGE COURSES**

#### **COMPLIT 11SC. Worlds (No Longer) Apart**

What (if anything) do supermall shoppers in the Philippines, a Filipino taxi driver in Paris, and television viewers in Nepal have to do with a legal case in Canada, two young Japanese on a pilgrimage to Graceland, and a South Asian lawyer/liquor store owner trying to reclaim his property in Uganda from where he lives, in Mississippi? This course uses literary narratives, films, and historical research to examine new textures of contemporary life, where borders seem hard-pressed to contain culture. Texts include Pico Iyer, *Video Night in Kathmandu*, Mira Nair's film *Mississippi Masala*, and M.G. Vassanji, *No New Land*. New forms of identity have emerged that reflect the cultural changes that have accompanied such movements. Nevertheless, we will not idealize such phenomena either; we will want also to carefully observe the binding power of nations. The result will be a finer-tuned sense of globalization and the local and the global. The course emphasizes creative

2 units, Aut (Palumbo-Liu, D)

#### **COMPLIT 12SC. Ghost Stories: Why the Dead Return and What They Want From Us**

Study of the ghost story genre, from classical literature to popular film. Exploration of anxiety about our own mortality and wisdom about the cultural place of the past. Reading of selected stories and novels that explore ghosts and hauntings. Regular participation in CourseWork discussion forum and work in small groups with other course members to discuss and present readings.

2 units, Aut (Berman, R)

### **COMPARATIVE MEDICINE SOPHOMORE COLLEGE COURSES**

#### **COMPMD 10SC. Comparative Anatomy and Physiology of Mammals**

Introduction to common laboratory, domestic, and exotic mammals. Investigation of the unique adaptations of species in terms of their morphological, anatomical, and behavioral characteristics. How these species interact with their own and other species, including humans; basic evolution and the impact of habitat destruction on wild animals; diversity of the mammalian orders, along with the fundamentals of comparative anatomy, physiology and basic dissection techniques. Lectures, dissection labs, student presentations, field trip to local zoo.

2 units, Aut (Bouley, D)

### **COMPUTER SCIENCE SOPHOMORE COLLEGE COURSES**

#### **CS 10SC. Great Ideas in Computer Science**

Exploration of great ideas in computer science, from understanding how search engines on the Web work to looking at mathematical theories underlying social networks, from questioning whether a computer can be intelligent to analyzing the notion of what is even possible to computers. Small group work to research topics in computer science. Field trips to local companies and the Computer History Museum.

2 units, Aut (Sahami, M; Roberts, E)

## DRAMA SOPHOMORE COLLEGE COURSES

### DRAMA 11SC. Learning Theater: From Audience to Critic at the Oregon Shakespeare Festival

Study of the details of the plays, their interpretation, their production, and acting itself, aimed at full appreciation of the theatrical experience. Extended stay in Ashland, Oregon, at the Oregon Shakespeare Festival (OSF). Time backstage, meeting with actors, designers, and artistic and administrative directors of OSF. Reading of plays before the seminar begins. In Ashland, production of staged readings and design of a final paper based on one of the productions.

2 units, Aut (Rehm, R; Paulson, L)

## EARTH SYSTEMS SOPHOMORE COLLEGE COURSES

### EARTHSYS 12SC. Environmental and Geological Field Studies in the Rocky Mountains

(Same as EESS 12SC, GES 12SC) Three-week field program emphasizing coupled environmental and geological problems in the Rocky Mountains, covering a broad range of topics including the geologic origin of the American West from three billion years ago to the present; paleoclimatology and the glacial history of this mountainous region; the long- and short-term carbon cycle and global climate change; and environmental issues in the American West related to changing land-use patterns and increased demand for its abundant natural resources. Examination of earth/environmental science-related questions in three different settings: 1) the three-billion-year-old rocks and the modern glaciers of the Wind River Mountains of Wyoming; 2) the sediments in the adjacent Wind River basin; and 3) the volcanic center of Yellowstone National Park and the mountainous region of Teton National Park. Small group work to analyze data and prepare reports and maps. Lectures in the field prior to and after fieldwork. Note: One week of backpack

2 units, Aut (Chamberlain, P)

### EARTHSYS 13SC. The Colorado River: Water in the West as Seen from a Raft in the Grand Canyon

(Same as HISTORY 23SC, HUMBIO 20SC) Expeditionary-style seminar spending 14 days rafting 225 miles through the Grand Canyon while studying the law, economics, politics, ecology, hydrology, history, literature, and art of the Colorado River. Students learn about the river through a variety of disciplines. Immersion in the grand subject of water in the West and sustainability, the focus of a major interdisciplinary research initiative of the Bill Lane Center for the American West and the Woods Institute for the Environment at Stanford.

2 units, Aut (Kennedy, D; Thompson, B; Ardoin, N; Freyberg, D)

## ECONOMICS SOPHOMORE COLLEGE COURSES

### ECON 13SC. A Random Walk Down Wall Street

Coverage of modern finance theory and a wide range of financial instruments: stocks, bonds, options, mutual funds, exchange traded funds, etc. Discussion of historical returns on different asset classes, the efficient market hypothesis, and the case for and against index funds as well as the collapse of the investment banks, the unprecedented actions of the Federal Reserve and the Treasury to strengthen the banking system, and the ongoing course of the economic recession.

2 units, Aut (Shoven, J)

## ELECTRICAL ENGINEERING SOPHOMORE COLLEGE COURSES

### EE 10SC. Mathematics of the Information Age

Empedocles taught that the world is made of four elements; earth, air, fire, and water. And what of the quintessence? Physics banished the ether as that elusive fifth element, but our current age has settled on information as the element that permeates and connects the world. What is information? Can it be measured and manipulated like the other elements? The primary steps -- before

circuits and chips and computers take charge -- are mathematical, and information became mathematical through the work of Claude Shannon on problems in communication. Shannon laid the foundations for the digital revolution that has become part of our everyday lives. The mathematics of the information age is likewise a part of your everyday life, from images to iTunes to the Internet, and the mathematics is quite accessible. We will discuss the elements of information theory and how information is represented in different ways for different purposes. We will work with the mathematical representation of s

2 units, Aut (Osgood, B)

## ENGLISH SOPHOMORE COLLEGE COURSES

### ENGLISH 15SC. Mixed Race in the New Millennium: Crossings of Kin, Culture, & Faith in the 21st Century

Examination of political and aesthetic implications of Generation Ethnically Ambiguous (E.A.), including contemporary images of mixed race as represented in literature, art, performance, film, Internet, and popular culture. How a range of cultural and legal events are changing the way we talk and think not only about race but also crossings and mixings across gender, nation, religion, and socioeconomic experience. Assignments explore the current controversies over mixed race identification and also the expressive and political possibilities for representing complex identities: requirements include three two to three-page analytical writing assignments and an individualized project. (Students can choose two options for this project: artistic project or written narrative.)

2 units, Aut (Elam, M)

## ENVIRONMENTAL EARTH SYSTEM SCIENCE SOPHOMORE COLLEGE COURSES

### EESS 12SC. Environmental and Geological Field Studies in the Rocky Mountains

(Same as EARTHSYS 12SC, GES 12SC) Three-week field program emphasizing coupled environmental and geological problems in the Rocky Mountains, covering a broad range of topics including the geologic origin of the American West from three billion years ago to the present; paleoclimatology and the glacial history of this mountainous region; the long- and short-term carbon cycle and global climate change; and environmental issues in the American West related to changing land-use patterns and increased demand for its abundant natural resources. Examination of earth/environmental science-related questions in three different settings: 1) the three-billion-year-old rocks and the modern glaciers of the Wind River Mountains of Wyoming; 2) the sediments in the adjacent Wind River basin; and 3) the volcanic center of Yellowstone National Park and the mountainous region of Teton National Park. Small group work to analyze data and prepare reports and maps. Lectures in the field prior to and after fieldwork. Note: One week of backpack

2 units, Aut (Chamberlain, P)

## GEOLOGICAL AND ENVIRONMENTAL SCIENCES SOPHOMORE COLLEGE COURSES

### GES 12SC. Environmental and Geological Field Studies in the Rocky Mountains

(Same as EESS 12SC, EARTHSYS 12SC) Three-week field program emphasizing coupled environmental and geological problems in the Rocky Mountains, covering a broad range of topics including the geologic origin of the American West from three billion years ago to the present; paleoclimatology and the glacial history of this mountainous region; the long- and short-term carbon cycle and global climate change; and environmental issues in the American West related to changing land-use patterns and increased demand for its abundant natural resources. Examination of earth/environmental science-related questions in three different settings: 1) the three-billion-year-old rocks and the modern glaciers of the Wind River Mountains of Wyoming; 2) the sediments in the adjacent Wind River basin; and 3) the volcanic

center of Yellowstone National Park and the mountainous region of Teton National Park. Small group work to analyze data and prepare reports and maps. Lectures in the field prior to and after fieldwork. Note: One week of backpack

2 units, Aut (*Chamberlain, P*)

## HISTORY SOPHOMORE COLLEGE COURSES

### HISTORY 21SC. Celluloid America: Explorations in Film and History

Exploration of the history and culture of the United States through film, examining both the history of the medium and the ways in which American history has been represented in movies. Topics include the invention of moving picture technology, the creation of cinema language, the rise and fall of the Hollywood studio system, the emergence and evolution of film genres (westerns, romantic comedies, film noir, science fiction, Blaxploitation, etc.), the quest for overseas markets for American movies, race and film, and the future of movies in the digital age. Daily readings and discussions as well as a number of required screenings. Short research projects on topics of students' choosing.

2 units, Aut (*Campbell, J*)

### HISTORY 23SC. The Colorado River: Water in the West as Seen from a Raft in the Grand Canyon

(Same as EARTHSYS 13SC, HUMBIO 20SC) Expeditionary-style seminar spending 14 days rafting 225 miles through the Grand Canyon while studying the law, economics, politics, ecology, hydrology, history, literature, and art of the Colorado River. Students learn about the river through a variety of disciplines. Immersion in the grand subject of water in the West and sustainability, the focus of a major interdisciplinary research initiative of the Bill Lane Center for the American West and the Woods Institute for the Environment at Stanford.

2 units, Aut (*Kennedy, D; Thompson, B; Ardoin, N; Freyberg, D*)

## HUMAN BIOLOGY SOPHOMORE COLLEGE COURSES

### HUMBIO 17SC. Darwin, Evolution, and Galapagos

(Same as ANTHRO 10SC) Lessons from the study of flora and fauna in Galapagos from Darwin's time to today. Adaptation, sexual selection, speciation, and adaptive radiation. The challenges the Galapagos Islands pose for conservation.

2 units, Aut (*Durham, W*)

### HUMBIO 19SC. Parks and Peoples: Dilemmas of Protected Area Conservation in East Africa

(Same as ANTHRO 12SC) A September Studies course, offered in a special session before Autumn Quarter. Students participating in this course will have it added to their Autumn study list in late November. Pros and cons of parks and protected areas; the dilemma of achieving conservation in a way that creates local community benefits and is socially just. Case study approach to study protected area (PA) approaches, proponents, objectives, successes, benefits, costs, ways to increase compatibility of the interests of parks and people. Final paper on some aspect of conservation dilemmas in East Africa and presentation of paper.

2 units, Aut (*Staff*)

### HUMBIO 20SC. The Colorado River: Water in the West as Seen from a Raft in the Grand Canyon

(Same as EARTHSYS 13SC, HISTORY 23SC) Expeditionary-style seminar spending 14 days rafting 225 miles through the Grand Canyon while studying the law, economics, politics, ecology, hydrology, history, literature, and art of the Colorado River. Students learn about the river through a variety of disciplines. Immersion in the grand subject of water in the West and sustainability, the focus of a major interdisciplinary research initiative of the Bill Lane Center for the American West and the Woods Institute for the Environment at Stanford.

2 units, Aut (*Kennedy, D; Thompson, B; Ardoin, N; Freyberg, D*)

## MICROBIOLOGY AND IMMUNOLOGY SOPHOMORE COLLEGE COURSES

### MI 18SC. The Coming Influenza Pandemic

Examines the H1N1 influenza virus from molecular, clinical, societal, historical, demographic, economic, and political perspectives. Examines the unique genetic, epidemiological, virologic, and pathogenic features of the influenza virus that allow it to continue to reinvent itself and re-emerge on an annual basis. Discusses past successes and failures, the current status of influenza, and the critical factors to consider to avert the coming influenza pandemic. Explores whether or not the lessons learned from influenza can be applied to other diseases. Includes guest lectures, field trips, student presentations.

2 units, Aut (*Siegel, R*)

## POLITICAL SCIENCE SOPHOMORE COLLEGE COURSES

### POLISCI 10SC. American Foreign Policy in the 21st Century

Investigation of foreign policy challenges and choices facing the United States. Topics include political considerations that influence the making and conduct of diplomacy, challenges to policy associated with the proliferation of weapons of mass destruction, international terrorism, failing and failed states, and regional, interstate, and intrastate conflict. Examination of how the changing distribution of power in the international system impacts the United States and its allies. Course includes a 48-hour simulation.

2 units, Aut (*Blacker, C*)

### POLISCI 22SC. The Face of Battle

Focus on the complexity of the process by which strategy is translated into tactical decisions by the officers and foot soldiers on the field of battle. Focus on three battles in American history: Gettysburg (July 1863), the Battle of Little Bighorn (June 1876), and the Battle of Lozano Ridge in Afghanistan (November 2003). Reading of major works on the battles and the conflicts in which they occurred; travel to Gettysburg, Pennsylvania, and the Little Bighorn battlefield in Montana. Extensive research on individual participants at Gettysburg and Little Bighorn.

2 units, Aut (*Sagan, S*)

### POLISCI 24SC. American Conservatism and its Critics in the 21st Century

Study of conservative political and economic thought from the 20th century onward and the influence of these ideas about freedom and capitalism on contemporary U.S. politics and public policy. Reading of works of leading conservative thinkers and their critics, including liberals and fellow conservatives, and evaluation of the strength of conservative responses to those criticisms. Study of public policy issues (tax policy, entitlement policy, health care policy) facing the U.S. and evaluation of conservative and liberal policy solutions to these problems.

2 units, Aut (*Staff*)

## PSYCHOLOGY SOPHOMORE COLLEGE COURSES

### PSYCH 12SC. The Cultural Shaping of Emotion

A September Studies course, offered in a special session before Autumn Quarter. Students participating in this course will have it added to their Autumn study list in late November. Examination of how culture influences the socialization of emotion, perceptions of emotion, and the meaning of happiness. Implications of cultural differences in emotion for health and education. Discussion of popular books and memoirs as well as empirical research from psychology, anthropology, sociology, and psychiatry. Hands-on experience with different methods of conducting research on culture and emotion.

2 units, Aut (*Staff*)

# SPANISH LANGUAGE (SPANLANG) COURSES

## UNDERGRADUATE COURSES IN SPANISH LANGUAGE

Primarily for undergraduates; graduate students may enroll with consent of adviser.

### **SPANLANG 1. First-Year Spanish, First Quarter**

Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Influences shaping the production of oral and written texts in the Spanish- and English-speaking world.

5 units, Aut (Casas Roige, R), Win (Del Carpio, C), Spr (Reinhold, V)

### **SPANLANG 1A. Accelerated First-Year Spanish, Part 1**

Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Spanish, or those with a strong background in another Romance language. 2A fulfills the University language requirement. Prerequisite: written and oral placement tests.

5 units, Aut (Ortiz Cuevas, C), Win (Ortiz Cuevas, C)

### **SPANLANG 2. First-Year Spanish, Second Quarter**

Continuation of 1. Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Prerequisite 1.

5 units, Aut (Nissler, P), Win (Spragins, E), Spr (Del Carpio, C)

### **SPANLANG 2A. Accelerated First-Year Spanish, Part 2**

Completes first-year sequence in two rather than three quarters. For students with previous knowledge of Spanish, or those with a strong background in another Romance language. 2A fulfills the University language requirement. Prerequisite: written and oral placement tests. Continuation of 1A. Fulfills the University language requirement. Prerequisite: 1A or written and oral placement tests.

5 units, Win (Won, H), Spr (Ortiz Cuevas, C)

### **SPANLANG 3. First-Year Spanish, Third Quarter**

Continuation of 2. Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Prerequisite 2. Fulfills the University language requirement.

5 units, Aut (Catoira, L), Win (Nissler, P), Spr (Spragins, E)

### **SPANLANG 5A. Intensive First-Year Spanish, Part A**

Same as SPANLANG 1. Goal is to engage in interactions with Spanish speakers in socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Only Stanford graduate students restricted to 9 units may register for 205A,B,C.

5 units, Sum (Staff)

### **SPANLANG 5B. Intensive First-Year Spanish, Part B**

Same as SPANLANG 2. Continuation of 5A. Goal is to engage in interactions with Spanish speakers in socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Only Stanford graduate students restricted to 9 units may register for 205A,B,C. Prerequisite 1 or 5A.

5 units, Sum (Staff)

### **SPANLANG 5C. Intensive First-Year Spanish, Part C**

Same as SPANLANG 3. Continuation of 5B. Continuation of 5A. Goal is to engage in interactions with Spanish speakers in socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Only Stanford graduate students restricted to 9 units may register for 205A,B,C. Prerequisite 2 or 5B. Fulfills the University Foreign Language Requirement.

5 units, Sum (Staff)

### **SPANLANG 10. Beginning Oral Communication**

Additional pronunciation, vocabulary, and speaking skills. May be repeated once for credit. Prerequisite: one quarter of Spanish, demonstrated oral proficiency above the novice level; may be taken concurrently with 2, 2A, or 3.

2 units, Aut (Brates, V), Win (Brates, V), Spr (Corso, I)

### **SPANLANG 11C. Second-Year Spanish: Cultural Emphasis, First Quarter**

Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socioculturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: one year of college Spanish or equivalent.

4-5 units, Aut (Garcia-Garcia, C), Win (Molitoris, J), Spr (Sanchez, K)

### **SPANLANG 11R. Second-Year Spanish: Emphasis on International Relations, First Quarter**

Sequence integrating geopolitics and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language, international relations, and socioeconomics of the Spanish-speaking world. Prerequisite: one year of college Spanish or equivalent.

4-5 units, Aut (Brates, V)

### **SPANLANG 12C. Second-Year Spanish: Cultural Emphasis, Second Quarter**

Continuation of 11C. Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socioculturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: 11 or equivalent.

4-5 units, Aut (Urruela, M), Win (Miano, A), Spr (Malik, C)

### **SPANLANG 12R. Second-Year Spanish: Emphasis on International Relations, Second Quarter**

Continuation of 11R. Sequence integrating geopolitics and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language, international relations, and socioeconomics of the Spanish-speaking world. Prerequisite: Prerequisite 11R or equivalent.

4-5 units, Win (Brates, V)

### **SPANLANG 13C. Second-Year Spanish: Cultural Emphasis, Third Quarter**

Continuation of 12C. Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socioculturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: 12 or equivalent.

4-5 units, Aut (Catoira, L), Win (Urruela, M), Spr (Urruela, M)

### **SPANLANG 13R. Second-Year Spanish: Emphasis on International Relations, Third Quarter**

Continuation of 12R. Sequence integrating geopolitics and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language, international relations, and socioeconomics of the Spanish-speaking world. Prerequisite: 12R or equivalent. Fulfills the IR major language requirement.

4-5 units, Spr (Brates, V)

### **SPANLANG 15. Intermediate Oral Communication**

Emphasis is on interaction in Spanish locally and globally. Regional vocabularies and cultures at home and abroad. Interaction with local native Spanish speakers and communities globally via the Internet. May be repeated once for credit. Prerequisite: first-year Spanish and demonstrated oral proficiency above the low intermediate level.

3 units, Aut (Gonzalez Flores, F), Win (Gonzalez Flores, F), Spr (Gonzalez Flores, F)

### **SPANLANG 15S. Intermediate Oral Communication**

Emphasis is on interaction in Spanish locally and globally. Regional vocabularies and cultures at home and abroad. Interaction with local native Spanish speakers and communities globally via the Internet. May be repeated once for credit. Prerequisite: first-year Spanish and demonstrated oral proficiency above the low intermediate level.

3 units, Sum (Staff)

**SPANLANG 21B. Second-Year Spanish for Heritage Language Students, First Quarter**

Emphasis is on ability to communicate orally and in writing. Spelling and the written accent. Goal is to understand, interpret, and analyze texts, movies, radio, and television. Written language skills include rules for editing written language. Third quarter focus is on the development of written and oral styles and registers used in more formal settings.

3-5 units, Aut (Sierra, A)

**SPANLANG 22B. Second-Year Spanish for Heritage Language Students, Second Quarter**

Second-Year Spanish for Heritage Language Students, Second Quarter - Continuation of 21B. Emphasis is on ability to communicate orally and in writing. Continuation of 21B. Spelling and the written accent. Goal is to understand, interpret, and analyze texts, movies, radio, and television. Written language skills include rules for editing written language. Prerequisite: 21B or equivalent.

3-5 units, Win (Sierra, A)

**SPANLANG 23B. Second-Year Spanish for Heritage Language Students, Third Quarter**

Emphasis is on ability to communicate orally and in writing. Spelling and the written accent. Goal is to understand, interpret, and analyze texts, movies, radio, and television. Written language skills include rules for editing written language. Third quarter Focus is on the development of written and oral styles and registers used in more formal settings. Prerequisite: 22B or equivalent.

3-5 units, Spr (Sierra, A)

**SPANLANG 25A. Intensive Second-Year Spanish, Part A**

Same as SPANLANG 11. Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socioculturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: one year of college Spanish or equivalent.

4 units, Sum (Staff)

**SPANLANG 25B. Intensive Second-Year Spanish, Part B**

Same as SPANLANG 12. Continuation of 25A. Prerequisite: 25A or equivalent.

4 units, Sum (Staff)

**SPANLANG 25C. Intensive Second-Year Spanish, Part C**

Same as SPANLANG 13. Continuation of 25B. Prerequisite: 25B or equivalent.

4 units, Sum (Staff)

**SPANLANG 60A. Beginning Spanish Conversation**

(AU)

1 unit, Aut (Urruela, M)

**SPANLANG 60B. Intermediate Spanish Conversation**

(AU)

1 unit, Win (Urruela, M)

**SPANLANG 60C. Advanced Spanish Conversation**

(AU)

1 unit, Spr (Urruela, M)

**SPANLANG 60T. Teaching Spanish Conversation**

1 unit, Aut (Urruela, M), Win (Urruela, M), Spr (Urruela, M)

**SPANLANG 99. Language Specials**

May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SPANLANG 100. Advanced Oral Communication**

For students who have completed second-year Spanish or who have oral skills above the intermediate level. Interactive activities require students to persuade, analyze, support opinions, and gather and interpret others' points of view. Focus is on vocabulary enrichment and idiomatic expressions. Cultural, literary, political, and journalistic readings. May be repeated once for credit. Prerequisite: 13 or equivalent.

3 units, Aut (Junguito Camacho, M), Win (Junguito Camacho, M), Spr (Catoira, L)

**SPANLANG 101. The Structure of Spanish**

Criteria and skills to analyze Spanish grammatical structure. Identification of word functions in sentences and texts, types of sentences, and terminology. Structure of nouns, adjectives, and verbs, and their relationship with meaning. The differences

between Spanish grammar as a formal system and in everyday life. Prerequisite: 13C, 13R, 23B, or equivalent.

3-5 units, Aut (Miano, A)

**SPANLANG 102. Composition and Writing Workshop**

Individual development of the ability to write in Spanish. Emphasis is on style and diction, and on preparing and writing essays on literary topics. Non-Spanish majors or minors may choose topics more closely related to their studies for projects.

Prerequisite: two years of college Spanish or equivalent. WIM

3-5 units, Aut (Brates, V), Win (Miano, A), Spr (Brates, V)

**SPANLANG 102B. Composition and Writing Workshop for Heritage Language Students**

For students with a good understanding of written accents, spelling, and syntax. Focus is on the craft of writing with emphasis on brainstorming, planning, outlining, drafting, revising, style, diction, and editing. Writing essays on literary topics. Non-Spanish majors or minors may choose topics related to their studies.

Prerequisite: 23B or equivalent.

3-5 units, not given this year

**SPANLANG 121M. Spanish for Medical Students**

(Same as HRP 280) First quarter of three-quarter series. Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on taking the medical history. Topics include the human body, hospital procedures, diagnostics, food, and essential doctor-patient phrases when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.

2 units, Aut (Corso, I)

**SPANLANG 122M. Spanish for Medical Students**

(Same as HRP 281) Second quarter of three-quarter series. Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on performing a physical examination. Topics include the human body, hospital procedures, diagnostics, food, and essential doctor-patient phrases when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.

2 units, Win (Corso, I)

**SPANLANG 123M. Spanish for Medical Students**

(Same as HRP 282) Third quarter of three-quarter series. Goal is a practical and culturally appropriate command of spoken Spanish. Emphasis is on different specialties and medical conditions. Topics include the human body, hospital procedures, diagnostics, food, and essential doctor-patient phrases when dealing with Spanish-speaking patients. Series can be taken independently, depending on the level of prior knowledge.

2 units, Spr (Staff)

**SPANLANG 131M. Spanish for Heritage and Foreign Language Pre-Med and Public Health Students**

For pre-med or public health students who grew up in homes where Spanish is spoken or for students who possess a considerable command of Spanish. Focus is on developing the ability to provide information on health-related topics to Spanish speakers in the U.S. Students participate in the organization and delivery of information on preventive health care in a workshop setting to a Spanish-speaking community.

3-4 units, not given this year

**SPANLANG 199. Individual Reading**

May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**GRADUATE COURSES IN SPANISH LANGUAGE**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**SPANLANG 1G. Accelerated First-Year Business Spanish, Part 1**

For GSB students only. Limited enrollment.

4 units, Win (Reinhold, V)

**SPANLANG 2G. Accelerated First-Year Business Spanish, Part 2**

Continuation of 1G. For GSB students only. Limited enrollment.

4 units, Spr (Reinhold, V)

### SPANLANG 3G. Spanish for Business Professionals

For GSB students only. Limited enrollment.

4 units, Aut (*Reinhold, V*)

### SPANLANG 205A. Intensive First-Year Spanish for Stanford Grads, Part A

Same as SPANLANG 1. For Stanford graduate students only. Goal is to engage in interactions with Spanish speakers using socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Stanford graduate students restricted to 9 units may take 205A,B,C for a total of 9 units or 2 of the courses for a total of 9 units.

3-5 units, Sum (*Staff*)

### SPANLANG 205B. Intensive First-Year Spanish for Stanford Grads, Part B

Same as SPANLANG 2. Continuation of 205A. For Stanford graduate students only. Goal is to engage in interactions with Spanish speakers using socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Stanford graduate students restricted to 9 units may take 205A,B,C for a total of 9 units or 2 of the courses for a total of 9 units. Prerequisite 205A or equivalent.

3-5 units, Sum (*Staff*)

### SPANLANG 205C. Intensive First-Year Spanish for Stanford Grads, Part C

Same as SPANLANG 3. Continuation of 205B. For Stanford graduate students only. Goal is to engage in interactions with Spanish speakers using socially and culturally appropriate forms. Social and cultural influences shaping the production of oral and written texts in the Spanish- and English-speaking world. Stanford graduate students restricted to 9 units may take 205A,B,C for a total of 9 units or 2 of the courses for a total of 9 units. Prerequisite 205B or equivalent.

3-5 units, Sum (*Staff*)

### SPANLANG 225A. Intensive Second-Year Spanish for Stanford Grads, Part A

Same as SPANLANG 11. For Stanford Graduate students restricted to 9 units. Sequence integrating culture and language. Emphasis is on advanced proficiency in oral and written discourse including presentational language and socioculturally appropriate discourse in formal and informal, academic, and professional contexts. Prerequisite: one year of college Spanish or equivalent.

3-4 units, Sum (*Staff*)

### SPANLANG 225B. Intensive Second-Year Spanish for Stanford Grads, Part B

Same as SPANLANG 12. Continuation of 225A. For Stanford Graduate students restricted to 9 units. Prerequisite 225A or equivalent.

3-4 units, Sum (*Staff*)

### SPANLANG 225C. Intensive Second-Year Spanish for Stanford Grads, Part C

Same as SPANLANG 13. Continuation of 225B. For Stanford Graduate students restricted to 9 units. Prerequisite 225B or equivalent.

3-4 units, Sum (*Staff*)

### SPANLANG 250. Reading Spanish

Reading Spanish - For students who have already taken Spanish for at least one year or have superior reading proficiency in another Romance language. Emphasis is on academic texts. Fulfills University reading requirements for advanced degrees if students earn a grade of 'B.'

3 units, Aut (*Brates, V*)

### SPANLANG 394. Graduate Studies in Spanish Conversation

Prerequisite: consent of instructor.

1-3 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

### SPANLANG 395. Graduate Studies in Spanish

Prerequisite: consent of instructor.

2-5 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*)

## SPECIAL LANGUAGE PROGRAM (SPECLANG) COURSES

### UNDERGRADUATE COURSES IN SPECIAL LANGUAGE PROGRAM

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### SPECLANG 75. Greek Culture, Ideals, and Themes

Introduction to Greek culture and its global influence in a social historical context, through images from its past and institutions in contemporary Greek society. Limited enrollment. GER:DB-Hum, EC-GlobalCom

3 units, Spr (*Prionas, E*)

#### SPECLANG 104B. Beginning Albanian, Second Quarter

3 units, not given this year

#### SPECLANG 104C. Beginning Albanian, Third Quarter

3 units, not given this year

#### SPECLANG 105A. Intermediate Albanian, First Quarter

3 units, Aut (*Bacaj, T*)

#### SPECLANG 105B. Intermediate Albanian, Second Quarter

3 units, Win (*Bacaj, T*)

#### SPECLANG 105C. Intermediate Albanian, Third Quarter

Continuation of 105B. Prerequisite 105B or consent of instructor.

3 units, Spr (*Bacaj, T*)

#### SPECLANG 106A. Advanced Albanian, First Quarter

3 units, Win (*Bacaj, T*)

#### SPECLANG 106B. Advanced Albanian, Second Quarter

3 units, Spr (*Bacaj, T*)

#### SPECLANG 106C. Advanced Albanian, Third Quarter

3 units, not given this year

#### SPECLANG 107A. Beginning Bulgarian, First Quarter

3 units, not given this year

#### SPECLANG 107B. Beginning Bulgarian, Second Quarter

3 units, not given this year

#### SPECLANG 107C. Beginning Bulgarian, Third Quarter

3 units, not given this year

#### SPECLANG 112A. Intermediate Hungarian Conversation, First Quarter

3 units, Aut (*Szoke, E*)

#### SPECLANG 112B. Intermediate Hungarian Conversation, Second Quarter

3 units, Win (*Szoke, E*)

#### SPECLANG 112C. Intermediate Hungarian Conversation, Third Quarter

3 units, not given this year

#### SPECLANG 123C. Beginning Armenian, Third Quarter

Continuation of 123B.

3 units, not given this year

#### SPECLANG 129A. Beginning Ukrainian, First Quarter

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Ukrainian culture.

3 units, Aut (*Jarboe, L*)

#### SPECLANG 129B. Beginning Ukrainian, Second Quarter

Continuation of 129A.

3 units, Win (*Jarboe, L*)

#### SPECLANG 129C. Beginning Ukrainian, Third Quarter

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Ukrainian culture.

3 units, Spr (*Jarboe, L*)

#### SPECLANG 130A. Intermediate Ukrainian, First Quarter

Continuation of 129C.

3 units, Aut (*Jarboe, L*)

#### SPECLANG 130B. Intermediate Ukrainian, Second Quarter

Continuation of 130A.

3 units, Win (*Jarboe, L*)

**SPECLANG 130C. Intermediate Ukrainian, Third Quarter**

Continuation of 130B.  
3 units, Spr (Jarboe, L)

**SPECLANG 131A. Advanced Ukrainian, First Quarter**

3 units, Aut (Jarboe, L)

**SPECLANG 131B. Advanced Ukrainian, Second Quarter**

3 units, Win (Jarboe, L)

**SPECLANG 131C. Advanced Ukrainian, Third Quarter**

3 units, Spr (Staff)

**SPECLANG 138A. Beginning Navajo, First Quarter**

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Navajo culture.

4 units, Win (Staff)

**SPECLANG 144A. Beginning Tagalog, First Quarter**

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Tagalog culture.

3 units, Aut (De Ramos, M)

**SPECLANG 144B. Beginning Tagalog, Second Quarter**

Continuation of 144A.

3 units, Win (Staff)

**SPECLANG 144C. Beginning Tagalog, Third Quarter**

Continuation of 144B.

3 units, Spr (Gotico, S)

**SPECLANG 145A. Intermediate Tagalog, First Quarter**

Grammar structures and vocabulary through authentic materials. Cultural proficiency. Fulfills the University language requirement.

3 units, Aut (De Ramos, M)

**SPECLANG 145B. Intermediate Tagalog, Second Quarter**

Continuation of 145A.

3 units, Win (Staff)

**SPECLANG 145C. Intermediate Tagalog, Third Quarter**

Continuation of 145B.

3 units, Spr (Gotico, S)

**SPECLANG 146A. Advanced Tagalog, First Quarter**

3 units, Aut (De Ramos, M)

**SPECLANG 146B. Advanced Tagalog, Second Quarter**

3 units, Win (Staff)

**SPECLANG 146C. Advanced Tagalog, Third Quarter**

3 units, Spr (Gotico, S)

**SPECLANG 150A. Beginning Vietnamese, First Quarter**

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Vietnamese culture.

3 units, Aut (Nguyen, D)

**SPECLANG 150B. Beginning Vietnamese, Second Quarter**

Continuation of 150A.

3 units, Win (Nguyen, D)

**SPECLANG 150C. Beginning Vietnamese, Third Quarter**

Continuation of 150B.

3 units, Spr (Nguyen, D)

**SPECLANG 151A. Intermediate Vietnamese, First Quarter**

Continuation of 150C. Fulfills the University language requirement.

3 units, Aut (Nguyen, D)

**SPECLANG 151B. Intermediate Vietnamese, Second quarter**

Continuation of 151A.

3 units, Win (Nguyen, D)

**SPECLANG 151C. Intermediate Vietnamese, Third Quarter**

Continuation of 151B.

3 units, Spr (Nguyen, D)

**SPECLANG 152A. Beginning Hindi, First Quarter**

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Hindi culture.

5 units, Aut (Staff)

**SPECLANG 152B. Beginning Hindi, Second Quarter**

Continuation of 152A.

5 units, Win (Staff)

**SPECLANG 152C. Beginning Hindi, Third Quarter**

Continuation of 152B. Fulfills the University language requirement.

5 units, Spr (Desai, S)

**SPECLANG 153A. Intermediate Hindi, First Quarter**

Second year sequence requires completion of first year or consent of the instructor. Focus on expanding all language skills, mastering grammar patterns and new vocabulary through authentic readings, writing essays, oral presentations and the use of multimedia-based materials. Focus on cultural proficiency.

4 units, Aut (Staff)

**SPECLANG 153B. Intermediate Hindi, Second Quarter**

Continuation of 153A.

4 units, Win (Staff)

**SPECLANG 153C. Intermediate Hindi, Third Quarter**

Continuation of 153B.

4 units, Spr (Desai, S)

**SPECLANG 154A. Advanced Hindi, First Quarter**

Continuation of 153C.

4 units, Aut (Staff)

**SPECLANG 154B. Advanced Hindi, Second Quarter**

Continuation of 154A.

4 units, Win (Staff)

**SPECLANG 154C. Advanced Hindi, Third Quarter**

Continuation of 154B.

4 units, Spr (Sancheti, P)

**SPECLANG 156A. Beginning Indonesian, First Quarter**

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Indonesian culture.

3 units, not given this year

**SPECLANG 156B. Beginning Indonesian, Second Quarter**

Continuation of 156A.

3 units, not given this year

**SPECLANG 156C. Beginning Indonesian, Third Quarter**

Continuation of 156B.

3 units, not given this year

**SPECLANG 157A. Intermediate Indonesian, First Quarter**

Continuation of 156C. Fulfills the University language requirement.

3 units, not given this year

**SPECLANG 157B. Intermediate Indonesian, Second Quarter**

Continuation of 157A.

3 units, not given this year

**SPECLANG 164A. Beginning Czech, First Quarter**

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Czech culture.

3 units, Aut (Dusatko, J)

**SPECLANG 164B. Beginning Czech, Second Quarter**

Continuation of 164A.

3 units, Win (Dusatko, J)

**SPECLANG 164C. Beginning Czech, Third Quarter**

Continuation of 164B.

3 units, Spr (Dusatko, J)

**SPECLANG 165A. Intermediate Czech, First Quarter**

Continuation of 164C. Fulfills the University language requirement.

3 units, Aut (Dusatko, J)

**SPECLANG 165B. Intermediate Czech, Second Quarter**

Continuation of 165A.

3 units, Win (Dusatko, J)

**SPECLANG 165C. Intermediate Czech, Third Quarter**

Continuation of 165B.

3 units, Spr (Dusatko, J)

**SPECLANG 166A. Advanced Czech, First Quarter**

(Staff)

1-4 units, Aut (Dusatko, J)

**SPECLANG 166C. Advanced Czech, Third Quarter**

1-4 units, Spr (Dusatko, J)

**SPECLANG 167A. Beginning Polish, First Quarter**

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Polish culture.

3 units, Aut (Szudelski, G)

**SPECLANG 167B. Beginning Polish, Second Quarter**

Continuation of 167A.  
3 units, Win (Szudelski, G)

**SPECLANG 167C. Beginning Polish, Third Quarter**

Continuation of 167B.  
3 units, Spr (Szudelski, G)

**SPECLANG 168A. Intermediate Polish, First Quarter**

Continuation of 167C. Fulfills the University language requirement.  
3 units, Aut (Szudelski, G)

**SPECLANG 168B. Intermediate Polish, Second Quarter**

Continuation of 168A.  
3 units, Win (Szudelski, G)

**SPECLANG 168C. Intermediate Polish, Third Quarter**

Continuation of 168B.  
3 units, Spr (Szudelski, G)

**SPECLANG 169A. Advanced Polish, First Quarter**

(Staff)  
3 units, Aut (Szudelski, G)

**SPECLANG 169B. Advanced Polish, Second Quarter**

3 units, Win (Szudelski, G)

**SPECLANG 169C. Advanced Polish, Third Quarter**

3 units, Spr (Szudelski, G)

**SPECLANG 170A. Beginning Modern Greek, First Quarter**

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Greek culture.  
4 units, Aut (Prionas, E)

**SPECLANG 170B. Beginning Modern Greek, Second Quarter**

Continuation of 170A.  
4 units, Win (Prionas, E)

**SPECLANG 170C. Beginning Modern Greek, Third Quarter**

Continuation of 170B. Emphasis on speaking, reading, writing and listening. Student-centered, interactive approach focuses on mastering the basic grammar structures and basic vocabulary through a multimodal approach. Introduction to the Greek culture. Fulfills the University language requirement.  
4 units, Spr (Prionas, E)

**SPECLANG 171B. Intermediate Modern Greek, Second Quarter**

Grammar structures and vocabulary through authentic materials. Cultural proficiency.  
4 units, Win (Prionas, E)

**SPECLANG 171C. Intermediate Modern Greek, Third Quarter**

Grammar structures and vocabulary through authentic materials. Cultural proficiency.  
4 units, Spr (Prionas, E)

**SPECLANG 172A. Modern Greek Language and Culture through Literature and Film, First Quarter**

Accelerated. Vocabulary enrichment through multimedia, online materials.  
4 units, not given this year

**SPECLANG 172B. Modern Greek Language and Culture through Literature and Film, Second Quarter**

Continuation of 172A.  
4 units, not given this year

**SPECLANG 172C. Modern Greek Language and Culture through Literature and Film, Third Quarter**

Accelerated. Vocabulary enrichment through multimedia, online materials.  
4 units, not given this year

**SPECLANG 173A. Beginning Hungarian, First Quarter**

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Hungarian culture.  
3 units, Aut (Szoke, E), Win (Szoke, E)

**SPECLANG 173B. Beginning Hungarian, Second Quarter**

Continuation of 173A.  
3 units, Win (Szoke, E)

**SPECLANG 173C. Beginning Hungarian, Third Quarter**

Emphasis on speaking, reading, writing and listening. Student-

centered, interactive approach focuses on mastering the basic grammar structures and basic vocabulary. Introduction to the Hungarian culture.

3 units, not given this year

**SPECLANG 174A. Beginning Quechua, First Quarter**

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Quechua culture.  
3 units, Aut (Fajardo, J)

**SPECLANG 174B. Beginning Quechua, Second Quarter**

Continuation of 174A.  
3 units, Win (Fajardo, J)

**SPECLANG 174C. Beginning Quechua, Third Quarter**

Continuation of 174B.  
3 units, not given this year

**SPECLANG 174C. Beginning Quechua - 3rd quarter**

3 units, Spr (Fajardo, J)

**SPECLANG 175A. Intermediate Quechua, Firsts Quarter**

Continuation of 174C. Fulfills the University Foreign Language Requirement.  
3 units, Aut (Staff)

**SPECLANG 175B. Intermediate Quechua, Second Quarter**

Continuation of 175A.  
3 units, Win (Staff)

**SPECLANG 175C. Intermediate Quechua, Third Quarter**

Continuation of 175B.  
3 units, Spr (Staff)

**SPECLANG 176B. Beginning Thai, Second Quarter**

Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Thai culture.  
3 units, not given this year

**SPECLANG 177A. Intermediate Thai, First Quarter**

Grammar structures and vocabulary through authentic materials. Cultural proficiency.  
3 units, not given this year

**SPECLANG 177B. Intermediate Thai, Second Quarter**

Grammar structures and vocabulary through authentic materials. Cultural proficiency.  
3 units, not given this year

**SPECLANG 177C. Intermediate Thai, Third Quarter**

Grammar structures and vocabulary through authentic materials. Cultural proficiency.  
3 units, not given this year

**SPECLANG 178A. Beginning Sign Language, First Quarter**

Comprehension and production skills; cultural awareness necessary for communication. Limited enrollment.  
4 units, Aut (Haas, C)

**SPECLANG 178B. Beginning Sign Language, Second Quarter**

continuation of 178A.  
4 units, Win (Haas, C)

**SPECLANG 178C. Beginning Sign Language, Third Quarter**

Continuation of 178B. Fulfills the University language requirement.  
4 units, Spr (Haas, C)

**SPECLANG 179A. Intermediate Sign Language, First Quarter**

Additional functional structures, lexical items, and history. Limited enrollment.  
4 units, Aut (Haas, C)

**SPECLANG 179B. Intermediate Sign Language, Second Quarter**

Continuation of 179A. Limited enrollment.  
4 units, Win (Haas, C)

**SPECLANG 179C. Intermediate Sign Language, Third Quarter**

Continuation of 179B. Limited enrollment.  
4 units, Spr (Haas, C)

**SPECLANG 182A. Intermediate Hungarian, First Quarter**

3 units, Aut (Szoke, E)

**SPECLANG 182B. Intermediate Hungarian, Second Quarter**

(Staff)  
3 units, Win (Szoke, E)

- SPECLANG 182C. Intermediate Hungarian, Third Quarter**  
(Staff)  
*3 units, Spr (Szoke, E)*
- SPECLANG 183A. Beginning Sanskrit, First Quarter**  
Sanskrit script and literary readings.  
*3 units, Aut (Porta, F)*
- SPECLANG 183B. Beginning Sanskrit, Second Quarter**  
Sanskrit script and literary readings.  
*3 units, Win (Porta, F)*
- SPECLANG 183C. Beginning Sanskrit, Third Quarter**  
Sanskrit script and literary readings.  
*3 units, Spr (Porta, F)*
- SPECLANG 186A. Beginning Serbo-Croatian, First Quarter**  
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Serb and Croat culture.  
*3 units, Aut (Rakicevic, B)*
- SPECLANG 186B. Beginning Serbo-Croatian, Second Quarter**  
Continuation of 186A.  
*3 units, Win (Rakicevic, B)*
- SPECLANG 186C. Beginning Serbo-Croatian, Third Quarter**  
Continuation of 186B.  
*3 units, Spr (Rakicevic, B)*
- SPECLANG 188A. Advanced Serbo-Croatian, First Quarter**  
*3 units, Aut (Rakicevic, B)*
- SPECLANG 188B. Advanced Serbo-Croatian, Second Quarter**  
*3 units, Win (Rakicevic, B)*
- SPECLANG 188C. Advanced Serbo-Croatian, Third Quarter**  
*3 units, Spr (Rakicevic, B)*
- SPECLANG 189A. Beginning Hawaiian, First Quarter**  
*4 units, Aut (Peralto, S)*
- SPECLANG 189B. Beginning Hawaiian, Second Quarter**  
*4 units, Win (Peralto, S)*
- SPECLANG 189C. Beginning Hawaiian, Third Quarter**  
*4 units, Spr (Peralto, S)*
- SPECLANG 192A. Beginning Kazakh, First Quarter**  
Grammatical structures, vocabulary, and sentence patterns through speaking, reading, writing, and listening. Kazakh culture.  
*3 units, Aut (Kunanbaeva, A)*
- SPECLANG 192B. Beginning Kazakh, Second Quarter**  
Continuation of 192A.  
*3 units, Win (Kunanbaeva, A)*
- SPECLANG 192C. Beginning Kazakh, Third Quarter**  
Continuation of 192B.  
*3 units, Spr (Kunanbaeva, A)*
- SPECLANG 193A. Intermediate Kazakh, First Quarter**  
Continuation of 192C. Fulfills the University language requirement.  
*3 units, Aut (Kunanbaeva, A)*
- SPECLANG 193B. Intermediate Kazakh, Second Quarter**  
Continuation of 193A.  
*3 units, Win (Kunanbaeva, A)*
- SPECLANG 193C. Intermediate Kazakh, Third Quarter**  
Continuation of 193B.  
*3 units, Spr (Kunanbaeva, A)*
- SPECLANG 198Q. Modern Greece in Film and Literature**  
(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Cultural and literary highlights. Filmmakers include Kakoyannis, Dassen, Boulmetis, Angelopoulos, and Scorsese; readings from Eugenides, Gage, Kavafis, Kazantzakis, Samarakis, Seferis, and Elytis. GER:DB-Hum, DB-Hum, EC-GlobalCom  
*3-5 units, Aut (Prionas, E)*
- SPECLANG 215A. Modern Greek for Heritage Language Learners, First Quarter**  
For students of Greek background. Sources include authentic texts, multimedia materials, and Greek media.  
*2-4 units, Aut (Prionas, E)*
- SPECLANG 215B. Modern Greek for Heritage Language Learners, Second Quarter**  
Continuation of 215A.  
*2-4 units, Win (Prionas, E)*
- SPECLANG 215C. Modern Greek for Heritage Language Learners, Third Quarter**  
Continuation of 215B.  
*2-4 units, not given this year*
- SPECLANG 224A. Advanced Vietnamese, First Quarter**  
Grammar structures and vocabulary through authentic materials. Cultural proficiency.  
*3 units, not given this year*
- SPECLANG 224B. Advanced Vietnamese, Second Quarter**  
Continuation of 224A.  
*3 units, not given this year*

- SPECLANG 240C. Advanced Uzbek, Third Quarter**  
Continuation of 240B.  
*3 units, Spr (Staff)*
- SPECLANG 241A. Ukrainian for Speakers of a Slavic Language, First Quarter**  
*3 units, Aut (Jarboe, L)*
- SPECLANG 241B. Ukrainian for Speakers of a Slavic Language, Second Quarter**  
Continuation of 241A.  
*3 units, Win (Jarboe, L)*
- SPECLANG 241C. Ukrainian for Speakers of a Slavic Language, Third Quarter**  
Continuation of 241B.  
*3 units, not given this year*
- SPECLANG 247. Introduction to Siouan Language & Culture I**  
introduction to the three dialects of the Siouan Language: Dakota, Nakota and Lakota. The focus will be on the Lakota dialect with accompanying notation on when it is appropriate to use the other two dialects. The method for teaching the Lakota dialect will be through the use of immersion techniques relying on cultural context, i.e. use of songs as poetry including current usage on Utube of Round Dance songs by today's youth to illustrate the adaptation of cultural ways to fit today's world. Use of a Dakota/Lakota grammar, Dakota/Lakota texts, and a basic introduction to a writing system that works for literacy. Definition of what oral culture means and the role of memory in the preservation of a way of life.  
*5 units, not given this year*
- SPECLANG 247A. Beginning Lakota, First Quarter**  
*4 units, Aut (Shaw, D)*

**SPECLANG 247B. Beginning Lakota, Second Quarter***4 units, Win (Staff)***SPECLANG 247C. Beginning Lakota, Third Quarter***4 units, Spr (Staff)***SPECLANG 248. Introduction to Siouan Language & Culture II**

Continuation of the Introduction to Siouan Language & Culture I. This course will take a more focused approach on one cultural aspect of Dakota/Nakota/Lakota culture through the analysis of Dakota/Nakota/Lakota words in the lyrics of songs sung in the Sundance as a focus of study in the continuing use of language in the Dakota/Nakota/Lakota culture.

*5 units, not given this year***SPECLANG 250A. Beginning Romanian, First Quarter***3 units, Aut (Negip-Schatt, S)***SPECLANG 250B. Beginning Romanian, Second Quarter***3 units, Win (Negip-Schatt, S)***SPECLANG 250C. Beginning Romanian, Third Quarter***3 units, Spr (Negip-Schatt, S)***SPECLANG 251A. Intermediate Kyrgyz, First Quarter**

Fulfills the University Foreign Language Requirement.

*3 units, Aut (Staff)***SPECLANG 262B. Intermediate Kyrgyz, Second Quarter**

Continuation of 262A.

*3 units, Win (Staff)***SPECLANG 262C. Intermediate Kyrgyz, Third Quarter**

Continuation of 262B.

*3 units, Spr (Staff)***GRADUATE COURSES IN SPECIAL LANGUAGE PROGRAM**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**SPECLANG 297. Directed Reading**

Prerequisite: consent of instructor.

*1-4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)***SPECLANG 395. Graduate Studies in Special Language**

Prerequisite: consent of instructor.

*1-4 units, Aut (Staff), Win (Staff), Spr (Staff)***STATISTICS (STATS) COURSES****UNDERGRADUATE COURSES IN STATISTICS**

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**STATS 42Q. Undergraduate Admissions to Selective Universities - a Statistical Perspective**

The goal is the building of a statistical model, based on applicant data, for predicting admission to selective universities. The model will consider factors such as gender, ethnicity, legacy status, public-private schooling, test scores, effects of early action, and athletics. Common misconceptions and statistical pitfalls are investigated. The applicant data are not those associated with any specific university.

*2 units, not given this year***STATS 47N. Breaking the Code?**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Cryptography and its counterpart, cryptanalysis or code breaking. How the earliest cryptanalysts used statistical tools to decrypt messages by uncovering recurring patterns. How such frequency-analysis tools have been used to analyze biblical texts to produce a Bible code, and to detect genes in the human genome. Overview of codes and ciphers. Statistical tools useful for code breaking. Students use simple computer programs to apply these tools to break codes and explore applications to various kinds of data. GER:DB-Math

*3 units, Aut (Holmes, S)***STATS 50. Mathematics of Sports**

(Same as MCS 100) The use of mathematics, statistics, and probability in the analysis of sports performance, sports records, and strategy. Topics include mathematical analysis of the physics of sports and the determinations of optimal strategies. New diagnostic statistics and strategies for each sport. Corequisite: STATS 116. GER:DB-Math

*3 units, Aut (Cover, T)***STATS 60. Introduction to Statistical Methods: Precalculus**

(Same as PSYCH 10, STATS 160) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages. GER:DB-Math

*5 units, Aut (Walther, G), Win (Thomas, E), Spr (Staff), Sum (Staff)***STATS 110. Statistical Methods in Engineering and the Physical Sciences**

Introduction to statistics for engineers and physical scientists. Topics: descriptive statistics, probability, interval estimation, tests of hypotheses, nonparametric methods, linear regression, analysis of variance, elementary experimental design. Prerequisite: one year of calculus. GER:DB-Math

*4-5 units, Aut (Staff), Sum (Staff)***STATS 116. Theory of Probability**

Probability spaces as models for phenomena with statistical regularity. Discrete spaces (binomial, hypergeometric, Poisson). Continuous spaces (normal, exponential) and densities. Random variables, expectation, independence, conditional probability. Introduction to the laws of large numbers and central limit theorem. Prerequisites: MATH 52 and familiarity with infinite series, or equivalent. GER:DB-Math

*3-5 units, Aut (Donoho, D), Spr (Romano, J), Sum (Staff)***STATS 141. Biostatistics**

(Same as BIO 141) Introductory statistical methods for biological data: describing data (numerical and graphical summaries); introduction to probability; and statistical inference (hypothesis tests and confidence intervals). Intermediate statistical methods: comparing groups (analysis of variance); analyzing associations (linear and logistic regression); and methods for categorical data (contingency tables and odds ratio). Course content integrated with statistical computing in R. GER:DB-Math

4-5 units, Aut (Staff)

### STATS 166. Computational Biology

(Same as BIOMEDIN 366, STATS 366) Course is designed to introduce students from the mathematical, physical and engineering sciences to selected current issues in computational biology and bioinformatics. Topics: Principles of gene expression and taxa abundance measurements by microarrays and sequencing. Kernel methods for graph gene interaction graph construction. Phylogenetic trees and their uses in microbiome studies. Computational nonparametric statistics for the analyses of real genomic studies. Assignments: weekly reading of papers and a final project.

3 units, Spr (Holmes, S)

### STATS 167. Probability: Ten Great Ideas About Chance

(Same as PHIL 166, PHIL 266, STATS 267) Foundational approaches to thinking about chance in matters such as gambling, the law, and everyday affairs. Topics include: chance and decisions; the mathematics of chance; frequencies, symmetry, and chance; Bayes great idea; chance and psychology; misuses of chance; and harnessing chance. Emphasis is on the philosophical underpinnings and problems. Prerequisite: exposure to probability or a first course in statistics at the level of STATS 60 or 116. GER:DB-Math

4 units, Spr (Diaconis, P; Skyrms, B)

### STATS 191. Introduction to Applied Statistics

Statistical tools for modern data analysis. Topics include regression and prediction, elements of the analysis of variance, bootstrap, and cross-validation. Emphasis is on conceptual rather than theoretical understanding. Applications to social/biological sciences. Student assignments/projects require use of the software package R. Recommended: 60, 110, or 141. GER:DB-Math

3-4 units, Win (Taylor, J)

### STATS 198. Practical Training

For students majoring in Mathematical and Computational Science only. Students obtain employment in a relevant industrial or research activity to enhance their professional experience.

1-3 units, Sum (Staff)

### STATS 199. Independent Study

For undergraduates.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN STATISTICS

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### STATS 160. Introduction to Statistical Methods: Precalculus

(Same as PSYCH 10, STATS 60) Techniques for organizing data, computing, and interpreting measures of central tendency, variability, and association. Estimation, confidence intervals, tests of hypotheses, t-tests, correlation, and regression. Possible topics: analysis of variance and chi-square tests, computer statistical packages.

5 units, Aut (Walther, G), Win (Thomas, E), Spr (Staff), Sum (Staff)

### STATS 200. Introduction to Statistical Inference

Modern statistical concepts and procedures derived from a mathematical framework. Statistical inference, decision theory; point and interval estimation, tests of hypotheses; Neyman-Pearson theory. Bayesian analysis; maximum likelihood, large sample theory. Prerequisite: 116.

3 units, Win (Walther, G), Sum (Staff)

### STATS 202. Data Mining and Analysis

Data mining is used to discover patterns and relationships in data. Emphasis is on large complex data sets such as those in very large databases or through web mining. Topics: decision trees, association rules, clustering, case based methods, and data visualization.

3 units, Aut (Taylor, J), Sum (Staff)

### STATS 203. Introduction to Regression Models and Analysis of Variance

Modeling and interpretation of observational and experimental data using linear and nonlinear regression methods. Model building and selection methods. Multivariable analysis. Fixed and random effects models. Experimental design. Pre- or corequisite:

200.

3 units, Win (Johnstone, I)

### STATS 205. Introduction to Nonparametric Statistics

Nonparametric analogs of the one- and two-sample t-tests and analysis of variance; the sign test, median test, Wilcoxon's tests, and the Kruskal-Wallis and Friedman tests, tests of independence. Nonparametric regression and nonparametric density estimation, modern nonparametric techniques, nonparametric confidence interval estimates.

3 units, not given this year

### STATS 206. Applied Multivariate Analysis

Introduction to the statistical analysis of several quantitative measurements on each observational unit. Emphasis is on concepts, computer-intensive methods. Examples from economics, education, geology, psychology. Topics: multiple regression, multivariate analysis of variance, principal components, factor analysis, canonical correlations, multidimensional scaling, clustering. Pre- or corequisite: 200.

3 units, not given this year

### STATS 207. Introduction to Time Series Analysis

Time series models used in economics and engineering. Trend fitting, autoregressive and moving average models and spectral analysis, Kalman filtering, and state-space models. Seasonality, transformations, and introduction to financial time series. Prerequisite: basic course in Statistics at the level of 200.

3 units, Spr (Donoho, D)

### STATS 208. Introduction to the Bootstrap

The bootstrap is a computer-based method for assigning measures of accuracy to statistical estimates. By substituting computation in place of mathematical formulas, it permits the statistical analysis of complicated estimators. Topics: nonparametric assessment of standard errors, biases, and confidence intervals; related resampling methods including the jackknife, cross-validation, and permutation tests. Theory and applications. Prerequisite: course in statistics or probability.

3 units, not given this year

### STATS 209. Understanding Statistical Models and their Social Science Applications

(Same as EDUC 260X, HRP 239) Critical examination of statistical methods in social science applications, especially for cause and effect determinations. Topics: path analysis, multilevel models, matching and propensity score methods, analysis of covariance, instrumental variables, compliance, longitudinal data, mediating and moderating variables. See <http://www-stat.stanford.edu/~rag/stat209>. Prerequisite: intermediate-level statistical methods

3 units, Win (Rogosa, D)

### STATS 211. Meta-research: Appraising Research Findings, Bias, and Meta-analysis

(Same as HRP 206, MED 206) Open to graduate, medical, and undergraduate students. Appraisal of the quality and credibility of research findings; evaluation of sources of bias. Meta-analysis as a quantitative (statistical) method for combining results of independent studies. Examples from medicine, epidemiology, genomics, ecology, social/behavioral sciences, education. Collaborative analyses. Project involving generation of a meta-research project or reworking and evaluation of an existing published meta-analysis. Prerequisite: knowledge of basic statistics.

3 units, Win (Olkin, I; Ioannidis, J)

### STATS 212. Applied Statistics with SAS

Data analysis and implementation of statistical tools in SAS. Topics: reading in and describing data, categorical data, dates and longitudinal data, correlation and regression, nonparametric comparisons, ANOVA, multiple regression, multivariate data analysis, using arrays and macros in SAS. Prerequisite: statistical techniques at the level of STATS 191 or 203; knowledge of SAS not required.

3 units, Sum (Staff)

### STATS 213. Introduction to Graphical Models

Multivariate Normal Distribution and Inference, Wishart distributions, graph theory, probabilistic Markov models, pairwise and global Markov property, decomposable graph, Markov equivalence, MLE for DAG models and undirected graphical

models, Bayesian inference for DAG models and undirected graphical models. Prerequisites: STATS 116, MATH 104 or equivalent class in linear algebra.

3 units, Aut (Rajaratnam, B; Ben-David, E)

### STATS 215. Statistical Models in Biology

Poisson and renewal processes, Markov chains in discrete and continuous time, branching processes, diffusion. Applications to models of nucleotide evolution, recombination, the Wright-Fisher process, coalescence, genetic mapping, sequence analysis. Theoretical material approximately the same as in STATS 217, but emphasis is on examples drawn from applications in biology, especially genetics. Prerequisite: 116 or equivalent.

3 units, Win (Siegmond, D)

### STATS 217. Introduction to Stochastic Processes

Discrete and continuous time Markov chains, poisson processes, random walks, branching processes, first passage times, recurrence and transience, stationary distributions. Non-Statistics masters students may want to consider taking STATS 215 instead. Prerequisite: STATS 116 or consent of instructor.

3 units, Win (Rajaratnam, B), Sum (Staff)

### STATS 218. Introduction to Stochastic Processes

Renewal theory, Brownian motion, Gaussian processes, second order processes, martingales.

3 units, Spr (Olshen, R), Sum (Staff)

### STATS 219. Stochastic Processes

(Same as MATH 136) Introduction to measure theory, Lp spaces and Hilbert spaces. Random variables, expectation, conditional expectation, conditional distribution. Uniform integrability, almost sure and Lp convergence. Stochastic processes: definition, stationarity, sample path continuity. Examples: random walk, Markov chains, Gaussian processes, Poisson processes, Martingales. Construction and basic properties of Brownian motion. Prerequisite: STATS 116 or MATH 151 or equivalent. Recommended: MATH 115 or equivalent.

3 units, Aut (Ding, J)

### STATS 221. Introduction to Mathematical Finance

Interest rate and discounted value. Financial derivatives, hedging, and risk management. Stochastic models of financial markets, introduction to Ito calculus and stochastic differential equations. Black-Scholes pricing of European options. Optimal stopping and American options. Prerequisites: MATH 53, STATS 116, or equivalents.

3-4 units, Sum (Staff)

### STATS 222. Statistical Methods for Longitudinal Data

(Same as EDUC 351A) Research designs and statistical procedures for time-ordered (repeated-measures) data. The analysis of longitudinal panel data is central to empirical research on learning and development. Topics: measurement of change, growth curve models, analysis of durations including survival analysis, experimental and non-experimental group comparisons, reciprocal effects, stability. See <http://www-stat.stanford.edu/~rag/stat222/>. Prerequisite: intermediate statistical methods.

2-3 units, Spr (Rogosa, D)

### STATS 237. Time Series Modeling and Forecasting

Box-Jenkins and Bayesian approaches. State-space and change-point models. Application to revenue prediction, forecasting product demand, and other real world problems. Development and assessment of models and forecasts in practical applications. Hands-on experience with real data.

3 units, Sum (Staff)

### STATS 239A. Workshop in Quantitative Finance

Topics of current interest.

1 unit, not given this year

### STATS 239B. Workshop in Quantitative Finance

Topics of current interest. May be repeated for credit.

1 unit, not given this year

### STATS 240. Statistical Methods in Finance

(SCPD students register for 240P.) Regression analysis and applications to investment models. Principal components and multivariate analysis. Likelihood inference and Bayesian methods. Financial time series. Estimation and modeling of volatilities. Statistical methods for portfolio management. Prerequisite: STATS 200 or equivalent.

3-4 units, Aut (Rajaratnam, B)

### STATS 240P. Statistical Methods in Finance

For SCPD students; see 240.

3 units, Aut (Rajaratnam, B)

### STATS 241. Financial Modeling Methodology and Applications

(SCPD students register for 241P.) Substantive and empirical modeling approaches in options and interest rate markets. Nonlinear least squares and nonparametric regression. Multivariate time series modeling and forecasting. Applications of canonical correlation analysis and cointegration. Statistical trading strategies and their evaluation. Prerequisite: 240 or equivalent.

3-4 units, Win (Lai, T)

### STATS 241P. Financial Modeling Methodology and Applications

For SCPD students; see 241.

3 units, Win (Lai, T)

### STATS 242. Algorithmic Trading and Quantitative Strategies

An introduction to financial trading strategies based on methods of statistical arbitrage that can be automated. Methodologies related to high frequency data and stylized facts on asset returns; models of order book dynamics and order placement, dynamic trade planning with feedback; momentum strategies, pairs trading. Emphasis on developing and implementing models that reflect the market and behavioral patterns. Prerequisite: STATS 240 or equivalent.

3 units, Sum (Staff)

### STATS 243. Statistical Models and Methods for Risk Management and Surveillance

(SCPD students register for 243P.) Market risk and credit risk, credit markets. Back testing, stress testing and Monte Carlo methods. Logistic regression, generalized linear models and generalized mixed models. Loan prepayment and default as competing risks. Survival and hazard functions, correlated default intensities, frailty and contagion. Risk surveillance, early warning and adaptive control methodologies. Banking and bank regulation, asset and liability management. Prerequisite: STATS 240 or equivalent.

3-4 units, Spr (Lai, T)

### STATS 243P. Statistical Models and Methods for Risk Management and Surveillance

For SCPD students; see 243.

3 units, Spr (Lai, T)

### STATS 250. Mathematical Finance

(Same as MATH 238) Stochastic models of financial markets. Forward and futures contracts. European options and equivalent martingale measures. Hedging strategies and management of risk. Term structure models and interest rate derivatives. Optimal stopping and American options. Corequisites: MATH 236 and 227 or equivalent.

3 units, Win (Papanicolaou, G)

### STATS 253. Spatial Statistics

(Same as STATS 352) Statistical descriptions of spatial variability, spatial random functions, grid models, spatial partitions, spatial sampling, linear and nonlinear interpolation and smoothing with error estimation, Bayes methods and pattern simulation from posterior distributions, multivariate spatial statistics, spatial classification, nonstationary spatial statistics, space-time statistics and estimation of time trends from monitoring data, spatial point patterns, models of attraction and repulsion. Applications to earth and environmental sciences, meteorology, astronomy, remote-sensing, ecology, materials.

3 units, not given this year

### STATS 260A. Workshop in Biostatistics

(Same as HRP 260A) Applications of statistical techniques to current problems in medical science.

1-2 units, Aut (Olshen, R; Sabatti, C)

### STATS 260B. Workshop in Biostatistics

(Same as HRP 260B) Applications of statistical techniques to current problems in medical science.

1-2 units, Win (Olshen, R; Sabatti, C)

**STATS 260C. Workshop in Biostatistics**

(Same as HRP 260C) Applications of statistical techniques to current problems in medical science.

1-2 units, Spr (Staff)

**STATS 261. Intermediate Biostatistics: Analysis of Discrete Data**

(Same as BIOMEDIN 233, HRP 261) Methods for analyzing data from case-control and cross-sectional studies: the 2x2 table, chi-square test, Fisher's exact test, odds ratios, Mantel-Haenzel methods, stratification, tests for matched data, logistic regression, conditional logistic regression. Emphasis is on data analysis in SAS. Special topics: cross-fold validation and bootstrap inference.

3 units, Win (Sainani, K)

**STATS 262. Intermediate Biostatistics: Regression, Prediction, Survival Analysis**

(Same as HRP 262) Methods for analyzing longitudinal data. Topics include Kaplan-Meier methods, Cox regression, hazard ratios, time-dependent variables, longitudinal data structures, profile plots, missing data, modeling change, MANOVA, repeated-measures ANOVA, GEE, and mixed models. Emphasis is on practical applications. Prerequisites: basic ANOVA and linear regression.

3 units, Spr (Staff)

**STATS 267. Probability: Ten Great Ideas About Chance**

(Same as PHIL 166, PHIL 266, STATS 167) Foundational approaches to thinking about chance in matters such as gambling, the law, and everyday affairs. Topics include: chance and decisions; the mathematics of chance; frequencies, symmetry, and chance; Bayes great idea; chance and psychology; misuses of chance; and harnessing chance. Emphasis is on the philosophical underpinnings and problems. Prerequisite: exposure to probability or a first course in statistics at the level of STATS 60 or 116.

4 units, Spr (Diaconis, P; Skyrms, B)

**STATS 270. A Course in Bayesian Statistics**

(Same as STATS 370) Advanced-level Bayesian statistics. Topics: Discussion of the mathematical and theoretical foundation for Bayesian inferential procedures. Examination of the construction of priors and the asymptotic properties of likelihoods and posterior densities. Discussion including but not limited to the case of finite dimensional parameter space. Prerequisite: familiarity with standard probability and multivariate distribution theory.

3 units, Win (Wong, W)

**STATS 290. Paradigms for Computing with Data**

Advanced programming and computing techniques to support projects in data analysis and related research. For Statistics graduate students and others whose research involves data analysis and development of associated computational software. Prerequisites: Programming experience including familiarity with R; computing at least at the level of CS 106; statistics at the level of STATS 110 or 141.

3 units, Win (Narasimhan, B; Chambers, J)

**STATS 297. Practical Training**

For students in the M.S. program in Financial Mathematics only. Students obtain employment in a relevant industrial or research activity to enhance their professional experience. May be repeated for credit once. Prerequisite: consent of adviser.

1-3 units, Aut (Lai, T), Win (Lai, T), Spr (Lai, T), Sum (Staff)

**STATS 298. Industrial Research for Statisticians**

Masters-level research as in 299, but must be conducted for an off-campus employer. Final report required. Prerequisite: enrollment in Statistics M.S. or Ph.D. program, prior to candidacy.

1-9 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**STATS 299. Independent Study**

For Statistics M.S. students only. Reading or research program under the supervision of a Statistics faculty member. May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**STATS 300. Advanced Topics in Statistics**

May be repeated for credit.

3 units, Sum (Staff)

**STATS 300A. Theory of Statistics**

Elementary decision theory; loss and risk functions, Bayes estimation; UMVU estimator, minimax estimators, shrinkage

estimators. Hypothesis testing and confidence intervals: Neyman-Pearson theory; UMP tests and uniformly most accurate confidence intervals; use of unbiasedness and invariance to eliminate nuisance parameters. Large sample theory: basic convergence concepts; robustness; efficiency; contiguity, locally asymptotically normal experiments; convolution theorem; asymptotically UMP and maximin tests. Asymptotic theory of likelihood ratio and score tests. Rank permutation and randomization tests; jackknife, bootstrap, subsampling and other resampling methods. Further topics: sequential analysis, optimal experimental design, empirical processes with applications to statistics, Edgeworth expansions, density estimation, time series.

2-3 units, Aut (Siegmund, D)

**STATS 300B. Theory of Statistics**

Elementary decision theory; loss and risk functions, Bayes estimation; UMVU estimator, minimax estimators, shrinkage estimators. Hypothesis testing and confidence intervals: Neyman-Pearson theory; UMP tests and uniformly most accurate confidence intervals; use of unbiasedness and invariance to eliminate nuisance parameters. Large sample theory: basic convergence concepts; robustness; efficiency; contiguity, locally asymptotically normal experiments; convolution theorem; asymptotically UMP and maximin tests. Asymptotic theory of likelihood ratio and score tests. Rank permutation and randomization tests; jackknife, bootstrap, subsampling and other resampling methods. Further topics: sequential analysis, optimal experimental design, empirical processes with applications to statistics, Edgeworth expansions, density estimation, time series.

2-4 units, Win (Johnstone, I)

**STATS 300C. Theory of Statistics**

Decision theory formulation of statistical problems. Minimax, admissible procedures. Complete class theorems (all minimax or admissible procedures are Bayes), Bayes procedures, conjugate priors, hierarchical models. Bayesian non parametrics: diaichlet, tail free, polya trees, bayesian sieves. Inconsistency of bayes rules.

2-4 units, Spr (Candes, E)

**STATS 302. Qualifying Exams Workshop**

Prepares Statistics Ph.D. students for the qualifying exams by reviewing relevant course topics and problem solving strategies.

3 units, Sum (Staff)

**STATS 303. PhD First Year Student Workshop**

For Statistics First Year PhD students only. Discussion of relevant topics in first year student courses, consultation with PhD advisor.

1 unit, Aut (Walther, G), Win (Walther, G), Spr (Walther, G), Sum (Staff)

**STATS 305. Introduction to Statistical Modeling**

Review of univariate regression. Multiple regression. Geometry, subspaces, orthogonality, projections, normal equations, rank deficiency, estimable functions and Gauss-Markov theorem. Computation via QR decomposition, Gramm-Schmidt orthogonalization and the SVD. Interpreting coefficients, collinearity, graphical displays. Fits and the Hat matrix, leverage & influence, diagnostics, weighted least squares and resistance. Model selection, Cp/Aic and crossvalidation, stepwise, lasso. Basis expansions, splines. Multivariate normal distribution theory. ANOVA: Sources of measurements, fixed and random effects, randomization. Emphasis on problem sets involving substantive computations with data sets. Prerequisites: consent of instructor, 116, 200, applied statistics course, CS 106A, MATH 114.

2-4 units, Aut (Owen, A)

**STATS 306A. Methods for Applied Statistics**

Regression modeling extended to categorical data. Logistic regression. Loglinear models. Generalized linear models. Discriminant analysis. Categorical data models from information retrieval and Internet modeling. Prerequisite: 305 or equivalent.

2-4 units, Win (Efron, B)

**STATS 306B. Methods for Applied Statistics: Unsupervised Learning**

Unsupervised learning techniques in statistics, machine learning, and data mining.

2-3 units, Spr (Tibshirani, R)

**STATS 310A. Theory of Probability**

(Same as MATH 230A) Mathematical tools: sigma algebras, measure theory, connections between coin tossing and Lebesgue

measure, basic convergence theorems. Probability: independence, Borel-Cantelli lemmas, almost sure and  $L_p$  convergence, weak and strong laws of large numbers. Large deviations. Weak convergence; central limit theorems; Poisson convergence; Stein's method. Prerequisites: 116, MATH 171.

2-4 units, Aut (Diaconis, P)

#### STATS 310B. Theory of Probability

(Same as MATH 230B) Conditional expectations, discrete time martingales, stopping times, uniform integrability, applications to 0-1 laws, Radon-Nikodym Theorem, ruin problems, etc. Other topics as time allows selected from (i) local limit theorems, (ii) renewal theory, (iii) discrete time Markov chains, (iv) random walk theory, (v) ergodic theory. Prerequisite: 310A or MATH 230A.

2-3 units, Win (Siegmund, D)

#### STATS 310C. Theory of Probability

(Same as MATH 230C) Continuous time stochastic processes: martingales, Brownian motion, stationary independent increments, Markov jump processes and Gaussian processes. Invariance principle, random walks, LIL and functional CLT. Markov and strong Markov property. Infinitely divisible laws. Some ergodic theory. Prerequisite: 310B or MATH 230B.

2-4 units, Spr (Dembo, A)

#### STATS 314. Advanced Statistical Methods

Topic this year is multiple hypothesis testing. The demand for new methodology for the simultaneous testing of many hypotheses as driven by modern applications in genomics, imaging, astronomy, and finance. High dimensionality: how tests of many hypotheses may be considered simultaneously. Classical techniques, and recent developments. Stepwise methods, generalized error rates such as the false discovery rate, and the role of resampling. May be repeated for credit.

2-3 units, not given this year

#### STATS 315A. Modern Applied Statistics: Learning

Overview of supervised learning. Linear regression and related methods. Model selection, least angle regression and the lasso, stepwise methods. Classification. Linear discriminant analysis, logistic regression, and support vector machines (SVMs). Basis expansions, splines and regularization. Kernel methods. Generalized additive models. Kernel smoothing. Gaussian mixtures and the EM algorithm. Model assessment and selection: crossvalidation and the bootstrap. Pathwise coordinate descent. Sparse graphical models. Prerequisites: STATS 305, 306A,B or consent of instructor.

2-3 units, Win (Hastie, T)

#### STATS 315B. Modern Applied Statistics: Data Mining

Two-part sequence. New techniques for predictive and descriptive learning using ideas that bridge gaps among statistics, computer science, and artificial intelligence. Emphasis is on statistical aspects of their application and integration with more standard statistical methodology. Predictive learning refers to estimating models from data with the goal of predicting future outcomes, in particular, regression and classification models. Descriptive learning is used to discover general patterns and relationships in data without a predictive goal, viewed from a statistical perspective as computer automated exploratory analysis of large complex data sets.

2-3 units, Spr (Friedman, J)

#### STATS 316. Stochastic Processes on Graphs

Local weak convergence, Gibbs measures on trees, cavity method, and replica symmetry breaking. Examples include random  $k$ -satisfiability, the assignment problem, spin glasses, and neural networks. Prerequisite: 310A or equivalent.

1-3 units, not given this year

#### STATS 317. Stochastic Processes

Semimartingales, stochastic integration, Ito's formula, Girsanov's theorem. Gaussian and related processes. Stationary/isotropic processes. Integral geometry and geometric probability. Maxima of random fields and applications to spatial statistics and imaging.

3 units, Spr (Taylor, J)

#### STATS 318. Modern Markov Chains

Tools for understanding Markov chains as they arise in applications. Random walk on graphs, reversible Markov chains, Metropolis algorithm, Gibbs sampler, hybrid Monte Carlo,

auxiliary variables, hit and run, Swedson-Wong algorithms, geometric theory, Poincare-Nash-Cheger-Log-Sobolov inequalities. Comparison techniques, coupling, stationary times, Harris recurrence, central limit theorems, and large deviations.

3 units, Spr (Candes, E)

#### STATS 319. Literature of Statistics

Literature study of topics in statistics and probability culminating in oral and written reports. May be repeated for credit.

1-3 units, Aut (Romano, J), Win (Rajaratnam, B)

#### STATS 320. Heterogeneous Data with Kernels

Mathematical and computational methods necessary to understanding analysis of heterogeneous data using generalized inner products and Kernels. For areas that need to integrate data from various sources, biology, environmental and chemical engineering, molecular biology, bioinformatics. Topics: Distances, inner products and duality. Multivariate projections. Complex heterogeneous data structures (networks, trees, categorical as well as multivariate continuous data). Canonical correlation analysis, canonical correspondence analysis. Kernel methods in Statistics. Representer theorem. Kernels on graphs. Kernel versions of standard statistical procedures. Data cubes and tensor methods.

3 units, not given this year

#### STATS 321. Modern Applied Statistics: Transposable Data

Topics: clustering, biclustering, and spectral clustering. Data analysis using the singular value decomposition, nonnegative decomposition, and generalizations. Plaid model, aspect model, and additive clustering. Correspondence analysis, Rasch model, and independent component analysis. Page rank, hubs, and authorities. Probabilistic latent semantic indexing. Recommender systems. Applications to genomics and information retrieval. Prerequisites: 315A,B, 305/306A,B, or consent of instructor.

3 units, Spr (Owen, A)

#### STATS 322. Function Estimation in White Noise

Gaussian white noise model sequence space form. Hyperrectangles, quadratic convexity, and Pinsker's theorem. Minimax estimation on  $L_p$  balls and Besov spaces. Role of wavelets and unconditional bases. Linear and threshold estimators. Oracle inequalities. Optimal recovery and universal thresholding. Stein's unbiased risk estimator and threshold choice. Complexity penalized model selection. Connecting fast wavelet algorithms and theory. Beyond orthogonal bases.

3 units, not given this year

#### STATS 324. Multivariate Analysis

Classic multivariate statistics: properties of the multivariate normal distribution, determinants, volumes, projections, matrix square roots, the singular value decomposition; Wishart distributions, Hotelling's T-square; principal components, canonical correlations, Fisher's discriminant, the Cauchy projection formula.

2-3 units, not given this year

#### STATS 329. Large-Scale Simultaneous Inference

Estimation, testing, and prediction for microarray-like data. Modern scientific technologies, typified by microarrays and imaging devices, produce inference problems with thousands of parallel cases to consider simultaneously. Topics: empirical Bayes techniques, James-Stein estimation, large-scale simultaneous testing, false discovery rates, local fdr, proper choice of null hypothesis (theoretical, permutation, empirical nulls), power, effects of correlation on tests and estimation accuracy, prediction methods, related sets of cases (enrichment), effect size estimation. Theory and methods illustrated on a variety of large-scale data sets.

1-3 units, not given this year

#### STATS 330. An Introduction to Compressed Sensing

(Same as CME 362) Compressed sensing is a new data acquisition theory asserting that one can design nonadaptive sampling techniques that condense the information in a compressible signal into a small amount of data. This revelation may change the way engineers think about signal acquisition. Course covers fundamental theoretical ideas, numerical methods in large-scale convex optimization, hardware implementations, connections with statistical estimation in high dimensions, and extensions such as recovery of data matrices from few entries (famous Netflix Prize).

3 units, Aut (Donoho, D)

**STATS 335. Simultaneous and Selective Inference**

We follow the change from concern about simultaneous inference on multiple parameters to concern about the selection effect, in areas where the multiplicity is high: Genomics, Brain Imaging and Medical Statistics. We review: (i) Basic principles for constructing simultaneous inference (ii) The introduction of the false discovery rate (iii) Variations on the false discovery rate. We emphasize (iv) selective inference, as a goal that merits its own terms and treatment, and present open challenges regarding concepts and methods.

3 units, Win (Staff)

**STATS 338. Topics in Biostatistics**

Data monitoring and interim analysis of clinical trials. Design of Phase I, II, III trials. Survival analysis. Longitudinal data analysis.

3 units, not given this year

**STATS 341. Applied Multivariate Statistics**

Theory, computational aspects, and practice of a variety of important multivariate statistical tools for data analysis. Topics include classical multivariate Gaussian and undirected graphical models, graphical displays. PCA, SVD and generalizations including canonical correlation analysis, linear discriminant analysis, correspondence analysis, with focus on recent variants. Factor analysis and independent component analysis. Multidimensional scaling and its variants (e.g. Isomap, spectral clustering). Students are expected to program in R. Prerequisite: STATS 305 or equivalent.

3 units, Spr (Hastie, T)

**STATS 345. Computational Algorithms for Statistical Genetics**

(Same as GENE 245) Computational algorithms for human genetics research. Topics include: permutation, bootstrap, expectation maximization, hidden Markov model, and Markov chain Monte Carlo. Rationales and techniques illustrated with existing implementations commonly used in population genetics research, disease association studies, and genomics analysis. Prerequisite: GENE 244 or consent of instructor.

2-3 units, alternate years, not given this year

**STATS 351A. An Introduction to Random Matrix Theory**

(Same as MATH 231A) Patterns in the eigenvalue distribution of typical large matrices, which also show up in physics (energy distribution in scattering experiments), combinatorics (length of longest increasing subsequence), first passage percolation and number theory (zeros of the zeta function). Classical compact ensembles (random orthogonal matrices). The tools of determinantal point processes.

3 units, not given this year

**STATS 352. Spatial Statistics**

(Same as STATS 253) Statistical descriptions of spatial variability, spatial random functions, grid models, spatial partitions, spatial sampling, linear and nonlinear interpolation and smoothing with error estimation, Bayes methods and pattern simulation from posterior distributions, multivariate spatial statistics, spatial classification, nonstationary spatial statistics, space-time statistics and estimation of time trends from monitoring data, spatial point patterns, models of attraction and repulsion. Applications to earth and environmental sciences, meteorology, astronomy, remote-sensing, ecology, materials.

3 units, not given this year

**STATS 362. Monte Carlo**

Random numbers and vectors: inversion, acceptance-rejection, copulas. Variance reduction: antithetics, stratification, control variates, importance sampling. MCMC: Markov chains, detailed balance, Metropolis-Hastings, random walk Metropolis, independence sampler, Gibbs sampling, slice sampler, hybrids of Gibbs and Metropolis, tempering. Sequential Monte Carlo. Quasi-Monte Carlo. Randomized quasi-Monte Carlo. Examples, problems and motivation from Bayesian statistics, machine learning, computational finance and graphics.

2-3 units, Aut (Owen, A)

**STATS 366. Computational Biology**

(Same as BIOMEDIN 366, STATS 166) Course is designed to introduce students from the mathematical, physical and engineering sciences to selected current issues in computational biology and bioinformatics. Topics: Principles of gene expression and taxa abundance measurements by microarrays and sequencing.

Kernel methods for graph gene interaction graph construction. Phylogenetic trees and their uses in microbiome studies. Computational nonparametric statistics for the analyses of real genomic studies. Assignments: weekly reading of papers and a final project.

3 units, Spr (Holmes, S)

**STATS 367. Statistical Models in Genetics**

Statistical problems in association and linkage analysis of qualitative and quantitative traits in human and experimental populations; sequence alignment and analysis; population genetics/evolution (Wright-Fisher model, Kingman coalescent, models of nucleotide substitution); related computational algorithms. Prerequisites: knowledge of probability through elementary stochastic processes and statistics through likelihood theory.

3 units, Aut (Sabatti, C)

**STATS 370. A Course in Bayesian Statistics**

(Same as STATS 270) Advanced-level Bayesian statistics. Topics: Discussion of the mathematical and theoretical foundation for Bayesian inferential procedures. Examination of the construction of priors and the asymptotic properties of likelihoods and posterior densities. Discussion including but not limited to the case of finite dimensional parameter space. Prerequisite: familiarity with standard probability and multivariate distribution theory.

3 units, Win (Wong, W)

**STATS 374. Large Deviations**

(Same as MATH 234) Combinatorial estimates and the method of types. Large deviation probabilities for partial sums and for empirical distributions, Cramer's and Sanov's theorems and their Markov extensions. Applications in statistics, information theory, and statistical mechanics. Prerequisite: MATH 230A or STATS 310.

3 units, not given this year

**STATS 375. Inference in Graphical Models**

Graphical models as a unifying framework for describing the statistical relationships between large sets of variables; computing the marginal distribution of one or a few such variables. Focus is on sparse graphical structures, low-complexity algorithms, and their analysis. Topics include: variational inference; message passing algorithms; belief propagation; generalized belief propagation; survey propagation. Analysis techniques: correlation decay; distributional recursions. Applications from engineering, computer science, and statistics. Prerequisite: EE 278, STATS 116, or CS 228. Recommended: EE 376A or STATS 217.

3 units, not given this year

**STATS 376A. Information Theory**

(Same as EE 376A) The fundamental ideas of information theory. Entropy and intrinsic randomness. Data compression to the entropy limit. Huffman coding. Arithmetic coding. Channel capacity, the communication limit. Gaussian channels. Kolmogorov complexity. Asymptotic equipartition property. Information theory and Kelly gambling. Applications to communication and data compression. Prerequisite: EE178/278A or STATS 116, or equivalent.

3 units, Win (Weissman, I)

**STATS 376B. Information Theory**

(Same as EE 376B) Rate distortion theory and Kolmogorov complexity. Information theory and statistics. Method of types. Stein's lemma. AEP. Information capacity of networks. Slepian-Wolf theorem. Optimal investment and information theory. Universal portfolios and universal data compression. Maximum entropy and Burg's theorem. Prerequisite: EE376A.

3 units, Spr (Cover, T)

**STATS 390. Consulting Workshop**

Skills required of practicing statistical consultants, including exposure to statistical applications. Students participate as consultants in the department's drop-in consulting service, analyze client data, and prepare formal written reports. Seminar provides supervised experience in short term consulting. May be repeated for credit. Prerequisites: course work in applied statistics or data analysis, and consent of instructor.

1-3 units, Aut (Sabatti, C), Win (Simon, N), Spr (Donoho, D), Sum (Staff)

**STATS 396. Research Workshop in Computational Biology**

Applications of Computational Statistics and Data Mining to

Biological Data. Attendance mandatory. Instructor approval required.

*1-2 units, Aut (Staff), Win (Staff), Spr (Staff)*

### **STATS 397. PhD Oral Exam Workshop**

For Statistics PhD students defending their dissertation.

*1 unit, Spr (Efron, B; Holmes, S)*

### **STATS 398. Industrial Research for Statisticians**

Doctoral research as in 298, but must be conducted for an off-campus employer. Final report required. May be repeated for credit. Prerequisite: Statistics Ph.D. candidate.

*1-9 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **STATS 399. Research**

Research work as distinguished from independent study of nonresearch character listed in 199. May be repeated for credit.

*1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **STATS 801. TGR Project**

*0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **STATS 802. TGR Dissertation**

*0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## STEM CELL BIOLOGY AND REGENERATIVE MEDICINE (STEMREM) COURSES

### UNDERGRADUATE COURSES IN STEM CELL BIOLOGY AND REGENERATIVE MEDICINE

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **STEMREM 83Q. The Stem Cell: Biological, Social, and Practical Aspects of Stem Cell Research**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Ethical, legal, social, and economic dimensions of stem cell research such as the discovery of human embryonic stem cells and the international landscape of public policy. How stem cells work, their role in the upkeep of the human body, and current and future uses in medicine. Issues at the intersection of science and society such as human-animal hybrids, notions of justice in intellectual property law, distribution of health care, and the major ethical frameworks defining the debate. Prerequisite: AP Biology

*3 units, Spr (Scott, C)*

### GRADUATE COURSES IN STEM CELL BIOLOGY AND REGENERATIVE MEDICINE

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **STEMREM 296. Stem Cell Biology and Regenerative Medicine**

For graduate and medical students. Embryonic and adult stem cells, including origin, regulation, self-renewal, differentiation, fate, and relationship to cancer; biological mechanisms and methods to translate findings to therapeutic applications.

*5 units, Win (Weissman, I; Fuller, M; Nusse, R; Longaker, M; Tang, C; Lee, A)*

#### **STEMREM 399. Graduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **STEMREM 802. TGR Dissertation**

*0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## STRUCTURAL BIOLOGY (SBIO) COURSES

### UNDERGRADUATE COURSES IN STRUCTURAL BIOLOGY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **SBIO 199. Undergraduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### GRADUATE COURSES IN STRUCTURAL BIOLOGY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **SBIO 228. Computational Structural Biology**

(Same as BIOPHYS 228) Interatomic forces and interactions such as electrostatics and hydrophobicity, and protein structure in terms of amino acid properties, local chain conformation, secondary structure, domains, and families of folds. How protein motion can be simulated. Bioinformatics introduced in terms of methods that compare proteins via their amino acid sequences and their three-dimensional structures. Structure prediction via simple comparative modeling. How to detect and model remote homologues. Predicting the structure of a protein from knowledge of its amino acid sequence. Via Internet.

*3 units, not given this year*

#### **SBIO 241. Biological Macromolecules**

(Same as BIOC 241, BIOPHYS 241) The physical and chemical basis of macromolecular function. Forces that stabilize biopolymers with three-dimensional structures and their functional implications. Thermodynamics, molecular forces, structure and kinetics of enzymatic and diffusional processes, and relationship to their practical application in experimental design and interpretation. Biological function and the level of individual molecular interactions and at the level of complex processes. Case studies in lecture and discussion of classic and current literature. Enrollment limited to 30. Prerequisites: None; background in biochemistry and physical chemistry preferred but material available for those with deficiency; undergraduates with consent of instructor only.

*3-5 units, Aut (Herschlag, D; Ferrell, J; Puglisi, J; Block, S; Weis, W; Garcia, K)*

#### **SBIO 242. Methods in Molecular Biophysics**

(Same as BIOPHYS 242) Experimental methods in molecular biophysics from theoretical and practical standpoints. Emphasis is on X-ray diffraction, nuclear magnetic resonance, and fluorescence spectroscopy. Prerequisite: physical chemistry or consent of instructor.

*3 units, alternate years, not given this year*

#### **SBIO 274. Topics in Nucleic Acid Structure and Function**

Principles of nucleic acid structure and function. Methods for investigating nucleic acid structure. Limited to graduate students and postdoctoral fellows in structural biology. Prerequisite: consent of instructor.

*2 units, not given this year*

#### **SBIO 299. Directed Reading in Structural Biology**

Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **SBIO 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

*4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **SBIO 399. Graduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SBIO 801. TGR Project**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SBIO 802. TGR Dissertation**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## STRUCTURED LIBERAL EDUCATION (SLE) COURSES

### UNDERGRADUATE COURSES IN STRUCTURED LIBERAL EDUCATION

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**SLE 91. Structured Liberal Education**

Three quarter sequence; restricted to and required of SLE students. Comprehensive study of the intellectual foundations of the western tradition in dialogue with eastern, indigenous, and postcolonial perspectives. The cultural foundations of western civilization in ancient Greece, Rome, and the Middle East, with attention to Buddhist and Hindu counterparts and the questions these traditions address in common. Texts and authors include Homer, Plato, Aristotle, Greek tragedy, Sappho, the Hebrew Bible, the New Testament, Saint Augustine, and texts from Hindu and Buddhist traditions. GER:DB-Hum, IHUM-1

9 units, Aut (Lougee Chappell, C; Watkins, G)

**SLE 92. Structured Liberal Education**

Three quarter sequence; restricted to and required of SLE students. Comprehensive study of the intellectual foundations of the western tradition in dialogue with eastern, indigenous, and postcolonial perspectives. The foundations of the modern world, from late antiquity through the Middle Ages, the Renaissance, the Enlightenment, and the Scientific Revolution. Authors include Dante, Descartes, Shakespeare, and texts from Chinese and Islamic traditions. GER:DB-Hum, IHUM-2

9 units, Win (Lougee Chappell, C; Watkins, G)

**SLE 93. Structured Liberal Education**

Three quarter sequence; restricted to and required of SLE students. Comprehensive study of the intellectual foundations of the western tradition in dialogue with eastern, indigenous, and postcolonial perspectives. Modernity as a period in intellectual history and a problem in the human sciences. Authors include Marx, Nietzsche, Freud, Kafka, Woolf, Eliot, and Sartre. GER:DB-Hum, IHUM-3

10 units, Spr (Lougee Chappell, C; Watkins, G)

**SLE 199. Teaching SLE**

1 unit, Aut (Watkins, G), Win (Watkins, G; Lougee Chappell, C), Spr (Watkins, G; Lougee Chappell, C)

**SLE 299. Structured Liberal Education Capstone Seminar**

Senior capstone project for students who were enrolled in SLE their freshman year.

1 unit, Spr (Watkins, G)

## SURGERY (SURG) COURSES

### UNDERGRADUATE COURSES IN SURGERY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**SURG 68Q. Current Concepts in Transplantation**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Biological aspects of cell and organ transplantation, including issues that arise in the media. Diseases for which transplantation is a treatment, the state of the art in human transplantation, transplantation of animal tissue into humans (xenotransplantation), development of new tissue and organs in the laboratory (tissue engineering and cloning), and development of drugs and biological strategies to promote long-term survival of the tissue or organ (tolerance). How to write a scientific abstract, critique scientific

literature, and research and present topics in contemporary transplantation.

3 units, Spr (Martinez, O; Krams, S)

**SURG 69Q. It's All in the Head: Understanding Diversity, Development, and Deformities of the Face**

Preference to sophomores. How the face conveys moods and emotions, and elicits reactions when disease or genetic disorders leave behind disfigurement. New work by evolutionary and molecular biologists concerning how variations in facial form are elicited; how tissues and molecules interact to form the face. How differences in facial anatomy affect an individual's self-perception and their acceptance in our beauty-conscious society.

3-4 units, not given this year

**SURG 70Q. Surgical Anatomy of the Hand: From Rodin to Reconstruction**

(F,Dial) Stanford Introductory Dialogue. The surgical anatomy of the hand is extremely complex in terms of structure and function. Exploration of the anatomy of the hand in different contexts: its representation in art forms, the historical development of the study of hand anatomy, current operative techniques for reconstruction, advances in tissue engineering, and the future of hand transplantation.

2 units, Win (Chang, J)

**SURG 101. Regional Study of Human Structure**

Enrollment limited to seniors and graduate students. Lectures in regional anatomy and dissection of the human cadaver; the anatomy of the trunk and limbs through the dissection process, excluding the head and neck.

5 units, Win (Gosling, J; Whitmore, I)

**SURG 111A. Emergency Medical Technician Training**

(Same as SURG 211A) Basics of life support outside the hospital setting. Topics include emergency patient assessments for cardiac, respiratory, and neurological emergencies, as well as readiness training for emergencies on- and off-campus. Lectures, practicals, and applications. Students taking the class for 4 units complete additional FEMA training and additional clinical rotations. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT licensure exam. Prerequisites: CPR-PR certification, application (see <http://surg211.stanford.edu>), and consent of instructor.

3-4 units, Aut (Gilbert, G; D'Souza, P; Wheeler, J; Moore, L)

**SURG 111B. Emergency Medical Technician Training**

(Same as SURG 211B) Continuation of 111A/211A. Approach to traumatic injuries. Topics include head, neck, and trunk injuries, bleeding and shock, burn emergencies, and environmental emergencies. Lectures, practicals, and applications. Students taking the class for 4 units complete additional online FEMA training and additional clinical rotations. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT licensure exam. Prerequisites: 111A/211A, CPR-PR certification, and consent of instructor.

3-4 units, Win (D'Souza, P; Gilbert, G; Moore, L; Wheeler, J)

**SURG 111C. Emergency Medical Technician Training**

(Same as SURG 211C) Continuation of 111B/211B. Special topics in EMS. Topics include pediatric, obstetric, and gynecologic emergencies, EMS operations, mass casualty incidents, and assault. Lectures, practicals, and applications. Students taking the class for 4 units complete additional online FEMA training and additional clinical rotations. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT certification exam. Prerequisites: 111B/211B, CPR-PR certification, and consent of instructor.

3-4 units, Spr (Staff)

**SURG 112A. Advanced Training and Teaching for the EMT**

(Same as SURG 212A) Ongoing training for current EMS providers. Students practice BLS assessments and medical care through simulated patient encounters. Topics include airway and stroke management, abdominal emergencies, prehospital pharmacology, and teaching skills. Students taking the course for 3 units also serve as teaching assistants for Surgery 111, the Stanford EMT training course. Prerequisites: SURG 111/211 A-C (or equivalent), CPR-PR certification, and consent of instructor.

2-3 units, Aut (Gilbert, G; D'Souza, P; Moore, L; Wheeler, J)

**SURG 112B. Advanced Training and Teaching for the EMT**  
(Same as SURG 212B) Ongoing training for current EMS providers. Students practice BLS assessments and medical care through simulated patient encounters. Topics include assessment and treatment of the undifferentiated trauma patient (including airway management, monitoring, and evaluation) and prehospital care in nontraditional locations. Students taking the course for 3 units also serve as teaching assistants for Surgery 111, the Stanford EMT training course. Prerequisites: SURG 111/211 A-C (or equivalent), CPR-PR certification, and consent of instructor.

*2-3 units, Win (Gilbert, G; D'Souza, P)*

**SURG 112C. Advanced Training and Teaching for the EMT**  
(Same as SURG 212C) Ongoing training for current EMS providers. Students practice BLS assessments and medical care through simulated patient encounters. Topics include mass casualty incidents, assaults, and pediatric emergencies. Expanded scope topics may be included - ACLS, ultrasound, and suturing. Students taking the course for 3 units also serve as teaching assistants for Surgery 111, the Stanford EMT training course. Prerequisites: SURG 111/211 A-C (or equivalent), CPR-PR certification, and consent of instructor.

*2-3 units, Spr (Staff)*

**SURG 150. Principles and Practice of International Medical Humanitarianism in Surgery**

(Same as SURG 250) Open to undergraduate, graduate, and medical students. Focus is on understanding ethical theory behind humanitarianism (utilitarianism, global health equity, and basic human rights), the growing role of surgery in international health, and social innovation and business in the health care sector. Summer internship opportunities for international health service with subsidized travel for top students. Guest speakers include world-renowned physicians, CEOs, and social-medical entrepreneurs.

*4 units, not given this year*

**SURG 199. Undergraduate Research**

Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## GRADUATE COURSES IN SURGERY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**SURG 201. Basic Cardiac Life Support**

All medical students must be certified in Basic Cardiac Life Support before the end of the first (autumn) quarter. Students who provide documentation of certification received within six months prior to the date of matriculation will be exempted from the requirement. The course teaches one- and two-rescuer CPR, management of an obstructed airway, and CPR for infants and children. Upon completion of the course, students receive an American Heart Association certificate in BLS.

*1 unit, Aut (Smith-Coggins, R; Lee, C)*

**SURG 203A. Human Anatomy**

Introduction to human structure and function presented from a medical perspective. Introduction to the physical examination and frequently-used medical imaging techniques. Students are required to attend lectures, actively participate in seminar groups, and engage in dissection of the human body in the anatomy laboratory. Surgery 203A presents structure of the thorax, abdomen, pelvis and limbs.

*11 units, Aut (Gosling, J; Srivastava, S; Whitmore, I)*

**SURG 203B. Human Anatomy**

Continues the introduction to human structure and function from a medical perspective, the physical examination, and frequently-used medical imaging techniques. Students are required to attend lectures, actively participate in seminar groups, and engage in dissection of the human body in the anatomy laboratory. Surgery 203B presents structure of the head, neck and back.

*4 units, Win (Gosling, J; Whitmore, I; Srivastava, S)*

**SURG 204. Introduction to Surgery**

Designed to give pre-clinical MD students a broad overview of all the surgical specialties. Lectures by leading surgeons from General Surgery, Plastic Surgery, Neurosurgery. Orthopedic

Surgery, Head and Neck Surgery, Transplantation Surgery and Cardiac Surgery highlight the array of diseases and operations performed in their disciplines. In addition, each lecture gives students a roadmap as to how to enter that discipline.

*1 unit, Aut (Greco, R; Lopez, A)*

**SURG 205. Advanced Suturing Techniques**

Builds upon skills taught in the Surgical Interest Group's introductory suturing workshops. Techniques such as suturing in a hole, suturing different tissues, and hand, instrument and laparoscopic knot tying.

*1 unit, Aut (Visser, B; Tran, P)*

**SURG 208. Plastic Surgery Tutorial**

Diagnosis, theory, and practice of plastic and reconstructive surgery. Limited to two students per faculty member.

*2 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**SURG 209. Plastic Surgery**

Students participate in plastic and reconstructive surgery as functioning members of the clinical team. Students are exposed to operative surgery, emergency and trauma care, evaluation of operative candidates in the outpatient setting, and also attend teaching conferences. Limited to four students. Prerequisite: completion of first year or clinical experience.

*1-18 units, Aut (Chang, J; Schendel, S; Lorenz, H; Longaker, M; Gurtner, G; Girod, S; Hentz, V; Lee, G), Win (Chang, J; Schendel, S; Lorenz, H; Longaker, M; Gurtner, G; Girod, S; Hentz, V; Lee, G), Spr (Chang, J; Girod, S; Gurtner, G; Hentz, V; Lee, G;*

**SURG 211A. Emergency Medical Technician Training**

(Same as SURG 111A) Basics of life support outside the hospital setting. Topics include emergency patient assessments for cardiac, respiratory, and neurological emergencies, as well as readiness training for emergencies on- and off-campus. Lectures, practicals, and applications. Students taking the class for 4 units complete additional FEMA training and additional clinical rotations. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT licensure exam. Prerequisites: CPR-PR certification, application (see <http://surg211.stanford.edu>), and consent of instructor.

*3-4 units, Aut (Gilbert, G; D'Souza, P; Wheeler, J; Moore, L)*

**SURG 211B. Emergency Medical Technician Training**

(Same as SURG 111B) Continuation of 111A/211A. Approach to traumatic injuries. Topics include head, neck, and trunk injuries, bleeding and shock, burn emergencies, and environmental emergencies. Lectures, practicals, and applications. Students taking the class for 4 units complete additional online FEMA training and additional clinical rotations. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT licensure exam. Prerequisites: 111A/211A, CPR-PR certification, and consent of instructor.

*3-4 units, Win (D'Souza, P; Gilbert, G; Moore, L; Wheeler, J)*

**SURG 211C. Emergency Medical Technician Training**

(Same as SURG 111C) Continuation of 111B/211B. Special topics in EMS. Topics include pediatric, obstetric, and gynecologic emergencies, EMS operations, mass casualty incidents, and assault. Lectures, practicals, and applications. Students taking the class for 4 units complete additional online FEMA training and additional clinical rotations. Upon completion of SURG 111A,B,C or 211A,B,C, students are eligible to sit for the National Registry EMT certification exam. Prerequisites: 111B/211B, CPR-PR certification, and consent of instructor.

*3-4 units, Spr (Staff)*

**SURG 212A. Advanced Training and Teaching for the EMT**

(Same as SURG 112A) Ongoing training for current EMS providers. Students practice BLS assessments and medical care through simulated patient encounters. Topics include airway and stroke management, abdominal emergencies, prehospital pharmacology, and teaching skills. Students taking the course for 3 units also serve as teaching assistants for Surgery 111, the Stanford EMT training course. Prerequisites: SURG 111/211 A-C (or equivalent), CPR-PR certification, and consent of instructor.

*2-3 units, Aut (Gilbert, G; D'Souza, P; Moore, L; Wheeler, J)*

**SURG 212B. Advanced Training and Teaching for the EMT**

(Same as SURG 112B) Ongoing training for current EMS providers. Students practice BLS assessments and medical care

through simulated patient encounters. Topics include assessment and treatment of the undifferentiated trauma patient (including airway management, monitoring, and evaluation) and prehospital care in nontraditional locations. Students taking the course for 3 units also serve as teaching assistants for Surgery 111, the Stanford EMT training course. Prerequisites: SURG 111/211 A-C (or equivalent), CPR-PR certification, and consent of instructor.

*2-3 units, Win (Gilbert, G; D'Souza, P)*

#### **SURG 212C. Advanced Training and Teaching for the EMT**

(Same as SURG 112C) Ongoing training for current EMS providers. Students practice BLS assessments and medical care through simulated patient encounters. Topics include mass casualty incidents, assaults, and pediatric emergencies. Expanded scope topics may be included - ACLS, ultrasound, and suturing. Students taking the course for 3 units also serve as teaching assistants for Surgery 111, the Stanford EMT training course. Prerequisites: SURG 111/211 A-C (or equivalent), CPR-PR certification, and consent of instructor.

*2-3 units, Spr (Staff)*

#### **SURG 220. Emergency Medicine: Introduction**

The specialty of emergency medicine and initial care of emergency patients, both in the pre-hospital phase and in the emergency department. Lectures and/or practical sessions cover: patient assessment; the initial management of the multiple trauma patient; and common medical emergencies, such as poisoning, asthma, and chest pain. Students taking the course for 1 unit must have 50% class attendance and pass the final exam; 2 units constitutes 70% class attendance and passing the final exam; 3 units includes participation in emergency department observation shifts.

*1-3 units, Aut (Chiao, A; White, W)*

#### **SURG 222. Biosecurity and Bioterrorism Response**

(Same as PUBLPOL 122, PUBLPOL 222) Open to medical, graduate, and undergraduate students. Explores the questions of how well the US and global healthcare systems are prepared to withstand a bioterrorism attack, what the parallels are to withstanding a pandemic, what can be done to prevent an attack. How the medical/healthcare field, government, and the technology sectors are involved in biosecurity and bioterrorism response, how these sectors interface, and the multidisciplinary challenges involved. Focus is on current biosecurity challenges, including global bio-surveillance, making the medical diagnosis, isolation, containment, hospital surge capacity, stockpiling and distribution of countermeasures, food and agriculture biosecurity, new promising technologies for detection of bio-threats and countermeasures. 2 unit option for class participation and short paper. 4 unit option includes a research paper.

*2-4 units, Win (Buchman, M)*

#### **SURG 223. Wilderness Medicine**

Open to all students. Wilderness-related illnesses and injuries; a framework for evaluation and treatment of emergencies in the backcountry. Hands-on clinical skills. Topics include high altitude medicine, hypothermia, envenomations, search and rescue, improvisation, and survival medicine. Includes opportunity for certification in Wilderness First Aid (WFA). 3 units includes participation in an Emergency Department observation shift and a day-long field-trip for hands-on field work.

*2-3 units, Spr (Staff)*

#### **SURG 228. Introduction to Vascular Disease and Treatment**

Develops basic interventional skills using hands-on endovascular simulation in multiple vascular beds. Designed for students interested in careers in vascular surgery, interventional cardiology, interventional radiology, and vascular medicine. Topics: peripheral vascular disease, angiography, SFA interventions, aortoiliac disease; visceral vascular disease and renal interventions, cerebrovascular disease and carotid intervention lab; frontiers in vascular disease.

*1 unit, Aut (Lee, J), Win (Lee, J)*

#### **SURG 229. Advanced Vascular Disease and Treatment**

Designed for students interested in careers in vascular surgery and vascular medicine. Expands upon the basic physiology, pathology, and skills learned in SURG 228. Topics: renal disease, cerebrovascular disease and carotid interventions, AAA disease and intervention, DVT disease, the future of vascular surgery. Centered on simulation based learning, student presentations, and

discussion. Prerequisite: SURG 228

*1 unit, Spr (Staff)*

#### **SURG 230. Obesity in America**

Prevalence and effects of the obesity epidemic in America and the growing prevalence of associated comorbidities such as diabetes, hypertension, hyperlipidemia, sleep apnea, and joint problems. Risk factors, multi-disciplinary treatment options, the role of food in society, patients' perspectives, and current research in the field.

*1 unit, Win (Morton, J; Lodhia, N)*

#### **SURG 231. Haiti and Healthcare**

Originally developed to highlight healthcare in extreme poverty in Haiti, related lectures have been added covering healthcare in resource poor environments with the objective to introduce students to the complexity and unique problems of working in the Third World's healthcare morass.

*1 unit, Spr (Staff)*

#### **SURG 250. Principles and Practice of International Medical Humanitarianism in Surgery**

(Same as SURG 150) Open to undergraduate, graduate, and medical students. Focus is on understanding ethical theory behind humanitarianism (utilitarianism, global health equity, and basic human rights), the growing role of surgery in international health, and social innovation and business in the health care sector. Summer internship opportunities for international health service with subsidized travel for top students. Guest speakers include world-renowned physicians, CEOs, and social-medical entrepreneurs.

*4 units, not given this year*

#### **SURG 254. Operative Anatomy and Techniques**

For preclinical students; provides a background in and integrates knowledge of surgical anatomy and therapy. Surgical or operative anatomy differs from gross anatomy in that the area exposed during surgery may be limited, the dissection may require exposing other seemingly unrelated anatomic structures with unique landmarks, and the procedure may require unusual technical facility. The course provides an opportunity for students to understand the goals of representative surgical procedures (translating pathophysiology to surgical decision making to actual incision). Students learn surgical skills and perform the dissection of a number of commonly performed operations in the cadaver laboratory. The course emphasizes hands-on participation in surgical procedures in the laboratory and is taught by attending physicians in general, cardiothoracic, vascular, plastic, head and neck, urologic, and orthopedic surgery.

*1 unit, Win (Srivastava, S; Fann, J; Johannet, P)*

#### **SURG 280. Early Clinical Experience in Surgery**

Provides an observational experience in a surgery specialty. Prerequisite: consent of instructor.

*1-2 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **SURG 290. Fundamentals of Digital Anatomy: Techniques, Methods, and Applications**

Explores the power of digital anatomy. How 3D anatomical data sets are created from human specimens; how they are processed, analyzed, and rendered. Focus on how digital content is best used for learning anatomy, patient education, and clinical practice. May be taken for 1 unit (lecture only) or 3 units (lecture and practicum).

*1-3 units, Spr (Staff)*

#### **SURG 296. Individual Work: Human Anatomy**

Carried out under the supervision of one or more members of the staff. Prerequisite: consent of instructor.

*1-18 units, Aut (Whitmore, I; Gosling, J; Srivastava, S), Win (Whitmore, I; Gosling, J; Srivastava, S), Spr (Whitmore, I; Gosling, J; Srivastava, S), Sum (Whitmore, I; Gosling, J; Srivastava, S)*

#### **SURG 298. Procedure-based-specialty Preparation Boot Camp**

Designed for graduating medical students pursuing a procedure-based residency or internship (e.g. gynecology, dermatology, surgery, interventional radiology). Incorporates in both skills and simulation workshops the basic skills required of residents and interns in procedure-based specialties with a review of relevant anatomy as it relates to these procedures. An opportunity for students to become facile with basic procedural skills and anatomic principles prior to entering their residencies or internships. Prerequisite: graduating medical student.

1 unit, Win (Staff)

### **SURG 299. Directed Reading in Surgery**

Consists of studies in progress, including cardiovascular and circulatory problems; gastric physiology; hemostatic disorders; homotransplantation; liver disorders; orthopedic pathology; bone growth; radiation injury; immunology, bacteriology, pathology, and physiology of the eye; physiological optics; comparative ophthalmology; neurophysiology of hearing; spatial orientation and disorientation; nasal function; and psychophysics of sensation. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### **SURG 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### **SURG 399. Graduate Research**

Students undertake investigations sponsored by individual faculty members.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## SYMBOLIC SYSTEMS (SYMSYS) COURSES

### **UNDERGRADUATE COURSES IN SYMBOLIC SYSTEMS**

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **SYMSYS 100. Introduction to Cognitive and Information Sciences**

(Same as LINGUIST 144, PHIL 190, PSYCH 132) The history, foundations, and accomplishments of the cognitive sciences, including presentations by leading Stanford researchers in artificial intelligence, linguistics, philosophy, and psychology. Overview of the issues addressed in the Symbolic Systems major. GER:DB-SocSci

4 units, Spr (Goodman, N)

#### **SYMSYS 145. Cognition in Interaction Design**

(Same as SYMSYS 245) Interactive systems from the standpoint of human cognition. Topics include skill acquisition, complex learning, reasoning, language, perception, methods in usability testing, special computational techniques such as intelligent and adaptive interfaces, and design for people with cognitive disabilities. Students conduct analyses of real world problems of their own choosing and redesign/analyze a project of an interactive system. GER:DB-SocSci

3 units, Win (Shrager, J)

#### **SYMSYS 170. Decision Behavior: Theory and Evidence**

(Same as SYMSYS 270) Introduction to the study of judgment and decision making, relating theory and evidence from disciplines such as psychology, economics, statistics, neuroscience, and philosophy. The development and critique of Homo economicus as a model of human behavior, and more recent theories based on empirical findings. Recommended: background in formal reasoning.

3-4 units, not given this year

#### **SYMSYS 190. Senior Honors Tutorial**

Under the supervision of their faculty honors adviser, students work on their senior honors project. May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **SYMSYS 191. Senior Honors Seminar**

Recommended for seniors doing an honors project. Under the leadership of the Symbolic Systems program coordinator, students discuss, and present their honors project.

1 unit, Aut (Davies, T)

#### **SYMSYS 196. Independent Study**

Independent work under the supervision of a faculty member. Can be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN SYMBOLIC SYSTEMS

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **SYMSYS 200. Symbolic Systems in Practice**

Applying a Symbolic Systems education at Stanford and outside. The basics of research and practice. Students develop and present a project, and investigate different career paths, including academic, industrial, professional, and public service, through interviews with alumni.

2-3 units, Win (Davies, T)

#### **SYMSYS 201. ICT, Society, and Democracy**

The impact of information and communication technologies on social and political life. Interdisciplinary. Classic and contemporary readings focusing on topics such as social networks, virtual versus face-to-face communication, the public sphere, voting technology, and collaborative production.

3 units, Spr (Davies, T)

#### **SYMSYS 206. Topics in the Philosophy of Neuroscience**

Preference to Undergraduates. Focus is literature in philosophy and neuroscience whose topics include perception, memory, neurophenomenology, sensorimotor accounts of consciousness, computational models, and eliminativism, among others. Prerequisites: Familiarity with philosophy (Phil 80) or neuroscience.

3 units, not given this year

#### **SYMSYS 209. Battles Over Bits**

The changing nature of information in the Internet age and its relationship to human behavior. Philosophical assumptions underlying practices such as open source software development, file sharing, common carriage, and community wireless networks, contrasted with arguments for protecting private and commercial interests such as software patents, copy protection, copyright infringement lawsuits, and regulatory barriers. Theory and evidence from disciplines including psychology, economics, computer science, law, and political science. Prerequisite: PSYCH 40, 55, 70, or SYMBSYS 202.

3 units, not given this year

#### **SYMSYS 210. Learning Facial Emotions: Art and Psychology**

Artistic and psychological learning approaches for emotion recognition from facial expressions. The advantages of learning by image-based microexpressions, subtle expressions, macro expressions, art drawing and actor mimicry when there are cognitive deficits due to conditions such as autism. Comparative analysis uses brain studies, learning theory, and human-computer interaction. Studio component conveys the artistic and psychological approaches. Prerequisites: PSYCH 1, SYMSYS 100 or consent of instructor. Go to [www.stanford.edu/~dwilkins/Symsys210Enroll.doc](http://www.stanford.edu/~dwilkins/Symsys210Enroll.doc) to sign up for a Permission Number.

3 units, not given this year

#### **SYMSYS 211. Learning Facial Emotions: Art, Psychology, Human-Computer Interaction**

Learning to recognize facial emotions by drawing a live model versus the psychology method of using classified images of subtle and micro expressions. Dimensions of analysis include cognitive modeling and neuroscience. The design of human-computer interaction systems for people with cognitive deficits such as autism and Aspergers, which integrate the art and psychology approaches using methods such as robot heads, avatars, and facial recognition software. Prerequisites: PSYCH 1 or consent of instructor.

3 units, not given this year

#### **SYMSYS 245. Cognition in Interaction Design**

(Same as SYMSYS 145) Interactive systems from the standpoint of human cognition. Topics include skill acquisition, complex learning, reasoning, language, perception, methods in usability testing, special computational techniques such as intelligent and adaptive interfaces, and design for people with cognitive disabilities. Students conduct analyses of real world problems of their own choosing and redesign/analyze a project of an interactive

system.

3 units, Win (Shrager, J)

**SYMSYS 270. Decision Behavior: Theory and Evidence**

(Same as SYMSYS 170) Introduction to the study of judgment and decision making, relating theory and evidence from disciplines such as psychology, economics, statistics, neuroscience, and philosophy. The development and critique of Homo economicus as a model of human behavior, and more recent theories based on empirical findings. Recommended: background in formal reasoning.

3-4 units, not given this year

**SYMSYS 280. Symbolic Systems Research Seminar**

A mixture of public lectures of interest to Symbolic Systems students (the Symbolic Systems Forum) and student-led meetings to discuss research in Symbolic Systems. Can be repeated for credit. Open to both undergraduates and Master's students.

1 unit, Aut (Staff), Win (Staff), Spr (Staff)

**SYMSYS 290. Master's Degree Project**

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SYMSYS 291. Master's Program Seminar**

Enrollment limited to students in the Symbolic Systems M.S. degree program. May be repeated for credit.

1 unit, Aut (Davies, T), Win (Davies, T), Spr (Davies, T)

**SYMSYS 296. Independent Study**

Independent work under the supervision of a faculty member. Can be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**SYMSYS 299. Curricular Practical Training**

Students obtain employment in a relevant research or industrial activity to enhance their professional experience consistent with their degree programs. Meets the requirements for curricular practical training for students on F-1 visas. Students submit a concise report detailing work activities, problems worked on, and key results. May be repeated for credit. Prerequisite: qualified offer of employment and consent of advisor.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## TIBETAN LANGUAGE (TIBETLNG) COURSES

### UNDERGRADUATE COURSES IN TIBETAN LANGUAGE

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**TIBETLNG 1. First-Year Tibetan, First Quarter**

Grammar, reading, and composition. Tibetan culture and the Tibetan view of reality.

4 units, Aut (Clark, R)

**TIBETLNG 2. First Year Tibetan, Second Quarter**

Continuation of 1.

4 units, Win (Clark, R)

**TIBETLNG 3. First Year Tibetan, Third Quarter**

Continuation of 2.

4 units, Spr (Clark, R)

**TIBETLNG 13. Intermediate Tibetan, Third-Quarter**

Continuation of 12.

4 units, not given this year

**TIBETLNG 21. Intermediate/Advanced Tibetan, First Quarter**

4 units, Aut (Clark, R)

**TIBETLNG 22. Intermediate/Advanced Tibetan, Second Quarter**

4 units, Win (Clark, R)

**TIBETLNG 23. Intermediate/Advance Tibetan, Thrid Quarter**

4 units, Spr (Clark, R)

**TIBETLNG 199. Individual Work**

May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

## GRADUATE COURSES IN TIBETAN LANGUAGE

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**TIBETLNG 395. Graduate Studies in Tibetan**

May be repeated for credit. Prerequisite: consent of instructor.

2-5 units, Aut (Staff), Win (Staff), Spr (Staff)

## URBAN STUDIES (URBANST) COURSES

### UNDERGRADUATE COURSES IN URBAN STUDIES

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**URBANST 100ASB. Pre-field Course for Urban Studies Alternative Spring Break**

Limited to students participating in the Alternative Spring Break program. See <http://asb.stanford.edu> for more information.

1 unit, Win (McLennan, W)

**URBANST 110. Utopia and Reality: Introduction to Urban Studies**

The study of cities and urban civilization. History of urbanization and current issues such as suburbanization, racial discrimination, globalization, and urban sustainability. Public policies designed to address these issues and Utopian versions of what cities could be in the future. GER:DB-SocSci, EC-AmerCul

4 units, Aut (Stout, F), Spr (Stout, F)

**URBANST 112. The Urban Underclass**

(Same as SOC 149, SOC 249) (Graduate students register for 249.) Recent research and theory on the urban underclass, including evidence on the concentration of African Americans in urban ghettos, and the debate surrounding the causes of poverty in urban settings. Ethnic/racial conflict, residential segregation, and changes in the family structure of the urban poor. GER:DB-SocSci, EC-AmerCul

5 units, Spr (Rosenfeld, M)

**URBANST 113. Introduction to Urban Design: Contemporary Urban Design in Theory and Practice**

Comparative studies in neighborhood conservation, inner city regeneration, and growth policies for metropolitan regions. Lect-disc and research focusing on case studies from North America and abroad, team urban design projects. Two class workshops in San Francisco Sat Jan 15 and Jan 29. Terms: Win | Units: 5 | UG Reqs: GER:DBSocSci | Grading: Letter (ABCD/NP) Instructors: Gast, G. GER:DB-SocSci

5 units, Win (Gast, G)

**URBANST 114. Cities in Comparative Perspective**

(Same as ANTHRO 126) Core course for Urban Studies majors. We will study urban space both historically and cross-culturally. Urban Studies, by definition, is an interdisciplinary field, where the methodological approaches draw upon a diverse set of analytic tools. Disciplines that occupy a prominent place in this class are geography, cultural anthropology, sociology, history, media studies, and literature. In this context, we will discuss the importance of cities around the world to the economic, cultural, and political well-being of modern societies and examine how forces such as industrialization, decentralization, and globalization affect the structure and function of cities. GER:DB-SocSci

5 units, Spr (Kapur, C)

**URBANST 115. Urban Sustainability: Long-Term Archaeological Perspectives**

(Same as CLASSGEN 123, CLASSGEN 223) Comparative and archaeological view of urban design and sustainability. How fast changing cities challenge human relationships with nature. Innovation and change, growth, industrial development, the consumption of goods and materials. Five millennia of city life including Near Eastern city states, Graeco-Roman antiquity, the Indus Valley, and the Americas.

3-5 units, Aut (Shanks, M)

**URBANST 122. Ethics and Politics of Public Service**

(Same as CSRE 178, ETHICSOC 133, HUMBIO 178, PHIL 175A, PHIL 275A, POLISCI 133) Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford. GER:DB-SocSci

5 units, Win (Mitchell, T)

**URBANST 123. Approaching Research and the Community**

Comparative perspective on research with communities and basic overview of research methodologies, with an emphasis on the principles and practices of doing community-based research as a collaborative enterprise between academic researchers and community members. How academic scholarship can be made useful to communities. How service experiences and interests can be used to develop research questions in collaboration with communities and serve as a starting point for developing senior theses or other independent research projects.

2 units, Spr (Staff)

**URBANST 126. Spirituality and Nonviolent Urban and Social Transformation**

(Same as RELIGST 162) A life of engagement in social transformation is often built on a foundation of spiritual and religious commitments. Case studies of nonviolent social change agents including Rosa Parks in the civil rights movement, César Chávez in the labor movement, and William Sloane Coffin in the peace movement; the religious and spiritual underpinnings of their commitments. Theory and principles of nonviolence. Films and readings. Service learning component includes placements in organizations engaged in social transformation. Service Learning Course (certified by Haas Center). GER:DB-Hum

5 units, Win (Sanders, J; Karlin-Neumann, P)

**URBANST 127. COMMUNITY PLANNING WORKSHOP**

4-5 units, not given this year

**URBANST 127. Community Planning Workshop**

Students work in teams to conduct research, analyze and evaluate alternatives, and make recommendations for possible solutions to local community development issues. Students work with community partners to blend theory and practice to accomplish a community based project.

4-5 units, not given next year

**URBANST 128. Community Mapping Practicum**

Students will use mapping techniques to explore community planning and policy issues in Redwood City. Focusing on building other skills including teamwork, writing, and oral communication. GIS is not a prerequisite.

4 units, not given this year

**URBANST 131. Social Innovation and the Social Entrepreneur**

Invited lecture series. Perspectives and endeavors of thought leaders and entrepreneurs who address social needs in the U.S. and internationally through private for-profit and nonprofit organizations, nongovernmental organizations, or public institutions.

1 unit, Aut (Edwards, M)

**URBANST 132. Concepts and Analytic Skills for the Social Sector**

How to create and grow innovative, non-profit and for-profit ventures which have the primary goal of solving social and environmental problems. Topics include organizational mission, strategy, marketing, financing and evaluation. Opportunities and limits of methods from the for-profit sector to meet social goals. Perspectives from the field of social entrepreneurship. Focus is on integrating theory with practical applications. Enrollment limited to 20. Prerequisite: consent of instructor. GER:DB-SocSci

4 units, Win (Litvak, L)

**URBANST 133. Social Entrepreneurship Collaboratory**

Interdisciplinary student teams create and develop U.S. and

international social entrepreneurship initiatives. Proposed initiatives may be new entities, or innovative projects, partnerships, and/or strategies impacting existing organizations and social issues in the U.S. and internationally. Focus is on each team's research and on planning documents to further project development. Project development varies with the quarter and the skill set of each team, but should include: issue and needs identification; market research; design and development of an innovative and feasible solution; and drafting of planning documents. In advanced cases, solicitation of funding and implementation of a pilot project. Enrollment limited to 30. May be repeated for credit. Prerequisites: 131 and 132, or consent of instructor.

4 units, Aut (Edwards, M), Spr (Scher, L)

**URBANST 137. Innovations in Microcredit and Development Finance**

The role of innovative financial institutions in supporting economic development, the alleviation of rural and urban poverty, and gender equity. Analysis of the strengths and limits of commercial banks, public development banks, credit unions, and microcredit organizations both in the U.S. and internationally. Readings include academic journal articles, formal case studies, evaluations, and annual reports. Priority to students who have taken any portion of the social innovation series: URBANST 131, 132, or 133. Recommended: ECON 1A or 1B.

4 units, Spr (Kieschnick, M)

**URBANST 160. Environmental Policy and the City in U.S.**

**History**

Looks at the historical backgrounds of current issues in urban environmental policy, including waste, transportation, air pollution, and other major issues. Covers the period 1800 to the present. Explores the relevance of historical scholarship

5 units, Win (Staff)

**URBANST 161. U.S. Urban History since 1920**

The end of European immigration and its impact on cities; the Depression and cities; WW II and the martial metropolis; de-industrialization; suburbanization; African American migration; urban renewal; riots, race, and the narrative of urban crisis; the impact of immigration from Asia, Latin America, and Africa; homelessness; the rise of the Sunbelt cities; gentrification; globalization and cities. Final project is history of a San Francisco neighborhood, based on primary sources and site visit. GER:DB-SocSci, EC-AmerCul

5 units, Spr (Kahan, M)

**URBANST 162. Managing Local Governments**

In-the-trenches approach. Issues in leading and managing local governments in an era of accelerating and discontinuous change. Focus is on practical strategies related to financing, public services impacted by increasing demand and revenue constraints, the politics of urban planning, private-public partnerships, public sector marketing, entrepreneurial problem solving, promoting a learning and risk-taking organizational culture, and developing careers in local government. Enrollment limited to 25; preference to Urban Studies majors. GER:DB-SocSci

4 units, not given this year

**URBANST 163. Land Use Control**

Methods of land use control related to the pattern and scale of development and the protection of land and water resources. Emphasis is on the relationship between the desired land use goal and geographical landscape, physical externalities, land use law, and regulatory agencies. Topics include the historical roots of modern land use controls; urban reforms of the 19th century; private ownership of land; zoning; local, state, and federal land use regulation; and land trusts preservation. Smart growth, environmental impact consideration, private property rights, and special purpose agencies are related to current issues. GER:DB-SocSci

4 units, not given this year

**URBANST 164. Sustainable Cities**

Focus is on the prospects for urban sustainability, including social, economic and environmental dimensions. Course examines the main problems facing urban areas, how they are assessed, and the policies and programs that try to address them through a team-based service learning project. Topics depend on projects but

potentially include sustainability indicators, ecological footprint, air and water quality, climate change, and sustainable energy and transportation policies.

4-5 units, Spr (Boudet, H)

**URBANST 165. Sustainable Urban and Regional Transportation Planning**

Environmental, economic, and equity aspects of urban transportation in 21st-century U.S. Expanded choices in urban and regional mobility that do not diminish resources for future generations. Implications for the global environment and the livability of communities. GER:DB-SocSci

4-5 units, Aut (Kott, J)

**URBANST 166. East Palo Alto: Reading Urban Change**

Examines the changes in East Palo Alto's build environment, economy, and civil society since the 1990s. Focus on the redevelopment of the Whiskey Gulch / Over the Ramp section into University Circle. Students use archived film footage to analyze the history.

5 units, Win (Kahan, M)

**URBANST 171. Urban Design Studio**

The practical application of urban design theory. Projects focus on designing neighborhood and downtown regions to balance livability, revitalization, population growth, and historic preservation.

5 units, Spr (Glanz, D)

**URBANST 190. Urban Professions Seminar**

Workshop. Contemporary practice of urban design and planning, community development, urban education, public service law, and related fields. Topics depend partly on student interests. Bay Area professionals lecture and respond to questions concerning their day-to-day work, impressions of their field, and the academic background recommended for their work.

1 unit, not given this year

**URBANST 194. Internship in Urban Studies**

For Urban Studies majors only. Students organize an internship in an office of a government agency, a community organization, or a private firm directly relevant to the major. Reading supplements internship. Paper summarizes internship experience and related readings.

2-4 units, Aut (Staff), Win (Staff), Spr (Staff)

**URBANST 195. Special Projects in Urban Studies**

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**URBANST 197. Directed Reading**

1-5 units, Aut (Kahan, M), Win (Staff), Spr (Kahan, M)

**URBANST 198. Senior Research in Public Service**

Limited to seniors approved by their departments for honors thesis and admitted to the year-round Public Service Scholars Program sponsored by the Haas Center for Public Service. What standards in addition to those expected by the academy apply to research conducted as a form of public service? How can communities benefit from research? Theory and practice of research as a form of public service readings, thesis workshops, and public presentation of completed research. May be repeated for credit. Corequisite: 199.

1-3 units, Aut (Visconti, V), Win (Visconti, V), Spr (Staff)

**URBANST 199. Senior Honors Thesis**

1-10 units, Aut (Staff), Win (Staff), Spr (Staff)

**URBANST 201. Preparation for Senior Project**

(Same as SOC 201) First part of capstone experience for Urban Studies majors pursuing an internship-based research project or honors thesis. Assignments culminate in a research proposal, which may be submitted for funding. Students also identify and prepare for a related internship, normally to begin in Spring Quarter in URBANST 201B or in Summer. Research proposed in the final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research. Service Learning Course (certified by Haas Center).

5 units, not given this year

**URBANST 201A. Capstone Internship in Urban Studies**

Restricted to Urban Studies majors. Students work at least 80 hours with a supervisor, establish learning goals, and create products demonstrating progress. Reflection on service and integration of internship with senior research plans. Must be

completed by start of Winter Quarter senior year. May continue for additional quarter as 194. Service Learning Course (certified by Haas Center). Corequisite: URBANST 201 or consent of instructor.

3 units, Aut (Kahan, M), Win (Kahan, M), Spr (Kahan, M)

**URBANST 201B. Capstone Internship Seminar**

Students carry out an internship of at least 80 hours with a community organization or government agency. Class meets weekly to discuss related issues, including ethics of service, combining service and research, navigating organizational dynamics, and setting and accomplishing internship goals. Students submit internship agreement and internship-related deliverables, and give in-class presentations.

3-4 units, Spr (Kahan, M)

**URBANST 202. Preparation for Senior Research**

(Same as SOC 202) Primarily for juniors in Sociology; sophomores who plan to be off-campus Winter Quarter of their junior year may register with consent of instructor. Students write a research prospectus and grant proposal, which may be submitted for funding. Research proposal in final assignment may be carried out in Spring or Summer Quarter; consent required for Autumn Quarter research.

5 units, Win (McAdam, D)

**URBANST 203. Senior Seminar**

Conclusion of capstone sequence. Students write a substantial paper based on the research project developed in 201 or 202. Students in the honors program may incorporate paper into their thesis. Guest scholar chosen by students. WIM

5 units, Aut (Kahan, M)

## WRITING AND RHETORIC, PROGRAM IN (PWR) COURSES

### UNDERGRADUATE COURSES IN WRITING AND RHETORIC, PROGRAM IN

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**PWR 1AH. Writing & Rhetoric 1: The Rhetoric of American Multicultural Experience**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Exploration of multicultural experience and cultural assimilation, focusing on the theme of social acceptance. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

4 units, Win (Heredia, A)

**PWR 1AO. Writing & Rhetoric 1: Visual Rhetoric Across the Globe: Capturing Culture in Images**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Analysis of styles of leadership across the globe and communication strategies used to bring about change. Exploration of how global leaders learn cross-cultural rhetoric skills to adapt to dynamic and unfamiliar situations. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

4 units, Aut (O'Brien, A)

**PWR 1AT. Writing & Rhetoric 1: A Mountain for Itself: The Rhetoric of Wilderness**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

4 units, Win (Todhunter, A)

**PWR 1CA. Writing & Rhetoric 1: The Rhetoric of Gaming**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based

argument using multiple sources. Individual conferences with instructor. Topics include how gameplay in a variety of genres operates as argument about cultural values and how games function as sites of community building, social networking, and learning. Students produce research-based arguments on these issues and merge practice and production in storyboarding rhetorically persuasive games. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, Aut (Alfano, C), Spr (Alfano, C)*

**PWR 1CK. Writing & Rhetoric 1: Reading the Newspaper**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, Aut (Kamrath, C), Spr (Kamrath, C)*

**PWR 1CR. Writing & Rhetoric 1: Writing Nature: Discourses in Ecology, Culture, and Technology**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Inquiry into human relationships with nature and how these influence ethical choices and social justice. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Courses.html](http://ual.stanford.edu/AP/univ_req/PWR/Courses.html)

*4 units, Aut (Ross, C), Win (Ross, C), Spr (Ross, C)*

**PWR 1D. Writing Well: An Introduction to College Writing**

Offered only to participants in the Summer College for High School Students. Develops critical reading, writing, and research skills applicable to any area of study. Emphases include close reading, analysis of varied texts, development of strong theses, revision strategies, and introduction to research-based argument. Classes are small, encouraging extensive interaction between students and instructors. Discussions of readings, peer work, and individual conferences with instructors. Each section has a thematic emphasis developed by the instructor; students choose sections based on their individual interests. Does not meet the Stanford first-year writing requirement.

*3 units, Sum (Staff)*

**PWR 1DC. Writing & Rhetoric 1: Is This What a Feminist Looks Like? Race/Gender in the Obama Age**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Study of the coverage of and activism in a post-racial U.S., including evaluation of the debate over the intersections of racial activism and feminist activism in U.S. politics. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1DH. Writing & Rhetoric 1: The Virtue of Vice and the Vice of Virtue: The Rhetoric of Criminality**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Students investigate language and images that construct criminals, analyzing how these representations shape personal and cultural beliefs. Analysis of the costs and benefits of retributive, restorative, and transformative justice systems. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, Aut (Hunter, D)*

**PWR 1DW. Writing & Rhetoric 1: Gangsters, Glamour Girls & Gold-diggers: Dialectic of Am. Culture & Hollywood**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Analysis of the rhetoric of American film and its conversation with American culture. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1EE. Writing & Rhetoric 1: Wishy-Washy or Wise?:**

**The Rhetoric of Ambivalence**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, Aut (Ellis, E), Win (Ellis, E)*

**PWR 1GAC. Writing & Rhetoric 1: Protest Art!: The Rhetoric of Art as Social Activism**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Analysis of the rhetoric of art in drawing our attention to social issues such as racism, poverty, sexism, and homophobia and in moving us to social action. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GAF. Writing & Rhetoric 1: Little Boxes: The Rhetoric of the American Suburb**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Examination of the suburbs as a site of cultural debate through investigation of the ways that authors and artists imagine the physical landscape of the suburb and the inner lives of suburbanites. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GAJ. Writing & Rhetoric 1: The Rhetoric of Eating**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GAT. Writing & Rhetoric 1: Size Matters: The Writing and Rhetoric of Short Stories**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GAW. Writing & Rhetoric 1: Global Exchange: Rhetoric in a World Context**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. The American cultural apparatus, its limitations, and development of other world views. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, Aut (Watters, A), Spr (Watters, A)*

**PWR 1GAZ. Writing & Rhetoric 1: From Cradle to Grave: The Rhetoric of Age and Aging**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include the history of aging in America; developments in reproductive science; the proverbial mid-life crisis; and how people cope with the ultimate horizon of death. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GBA. Writing & Rhetoric 1: RHETORIC OF BEN ALLEN**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, Win (Allen, B), Spr (Allen, B)*

**PWR 1GBB. PWR 1: RHET OF BILSKY**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Win (Bilsky, B), Spr (Bilsky, B)*

**PWR 1GBJ. Writing & Rhetoric 1: The Rhetoric of Cultural Memories of Violence**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GBW. Writing & Rhetoric 1: Deathbeds: Art and the Rhetoric of Disease**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GCH. Writing & Rhetoric 1: Rhetoric of Dalglish**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Win (Chew, D), Spr (Chew, D)*

**PWR 1GCJ. Writing & Rhetoric 1: El Otro Lado / The Other Side: The rhetoric of real and imagined borders**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. The physical border between the United States and Mexico is the focus of the examination of the artistic, scholarly, and political rhetoric of real and imagined borders. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GCL. Writing & Rhetoric 1: Rhetoric of Ledbetter**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Win (Ledbetter, A), Spr (Ledbetter, A)*

**PWR 1GCX. Writing & Rhetoric 1: I Do: The Rhetoric of Consent**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Examination of the idea of consent and the underlying principles of free will and autonomy in the fields of law, intellectual property, marriage contracts, political philosophy, medical ethics, and sex. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GCZ. Writing & Rhetoric 1: It Never Got Weird Enough For Me: The Rhetoric of Intoxication**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GDM. Writing & Rhetoric 1: Rhetoric of Mong**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [\[bin/drupal\\\_ual/AP\\\_univ\\\_req\\\_PWR\\\_Courses.html\]\(http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\_ual/AP\_univ\_req\_PWR\_Courses.html\).](http://www.stanford.edu/dept/undergrad/cgi-</a></p>
</div>
<div data-bbox=)

*4 units, Win (Mong, D), Spr (Mong, D)*

**PWR 1GEJ. Writing & Rhetoric 1: Rhetoric of Johnson**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Win (Johnson, E), Spr (Johnson, E)*

**PWR 1GER. Writing & Rhetoric 1: The Rhetoric of Social Media**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Exploration of the multifaceted and hypertextual rhetoric of social media, the intersection between rhetoric and social media, and how new types of online media have heightened participation, openness, and a sense of community. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GEV. Writing & Rhetoric 1: All the World's a Stage: The Rhetoric of Theater**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Students investigate the role theater plays in the rhetorical strategies of various literary and non-literary texts as well as visual materials such as films and cartoons. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Req.html](http://ual.stanford.edu/AP/univ_req/PWR/Req.html).

*4 units, not given this year*

**PWR 1GFR. Writing & Rhetoric 1: Rhetoric of Morgan Frank**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Win (Frank, E), Spr (Frank, E)*

**PWR 1GGH. Writing & Rhetoric 1: Understanding American Political Speeches of the 20th and 21st Centuries**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Rhetorical analyses of speeches by a range of 20th-century American political figures and the political rhetoric of the present day. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GHJ. Writing & Rhetoric 1: The Rhetoric of The Economist**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Analysis of the strategies that produce The Economist magazine's rhetorically effective yet anonymous voice. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, Aut (Janiszewska, H)*

**PWR 1GHW. Writing & Rhetoric 1: Rhetoric of Hannah Walser**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Win (Walser, H), Spr (Walser, H)*

**PWR 1GIF. Writing & Rhetoric 1: Dark Humor: A Rhetoric of Social Taboos**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Study of dark humor as it deals with the most delicate subject matter, topics we designate as sacred and beyond criticism:

violence and bodily damage, illness, aging and death, race and ethnicity, and gender and sexuality. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, not given this year*

**PWR 1GJD. Writing & Rhetoric 1: Rhetoric of J.D. Porter**  
 Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).  
*4 units, Win (Porter, J), Spr (Porter, J)*

**PWR 1GJE. Writing & Rhetoric 1: Gay Ghettoes, Queer Hoods: The Rhetoric of Race and Urban Sexual Subcultures**  
 Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Study of the rhetoric of urban sexual subcultures, and how the rhetoric in medical science, journalism, and popular entertainment defines queers of color in intellectual thought and pop culture. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, not given this year*

**PWR 1GJM. Writing & Rhetoric 1: The Rhetoric of California**  
 Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Courses.html](http://ual.stanford.edu/AP/univ_req/PWR/Courses.html).  
*4 units, not given this year*

**PWR 1GJS. Writing & Rhetoric 1: Our Warded World: The Rhetoric of Conservation**  
 Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, not given this year*

**PWR 1GJW. Writing & Rhetoric 1: I Know It When I Hear It: The Rhetoric of the Unspeakable**  
 Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, not given this year*

**PWR 1GKL. Writing & Rhetoric 1: The Use and Abuse of Civil Debate: The Rhetoric of Collective Thinking**  
 Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).  
*4 units, Aut (Ligda, K)*

**PWR 1GLA. Writing & Rhetoric 1: Code Orange: Post-9/11 America and the Rhetoric of Alarm**  
 Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, not given this year*

**PWR 1GLD. Writing & Rhetoric 1: The Cyborg Body: The Rhetoric of Disability**  
 Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Analysis of disability using the analogy of the cyborg, in an era when the human body has become plastic, digitized and surgically manipulated. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, not given this year*

**PWR 1GLE. Writing & Rhetoric 1: Rhetoric of Lauren Eidal**  
 Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).  
*4 units, Win (Eidal, L), Spr (Eidal, L)*

**PWR 1GLL. Writing & Rhetoric 1: Wow, that's so postcard: The Rhetoric of Tourism**  
 Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Analysis of tourism as a way of seeing and representing the rest of the world and oneself, touching on some of the most pressing political, economic, and cultural questions facing an increasingly globalized world. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, not given this year*

**PWR 1GM. Writing & Rhetoric 1: Anywhere That Is Wild: The Making and Unmaking of Rhetoric**  
 Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Exploration of the tension between reverence and science, language and feeling, natural and unnatural in the interrelationship of rhetoric and nature. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).  
*4 units, Win (Moyer, G)*

**PWR 1GMB. Writing & Rhetoric 1: Rhetoric of Mackenzie Barnes**  
 Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).  
*4 units, Win (Barnes, M), Spr (Barnes, M)*

**PWR 1GMG. Writing & Rhetoric 1: Love to Hate: The Rhetoric of Misanthropy**  
 Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).  
*4 units, Aut (Gemma, M)*

**PWR 1GMR. Writing & Rhetoric 1: Fearful Symmetry: The Rhetoric of the Double**  
 Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Exploration of the fictions of the double and the philosophies of personal identity, and how both anticipate and condition contemporary responses to the twin issues of human cloning and intellectual property. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, not given this year*

**PWR 1GMU. Writing & Rhetoric 1: Rhetoric of Krishna Murali**  
 Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).  
*4 units, Win (Murali, K), Spr (Murali, K)*

**PWR 1GMV. Writing & Rhetoric 1: Don't Take it Personally!: The Rhetoric of The Insult**  
 Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Analysis of how insults function rhetorically in specific situations and how they have catalyzed prolonged confrontations around race, education, politics, sexual orientation, and national

standing. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GMW. Writing & Rhetoric 1: Legal Rhetoric**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, Aut (Wallis, M)*

**PWR 1GMX. Writing & Rhetoric 1: Too Much Information?: The Rhetoric of Social Networking & Online Privacy**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Critical analysis of the ways in which online life intersects with real life around issues including privacy, authorship, and morality. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GNL. Writing & Rhetoric 1: Punk Rock and Rhetoric of Protest Music**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GRA. Writing & Rhetoric 1: Millions Like Us: The Rhetoric of Crowds**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include symbolic meaning of rock, sports, and political events; virtual crowds online; and use of crowds to shape ideology. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GRH. Writing & Rhetoric 1: 2012 & the Rhetoric of Apocalypse**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Analysis of the rhetoric of apocalypse as a cultural phenomenon. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GRL. Writing & Rhetoric 1: LGBTQAWTF: Queer Rhetorics**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GRN. Writing & Rhetoric 1: Lasting Only One Day: The Rhetoric of Ephemera and Other Discarded Things**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Exploration of ephemera and how they argue for their meaning as they collect and preserve the past while reflecting humantransience. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GRW. Writing & Rhetoric 1: Rhetoric of Rebecca Wilbanks**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, Win (Wilbanks, R), Spr (Wilbanks, R)*

**PWR 1GRY. Writing & Rhetoric 1: Fashionable Fables: The Rhetoric of Modern Mythology**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GSA. Writing & Rhetoric 1: Freakonomics and the Case Study: The Rhetoric of the Business Bestseller**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, Aut (Allison, S)*

**PWR 1GSD. Writing & Rhetoric 1: Masters of Style - The Rhetoric of Sophistication**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Examination of how style is mastered and deployed in a range of genres. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GTM. Writing & Rhetoric 1: The Rhetoric of Taste**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Examination of the rhetoric of taste as the luxurious product of a sophisticated society and as tedious, stultifying, snobby, or outright offensive. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GTX. Writing & Rhetoric 1: 'Making My Way Downtown': The Rhetoric of the City**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Through historic, literary, journalistic, and film portrayals of city life, we will analyze the idea of 'the city' as constructed through media and in the imaginations of its residents, and the way life in cities is really lived. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GVC. Writing & Rhetoric 1: The Rhetoric of Circus**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, not given this year*

**PWR 1GVS. Writing & Rhetoric 1: Rhetoric of Vanessa Seals**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, Win (Seals, V), Spr (Seals, V)*

**PWR 1GWJ. Writing & Rhetoric 1: Rhetoric of William Jones**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, Win (Jones, W), Spr (Jones, W)*

**PWR 1HR. Writing & Rhetoric 1: Fake News and the Rhetoric of Truthiness**

Development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Critical

analysis of the fake news phenomenon, considering its impact on the political process and how we discuss important issues of the day. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, not given this year*

**PWR 1JB. Writing & Rhetoric 1: From Mad Cow to Mad Corn: The Rhetoric of Food Science and Politics**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include how activists, nutritionists, food scientists, chemical companies, and legislative bodies articulate their concerns and argue their positions and how agribusiness and government respond to consumer concerns about food produced with the aid of chemicals. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, Aut (Bleakney, J)*

**PWR 1JH. Writing & Rhetoric 1: Lies and the Lying Liars Who Tell Them: Rhetoric and Deception**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Study of untruth, misrepresentation, and deception in journalistic and scientific rhetoric. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, not given this year*

**PWR 1JJK. Writing & Rhetoric 1: The Rhetoric of Futility**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, Win (Staff), Spr (Staff)*

**PWR 1JL. Writing & Rhetoric 1: Rhetoric and Humanitarian Intervention**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Examination of how media representations of world crises are crafted to persuade us to action, appealing to our senses of justice, pragmatism, outrage, and compassion. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, Win (Lee, J)*

**PWR 1JP. Writing & Rhetoric 1: The Rhetoric of Consumer Culture**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Students explore what consumerism says about the larger culture and the segmented groups within it, analyzing popular and scholarly texts as well as current trends in pop culture, to research how the activities of consumerism shape culture. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, not given this year*

**PWR 1JPA. Writing & Rhetoric 1: Contemplation or Action: The Rhetoric of a Liberal Arts Education**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Engagement with debates and issues related to liberal arts education, including the tension between education as training for a career and as a venue for developing the life of the mind. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Courses.html](http://ual.stanford.edu/AP/univ_req/PWR/Courses.html)  
*4 units, Spr (Peterson, J)*

**PWR 1JT. PWR 1: RHETORIC HEALTH CARE**

*4 units, not given this year*

**PWR 1KB. Writing & Rhetoric 1: Authentic Experience: The Rhetoric of Tourism**

Rhetorical and contextual analysis of readings; research; and

argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, not given this year*

**PWR 1KBA. Writing & Rhetoric 1: On Display: The Rhetoric of Museums and Exhibition Spaces**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, not given this year*

**PWR 1KD. Writing & Rhetoric 1: the Feature Article: Writing and Change**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. How various feature article writers argue the issues of soaring energy and food prices, serious market volatility, climate change, an ongoing war in the Middle East, and how terms like *‘crisis’* or *‘change’* impact the discussion. See [http://ual.stanford.edu/AP/univ\\_req/PWR/Courses.html](http://ual.stanford.edu/AP/univ_req/PWR/Courses.html)  
*4 units, Spr (DiPirro, K)*

**PWR 1KE. Writing & Rhetoric 1: The Science of Sports**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include sports at the level of cells and psychology, the science of sports equipment and sports spaces, the ethics of performance enhancement, and sports-related research projects on the Stanford campus. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, Spr (Myers, K)*

**PWR 1KM. Writing & Rhetoric 1: If These Walls Could Talk: The Rhetoric of Places and Spaces**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Explores the *‘language’* of man-made environments such as universities, theme parks, monuments, shopping malls, museums, and public buildings. Students analyze space through physical exploration and critical inquiry and discover the applications of rhetoric not only to traditional texts but to physical structures and spaces as well. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, not given this year*

**PWR 1KMA. Writing & Rhetoric 1: Metaphor and Motion: The Rhetoric of Sacred Space**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, not given this year*

**PWR 1KMB. Writing & Rhetoric 1: Cradle to Cradle: the Rhetoric of Sustainability**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
*4 units, not given this year*

**PWR 1KS. Writing & Rhetoric 1: Imagining Others: 21st Century Cosmopolitanism**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Exploration of cosmopolitanism, questions related to globalization, nationalism, citizenship, cultural values, aesthetics, and identity. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

4 units, not given this year

**PWR 1KSA. Writing & Rhetoric 1: Constructing Childhood**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Win (Savelson, K)

**PWR 1LK. Writing & Rhetoric 1: The Rhetoric and Politics of Satire**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Explores the ways that satirists use irony, exaggeration, and humor--among other rhetorical techniques--to make serious statements about the world. Juxtaposes historical and recent satirical writing to illuminate intellectual problems that are thousands of years old and sharply contemporary. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, not given this year

**PWR 1LKA. Writing & Rhetoric 1: Rhetoric, Social Media, and Virtual Worlds**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Exploration of the effects of social media and how we shape our identities and develop new habits of mind when we enter virtual worlds. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, not given this year

**PWR 1MF. Writing & Rhetoric 1: The Rhetoric of Urban Life**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, not given this year

**PWR 1MFA. Writing & Rhetoric 1: Shades of Green: The Rhetoric of Contemporary Environmentalism**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Spr (Feldman, M)

**PWR 1MJ. Writing & Rhetoric 1: Rock 'n' Rhetoric**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include rhetorical strategies and meaning of the lyrics of songs with multiple interpretations and how rock musicians construct arguments in their songs. Analysis of how surrounding cultural and historical contexts influence the significance and meaning of rock, pop, and hip-hop songs. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Aut (Ford, M), Win (Ford, M)

**PWR 1PB. Writing & Rhetoric 1: Supreme Court Rhetoric**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Analysis of the rhetoric of Supreme Court opinions, *amicus curiae* briefs, editorials about Court opinions, and pertinent lower court decisions. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Win (Bator, P)

**PWR 1PH. Writing & Rhetoric 1: He Said, She Said: The Rhetoric of Gender Politics**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include the ways in which news articles, movie

clips, magazine advertisements, television commercials, and other texts present gender roles, and how the roles and bodies of both sexes are presented as objects open to scrutiny, critique, exploitation, abuse, and awe. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Aut (Hanlon-Baker, P)

**PWR 1PL. Writing & Rhetoric 1: Writing Wrongs: Human Rights in the Age of Facebook**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Aut (Pell, J), Win (Pell, J)

**PWR 1RS. Writing & Rhetoric 1: Rhetoric and Stereotyping: American Indians and Others**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Aut (Shaw, D), Win (Shaw, D), Spr (Shaw, D)

**PWR 1RT. Writing & Rhetoric 1: The War Between Wars: the isms of modernism**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Analysis of the rhetoric of modernism in art, literature, and thought between the two world wars. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Aut (Taylor, R)

**PWR 1SB. Writing & Rhetoric 1: The Rhetoric of Technology**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include the arguments we make about technology, the arguments various technologies produce about us, and the ways in which rhetoric itself might be productively viewed as a technology for producing arguments. Students explore the social, economic, political, and psychological consequences of rapidly developing technologies. See [http://www.stanford.edu/AP\\_univ\\_req/PWR/Req.html](http://www.stanford.edu/AP_univ_req/PWR/Req.html).

4 units, Win (Brawn, S)

**PWR 1SG. Writing & Rhetoric 1: Body and Mind: The Rhetoric of Gesture**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Aut (Streit, S)

**PWR 1SH. Writing & Rhetoric 1: Strange Art, Stranger Politics: Absurdism and the Rhetoric of Social Action**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Topics include the benefits and drawbacks of deploying strange art as artistic and political protest, how breaking the aesthetic rules sometimes serves to argue for social change, and how absurdist protests succeed or fail to gain social traction. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, not given this year

**PWR 1SL. Writing & Rhetoric 1: New Media Rhetoric and Web 2.0**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Students define new media and debate the ideas of web 2.0; the virtue of Web 2.0 in digital game modifications and the potential subversive effects of web 2.0 on advertising restrictions; and look into the possibilities and limitations of democracy 2.0.

See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, not given this year*

**PWR 1SLA. Writing & Rhetoric 1: Advertising R Us: The Rhetoric of Advertising**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Win (Lee, S)*

**PWR 1SM. Writing & Rhetoric 1: The Elephant, the Tiger, and the Cellphone: Rhetoric of India and Indian Film**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Study of the rhetoric of the India of the new millennium, including issues of gender, caste, class, religion, sexuality, nationalism, diaspora, outsourcing, and globalization. Service Learning Course (certified by Haas Center). See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, not given this year*

**PWR 1SMA. Writing & Rhetoric 1: Humans and Things: The Rhetoric of Commodities and Commodification**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, not given this year*

**PWR 1SMB. Writing & Rhetoric 1: The Jewel in the Crown: The Rhetoric of (Post)Colonialism**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, not given this year*

**PWR 1SP. Writing & Rhetoric 1: Growing Up Global: The Rhetoric of Children's Culture Today**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Aut (Pittock, S), Spr (Pittock, S)*

**PWR 1SS. Writing & Rhetoric 1: Soap Operas and Soapboxes: The Rhetoric of Performance**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Students explore identity as a social, political, and cultural performance; how different situations call for particular styles of rhetorical performance; and how people evaluate and analyze different types of performances, including artistic and political performances, as well as the performances of everyday life. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Spr (Schuyler, S)*

**PWR 1SSA. Writing & Rhetoric 1: Real and Imagined Lives: Narrative, Rhetoric, and Identity**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Analysis of the rhetoric of identity as constructed in a range of narrative forms including fiction, memoirs, political campaigns, and social media. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, not given this year*

**PWR 1ST. Writing & Rhetoric 1: The Rhetoric of Biomedical Ethics**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Aut (Starkman, R), Win (Starkman, R)*

**PWR 1SU. Writing & Rhetoric 1: The World According to Bollywood: Indian Cinema and its Representations**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Analysis of representations of India's culture through Indian film and how such representations have coincided with India's economic success over the last two decades of the twentieth century, giving rise to a new trend in global popular culture. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, not given this year*

**PWR 1SUA. Writing & Rhetoric 1: Such a Long Journey: South Asian Diaspora in the World**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, not given this year*

**PWR 1SW. Writing & Rhetoric 1: Scandals, Private Lives, and Public Faces: The Rhetoric of Stanford**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Study of the early history and rhetoric of the public face of Stanford University, from the post-Gold Rush and Big Four railroad era to the building of the University. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Spr (Wyle, S)*

**PWR 1VS. Writing & Rhetoric 1: Eating-Animals: The Rhetoric of Animals, Food, and the Environment**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Aut (Stanescu, V)*

**PWR 1WG. Writing & Rhetoric 1: Reading Minds: The Rhetoric of Consciousness**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Examination of states of mind ranging from the radical self-possession cultivated through practice to altered states induced through drugs and trauma, illness, and religion. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, not given this year*

**PWR 2AH. Writing & Rhetoric 2: Ethnic Narratives and the Rhetoric of American Identity**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Exploration of how race and ethnicity in America have become subjects of personal negotiations and public perception. Addresses various topics such as biracial and bicultural identity, acculturation, and stereotyping. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Aut (Heredia, A), Spr (Heredia, A)*

**PWR 2AO. Writing & Rhetoric 2: Rhetoric and Global Leadership**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Analysis of

styles of leadership across the globe and communication strategies used to bring about change. Exploration of how global leaders learn cross-cultural rhetoric skills to adapt to dynamic and unfamiliar situations. See

[http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
4 units, *Win (O'Brien, A), Spr (O'Brien, A)*

**PWR 2CA. Writing & Rhetoric 2: Networked Rhetoric: Social Networks, Participatory Media and the Future of Wr**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Exploration of the issues surrounding participatory media and social networking in contemporary digital culture from the perspective of both theory and practice. See

[http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)  
4 units, *Win (Alfano, C)*

**PWR 2CK. pwr 2: rhetoric of kamrath**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, *Win (Kamrath, C)*

**PWR 2CR. Writing & Rhetoric 2: Revolutions in Environmental Rhetoric**

Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Examination of the motivations and appeals of environmental arguments, considering underlying assumptions and contexts of time, culture, audience, purpose, and mode of delivery. Participation in Community Writing Project, working with local nonprofit environmental organizations to produce real-world writing, multimedia, and/or speaking projects on these organizations' behalf. Work in the community will form the basis of the major research project. Service Learning Course (certified by Haas Center). Prerequisite: PWR 1. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, *not given this year*

**PWR 2CRA. Writing & Rhetoric 2: The State of California: Rhetoric of a Dream**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Service Learning Course (certified by Haas Center). See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, *not given this year*

**PWR 2DC. Writing & Rhetoric 2: The Popular Science of Sex**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Exploration of the intersection between social debate and scientific research about sex and gender; how social debates draw on, represent, respond to, and influence scientific studies; and how the process shapes our knowledge and beliefs about sex and gender. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

4 units, *not given this year*

**PWR 2DCA. Writing & Rhetoric 2: Race/Gender in the Obama Age**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Analysis of perceptions of race and gender seen through the political lens of the 2008 presidential campaign. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

4 units, *not given this year*

**PWR 2DH. Writing & Rhetoric 2: Me and My iPod: The Rhetoric of Identity**

Prerequisite: PWR 1. Further work in developing skills in

argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Study of the message, performance, and construction of identity, electronic renditions of the self, and the constant or changing nature of identity. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, *Spr (Hunter, D)*

**PWR 2DHA. Writing & Rhetoric 2: Scholar Activists Fix the World? The Rhetoric of Scholarship and Activism**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, *Win (Hunter, D)*

**PWR 2EE. PWR 2: RHETORIC OF ELLIS**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, *Spr (Ellis, E)*

**PWR 2GAW. Writing & Rhetoric 2: The Rhetoric of Cross-Cultural Communication**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. Exploration of how rhetoric functions in various cultures, considering body language, symbols, visual media, and the Internet. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, *Win (Watters, A)*

**PWR 2GM. Writing & Rhetoric 2: Unpredictable Dialogue: Art of the Interview, Art of the Essay**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Study of the rhetorical craft of the interview, exploring structure, language, timing, and development in a range of forums, including documentaries, radio, transcription, campus conversations, and television. Research of a Stanford professor's work, including interview. Presentation of findings from research and interview to the class. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, *Aut (Moyer, G), Spr (Moyer, G)*

**PWR 2HR. Writing & Rhetoric 2: What's So Funny? Humor, Race, Class and Gender**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Analysis of cartoons and jokes about and by feminists, LGBTs, ethnic minorities, and rednecks. Discussion of how jokes reflect important moral values about race, sex, gender, and religion. Exploration of how satire works as social criticism. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, *Aut (Rytkonen, H), Win (Rytkonen, H), Spr (Rytkonen, H)*

**PWR 2JB. Writing & Rhetoric 2: Rhetoric of Ethics in Research and Technology**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Study of the rhetoric of ethical discourse, including the ethical standards guiding research at Stanford and examples of ethical misconduct. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, *not given this year*

**PWR 2JH. Writing & Rhetoric 2: Cred: Rhetoric and Credibility in Research, Politics, and Everyday Life**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Work on making students more effective researchers and communicators in

their areas of interest, with a focus on gaining and projecting credibility. Exploration of how speakers and writers gain and lose credibility, how people evaluate the credibility of others, and how the rules of credibility are different in politics, in scholarship, and in popular culture. See

[http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, not given this year*

**PWR 2JL. Writing & Rhetoric 2: Domsday Rhetoric**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Investigation of how the doomsday epic expresses real concerns emerging from fields like technology, environmental studies, pathobiology, and politics. Consideration of apocalypticism as a mode of argument. Examination of how belief in the imminent destruction of the present world order influences our political decisions and personal behavior. Topics in religious eschatology and apocalypticism illuminate the genre's origins. See

[http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, not given this year*

**PWR 2JLA. Writing & Rhetoric 2: Speaking About Art: Narrating the Collections of the Cantor Art Center**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Exploration and theory of successful strategies of oral communication, considering how words and images (in this case works of art) work together to create meaning, culminating in creation of an audio guide for the Cantor Arts Center. See

[http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, not given this year*

**PWR 2JLB. Writing & Rhetoric 2: Rhetoric and Education Reform**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Analysis of social, ideological, and pedagogical perspectives on education reform. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html)

*4 units, Aut (Lee, J), Spr (Lee, J)*

**PWR 2JM. Writing & Rhetoric 2: Criminal Matters: Evidence, Detection, Expertise**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, not given this year*

**PWR 2JP. Writing & Rhetoric 2: The Rhetoric of Art and Commerce**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Examination of unspoken rules regarding the separation of creativity and commerce and arguments about how consumer culture influences the work of the artist. See

[http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Aut (Peterson, J), Win (Peterson, J)*

**PWR 2KD. Writing & Rhetoric 2: Un-Performing Ourselves: The Design and Craft of Presentations**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Exploration of how the application of performance techniques makes academic or professional presentations more compelling. See

[http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Aut (DiPirro, K), Win (DiPirro, K)*

**PWR 2KE. Writing & Rhetoric 2: Olympic Rhetoric: Studying the Spirit of the Games**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Analysis of Olympic media, looking specifically at race and gender in Olympic coverage; technological innovation and ethics in the Games; and Olympic history. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Win (Myers, K)*

**PWR 2KEA. Writing & Rhetoric 2: Competitive Women: Opportunity, Exposure, and Resistance in the World of Sports**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Examination of women in sports, looking specifically at issues of opportunity, exposure, and resistance; arguments made by, for, and against women playing sports; and the fight for equality in sports. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Aut (Myers, K)*

**PWR 2KEB. Writing & Rhetoric 2: Sports Appeal: Packaging and Promoting Stanford Athletics**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, not given this year*

**PWR 2KM. Writing & Rhetoric 2: Power Shift:: The Rhetoric of Sustainable Energy**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Focus on the rhetoric and ethics of sustainable energy, investigating both the alarmism and optimism which fuel this debate. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, Win (Moekle, K), Spr (Moekle, K)*

**PWR 2KMA. Writing & Rhetoric 2: Natural Enemies: The Rhetoric of Invasion Biology**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Study of the use of metaphors and argument in the context of invasion biology and species conservation, especially the effects those metaphors and claims have on practice and policy outcomes. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, not given this year*

**PWR 2KS. Writing & Rhetoric 2: Happy Now? The Anatomy of Happiness**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. How the emerging field of happiness studies involves psychologists, economists and policy-makers in defining what happiness is and determining how society might create the conditions in which it can flourish. Exploration of how happiness studies can uncover happiness at the heart of arguments about democracy, religion, and personal lifestyles, exploring what makes people happy across cultural, social, and national contexts. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, not given this year*

**PWR 2KSA. Writing & Rhetoric 2: The Rhetoric of Childhood and Children's Culture**

Rhetorical and contextual analysis of readings; research; and argument. Focus is on development of a substantive research-based argument using multiple sources. Individual conferences with instructor. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

*4 units, not given this year*

**PWR 2KSB. Writing & Rhetoric 2: The Rhetoric of Design**

**Thinking**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Aut (Savelson, K), Spr (Savelson, K)

**PWR 2LK. Writing & Rhetoric 2: Rhetoric in Crisis!**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Spr (Konstantinou, L)

**PWR 2MF. Writing & Rhetoric 2: Speaking About Art: Narrating the Cantor's Collections**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Study of strategies for developing museum audio guides, including analysis of existing guides and behind-the-scenes work in the Cantor Arts Center. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, not given this year

**PWR 2MFA. Writing & Rhetoric 2: Searching for San Jose: Urban Studies Audio Walking Tours**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, not given this year

**PWR 2MFB. Writing & Rhetoric 2: Sustainability: Making an Impact with Research and Rhetoric**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Aut (Feldman, M), Win (Feldman, M)

**PWR 2MR. Writing & Rhetoric 2: Technology and the Demonic: Rhetoric Against the Machine**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, not given this year

**PWR 2PB. Writing & Rhetoric 2: The Power of Political Photography**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Topics include the role of photographers and photo-journalists in helping viewers see the world differently and the political implications of fashion photography, environmental photography, music photography, and fashion photography. Traditional readings as well as archival and field research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Aut (Bator, P), Spr (Bator, P)

**PWR 2PH. Writing & Rhetoric 2: Equal Treatment: The Rhetoric of Public Health**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Study of how public health discourses influence policymaking, practitioners, and community members, how the public understands the rhetoric of public health, and how that understanding affects public and government support of health-related research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, not given this year

**PWR 2PHA. Writing & Rhetoric 2: You Go Girl: The Rhetoric of Gender Equality**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, not given this year

**PWR 2PHB. Writing & Rhetoric 2: Indecision 2012: The Rhetoric of Politics**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Win (Hanlon-Baker, P), Spr (Hanlon-Baker, P)

**PWR 2PL. PWR 2: RHETORIC OF PELL**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Spr (Pell, J)

**PWR 2RS. Writing & Rhetoric 2: Rhetoric of Delphine Red Shirt**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Spr (Staff)

**PWR 2RT. Writing & Rhetoric 2: Stepping Out of the Shadows: Music, Bass Guitar, and the Rhetoric of Revoluti**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Analysis of how the emergence of the electric bass in the fifties helped usher in a revolution that challenged commonplace assumptions concerning nationality, race, gender, and sexuality. Exploration of the history of the electric bass as a case study of musical revolutions, focusing on how music revolutions reflect emerging ideologies in any given culture. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Spr (Taylor, R)

**PWR 2RTA. Writing & Rhetoric 2: Postmodernism and the Rhetoric of Uncertainty**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Inquiry into major theories of the postmodern and analysis of postmodernism's effect on culture. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Win (Taylor, R)

**PWR 2SB. Writing & Rhetoric 2: Writing the Future: The Rhetoric of Popular Science and Science Fiction**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Analysis of science fiction and popular writing about science and technology as arguments about where we are headed, where we are, who we are, and what we value. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Aut (Brawn, S), Spr (Brawn, S)

**PWR 2SG. PWR 2: RHETORIC OF STREIT**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).

4 units, Win (Streit, S), Spr (Streit, S)

**PWR 2SH. Writing & Rhetoric 2: The Ugly American: Tourism and the Rhetoric of Power**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Analysis of the Ugly American in aesthetics and culture, in films and novels, tourist locations and business conferences, to illuminate America's complex role in the world. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).  
4 units, not given this year

**PWR 2SL. Writing & Rhetoric 2: Got Ads: Visual Design in Print Advertising**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Introduction to the rhetorical interplay of visuals, text, and design layout in print advertising, and narrative, classificatory, and dynamic patterns in print advertisement campaigns. Culminates in design and presentation of an original ad campaign. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).  
4 units, Spr (Lee, S)

**PWR 2SM. Writing & Rhetoric 2: Dirty, Pretty Things: The Rhetoric of Objects and Objectification**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Study of objects and objectification, from the relationships shared by cultures, objects, and people to how human beings have been objectified through colonialism, enslavement, sex-trafficking, and organ trade. Material objects discussed in terms of staging, collecting, design, location, inheritance, and cultural meaning. Service Learning Course (certified by Haas Center). See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).  
4 units, not given this year

**PWR 2SMA. Writing & Rhetoric 2: Love and Longing in Bombay: Romance and Rebellion in Indian Film**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).  
4 units, not given this year

**PWR 2SP. PWR 2: RHETORIC OF PITTOCK**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).  
4 units, Win (Pittock, S)

**PWR 2SS. Writing & Rhetoric 2: The Rhetoric of Mass Audiences**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Exploration of how the ability to reproduce a work for increasingly large audiences has fundamentally changed the nature of art and its effect on culture. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).  
4 units, Aut (Schuyler, S), Win (Schuyler, S)

**PWR 2SSA. Writing & Rhetoric 2: Rhetoric of Reality Culture**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).  
4 units, not given this year

**PWR 2ST. PWR 2: RHETORIC OF STARKMAN**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. See [\[bin/drupal\\\_ual/AP\\\_univ\\\_req\\\_PWR\\\_Courses.html\]\(http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\_ual/AP\_univ\_req\_PWR\_Courses.html\).  
4 units, Spr \(Starkman, R\)](http://www.stanford.edu/dept/undergrad/cgi-</a></p>
</div>
<div data-bbox=)

**PWR 2SU. Writing & Rhetoric 2: Hollywood Bollywood: Rhetoric of India in Global Cinema**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Exploration of how the rhetoric of India is constructed for an international audience through films and how such representations have coincided with India's recent economic success to give rise to a new trend in global popular culture. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).  
4 units, not given this year

**PWR 2SW. Writing & Rhetoric 2: The Rhetoric of World War II: Strategies of Persuasion in War Time**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Through work with the Hoover Archives, exploration of how written, visual, and film sources were used by a variety of countries to influence their citizens during WWII. Topics include the rhetoric of eugenics, political speeches, war posters, and how advertising during WWII pursued clear agendas to support government goals. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).  
4 units, Aut (Wyle, S), Win (Wyle, S)

**PWR 2WG. Writing & Rhetoric 2: All That Jazz: The Rhetoric of American Musical Theater**

Prerequisite: PWR 1. Further work in developing skills in argument and research-based writing, with emphasis on both written and oral/multimedia presentation of research. Exploration of the conventions and strategies that define the genre of American musical theater. Analysis of how contemporary musicals mirror, revise, and even subvert traditional rules while addressing a range of current issues. See [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_ual/AP\\_univ\\_req\\_PWR\\_Courses.html](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_ual/AP_univ_req_PWR_Courses.html).  
4 units, Win (Goldberg, W), Spr (Goldberg, W)

**PWR 4. Directed Writing**

Further work on developing writing. Analysis and research-based argument, writing for a range of audiences and in varied disciplinary contexts. Workshops and individual conferences. May be repeated for credit. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.  
3-4 units, not given this year

**PWR 5. Independent Writing**

Individual writing project under the guidance of a PWR instructor. May be repeated for credit. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.  
1-5 units, Aut (Staff), Win (Diogenes, M), Spr (Staff), Sum (Staff)

**PWR 6. Writing Workshop**

1-2 units, not given this year

**PWR 91. Intermediate Writing**

For students who have completed the first two levels of the writing requirement and want further work in developing writing abilities, especially within discipline-specific contexts and nonfiction genres. Individual conferences with instructor and peer workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For topics, see [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_pwr/advanced\\_pwr](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_pwr/advanced_pwr).  
3 units, not given this year

**PWR 91A. Intermediate Writing: The Art of Storytelling**

A variety of storytelling forms to build a repertoire of tools for telling stories, oral, textual, visual, sonic, or a combination. For students who have completed the first two levels of the writing requirement and want further work in developing writing abilities, especially within discipline-specific contexts and nonfiction genres. Individual conferences with instructor and peer workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For more information, see [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_pwr/advanced\\_pwr](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_pwr/advanced_pwr).  
3 units, Aut (Willihnganz, J)

**PWR 91B. Intermediate Writing: Digital Rhetoric, New Media, and Transformations in Writing**

Writing operates in multiple modes (word, image, sound) in the new media environment. Examples of texts - invention, drafting, revision, and communication - governed by the evolving conditions of a new, digital rhetoric. For students who have completed the first two levels of the writing requirement and want further work in developing writing abilities, especially within discipline-specific contexts and nonfiction genres. Individual conferences with instructor and peer workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For more information, see [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_pwr/advanced\\_pwr](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_pwr/advanced_pwr).

*3 units, Win (Alfano, C)*

**PWR 91C. Intermediate Writing: The Stanford Daily Show**

Class will study fake news programs such as the Daily Show, the Colbert Report and the Onion, and will produce The Stanford Daily Show, our own version of a fake news program. For students who have completed the first two levels of the writing requirement and want further work in developing writing abilities, especially within discipline-specific contexts and nonfiction genres. Individual conferences with instructor and peer workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For more information, see [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_pwr/advanced\\_pwr](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_pwr/advanced_pwr).

*3 units, Spr (Rytkonen, H)*

**PWR 191. Advanced Writing**

Open to undergraduates and graduate students. Crafting nonfiction prose in a range of genres. Focus is on the relationship of genre and form; attention to developing stylistic versatility. Individual conferences with instructor. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.

*3 units, not given this year*

**PWR 192. Projects in Research, Writing, and Rhetoric**

Advanced work on research projects, early drafts of theses, proposals. Shared work, discussions, and examination of methods, rhetorics, and styles in all disciplines. May be repeated for credit. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.

*1-5 units, not given this year*

**PWR 193. Writing the Honors Thesis**

For students from all majors in the process of writing an honors thesis. Review of key elements of thesis process, including literature reviews, structure, argumentation, style, and documentation. Group and individual workshops. Prerequisite: first two levels of the writing requirement or equivalent transfer credit.

*1-5 units, not given this year*

**PWR 194. Topics in Writing and Rhetoric**

Understanding rhetoric as readers and interpreters of texts and to develop skills as writers and speakers. Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For topics, see [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_pwr/advanced\\_pwr](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_pwr/advanced_pwr).

*4 units, not given this year*

**PWR 194A. The Rhetoric of Social and Political Movements**

Analyzing the rhetorical foundation of social and political movements informs our awareness of how terms such as feminist, conservative, activist, queer, and policy maker are differently understood and used among those movements. This advanced rhetoric course will ask students to examine how rhetors and rhetorical positions shape and are shaped by social and political movements. Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For details, see [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_pwr/advanced\\_pwr](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_pwr/advanced_pwr).

*3 units, Spr (Hanlon-Baker, P)*

**PWR 194B. Advanced Writing**

Prerequisite: first two levels of the writing requirement or equivalent transfer credit. For details, see [http://www.stanford.edu/dept/undergrad/cgi-bin/drupal\\_pwr/advanced\\_pwr](http://www.stanford.edu/dept/undergrad/cgi-bin/drupal_pwr/advanced_pwr).

*4 units, not given this year*

**PWR 195. Writing Center Peer Tutor Seminar**

(Same as ENGLISH 195W) For students selected to serve as peer writing tutors in the Stanford Writing Center and/or at other campus sites. Readings on and reflection about writing processes, the dynamics of writing and tutoring situations, tutoring techniques, learning styles, diversity, and ethics. Observation of tutoring sessions, written responses to readings, and other written work.

*3 units, Spr (Bleakney, J)*

# CENTERS, LABORATORIES, AND INSTITUTES

Independent research laboratories, centers, and institutes perform multidisciplinary research that extends beyond the scope of any one of the University's organized schools. Consult the links below for full information on these units.

Information on academic programs for undergraduates is provided by following the links on the right.

## OFFICE OF VICE PROVOST AND DEAN OF RESEARCH

*Vice Provost and Dean of Research and Dean of the Independent*

*Laboratories, Centers, and Institutes: Ann M. Arvin*

*Offices: 450 Serra Mall, Main Quadrangle, Building 60*

*Mail Code: 94305-2064*

*Office Phone: 650-723-8789*

*Office Fax: 650-723-0662*

*Web Site: <http://stanford.edu/dept/DoR>*

The following independent Laboratories, Centers, and Institutes report to the Vice Provost and Dean of Research:

## BIOLOGICAL AND LIFE SCIENCES

- Bio-X, the interdisciplinary program related to bioengineering, biomedicine, and biosciences, <http://biox.stanford.edu>
- Spectrum (formerly the Stanford Center for Clinical and Translational Education and Research), <http://spectrum.stanford.edu>

## ENVIRONMENTAL SCIENCES

- Precourt Institute for Energy, <http://pie.stanford.edu/>
  - Precourt Energy Efficiency Center, <http://peec.stanford.edu>
  - Global Climate and Energy Project (G-CEP), <http://gcep.stanford.edu>
- Woods Institute for the Environment, <http://woods.stanford.edu>

## HUMANITIES AND SOCIAL SCIENCES

- Center for Advanced Study in the Behavioral Sciences (CASBS), <http://www.casbs.org>
- Center for the Study of Language And Information (CSLI), <http://www-csli.stanford.edu>
- Freeman Spogli Institute for International Studies (FSI), <http://fsi.stanford.edu>
  - Center on Democracy, Development, and the Rule of Law (CDDRL), <http://cddrl.stanford.edu>
  - Stanford Health Policy (Center for Health Policy/Center for Primary Care and Outcomes Research), <http://healthpolicy.stanford.edu>
  - Center for International Security and Cooperation (CISAC) <http://cisac.stanford.edu>
  - Walter H. Shorenstein Asia-Pacific Research Center (Shorenstein APARC), <http://aparc.stanford.edu>
  - The Europe Center, <http://fce.stanford.edu>
  - Program on Food Security and the Environment, <http://fse.stanford.edu>
  - Inter-University Center for Japanese Language Studies (IUC), <http://www.stanford.edu/dept/IUC>
  - Program on Energy and Sustainable Development (PESD), <http://pesd.stanford.edu>

- Stanford Program on International and Cross-Cultural Education (SPICE), <http://spice.stanford.edu>
- Human-Sciences and Technologies Advance Research Institute (H-STAR), <http://hstar.stanford.edu>
  - Media-X, <http://mediax.stanford.edu>
  - Stanford Center for Innovations in Learning (SCIL), <http://scil.stanford.edu>
- Stanford Center on Longevity (SCL), <http://longevity.stanford.edu>
- Stanford Humanities Center, <http://shc.stanford.edu>
- Stanford Institute for Economic Policy Research (SIEPR), <http://siepr.stanford.edu>

## PHYSICAL SCIENCES

- Edward L. Ginzton Laboratory, <http://stanford.edu/group/ginzton>
- Geballe Laboratory for Advanced Materials (GLAM), <http://stanford.edu/group/glam>
- Kavli Institute for Particle Astrophysics and Cosmology (KIPAC), <http://www-group.slac.stanford.edu/kipac>, operated jointly with SLAC National Accelerator Laboratory
- Photon Ultrafast Laser Science and Engineering (PULSE), <http://pulse.slac.stanford.edu>, operated jointly with SLAC National Accelerator Laboratory
- Stanford Institute for Materials and Energy Sciences (SIMES), <http://simes.slac.stanford.edu>, operated jointly with SLAC National Accelerator Laboratory
- W. W. Hansen Experimental Physics Laboratory (HEPL), <http://hepl.stanford.edu>

## CENTERS REPORTING TO THE DEAN OF HUMANITIES AND SCIENCES

- Center for Space Science and Astrophysics, <http://www.stanford.edu/group/CSSA>
- Institute for Research in the Social Sciences (IRiSS), <http://iriss.stanford.edu>
  - Stanford Center for Population Research (SCPR), <http://iriss.stanford.edu/scpr>
  - Stanford Center for the Study of Poverty and Inequality (CPI), <http://iriss.stanford.edu/CPI>
  - Stanford Center for American Democracy (SCAD) (web site in development)
  - Stanford Center on Philanthropy and Civil Society (PACS), <http://pacscenter.stanford.edu>
- Michelle R. Clayman Institute for Gender Research, <http://gender.stanford.edu>
- Morrison Institute for Population and Resource Studies, <http://www.stanford.edu/group/morrinst>

## OTHER ACADEMIC PROGRAMS AND CENTERS, AND INDEPENDENT RESEARCH LABORATORIES, CENTERS, AND INSTITUTES

- Hoover Institution on War, Revolution and Peace, <http://www.hoover.org>
- SLAC National Accelerator Laboratory (SLAC), <http://www.slac.stanford.edu>
- Stanford Synchrotron Radiation Laboratory (SSRL), <http://ssrl.slac.stanford.edu>

## CENTER FOR SPACE SCIENCE AND ASTROPHYSICS

*Emeriti: (Professors)* Robert Cannon, I-Dee Chang, Daniel B. DeBra, W. Gary Ernst, Von R. Eshleman, Robert A. Helliwell, Bruce B. Lusignan, Ronald J. P. Lyon, Laurence A. Manning, Bradford W. Parkinson, J. David Powell, Peter A. Sturrock, G. Leonard Tyler, Robert V. Wagoner; *(Professors, Research)* Donald L. Carpenter, Aldo V. daRosa, Antony Fraser-Smith

*Director:* Roger W. Romani

*Associate Directors:* Umran S. Inan, Philip H. Scherrer

*Professors:* Roger Blandford (Physics, SLAC), Elliot Bloom (SLAC), Lambertus Hesselink (Electrical Engineering), Umran S. Inan (Electrical Engineering), Steven Kahn (Physics, SLAC), Tune Kame (SLAC), Peter F. Michelson (Physics), Vahé Petrosian (Physics), Roger W. Romani (Physics), Norman H. Sleep (Geophysics), Howard Zebker (Electrical Engineering, Geophysics)

*Associate Professors:* Tom Abel (Physics, SLAC), Steve Allen (Physics, SLAC), Sarah Church (Physics), Guenther Walther (Statistics)

*Assistant Professors:* Stefan Funk (Physics, SLAC), Chao-Lin Kuo (Physics, SLAC), Risa Wechler (Physics, SLAC)

*Professors (Research):* C-W. Francis Everitt (HEPL), Philip H. Scherrer (Physics)

*Consulting Professor:* Martin Walt (Electrical Engineering)

*SLAC Staff Physicist:* Grzegorz Madejski

*Center Offices:* Varian, Room 316

*Mail Code:* 94305-4060

*Phone:* (650) 723-1439

*Email:* danav@stanford.edu

*Web Site:* <http://www.stanford.edu/group/CSSA>

The Center for Space Science and Astrophysics is an interdepartmental organization coordinating research in space science and astrophysics. Its members are drawn from the Department of Geological and Environmental Sciences in the School of Earth Sciences; the departments of Aeronautics and Astronautics, Electrical Engineering, and Mechanical Engineering in the School of Engineering; the departments of Applied Physics, Physics, and Statistics in the School of Humanities and Sciences; the W. W. Hansen Experimental Physics Laboratory; and the SLAC National Accelerator Laboratory. Its membership also includes all faculty and appropriate staff at the Kavli Institute for Particle Astrophysics and Cosmology, located at SLAC and the Physics department.

The facilities of the center are available to any interested and qualified student, who must be admitted by and registered in a department. The departments of Aeronautics and Astronautics, Applied Physics, Electrical Engineering, Mechanical Engineering, and Physics offer opportunities leading to an M.S. or Ph.D. degree for work in space science or astrophysics. The center also offers opportunities to undergraduates who may, for instance, participate in research projects in their junior or senior years, on a part-time basis during the school year or on a full-time basis during the summer. The Astronomy Course Program operates a small student observatory where students may gain practical experience in astronomical observing.

## FREEMAN SPOGLI INSTITUTE FOR INTERNATIONAL STUDIES (FSI)

The Freeman Spogli Institute for International Studies (FSI) provides opportunities for undergraduate research through the

CISAC Interschool Honors Program in International Security Studies and the CDDRL Undergraduate Honors Program. For information on the institute that manages student fellowship programs, see <http://fsi.stanford.edu/fellowships/>.

### INTERSCHOOL HONORS PROGRAM IN INTERNATIONAL SECURITY STUDIES

*Co-Directors:* Martha Crenshaw, Coit D. Blacker

The Center for International Security and Cooperation (CISAC) coordinates a University-wide Interschool Honors Program in International Security Studies. Students chosen for the honors program intern with a security-related organization, attend the program's honors college in Washington, D.C., in September, attend a year-long core seminar on international security research, and produce an honors thesis with policy implications. Upon fulfilling individual department course requirements and completing the honors program, students graduate in their major with a certificate in Honors in International Security Studies. To be considered for the program, students must demonstrate sufficient depth and breadth of international security course work. Successful applicants to the program are expected to have taken: POLISCI 114S, International Security in a Changing World; MS&E 193, Technology in National Security; and at least one related course such as ECON 150/PUBLPOL 104, Economic Policy Analysis; STS 110/MS&E 197/PUBLPOL 103B, Ethics and Public Policy; SOC 160, Formal Organizations; PUBLPOL 102/SOC 166, Organizations and Public Policy; POLISCI 110B, Strategy, War, and Politics; POLISCI 110D, War and Peace in American Foreign Policy; POLISCI 123/PUBLPOL 101, Politics and Public Policy; or POLISCI 114T, Major Issues in International Conflict Management. Students in the program enroll in IIS 199, Interschool Honors Program in International Security Studies, in Autumn, Winter, and Spring quarters. Information about and applications to this program may be obtained from the Center for International Security and Cooperation, C206-7 Encina Hall Central, telephone (650) 725-9132 or <http://cisac.stanford.edu>.

### INTERSCHOOL HONORS PROGRAM IN DEMOCRACY, DEVELOPMENT, AND THE RULE OF LAW

*Directors:* Kathryn Stoner-Weiss (AY 2011-12), Francis Fukuyama (AY 2012-13)

The Center on Democracy, Development, and the Rule of Law (CDDRL) Undergraduate Senior Honors Program provides students majoring in any Stanford academic department the opportunity to conduct an independent research project focused on the fields of democracy, development, and the rule of law under CDDRL faculty guidance. Students are required to complete a year-long honors research seminar that begins autumn quarter of the junior year. They will spend the last quarter of the senior year working independently with their faculty advisor to complete and submit their honors thesis ahead of their formal defense in mid-May. Upon fulfilling individual department course requirements and completing the honors program, students graduate with a certificate in Honors in Democracy, Development, and the Rule of Law.

Students interested in the program consult with their prospective honors advisers in their junior year to determine the tentative thesis topic, which should have some degree of policy relevance. Prerequisites for the program include: a 3.5 grade-point average at the time they apply; a strong overall academic record; sufficient depth and breadth in the fields of democracy, economic and social development, rule of law, and human rights course work; and demonstrated skills in writing and conducting independent research.

Students are required to attend honors college in Washington, D.C. in September before autumn quarter classes begin. Applicants are discouraged from studying abroad during the duration of the CDDRL Undergraduate Honors program.

- Required course work includes:
- INTNLREL/POLISCI 114D (5 units) CDDRL's flagship undergraduate lecture course taught during Autumn Quarter, which ideally should be completed before the student enters the honors program.
  - DDRL Honors Research Methods Seminars: Students meet their peers and faculty on a weekly basis to present their project theses and receive feedback.
    - Spring Quarter, Junior Year
      - DDRL 189 (3 units) Honors Research
    - Autumn Quarter, Senior Year
      - DDRL 190 (3 units) Honors rResearch
    - Winter Quarter, Senior Year
      - DDRL 190 (3 units) Honors Research
  - Two additional courses that relate to the fields of democracy, development, and the rule of law (please see the program application for a list of examples).

Admitted students must be able to fulfill all course requirements in their individual majors by the time they graduate, in addition to the units required for the honors program.

For more information, contact Sarina Beges, CDDRL Program Manager at sbeges@stanford.edu or see <http://cddrl.stanford.edu>.

## WOODS INSTITUTE FOR THE ENVIRONMENT: GOLDMAN INTERSCHOOL HONORS PROGRAM IN ENVIRONMENTAL SCIENCE, TECHNOLOGY, AND POLICY

The Woods Institute for the Environment coordinates a University-wide interschool honors program in environmental science, technology, and policy. Undergraduates planning to participate in the honors program are required to pursue studies in environmental sciences, technology, and policy, with a concentration in a single discipline. After completion of the prerequisite units, students join small group honors seminars to work with faculty members in the environmental field on an honors thesis that incorporates both scientific principles and policy aspects of environmental issues.

Courses in environmental studies appear under the course listings of the schools of Earth Sciences, Engineering, and Humanities and Sciences. Information about and applications to this program may be obtained by phoning (650) 723-5697 and at <http://woods.stanford.edu/education/goldman>.

The Woods Institute provides support for student group projects focusing on the environment and sustainability. For details, see <http://woods.stanford.edu/students/projects.html>.

The Woods Institute also sponsors a weekly series of talks on a broad range of energy topics under the rubric of CEE/ENERGY 301, Energy Seminar. For more information, see <http://woods.stanford.edu/cgi-bin/energyseminar.php>.

# LIBRARIES AND COMPUTING RESOURCES

## STANFORD UNIVERSITY LIBRARIES AND ACADEMIC INFORMATION RESOURCES

*University Librarian and Director of Academic Information Resources:* Michael A. Keller  
*Web Site:* <http://library.stanford.edu>

Stanford University Libraries and Academic Information Resources (SULAIR) includes more than 30 libraries and programs supporting research, teaching, and learning at Stanford University. SULAIR acquires and delivers library collections in all formats, establishes policies and standards to guide the use of academic information resources, develops training and support programs for academic uses of computers, and maintains a broad array of electronic information resources, including the online library catalog and several hundred article and indexing databases and electronic journal subscriptions.

In each library unit, knowledgeable professional staff provide assistance in locating and using print and online information resources. Subject specialists and reference librarians are available for individual consultation, group classes, demonstrations, and special workshops by request.

Libraries throughout campus provide group and individual study spaces, public computers, personal laptop connections, photocopy machines, and digital scanners for use by Stanford faculty, staff, and students.

For information about library hours, see <http://libraryhours.stanford.edu>.

In support of the University's academic mission, Academic Computing Services provides technology expertise, resources and services to students and faculty. Academic Computing Services supports the use of technology in teaching, learning, research, and community; operates and manages technology-enabled teaching and learning environments including classrooms and public study spaces, the Multimedia Studio in Meyer Library, the Digital Language Lab, and computer clusters in Green Library, Tresidder Union, and the student residences; provides technology education, consulting support, and multimedia services at Meyer and in the residences; provides faculty-specific computing resources through the Academic Technology Specialist Program and Academic Technology Lab; and provides technology support to Stanford University Libraries' services.

Information about the library collections, facilities, services, and policies is available at <http://library.stanford.edu>.

Further information about library services and resources is available from the Information Center staff in Cecil H. Green Library at <http://infocenter.stanford.edu>, and from reference staff in all University libraries.

### CENTRAL CAMPUS LIBRARIES

The Cecil H. Green Library (East and Bing Wings) maintains research collections in the humanities, social sciences, area studies, and interdisciplinary areas. These collections number approximately 2.8 million volumes. Major services in Green Library include: the Information Center, the Media Microtext

Center, the Jonsson Reading Room, the Lane Reading Room, the Bender Room, Loan Desk and Privileges, Interlibrary Services, course reserves, the Department of Special Collections, and the University Archives.

The J. Henry Meyer Memorial Library houses the East Asia Library as well as the Academic Computing Services group of SULAIR and provides study, multimedia, consulting, and instructional support services. In addition, Meyer Library houses the University's Digital Language Lab, technology enabled study spaces and classrooms, the Academic Technology Lab, and the central offices of Student Computing and Academic Computing Services.

## BRANCH LIBRARIES

Humanities and Social Sciences Branch Libraries include the Art and Architecture Library, Cubberley Education Library, East Asia Library, Music Library, and Archive of Recorded Sound.

Science Branch Libraries include the Branner Earth Sciences Library, Engineering Library, Falconer Biology Library, Mathematical and Computer Sciences Library, Harold A. Miller Library at the Hopkins Marine Station, Physics Library, and Swain Library of Chemistry and Chemical Engineering.

For a complete list of campus libraries, see: <http://libraries.stanford.edu>.

## COORDINATE LIBRARIES

**J. Hugh Jackson Library, Graduate School of Business**

*Director:* Kathy Long

**Lane Medical Library**

*Director:* Debra Ketchell

**Crown Law Library**

*Director:* Paul Lomio

**SLAC National Accelerator Laboratory Library**

*Director of Technical Information Services:* Patricia Kreitz

## HOOVER INSTITUTION ON WAR, REVOLUTION AND PEACE

*Director:* John Raisian

*Web Site:* <http://www.hoover.org>

Since its founding by Herbert Hoover in 1919 as a special collection dealing with the causes and consequences of World War I, the Hoover Institution has become an international center for documentation, research, and publication on political, economic, social, and educational change in the 20th and 21st centuries.

The Hoover Library and Archives include one of the largest private archives in the world and contain outstanding area collections on Africa, East Asia, Eastern Europe, Russia and the former Soviet Union, Latin America, the Middle East, North America, and Western Europe.

Holdings include government documents, files of newspapers and serials, manuscripts, memoirs, diaries, and personal papers of men and women who have played significant roles in the events of these centuries, the publications of societies and of resistance and underground movements, the publications and records of national and international bodies, both official and unofficial, and books and pamphlets, many of them rare and irreplaceable. The materials are open to all Stanford students, faculty, and staff, to scholars from outside the University, and to the public at large.

## INFORMATION TECHNOLOGY SERVICES (IT SERVICES)

*Web Site:* <http://it-services.stanford.edu>

IT Services manages the University's central information technology infrastructure and provides hundreds of services and applications for use in academic and business activities. Support is provided in four layers:

- Participation and client-focused leadership in institutional IT planning, including strategies for data center expansion, centrally managed storage and backup, and business continuity and disaster recovery.
- Applications and services for departments and end-users including email, calendaring, wireless connectivity, web authentication, and Windows and Linux server hosting. These services are supported by a help desk, contract-support consultants, online self-help, and training.
- Applications and services that support other campus service providers, including the help desk, change management, and network registration systems.
- A communications and collaboration infrastructure robust enough to support advanced network, voice, and web-based services.

To learn about the variety of information technology resources available at Stanford, see <http://computing.stanford.edu>. For assistance with technology services at Stanford, contact the Stanford IT Help Desk at (650) 725-HELP (5-4357) or submit a request through <http://helpsu.stanford.edu>.

## THE CONTINUING STUDIES PROGRAM

*Dean and Associate Provost:* Charles Junkerman

*Associate Dean and Director:* Dan Colman

*Program Offices:* 482 Galvez Mall

*Mail Code:* 94305-6079

*Phone:* (650) 725-2650; *Fax:* (650) 725-4248

*Email:* [continuingstudies@stanford.edu](mailto:continuingstudies@stanford.edu)

*Web Site:* <http://continuingstudies.stanford.edu>

The Continuing Studies Program provides adults from Stanford and surrounding communities the opportunity to take classes on a part-time basis for intellectual enrichment, both personal and professional. Courses and events are offered in all four academic quarters, with over 350 courses planned throughout the year.

The faculty are primarily drawn from the ranks of the University's professoriate. The program presents a wide variety of courses, with a central concentration in the liberal arts, including literature, history, art and architecture, and music.

Tuition discounts are available to University employees, Stanford students and faculty, Stanford Alumni Association members, educators, and those over age 65.

For a course catalogue, contact the Continuing Studies Program by mail, phone, or email as above.

The Continuing Studies Program also administers the Master of Liberal Arts Program and Summer Session.

# MASTER OF LIBERAL ARTS PROGRAM

*Associate Dean and Director:* Linda Paulson

*Participating Faculty:* Russell Berman (Comparative Literature, German Studies), Marc Bertrand (French and Italian, emeritus), Jay Bhattacharya (Medicine), Eamonn Callan (Education), Gerry Dorfman (Hoover Institution, Political Science), Michele Elam (English), Martin Evans (English), Paula Findlen (History), Larry Friedlander (English), Kenneth Fields (English), Hester Gelber (Religious Studies), Albert Gelpi (English, emeritus), Barbara Gelpi (English, emerita), Robert Gregg (Religious Studies, emeritus), Tom Grey (Music), Hans Ulrich Gumbrecht (French and Italian), Van Harvey (Religious Studies, emeritus), Gavin Jones (English), Charles Junkerman (Continuing Studies Program), Nancy Kollmann (History), Marsh McCall (Classics, emeritus), Mark Mancall (History, emeritus), Scotty McLennan (Religious Life), David Palumbo-Liu (Comparative Literature), Linda Paulson (English), Denis Phillips (Education, emeritus), Ronald Rebolz (English, emeritus), Rush Rehm (Drama, Classics), John Rick (Anthropology), John Rickford (Linguistics), Paul Robinson (History, emeritus), Ramón Saldívar (English), Paul Seaver (History, emeritus), Thomas Sheehan (Religious Studies), Robert Siegel (Microbiology and Immunology), Peter Stansky (History, emeritus), Stephen Stedman (Freeman Spogli Institute for International Studies), Thomas Wasow (Linguistics), Ernlé Young (Medicine, emeritus), Steven Zipperstein (Jewish Culture and History)

*Program Offices:* 482 Galvez Mall

*Mail Code:* 94305-6079

*Phone:* (650) 725-0061

*Email:* mlaprogram@stanford.edu

*Web Site:* <http://mla.stanford.edu>

Courses offered by the Master of Liberal Arts Program are listed under the subject code MLA on the *Stanford Bulletin's* ExploreCourses web site.

*Program Description*—The Master of Liberal Arts (MLA) program aims to provide a flexible, interdisciplinary program for returning adult students who seek a broad education in the liberal arts. The underlying premise of the MLA program is that knowledge gained through an interdisciplinary course of study leads to intellectual independence and satisfaction not always found in discipline-based programs of study. The goals of the MLA program are to develop advanced critical thinking, to foster intellectual range and flexibility, and to cultivate an individual's ability to find the connections among different areas of human thought: art, history, literature, music, philosophy, political science, science, and theology.

The program is designed with part-time students in mind: seminars meet in the evening, and students complete the degree in 4-5 years. All master's seminars are taught by members of the Stanford faculty. Seminar size is limited to 20 students.

*Degree Requirements*—Candidates for the MLA degree must complete a minimum of 50 units of course work with at least a grade point average of 3.3 (B+). These units must include a three-quarter foundation course (equal to 12 units total), one 4-unit core introductory seminar for second-year students, at least seven 4-unit MLA seminars, and a 6-unit master's thesis. Students must also fulfill distribution requirements in each of the following areas: humanities; social science or social policy; and science, engineering, or medicine.

*Foundation Course*—During the Autumn, Winter, and Spring following admission to the program, a three-quarter foundation course is required of all students. The purpose of this course is to lay the groundwork for the interdisciplinary, intercultural studies the student will shortly undertake. The foundation course will

introduce students to the broad framework of history, literature, philosophy, political science, and art.

*Core Seminar*—During the first quarter of the second year, students take the core introductory seminar, MLA 102, An Introduction to Interdisciplinary Graduate Study. This seminar prepares students for interdisciplinary graduate work at Stanford. Students concentrate on writing a critical graduate paper, conducting library research, presenting the results of their research, and productively participating in a collaborative seminar.

*MLA Seminars*—Students are required to take at least seven MLA seminars of four units each. Each year, at least nine seminars are offered in the MLA program. Each MLA course requires a substantial seminar paper. Students are encouraged to use these papers as a way to investigate new fields of interest, as well as a way to develop different perspectives on issues in which they have an ongoing interest.

*Master's Thesis*—The MLA program culminates in the master's thesis. Students approaching the end of the program write a thesis, approximately 75-100 pages in length, that evolves out of work they have pursued during their MLA studies. The thesis is undertaken with the prior approval of the MLA program, and under the supervision of a Stanford faculty member. During the process of writing the thesis, students are members of a work-in-progress group, which meets regularly to provide peer critiques, motivation, and advice. Each student presents the penultimate draft of the thesis to a colloquium of MLA faculty and students, in preparation for revising and submitting the final draft to the adviser and to the MLA program.

*Enrollment Requirements*—MLA students must enroll for each academic year from the time of original matriculation until conferral of the degree. To remain active, students must either: (a) complete a minimum of two courses (eight units) in one academic year, defined as from the beginning of Autumn Quarter through the end of the following Summer Quarter; or (b) be actively working on their thesis and regularly attend a minimum of three quarters of the work-in-progress meetings from the time the student enrolls in work-in-progress through graduation.

*Timeline for Completion*—All requirements for the Master of Liberal Arts degree must be completed within five years after the student's first term of enrollment in the program. If extraordinary circumstances prevent completion within five years, a student may submit a written petition for a maximum one-year extension to the Associate Dean and Director. This petition is reviewed by a committee which makes a recommendation to the Director; the final decision is at the discretion of the Director. To be considered, the petition must be submitted on or before May 1 of the student's fifth year in the program.

*Registration*—Master of Liberal Arts students enroll in courses through Stanford's Axess system.

## SUMMER SESSION

*Associate Dean:* Patricia Brandt

*Assistant Dean of Summer College:* Jim Sirianni

*Program Offices:* 482 Galvez Mall

*Mail Code:* 94305-6079

*Phone:* (650) 723-3109; *Fax:* (650) 725-6080

*Email:* [summersession@stanford.edu](mailto:summersession@stanford.edu)

*Web Site:* <http://summer.stanford.edu>

Students attending Stanford Summer Session are enrolled in either a regular degree program, the Summer Visitor Program, or the High School Summer College.

The regular degree program is for students who are candidates for a Stanford degree and who are continuing their academic work in Summer Quarter. Degree-seeking Stanford students should indicate on Axess during Spring Quarter that they intend to register for Summer Quarter. Separate application is not required.

The Summer Visitor Program is for students who are not presently candidates for a Stanford degree. It is open to students

and adults who have taken at least one course at another college or university. Qualified high school students who have completed at least their sophomore year may apply to the High School Summer College program.

Students in Stanford Summer Session, in general, enjoy the privileges of students in the regular degree programs except that work completed cannot be applied toward a Stanford degree or credential until the student has been admitted to regular standing. Admission as a summer visitor does not imply later admission to matriculated status. However, should the visitor matriculate at a later date through normal admission procedures, the summer work may be applied toward the requirements for a Stanford degree or credential at the discretion of the University or academic department.

Students in the Summer Visitor Program or the High School Summer College are not matriculated Stanford University students, and not all University student policies apply to such students. The University reserves the right, at its discretion, to withhold registration from or require withdrawal from the program of any Summer Visitor Program or High School Summer College student or applicant.

Stanford University admits qualified students of any race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, and gender identity to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, Stanford prohibits unlawful discrimination, including harassment, on the basis of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity, or any other characteristic protected by applicable law in the administration of the University's programs and activities.

For more information, contact Summer Session by email, mail, phone, or fax using the listings above. Information is updated annually in January and may also be found online at <http://summer.stanford.edu>.

## STUDENT AFFAIRS

*Vice Provost for Student Affairs:* Greg Boardman  
*Associate Vice Provost and Dean of Student Life:* Chris Griffith  
*Associate Vice Provost and Dean of Educational Resources:* Sally Dickson  
*Associate Vice Provost and Director of Vaden Health Center:* Ira Friedman  
*Associate Vice Provost and University Registrar:* Thomas C. Black  
*Associate Vice Provost and Dean of Residential Education:* Deborah Golder  
*Web Site:* <http://studentaffairs.stanford.edu/>

The Student Affairs division encompasses a broad range of programs and services for undergraduates and graduate students, including the Office of Residential Education, University Registrar, Student Life, Educational Resources, Vaden Health Center, Career Development Center, Office of Accessible Education, Graduate Life Office, Haas Center for Public Service, Judicial Affairs, Bechtel International Center, Asian American Activities Center, Black Community Services Center, El Centro Chicano, LGBT Community Resources Center, Native American Cultural Center, Women's Community Center, Office of Student Activities and Leadership, Diversity and First Gen Programs, Office of Sexual Assault and Relationship Abuse Education and Response, and the Office of Alcohol Policy and Education.

The Vice Provost for Student Affairs reports directly to the Provost and is responsible for providing leadership, policy direction, and administrative support for budget, personnel, facilities, and development, as well as oversight of the efficiency and effectiveness of each of the division's units. The Vice Provost interacts with the President, the Provost, the Vice Provosts, faculty, schools, department representatives, students, and parents. The Vice Provost is a member of the Stanford University Cabinet, and ex officio member of the Stanford Alumni Association Board of Directors, Stanford Athletic Board, and Haas Center for Public Service National Advisory Board. The Vice Provost also attends the Senate meetings of the Academic Council.

## STUDENT SERVICES CENTER

*Office:* Tresidder Memorial Union, 2nd floor  
*Contact* via *HelpSU:*  
<https://remedyweb.stanford.edu/helpsu/helpsu?pcat=StuAcct&tag=10772>  
*Phone:* (650) 723-7772 or (866) 993-7772 (toll-free)  
*Web Site:* <http://studentservicescenter.stanford.edu>  
*The AskJane Online Answers Resource:* <http://askjane.stanford.edu>

The Student Services Center (SSC) is committed to providing a single point of friendly, professional service for answers to questions concerning administrative and financial issues. The center strives to resolve 90% of students' issues upon first contact. The SSC represents Student Financial Services, the Office of the University Registrar, the University Cashier's Office, the Financial Aid Office, and Stanford ID Card Services, and is able to assist students with questions including those related to University billing, financial aid disbursements, refunds, payroll deductions, payment plan, enrollment, Stanford degree policies and procedures, Stanford ID card, and forms pickup and submission.

## DEAN OF STUDENT LIFE

*Dean of Student Life:* Chris Griffith  
*Office:* Old Union  
*Phone:* (650) 723-2733  
*Web Site:* <http://studentaffairs.stanford.edu/studentlife>

The Dean of Student Life has responsibility for overseeing the development, implementation, and monitoring of comprehensive student life programs. The unit consists of the Graduate Life Office, Office of Student Activities and Leadership, Judicial Affairs, Organization Conduct Board, Office of Sexual Assault and Relationship Abuse Education & Response, Old Union, and 5-SURE. The Dean reports to the Vice Provost for Student Affairs and is a member of his executive group.

## DEAN OF EDUCATIONAL RESOURCES

*Dean of Educational Resources:* Sally Dickson

*Office:* Old Union

*Phone:* (650) 721-4037

*Web Site:* <http://studentaffairs.stanford.edu/educationalresources>

The Dean of Educational Resources is responsible for overseeing the development, implementation, and monitoring of comprehensive programs relating to ethnic, gender, career, and learning needs and interests of student groups. The unit is comprised of the Asian American Activities Center, Black Community Services Center, El Centro Chicano, LGBT Community Resources Center, Native American Cultural Center, Women's Community Center, Diversity and First Gen Programs, Bechtel International Center, Career Development Center, and the Office of Accessible Education. The Dean also has oversight responsibility for the Haas Center for Public Service, as well as responsibility for the Acts of Intolerance Protocol. The Dean reports to the Vice Provost for Student Affairs and serves as a member of his executive group.

## OFFICE OF ACCESSIBLE EDUCATION (OAE)

*Offices:* 563 Salvatierra Walk

*Phone:* (650) 723-1066; TDD (650) 723-1067

*Web Site:* <http://studentaffairs.stanford.edu/oae>

The Office of Accessible Education (OAE) is the campus office designated to work with students, faculty, and staff to put in place appropriate accommodations for all Stanford students with disabilities, at both the undergraduate and graduate levels (including the professional schools). The OAE provides a wide array of support services, accommodations, and programs to remove barriers to full participation in the life of the University.

In reaching its determinations about appropriate accommodations, the OAE considers factors such as the documentation from professionals specializing in the area of the student's diagnosed disability, the student's functional limitations, and the student's input and accommodation history in regard to particular needs and limitations. The OAE then works with the student and relevant faculty and staff through an interactive process designed to achieve an accommodation that meets the needs of all parties.

## CAREER DEVELOPMENT CENTER

*Center Office:* 563 Salvatierra Walk

*Web Site:* <http://cardinalcareers.stanford.edu>

*Counseling Services*—Monday through Friday, 9 a.m. to 12 noon, 1 p.m. to 5 p.m.; (650) 725-1789.

*Employment Services*—Monday through Friday, 8:15 a.m. to 4:30 p.m.; (650) 723-9014.

*Reference File Services*—Monday through Friday, 10 a.m. to 12 noon, 1 p.m. to 4 p.m.; (650) 723-1548.

The Career Development Center (CDC) offers services such as counseling, workshops, presentations, on-campus recruiting, job/internship databases, reference file services, library resources, and alumni networking, to help students make informed decisions and to plan for life after Stanford.

Services are available to undergraduate and graduate students, and all students are encouraged to visit in person or via the web. Programs and services are free to students; limited services are available to alumni and student spouses/domestic partners.

The following suggestions may assist students in getting the most out of the CDC:

- Visit early in a Stanford career.
- Register with the CDC's Cardinal Career online system to access internships, part-time and full-time.
- Gather general career information through the career resource library, jobs and internship database, handouts, and alumni network.
- Inquire about individual counseling for all stages of career planning and development.
- Participate in workshops and other programs to clarify career goals.
- Use the Reference File Service to ease the management of applications for graduate school or employment.

## COMMUNITY CENTERS

There are six ethnic and community centers that support students who seek services associated with a particular group or community. Each center has its own site and professional staff who advise and counsel students. In addition, the centers sponsor programs throughout the year that foster intellectual, personal, and cultural growth. Detailed information is available on the following web sites:

- Asian American Activities Center: <http://stanford.edu/group/a3c>
- Black Community Services Center: <http://stanford.edu/dept/BCSC>
- El Centro Chicano: <http://stanford.edu/dept/elcentro>
- LGBT Community Resources Center: <http://lgbt.stanford.edu>
- Native American Cultural Center: <http://stanford.edu/dept/nacc>
- Women's Community Center: <http://womenscntr.stanford.edu>

## DIVERSITY AND FIRST GEN PROGRAMS

*Director:* Tommy Lee Woon

*Office:* Old Union, Suite 206

*Phone:* (650) 721-6870

*Email:* [tlw@stanford.edu](mailto:tlw@stanford.edu)

Established in 2010 to serve first generation and low-income students and help them be successful, the Office of Diversity and First Gen Programs provides:

- a *Thrive Guide* to publicize the abundance of support available
- contact information for student groups, staff, faculty, and alumni for networking and mentoring
- signature programs and special events to build community
- administrative support and advocacy for diversity programs, especially those highlighting socioeconomic issues

## GRADUATE LIFE OFFICE

*Graduate Life Office:* Escondido Village Office, 859 Comstock Circle

*Graduate Life Office, Graduate Community Center:* 750 Escondido Road

*Phone:* (650) 736-7078

*Email:* [graduatelife@stanford.edu](mailto:graduatelife@stanford.edu)

*Web Site:* <http://glo.stanford.edu>

The Graduate Life Office (GLO) works with students on and off campus and with student groups, including Community Associates (student residence staff), the Graduate Student Programming Board, and the Graduate Student Council, to create an inclusive environment through programs in the residences and campus-wide. The Graduate Community Center (GCC) serves as a focal point for meetings and activities in the graduate community.

The GLO staff also works with individual students who need information and support or who may be experiencing personal difficulties. Staff members are knowledgeable about and have access to support and resources available throughout the University. Staff work closely with student services administrators in academic departments to provide consultation and services to students in need.

### GRADUATE STUDENT RESIDENCE PROGRAM

The University's philosophy of graduate student housing is based on the premise that supporting high quality graduate scholarship and research is central to the mission of the University. By providing affordable housing in proximity to academic resources, the University creates an environment conducive to research and intellectual dialogue among students, their peers, and faculty members. The Community Associate (CA) program in the residences serves as a supportive resource for residents and to connect student neighbors through social events and activities to build a sense of community in the residences.

## HAAS CENTER FOR PUBLIC SERVICE

*Center Offices:* 562 Salvatierra Walk

*Mail Code:* 8620

*Phone:* (650) 723-0992

*Web Site:* <http://haas.stanford.edu>

The Haas Center for Public Service connects academic study with public service to strengthen communities and develop effective public leaders. The center aspires to develop aware, engaged, and thoughtful citizens who contribute to the realization of a more just and humane world.

To accomplish these objectives, the center collaborates with associated units at Stanford to implement programs in the following areas of work.

- Through the center's fellowship programs, undergraduates perform summer internships in nonprofit organizations, foundations, and government agencies locally, nationally, and internationally. Postgraduate fellowships allow graduating seniors to work with a mentor in a nonprofit or public agency for a year.
- The Public Service Leadership Fellows Program provides an opportunity for students who want to be intentional about their leadership development. Center staff also provides leadership development through training, advising, and resources to Stanford in Government, Alternative Spring Break, and other student groups engaged in service.

- With support from the center, Stanford faculty members have created service-learning courses that involve Stanford students in providing direct service and community-based research efforts in collaboration with local schools and other partner agencies. The center's Public Service Scholars Program supports seniors writing honors theses that combine academic research with service to communities.
- Faculty from Stanford's School of Education collaborate with center staff to provide curriculum guidance and training for tutors and mentors at nearby schools. Another program trains Stanford students to bring results of scientific research to neighborhood programs. The federally supported Community Service Work-Study program, administered in conjunction with the University's Financial Aid Office, allows students to satisfy work-study obligations year-round by working in community organizations and public agencies.
- The postgraduate and alumni programs help students, particularly graduating seniors, identify opportunities to assist in launching their public service careers in nonprofit and government agencies, and in the private sector in service-related positions. The Haas Center houses the Center on Philanthropy and Civil Society, a program of the Institute for Research in the Social Sciences (IRiSS).

Students interested in public service fellowships, service-learning courses, community-based research, public and community service internships for youth and education, or service organization leadership development should contact the center.

## BECHTEL INTERNATIONAL CENTER

*Web Site:* <http://icenter.stanford.edu>

The Bechtel International Center (I-Center) is a meeting place for students and senior research scholars at Stanford from throughout the world and for internationally oriented U.S. students, faculty, and short-term visitors on the campus. Through a variety of social, cultural, and educational programs, I-Center facilities are used to acquaint students and scholars with the life of the University and the community, and to bring them together in activities of mutual interest.

The Center believes that international educational exchange nurtures a lifelong global perspective, and plays a key role in supporting Stanford's standing as a truly international university in the following ways:

- Provides information about and assistance with obtaining and maintaining legal status in the U.S. to foreign students, scholars, and Stanford departments.
- Advises U.S. students who are pursuing scholarships for study and research abroad.
- Enables foreign students, scholars, and their family members at Stanford to receive maximum academic, cultural, and personal benefit from their stays in the U.S.
- Contributes to international activities at Stanford by helping to create a welcoming and supportive environment that is responsive to the needs of the international community.
- Facilitates professional meetings between visiting international delegations and their Stanford counterparts.
- Provides opportunities for Stanford students, faculty, staff, and members of the local community to broaden their horizons by interacting with people from different cultures through programs to increase international awareness and understanding.

# JUDICIAL AFFAIRS AND STUDENT CONDUCT

Office: Tresidder Memorial Union, 2nd floor  
Mailing Address: 459 Lagunita Drive, Suite 9  
Mail Code: 94305-3010  
Phone: (650) 725-2485  
Fax: (650) 736-0247  
Web Site: <http://judicialaffairs.stanford.edu>  
Email: [judicial.affairs@stanford.edu](mailto:judicial.affairs@stanford.edu)

The primary codes of conduct for students are the Fundamental Standard and Honor Code. Cases of alleged violations of the University's Honor Code, Fundamental Standard, and other student conduct or University policies now proceed through an established student judicial process based upon the Student Judicial Charter of 1997, which can be found in its entirety at the University's Office of Judicial Affairs web site at <http://judicialaffairs.stanford.edu>. The web site also contains the policies, rules, and interpretations, as well as the University's Student Conduct Penalty Code, applicable to those students found responsible for violating the Honor Code, the Fundamental Standard, or other University policy or rule.

Through at least December 2011, allegations of sexual misconduct, sexual harassment, stalking, or dating violence proceed through the Dean's Alternate Misconduct Review Process. See <http://www.stanford.edu/dept/vpsa/judicialaffairs/judicialprocess/ar.htm>.

When a violation of the Fundamental Standard, Honor Code, or other University policy or rule governing student conduct is alleged, or whenever a member of the University community believes such a violation has occurred, he or she should contact the Office of Judicial Affairs.

## FUNDAMENTAL STANDARD

Students at Stanford are expected to know, understand, and abide by the Fundamental Standard, which is the University's basic statement on behavioral expectations articulated in 1896 by Stanford's first President, David Starr Jordan, as follows:

"Students are expected to show both within and without the University such respect for order, morality, personal honor, and the rights of others as is demanded of good citizens. Failure to do this will be sufficient cause for removal from the University."

*Actions that have been found to be in violation of the Fundamental Standard include:*

- Physical assault
- Property damage
- Forgery
- Theft
- Sexual harassment or other sexual misconduct
- Misrepresentation in seeking financial aid, University housing, University meals, or other University benefits
- Driving on campus while under the influence of alcohol
- Misuse of computer equipment or email
- Sending threatening or obscene messages

There is no standard penalty which applies to violations of the Fundamental Standard. Penalties range from a formal warning to expulsion. Each case is fact specific; considerations include the nature and seriousness of the offense, the motivation underlying the offense, and precedent in similar cases.

## HONOR CODE

The Honor Code is the University's statement on academic integrity. It is essentially the application of the Fundamental Standard to academic matters. Provisions of the Honor Code date from 1921, when the honor system was established by the

Academic Council of the University Faculty at the request of the student body and with the approval of the President. The Honor Code reads:

- A. The Honor Code is an undertaking of the students, individually and collectively:
  1. that they will not give or receive aid in examinations; that they will not give or receive unpermitted aid in class work, in the preparation of reports, or in any other work that is to be used by the instructor as the basis of grading;
  2. that they will do their share and take an active part in seeing to it that others as well as themselves uphold the spirit and letter of the Honor Code.
- B. The faculty on its part manifests its confidence in the honor of its students by refraining from proctoring examinations and from taking unusual and unreasonable precautions to prevent the forms of dishonesty mentioned above. The faculty will also avoid, as far as practicable, academic procedures that create temptations to violate the Honor Code.
- C. While the faculty alone has the right and obligation to set academic requirements, the students and faculty will work together to establish optimal conditions for honorable academic work.

*Examples of conduct that has been found to be in violation of the Honor Code include:*

- Copying from another's examination paper or allowing another to copy from one's own paper
- Unpermitted collaboration
- Plagiarism
- Revising and resubmitting a quiz or exam for regrading without the instructor's knowledge and consent
- Representing as one's own work the work of another
- Giving or receiving aid on an academic assignment under circumstances in which a reasonable person should have known that such aid was not permitted

For more information, see the Interpretations and Applications of the Honor Code at <http://stanford.edu/dept/vpsa/judicialaffairs/guiding/honorcode>.

The standard penalty for a first offense is a one quarter suspension from the University and 40 hours of community service. In addition, many faculty members issue a 'No Pass' for the course in which the violation occurred.

## OLD UNION

Stanford's student union, known as the Old Union, serves as a hub for student activities on campus. The central structure in a three-building complex, the Old Union has administrative offices for ASSU, Office of Student Activities (OSA), Dean of Student Life, and Dean of Educational Resources. It also houses a multifunction center known as CIRCLE (Center for Inter-Religious Community, Learning, and Experiences), meeting rooms for student use, and the Axe and Palm which offers casual dining. Adjoining the Old Union, the Nitery houses a black-box theater and El Centro Chicano, and the Clubhouse is home to the Asian American Activities Center and the Native American Cultural Center.

## OFFICE OF RESIDENTIAL EDUCATION

Web Site: <http://www.stanford.edu/dept/resed/>

The Office of Residential Education is responsible for developing the policies, programs, and staffing which support the intellectual, educational, and community-building activities in student residences. The conviction behind the Stanford residence

program is that formal teaching, informal learning, and personal support in residences play an important role in a Stanford education.

## RESIDENTIAL EDUCATION PROGRAM

The Residential Education program provides Stanford undergraduates with a small community experience within a large research university. Residential Education programs extend the classroom into the residences and complement the academic curriculum with activities and experiences that contribute to students' preparation for a life of leadership, intellectual engagement, citizenship, and service. An extensive network of staff, including many who live in the residence halls, supports students during their undergraduate careers.

## RESIDENCE DEANS

Residence Deans provide assistance to on- and off-campus undergraduate students. They can advise students about personal matters, occasionally intervene directly in behavioral problems or mental health concerns, and assist with personal emergencies. Advice is also available on issues of academic probation or suspension, leaves of absence, special concerns of students, and administrative matters. Residence Deans work closely with the Dean of Student Life and other University offices. They are assigned to specific residences and to off-campus students. For further information, undergraduates should call Residential Education at (650) 725-2800. For assistance, graduate students can consult Assistant Deans in the Graduate Life Office at (650) 736-7078.

## SEXUAL ASSAULT AND RELATIONSHIP ABUSE EDUCATION AND RESPONSE

*Web Site:* <http://www.stanford.edu/group/svab>  
*Email:* [saraoffice@stanford.edu](mailto:saraoffice@stanford.edu)

The Office of Sexual Assault and Relationship Abuse Education and Response (SARA) addresses policies, programs, protocols, and services related to interpersonal relationship violence on campus. The office is designed to coordinate response to reports of sexual assault, relationship abuse, and stalking to ensure the delivery of compassionate, comprehensive, and consistent services. The office also assists with educational outreach and training to increase awareness, sensitivity, and community accountability in the prevention of these acts. Questions and concerns can be addressed to [saraoffice@stanford.edu](mailto:saraoffice@stanford.edu).

## STUDENT ACTIVITIES AND LEADERSHIP

*Web Site:* <http://studentaffairs.stanford.edu/sal>

The Office of Student Activities and Leadership (SAL), located in Old Union, supports student activities, over 600 student organizations and the ASSU through publications, workshops, one-on-one consultation, advising and major event planning support. SAL also provides fundraising expertise for student groups and leadership opportunities for students.

## VOLUNTARY STUDENT ORGANIZATIONS

There are over 600 different Voluntary Student Organizations

(VSOs) at Stanford. VSOs are those organizations: (1) in which membership is not mandatory and is nondiscriminatory, (2) in which membership is both open and limited to current Stanford students registered in a degree-granting program, (3) in which students make all organizational decisions, and (4) whose purposes and procedures are consistent with the goals and standards of the University. In order to use University facilities, the Stanford name, or to receive ASSU funding, all voluntary student organizations must register with the University through the Office of Student Activities, Old Union, room 206.

As a condition of registration, each voluntary student organization must file and have approved each of the following:

1. A statement of purpose and organizational constitution.
2. A statement about membership eligibility.
3. Clear procedures for officer elections.
4. Identification of the authorized representatives of the group, who must be a currently registered student, and at least five active members in the organization who are currently registered students.

Each voluntary student organization must renew its registration with the University annually, early in Autumn Quarter, by submitting new registration materials.

If a voluntary student organization that is registered with the University seeks to use University facilities for meetings open to more than its own members and to specifically invited guests, such meetings shall be subject to the regulations of the Committee on Public Events. All organization events held in University facilities must receive event approval from the Office of Student Activities and Stanford Events.

A voluntary student religious organization may hold open meetings in University facilities only with the approval of the Office of the Dean for Religious Life.

A registered voluntary student organization may advocate publicly a position on a public issue, provided the organization clearly identifies itself, and provided such an organization in any public statement makes clear it does not represent or speak for the University or for the Associated Students.

No student group may use University space or facilities or receive other University support for purposes of supporting candidates for public office. Groups may use public places such as White Plaza for tables, speeches, and similar activities; may have intermittent use of on-campus meeting rooms; and may request to reserve auditoriums and similar space for public events including speeches by political candidates as long as all University guidelines are followed.

## TRESIDDER MEMORIAL UNION

Tresidder Memorial Union (TMU) is a center of community activity on the Stanford campus. It houses a variety of restaurants and meeting rooms, a ticket office and campus information center, a convenience store, banking and credit union offices with ATMs, a fitness center, FedEx/Kinkos and a hair salon.

TMU is also the home of several administrative offices: Meeting Services, Judicial Affairs, Residential Education, Student Services Center, Stanford Catering, Stanford Dining (Meal Card program), the LAIR computer center and the Office of the Vice Provost for Student Affairs.

## VADEN HEALTH CENTER

*Center Office:* 866 Campus Drive  
*Web Site:* <http://vaden.stanford.edu>

The Allene G. Vaden Health Center strictly protects the confidentiality of information obtained in medical care and counseling.

## MEDICAL SERVICES

Medical Services (650-498-2336, ext. 1) is the first stop for diagnosis and treatment of illness, injury, and ongoing conditions, as well as preventive counseling and education. Services available without additional charge for students who have paid the Campus Health Service fee include:

- Medical appointments in general medicine and sports medicine.
- Medical advice for routine concerns throughout the day. When Medical Services is closed, advice for urgent conditions is available from the on-call physician.
- Referral to specialists, primarily at Stanford Hospital and Clinics and Menlo Medical Clinic.

Additional services (fees apply):

- Allergy injections, immunizations, travel services, physical exams for employment and scholarships, HIV testing, laboratory, X-rays, drug screening (academic year only).
- Pharmacy (650-498-2336, ext. 3) and physical therapy (650-723-3195) are available on site.

## COUNSELING AND PSYCHOLOGICAL SERVICES (CAPS)

CAPS (650-723-3785) helps students who experience a wide variety of personal, academic, and relationship concerns. Services available without additional charge for students who have paid the Campus Health Service Fee include:

- Evaluation and brief counseling, including personal, couples and group therapy. Students requesting or requiring longer, ongoing therapy incur fees.
- Workshops and groups that focus on students' social, personal and academic effectiveness.
- Crisis counseling for urgent situations 24 hours a day.
- Consultation and outreach to faculty, staff, and student organizations.

## YWCA SEXUAL ASSAULT CENTER AT STANFORD

The YWCA Sexual Assault Center at Stanford assists students, staff, faculty and other Stanford campus affiliates who are victims of sexual assault. Located on the first floor of Vaden Health Center, it is open by appointment or drop-in office hours, Monday through Thursday, 2:00-4:00 PM. The center also can be reached at its 24-hour campus telephone line (650) 725-9955.

## HEALTH PROMOTION SERVICES

Health Promotion Services (650-723-0821) educates and supports students to help them make informed, healthy decisions about their lifestyle. Services include:

- Individual preventive counseling and resource referral concerning nutrition, weight management, eating and body image, alcohol, tobacco and other drug use, sexual assault and harassment, relationships, intimacy and gender issues, and sexual health.
- Health education speakers, programs, and events and workshops at student residences, community centers, student organizations, and for new students (such as Real World: Stanford).
- Academic courses and internships.
- Student groups and volunteer opportunities including Peer Health Educators, HIV Peer Anonymous Counseling and Testing (HIV\*PACT), Sexual Health Peer Resource Center (SHPRC), and CPR/First Aid classes.

## HEALTH INSURANCE

All registered students are required to have health insurance. Call (650) 723-2135 for more information. Cardinal Care, the University-sponsored plan for students, fulfills this requirement. Insured by Aetna Student Health (medical), and ValueOptions (mental health), Cardinal Care features comprehensive, worldwide coverage, services by referral at Stanford University Medical Center and Menlo Medical Clinic, and lowest costs when one initiates care at Vaden Health Center. Stanford does not sponsor a health insurance plan for dependents; for available options, see <http://vaden.stanford.edu/insurance/dependent.html>. Options for voluntary dental insurance are also offered.

# OTHER SERVICES AND PROGRAMS

## BOOKSTORE

*Web Site:* <http://stanfordbookstore.com>

Organized in 1897, Stanford Bookstore, (650) 329-1217, located at 519 Lasuen Mall (White Plaza), provides a diverse selection of books, course materials, and supplies to the students, faculty, staff, and community in and surrounding Stanford. The bookstore carries over 130,000 titles, including a wide selection of medical books and books written by Stanford authors, making it one of the largest bookstores in the nation. The bookstore also carries medical instruments, Stanford logo apparel, gifts and souvenirs, periodicals, and features a café that provides an enhanced shopping experience. The Computer Store, in the main branch, sells academically priced computer hardware and software. Other services include shipping of purchases, gift cards, book buyback, fax service, postage stamp sales, an ATM, and Enterprise Rent-A-Car hotline. There are four branches in addition to the Stanford Bookstore that also serve the community: the Stanford Athletics Shop (formerly the Track House Sports Shop), (650) 327-8870, underneath the Cobb Track and Angell Field bleachers, is the headquarters for Stanford Athletic Gear; Tresidder Express convenience store, (650) 723-9224 in Tresidder Union; the Stanford Shop, (650) 614-0295, at the Stanford Shopping Center, provides Stanford apparel; and the Bookshop, (650) 725-2775, at the Cantor Center for the Arts, carries books on the arts, fine gifts, apparel, and jewelry.

## DIVERSITY AND ACCESS OFFICE

*Office:* Mariposa House, 585 Capistrano Way

*Mail Code:* 94305-8230

*Phone:* (650) 723-0755; *TTY:* (650) 723-1216

*Email:* [equal.opportunity@stanford.edu](mailto:equal.opportunity@stanford.edu),  
[disability.access@stanford.edu](mailto:disability.access@stanford.edu)

*Web Site:* <http://stanford.edu/dept/diversityaccess>

The Diversity and Access Office has two primary missions:

1. To oversee University compliance with nondiscrimination and equal opportunity laws (including but not limited to Title VI, Title VII, and Title IX), as well as the regulations relating to affirmative action. This includes collecting, monitoring, reporting, and analyzing personnel data regarding the hiring, promotion, and retention of women and minorities.
2. To oversee University compliance with federal and state disability-related laws, including (but not limited to) the Americans with Disabilities Act, and Sections 503 and 504 of the Rehabilitation Act. This includes providing certain non-academic services (and accommodations) to students with disabilities, and providing assistance and information to staff and faculty with disabilities needing workplace accommodations. The office also provides auxiliary aids and services to the public visiting Stanford and attending public events. In addition, the office monitors disability access on campus and provides information regarding web accessibility.

## STANFORD CONFERENCE SERVICES

*Phone:* (650) 723-3126

*Email:* [conferenceinquiries@stanford.edu](mailto:conferenceinquiries@stanford.edu)

*Web Site:* <http://conference.stanford.edu>

A conference is defined as any student, youth, or adult group that convenes for part of a day (including a luncheon), overnight, or for several days, outside the regular or summer academic sessions for registered students. Policies concerning conferences are the responsibility of the offices of the President and the Provost.

To make arrangements for hosting a new, academically sponsored residential summer conference during the mid-June through late-August time frame, contact Stanford Conference Services by phone or email as listed above. Stanford Conference Services also offers meeting planning services on a year-round basis for academically sponsored conference groups seeking assistance with planning and managing residential and non-residential conferences. In addition, conference organizers seeking to conduct conferences outside of the late August to early June time frame can also contact the non-academic facilities scheduling in the Office of the University Registrar, (650) 723-6755 or [reg-events@stanford.edu](mailto:reg-events@stanford.edu), or contact Stanford Events, (650) 723-2551 or [stanfordevents@stanford.edu](mailto:stanfordevents@stanford.edu).

Academic sponsorship by a Stanford dean or department head is required for first time conferences hosted by University departments or by conferences hosted by external organizations interested in meeting at Stanford. Conferences initiated by University departments or external organizations must demonstrate consistency with the University's academic mission. For summer conferences, the sponsoring department submits its proposal to the Director of Stanford Conference Services for review in terms of available facilities and for the approval of the President's Office. At least half of the participants in any summer conference at Stanford hosted by an external organization must be housed in Stanford's campus residences and participate in daily meal plans provided by Stanford Dining. On-campus residential housing and dining services are normally available from the Sunday following Commencement through late August.

Summer conference groups should contact Stanford Conference Services concerning arrangements for tables, chairs, audio-visual aids, signage, janitorial services, trash pick-up and removal, sprinkler shutoffs, and other conference-related products/services. During the academic year, housing arrangements for University-sponsored visitors can be made through the Stanford Guest House, (650) 926-2800, or at <http://guesthouse.stanford.edu>.

## OMBUDS

*Stanford University Ombuds:* David Rasch

*Ombuds Office:* Mariposa House, 585 Capistrano Way, Room 210

*Phone:* (650) 723-3682

*Fax:* (650) 725-7288

*Mail Code:* 94305-8200

*Email:* [rasch@stanford.edu](mailto:rasch@stanford.edu)

*Web Site:* <http://stanford.edu/dept/ombuds>

*School of Medicine Ombuds:* <http://med.stanford.edu/ombuds>

The charge to the Ombuds office at Stanford is: "The Ombudsperson's task is to protect the interests and rights of members of the Stanford community from injustices or abuses of discretion, from gross inefficiency, from unnecessary delay and complication in the administration of University rules and regulations, and from inconsistency, unfairness, unresponsiveness, and prejudice in the individual's experience with University activities. The Ombudsperson's office exists to receive, examine, and channel the complaints and grievances of members of the

Stanford community, and to secure expeditious and impartial redress."

Any troublesome matter in the University community may be discussed in confidence with the University Ombuds. Services of the office are available to students, staff, and faculty. Although possessing no decision making authority, the Ombuds has wide powers of inquiry. The Ombuds refers matters to the proper person or office expeditiously and also provides conflict resolution services. For the role of the office of the Ombuds in cases of sexual harassment, see the "Non-Academic Regulations" section of this bulletin.

## POLICE SERVICES

---

*Department Office:* Corner of Campus Drive and Serra Street  
*Phone:* (650) 723-9633  
*Web Site:* <http://police.stanford.edu>

The Stanford Department of Public Safety is a full service police department that operates 24 hours a day, 7 days a week. For police, fire, or ambulance response, dial 9-1-1, or 9-9-1-1 from a University phone. Emergency assistance can also be obtained by using one of the nearly 100 Blue Emergency Phone Towers strategically placed around campus.

The department is composed of the following divisions:

The Field Services Division consists of sworn and non-sworn officers who patrol the campus and respond to calls for service. Sworn officers receive their police powers through the Santa Clara County Sheriff's Office. Sworn officers have the legal authority to stop vehicles, make arrests, and enforce all laws. Non-sworn officers assist the sworn officers with security patrols, evidence collection, crime prevention presentations, and other assigned tasks.

Community Service Division: Community Service Officers (CSOs) enforce the parking rules and regulations on campus, and provide traffic control at special events, construction zones, and accident scenes. CSOs also provide building security during emergency or critical incidents.

The Support Services Division provides logistical, technical, and accounting support to the department. Special events are handled through this division as well. Special Events Personnel (SEPs) provide security at campus events including athletic events, concerts, student-sponsored events, and dignitary visits. SEPs are available for hire by groups needing security at their University events. Contact the special events office at (650) 723-4924, or email [event\\_security@stanford.edu](mailto:event_security@stanford.edu), for more information.

The Administrative Support Division supports the department through training, recruiting, payroll, human resources, and other business functions.

For additional safety information or to view the yearly crime statistics, see the Stanford Safety and Security Almanac, available free from Public Safety, or see <http://police.stanford.edu>.

## OFFICE FOR RELIGIOUS LIFE

---

*Office:* Memorial Church  
*Phone:* (650) 723-1762  
*Web Site:* <http://religiouslife.stanford.edu>

The mission of the Office for Religious Life (ORL) is to guide and enhance spiritual, religious, and ethical life within the Stanford University community. Multifaith exploration and dialogue, central in Stanford's history from its founding, is a vital part of both its ethos and education.

The ORL is committed to welcoming students of all genders and sexual identities, all religious and non-religious traditions, and all cultural backgrounds, striving to ensure that students, faculty, and staff have access to supportive contexts in which to pursue their spiritual journeys on the Stanford campus.

The ORL oversees and provides support for Stanford Associated Religions (SAR), more than thirty religious organizations that offer their spiritual services to the campus, as well as the Center for Inter-Religious Community, Learning, and Experiences (the CIRCLE). Located on the third floor of the remodeled Old Union, the CIRCLE offers an interfaith sanctuary, a seminar room, a common room, a student lounge, a non-lending library, and offices housing many SAR member groups.

## STANFORD ALUMNI ASSOCIATION

---

*Web Site:* <http://stanfordalumni.org>  
*Phone:* (800) 786-2586 or (650) 723-2021

The Stanford Alumni Association (SAA) seeks to serve all Stanford alumni and students by offering programs and services such as reunions, regional events, *Stanford Magazine*, online services, volunteer and learning opportunities, and the alumni directory.

The Stanford Alumni Association's alumni and student class outreach department (ASCO) provides undergraduates and graduate students with networking opportunities, celebratory and social events, and programs that enhance their Stanford experience and help connect them to the 200,000 alumni worldwide who make up the Stanford alumni community. ASCO programs bring students and alumni together through Reunion Homecoming Weekend each autumn and Commencement weekend in the spring, along with alumni networking events throughout the year.

For students, SAA sponsors events such as student tailgates, alumni panels, Senior Send-off, Senior Dinner on the Quad, and Class Day. The Alumni Association gives out the J.E. Wallace Sterling Award and the Stanford Award of Excellence annually to honor graduating seniors for exemplary service to the University. For more information on student programs at the Stanford Alumni Association, see <http://www.stanfordalumni.org/students/home.html>.

## STANFORD EVENTS

---

Stanford Events supports the mission and goals of Stanford University through open engagement of the campus community and the worldwide public. The department has three divisions: Public Events, Stanford Lively Arts, and the Stanford Ticket Office.

Public Events oversees, advises, and produces University events and ceremonies as designated by the President's office such as: Commencement, Baccalaureate, the University President's inaugurations, New Student Orientation Convocation, Community Day/Founders' Celebration, and other high-profile university events. This division also serves in an advisory capacity to the schools, departments, and student groups on campus, and oversees University policy and procedure regarding campus events. The Public Events office has final approval authority of Stanford facility and open space use for non-academic public events on campus. For information about University event planning, policies, procedures, and University facilities, see <http://stanfordevents.stanford.edu>, or call (650) 723-2551.

Stanford Lively Arts, the University's presenting program, annually brings to campus a full season of music, dance, and theater by world-famous artists and exceptional newcomers. It furthers research and creativity through world premieres, collaborations, and commissions. In addition to on-stage performances, Lively Arts extends and supplements the academic life of the University through master classes, extended residencies, workshops, lectures and demonstrations, and group discussions. Internationally acclaimed artists perform serious work with Stanford students in classrooms as well as in residence halls.

Discounts on performances are available for faculty, staff, and students. For tickets and more information, see <http://livelyarts.stanford.edu>, or call (650) 725-ARTS (2787).

Stanford Ticket Office provides ticketing services for the arts and entertainment events of Stanford University. Tickets for Stanford Lively Arts, Stanford music and drama departments, Stanford Jazz Workshop/Festival, and the ASSU Concert Network are among the event tickets that are available through this office. For more information, see <http://tickets.stanford.edu>, or call (650) 725-ARTS (2787).

## AWARDS AND HONORS

### FACULTY AND STAFF AWARDS

#### KENNETH M. CUTHBERTSON AWARD

The Kenneth M. Cuthbertson Award was established in 1981 to recognize exceptional service to Stanford University. It was established by members of the faculty who wish to remain anonymous. All members of the Stanford community are eligible for the award; the sole criterion is the quality of the contribution that the recipients have made to the University. The award provides a way of honoring members of the staff and faculty for their efforts on behalf of the University.

Ordinarily, one award is made each year. The award was first presented in 1981 to the person for whom it is named. Kenneth M. Cuthbertson was one of the early architects of Stanford's long-term financial planning and fundraising program. His service to Stanford set an enduring standard for those who will come after him. The award is made annually at the University Commencement Ceremony.

#### LLOYD W. DINKELSPIEL AWARDS

The Lloyd W. Dinkelspiel Awards recognize distinctive and exceptional contributions to undergraduate education at Stanford University. The two principal awards are made to the faculty or staff members adjudged to have made the most distinctive contribution to the development and enrichment of undergraduate education in its broadest sense. Two awards are also made to graduating seniors who combine academic achievement with effective contributions to undergraduate student life. Preference is given to service in the School of Humanities and Sciences in the area of liberal education. The awards are made from an endowment fund established in memory of Lloyd W. Dinkelspiel, a Stanford alumnus and trustee. The awards are made annually at the University Commencement Ceremony.

#### WALTER J. GORES AWARDS

The Walter J. Gores Faculty Achievement Awards for excellence in teaching were established by bequest of Walter J. Gores, Stanford Alumnus of the Class of 1917 and a professor at the University of Michigan for 30 years. Teaching is understood in its broadest sense and includes, in particular, lecturing, leading discussions, tutoring, and advising at the undergraduate or graduate levels. Any member of the teaching staff of the University is eligible for an award, including all faculty of professorial rank, instructors, lecturers, teaching fellows, and teaching and course assistants. Ordinarily, awards are made to a senior faculty member (associate or full professor) or senior lecturer; a junior faculty member or member of the teaching staff; and a teaching assistant (graduate or undergraduate student). The awards are made annually at the University Commencement Ceremony.

#### ALLAN COX MEDAL FOR FACULTY EXCELLENCE FOSTERING UNDERGRADUATE RESEARCH

The Allan Cox Medal for Faculty Excellence Fostering Undergraduate Research is awarded annually to a faculty member

who has established a record of excellence directing undergraduate research over a number of years. It may also go to a faculty member who has done an especially outstanding job with just one or two undergraduates who have demonstrated superior work. The medal was established in memory of the former professor of Geophysics and Dean of the School of Earth Sciences, a strong supporter of faculty-student research collaboration.

#### HERBERT HOOVER MEDAL FOR DISTINGUISHED SERVICE

David Starr Jordan's belief that every academic degree should represent work actually done in or under the direction of the institution granting it has meant that, since its founding, Stanford has awarded no honorary degrees. As a means of recognizing extraordinary individuals who deserve special acknowledgment, the Stanford Alumni Association in 1962 voted to establish the Herbert Hoover Medal for Distinguished Service. The name pays tribute to the former President's example of service to his University, to his country, and to the cause of world humanitarianism. Indeed, Mr. Hoover was the first award recipient. The gold medal is presented following selection by an anonymous committee appointed by the Chair of the Board of Directors of the Alumni Association.

### STUDENT AWARDS

#### BOOTHE PRIZE FOR EXCELLENCE IN WRITING

Awarded during the freshman year, the Boothe Prize recognizes excellence in writing. Students are selected for this honor on the basis of essays written for courses fulfilling the Introduction to the Humanities or Writing and Rhetoric requirements. The prize is named for Mr. and Mrs. D. Power Boothe, Jr., whose gifts to the University reflect their interest in the humanities.

#### PRESIDENT'S AWARD FOR ACADEMIC EXCELLENCE IN THE FRESHMAN YEAR

The President's Award honors students in the top 3% of the class who have exceptionally distinguished academic records that exemplify a strong program of study in the freshman year. Students eligible for the award normally have completed Writing and Rhetoric and Introduction to the Humanities requirements during their first year at Stanford.

#### DEANS' AWARD FOR ACADEMIC ACHIEVEMENT

The Deans of Earth Sciences, Engineering, and Humanities and Sciences recognize from five to ten undergraduate students each year for their academic endeavors. Honorees are cited for noteworthy accomplishments which represent more than a high grade point average or success in course work. Faculty nominate students who have exceptional tangible achievements in classes or independent research, national academic competitions, a presentation or publication for a regional or national audience, or exceptional performance in the creative arts.

#### FIRESTONE MEDAL FOR EXCELLENCE IN RESEARCH

The Firestone Medal is awarded to seniors in recognition of excellence in undergraduate research. Departments in the School of Humanities and Sciences nominate students who have completed outstanding honors projects in the social, physical, and natural sciences.

## **ROBERT M. GOLDEN MEDAL FOR EXCELLENCE IN THE HUMANITIES AND CREATIVE ARTS**

The Golden Medal recognizes outstanding achievement in the humanities and the creative arts. Seniors receive these medals upon nomination by their major department.

## **HOEFER PRIZE FOR EXCELLENCE IN UNDERGRADUATE WRITING**

The Hoefer Prize recognizes students and faculty for their work in courses that meet the University Writing Requirement for writing in the major. Prizes are awarded in each of the five areas of the undergraduate curriculum: humanities, social sciences, natural sciences, engineering, and earth sciences.

## **FREDERICK EMMONS TERMAN ENGINEERING SCHOLASTIC AWARD**

The School of Engineering annually presents the Terman Award to seniors for outstanding academic achievement. The awardees share their award with a high school teacher of their nomination.

## **PHI BETA KAPPA**

Phi Beta Kappa is a nationwide society honoring students for the excellence and breadth of their undergraduate scholarly accomplishments. Membership in the Stanford Chapter (Beta of California) is open to undergraduates of all majors. To be elected to Phi Beta Kappa at Stanford, a student must achieve academic distinction in the major as well as in courses across a broad range of fields.

Approximately a tenth of the members of a graduating class are elected to Phi Beta Kappa. Of this number, about one fifth are chosen in their junior year, the remainder in their senior year.

The chapter's election guidelines define breadth of study as excellence beyond the major field. To be considered for election, a student must have taken at least three courses of 3 units or more at Stanford by the time elections are held early in the Spring Quarter with a letter grade of 'B-' or better in each of the following three major domains of knowledge: humanities; science, engineering, and math; and social sciences. Students who transfer in their junior year must have taken at least two courses at Stanford in two of the major domains and at least one course in the third domain, and must have completed a minimum of 75 units of academic work at Stanford by the end of Winter Quarter. Students who transfer in their sophomore year must have taken at least two courses at Stanford in each of the major domains.

There is no direct correlation between Stanford University General Education Requirements (GERs) and Phi Beta Kappa breadth requirements. The elections committee analyzes the content of individual courses to determine which major domain requirement they may satisfy. IHUM, PWR, and first-year language courses do not satisfy the PBK breadth criterion.

A grade of '+' or 'CR' is not considered a sign of distinction. Minimally satisfying the breadth criterion is not considered a sign of distinction.

The academic records of eligible students are automatically reviewed, so no special action is required for students wishing to be considered for membership. Anonymity in the election process is ensured by removal of the students' names from their academic records before consideration. Students who desire that their records not be made available for consideration by the Stanford chapter of Phi Beta Kappa should inform the Registrar, 630 Serra Street, Suite 120, Stanford, CA 94305-6032.

## **EXCHANGE PROGRAMS AND CROSS-ENROLLMENT AGREEMENTS**

Stanford has exchange programs and cross-enrollment agreements with a number of other colleges and universities. The purpose of these programs and agreements is to offer Stanford students courses and training that are not available in the Stanford curriculum.

### **EXCHANGE PROGRAMS**

#### **UNDERGRADUATE**

Stanford has exchange programs with four colleges and universities that allow students to exchange schools for a quarter/semester or for a year, depending on the school. These programs are best suited to students in their junior year, when the major area of study has been determined. Stanford students register for zero units at Stanford during the quarter(s) in which they are attending another college or university and pay the regular Stanford tuition. Courses taken at the other institution are treated as transfer credit back to Stanford. Students should contact the External Credit Evaluation section of the Office of the University Registrar to determine whether the courses taken through an exchange program may qualify for credit toward a Stanford degree. Only the number of units accepted in transfer, not the course titles or the grades received, are recorded on the Stanford transcript.

Exchange programs are currently available at three historically black institutions: Howard University in Washington D.C.; and Morehouse College and Spelman College in Atlanta, Georgia. The exchange program at Dartmouth College in Hanover, New Hampshire, focuses on Native American Studies. Further information is available at the Undergraduate Advising and Research Center.

#### **GRADUATE**

The Exchange Scholar Program is open to doctoral students in the fields of humanities, social sciences, and sciences who have completed one full year of study at one of the participating institutions. These students may apply to study at Stanford, and Stanford students may apply to one of these other institutions, for a maximum of one academic year (Autumn, Winter, and Spring quarters) to take advantage of particular educational opportunities not available on the home campus. The participating institutions are Brown University, University of Chicago, Columbia University, Cornell University, Harvard University, Massachusetts Institute of Technology, Princeton University, Stanford University, University of Pennsylvania, and Yale University. Further information on the program may be obtained from the Office of the University Registrar, or the graduate dean's office at participating institutions. Some institutions may place restrictions on specific departments.

Stanford also has separate exchange programs with the University of California, Berkeley, and the University of California, San Francisco. Further information may be obtained at the Office of the University Registrar.

### **CROSS-ENROLLMENT AGREEMENTS FOR ROTC**

Stanford currently has cross-enrollment agreements for the Reserve Officers' Training Corps (ROTC) with the Navy and Marine Corps ROTC program at the University of California at Berkeley, the Army ROTC program at Santa Clara University, and the Air Force ROTC program at San Jose State University. The purpose of these agreements is to allow Stanford students to engage in military training while working on their degrees from

Stanford. Courses taken in ROTC programs are offered by and through UC Berkeley, Santa Clara, and San Jose State. The courses do not qualify to be used towards the 12-unit requirement for full-time registration status or satisfactory academic progress requirements for Stanford undergraduates. Certain ROTC courses may be eligible to be used as transfer credit if they qualify under Stanford's transfer credit practices.

Normally, students who participate in ROTC training complete a four-year course of instruction at the respective institution that consists of two years of basic courses during the freshmen and sophomore years, and an advanced course of instruction during the junior and senior years. Students who accept ROTC scholarships are generally subject to a service obligation, depending on the regulation of the particular service.

Stanford students who are enrolled in ROTC programs under the cross-enrollment agreements are eligible to compete for scholarships to include full tuition and a monthly stipend (Navy and Air Force), or other varying amounts (Army). Students normally compete for national scholarships as high school seniors, although current Stanford students may be eligible to enroll in ROTC on a non-scholarship basis. Non-scholarship ROTC students are eligible to compete for scholarships, and individual services may offer additional scholarship programs to current qualifying undergraduate and graduate students. Interested students should contact the appropriate military professor at the host institution to obtain information on these programs and to initiate application procedures (see below).

Students who satisfactorily complete an ROTC program and are awarded a Stanford degree qualify for a commission as a Second Lieutenant in the U.S. Army, an Ensign in the U.S. Navy, a Second Lieutenant in the U.S. Marines, or a Second Lieutenant in the U.S. Air Force.

For questions concerning the ROTC programs, Stanford students should consult one of the following: Air Force ROTC, San Jose State University, San Jose, CA 95192-0051, telephone (408) 924-2960; Army ROTC, Department of Military Science, Santa Clara University, Santa Clara, CA 95053, telephone (408) 554-4034; Naval ROTC, 152 Hearst Gym, University of California, Berkeley, CA 94720-3640, telephone (510) 642-3551.

## AIR FORCE ROTC

The following are offered by San Jose State University. See also <http://info.sjsu.edu/web-dbggen/catalog/departments/AS.html>.

### AS 001A,B. The Foundation of the United States Air Force

Freshman year. Introduces students to the Air Force and AFROTC. The characteristics, missions, and organization of the Air Force. Officership and professionalism, career opportunities, military customs and courtesies, and communication skills. Required leadership lab.

### AS 002A,B. The Evolution of the United States Air And Space Power

Sophomore year. Air and space power through historical study and analysis. The capabilities, function, and doctrinal employment of aerospace forces. Emphasis is on oral and written communication skills. Required leadership lab.

### AS 131A,B. Air Force Leadership Studies

Junior year. Leadership, management fundamentals, professional knowledge, Air Force personnel system, ethics, and communication skills. Application-level knowledge of skills required of junior Air Force officer through case studies, practical exercises, and seminar discussion. Required leadership lab. Prerequisites: AS 001A,B, AS 002A,B, or as determined by department chair.

### AS 141A. National Security Affairs

Senior year. The national security process, international and regional relations, advanced leadership ethics, and Air Force doctrine with focus on the military as a profession, officership, military justice, civilian control of the military, and current issues affecting military professionalism. Required leadership lab. Pre- or corequisites: AS 131A, or as determined by department chair.

### AS 141B. Preparation for Active Duty

Senior year. The role of the Air Force officer in contemporary society emphasizing skills to facilitate a smooth transition from civilian to military life. Required leadership lab. Pre- or corequisites: AS 131A,B, or as determined by department chair.

### Leadership Laboratory (LLAB)

Mandatory. Hands-on. Drill and ceremony; Air Force customs and courtesies; leadership and followership skills. Guest speakers.

## ARMY ROTC

See also <http://scu.edu/rotc>.

### FRESHMAN YEAR

#### MILS 11. Leadership and Personal Development

Taught on Stanford campus. Personal challenges and competencies for effective leadership. How life skills such as goal setting, time management, physical fitness, and stress management relate to leadership and officership. Development of a personal fitness program under the guidance of an Army master fitness trainer. Two 60-minute classes per week. Weekly 3-hour leadership labs required. One four-day weekend field exercise away from the University.

#### MILS 12. Foundations in Leadership I

Taught on Stanford Campus. Leadership fundamentals such as setting direction, problem solving, listening, presenting briefs, providing feedback, and effective writing skills. Leadership dimensions and values. Two 60-minute classes per week. Weekly 3-hour leadership labs required. One evening military formal dinner.

#### MILS 13. Foundations in Leadership II

Taught on Stanford campus. Leadership framework; practical applications in fundamentals such as problem solving, listening, presenting briefs, and effective writing skills. Values, attributes, skills, and actions in the context of practical and interactive exercises. Two 60-minute classes per week. Weekly 3-hour leadership labs required. One four-day weekend field training exercise away from the University.

### SOPHOMORE YEAR

#### MILS 21. Innovative Leadership

Taught on Stanford campus. Creative and innovative leadership strategies and styles through historical cases and interactive exercises. Personal motivation and team building through team exercises. Focus is on leadership values and attributes through organizational customs and courtesies. Leadership case studies; individual creeds and organizational ethos. Two 60-minute classes per week. Weekly 3-hour labs required. One four-day weekend field training exercise away from the University.

#### MILS 22. Leadership in Changing Environments

Taught on Stanford campus. The challenges of leading in contemporary operational environments. Crosscultural challenges and applications to leadership tasks and situations. Case studies. Two 60-minute classes per week. Weekly 3-hour labs required. One evening military formal dinner.

#### MILS 23. Team Leading Procedures

Taught on Stanford campus. Plans and orders that enable small units to complete assigned tasks and the decision making process. Planning techniques to develop orders, briefing plans, and decisions. Two 60-minute classes per week. Five 3-hour labs per quarter. One four-day weekend field training exercise away from the University.

### JUNIOR YEAR

#### MILS 131. Adaptive Team Leadership

Taught at Santa Clara University. Adaptive leadership skills and the demands of the ROTC Leader Development Assessment Course (LDAC). Scenarios related to small-unit tactical operations to develop self awareness and thinking skills. Feedback on student leadership abilities. Two 90-minute classes per week. Weekly 3-hour labs required. One mandatory four-day field training exercise away from the University. Prerequisites: MILS 11, 12, 13, 21, 22, and 23, or consent of department chair.

**MILS 132. Situational Leadership I**

Taught at Santa Clara University. Skills in leading small units, including decision making, persuading, and motivating team members when under fire. Two 90 minute classes per week. Weekly 3-hour labs required. One evening military formal dinner. Prerequisite: MILS 131, or consent of department chair.

**MILS 133. Situational Leadership II**

Taught at Santa Clara University. Applications of situational leadership challenges in decision making, persuading, and motivating team members when under fire. Preparation for ROTC Leader Development Assessment Course (LDAC). Two 90-minute classes per week. Weekly 3-hour labs required. One mandatory four-day field training exercise away from the University. Prerequisite: MILS 132, or consent of department chair.

**SENIOR YEAR****MILS 141. Developing Adaptive Leaders**

Taught at Santa Clara University. Planning, executing, and assessing complex operations, functioning as a member of staff, and providing leadership performance feedback to subordinates. Situational opportunities to assess risk, make ethical decisions, and provide coaching to fellow ROTC students. Responsibilities of key staff. Two 90-minute seminars per week. Weekly 3-hour labs required. One mandatory four-day weekend field training exercise away from the University. Prerequisite: MILS 133, or consent of department chair.

**MILS 142. Leadership in a Complex World I**

Taught at Santa Clara University. Differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism. Interacting with nongovernmental organizations, civilians on the battlefield, and host nation support. Two 90-minute seminars per week. Weekly 3-hour labs required. One evening military formal dinner. Prerequisite: MILS 141.

**MILS 143. Leadership in a Complex World II**

Taught at Santa Clara University. Preparation for first unit of assignment and transition to Lieutenant. Case studies, scenarios, and exercises to prepare for complex ethical and practical demands as commissioned officers in the U.S. Army. Two 90-minute seminars per week. Weekly 3-hour labs required. One mandatory four-day weekend field training exercise away from the University. Prerequisite: MILS 142.

**MILITARY HISTORY****MILS 199. Dynamics of Leadership in Military History**

Taught at Santa Clara University. Dynamics that drive decisions made by history's military leaders and followers. Wars and battles from 1861 to present. Techniques and innovations in military training, weapon systems, political timing, and their effect they have on strategies. Combined arms experiences.

**NAVAL ROTC**

The Department of Naval Science at UC Berkeley offers programs of instruction for men and women leading to active duty commissions in the U.S. Navy or U.S. Marine Corps.

**COURSES**

Navy option students enrolled in one of the four-year programs normally complete the following courses during the first two years. Students should consult <http://navyrotc.berkeley.edu> for more information and changes to course offerings. Click on the Courses link to access course descriptions.

**FRESHMAN YEAR**

**NS 1. Introduction to Naval Science**

**NS 2. Sea Power**

**SOPHOMORE YEAR**

**NS 3. Leadership and Management**

**NS 10. Naval Ship Systems I: Engineering**

Navy option students enrolled in either the four- or two-year program normally complete the following courses during their junior and senior years.

**JUNIOR YEAR**

**NS 12A. Navigation and Naval Operations I**

**NS 12B. Navigation and Naval Operations II**

**SENIOR YEAR**

**NS 401. Naval Ship Systems**

**NS 412. Leadership and Ethics**

In addition to the above courses, Navy option ROTC students are required to participate in weekly professional development laboratories (drill) at UC Berkeley and complete a number of other courses at Stanford including one year of calculus, physics, and English, and one quarter of world cultural studies, and military history or national security policy.

In lieu of NS 401, NS 10, NS 12A and NS 12B, Marine option students participate in Marine Seminars and complete MA 154, History of Littoral Warfare, and MA 20, Evolution of Warfare, or a designated equivalent course. Marine option students also participate in the weekly professional development laboratories.

# NONACADEMIC REGULATIONS

## NONDISCRIMINATION POLICY

Stanford University admits qualified students of any race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, and gender identity to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, Stanford prohibits unlawful discrimination, including harassment, on the basis of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity, or any other characteristic protected by applicable law in the administration of the University's programs and activities. The following person has been designated to handle inquiries regarding this nondiscrimination policy: the Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email).

## ADA (AMERICANS WITH DISABILITIES ACT)/SECTION 504 GRIEVANCE PROCEDURE (STUDENT)

For information concerning policies and procedures for students with disabilities, see <http://www.stanford.edu/dept/diversityaccess>, or the ADA/Section 504 Compliance Officer, Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford CA, 94305-8230, (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email); see also the Office for Accessible Education (OAE) at <http://studentaffairs.stanford.edu/oea>.

### POLICY

*The following is quoted from the policy:*

#### I. Policy

Stanford University, in compliance with state and federal laws and regulations, including the Americans with Disabilities Act of 1990 (ADA; as amended 2008) and Section 504 of the Rehabilitation Act of 1973 (Section 504), does not discriminate on the basis of disability in administration of its education-related programs and activities, and has an institutional commitment to provide equal educational opportunities for disabled students who are otherwise qualified.

Students who believe they have been subjected to unlawful discrimination on the basis of disability, or have been denied access to services or accommodations required by law, have the right to use this grievance procedure.

#### II. Applicability

The grievance procedure set forth below is applicable to undergraduate and graduate students of the University. In general, it is designed to address disputes concerning the following:

1. Disagreements regarding a requested service, accommodation, or modification of a University practice or requirement;
2. Inaccessibility of a program or activity;
3. Harassment or discrimination on the basis of disability;
4. Violation of privacy in the context of disability.

As a general proposition, this grievance procedure supplants the Student Academic Grievance Procedure and the Student Non-Academic Grievance Procedure (both of which are set forth in this bulletin) for disability-related grievances. Questions of applicability will be decided by the Director of the Diversity and Access Office.

#### III. Compliance Officers

Stanford University's Compliance Officers are responsible for administering this grievance procedure as well as ensuring compliance with applicable laws. The Director of the Diversity and Access Office is the designated ADA / Section 504 Compliance Officer. That office is located in the Mariposa House, 585 Capistrano Way, Stanford, CA 94305-8230, 650-725-0326 (Voice), 650-723-1216 (TTY), 650-723-1791 (Fax), email: [disability.access@stanford.edu](mailto:disability.access@stanford.edu). Additional Compliance Officers may be designated from time to time by the Provost from those faculty and staff members knowledgeable concerning disability issues and the legal mandates of state and federal disability statutes.

#### IV. Informal Resolution

Prior to initiating the formal complaint procedure set forth below, the student should, in general, first discuss the matter orally or in writing with the individual(s) most directly responsible. If no resolution results, or if direct contact is inappropriate under the circumstances, the student should then consult with the Compliance Officer at the Diversity and Access Office who will attempt to facilitate a resolution. (The informal resolution process may involve consultation with the Dean of Educational Resources.)

If the Compliance Officer is not successful in quickly achieving a satisfactory resolution (that is, generally within seven calendar days), the Compliance Officer will inform the student of his or her efforts and the student's right to file a formal complaint.

#### V. Formal Complaint

If the procedure set forth above for informal resolution does not yield a successful resolution, then the student may file a formal complaint in the following manner:

- A. *When to File Complaint:* Complaints must be filed as soon as possible, but in no event later than 10 days after the end of the quarter in which the concern arose.
- B. *What to File:* a complaint must be in writing and include the following:
  1. The grievant's name, address, email address and phone number;
  2. A full description of the problem;
  3. A description of what efforts have been made to resolve the issue informally;
  4. A statement of the remedy requested.
- C. *Where to File Complaint:* the complaint is to be filed with the Compliance Officer at the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford CA 94305-8230, 650-725-0326 (Voice), 650-723-1216 (TTY), 650-723-1791 (Fax), email: [disability.access@stanford.edu](mailto:disability.access@stanford.edu).
- D. *Notice of Receipt:* upon receipt of the complaint, the Compliance Officer reviews the complaint for timeliness and appropriateness for this grievance procedure, and provides the grievant with written notice acknowledging its receipt.

- E. *Investigation*: the Compliance Officer will promptly initiate an investigation and may refer the matter (or any part of it) to a grievance officer or other designee, who will look into and/or address the matter as the Compliance Officer directs. In undertaking the investigation, the Compliance Officer or grievance officer may interview, consult with, and/or request a written response to the issues raised in the grievance from any individual the grievance officer believes to have relevant information, including faculty, staff, and students.
- F. *Representation*: the grievant and the party against whom the grievance is directed each have the right to have a representative. The party shall indicate whether he or she is to be assisted by a representative and, if so, the name of that representative. For purposes of this procedure, an attorney is not an appropriate representative.
- G. *Findings and Notification*: upon completion of the investigation, the grievance officer will prepare and transmit to the student, and to the party against whom the grievance is directed, a final report containing a summary of the investigation, written findings, and a proposed disposition. This transmission will be expected within 45 calendar days of the filing of the formal complaint. The deadline may be extended by the Compliance Officer for good cause (including for reasons relating to breaks in the academic calendar), and will nearly always be extended during summers and the winter closure. The final report may also be provided, where appropriate, to any University officer whose authority will be needed to carry out the proposed disposition or to determine whether any personnel action is appropriate.
- H. *Final Disposition*: the disposition proposed by the Compliance Officer will be put into effect promptly. The grievant or any party against whom the grievance or the proposed disposition is directed may appeal. The appeal to the Provost (as set forth below) will not suspend the implementation of the disposition proposed by the grievance officer, except in those circumstances where the Provost decides that good cause exists making the suspension of implementation appropriate.

#### VI. *Urgent Matters*

Whenever the application of any of the time deadlines or procedures set forth in this grievance procedure creates a problem due to the nature of the complaint, the urgency of the matter, or the proximity of the upcoming event, the Compliance Officer will, at the request of the grievant, determine whether an appropriate expedited procedure can be fashioned.

#### VII. *Remedies*

Possible remedies under this grievance procedure include corrective steps, actions to reverse the effects of discrimination or to end harassment, and measures to provide a reasonable accommodation or proper ongoing treatment. As stated above, a copy of the Compliance Officer's report may, where appropriate, be sent to University officer(s) to determine whether any personnel action should be pursued.

#### VIII. *Appeal*

Within ten calendar days of the issuance of the final report, the grievant or the party against whom the grievance is directed may appeal to the Provost the grievance officer's determination.

An appeal is taken by filing a written request for review with the Compliance Officer at the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford CA 94305-8230; (650) 723-0755 (Voice), (650) 723-1216 (TTY), (650) 723-1791 (Fax), email: [disability.access@stanford.edu](mailto:disability.access@stanford.edu).

The written request for review must specify the particular substantive and/or procedural basis for the appeal, and must be made on grounds other than general dissatisfaction with the proposed disposition. Furthermore, the appeal must be directed only to issues raised in the formal complaint as filed or to procedural errors in the conduct of the grievance procedure itself, and not to new issues.

The Compliance Officer will forward the appeal to the Provost, and also provide copies to the other party or parties.

If the grievance involves a decision that is being challenged, the review by the Provost or his or her designee usually will be limited to the following considerations:

1. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?
2. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?
3. Given the proper facts, criteria, and procedures, was the decision a reasonable one?

A copy of the Provost's written decision will be expected within 30 calendar days of the filing of the appeal and will be sent to the parties, the Compliance Officer and, if appropriate, to the University officer whose authority will be needed to carry out the disposition. The deadline may be extended by the Provost for good cause (including for reasons relating to breaks in the academic calendar), and will nearly always be extended during summers and the winter closure. The decision of the Provost on the appeal is final.

## TITLE IX OF THE EDUCATION AMENDMENTS OF 1972

It is the policy of Stanford University to comply with Title IX of the Education Amendment of 1972 and its regulations, which prohibit unlawful discrimination on the basis of sex. The Title IX Compliance Officer is the Director of the Diversity and Access Office, who has been appointed to coordinate the University's efforts to comply with the law. Anyone who believes that Stanford is not in compliance with Title IX and its regulations should contact the Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford, CA 94305-8230, (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), [equal.opportunity@stanford.edu](mailto:equal.opportunity@stanford.edu) (email). The Compliance Officer serves as a resource to provide accommodations and services to address the effects of sexual harassment and sexual violence. Grievance procedures to address complaints of discrimination on the basis of sex are set forth in the "Student Non-Academic Grievance Procedure". See also Administrative Guide Memo 23 at <http://adminguide.stanford.edu/23.pdf>.

## TITLE VI OF THE CIVIL RIGHTS ACT OF 1964

It is the policy of Stanford University to comply with Title VI of the Civil Rights Act of 1964 and its regulations, which prohibit unlawful discrimination on the basis of race, color, and national origin. The Title VI Compliance Officer is the Director of the Diversity and Access Office, who has been appointed to coordinate the University's efforts to comply with the law. Anyone who believes that Stanford is not in compliance with Title VI and its regulations should contact the Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), [equal.opportunity@stanford.edu](mailto:equal.opportunity@stanford.edu) (email). Grievance procedures to address complaints of discrimination on the basis of race, color, and national origin are set forth in the "Student Non-Academic Grievance Procedure." See also Administrative Guide Memo 23 at <http://adminguide.stanford.edu/23.pdf>.

# GRIEVANCES

A Stanford undergraduate or graduate student who believes that he or she has been subject to an improper decision on an academic matter may file a grievance pursuant to the Student Academic Grievance Procedure (in the "Academic Policies and Statements" section of this bulletin). For other types of grievances, students should review the section that follows on the Student Non-Academic Grievance Procedure, and consult concerning applicable procedures with the Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email).

## STUDENT NON-ACADEMIC GRIEVANCE PROCEDURE

### POLICY

The following is the policy:

#### 1. *Applicability*

- a. It is perhaps inevitable in any university that some students may at times feel improperly treated, and that concerns about unfairness (including potential discrimination and harassment) may also at times arise.

In this regard (and although this grievance procedure is not limited to concerns of discrimination), Stanford University's Nondiscrimination Policy provides in part: "Stanford University admits qualified students of any race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, and gender identity to all the rights, privileges, programs, and activities generally accorded or made available to students at the University. Consistent with its obligations under the law, Stanford prohibits unlawful discrimination, including harassment, on the basis of race, color, national or ethnic origin, sex, age, disability, religion, sexual orientation, gender identity, or any other characteristic protected by applicable law in the administration of the University's programs and activities."

- b. At Stanford, there are a number of grievance procedures through which students can raise and seek redress for what they believe to be unfair, improper or discriminatory decisions, actions, or treatment. For example:
  1. If the matter involves an academic decision, the Student Academic Grievance Procedure may be the applicable procedure.
  1. If the matter involves a disability-related concern, the Student ADA/Section 504 Grievance Procedure may be applicable.
  2. If the matter involves a student-athlete and his or her sport, the Student-Athlete Grievance Procedure may be applicable.
- c. The purpose of the Student Non-Academic Grievance Procedure is to provide a process for students to seek resolution of disputes and grievances that may not fall within the scope of one of the other grievance processes, including those which may arise in a student's capacity as a student-employee.
- d. This procedure is available to undergraduates and graduate students at Stanford University. It is designed to address individual decisions or individual actions that affect the grievant personally in his or her capacity as a student, but it does not apply to matters proceeding through the Office of Judicial Affairs or through the involuntary leave policy. This is likewise not a grievance procedure to address the concerns of student groups. Similarly and as a general

proposition, dissatisfaction with a departmental, school, or University policy or practice of broad or general application is not grounds for a grievance under this procedure; the Director of the Diversity and Access Office (hereafter "the Director") may, in his or her discretion, entertain such a grievance in exceptional circumstances, such as where (for example) the policy or practice is alleged to be contrary to law. In the same way, the Director may entertain a grievance under this procedure brought by a non-student, in an appropriate case or as required by law.

- e. The Director is responsible for administering this Student Non-Academic Grievance Procedure.

1. The Director may be contacted at: Director of the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), equal.opportunity@stanford.edu (email), <http://www.stanford.edu/dept/ocr>.

2. The Director in his or her sole discretion can decide whether to refer a grievance brought under this procedure to another grievance process. In cases involving allegations of sexual harassment in particular, the Director may wish to consult with the Director of the Sexual Harassment Policy Office as to the most appropriate way to proceed; see Section 5.d below. In cases involving student employment, the Director may wish to consult with the University's Department of Human Resources.

#### 2. *Informal Resolution*

- a. As a general proposition (and although particular circumstances may warrant an exception), the student should first discuss the problem and seek a solution with the individual(s) most directly involved.
- b. If no resolution results (or if circumstances make discussion inappropriate with the person most directly involved), the student should then consult with the individual at the next (higher) administrative level in the department, school, residence or University administrative unit. Serious efforts should be made to resolve the issue locally at an informal level without resort to a formal grievance; such efforts may continue even after the formal process is underway.

#### 3. *Formal Grievance*

- a. If informal means of resolution prove inadequate, the student should set forth in writing the substance of the complaint, the grounds for it and the evidence on which it is based, and the efforts taken to date to resolve the matter. It is at this stage that the complaint becomes a formal grievance.
- b. The grievance document should be submitted to the Director. A grievance should be filed in a timely fashion, i.e., normally within thirty days of the end of the academic quarter in which the action that is the subject of the grievance occurred. Except in extraordinary circumstances, delay in filing a grievance will be grounds for rejection of that grievance.
- c. The Director will promptly initiate a review, which should normally be completed within sixty days. The Director may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance officer or other designee, who will look into and/or address the matter as the Director directs. The Director may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.
- d. In undertaking this review, either the Director, his or her designee, or the grievance officer may request a response to the issues raised in the grievance from any individuals believed to have information the reviewer considers relevant, including faculty, staff and students.

# AGE DISCRIMINATION ACT OF 1975

- e. The Director (or his or her designee) will issue his or her decision in writing, and take steps to initiate such corrective action as is called for (if any). Conduct meriting discipline will be brought to the attention of the appropriate disciplinary process.
4. *Appeal*
    - a. If the student is dissatisfied with the disposition by the Director (or his or her designee), he or she may appeal to the Provost (Office of the President and Provost, Building 10, Stanford, CA 94305-2061; phone 650-725-4075; fax 650-725-1347). The appeal should be filed in writing with the Provost within ten days of the issuance of the decision by the Director (or his or her designee); a delay in filing the appeal may be grounds for rejection of that appeal.
    - b. The Provost may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance appeal officer, who will review the matter at the Provost's direction. The Provost may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.
    - c. The Provost should normally complete his or her review of the appeal and issue his or her decision in writing within forty-five days. That decision is final.
  5. *General Provisions*
    - a. *Time Guidelines*—The time frames set forth herein are guidelines. They may be extended by the Director or Provost, as applicable, in his or her discretion for good cause (including for reasons relating to breaks in the academic calendar), and will nearly always be extended during summers and the winter closure.
    - b. *Advisers*—A student initiating or participating in a grievance under this procedure may be accompanied by an adviser in any discussion with the Director, the Provost or their designees, or a grievance or grievance appeal officer under this procedure; any adviser must be a current Stanford faculty, staff member or student.
    - c. *Ombuds*—Students should be aware that the University Ombuds (<http://www.stanford.edu/dept/ocr/ombuds>) is available to discuss and advise on any matters of University concern and frequently help expedite resolution of such matters. Although it has no decision making authority, the Ombuds' Office has wide powers of inquiry.
    - d. *Sexual Harassment and Sexual Assault*—For information and resources concerning sexual harassment, students should refer to the web page of the Sexual Harassment Policy Office at <http://harass.stanford.edu>. For information and resources concerning sexual assault and relationship abuse, students should refer to the web page of the Sexual Violence Advisory Board at <http://www.stanford.edu/group/svab/help.shtml>.
    - e. *No retaliation*—Stanford University prohibits retaliation or reprisals against individuals based on their pursuit in good faith of a grievance under this procedure, or their participation in good faith in the grievance process.
    - f. *Standards for Review*—If the grievance involves a decision that is being challenged, the review by the Director, as well as the review by the Provost on appeal, usually will be limited to the following considerations:
      1. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?
      2. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?
      3. Given the proper facts, criteria, and procedures, was the decision one which a person in the position of the decision maker might reasonably have made?

1. *Policy*

It is the policy of Stanford University to comply with the Age Discrimination Act of 1975 and its regulations, which prohibit unlawful discrimination on the basis of age. The Age Discrimination Act Compliance Officer is the Director of the Diversity and Access Office ("the Director"), who has been appointed to coordinate the University's efforts to comply with the law. Anyone who believes that Stanford is not in compliance with the Age Discrimination Act and its regulations ("the Act") should contact the Director at the Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford, CA 94305-8230; (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), [equal.opportunity@stanford.edu](mailto:equal.opportunity@stanford.edu) (email).

2. *Grievance Procedure*

- a. An individual who believes that Stanford is not acting in compliance with the Act and who wishes to file a grievance should set forth in writing the substance of his or her complaint, the grounds for it and the evidence on which it is based, and the efforts (if any) taken to date to resolve the matter. It is at this stage that the complaint becomes a formal grievance.
- b. The grievance document should be submitted to the Director. A grievance should be filed in a timely fashion, i.e., normally within thirty days of the end of the academic quarter in which the action that is the subject of the grievance occurred. Except in extraordinary circumstances, delay in filing a grievance will be grounds for rejection of that grievance.
- c. The Director will promptly initiate a review, which should normally be completed within sixty days. The Director may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance officer or other designee, who will look into and/or address the matter as the Director directs. The Director may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.
- d. In undertaking this review, either the Director, his or her designee, or the grievance officer may request a response to the issues raised in the grievance from any individuals believed to have information the reviewer considers relevant, including faculty, staff and students.
- e. The Director (or his or her designee) will issue his or her decision in writing, and take steps to initiate such corrective action as is called for (if any).

3. *Appeal*

- a. If the grievant is dissatisfied with the disposition by the Director (or his or her designee), he or she may appeal to the Provost (Office of the President and Provost, Building 10, Stanford, CA 94305-2061; phone 650-725-4075; fax 650-725-1347). The appeal should be filed in writing with the Provost within ten days of the issuance of the decision by the Director (or his or her designee); a delay in filing the appeal may be grounds for rejection of that appeal.
- b. The Provost may attempt to resolve the matter informally, and may refer the matter (or any part of it) to a grievance appeal officer, who will review the matter at the Provost's direction. The Provost may also, in appropriate cases, remand the matter to the appropriate administrator (including to the administrative level at which the grievance arose) for further consideration.
- c. The Provost should normally complete his or her review of the appeal and issue his or her decision in writing within forty-five days. That decision is final.

#### 4. *General Provisions*

- a. *Time Guidelines*—The time frames set forth herein are guidelines. They may be extended by the Director or Provost, as applicable, in his or her discretion for good cause (including for reasons relating to breaks in the academic calendar), and will nearly always be extended during summers and the winter closure.
- b. *No Retaliation*—Stanford University prohibits retaliation or reprisals against individuals based on their pursuit in good faith of a grievance under this procedure, or their participation in good faith in the grievance process.
- c. *Standards for Review*—If the grievance involves a decision that is being challenged, the review by the Director, as well as the review by the Provost on appeal, usually will be limited to the following considerations:
  1. Were the proper facts and criteria brought to bear on the decision? Were improper or extraneous facts or criteria brought to bear that substantially affected the decision to the detriment of the grievant?
  2. Were there any procedural irregularities that substantially affected the outcome of the matter to the detriment of the grievant?
  3. Given the proper facts, criteria, and procedures, was the decision one which a person in the position of the decision maker might reasonably have made?

## OWNERSHIP AND USE OF STANFORD NAME AND TRADEMARKS

Stanford registered marks, as well as other names, seals, logos, and other symbols and marks that are representative of Stanford, may be used solely with permission of Stanford. Merchandise bearing Stanford's names and marks, such as t-shirts, glassware, and notebooks, must be licensed. For complete text of the currently applicable policy, including the University officers authorized to grant permission to use the Stanford name and marks, see Administrative Guide Memo 15.5, Ownership and Use of Stanford Name and Trademarks at [http://adminguide.stanford.edu/15\\_5.pdf](http://adminguide.stanford.edu/15_5.pdf).

## COPYRIGHT

Copyright laws protect original works of authorship and give the owners of copyrights the exclusive right to do and to authorize others to do certain things in regard to a copyrighted work, including: make copies, distribute the work, display or perform the work publicly, and create derivative works. Copyright laws apply to nearly all forms of captured content, including traditional works like books, photographs, music, drama and sculpture. The laws also adapt to changes in technologies, and include in their scope modern forms of works like motion pictures, web sites, electronic media, software, multimedia works and some databases. Registration is not required to obtain a copyright, so if in doubt, assume a copyright applies.

Unless an exception to the copyright owner's exclusive rights applies, you must obtain permission from the copyright owner to copy, distribute, display or perform a copyrighted work in any medium for any purpose. Be especially mindful of copyright principles when using the Internet. Just because a work is posted on the Internet does not mean that the owner of the copyright has given you permission to use it. And, you should not be posting material onto the Internet without copyright clearance.

Stanford University Libraries have licenses with many publishers, which permit copying of materials in accordance with the educational, research or administrative functions of the

University. In addition, there are four major exceptions to the copyright owner's exclusive rights, which (if applicable) permit limited use without permission. These are: the fair use exception, the library exception, the face-to-face teaching exception, and the distance-learning exception. For a more detailed explanation of these exceptions, the copyright laws and Stanford's copyright policies, please review the University's Copyright Reminder at [http://www-sul.stanford.edu/libraries\\_collections/copyright\\_reminders/](http://www-sul.stanford.edu/libraries_collections/copyright_reminders/). It is each person's responsibility to be aware of and abide by copyright law; violation may result in civil or criminal liability, and constitutes grounds for University discipline, up to and including discharge, dismissal and expulsion.

## PEER-TO-PEER FILE SHARING

The use of file-sharing networks and software to download and share copyrighted works like software, music, movies, television programs, and books can violate copyright laws. Both the person who makes an illegal copy of a copyrighted work available and the person who receives or downloads an illegal copy have violated the law and Stanford policies. Many file-sharing programs have default settings that share copyrighted files, such as music and movies, through the Internet. Before enabling any of these programs students, faculty, or staff must read the fine print, make sure to understand the program itself, and only use such programs lawfully. Under the Digital Millennium Copyright Act (DMCA), copyright owners are entitled to notify Internet service providers, such as Stanford, that IP addresses linked to the Stanford network are sharing copies of music, movies, or other content without authorization. The law requires the University to respond to such complaints by eliminating access to the infringing materials. Stanford will disconnect students who fail to respond to a DMCA complaint promptly, and Stanford will charge reconnection fees starting at \$100 and going up as high as \$1,000 for successive DMCA complaints. Furthermore, the University also will suspend or terminate computer access to the Stanford network, including termination of the SUNet ID, to members of the community who continue to violate copyright laws. Finally, the University will take action through the student, employee, or faculty disciplinary processes if necessary. Beyond University consequences, copyright holders may file civil lawsuits against copyright infringers seeking extensive monetary damages. If compelled by a lawful subpoena, Stanford may be required to identify students, faculty, staff, or others who have violated copyright law. For more information about file-sharing, refer to Residential Computing's online resource, File-Sharing and Copyright Law at <http://rescomp.stanford.edu/info/dmca>.

Except with permission from the Office of Accessible Education or the instructor in question, students may not audio- or video-record lectures. Even with permission, students may only use such recordings for personal use; no posting or further distribution or use is permitted.

## DOMESTIC PARTNERS

In October 1990, Stanford University adopted a domestic partners policy. This policy, which implements the University's nondiscrimination policy, makes services that have historically been available to married students available on an equal basis to students with same-sex or opposite-sex domestic partners. These services include access to student housing, a courtesy card that provides access to University facilities, and the ability to purchase medical care at Vaden Health Service. A domestic partnership is defined as an established long-term partnership with an exclusive mutual commitment in which the partners share the necessities of life and ongoing responsibility for their common welfare.

# SEXUAL HARASSMENT AND CONSENSUAL SEXUAL OR ROMANTIC RELATIONSHIPS

For the complete text of the currently applicable version of this policy, see Administrative Guide Memo 23.2, Sexual Harassment, [http://adminguide.stanford.edu/23\\_2.pdf](http://adminguide.stanford.edu/23_2.pdf). It is also available from the Sexual Harassment Policy Office homepage, <http://harass.stanford.edu>.

## SUMMARY

Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation. Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.

## POLICY

The following is quoted from the policy:

1. *In General*
  - a. *Applicability and Sanctions for Policy Violations*—This policy applies to all students, faculty and staff of Stanford University, as well as to others who participate in Stanford programs and activities. Its application includes Stanford programs and activities both on and off-campus, including overseas programs. Individuals who violate this policy are subject to discipline up to and including discharge, expulsion, and/or other appropriate sanction or action.
  - b. *Respect for Each Other*—Stanford University strives to provide a place of work and study free of sexual harassment, intimidation or exploitation. It is expected that students, faculty, staff and other individuals covered by this policy will treat one another with respect.
  - c. *Prompt Attention*—Reports of sexual harassment are taken seriously and will be dealt with promptly. The specific action taken in any particular case depends on the nature and gravity of the conduct reported, and may include intervention, mediation, investigation and the initiation of grievance and disciplinary processes as discussed more fully below. Where sexual harassment is found to have occurred, the University will act to stop the harassment, prevent its recurrence, and discipline and/or take other appropriate action against those responsible.
  - d. *Confidentiality*—The University recognizes that confidentiality is important. Sexual harassment advisers and others responsible to implement this policy will respect the confidentiality and privacy of individuals reporting or accused of sexual harassment to the extent reasonably possible. Examples of situations where confidentiality cannot be maintained include circumstances when the University is required by law to disclose information (such as in response to legal process) and when disclosure is required by the University's outweighing interest in protecting the rights of others.
  - e. *Protection Against Retaliation*—Retaliation and/or reprisals against an individual who in good faith reports or provides information in an investigation about behavior that may violate this policy are against the law and will not be tolerated. Intentionally making a false report or providing false information, however, is grounds for discipline.
  - f. *Relationship to Freedom of Expression*—Stanford is committed to the principles of free inquiry and free expression. Vigorous discussion and debate are fundamental to the University, and this policy is not intended to stifle teaching methods or freedom of

expression generally, nor will it be permitted to do so. Sexual harassment, however, is neither legally protected expression nor the proper exercise of academic freedom; it compromises the integrity of the University, its tradition of intellectual freedom and the trust placed in its members.

## 2. *What Is Sexual Harassment?*

Unwelcome sexual advances, requests for sexual favors, and other visual, verbal or physical conduct of a sexual nature constitute sexual harassment when:

- a. It is implicitly or explicitly suggested that submission to or rejection of the conduct will be a factor in academic or employment decisions or evaluations, or permission to participate in a University activity; *or*
  - b. The conduct has the purpose or effect of unreasonably interfering with an individual's academic or work performance or creating an intimidating or hostile academic, work or student living environment.
- Determining what constitutes sexual harassment depends upon the specific facts and the context in which the conduct occurs. Sexual harassment may take many forms—subtle and indirect, or blatant and overt. For example,
- It may be conduct toward an individual of the opposite sex or the same sex.
  - It may occur between peers or between individuals in a hierarchical relationship.
  - It may be aimed at coercing an individual to participate in an unwanted sexual relationship or it may have the effect of causing an individual to change behavior or work performance.
  - It may consist of repeated actions or may even arise from a single incident if sufficiently egregious.

The University's Policy on Sexual Assault (see Guide Memo 23.3, Sexual Assault, [http://adminguide.stanford.edu/23\\_3.pdf](http://adminguide.stanford.edu/23_3.pdf)) may also apply when sexual harassment involves physical contact.

## 3. *What To Do About Sexual Harassment*

Individuals seeking further information are directed to the following resources:

- The Sexual Harassment Policy Office (Mariposa House, 585 Capistrano Way, Room 208-209, Stanford University, Stanford, CA, 94305-8230; (650) 723-1583; email: [harass@stanford.edu](mailto:harass@stanford.edu) for information, consultation, advice, or to lodge a complaint. Note that anonymous inquiries can be made to the SHPO by phone during business hours.
- The Sexual Harassment Policy Office web page at <http://harass.stanford.edu>.
- Any designated Sexual Harassment Adviser or resource person listed in 3.a or 5.a.

The following are the primary methods for dealing with sexual harassment at Stanford. They are not required to be followed in any specific order. However, early informal methods are often effective in correcting questionable behavior.

- a. *Consultation*—Consultation about sexual harassment is available from the Sexual Harassment Policy Office, Sexual Harassment Advisers (including residence deans), human resources officers, employee relations specialists, counselors at Counseling and Psychological Services (CAPS) or the Help Center, chaplains at Memorial Church, ombudspersons and others. A current list of Sexual Harassment Advisers is available from the Sexual Harassment Policy Office and at <http://harass.stanford.edu/SHadvisers.html>. Consultation is available for anyone who wants to discuss issues related to sexual harassment, whether or not "harassment" actually has occurred, and whether the person seeking information is a complainant, a person who believes his or her own actions may be the subject of criticism (even if unwarranted), or a third party.

Often there is a desire that a consultation be confidential or “off the record.” This can usually be achieved when individuals discuss concerns about sexual harassment without identifying the other persons involved, and sometimes even without identifying themselves. Confidential consultations about sexual harassment also may be available from persons who, by law, have special professional status, such as:

- Counselors at Counseling and Psychological Services (CAPS), <http://caps.stanford.edu>
- Counselors at the Help Center, <http://www.stanford.edu/dept/helpcenter>
- Chaplains at Memorial Church
- The University Ombudsman, <http://www.stanford.edu/dept/ombuds>

In these latter cases, the level of confidentiality depends on what legal protections are held by the specific persons receiving the information and should be addressed with them before specific facts are disclosed. For more information see <http://harass.stanford.edu/confidential.html>.

For further information on confidentiality, see Section 1(d) above.

- b. *Direct Communication*—An individual may act on concerns about sexual harassment directly, by addressing the other party in person or writing a letter describing the unwelcome behavior and its effect and stating that the behavior must stop. A Sexual Harassment Adviser can help the individual plan what to say or write, and likewise can counsel persons who receive such communications. Reprisals against an individual who in good faith initiates such a communication violate this policy.
- c. *Third Party Intervention*—Depending on the circumstances, third party intervention in the workplace, student residence or academic setting may be attempted. Third party intervenors may be the Sexual Harassment Advisers, human resources professionals, the ombudspersons, other faculty or staff, or sometimes mediators unrelated to the University. When third party intervention is used, typically the third party (or third parties) will meet privately with each of the persons involved, try to clarify their perceptions and attempt to develop a mutually acceptable understanding that can insure that the parties are comfortable with their future interactions. Other processes, such as a mediated discussion among the parties or with a supervisor, may also be explored in appropriate cases. Possible outcomes of third party intervention include explicit agreements about future conduct, changes in workplace assignments, substitution of one class for another, or other relief, where appropriate.
- d. *Formal Grievance, Appeal, and Disciplinary Processes*—Grievance, appeal, or disciplinary processes may be pursued as applicable.
  1. *Grievances and Appeals*—The applicable procedure depends on the circumstances and the status of the person bringing the charge and the person against whom the charge is brought. Generally, the process consists of the individual’s submission of a written statement, a process of fact-finding or investigation by a University representative, followed by a decision and, in some cases, the possibility of one or more appeals, usually to Stanford administrative officers at higher levels. The relevant procedure (see below) should be read carefully, since the procedures vary considerably.

If the identified University fact-finder or grievance officer has a conflict of interest, an alternate will be arranged, and the Director of the Sexual Harassment Policy Office or the Director of Employee and Labor Relations can help assure that this occurs.

In most cases, grievances and appeals must be brought within a specified time after the action complained of. While informal resolution efforts will not automatically extend the time limits for filing a grievance or appeal, in appropriate circumstances the complainant and the other relevant parties may mutually agree in writing to extend the time for filing a grievance or appeal.

A list of the established grievance and appeal procedures is located at [http://hrweb.stanford.edu/elr/policies/list\\_grievance\\_procedures.html](http://hrweb.stanford.edu/elr/policies/list_grievance_procedures.html). Copies may also be obtained from the Sexual Harassment Policy Office, <http://www.stanford.edu/group/SexHarass>.

Copies of the following may be obtained from Employee and Labor Relations, 651 Serra Street:

- “Solving Workplace Problems at Stanford: Understanding the Staff Dispute Resolution Policy” (also at <http://hrweb.stanford.edu/forms/staffresolution.pdf>.)
  - “Solving Workplace Problems at Stanford: Information for Academic Staff – Librarians and Academic Staff – Research Associates”
  - “The Dispute Resolution Process (A User’s Guide)”
1. *Disciplinary Procedures*—In appropriate cases, disciplinary procedures may be initiated. The applicable disciplinary procedure depends on the status of the individual whose conduct is in question. For example, faculty are subject to the Statement on Faculty Discipline <http://www.stanford.edu/dept/provost/faculty/policies/handbook/ch4.html#statementonfacultydiscipline>, and students to the Fundamental Standard. For additional information related to student judicial affairs, see <http://www.stanford.edu/dept/vpsa/judicialaffairs>.

The individuals referenced in this section are available to discuss these options and differing methods for dealing with sexual harassment.

#### 4. *Procedural Matters*

- a. *Investigations*—If significant facts are contested, an investigation may be undertaken. The investigation will be conducted in a way that respects, to the extent possible, the privacy of all of the persons involved. In appropriate cases, professional investigators may be asked to assist in the investigation. The results of the investigation may be used in the third party intervention process or in a grievance or disciplinary action.
- b. *Recordkeeping*—The Sexual Harassment Policy Office will track reports of sexual harassment for statistical purposes and report at least annually to the University President concerning their number, nature and disposition. The Sexual Harassment Policy Office may keep confidential records of reports of sexual harassment and the actions taken in response to those reports, and use them for purposes such as to identify individuals or departments likely to benefit from training so that training priorities can be established. No identifying information will be retained in cases where the individual accused was not informed that there was a complaint.
- c. *Indemnification and Costs*—The question sometimes arises as to whether the University will defend and indemnify a Stanford employee accused of sexual harassment. California law provides, in part, “An employer shall indemnify [its] employee for all that the employee necessarily expends or loses in direct consequence of the discharge of his [or her] duties as such . . . .” The issue of indemnification depends on the facts and circumstances of each situation. Individuals who violate this policy, however, should be aware that they and/or their schools, institutes, or other units may be required to pay or contribute to any judgments, costs and expenses incurred as a result of behavior that is wrongful and/or contrary to

the discharge of the employee's duties. In general, see Administrative Guide Memo 15.7 ([http://adminguide.stanford.edu/15\\_7.pdf](http://adminguide.stanford.edu/15_7.pdf)).

5. *Resources for Dealing with Sexual Harassment*

- a. *Advice*—Persons who have concerns about sexual harassment should contact the Sexual Harassment Policy Office, any Sexual Harassment Adviser at <http://harass.stanford.edu/SHadvisers.html> or one of the other individuals listed below. Reports should be made as soon as possible: the earlier the report, the easier it is to investigate and take appropriate remedial action. When reports are long delayed, the University will try to act to the extent it is reasonable to do so, but it may be impossible to achieve a satisfactory result after much time has passed.

Likewise, anyone who receives a report or a grievance involving sexual harassment should promptly consult with the Sexual Harassment Policy Office or with a Sexual Harassment Adviser.

There are a number of individuals specially trained and charged with specific responsibilities in the area of sexual harassment. In brief, they are:

- *Sexual Harassment Advisers* (<http://harass.stanford.edu/SHadvisers.html>) serve as resources to individuals who wish to discuss issues of sexual harassment, either because they have been harassed or because they want information about the University's policy and procedures. There is usually at least one Adviser assigned to each of the schools at the University and to each large work unit; most of the residence deans also have been appointed as Sexual Harassment Advisers. Advisers are also authorized to receive complaints.
- *The Director of the Sexual Harassment Policy Office* is responsible for the implementation of this policy. The Director's Office also provides advice and consultation to individuals when requested; receives complaints and coordinates their handling; supervises the other Advisers; encourages and assists prevention education for students, faculty and staff; keeps records showing the disposition of complaints; and generally coordinates matters arising under this policy. Because education and awareness are the best ways to prevent sexual harassment; developing awareness, education and training programs and publishing informational material are among the most important functions of the Sexual Harassment Policy Office (<http://harass.stanford.edu>).
- As stated above, individuals with concerns about sexual harassment may also discuss their concerns informally with psychological counselors (for example through CAPS or the HELP Center), chaplains (through the Memorial Chapel), or the University ombudsperson. For more information, see <http://harass.stanford.edu/resources.html>.

- b. *External Reporting*—Sexual harassment is prohibited by state and federal law. In addition to the internal resources described above, individuals may pursue complaints directly with the government agencies that deal with unlawful harassment and discrimination claims, e.g., the U.S. Equal Employment Opportunity Commission (EEOC), the Office for Civil Rights (OCR) of the U.S. Department of Education, and the State of California Department of Fair Employment and Housing (DFEH). These agencies are listed in the Government section of the telephone book. A violation of this policy may exist even where the conduct in question does not violate the law.

6. *Consensual Sexual or Romantic Relationships*

- a. *In General*—There are special risks in any sexual or romantic relationship between individuals in inherently unequal positions, and parties in such a relationship

assume those risks. In the University context, such positions include (but are not limited to) teacher and student, supervisor and employee, senior faculty and junior faculty, mentor and trainee, adviser and advisee, teaching assistant and student, coach and athlete, and the individuals who supervise the day-to-day student living environment and student residents. Because of the potential for conflict of interest, exploitation, favoritism, and bias, such relationships may undermine the real or perceived integrity of the supervision and evaluation provided, and the trust inherent particularly in the teacher-student context. They may, moreover, be less consensual than the individual whose position confers power or authority believes. The relationship is likely to be perceived in different ways by each of the parties to it, especially in retrospect.

Moreover, such relationships may harm or injure others in the academic or work environment. Relationships in which one party is in a position to review the work or influence the career of the other may provide grounds for complaint by third parties when that relationship gives undue access or advantage, restricts opportunities, or creates a perception of these problems. Furthermore, circumstances may change, and conduct that was previously welcome may become unwelcome. Even when both parties have consented at the outset to a romantic involvement, this past consent does not remove grounds for a charge based upon subsequent unwelcome conduct.

Where such a relationship exists, the person in the position of greater authority or power will bear the primary burden of accountability, and must ensure that he or she—and this is particularly important for teachers—does not exercise any supervisory or evaluative function over the other person in the relationship. Where such recusal is required, the recusing party must also notify his or her supervisor, department chair or dean, so that such chair, dean or supervisor can exercise his or her responsibility to evaluate the adequacy of the alternative supervisory or evaluative arrangements to be put in place. Staff members may notify their local human resources officers. To reiterate, the responsibility for recusal and notification rests with the person in the position of greater authority or power. Failure to comply with these recusal and notification requirements is a violation of this policy, and therefore grounds for discipline. The University has the option to take any action necessary to insure compliance with the spirit of this recusal policy, including transferring either or both employees in order to minimize disruption of the work group. In those extraordinarily rare situations where it is programmatically infeasible to provide alternative supervision or evaluation, the cognizant Dean or Director must approve all evaluative and compensation actions.

- b. *With Students*—At a university, the role of the teacher is multi-faceted, including serving as intellectual guide, counselor, mentor and advisor; the teacher's influence and authority extend far beyond the classroom. Consequently and as a general proposition, the University believes that a sexual or romantic relationship between a teacher and a student, even where consensual and whether or not the student would otherwise be subject to supervision or evaluation by the teacher, is inconsistent with the proper role of the teacher, and should be avoided. The University therefore very strongly discourages such relationships.

7. *Policy Review and Evaluation*—This policy went into effect on October 6, 1993, and was amended on November 30, 1995, and on May 30, 2002. It is subject to periodic review, and any comments or suggestions should be forwarded to the Director of the Sexual Harassment Policy Office.

## RESOURCES

*The following is a summary of resources concerning sexual harassment available to members of the Stanford Community:*

A brochure containing the policy, a list of current sexual harassment advisers, confidential resources, and other helpful information is available online at <http://harass.stanford.edu>, and in printed form from the Sexual Harassment Policy Office at Mariposa House, 585 Capistrano Way, Room 208-209, Stanford University, Stanford, CA, 94305-8230; (650) 723-1583; email: [harass@stanford.edu](mailto:harass@stanford.edu). Copies of the University policy on sexual assault, which complements this sexual harassment policy, as well as all other documents mentioned in this section, are also available at the Sexual Harassment Policy Office.

All faculty, staff, and students who have questions regarding this policy and its enforcement can consult with a Sexual Harassment Adviser or can be directed to the local Personnel Officer or Regional Human Resources Manager. Faculty members should contact their dean or department chair, and students should contact the Director of the Sexual Harassment Policy Office or the Dean of Student Affairs.

*Sexual Harassment Policy Office*—telephone: (650) 723-1583; email: [harass@stanford.edu](mailto:harass@stanford.edu).

*Director:* Laraine Zappert (Clinical Professor, Psychiatry and Behavioral Sciences)

*Assistant Director:* Nanette Andrews

## SEXUAL ASSAULT

The University's Policy on Sexual Assault is published in complete form in the Administrative Guide Memo 23.3, available at [http://adminguide.stanford.edu/23\\_3.pdf](http://adminguide.stanford.edu/23_3.pdf), and on the Judicial Affairs Office web site at <http://www.stanford.edu/dept/vpsa/judicialaffairs/index.html>.

### SUMMARY

*The following summarizes the policy on Sexual Assault and provides information on resources available to members of the Stanford community.*

*Policy*—Sexual assault is unacceptable and will not be tolerated at Stanford University. Any member of the Stanford community who commits sexual assault at or on the grounds of the University, or at any of the University's off-campus facilities or activities, or at the facilities or activities of any affiliated student organization, will face maximal institutional sanctions, in addition to any prosecutions external authorities may undertake. Stanford University is committed to providing information on services, resources, and treatment available to victims of sexual assault. A comprehensive website containing a list of resources can be found at <http://www.stanford.edu/group/svab/>.

*Definition*—For purposes of this policy, sexual assault is defined as the commission of an unwanted sexual act, occurring without consent of both individuals, or occurring under threat or coercion. It can occur either forcibly and/or against a person's will, or when a person is incapable of giving consent (if under 18 years of age; if intoxicated by drugs or alcohol; if developmentally disabled; if temporarily or permanently mentally or physically unable to do so). Sexual assault includes but is not limited to rape, forcible sodomy, forcible oral copulation, rape with an object, sexual battery, forcible fondling, and threat of sexual assault.

*Notification*—With the consent of the victim, charges of sexual assault received by University offices or personnel shall be communicated promptly to the Department of Public Safety, 711 Serra Street, telephone 9-911 for emergency response or (650) 723-9633 during normal business hours, or, in the case of a student, to the sexual assault response team at YWCA Sexual Assault Center at Stanford at Vaden Health Service, 866 Campus Drive, telephone 725-9955.

*Legal Reporting Requirements*—Health care professionals are expected to fulfill legally mandated reporting requirements.

*Emergency Services Available to Victims*—Victims of sexual assault are urged to seek immediate attention from emergency police, medical, and counseling services. On the Stanford campus and in the immediate vicinity, the following provide 24-hour response and will arrange for police assistance, medical assistance, emotional support services, and advocacy and support:

“911” Emergency Network: dial 9-911 from University phones or 911 from outside phones

Santa Clara Valley Medical Center, 751 South Bascom Avenue, San Jose, telephone (408) 885-5000

YWCA Sexual Assault Center at Stanford, for students, at the Vaden Health Service, telephone (650) 725-9955

Stanford Hospital and Clinics, 300 Pasteur Drive, Stanford, telephone (650) 723-5111

*Non-Emergency Resources*—Additional resources for students are available at Vaden Health Service at (650) 723-3785, including short-term counseling, referral to long-term therapy, follow-up pregnancy testing, and testing and treatment for sexually transmitted diseases. Additional services for faculty and staff are available at the University's HELP Center, Galvez House (723-4577), including general counseling, information, support, and referral. The University ombudsperson (723-3682) is available to all in the Stanford community for general counseling, advice, and advocacy. The Title IX Compliance Officer, Director of Diversity and Access Office, Mariposa House, 585 Capistrano Way, Stanford University, Stanford CA, 94305-8230, (650) 723-0755 (voice), (650) 723-1216 (TTY), (650) 723-1791 (fax), [equal.opportunity@stanford.edu](mailto:equal.opportunity@stanford.edu) (email), is available to assist students to address the effects of sexual harassment and sexual violence

*Ongoing Case Management Procedures*—Both informal procedures and formal grievance procedures for case management of sexual assault charges are given in the University's policy on Sexual Harassment appearing as Administrative Guide Memo 23.2 and published annually in this bulletin. Victims are to be kept informed by those responsible for those procedures of the status of any disciplinary proceedings and the results of any disciplinary action or appeal. The office of the Dean of Student Life is available to help student victims deal with academic difficulties that may arise because of the victimization and its impact.

*Information Requests and Disclosure*—The University offices responding to charges of sexual assault have established protocols for limiting the disclosure of information and for handling inquiries from the press, concerned students, and parents.

*Information about Options*—The University offices responding to charges of sexual assault will inform victims, at a minimum, of the options of: criminal prosecution, civil prosecution, the disciplinary process, the appropriate grievance procedure, alternative housing assignments, and academic assistance alternatives.

## POLITICAL ACTIVITIES

For the complete text of the currently applicable version of this policy, see Administrative Guide Memo 15.1, Political Activities, available at [http://adminguide.stanford.edu/15\\_1.pdf](http://adminguide.stanford.edu/15_1.pdf).

### SUMMARY

*The following summarizes the policy on Political Activities:*

Stanford University, as a charitable entity, is subject to federal, state, and local laws and regulations regarding political activities: campaign activities, lobbying, and the giving of gifts to public officials.

While all members of the University community are naturally free to express their political opinions and engage in political activities to whatever extent they wish, it is very important that they do so only in their individual capacities and avoid even the appearance that they are speaking or acting for the University in political matters.

In the limited circumstances where individuals must speak or act on behalf of the University in the political arena, they must do so in accordance with the provisions of this Guide Memo.

## POLICY

*The following is quoted from the policy:*

### 1. Summary of Legal Requirements and Restrictions

a. *Campaign Activities:* contributions of money, goods, or services to candidates for political office and in support of or opposition to ballot measure campaigns are subject to a wide variety of political laws. Depending on the jurisdiction and the campaign, political contributions may be prohibited or limited and, in nearly all cases, are subject to a complicated series of disclosure rules. Because of the University's tax-exempt status, the University is legally prohibited from endorsing candidates for political office or making any contribution of money, goods, or services to candidates. It is important, therefore, that no person inadvertently cause the University to make such a contribution.

b. *Lobbying:* lobbying can generally be described as any attempt to influence the action of any legislative body (for example, Congress, state legislatures, county boards, city councils, and their staffs) or any federal, state, or local government agency. Laws regulating lobbying exist at the federal, state, and local levels but can differ widely in scope, depending on the jurisdiction. Some laws, for example, only regulate lobbying of the legislative branch. Others, however, also cover lobbying of administrative agencies and officers in the executive branch (for example, lobbying for federally-funded grants). To one degree or another, however, most lobbying laws require registration and reporting by individuals engaged in attempts to influence governmental action.

Tax-exempt organizations are permitted to lobby, and the University engages in lobbying on a limited number of issues, mostly those affecting education, research, and related activities. There is usually some threshold of time or money spent on lobbying that triggers registration and reporting requirements. Regardless of thresholds, however, no University employee—other than the following individuals, on matters under their jurisdiction—may lobby on behalf of the University without specific authorization:

- President
- Provost
- Deans of the Seven Schools
- Vice Provost and Dean of Research
- Vice President for Business Affairs and Chief Financial Officer
- Executive Director of Human Resources
- Director of the Stanford Linear Accelerator Center
- Director of the Hoover Institution
- General Counsel
- Vice President for Public Affairs

The Vice Provost and Dean of Research may grant permission to faculty members to lobby on behalf of the University for specific purposes. The Director of Government and Community Relations may grant permission to staff members to lobby on behalf of the University for specific purposes. All lobbying on behalf of the University should be coordinated with the Director of Government and Community Relations.

c. *Giving of Gifts to Public Officials and Staff:* almost all jurisdictions have strict rules on the extent to which gifts and honoraria may be given to public officials (both elected and non-elected officials and, often, staff). In some cases gifts and honoraria are prohibited; in others they are limited; and in most cases they are subject to detailed disclosure. In addition, in some jurisdictions such as California, gifts to both state and local public officials can

result in a public official's disqualification from participation in any governmental action affecting the interests of the donor. Meals, travel, and entertainment are the most common types of gifts, but gift rules can also apply in cases where public officials attend a reception or receive tickets to sporting or other events.

As a non-profit organization, the University generally does not give gifts to public officials and, in those limited cases where it does give such gifts, it must do so in accordance with all applicable laws and regulations. Therefore, any University employee who, on behalf of the University, wishes to make a gift to a public official must receive prior approval from the Director of Government and Community Relations before making such a gift.

d. *Reporting of Political Activities:* the University must report most of its political activities above certain thresholds. Therefore, any University employee engaging in such activities on behalf of the University should carefully review the remainder of this Guide Memo and should discuss the relevant activities in advance with the Director of Government and Community Relations.

### 2. Prohibited and Restricted Political Activities

a. *In General:*

b. No person may, on behalf of the University, engage in any political activity in support of or opposition to any candidate for elective public office (including giving or receiving funds or endorsements), nor shall any University resources be used for such purpose.

c. No person may, on behalf of the University, lobby (or use University resources to lobby) any federal, state, or local legislative or administrative official or staff member unless specifically authorized to do so. Any lobbying activity, even when authorized, must be conducted in compliance with this Guide Memo, other applicable University policies, and applicable law.

d. No person may, on behalf of the University, give a gift (or use any University resources to give a gift) to any federal, state, or local official or staff member, except in compliance with this Guide Memo, other applicable University policies, and applicable law.

e. No person supporting candidates for public office or engaging in other political activities may use University space or facilities or receive University support, except in the limited ways described in section 3A, below.

f. No person may use for lobbying activities federally-funded contract or grant money received by the University. Even the foregoing activities that are only restricted, rather than prohibited, may be subject to limitations imposed by law. Therefore, any person engaging in the activity, or contemplating doing so, should consult with the Director of Government and Community Relations.

g. *Guidelines for Avoiding Prohibited Partisan Political Activities:* the following guidelines should assist in preventing the involvement or apparent involvement of the University in political activities in support of or opposition to any candidate for elective public office, that is, partisan political activities. Except in the limited circumstances set forth in section 3.b., below:

1. *Use of Name and Seal:* neither the name nor seal of the University or of any of its schools, departments, or institutions should be used on letters or other materials intended for partisan political purposes.

2. *Use of Address and Telephones:* no University office should be used as a return mailing address for partisan political mailings, and telephone service that is paid by the University, likewise, should not be used for partisan political purposes. (Obviously, a student's dormitory room and telephone service that are personal to the student may be used for these purposes.)

3. *Use of Title*: the University title of a faculty or staff member or other person should be used only for identification and should be accompanied by a statement that the person is speaking as an individual and not as a representative of the University.
  4. *Use of Services and Equipment*: University services, such as Interdepartmental Mail; equipment, such as duplicating machines, computers, and telephones; and supplies should not be used for partisan political purposes.
  5. *Use of Personnel*: no University employee may, as part of his or her job, be requested to perform tasks in any way related to partisan political purposes.
3. *Permissible Activities*
- a. *In General*: as noted above, the federal, state, and local laws which limit the partisan political activities that can take place in University facilities and with University support in no way inhibit the expression of personal political views by any individual in the University community. Nor do they forbid faculty, students, or staff from joining with others in support of candidates for office or in furtherance of political causes. There is no restriction on discussion of political issues or teaching of political techniques. Academic endeavors which address public policy issues are in no way affected.  
Because the University encourages freedom of expression, political activities which do not reasonably imply University involvement or identification may be undertaken so long as regular University procedures are followed for use of facilities. Examples of permissible activities are:
    1. Use of areas, such as White Plaza, for tables, speeches, and similar activities.
    2. Use of auditoriums for speeches by political candidates, but subject to rules of the Internal Revenue Service, the Federal Election Commission, and the California Fair Political Practices Commission, and other applicable laws. Arrangements must be made with University Events and Services. (See also Guide Memo 82.1, Public Events, for more information.)
 To reiterate, because tax and political compliance laws impose restrictions, and even prohibitions, on certain political activities and on the use of buildings and equipment at a non-profit institution such as the University, any such activities must be in compliance with these legal requirements. Individuals taking political positions for themselves or groups with which they are associated, but not as representatives of the University, should clearly indicate, by words and actions, that their positions are not those of the University and are not being taken in an official capacity on behalf of the University.
  - b. *Limited University Political Activities*: limited activities relating to specific federal, state, or local legislation or ballot initiatives are permissible where (1) the subject matter is directly related to core interests of the University's activities; (2) the President has determined that the University should take a position; and (3) the individuals who speak or write on the University's behalf are specifically authorized to do so.
4. *Responsibility for Interpretation*: the Director of Government and Community Relations, in consultation with the General Counsel, is the administrative officer responsible for interpretation and application of the above guidelines. Questions on whether planned student activities are consistent with the University's obligations should be directed to the Dean of Students, who will consult with the Director of Government and Community Relations and/or the General Counsel. All other questions on whether planned activities are consistent with the University's obligations should be

addressed directly to the Director of Government and Community Relations or the General Counsel.

## CAMPUS DISRUPTIONS

The University's policy on campus disruption applies to students, faculty, and staff. It is published in its complete form on the Judicial Affairs Office web site at <http://www.stanford.edu/dept/vpsa/judicialaffairs/index.html>.

### POLICY

*The following is quoted from the policy:*

Because the rights of free speech and peaceable assembly are fundamental to the democratic process, Stanford firmly supports the rights of all members of the University community to express their views or to protest against actions and opinions with which they disagree.

All members of the University also share a concurrent obligation to maintain on the campus an atmosphere conducive to scholarly pursuits, to preserve the dignity and seriousness of University ceremonies and public exercises, and to respect the rights of all individuals.

*The following regulations are intended to reconcile these objectives.*

It is a violation of University policy for a member of the faculty, staff, or student body to:

1. prevent or disrupt the effective carrying out of a University function or approved activity, such as lectures, meetings, interviews, ceremonies, the conduct of University business in a University office, and public events.
2. obstruct the legitimate movement of any person about the campus or in any University building or facility.

Members of the faculty, staff, and student body have an obligation to leave a University building or facility when asked to do so in the furtherance of the above regulations by a member of the University community acting in an official role and identifying himself or herself as such; members of the faculty, staff, or student body also have an obligation to identify themselves, when requested to do so by such a member of the University community who has reasonable grounds to believe that the person(s) has violated section (1) or (2) of this policy and who has so informed the person(s).

### APPLICATION

*The following are examples to illustrate the policy:*

The policy has been applied to the following actions: refusal to leave a building which has been declared closed; obstructing the passage into or out of buildings by sitting in front of doorways; preventing University employees from entering their workplace; preventing members of a class from hearing a lecture or taking an examination, or preventing the instructor from giving a lecture, by means of shouts, interruptions, or chants; preventing others from hearing a scheduled speaker by means of shouts, interruptions, or chants; refusing to leave a closed meeting when unauthorized to attend; and intruding upon or refusing to leave a private interview.

It should be understood that while the above are examples of extraordinarily disruptive behavior, the application of the policy also takes situational factors into consideration. Thus, for example, conduct appropriate at a political rally might constitute a violation of the Policy on Campus Disruption if it occurred within a classroom.

There is no "ordinary" penalty which attaches to violations of the Policy on Campus Disruption. Each case is fact-specific; considerations would include: the gravity of the offense, and prior similar misconduct. As a general rule, the more serious the offense, the less it matters that the violation had otherwise not done wrong.

# USE OF THE MAIN QUADRANGLE AND MEMORIAL COURT

## POLICY

*The following is quoted from the policy:*

The Main Quadrangle and Memorial Court are part of Stanford University's academic preserve due to their locations at the heart of the campus. To protect and enhance their historic status, University policy limits activities primarily to established or traditional ceremonies and events.

To schedule an event, approval must be obtained in advance from the Office of Stanford Events (see below). Unscheduled events, protests, or activities are prohibited.

Requests for waivers to this policy must be submitted in advance and in writing to the Office of Stanford Events. Exceptions may be granted only in extraordinary cases.

## RESOURCES

*The following is a summary of resources available:*

For instructions on use of the Main Quadrangle/Memorial Court, contact the Office of Special Events and Protocol (OSEP) at (650) 724-1387, <http://stanfordevents.stanford.edu>.

Note: other venues on campus (such as White Plaza) are made available to Stanford students, faculty, and staff for events other than scheduled "established or traditional ceremonies and events" including those that may involve amplified sound. For further information on the use of such other venues, contact Student Activities and Leadership (SAL) at (650) 723-2733, <http://studentaffairs.stanford.edu/sal>.

## OVAL POLICY

The Oval is considered to be the initial and official visual entrance to the Stanford University campus. Given this historic and aesthetic status, it is in the best interests of the University community and visiting members of the public to maintain its open and pristine space, to help preserve its natural beauty and environmental integrity. The Oval also presents the formal academic image of the University, leading directly to departments, classrooms and other academic space, and faculty and graduate student offices, and thus is subject to the University's Noise Policy.

The University prohibits formal or informal events of any kind to take place in the Oval. Gatherings of Stanford students, faculty, and staff such as demonstrations, rallies, or dances may take place in White Plaza, which can be reserved through the Office of Student Activities. Weddings also are not allowed in the Oval but are in certain circumstances allowed in Memorial Church (refer to Memorial Church wedding ceremony guidelines).

The Oval is considered a pedestrian zone and appropriate use of its space includes walking, running, reading, relaxing, and other limited recreational use of the lawn area (such as quiet, very small picnics and Frisbee), unless or until such use damages or otherwise harms the property.

Cooking food or use of any grill/barbecue or open flame is strictly prohibited. Fireworks or the use of other incendiary devices represent a safety hazard to the area and are therefore prohibited. Amplified sound from items such as boom boxes, musical instruments, or the use of bullhorns or amplified speakers is also prohibited. Only authorized Stanford service vehicles are permitted inside the Oval areas.

As the official entrance to the University, the Oval offers public access to general parking spaces in the marked areas surrounding the outer perimeter of the Oval; drivers are expected to obey all traffic signs and limitations. Buses are subject to additional restrictions.

For further information regarding this policy, contact the Executive Director of Special Events and Protocol, 724-1387 or see <http://osep.stanford.edu/policies/oval.html>.

# NOISE AND AMPLIFIED SOUND

## POLICY

*The following is quoted from the policy:*

Stanford is not only an academic institution but a residential community as well. It is the responsibility of all faculty, students, and staff to moderate noise especially during an event or activity held on campus. Supporting the mission of the University and respecting those who are studying, researching, or otherwise carrying out academic-related activities is a Stanford priority. The campus must require a conducive atmosphere to ensure these endeavors are accomplished and supported. Disturbing noise in or around a residence or other campus buildings which infringe on the rights of other residents or members of the University community is considered a violation of this policy. As part of the event planning process, the event sponsor must obtain all appropriate approvals regarding the use of amplified sound during an event or activity.

## RESOURCES

Information regarding whether and how the use of amplified sound is permitted is available from the following sources, which must be consulted for prior approval:

- The Office of Student Activities: phone: 723-2733, or see <http://studentaffairs.stanford.edu/sal/policies/noise>
- Registrar's Scheduling Office: email [reg-events@stanford.edu](mailto:reg-events@stanford.edu), or see <http://studentaffairs.stanford.edu/registrar/faculty/events>.
- Office of Special Events and Protocol (OSEP) at (650) 724-1387, or see <http://stanfordevents.stanford.edu>.

# PROHIBITION OF THE POSSESSION OF DANGEROUS WEAPONS ON CAMPUS

The University's policy prohibiting weapons on campus is published in its complete form on the Judicial Affairs Office web site <http://stanford.edu/dept/vpsa.judicialaffairs/index.html>.

## POLICY

*The following is quoted from the policy:*

Except for authorized academic purposes, the knowing possession by any student on any Stanford campus of the following is prohibited: firearms, explosives, or any instrument or weapon of the kind commonly known as blackjack, slingshot, billy club, sandclub, sandbag, or metal knuckles.

Notwithstanding the paragraph above, a student who is a resident of a Stanford campus may store a weapon on such campus if both of the following conditions are met:

- The student has complied with all state and federal regulations regarding the use and possession of said weapon, or, in the case of a foreign campus, with the laws of the country in which the campus is located.
- The student stores such weapons with the Stanford Department of Public Safety (SDPS) or, in the case of a foreign campus, in a facility provided by the director of such campus.

Students may remove their weapons from storage only in accordance with regulations established by the SDPS or by the director of the foreign campus at which the weapon is stored. A student who is a resident of a Stanford campus may bring any of the above weapons on campus for purposes of storage only if the student has previously notified the SDPS of the intention to do so,

but in no event more than six hours after arrival on the campus. When the student removes the weapon from storage, it must be taken off campus as soon as is practicable, but in no event more than one hour after such removal.

The term “Stanford campus” shall include all the lands and facilities of Leland Stanford Junior University, whether owned or leased, and whether located in the United States or abroad.

## STUDENT ALCOHOL POLICY

This document clarifies the University’s expectations and approach related to the use of alcohol by students. The University’s Controlled Substances and Alcohol Policy is also applicable. The full text is contained at: [http://adminguide.stanford.edu/23\\_6.pdf](http://adminguide.stanford.edu/23_6.pdf).

### PREAMBLE

The Fundamental Standard has set the standard of conduct for students at Stanford since 1896. It states: “Students at Stanford are expected to show both within and without the University such respect for order, morality, personal honor and the rights of others as is demanded of good citizens.” Implicit in the Standard is the understanding that students are responsible for making their own decisions and accepting the consequences of those decisions.

The University is committed to the health, safety and well-being of each member of the Stanford community. In order to further student learning, development and success and to promote the University’s academic mission, Stanford fosters an environment of personal and collective responsibility and respectful citizenship. This means that all members of the university community—students, faculty and staff—have a role in safeguarding a healthy learning environment free of the consequences of alcohol misuse. The University also strives to create a culture that supports students who do not use alcohol and students who use alcohol in a safe, legal and responsible fashion.

### LEGAL BACKGROUND

Members of the Stanford community are expected to abide by all federal, state and local laws, including those governing alcohol consumption and distribution. Under California law, it is illegal for anyone under the age of 21 to purchase alcohol or to possess alcohol in a public space. It is also illegal for anyone to furnish alcohol to an individual under the age of 21. Other state laws governing the use of alcohol are listed below.

While it is not the responsibility of most Stanford officials to enforce state law, it is the responsibility of the University’s Department of Public Safety, and accordingly they enforce all state alcohol laws when they encounter violations. All community members should understand the law and, as individuals, ensure that they themselves do not violate it.

In addition, it is the responsibility of all community members to ensure that the University does not, through their actions, violate the law. Accordingly, official University functions, including events held by registered student groups, are not allowed to provide alcohol to those under 21, and no University funds may be used to purchase alcohol for that purpose. Violations of this requirement can result in both criminal prosecution and University administrative action, including dismissal from the University.

### RESPONSIBLE ALCOHOL USE

Stanford students are expected to behave responsibly, both in the classroom and outside, both on campus and off. In particular, the University does not tolerate reckless drinking—lawful or unlawful—and its consequent harmful behaviors. The University is especially concerned about the misuse of distilled alcohol products (“hard alcohol”), and the dangers that arise from that misuse.

All students should understand the physical and behavioral effects of alcohol misuse, and should avoid such misuse themselves. In addition, they are expected to do their part to

ensure the safety of fellow students whom they perceive to be engaged in reckless drinking behavior or to be suffering from its consequences.

The University provides educational resources to assure that students understand the effects of alcohol misuse and know how to respond when they perceive others to be engaged in dangerous behavior.

Reckless drinking and encouraging reckless drinking are violations of University policy, and may be subject to disciplinary action. Extreme or repeated violations may result in dismissal from the University.

More generally, students are expected to make healthy, responsible choices concerning their personal use of alcohol and the University supports them in this endeavor through education and other resources. The University sponsors activities and programs focused on students who choose not to drink or to drink lightly, as well as resources and services to assist students who need help for themselves or others related to alcohol use.

### AUTHORITY, APPLICATION AND ENFORCEMENT

Responsibility for application of the Student Alcohol Policy resides with the Vice Provost for Student Affairs. The Office of Alcohol Policy and Education reports to the Vice Provost for Student Affairs and is expected to coordinate and implement alcohol programs. (The University’s Controlled Substances and Alcohol Policy is also applicable. The full text is contained at: [http://adminguide.stanford.edu/23\\_6.pdf](http://adminguide.stanford.edu/23_6.pdf)).

The Stanford University Department of Public Safety enforces federal, state and local laws among students, other community members, guests and visitors.

### ALCOHOL POLICY VIOLATIONS

The Office of Alcohol Policy and Education will work with the following offices to address violations of the University’s alcohol policy as determined by the specifics of each situation.

- The Office of Residential Education for undergraduate students, residential groups, fraternities and sororities
- Graduate Life Office (GLO) for graduate students
- Student Activities and Leadership (SAL) for voluntary student organizations
- Department of Athletics, Physical Education and Recreation (DAPER) for student athletes and athletic groups
- Such other offices as are appropriate under particular circumstances

Violations may be referred to the Office of Judicial Affairs (for individual students) and the Organization Conduct Board (for student groups). The Dean of Student Life may take action as well in certain circumstances.

### GETTING HELP: RESOURCES AVAILABLE TO STUDENTS

Students have access to a variety of University resources.

### ADDITIONAL UNIVERSITY REGULATIONS

- Students living in University residences sign a residence agreement that outlines housing policies and expectations for conduct. Violations of the residence agreement can lead to loss of housing.  
[[http://www.stanford.edu/dept/rde/shs/res\\_agree.htm](http://www.stanford.edu/dept/rde/shs/res_agree.htm)]
- All parties must be registered with the University, and availability of alcohol is regulated by party planning guidelines coordinated by the Office of Student Activities and Leadership.  
[<http://studentaffairs.stanford.edu/sal/planning/party>]  
Other restrictions apply to particular circumstances
- Frosh Housing—Alcoholic beverages are prohibited at all-frosh house events in common area spaces.
- University Funds and the Purchase of Alcohol—No University funds or funds collected by the University may be used in a way that violates the alcohol policy. In student residences,

house funds (funds collected by Student Financial Services or other University offices) may not be used to buy alcohol. Any decision to use student-collected funds to buy alcohol must be made lawfully, thoughtfully, fairly and in a way that respects the views of all students. Students must not be required to contribute to the purchase of alcohol.

- Dining Hall—Students may not possess or consume alcoholic beverages in Stanford Dining Halls during meal times and food service. University Dining staff can deny admission, access or meal service to anyone who is believed to be intoxicated by the Dining Management staff.
- White Plaza—Alcoholic beverages in White Plaza are prohibited.
- End of Quarter Period and Finals Week—No registered parties (with or without alcohol) can occur during the End of the Quarter Period (dead week) or Finals Week.
- Athletic Facilities—No alcohol is permitted inside Stanford athletic facilities public spaces during athletic events.
- Stanford Conferences and University Facilities—The University requires that event sponsors and student groups wishing to offer alcoholic beverages at their programs and events operate within state and local laws as provided by the Department of Alcohol and Beverage Control (ABC). Alcohol service is not allowed in classrooms.
- Admit Weekend—Stanford students are prohibited from providing, serving or in anyway making alcohol available to any prospective frosh (ProFro). All student groups/organizations and residences may host only alcohol-free parties or events during Admit Weekend. This specifically means that no alcohol is to be present, served or consumed at any student group/organization and/or dorm function during Admit Weekend.
- New Student Orientation (NSO) Period—At no time should any Stanford student provide, serve or in any way make alcohol available to any new, incoming undergraduate student (freshman or transfer). All undergraduate student groups/organizations and residences will host only alcohol-free parties or events during Orientation. This specifically means that no alcohol is to be present, served, or consumed at any student group/organization and/or dorm function during NSO.

### CALIFORNIA STATE LAWS

Students should be familiar with California laws governing the consumption of alcohol. The following summarizes those laws most relevant to individuals.

- It is illegal for persons under the age of 21 to possess an alcoholic beverage in any public place or any place open to the public (CA Business and Professions Code 25662).
- Any person who furnishes, gives or sells any alcoholic beverage to someone under the age of 21 is guilty of a misdemeanor (CA Business and Professions Code 25658(a)).
- Any person under the age of 21 who attempts to purchase an alcoholic beverage is guilty of an infraction (CA Business and Professions Code 25658.5).
- Any person under the influence of alcohol in a public place and unable to exercise care for one's own safety or that of others is guilty of a misdemeanor (CA Penal Code 647(f)).
- It is illegal for persons to operate a motor vehicle while under the influence of alcohol or other intoxicants or with a blood alcohol level of .08% or higher (CA Vehicle Code Section 23152). NOTE: A golf cart is a motor vehicle.
- It is unlawful for a person under the age of 21 years who has 0.05 percent or more, by weight, of alcohol in his or her blood to drive a vehicle (CA Vehicle Code Section 23140(a)).

- It is illegal for a person under the age of 21 to drive a vehicle when he or she has a blood alcohol concentration (BAC) of .01% or higher (CA Vehicle Code Section 23136).
- It is a misdemeanor to ride a bicycle under the influence of alcohol, drugs or both (CA Vehicle Code Section 21200.5).
- It is an infraction to possess an open container of an alcoholic beverage while in a motor vehicle (CA Vehicle Code Section 23223).
- It is an infraction for an owner or driver of a motor vehicle to allow an open container of alcohol in the passenger area (CA Vehicle Code Section 23225).

## HAZING POLICY

Hazing is not permitted at Stanford University. No individual, recognized student organization, club, team, or any other Stanford-affiliated student group is permitted to plan, engage in, or condone hazing, on or off the Stanford campus.

### DEFINITION OF HAZING AT STANFORD UNIVERSITY

Hazing includes any activity done in connection with a student organization, regardless of whether the organization is officially recognized at Stanford, that causes or is reasonably likely to cause another student to suffer bodily danger, physical harm, or significant personal degradation or humiliation, even if no bodily danger, physical harm, or significant degradation or humiliation in fact results. Hazing might occur during initiation or pre-initiation into a student organization, but is not limited to these time frames. Any individual who plans or intentionally assists in hazing activity has engaged in hazing, regardless of whether that individual is present when the hazing activity occurs.

### CONSEQUENCES OF A VIOLATION

Stanford University expects its students to conduct themselves in socially responsible and respectful ways. Thus, participation in hazing, either as an individual or as part of any student group, may result in serious individual and organizational consequences including, but not limited to: disciplinary action up to and including expulsion; permanent loss of organizational recognition; and loss of eligibility to remain a member of any club, team, or other Stanford-affiliated student group. Consent, implied or expressed, is not a defense to any complaint or charge alleging a hazing violation.

A number of University offices may take institutional action, including: the Organizational Conduct Board; Judicial Affairs; or other University offices, such as the Vice Provost for Student Affairs or the Department of Athletics.

### APPLICATIONS

Stanford's hazing policy is distinct from and broader than California Penal Code section 245.6, which prohibits: "any method of initiation or preinitiation into a student organization or student body, whether or not the organization or body is officially recognized by an educational institution, which is likely to cause serious bodily injury to any former, current, or prospective student of any school, community college, college, university or other educational institution in this state." A violation of Penal Code Section 245.6 that does not result in serious bodily injury is punishable as a misdemeanor, while a violation that results in death or injury is punishable as a felony or a misdemeanor.

Nothing in this hazing policy prevents Stanford from taking institutional action against hazing activity that falls outside the narrower definition of Penal Code section 245.6.

Stanford's hazing policy is not intended to prohibit student recruitment or new or continuing member activities that are positive and educational in nature, designed to instill a group ethos

or unity. Its intent is to deter those behaviors that cause or are likely to cause danger, harm or humiliation to another student.

Stanford's hazing policy is not intended to apply to customary athletic events or other similar institutionally-approved contests or competitions.

Questions should be directed to the Office of Student Activities, (650) 723-2733.

## SMOKE-FREE ENVIRONMENT

The University's policy on a smoke-free environment is published in its complete form in the Administrative Guide as Administrative Guide Memo 23.4, available at [http://adminguide.stanford.edu/23\\_4.pdf](http://adminguide.stanford.edu/23_4.pdf), and Judicial Affairs Office web site at <http://www.stanford.edu/dept/vpsa/judicialaffairs/index.html>.

**Applicability**—This policy applies to all academic and administrative units of Stanford University, including the SLAC National Accelerator Laboratory, and all campus student housing. This policy does not supersede more restrictive policies which may be in force in compliance with federal, state, or local laws or ordinances.

Note also that the School of Medicine has adopted a more restrictive policy; see <http://med.stanford.edu/tobaccofree>.

### POLICY

*The following is quoted from the policy:*

1. **Policy**  
It is the policy of Stanford University that the smoking of tobacco products in enclosed buildings and facilities and during indoor or outdoor events (and the selling of tobacco products) on the campus is prohibited.
2. **Guidelines**
  - a. **Smoking-Prohibited Areas**—Specifically, smoking is prohibited in classrooms and offices, all enclosed buildings and facilities, in covered walkways, in University vehicles, during indoor and outdoor athletic events, and during other University sponsored or designated indoor or outdoor events.
    - Ashtrays will not be provided in any enclosed University building or facility.
    - "Smoking Prohibited" signs will be posted.
  - b. **Outdoor Smoking Areas**—Smoking is permitted in outdoor areas, except during organized events. Outdoor smoking areas should be located far enough away from doorways, open windows, covered walkways, and ventilation systems to prevent smoke from entering enclosed buildings and facilities. To accommodate faculty, staff, and students who smoke, Vice Presidents, Vice Provosts, and Deans may designate certain areas of existing courtyards and patios as smoking areas in which case ashtrays must be provided. Costs associated with providing designated smoking areas and ashtrays will be absorbed by the specific academic or administrative unit(s).
3. **Enforcement**—This policy relies on the consideration and cooperation of smokers and non-smokers. It is the responsibility of all members of the University community to observe and follow this policy and its guidelines.
  - a. **Smoking Cessation Information**—Smoking cessation programs are available for faculty and staff through the Center for Research in Disease Prevention, and the Health Improvement Program (HIP). Students may contact the Health Promotion Program (HPP) through the Student Health Center for smoking cessation information or programs.
  - b. **Repeated Violations**—Faculty, staff, and students repeatedly violating this policy may be subject to appropriate action to correct any violation(s) and prevent future occurrences.

4. **Implementation and Distribution**—Copies of this policy will be disseminated by the Manager of HR Policy/Staff and Labor Relations and the Vice Provost for Student Affairs to all faculty, staff, and students, and to all new members of the University community.

## VISITOR POLICY/UNIVERSITY STATEMENT ON PRIVACY

Stanford University has an interest in ensuring that the privacy of its students, faculty, and staff is respected, and that no activities interfere with education, research, or residential life.

The University is private property; however, some areas of the campus typically are open to visitors. These areas include White Plaza, public eating areas (such as those at Tresidder Union), outdoor touring areas, and locations to which the public has been invited by advertised notice (such as for public educational, cultural, or athletic events). Even in these locations, visitors must not interfere with the privacy of students, faculty, and staff, or with educational, research, and residential activities. The University may revoke at any time permission to be present in these, or any other areas. Visitors should not be in academic or residential areas unless they have been invited for appropriate business or social purposes by the responsible faculty member, student, or staff member.

No commercial activity, including taking photos or similar audio or visual recordings that are sold to others or otherwise used for commercial purposes, may occur on the campus without the University's permission. Requests for permission should be submitted to the Director of University Communications or, as appropriate, the Dean of Students, the Department of Athletics, or the Office of Public Events. Recognized student groups and official units of the University will be granted such permission so long as they do not violate privacy or property interests of others; so long as any sale of their products is predominantly on campus to students, faculty, and staff; and so long as they comply with applicable University policies and procedures.

Violators of this policy may be subject to criminal and/or civil liability, as well as University disciplinary action.

## COMPUTER AND NETWORK USAGE

For a complete text of the currently applicable version of this policy, see Administrative Guide Memo 62, Computer and Network Usage Policy, available at <http://adminguide.stanford.edu/62.pdf>.

### POLICY

*The following is quoted from the policy:*

Users of Stanford network and computer resources have a responsibility not to abuse the network and resources. This policy provides guidelines for the appropriate and inappropriate use of information technologies.

### SUMMARY

*The following summarizes the policy on Computer and Network Usage:*

In particular, the policy provides that users of University information resources must respect software copyrights and licenses, respect the integrity of computer-based information resources, refrain from seeking to gain or permitting others to gain unauthorized access, including by sharing passwords, and respect the rights of other computer users.

This policy covers appropriate use of computers, networks, and information contained therein. As to political, personal and

commercial use, the University is a non-profit, tax-exempt organization and, as such, is subject to specific federal, state, and local laws regarding sources of income, political activities, use of property, and similar matters. It also is a contractor with government and other entities, and thus must assure proper use of property under its control and allocation of overhead and similar costs. For these reasons, University information resources must not be used for partisan political activities where prohibited by federal, state, or other applicable laws, and may be used for other political activities only when in compliance with federal, state, and other laws, and in compliance with applicable University policies. Similarly, University information resources should not be used for personal activities not related to appropriate University functions, except in a purely incidental manner. In addition, University information resources should not be used for commercial purposes, except in a purely incidental manner or except as permitted under other written policies of the University or with the written approval of a University officer having the authority to give such approval. Any such commercial use should be properly related to University activities, take into account proper cost allocations for government and other overhead determinations, and provide for appropriate reimbursement to the University for taxes and other costs the University may incur by reason of the commercial use. Users also are reminded that the .edu domain on the Internet has rules restricting or prohibiting commercial use, and thus activities not appropriately within the .edu domain and which otherwise are permissible within the University computing resources should use one or more other domains, as appropriate.

The University's Information Security Officer is authorized in appropriate circumstances to inspect or monitor private data (including email), such as when there is a reasonable cause to suspect improper use of computer or network resources.

For further information on the topic of peer-to-peer file sharing, see the section above on Copyright.

## PROTECTION OF SENSITIVE DATA

---

Stanford University maintains sensitive non-public data protected by laws and agreements, including Social Security numbers, financial information, health information, and student records. It is incumbent on every member of the Stanford community with access to such data to be familiar with and abide by Stanford's data classifications requirements provided at [http://www.stanford.edu/group/security/securecomputing/dataclass\\_chart.html](http://www.stanford.edu/group/security/securecomputing/dataclass_chart.html). Members of the Stanford community should also familiarize themselves with applicable laws and University policies on privacy as provided by the University, including Administrative Guide Memo 63, Information Security, <http://adminguide.stanford.edu/63.pdf>, Administrative Guide Memo 64, Identification and Authentication of Systems, <http://adminguide.stanford.edu/64.pdf>, Administrative Guide Memo 65, Electronic Commerce, <http://adminguide.stanford.edu/65.pdf>, and Administrative Guide Memo 67, Information Security Incident Response, <http://adminguide.stanford.edu/67.pdf>. For information on best practices for securing mobile computing devices, see [http://www.stanford.edu/group/security/securecomputing/mobile\\_devices.html](http://www.stanford.edu/group/security/securecomputing/mobile_devices.html).

## CAMPUS SAFETY AND CRIMINAL STATISTICS

---

Stanford University complies with the Jeanne Clery Disclosure of Campus Security Policy and Crime Statistics Act. A copy of Stanford's policies and statistics under this act are posted on the

Department of Public Safety web site at <http://stanford.edu/group/SUDPS/safety-report.shtml>. A paper copy can be obtained by calling the Stanford Department of Public Safety at (650) 723-9633.
