The Center for Russian, East European and Eurasian Studies (CREEES) offers an undergraduate minor and a one-year master's program in interdisciplinary area studies.

For further information, see the "Center for Russian, East European and Eurasian Studies" section of this bulletin.

## CENTER FOR SOUTH ASIA

*Director:* Thomas Blom Hansen

*Office:* Encina Hall West, first floor

*Web Site:* <http://southasia.stanford.edu>

The Center for South Asia (CSA) serves to coordinate and develop Stanford's resources for the study of South Asia across all the disciplines in the School of Humanities and Sciences. It works closely with departments and other units of the University to increase faculty strength, support research, enhance the curriculum, build the library collection, and sponsor programs and events.

## FORD DORSEY PROGRAM IN INTERNATIONAL POLICY STUDIES

*Director:* Kathryn Stoner-Weiss

*Office:* Encina Hall West, second floor

*Web Site:* <http://ips.stanford.edu>

The Ford Dorsey Program in International Policy Studies (IPS) is a two-year master's program that seeks to train the next generation of policy analysts to solve key global problems.

For further information, see the "International Policy Studies" section of this bulletin.

## FRANCE-STANFORD CENTER FOR INTERDISCIPLINARY STUDIES

*Director:* Keith Baker

*Office:* Building 260, room 105

*Web Site:* <http://francestanford.stanford.edu>

The France-Stanford Center for Interdisciplinary Studies, founded in partnership with the French Ministry of Foreign Affairs, aims to bridge the disciplines of the humanities, social sciences, sciences, engineering, business, and law, addressing historical and contemporary issues of significance for France and the United States. The Center brings together Stanford faculty and students and academics in France to advance collaborative research and foster interdisciplinary inquiry. Its programs include conferences, support for collaborative research projects, internships, exchanges, lectures, and seminars.

## HAMID AND CHRISTINA MOGHADAM PROGRAM IN IRANIAN STUDIES

*Director:* Abbas Milani

*Office:* Encina Hall West, second floor

*Web Site:* <http://iranian-studies.stanford.edu>

The Hamid and Christina Moghadam Program in Iranian Studies at Stanford fosters the interdisciplinary study of Iran as a civilization, one of the oldest in the world. The program combines pedagogy, policy analysis, and research on all aspects of Iran's past, present, and future. The program organizes lectures and student research conferences on Iran.

## MEDITERRANEAN STUDIES FORUM

*Interim Director:* Vincent Barletta

*Office:* Encina Hall West, Room 211

*Web Site:* <http://mediterraneanstudies.stanford.edu>

The Mediterranean Studies Forum encourages scholars to explore the interplay among societies, cultures, and communities around the Mediterranean Basin from the Middle Ages to the present. Its focus is on all aspects of co-existence and conflict that have marked these encounters in the empires, port cities, nation states, and transregional and transnational social, religious, cultural, and economic contexts of North Africa, the Levant, the Balkans, and Southern Europe. It is also interested in the relations of the Mediterranean with other regions and areas of the world. The central goal of the forum is to contribute to interfield and interdisciplinary dialogue among scholars of these areas through lectures, colloquia, workshops, conferences, and publications.

## PROGRAM IN INTERNATIONAL RELATIONS

*Interim Director:* Judith Goldstein

*Office:* Encina Hall West, second floor

*Web Site:* <http://internationalrelations.stanford.edu>

International Relations (IR) is an interdisciplinary undergraduate major focusing on changing political, economic, and cultural relations within the international system in the modern era.

For further information, see the "International Relations" section of this bulletin.

## ROBERT H. N. HO FAMILY FOUNDATION CENTER FOR BUDDHIST STUDIES AT STANFORD UNIVERSITY

*Directors:* Carl Bielefeldt, Paul Harrison

*Office:* Building 70, Room 71E

*Web Site:* <http://hcbss.stanford.edu>

The Robert H. N. Ho Family Foundation Center for Buddhist Studies at Stanford University (HCBSS) serves to coordinate, support, and develop the University's resources for Buddhist Studies in scholarly research, academic communication, teaching, and public outreach. The Center supports individual and team research projects for faculty, students, and visiting fellows. It houses a reference collection and reading room and sponsors lectures, conferences, symposia, workshops, and seminars. The Center works closely with the Department of Religious Studies, the Buddhism in the Modern World Program, and the Group in Buddhist Studies at UC Berkeley.

## SOHAIB AND SARA ABBASI PROGRAM IN ISLAMIC STUDIES

*Interim Director:* Vincent Barletta

*Office:* Encina Hall West, Room 211

*Web Site:* <http://islamicstudies.stanford.edu>

The mission of the Sohaib and Sara Abbasi Program in Islamic Studies is to serve as a forum for interdisciplinary research and teaching in Islamic studies, complemented by seminars, colloquia and public lectures. The program seeks to illuminate Islamic history from its beginnings to the 21st century, the religion of Islam in its many aspects, and the diversity of Muslim cultures and societies, past and present, not only in the Middle East but also including South and Southeast Asia, Africa, Europe, and America. In addition to geographical breadth, the program promotes the use of scholarly resources from both the humanities and the social sciences. Participating faculty and students bring perspectives and methods from academic fields including anthropology, art, economics, history, international relations, languages, law, literature, philosophy, political science, and religious studies.

## TAUBE CENTER FOR JEWISH STUDIES

*Director:* Steven Weitzman

*Office:* Building 360, Room 362G

*Web Site:* <http://jewishstudies.stanford.edu>

The interdisciplinary Taube Center for Jewish Studies coordinates and promotes the study of all aspects of Jewish life. The center offers an undergraduate minor and an interdisciplinary major coordinated by the Humanities and Sciences dean's office.

For further information, see the "Jewish Studies" section of this bulletin.

## INTERNATIONAL POLICY STUDIES

*Director:* Kathryn Stoner-Weiss (Freeman Spogli Institute for International Studies)

*Executive Committee Co-chairs:* Coit D. Blacker (Freeman Spogli Institute for International Studies), Andrew Walder (Sociology)

*Executive Committee:* Larry Diamond (Hoover Institution), Nicholas C. Hope (Stanford Institute for Economic Policy Research), Jenny Martinez (Law), Norman Naimark (History), Rosamond Naylor (Freeman Spogli Institute for International Studies), Bruce Owen (Public Policy), Julie Parsonnet (Medicine), Frank Wolak (Economics)

*Lecturers:* Chonira Aturupane, Thomas Fingar, Erica Gould, Christine Jojarth, Anja Manuel, Eric Morris, Joe Nation, Daniel Sneider, David Straub

*Affiliated Faculty:* Mike Armacost (Freeman Spogli Institute for International Studies), Jonathan Bendor (Business), Paul Brest (Law), Jeremy Bulow (Economics), Gordon Chang (History), John Cogan (Hoover Institution), Joshua Cohen (Political Science), Martha Crenshaw (Freeman Spogli Institute for International Studies), Larry Diamond (Hoover Institution), Lynn Eden (Sociology), Walter P. Falcon (Freeman Spogli Institute for International Studies), James Fearon (Political Science), Lawrence Goulder (Economics), Justin Grimmer (Political Science), Stephen H. Haber (Political Science), Deborah Hensler (Law), David J. Holloway (History, Political Science), Joy Ishii (Graduate School of Business), Simon Jackman (Political Science), Seema Jayachandran (Economics), Timothy Josling (Freeman Spogli Institute for International Studies), Terry Karl (Political Science), Daniel P. Kessler (Business), Stephen D. Krasner (Political Science), Gail Lapidus (Freeman Spogli Institute for International Studies), Susanna Loeb (Education), Michael McFaul (Political Science, on leave), Ronald I. McKinnon (Economics), Norman Naimark (History), Rosamond Naylor (Freeman Spogli Institute for International Studies), Jean Oi (Political Science), William Perry (Management Science and Engineering), Rob Reich (Political Science), Douglas Rivers (Political Science), Richard Roberts (History), Lee Ross (Psychology), Scott D. Sagan (Political Science), Stephen J. Stedman (Freeman Spogli Institute for International Studies), Jeff Strnad (Law), Michael Tomz (Political Science), Andrew Walder (Sociology), Allen Weiner (Law), Jeremy Weinstein (Political Science)

*Program Office:* Encina Hall West, Second Floor

*Mail Code:* 94305-6045

*Phone:* (650) 725-9155

*Web Site:* <http://ips.stanford.edu>

Courses offered by the Ford Dorsey Program in International Policy Studies are listed under the subject code IPS on the *Stanford Bulletin's* ExploreCourses web site.

The Ford Dorsey Program in International Policy Studies (IPS) is an analytical interdisciplinary program focusing on international policy analysis. Its goal is to provide students with exposure to issues they will face in international business and public policy, and to develop the skills and knowledge to address those issues. The program allows students to specialize in: democracy, development, and the rule of law; energy, environment, and natural resources; global health; global justice; international negotiation and conflict management; international political economy; or international security and cooperation.

University requirements for the M.A. degree are described in the "Graduate Degrees" section of this bulletin.

### ADMISSION

IPS is designed for students who have an undergraduate background in economics and political science. To enroll in the program, students must have completed prerequisite courses in calculus-based statistics, microeconomics, macroeconomics, international trade and international finance. Stanford courses satisfying these requirements are ECON 51, 52, 102A or POLISCI 150A, and ECON 165 and 166.

To apply or for information on graduate admission, see <http://gradadmissions.stanford.edu>.

Applicants from schools other than Stanford or applicants from Stanford who did not apply in their senior year should submit a graduate admission application including:

- a statement setting forth relevant personal, academic, and career plans and goals
- official transcripts
- three letters of recommendation
- Graduate Record Examination (GRE) scores
- a writing sample of at least eight double-spaced pages
- resume or curriculum vitae
- TOEFL scores are required of applicants for whom English is not their first language or who did not attend an undergraduate institution where English is the language of instruction. Applicants are expected to have a B.A. or B.S. degree from an accredited school.

Applications for admission in Autumn Quarter must be filed with supporting credentials by January 10, 2012.

### COTERMINAL PROGRAM

Undergraduates at Stanford may apply for admission to the coterminal master's program in IPS when they have earned a minimum of 120 units toward graduation, including AP and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. The coterminal application requires the following supporting materials:

- two letters of recommendation from University faculty
  - a writing sample of at least eight double-spaced pages
  - a statement of relevant personal, academic, and career plans and goals.
- Applications must be filed together with supporting materials by January 110 2012.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see <http://studentaffairs.stanford.edu/registrar/publications#Coterm>.

### JOINT DEGREE PROGRAM

Students may also choose to pursue a joint J.D./M.A. in IPS degree. The joint degree program supplements the strengths of the Law School with training through IPS. Prospective students interested in the joint J.D./M.A. in IPS program may apply concurrently to both the Stanford Law School and the IPS program. This means that two separate application forms are required and applicants must submit LSAT scores to the Law School and GRE scores to the IPS program.

Students already enrolled at Stanford Law School may apply to the joint J.D./M.A. in IPS program by no later than the end of the second year of Law School. The IPS program will make rolling admissions decisions based on the student's original application materials (GRE scores are not required in addition to LSAT scores in this case). Submission of the following is required for consideration:

- IPS Joint Degree Application Form (available from the IPS web site)

- Law School Joint Degree Petition (available from the Law School Registrar's Office)
  - Graduate Program Authorization Petition (submitted via Axxess)
  - Enrollment Agreement for Students with Multiple Programs (available for download on the University Registrar's forms page)
- For further information, see the "Joint Degree Programs" section of this bulletin and the University Registrar's site.

## MASTER OF ARTS IN INTERNATIONAL POLICY STUDIES

### DEGREE REQUIREMENTS

To receive the M.A. degree in International Policy Studies, students must complete the courses listed below. These requirements entail a minimum of 26 units of policy skills courses, a 10-unit practicum or master's thesis, a 5-unit writing and rhetoric seminar, a 5-unit course in international economics, a 1-unit colloquium, a 3-unit course in international relations theory, and a total of six courses at a minimum of 24 units from the concentration curriculum. Only students with two or more years of relevant policy work experience may petition to write a master's thesis instead of taking the practicum. To obtain the M.A. degree in IPS, students must complete a minimum of 74 units over two years.

The IPS program has the following prerequisites:

- ECON 51
- ECON 52
- ECON 102A or POLISCI 150A
- ECON 165
- ECON 166

### COURSE REQUIREMENTS

*Core Courses—*

1. IPS 300. Issues in International Policy Studies Colloquium (1 unit)
2. IPS 201. Managing Global Complexity (3 units)

*Policy Skills Courses—*

1. POLISCI 350A. Political Methodology I (5 units) and POLISCI 350B. Political Methodology II (5 units) or ECON 102A. Introduction to Statistical Methods for Social Scientists (5 units) and ECON 102B. Introduction to Econometrics (5 units)
2. IPS 208. Justice (4 units) or POLISCI 336. Global Justice (5 units)
3. IPS 221. International Political Economy and International Organizations: Theory and Practice (4-5 units) or SOC 260. Formal Organizations (5 units)
4. IPS 207A. Judgment and Decision Making (4 units) or IPS 207B. Public Policy and Social Psychology: Implications and Applications (4 units)
5. Those concentrating in international political economy must choose one of the following:
  - IPS 204A. Microeconomics (4 units)
  - IPS 204B. Cost-Benefit Analysis and Evaluation (4 units)

Those not concentrating in international political economy must choose one of the following:

- IPS 204A. Microeconomics (4 units)
- IPS 204B. Cost-Benefit Analysis and Evaluation (4 units); *must petition and have strong microeconomic background*
- IPS 202 (5 units) or IPS 203 (5 units); take whichever course is not taken for the international economics requirement

*Writing and Rhetoric Seminar—*One of the following (5 units):

- IPS 210. The Politics of International Humanitarianism
- IPS 211. The Transition from War to Peace: Peacebuilding Strategies
- IPS 213. International Mediation and Civil Wars

- IPS 244. US Policy Toward Northeast Asia
- IPS 314S. Decision Making in U.S. Foreign Policy

*International Economics Seminar—*One of the following (5 units):

- IPS 202. Topics in International Macroeconomics
- IPS 203. Issues in International Economics

*Practicum or Thesis—*One of the following (10 units):

- IPS 209. Practicum
- IPS 209A. Master's Thesis. The student must petition and receive program director approval to take this course.

*Area of Concentration Curriculum—*Students are required to choose one area of concentration from the list below and complete a total of six courses within the concentration at a minimum of 24 total units. Each area of concentration has a gateway course, which must be taken during the first year and prior to enrolling in subsequent courses. Additionally, each area of concentration has a list of approved courses (see list below).

- Democracy, Development, and Rule of Law  
*Gateway course:* IPS 230. Democracy, Development, and Rule of Law (5 units)
- Energy, Environment, and Natural Resources  
*Gateway course:* CEE 207A. Energy Resources (4-5 units)
- Global Health  
*Gateway course:* HUMBIO 129S. Global Public Health (4 units)
- International Negotiation and Conflict Management  
*Gateway courses:* IPS 250. International Conflict: Management and Resolution (3 units) and IPS 250A. International Conflict Resolution Colloquium (1 unit)
- International Political Economy  
*Gateway course:* IPS 202. Topics in International Macroeconomics (5 units) and IPS 203. Issues in International Economics (5 units); one course counts towards international economics requirement
- International Security and Cooperation  
*Gateway course:* IPS 241. International Security in a Changing World (5 units)

*Language Requirement—*Proficiency in a foreign language is required and may be demonstrated by completion of three years of university-level course work in a foreign language or by passing an oral and written proficiency examination prior to graduation. International students who speak English as a second language already meet this requirement.

*Grade Requirements—*All courses to be counted toward the degree, except IPS 300, must be taken for a letter grade. An overall GPA of 3.0 must be maintained.

*Additional Academic Requirements—*

1. Students are not required to repeat a course that duplicates material they have already mastered. Students, may, by petition and approval, substitute a different course for a core requirement whose material would be duplicative. This flexibility does not reduce the unit requirements for the M.A. degree.
2. All graduate degree candidates must submit a Master's Degree Program Proposal to the International Policy Studies office by the end of Autumn Quarter; this document must be on file in order to apply to graduate.

### COGNATE COURSES

The courses listed below fulfill elective requirements within the various areas of concentration. Not all courses are applicable for every area of concentration. Additional relevant courses may be offered. For course descriptions, see ExploreCourses.

- ANTHRO 109/209. Archaeology: World Cultural Heritage
- ANTHRO 277. Environmental Change and Emerging Infectious Diseases (same as HUMBIO 114)
- ANTHRO 336. Anthropology of Rights
- ANTHRO 356. The Anthropology of Development

- BIO 180/280. Fundamentals of Sustainable Agriculture (same as EARTHYSYS 280)
- BIO 247. Controlling Climate Change in the 21st Century (same as EARTHYSYS 247, HUMBIO 116)
- BIOMEDIN 432. Analysis of Costs, Risks, and Benefits of Health Care (same as MGTECON 332, HRP 392)
- CEE 242A. Creating Sustainable Development
- CEE 265A. Sustainable Water Resources Development
- CEE 265C. Water Resources Management
- CEE 265D. Water and Sanitation in Developing Countries
- CEE 275A. Law and Science of California Coastal Policy (same as EARTHYSYS 275)
- COMM 336G. Democracy, Justice, and Deliberation
- COMM 338. Democratic Theory: Normative and Empirical Issues
- COMM 344. Democracy, Press, and Public Opinion
- ECON 106. World Food Economy
- ECON 127. Economics of Health Improvement in Developing Countries (same as MED 262)
- ECON 214. Development Economics I
- ECON 216. Development Economics II
- ECON 265. International Economics I
- ECON 266. International Economics II
- GES 253. Petroleum Geology and Exploration
- HISTORY 102. The History of the International System
- HISTORY 227/327. East European Women and War in the 20th Century
- HISTORY 257/347. The Politics and Ethics of Modern Science and Technology (same as STS 221)
- HISTORY 304G. War, Culture, and Society in the Modern Age
- HISTORY 326G. Civilians and War in Modern Europe
- HISTORY 378A. The Logic of Authoritarian Government, Ancient and Modern
- HISTORY 391E. Maps, Borders, and Conflict in East Asia
- HRP 207. Introduction to Concepts and Methods in Health Services and Policy Research I
- HRP 208. Introduction to Concepts and Methods in Health Services and Policy Research II
- HRP 212. Crosscultural Medicine
- HRP 231. Epidemiology of Infectious Diseases
- HUMBIO 122S. Social Class, Race, Ethnicity, Health (same as SOC 141A)
- HUMBIO 153. Parasites and Pestilence: Infectious Public Health Challenges
- INTNLREL 140C. The U.S., U.N. Peacekeeping, and Humanitarian War
- LAW 330. International Human Rights
- LAW 336. International Jurisprudence
- LAW 338. Land Use
- LAW 407. International Deal Making: Legal and Business Aspects
- LAW 605. International Environmental Law: Climate Change
- MED 242. Physicians and Human Rights
- MGTECON 331. Political Economy of Health Care in the United States (same as HRP 391, PUBLPOL 231)
- MS&E 243. Energy and Environmental Policy Analysis (same as IPER 243)
- MS&E 248. Economics of Natural Resources
- MS&E 294. Climate Policy Analysis
- PHIL 176/276. Political Philosophy: The Social Contract Tradition
- POLISCI 110B. Strategy, War, and Politics
- POLISCI 110D/110Y. War and Peace in American Foreign Policy
- POLISCI 113F. The United Nations and Global Governance
- POLISCI 116. History of Nuclear Weapons (same as HISTORY 103E)
- POLISCI 134. Democracy and the Communication of Consent (same as COMM 236)
- POLISCI 215. Explaining Ethnic Violence
- POLISCI 216E/316. International History and International Relations Theory (same as HISTORY 202/306E)
- POLISCI 218. U.S. Relations in Iran
- POLISCI 221. Tolerance and Democracy
- POLISCI 223S. The Imperial Temptation: U.S. Foreign Policy in a Unipolar World
- POLISCI 231S. Contemporary Theories of Justice
- POLISCI 236. Theories of Civil Society, Philanthropy, and the Nonprofit Sector
- POLISCI 336. Justice (same as PHIL 271)
- POLISCI 348R. Workshop: China Social Science (same as SOC 368W)
- POLISCI 440B. Political Economy of Development (same as HISTORY 378E)
- PSYCH 215. Mind, Culture, and Society
- SOC 141/241. Controversies about Inequality
- SOC 210. Politics and Society
- SOC 218. Social Movements and Collective Action
- SOC 240. Introduction to Social Stratification
- SOC 247A. Comparative Ethnic Conflict
- SOC 314. Economic Sociology
- SOC 345. Seminar in Comparative Race and Ethnic Relations
- STS 210. Ethics, Science, and Technology

## INTERNATIONAL RELATIONS

*Interim Director:* Judith Goldstein (Political Science)

*Faculty Committee:* Kyle Bagwell (Economics), Larry J. Diamond (Freeman Spogli Institute for International Studies), Zephyr Frank (History), Judith L. Goldstein (Political Science), Stephen H. Haber (Political Science), Rosamond Naylor (Freeman Spogli Institute for International Studies), Kenneth Schultz (Political Science), Michael Tomz (Political Science)

*Affiliated Faculty:* David Abernethy (Political Science, emeritus), Barton Bernstein (History, emeritus), Gordon Chang (History), Larry J. Diamond (Hoover Institution), Peter Duus (History, emeritus), Amir Eshel (German Studies), James Fearon (Political Science), Zephyr Frank (History), Lawrence H. Goulder (Economics), David J. Holloway (History, Political Science), Terry L. Karl (Political Science), David M. Kennedy (History, emeritus), Stephen D. Krasner (Political Science), Gail Lapidus (Freeman Spogli Institute for International Studies, emerita), Philip Lipsky (Political Science), Beatriz Magaloni (Political Science), Mark I. Mancall (History, emeritus), Robert McGinn (Management Science and Engineering), Norman Naimark (History), Rosamond Naylor (Freeman Spogli Institute for International Studies), Jean C. Oi (Political Science), Daniel I. Okimoto (Political Science, emeritus), William J. Perry (Freeman Spogli Institute for International Studies, Management Science and Engineering), Richard Roberts (History), Jonathan Rodden (Political Science), Scott Sagan (Political Science), Debra M. Satz (Philosophy), Andrew Walder (Sociology), Amir Weiner (History), Jeremy Weinstein (Political Science)

*Other Affiliation:* Jasmina Bojic (International Relations), Christophe Crombez (Freeman Spogli Institute for International Studies), Rafiq Dossani (Freeman Spogli Institute for International Studies), Gili S. Drori (International Relations), John Dunlop (Hoover Institution), Katherine Jolluck (History), Anjini Kochar (Stanford Institute for Economic Policy Research), Martin W. Lewis (History), Pawel Lutomski (International Relations), Alice Lyman Miller (Hoover

Institution), Thomas O'Keefe (International Relations), Bertrand Patenaude (Hoover Institution), Armin Rosencranz, Miriam Abu Sharkh (CDDRL), Stephen Stedman (Political Science), Richard Steinberg (International Comparative and Area Studies), Kathryn Stoner-Weiss (Freeman Spogli Institute for International Studies)

*Program Office:* Encina Hall West, Room 216  
*Mail Code:* 94305-6045  
*Phone:* (650) 725-0715  
*Web Site:* <http://internationalrelations.stanford.edu>

Courses offered by the Program in International Relations are listed under the subject code INTNLREL on the *Stanford Bulletin's* ExploreCourses web site.

International Relations (IR) is an interdisciplinary undergraduate major focusing on the changing political, economic, and cultural relations within the international system in the modern era. The program explores how global, regional, and domestic factors influence relations among world actors. Students are equipped with the skills and knowledge necessary to analyze choices and challenges that arise in this arena. IR majors pursue a study in world politics that includes courses in political science, economics, history, and languages, focusing on issues such as international security, international political economy, political and economic development, and democratization. Students must spend at least one quarter overseas and show two-year proficiency in a foreign language.

International Relations offers an undergraduate Bachelor of Arts program, an honors program, and a minor in International Relations.

## MISSION OF THE UNDERGRADUATE PROGRAM IN INTERNATIONAL RELATIONS

The undergraduate program in International Relations provides an interdisciplinary approach to the study of the changing political, economic, and cultural relations within the international system of the modern era. Students in the program explore how global, regional, and domestic factors influence relations among world actors. The program equips students with the skills and knowledge necessary to analyze choices and challenges that arise in this arena. IR majors pursue study in world politics, including courses in political science, economics, history, and language, focusing on issues such as international security, political economy, economic development, and democratization. Students must spend at least one quarter overseas. The major prepares students for careers in government and the corporate sector, and for admission into graduate programs in law, business, economics, and political science.

## LEARNING OUTCOMES

The program expects its undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Program in International Relations. Students are expected to demonstrate:

1. understanding of core knowledge within International Relations.
2. ability to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
3. ability to write clearly and persuasively, communicating ideas clearly.
4. ability to evaluate theory and critique research within the discipline.

## COTERMINAL PROGRAMS IN RELATED FIELDS

It is possible for students majoring in International Relations to work simultaneously for a coterminal master's degree in a number of related fields. Coterminal students should consult advisers in both departments or programs to ensure that they fulfill the degree

requirements in both fields. For information on the M.A. program in International Policy Studies, see the "International Policy Studies" section in this bulletin. University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see <http://studentaffairs.stanford.edu/registrar/publications#Coterm>.

## BACHELOR OF ARTS IN INTERNATIONAL RELATIONS

The International Relations major must be declared no earlier than the beginning of sophomore year and no later than the end of the second quarter of the junior year. Students must submit an acceptable proposal to the director of the program and declare IR on Axess. Students completing a double major, or fulfilling International Relations as a secondary major, are also required to file a proposal by the end of the second quarter of the junior year.

Requirements for the major (70 units) are as follows; IR core courses are listed in items 1-5:

1. POLISCI 1
2. POLISCI 110A or 110B or 110C or 110D or HISTORY 158
3. ECON (10 units), two of these five courses: ECON 1A, 1B, 50, 51, 52
4. Two additional upper-division courses with strong economic components from the IR approved course offerings lists
5. At least one of the following skills classes: ECON 102A, POLISCI 150A, STATS 60
6. Complete either a functional specialization or an area specialization (see below for descriptions of specializations). Courses that are used in the core area (1-5 above) cannot also be counted for the specialization.
7. At least one course must be an upper-division seminar or colloquium.
8. At least one writing intensive course designated as Writing in the Major (WIM) for International Relations.
9. No more than 20 units can be lower-division courses.
10. A minimum grade of 'C' is required for courses to count towards major requirements.
11. Completion of one quarter study overseas either through the Stanford Overseas Studies Program or an approved non-Stanford program; non-Stanford programs must be pre-approved by the IR program before the student enrolls in the program.
12. Proficiency in a foreign language through two years of course work (second-year, third-quarter) or a proficiency exam.

## FUNCTIONAL SPECIALIZATION

The three functional specializations are:

1. Comparative Political and Historical Analysis (CPHA)
  2. Comparative Culture and Society (CCAS)
  3. Comparative and International Political Economy (CIPE)
- Students must complete a total of seven courses (35 units) for their functional specialization. Four courses must be from the student's functional area (CPHA, CCAS, CIPE); two courses from a second track; and the final course from the third track (4-2-1). Functional specializations are not declared on Axess.

The following courses are approved for each functional specialization. Updated lists are made available every quarter on the web and they are also available in the International Relations office.

- COMPARATIVE POLITICAL AND HISTORICAL ANALYSIS (CPHA)**  
 INTNLREL 114D. Democracy, Development, and the Rule of Law  
 INTNLREL 116. Politics of Divided Korea  
 INTNLREL 120. Terrorism and Security in Israel  
 INTNLREL 125. Japanese Postwar Politics  
 INTNLREL 131. Globalization and Organizations  
 INTNLREL 136R. Introduction to GLObal Justice  
 INTNLREL 140A. International Law and International Relations

INTNLREL 140B. Theories of International Law  
 INTNLREL 163. History and Geography of Contemporary Global Issues  
 INTNLREL 170. Energy and the Climate  
 COMM 177K. Specialized Writing and Reporting - Human Rights Reporting  
 EASTASN 189K. Politics of Divided Korea  
 HISTORY 102. The History of the International System (WIM)  
 HISTORY 120C. 20th-Century Russian and Soviet History  
 HISTORY 123. Reform and Revolution in Modern Russia, 1856-2008  
 HISTORY 125. 20th-Century Eastern Europe  
 HISTORY 137/337. The Holocaust  
 HISTORY 145B. Africa in the 20th Century  
 HISTORY 150C. The United States in the Twentieth Century  
 HISTORY 158. The United States Since 1945  
 HISTORY 181B. The Middle East in the 20th Century  
 HISTORY 195. Modern Korean History  
 HISTORY 195C. Modern Japanese History  
 HISTORY 197. Southeast Asia: From Antiquity to the Modern Era  
 HISTORY 198. The History of Modern China  
 HISTORY 202/306E. International History and International Relations  
 HISTORY 224/324. Violence, Islam, and the State in Central Asia

#### 1- and 2-unit options

INTNLREL 191. International Relations Journal

#### INDEPENDENT STUDY/HONORS

INTNLREL 197. Directed Reading in International Relations—open only to declared International Relations majors.  
 INTNLREL 198. Senior Thesis—open only to declared International Relations majors with approved senior thesis proposals.  
 INTNLREL 199. Honors Research: Democracy, Development, and the Rule of Law in Developing Countries  
 INTNLREL 200A. International Relations Honors Field Research  
 INTNLREL 200B. International Relations Honors Seminar

#### AREA SPECIALIZATION

The area specializations are: Africa, Europe, Latin America, and Russia/East Europe. Students must complete a total of seven courses (35 units) with five courses directly related to their area specialization. Three of these five courses must be in one of the three tracks (CPHA, CCAS, CIPE), one course in a second track, and the final course in the third track. The ten remaining units must be fulfilled by comparative or further area course work.

Students must also demonstrate proficiency in a language, other than English, commonly spoken in the area chosen, by completing two years of language study or by passing a second-year, third-quarter proficiency exam.

Check the IR office for updated information about the area specialization requirements. Area specializations are not declared on Axess.

#### HONORS PROGRAM

The International Relations honors program offers qualified students the opportunity to conduct a major independent research project under faculty guidance. Such a project requires a high degree of initiative and dedication, significant amounts of time and energy, and demonstrated skills in research and writing.

In their junior year, students should consult with prospective honors advisers, choose the courses that provide academic background in their areas of inquiry, and demonstrate an ability to conduct independent research. Students can select from the IR honors option or the CDDRL (Center on Democracy, Development, and the Rule of Law) option which focuses on issues of democracy, development, and the rule of law; for information on the CDDRL, see <http://cddrl.stanford.edu>.

Students should submit their honors thesis proposal late in Winter Quarter of the junior year; check with IR office for the exact deadline.

Prerequisites for participation include a 3.5 grade point average (GPA), a strong overall academic record, good academic standing, successful experience in writing a research paper, and submission

of an acceptable thesis proposal. Students are required to enroll in INTNLREL 200A, International Relations Honors Field Research, in Spring Quarter of their junior year and consider participating in Honors College. CDDRL option students should enroll in INTNLREL 199, Honors Research: Democracy, Development, and the Rule of Law in Developing Countries. In their senior year, honors students must enroll in INTNLREL 200B in Autumn Quarter and in research units each quarter with their faculty adviser. Honors students present a formal defense of their theses in mid-May. Students must receive at least a grade of 'B+' in order to graduate with honors in International Relations.

## MINOR IN INTERNATIONAL RELATIONS

A minor in International Relations is intended to provide an interdisciplinary background allowing a deeper understanding of contemporary international issues. Declaration of the minor must take place no later than the end of the second quarter of the junior year. To declare, complete the application for a minor on Axess.

Students complete the minor by taking seven unduplicated courses (35 units) from the IR curriculum, including the following:

1. POLISCI 1
2. Two of these five courses: POLISCI 110A,B,C,D, or HISTORY 158
3. Four courses from one of the three major tracks (CPHA, CCAS, CIPE), or four courses relating to the same geographic region (Africa, Europe, Latin America, and Russia/East Europe).

## OVERSEAS STUDIES COURSES IN INTERNATIONAL RELATIONS

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (<http://explorecourses.stanford.edu>) or the Bing Overseas Studies web site (<http://bosp.stanford.edu>). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

### AUTUMN QUARTER

#### BEIJING

- OSPBEIJ 24. China's Economic Development. 5 units, Scott Rozelle, GER:DB:SocSci

## JEWISH STUDIES

*Director:* Steven Weitzman

*Academic Advisory Committee:* Zachary Baker (Stanford University Libraries), Joel Beinin (History), Jonathan Berger (Music), Arnold Eisen (Religious Studies, emeritus), Amir Eshel (German Studies), John Felstiner (English, emeritus), Shelley Fisher Fishkin (English), Charlotte Fonrobert (Religious Studies), Avner Greif (Economics), Katherine Jolluck (History), Mark Mancall (History, emeritus), Norman Naimark (History), Reviel Netz (Classics), Jack Rakove (History), Aron Rodrigue (History), Gabriella Safran (Slavic Languages and Literatures), Vered Karti Shemtov (African and Middle Eastern Languages and Literatures), Lee Shulman (Education, emeritus), Peter Stansky (History, emeritus), Amir Weiner (History), Steven Weitzman (Religious Studies), Sam Wineburg (Education), Steven Zipperstein (History), Writer in Residence: Maya Arad

*Offices:* Building 360, Room 362H

*Mail Code:* 94305-2190

*Phone:* (650) 725-2789

*Web Site:* <http://jewishstudies.stanford.edu>

The Taube Center for Jewish Studies investigates all aspects of Jewish culture in history, religion, literature, language and

education from biblical times to the present. Courses are offered on the undergraduate and graduate levels in a program complemented by a full range of guest lectures, conferences, and symposia. The Center annually sponsors the Donald and Robin Kennedy Undergraduate Award for the best undergraduate essay on any theme in Jewish Studies, the Dr. Bernard Kaufman Undergraduate Research Award in Jewish Studies to an undergraduate engaged in research on Jews in modernity, and the Koret Award for Best Essay Written in Hebrew by an undergraduate.

Graduate students must apply and enroll in the program through the departments of English, History, Comparative Literature, Religious Studies, or the School of Education, and meet the requirements of those departments. For more information about graduate studies in Jewish Studies, please contact the Center manager or Director.

## UNDERGRADUATE PROGRAMS IN JEWISH STUDIES

The center does not offer an undergraduate program in Jewish Studies. However, the Individually Designed Major in Jewish Studies permits interested students to focus their attention on the broad field of Jewish Studies and, at the same time, to expand their knowledge of one or another related fields.

## INDIVIDUALLY DESIGNED MAJOR IN JEWISH STUDIES

The Individually Designed Major in Jewish Studies permits interested students to focus their attention on the broad field of Jewish Studies and, at the same time, to expand their knowledge of one or another related fields.

Each major should complete at least 75 units, all in courses at or above the 100 level (or their equivalent). A maximum of 15 of these 75 units may be taken on a credit/no credit basis. A maximum of 5 of these 75 units may be taken in individual study or directed reading.

Students must present evidence that demonstrates their ability to do independent work and have at least three full quarters of undergraduate work remaining at Stanford after the date on which the proposal is approved by the committee. Each major must obtain sponsorship from three faculty members, one of whom is the student's primary adviser, and from the Director of the Taube Center for Jewish Studies.

The application deadline for IDM proposals is the fifth week of Spring Quarter of the sophomore year. Applications are reviewed only once a year.

Details about the written procedures and documents necessary for application for an individually designed major in Jewish Studies can be obtained at the Taube Center for Jewish Studies, Bldg. 360, Main Quad, (650) 725-2789. See also the "Individually Design Majors in Humanities and Sciences" section of this bulletin.

## REQUIREMENTS

The faculty members in Jewish Studies have designed the following structure for the individually designed major:

### HISTORY AND SOCIETY:

Students must take one course in each of the three periods: 20 units  
biblical and ancient, medieval and modern, and contemporary

### RELIGION:

Biblical, rabbinic, medieval, modern 20 units

### LITERATURE:

Hebrew, Holocaust, American Jewish, Yiddish, German Jewish, Russian Jewish 15 units

### HEBREW LANGUAGE (SECOND YEAR OR BEYOND):

Students who demonstrate by examination that they have completed the equivalent of at least two years of 12 units

university-level modern Hebrew may apply the 12 units required in this category to more work in another category, with the approval of their primary adviser

**ANCILLARY COURSES:**

Ancient history, medieval history, modern European history, history of philosophy, Islam, Christianity 8-10 units

**WIM COURSE:**

The Writing in the Major (WIM) course can be taken within a subfield (History, Religious Studies or Comparative Literature). 5 units

Total number of units required 75-77 units

No course proposed for the major may be counted as fulfilling more than one required category in the proposed major. Transfer credits from other universities must be approved by the appropriate Stanford authorities.

**HONORS**

Students planning an Individually Designed Major in Jewish Studies are also urged to write an honors thesis. Students interested in declaring an Individually Designed Major in Jewish Studies should discuss this with their adviser(s) when discussing the major itself. Up to 10 honors thesis units may be included in the major.

**COURSES**

Students interested in pursuing an Individually Designed Major in Jewish Studies are advised to consult the following list of courses in preparing their program.

- JEWISHST 102/AMELANG 127. Land and Literature
- JEWISHST 101A/AMELANG 128A. Beginning Hebrew, First Quarter
- JEWISHST 101B/AMELANG 128B. Beginning Hebrew, Second Quarter
- JEWISHST 101C/AMELANG 128C. Beginning Hebrew, Third Quarter
- JEWISHST 102A/AMELANG 129A. Intermediate Hebrew, First Quarter
- JEWISHST 102B/AMELANG 129B. Intermediate Hebrew, Second Quarter
- JEWISHST 102C/AMELANG 129C. Intermediate Hebrew, Third Quarter
- JEWISHST 103A/AMELANG 130A. Advanced Hebrew, First Quarter
- JEWISHST 104/AMELANG 131. Hebrew Forum
- JEWISHST 104A/AMELANG 140A. Beginning Yiddish, First Quarter
- JEWISHST 104B/AMELANG 140B. Beginning Yiddish, Second Quarter
- JEWISHST 104C/AMELANG 140C. Beginning Yiddish, Third Quarter
- JEWISHST 107A/AMELANG 170A. Biblical Hebrew, First Quarter
- JEWISHST 107B/AMELANG 170B. Biblical Hebrew, Second Quarter
- JEWISHST 107C/AMELANG 170C. Biblical Hebrew, Third Quarter
- JEWISHST 139/FEMST 139. Rereading Judaism in Light of Feminism
- JEWISHST 148,248/SLAVLIT 198,298. Writing Between Languages: The Cast of Eastern European Jewish Literature
- JEWISHST 241/COMPLIT 221/GERLIT 246. Memory, History, and the Contemporary Novel
- JEWISHST 153C/ENGLISH 183C/AMSTUD 183C. Feminism and American Literature
- JEWISHST 183,383/HISTORY 137,337. The Holocaust
- JEWISHST 185B/HISTORY 185B. Jews in the Modern World

- JEWISHST 287D,387D/HISTORY 287D,387D. Tel-Aviv: Site, Symbol, City
  - JEWISHST 287E,387E/HISTORY 287E,387E. Jewish Intellectuals and the Crisis of Modernity
  - JEWISHST 289,389/HISTORY 229,329. Poles and Jews
  - JEWISHST 385A/HISTORY 385A. Core in Jewish History, 17th-19th Centuries
  - JEWISHST 385B/HISOTRY 385B. Core in Jewish History, 20th Century
  - JEWISHST 486A/HISTORY 486A. Graduate Research Seminar in Jewish History
  - JEWISHST 486B/HISTORY 486B. Graduate Research Seminar in Jewish History
  - JEWISHST 15A/RELIGST 15A. The Bible and Archaeology\*
  - JEWISHST 15N/RELIGST 15N. Travels Through the Afterlife\*
  - JEWISHST 122B/RELIGST 132B/CLASSGEN 134. Early Christianity, Early Judaism, and Gender
  - JEWISHST 222A/RELIGST 282A. In Search of David and Solomon
- \*Courses below the 100-level cannot be counted towards the major, however, it may be counted towards the minor in Jewish Studies.

**MINOR IN JEWISH STUDIES**

The Jewish Studies minor is open to students in any department who wish to enrich their studies through acquiring knowledge in Jewish history, thought, religion, literature, and society. Students must complete their declaration of the minor no later than the last day of the quarter three quarters before degree conferral. For example, a student graduating in Spring Quarter must declare the minor no later than the last day of Autumn quarter of the same year.

Students must complete six courses for a maximum of 36 units toward the minor. Courses of study should be discussed and approved by a Jewish Studies faculty member in the departments of English, History, Religious Studies, or the Division of Literatures, Cultures, and Languages, and by the center directors. In addition to suggested introductory courses, students are also encouraged to take courses in the Hebrew language as part of their Jewish studies minor, and are granted credit toward the minor for up to 5 units of language study. Any variations on the minor requirements must be approved in advance by one of the directors of the center.

Courses credited toward the minor must be distributed as follows:

1. Three introductory courses at the 100 level or below in the fields of history, religious studies, literature, or Hebrew language (for a maximum of 5 units) or one of the designated introductory courses offered through the Program in Comparative Studies in Race and Ethnicity.
2. Two courses at the 100 level or above from two of three areas of concentration (history, religious studies, or literature).

One seminar or undergraduate colloquium at the 200 level or above in one area of concentration (history, religious studies, or literature). No course credited toward the Jewish Studies minor may be double counted toward major requirements.

# LANGUAGE CENTER

*Director:* Elizabeth Bernhardt

*Associate Director:* Joan Molitoris

*Assistant Director:* Patricia de Castris

## **African and Middle Eastern Languages**

*Senior Lecturers:* Khalil Barhoum (Coordinator, and Minor Adviser: Arabic Language and Literature), Vered Shemtov (Jewish Language and Literature)

*Lecturers:* Ozden Akyol (Fulbright Scholar), Salem Aweiss, Ebru Ergul, Shahla Fahimi, Estee Greif, Eva Hashem-Aramouni, Yasmina Khedhir (Fulbright Scholar), Jon Levitow, Khalid Obeid, Gallia Porat, Merchades Method Rutechura, Ramzi Salti

## **Catalan Language**

*Coordinator:* Joan Molitoris (Associate Director, Language Center)

*Lecturer:* Lena Tahmassian

## **Chinese Language**

*Coordinator:* Chao Fen Sun (Professor, Asian Languages and Cultures, on leave)

*Lecturers:* Marina Chung, Michelle DiBello, Sik Lee Dennig, Nina Lin, Xujing Qian, Yu-hwa Liao Rozelle, Le Tang, Huazhi Wang, Hong Zeng (Acting Coordinator), Youping Zhang, Xiaofang Zhou

## **English for Foreign Students**

*Director and Senior Lecturer:* Philip Hubbard

*Lecturers:* Robyn Brinks Lockwood, Carole Mawson, Andrea Kevech, Andrew Oman, Kenneth Romeo, Constance Rylance, Seth Streichler

## **French Language**

*Lecturers:* Jane Dozer-Rabedeau, Heather Howard (Coordinator), Miranda Kershaw, Marie Lasnier, Vera Shapirshteyn, Suzie Telep

## **German Language**

*Senior Lecturers:* William E. Petig, Kathryn Strachota

*Lecturer:* Paul Nissler (Coordinator)

## **Iberian Languages**

*Coordinator:* Joan Molitoris (Associate Director, Language Center)

*Lecturer:* Joseba Iñaki Lopez de Luzuriaga

## **Italian Language**

*Lecturers:* Marta Baldocchi, Anna Cellinese (Coordinator), Alessandra McCarty, Giovanni Tempesta

## **Japanese Language**

*Coordinator:* Yoshiko Matsumoto (Professor, Asian Languages and Cultures)

*Senior Lecturer:* Kazuko M. Busbin

*Lecturers:* Noriko Knickerbocker, Hisayo O. Lipton, Momoyo K. Lowdermilk, Emiko Yasumoto Magnani, Kiyomi Nakamura, Momoe Saito Fu, Yoshiko Tomiyama

## **Korean Language**

*Lecturers:* Hee-Sun Kim (Coordinator), Sun Young Lee (Fulbright Scholar)

## **Portuguese Language**

*Senior Lecturer:* Lyris Wiedemann (Coordinator)

*Lecturer:* Agripino Silveira

## **Slavic Language**

*Senior Lecturer:* Rima Greenhill

*Lecturer:* Eugenia Khassina (Coordinator)

## **Spanish Language**

*Lecturers:* Vivian Brates, Loreto Catoira, Citlalli del Carpio, Irene Corso, Alice Miano (Coordinator), Joan Molitoris (Associate Director, Language Center), Paul Nissler, Carimer Ortiz Cuevas, Veronika Reinhold, Kara Sanchez, Ana Maria. Sierra, María Cristina Urruela, Hae-Joon Won

## **Special Language Program**

*Lecturers:* Marichelle De Ramos (Fulbright Scholar), Cathy Haas, Dzuong Nguyen, Neeti Roy (Fulbright Scholar), Eva Prionas

(Coordinator, Modern Greek Language and Literature), Pranjali Sirasao

## **Tibetan Language Program**

*Lecturer and Coordinator:* Robert W. Clark

*Language Center Offices:* Building 30

*Mail Code:* 94305-2015

*Department Phone:* (650) 725-9222

*Email:* patricia@stanford.edu

*Web Site:* <http://language.stanford.edu>

Courses offered by the Language Center are listed under the following subject codes on the *Stanford Bulletin's* ExploreCourses web site: AMELANG (African and Middle Eastern Languages and Literatures), CATLANG (Catalan Language), CHINLANG (Chinese Language), EFSLANG (English for Foreign Students), FRENLANG (French Language), GERLANG (German Language), IBERLANG (Iberian Languages), ITALLANG (Italian Language), JAPANLANG (Japanese Language), KORLANG (Korean Language), PORTLANG (Portuguese Language), SLAVLANG (Slavic Language), SPANLANG (Spanish Language), SPECLANG (Special Language), and TIBETLANG (Tibetan Language).

The Stanford Language Center oversees all language instruction at Stanford. The center's charge is to guarantee that Stanford language programs are of the highest quality; to develop and administer achievement and proficiency tests needed to implement the language requirement; to provide technical assistance and support to the graduate students, lecturers, and faculty who deliver Stanford's language instruction; and to take leadership in research and development efforts in language learning. The Language Center is a unit within the Division of Literatures, Cultures, and Languages.

The African and Middle Eastern Languages and Literatures Program (AME) offers classes in Arabic, Hebrew, Swahili, and African languages not regularly taught at Stanford. Based on current funding and student requests, the courses planned for 2011-12 are listed below. Additional languages may still be offered upon request, provided funding is available. Requests for the 2012-13 academic year should be made by Spring Quarter of this year to the AME program office by email to [khalil@stanford.edu](mailto:khalil@stanford.edu). Beginning, intermediate and advanced each refer to an academic year's sequence of language study. Most language courses are offered for a two-year, three quarter sequence: 'A' suffix courses are taught Autumn; 'B' suffix courses are taught Winter; 'C' suffix courses are taught Spring. Those who have taken courses in the relevant language at another institution, or have previous knowledge of the language, can request to be tested. Tests are comprised of two parts, written and oral. Students must display first-year proficiency in the requested language to fulfill the requirement. Testing is guaranteed only for languages currently offered. Students planning to take a test must contact the AME program no later than the Spring Quarter of their sophomore year. To submit a request for language testing or to request that a language be taught, and for further information on the program, see

<https://www.stanford.edu/dept/lc/language/courses/africanMidEastern/index.html>. Language courses may not be repeated for credit and must be taken in sequence.

## **PROFICIENCY IN FOREIGN LANGUAGE NOTATION**

A student who demonstrates levels of achievement equivalent to those expected at the end of the third quarter of the third year of study in a language may be awarded the notation "proficiency in" that language on the official transcript. Successful candidates tend to have completed the third year or beyond of language study at Stanford and spent considerable time studying abroad in the foreign language.

In order to receive the proficiency notation, the student must complete the following oral and written requirements according to

the time to appear on the official transcript, the student must complete below. Successful completion of the oral component is required before proceeding with the written component.

Both oral and written components must be completed no later than the quarter preceding the graduating quarter.

For more information contact Patricia de Castries (patricia@stanford.edu).

## APPLICATION AND ORAL COMPONENT: TWO QUARTERS PRIOR TO GRADUATION

1. Notify the Language Center via email of the intent to pursue the notation and request an official Oral Proficiency Interview (OPI). Since this is a formal interview conducted according to national academic and professional standards, at least two quarters of lead time are essential for scheduling.
2. Complete the 30 minutes Oral Proficiency Interview as scheduled through the Language Center and conducted by a certified OPI tester. The interview must take place no later than one quarter prior to graduation and be administered on campus.

## WRITING COMPONENT: ONE QUARTER PRIOR TO GRADUATION

1. Once approved to continue with the writing component, schedule a Writing Proficiency Test (WPT) through the Language Center. As an official writing assessment, the 90 minute exam must take place no later than one quarter prior to graduation and as soon as possible after the interview. The WPT is administered on campus and rated by a certified rater.
2. Receive an official rating of Advanced Low or higher on the Foreign Service Institute/American Council on the Teaching of Foreign Languages (FSI/ACTFL) scale of the oral and writing proficiency, except in the non-cognate languages which require a minimum rating of Intermediate High. Students who do not meet the minimum levels for the notation will nonetheless receive an official OPI (or OPI and WPT) rating, which carries national recognition of their oral and writing proficiencies.

## PROFICIENCY NOTATION TIMETABLE

1. Graduating Spring/Summer: Apply Autumn. Interview Autumn/Winter: writing Winter.
2. Graduating Autumn: Apply Winter, interview Winter/Spring: writing Spring.
3. Graduating Winter: Apply Spring, interview Spring/Autumn: writing Autumn.

## MINOR IN MIDDLE EASTERN LANGUAGES, LITERATURES, AND CULTURES

The undergraduate minor in Middle Eastern Languages, Literatures, and Cultures has been designed to give students majoring in other departments an opportunity to gain a substantial introduction to Middle Eastern and African languages, and to the cultures and civilizations of the Middle East and Africa. Contact the minors adviser before declaring at khalil@stanford.edu.

Students declaring a minor must do so no later than the last day of the fourth quarter before degree conferral. For example, students graduating in June (Spring Quarter) must declare the minor no later than the last day of Spring Quarter of their junior year. If a student is not able to meet this deadline, he or she may petition the Language Center director and request a revised declaration date, which may be granted at the director's discretion.

The requirements for a minor in Middle Eastern Languages, Literatures, and Cultures are:

1. Courses for the minor must be taken for a letter grade unless only offered for faculty-elected satisfactory/no credit.
2. All courses must be completed with a letter grade of 'C' or better.

3. Courses may not overlap with those taken for a major course of study.
4. Relevant courses taken to fulfill a GER may count toward fulfilling both minor and GER requirements.

## CULTURAL STUDIES TRACK

Requirements are:

1. Completion of the language prerequisite at the beginning level, or a demonstrated equivalent competence.
2. In the case of Arabic, completion of six non-language courses, including three from the AME program.
3. In the case of Hebrew and African languages, completion of six non-language related courses. Consult minor adviser for course options.

## LANGUAGE TRACK

- Option one:
  1. Completion of prerequisite language study at the beginning level, or a demonstrated equivalent competence.
  2. Completion of one year of language study at the intermediate level.
  3. Completion of three related non-language courses, including one of the AMELANG 30-36 series in the case of Arabic. Consult the minor adviser (khalil@stanford.edu) for course options.
- Option two:
  1. Completion of prerequisite language study at the advanced level in Arabic, Hebrew, or an African language, for the equivalent of three years of language study.
  2. Completion of one African and Middle Eastern literature and culture course relevant to the language studied in the case of Arabic or Hebrew; or, in the case of African languages, completion of one non-language African Studies course relevant to the language studied. Consult the minor adviser (khalil@stanford.edu) for course options.
- Option Three:
 

Completion of four years of language study, at least two of which must be concluded at Stanford.

## MINOR IN MODERN LANGUAGES

An undergraduate minor in Modern Languages is offered through the Division of Literatures, Cultures, and Languages and includes courses offered through the Language Center. Students should consult the "Division of Literatures, Cultures, and Languages" section of this bulletin for further details about the minor and its requirements.

## SPECIAL LANGUAGE PROGRAM

The Special Language Program (SLP) offers foreign languages not otherwise taught at Stanford. Based on current funding and student requests, the courses planned for 2011-12 are listed in the "Explore Courses" section of this Bulletin under the Special Languages (SPECLANG) Program; however, not every course listed is taught. Additional languages may still be offered upon request, provided funding is available. Requests for the 2012-13 academic year should be made by Spring Quarter of this year at the Special Language Program office (epriomas@stanford.edu).

Beginning-level courses are offered for 3, 4 or 5 units, as listed. The 3-unit beginning courses are offered on a satisfactory/no credit basis only. The 4 and 5-unit beginning level courses are offered with a letter grade option. Intermediate-level as well as advanced-level courses are offered with a grade option. Beginning, intermediate and advanced each refer to an academic year's sequence of language study. Most 3-unit language courses are offered for a two-year, three quarter sequence:

'A' suffix courses are typically taught Autumn.

'B' suffix courses are typically taught Winter.

'C' suffix courses are typically taught Spring.

In some circumstances, a beginning or intermediate course may be offered in alternate years. For more information, see <http://www.stanford.edu/dept/SLP>. Language courses may not be repeated for credit, and must be taken in sequence.

#### **FULFILLING THE LANGUAGE REQUIREMENT**

Students can fulfill the language requirement by taking courses offered by the Special Language Program. At least 12 units are needed to complete the requirement. Students who have already taken courses in the relevant language at another institution, or who have previous knowledge of the language, can request to be tested. Tests are comprised of written and oral parts. A student must display first-year level proficiency in the requested language in order to fulfill the requirement. Testing is guaranteed only for these languages currently offered. Students planning to take a test must contact the Special Language Program no later than the Spring Quarter of sophomore year. To submit a request for language testing, or to request a language, apply via the web at <http://www.stanford.edu/dept/SLP>.

#### **BEGINNING-LEVEL, FIRST-YEAR COURSES**

Beginning-level, first-year language courses require no previous knowledge of the language. The beginning-level sequence emphasizes development of the full range of language skills—reading, listening comprehension, the use of grammatical structures, and oral and written communication—through a variety of learning themes. Individual, small group, interactive work and multimedia-based activities reinforce language skills and provide the platform for adapting the curriculum to specific student learning goals. Cultural awareness is a strong component of the curriculum.

#### **INTERMEDIATE-LEVEL, SECOND-YEAR COURSES**

Intermediate-level, second-year language courses require completion of the beginning sequence, or consent of instructor. The intermediate-level sequence focuses on continuous mastery and development of learning skills that help students to converse accurately and more fluently, incorporate more advanced grammatical structures in their oral and written work, use idiomatic expressions in the right context, and write simple compositions. Curricular objectives and enhanced understanding of the culture are built into the courses through a multimodal approach.

#### **ADVANCED-LEVEL, THIRD-YEAR COURSES**

Advanced-level, third-year language courses require completion of the intermediate-year sequence and consent of the program coordinator. The advanced-level sequence focuses on accurate understanding and use of structures through authentic texts and multimedia materials, and readings from various genres. Individual learning goals and student proficiency are taken into account to provide a learning environment that helps students become more autonomous learners.

### **AFRICAN AND MIDDLE EASTERN LANGUAGES AND LITERATURES PROGRAM**

The African and Middle Eastern Languages and Literatures Program offers classes in Arabic, Hebrew, Swahili, and African languages not regularly taught at Stanford. Based on current funding and student requests, the courses planned for 2011-12 are listed below. Additional languages may still be offered upon request, provided funding is available. Requests for the 2012-13 academic year should be made by Spring Quarter of this year at the AME program office, email: [khalil@stanford.edu](mailto:khalil@stanford.edu).

Beginning, intermediate and advanced each refer to an academic year's sequence of language study. Most language courses are offered for a two-year, three quarter sequence:

- All 'A' suffix courses are taught Autumn.
- All 'B' suffix courses are taught Winter.
- All 'C' suffix courses are taught Spring.

All beginning, intermediate, and advanced courses are 4 units except Arabic, Hebrew, Swahili and Turkish. In some circumstances, a beginning or intermediate course may be offered in alternate years.

#### **FULFILLING THE LANGUAGE REQUIREMENT**

Students can fulfill the language requirement by taking an African or Middle Eastern language. At least 12 units are needed to complete the requirement. Normally, the requirement is completed after the first quarter of intermediate-level language. In the case of African or Middle Eastern languages taught only at the beginning level, students may petition the Language Center to fulfill the requirement by taking a directed reading course in the fourth quarter. Contact [patricia@stanford.edu](mailto:patricia@stanford.edu) for more information.

#### **BEGINNING-LEVEL, FIRST-YEAR COURSES**

Beginning-level, first-year language courses require no previous knowledge of the language. The beginning-level sequence emphasizes development of the full range of language skills, reading, listening comprehension, the use of grammatical structures, and oral and written communication, through a variety of learning themes. Individual, small group, interactive work and multimedia-based activities reinforce language skills and provide the platform for adapting the curriculum to specific student learning goals. Cultural awareness is a strong component of the curriculum.

#### **INTERMEDIATE-LEVEL, SECOND-YEAR COURSES**

Intermediate-level, second-year language courses require completion of the beginning sequence, or consent of instructor. The intermediate-level sequence focuses on continuous mastery and development of learning skills that help students to converse accurately and more fluently, incorporate more advanced grammatical structures in their oral and written work, use idiomatic expressions in the right context, and write simple compositions. Curricular objectives and enhanced understanding of the culture are built into the courses through a multimodal approach.

#### **ADVANCED-LEVEL, THIRD-YEAR COURSES**

Advanced-level, third-year language courses require completion of the intermediate-year sequence and consent of the program coordinator. The advanced-level sequence focuses on accurate understanding and use of structures through authentic texts and multimedia materials, and readings from various genres. Individual learning goals and student proficiency are taken into account to provide a learning environment that helps students become more autonomous learners.

### **OVERSEAS STUDIES COURSES IN THE LANGUAGE CENTER**

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (<http://explorecourses.stanford.edu>) or the Bing Overseas Studies web site (<http://bosp.stanford.edu>). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

#### **AUTUMN QUARTER**

##### **BEIJING**

- OSPBEIJ 1C. First-Year Modern Chinese. 5 units, Yan Wang, Xiaoya Zhu
- OSPBEIJ 6C. Beginning Conversational Chinese. 2 units, Staff
- OSPBEIJ 21C. Second-Year Modern Chinese. 5 units, Li Chen
- OSPBEIJ 101C. Third-Year Modern Chinese. 5 units, Xiaoya Zhu
- OSPBEIJ 211C. Advanced Modern Chinese. 5 units, Yan Wang

**BERLIN**

OSPBER 1Z. Accelerated German 1st and 2nd Quarter. 8 units, Jari Spletstoesser, Jochen Wohlfeil  
 OSPBER 21B. Intermediate German. 5 units, Sylvia Kloetzer  
 OSPBER 100B. Berlin Heute. 2 units, Dubravka Friesel  
 OSPBER 101B. Advanced German. 5 units, Maria Biege

**FLORENCE**

OSPFLO 21F. Accelerated Second Year Italian, Part A. 5 units, Fiorenza Quercioli  
 OSPFLO 22F. Accelerated Second-Year Italian, Part B. 5 units, Fiorenza Quercioli  
 OSPFLO 31F. Advanced Oral Communication: Italian. 3 units, Fiorenza Quercioli

**MADRID**

OSPMADR 12M. Accelerated Second-Year Spanish I. 5 units, Maria Teresa Cambor Portilla  
 OSPMADR 13M. Accelerated Second-Year Spanish II. 5 units, Maria Teresa Cambor Portilla  
 OSPMADR 102M. Composition and Writing Workshop for Students in Madrid. 3-5 units, Maria Teresa Cambor Portilla

**MOSCOW**

OSPMOSC 10M. Intensive First-Year Russian. 9 units, Liza Kurganova  
 OSPMOSC 51M. Second Year Russian I. 5 units, Tatyana Boldyreva  
 OSPMOSC 111M. Third Year Russian I. 5 units, Galina Filatova  
 OSPMOSC 177M. Fourth Year Russian I. 5 units, Staff

**PARIS**

OSPPARIS 22P. Intermediate French I. 4 units, Pauline Reyman  
 OSPPARIS 23P. Intermediate French II. 4 units, Florence Mercier  
 OSPPARIS 124P. Advanced French I. 4 units, Patrick Guedon

**SANTIAGO**

OSPSANTG 12S. Accelerated Second-Year Spanish I. 5 units, Mabel Abad  
 OSPSANTG 13S. Accelerated Second-Year Spanish II. 5 units, Mabel Abad  
 OSPSANTG 102S. Composition and Writing Workshop for Students in Santiago. 3-5 units, Andres Bobbert

**WINTER QUARTER****BERLIN**

OSPBER 1Z. Accelerated German 1st and 2nd Quarter. 8 units, Jari Spletstoesser, Jochen Wohlfeil  
 OSPBER 21B. Intermediate German. 5 units, Sylvia Kloetzer  
 OSPBER 100B. Berlin Heute. 2 units, Dubravka Friesel  
 OSPBER 101B. Advanced German. 5 units, Maria Biege

**FLORENCE**

OSPFLO 21F. Accelerated Second Year Italian, Part A. 5 units, Fiorenza Quercioli

- OSPFLO 31F. Advanced Oral Communication: Italian. 3 units, Fiorenza Quercioli

**KYOTO**

- OSPKYOTO 9K. First Year Japanese Language, Culture, Communication B. 5 units, Staff
- OSPKYOTO 17K. Second Year Japanese Language, Culture, Communication B, First Quarter. 5 units, Staff
- OSPKYOTO 19K. Second Year Japanese Language, Culture, Communication B, Third Quarter. 5 units, Staff
- OSPKYOTO 129K. Third Year Japanese Language, Culture, Communication B. 5 units, Staff
- OSPKYOTO 211K. Advanced Japanese. 5 units, Staff

**MADRID**

- OSPMADR 12M. Accelerated Second-Year Spanish I. 5 units, Maria Teresa Cambor Portilla
- OSPMADR 13M. Accelerated Second-Year Spanish II. 5 units, Maria Teresa Cambor Portilla
- OSPMADR 102M. Composition and Writing Workshop for Students in Madrid. 3-5 units, Maria Teresa Cambor Portilla

**PARIS**

- OSPPARIS 22P. Intermediate French I. 4 units, Pauline Reyman
- OSPPARIS 23P. Intermediate French II. 4 units, Sonia Gourevitch
- OSPPARIS 125P. Advanced French II. 4 units, Elizabeth Molkou

**SANTIAGO**

- OSPSANTG 12S. Accelerated Second-Year Spanish I. 5 units, Mabel Abad
- OSPSANTG 13S. Accelerated Second-Year Spanish II. 5 units, Mabel Abad
- OSPSANTG 102S. Composition and Writing Workshop for Students in Santiago. 3-5 units, Andres Bobbert

**LATIN AMERICAN STUDIES**

*Director of the Center: Rodolfo Dirzo*

*Associate Director:* Megan Gorman

*Tinker Visiting Professors:* Enrique Casanovas, Mauricio Fontes, Miguel A. Garcés, Roberto Ierusalimsky, Iris Kantor, Pablo Neumeyer

**Affiliated Faculty and Staff:**

*Anthropology:* Clifford Barnett (emeritus), George Collier (emeritus), Lisa Curran, Carolyn Duffey, William Durham, James Fox, John Rick, Ian Robertson

*Art and Art History:* Barbaro Martinez-Ruiz

*Biology:* Gretchen Daily, Rodolfo Dirzo, Harold Mooney, Peter Vitousek, Virginia Walbot

*Carnegie Institution for Science:* Gregory Asner

*Comparative Literature:* Roland Greene, Hans Ulrich Gumbrecht, José David Saldívar

*Dance:* Susan Cashion (emerita)

*Earth Sciences, School of:* Pamela Matson

*Economics:* Roger Noll (emeritus)

*Education, School of:* Martin Carnoy, Amado Padilla, Guadalupe Valdés

*Engineering, School of:* Jenna Davis, Bruce Lusignan (emeritus), Leonard Ortolano

*English:* Ramón Saldívar (also Comparative Literature)

*Freeman Spogli Institute for International Studies:* Rosamond Naylor

*History:* Zephyr Frank, Tamar Herzog

*Hoover Institute:* Herbert Klein

*Human Biology:* Anne Firth Murray

*Iberian and Latin American Cultures:* Héctor Hoyos, Marília Librandi Rocha, Michael Predmore, Joan Ramon Resina, Jorge Ruffinelli, Lisa Surwillo, Yvonne Yarbro-Bejarano

*International Relations:* Thomas O'Keefe

*Language Center:* José Carlos Fajardo, Alice Miano, Ana Sierra, Lyris Wiedemann

*Law, School of:* Jonathan Greenberg, Thomas Heller (emeritus)

*Linguistics:* John Rickford

*Medicine, School of:* Evaleen Jones, Grant Miller, Paul Wise

*Political Science:* Stephen Haber, Terry Karl, Beatriz Magaloni, Robert Packenham (emeritus), Gary Segura, Michael Tomz

*Religious Studies:* Thomas Sheehan

*Sociology:* Tomás Jiménez, Michael Rosenfeld

*Stanford University Libraries:* Adán Griego, Sergio Stone, Robert Trujillo

*Center Offices:* Bolívar House, 582 Alvarado Row

*Mail Code:* 94305-8545

*Department Phone:* (650) 723-4444

*Email:* latinamerica@stanford.edu

*Web Site:* <http://las.stanford.edu>

Courses offered by the Interdisciplinary Program in Latin American Studies are listed under the subject code LATINAM on the *Stanford Bulletin's* ExploreCourses web site.

The Center for Latin American Studies (CLAS) supports research and teaching in all fields of study as they relate to Latin America. Academic programs encourage interdisciplinary approaches and draw on the expertise of nearly sixty active affiliated faculty members representing Stanford's various schools and departments. Stanford University Libraries' substantial Latin American collections are valuable resources for students, faculty, and visiting researchers alike. Each year CLAS hosts a number of Tinker Visiting Professors, highly distinguished Latin American and Iberian scholars who come to Stanford to teach a course in their field of specialization. The Center for Latin American Studies maintains a highly active public events calendar and provides funding to students and faculty for a variety of research, teaching, internship, and conference activities. Stanford offers three formal academic programs in Latin American Studies: an Undergraduate Minor, Interdisciplinary Honors, and a Master of Arts degree. The Center is a U.S. Department of Education Title VI National Resource Center for Latin America.

## UNDERGRADUATE PROGRAMS IN LATIN AMERICAN STUDIES

Currently, Stanford University does not offer an undergraduate major in Latin American Studies; however, undergraduates may pursue a minor or interdisciplinary honors in Latin American Studies. In addition, students may concentrate on Latin America through other departmental and interdisciplinary degree programs, such as Anthropology, History, Political Science, Iberian and Latin American Cultures, or International Relations. Interested students should consult the relevant departmental web sites and sections of this bulletin for further information.

Undergraduates can obtain a coterminal M.A. degree in Latin American Studies while concurrently working on their undergraduate major by applying during the regular admissions cycle no later than their senior year.

*Financial Aid*—Each summer, CLAS awards grants to a small number of undergraduates to complete internships in Latin America. Applications include a proposal, academic transcript, and letters of recommendation. Students from any department are eligible to apply. See <http://las.stanford.edu>.

Students in undergraduate programs who plan to enroll in Portuguese or Quechua language and area or international studies courses may be eligible for Academic Year and Summer Foreign Language and Area Studies (FLAS) fellowships. Recipients of FLAS fellowships must be American citizens or permanent residents. For detailed program information and eligibility, see <http://las.stanford.edu>.

## GRADUATE PROGRAMS IN LATIN AMERICAN STUDIES

The one-year master's program in Latin American Studies is designed for students who have experience working, living, or studying in Latin America or Iberia and little prior course work on Latin America.

Stanford University does not offer a Ph.D. program in Latin American Studies; however, doctoral candidates may concentrate on Latin America through other departmental programs, such as Anthropology, History, Political Science, or Iberian and Latin American Cultures. Interested applicants should consult the relevant departmental web sites and sections of this bulletin for admissions information and further details.

*Admission*—The application deadline for the 2012-13 academic year is January 10, 2012. Applicants submit an online application, including a 500-word statement of purpose, resumé, 10-15 page double-spaced academic writing sample, and three letters of recommendation. In addition, all applicants must submit official transcripts and GRE general test scores. TOEFL scores are required of applicants whose first language is not English or who did not earn a degree from an undergraduate institution where English is the primary language of instruction. For information on university graduate admissions and to access the online application, visit <http://gradadmissions.stanford.edu>.

Applicants must meet the University admission requirements, have a working knowledge of Spanish or Portuguese at the university third-year level or higher, and have experience working, living, or studying in Latin America or Iberia prior to admission.

CLAS takes a broad approach to evaluating applications for admission. As important as GRE scores and grades are the applicant's essay, letters of recommendation, academic writing sample, and the experiences and goals conveyed through the personal statement and resume.

Students interested in pursuing the joint degree program in Latin American Studies and Law (J.D.) or a dual degree in Latin American Studies and Business (M.B.A.) or Medicine (M.D.) must apply to each program separately and be accepted by both. Details about the joint and dual degree programs can be found in the "Master of Arts in Latin American Studies" section of this bulletin.

*Financial Aid*—The Center for Latin American Studies

provides several graduate fellowships as well as limited course assistantships with the Tinker Visiting Professors each quarter.

Students in graduate programs who plan to enroll in Portuguese or Quechua language and area or international studies courses may be eligible for Academic Year and Summer Foreign Language and Area Studies (FLAS) fellowships. Recipients of FLAS fellowships must be American citizens or permanent residents. Applicants to the M.A. program have priority in the annual FLAS competition; in recent years CLAS has also awarded FLAS fellowships to students enrolled in the School of Engineering and the School of Law. For detailed program information and eligibility, see <http://las.stanford.edu>.

CLAS awards Working Group grants to graduate students across the University who wish to organize events such as lectures, speaker series, symposia, exchange of working papers, and collaborative research efforts. For detailed program information and eligibility, see <http://las.stanford.edu>.

## MINOR IN LATIN AMERICAN STUDIES

The Minor in Latin American Studies is open to students in any major. Students who wish to complete the minor must declare online (through Axess) and submit a proposal of course work no later than the second quarter of their junior year. The minor must be completed by the second quarter of the senior year. Units taken for a student's major cannot be double-counted towards the minor.

Requirements for the minor include:

1. Completion of 25 units as follows:
  - a. A 5-unit course surveying Latin America: either HISTORY 170B, Culture, Society and Politics in Latin America or an approved substitute.
  - b. 20 additional units in a number of courses which together comprise a coherent focus on a theoretical problem or issue of the region, such as (but not limited to) culture and identity, political economy, or sustainable development. All courses, with the exception of Overseas Studies courses, must be at the 100-level or higher. For approved courses, see the "Latin American Studies Cognate Courses" section of this bulletin.
  - c. At least 10 of the 25 units must be completed at Stanford. All courses to be counted toward the minor must be taken for a letter grade.
2. Fulfill the Foreign Language Requirement. The minimum requirement for completion of the minor in Latin American Studies is advanced proficiency in Spanish or Portuguese by any one of the following means:
  - a. Successful completion of seven quarters of college-level study of Spanish or Portuguese.
  - b. Completion of a course taught in Spanish or Portuguese at the 100-level or higher, with a letter grade of 'B' (3.0) or higher. This may be a course on Spanish or Portuguese language or literature, or some other subject, as long as it fulfills the above criteria.
  - c. Achievement of the advanced proficiency level on the ACTFL scale in a test administered by the Stanford Language Center. Contact the Language Center for test dates and procedures.
3. Recommended: experience in Latin America such as study abroad, field research, or an internship.

Upon completion of all requirements, the CLAS subcommittee on undergraduate programs authorizes the designation of the Minor in Latin American Studies on the student's transcript.

## HONORS IN LATIN AMERICAN STUDIES

The Honors Program in Latin American Studies is open to undergraduate students in any major. The aim of the honors program is to prepare students to pursue individualized research on Latin America, culminating in an honors thesis completed under the supervision of a faculty adviser. The honors program is particularly suited to the student who wishes to go on to graduate

school or pursue employment in an institution emphasizing research and independent work. Although not required, students are encouraged to undertake independent field research in Latin America for their thesis. It is strongly recommended that students enroll in HISTORY 299X, Design and Methodology for International Field Research (1 unit), during their sophomore or junior year for an overview of research design and methods for international field research.

Admission to the honors program is by application by the end of the junior year. Applications are reviewed and approved by the CLAS director and associate director. Applicants must have a cumulative grade point average (GPA) of 3.3 (B+) or higher and maintain this average in courses taken to satisfy the requirements. Courses must be taken for a letter grade where that option is available. Courses credited toward LAS honors may be double-counted toward the student's major requirements.

To graduate with interdisciplinary honors in Latin American Studies a student must:

1. Complete a total of 35 units in courses certified for honors by the Center for Latin American Studies, distributed as follows:
  - a. A 5-unit survey course, normally taken in the sophomore year: either HISTORY 170B, Culture, Society and Politics in Latin America or an approved substitute.
  - b. For breadth: two 4-5-unit courses at the 100-level or higher with a focus on Latin America. These courses are normally taken during the sophomore and junior years. For approved courses, see the "Latin American Studies Cognate Courses" section of this bulletin.
  - c. For depth: one 4-5-unit course, approved by the honors adviser, at the 100-level or higher with a focus on Latin America that explores in depth an issue of particular interest to the student. See the "Latin American Studies Cognate Courses" section of this bulletin.
  - d. LATINAM 198, Honors Thesis (1-10 units), under the supervision of the honors adviser. Normally these units are spread over two or three quarters of the senior year and are devoted to the completion of the honors thesis.
  - e. Honors Seminar in Latin American social history, taken in the senior year. Please consult the Center for Latin American Studies website for the 2012-13 honors seminar.
  - f. Additional courses at the 100-level or higher focusing on Latin America to bring the total to 35 units. Up to 5 units may come from study of Spanish or Portuguese beyond the seventh quarter. For approved courses, see the "Latin American Studies Cognate Courses" section of this bulletin.
  - g. Of the courses applied to 'b' and 'c' above, up to 10 units may be completed in Overseas Studies, and up to 5 units may be taken as directed individual study. For approved Overseas Studies courses, see the "Latin American Studies Cognate Courses" section of this bulletin.
  - h. All courses to be counted toward the honors program must be taken for a letter grade.
2. Fulfill the Foreign Language Requirement. The minimum requirement for completion of the honors program in Latin American Studies is advanced proficiency in Spanish or Portuguese by any one of the following means:
  - a. Successful completion of seven quarters of college-level study of Spanish or Portuguese.
  - b. Completion of a course taught in Spanish or Portuguese at the 100-level or higher, with a letter grade of 'B' (3.0) or higher. This may be a course on Spanish or Portuguese language or literature, or another subject, as long as it fulfills the above criteria.
3. Achievement of the advanced proficiency level on the ACTFL scale in a test administered by the Stanford Language Center. Contact the Language Center for test dates and procedures.
4. Submit an honors thesis that meets standards of scholarly excellence and is approved by the thesis adviser. If graduating in June, participate in the LAS honors symposium in late May or early June.

## COTERMINAL BACHELOR'S AND MASTER'S DEGREES IN LATIN AMERICAN STUDIES

Undergraduates at Stanford may apply for admission to the coterminal master's program in Latin American Studies when they have earned a minimum of 120 units toward graduation, including advanced placement and transfer credit, and no later than the quarter prior to the expected completion of their undergraduate degree. The application deadline for the 2012-13 academic year is January 10, 2012.

Coterminal applicants must submit:

- an application form
- a 500-word statement of purpose
- a resumé
- a 10-15 page double-spaced academic writing sample
- three letters of recommendation
- a Stanford transcript
- GRE general test scores

Coterminal applicants must have a minimum cumulative GPA of 3.5 and a working knowledge of Spanish or Portuguese at a university third-year level or higher.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see <http://studentaffairs.stanford.edu/registrar/publications#Coterm>.

Requirements for the coterminal master's degree are outlined in the "Master of Arts in Latin American Studies" section of this bulletin.

## MASTER OF ARTS IN LATIN AMERICAN STUDIES

The Master of Arts in Latin American Studies is an interdisciplinary program. The curriculum consists of a core set of courses surveying the history, politics, society, ecology, and culture of the Latin American region; advanced language training; and in-depth course work. In consultation with a faculty adviser, students select a course of study suited to their individual interests.

## JOINT DEGREE PROGRAM IN LATIN AMERICAN STUDIES AND LAW

The joint degree program in Latin American Studies and Law allows students to pursue the M.A. degree in Latin American Studies concurrently with the Doctor of Jurisprudence (J.D.) degree, with a significant number of courses that may apply to both degrees. It is designed to train students interested in a career in teaching, research, or the practice of law related to Latin American legal affairs. Students must apply separately to the Latin American Studies M.A. program and to the Stanford School of Law and be accepted by both. Completing this combined course of study requires approximately four academic years, depending on the student's background and level of language training. For more information, see the "Joint Degree Programs" section of this bulletin and consult with the program offices for the two programs.

## DUAL MASTER'S DEGREE WITH MEDICINE OR BUSINESS

Stanford offers dual degree programs that grant an M.A. degree in Latin American Studies and a Master of Business Administration degree or a Medical Doctor degree. Students must apply separately to and be accepted by both the Latin American Studies M.A. program and the Graduate School of Business or School of Medicine.

## DEGREE REQUIREMENTS

University requirements for the master's degree are described in the "Graduate Degrees General Requirements" section of this bulletin.

The program requires completion of a minimum of 45 graduate units. Each student is assigned a faculty adviser who works with the student to develop a customized program of study. All courses for the M.A. degree must be at the 100-level or higher, with at least half being at the 200-level or higher.

Candidates to the M.A. in Latin American Studies must complete the following:

1. *Core courses* (15 units): one core 5-unit course in each of three fields of specialization:
  - a. Culture and Society: HISTORY 372B (same as ILAC 372B), *Frontiers of Iberian and Latin American Culture and History* (Autumn)
  - b. Political Economy: POLISCI 248S, *Latin American Politics* (Winter)
  - c. Environment and Ecology: ANTHRO 259 (same as ANTHRO 159), *Conservation and Development Dilemmas in Latin America: Galapagos as a Microcosm* (Spring)
2. *Cognate courses* (15 units): three courses (5 units each), one from each of the three fields of specialization listed in '1' above. For approved courses, see the "Latin American Studies Cognate Courses" section of the Bulletin.
3. *Elective courses* (10-15 units): three elective courses (3-5 units each) in one of the three fields of specialization (see '1' above) from across the University's offerings, selected with guidance and approval from the faculty adviser.
4. *Language requirement*: at least 3 units of course work on a second Latin American language. Students proficient in both Spanish and Portuguese must take an advanced third-year language course in either Spanish or Portuguese; students proficient in only Spanish or only Portuguese must take a basic course in the language in which they are not already proficient. Up to 6 units of foreign language coursework may be applied toward the MA degree. All foreign language coursework must be taken at the 100-level or higher.
5. *Seminar requirement*: 3 units (1 per quarter) of LATINAM 200, *Contemporary Issues in Latin American Studies*.
6. *Thesis option*: students may elect to write a master's thesis; they may register for LATINAM 398 for up to 10 units of thesis research under the guidance of an Academic Council faculty member. Thesis units may be counted toward the elective field unit requirements (requirement number 3, above).
7. *Grade requirements*: All courses to be counted toward the MA (with the only exception being LATINAM 200) must be taken for a letter grade and earn a B- or better. M.A. candidates must maintain a cumulative GPA of 3.0 or higher.

## LATIN AMERICAN STUDIES COGNATE COURSES

The following courses may be used to satisfy requirements for the M.A. degree, honors, or minor in Latin American Studies. Consult the *Stanford Bulletin's* ExploreCourses web site for full course descriptions and class schedules.

When selecting courses from this list, please be aware of the following:

1. Overseas Studies courses, denoted by the subject codes OSPMADR or OSPSANTG, apply only to the undergraduate minor or honors programs and are not options for M.A. students.
2. Courses with numbers ending in the letter N or Q are Introductory Seminars for undergraduates and are not options for M.A. students. Courses ending in N give preference to freshmen; courses ending in Q give preference to sophomores.
3. All courses to be counted toward the M.A., minor, or honors in Latin American Studies must be taken at the 100-level or higher, with the exception of Overseas Studies courses included on this list (see also note 1, above).
4. All courses to be counted toward the M.A., minor, or honors in Latin American Studies must be taken for a letter grade.

5. For the M.A. degree, cognate courses must be taken for 5 units each. M.A. elective courses may be taken for 3-5 units each.
6. Some courses have prerequisites or special enrollment requirements. Students are responsible for making sure they have completed any prerequisites and/or secured an instructor's permission, as needed.

## CULTURE AND SOCIETY

- ANTHRO 100C. Chavin de Huantar Research Seminar
- ANTHRO 101. The Aztecs and Their Ancestors: Introduction to Mesoamerican Archaeology
- ANTHRO 120. The Maya
- ARTHIST 494. Caribbean and Latin American Art
- COMPLIT 121. Poems, Poetry, Worlds: An Introductory Course
- COMPLIT 142. The Literature of the Americas (same as AMSTUD 142, ENGLISH 172E)
- COMPLIT 332. The Transatlantic Renaissance (same as ENGLISH 310)
- EDUC 178X. Latino Families, Languages, and Schools
- HISTORY 70. Culture, Politics, and Society in Latin America
- HISTORY 106B. Global Human Geography: Europe and Americas
- HISTORY 170. Colonial Latin America
- HISTORY 170B. Culture, Society and Politics in Latin America (minor/honors survey course)
- HISTORY 175. Modern Mexico
- HISTORY 203E. Global Catholicism
- HISTORY 208C. History of Death and Dying
- HISTORY 273G. Geographical Imagination & the Making of Brazil & the Hispanic-American States, 1750-1850
- HISTORY 275G. Religion in Colonial Latin America and the Iberian World (same as HISTORY 375G)
- HISTORY 372B. Frontiers of Iberian and Latin American Culture and History (same as HISTORY 272B, ILAC 272B, ILAC 372B) (M.A. core course and honors seminar)
- ILAC 106N. Contemporary Latin American Literature in Translation
- ILAC 114N. Lyric Poetry
- ILAC 118N. Slavery and Freedom, Madness and Reason in Brazil; the Fiction of Machado de Assis
- ILAC 121. Narratives of Affect
- ILAC 131. Cultural Perspectives in the Luso-Hispanic Americas
- ILAC 161. Modern Latin American Literature
- ILAC 193Q. Spaces and Voices of Brazil through Film (same as PORTLANG 193Q)
- ILAC 212. Cuban Cinema since the Revolution
- ILAC 239. Borges and Translation
- ILAC 258. New Latin American Short Stories and Films (1980-2009): a Survey (same as ILAC 158)
- ILAC 262. The Literature of Elena Poniatowska
- ILAC 264. Visions of the Andes (same as ILAC 364)
- ILAC 271. Brazilian Presence: Landscape, Life and Literature
- ILAC 280. Latina/o Literature (same as CHICANST 200, CSRE 200, ILAC 382)
- OSPMADR 50. Flirting with Spanish Metafiction: Cervantes, Velázquez, Fuentes, Almodóvar
- OSPSANTG 10. Borges and Argentina
- OSPSANTG 11. Dance and Culture in Latin America
- OSPSANTG 14. Women Writers of Latin America in the 20th Century
- OSPSANTG 15. Dances of Latin America
- OSPSANTG 62. Topics in Chilean History
- OSPSANTG 68. The Emergence of Nations in Latin America

- OSPSANTG 104X. Modernization and Culture in Latin America
- OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century
- OSPSANTG 118X. Artistic Expression in Latin America
- SOC 264. Immigration and the Changing United States (same as CHICANST 164, CSRE 164, SOC 164)

## ENVIRONMENT AND ECOLOGY

- ANTHRO 259. Conservation and Development Dilemmas in Latin America: Galapagos as Microcosm (same as ANTHRO 159) (M.A. core course)
- ANTHRO 260. Social and Environmental Sustainability: The Costa Rican Case (same as ANTHRO 160)
- ANTHRO 277. Environmental Change and Emerging Infectious Diseases (same as ANTHRO 177, HUMBIO 114)
- BIO 175. Tropical Ecology and Conservation
- CEE 265A. Sustainable Water Resources Development
- CEE 265D. Water and Sanitation in Developing Countries
- EARTHSYS 173. Aquaculture and the Environment: Science, History, and Policy (EARTHSYS 273, EESS 173, EESS 273)
- EARTHSYS 253. Soils and Nutrient Cycling in the Amazon Rainforest (same as EARTHSYS 153, EESS 153, EESS 253)
- OSPSANTG 58. Living Chile: A Land of Extremes
- OSPSANTG 71. Santiago: Urban Planning, Public Policy, and the Built Environment
- OSPSANTG 85. Marine Ecology of Chile and the South Pacific

## POLITICAL ECONOMY

- ECON 106. World Food Economy (EARTHSYS 106, EESS 106)
- ECON 127. Economics of Health Improvement in Developing Countries (same as MED 262)
- ECON 217. Topics in Latin American Macroeconomics and Development
- EDUC 306A. Economics of Education in the Global Economy
- INTNLREL 141A. Camera as Witness: International Human Rights Documentaries
- INTNLREL 147. The Political Economy of the Southern Cone of South America
- INTNLREL 148. Economic Integration of the Americas
- LAW 584. Comparative and International Freedom of Press: US, Latin America, and Inter-American System
- LAW 658A. International Human Rights and Conflict Resolution Clinic: Clinical Practice
- OSPSANTG 119X. The Chilean Economy: History, International Relations, and Development Strategies
- OSPSANTG 129X. Latin America in the International System
- OSPSANTG 130X. The Chilean Economy in Comparative Perspective
- OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective
- POLISCI 248S. Latin American Politics (M.A. core course)
- POLISCI 327. Minority Behavior and Representation
- POLISCI 440B. Political Economy of Development (same as HISTORY 378E)

## OVERSEAS STUDIES COURSES IN LATIN AMERICAN STUDIES

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (<http://explorecourses.stanford.edu>) or the Bing Overseas Studies web site (<http://bossp.stanford.edu>). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

**AUTUMN QUARTER****SANTIAGO**

- OSPSANTG 14. Women Writers of Latin America in the 20th Century. 4-5 units, Sergio Missana, GER:DB:Hum, EC:Gender
- OSPSANTG 58. Living Chile: A Land of Extremes. 5 units, Reid, GER:DB:EngrAppSci
- OSPSANTG 68. The Emergence of Nations in Latin America. 4-5 units, Ivan Jaksic, GER:DB:SocSci
- OSPSANTG 104X. Modernization and Culture in Latin America. 5 units, Bernardo Subercaseaux, GER:DB:SocSci, EC:GlobalCom
- OSPSANTG 130X. The Chilean Economy in Comparative Perspective. 5units, Luders, GER:DB:SocSci
- OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective. 5 units, Sergio Micco, GER:DB:SocSci

**WINTER QUARTER****SANTIAGO**

- OSPSANTG 14. Women Writers of Latin America in the 20th Century. 4-5 units, Sergio Missana, GER:DB:Hum, EC:Gender
- OSPSANTG 58. Living Chile: A Land of Extremes. 5 units, Staff, GER:DB:EngrAppSci
- OSPSANTG 62. Topics in Chilean History. 4-5 units, Ivan Jaksic
- OSPSANTG 118X. Artistic Expression in Latin America. 5 units, César Albornoz, GER:DB:SocSci, EC:GlobalCom
- OSPSANTG 129X. Latin America in the International System. 4-5 units, Claudio Fuentes, GER:DB:SocSci

**SPRING QUARTER****MADRID**

- OSPMADRD 50. Flirting with Spanish Metafiction: Cervantes, Velázquez, Fuentes, Almódovar. 4-5 units, Santiago Tejerina-Canal, GER:DB:Hum

**SANTIAGO**

- OSPSANTG 10. Borges and Argentina. 4-5 units, Sergio Missana, GER:DB:Hum
- OSPSANTG 68. The Emergence of Nations in Latin America. 4-5 units, Ivan Jaksic, GER:DB:SocSci
- OSPSANTG 85. Marine Ecology of Chile and the South Pacific. 5 units, Alvaro Palma, GER:DB:NatSci
- OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century. 5 units, German Correa, GER:DB:SocSci

**LINGUISTICS**

*Emeriti (Professors)* Joan Bresnan, Clara N. Bush, Shirley Brice Heath, William R. Leben, Stanley Peters, Elizabeth C. Traugott  
*Chair:* Thomas A. Wasow

*Professors:* Eve V. Clark, Penelope Eckert, Daniel Jurafsky (on leave Autumn), Martin Kay, Paul Kiparsky, Beth Levin, John R. Rickford, Ivan A. Sag, Thomas A. Wasow

*Associate Professors:* Arto Anttila, Christopher Manning, Christopher Potts

*Assistant Professors:* Vera Gribova, Robert Podesva, Meghan Sumner (on leave)

*Courtesy Professors:* Herbert H. Clark, Kenji Hakuta, James McClelland, Orrin W. Robinson III, Chao Fen Sun

*Courtesy Associate Professors:* H. Samy Alim, James A. Fox, Miyako Inoue, Yoshiko Matsumoto

*Courtesy Assistant Professor:* Michael C. Frank

*Senior Lecturer:* Philip L. Hubbard

*Visiting Associate Professor:* Gerald Penn

*Lecturers:* Philip Hofmeister (Autumn), Asya Pereltsvaig (Autumn and Spring)

*Consulting Professors:* Ronald Kaplan, Lauri Karttunen, Annie Zaenen, Arnold Zwicky

*Consulting Associate Professors:* Jared Bernstein, Cleo Condoravdi

*Department Offices:* Margaret Jacks Hall, Building 460

*Mail Code:* 94305-2150

*Phone:* (650) 723-4284

*Email:* linguistics@lists.stanford.edu

*Web site:* <http://linguistics.stanford.edu>

Courses offered by the DEPARTMENT of Linguistics are listed under the subject code LINGUIST on the *Stanford Bulletin's* ExploreCourses web site.

Linguistics concerns itself with the fundamental questions of what language is and how it is related to the other human faculties. In answering these questions, linguists consider language as a cultural, social, and psychological phenomenon and seek to determine what is unique in languages, what is universal, how language is acquired, and how it changes. Linguistics is, therefore, one of the cognitive sciences; it provides a link between the humanities and the social sciences, as well as education, and hearing and speech sciences.

The department offers courses at the undergraduate and graduate levels in the areas central to linguistic theory and analysis. Many of them deal with the analysis of structural patterns in the different components that make up language, including sounds (phonetics and phonology), meanings (semantics and pragmatics), words (morphology), sentences (syntax), and the way they vary and change over time. Other courses integrate the analysis of linguistic structure with phenomena that directly concern other disciplines. These include courses in computational linguistics, language acquisition, the philosophy of language, psycholinguistics, and sociolinguistics.

A variety of open forums provide for the discussion of linguistic issues, including colloquia and regularly scheduled workshops in child language, computational linguistics, phonology, psycholinguistics, semantics, sociolinguistics, and syntax.

**MISSION OF THE UNDERGRADUATE PROGRAM IN LINGUISTICS**

The mission of the undergraduate program in Linguistics is to provide students with the skills necessary to analyze the structure of human languages including sounds (phonetics and phonology), meanings (semantics and pragmatics), words (morphology), sentences (syntax), and the way in which these structural patterns vary and change over time. Courses in the major also integrate the analysis of linguistic structure with phenomena that directly

concern other disciplines including computer science, psychology, cognitive science, communication, anthropology, and foreign language. The program provides students with excellent preparation for further study in graduate or professional schools as well as careers in business, social services, government agencies, and teaching.

## LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. the ability to formulate theoretically interesting and tractable research questions.
2. the ability to identify sources of data relevant to answering their research questions.
3. facility with methods of collecting data relevant to their research questions.
4. knowledge of analytical methods to apply to the data they have collected.
5. the ability to bring the results of their data analysis to bear on their research questions.

## GRADUATE PROGRAMS IN LINGUISTICS

The department offers an M.A., Ph.D., and Ph.D. minor in Linguistics.

## COGNITIVE SCIENCE

Linguistics is participating with the departments of Computer Science, Philosophy, and Psychology in an interdisciplinary program in Cognitive Science for doctoral students. The program is intended to provide an interdisciplinary education as well as a deeper concentration in linguistics. Students who complete the Linguistics and Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Linguistics. To receive this field designation, students must complete 30 units of approved courses, to be determined in consultation with the graduate studies adviser.

## LINGUISTICS COURSE CATALOG NUMBERING SYSTEM

Courses numbered under 100 are designed primarily for pre-majors. Courses with 100-level numbers are designed for majors, minors, and M.A. and Ph.D. minor candidates in Linguistics. Those with numbers 200 and above are primarily for graduate students, but with consent of instructor some of them may be taken for credit by qualified undergraduates. At all levels, the course numberings indicate a special area, as follows:

00-04	General
05-09	Phonetics
10-14	Phonology
15-19	Morphology
20-29	Syntax
30-39	Semantics, Pragmatics, Discourse
40-49	Language Acquisition, Psycholinguistics
50-61	Sociolinguistics, Language Variation, Change
62-73	Language and Culture, Structure of a Language
74-79	Methods, Mathematical Linguistics, Statistics
80-89	Computational Linguistics
90-99	Directed Work, Theses, Dissertations

## BACHELOR OF ARTS IN LINGUISTICS

The undergraduate major stresses the study of language both as a fundamental human faculty and as a changing social institution. At the core of the program is a set of departmental courses on the nature of human language; the major also draws on courses offered by other departments and programs.

The Linguistics major cuts across the humanities and the social and physical sciences. It provides a solid general education as a background for advanced studies in such disciplines as anthropology, cognitive science, communication, computer science, education (language, literacy, and culture), hearing and speech sciences, languages, law, linguistics, philosophy, and psychology.

## REQUIREMENTS

Requirements for the B.A. include at least 50 units of course work in Linguistics and approved courses in related fields. Of the 50 units required for the major, no more than 12 may be below the 100 level. No more than two courses, neither of which can be a core course, may be taken on a credit/no credit basis. Students must receive a 'C-' or better in courses used towards the requirements.

*Core Courses*—The core courses are:  
 LINGUIST 1. Introduction to Linguistics  
 LINGUIST 110. Introduction to Phonetics and Phonology  
 LINGUIST 120. Introduction to Syntax  
 LINGUIST 130A. Introduction to Linguistic Meaning  
 or LINGUIST 130B. Introduction to Lexical Semantics  
 LINGUIST 150. Language in Society, which fulfills the Writing in the Major requirement (WIM)  
 LINGUIST 160. Introduction to Language Change, or, in advance consultation with the Linguistics undergraduate studies adviser, a course in historical linguistics or the history of a language.

All majors must complete at least five core courses, including LINGUIST 150, Language and Society.

*Other Courses*—Other courses counting toward the unit requirement should form a coherent program with emphases from among the areas of concentration listed below. Students should consult with the Linguistics undergraduate studies adviser when declaring the major, and maintain regular contact during the remainder of their Stanford career. Each student's major program must be approved by the Linguistics undergraduate studies adviser, or approved department adviser.

Students in the major must also take:

1. At least two 200-level Linguistics courses, typically in their area of concentration.
2. LINGUIST 197, Undergraduate Research Seminar, in the junior year. Special arrangements can be made for transfer students and others who start the major late.

*Other Requirements*—

1. *Foreign language*: majors must have competence in at least one language other than English as part of their understanding of the field of linguistics and its study. This is usually demonstrated by the completion of six quarters of language study at Stanford or equivalent; level of proficiency is determined by the Language Center or the relevant language department. Students may petition to be exempted from the Language Requirement if they have grown up speaking a language other than English and can use it for everyday purposes and for linguistic analysis.
2. *Junior research paper*: this requirement is typically fulfilled by providing an additional stage of revision on a research paper previously submitted in a Linguistics course. It must be approved by both the instructor of the course and the Linguistics undergraduate studies adviser by the end of the junior year.

## AREAS OF CONCENTRATION

Students select an area of concentration or develop one themselves in advance consultation with the Linguistics undergraduate studies adviser. These areas of concentration are not declared on Axess, and they do not appear on the transcript or diploma.

## HONORS PROGRAM

Students who wish to undertake a more intensive program of study, including independent research, should pursue departmental honors. Students should apply for honors by the end of Spring Quarter of their junior year. As part of the application, the student must write a research proposal describing the honors project which must be approved by the faculty adviser. Approval is given only to students who have maintained a grade point average (GPA) of 3.3 (B+) or better in the courses required for the major.

Honors students complete a total of 60 units including the 50 units for the major, plus 10 additional units of independent study and Honors Research. In addition, they must complete an honors thesis based on research conducted with a principal adviser who must be a member of the Linguistics faculty, and a secondary faculty adviser who may, with the approval of the Undergraduate Studies Committee, be a member of another department. In the Autumn Quarter of the senior year, honors students enroll in LINGUIST 199, Independent Study, to work closely with one of their advisers on the research project. In Winter and Spring quarters, honors students enroll in LINGUIST 198, Honors Research, with the student's principal adviser for close supervision of the honors thesis. The thesis must be submitted in final, acceptable, form by May 15. The thesis topic is presented orally at a department Honors Colloquium late in Spring Quarter.

## MINOR IN LINGUISTICS

Requirements for the minor include at least 28 units of course work (typically seven courses) in Linguistics and related fields, approved in advance by the Linguistics undergraduate studies adviser. No more than two courses, neither of which can be a core course, may be taken on a credit/no credit basis. The courses counting towards the minor must be incremental units beyond those needed to satisfy the student's major course of study. The minor consists of:

1. LINGUIST 1. Introduction to Linguistics
2. Two out of the following Linguistics core courses:  
LINGUIST 110. Introduction to Phonetics and Phonology  
LINGUIST 120. Introduction to Syntax  
LINGUIST 130A. Introduction to Linguistic Meaning  
LINGUIST 150. Language in Society  
or LINGUIST 160. Introduction to Language Change  
or, in advance consultation with the Linguistics undergraduate studies adviser, a course in historical linguistics or the history of a language.
3. At least four other courses determined in advance consultation with the Linguistics undergraduate studies adviser. Students are encouraged to take at least one 200-level Linguistics course. Students may also choose to do independent work with a faculty member of their choice.

## COTERMINAL BACHELOR'S AND MASTER'S DEGREE PROGRAM IN LINGUISTICS

The Department of Linguistics admits a limited number of undergraduates to the coterminal degree program. Students are required to submit to the department a complete application, which includes a statement of purpose identifying a thesis topic, a Stanford transcript, three letters of recommendation (at least one of which must be from a faculty member in Linguistics), and a proposed course of study (worked out in advance with a Linguistics adviser). Applicants for the coterminal degree may apply as early as their eighth quarter and no later than early in the eleventh quarter of undergraduate study. Decisions on admission to the coterminal degree program rest with the Graduate Admissions Committee of the Department of Linguistics. For further application information, see the department's web pages.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

## MASTER OF ARTS IN LINGUISTICS

The University's basic requirements for the master's degree are discussed in the "Graduate Degrees" section of this bulletin. The following are additional departmental requirements. Candidates should review the department's *Guidelines for the M.A. Degree in Linguistics* for further particulars concerning these requirements.

1. *Courses*: candidates must complete 45 units of graduate work in Linguistics, including at least four courses in the student's area of specialization. No more than two courses should be at the 100 level.  
Individual programs should be worked out in advance with an adviser to ascertain that the necessary courses in the area of specialization are offered over the course of the year of anticipated enrollment. The overall grade point average (GPA) must be at least 3.0 (B) for all degree program coursework.
2. *Language*: reading knowledge of a non-native language in which a substantial linguistic literature is written, with sufficient facility to understand and interpret linguistic research published in that language, or in-depth research on the structure of a non-native language.
3. *Thesis or Thesis Project*: a research paper supervised by a committee of three faculty (normally fulfilled by up to 6 units of LINGUIST 398, Directed Research).

## DOCTOR OF PHILOSOPHY IN LINGUISTICS

The following requirements are in addition to the basic University requirements for the degree sought; see the "Graduate Degrees" section of this bulletin. Candidates should review the department's *Guidelines for the Degree of Ph.D. in Linguistics*, downloadable at <http://www-linguistics.stanford.edu/graduate/phd-guidelines.pdf>, for further particulars concerning these requirements.

1. *Language*—candidates must demonstrate the ability to read at least one foreign language in which a substantial linguistic literature is written, with sufficient facility to understand and to interpret linguistic research published in that language. (Particular areas of specialization may require additional research languages.)  
In addition, each candidate must demonstrate an explicit in-depth knowledge of the structure of at least one language (normally neither the candidate's native language nor the language used for the reading exam). This requirement is fulfilled by writing an original research paper on a language.
2. *Courses*—a minimum of 135 units of graduate work beyond the bachelor's degree, or 90 units beyond the master's degree. The course requirements detailed in the *Guidelines for the Degree of Ph.D. in Linguistics* guarantee that each student covers a sufficient set of subareas within the field.  
Candidates must maintain a satisfactory record in the number and distribution of units completed. The overall course work GPA must be at least 3.0 (B), and all of the basic courses should be completed with at least a 'B.'
3. *Research*—the prospective Ph.D. candidate is expected to complete two substantial qualifying papers. The deadline for completion of the first qualifying paper is the end of Autumn Quarter of the second year; the deadline for completion of the second qualifying paper is the end of Autumn Quarter of the third year. The subject matter of the two papers, although it may be related (for example, same language), must be clearly distinct. The requirement is fulfilled by two quarters of LINGUIST 395, Research Workshop (1-2 units each), and by oral discussion with a committee of at least three faculty members selected by the student and the faculty.
4. *Candidacy*—students must complete a prescribed portion of the basic course requirement (see item 2 above), one foreign language requirement (see item 1 above), and one qualifying paper (see item 3 above) by the end of their second year.

5. *Teaching*—at least three quarters serving as a teaching assistant in Linguistics courses.
6. *Colloquia*—two oral presentations exclusive of the public portion of the University oral (see item 7b below). This requirement is satisfied by class presentations, conference papers, or colloquium talks. Normally, both should be given during the first four years of study.
7. *Dissertation*—
  - a. appointment of a dissertation committee.
  - b. an approved written dissertation proposal is required by the end of Autumn Quarter of the fourth year.
  - c. oral discussion of the dissertation proposal with an augmented dissertation committee.
  - d. passing a University oral examination on the dissertation and related areas which includes a public presentation of the dissertation research.
  - e. dissertation (up to 15 units of LINGUIST 399).

## PH.D. MINOR IN LINGUISTICS

1. *Courses*: the candidate must complete 30 units of course work in linguistics. The University requires that at least 20 of these units be at the 200 level or above; the remaining 10 units must be at the 100 level or above. The course work for the minor must include LINGUIST 110, 120, and either 130A or 130B or 200-level introductory courses in the same areas and at least three courses related to the area of specialization. Courses submitted for the minor must be incremental units beyond those used to satisfy the major. Individual programs should be worked out in advance with the student's Ph.D. minor adviser in Linguistics.
2. *Research Project* (optional): the candidate may elect to present a paper which integrates the subject matter of linguistics into the field of specialization of the candidate.
3. The Linguistics minor adviser or designee serves on the candidate's University oral examination committee and may request that up to one-third of the examination be devoted to the minor subject.

## OVERSEAS STUDIES COURSES IN LINGUISTICS

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (<http://explorecourses.stanford.edu>) or the Bing Overseas Studies web site (<http://bosp.stanford.edu>). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

## WINTER QUARTER

### PARIS

OSPPARIS 37. Gesture. 3 units, Eve Clark, GER:DB:SocSci  
 OSPPARIS 38. First Language Acquisition, with Emphasis on French. 4 units, Eve Clark

# DIVISION OF LITERATURES, CULTURES, AND LANGUAGES

*Division Chair*: Gabriella Safran  
*Division Offices*: Building 260, Rooms 114-119  
*Mail Code*: 94305-2005  
*Phone*: (650) 724-1333; Fax: (650) 725-9306  
*Email*: dlcl@stanford.edu  
*Web Site*: <http://dlcl.stanford.edu>

Courses offered by the Division of Literatures, Cultures, and Languages are listed under the subject code DLCL on the *Stanford Bulletin's* ExploreCourses web site.

The Division of Literatures, Cultures, and Languages consists of five academic departments (Comparative Literature, French and Italian, German Studies, Iberian and Latin American Cultures, and Slavic Languages and Literatures), five focal groups (Humanities Education, Performance, Philosophy and Literature, Poetics, and Renaissance) as well as the Language Center, which oversees language instruction at Stanford. All the departments of the division offer academic programs leading to B.A., M.A., and Ph.D. degrees. The division brings together scholars and teachers dedicated to the study of literatures, cultures, and languages from humanistic and interdisciplinary perspectives. The departments in the division are distinguished by the quality and versatility of their faculty, a wide variety of approaches to cultural traditions and expressions, and the intense focus on the mastery of languages. This wealth of academic resources, together with small classes and the emphasis on individual advising, creates a superior opportunity for students who wish to be introduced to or develop a deeper understanding of non-English speaking cultures.

The division's departments and the Language Center offer instruction at all levels, including introductory and general courses that do not require knowledge of a language other than English. These courses satisfy a variety of undergraduate requirements and can serve as a basis for developing a minor or a major program in the member departments. The more advanced and specialized courses requiring skills in a particular language are listed under the relevant departments, as are descriptions of the minor and major programs.

The DLCL itself offers one undergraduate minor program, an undergraduate multimedia laboratory course, and several graduate courses focused on the teaching of second languages, the teaching of literature, and academic professionalization.

## MINOR IN MODERN LANGUAGES

The Division of Literatures, Cultures, and Languages offers an undergraduate minor that draws upon courses in literature and language within the division's departments and elsewhere in the University.

Course work in this minor may not duplicate work counted toward other majors or minors. Advanced Placement credit and transfer credit do not apply to this minor. All courses must be taken for a letter grade. By University policy, no more than 36 units may be awarded in this minor.

Students declare the minor in Modern Languages through Axess.

## MINOR IN MODERN LANGUAGES

The minor in Modern Languages is offered to students who want to supplement the course work in their major with course work in modern languages and literatures. The minor must be approved by the chairs of undergraduate studies of the respective language departments. Students in any field qualify for the minor by meeting the following requirements:

1. A minimum of 20 units (10 units per language) at the intermediate level (second year) or beyond, not including

conversation, in two languages other than English offered by the DLCL.

- At least one additional course, at the 100 level or above, whose subject code ends in -LIT or -GEN in each modern language in '1' above. These courses should be taught by Academic Council members or other senior members of the faculty.

Students are recommended to study, work, or intern abroad for at least eight weeks at a location where one of the languages is spoken.

## FOCAL GROUPS

While the five departments in the Division of Literatures, Cultures, and Languages serve common interests in literary and cultural traditions and their languages, the DLCL's focal groups bring together faculty members and graduate students who share topics and approaches that range across languages and national literatures. These groups are designed to respond directly to the research interests of the faculty as a community, and reflect long-term commitments by the participants. They are conceived as portals that open from the Division outward to the wider community of literary and humanities scholars at Stanford. The membership may include any member of the Stanford faculty or any Ph.D. student with an interest in the topic. Most Focal Groups include participants from several humanities departments outside the DLCL.

Thus the DLCL is characterized by two axes of intellectual inquiry:

- the departmental axis, which is organized by language, nation, and culture
- the focal axis, which may be organized by genre, period, methodology, or other criteria.

The convergence of the two axes, departments and focal groups, locates faculty members and graduate students in at least two intersecting communities. The DLCL believes that this convergence gives institutional form to the intellectual conditions under which many scholars of literature and culture presently work.

Each focal group maintains a standing research workshop at which both faculty and graduate student members discuss their work. Some focal groups offer formal courses; and all groups are responsible for overseeing research-oriented activities and extracurricular events in the relevant area, including sponsoring conferences, publications, podcasts, and other activities that disseminate the outcomes of their research.

## HUMANITIES EDUCATION

*Chairs:* Jenny Bergeron (Institutional Research and Decision Support), Russell A. Berman (Comparative Literature, German Studies)

*Faculty Members:* Elizabeth Bernhardt (German Studies, Language Center), Eamonn Callan (School of Education), Adrian Daub (German Studies), Marisa Galvez (French and Italian), Orrin Robinson (German Studies), Gabriella Safran (Slavic Languages and Literatures), Mitchell Stevens (School of Education), Jennifer Summit (English), Guadalupe Valdés (School of Education)

*Web Site:* <http://dlcl.stanford.edu/groups/humanities-education>

The focal group on Humanities Education explores issues concerning teaching and learning in the humanities, including research on student learning, innovation in pedagogy, the role of new technologies in humanities instruction, and professional issues for humanities teachers at all educational levels.

## PERFORMANCE

*Chairs:* Monika Greenleaf (Comparative Literature, Slavic Languages and Literatures), Peggy Phelan (Drama, English)

*Faculty Members:* Julie Draskoczy (Slavic Languages and Literatures), Jean Ha (History), Branislav Jakovljevic (Drama), Indra Levy (East Asian Languages and Cultures), Marília Librandi Rocha (Iberian and Latin American Cultures),

Gabriella Safran (Slavic Languages and Literatures), Lisa Surwillo (Iberian and Latin American Cultures)

*Web Site:* <http://dlcl.stanford.edu/groups/performance>

The Performance group brings together departments of the DLCL with other disciplines, such as Drama, to achieve a cross-pollination and to reinvigorate performance theory through consciously re-mediated research interests, methodologies, and forms of scholarly expression. Each year of a three-year program focuses on a distinct goal:

- Discussion of seminal texts and topics with key guests, extended through a blog on Arcade.
- A writing colloquium culminating in a conference and guest performances by invited artists at the Bing Concert Hall opening (2012).
- Joint publication.

## PHILOSOPHY AND LITERATURE

*Chairs:* R. Lanier Anderson (Philosophy), Joshua Landy (French and Italian)

*Faculty Members:* Keith Baker (History), Russell Berman (Comparative Literature, German Studies), Alexis Burgess (Philosophy), Martón Dornbach (German Studies), Jean-Pierre Dupuy (French and Italian), Amir Eshel (Comparative Literature, German Studies), Gregory Freidin (Slavic Languages and Literatures), Robert Harrison (French and Italian), David Hills (Philosophy), Héctor Hoyos (Iberian and Latin American Cultures), Michelle Karnes (English), Marília Librandi Rocha (Iberian and Latin American Cultures), Joan Ramon Resina (Iberian and Latin American Cultures, Comparative Literature), Nariman Skakov (Slavic Languages and Literatures), Blakey Vermeule (English), Laura Wittman (French and Italian), Lee Yearley (Religious Studies)

*Web Site:* <http://dlcl.stanford.edu/groups/philosophy-literature>

The focal group on Philosophy and Literature brings together faculty and students from nine departments to investigate questions in aesthetics and literary theory, philosophically-inflected literary texts, and the form of philosophical writings. Fields of interest include both continental and analytic philosophy, as well as cognitive science, political philosophy, rational choice theory, and related fields. The group offers undergraduate tracks within eight majors, a graduate workshop, and a lecture series.

## WORKSHOP IN POETICS

*Chairs:* Roland Greene (Comparative Literature, English), Nicholas Jenkins (English)

*Faculty Members:* Marisa Galvez (French and Italian), Michael Predmore (Iberian and Latin American Cultures)

*Web Site:* <http://dlcl.stanford.edu/groups/workshop-poetics>

The Workshop in Poetics focal group is concerned with the theoretical and practical dimensions of the reading and criticism of poetry. During the four years of its existence, the Workshop has become a central venue at Stanford enabling participants to share their individual projects in a general conversation outside of disciplinary and national confinements. The two dimensions that the workshop sees as urgent are:

- poetics in its specificity as an arena for theory and interpretive practice.
- historical poetics as a particular set of challenges for the reader and scholar.

The core mission is to offer Stanford graduate students a space to develop and critique their current projects.

## RENAISSANCES

*Chairs:* Vincent Barletta (Iberian and Latin American Cultures), Roland Greene (Comparative Literature, English)

*Faculty Members:* Cécile Alduy (French and Italian), Shahzad Bashir (Religious Studies), Paula Findlen (History), Tamar Herzog (History), Bissera Pentcheva (Art and Art History), Morten Steen Hansen (Art and Art History), Jennifer Summit (English)

Web Site: <http://dlcl.stanford.edu/groups/renaissances>

The Renaissance focal group discusses the present and future of early modern studies, drawing different fields of literature into conversation. In addition to sponsoring lectures and seminars focused primarily on methods and modes of research in the field, the group organizes the Renaissance/Early Modern seminar (taught this year in Spring Quarter 2012) and is currently developing a web-based project on the Renaissance.

## MATHEMATICAL AND COMPUTATIONAL SCIENCE

*Co-Directors:* Bradley Efron, Susan Holmes

*Committee in Charge:* Takeshi Amemiya (Economics, emeritus), Emmanuel Candes (Mathematics, Statistics), Gunnar Carlsson (Mathematics), Richard Cottle (Management Science and Engineering, emeritus), Thomas M. Cover (Electrical Engineering, Statistics), Bradley Efron (Statistics), J. Michael Harrison (Graduate School of Business), Susan Holmes (Statistics), Parviz Moin (Engineering), George Papanicolaou (Mathematics), Eric Roberts (Computer Science), David Rogosa (Education), Tim Roughgarden (Computer Science), Amin Saberi (Management Science and Engineering), David Siegmund (Statistics), Jonathan Taylor (Statistics), Arthur F. Veinott, Jr. (Management Science and Engineering, emeritus), Brian White (Mathematics).

*Program Offices:* Sequoia Hall, 390 Serra Mall

*Mail Code:* 94305-4065

*Phone:* (650) 723-2620

*Email:* helnnn@stanford.edu

*Web Site:* <http://stanford.edu/group/mathcompsci>

Courses offered by the Program in Mathematical and Computational Science are listed under the subject code MCS on the *Stanford Bulletin's* ExploreCourses web site.

This interdepartmental interschool undergraduate program provides a major for students interested in the mathematical and computational sciences, or in the use of mathematical ideas and analysis in problems in the social or management sciences. It provides a core of mathematics basic to all the mathematical sciences and an introduction to concepts and techniques of computation, optimal decision making, probabilistic modeling, and statistical inference. It also provides an opportunity for elective work in any of Stanford's mathematical science disciplines.

The program uses the faculty and courses of the departments of Computer Science, Management Science and Engineering, Mathematics, and Statistics. It prepares students for graduate study or employment in the mathematical and computational sciences or in those areas of applied mathematics which center around the use of computers and are concerned with the problems of the social and management sciences.

A biology option is offered for students interested in applications of mathematics, statistics, and computer science to the biological sciences (bioinformatics, computational biology, statistical genetics, neurosciences); and in a similar spirit, an engineering option.

### UNDERGRADUATE MISSION STATEMENT FOR MATHEMATICAL AND COMPUTATIONAL SCIENCE

The mission of the Mathematical and Computational Science Program is to provide students with a core of mathematics basic to all the mathematical sciences and an introduction to concepts and techniques of computation, optimal decision making, probabilistic modeling and statistical inference. The program is interdisciplinary in its focus, and students are required to complete course work in mathematics, computer science, statistics, and management science and engineering. A computational biology track is available for

students interested in biomedical applications. The program prepares students for careers in academic, financial and government settings as well as for study in graduate or professional schools.

### LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to be able to demonstrate:

1. understanding of principles and tools of statistics.
2. command of optimization and its applications and to be able to analyze and interpret problems from various disciplines.
3. an understanding of computer applications emphasizing modern software engineering principles.
4. an understanding of multivariate calculus, linear algebra, and algebraic and geometric proofs.

### BACHELOR OF SCIENCE IN MATHEMATICAL AND COMPUTATIONAL SCIENCE

The requirement for the bachelor's degree, beyond the University's basic requirements, is an approved course program of 72-77 units, distributed as follows:

**Mathematics (MATH):** 28-31 units

	<i>Qtr. and Units</i>
MATH 41. Calculus	A 5
and MATH 42. Calculus	A,W 5
MATH 51. Linear Algebra and Differential Calculus of Several Variables	A,W,S 5
or MATH 51H. Honors Advanced Calculus	A 5
MATH 52. Integral Calculus of Several Variables	A,W,S 5
or MATH 52H. Honors Advanced Calculus	W 5
MATH 53. Ordinary Differential Equations with Linear Algebra	A,W,S 5
or MATH 53H. Honors Advanced Calculus	S 5
MATH 109. Applied Group Theory (WIM)	W 3
or MATH 110. Applied Number Theory and Field Theory (WIM)	S 3
or MATH 120. Modern Algebra (WIM)	A,S 3
or MATH 171. Fundamental Concepts of Analysis (WIM)	A,S 3
MATH 104. Applied Matrix Theory	A,W 3
or MATH 113. Linear Algebra and Matrix Theory	W,S 3

**Computer Science (CS):** 18-24 units

CS 103. Mathematical Foundations of Computing	A,S 5
CS 106X. Programming Methodology and Abstractions (Accel)	A,W 3-5
or CS 106A. Programming Methodology	A,W,S 3-5
and CS 106B. Programming Abstractions	A,W,S 3-5
And two of the following (CS or CME):	
CME 108. Introduction to Scientific Computing	S 3-4
CS 107. Programming Paradigms	A,S 3-5
CS 154. Introduction to Automata and Complexity Theory	W,S 3-4
CS 161. Design and Analysis of Algorithms	A,W 3-4
CS 181. Computers, Ethics and Public Policy (WIM)	A,S 3-4

**Management Science and Engineering (MS&E):** 7-9 units

<b>Both:</b>	
MS&E 211. Linear and Nonlinear Optimization	A 4
and MS&E 221. Stochastic Modeling	W 3
<b>Or 3 of the following:</b>	
MS&E 111. Introduction to Optimization (same as ENGR 62)	A,S 4
MS&E 121. Introduction to Stochastic Modeling	S 3
MS&E 211. Linear and Nonlinear Optimization	A 4
MS&E 212. Mathematical Programming and Combinatorial Optimization	W 3
MS&E 221. Stochastic Modeling	W 3

MS&E 251. Stochastic Decision Models	W	3
<b>Statistics (STATS): (11 units)</b>		
STATS 116. Theory of Probability	A,S	3-5
STATS 191. Introduction to Applied Statistics	W	3-4
or STATS 203. Introduction to Regression Models and Analysis of Variance	W	3
STATS 200. Introduction to Statistical Inference	W	3

**HONORS PROGRAM**

The honors program is designed to encourage a more intensive study of mathematical sciences than the B.S. program. In addition to meeting all requirements for the B.S., the student must:

- Maintain an average letter grade equivalent to at least a 3.5 in all academic work.
- Prepare a statement describing major area of concentration for honors work.
- Complete at least 15 units in mathematical sciences in addition to the requirements for the major listed above. Include in these 15 units at least one of the following:
  - An approved higher-level graduate course
  - Participation in a small group seminar
  - At least 3 units of directed reading
- Describe how each course selected added to the student's knowledge and understanding in area chosen for concentration.
- Students interested in honors should consult with their adviser by last quarter of their junior year to prepare their program of study. Honors work may be concentrated in fields such as biological sciences, environment, physics, etc.

**MATHEMATICAL AND COMPUTATIONAL SCIENCE ELECTIVES (9 UNITS)**

Three courses in mathematical and computational science, 100-level or above, at least 3 units each. At least one must be chosen from the following:

	<i>Qtr. and Units</i>	
ECON 102C. Advanced Topics in Econometrics	S	5
ECON 140. Introduction to Financial Economics	S	5
ECON 160. Game Theory and Economic Applications (prerequisite ECON 51)	S	5
ECON 179. Experimental Economics	W	5
EE 261. The Fourier Transform and its Applications	A,W	3
EE 263. Introduction to Linear Dynamical Systems	A	3
EE 278. An Introduction to Statistical and Signal Processing	A,W,S	3
MS&E 211. Linear and Nonlinear Optimization	A	3-4
MS&E 212. Mathematical Programming and Combinatorial Optimization	W	3
MS&E 221. Stochastic Modeling	W	3
MS&E 251. Stochastic Decision Models	W	3
MCS 100. Mathematics of Sports (same as STATS 50)	A	3
MATH 104. Applied Matrix Theory	A, W	3
MATH 106. Functions of a Complex Variable	W	3
MATH 108. Introduction to Combinatorics and its Applications	S	3
MATH 113. Linear Algebra & Matrix Theory	W,S	3
MATH 115. Functions of a Real Variable	A,S	3
MATH 116. Complex Analysis	S	3
MATH 131. Partial Differential Equations I	A,W	3
MATH 132. Partial Differential Equations II	S	3
MATH 136. Stochastic Processes (same as STATS 219)	A	3
MATH 171. Fundamental Concepts of Analysis	A,S	3
MATH 172. Lebesgue Integration and Fourier Analysis	W	3
PHIL 151. First-Order Logic	W	4
STATS 202. Data Mining and Analysis	A	3
STATS 208. Introduction to the Bootstrap (not given 2011-12)		3
STATS 215. Statistical Models in Biology	W	3
STATS 217. Introduction to Stochastic Processes	W	3

For Computer Science (CS), electives can include courses not taken as units under the CS list above and the following:

CME 302. Numerical Linear Algebra	A	3
CS 108. Object-Oriented Systems Design	A,W	3-4
CS 110. Principles of Computer Systems	A,W	5
CS 140. Operating Systems and Systems Programming	A	3-4
CS 143. Compilers	A	3-4
CS 157. Logic and Automated Reasoning	A	3-4
CS 161. Design and Analysis of Algorithms	A,W	3-4
CS 164. Computing with Physical Objects		3
CS 194. Software Project (prerequisite CS 108)	S	3
CS 221. Artificial Intelligence: Principles and Techniques	W	3-4
CS 223A. Introduction to Robotics	W	3
CS 223B. Introduction to Computer Vision		3
CS 225A. Experimental Robotics	S	3
CS 228. Probabilistic Models in Artificial Intelligence	W,S	3
CS 229. Machine Learning	A	3
CS 243. Advanced Compiling Techniques	W	3-4
EE 282. Computer Systems Architecture	S	3

With the adviser's approval, courses other than those offered by the sponsoring departments may be used to fulfill part of the elective requirement. These may be in fields such as biology, economics, electrical engineering, industrial engineering, and medicine, that might be relevant to a mathematical sciences major, depending on a student's interests.

- At least three quarters before graduation, majors must file with their advisers a plan for completing degree requirements.
- All courses used to fulfill major requirements must be taken for a letter grade with the exception of courses offered satisfactory/no credit only.
- A course used to fulfill the requirements of one section of the program may not be applied toward the fulfillment of the requirements of another section.
- The student must have a grade point average (GPA) of 2.0 or better in all course work used to fulfill the major requirement.

**MATHEMATICAL AND COMPUTATIONAL SCIENCE BIOLOGY OPTION**

	<i>Qtr. and Units</i>	
Replace STATS 191/203 with		
STATS/BIO 141. Biostatistics	A	3-5
Take at least 2 courses from the Biology core:		
BIO 41. Genetics and Biochemistry	A	5
BIO 42. Cell Biology and Animal Physiology	W	5
BIO 43. Plant Biology, Evolution, and Ecology	S	5
Take a third course either from the core or:		
STATS 166. Statistical Methods in Computational Genetics (WIM)	S	3
BIO 102. Population Biology	S	3
BIO 136. Evolutionary Paleobiology		4
BIO 143/243. Evolution		4
BIO 144. Conservation Biology	W	3-4
BIO 160A. Developmental Biology I	A	4
BIO 160B. Developmental Biology II	A	4
BIO 183. Theoretical Population Genetics	S	3
BIO 203. Advanced Genetics	A	4
BIO 230. Molecular and Cellular Immunology	A	4-5
Honors students should take 3 of the following:		
STATS 166. Statistical Methods in Computational Genetics (WIM)	S	3
ANTHRO 178. Introduction to Anthropological Genetics		5
ANTHRO 187. The Genetic Structure of Populations		5
ANTHRO 188. Research in Anthropological Genetics		5
BIO 113. Fundamentals of Molecular Evolution		4
BIO 146. Population Studies	W	1

**MATHEMATICAL AND COMPUTATIONAL SCIENCE ENGINEERING OPTION**

Students in the Engineering option take the introductory courses for the Mathematics and Computational Sciences major with the following allowable substitutions.

**The MATH 51-53 series may be replaced by:**

CME 100/ENGR 154. Vector Calculus for Engineers	A	5
CME 102/ENGR 155A. Ordinary Differential Equations for Engineers	W	5
CME 104/ENGR 155B. Linear Algebra and Partial Differential Equations for Engineers	S	5
MATH 115. Functions of a Real Variable	A,S	3

**STATS 116 may be replaced by either one of the following:**

STATS 110. Statistical Methods in Engineering and Physical Sciences	A	4-5
or CME 106/ENGR 155C. Introduction to Probability and Statistics for Engineers	W	3-4

**STATS 191/STATS 203 may be replaced by:**

STATS 202. Data Analysis	A	3
<i>Electives—</i>		

**Take at least one course from the following list:**

MATH 106. Introduction to Theory of Functions of a Complex Variable	W	3
MATH 108. Introduction to Combinatorics Applications	S	3
MATH 116. Complex Analysis	S	3
MATH 132. Partial Differential Equations II	S	3
PHIL 151. First-Order Logic	W	4

**Take at least two courses from the following list:**

ENGR 15. Dynamics	A,S	3
ENGR 20. Introduction to Chemical Engineering	S	3
ENGR 25. Biotechnology	W,S	3
ENGR 30. Engineering Thermodynamics	A,W	3
ENGR 40. Introductory Electronics	A, S	5
ENGR 50. Introductory Science Materials	A,W, S	4
ENGR 105. Feedback Control Design	W	3

**MINOR IN MATHEMATICAL AND COMPUTATIONAL SCIENCE**

The minor in Mathematical and Computational Science is intended to provide an experience of the four constituent areas: Computer Science, Mathematics, Management Science and Engineering, and Statistics. Five basic courses are required:

CS 106X. Programming Methodology and Abstractions (Accelerated)

or CS 106A,B. Programming Methodology

MATH 51. Linear Algebra and Differential Calculus of Several Variables

or MATH 104. Applied Matrix Theory

MS&E 211. Linear and Nonlinear Optimization

or MS&E 221. Stochastic Modeling

STATS 116. Theory of Probability, and either

STATS 191. Introduction to Applied Statistics

or STATS 200. Introduction to Statistical Inference

In addition to the above, the minor requires three courses from the following, two of which must be in different departments:

CME 108. Introduction to Scientific Computing

CS 103. Mathematical Foundations of Computing

CS 107. Programming Paradigms

CS 154. Introduction to Automata and Complexity Theory

CS 161. Design and Analysis of Algorithms

EE 261. The Fourier Transform and its Applications

ECON 102C. Advanced Topics in Econometrics

ECON 160. Game Theory and Economic Applications (prerequisite ECON 51)

ECON 181. Optimization and Economic Analysis

MS&E 211. Linear and Nonlinear Optimization

MS&E 212. Mathematical Programming and Combinatorial Optimization

MS&E 221. Stochastic Modeling

MS&E 251. Stochastic Decision Models

MATH 104. Applied Matrix Theory

MATH 106. Functions of a Complex Variable

MATH 108. Introduction to Combinatorics and its Applications

*Qtr. and Units*

MATH 109. Applied Group Theory		
MATH 110. Applied Number Theory and Field Theory		
MATH 115. Functions of a Real Variable		
MATH 131. Partial Differential Equations I		
MATH 132. Partial Differential Equations II		
MATH 171. Fundamental Concepts of Analysis		
PHIL 151. First-Order Logic		
STATS 191. Introduction to Applied Statistics		
STATS 200. Introduction to Statistical Inference		
STATS 202. Data Analysis		
STATS 203. Introduction to Regression Models and Analysis of Variance		
STATS 217. Introduction to Stochastic Processes		

Other upper-division courses appropriate to the program major may be substituted with consent of the program director. Undergraduate majors in the constituent programs may not count courses in their own departments.

**MATHEMATICS**

*Emeriti:* Solomon Feferman, Robert Finn, Yitzhak Katznelson, Joseph Keller, Georg Kreisel, Harold Levine, Tai-Ping Liu, R. James Milgram, Donald Ornstein, Robert Osserman

*Chair:* Steven Kerckhoff

*Professors:* Simon Brendle, Gregory Brumfiel, Daniel Bump, Emmanuel Candes, Gunnar Carlsson, Ralph L. Cohen, Brian Conrad, Amir Dembo, Persi Diaconis, Yakov Eliashberg, Eleny Ionel, Steven Kerckhoff, Jun Li, Rafe Mazzeo, Maryam Mirzakhani, George Papanicolaou, Lenya Ryzhik, Richard Schoen, Leon Simon, Kannan Sundararajan, Ravi Vakil, Andras Vasy, Akshay Venkatesh, Brian White

*Associate Professor:* Soren Galatius

*Szegö Assistant Professors:* Ricardo Andrade, Isabelle Camilier, Jose Cantarero Lopez, Thomas Church, Jian Ding, Pierre Garapon, Martin Luu, Peter McNamara, Ronan Mukamel, Yi Wang

*Lecturers:* Eric Bahuaud, Mark Lucianovic, Jeremy Van Horn-Morris, Wojciech Wieczorek

*Courtesy Professors:* Renata Kallosh, Grigori Mints

*Consulting Professors:* Brian Conrey, David Hoffman

*Simons Fellows:* Richard Bamler, Alexander Subotic

*Web site:* <http://math.stanford.edu>

Courses offered by the Department of Mathematics are listed under the subject code MATH on the *Stanford Bulletin's* ExploreCourses web site.

The Department of Mathematics offers programs leading to the degrees of Bachelor of Science, Master of Science, and Doctor of Philosophy in Mathematics, and participates in the program leading to the B.S. in Mathematical and Computational Science. The department also participates in the M.S. and Ph.D. degree programs in Scientific Computing and Computational Mathematics and the M.S. degree program in Financial Mathematics.

**MISSION OF THE UNDERGRADUATE PROGRAM IN MATHEMATICS**

The mission of the undergraduate program in Mathematics is to provide students with a broad understanding of mathematics encompassing logical reasoning, generalization, abstraction, and formal proof. Courses in the program teach students to create, analyze, and interpret mathematical models and to communicate sound arguments based on mathematical reasoning and careful data analysis. The mathematics degree prepares students for careers in the corporate sector and government agencies, and for graduate programs in mathematics.

**LEARNING OUTCOMES**

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These

learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. the ability to comprehend mathematical arguments.
2. problem solving skills.
3. the ability to formulate proofs and to structure mathematical arguments.
4. the ability to communicate mathematical ideas.

### ADVANCED PLACEMENT IN MATHEMATICS FOR FRESHMEN

Students of unusual ability in mathematics often take one or more semesters of college-equivalent courses in mathematics while they are still in high school. Under certain circumstances, it is possible for such students to secure both advanced placement and credit toward the bachelor's degree. A decision as to placement and credit is made by the department after consideration of the student's performance on the Advanced Placement Examination in Mathematics (forms AB or BC) of the College Entrance Examination Board, and also after consideration of transfer credit in mathematics from other colleges and universities.

The department does not give its own advanced placement examination. Students can receive either 5 or 10 units of advanced placement credit, depending on their scores on the CEEB Advanced Placement Examination. Entering students who have credit for two quarters of single variable calculus (10 units) are encouraged to enroll in MATH 51-53 in multivariable mathematics, or the honors version 51H-53H. These three-course sequences, which can be completed during the freshman year, supply the necessary mathematics background for most majors in science and engineering. They also serve as excellent background for the major or minor in Mathematics, or in Mathematical and Computational Science. Students who have credit for one quarter of single variable calculus (5 units) should take MATH 42 in Autumn Quarter and 51 in Winter Quarter. Options available in Spring Quarter include MATH 52, or 53. For proper placement, contact the Department of Mathematics.

### BACHELOR OF SCIENCE IN MATHEMATICAL AND COMPUTATIONAL SCIENCE

The Department of Mathematics participates with the departments of Computer Science, Management Science and Engineering, and Statistics in a program leading to a B.S. in Mathematical and Computational Science. See the "Mathematical and Computational Science" section of this bulletin.

### INTRODUCTORY AND UNDERGRADUATE COURSES

The department offers two sequences of introductory courses in single variable calculus.

1. MATH 41, 42 present single variable calculus. Differential calculus is covered in the first quarter, integral calculus in the second.
2. MATH 19, 20, 21 cover the material in 41, 42 in three quarters instead of two.

There are options for studying multivariable mathematics:

1. MATH 51, 52, 53 cover differential and integral calculus in several variables, linear algebra, and ordinary differential equations. These topics are taught in an integrated fashion and emphasize application. MATH 51 covers differential calculus in several variables and introduces matrix theory and linear algebra; 52 covers integral calculus in several variables and vector analysis; 53 studies further topics in linear algebra and applies them to the study of ordinary differential equations. This sequence is strongly recommended for incoming freshmen with 10 units of advanced placement credit.
2. MATH 51H, 52H, 53H cover the same material as 51, 52, 53, but with more emphasis on theory and rigor.

The department offers three classes on linear algebra: 51 (or 51H), 104, and 113.

## GRADUATE PROGRAMS IN MATHEMATICS

### TEACHING CREDENTIALS

For information concerning the requirements for teaching credentials, see the "School of Education" section of this bulletin or address inquiries to Credential Secretary, School of Education.

### BACHELOR OF SCIENCE IN MATHEMATICS

The following department requirements are in addition to the University's basic requirements for the bachelor's degree:

Students wishing to major in Mathematics must satisfy the following requirements:

1. Department of Mathematics courses (other than MATH 100) totaling at least 49 units credit; such courses must be taken for a letter grade. For the purposes of this requirement, STATS 116, PHIL 151, and PHIL 152 count as Department of Mathematics courses.
2. Additional courses taken from Department of Mathematics courses numbered 101 and above or from approved courses in other disciplines with significant mathematical content, totaling at least 15 units credit. At least 9 of these units must be taken for a letter grade.
3. A Department of Mathematics adviser must be selected, and the courses selected under items '1' and '2' above must be approved by the department's director of undergraduate study, acting under guidelines laid down by the department's Committee for Undergraduate Affairs. The Department of Mathematics adviser can be any member of the department's faculty.
4. To receive the department's recommendation for graduation, a student must have been enrolled as a major in the Department of Mathematics for a minimum of two full quarters, including the quarter immediately before graduation. Students are encouraged to declare as early as possible, preferably by the end of the sophomore year.

Students are normally expected to complete either the sequence 19, 20, 21 or the sequence 41, 42 (but not both). Students with an Advanced Placement score of at least 4 in BC math or 5 in AB math may receive 10 units credit and fulfill requirement '1' by taking at least 39 units of Department of Mathematics courses numbered 51 and above. Students with an Advanced Placement score of at least 3 in BC math or at least 4 in AB math may receive 5 units credit and fulfill requirement '1' by taking at least 44 units of Department of Mathematics courses numbered 42 and above.

Sophomore seminar courses may be counted among the choice of courses under item '1'. Other variations of the course requirements laid down above (under items '1' and '2') may, in some circumstances, be allowed. For example, students transferring from other universities may be allowed credit for some courses completed before their arrival at Stanford. However, at least 24 units of the 49 units under item '1' above and 9 of the units under item '2' above must be taken at Stanford. In all cases, approval for variations in the degree requirements must be obtained from the department's Committee for Undergraduate Affairs. Application for such approval should be made through the department's director of undergraduate studies. The policy of the Mathematics Department is that no courses other than the MATH 50 series and below may be double-counted toward any other University major or minor.

It is to be emphasized that the above regulations are minimum requirements for the major; students contemplating graduate work in mathematics are strongly encouraged to include the courses 116, 120, 121, 147 or 148, and 171 in their selection of courses, and in addition, take at least three Department of Mathematics courses over and above the minimum requirements laid out under items '1' and '2' above, including at least one 200-level course. Such

students are also encouraged to consider the possibility of taking the honors program, discussed below.

To help develop a sense of the type of course selection (under items '1' and '2' above) that would be recommended for math majors with various backgrounds and interests, see the following examples. These represent only a few of a very large number of possible combinations of courses that could be taken in fulfillment of the Mathematics major requirements:

*Example 1*—A general program (a balanced program of both pure and applied components, without any particular emphasis on any one field of mathematics or applications) as follows:

- A. either MATH 19, 20, and 21, or 41 and 42 (or satisfactory Advanced Placement credit); 51, 52, 53; 104 or 113; 106; 109; 110; 115;
- B. plus any selection of at least eight of the following courses, including three Department of Mathematics courses: MATH 108, 131, 132, 143, 146, 147, 148, 152, 161; CS 137; ECON 50; PHYSICS 41, 43, 45; STATS 116. These courses from other departments are only meant as examples; there are many suitable courses in several departments that can be taken to fulfill part or all of requirement '2.'

*Example 2*—A theoretical program recommended for those contemplating possible later graduate work providing an introduction to the main areas of mathematics both broader and deeper than the general program outlined above:

- A. either MATH 19, 20 and 21, or 41 and 42 (or satisfactory Advanced Placement credit)
- B. either the sequence 51, 52, 53, or the sequence 51H, 52H, 53H; 106 or 116; 113; 120; 171
- C. plus nine or more 3-unit math courses numbered 121 or higher (the logic courses PHIL 151 and PHIL 152 are considered to be such courses), including at least one algebra course, one analysis course, and one geometry/topology course. (See the description of the honors program below.)

In addition, those contemplating eventual graduate work in Mathematics should consider including at least one graduate-level math course such as MATH 205A, 210A, or 215A or B. Such students should also consider the possibility of entering the honors program.

*Example 3\**—An applied mathematics program:

- A. either MATH 19, 20, and 21; or 41 and 42 (or satisfactory Advanced Placement credit); 51, 52, 53; 104; 106; 108; 109; 110; 115; 131; 132; STATS 116
- B. plus at least 15 units of additional courses in Applied Mathematics, including, for example, suitable courses from the departments of Physics, Computer Science, Economics, Engineering, and Statistics.

\* Students with interests in applied mathematics, but desiring a broader-based program than the type of program suggested in Example 3, including significant computational and/or financial and/or statistical components, are encouraged to also consider the Mathematics and Computational Science program.

## HONORS PROGRAM

The honors program is intended for students who have strong theoretical interests and abilities in mathematics. The goal of the program is to give students a thorough introduction to the main branches of mathematics, especially analysis, algebra, and geometry. Through the honors thesis, students may be introduced to a current or recent research topic, although occasionally more classical projects are encouraged. The program provides an excellent background with which to enter a master's or Ph.D. program in Mathematics. Students completing the program are awarded a B.S. in Mathematics with Honors.

It is recommended that the sequence 51H, 52H, 53H be taken in the freshman year. To graduate with a B.S. in Mathematics with Honors, the following conditions apply in addition to the usual requirements for math majors:

1. The selection of courses under items '1' and '2' above must contain MATH 106 or 116, MATH 120, and MATH 171 and must also include seven additional 3-unit Math courses

numbered 121 or higher. (The logic courses PHIL 151 and 152 can also be used.) These seven courses must include at least one algebra course (121, 122, 152, 154, or 155), one analysis course (131P, 132, 136, 151, 172, 173, or 175), and one geometry/topology course (143, 145, 146, 147, or 148).

2. Students in the honors program must write a senior thesis. In order to facilitate this, the student must, by the end of the junior year, choose an undergraduate thesis adviser from the Department of Mathematics faculty, and map out a concentrated reading program under the direction and guidance of the adviser. During the senior year, the student must enroll in MATH 197 for a total of 6 units (typically spread over two quarters), and work toward completion of the thesis under the direction and guidance of the thesis adviser. The thesis may contain original material, or be a synthesis of work in current or recent research literature. The 6 units of credit for MATH 197 are required in addition to the course requirements laid out under items '1' and '2' above and in addition to all other requirements for math majors.

In addition to the minimum requirements laid out above, it is strongly recommended that students take at least one graduate-level course (that is, at least one course in the 200 plus range). MATH 205A, 210A, and 215A or B are especially recommended in this context.

Students with questions about the honors program should see the director of undergraduate advising.

## MINOR IN MATHEMATICS

To qualify for the minor in Mathematics, a student should complete, for a letter grade, at least six Department of Mathematics courses (other than MATH 100) numbered 51 or higher, totaling a minimum of 24 units. For the purposes of this requirement, STATS 116, PHIL 151, and PHIL 152 count as Department of Mathematics courses. No other courses from outside the Department of Mathematics may be used towards the minor in Mathematics. It is recommended that these courses include either the sequence 51, 52, 53 or the sequence 51H, 52H, 53H. At least 12 of the units applied toward the minor in Mathematics must be taken at Stanford. The policy of the Mathematics Department is that no courses other than the MATH 50 series and below may be double-counted toward any other University major or minor.

## MASTER OF SCIENCE IN MATHEMATICS

The University's basic requirements for the master's degree are discussed in the "Graduate Degrees" section of this bulletin. Students should pay particular attention to the University's course requirements for graduate degrees. The following are specific departmental requirements:

Candidates must complete an approved course program of 45 units of courses beyond the department requirements for the B.S. degree, of which at least 36 units must be Mathematics Department courses, taken for a letter grade. The Mathematics courses must include at least 18 units numbered 200 or above. The candidate must have a grade point average (GPA) of 3.0 (B) over all course work taken in Mathematics, and a GPA of 3.0 (B) in the 200-level courses considered separately. Course work for the M.S. degree must be approved during the first quarter of enrollment in the program by the department's Director of Graduate Studies.

For the M.S. degree in Financial Mathematics, see the "Financial Mathematics" section of this bulletin.

## DOCTOR OF PHILOSOPHY IN MATHEMATICS

The University's basic requirements for the doctorate (residence, dissertation, examinations, etc.) are discussed in the "Graduate Degrees" section of this bulletin. The following are specific departmental requirements.

To be admitted to candidacy, the student must have successfully completed 27 units of graduate courses (that is, courses numbered 200 and above). In addition, the student must pass qualifying examinations given by the department.

Beyond the requirements for candidacy, the student must complete a course of study approved by the Graduate Affairs Committee of the Department of Mathematics and submit an acceptable dissertation. In accordance with University requirements, Ph.D. students must complete a total of 135 course units beyond the bachelor's degree. These courses should be Department of Mathematics courses or approved courses from other departments. The course program should display substantial breadth in mathematics outside the student's field of application. The student must receive a grade point average (GPA) of 3.0 (B) or better in courses used to satisfy the Ph.D. requirement. In addition, the student must pass the Department area examination and the University oral examination.

Experience in teaching is emphasized in the Ph.D. program. Each student is required to complete nine quarters of such experience. The nature of the teaching assignment for each of those quarters is determined by the department in consultation with the student. Typical assignments include teaching or assisting in teaching an undergraduate course or lecturing in an advanced seminar.

For further information concerning degree programs, fellowships, and assistantships, inquire of the academic associate of the department.

## PH.D. MINOR IN MATHEMATICS

The student should complete both of the following:\*

1. MATH 106 *or* 116, 131, 132
2. MATH 113, 114, 120 *or* 152

These courses may have been completed during undergraduate study, and their equivalents from other universities are acceptable.

In addition, the student should complete 21 units of 200-level courses in Mathematics. These must be taken at Stanford and approved by the Department of Mathematics Ph.D. minor adviser.

\* A third coherent sequence designed by the student, subject to the approval of the graduate committee, may be considered as a substitute for items '1' or '2'.

## MEDIEVAL STUDIES

*Affiliated Faculty:* Cecile Alduy (French and Italian), Vincent Barletta (Iberian and Latin American Cultures), Shahzad Bashir (Religious Studies), Carl Bielefeldt (Religious Studies), George H. Brown (English), Steven Carter (Asian Languages), Paula Findlen (History), Charlotte Fonrobert (Religious Studies), Hester Gelber (Religious Studies), Avner Greif (Economics), Hans Ulrich Gumbrecht (French and Italian), Robert Harrison (French and Italian), Michelle Karnes (English), Nancy S.Kollmann (History), Mark E. Lewis (History), William Mahrt (Music), Patricia Parker (Comparative Literature), Bissera Pentcheva (Art and Art History), Orrin W. Robinson (German Studies), Jesse Rodin (Music), Behnam Sadeki (Religious Studies), Carolyn Springer (French and Italian), Jennifer Summit (English)

The Program in Medieval Studies draws together a wide range of disciplines: art and architecture; literature and languages; music; philosophy; religious studies; and economic, social, and political history. Faculty interests bridge Western, Islamic, and Asian cultures, and encompass both traditional and innovative materials and methods.

Undergraduates interested in completing a major in the field of medieval studies may apply to the Individually Designed Majors Program in the School of Humanities and Sciences. For information about this option, contact the Office of Graduate and Undergraduate Studies in the School of Humanities and Sciences.

The minor in Medieval Studies is not available at this time.

## MODERN THOUGHT AND LITERATURE

*Director:* Paula M. L. Moya

*Steering Committee:* Paula M.L. Moya (Chair), Joshua Cohen, Shelley Fisher Fishkin, Zephyr Frank, Sean Hanretta, Pavle Levi, Andrea A. Lunsford, Barbaro Martinez-Ruiz, Jisha Menon, José David Saldívar, Alex Woloch

*Affiliated Faculty:* Lanier Anderson (Philosophy), Eamonn Callan (Education), Russell Berman (German Studies), Joshua Cohen (Political Science, Philosophy, Law), Jean-Pierre Dupuy (French and Italian), Paulla Ebron (Anthropology), Harry Elam (Drama), Michele Elam (English), Shelley Fisher Fishkin (English), James Ferguson (Anthropology), Zephyr Frank (History), Gregory Freidin (Slavic Languages and Literatures), Hans U. Gumbrecht (French and Italian, Comparative Literature), Sean Hanretta (History), Ursula K. Heise (English), Matthew Kohrman (Anthropology), Aishwary Kumar (History), Pam Lee (Art and Art History), Pavle Levi (Art and Art History), Helen Longino (Philosophy), Andrea A. Lunsford (English), Saikat Majumdar (English), Liisa Malkki (Anthropology), Barbaro Martinez-Ruiz (Art and Art History), Dourlas McAdam (Sociology), Robert McGinn (Management Science and Engineering; Science, Technology, and Society), Jisha Menon (Drama), Franco Moretti (English, Comparative Literature), Paula Moya (English), Elisabeth Mudimbe-Boyi (French and Italian), Josiah Ober (Political Science), David Palumbo-Liu (Comparative Literature), Peggy Phelan (Drama), Richard Roberts (History), José David Saldívar (Comparative Literature), Ramón Saldívar (English, Comparative Literature), Priya Satia (History), Debra Satz (Philosophy), Londa Schiebinger (History), Stephen Sohn (English), Helen Stacy (Law), Elizabeth Tallent (English), Fred Turner (Communication), Richard White (History), Bryan Wolf (Art and Art History), Alex Woloch (English), Yvonne Yarbro-Bejarano (Iberian and Latin American Cultures)

*Program Offices:* Building 460, Room 219

*Mail Code:* 94305-2022

*Phone:* (650) 723-3413

*Email:* monica.moore@stanford.edu

*Web Site:* <http://www.stanford.edu/dept/MTL>

Courses offered by the Program in Modern Thought and Literature are listed under the subject code MTL on the *Stanford Bulletin's* ExploreCourses web site.

The program in Modern Thought and Literature admits students for the Ph.D. and a limited number for a coterminal B.A./M.A. Program.

## UNDERGRADUATE PROGRAMS IN MODERN THOUGHT AND LITERATURE

Although Modern Thought and Literature has no formal undergraduate degree granting program, undergraduates interested in completing a major in this field may apply to the Individually Designed Majors Program in the School of Humanities and Sciences. Students interested in this option should consult the Director of the Program in Modern Thought and Literature and the Dean's Office in the School of Humanities and Sciences, which administers the IDM Programs.

## GRADUATE PROGRAMS IN MODERN THOUGHT AND LITERATURE

Modern Thought and Literature (MTL) is an interdisciplinary graduate program advancing the study of critical issues in the modern world. Since 1971, MTL students have helped to redefine the cutting edge of many interdisciplinary fields and to reshape the ways in which disciplinary scholarship is understood and practiced. MTL graduates are leaders in fields such as American

studies, ethnic studies, film studies, social and cultural studies, and women's studies, as well as disciplines such as English, cultural anthropology, and comparative literature.

The program trains students to understand the histories and methods of disciplines and to test their assumptions. It considers how disciplines shape knowledge and, most importantly, how interdisciplinary methods reshape objects of study. MTL students produce innovative analyses of diverse texts, forms, and practices, including those of literature, history, philosophy, anthropology, law, and science; film, visual arts, popular culture, and performance; and material culture and technology.

Each student constructs a unique program of study suited to his or her research. Students have focused on such areas as gender and sexuality; race and ethnicity; science, technology, and medicine; media and performance; legal studies; and critical and social theory. The program's faculty is drawn from fields in the humanities and social sciences, as well as from education, law, and medicine. As interdisciplinary study is impossible without an understanding of the disciplines under consideration, each student is expected to master the methods of one discipline and to gain a foundation in a second field.

## MASTER OF ARTS

The Master of Arts is available to students who are admitted to the doctoral program. Students are not admitted into the program for the purpose of earning a terminal Master of Arts degree. Candidates for the Ph.D. who satisfy the committee of their progress and satisfactorily complete 45 units of course work forming a coherent program of study, may apply for an M.A. in Modern Thought and Literature.

## COTERMINAL BACHELOR'S AND MASTER'S PROGRAM IN MODERN THOUGHT AND LITERATURE

Each year, one or two undergraduates who are exceptionally well prepared in literature and at least one foreign language and whose undergraduate course work includes a strong interdisciplinary component, may petition to be admitted to the program for the purpose of completing a coterminal M.A. degree. Admission to this program is granted only on condition that in the course of working on their master's degrees they do not apply to enter the Ph.D. program in Modern Thought and Literature. The deadline for application is early February.

To apply, applicants submit:

1. An unofficial grade transcript from Axess.
2. A Petition for Admission to the Coterminal Program from the Registrar's Office.
3. A statement giving the reasons the student wishes to pursue this program and its place in his or her future plans. This statement should pay particular attention to the reasons why the student could not pursue the studies he or she desires in some other way.
4. An initial plan of study listing, quarter by quarter, each course by name, units, and instructor, to be taken in order to fulfill the requirements for the degree for a total of 45 units, including at least 20 units of advanced work in one literature, and at least 20 units in a coherent interdisciplinary program of courses taken in non-literature departments. (Changes in the course list are to be expected.)
5. A writing sample of critical or analytical prose, 20 pages maximum.
6. Two letters of recommendation from members of the faculty who know the applicant well and who can speak directly to the question of his or her ability to do graduate-level work.
7. A designated adviser from among the Stanford faculty; normally one letter of recommendation will be from this faculty member.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and

University application forms, see <http://studentaffairs.stanford.edu/registrar/publications#Coterm>.

## REQUIREMENTS

The candidate for the M.A. must complete at least 45 units of graduate work, to be divided in the following manner:

1. The introductory seminar, MTL 334A, Concepts of Modernity 1, 5 units; students may substitute 334B, Concepts of Modernity 2, with the director's permission.
2. At least 20 units of advanced course work in literature, to be approved by the director.
3. At least 20 units of course work in a coherent and individually arranged interdisciplinary program, to be approved by the director.

By the end of the course of study, each candidate must also demonstrate a reading knowledge of at least one foreign language.

## DOCTOR OF PHILOSOPHY IN MODERN THOUGHT AND LITERATURE

University requirements for the Ph.D. are discussed in the "Graduate Degrees" section of this bulletin.

A candidate for the Ph.D. degree in Modern Thought and Literature must complete three years (nine quarters) of full-time work, or the equivalent, in graduate study beyond the B.A. degree. He or she is expected to complete at least 18 courses of graduate work in addition to the dissertation. Students may spend one year of graduate study abroad.

Requirements for the Ph.D. in Modern Thought and Literature are:

1. MTL 334A,B. Concepts of Modernity 1 and 2 (5 units each).
2. MTL 299. Edgework: New Directions in the Study of Culture (2 units, Spring Quarter), required of all first-year students.
3. A coherent program of eight courses of advanced work in literary studies to be worked out with the adviser, of which at least six must be regularly scheduled courses in literature. Courses in the teaching of composition (ENGLISH 396, 397), ad hoc graduate seminars (MTL 395), research courses (MTL 398), and thesis registration (MTL 802) may not be counted among these six courses; MTL 396L, 397, 399, 802 may not be counted toward these requirements under any circumstances.
4. Eight courses of advanced work in non-literature departments, the core of which is completion of either a departmental minor or an interdepartmental concentration, typically consisting of six courses. Departmental minors are available from the departments of Anthropology, Art and Art History, Communication, History, Philosophy, Political Science, Religious Studies, and Sociology (see the relevant information in those sections of this bulletin). Approved interdepartmental concentrations have been established in popular culture, ethnic studies, feminist and gender studies, and science and technology studies (specific course requirements are available from the program office). Individually designed concentrations may be approved by petition to the director. In addition to the required six courses in a minor or a concentration, two additional courses from non-literature departments are chosen in consultation with the student's academic adviser. Course restrictions noted above in item 2 also apply.
5. *Qualifying Paper*: This certifies that students are likely to be able to undertake the quality of research, sustained argumentation, and cogent writing demanded in a doctoral dissertation. The qualifying paper must be a substantial revision of a seminar paper written at Stanford during the first year and should embody a substantial amount of independent research, develop an intellectual argument with significant elements of original thinking, and demonstrate the ability to do interdisciplinary work. Each paper is evaluated by two or three readers (designated before the end of the first year of graduate study), one of whom must be a member of the Committee in Charge. Qualifying papers must be submitted to the program

office no later than the end of the third week of the fifth quarter of enrollment, normally, Winter Quarter of the second year.

6. *Teaching*, an essential part of the program, is normally undertaken in conjunction with the Department of English. Candidates are required to demonstrate competence in teaching.
7. Students must demonstrate, by the end of the third quarter of the first year, a reading knowledge of one foreign language and, by the beginning of the first quarter of the third year, a reading knowledge of one other foreign language. Reading knowledge means the ability to make a genuine scholarly use of the language: that is, to read prose of ordinary difficulty. Students may not take the University oral examination before completion of the foreign language requirement.
8. *Candidacy*: At the end of the second year, students apply for candidacy. The following qualifications are required before candidacy can be certified: the earlier submission of a satisfactory qualifying paper; demonstration of a reading knowledge of one foreign language; satisfactory progress in course work; a list of courses applicable to the degree, distinguishing between courses appropriate to the literary component and courses appropriate to the non-literary component; designation of a departmental minor or an interdisciplinary concentration; and the submission of a statement outlining the scope and coherence of the interdisciplinary component of the program in relation to the literary component, and noting the relevance of the course work to that program.
9. *Annual Review*: The program and progress of each student must be approved by the Committee in Charge at the end of each academic year.
10. *University Oral Examination*: This examination, covering the student's areas of concentration, is normally taken in the third year of graduate study. It is a two-hour oral examination administered by four faculty members specializing in the student's areas of concentration, and a chair from another department. The exam is based on a substantial reading list prepared by the student in conjunction with the faculty committee and designed to cover the areas of expertise pertinent to the student's dissertation project.
11. *Dissertation Proposal and Colloquium*: Within one quarter after the University oral examination, the student writes up the dissertation proposal: 15-20 pages with a general description of the project and a chapter breakdown plus a bibliography. The proposal is submitted to the program director and the dissertation committee for approval. After completion of the first chapter of the dissertation, the student sets up a meeting with the dissertation committee for one hour to discuss the work accomplished in the first chapter and plans for completing the rest of the dissertation.
12. *Dissertation*: The fourth and fifth years are devoted to the dissertation, which should be a substantial and original contribution acceptable to the Committee in Charge of Modern Thought and Literature. The subject is drawn from the literature of specialization and the area of nonliterary studies. The dissertation project will conclude with a two-hour defense. The first hour is open to the public and includes a brief presentation of the dissertation project on the part of the Ph.D. candidate. The second hour is reserved to the candidate and his/her Dissertation Committee.

## PH.D. IN MODERN THOUGHT AND LITERATURE AND HUMANITIES

The department participated in the Graduate Program in Humanities leading to a Ph.D. degree in Modern Thought and Literature and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities; no new students are being accepted. The University remains committed to a broad-based graduate education in the humanities; the courses, colloquium, and symposium continue to

be offered, and the Division of Literatures, Cultures, and Languages provides advising for students already enrolled who may contact Denise Winters at 650-724-1333 for further information. Courses are listed under the subject code HUMNTIES and may be viewed on the *Stanford Bulletin's* ExploreCourses web site.

## MUSIC

*Emeriti (Professors)* John M. Chowning, Albert Cohen, George Houle, William H. Ramsey, Leonard G. Ratner, Leland C. Smith; *(Professors, Performance)* Arthur P. Barnes, Marie Gibson

*Chair*: Stephen M. Sano

*Professors*: Jonathan Berger, Karol Berger (on leave), Chris Chafe, Brian Ferneyhough, Thomas Grey, Stephen Hinton, Julius O. Smith (on leave Autumn)

*Associate Professors*: Mark Applebaum, Heather Hadlock, William P. Mahrt

*Assistant Professors*: Jaroslaw Kapuscinski, Jesse Rodin (on leave), Anna Schultz, Ge Wang

*Professors (Teaching)*: George Barth (Piano), Stephen M. Sano (Director of Choral Studies)

*Associate Professor (Performance)*: Jindong Cai (Director of Orchestral Studies)

*Courtesy Professor*: Paul DeMarinis

*Senior Lecturers*: Giancarlo Aquilanti (Director of Theory; Wind Ensemble), Talya Berger (Theory), Stephen Harrison (Violoncello), Thomas Schultz (Piano), Gregory A. Wait (Voice; Director of Vocal Studies), Frederick R. Weldy (Piano)

*Lecturers*: Kumaran Arul (Piano), Fredrick Berry (Jazz Ensemble), Mark Brandenburg (Clarinet), Marie-Louise Catsalis (Voice), Marjorie Chauvel (Harp), Jonathan Clark (Mariachi), Tony Clements (Tuba), Laura Dahl (Resident Collaborative Pianist), Anthony Doheny (Violin), John Dornenburg (Viola da Gamba), Charles A. Ferguson (Guitar), Debra Fong (Violin), Claire Giovannetti (Voice), Dawn Harms (Violin, Viola), Alexandra Hawley (Flute), David Henderson (Classical Saxophone), Wendy Hillhouse (Voice), Robert Hubbard (Oboe), Joyce Johnson-Hamilton (Trumpet), Wendy Ju (HCI theory), Jay Kadis (Audio Recording), McDowell Kenley (Trombone), Mary Linduska (Voice, Summer only), Murray Low (Jazz Piano), Janet Maestre (Flute), Anthony Martin (Baroque Violin), James Matheson (Oboe), Seward McCain (Jazz Bass), Charles McCarthy (Jazz Saxophone), Robert Huw Morgan (University Organist, Organ), Bruce Moyer (Contrabass), Herbert Myers (Early Winds), James Nadel (Jazz), Rufus Olivier (Bassoon), Larry S. Ragent (French Horn), Joseph Sargent (Musicology, Autumn only), Melody Schaeffle (Flute), Amy Schneider (Voice, on leave), Robin Sharp (Violin), Livia Sohn (Violin), Elaine Thornburgh (Harpsichord), Erik Ulman (Composition, Theory), Linda Uyechi (Taiko), Rick Vandivier (Jazz Guitar), Mark Veregge (Percussion), Sharon Wei (Viola), John Worley (Jazz Trumpet), Hui (Daisy) You (Guzheng), Timothy Zerlang (University Carillonneur, Piano)

*Consulting Professors*: Jonathan Abel (CCRMA), David Berners (CCRMA), Marina Bosi-Goldberg (CCRMA), Walter Hewlett (Computer-Assisted Research in the Humanities), Eleanor Selfridge-Field (Computer-Assisted Research in the Humanities), Malcolm Slaney (CCRMA)

*Visiting Professor*: Thomas Rossing (CCRMA)

*Acting Assistant Professor*: Charles Kronengold

*Artists-in-Residence (St. Lawrence String Quartet)*: Geoff Nuttall (Violin), Scott St. John (Violin), Lesley Robertson (Viola), Christopher Costanza (Violoncello)

*Department Offices*: Braun Music Center, Room 101

*Mail Code*: 94305-3076

*Phone*: (650) 723-3811

*Email*: musicdept@stanford.edu

Web Site: <http://music.stanford.edu>

Courses offered by the Department of Music are listed under the subject code MUSIC on the *Stanford Bulletin's* ExploreCourses web site.

## MISSION OF THE DEPARTMENT OF MUSIC

The Department of Music's aims are to provide specialized training for those who plan careers in music as composers, performers, teachers, and research scholars, and to promote the understanding and enjoyment of music in the University at large through its courses and performance offerings.

### LEARNING OUTCOMES

Students majoring in music pursue foundational theoretical and historical coursework before moving on to this in-depth, writing intensive musical analysis course. This course provides the requisite skills needed to continue in advanced work for the major. Students must demonstrate an understanding of tonal music and facility in discussing it.

1. the ability to select and outline an appropriate topic area and select appropriate methodologies for tonal music analysis.
2. an appropriate mastery of the principles underpinning tonal music analysis, referencing appropriate authors and analytical tools and methodologies.
3. appropriate mastery of the use of primary source materials in written and oral presentations.
4. appropriate mastery of the use of secondary source materials in written and oral presentations.
5. the analytical writing skills necessary for the execution of the course papers.
6. the skills necessary to present a musical analysis to an audience in a coherent manner.

## BACHELOR OF ARTS IN MUSIC

The undergraduate major in Music is built around a series of foundation courses in theory, musicianship, and music history, in addition to performance and the proficiency requirements outlined below. Majors must complete a minimum of 66 units within the department. All required courses for the B.A. in any concentration must be taken for a letter grade. Electives may be taken credit/no credit, but any courses taken towards concentration requirements must carry a letter grade.

### SUGGESTED PREPARATION FOR THE MAJOR

Because of the sequence of courses, it takes more than two years to complete the requirements for the major. Students are required to meet with the undergraduate student services officer in the department prior to declaring the major. It is recommended that prospective majors schedule this consultation with the undergraduate student services officer as early as possible in their careers in order to plan a program that allows sufficient time for major course work, practice, and University requirements outside the major. Early planning is especially important for students wishing to double-major, for those contemplating overseas study during their undergraduate years, for those wishing to do an in-depth concentration in the Music major, and for those with particular musical talents and interests. It is recommended that music majors complete MUSIC 21, 22, and 23 in the freshman year; the series should be completed by Autumn Quarter of the junior year. It is recommended that music majors complete MUSIC 40, 41, and 42 in the sophomore year; the series should be completed by the end of the junior year.

*Suggested Preparatory Course*—MUSIC 19. Introduction to Music Theory.

### FIELDS OF STUDY OR DEGREE OPTIONS

Concentrations are offered in: performance; conducting; composition; history and theory; or music, science, and technology. Each concentration is declarable in Axxss as a

subplan; guidelines and further information are available from the Department of Music office. In order to complete requirements in a timely manner, students are urged to select this option no later than the middle of the junior year for single-area concentrators and the middle of the sophomore year for multiple-area concentrators. Students pursuing multiple concentrations must fulfill all the requirements of each.

### DEGREE REQUIREMENTS

In conjunction with the undergraduate student services officer, the student is assigned a departmental adviser with whom the student is required to meet at least once each quarter. Total units and courses required to graduate for each concentration are specified in the relevant section following.

*Required Courses*—The following courses are required of all majors.

1. *Theory*—  
MUSIC 21. Elements of Music I (4 units)  
MUSIC 22. Elements of Music II (4 units)  
MUSIC 23. Elements of Music III (4 units)
2. *History*—  
MUSIC 40. Music History to 1600 (4 units)  
MUSIC 41. Music History 1600-1830 (4 units)  
MUSIC 42. Music History Since 1830 (4 units)
3. *Analysis*—  
MUSIC 121. Analysis of Tonal Music (4 units)  
and two at the 4-unit level, from:  
MUSIC 122A. Renaissance and Baroque Counterpoint  
MUSIC 122B. Harmonic Materials of the 19th Century  
MUSIC 122C. Introduction to 20th-Century Composition
4. *Writing in the Major (WIM)*—Three (at least two at the 4-unit level) from:  
MUSIC 140. Studies in Medieval Music  
MUSIC 141. Studies in Renaissance Music  
MUSIC 142. Studies in Baroque Music  
MUSIC 143. Studies in Classical Music  
MUSIC 144. Studies in Romantic Music  
MUSIC 145. Studies in Modern Music  
MUSIC 146. Music and Urban Film  
MUSIC 147. The Soul Tradition in African American Music  
MUSIC 147A. Music Ethnography of the Bay Area  
MUSIC 148. Musical Shakespeare: Theater, Song, Opera, and Film  
MUSIC 149. Reactions to the Record: Early Recordings, Lost Styles, and Music's Future  
MUSIC 251. Psychophysics and Music Cognition
5. *Applied*—
  - a. A minimum of five quarters totaling 15 units of private instruction in instrumental and/or vocal performance (MUSIC 172/272-177/277); students who do not qualify for private instruction at the intermediate or advanced level, but who wish to pursue the major may take introductory voice (MUSIC 65 and 73), piano (MUSIC 12 and 72A), or guitar (MUSIC 74C) to reach the minimum proficiency levels required to be accepted into a private studio and then complete their 5 quarters. Requirements for the minimum levels of proficiency in each instrument for private instruction are posted at: <http://music.stanford.edu/Academics/Auditions.html>.
  - b. A minimum of five quarters totaling at least 5 units of work in one or more of the department's organizations or chamber groups. To fulfill the ensemble requirement, Music majors need at least three quarters of participation in the department's traditional large ensembles (MUSIC 159-167), with the exception of students whose primary instrument is harp, keyboard, or guitar, who need to participate at least one quarter in the ensembles above, but who may fulfill the rest of the requirement with chamber music (MUSIC 171). MUSIC 181 and MUSIC 156 may count for up to two of the ensemble-unit requirements for the Music major.

*Note*—MUSIC 128, Composition, Coding, and Performance with SLOrk; MUSIC 157, Mariachi Band; MUSIC 158, Soundwire Ensemble; MUSIC 160A, Stanford Philharmonia Orchestra; MUSIC 160B, Stanford New Ensemble; MUSIC 161C, Red Vest Band; and MUSIC 161D, Stanford Brass Ensemble, do not satisfy this requirement.

6. *Additional requirements*—
  - a. Majors are required to pass a Piano Proficiency examination as part of the music theory core (MUSIC 21, 22, 23). The examination is given in the first two weeks of MUSIC 21. Students who do not pass the Piano Proficiency examination are required to enroll in MUSIC 12 concurrently with the music theory core until they are able to pass the examination. The examination consists of scales and arpeggios, performance of a simple tune to be set by the examiner, sight-reading, and the performance of prepared pieces. Information regarding the proficiency examination may be downloaded at <http://music.stanford.edu/private/downloads/PIANO%20PROFICIENCY%20EXAM.doc>
  - b. Majors must also pass an ear-training proficiency examination, which is one of the requirements to complete MUSIC 23. It may be taken by arrangement and demonstrates a student's ability to hear music accurately and to perform it at sight.

*Electives*—

1. *Concentration in Performance*—In addition to degree requirements required of majors listed above, students in the Performance concentration must:
    - a. Complete at least 6 additional, graded course units in one area of performance. Acceptable courses are described under "Applied" in the section describing private instruction and ensemble course work above. Additional courses might include, but are not limited to:
      - MUSIC 126. Introduction to Thoroughbass
      - MUSIC 154. Composition and Performance of Instrumental Music with Electronics
      - MUSIC 182. Diction for Singers
      - MUSIC 183. Art Song Interpretation
      - MUSIC 269. Research in Performance Practices
    - a. Register for an independent project (MUSIC 198, 4 units) in the senior year under faculty supervision, leading to a senior recital.
  2. *Concentration in Conducting*—In addition to degree requirements required of majors listed above, students in the Conducting concentration must:
    - a. Complete at least 6 additional, graded course units in conducting. Additional courses might include, but are not limited to:
      - MUSIC 127. Instrumentation and Orchestration
      - MUSIC 130. Elementary Conducting
      - MUSIC 230. Advanced Orchestral Conducting
      - MUSIC 231. Advanced Choral Conducting
    - a. Register for an independent project (MUSIC 198, 4 units) in the senior year under faculty supervision, leading to a senior conducting project.
  3. *Concentration in Composition*—In addition to degree requirements required of majors listed above, students in the Composition concentration must:
    - a. Complete at least 6 additional, graded course units in composition. Additional courses might include, but are not limited to:
      - MUSIC 123. Undergraduate Seminar in Composition
      - MUSIC 125. Individual Undergraduate Projects in Composition
      - MUSIC 127. Instrumentation and Orchestration
      - MUSIC 150. Musical Acoustics
      - MUSIC 154. Composition and Performance of Instrumental Music with Electronics
- MUSIC 220A, B, or C—any of the series in computer-generated sound, music, and composition
- a. Register for an independent project (MUSIC 198, 4 units) in the senior year under faculty supervision, leading to a composition.
4. *Concentration in History and Theory*—In addition to degree requirements required of majors listed above, students in the History and Theory concentration must:
    - a. Complete at least 6 additional, graded course units in history and theory. Additional courses might include, but are not limited to:
      - MUSIC 122A, B, or C—any course not taken in fulfillment of the major requirement
      - MUSIC 140-149/240-249, 251—any courses not taken in fulfillment of the major requirement
      - MUSIC 221. Topics in the History of Theory
    - MUSIC 220A, B, or C—any of the series in computer-generated sound, music, and composition
    - a. Register for an independent project (MUSIC 198, 4 units) in the senior year under faculty supervision, leading to a senior research paper.
  5. *Concentration in Music, Science, and Technology*—Requires completion of 66 units of course work that differs from that of the major and is delineated below. This field of study is designed for those students interested in the musical ramifications of rapidly evolving computer technology and digital audio, and in the acoustic and psychoacoustic foundations of music. This program can serve as a complementary major to students in the sciences and engineering. Students in the program are required to include the following courses in their studies:
    - a. *Theory and Analysis*—
      - MUSIC 21. Elements of Music I (4 units)
      - MUSIC 22. Elements of Music II (4 units)
      - MUSIC 23. Elements of Music III (4 units; includes passing the piano and ear-training proficiency examinations, as described for the major)
      - MUSIC 121. Analysis of Tonal Music (4 units)
      - MUSIC 150. Musical Acoustics (3 units)
      - MUSIC 251. Psychophysics and Music Cognition (WIM) (4 units)
      - MUSIC 220A. Fundamentals of Computer-Generated Sound (4 units)
      - MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing (4 units)
      - MUSIC 220C. Research Seminar in Computer-Generated Music (4 units)
      - MUSIC 220D. Research in Computer-Generated Music (4 units)
      - MUSIC 250A. Human-Computer Interface Theory and Practice (4 units)
    - a. *Applied*—
      - Individual studies in performance, MUSIC 171/272-177/277, (6 units), or MUSIC 192A, Foundations of Sound Recording Technology and MUSIC 192B, Advanced Sound-Recording Technology (3 units each).
      - Ensemble as described above for the major (5 units) or MUSIC 192C. Session Recording (5 units).
    - b. *History*—Two at the 4-unit level from:
      - MUSIC 40. Music History to 1600
      - MUSIC 41. Music History 1600–1830
      - MUSIC 42. Music History Since 1830
    - a. The program requires a senior research project (4 units) completed under faculty guidance. May be completed in conjunction with enrollment in any of the following: MUSIC 220D; MUSIC 199; MUSIC 198.

### HONORS PROGRAM

Honors in Music are awarded by the faculty to Majors who have produced an independent project of exceptional quality through the Concentration program. Students who wish to pursue

Honors must declare their Concentration(s) by May 31 of the Junior year (see the Undergraduate Student Services Officer for concentration-specific requirements). To receive Honors students must also have earned an overall GPA of 3.60 or higher and a GPA of 3.70 or higher in courses required for the Music Major. Honors are conferred solely through faculty adjudication. For students concentrating in multiple areas, a single jury will be convened.

### OVERSEAS STUDY OR STUDY ABROAD

Courses in Music are often available at Stanford overseas programs, especially in Berlin, Paris, Florence, and Oxford. See the "Overseas Studies Program" section of this bulletin for this year's listings. Music majors and minors should talk to the Department of Music undergraduate administrator prior to going overseas.

### MINOR IN MUSIC

Minors in Music in the concentration areas of performance, conducting, composition and history and theory, as well as in the concentration in music, science, and technology provide the student with a core of essential Music courses in the disciplines that establish both a foundation for informed appreciation of music and a basis for more advanced study, should the student wish to pursue it.

*Requirements*—Total of 36 units required course work as delineated below. Students in either minor must also pass the piano and ear-training proficiency examinations required of Music majors.

*Required Courses for the Minor in Music with concentrations in performance, conducting, composition, and history and theory—*

1. *Theory*—
  - MUSIC 21. Elements of Music I (4 units)
  - MUSIC 22. Elements of Music II (4 units)
  - MUSIC 23. Elements of Music III (4 units)
2. *History*—
  - MUSIC 40. Music History to 1600 (4 units)
  - MUSIC 41. Music History 1600–1830 (4 units)
  - MUSIC 42. Music History Since 1830 (4 units)
3. *Applied (two quarters)*—
  - MUSIC 159-171. Ensemble (2 units, total)
  - MUSIC 172-177. Individual Instruction (6 units, total)
4. *Choice of one (WIM)*—
  - MUSIC 140-149, 190H, 251 (4 units)

*Required Courses for the Minor in Music with a concentration in music, science, and technology—*

1. *Theory*—
  - MUSIC 21. Elements of Music I (4 units)
  - MUSIC 22. Elements of Music II (4 units)
  - MUSIC 23. Elements of Music III (4 units)
  - MUSIC 150. Musical Acoustics (3 units)
  - MUSIC 251. Psychophysics and Music Cognition (WIM) (4 units)
  - MUSIC 220A. Fundamentals of Computer-Generated Sound (4 units)
  - MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing (4 units)
2. *Applied*—
  - MUSIC 192A. Foundations of Sound-Recording Technology (3 units)
  - MUSIC 192B. Advanced Sound-Recording Technology (3 units)
  - MUSIC 192C. Session Recording (two quarters; 3 units total)

### MASTER OF ARTS IN MUSIC

University requirements for the M.A. are described in the "Graduate Degrees" section of this bulletin.

None of Stanford's required undergraduate courses may be credited toward an advanced degree unless specifically required

for both degrees. Only work that receives a grade of 'A,' 'B,' or 'Satisfactory' (a passing grade in an instructor-mandated credit/no credit course) in Music courses numbered 100 or higher taken as a graduate student is recognized as fulfilling the advanced-degree requirements. Students may need to devote more than the minimum time in residence if preparation for graduate study is inadequate.

### ADMISSION

Applicants are required to submit evidence of accomplishment (scores, recordings, and/or research papers) when they complete the application form. Applicants should arrange to take the Graduate Record Examination (GRE) well in advance of the December 14 application deadline. All components of the application are due by December 14. International students whose first language is not English are also required to take the TOEFL exam (with certain exceptions: see <http://studentaffairs.stanford.edu/gradadmissions>).

### FIELDS OF STUDY OR DEGREE OPTIONS

All of the above fields of study are declarable as subplans in Axxess:

- Master of Arts degree (M.A.)—in Composition.
- Master of Arts degree (M.A.)—in Music History.
- Master of Arts degree (M.A.)—in Computer-Based Music Theory and Acoustics.
- Master of Arts degree (M.A.)—in Music, Science, and Technology (M.A./M.S.T.) Note: The MA/MST program is the only terminal master's degree; it is two years in duration.

### DEGREE REQUIREMENTS

A minimum of 45 academic units is required for the master's degree in Music. The Department of Music does not accept students for study only towards the M.A. degree except in the Music, Science, and Technology program, described below.

*Required Courses—*

I. *Composition*—Students are not admitted into the M.A. as a terminal degree for composition: rather, students in the D.M.A. program in composition who enter directly from the bachelor's level may, upon completing 45 graduate-level units and advancing to candidacy by passing the qualifying examination, be recommended for the M.A. degree in composition.

II. *Music History*—Students are not admitted into the M.A. as a terminal degree for music history: rather, students in the Ph.D. program in musicology who enter directly from the bachelor's level may, upon completing 45 graduate-level units and advancing to candidacy by passing the qualifying examination, be recommended for the M.A. degree in music history.

III. *Computer-Based Music Theory and Acoustics*—Students are not admitted into the M.A. as a terminal degree for computer-based music theory and acoustics: rather, students in the Ph.D. program in computer-based music theory and acoustics who enter directly from the bachelor's level may, upon completing 45 graduate-level units and advancing to candidacy by passing the qualifying examination, be recommended for the M.A. degree in computer-based music theory and acoustics.

IV. *Music, Science, and Technology (M.S.T.)*—The M.A. in music, science, and technology is the department's only terminal master's degree. This is a two-year program of 45 graduate-level units focusing on the integration of music perception, music-related signal processing and controllers, synthesis, performance and composition. The program is designed for students who have an undergraduate music, engineering or science degree. Required course work is listed below. A complete program with an individually-tailored list of electives will be formed in consultation with the student's adviser.

1. Required:
  - MUSIC 155. Intermedia Workshop (4 units)
  - MUSIC 201. CCRMA Colloquium (1 unit)

- MUSIC 220A. Fundamentals of Computer-Generated Sound (4 units)
  - MUSIC 251. Psychophysics and Music Cognition (4 units)
  - MUSIC 256A. Music Software Design (4 units)
  - MUSIC 320. Introduction to Digital Audio Signal Processing (4 units)
2. Electives: students are required to complete an additional 24 units of graduate level work determined in consultation with the student's adviser and will include CCRMA electives, and may include courses taken outside the department.

## DOCTOR OF MUSICAL ARTS (D.M.A.) AND DOCTOR OF PHILOSOPHY (PH.D.) IN MUSIC

University requirements for the D.M.A and Ph.D. are described in the "Graduate Degrees" section of this bulletin. The following statements apply to all the graduate degrees described below, unless otherwise indicated.

**Department Examinations**—All entering doctoral graduate students are required to take: (1) a diagnostic examination testing the student in theory (counterpoint, harmony, and analysis) and (for musicologists only) the history of Western art music; and, (2) a proficiency examination in sight-singing and piano sight-reading. These exams are given at the beginning of study in the department (usually the week before school begins). Teaching Assistant assignments and the funding associated with this portion of a graduate student's financial aid package are determined based upon successful completion of these exams.

None of Stanford's required undergraduate courses may be credited toward an advanced degree unless specifically required for both degrees. Only work that receives a grade of 'A,' 'B,' or 'Satisfactory' (a passing grade in an instructor-mandated credit/no credit course) in music courses numbered 100 or higher taken as a graduate student is recognized as fulfilling the advanced-degree requirements. Students may need to devote more than the minimum time in residence if preparation for graduate study is inadequate.

The following may be taken as electives for graduate credit:

- a. any course in another department numbered 100 or over (with adviser's consent)
- b. any course in the Music department numbered 100 or over except those required for the B.A. degree. A letter grade of 'A,' 'B,' or 'S' (in an instructor-mandated pass/fail course) is required.
- c. Music department group instruction: MUSIC 72–77.

### ADMISSION

Applicants are required to submit evidence of accomplishment (scores, recordings, and/or research papers, according to the proposed field of concentration) when they complete the application form. Applicants should arrange to take the Graduate Record Examination (GRE) well in advance of the December 14 application deadline. All components of the application are due by December 14. International students whose first language is not English are also required to take the TOEFL exam (with certain exceptions: see <http://studentaffairs.stanford.edu/gradadmissions>).

### FIELDS OF STUDY OR DEGREE OPTIONS

All of the following fields of study are declarable as subplans in Axxes:

**Doctor of Musical Arts degree (D.M.A.) in Composition**—The D.M.A. is offered to a limited number of students who demonstrate substantial training in the field and high promise of attainment as composers. Students may work in traditional and/or electronic forms. Breadth is given through studies in other branches of music and in relevant fields outside music, as desirable. The final project for this degree is a large-scale composition.

**Doctor of Philosophy degree (Ph.D.) in Musicology**

**Doctor of Philosophy degree (Ph.D.) in Computer-Based Music Theory and Acoustics**—The Ph.D. is offered in areas of the

research of Stanford's graduate faculty: Musicology, including specialties in musical aesthetics, history of music theory, and performance practice; and Computer-Based Music Theory and Acoustics (CBMTA), specializing in research in musical acoustics at the Center for Computer Research in Music and Acoustics (CCRMA). The department seeks students who demonstrate substantial scholarship, high promise of attainment, and the ability to do independent investigation and present the results of such research in a dissertation.

### DEGREE REQUIREMENTS

**Residence**—The candidate must complete a minimum of 135 academic units (see Residency under the "Graduate Degrees" section of this bulletin). Doctoral candidates working on Ph.D. dissertations or Doctor of Musical Arts (D.M.A.) final projects that require consultation with faculty members continue enrollment in the University under Terminal Graduate Registration (TGR), after they have reached the required 135 academic units and have completed their Special Area examinations.

**Qualifying Examination**—A written and oral examination for admission to candidacy is given just prior to the fourth quarter of residence for D.M.A. students and Ph.D. students in the Computer-Based Music Theory and Acoustics programs; for Ph.D. students in Musicology, the exams are given just prior to the eighth quarter of residence. This exam tests knowledge of history, theory, repertory, and analysis.

**Teaching**—All students in the Ph.D. or D.M.A. degree programs, regardless of sources of financial support, are required to complete six quarters of supervised teaching at half time. Music 280 (given in Spring Quarter and taken at the end of the first year) is a required course for Teaching Assistants. Additional quarters of teaching may be required by the department.

**Required Courses**—

MUSIC 200. Graduate Proseminar (4 units)—required of all composition and computer-based music theory and acoustics students entering directly from the bachelor's degree and of all students in musicology, regardless of entering degree level.

MUSIC 280. TA Training (1 unit)

MUSIC 301A. Analysis of Music: Modal (4 units)

MUSIC 301B. Analysis of Music: Tonal (4 units)

MUSIC 301C. Analysis of Music: Post-Tonal (4 units)

**I. Composition**—The Doctor of Musical Arts (D.M.A.) degree in Composition is given breadth through collateral studies in other branches of music and in relevant studies outside music as seems desirable. In addition to degree requirements required of all doctoral graduate students and listed above, students must complete at least 24 units of:

1. MUSIC 323. Doctoral Seminar in Composition
2. Besides those requirements listed above, candidates are expected to produce a number of works demonstrating their ability to compose in a variety of forms and for the common media: vocal, instrumental, and electronic music. If possible, the works submitted are presented in public performance prepared by the composer. Annual progress is reviewed by the composition faculty with a major portfolio review conducted at the conclusion of the second year.
3. **Foreign Language Requirement**—At the time of advancement to candidacy, all D.M.A. students are required to have demonstrated a reading knowledge of one language other than English and the ability to translate it into idiomatic English.
4. **Special-Area Examination**—A written examination in the candidate's field of concentration, including a final project proposal, is required to be completed during the fourth year of study, no later than the last day of classes in Autumn Quarter of that year.
5. **Final Project Presentation**—Required during the last quarter of residence, the purpose of the presentation is to demonstrate the ability of the candidate to organize and present the topic of the final project for public review. It should be two hours in length, treating aspects of the final project. Details regarding the D.M.A. final project presentation may be found in the

*Department of Music Graduate Handbook* available at: <http://music.stanford.edu/Academics/gradStudies.html>

6. *Final Project*—Candidate's work culminates in a required Final Project. The final project in composition must be a substantial composition, the scope of which shall be agreed upon by the members of the committee. Typically, work on the final project encompasses several quarters. Usually, smaller works, for specific performances, are composed at the same time.
7. *Reading Committee*—The membership of the reading committee is the principal final project adviser and a minimum of two additional members. The notice of appointment of a D.M.A. Final Project Reading Committee should be submitted to the department at the same time as the approved final project proposal and the completion of the special area exam. It is the responsibility of the student, with the advice of his or her adviser, to approach appropriate faculty members and obtain their consent to serve on the reading committee. Obtain the D.M.A. reading committee form from the department office; fill it out; obtain committee members' signatures; return to the department office.

II. *Musicology*—In addition to degree requirements required of all doctoral graduate students and listed above, students must complete at least 43 units of approved courses including:

1. *Required:*
  - MUSIC 221. Topics in the History of Theory (3–5 units)
  - MUSIC 300A. Medieval Notation (4 units)
  - MUSIC 300B. Renaissance Notation (4 units)
  - MUSIC 310. Research Seminar in Musicology (24–40 units); the requirement is for eight seminars of 3–5 units each. Students may petition to take up to two graduate seminars in other departments, in consultation with their adviser.
  - MUSIC 312A. Aesthetics and Criticism of Music, Ancients and Moderns: Plato to Nietzsche (4 units)
  - MUSIC 312B. Aesthetics and Criticism of Music, Contemporaries: Heidegger to Today (4 units)
  - MUSIC 330. Musicology Dissertation Colloquium (1–4 units); the requirement is for enrollment each spring beginning in year four and continuing to graduation.
2. *Foreign Language Requirement*—At the time of advancement to candidacy, all Ph.D. students in Musicology must have passed a Ph.D. Language examination in German and in a second language, chosen from French, Italian, or Latin (or, on a case-by-case basis, another language, if it has significant bearing on the candidate's field of study). If one of these languages is the student's native language, the student may be exempted from an examination.
3. *Special-Area Examination*—A written and oral examination testing the student's knowledge of music and research in the student's field of concentration is completed during the fourth year of study, no later than the last day of classes in Autumn Quarter of that year. This includes an oral defense of the dissertation proposal. The examining committee comprises prospective readers of the dissertation.
4. *University Oral Examination*—Taken once the dissertation is substantially under way; an oral presentation is a defense of dissertation research methods and results.
5. *Dissertation*—After the first two years of graduate study, the student concentrates on research and writing of the dissertation. The dissertation demonstrates the student's ability to work systematically and independently to produce an essay of competent scholarship.
6. *Reading Committee*—The minimum membership of the reading committee is 1) the principal dissertation adviser, 2) a second member from the department, and 3) a third member from the major department or another department. If a third member is from another institution, a fourth member must be appointed from the department. The principal dissertation adviser and all other members of the committee must belong to the Academic Council. The notice of appointment of a Reading Committee should be submitted to the department at

the same time as the approved dissertation proposal and the completion of the Special-Area Exam. It is the responsibility of the student, with the advice of his or her adviser, to approach appropriate faculty members and obtain their consent to serve on the reading committee.

III. *Computer-Based Music Theory and Acoustics*—In addition to degree requirements required of all doctoral graduate students and listed above, students must complete at least 28 units of approved courses including:

1. *Required:*
  - MUSIC 220A. Fundamentals of Computer-Generated Sound (4 units)
  - MUSIC 220B. Compositional Algorithms, Psychoacoustics, and Spatial Processing (4 units)
  - MUSIC 220C. Research Seminar in Computer-Generated Music (4 units)
  - MUSIC 220D. Research in Computer-Generated Music (12 units total)
  - MUSIC 320. Introduction to Digital Audio Signal Processing (4 units)
2. *Foreign Language Requirement*—At the time of advancement to candidacy, all Ph.D. students in computer-based music theory and acoustics are required to have demonstrated a reading knowledge of one language other than English and the ability to translate it into idiomatic English.
3. *Special-Area Examination*—A written and oral examination testing the student's knowledge of music and research in the student's field of concentration is completed during the fourth year of study, no later than the last day of classes in Autumn Quarter of that year. This includes an oral defense of the dissertation proposal. The examining committee comprises prospective readers of the dissertation.
4. *University Oral Examination*—Taken once the dissertation is substantially under way; an oral presentation is a defense of dissertation research methods and results.
5. *Dissertation*—After the first two years of graduate study, the student concentrates on research and writing of the dissertation. The dissertation demonstrates the student's ability to work systematically and independently to produce an essay of competent scholarship.
6. *Reading Committee*—The minimum membership of the reading committee is 1) the principal dissertation adviser, 2) a second member from the department, and 3) a third member from the major department or another department. If a third member is from another institution, a fourth member must be appointed from the department. The principal dissertation adviser and all other members of the committee must belong to the Academic Council. The notice of appointment of a Reading Committee should be submitted to the department at the same time as the approved dissertation proposal and the completion of the Special-Area Exam. It is the responsibility of the student, with the advice of his or her adviser, to approach appropriate faculty members and obtain their consent to serve on the reading committee.

IV. *Ph.D. in Music and Humanities*—The department participated in the Graduate Program in Humanities leading to a Ph.D. degree in Music and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities; no new students are being accepted. The University remains committed to a broad-based graduate education in the humanities; the courses, colloquium, and symposium continue to be offered, and the Division of Literatures, Cultures, and Languages provides advising for students already enrolled who may contact DLCL Student Affairs at 650-724-1333 or [dcl@stanford.edu](mailto:dcl@stanford.edu) for further information. Courses are listed under the subject code HUMNTIES and may be viewed on the *Stanford Bulletin's* ExploreCourses web site.

# PHILOSOPHY

*Emeriti (Professors):* Fred Dretske, Solomon Feferman, Dagfinn Føllesdal, Georg Kreisel, John Perry, David S. Nivison, Patrick Suppes, James O. Urmson, Allen Wood, Rega Wood; (*Courtesy Professor*) Denis Phillips

*Chair:* Helen Longino

*Director of Graduate Study:* Michael Bratman

*Director of Undergraduate Study:* Chris Bobonich

*Professors:* Chris Bobonich, Michael Bratman, Alan Code, Joshua Cohen, John Etchemendy, Michael Friedman, Helen Longino, Grigori Mints, Debra Satz, Brian Skyrms (Spring), Kenneth Taylor, Johan van Benthem (Spring), Thomas Wasow

*Associate Professors:* Lanier Anderson, Mark Crimmins, Graciela De Pierris, David Hills (Teaching), Nadeem Hussain, Krista Lawlor, Tamar Schapiro (on leave)

*Assistant Professors:* Alexis Burgess (on leave), Anna-Sara Malmgren

*Courtesy Professors:* Reviel Netz, Josiah Ober, Rob Reich

*Lecturers:* Enrique Casanovas, Jorah Dannenberg, Shane Duarte, James Genone, Jennifer Lockhart, John Mumma, Thomas Ryckman, Richard Sommer, Donovan Wishon

*Department Offices:* Building 90

*Mail Code:* 94305-2155

*Department Phone:* (650) 723-2547

*Email:* philosophy@stanford.edu

*Web Site:* <http://philosophy.stanford.edu>

Courses offered by the Department of Philosophy are listed under the subject code PHIL on the *Stanford Bulletin's* ExploreCourses web site.

Philosophy concerns itself with fundamental problems. Some are abstract and deal with the nature of truth, justice, value, and knowledge; others are more concrete, and their study may help guide conduct or enhance understanding of other subjects. Philosophy also examines the efforts of past thinkers to understand the world and people's experience of it.

Although it may appear to be an assortment of different disciplines, there are features common to all philosophical inquiry. These include an emphasis on methods of reasoning and the way in which judgments are formed, on criticizing and organizing beliefs, and on the nature and role of fundamental concepts.

Students of almost any discipline can find something in philosophy which is relevant to their own specialties. In the sciences, it provides a framework within which the foundations and scope of a scientific theory can be studied, and it may even suggest directions for future development. Since philosophical ideas have had an important influence on human endeavors of all kinds, including artistic, political, and economic, students of the humanities should find their understanding deepened by acquaintance with philosophy.

## MISSION OF THE UNDERGRADUATE PROGRAM IN PHILOSOPHY

The mission of the undergraduate program in Philosophy is to train students to think clearly and critically about the deepest and broadest questions concerning being, knowledge, and value and their connections to the full range of human activities and interests. The Philosophy major presents students with paradigms and perspectives of past thinkers and introduces students to a variety of methods of reasoning and the ways in which judgments are formed. Courses in the major equip students with core skills involved in critical reading, analytical thinking, sound argumentation, and the clear and well-organized expression of ideas. Philosophy is an excellent major for those planning a career in law, medicine, or business. It provides analytical skills and a breadth of perspective helpful to those called upon to make decisions about their own conduct and the welfare of others. Philosophy majors who have carefully planned their undergraduate

program have an excellent record of admission to professional and graduate schools.

## LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. the ability to communicate philosophical ideas effectively orally and in writing.
2. close reading, argument evaluation, and analytical writing.
3. dialectical ability to identify strengths and weaknesses of an argument and devise appropriate and telling responses.
4. the ability to think critically and demonstrate clarity of conceptualization.
5. the ability to differentiate good from unpromising philosophical questions.
6. the ability to sustain an argument of substantial scope, showing control over logical, argumentative, and evidential relations among its parts.

## SPECIAL AND JOINT MAJORS

The Special Program in the History and Philosophy of Science enables students to combine interests in science, history, and philosophy. Students interested in this program should see the special adviser.

The joint major in Philosophy and Religious Studies combines courses from both departments into a coherent theoretical pattern.

## GRADUATE PROGRAM IN PHILOSOPHY

The Department of Philosophy offers an M.A. and a Ph.D. degree. The University's basic requirements for the M.A. and Ph.D. degrees are discussed in the "Graduate Degrees" section of this bulletin.

## LIBRARY AND ASSOCIATIONS

The Tanner Memorial Library of Philosophy contains an excellent working library and ideal conditions for study. Graduate students and undergraduate majors in philosophy have formed associations for discussion of philosophical issues and the reading of papers by students, faculty, and visitors.

## BACHELOR OF ARTS IN PHILOSOPHY

There are three ways of majoring in Philosophy:

- The General Program
- The Special Program in the History and Philosophy of Science
- The Special Option in Philosophical and Literary Thought.

A student completing any of these receives a B.A. degree in Philosophy. There is also a major program offered jointly with the Department of Religious Studies. To declare a major, a student should consult with the Director of Undergraduate Study and see the undergraduate student services administrator to be assigned an adviser and work out a coherent plan. The department recommends proficiency in at least one foreign language.

## GENERAL PROGRAM

1. Course requirements, minimum 55 units:
  - a. preparation for the major: an introductory course (under 100) and 80. (PHIL 80 should normally be taken no later than the first quarter after declaring the major.) Students taking both quarters of the Winter/Spring Philosophy Introduction to the Humanities (IHUM) track can count 5 units toward the introductory Philosophy requirement.
  - b. the core: 24 additional Philosophy units as follows:
    1. logic: one from 50, 150, 151, 152, 153, 154, 155, 157
    1. philosophy of science: any course from 60, 61, 160, 162-168
    2. moral and political philosophy: one from 170-174

3. metaphysics and epistemology: one from 1, 80, 180-189
4. history of philosophy: 100 and 102 are required of each major
  - c. one undergraduate philosophy seminar from the 194 series.
  - d. electives: courses numbered 10 or above, at least 13 units of which must be in courses numbered above 99.
2. Units for Tutorial, Directed Reading (PHIL 196, 197, 198), *The Dualist* (PHIL 198), Honors Seminar (PHIL 199), or affiliated courses may not be counted in the 55-unit requirement. No more than 10 units completed with grades of 'satisfactory' and/or 'credit' may be counted in the 55-unit requirement.
3. A maximum of 10 transfer units or two courses can be used for the departmental major. In general, transfer courses cannot be used to satisfy the five area requirements or the undergraduate seminar requirement. Students may not substitute transfer units for the PHIL 80 requirement.

### SPECIAL PROGRAM IN HISTORY AND PHILOSOPHY OF SCIENCE

Undergraduates may major in Philosophy with a field of study in History and Philosophy of Science. This field of study is declared on Axess. Each participating student is assigned an adviser who approves the course of study. A total of 61 units are required for the sub-major, to be taken according to requirements 1 through 5 below. Substitutions for the listed courses are allowed only by written consent of the undergraduate adviser for History and Philosophy of Science. Students are encouraged to consider doing honors work with an emphasis on the history and philosophy of science. Interested students should see the description of the honors thesis in Philosophy and consult their advisers for further information.

1. Three science courses (for example, biology, chemistry, physics) for 12 units.
2. The following Philosophy (PHIL) core courses must be completed with a letter grade by the end of the junior year:
  - a. one from 50, 150, 151, 154
  - b. 60 or 61
  - c. 80
3. Three history of science courses.
4. Three philosophy of science courses, of which one must be PHIL 164.
5. Three additional courses related to the major, in philosophy or history, to be agreed on by the adviser.
6. At least six courses in the major must be completed at Stanford with a letter grade. Units for Tutorial, Directed Reading, or *The Dualist* (196, 197, 198) may not be counted in the 61-unit requirement. No more than 10 units completed with grades of 'satisfactory' and/or 'credit' may be counted in the 61-unit requirement.
7. Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring a major. Transfer courses are strictly limited when used to satisfy major requirements.

### SPECIAL OPTION IN PHILOSOPHICAL AND LITERARY THOUGHT

Undergraduates may major in Philosophy with a special option in philosophy and literature. This option is declared to the department; it is not declared on Axess, and it does not appear on the transcript or the diploma. Students in this option take courses alongside students from other major departments which also have a specialized option associated with the program for the study of philosophical and literary thought, with administrative staff in the DLCL. Each student in this option is assigned an adviser in Philosophy, and students' schedules and overall course of study must be approved in writing by the adviser, and the Directors of Undergraduate Studies of Philosophy and of the program.

A total of 65 units must be completed for this option, including the following requirements.

1. Core requirements for the major in Philosophy, including:
  - a. an introductory course
  - b. PHIL 80
  - c. the core distribution requirements listed in section 1b of the general program above.
2. Gateway course in philosophy and literature (PHIL 81). This course should be taken as early as possible in the student's career, normally in the sophomore year.
3. Three courses in a single national literature, chosen by the student in consultation with the adviser and the program director of undergraduate studies. This normally involves meeting the language proficiency requirements of the relevant literature department.
4. Electives within Philosophy beyond the core requirements totaling at least 5 units, and drawn from courses numbered 100 or higher.
5. Two upper division courses of special relevance to the study of philosophy and literature, as identified by the committee in charge of the program. A list of approved courses is available from the program director of undergraduate studies.
6. Capstone seminar in the PHIL 194 series.
7. Capstone seminar of relevance to the study of philosophy and literature, as approved by the program committee. In some cases, with approval of the Philosophy Director of Undergraduate Study and the program director of undergraduate studies, the same course may be used to meet requirements 6 and 7 simultaneously. In any case, the student's choice of a capstone seminar must be approved in writing by the Philosophy Director of Undergraduate Study and the program director of undergraduate studies.

Students are encouraged to consider doing honors work in a topic related to philosophy and literature through the Philosophy honors program.

The following rules also apply to the special option:

1. Units for Honors Tutorial, Directed Reading (PHIL 196, 197, 198), *The Dualist* (PHIL 198), Honors Seminar (PHIL 199) may not be counted toward the 65-unit requirement. No more than 10 units with a grade of 'satisfactory' or 'credit' may be counted toward the unit requirement.
2. A maximum of 15 transfer units may be counted toward the major, at most 10 of which may substitute for courses within Philosophy. Transfer credits may not substitute for PHIL 80 or 81, and are approved as substitutes for the five area requirements or PHIL 194 only in exceptional cases.
3. Courses offered in other departments may be counted toward requirements 3, 5 and 7, but such courses, including affiliated courses, do not generally count toward the other requirements. In particular, such courses may not satisfy requirement 4.
4. Units devoted to meeting the language requirement are not counted toward the 65-unit requirement.

### HONORS PROGRAM

Students who wish to undertake a more intensive and extensive program of study, including seminars and independent work, are invited to apply for the honors program during Winter Quarter of the junior year. Admission is selective on the basis of demonstrated ability in philosophy, including an average grade of at least 'A-' in a substantial number of philosophy courses and progress towards satisfying the requirements of the major.

With their application, candidates should submit an intended plan of study for the remainder of the junior and the senior years. It should include at least 5 units of Senior Tutorial (196) during Autumn and/or Winter Quarter(s) of the senior year. Students who are applying to Honors College may use the same application for philosophy honors. In the quarter preceding the tutorial, students should submit an essay proposal to the Philosophy undergraduate director and determine an adviser.

Students applying for honors should enroll in Junior Honors Seminar (199) during the Spring Quarter of the junior year.

The length of the honors essay may vary considerably depending on the problem and the approach; usually it falls somewhere between 7,500 and 12,500 words. This essay may use work in previous seminars and courses as a starting point, but it cannot be the same essay that has been used, or is being used, in some other class or seminar. It must be a substantially new and different piece of work reflecting work in the tutorials.

A completed draft of the essay is submitted to the adviser at the end of the Winter Quarter of the senior year. Any further revisions must be finished by the fifth full week of the Spring Quarter, when three copies of the essay are to be given to the undergraduate secretary. The honors essay is graded by the adviser together with a second reader, chosen by the adviser in consultation with the student. The student also provides an oral defense of the thesis at a meeting with the adviser and second reader. The essay must receive a grade of 'A-' or better for the student to receive honors.

Honors tutorials represent units in addition to the 55-unit requirement.

## MINOR IN PHILOSOPHY

A minor in Philosophy consists of at least 30 units of Philosophy courses satisfying the following conditions:

- Students taking both quarters of the Winter/Spring Philosophy Introduction to the Humanities (IHUM) track may count these courses as equivalent to a maximum of 5 units of Philosophy courses under 100.
- At least 10 units must be from courses numbered 100 or above.
- The 30 units must include one of:
  - a history of philosophy course numbered 100 or above
  - two quarters of IHUM (only 5 of the 10 units can count towards 30-unit requirement).
- One course from any two of the following three areas (PHIL):
  - philosophy of science and logic: 60, 61, 160, 162-168; 50, 150, 151, 152, 153, 154, 155, 157
  - moral and political philosophy: 2, 170-174
  - metaphysics and epistemology: 1, 80, 180-189.
- Units for tutorials, directed reading, and affiliated courses may not be counted.
- Transfer units must be approved in writing by the Director of Undergraduate Study at the time of declaring. The number of transfer units is generally limited to a maximum of 10.
- No more than 6 units completed with grades of 'satisfactory' or 'credit' count towards the 30-unit requirement.

Students must declare their intention to minor in Philosophy in a meeting with the Director of Undergraduate Study. This formal declaration must be made no later than the last day of the quarter two quarters before degree conferral. The Permission to Declare a Philosophy Minor (signed by the Director of Undergraduate Study) lists courses taken and to be taken to fulfill minor requirements. This permission is on file in the department office. Before graduation, a student's record is checked to see that requirements have been fulfilled, and the results are reported to the University Registrar.

## JOINT MAJOR IN PHILOSOPHY AND RELIGIOUS STUDIES

The joint undergraduate major in Philosophy and Religious Studies consists of 60 units of course work with approximately one third each in the philosophy core, the religious studies core, and either the general major or the special concentration. Affiliated courses cannot be used to satisfy this requirement.

No courses in either the philosophy or religious studies core may be taken satisfactory/no credit or credit/no credit.

In general, transfer units cannot be used to satisfy the core requirements. Transfer units and substitutions must be approved by the director of undergraduate studies in the appropriate department.

## CORE REQUIREMENTS

- Philosophy (PHIL) courses:
  - 80

- 16 units, including at least one Philosophy course from each of the following areas:
  - logic and philosophy of science: 50, 60, 61, 150, 151, 152, 153, 154, 155, 160, 162-168
  - ethics and value theory: 170-173
  - epistemology, metaphysics, and philosophy of language: 1, 80, 180-189
  - history of philosophy: 100-103
- Religious Studies (RELIGST) courses: 20 units, chosen in consultation with the student's adviser, including:
  - RELIGST 290. Theories of Religion (5 units; Winter Quarter; recommended junior year; fulfills WIM requirement)
  - at least one course in philosophy of religion, broadly construed: RELIGST 52, 54, 62, 101, 173, 174E, 183, 212, 220, 226, 238, 240, 242, 244, 245, 271A, 271B, 273, 274, 275, 278, 279, 280
  - diversity requirement: Students may not take all their religion courses in one religious tradition.

*General Major Requirements*—Five additional courses (approximately 20 units) divided between the two departments. No more than five of these units may come from courses numbered under 99 in either department. Each student must also take at least one undergraduate seminar in religious studies and one undergraduate seminar in philosophy.

*Special Concentration*—With the aid of an adviser, students pursue a specialized form of inquiry in which the combined departments have strength; for example, American philosophy and religious thought, philosophical and religious theories of human nature and action, philosophy of religion. Courses for this concentration must be approved in writing by the adviser.

*Directed Reading and Satisfactory/No Credit Units*—Units of directed reading for fulfilling requirements of the joint major are allowed only with special permission. No more than 10 units of work with a grade of 'satisfactory' count toward the joint major.

## HONORS PROGRAM

Students pursuing a joint major in Philosophy and Religious Studies may also apply for honors by following the procedure for honors in either of the departments.

## COTERMINAL BACHELOR'S AND MASTER'S DEGREES IN PHILOSOPHY

It is possible to earn an M.A. in Philosophy while earning a B.A. or B.S. This can usually be done by the end of the fifth undergraduate year, although a student whose degree is not in Philosophy may require an additional year. Standards for admission to, and completion of, this program are the same as for M.A. applicants who already have the bachelor's degree when matriculating. Applicants for the coterminal program are not, however, required to take the Graduate Record Exam.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see <http://studentaffairs.stanford.edu/registrar/publications#Coterm>.

## MASTER OF ARTS IN PHILOSOPHY

University requirements for the M.A. are discussed in the "Graduate Degrees" section of this bulletin.

Three programs lead to the M.A. in Philosophy. One is a general program providing a grounding in all branches of the subject. The others provide special training in one branch.

*Admissions*—All prospective master's students, including those currently enrolled in other Stanford programs, must apply for admission to the program. No fellowships are available. Entering students must meet with the director of the master's program and have their adviser's approval, in writing, of program proposals. The

master's program should not be considered a stepping stone to the doctoral program; these two programs are separate and distinct.

**Unit Requirements**—Each program requires a minimum of 45 units in philosophy. Students in a special program may be allowed or required to replace up to 9 units of philosophy by 9 units in the field of specialization. Although the requirements for the M.A. are designed so that a student with the equivalent of a strong undergraduate philosophy major at Stanford might complete them in one year, most students need longer. Students should also keep in mind that although 45 units is the minimum required by the University, quite often more units are necessary to complete department requirements. Up to 6 units of directed reading in philosophy may be allowed. There is no thesis requirement, but an optional master's thesis or project, upon faculty approval, may count as the equivalent of up to 8 units. A special program may require knowledge of a foreign language. At least 45 units in courses numbered 100 or above must be completed with a grade of 'B-' or better at Stanford. Students are reminded of the University requirements for advanced degrees, and particularly of the fact that for the M.A., students must complete three full quarters as measured by tuition payment.

## GENERAL PROGRAM

The General Program requires a minimum of 45 units in Philosophy courses numbered above 99. These courses must be taken for a letter grade, and the student must receive at least a 'B-' in the course. Courses taken to satisfy the undergraduate core or affiliated courses may not be counted in the 45 units. The requirement has three parts:

- Undergraduate Core**—Students must have when they enter, or complete early in their program, the following undergraduate courses (students entering from other institutions should establish equivalent requirements with a master's adviser upon arrival or earlier):
  - Logic: 50 (formerly 57), 150 (formerly 159), or 151 (formerly 160A)
  - Philosophy of science: any course from 60, 61, 163-167
  - Moral and political philosophy: one from 170-173
  - Metaphysics and epistemology: one from 80, 180-189
  - History of philosophy: two history of philosophy courses numbered 100 or above
- Graduate Core**—Students must take at least one course numbered over 105 from three of the following five areas (courses used to satisfy the undergraduate core cannot also be counted toward satisfaction of the graduate core). Crosslisted and other courses taught outside the Department of Philosophy do not count towards satisfaction of the core.
  - Logic and semantics
  - Philosophy of science and history of science
  - Ethics, value theory, and moral and political philosophy
  - Metaphysics, epistemology, and philosophy of language
  - History of philosophy
- Each master's candidate must take at least two courses numbered above 200; these cannot be graduate sections of undergraduate courses.
- Specialization**—Students must take at least three courses numbered over 105 in one of the five areas.

## SPECIAL PROGRAM IN SYMBOLIC SYSTEMS

Students should have the equivalent of the Stanford undergraduate major in Symbolic Systems. Students who have a strong major in one of the basic SSP disciplines (philosophy, psychology, linguistics, computer science) may be admitted, but are required to do a substantial part of the undergraduate SSP core in each of the other basic SSP fields. This must include the following three philosophy courses or their equivalents: 80; 151

(formerly 160A); and one from 181, 183, 184, 186. This work does not count towards the 45-unit requirement.

## COURSE REQUIREMENTS

- Four courses in philosophy at the graduate level (numbered 200 or above), including courses from three of the following five areas:
  - Philosophy of language
  - Logic
  - Philosophy of mind
  - Metaphysics and epistemology
  - Philosophy of science
 At most two of the four courses may be graduate sections of undergraduate courses numbered 100 or higher.
- Three courses numbered 100 or higher from outside Philosophy, chosen in consultation with an adviser. These courses should be from two of the following four areas:
  - Psychology
  - Linguistics
  - Computer Science
  - Education
 Remaining courses are chosen in consultation with and approved by an adviser.

## SPECIAL PROGRAM IN THE PHILOSOPHY OF LANGUAGE

Admission is limited to students with substantial preparation in philosophy or linguistics. Those whose primary preparation has been in linguistics may be required to satisfy all or part of the undergraduate core requirements as described in the "General Program" subsection above. Those whose preparation is primarily in philosophy may be required to take additional courses in linguistics.

## COURSE REQUIREMENTS

- Philosophy of language: two approved courses in the philosophy of language numbered 180 or higher.
- Syntactic theory and generative grammar: 384 and LINGUIST 231.
- Logic: at least two approved courses numbered 151 (formerly 160A) or higher.
- An approved graduate-level course in mathematical linguistics or automata theory.

## DOCTOR OF PHILOSOPHY IN PHILOSOPHY

Prospective graduate students should see <http://gradadmissions.stanford.edu> for information and application materials. Applicants should take the Graduate Record Examination by October of the year the application is submitted.

The University's basic requirements for the Ph.D. degree including residence, dissertation, and examination are discussed in the "Graduate Degrees" section of this bulletin. The requirements detailed here are department requirements.

Courses used to satisfy any course requirement in Philosophy must be passed with a letter grade of 'B-' or better (no satisfactory/no credit), except in the case of a course/seminar used to satisfy the third-year course/seminar requirement and taken for only 2 units. Such a reduced-unit third-year course/seminar must be taken credit/no credit.

At the end of each year, the department reviews the progress of each student to determine whether the student is making satisfactory progress, and on that basis to make decisions about probationary status and termination from the program where appropriate.

Any student in one of the Ph.D. programs may apply for the M.A. when all University and department requirements have been met.

## PROFICIENCY REQUIREMENTS

1. *First-year Ph.D. Proseminar*—A one quarter, topically focused seminar offered in Autumn Quarter, and required of all first-year students.
2. *Distribution requirements during the first six quarters*—
  - a. six courses distributed across three areas as follows:
    1. two courses in value theory including ethics, aesthetics, political philosophy, social philosophy, philosophy of law. At least one of the courses satisfying this distribution requirement must be in ethics or political philosophy.
    2. Two courses in language, mind, and action. One course satisfying this requirement must be drawn from the language related courses, and one from mind and action related courses.
    3. two courses in metaphysics and epistemology (including metaphysics, epistemology, philosophy of science). At least one of the courses satisfying this requirement must be drawn from either metaphysics or epistemology.
      - Instructors indicate which courses may satisfy particular requirements. If a course potentially satisfies more than one requirement the student may use it for only one of those area requirements; no units may be double-counted. Students must develop broad competencies in all these areas. Those without strong backgrounds in these areas would normally satisfy these distribution requirements by taking more basic courses rather than highly specialized and focused courses. Students should consult with their adviser in making these course decisions, and be prepared to explain these decisions when reviewed for candidacy; see requirement 6 below.
  - b. Logic requirement: PHIL 150 or equivalent.
  - c. History/logic requirement. Three of the four courses listed below.
    1. Three approved history courses
    2. PHIL 151
      - To satisfy this history/logic requirement it is necessary to take at least one course in ancient philosophy and one course in the history of modern philosophy.
  - d. Students should normally take at least 64 graduate level units at Stanford during their first six quarters (in many cases students would take more units than that) and of those total units, at least 49 units of course work are to be in the Philosophy department. These courses must be numbered above 110, but not including Teaching Methods (PHIL 239) or affiliated courses. Units of Individual Directed Reading are normally not to be counted toward this 49-unit requirement unless there is consent from the student's adviser and the Director of Graduate Study.
3. *Writing requirement*—A qualifying paper of professional quality and approximately 8000 words. Students must complete a version of the paper, which is itself likely to be a revision of a paper written during the first year of course work, by the beginning of their fourth quarter. The paper is read by a committee of two faculty who make suggestions for additional revision. The final version must be submitted by the first day of the sixth quarter, normally Spring Quarter of the second year.
4. *Teaching Assistancy*—A minimum of five quarters of teaching assistancy are required for the Ph.D. Normally one of these quarters is as a teaching assistant for the Philosophy Department's Writing in the Major course, PHIL 80. It is expected that students not teach in their first year and that they teach no more than two quarters in their second year. Students are required to take PHIL 239 during Spring Quarter of their first year and during Autumn Quarter of their second year.
5. *Review at the End of the Second Year for Advancement to Candidacy*—By the fourth week of the sixth quarter students must submit a one-page explanation of their first- and second-year course plan and their writing requirement paper. The faculty's review of each student includes a review of the student's record, an assessment of the qualifying paper, and an assessment of the student's preparation for work in her/his intended area of specialization, as well as recommendations of additional preparation, if necessary.
6. *Candidacy*—To continue in the Ph.D. program, each student must be approved for candidacy during the sixth academic quarter, normally the Spring Quarter of the student's second year. Students may be approved for candidacy on a conditional basis if they have only one or two outstanding deficiencies, but are not officially advanced to candidacy until these deficiencies have been removed. Approval for candidacy indicates that, in the department's judgment, the student can complete the Ph.D. In reaching this judgment, the department considers the overall quality of the student's work during the first six quarters and the student's success in fulfilling course and writing requirements.
7. During the Summer Quarter of the second year, students are required to attend a dissertation development seminar given by the department.
8. During the third year of graduate study, and after advancement to candidacy, a Ph.D. student must complete at least three graduate-level courses and/or seminars, at least two of which must be in Philosophy. Courses required for candidacy are not counted toward satisfaction of this requirement. Courses and/or seminars outside Philosophy are determined in consultation with a student's adviser. Except in special circumstances, one of these courses and/or seminars may be taken for reduced units if that option is provided by the faculty teaching the course or seminar. Courses used to satisfy these requirements must be passed with a letter grade of 'B-' or better, except in the case of a course or seminar used to satisfy the third-year course and/or seminar requirement and taken for only 2 units. Such a reduced-unit third-year course or seminar must be taken credit/no credit.
9. *Dissertation Work and Defense*—The third and fourth, and normally fifth, years are devoted to dissertation work. Students should make every effort to conform to the following deadlines.
  - a. *Dissertation Proposal*—By Spring Quarter of the third year, students choose a dissertation topic, a reading committee, and a possible thesis relative to that topic. The topic and thesis should be sketched in a proposal of 3-5 pages, along with a detailed, annotated bibliography demonstrating familiarity with the relevant literature. Individual faculty on the committee may impose further requirements on the proposal. The proposal should be approved by the reading committee before the meeting on graduate student progress late in Spring Quarter.
  - b. *Departmental Oral*—During Autumn Quarter of the fourth year, students take an oral examination, called the departmental oral, based on at least 30 pages of written work, in addition to the proposal. The aim of the exam is to help the student arrive at an acceptable plan for the dissertation and to make sure that student, thesis topic, and adviser make a reasonable fit.
  - c. *Fourth-Year Colloquium*—No later than Spring Quarter of the fourth year, students present a research paper in a seminar open to the entire department. This paper should be on an aspect of the student's dissertation research.
  - d. *University Oral Exam*—Ph.D. students must submit a completed draft of the dissertation to the reading committee at least one month before the student expects to defend the thesis in the University oral exam. If the student is given consent to go forward, the University oral take place approximately two weeks later. A portion of the exam consists of a student presentation based on the dissertation and is open to the public. A closed question period follows. If the draft is ready by Autumn Quarter of

the fourth year, the student may request that the University oral count as the department oral.

## INTERDISCIPLINARY STUDY

The department supports interdisciplinary study. Courses in Stanford's other departments and programs may be counted towards the degree, and course requirements in Philosophy are designed to allow students considerable freedom in taking such courses. Dissertation committees may include members from other departments. Where special needs arise, the department is committed to making it possible for students to obtain a philosophical education and to meet their interdisciplinary goals. Students are advised to consult their advisers and the department's student services office for assistance.

## INTERDEPARTMENTAL PROGRAMS

### PH.D. IN PHILOSOPHY AND HUMANITIES

The department participated in the Graduate Program in Humanities leading to a Ph.D. degree in Philosophy and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities; no new students are being accepted. The University remains committed to a broad-based graduate education in the humanities; the courses, colloquium, and symposium continue to be offered, and the Division of Literatures, Cultures, and Languages provides advising for students already enrolled who may contact DLCL Student Affairs at 650-724-1333 or dlcl@stanford.edu for further information. Courses are listed under the subject code HUMNTIES and may be viewed on the *Stanford Bulletin's* ExploreCourses web site.

### GRADUATE PROGRAM IN COGNITIVE SCIENCE

Philosophy participates with the departments of Computer Science, Linguistics, and Psychology in an interdisciplinary program in Cognitive Science. It is intended to provide an interdisciplinary education, as well as a deeper concentration in philosophy, and is open to doctoral students. Students who complete the requirements within Philosophy and the Cognitive Science requirements receive a special designation in Cognitive Science along with the Ph.D. in Philosophy. To receive this field designation, students must complete 30 units of approved courses, 18 of which must be taken in two disciplines outside of philosophy. The list of approved courses can be obtained from the Cognitive Science program located in the Department of Psychology.

### SPECIAL TRACK IN PHILOSOPHY AND SYMBOLIC SYSTEMS

Students interested in interdisciplinary work relating philosophy to artificial intelligence, cognitive science, computer science, linguistics, or logic may pursue a degree in this program.

Prerequisites—Admitted students should have covered the equivalent of the core of the undergraduate Symbolic Systems Program requirements as described in the "Symbolic Systems" section of this bulletin, including courses in artificial intelligence (AI), cognitive science, linguistics, logic, and philosophy. The graduate program is designed with this background in mind. Students missing part of this background may need additional course work. Aside from the required course work below, the Ph.D. requirements are the same as for the regular program, with the exception that one course in value theory and one course in history may be omitted.

*Courses of Study*—The program consists of three years of courses and two years of dissertation work. Students are required to take the following courses in the first two years:

1. Philosophy courses:
  - a. at least three graduate seminars in the general area of symbolic systems other than logic, such as philosophy of mind and philosophy of language.
  - b. two quarters of graduate logic courses from among 350A, 351A, 352A, 353A

2. Five cognitive science and computer science courses:
  - a. at least two courses in cognitive psychology
  - b. two or three graduate courses in computer science, at least one in AI and one in theory
3. Three linguistics and computational linguistics courses:
  - a. graduate courses on natural language that focus on two of the following areas: phonetics and phonology, syntax, semantics, or pragmatics
  - b. one graduate course in computational linguistics, typically LINGUIST 288
4. At least two additional graduate seminars at a more advanced level, in the general area of the program, independent of department. These would typically be in the area of the student's proposed dissertation project.

The requirements for the third year and subsequent years are the same as for other third-year graduate students in philosophy: The dissertation committee must include at least one member of the Department of Philosophy and one member of the Program in Symbolic Systems outside the Department of Philosophy.

### JOINT PROGRAM IN ANCIENT PHILOSOPHY

This program is jointly administered by the Departments of Classics and Philosophy and is overseen by a joint committee composed of members of both departments. It provides students with the training, specialist skills, and knowledge needed for research and teaching in ancient philosophy while producing scholars who are fully trained as either philosophers with a strong specialization in ancient languages and philology, or classicists with a concentration in philosophy.

Students are admitted to the program by either department. Graduate students admitted by the Philosophy department receive their Ph.D. from the Philosophy department; those admitted by the Classics department receive their Ph.D. from the Classics department. For Philosophy graduate students, this program provides training in classical languages, literature, culture, and history. For Classics graduate students, this program provides training in the history of philosophy and in contemporary philosophy.

Each student in the program is advised by a committee consisting of one professor in each department.

*Requirements for Philosophy Graduate Students*—These are the same as the proficiency requirements for the Ph.D. in Philosophy with the following exception: if the student has already taken two courses in modern philosophy, there is no need to take a course in modern philosophy to satisfy proficiency requirement 2.c.

One year of Greek is a requirement for admission to the program. If students have had a year of Latin, they are required to take 3 courses in second- or third-year Greek or Latin, at least one of which must be in Latin. If they have not had a year of Latin, they are then required to complete a year of Latin, and take two courses in second- or third-year Greek or Latin.

Students are also required to take at least three courses in ancient philosophy at the 200 level or above, one of which must be in the Classics department and two of which must be in the Philosophy department.

### GRADUATE DEGREES IN HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY

See the description in the "History and Philosophy of Science and Technology" section of this bulletin.

### PH.D. MINOR IN PHILOSOPHY

To obtain a Ph.D. minor in Philosophy, students must follow these procedures:

1. Consult with the Director of Graduate Study to establish eligibility, and select a suitable adviser.
2. Give to the department academic assistant a signed copy of the program of study (designed with the adviser) which offers:
  - a. 30 units of courses in the Department of Philosophy with a letter grade of 'B-' or better in each course. No more than 3

- units of directed reading may be counted in the 30-unit requirement.
- b. At least one course or seminar numbered over 99 to be taken in each of these five areas:
    1. Logic
    2. Philosophy of science
    3. Ethics, value theory, and moral and political philosophy
    4. Metaphysics, epistemology, and philosophy of language
    5. History of philosophy
  - c. Two additional courses numbered over 199 to be taken in one of those (b) five areas.
3. A faculty member from the Department of Philosophy (usually the student's adviser) serves on the student's doctoral oral examination committee and may request that up to one third of this examination be devoted to the minor subject.
  4. Paperwork for the minor must be submitted to the department office before beginning the program.

### COGNATE COURSES

The following courses have substantial philosophical content. However, in the absence of special permission these courses cannot generally be used to satisfy requirements for the Philosophy major or graduate degrees in Philosophy.

- CLASSHIS 101. The Greeks
- CLASSGRK 113. Advanced Greek: Thucydides
- CLASSGEN 94. Ethics of Pleasure
- CLASSGEN 208B. Survey of Greek and Latin Literature: Classical Greek
- CLASSGEN 237. Augustine on the Body (Same as COMPLIT 337)
- ETHICSOC 179M. Libertarianism, Egalitarianism, and Public Policy
- GERGEN 246/346. Being at Home in the World: Kant's Critique of the Power of Judgment
- IPS 206A. Politics and Collective Action (same as POLISCI 331S, PUBLPOL 304A)
- MATH 161. Set Theory
- POLISCI 132. Ethics of Political Animals
- POLISCI 332R,S. Greek Political Economy I,II
- RELIGST 278/378. Heidegger: Confronting the Ultimate

## PHYSICS

*Emeriti: (Professors)* Steven Chu, Alexander L. Fetter, Stanley S. Hanna, William A. Little, Douglas D. Osheroff, David M. Ritson, H. Alan Schwettman, Robert V. Wagoner, John Dirk Walecka, Stanley G. Wojcicki\*, Mason R. Yearian; (*Professors, Research*) John A. Lipa\*, Todd I. Smith\*, John P. Turneaure; (*Professors, Courtesy*) Peter A. Sturrock (Applied Physics), Richard Taylor (SLAC National Accelerator Laboratory)

*Chair:* Steven M. Kahn

*Associate Chair:* Giorgio Gratta

*Professors:* Roger Blandford, Phil Bucksbaum, Patricia Burchat, Blas Cabrera, Savas G. Dimopoulos, Sebastian Doniach, Giorgio Gratta, Shomit Kachru, Steven Kahn, Renata E. Kallosh, Aharon Kapitulnik, Mark Kasevich, Steven A. Kivelson, Robert B. Laughlin, Andrei D. Linde, Kathryn Moler, Peter F. Michelson, Vahe Petrosian, Roger W. Romani, Zhi-Xun Shen, Stephen Shenker, Eva Silverstein, Leonard Susskind, Shoucheng Zhang

*Associate Professors:* Tom Abel, Steven Allen, Sarah Church, David Goldhaber-Gordon, Hari Manoharan

*Assistant Professors:* Stefan Funk, Peter Graham, Sean Hartnoll, Chao-Lin Kuo, Xiao-liang Qi, Srinivas Raghu, Leonardo Senatore, Risa Wechsler

*Professors (Research):* Leo Hollberg, Phillip H. Scherrer

*Courtesy Professors:* Rhiju Das, Benjamin Lev, Craig Levin, Stephen Quake, Richard N. Zare

*Lecturers:* Chaya Nanavati, Rick Pam

*Consulting Professors:* Ralph Devoe, Gerald Fisher, Barbara Jones, Alan Title

*Visiting Associate Professor:* Joel Franklin

\* Recalled to active duty.

*Department Offices:* 382 Via Pueblo Mall

*Mail Code:* 94305-4060

*Phone:* (650) 723-4344

*Web Site:* <http://stanford.edu/dept/physics>

Courses offered by the Department of Physics are listed under the subject code PHYSICS on the *Stanford Bulletin's* ExploreCourses web site.

### MISSION OF THE UNDERGRADUATE PROGRAM IN PHYSICS

The mission of the undergraduate program in Physics is to provide students with a strong foundation in both classical and modern physics. The goal of the program is to develop both quantitative problem solving skills and the ability to conceive experiments and analyze and interpret data. These abilities are acquired through both course work and opportunities to conduct independent research. The program prepares students for careers in fields that benefit from quantitative and analytical thinking, including physics, engineering, teaching, medicine, law, science writing, and science policy, in government or the private sector. In some cases, the path to this career will be through an advanced degree in physics or a professional program.

### LEARNING OUTCOMES

Students develop an understanding of the fundamental laws that govern the universe, and a strong foundation of mathematical, analytical, laboratory, and written communication skills. They will also be presented with opportunities for learning through research. Upon completion of the Physics degree, students should have acquired the following knowledge and skills:

1. a thorough quantitative and conceptual understanding of the core areas of physics, including mechanics, electricity and magnetism, thermodynamics, statistical physics, and quantum mechanics, at a level compatible with admission to graduate programs in physics at peer institutions.
2. the ability to analyze and interpret quantitative results, both in the core areas of physics and in complex problems that cross multiple core areas.
3. the ability to apply the principles of physics to solve new and unfamiliar problems. This ability is often described as "thinking like a physicist."
4. the ability to use contemporary experimental apparatus and analysis tools to acquire, analyze and interpret scientific data.
5. the ability to communicate scientific results effectively in written papers and presentations or posters.

### COURSE WORK

Course work is designed to provide students with a sound foundation in both classical and modern physics. Students who wish to specialize in astronomy, astrophysics, or space science should also consult the "Astronomy Program" section of this bulletin.

Three introductory series of courses include labs in which undergraduates carry out individual experiments. The Intermediate Physics Laboratories offer facilities for increasingly complex individual work, including the conception, design, and fabrication of laboratory equipment. Undergraduates are also encouraged to participate in research; most can do this through the senior thesis and/or the summer research program.

The study of physics is undertaken by three principal groups of undergraduates: those including physics as part of a general education; those preparing for careers in professional fields that require a knowledge of physics, such as medicine or engineering;

and those preparing for careers in physics or related fields, including teaching and research in colleges and universities, research in federally funded laboratories and industry, and jobs in technical areas. Physics courses numbered below 100 are intended to serve all three of these groups. The courses numbered above 100 mainly meet the needs of the third group, but also of some students majoring in other branches of science and in engineering.

## ENTRY-LEVEL SEQUENCES IN PHYSICS

The Department of Physics offers three year-long, entry-level physics sequences, the PHYSICS 20, 40, and 60 series. The first of these (the 20 series) is non-calculus-based, and is intended primarily for those who are majoring in biology. Students with AP Physics credit, particularly those who are considering research careers, may wish to consider taking the PHYSICS 20 or 40 series, rather than using AP placement. These introductory courses provide a depth and emphasis on problem solving that has significant value in biological research, given today's considerable physics-based technology.

For those intending to major in engineering or the physical sciences, or simply wanting a stronger background in physics, the department offers the PHYSICS 40 and 60 series. Either of these satisfies the entry-level physics requirements of any Stanford major. The 60 series is intended for those who have already taken a Physics course at the level of the 40 series, or at least have a strong background in mechanics, some background in electricity and magnetism, and a strong background in calculus. The PHYSICS 40 series begins with mechanics in Winter Quarter, electricity and magnetism in Spring Quarter, and light and heat in Autumn Quarter. While it is recommended that most students begin the sequence with mechanics (PHYSICS 41) in Winter Quarter, those who have had strong physics preparation in high school (such as a score of at least 4 on the Physics Advanced Placement C exam) may start the sequence with PHYSICS 45 in Autumn Quarter.

All courses for the Physics major must be taken for a letter grade, and a grade of 'C-' or better must be received for all units applied toward the major.

## GRADUATE PROGRAMS IN PHYSICS

Graduate students find opportunities for research in the fields of astrophysics, particle astrophysics, cosmology, experimental particle physics, particle theory, string theory, intermediate energy physics, low temperature physics, condensed matter physics, materials research, atomic physics, laser physics, quantum electronics, coherent optical radiation, novel imaging technologies, and biophysics. Faculty advisers are drawn from many departments, including Physics, Applied Physics, Materials Science and Engineering, Electrical Engineering, and Biology. Opportunities for research are also available with the faculty at SLAC in the areas of theoretical and experimental particle physics, particle astrophysics, cosmology, accelerator design, and photon science.

The number of graduate students admitted to the Department of Physics is strictly limited. Students should submit applications by Tuesday, December 13, 2011 for matriculation the following Autumn Quarter. Graduate students may normally enter the department only at the beginning of Autumn Quarter.

## FELLOWSHIPS AND ASSISTANTSHIPS

The Department of Physics makes an effort to support all its graduate students through fellowships, teaching assistantships, research assistantships, or a combination of sources. More detailed information is provided with the offer of admission.

## TEACHING CREDENTIALS

For information on teaching credentials, consult the "School of Education" section of this bulletin or visit <http://usestep.stanford.edu>. Also see the section on the Individually Designed Major program in Teaching Physical Science.

## MASTER OF SCIENCE

The department does not offer a coterminal degree program, or a separate program for the M.S. degree, but this degree may be awarded for a portion of the Ph.D. degree work.

University requirements for the master's degree, discussed in the "Graduate Degrees" section of this bulletin, include completion of 45 units of unduplicated course work after the bachelor's degree. Among the department requirements are a grade point average (GPA) of at least 3.0 (B) for courses 210 or 211, 212, 220, 221, 230, 231, or their equivalents. Up to 6 of these required units may be waived on petition if a thesis is submitted.

## LABORATORIES AND INSTITUTES

The Russell H. Varian Laboratory of Physics, the Physics and Astrophysics Building, the W. W. Hansen Experimental Physics Laboratory (HEPL), the E. L. Ginzton Laboratory, and the Geballe Laboratory for Advanced Materials (GLAM) together house a range of physics activities from general courses through advanced research. Ginzton Lab houses research on optical systems, including quantum electronics, metrology, optical communication and development of advanced lasers. GLAM houses research on novel and nanopatterned materials, from high-temperature superconductors and magnets to organic semiconductors, subwavelength photon waveguides, and quantum dots. GLAM also supports the materials community on campus with a range of characterization tools: it is the site for the Stanford Nanocharacterization Lab (SNL) and the NSF-sponsored Center for Probing the Nanoscale (CPN). The SLAC National Accelerator Laboratory is just a few miles from the Varian Laboratory. SLAC is a national laboratory funded by the Office of Basic Energy Sciences and High Energy Physics of the Department of Energy. Scientists at SLAC conduct research in photon science, accelerator physics, particle physics, astrophysics and cosmology. The laboratory hosts a two-mile-long linear accelerator that can accelerate electrons and positrons. Until recently, the PEP-II asymmetric-energy electron-positron storage ring was used to study CP violation in the B meson system. The Stanford Synchrotron Radiation Laboratory (SSRL) uses intense x-ray beams produced with another smaller storage ring on the SLAC site. The Linac Coherent Light Source (LCLS), completed in 2009, is the world's first x-ray free electron laser and has opened new avenues of research in ultra-fast photon science.

The Ginzton Laboratory, HEPL, GLAM, SLAC, and SSRL are listed in the "Academic Programs and Centers, Independent Research Laboratories, Centers, and Institutes" section of this bulletin. Students may also be interested in research and facilities at two other independent labs: the Center for Integrated Systems, focused on electronics and nanofabrication; and the Clark Center, an interdisciplinary biology, medicine, and bioengineering laboratory.

The Kavli Institute for Particle Astrophysics and Cosmology (KIPAC), formed jointly with the SLAC National Accelerator Laboratory, provides a focus for theoretical, computational, observational, and instrumental research programs. A wide range of research areas in particle astrophysics and cosmology are investigated by students, postdocs, research staff and faculty. The two major projects with which KIPAC is heavily involved are the Fermi Gamma-Ray Space Telescope (FGST) and the large Synoptic Survey Telescope. KIPAC members also participate fully in the Cryogenic Dark Matter Search (CDMS), the Solar Dynamics Observatory, the EXO-200 double beta decay experiment, the Dark Energy Survey (DES), the NuSTAR and Astro-H X-ray satellites, the Cerenkov Telescope Array (CTA) and several cosmic microwave background experiments (BICEP, KECK, QUIET and POLAR-1).

The Stanford Institute for Theoretical Physics is devoted to the investigation of the basic structure of matter (particle theory, string theory, M-theory, quantum cosmology, condensed matter physics).

## PHYSICS COURSE CATALOG NUMBERING SYSTEM

There are four series of beginning courses. One course from the teen series (15, 16, 17, 19) is recommended for the humanities or social science student who wishes to become familiar with the methodology and content of modern physics. The 20 series (21, 22, 23, 24, 25, 26) is recommended for general students and for students preparing for medicine or biology. The 40 series (41, 42, 43, 44, 45, 46) is for students of engineering, chemistry, earth sciences, mathematics, or physics. The advanced freshman series (61, 62, 63, 64, 65, 67) is for students who have had strong preparation in physics and calculus in high school. Students who have had appropriate background and wish to major in physics should take this introductory series.

The 20, 40, and 60 series consist of demonstration lectures on the fundamental principles of physics, problem work on application of these principles to actual cases, and lab experiments correlated with the lectures. Their objectives are not only to give information on particular subjects, but also to provide training in the use of the scientific method. The primary difference between the series of courses is that topics are discussed more thoroughly and treated with greater mathematical rigor in the 40 and 60 series.

Courses beyond 99 are numbered in accordance with a three-digit code. The first digit indicates the approximate level of the course:

100	undergraduate courses
200	first-year graduate courses
300	more advanced courses
400	research, special, or current topics

The second digit indicates the general subject matter:

00	laboratory
10,20,30	general courses
40	nuclear physics, nuclear energy, energy
50	elementary particle physics
60	astrophysics, cosmology, gravitation
70	condensed matter physics
80	optics and atomic physics
90	miscellaneous courses

## BACHELOR OF SCIENCE IN PHYSICS

To help in deciding which introductory sequence is most suitable, students considering a major in Physics may contact the undergraduate program coordinator (elva@stanford.edu) to arrange an advising appointment. Although it is possible to complete the Physics major in three years, students who contemplate starting the major during sophomore year should make an advising appointment to map out their schedule. Students who have had previous college-level courses (including EPGY) should make an advising appointment for placement and possible transfer credit. For advanced placement advice, see <http://studentaffairs.stanford.edu/registrar/students/ap>.

Undergraduates are offered help with physics problems in the Physics Tutoring Center in the Physics and Astrophysics Building, sub-basement, room S-17, which is staffed Monday through Friday. See schedule at <http://physicstutor.stanford.edu>.

- Prospective Physics majors are advised to take PHYSICS 59, Current Research Topics, in their freshman or sophomore year.
  - A calculus-based entry-level series is required, either PHYSICS 61, 62, 63, 64, 65, 67, or 41, 42, 43, 44, 45, 46 (or preferably 67 rather than 44). Students who take the PHYSICS 40 series take PHYSICS 70, which covers the foundations of modern physics.
  - Students taking the PHYSICS 60 series do not take PHYSICS 70; instead, they must take one advanced Physics elective (100-level or higher).
- In addition, the following advanced courses are required: PHYSICS 105, 107 (WIM), 108, 110, 120, 121, 130, 131, 170, and 171; MATH 51, 52, 53, 131P (MATH 173 can be taken in place of MATH131P); one additional Mathematics course

numbered 101 or higher, or PHYSICS 112 or STATS 116 or EE 261.

- MATH 51H, 52H, and 53H may substitute for MATH 51, 52, and 53.
- It is recommended that students intending to complete a Ph.D. in Physics also take PHYSICS 113, 134, and one or more of the following, depending upon their interests:
    - PHYSICS 100, 152A,B, 160, 161, 172, 204, 262, APPPHYS 192, or EE 268.
    - PHYSICS 113 is designed to be taken in parallel with 110.
  - The department advises the study of some computer science such as CS 106A,B or CS 106X.
  - Physics and Mathematics courses taken to satisfy the department's major requirements must be taken for a letter grade, and a grade of 'C-' or better must be received for all units applied toward the major.

## REQUIRED COURSES FOR MAJORS

For sample schedules illustrating how to complete the Physics major, see <http://physics.stanford.edu/academics/undergrad.html>.

### INTRODUCTORY SEQUENCE

Students must complete either the 40 or 60 series as follows:

40 Series:	Qtr. and Units
PHYSICS 41. Mechanics	W 4
PHYSICS 42. Mechanics Lab	W 1
PHYSICS 43. Electricity and Magnetism	S 4
PHYSICS 44. Electricity and Magnetism Lab	S 1
PHYSICS 45. Light and Heat	A 4
PHYSICS 46. Light and Heat Lab	A 1
PHYSICS 67. Introduction to Laboratory Physics (recommended for Physics majors in place of 44)	S 2
PHYSICS 70. Foundations of Modern Physics	A 4

60 Series: Subject and Catalog Number	Qtr. and Units
PHYSICS 61. Mechanics and Special Relativity	A 4
PHYSICS 62. Mechanics Lab	A 1
PHYSICS 63. Electricity, Magnetism and Waves	W 4
PHYSICS 64. Electromagnetism Lab	W 1
PHYSICS 65. Thermodynamics and Foundations of Modern Physics	S 4
PHYSICS 67. Introduction to Laboratory Physics and	S 2
MATH 51. Linear Algebra and Differential Calculus of Several Variables	AWS 15
MATH 52. Integral Calculus of Several Variables	
MATH 53. Ordinary Differential Equations with Linear Algebra	
PHYSICS 59. Current Research Topics (recommended)*	A 1

### INTERMEDIATE SEQUENCE

PHYSICS 105. Intermediate Laboratory I: Analog Electronics	A 3
PHYSICS 107. Intermediate Laboratory II: Experimental Techniques and Data Analysis (WIM)	W 4
PHYSICS 108. Advanced Physics Laboratory: Project	W or S 4
PHYSICS 110. Intermediate Mechanics	S 4
PHYSICS 112. Math Methods of Physics (recommended)**	W 4
PHYSICS 113. Computational Physics (recommended)*	S 4
PHYSICS 120,121. Intermediate Electricity and Magnetism	W,S 8
and	
MATH 131P. Partial Differential Equations I or	A,W 3
MATH 173. Theory of Partial Differential Equations	

### ADVANCED SEQUENCE

PHYSICS 130,131. Quantum Mechanics	A,W 8
PHYSICS 134. Advanced Topics in Quantum Mechanics*	S 4
PHYSICS 170,171. Statistical Mechanics and one advanced Mathematics elective (101 level or higher) or PHYSICS 112 or STATS 116 or EE 261.	A,W 8

One advanced Physics elective (100 level or higher):  
required only for students who are not required to take PHYSICS 70

- \* These courses are not required. PHYSICS 113 is recommended for students planning to work in technical fields. Both PHYSICS 113 and PHYSICS 134 are recommended for students who intend to complete a Ph.D. in Physics.
- \*\* Those wishing to pursue theoretical physics in graduate school may wish to take a collection of courses in the Department of Mathematics rather than or in addition to PHYSICS 112.

## CONCENTRATIONS IN PHYSICS

The primary purpose of concentrations in the Physics major is to provide consistent and more formal advising to students who want to concentrate in a particular area of physics during their undergraduate education, or prepare for future graduate studies in a particular area of physics. Physics majors are not required to choose a concentration and a concentration does not add any formal requirements to the Physics major. Upon graduation, students receive a certificate of completion of a concentration.

Students seeking further advice on a given concentration should contact the professor whose name appears next to the respective title of each section below. Within the chosen concentration below, complete at least four courses from the list or three courses plus a senior thesis. No more than one of the courses can be taken for CR/NC.

### A. APPLIED PHYSICS (HARI MANOHARAN)

*Solid State—*

- PHYSICS 172. Solid State Physics
- APPPHYS 270. Magnetism and Long Range Order in Solids
- MATSCI 195. Waves and Diffraction in Solids

*Biophysics—*

- APPPHYS 192. Introductory Biophysics

*Lasers—*

- EE 231. Introduction to Lasers
- EE 232. Laser Dynamics
- EE 268. Introduction to Modern Optics

*Lab Methods—*

- APPPHYS 207, 208. Laboratory Electronics, Analog and Digital
- APPPHYS 304. Lasers Laboratory

### B. ASTROPHYSICS (ROGER ROMANI, SARAH CHURCH)

*Requirements—*

- PHYSICS 100. Introduction to Observational and Laboratory Astronomy
- PHYSICS 160. Introduction to Stellar and Galactic Astrophysics
- PHYSICS 161. Introduction to Extragalactic Astrophysics and Cosmology

*Plus one elective from below or a senior thesis—*

- PHYSICS 211. Continuum Mechanics
- PHYSICS 260. Introduction to Astrophysics and Cosmology
- PHYSICS 262. Introduction to Gravitation
- PHYSICS 312. Basic Plasma Physics

### C. BIOPHYSICS (SEB DONIACH)

- APPPHYS 136. Biology by the Numbers
  - APPPHYS 192/292. Introductory Biophysics
  - BIOC 202. Biochemistry Bootcamp
  - BIOPHYS 228. Computational Structural Biology
  - BIO 141. Biostatistics
  - BIO 132/232. Advanced Imaging Lab In Biophysics
  - BIO 135/HUMBIO 186. Biological Clocks
  - BIO 217. Neuronal Biophysics
  - CS 273A. A Computational Tour of the Human Genome
- It is recommended that Physics majors interested in pursuing a career in biophysics consider a minor in Biology.

### D. GEOPHYSICS (SIMON KLEMPERER, GEOPHYSICS)

The following requirements apply to students matriculating 2010-11 or later:

*Requirements—*

- GEOPHYS 110. Earth on the Edge: Introduction to Geophysics
- GEOPHYS 120. Ice, Water, Fire
- GEOPHYS 150. Geodynamics: Our Dynamic Earth *Plus one elective from below or a senior thesis—*
- GEOPHYS 130. Introductory Seismology
- GEOPHYS 140. The Earth from Space: Introduction to Remote Sensing
- GEOPHYS 170. Global Tectonics
- GEOPHYS 184. Journey to the Center of the Earth
- GEOPHYS 190. Near-Surface Geophysics

Physics majors matriculating prior to 2010-11 who wish to complete a concentration in Geophysics should consult Prof. Klemperer.

### E. THEORETICAL PHYSICS (ANDREI LINDE)

- PHYSICS 152A,B. Introduction to Particle Physics
- PHYSICS 153. Introduction to String Theory, Quantum Gravity, and Black Holes
- PHYSICS 204. Seminar in Theoretical Physics
- PHYSICS 212. Statistical Mechanics
- PHYSICS 232. Quantum Mechanics
- PHYSICS 260. Introduction to Astrophysics and Cosmology
- PHYSICS 262. Introduction to Gravitation
- PHYSICS 330,331,332. Quantum Field Theory
- PHYSICS 351. Standard Model of Particle Physics
- PHYSICS 362. Advanced Extragalactic Astrophysics and Cosmology
- PHYSICS 364. Advanced Gravitation

Notes to students taking this concentration:

1. Students should discuss the choice of courses with members of the Institute for Theoretical Physics and/or their major adviser.
2. Students may attend 330 after taking 130, 131 and 134. Prior study of special topics in quantum mechanics (232) may be helpful.

## INDIVIDUALLY DESIGNED MAJOR PROGRAM IN TEACHING PHYSICAL SCIENCE

This major, a joint effort of the Department of Physics and the Stanford Teacher Education Program (STEP), is designed for students to prepare themselves as high school teachers of physics and general science. Students complete 47-49 units of Physics and related Mathematics courses, 40-43 units of course work in other sciences such as the life sciences, chemistry, and geosciences, and in general issues of science, and 9-15 units of concentration and depth courses. Total program units: 96-107. Students interested in this program should consult Professor Patricia Burchat (burchat@stanford.edu, 725-5771), and Professor Rachel Lotan, Director of the Stanford Teacher Education Program (STEP) in the School of Education (rlotan@stanford.edu).

### CORE PHYSICS COURSES

<i>Mechanics:</i>	<i>Units</i>
PHYSICS 41. Mechanics	
PHYSICS 42. Mechanics Lab	
<i>or</i>	
PHYSICS 61. Mechanics and Special Relativity	
PHYSICS 62. Mechanics Lab	5
<i>Heat:</i>	
PHYSICS 45. Light and Heat	
PHYSICS 46. Light and Heat Lab	
<i>or</i>	
PHYSICS 65. Thermodynamics and Foundations of Modern Physics	
PHYSICS 67. Introduction to Laboratory Physics	5-6

*Electricity and Magnetism:*  
 PHYSICS 43. Electricity and Magnetism  
 PHYSICS 67. Introduction to Laboratory Physics  
 or  
 PHYSICS 63. Electricity, Magnetism, and Waves  
 PHYSICS 64. Electricity and Magnetism Lab  
 and  
 PHYSICS 105. Analog Electronics (Lab) 8-9  
*Wave Motion:*  
 PHYSICS 107 Intermediate Physics Laboratory II: 4  
 Experimental Techniques and Data Analysis (WIM)  
*Modern Physics (for students who take 40 series):*  
 PHYSICS 70. Foundations of Modern Physics 4  
*Applications:*  
 PHYSICS 59. Current Research Topics 1  
*Mathematics (Physics departmental requirement):*  
 MATH 51. Linear Algebra and Differential Calculus of Several 4  
 Variables  
 MATH 52. Integral Calculus of Several Variables  
 MATH 53. Ordinary Differential Equations with Linear Algebra 4  
 and  
 A course in Statistics (choose one):  
 STATS 110. Statistical Methods in Engineering and the 4  
 Physical Sciences  
 STATS 116. Theory of Probability  
 STATS 141. Biostatistics  
 STATS 166. Computational Biology  
 STATS 191. Introduction to Applied Statistics  
 Total 20  
 47-49

**ADDITIONAL SCIENCE BREADTH COURSES**

*Life Sciences—*  
 BIO 41. Genetics, Biochemistry, and Molecular Biology  
 BIO 42. Cell Biology and Animal Physiology  
 BIO 43. Plant Biology, Evolution and Ecology  
 or  
 HUMBIO 2A. Genetics, Evolution, and Ecology 15  
 HUMBIO 2B. Culture, Evolution, and Society  
 HUMBIO 3A. Cell and Developmental Biology  
 HUMBIO 3B. Behavior, Health, and Development  
 HUMBIO 4A. The Human Organism  
 HUMBIO 4B. Environmental and Health Policy Analysis  
  
*Chemistry—*  
 CHEM 31A and B, or 31X. Chemical Principles  
 CHEM 33. Structure and Reactivity 8  
  
*Geosciences—*  
 EARTHSYS 10. Introduction to Earth Systems  
 PHYSICS 15. The Nature of the Universe  
 or PHYSICS 16. Cosmic Horizon  
 or PHYSICS 17. Black Holes 8  
  
*General Issues of Science—*  
 STS 101. Science, Technology, and Contemporary Society  
 EDUC 180. Directed Reading in Education  
 ENGR 103. Public Speaking 9-12  
  
*Concentration and Depth Courses—*  
 3 courses (100 level or above) in a single area of 9-15  
 concentration  
 Total units for general science 49-58  
 Total units for the Physical Science program 96-107

This individually designed major program in Physical Science includes all the elements of a Program of Subject Matter Preparation for Secondary Teachers of Physics and General Science that has been approved by the California Commission on Teacher Credentialing (CCTC). Students who complete the program are exempt from taking the C-BEST examination in Physics and General Science for admission to the Stanford Teacher Education Program (STEP) or any other accredited secondary teacher education program in California. Full details of the CCTC-approved program may be found at <http://ed.stanford.edu/suse/programs-degrees/program-coterminal-step.html>.

*Note:* the Stanford individually designed major program in Physical Science requires course work beyond the CCTC-approved program, specifically 9-15 units of depth courses in a field of concentration: Physics, Astrophysics, Biology, Chemistry, Earth Sciences, Human Biology, or Computational Mathematics. See the adviser in the Physics department or the School of Education for more details.

**SENIOR THESIS**

The department offers Physics majors the opportunity to complete a senior thesis. These are the guidelines:

1. Students must submit a Senior Thesis Application form once they identify a physics project, either theoretical or experimental, in consultation with individual faculty members. Proposal forms are available from the Undergraduate Coordinator and must be submitted by the week prior to the November Thanksgiving break of the academic year in which the student plans to graduate.
2. Credit for the project is assigned by the adviser within the framework of PHYSICS 205. A minimum of 3 units of PHYSICS 205 must be completed for a letter grade during the senior year. Work completed in the Senior Thesis Program may not be used as a substitute for regular required courses for the Physics major.
3. A written report and a presentation of the work at its completion are required for the Senior Thesis. By mid-May, the Senior Thesis candidate is required to present the project at the department's Senior Thesis Presentation Program. This event is publicized and open to the general public. The expectation is that the student's adviser, second reader, and all other Senior Thesis candidates attend.

**HONORS PROGRAM**

Physics majors are granted a Bachelor of Science in Physics with Honors if they satisfy these three requirements beyond the general Physics major requirements:

1. The student files for entry into the honors program by completing an Honors Program Application (available from the Undergraduate Coordinator) by the same deadline as the Senior Thesis Application, and eligibility is confirmed by the department.
2. The student completes a Senior Thesis by meeting the deadlines and requirements described above.
3. The student completes course work with an overall GPA of 3.30 or higher, and a GPA of 3.50 or higher in courses required for the Physics major.

**MINOR IN PHYSICS OR ASTRONOMY**

A minor is offered in either Physics or Astronomy. Students who take the PHYSICS 20, 40, or 60 series at Stanford in support of their major may count those units towards the minor. Those who have fulfilled Physics requirements at the 20 or 40 level by enrollment at another accredited university, or through advanced placement credits, may count credits towards 21/22 and 23/24, or 41/42 and 43/44, respectively. 25/26, or 45/46 for a technical minor, must be taken at Stanford even if similar material has been covered elsewhere. With the 21/22/23/24 or 41/43/44 exception noted above, all courses for the minor must be taken at Stanford University for a letter grade, and a grade of 'C-' or better must be received for all units applied toward the minor. The minor declaration deadline is three quarters before graduation, typically the beginning of Autumn Quarter if the student is graduating at the end of Spring Quarter.

**MINOR IN PHYSICS**

An undergraduate minor in Physics requires a minimum of 25 units with the following course work:

PHYSICS 41/42, 43/44, 45/46 and PHYSICS 70	<i>Units</i> 19
or	
PHYSICS 61/62, 63/64, 65/67	16

At least three PHYSICS courses numbered 100 or above	9-12
Total	25-31

\* PHYSICS 67 may be substituted for PHYSICS 44.

## MINOR IN ASTRONOMY

Students wishing to pursue advanced work in astrophysical sciences should major in physics and concentrate in astrophysics. Students who take the 20, 40, or 60 series at Stanford in support of their major may count those units towards the minor. However, students outside of physics with a general interest in astronomy may organize their studies by completing one of the following minor programs.

An undergraduate minor in astronomy requires the following courses:

*Non-Technical*—For students whose majors do not require the PHYSICS 40 or 60 series:

PHYSICS 21, 23, 25/26	Units
	10
PHYSICS 50 or 100 (Observatory Lab)	3-4
Choose two courses from the following:	
PHYSICS 15, 16, 17	6

Total 19-20 (9-10 in addition to the 20 series)

*Technical*—For students whose majors require the PHYSICS 40 or 60 series:

PHYSICS 41, 43, 45/46	Units
or	13-14
PHYSICS 61, 63, 65 and 67	
PHYSICS 70	4
PHYSICS 100 (Observatory Lab)	4
Choose two courses from the following:	
PHYSICS 160,* 161,* EE 106*	6
Total	27-28 (14 or 15 in addition to the 40 or 60 series)

\* With approval of the minor adviser and the chair of the Astronomy Course Program, 3 units of PHYSICS 169, Independent Study in Astrophysics, may be substituted for one course of astronomy (e.g., 160, 161, EE 106). This independent study can either be constituted as a directed reading program or participation in a research project. Students are also encouraged to take the electricity and magnetism/optics lab of the appropriate PHYSICS series (24, 44, and 64) for 1 additional unit.

## DOCTOR OF PHILOSOPHY IN PHYSICS

The University's basic requirements for the Ph.D. are discussed in the "Graduate Degrees" section of this bulletin.

The minimum department requirements for the Ph.D. degree in Physics consist of completing all courses listed below, plus 290 and 294 and at least one quarter from each of two subject areas outside the student's primary area of research (among biophysics, condensed matter, quantum optics and atomic physics, astrophysics and gravitation, and nuclear and particle physics) chosen from courses with numbers above 232, except 290 and 294. The requirements in the following list may be fulfilled by passing the course at Stanford or passing an equivalent course elsewhere: 210 or 211, 212, 220, 221, 230, 231. A grade point average (GPA) of at least 3.0 (B) is required for courses taken toward the degree.

All Ph.D. candidates must have math proficiency equivalent to the following Stanford MATH courses: 106, 113, 114, 116, 131, 132.

Prior to making an application for candidacy, each student is required to pass a comprehensive qualifying examination on undergraduate physics. This closed book exam is given in the month of January following the student's arrival at Stanford. This is a written examination held over two days, covering particle mechanics, electricity and magnetism, quantum mechanics, statistical mechanics, thermodynamics, special relativity, and general physics. A thesis proposal must be submitted during the third year. In order to assess the direction and progress toward a thesis, an oral report and evaluation are required during the fourth year. After completion of the dissertation, each student must take the University oral examination (defense of dissertation).

Three quarters of teaching (including a demonstrated ability to teach) are a requirement for obtaining the Ph.D. in Physics.

Students interested in applied physics and biophysics research should also take note of the Ph.D. granted independently by the Department of Applied Physics and by the Biophysics Program. Students interested in astronomy, astrophysics, or space science should also consult the "Astronomy Course Program" section of this bulletin.

## PH.D. MINOR IN PHYSICS

Doctoral students seeking a minor in Physics must take at least six courses numbered 210 to 232 among the 20 required units. All prospective minors must obtain approval of their Physics course program from the Physics Graduate Study Committee at least one year before the award of the Ph.D.

## POLITICAL SCIENCE

*Emeriti: (Professors)* David B. Abernethy, Lucius J. Barker, Richard A. Brody, David Danielski, Charles Drekmeier, Richard R. Fagen, John A. Ferejohn, John W. Lewis, John Manley, James March, Hubert R. Marshall, Daniel Okimoto, Robert A. Packenham, Philippe Schmitter, Hans N. Weiler

*Chair:* Josiah Ober

*Professors:* David W. Brady, Joshua Cohen, Gary W. Cox, James D. Fearon, Morris P. Fiorina, Judith L. Goldstein, Stephen H. Haber, David J. Holloway, Shanto Iyengar, Simon D. Jackman, Terry L. Karl, Stephen D. Krasner, Jon A. Krosnick, David D. Laitin, Michael A. McFaul (on leave), Terry M. Moe, Josiah Ober, Jean C. Oi, Jack N. Rakove, Condoleezza Rice, Douglas Rivers, Scott D. Sagan, Kenneth A. Schultz, Gary M. Segura, Paul M. Sniderman, Michael R. Tomz (on leave), Barry R. Weingast

*Associate Professors:* Beatriz Magaloni, Rob Reich (on leave), Jonathan A. Rodden, Jeremy Weinstein

*Assistant Professors:* Lisa Blaydes, Adam Bonica, Lauren Davenport, Justin Grimmer, Karen L. Jusko, Phillip Y. Lipsky, Alison McQueen, Clayton Nall, Jonathan Wand

*Lecturers:* Thomas J. Dougherty, Tammy Frisby, Margaret E. Peters, Andrew R. Rutten, Patricia Young

*Courtesy Professors:* David P. Baron, Jonathan B. Bendor, Coit D. Blacker, Gerhard Casper, Martha Crenshaw, Mariano Florentino-Cuellar, Larry Diamond, Jean-Pierre Dupuy, James Fishkin, Lawrence Friedman, Francis Fukuyama, Keith Krehbiel, Debra M. Satz, Stephen J. Stedman

*Courtesy Associate Professors:* Neil Malhotra, Ken Shotts

*Courtesy Assistant Professor:* Saumitra Jha

*Department Offices:* Encina Hall West, room 100

*Mail Code:* 94305-6044

*Phone:* (650) 723-1806

*Web Site:* <http://polisci.stanford.edu>

Courses offered by the Department of Political Science are listed under the subject code POLISCI on the *Stanford Bulletin's* ExploreCourses web site.

## MISSION OF THE UNDERGRADUATE PROGRAM IN POLITICAL SCIENCE

The mission of the undergraduate program in Political Science is to provide students with a solid grasp of the American political system and other political systems within the context of global forces, international conflicts, social movements, ideological systems and diversity. Courses in the major are designed to help students gain competency in the primary subfields of political science including American and comparative politics, international relations, and the theory/philosophy of politics; to introduce students to a variety of research methodologies and analytical frameworks; and to develop students' written and oral communication skills. Students in the program have excellent

preparation for further study in graduate or professional schools as well as careers in government, business, and not-for-profit organizations.

## LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of core knowledge within the discipline of political science.
2. the ability to communicate ideas clearly and persuasively in writing.
3. the ability to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
4. the ability to evaluate theory and critique research within the discipline of Political Science.

## GRADUATE PROGRAMS IN POLITICAL SCIENCE

*Admission*—Prospective graduate students should go to <http://gradadmissions.stanford.edu> for application materials. Applicants are required to submit a recent sample of their writing (not to exceed 35 pages) and to take the General Test of the Graduate Record Examination (GRE). Applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL). The TOEFL requirements are waived for applicants who have recently completed two or more years of study at a university where all instruction is provided in English. For details concerning these tests, see the *Guide to Graduate Admission*, available at <http://gradadmissions.stanford.edu>. The application deadline is December 6, 2011. Admission is offered for the Autumn Quarter only. The department expects all students to pursue a full-time program except for time devoted to teaching or research assistantships.

## BACHELOR OF ARTS IN POLITICAL SCIENCE

To receive a B.A. in Political Science, a student must:

1. Submit a Political Science major proposal to the undergraduate administrator and declare on Axess. Forms are available in Encina Hall West, room 100, or at <http://polisci.stanford.edu/bachelors>. For additional information, come to the office or phone (650) 723-1608. Students must complete their major declaration no later than the end of Autumn Quarter of their junior year.
2. Complete 70 units including:
  - a. 45 Political Science course units in the primary and secondary concentration combined. Each major should declare a primary concentration in one subfield and take at least 30 units in this concentration, including the introductory course for that subfield. The secondary concentration must be completed with at least 15 units, including the introductory course for that subfield. Subfields include:
    - International Relations (1, 110-119, 210-219, 310-319)
    - American Politics (2, 120-129, 220-229, 320-329)
    - Political Theory (3, 130-139, 230-239, 330-339)
    - Comparative Politics (4, 140-149, 240-249, 340-349)
    - Methodology (150-159, 350-359)
  - b. A 5-unit methods requirement satisfied by STATS 60, ECON 102A, POLISCI 150A, 150B, 150C, 151A, or 151B.
  - c. 20 additional Political Science units including no more than 5 units of directed reading. 10 units of ECON 1A and/or ECON 1B may substitute for two 5-unit POLISCI courses.

- d. No more than two 5-unit Stanford Introductory Seminar courses can be applied toward the 70-unit major requirement.
3. Introductory Courses: each student must take two from the following Political Science courses, one of which must be in the primary concentration, the other in the secondary concentration. These courses should be completed by the end of sophomore year.
    - POLISCI 1. Introduction to International Relations
    - POLISCI 2. Introduction to American National Government and Politics
    - POLISCI 3. Introduction to Political Philosophy
      - or POLISCI 3P. Justice
    - POLISCI 4. Introduction to Comparing Political Systems
    - POLISCI 151A. Doing Political Science
      - or POLISCI 151B. Data Analysis for Political Science
  4. Demonstrate the capacity for sustained research and writing in the discipline. This requirement is satisfied by taking a Political Science course designated as a Writing in the Major (WIM) course and may be in any subfield of the major.
  5. Take at least one 5-unit, 200 or 300-level undergraduate seminar in Political Science.
  6. Students may petition a maximum of ten units towards the major. Transfer students are allowed to petition up to twenty units towards the major. A maximum of 15 units may be applied towards the concentrations and 5 towards other Political Science course units. All Stanford-in-Washington courses and transfer credit from outside of Stanford require petitions which must be reviewed and approved by the Director of Undergraduate Studies. Petitions must be submitted within one quarter of course completion, or within one quarter of declaring the major. Cognate courses do not require a petition.
  7. Directed reading and Oxford tutorial units also require a petition and may only be applied towards related course work units. These units may not be used in the concentrations, and no more than 10 combined units of directed reading and Oxford tutorial units may count toward the required 70 Political Science units.
  8. All courses for the major must be completed with a letter grade of 'C' or better.

## COGNATE COURSES

- AFRICAST 111/211. Education for All? The Global and Local in Public Policy Making in Africa
- AFRICAST 112/212. AIDS, Literacy, and Land: International Aid and the Problems of Development in Africa
- ECON 1A,B. Introductory Economics A, B
- ETHICSOC 185M. Contemporary Moral Problems (same as PHIL 72)
- IPS 219. Intelligence and National Security
- IPS 221. International Organization and Institution
- IPS 246. China on the World Stage
- MS&E 193,193W, 293. Technology and National Security
- PUBLPOL 102. Organizations and Public Policy (same as PUBLPOL 202)
- STATS 60. Introduction to Statistical Methods (same as PSYCH 10 and STATS 160)
- OSPBEIJ 66. Essentials of China's Criminal Justice System
- OSPBER 15. Shifting Alliances? The European Union and the U.S.
- OSPBER 115X. The German Economy: Past and Present
- OSPBER 126X. A People's Union? Money, Markets, and Identity in the EU
- OSPCPTWN 31. Theory and Politics of Foreign Aid
- OSPFLOR 51. Italian Foreign Policy and the Global Players
- OSPFLOR 53. Law and the Use of Force: A Historical Appraisal

- OSPFOR 78. An Extraordinary Experiment: Politics and Policies of the New European Union
- OSPKYOTO 215X. The Political Economy of Japan
- OSPMOSC 72. Space, Politics, and Modernity in Russia
- OSPMOSC 74. Post-Soviet Eurasia and SCO: Society, Politics, Integration
- OSPOXFRD 18. Making Public Policy: An Introduction to Political Philosophy, Politics, and Economics
- OSPOXFRD 24. British and American Constitutional Systems in Comparative Perspective
- OSPOXFRD 35. Modern UK and European Government and Politics
- OSPOXFRD 41. Europe and US Foreign Policy
- OSPPARIS 32. Understanding French Politics
- OSPPARIS 57. Human Rights in Comparative Perspective
- OSPPARIS 122X. Challenges of Integration in the European Union
- OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century
- OSPSANTG 129X. Latin America in the International System
- OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective

## RESEARCH HONORS TRACK PROGRAM

2011-12 is the first year of a research-based track within the undergraduate major. The track will lead to a B.A.H. (Bachelor of Arts with Honors) in Political Science and replaces the existing honors program described below. The five-year pilot program is designed to provide its students with the analytical tools they need to write honors theses and collaborate with Stanford faculty and Ph.D. students. Professor Stephen Haber is the 2011-12 program director.

To receive a B.A.H. in Political Science students must apply and be accepted to the research honors track. Students must apply to the program in the Spring Quarter of the sophomore year or Autumn Quarter of the junior year. A complete application includes a transcript; a letter of recommendation from a member of the Stanford Political Science faculty or from a teaching assistant in a Political Science course; and an essay outlining the student's interest in the research honors track.

To fulfill the research honors track major requirements, a student must:

1. Complete 70 units
  - a. All courses taken for the research honors track must receive a letter grade of 'C' or better. Junior research honors track courses (see 2d) must receive a 'B' or better to count toward the major. Students unable to meet these requirements may be removed from the track.
  - b. 10 units of introductory course work in Political Science. Students must complete at least two of the following courses, preferably by the end of Spring Quarter of sophomore year: POLISCI 1, POLISCI 2, POLISCI 3 or POLISCI 3P, or POLISCI 4. It is recommended that research honors track students enroll in one of the discussion sections designed for students interested in research.
  - c. 10 units of a math/statistics sequence. This can be completed by taking one of the following sequences
    - STATS 60 and 191
    - STATS 116 and 200
    - POLISCI 150A and 150B
    - ECON 102A and 102B.
 Students are encouraged to complete a calculus sequence, either by taking MATH 51, MATH 40 and 41, or MATH 19, 20, and 21.
  - d. Three courses designed for the research honors track, to be taken during junior year:
    - POLISCI 291. Political Institutions

- POLISCI 292. Political Behavior
- POLISCI 293. Research Design

Students must earn a minimum grade of 'B' in these three classes. To accommodate students studying at overseas campuses during their junior year, these courses are offered during the winter and spring quarters. (With two exceptions, most overseas programs are offered during Autumn Quarter.)

- e. Two 300-level or 400-level graduate elective courses during senior year.
  - f. Three 100-level or 200-level Stanford POLISCI courses that must be approved by the student's adviser.
  - g. A Political Science Writing in the Major (WIM) course.
  - h. 10 units of honors thesis work.
2. Complete at least one intensive summer research experience. After sophomore year, students have special access to the Department of Political Science Summer Research College (SRC). After junior year, students may choose to spend the summer advancing their own research project under faculty direction, with funding from the VPUE. Independent summer research may include traveling to archives or libraries, conducting surveys or interviews, or working with Stanford research teams off-campus.
  3. Students may petition a maximum of 10 units to count for the major. Transfer students are allowed to petition a maximum of 20 units. All petitions and transfer courses require approval from the research honors track director.

## HONORS PROGRAM (2011-12 ONLY)

Students interested in earning a B.A.H. in Political Science must apply to the research honors track program described above. The department's previously existing honors program is suspended for five years, and the requirements listed here apply only to seniors accepted into the program as juniors in 2010-11.

Students pursuing honors must complete the following by the end of Spring Quarter of their junior year:

1. Methods requirement (STATS 60, ECON 102A, POLISCI 150A,B,C, 151A, or 151B)
2. WIM requirement
3. Research paper from an advanced undergraduate seminar or directed reading

Students who are accepted into the program should plan to make the thesis the focus of their senior year. They should enroll in 10-15 units of POLISCI 299A,B,C, which covers research and writing directed by the student's adviser.

To complete the honors program, students must:

1. Complete all requirements for the major.
2. Enroll in POLISCI 299Q during Spring Quarter of the student's junior year. This course is designed to help students understand the research process and map out a concrete time line for their thesis work. Enroll in at least 10 units of POLISCI 299A, B, or C, Senior Project. Students must take at least two quarters of Senior Project units.
3. Complete a thesis of honors quality, for a grade of 'B+' or better.

Students cannot apply units from the POLISCI 299Q, Junior Research Seminar, toward the 70-unit requirement for the major. However, students can apply up to 10 units from POLISCI 299A,B,C, Senior Project, toward the 70-unit requirement.

## MINOR IN POLITICAL SCIENCE

Students must complete their declaration of the minor on Axess no later than the end of the junior year. They must submit the minor declaration form to the undergraduate administrator in Encina Hall West 100. This form can be found in Encina Hall West 100 or at <http://politicalscience.stanford.edu/minor.html>.

To receive a minor in Political Science, a student must complete a minimum of 30 unduplicated units. All units must be in Political Science courses or cognate courses. All courses for the minor must be taken for a letter grade. Students must receive a minimum letter grade of 'C' in all courses for the minor.

*Concentration*—The student selects a primary subfield in which three courses are taken. One of these courses is the introductory course, the other two are at a more advanced level (numbered above 100). The concentration corresponds to one of the subfields the department already has in place, namely, American politics, comparative politics, international relations, and political theory.

*Distribution*—Three courses must be in the primary concentration, as specified above, for 15 units. An additional 10 units of intermediate and advanced courses (100 level or above) must be in two additional subfields. The final 5 units may be in any related subfield. ECON 1A or 1B may also be used to satisfy the last five units.

*Petitioned courses*—Students may petition for a maximum of 5 units to count towards the minor. This includes directed readings and Stanford in Washington courses. Directed readings and Stanford in Washington courses may only count towards the last five related units for the minor. Transfer students can petition a maximum of 10 units towards the minor, while non-transfer students can petition a maximum of five units towards the major. All petitioned courses must be individually reviewed and approved by the Director of Undergraduate Studies. Students can download the petition form or pick one up from Encina Hall West, room 100. Students must submit petitions to the undergraduate administrator in Encina Hall West, room 100.

## MASTER OF ARTS IN POLITICAL SCIENCE

The Political Science department does not offer a terminal M.A. degree. An M.A. degree may only be pursued in combination with a doctoral degree from another department within the University or with an advanced degree from one of the University's professional schools. Students interested in pursuing the M.A. should discuss the application requirements with the graduate administrator in Political Science.

Students from within the department and from other degree programs who have applied to the M.A. program may elect to take the M.A. degree in Political Science when they have met the following requirements:

1. Completion of at least three quarters of residency as a graduate student with 45 units of credit of which at least 25 units must be taken in Political Science graduate seminars of 300 level and above. Not more than 25 units of the 45-unit requirement may be taken in a single field.
2. At least two graduate seminars in each of two fields and at least one graduate seminar in a third field.
3. The remaining 20 units must come from courses numbered above 100. Of those 20 units, not more than 10 units of work from related departments may be accepted in lieu of a portion of the work in Political Science. Not more than 10 units may be taken as directed reading.
4. Courses must be numbered above 100.
5. A grade point average (GPA) of 2.7 (B-) or better must be attained for directed readings and all course work. No thesis is required.

The department does not offer a coterminal bachelor's and master's degree.

Political Science doctoral candidates may pursue master's degrees from other departments. Recent examples include but are not restricted to master's degrees in Statistics and Economics. Students interested in this option should consult the relevant sections of this Bulletin for both University and department requirements for master's degrees.

## DOCTOR OF PHILOSOPHY IN POLITICAL SCIENCE

The University's basic requirements for the Ph.D. degree are discussed in the "Graduate Degrees" section of this bulletin.

Programs of study leading to the Ph.D. degree are designed by the student, in consultation with advisers and the Director of Graduate Studies, to serve his or her particular interests as well as to achieve the general department requirements. A student is

recommended to the University Committee on Graduate Studies to receive the Ph.D. degree in Political Science when the following program of study has been completed:

1. The candidate for the Ph.D. degree must take three of the following concentrations in political science: American politics, comparative politics, international relations, methodology, and political theory. Students concentrate on two of these areas by fulfilling, depending on the concentration, combinations of the following: written qualifying examinations, research papers, research design, or course work. The requirement for the third concentration may be satisfied by taking either a written examination in that area or by taking a minimum of 10 units with a grade point average (GPA) of 3.0 (B) or better in the third concentration from among the formal graduate-level courses in the five divisions of the department. The third concentration cannot be satisfied by courses taken as a requirement for a first or second concentration. A third concentration in theory requires two courses in addition to the five units necessary to fulfill the program requirement. A third concentration in methodology requires two courses in addition to the 10 units necessary to fulfill the program requirement. Completion of special concentrations may require more than 10 units of course work.
2. The Ph.D. candidate is required to demonstrate competence in a language and/or skill that is likely to be relevant to the dissertation research. The level of competence needed for successful completion of the research is determined by the student's adviser. All candidates must complete at least 10 units of statistical methodology or its equivalent. Previous instruction can be counted towards this requirement only if approved by the Director of Graduate Studies.
3. Every Ph.D. candidate must complete at least five units of graduate-level instruction in political theory.
4. By the start of the fourth quarter in residence, each graduate student submits a statement of purpose to the student's adviser. This statement indicates the student's proposed major concentrations of study, the courses taken and those planned to be taken to cover those fields, the student's plan for meeting language and/or skill requirements, plans for scheduling of comprehensive examinations and/or research papers, and, where possible, dissertation ideas or plans. This statement is discussed with, and must be approved by, the student's adviser. In the Autumn Quarter following completion of their first year, students are reviewed at a regular meeting of the department faculty. The main purposes of this procedure are, in order of importance: to advise and assist the student to realize his or her educational goals; to provide an incentive for clarifying goals and for identifying ways to achieve them; and to facilitate assessment of progress toward the degree.
5. Students must take the comprehensive exams in two major fields by the end of their second year in the program. Students are expected to have passed these examinations and to have faculty approval of their research paper by the end of their second year.
6. Upon completion of one research paper and two comprehensive exams in his or her two major concentrations, the student files an Application for Candidacy for the Doctoral Degree which details program plans and records. The University and the department expect that students be advanced to candidacy by the completion of their sixth quarter as a full-time student. Each second-year student is reviewed and considered for admission to candidacy in a meeting of the faculty that is typically held during the tenth week of Spring Quarter. Since completion of two comprehensive exams and a research paper are prerequisites for admission to candidacy, students should plan their first- and second-year studies so that these requirements are satisfied by the time of the faculty review meeting. In particular, students should submit their research paper to the relevant faculty readers no later than the middle of Winter Quarter, since revisions of the paper are often required prior to obtaining faculty approval.

7. During the third year, a formal dissertation proposal must be submitted to and approved by the student's dissertation adviser and the Director of Graduate Studies. Dissertation proposals must be approved by the end of the third year.
8. A candidate for the Ph.D. in Political Science is required to serve as a teaching assistant (TA) in the department for a minimum of three quarters.
9. Doctoral candidates who apply for the M.A. degree are awarded that degree on completion of the requirements outlined in the description of the M.A. program.
10. The candidate must pass the University oral examination on the area of the dissertation at a time, after the passing of the written comprehensive examinations, suggested by the candidate's dissertation committee.
11. The candidate must complete a dissertation satisfactory to the dissertation reading committee.

## PH.D. MINOR IN POLITICAL SCIENCE

Candidates in other departments which accept a minor in Political Science select two concentrations in political science in consultation with the Director of Graduate Studies and submit to her or him a program of study for approval. Written approval for the program must be obtained from the Director of Graduate Studies before application for doctoral candidacy. Students are required to complete at least 20 units in Political Science courses. Courses must be 300 level and above. Grades must be a GPA of 3.0 (B) or better. Candidates may be examined in their concentrations in the general oral examination by a member of the Department of Political Science, chosen in consultation with the Director of Graduate Studies.

## OVERSEAS STUDIES COURSES IN POLITICAL SCIENCE

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (<http://explorecourses.stanford.edu>) or the Bing Overseas Studies web site (<http://bosp.stanford.edu>). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

### AUTUMN QUARTER

#### BEIJING

OSPBELJ 66. Essentials of China's Criminal Justice System. 5 units, Wang, GER:DB:SocSci, EC:GlobalCom

#### BERLIN

OSPBER 15. Shifting Alliances? The European Union and the US. 4-5 units, Brückner, GER: DB:SocSci, EC:GlobCom

OSPBER 115X. German Economy: Past and Present. 4-5 units, Klein, GER:DB:SocSci, EC:GlobalCom

OSPBER 126X. A People's Union? Money, Markets, and Identity in the EU. 4-5 units, Brückner, GER: DB:SocSci, EC: GlobCom

#### FLORENCE

OSPFLOR 51. Italian Foreign Policy and the Global Players. 5 units, Pistelli

OSPFLOR 53. Law and the Use of Force: An Historical Appraisal. 3 units, Sofaer

#### KYOTO

OSPKYOTO 215X. Political Economy of Japan. 4-5 units, Hayashi, DB:SocSci.

#### MOSCOW

OSPMOSC 72. Space, Politics and Modernity in Russia. 5 units, Medvedev, GER:DB:SocSci, EC:GlobalCom

OSPMOSC 74. Post-Soviet Eurasia and SCO: Society, Politics, and Integration

#### OXFORD

OSPOXFRD 35. Modern UK and European Government and Politics. 4-5 units, Cappocia, GER:DB:SocSci

#### PARIS

OSPPARIS 32. Understanding French Politics. 4-5 units, Chamorel, GER:DB: SocSci

#### SANTIAGO

OSPSANTG 221X. Political Transition and Democratic Consolidation: Chile in Comparative Perspective. 5 units, Micco, GER:DB:SocSci

### WINTER QUARTER

#### FLORENCE

OSPFLOR 78. An Extraordinary Experiment: Politics and Policies of the "New" European Union.

#### OXFORD

OSPOXFRD 18. Making Public Policy: an Introduction to Political Philosophy, Politics and Economics. 4-5 units, McMahon, GER:DB:SocSci

#### PARIS

OSPPARIS 57. Human Rights in Comparative Perspective. 4-5 units, Boussaguet, GER:DB:SocSci, EC:GlobalCom

#### SANTIAGO

OSPSANTG 129X. Latin America in the International System. 4-5 units, GER: DB:SocSci

### SPRING QUARTER

#### BERLIN

OSPBER 15. Shifting Alliances? The European Union and the US. 4-5 units, Brückner, GER: DB:SocSci, EC: GlobCom

#### CAPETOWN

OSPCPTWN 31. Theory and Politics of Foreign Aid. 3 units, Klingebiel

#### KYOTO

OSPKYOTO 215X. Political Economy of Japan. 4-5 units, Hayashi, GER:DB:SocSci

#### OXFORD

OSPOXFRD 24. British and American Constitutional Systems in Comparative Perspective. 4-5 units, McMahon, GER:DB:SocSci

OSPOXFRD 41. Europe and US Foreign Policy. 5 units, Schultz. GER: DB:SocSci

#### PARIS

OSPPARIS 122X. Challenges of Integration in the European Union. 4-5 units, Strudel, GER:DB:SocSci

#### SANTIAGO

OSPSANTG 116X. Modernization and its Discontents: Chilean Politics at the Turn of the Century. 5 units, Correa, GER:DB:SocSci

# PSYCHOLOGY

*Emeriti (Professors)* Albert Bandura, Gordon H. Bower, Lyn K. Carlsmith, John H. Flavell, Albert H. Hastorf, Leonard M. Horowitz, Eleanor E. Maccoby, David Rosenhan, Roger N. Shepard, Claude Steele, Barbara Tversky, Philip G. Zimbardo

*Chair:* James L. McClelland

*Professors:* Nalini Ambady, Laura L. Carstensen, Herbert H. Clark, Geoffrey Cohen, Carol Dweck, Ian H. Gotlib, James J. Gross, John D. Krumboltz, Mark R. Lepper, Ellen M. Markman, Hazel R. Markus, James L. McClelland, Dale Miller, Lee D. Ross, Ewart A. C. Thomas, Anthony Wagner, Brian Wandell, Jeffrey J. Wine

*Professor (Research):* Anthony Norcia

*Associate Professors:* Jennifer L. Eberhardt, Anne Fernald, Kalanit Grill-Spector, Brian Knutson, Benoit Monin, Jeanne L. Tsai

*Associate Professor (Teaching):* Catherine Heaney

*Assistant Professors:* Lera Boroditsky, Michael Frank, Noah Goodman, Samuel M. McClure, Gregory M. Walton, Jamil Zaki

*Lecturers:* Amie Haas, Beverley Hartman, Jennifer Winters

*Courtesy Professors:* William C. Dement, Gary H. Glover, Jon Krosnick, Tanya Luhmann, William T. Newsome, Anne C. Petersen

*Department Offices:* Jordan Hall, Building 420

*Mail Code:* 94305-2130

*Department Phone:* (650) 725-2400

*Web Site:* <http://psychology.stanford.edu>

Courses offered by the Department of Psychology are listed under the subject code PSYCH on the *Stanford Bulletin's* ExploreCourses web site.

The department, housed in Jordan Hall, maintains shop facilities and many computer-equipped laboratories. Bing Nursery School, located on campus at 850 Escondido Road, provides a laboratory for child observation, training in nursery school teaching, and research. It was constructed with funding from the National Science Foundation and a special grant from Mrs. Anna Bing Arnold and Dr. Peter Bing.

The department provides

- courses designed for the general student
- a major program leading to the degree of Bachelor of Arts, including options for honors and a specialization in one of four content area tracks
- an undergraduate minor program
- a coterminal master's degree program leading to the degree of Master of Arts
- programs of graduate study and research leading to the degree of Doctor of Philosophy
- a Ph.D. minor

Applications are not accepted for the master's degree except as noted below.

## MISSION OF THE UNDERGRADUATE PROGRAM IN PSYCHOLOGY

The mission of the undergraduate program in Psychology is to introduce students to the corpus of data on, and explanations of, human nature and behavior. Through the study of abnormal behavior, aging, child development, cognitive processes, decision making, emotion, group behavior, infancy, language, learning and memory, personality, social perception, visual perception, and other related topics, students are introduced to the properties of sensory, cognitive, and affective systems, and of their interrelationships to the reciprocal effects of one person on another and to the effects on behavior of the physical, social, and cultural environment. The major provides students with preparation for professional careers in computer science, business, counseling, education and law or medicine as well as for graduate work in Psychology.

## LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of core knowledge within the discipline of psychology.
2. the ability to communicate ideas clearly and persuasively in writing.
3. the ability to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
4. the ability to evaluate theory and critique research within the discipline of psychology.

## BACHELOR OF ARTS IN PSYCHOLOGY

*Major Requirements*—Students declaring a major in Psychology must complete a minimum of 70 units of course work in Psychology, 60 of which must be taken in the Psychology department. The remaining 10 units can be taken outside of the Psychology department but must be pre-approved by the student services office or faculty adviser. These courses should represent a coherent thematic focus. One way to achieve this focus is through a field of study. Courses taken to satisfy the 70-unit requirement must be taken for a grade of 'C-' or better (except for courses offered only on a satisfactory/no credit basis). Majors must take PSYCH 1, Introduction to Psychology, and PSYCH 10, Introduction to Statistical Methods. Advanced placement (AP) credit may no longer be used toward the Psychology major requirements. Beyond these two required courses, students must complete at least five of the following eleven core Psychology courses, with a minimum of two from each area A and B:

*Area A Courses—*

- BIO 20. Introduction to Brain and Behavior
- PSYCH 30. Introduction to Perception
- PSYCH 45. Introduction to Learning and Memory
- PSYCH 50. Introduction to Cognitive Neuroscience
- PSYCH 55. Introduction to Cognition and the Brain

*Area B Courses—*

- PSYCH 60. Introduction to Developmental Psychology
- PSYCH 70. Introduction to Social Psychology
- PSYCH 75. Introduction to Cultural Psychology
- PSYCH 80. Introduction to Introduction to Personality and Affective Science
- PSYCH 90. Introduction to Clinical Psychology
- PSYCH 95. Introduction to Abnormal Psychology

Students who declared a major in Psychology prior to the 2005-06 academic year may choose to adhere to the 55-unit major requirement, taking PSYCH 1 and 10, five core courses, and elective courses, totaling 55 units.

Students must take one Writing in the Major (WIM) course in Psychology, and should check the *Stanford Bulletin* yearly as these courses may change. The department also strongly recommends that all majors take at least one advanced seminar.

Students may count up to 10 units of research, independent study, and practica (including but not limited to PSYCH 194, 195, 281) toward the Psychology major. Students who are teaching assistants for a Psychology course or are enrolled in the senior honors program are allowed up to 15 units in independent study and research. Any units beyond the limit of 10 or 15 may be counted toward the 180 units required for graduation.

Students who are double majoring or completing a minor degree in another department may not overlap (double-count) courses, unless the overlapping courses constitute introductory skill requirements, such as PSYCH 10, Introduction to Statistical Methods. In this instance, while the course requirement would be satisfied, the units for the course can only be applied to one

program of study, not both. Consult the student services office for further clarification.

Summer Quarter Psychology courses are not equivalent to courses given during the regular academic year and, while applicable toward the 70 units needed for the major, may not be used to fulfill core course requirements. Additionally, a course taken during the Summer Quarter cannot be used to replace the grade of a non-Summer Quarter course, even if the title and units of the two courses are the same.

*Beyond the Minimal Requirements*—The following recommendations may be helpful to students who wish to plan a program which goes beyond the minimal requirements listed above:

1. Within the general major, the student may take advanced undergraduate or graduate courses, including seminars. The student may also take advantage of widespread opportunities for directed research, working closely with individual faculty and graduate students.
2. The student may apply to the senior honors program, described below.
3. The student may elect to pursue one of four fields of study: Cognitive Sciences; Health and Development; Mind, Culture, and Society; or Neuroscience, described below.

The training obtained from the pursuit of any of these options is valuable not only for students considering graduate work in Psychology, but also for those thinking of professional careers outside of Psychology in fields such as computer science, business, counseling, education, law, or medicine.

## CREDIT FROM OUTSIDE THE DEPARTMENT

Psychology majors must complete at least 60 units of course work toward their major at Stanford within the Psychology department. Psychology minors may count no more than a total of 10 units credit from outside the department toward the minor. Both majors and minors, under extenuating circumstances, may use one course from outside the department to fulfill core course requirements. Additional courses may be used to fulfill the 70-unit major requirement, but may not be counted as core courses. Please see the student services office for further clarification.

Petition for transfer of credit is rarely granted. In cases where petitioning is necessary, there are two types of credit from outside the department: external transfer credit for courses taken at institutions other than Stanford and credit for courses in other Stanford departments. A student must have already declared Psychology as a major or minor in order to submit a petition for transfer credit. Stanford credit for courses completed at other institutions must have been granted by the External Credit Evaluation section of the Registrar's Office; those units may be applied toward the 180 units required for graduation. To have credit from outside the department evaluated to fulfill requirements toward the Psychology major or minor, students must complete an Undergraduate Petition form, available from the student services office, and submit it with a course syllabus. Students requesting external transfer credit must also submit a copy of the signed transcript from the External Credit Evaluation section of the Registrar's Office showing the number of Stanford units granted for the course. The Psychology department then evaluates external credit courses and courses from other Stanford departments to determine if they can be applied toward Psychology major or minor requirements.

## FIELDS OF STUDY

Students in the major program, including those in the senior honors program, may elect to specialize in one of four fields of study: Cognitive Sciences; Health and Development; Mind, Culture, and Society; or Neuroscience. Fields of study consist of a coherent set of courses leading to advanced undergraduate or even graduate-level courses in an area. In the ideal case, the student who specializes would acquire an understanding of a range of psychological processes, as well as an appreciation of the significance of these processes in the chosen area of application. In

this way, specialization could facilitate the student's preparation for a professional career in, for example, medicine, business, or counseling, as well as for graduate work in Psychology.

Specialization in a field of study is optional, although students who do not wish to complete all the requirements for a track may still want to use the track as a guideline for an integrated program in Psychology. Students who choose to complete a field of study must meet the requirements for the major plus the additional requirements designated for the field of study. Typically the courses required for a field of study include one or two required courses, four to six recommended courses in Psychology, one or two advanced seminars, and three or four courses in related disciplines. Psychology courses completed for the field of study count toward satisfying the major requirements. Courses from other departments listed for the field of study may count toward the 10 outside units for the major requirement, but must be pre-approved by the student services office or faculty adviser.

## HONORS PROGRAM

The senior honors program is designed for exceptionally able Psychology majors who wish to pursue a year of intensive supervised independent research. Admission to the program is made at the end of the student's junior year on the basis of:

- excellent academic performance
- previous research experience
- two letters of recommendation by faculty and/or graduate students

Applications are available late Spring Quarter and are to be submitted to the student services office with a current transcript and recommendations prior to the student's senior year.

Students interested in the program should involve themselves in research as early as possible and should acquire a broad general background in Psychology, including statistics, and a deep background in their chosen area. The honors program is particularly appropriate for students planning to go to graduate school in Psychology or in other social sciences, as well as in computer science, business, counseling education, law, and medicine.

During Autumn Quarter of their senior year, honors program students participate in a weekly seminar and meet with their advisers to develop their experimental program and begin data collection. Winter and Spring Quarters are devoted to completing the research, analyzing the data, and writing the thesis, which is submitted mid-May. Students give oral presentations of their projects at the annual Honors Convention. This convention is attended by undergraduates, graduate students, and faculty.

## MINOR IN PSYCHOLOGY

*Declaration*—Students who wish to declare a minor field of concentration in Psychology must do so no later than the deadline for their application to graduate.

*Requirements*—Completion of a minimum of 35 units in Psychology is required for the minor, including PSYCH 1, Introduction to Psychology, and PSYCH 10, Introduction to Statistical Methods, or a comparable statistics course. Advanced placement (AP) credit may no longer be used towards the Psychology minor.

The minor must include three of eleven core courses, with a minimum of one from each of two areas (A: BIO 20; PSYCH 30, 45, 50, 55; and B: 60, 70, 75, 80, 90, 95) and elective Psychology courses of at least three units each, totaling 35 units. Students who declared a Psychology minor prior to the 2002-03 academic year may choose any three of the eleven core courses.

Students who declared a Psychology minor prior to the 2005-06 academic year may choose to complete seven total courses: PSYCH 1 and 10, three core courses, and two elective courses.

Independent study, research, and practica cannot be counted toward the minor. Summer Quarter Psychology courses are not applicable toward the 35 units needed for the minor.

All courses used to fulfill the requirements of the minor must be passed with a grade of 'C-' or better, except for courses offered only on a satisfactory/no credit basis. No more than 10 units of transfer credit may be counted toward the Psychology minor.

## MASTER OF ARTS IN PSYCHOLOGY

The Department of Psychology offers a Master of Arts degree only to students concurrently enrolled in its Ph.D. program or to students currently pursuing Stanford B.A. or M.A. degrees. In exceptional cases, students concurrently enrolled in another doctoral or professional program at Stanford may also apply for the M.A. degree. Such applicants should consult with the student services office.

All applicants must satisfy University residency requirements for the degree and are responsible for consulting with their primary departments or the Financial Aid Office about the effects of the proposed program on their current funding. General University requirements for the master's degree are described in the "Graduate Degrees" section of this bulletin.

**Coterminal Program**—Stanford undergraduates who would like advanced training in Psychology may apply for a coterminal M.A. degree in Psychology. To do so, students should consult with the student services office. Along with a coterminal program application, applicants must submit:

1. a statement of purpose
2. a preliminary program plan specifying the courses in which they intend to enroll to fulfill degree requirements
3. at least two letters of recommendation from Stanford faculty members familiar with their academic work
4. a current Stanford undergraduate transcript
5. a written nomination by a member of the Psychology faculty willing to serve as the student's master's degree adviser

This program is limited in size and admission is selective. Applicants must have earned a minimum of 120 units towards graduation as shown on the undergraduate transcript. The department's deadline for the submission of an application to the coterminal program is traditionally in January.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see <http://studentaffairs.stanford.edu/registrar/publications#Coterm>.

## REQUIREMENTS

Students must complete at least 45 units of Psychology courses for the degree. (For coterminal degree students, course work for the master's degree may not duplicate courses taken for the undergraduate degree.) Of these 45 units, at least 27 must be in Psychology courses numbered 200 or above. Units from research, teaching, practica, independent study, and lab courses, such as PSYCH 258, 269, 275, 281, 282, and 297, may not be counted toward these 27 units. Two of the graduate courses of at least 3 units each (one from Area A and one from Area B below) are required. In addition, at least one upper division statistics course is required. The course must be approved by the student's adviser. It is recommended that all coterminal students enroll in PSYCH 196, Contemporary Psychology: Overview of Theory, Research, Applications.

Courses to be counted toward the master's degree must be passed with a grade of 'B-' or better, unless the course is offered only on a satisfactory/no credit basis. Units from research, teaching, practica, independent study, and lab courses, such as PSYCH 258, 269, 275, 281, 282, and 297, may be counted toward the remaining required 18 units. Psychology courses numbered in the 100-level and courses from other Stanford departments may be used to satisfy the remaining 18 units. Courses specifically for undergraduates, such as undergraduate honors courses, and courses offered in the Summer Quarter may not be counted toward the master's program unit requirements.

Demonstration of competence in the design and execution of psychological research is also required for receipt of the master's degree. This demonstration entails completion of a master's thesis containing original research. If the student is currently writing a senior honors thesis, this honors thesis may be accepted as proof of research competence provided the honors thesis is judged to be master's level research by the student's adviser and the department's graduate program committee. If the student has completed an honors thesis in Psychology in the prior year, the student would be expected to continue independent research during the coterminal year and to submit this research in a written report which, together with the completed honors thesis, would constitute the master's thesis. All students are required to make an oral presentation of their research during the Spring Quarter, and to present their thesis or written report in June.

Applicants to the coterminal program must have an adviser in the department who agrees to supervise the student's research. Students in the program may be terminated if they do not have an adviser, or if they are not making satisfactory progress in research or course work.

### Area A Courses—

- PSYCH 202. Cognitive Neuroscience
- PSYCH 205. Foundations of Cognition
- PSYCH 210. Foundations of Memory
- PSYCH 221. Applied Vision and Image Systems
- PSYCH 228. Ion Transport
- PSYCH 251. Affective Neuroscience
- PSYCH 261. Emotion
- PSYCH 261A. Learning and Cognition in Activity

### Area B Courses—

- PSYCH 211. Developmental Psychology
- PSYCH 212. Social Psychology
- PSYCH 213. Affective Science Seminar
- PSYCH 215. Mind, Culture, and Society
- PSYCH 217. Topics and Methods in Cultural Psychology
- PSYCH 259. Emotions: History, Theories, Research
- PSYCH 271. Applications of Social Psychology

## DOCTOR OF PHILOSOPHY IN PSYCHOLOGY

There are no specific course requirements for admission to the doctoral program. However, an applicant should have research experience as an undergraduate, as well as the equivalent of an undergraduate major in Psychology. The major focus of the doctoral program is on research training, and admission is highly selective.

Applicants for admission must submit their scores on the general Graduate Record Examination as part of the application. GRE subject scores are recommended.

General University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

In addition to fulfilling Stanford University requirements for the degree, the following departmental requirements are stipulated.

**First-Year Course Requirements**—During the first year of graduate study, the student must take PSYCH 207, Proseminar for First-Year Ph.D. Graduate Students, at least one approved graduate statistics course, and at least two core courses from the following list:

- PSYCH 202. Neuroscience
- PSYCH 205. Foundations of Cognition
- PSYCH 211. Developmental Psychology
- PSYCH 212. Social Psychology
  - or PSYCH 215. Mind, Culture, and Society
- PSYCH 213. Affective Science

Students in each area may be required to take up to two additional non-core graduate courses in their area of specialization.

The student is expected to spend at least half of the time in research from the beginning of the first year of graduate study to the completion of the Ph.D., taking no more than 10 units of course

work each quarter. At the end of the first year of graduate study, the student must file with the department a written report of the first-year research activities.

*Second Year Course Requirements*—By the end of the second year of graduate study, the student should complete the core courses listed above and take a second approved graduate course in statistics.

*Third-Year and Beyond*—Students are expected to form a research committee, which must include the dissertation reading committee, before the initiation of the dissertation research. The research committee includes the dissertation adviser and consists of at least three faculty members, at least two of whom should have primary appointments in the Psychology department. For University guidelines for the composition of the dissertation reading committee, see the "Graduate Degrees" section of this bulletin.

The research committee should meet no later than the last day of classes of Spring Quarter of the third year, and determines the timeline for further development of the dissertation research project. Subsequent meetings are triggered by the completion of one of two documents: a dissertation proposal (DP) or a conceptual analysis of the dissertation area (CADA). The timing and sequencing of the DP and CADA are developed by the student in consultation with the committee. As a general guide, one of the two preliminary elements (CADA or DP) should be completed by the end of the third Summer Quarter and the second should be completed by the end of the fourth Spring Quarter. Students are free to alter the membership of the committee at any time during the process, subject to consultation with the adviser.

The DP should be a description of the proposed research. The CADA provides a framework for the research topic of the dissertation, addresses the central issues within the specialty area, and reviews the pertinent literature.

*Advanced Course or Minor Requirements*—The candidate must complete 12 units of advanced graduate course work or a Ph.D. minor in another department. If a student waives the minor requirement in favor of the 12 advanced units, the student must fulfill the advanced course requirement by taking (a) non-core graduate courses required by a particular area, or (b) graduate-level courses in other departments comparable in quality to Psychology's graduate courses. If there is any question about comparability, the student should consult the adviser, student services, and, in some cases, the graduate program committee chair before taking the course.

*Orals*—The candidate must pass the University oral examination, which also serves as a dissertation defense. A committee is formed to review the oral examination, including the dissertation reading committee, an additional faculty member, and one oral examination committee chair from outside the Psychology department. The oral examination consists of a 40-45-minute presentation to the department of the completed dissertation research. Parents and friends are welcome to attend. Following the presentation, the student and the committee convene for a discussion of the dissertation and the presentation.

*Dissertation Requirements*—The candidate must complete a dissertation satisfactory to the dissertation reading committee prior to the oral examination. Minor revisions to formatting may be made after the oral examination.

Ph.D. candidacy expires five years after admission to candidacy at the end of the second year of study. Reapplication requires department reexamination.

## STUDENT EVALUATIONS

*First-Year Evaluation*—It is the department's policy to evaluate the progress of each graduate student at the end of the first year of graduate study. As part of the procedure, each student is required to file with the department a report of the first-year research activities.

Students should discuss this report and the evaluation procedures with their adviser as early as possible in their first year. If the student fulfills the academic promise displayed upon

entrance, he or she is invited to continue working towards the doctorate.

The first-year evaluation is primarily based on three factors:

1. quality of research carried out in the first year
2. performance in courses (especially required courses)
3. recommendations of the adviser (including a commitment on the part of that adviser to continue in that role).

*Second-Year and Beyond Evaluation*—A similar evaluation is conducted at the end of each year of graduate training involving the same criteria as the first year; however, the student is not required to submit a paper. Students who are not making satisfactory progress may be dropped from the program.

## THE DOCTORAL TRAINING PROGRAM

As indicated by the requirements described above, a student concentrates in any one of several areas within Psychology. Regardless of area, however, the training program places emphasis on the development of research competence, and students are encouraged to develop those skills and attitudes that are appropriate to a career of continuing research productivity.

Two kinds of experience are necessary for this purpose. One is the learning of substantial amounts of technical information. A number of courses and seminars are provided to assist in this learning, and a student is expected to work out a program, with his or her adviser, to attain this knowledge in the most stimulating and economical fashion.

A second aspect of training is one that cannot be gained from the courses or seminars. This is firsthand knowledge of, and practical experience with, the methods of psychological investigation and study. These methods include ways of behaving with the subjects being studied. Students are provided with whatever opportunities they need to reach those levels of competence representative of doctoral standing. Continuing research programs, sponsored by members of the faculty, offer direct opportunities for experience in fields represented by the faculty's many research interests.

Each student achieves competence in unique ways and at different rates. Each student and adviser share in planning a program leading to the objectives discussed. The student is expected to spend half of his or her time on research and takes no more than 10 units of course work per quarter. For further information please contact the student services office and the department graduate guide.

## TEACHING REQUIREMENT

The department views experience in supervised teaching as an integral part of its graduate program. Regardless of the source of financial support, all students serve as teaching assistants for at least five Psychology courses during their graduate study. Of the courses, two must be PSYCH 1, Introduction to Psychology, or PSYCH 10, 252 or 253, Statistical Methods. Students are discouraged from participating in teaching during the first year of graduate study. Students typically progress from closely supervised teaching to more independent work. Some students may be invited to offer a supervised, but essentially independent, seminar during their final year of graduate study.

## PSYCHOLOGY COLLOQUIUM

The Psychology Colloquium meets on most Wednesday afternoons at 3:45 p.m. Speakers from Stanford and other institutions present topics of current interest. Graduate students are expected to attend. Additional announcements may be found at <http://www.stanford.edu/dept/psychology/colloquium>.

## PH.D. MINOR IN PSYCHOLOGY

Candidates for the Ph.D. degree in other departments may elect a minor in Psychology. To obtain a minor, the student must complete 20 units of course work at the graduate level in the Department of Psychology, excluding PSYCH 275 (graduate-level research). Crosslisted graduate courses can be used to satisfy this

requirement. All courses counting toward the Ph.D. minor must be passed with a grade of 'B-' or better, unless the course is offered only on a credit/no credit basis.

## PUBLIC POLICY

*Director:* Bruce M. Owen (Stanford Institute for Economic Policy Research)

*Deputy Director:* Gregory L. Rosston (Stanford Institute for Economic Policy Research)

*Associate Director and Senior Lecturer:* Geoffrey Rothwell (Economics, Public Policy)

*Director of Undergraduate Capstone and Senior Lecturer:* Mary Sprague (Public Policy)

*Director of Graduate Practicum and Professor of the Practice of Public Policy:* Joe Nation (Public Policy)

*Executive Committee:* Laurence Baker (Medicine), Jonathan Bendor (Graduate School of Business), David Brady (Political Science, SIEPR), Samuel Chiu (Management Science and Engineering), Joshua Cohen (Political Science, Philosophy, Law), Morris Fiorina (Political Science, Hoover Institution), David Kennedy (History, emeritus), David Grusky (Sociology), Eric Hanushek (Hoover Institution, SIEPR), Deborah Hensler (Law), Jonathan Levin (Economics), Roger Noll (Economics, emeritus, SIEPR), Bruce Owen (SIEPR), Madhav Rajan (Graduate School of Business), Sean Reardon (Education), Lee Ross (Psychology), Gregory Rosston (SIEPR), Debra Satz (Philosophy), John Shoven (SIEPR, Economics), Kathryn Stoner-Weiss (Freeman Spogli Institute for International Studies)

*Affiliated Faculty:* William Abrams (Human Biology), Michael Armacost (Freeman Spogli Institute for International Studies), Jonathan Bendor (Graduate School of Business), Eric Bettinger (Education), Jayanta Bhattacharya (Medicine), Coit Blacker (Freeman Spogli Institute for International Studies), Lisa Blaydes (Political Science), Michael J. Boskin (Economics, Hoover Institution), Paul Brest (Law, emeritus), Jeremy Bulow (Graduate School of Business), Eamonn Callan (Education), Martin Carnoy (Education), John Cogan (Hoover Institution), Geoffrey Cohen (Psychology), Joshua Cohen (Political Science, Philosophy, Law), Gary Cox (Political Science), Christophe Crombez (Freeman Spogli Institute for International Studies), Larry Diamond (Freeman Spogli Institute for International Studies, Hoover Institution), Walter Falcon (Freeman Spogli Institute for International Studies, emeritus), Lawrence Friedman (Law), Lawrence Goulder (Economics, Freeman Spogli Institute for International Studies), Stephen Haber (Political Science, Hoover Institution), Justin Grimmer (Political Science), Deborah Hensler (Law), Pamela Hinds (Management Science and Engineering), Daniel Ho (Law), Nicholas Hope (Stanford Center for International Development), Caroline Hoxby (Economics, Hoover Institution, SIEPR), Joy Ishii (Graduate School of Business), Jakub Kastl (Economics), Daniel Kessler (Law, Hoover Institution, Graduate School of Business), Pete Klenow (Economics), Stephen Krasner (Political Science, Freeman Spogli Institute for International Studies, Hoover Institution), Jon A. Krosnick (Communication), Claire Lim (Graduate School of Business), Thomas MaCurdy (Economics, Hoover Institution), Robert McGinn (Management Science and Engineering; Science, Technology and Society), Milbrey McLaughlin (Education), Terry Moe (Political Science, Hoover Institution), Petra Moser (Economics), Joan Petersilia (Law), James Phills (Graduate School of Business), A. Mitchell Polinsky (Law), Walter Powell (Education), Robert Reich (Political Science), Douglas Rivers (Political Science, Hoover Institution), Lee Ross (Psychology), Ken Shotts (Graduate School of Business), Samuel So (Medicine), Stephan Stedman (Freeman Spogli Institute for International Studies), Jeff Strnad (Law), Barton Thompson (Law, Woods Institute, Freeman Spogli Institute for

International Studies), Michael Tomz (Political Science, SIEPR), Greg Walton (Psychology), Jonathan Wand (Political Science), Barry Weingast (Political Science, Hoover Institution), Robert M. White (Materials Science and Engineering), Frank Wolak (Economics, Freeman Spogli Institute for International Studies), Christine Min Wotipka (Education).

*Lecturers:* Laura Arrillaga (Graduate School of Business), Frank Benest (Public Policy), Jeffrey Clemens (SIEPR), David Crane (Public Policy), Tammy Frisby (Hoover Institution, Political Science), Dennis Gale (Urban Studies), Jonathan D. Greenberg (Law), Russell Hancock (Public Policy), Koichiro Ito (SIEPR), Adrienne Jamieson (Bing Stanford in Washington), Anjini Kochar (SIEPR), Eva Meyersson Milgrom (SIEPR, Sociology), Alyssa O'Brien (Program in Writing and Rhetoric), Mark Tendall (Economics), Patrick Windham (Public Policy)

*Program Office:* First Floor, SIEPR Gunn Building, 366 Galvez Street

*Mail Code:* 94305-6050

*Program Phone:* (650) 725-0109

*Web Site:* <http://publicpolicy.stanford.edu>

*Email:* [publicpolicy@stanford.edu](mailto:publicpolicy@stanford.edu)

Courses offered by the Public Policy Program are listed under the subject code PUBLPOL on the *Stanford Bulletin's* ExploreCourses web site.

### MISSION OF THE UNDERGRADUATE PROGRAM IN PUBLIC POLICY

The mission of the undergraduate program in Public Policy is to expose students to the concepts and tools used in evaluating public policy options and outcomes, and to prepare students for entry-level positions in organizations concerned with such analysis. The focus is chiefly on domestic policy issues, applicable anywhere in the world. Courses in the major provide students with background in economics and quantitative methods, political science, law, philosophy, ethics, organizational behavior, and social psychology. Economics and quantitative analyses are central to but not sufficient for modern public policy analysis; political science, law, philosophy, organizational behavior, and psychology are among other necessary disciplinary perspectives. Political philosophy and ethics form the foundations of public policy. Political science offers insights to the decision making process and information needs of a democracy. Organizational behavior focuses on the decisions made outside the market environment in hierarchies, bureaucracies, and teams. Nearly all public policy is formulated as law, and economic analysis of legal rules and institutions is key to effective implementation of policy decisions. Seniors have a research capstone requirement consisting either of an honors thesis or participation in a team practicum, conducting applied policy research for an outside client, typically a local or regional agency. Students majoring in Public Policy are prepared for careers in elective or appointed public office, business, law, and governmental agencies, or for further study in graduate or professional schools.

The Public Policy Program offers a Bachelor of Arts, an honors program, and a minor for undergraduates, as well as a coterminal M.A. in Public Policy.

### LEARNING OUTCOMES

The program expects its undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Program in Public Policy. Students are expected to demonstrate:

1. knowledge and understanding of Public Policy analytical tools.
2. ability to communicate ideas clearly and persuasively in written and oral forms.
3. ability to evaluate applied theoretical and empirical work in the discipline.

4. ability to apply skills and knowledge acquired in the curriculum to analyze policy issues and make policy recommendations.
5. demonstrate mastery in senior capstone experience.

## GRADUATE PROGRAMS IN PUBLIC POLICY

University requirements for the master's degree are described in the "Graduate Degrees" section of this Bulletin.

Courses in the graduate program in Public Policy offer advanced skills necessary to assess the performance of alternative approaches to policy making and implementation, evaluating program effectiveness, understanding the political constraints faced by policy makers, and appreciating the conflicts in fundamental human values that often animate policy debate. After completing the graduate core curriculum, students apply these skills by focusing their studies in a two quarter, 10-unit practicum for the M.P.P., or a 5-unit master's thesis for the M.A. Students in the M.P.P. program also complete at least one concentration tailored to the student's primary degree program or the student's interests and skills.

The Graduate Program in Public Policy offers two master's degrees:

- Master of Public Policy (M.P.P.), a two-year program leading to a professional degree
- Master of Arts (M.A.), a one-year program not intended as a professional degree

The following joint degree programs, permitting students to complete requirements for two degrees with a reduced number of total residency units, are also offered:

- Juris Doctor with a Master of Public Policy (J.D./M.P.P.)
- Juris Doctor with an M.A. of Public Policy (J.D./M.A.)
- Doctor of Philosophy in Economics, Education, Management Science and Engineering, Psychology, or Sociology with a Master of Public Policy (Ph.D./M.P.P.)
- Master of Business Administration with a Master of Public Policy (M.B.A./M.P.P.)
- Master of Arts in International Policy Studies with a Master of Public Policy (M.A./M.P.P.)
- Master of Science in Management Science and Engineering with a Master of Public Policy (M.S./M.P.P.)

Requirements for the joint degrees differ from completing the two degrees separately. See the "Master's Degrees in Public Policy" section for more details.

## BACHELOR OF ARTS IN PUBLIC POLICY

The core courses in the Public Policy Program develop the skills necessary to assess the performance of alternative approaches to policy implementation, evaluate the effectiveness of policies, understand the political objectives and constraints faced by policy makers, and appreciate the conflicts in fundamental human values that often animate the policy debate. After completing the core, students apply these skills by focusing their studies in one of several areas of concentration. The areas of concentration address specific fields of public policy, types of institutions, or a deeper development of the tools of policy analysis. Students design their own concentrations with the help of their faculty advisors and the approval of the program director. Students must submit a list of their proposed concentration course work and a brief written defense of its coherence in advance of taking concentration courses. Areas of concentration are not declared on Axess. They do not appear on the transcript or diploma.

Recent areas of concentration include, but are not limited to:

- Advanced Methods of Policy Analysis
- Design of Public Institutions
- Development and Growth Policies

- Education
- Environment, Resources, and Population
- Health Care
- International Policies
- Law and the Legal System
- Science and Technology Policy
- Social Policy: Discrimination, Crime, Poverty

Completion of the Bachelor of Arts degree in Public Policy requires a minimum of 87 units of course work.

1. *Preparatory courses (44 units)*—POLISCI 2 or equivalent; ECON 1A, 1B, 50, 51, 102A, 102B; MATH 51; MS&E 180 or PSYCH 70 or PSYCH 138. The U.S. Government and politics requirement can be fulfilled by taking POLISCI 2, by passing a diagnostic exam offered by the Public Policy program, or by receiving a score of at least 4 on the Advanced Placement exam in U.S. government and politics (which appears on the student's Stanford transcript). ECON 50, 51 and MATH 51 must be taken for a letter grade. A maximum of 10 units of the other preparatory courses may be taken as credit/no credit.
2. *Core courses*—A 25-unit sequence of 5-unit PUBLPOL courses (101, 102, 103B, C, or D, 104, and 106), which students should plan to complete by the end of the junior year. All core courses must be completed for a letter grade.
3. *Concentration*—Majors must complete at least 15 units of course work in an area of concentration. This post-core course work must be approved by a faculty advisor and the director. Concentration courses must be completed for a letter grade.
4. *Capstone research requirement*—Seniors are required to demonstrate competency in applied policy research. This requirement is fulfilled either by an honors thesis or by participation in a research project (Practicum) in which small student teams analyze real world policy problems faced by Bay Area agencies and produce a report for use by the client. A seminar for honors students is offered Autumn Quarter (PUBLPOL 200A, 3 units). The Practicum is offered both Winter and Spring quarters (PUBLPOL 200B and C, 5 units). The capstone research requirement must be completed for a letter grade.
5. Students must complete the Public Policy core, concentration and the senior capstone requirement with an overall grade point average (GPA) of 2.3 (C+) or higher.
6. It is recommended that the major be declared by the end of sophomore year but no later than the end of Autumn Quarter of the junior year. Major declaration forms are available in the Public Policy Program office and on the web site.

The Public Policy Program encourages students to attend the Bing Stanford in Washington Program and to participate in appropriate Stanford internship programs, especially those available through the Haas Center for Public Service and Stanford in Government.

## HONORS PROGRAM

The Public Policy Program offers students the opportunity to pursue honors work during the senior year. To graduate with honors in Public Policy, a student must:

1. Apply for admission to the honors program no later than the end of Spring Quarter of the junior year.
2. Complete the requirements for the B.A. in Public Policy and achieve an overall grade point average (GPA) of 3.5 in the following courses: the Public Policy core; concentration; Senior Capstone; PUBLPOL 199, Senior Research; and a course in applied econometrics (ECON 102C, ECON 103, ECON 104, STATS 202, PUBLPOL 303B, or PUBLPOL 303C). Students are encouraged to complete the applied econometrics course by the end of Spring Quarter of the junior year and take PUBLPOL 200A during Autumn Quarter of that year. Courses not taken at Stanford are not included in calculating the GPA.
3. During the senior year, enroll in at least 8 but no more than 15 units of PUBLPOL 199, Senior Research, with the thesis

advisor. Students need to contact the program office to have their thesis advisor listed as a 199 instructor. An 'N' grade will be given by the advisor in quarters prior to Spring, when the thesis is completed and presented. All PUBLPOL 199 units must receive a final grade of at least a 'B+'. The honors thesis must demonstrate mastery of relevant analytical tools and address a policy issue.

4. The honors thesis must be submitted to both the thesis advisor and the Public Policy Program office. In order to be considered for University and department awards, the final thesis must be submitted to the program office no later than the third Wednesday in May in both printed and electronic forms. All other theses must be submitted by the last Friday in May in both printed and electronic forms.

Students who intend to pursue honors work should plan their academic schedules so that most of the core courses are completed before the beginning of the senior year, and all of the core and concentration courses are completed by the end of Winter Quarter of senior year. This scheduling gives students both the time and the necessary course background to complete their honors thesis during Spring Quarter. In addition, prospective honors students are encouraged to enroll in PUBLPOL 197, Junior Honors Seminar, during Winter or Spring Quarter. This course focuses on developing a research plan and the research skills necessary to complete an honors thesis.

To apply for honors, a student must submit a completed application to the Public Policy Program office with a brief description of the thesis. Applications are found online or in the program office. The student must obtain the sponsorship of a faculty member who approves the thesis description and agrees to serve as a thesis advisor. Students intending to write a thesis involving more than one discipline may wish to have two advisors, at least one of whom is affiliated with the Public Policy Program.

Graduation with honors requires that the thesis be approved by both the advisor and the program director. The role of the director is to assure that the thesis deals with an issue of public policy and satisfies the standards of excellence of the program. However, the grade for the honors thesis (PUBLPOL 199 units) is determined solely by the advisor.

Members of the affiliated faculty in Public Policy are available to provide assistance in selecting a thesis topic and advisor.

## COTERMINAL M.A. IN PUBLIC POLICY

The coterminal M.A. in Public Policy is a structured program designed to impart the basic analytical tools of public policy analysis, or to permit public policy majors to specialize in an applied field of policy analysis. The coterminal M.A. is also a gateway to the M.P.P. degree program. Coterminal students in any program may apply for admission to the M.P.P. program after one quarter. Most students complete their M.A. in a fifth year at Stanford; occasionally students may be able to complete their B.A. and coterminal M.A. in the fourth year.

## APPLICATION AND ADMISSION

There are three application deadlines for the 2012-13 academic year: November 16, 2011; February 22, 2012; and April 25, 2012. Seniors wishing to apply to the coterminal program must apply by the November or February deadlines.

To apply for admission to the Public Policy coterminal M.A. program, students should submit the following materials directly to the Public Policy office:

1. the coterminal application
2. 1-2 page statement of purpose
3. one-page resume
4. a preliminary program proposal
5. a current unofficial undergraduate transcript
6. two confidential letters of recommendation from Stanford faculty members familiar with the student's academic work.

Applicants will be contacted for an interview. All applicants should have completed, or be currently enrolled in, required

preparatory course work (MATH 51, POLISCI 2, ECON 1A, 1B, 50, 51, 52, 102A and 102B) prior to application.

University regulations govern both the coterminal M.A. degree application process and the requirements for the degree. Undergraduates with strong academic records may apply for admission upon completion of 120 units, but no later than the quarter prior to the expected completion of the undergraduate degree. The University requires that units for a given course may not be counted to meet the requirements of more than one degree; that is, no units may be double-counted. No courses taken more than two quarters prior to admission to the coterminal master's program may be used to meet the 45-unit University minimum requirement for the master's degree.

The University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this Bulletin. For University coterminal degree program rules and University application forms, also see <http://studentaffairs.stanford.edu/registrar/publications#Coterm>.

## REQUIREMENTS

To graduate with a coterminal M.A. in Public Policy, students must:

1. Take all courses applied to the coterminal master's degree for a letter grade (with the exception of PUBLPOL 311, which is only offered C/NC). For courses with variable units, coterminal students in their graduate career should enroll in the course for 4 units. No units are counted for courses in which a student earns a grade less than 'B-'. Courses offered only for C/NC or other non-letter grade system may be applied upon approval of a petition to the program director.
2. Achieve a cumulative grade point average (GPA) of 3.0 (B) or better for all courses taken towards the M.A.
3. Comply with all relevant University and program deadlines and policies.
4. Students seeking the coterminal M.A. in Public Policy follow one of two tracks (A or B) through the program, as described below.
5. Students who apply successfully to the M.P.P. program must transfer all applicable M.A. units to the M.P.P. program.

## TRACK A

For students who have completed, or will complete, the Public Policy core course curriculum. Track A consists of at least 45 units of course work:

1. 27 or more units in an area of concentration. There are six concentrations:
  - Health Policy
  - Education Policy
  - International Policy
  - Regulatory Policy
  - Environmental Policy
  - Science and Technology Policy

Each concentration includes a set of required core courses and a variety of electives. Students must present a coherent written study plan to support concentration course choices, designed in consultation with a faculty adviser and approved by the program director.

2. 4 or 5 units of applied econometrics (ECON 102C, ECON 103, ECON 104, STATS 202, or PUBLPOL 303C).
3. PUBLPOL 302A. Introduction to American Law.
4. All Public Policy graduate students are required to attend three quarters of PUBLPOL 311, Public Policy Colloquium, and enroll for 1 unit during any quarter of their choosing. Attendance and participation are mandatory.
5. Completion of a 10-unit practicum or a faculty-supervised internship or thesis.
6. All 45 units must be taken in upper division (100-level) courses, and at least 25 of those units must be at the graduate level (200-level and above).
7. Track A students must also complete ECON 52, which does not count toward the 45 units.

8. Track A students who are accepted into the M.P.P. program take advanced courses in those subjects where the standard M.P.P. curriculum would duplicate undergraduate major requirements.

### TRACK B

For students who will not complete the Public Policy core curriculum. Track B consists of at least 45 units of core subjects in the analysis of public policy.

- The following preparatory courses are required, but do not count toward the 45-units:
  - ECON 1A, 1B, 50, 51, 52, 102A, 102B
  - MATH 51
  - POLISCI 2 or equivalent
- The following core courses are required and do count toward the required 45 units:
  - PUBLPOL 201. Politics and Public Policy *or* PUBLPOL 304A. Politics and Collective Action
  - PUBLPOL 301A. Microeconomics
  - PUBLPOL 202. Organizations and Public Policy *or* MS&E 180. Organizations: Theory and Management
  - PUBLPOL 307. Justice
  - PUBLPOL 301B. Cost-Benefit Analysis and Evaluation *or* PUBLPOL 204. Economic Policy Analysis
  - PUBLPOL 302A. Introduction to American Law
  - ECON 102C, ECON 103, ECON 104, STATS 202, PUBLPOL 303B, or PUBLPOL 303C .
  - PUBLPOL 206. Economics of Legal Rules and Institutions *or* PUBLPOL 302B. Economic Analysis of Law
  - PUBLPOL 305A. Judgment and Decision Making *or* PUBLPOL 305B. Social Psychology and Social Change
- All Public Policy graduate students are required to attend three quarters of PUBLPOL 311, Public Policy Colloquium, and enroll for 1 unit during any quarter of their choosing. Attendance and participation are mandatory.
- Students should petition to count additional advanced policy skills courses needed to meet the 45-unit degree requirement. All 45 units must be taken in upper division (100+ level) courses and at least 25 of those units must be taken at the graduate level (200-level and above).

Coterminal M.A. students must meet with their faculty adviser upon acceptance to the program. For Track A students, advisers must confirm that the courses proposed are likely to be taught during the applicable period, or that appropriate substitute courses are available. Public Policy student services will verify scheduling of courses.

### FINANCIAL AID

The Public Policy Program does not provide financial assistance to coterminal students. For information on student loans and other sources of support, please consult the Stanford Financial Aid Office. Students who enter public service employment with local, state, or federal agencies, schools, or certain non-for-profit organizations may obtain forgiveness for educational loans, based on years of public service employment.

### MASTER'S DEGREES IN PUBLIC POLICY

The program offers two master's programs in Public Policy. The Master of Public Policy (M.P.P.) is a two-year professional degree and the Master of Arts in Public Policy (M.A.) is a one-year non-professional degree.

Currently-enrolled students in other Stanford graduate programs or applicants to those programs may apply for either of the Public Policy master's programs. Stanford undergraduates may apply for the coterminal M.A. in Public Policy and then, after one quarter, apply to the M.P.P. program, using the Graduate Program Authorization Petition. The same is true for coterminal master's students in any program. Students accepted to the M.P.P. program withdraw from the M.A. degree program and complete the requirements for the 90-unit M.P.P. degree. This does not reduce

the total number of units required for the bachelor's or master's degrees. Earning the B.A. and M.P.P. typically takes at least five years. Students considering this option should be familiar with the University's coterminal degree policies and procedures and should consult the director of the Public Policy program early in their planning.

All Public Policy master's programs, with the exception of the J.D./M.A., require at least one year of study at Stanford beyond the requirements for the other joint or dual degree.

- Public Policy Joint Degrees. Students enrolled in or applying to certain degree programs in the Schools of Business, Education, Engineering, Humanities and Sciences, and Law are eligible to apply for Public Policy joint degrees.
  - Juris Doctor and Master of Public Policy (J.D./M.P.P.)
  - Juris Doctor and Master of Arts of Public Policy (J.D./M.A.)
  - Doctor of Philosophy in Education and Master of Public Policy (Ph.D./M.P.P.)
  - Doctor of Philosophy in Economics and Master of Public Policy (Ph.D./M.P.P.)
  - Doctor of Philosophy in Management Science & Engineering and Master of Public Policy (Ph.D./M.P.P.)
  - Doctor of Philosophy in Psychology and Master of Public Policy (Ph.D./M.P.P.)
  - Doctor of Philosophy in Sociology and Master of Public Policy (Ph.D./M.P.P.)
  - Master of Business Administration and Master of Public Policy (M.B.A./M.P.P.)
  - Master of Arts in International Policy Studies and Master of Public Policy (M.A./M.P.P.)
  - Master of Science in Management Science & Engineering and Master of Public Policy (M.S./M.P.P.)

For further information, see the "Joint Degree Programs" section of this bulletin and the University Registrar's site.
- Master of Public Policy (M.P.P.) and Master of Arts in Public Policy (M.A.) Dual Degrees  
Any other Stanford graduate student (i.e., not covered in '1' above) is eligible to apply for a dual degree, either the M.P.P. or the M.A. in Public Policy, in addition to the degree program in which they are currently enrolled.

### PREREQUISITES

Graduate students in Public Policy are expected to be literate in mathematics and microeconomics at a level equivalent to MATH 51 and ECON 50 before beginning the curriculum. A no-credit refresher course in mathematics and economics is offered in the two weeks preceding the start of Autumn Quarter.

### APPLICATION AND ADMISSIONS

Applications for graduate study in Public Policy are accepted only from students currently enrolled in any Stanford graduate degree program or from external applicants seeking a joint degree. Coterminal M.A. or M.S. students in any program are eligible to apply to the M.P.P. program once they complete one quarter of coterminal study, using the Graduate Program Authorization Petition for this purpose.

External applicants for joint degrees must apply to the department or school offering the other graduate degree (i.e., Ph.D., M.A., M.S., M.B.A., or J.D.), indicating an interest in the joint degree program; applicants admitted to the other degree program are then evaluated for admission to the M.P.P. or M.A. program.

Students currently enrolled in any Stanford graduate program may, with the consent of that program, apply either for the applicable joint degree program or for the dual M.P.P. or M.A. degree. To apply for admission for the Master of Public Policy (M.P.P.) or Master's of Arts in Public Policy (M.A.) degree program, graduate students should submit the following materials directly to the Public Policy office by April 13, 2012:

- application form

- confidential letter of recommendation from a Stanford faculty member familiar with applicant's academic work
- undergraduate and graduate transcripts
- GRE, GMAT, LSAT or MCAT test scores
- 1-2 page statement of purpose, including career goals
- resume
- preliminary program proposal
- transcripts and course descriptions demonstrating completion of required prerequisite course work in multivariate calculus and intermediate microeconomics

Applicants will be interviewed. If admitted, students will submit a Graduate Authorization Petition through Axess.

## REQUIREMENTS

1. *Core Curriculum*—All core courses must be taken for a letter grade and must be completed with an overall grade point average (GPA) of 3.0 or better.
  - PUBLPOL 301A. Microeconomics
  - PUBLPOL 301B. Cost-Benefit Analysis and Evaluation
  - PUBLPOL 302A. Introduction to American Law
  - PUBLPOL 302B. Economic Analysis of Law
  - PUBLPOL 303A. Political Methodology I
  - PUBLPOL 303B. Political Methodology II
  - PUBLPOL 304A. Politics and Collective Action
  - PUBLPOL 305A. Judgment and Decision Making
  - PUBLPOL 305B. Social Psychology and Social Change
  - PUBLPOL 306. Writing and Rhetoric for Policy Audiences (M.P.P. students only)
  - PUBLPOL 307. Justice
  - PUBLPOL 317. Comparing Institutional Forms
2. *Colloquium*—All Public Policy graduate students are required to attend three quarters of PUBLPOL 311, Public Policy Colloquium, and enroll for 1 unit during any quarter of their choosing. Attendance and participation are mandatory.
3. *Practicum (M.P.P. and Track A Coterminal M.A. students only)*—Completion of the two quarter practicum course, PUBLPOL 309 (10 units, Autumn and Winter Quarters), and presentation of a report in which interdisciplinary student teams analyze real world policy issues for an outside client.
4. *Concentration (M.P.P. students only)*—Advanced course work in a specialized field, chosen from the approved list of concentration courses with the prior approval of the student's faculty adviser and the program director.
5. *Master's Thesis (M.A. students only)*—All M.A. students must submit a 5-unit master's thesis, written under the guidance of an adviser who is a member of the Public Policy affiliated faculty on a topic approved in advance by the program director. Students give the program office the name of their thesis adviser during Autumn Quarter and enroll in PUBLPOL 310 during a quarter of their choosing. The 5 units may be spread over multiple quarters, and an 'N' (continuing course) grade is given during any quarters prior to Spring. The thesis must be submitted to the Public Policy Program office in both electronic and printed form no later than the last Friday in May. The final grade for PUBLPOL 310 is the M.A. thesis grade, which is determined solely by the thesis adviser.

## M.P.P. AND M.A. DEGREE REQUIREMENTS

1. All graduate degree candidates must submit a Master's Degree Program Proposal to the Public Policy office by the end of Autumn Quarter and must amend this proposal formally if plans for meeting the degree requirements change.
2. Public Policy students are never required to repeat a course which duplicates material they have already mastered. Students may, by petition, substitute a different course for a core requirement whose material would be duplicative. This flexibility does not reduce the unit requirements for any degree.
3. M.P.P. degree students are not permitted to enroll in PUBLPOL 309, Practicum, without having completed the

following Core Courses: PUBLPOL 301A, 301B, 302B, 303A, 303B, 306.

## PUBLIC POLICY JOINT DEGREE REQUIREMENTS

1. A joint degree is regarded by the University as distinct from either of its component degrees, and requirements for the joint degree generally differ from the sum of the requirements for the individual degrees.
2. Up to a maximum of 45 units, or one year, of the University residency requirement can be credited toward both graduate degree programs (i.e., the joint degree requirements may contain up to 45 units less than the sum of the individual degree unit requirements). For example, a J.D./M.P.P. has a four-year residency requirement, one year less than the sum of the requirements for the separate degrees. This recognizes that there is a subject matter overlap between the fields comprising the joint degree.
3. The Public Policy Program strives to encourage an intellectual, professional, and social community among its students. For this reason, joint degree students are expected to devote one year of full-time study at Stanford (usually the second) entirely to the Public Policy Program, rather than spacing Public Policy courses throughout their graduate careers. Unavoidable scheduling conflicts involving joint degree students may be mitigated by substitution of equivalent courses approved in advance by petition.
4. Joint degree students are expected to have and to consult regularly with an academic adviser. The adviser is generally a member of the faculty of both degree programs. The program director is available to make adviser recommendations.
5. In order to take advantage of the reduced residency requirement, joint M.P.P. students must define their area of concentration from among courses offered in their non-Public Policy program. Students wishing to concentrate in another field should apply for a dual, rather than a joint, MPP degree.

## MINORS IN PUBLIC POLICY

The Public Policy Program offers a minor that is intended to provide bachelor's students with interdisciplinary training in applied social sciences. Students who pursue the minor are required to take the courses listed below for a total of 35 units in Public Policy and its supporting disciplinary departments. Because University rules prohibit double-counting courses, the requirements for a minor differ according to the student's major requirements. Courses for the minor must be completed for a letter grade, with the exception of PUBLPOL 311.

For students whose major department or program requires no courses in economics and political science, the requirements for a Public Policy minor are:

<i>Subject and Catalog Number</i>	<i>Units</i>
ECON 1A,B, 50, 51	20
POLISCI 2*	5
PUBLPOL 101	5
PUBLPOL 104	5

For students who are Economics majors or who satisfy a major requirement by taking ECON 50, but have taken no courses in political science, the requirements for a Public Policy minor are:

MS&E 180	4
POLISCI 2*	5
PUBLPOL 101	5
PUBLPOL 102	5
PUBLPOL 103B, C or D	5
PUBLPOL 104	5
PUBLPOL 106	5
PUBLPOL 311	1

\* The U.S. government and politics requirement can be fulfilled by taking POLISCI 2, passing a diagnostic exam offered by the Public Policy program, or by receiving a score of at least 4 on the Advanced Placement exam in U.S. government and politics (which appears on the Stanford transcript).

For students who are Political Science majors or who satisfy a major requirement by taking POLISCI 2 but no courses in Economics, the requirements for a Public Policy minor are:

ECON 1A,B, 50, 51, 102A	25
PUBLPOL 104	5
PUBLPOL 106	5

For Sociology majors, the requirements for a Public Policy minor are:

ECON 1A,B, 50, 51, 102A	25
PUBLPOL 103B, C or D	5
PUBLPOL 104	5

For students who major in another interdepartmental program such as International Relations and who satisfy major requirements by taking ECON 50, POLISCI 2, and an introductory course in statistics such as ECON 102A or STATS 60, the requirements for a Public Policy minor are:

ECON 51, 102B	10
PUBLPOL 101	5
PUBLPOL 102	5
PUBLPOL 103B, C or D	5
PUBLPOL 104	5
PUBLPOL 106	5

## OVERSEAS STUDIES COURSES IN PUBLIC POLICY

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (<http://explorecourses.stanford.edu>) or the Bing Overseas Studies web site (<http://bosp.stanford.edu>). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

### AUTUMN QUARTER

#### BEIJING

OSPBEIJ 024. China's Economic Development. 5 units, Rozelle, GER:DB:SocSci

#### PARIS

OSPPARIS 124X. Building the European Economy: Economic Policies and the Challenges Ahead. 5 units, Jacques Le Cacheux, GER:DB:SocSci

OSPPARIS 153X. Health Systems and Health Insurance: France and the U.S. -- a Comparison. 4-5 units, Fessler, GER:DB:SocSci, EC:GlobCom

### WINTER QUARTER

#### MADRID

OSPMADRID 32. Health Care Systems Design: Spain, Europe, and the United States. 4 units, Baker, GER:DB:HUM

#### OXFORD

OSPOXFRD 18. Making Public Policy: An Introduction to Political Philosophy, Politics and Economics. 4-5 units, Robert McMahon, GER:DB:SocSci

### SPRING QUARTER

#### CAPETOWN

OSPCPTWN 40. Education in the Post-Apartheid City. 4 units, Bardroodien, Aslam Fataar

#### FLORENCE

OSPFLOR 24. Economics in the European Setting. 3 units, Eric Bettinger

OSPFLOR 78. An Extraordinary Experiment: Politics and Policies of the "New" European Union. 5 units, Morlino, GER:DB:SocSci

#### PARIS

OSPPARIS 33. The Economics of Climate Change: Policies in Theory and in Practice in the EU and the US. 5 units, Christian de Perthuis, Benoit Leguet, GER:DB:SocSci, EC:GlobalCom

#### SANTIAGO

OSPSANTG 119X. The Chilean Economy: History, International Relations, and Development Strategies. 5 units, Staff, GER:DB:SocSci

## RELIGIOUS STUDIES

*Emeriti: (Professors)* Arnold Eisen, Bernard Faure, René Girard, Edwin M. Good, Robert C. Gregg, Van Harvey, David S. Nivison

*Chair:* Hester G. Gelber

*Professors:* Carl W. Bielefeldt, Shahzad Bashir (on leave), Hester G. Gelber, Paul Harrison, Thomas Sheehan, Steven Weitzman, Lee Yearley

*Associate Professors:* Charlotte Fonrobert, Brent Sockness

*Assistant Professor:* Behnam Sadeghi (on leave)

*Senior Lecturers:* Linda Hess, Barbara Pitkin

*Lecturers:* Kirsti Copeland, Ozgen Felek, Irene Lin, Azim Nanji, Yuhua S.-D. Vevaina

*Visiting Professors:* Devin DeWeese, Zvi Lederman

*Visiting Associate Professor:* Jinhua Chen

*Affiliated Faculty:* Vincent Barletta (Iberian and Latin American Cultures), Jean-Pierre Dupuy (French and Italian)

*Department Offices:* Building 70

*Mail Code:* 94305-2165

*Phone:* (650) 723-3322

*Web Site:* <http://stanford.edu/dept/relstud>

Courses offered by the Department of Religious Studies are listed under the subject code RELIGST on the *Stanford Bulletin's* ExploreCourses web site.

## MISSION OF THE DEPARTMENT

The field of Religious Studies brings a variety of disciplinary perspectives to bear on the phenomena of religion for the purpose of understanding and interpreting the history, literature, thought, social structures, and practices of the religious traditions of the world. Comprised of a dozen regular faculty with particular strengths in the study of Buddhism, Christianity, Islam, and Judaism, it enrolls about thirty graduate students (mostly doctoral) and roughly as many undergraduate majors, minors, and joint majors.

Religious Studies works closely with several related programs at Stanford: the Department of Philosophy, with which it offers a joint undergraduate major; the Ho Center for Buddhist Studies; the Taube Center for Jewish Studies; the Abbasi Program in Islamic Studies; the McCoy Center for Ethics in Society; and the Center for Medieval and Early Modern Studies.

While some undergraduates continue their study of religion in a graduate or professional program, most pursue meaningful and successful careers in business, government, the nonprofit sector, and medicine. In this respect, Religious Studies is an ideal interdisciplinary major in the liberal arts. Graduates of the department's doctoral program generally pursue academic careers and are routinely placed in the best universities and colleges in the country.

## LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. understanding of the subject matter of and methods used in the study of religion.

2. skill in reading and interpreting religious texts critically.
3. ability to conduct and present research within the discipline.

## UNDERGRADUATE PROGRAMS IN RELIGIOUS STUDIES

The department offers a Bachelor of Arts major, minor, and honors program in Religious Studies, and a joint major with the Philosophy Department in Religious Studies and Philosophy. Undergraduate courses in Religious Studies are designed to engage students existentially and to assist them in thinking about intellectual, ethical, and sociopolitical issues in the world's religions. The department's faculty seek to provide tools for understanding the complex encounters among religious ideas, practices, and communities, and the past and present cultures that have shaped and been shaped by religion. Courses therefore expose students to: leading concepts in the field of religious studies such as god(s), sacrifice, ritual, scripture, prophecy, and priesthood; approaches developed over the past century, including the anthropological, historical, psychological, philosophical, and phenomenological, that open religion to closer inspection and analysis; and major questions, themes, developments, features, and figures in the world's religious traditions. The department encourages and supports the acquisition of languages needed for engagement with sacred texts and interpretive traditions as well as study abroad at Stanford's overseas centers where religions can be observed and experienced in the culture of their origin.

## GRADUATE PROGRAMS IN RELIGIOUS STUDIES

The graduate mission of the department is to provide students with an interdisciplinary setting of study within which to focus on their respective areas of specialization. The department offers an M.A. and a Ph.D. degree in Religious Studies.

## BACHELOR OF ARTS IN RELIGIOUS STUDIES

### SUGGESTED PREPARATION FOR THE MAJOR

There is no prescribed route or prerequisite to the major; students typically find themselves majoring after taking courses in the department and becoming acquainted with department faculty. Students contemplating the major or joint major are invited to consult with the Director of Undergraduate Studies. The undergraduate student services associate in Building 70 can also field questions regarding the declaration procedure within the department.

### DEGREE REQUIREMENTS

The curriculum for majors is designed to move students sequentially from foundational courses, through deeper investigations, culminating in integrative research courses. Thus, the introductory sequence is designed to lead to courses which build on this foundation with topics including: particular traditions such as Judaism or Buddhism; comparative studies such as nonviolence in Hinduism and Buddhism, or Muslim and Christian interpretations of scripture; specific topics such as mysticism, gender and religion, or theodicy; and distinctive approaches such as the philosophy of religion or ritual studies. Majors complete their careers with integrative courses that afford opportunity for research and consolidation of the knowledge and skills gained earlier.

A Bachelor of Arts in Religious Studies requires 60 units of course work. At least 44 units are to be taken in courses numbered above 100. Ten units out of the 60 may be taken for the grade of C/NC.

### REQUIRED COURSES

1. At least 8 of the 60 units must be courses at the introductory level. Students may satisfy this requirement by taking either:

- a. IHUM 68A,B. Ultimate Meanings (Winter/Spring sequence), or
  - b. one course in each of the following categories: introduction to religious traditions (courses numbered 11-50) and introductory topics in the study of religion (courses numbered 51-99). In consultation with the Undergraduate Director, one Stanford Introductory Seminar in Religious Studies may be applied to this introductory requirement.
2. At least 29 units are to be taken in intermediate lecture and seminar courses numbered 100-289. Of these, at least two seminars are required from courses numbered above 200. With approval of the Undergraduate Director, language courses related to the student's program of study (such as Arabic, Biblical Hebrew, New Testament Greek, Chinese, or Japanese), but not counted towards the University language requirement, may be counted among these 29 units.
  3. 15 units in integrative courses:
    - a. Majors' Seminar: RELIGST 290. Theories of Religion (5 units; Winter Quarter of junior year; fulfills WIM requirement; letter grade only)
    - b. Senior Essay or Honors Thesis Research: RELIGST 297 (3-5 units; minimum 5 units; up to 10 units over two quarters; graded 'N' until completion of essay or thesis)
    - c. Senior Majors' Colloquium: RELIGST 298 (5 units; Spring Quarter; grading option S/NC)
    - d. completion of either a senior essay or honors thesis. See below concerning the difference between these options.
  4. Each student, in consultation with his/her adviser, works out a focus of study centering either on a particular religious tradition or on a theme or problem that cuts across traditions such as ritual, ethics, scripture, or gender.
  5. Students focusing on one religious tradition must take at least 8 units in one or more religious traditions outside their concentration.

### SENIOR ESSAY

A 25-30 page essay on a topic chosen by the student and approved by the adviser upon receipt of a student's proposal by the end of the third quarter prior to expected graduation. The character and content of the essay, which is meant to allow the student to call into play knowledge and skills learned in the course of the major, may take several forms. For example, a student may return to a subject studied earlier but now pursued in more depth or from a new perspective, research a recent or new topic of interest in the field, or offer a carefully framed critical assessment of what has been learned in the major based on review of influential sources, theories, and methods of studying religion. The senior essay is read and graded by the student's adviser and one other member of the Religious Studies faculty.

### HONORS THESIS

A 40-80 page research paper on a topic chosen by the student and approved by the adviser upon receipt of a proposal in the fourth quarter prior to expected graduation. The paper, supported by mastery of primary and secondary scholarship, advances a well-reasoned, supportable thesis. Writers of honors theses must have a grade point average (GPA) of 3.5 in Religious Studies courses, and at least 3.2 overall, and are expected to have already demonstrated success in writing research papers. The honors thesis is read and graded by the student's adviser and one other member of the Religious Studies faculty. Theses earning a grade of 'B+' or above receive honors.

### COGNATE COURSES

The following courses in other departments/programs have been approved by the Chair as fulfilling requirement 2 above.  
 CLASSGEN 18. Greek Mythology  
 POLISCI 149S. Islam and the West

## MAJOR IN RELIGIOUS STUDIES AND PHILOSOPHY

The departments of Religious Studies and Philosophy jointly nominate for the B.A. in Religious Studies and Philosophy those students who have completed a major in the two disciplines. See a description of this joint major in the "Philosophy" section of this bulletin, or in the guidelines available from the undergraduate director of either department.

## MINOR IN RELIGIOUS STUDIES

A Religious Studies minor is a complement to many majors throughout the University. Students contemplating the minor are invited to consult with the Director of Undergraduate Studies. The undergraduate student services associate in Bldg. 70 can also field questions regarding the declaration procedure within the department.

*Requirements*—A minor in Religious Studies requires a minimum of 30 graded units. Students are encouraged to focus their program of study either in a religious tradition or in a theme that cuts across traditions. In consultation with their advisers, students may design the minor in Religious Studies to complement their major. The minor must be declared no later than the last day of the quarter, two quarters before degree conferral.

*Required Courses for the Minor*—

- Two introductory courses. To satisfy this requirement, students take either:
  - IHUM 68A,B. Ultimate Meanings (Winter/Spring sequence), or
  - one course in each of the following categories: introduction to religious traditions (courses numbered 11-50) and introductory topics in the study of religion (courses numbered 51-99). In consultation with the Undergraduate Director, one Stanford Introductory Seminar in Religious Studies may be applied to this introductory requirement.
- At least 22 units in courses at the intermediate and advanced level (above 100), including at least one 200-level seminar.
- Diversity requirement: Students may not take all courses in one religious tradition.
- One course in directed reading (RELIGST 199) may count towards the minor.
- With approval of the Undergraduate Director, one language course related to the student's program of study (such as Arabic, Biblical Hebrew, New Testament Greek, Chinese, or Japanese), but not counted towards the University language requirement, may be counted toward the minor.
- Courses from other departments may not count towards the minor. (*Exception*: language courses covered by point 5.)

## MASTER OF ARTS IN RELIGIOUS STUDIES

University requirements for the M.A. are described in the "Graduate Degrees" section of this bulletin. The department offers a one-year terminal M.A. program. Students can also earn their M.A. degree as part of their coterminal degree program. The M.A. program serves two groups of students: a) those who wish to prepare for a doctoral program in religious studies and b) those who wish to further deepen their knowledge in an area in which they have acquired some expertise during their undergraduate work.

### DEGREE REQUIREMENTS

The following requirements are in addition to the University's basic requirements.

The student completes at least 45 units of graduate work at Stanford beyond the B.A. degree, including either RELIGST 290, Majors Seminar, or, with consent of instructor, RELIGST 304A or B, Theories and Methods. Residence may be completed by three quarters of full-time work or the equivalent.

The student's plan of courses is subject to approval by the Graduate Director. No field of specialization is expected, but students may focus work in particular areas. Advanced and graduate courses in other departments may be taken (see below). No thesis is required; a thesis, if elected, may count for as many as 9 units.

Each student demonstrates reading knowledge of at least one foreign language.

## DOCTOR OF PHILOSOPHY IN RELIGIOUS STUDIES

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin. The Ph.D. in Religious Studies signifies special knowledge of an interdisciplinary field of study and potential mastery of an area of specialization within it. The faculty of the department have established certain fields of study in which the department's strengths and those of other Stanford departments cohere. They are: Buddhist studies, Islamic studies, Jewish studies, and modern religious thought, ethics, and philosophy. Students who wish to specialize in other fields must obtain early approval by the faculty. Each of these areas of specialization follows a shared structure of study.

### DEGREE REQUIREMENTS

The following requirements are in addition to the University's basic requirements.

- Residence*—Each student completes three years (nine quarters) of full-time study, or the equivalent, in graduate work beyond the B.A. degree, and a minimum of 135 units of graduate course work (excluding the dissertation).
- Required Courses*—The 135 units of graduate course work must include the following:  
RELIGST 304A. Theories and Methods  
RELIGST 304B. Theories and Methods  
RELIGST 391. Pedagogy  
RELIGST 399. Recent Works in Religious Studies  
The remainder of the course work is individually designed, in consultation with the adviser.
- Languages*—Each student demonstrates a reading knowledge of two foreign languages, including French or German. One of those language requirements should be fulfilled by the time of advancing to candidacy at the end of the second year. Competence in the second language must be demonstrated at the time of the qualifying examination. Each student also demonstrates reading knowledge of other ancient or modern languages necessary for the field of study, area of specialization, and dissertation topic.
- Candidacy*—At the end of each academic year, the department's faculty recommend second-year students for candidacy on the basis of all relevant information, and especially on the student's candidacy dossier that includes the approved declaration of an area of specialization, certification for one foreign language, and two substantial papers written for courses during the previous two years. Students are required to take RELIGST 391 and RELIGST 399 prior to candidacy.
- Paper-in-Field*—During the third year, under the supervision of their advisers, students prepare a paper suitable for submission to an academic journal in their field. The paper is read and approved by at least two faculty members in the department. Students are encouraged to register for RELIGST 392 while working on the paper.
- Teaching Internship*—At least one teaching internship under the supervision of faculty members is undertaken at a time negotiated with the Graduate Director. Students receive academic credit for the required internship, which is a part of academic training and not of employment.
- Qualifying Examination*—To qualify for writing a dissertation, the student must pass a comprehensive examination in the chosen field and the area of specialization, typically during the

first quarter of their fourth year. The student must complete the second language requirement before taking the qualifying examination. The qualifying examination is normally conducted by a committee of at least three Academic Council members of the department, one of whom is the adviser. One faculty member may be from outside the department with permission of the Director of Graduate Studies.

8. *Dissertation*—The dissertation contributes to the humanistic study of religion and is written under the direction of the candidate's dissertation adviser and at least two other members of the Academic Council. The University Oral examination is a defense of a completed draft of the dissertation.
  - a. *Dissertation Proposal*—Candidates submit their dissertation proposal in consultation with their advisers. It is read by a committee of at least three faculty, of whom one is the adviser (as chair) and the two others are members of the Academic Council. One non-departmental faculty member may be included.
  - b. *Dissertation Committee*—The dissertation committee is formed after acceptance of the dissertation proposal. It is normally composed of the dissertation adviser and at least two Academic Council members of the Religious Studies department. One non-departmental faculty member may serve as a reader when approved by the Director of Graduate Studies.
9. *University Oral Examination*—This examination, required by the University of Ph.D. students, is a defense of a completed draft of the dissertation. The composition of the examination committee is set by University regulation: five or more faculty, normally all of whom are members of the Academic Council, one of whom must be outside the department to serve as chair of the committee. Normally, the examining committee includes all qualified members of the dissertation committee.

## PH.D. IN RELIGIOUS STUDIES AND HUMANITIES

The department participated in the Graduate Program in Humanities leading to a Ph.D. degree in Religious Studies and Humanities. At this time, the option is available only to students already enrolled in the Graduate Program in Humanities; no new students are being accepted. The University remains committed to a broad-based graduate education in the humanities; the courses, colloquium, and symposium continue to be offered, and the Division of Literatures, Cultures, and Languages provides advising for students already enrolled who may contact DLCL Student Affairs at 650-724-1333 or dlcl@stanford.edu for further information. Courses are listed under the subject code HUMNTIES and may be viewed on the *Stanford Bulletin's* ExploreCourses web site.

## PH.D. MINOR IN RELIGIOUS STUDIES

Candidates for the Ph.D. in other departments may select a Ph.D. minor in Religious Studies.

*Requirements*—The minor requires at least 24 units in Religious Studies at the 200 level or above. Four of the 24 units should be in RELIGST 304 A,B, Theories and Methods.

*Required Courses for the Minor*—  
RELIGST 304A or B. Theories and Methods

*Optional Courses for the Minor*—  
The student should choose any of the courses offered in the department at the 200 level or above, for the equivalent of at least 24 units. Other courses can be chosen in consultation with the Graduate Director.

## OVERSEAS STUDIES COURSES IN RELIGIOUS STUDIES

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site

(<http://explorecourses.stanford.edu>) or the Bing Overseas Studies web site (<http://bosp.stanford.edu>). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

## AUTUMN QUARTER

### MADRID

- OSPMADR 74. Islam in Spain and Europe. 5 units, Almudena Ariza.

## WINTER QUARTER

### MADRID

- OSPMADR 75. Sefarad: The Jewish Community in Spain. 5 units, Almudena Ariza.

## RUSSIAN, EAST EUROPEAN AND EURASIAN STUDIES

*Director:* Robert Crews (History)

*Professors:* Lazar Fleishman (Slavic Languages and Literatures), Gregory D. Freidin (Slavic Languages and Literatures), David J. Holloway (History, Political Science), Nancy S. Kollmann (History, on leave), Michael A. McFaul (Political Science, on leave), Norman Naimark (History), Aron Rodrigue (History), Gabriella Safran (Slavic Languages and Literatures), Nancy B. Tuma (Sociology), Steven J. Zipperstein (History)

*Associate Professors:* Shahzad Bashir (Religious Studies, on leave), Robert Crews (History), Monika Greenleaf (Slavic Languages and Literatures), Amir Weiner (History)

*Assistant Professors:* Vera Gribanova (Linguistics), Branislav Jakovljevic (Drama), Pavle Levi (Film Studies), Bissera Pentcheva (Art History, on leave), Edith Sheffer (History), Nariman Skakov (Slavic Languages and Literatures)

*Senior Lecturers:* Rima Greenhill (Slavic Languages and Literatures), Katherine Jolluck (History)

*Lecturers:* Jelena Batrinic (History), Julie Draskoczy (Slavic Languages and Literatures), Eugenia Khassina (Slavic Languages and Literatures), Jack Kollmann (Center for Russian, East European and Eurasian Studies), Gail Lapidus (Center for Russian, East European and Eurasian Studies), Alma Kunanbaeva (Anthropology), Asya Perelstvaig (Linguistics), Kathryn Stoner-Weiss (Political Science, and Senior Fellow at FSI), Patricia Young (Political Science)

*Courtesy Professor:* Coit Blacker (Political Science)

*Visiting Professors:* Devin Deweese (Religious Studies), Arek Marciniak (Archeology)

*Visiting Associate Professor:* Ewa Domanska (Anthropology)

*Affiliates:* Michael B. Bernstam (Hoover Institution), Lera Boroditsky (Psychology), Margaret Brandeau (School of Engineering), Chaim Braun (Freeman Spogli Institute for International Studies), Martin Carnoy (School of Education), Robert Conquest (Hoover Institution), John B. Dunlop (Hoover Institution), Timothy Garton Ash (Hoover Institution), Paul Gregory (Hoover Institution), Siegfried S. Hecker (School of Engineering), Kenneth Jowitt (Hoover Institution), Terry L. Karl (Political Science), David Laitin (Political Science), Scott Littlefield (Hoover Institution), Douglas Owens (School of Medicine), Bertrand Patenaude (Hoover Institution), William J. Perry (School of Engineering), Dmitri Petrov (Biology), Pavel Podvig (Freeman Spogli Institute for International Studies), Condoleezza Rice (Political Science), Jeffrey Richardson (Freeman Spogli Institute for International Studies), Karen Rondstvedt (Stanford Libraries), Geoffrey Rothwell (Economics), Nancy Ruttenburg (English), Anatol Shmelev (Hoover Institution), Maciej Siekierski (Hoover Institution), Mitchell Stevens (School of Education and Sociology), Ilya

Strebulaev (Graduate School of Business), Allen S. Weiner (School of Law)

Center Offices: Encina West, Room 203

Mail Code: 94305-6045

Phone: (650) 723-3562

Web Site: <http://CREEES.stanford.edu>

Courses offered by the Center for Russian, East European and Eurasian Studies are listed under the subject code REES on the *Stanford Bulletin's* ExploreCourses web site.

The Center for Russian, East European and Eurasian Studies (CREEES) coordinates the University's teaching, research, and extracurricular activities related to Russia, Eastern Europe, Central Asia, and the Caucasus and administers a one-year interdisciplinary M.A. graduate degree program. Information on the center's degree programs and other activities is available at <http://CREEES.stanford.edu>. CREEES and its degree programs are directed by the CREEES Steering Committee, composed of faculty members associated with the Center. The program draws on the strengths of nationally recognized area faculty and research affiliates and significant library and archival collections at Stanford. The Center is a U.S. Department of Education Title VI National Resource Center for Russia, East Europe, and Eurasia.

## UNDERGRADUATE PROGRAMS IN RUSSIAN, EAST EUROPEAN AND EURASIAN STUDIES

Students interested in a minor should consult the Director of Undergraduate Studies in the Department of Slavic Languages and Literatures which offers the following relevant minors:

- Russian, East European and Eurasian Studies
- Russian Language
- Russian Language, Literature and Culture
- Russian Culture

*Slavic Theme House*—Slavianskii Dom (SlavDom), at 650 Mayfield Avenue, is an undergraduate residence which houses 50 students and offers a wide variety of opportunities to expand knowledge, understanding and appreciation of Russia and the nations of East Europe, the Caucasus and Central Asia.

*Overseas Studies Programs*—Undergraduates interested in the study of languages, history, culture and social organization of the countries of Russia, Eurasia and East Europe may apply to study at the Stanford centers in Moscow and Berlin. Information about these programs is available at the Bing Overseas Studies Program at <http://bosp.stanford.edu>.

## GRADUATE PROGRAMS IN RUSSIAN, EAST EUROPEAN AND EURASIAN STUDIES

The center offers an M.A. in Russian, East European and Eurasian Studies. The center also offers a coterminal M.A. in Russian, East European and Eurasian Studies.

*Financial Aid*—Subject to funding, CREEES may have a limited number of Foreign Language and Area Studies (FLAS) fellowships for U.S. citizens or permanent residents. Additional financial aid may also be available from CREEES. Applicants to the M.A. program have priority in the annual FLAS competition; in recent years CREEES has also awarded FLAS fellowships to students enrolled in the School of Education and the School of Law. Consult the CREEES associate director for further information about the application and award process. Applications for FLAS fellowships can be obtained at <http://CREEES.stanford.edu/grants/>.

*Doctoral Programs*—Since the University does not offer a Ph.D. in Russian, East European and Eurasian Studies, students wishing to pursue a REEES-related doctoral program must apply to one of the departments offering a Ph.D. with an emphasis on Russia, Eurasia, or Eastern Europe, such as the departments of

History, Anthropology, Political Science, or Slavic Languages and Literatures.

## MINOR IN RUSSIAN, EAST EUROPEAN, AND EURASIAN STUDIES

### UNDERGRADUATE MINOR IN RUSSIAN, EAST EUROPEAN, AND EURASIAN STUDIES

The Center for Russian, East European and Eurasian Studies no longer offers an undergraduate minor.

Students interested in a minor should consult the "Minors in Slavic Languages and Literatures" section of this bulletin which describes the following relevant minors:

- Russian, East European, and Eurasian Studies
- Russian Language
- Russian Language, Literature, and Culture
- Russian Culture

## MASTER OF ARTS IN RUSSIAN, EAST EUROPEAN AND EURASIAN STUDIES

CREEES offers a one-year interdisciplinary master's degree program in Russian, East European and Eurasian Studies for students with a strong prior language and area studies background. The program structure allows students the flexibility to pursue their particular academic interests, while providing intellectual cohesion through a required core curriculum that addresses historical and contemporary processes of change in the Russian Federation, Eastern Europe, the Caucasus, and Central Asia. This core curriculum consists of three core courses and REES 200, Core Seminar Series. The program may be taken separately or coterminally with a B.A. degree program. The interdisciplinary M.A. program typically serves three types of students:

1. Those who intend to pursue careers and/or advanced degrees in such fields as business, education, government, journalism, medicine, or law, and who wish to establish competence in Russian, East European and Eurasian studies.
2. Those who intend to apply to a Ph.D. program involving Russian, East European and Eurasian studies and who need to enhance their academic skills and credentials.
3. Those who are as yet undecided on a career but who wish to continue an interest in Russian, East European and Eurasian studies.

## ADVISING

The advising structure is two-tiered: each M.A. candidate works with the CREEES associate director who advises on the program of course work and monitors the student's progress toward completing the degree. Candidates are also assigned a faculty adviser from the Academic Council faculty, who provides intellectual and academic guidance.

## ADMISSION

Applicants apply electronically; see <http://gradadmissions.stanford.edu> for a link to the electronic application and general information regarding graduate admission. In addition, prospective applicants may consult with the CREEES associate director regarding the application process.

To qualify for admission to the program, the following apply:

1. Applicants must have earned a B.A. or B.S. degree, or the equivalent.
2. At least three years of college-level language study in Russian, a East European or Central Asian language, is preferred. Candidates with fewer years of area language study will be considered.
3. Applicants whose native language is not English and do not possess a U.S. bachelor's degree are expected to take the Test of English as a Foreign Language (TOEFL) and have the results sent to Graduate Admissions, Office of the University Registrar.

4. All applicants must take the General Test of the Graduate Record Examination (GRE) and have the results sent to Graduate Admissions, Office of the University Registrar.
5. Applicants must submit a writing sample of 20 pages or less in English on a topic in Russian, East European, or Eurasian studies.

The deadline for submission of applications for admission and for financial aid is January 11, 2011. Admission is normally granted for Autumn Quarter, but requests for exceptions are considered.

The successful applicant generally demonstrates the following strengths: requisite foreign language study, significant course work in Russian, East European and Eurasian studies in multiple disciplines, outstanding grades in previous academic work, strong analytical writing skills, high GRE scores (particularly verbal and analytical writing), study or work experience in the region, strong letters of recommendation from faculty members in the Russian, East European, and Eurasian Studies field (one letter may be from a language instructor), and a persuasive statement of purpose explaining how the program would advance the applicant's academic and career goals.

### DEGREE REQUIREMENTS

Candidates for the M.A. degree must meet University requirements for an M.A. degree as described in the "Graduate Degrees" section of this bulletin.

The M.A. program in REEES can ordinarily be completed in one academic year by a well-prepared student; longer periods of study are permitted.

Requirements to complete the interdisciplinary M.A. degree are principally ones of distribution, with the exception of three required core courses and a core seminar, as described below. Each student, with the advice of the CREEES associate director, selects courses according to the student's interests, needs, and goals.

All students in the M.A. REEES program must complete a minimum of 48 academic credit units within the following guidelines.

1. *Core courses:* students must complete three core courses, including REES 301 Gateway Course in Russian, East European and Eurasian Studies (autumn), REES 340 The Comparative Political Economy of Post-Communist Transitions (autumn), and REES 320 State and Nation-Building in Central Asia (winter).
2. *Core seminar:* REES 200, Current Issues in Russian, East European and Eurasian Studies, is required of all students in the M.A. program in the winter and spring quarters. The goal of this course is to survey current methodological and substantive issues in Russian, East European and Eurasian studies, acquaint students with Stanford resources and faculty, and present professional development and career options.
3. *Interdisciplinary course work:* all courses (other than language courses) must be taken on the graduate level (200-level or higher). Courses in Russian, East European and Eurasian studies must be completed and distributed among at least three disciplines. All course work applied to the 48-unit minimum must deal primarily with Russian, Eurasian, or East European studies.
4. *Language study:* students in the program are encouraged to study Russian or a language of Eastern Europe, Central Asia or the Caucasus. Credit towards the 48-unit minimum (maximum 3 units per quarter, 9 units total) is allowed for advanced language work.
5. All course work qualifying for the 48-unit minimum (except REES 200) must have a letter grade of 'B' or higher. ('B-' does not count for degree credit, nor does 'S' or 'CR'.)
6. All courses counting towards the 48-unit minimum must be approved by the CREEES associate director, who ensures that planned course work satisfies requirements towards the degree. The CREEES director and steering committee determine the requirements. Consult the CREEES website or the associate

director for the complete and updated list of courses which may be taken toward the degree.

#### *Required Core Courses for 2011-12—*

- REES 301. Gateway Course in Russian, East European, and Eurasian Studies  
 REES 320. State and Nation Building in Central Asia  
 REES 340. Comparative Political Economy of Post-Communist Transitions

#### *Pre-approved courses—*

- ANTHRO 147A. Folklore, Mythology, and Islam in Central Asia  
 ANTHRO 148A/248A. Nomads of Eurasia: Culture in Transition  
 ARTHIST 106. Byzantine Art and Architecture, 300-1453 C.E.  
 ARTHIST 208. Hagia Sophia  
 COMPLIT 219. Dostoevsky and His Time  
 HISTORY 125. 20th-Century Eastern Europe  
 HISTORY 137/337. The Holocaust  
 HISTORY 138A. Germany and the World Wars  
 HISTORY 185B. Jews in the Modern World  
 HISTORY 224A/424A. Soviet Civilization  
 HISTORY 224B/324B. Modern Afghanistan  
 HISTORY 227/327. East European Women and War in the 20th Century  
 HISTORY 236A/336A. Nations and Nationalism in East-Central Europe  
 HISTORY 236D/336D. Cold War Europe  
 HISTORY 238K/328K. Resistance and Collaboration in Hitler's Europe During World War II  
 POLISCI 140C. The Comparative Political Economy of Post-Communist Transitions  
 POLISCI 241L. Democracy and the Market in Eastern Europe  
 RELIGST 125. Authority of the Past in Islamic Thought  
 SLAVGEN 145/245. Age of Experiment: From Pushkin to Gogol  
 SLAVGEN 146/246. The Age of the Great Russian Novel: History and Other Theories of Time  
 SLAVGEN 147/247. The Age of War and Revolution: A Survey of Russian Literature and Culture, 1900-1950s  
 SLAVGEN 148/248. Dissent and Disenchantment: A Survey of Literature and Culture, 1953 to Present  
 SLAVGEN 169/269. Slavic Folklore and Folklore Theory  
 SLAVLIT 179/279. Literature from Old Rus' and Medieval Russian  
 SLAVLIT 188/288. Russian Poetry  
 SLAVLIT 203. Academic Russian  
 SLAVLIT 211. Introduction to Old Church Slavonic  
 SLAVLIT 224. The Russian Postmodern Novel  
 SLAVLIT 232. Formalism/Semiotics/Bakhtin: Key Texts  
 SLAVLIT 272. Osip Mandelstam and the Modernist Paradigm

#### *Additional courses which may be counted for the M.A. degree (with approval) —*

- ANTRHO 338A. Biohumanities: Continental Philosophy and the Human and Social Sciences  
 ARTHIST 411. Animacy, Performance, Presence in Medieval Art  
 COMPLIT 122. Literature as Performance  
 DRAMA 167/267. Avant Garde Theater  
 DRAMA 300A. Critical Styles I  
 FILMSTUD 102. Theories of the Moving Image  
 FILMSTUD 116/316. International Documentary  
 FILMSTUD 137/337. European New Wave Cinemas  
 HISTORY 284/384. The Ottoman Turks in Comparative Perspective: The Inner Life of a Eurasian Empire  
 HISTORY 299X. Design and Methodology for International Field Research  
 INTNLREL 122A. The Political Economy of the European Union  
 IPS 211. The Transition from War to Peace: Peacebuilding Strategies  
 IPS 219. Intelligence and National Security  
 IPS 221. International Organizations and Institutions  
 IPS 241. International Security in a Changing World (Same as POLISCI 114S)

IPS 280. Transitional Justice, International Criminal Tribunals, and the International Criminal Court  
 LINGUIST 167. Languages of the World  
 MS&E 193/293. Technology and National Security  
 POLISCI 141. The Global Politics of Human Rights  
 POLISCI 210R. International Conflict: Management and Resolution (Same as IPS 250)  
 POLISCI 214R/314R. Challenges and Dilemmas in American Foreign Policy  
 POLISCI 242P. The Comparative Politics of Corruption  
 POLISCI 314D. Democracy, Development, and the Rule of Law (Same as IPS 230)  
 POLISCI 314S. Decision Making in U.S. Foreign Policy (Same as IPS 314S)  
 POLISCI 337S. Seminar on Liberation Technologies  
 RELIGST 222B. Sufism Seminar  
 RELIGST 224B/324B. Unveiling the Sacred: Explorations in Islamic Religious Imagination  
 RELIGST 236/336. European Reformatations  
 SOC 109/209. The Sociology of Terrorism  
 SOC 341W. Workshop: Inequality

Other courses may be counted towards the M.A. by special arrangement with the instructor and the CREEES associate director.

A description of the M.A. program is also available on the web at <http://CREEES.stanford.edu/academic/graduate-masters.html> and by request from the Center for Russian, East European and Eurasian Studies.

## COTERMINAL MASTER'S PROGRAM IN RUSSIAN, EAST EUROPEAN, AND EURASIAN STUDIES

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see <http://studentaffairs.stanford.edu/registrar/publications#Coterm>.

To qualify for a coterminal M.A. degree in Russian, East European, and Eurasian Studies, besides completing University requirements for the B.A. degree, a student must:

1. Submit a coterminal application for admission to the program no later than the quarter prior to the expected completion of the undergraduate degree, normally Winter Quarter prior to Spring Quarter graduation. Students with advanced placement and transfer credit must apply at least four quarters before the expected master's degree conferral date. The deadline for all coterminal applications to the M.A. program in Russian, East European, and Eurasian Studies is January 11, 2011.
2. Include in the application a program which outlines, by quarter, the schedule of courses the student plans to complete toward the M.A. degree. The student should seek the advice of the CREEES associate director in drafting this schedule. The application also should include:
  - a. a current Stanford transcript
  - b. a one-page statement of purpose
  - c. three letters of recommendation from Stanford professors
  - d. a writing sample of 20 pages or less on a Russian, East European, or Eurasian Studies topic
3. Applicants must have a grade point average (GPA) of at least 3.0 (B). Coterminal applicants must take the general test of the Graduate Record Examination and have the results sent to Graduate Admissions, Office of the University Registrar.
4. Complete 15 full-time quarters or the equivalent, or three quarters in full-time residence after completing 180 units; and complete, in addition to the 180 units required for the bachelor's degree, a minimum of 48 units for the master's degree.

The same courses may not be counted to meet both undergraduate and graduate requirements, and no courses taken

before the junior year may be used to meet the course requirements for the master's degree.

For M.A. degree requirements, see the "Master of Arts in Russian, East European, and Eurasian Studies" section of this bulletin.

## SCIENCE, TECHNOLOGY, AND SOCIETY

*Emeriti:* James Adams (Management Science and Engineering, Mechanical Engineering), Alex Inkeles (Sociology), Walter Vincenti (Aeronautics and Astronautics)

*Director:* Fred Turner (Communication)

*Associate Director:* Allison Carruth

*Program Committee:* Stephen Barley (Management Science and Engineering), Mark Granovetter (Sociology), Hank Greely (Law), Ursula K. Heise (English), Sarah Lochlann Jain (Anthropology), Robert McGinn (Management Science and Engineering), Brad Osgood (Electrical Engineering), Eric Roberts (Computer Science), Scott Sagan (Political Science), Fred Turner (Communication), John Willinsky (Education)

*Affiliated Faculty and Staff:* Jeremy Bailenson (Communication), Stephen Barley (Management Science and Engineering), Barton Bernstein (History), Scott Bukatman (Art and Art History), Thomas Byers (Management Science and Engineering), Jean-Pierre Dupuy (French), Paula Findlen (History), Hank Greely (Law), Ursula K. Heise (English), Martin Hellman (Electrical Engineering, Emeritus), Sarah Lochlann Jain (Anthropology), Pamela Lee (Art and Art History), Henry Lowood (Stanford University Libraries), Robert McGinn (Management Science and Engineering), Thomas Mullaney (History), Clifford Nass (Communication), Brad Osgood (Electrical Engineering), Walter Powell (Education), Robert Proctor (History), Jessica Riskin (History), Eric Roberts (Computer Science), Scott Sagan (Political Science), Londa Schiebinger (History), Michael Shanks (Classics, Anthropology), Fred Turner (Communication), John Willinsky (Education), Patrick Windham (Public Policy), Gavin Wright (Economics)

*Mail Code:* 94305-2120

*Phone:* (650) 723-2565

*Web Site:* <http://sts.stanford.edu>

Courses offered by the Program in Science, Technology, and Society are listed under the subject code STS on the *Stanford Bulletin's* ExploreCourses web site.

Technology and science are activities of central importance in contemporary life, intimately bound up with society's evolving character, problems, and potentials. If scientific and technological pursuits are to further enhance human well-being, they and their effects on society and the individual must be better understood by non-technical professionals and ordinary citizens as well as by engineers and scientists. Issues of professional ethics and social responsibility confront technical practitioners. At the same time, lawyers, public officials, civil servants, and business people are increasingly called upon to make decisions requiring a basic understanding of science and technology and their ethical, social, and environmental consequences. Ordinary citizens, moreover, are being asked with increasing frequency to pass judgment on controversial matters of public policy related to science and technology in society. These circumstances require education befitting the complex sociotechnical character of the contemporary era.

Science, Technology, and Society (STS) is a program devoted to understanding the natures, consequences, origins, and shaping of technological and scientific activities in modern and contemporary societies. Students in STS courses study science and technology in society from a variety of perspectives in the humanities and social sciences. To provide a basic understanding of technology and science, STS majors are also required to achieve either theoretical

literacy (B.A.) or a solid grasp of practical fundamentals (B.S.) in some area of engineering or science.

STS courses may be used, individually or in groups, for purposes such as:

1. To satisfy University General Education Requirements (GER)
2. To satisfy the Technology in Society Requirement of the School of Engineering
3. To comprise parts of student-designed concentrations required for majors in fields such as Human Biology and Public Policy
4. To satisfy the requirements of the STS honors program complementing any major
5. To satisfy requirements for majors in STS
6. To satisfy requirements for a minor in STS

STS courses are particularly valuable for undergraduates planning further study in graduate professional schools (for example, in business, education, engineering, law, journalism, or medicine) and for students wishing to relate the specialized knowledge of their major fields to broad technology and science-related aspects of modern society and culture.

## UNDERGRADUATE MISSION STATEMENT

The mission of the Science, Technology and Society (STS) Program is to provide Stanford undergraduates with intellectually stimulating education that will prepare them for life in the contemporary era, one in which science and technology are pervasive and potent forces for transformative social change. To that end, STS courses explore the evolving natures and interrelationship of science and technology, influences of science and technology on different kinds of societies, how societies manage and otherwise shape their scientific and technological endeavors and products, and ethical, social, cultural, and policy issues raised by scientific and technological innovations in contemporary societies. STS faculty believe that probing study of this vital subject matter provides an innovative form of liberal arts and pre-professional education, one that helps STS students fulfill their future civic and professional roles in an informed, responsible manner.

STS is an interdisciplinary and multidisciplinary program. STS students learn to critically analyze the interplay of science and technology with human values and world views, political and economic forces, and cultural and environmental systems. To a set of core STS courses promoting such learning, Program majors add structured sets of pertinent disciplinary courses in the humanities, social sciences, natural sciences, and engineering. Every STS major completes a capstone project in her or his final year, as an honors thesis or in the senior colloquium. The capstone project is an integrative research endeavor incorporating prior STS coursework. The Program prepares its majors for successful careers in business, law, medicine, education, engineering, public policy, and public service, for masters-level work in selected humanistic, social scientific, and engineering disciplines, and for doctoral work in STS and related academic areas.

## LEARNING OUTCOMES

The program expects undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Program in Science, Technology, and Society. Students are expected to demonstrate:

1. knowledge of core concepts, approaches, and issues of the STS field.
2. ability to use STS intellectual resources to analyze and illuminate issues of science and technology in society.
3. ability to critically evaluate and effectively utilize scholarship and empirical evidence in the field of STS.
4. ability to clearly and persuasively communicate about STS issues to a general audience, orally and in writing.

## UNDERGRADUATE PROGRAMS IN SCIENCE, TECHNOLOGY, AND SOCIETY

Degree programs in STS are curricula devoted to understanding the nature and significance of technology and science in modern society. Majors analyze phenomena of science and technology in society from ethical, aesthetic, historical, economic, and sociological perspectives. In addition, students pursuing the B.A. degree study a technical field in sufficient depth to obtain a grasp of basic concepts and methods, and complete a structured concentration on a theme, issue, problem, or area of personal interest related to science and technology in society. Those seeking the B.S. degree complete at least 50 structured units in technology, science, and/or mathematics. The particular technical courses chosen reflect the student's special interest in issue areas of science and technology in society.

## BACHELOR OF ARTS IN SCIENCE, TECHNOLOGY, AND SOCIETY

### REQUIREMENTS

1. *STS Core* — requires completion of eight courses satisfying the following requirements:
  - a. *Interdisciplinary Foundational Course*: STS 101 or 101Q
  - b. *Disciplinary Analyses*: six courses, with one in each area, and at least three of which must be upper-level (targeted primarily at juniors and seniors)
    1. Philosophical/Ethical/Aesthetic Perspectives: STS 110, 112, 114, 210; ARTHIST 158A; COMM 131, 137W; CS 181; ENGLISH 176; ME 120, 214/314; PHIL 60, 163H
    1. Historical Perspectives: ARTHIST 158A; CEE 64; CLASSGEN 123, 133; EARTHSYS 145; ECON 116, 226; HISTORY 31/131, 40/140, 41A/141A, 130A, 140A, 208A, 242G, 243G; ME 120; PHIL 163H; POLISCI 116
    2. Social Science Perspectives: STS 190; AA 116N; ANTHRO 82, 180; COMM 1B, 108, 120, 166, 168, 169, 172, 182; COMPMED 87Q; EARTHSYS 57Q, 111, 173, 184; ECON 113, 224, 225; EDUC 358X; ENGR 110; HUMBIO 175; MS&E 181, 185, 189, 193; POLISCI 114S, 122; PUBLPOL 194; SOC 114, 160, 161
  - c. *Interdisciplinary Senior Seminar*: STS 200, Senior Colloquium, or STS 299, Advanced Individual Work, for students writing an STS honors thesis.
2. *Technical Literacy* (five courses)—
  - a. CS 101, 105 or 106A or equivalent; and
  - b. A four-course sequence (minimum of 12 units) in a field of engineering or science (sample sequences available in the STS office)
3. *Thematic Concentration* (minimum of 20 units, at least five courses, one each from among those designated on the appropriate concentration course list as foundational and advanced). Thematic concentrations are organized around an STS-related problem or area:
  - Aesthetics, Science, and Technology
  - Development, Science, and Technology
  - History and Philosophy of Science and Technology
  - Information Science and Technology in Society
  - Public Policy, Science and Technology
  - Science, Technology, and Social Change
  - Work, Technology, and Social Organizations

Course lists for these thematic concentrations areas are available in the STS office and on the STS website. A student choosing one of the certified topics may petition one or more courses not on the corresponding course list if they are germane to the concentration, meet the student's special interests, and are approved by the STS associate director and thematic concentration adviser.

Alternatively, subject to program approval, the student may choose to design a unique thematic concentration topic and course package.

Each thematic concentration, certified or self-designed, requires the signature of an appropriate faculty adviser. See the STS undergraduate adviser for details.

## HONORS PROGRAM

STS offers students an opportunity to achieve honors through in-depth study of the interaction of science and technology with society. The honors program is open to students majoring in any field, including STS. Students accepted for this program carry out an honors research project, typically beginning in the Winter or Spring Quarter of junior year and finishing by May of senior year. Students who want their projects to be considered for University awards must complete their theses by early May. STS projects usually involve researching and writing an original scholarly essay, although occasionally students have chosen to produce a technical artifact or carry out some other work that itself represents original, creative thinking. When an honors project results in a work other than an essay, the student must also submit an accompanying scholarly exegesis of the work in question. Past honors projects are on file in the STS office library.

## ADMISSION

Application for admission to the STS honors program is due in the junior year before the end of Spring quarter. Each student seeking admission to the honors program must submit a research proposal with the name of one potential thesis faculty adviser. For proposal parameters, see the document STS Honors Program, available on the STS web site. Students are also encouraged to apply to join the STS contingent at the Bing Honors College in early September to get a running start on their theses.

## REQUIREMENTS

- Course Work for STS Majors*—Majors must complete STS Core requirements, for a letter grade where available, with a GPA of 3.4 or higher.
- Course Work for Non-Majors*—Non-majors must complete one course from each of the following categories, for a letter grade where available, with a GPA of 3.4 or higher:
  - Foundational Course: STS 101 or 101Q
  - Philosophical/Ethical/Aesthetic Perspectives Course: STS 110, 112, 114, 210; ARTHIST 158A; COMM 131, 137W; CS 181; ENGLISH 176; ME 120, 214/314; PHIL 60, 163H
  - Historical Perspectives Course: ARTHIST 158A; CEE 64; CLASSGEN 123, 133; EARTHSYS 145; ECON 116, 226; HISTORY 31/131, 40/140, 41A/141A, 130A, 140A, 208A, 242G, 243G; ME 120; PHIL 163H; POLISCI 1
  - Social Science Perspectives Course: STS 190; AA 116N; ANTHRO 82, 180; COMM 1B, 108, 120, 166, 168, 169, 172, 182; COMPMED 87Q; EARTHSYS 57Q, 111, 173, 184; ECON 113, 224, 225; EDUC 358X; ENGR 110; HUMBIO 175; MS&E 181, 185, 189, 193; POLISCI 114S, 122; PUBLPOL 194; SOC 114, 160, 161
- Honors Thesis Credit*—All STS honors students must sign up for STS 299, advanced individual work (1-5 units depending on quarterly workload) each quarter of the senior year. For assistance enrolling in a section directly with your faculty adviser contact the STS undergraduate adviser.
- To Graduate with Honors*—Students must complete course requirements listed above with a 3.4 GPA or higher and earn at least a 'B' on the completed thesis. If all these requirements are met, the designation "Honors Program in Science, Technology, and Society" is affixed to the student's permanent record and appears in the Commencement program.

## COGNATE COURSES

The following cognate courses offered by other programs or departments may be used to fulfill STS major, minor, and honors core requirements.

- Disciplinary Analysis: Philosophical/Ethical/Aesthetic Perspectives*—
  - ARTHIST 158A. History of Photography
  - COMM 131. Media Ethics and Responsibility
  - COMM 137W. The Dialogue of Democracy
  - CS 181. Computers, Ethics, and Public Policy
  - ENGLISH 176. Science Fiction: Techno Dreams and Nightmares
  - ME 120. History and Philosophy of Design
  - ME 214/314. Good Products, Bad Products
  - PHIL 60. Introduction to Philosophy of Science
  - PHIL 163H. The History of Scientific Methods, Pythagoras to Popper
- Disciplinary Analysis: Historical Perspectives*—
  - ARTHIST 158A. History of Photography
  - CEE 64. Air Pollution and Global Warming: History, Science, and Solutions
  - CLASSGEN 123. Urban Sustainability: Long-Term Archaeological Perspectives
  - CLASSGEN 133. Invention of Science
  - EARTHSYS 145. The Environmental History of North America
  - ECON 116. American Economic History
  - ECON 226. U.S. Economic History
  - HISTORY 31/131. Science, Technology and Art: The Worlds of Leonardo da Vinci
  - HISTORY 40/140. World History of Science: From Prehistory to the Scientific Revolution
  - HISTORY 41A/141A. The Emergence of Medicine: The Middle Age and the Renaissance
  - HISTORY 130A. The Rise of Scientific Medicine in the United States, 1825-Present
  - HISTORY 140A. The Scientific Revolution
  - HISTORY 208A. Science and Law in History
  - HISTORY 242G. Einstein: Science, Technology, and Culture
  - HISTORY 243G. Tobacco and Health in World History
  - ME 120. History and Philosophy of Design
  - PHIL 163H. The History of Scientific Methods, Pythagoras to Popper
  - POLISCI 116. History of Nuclear Weapons
- Disciplinary Analysis: Social Science Perspectives*—
  - AA 116N. Electric Automobiles and Aircraft
  - ANTHRO 82. Medical Anthropology
  - ANTHRO 180. Science, Technology, and Gender
  - COMM 1B. Media, Culture, and Society
  - COMM 108. Media Processes and Effects
  - COMM 120. Digital Media in Society
  - COMM 166. Virtual People
  - COMM 168. Experimental Research in Advanced User Interfaces
  - COMM 169. Computers and Interfaces
  - COMM 172. Media Psychology
  - COMM 182. Virtual Communities and Social Media
  - COMPMED 87Q. Introduction to the Mouse in Biomedical Research
  - EARTHSYS 57Q. Climate Change from the Past to the Future
  - EARTHSYS 111. Biology and Global Change
  - EARTHSYS 173. Aquaculture and the Environment: Science, History, and Policy
  - EARTHSYS 184. Climate and Agriculture
  - ECON 113. Economics of Innovation
  - ECON 224. Science and Technology in Economic Growth
  - ECON 225. Economics of Technology and Innovation
  - EDUC 358X. Developments in Access to Knowledge & Scholarly Communication
  - ENGR 110. Perspectives in Assistive Technology
  - HUMBIO 175. Health Care as Seen Through Medical History, Literature, and the Arts

- MS&E 181. Issues in Technology and Work for a Post-Industrial Economy
- MS&E 185. Global Work
- MS&E 189. Social Networks - Theory, Methods, and Applications
- MS&E 193. Technology and National Security
- POLISCI 114S. International Security in a Changing World
- POLISCI 122. Introduction to American Law
- PUBLPOL 194. Technology Policy
- SOC 114. Economic Sociology
- SOC 160. Formal Organizations
- SOC 161. The Social Science of Entrepreneurship

## BACHELOR OF SCIENCE IN SCIENCE, TECHNOLOGY, AND SOCIETY

The student pursuing the B.S. degree must complete the STS Core (see requirement 1 in "Bachelor of Arts in Science, Technology, and Society" above) and a structured package of at least 50 units of technical courses intended to enable students to understand socially significant technical phenomena in some field of engineering or science.

The B.S. candidate follows one of two models in fulfilling the minimum 50-unit technical depth requirement:

1. *Focused Depth*—at least seven courses amounting to at least 25 units in a single field of science or engineering, with the remaining units (except for at most two stand-alone courses) grouped in sequences of at least three courses each in other fields of science or engineering. For example, a focused depth package might contain eight mechanical engineering, three physics, three mathematics, and three computer science courses, and one course each in electrical engineering and chemistry. At least four of the seven courses in the focused depth area must be advanced, that is, not normally taken in the first year of study in that field.
2. *Clustered Depth*—two or more clusters of at least five courses and 15 units each in different fields of science or engineering, with at most two stand-alone courses, and remaining courses, if any, in sequences of three or more courses. For example, a clustered depth package might contain five-course clusters in computer science, electrical engineering, and physics, three courses in civil engineering, and one course each in biology and chemical engineering. At least two courses in each cluster area must be advanced.  
It is recommended that B.S. majors complete CS 106A or its equivalent.

## MINOR IN SCIENCE, TECHNOLOGY, AND SOCIETY

Students planning careers in many technical and non-technical fields, including business, education, engineering, science, law, medicine, and public affairs, are faced with important STS issues in their professional practice. Therefore, a minor in STS is likely to prove practically valuable as well as intellectually stimulating.

*Requirements*—The STS minor requires completion of six courses satisfying the following requirements:

1. *Interdisciplinary Foundational Course*: STS 101 or 101Q
2. *Disciplinary Analyses*: five courses, with one in each area, and at least two of which must be upper-level (targeted primarily at juniors and seniors)
  - a. Philosophical/Ethical/Aesthetic Perspectives: STS 110, 112, 114, 210; ARTHIST 158A; COMM 131, 137W; CS 181; ENGLISH 176; ME 120, 214/314; PHIL 60, 163H
  - b. Historical Perspectives: ARTHIST 158A; CEE 64; CLASSGEN 123, 133; EARTHSYS 145; ECON 116, 226; HISTORY 31/131, 40/140, 41A/141A, 130A, 140A, 208A, 242G, 243G; ME 120; PHIL 163H; POLISCI 116
  - c. Social Science Perspectives: STS 190; AA 116N; ANTHRO 82, 180; COMM 1B, 108, 120, 166, 168, 169,

172, 182; COMPMED 87Q; EARTHSYS 57Q, 111, 173, 184; ECON 113, 224, 225; EDUC 358X; ENGR 110; HUMBIO 175; MS&E 181, 185, 189, 193; POLISCI 114S, 122; PUBLPOL 194; SOC 114, 160, 161

All courses taken to satisfy STS minor requirements must be taken for a letter grade where available. Courses should be chosen so as to realize a measure of intellectual coherence and interrelatedness. Students wishing to use a course not listed above to satisfy one of the requirements for a minor in STS may petition to do so. See the STS undergraduate adviser for details.

## OVERSEAS STUDIES COURSES IN SCIENCE, TECHNOLOGY, AND SOCIETY

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (<http://explorecourses.stanford.edu>) or the Bing Overseas Studies web site (<http://bosp.stanford.edu>). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

### AUTUMN QUARTER

#### FLORENCE

- OSPFLOR 63. Technology Entrepreneurship. 3 units, Thomas Byers, GER:DB:SocSci
- OSPFLOR 134F. Modernist Italian Cinema. 5 units, Ermelinda Campani, GER:DB:Hum

## SLAVIC LANGUAGES AND LITERATURES

*Emeriti: (Professors)* Joseph Frank, Richard D. Schupbach, Joseph A. Van Campen

*Director:* Gabriella Safran

*Chair of Graduate Studies:* Monika Greenleaf

*Chair of Undergraduate Studies:* Gregory Freidin

*Professors:* Lazar Fleishman (on leave, Autumn), Gregory Freidin, Gabriella Safran

*Associate Professor:* Monika Greenleaf

*Assistant Professor:* Nariman Ruttenberg

*Courtesy Professor:* Nancy Ruttenberg

*Senior Lecturer:* Rima Greenhill

*Lecturers:* Julie S. Draskoczy (Humanities Fellow), Ilja Gruen, Eugenia Khassina

*Department Offices:* Building 240, Room 102

*Mail Code:* 94305-2006

*Phone:* (650) 723-4438

*Email:* [slavic@stanford.edu](mailto:slavic@stanford.edu)

*Web Site:* <http://slavic.stanford.edu>

Courses offered by the Department of Slavic Languages and Literatures are listed on the *Stanford Bulletin's* ExploreCourses web site under the subject codes SLAVGEN (Slavic General), SLAVLANG (Slavic Language), and SLAVLIT (Slavic Literature).

The department supports coordinated study of Russian language, literature, literary and cultural history, theory, and criticism. The department's programs may also be combined with the programs in Russian, East European and Eurasian Studies, Jewish Studies, Film Studies, Drama, International Relations, Stanford's Overseas Studies, and the Special Languages Program.

A full undergraduate program provides a choice of several tracks leading to a B.A. (with a major or a minor) or to a B.A. with honors. The department offers a full graduate program leading to an M.A. in Russian and a Ph.D. in Slavic Languages and Literatures. Stanford undergraduates are eligible to apply to the department for a coterminal B.A./M.A. degree. Students in the department's Ph.D. program are required to choose among minor

programs in other national literatures, linguistics, Russian, East European, and Eurasian Studies, Jewish Studies, art and music history, theater, or film studies; or they may design their own minor or choose the related field option.

The department runs a colloquium series, which brings distinguished speakers to Stanford; organizes international conferences and symposia; and since 1987 maintains a continuing publication series, *Stanford Slavic Studies*. Along with the Center for Russian, East European and Eurasian Studies, the department offers qualified undergraduates summer grants (on a competitive basis) for intensive Russian language instruction in accredited programs in Russia and the U.S.

Improving cultural understanding is a critical part of the department's mission, and the department offers a full range of courses at all levels devoted to Russian literature, music and visual arts that do not require specialized knowledge, as well as advanced research seminars for graduate students. The Slavic theme house, Slavianskii Dom, serves as an undergraduate residence for many students in the program and hosts program-related activities. Undergraduates may also choose to study in Moscow through the Stanford Overseas Studies Program. The undergraduate program has attracted students seeking careers in journalism, business, international relations, law, medicine, and human rights, as well as academia. Russian is still the *lingua franca* over the vast territory of the former Soviet Union, and a good command of this language offers a gateway to Eurasia's diverse cultures, ethnicities, economies, and religions.

Stanford students are in a privileged position in relation to Russian, East European and Eurasian Studies, because of Stanford's faculty resources that are without peer in the U.S. Green Library and the Hoover Institution libraries and archives hold the premier Russian and East European collections, which undergraduates and graduate students use in their research. Department students master a difficult language and a rich and challenging literature, and are rewarded by gaining entry into a unique, powerful, and diverse civilization that defined major trends in the past century and plays an increasingly significant role in the world today.

## MISSION OF THE UNDERGRADUATE PROGRAM IN SLAVIC LANGUAGES AND LITERATURES

The mission of the undergraduate program in Slavic Language and Literatures is to expose students to a variety of perspectives on Russian language, history, culture, literature, and philosophical thought. The program offers three tracks. Courses in the Russian Language and Literature track focus on the linguistic and philological study of literature, as well as the history of Russian literature. The Russian Language, Culture, and History track guides students through a comprehensive interdisciplinary study of Russian literature and culture in historic context. The Russian and Philosophy track provides students with a background in the Russian language and literary tradition with emphasis on philosophical thought.

## LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. the ability to develop effective and nuanced lines of interpretation.
2. critical thinking skills using Russian literary materials.
3. analytical writing skills and close reading skills in Russian and English.
4. skills in active listening and productive communication.
5. a minimum of Intermediate High Oral Proficiency level (established through an OPI test) in Russian or another Slavic language.

## SLAVIC THEME HOUSE

Slavianskii Dom, at 650 Mayfield Avenue, is an undergraduate residence that offers opportunities for students to expand their knowledge, understanding, and appreciation of Russia, Eastern Europe, and Eurasia.

## BACHELOR OF ARTS IN SLAVIC LANGUAGES AND LITERATURES

The major tracks in Russian Language and Literature and Russian Language, Culture, and History are declared on Axess and appear on the transcript but not on the diploma. The degree option in Russian and Philosophy is not declared on Axess and does not appear on the transcript or the diploma.

*Writing in the Major*—Undergraduates are required by the University to pass at least one writing-intensive course in their field of concentration in order to graduate. Majors in any Slavic track may satisfy the writing requirement in 2011-12 by passing SLAVGEN 156, Nabokov in the Transnational Context.

## RUSSIAN LANGUAGE AND LITERATURE

The Russian Language and Literature field of study is designed for those students who wish to gain command of the Russian language and to study the nation's literary tradition. Emphasis is placed on the linguistic and philological study of literature, as well as the history of Russian literature and related media in the broader context of Russian culture. This major also welcomes students with an interest in Russian and Slavic linguistics.

Majors who concentrate in Russian Language and Literature must earn a grade point average (GPA) of 2.0 (C) or better in order to receive credit toward the major.

*Prerequisites*—Completion of first year Russian, or the equivalent, as determined by the Language Center placement examination.

*Requirements*—Candidates for the B.A. degree with a Russian Language and Literature field of study must complete an additional 56 units according to the following distribution:

*Russian Language*—A minimum of 12 units from:

- SLAVLANG 111, 112, 113. Third year Russian language
- SLAVLANG 177, 178, 179. Fourth year Russian language
- SLAVLANG 181, 182, 183. Fifth year Russian language

*Russian Literature*—The 20-unit core literature sequence consisting of:

- SLAVGEN 145. Age of Experiment
- SLAVGEN 146. The Great Russian Novel
- *Either* SLAVGEN 147. The Age of Revolution *or* SLAVGEN 148. Dissent and Disenchantment
- SLAVLIT 188. Russian Poetry, or another poetry course offered by the Slavic Department

*Electives*—Students must take 24 units of electives. These courses are chosen in consultation with the department's chair of undergraduate studies. With department consent, work in related academic fields may be applied toward the degree requirements. Students who have completed IHUM 28A,B, Poetic Justice: Order and Imagination in Russian Culture, with a grade of 'B' or better may count these 10 units towards elective courses required for the major, as may students who have completed the SLE sequence.

Russian courses for 2011-12 include:

- SLAVLIT 188. Russian Poetry
- SLAVGEN 156/256. Nabokov in the Transnational Context
- SLAVGEN 185. Cinemato-graph
- SLAVGEN 190. Anna Karenina and the Social Thought of Its Time
- SLAVGEN 196. Prison Literature

*Capstone*—Students must designate a 200-level course taken in their junior or senior year as a capstone course. Before graduation, skills in writing, textual analysis, and discussion will be evaluated

by the Chair of Undergraduate Studies based on work submitted for the capstone course.

## RUSSIAN LANGUAGE, CULTURE, AND HISTORY

The Russian Language, Culture, and History field of study is for students who want to obtain command of the Russian language and to pursue a broad, interdisciplinary study of Russian literature and culture in historical context. Emphasis is on the relation of the Russian literary tradition to other arts, including film, as well as the disciplines that have enriched the historical understanding of Russian literature: history, anthropology, art history, political science, and sociology. Majors in the Russian Language, Culture, and History must earn a GPA of 2.0 (C) or better in order to receive credit toward the major.

*Prerequisites*—Completion of first year Russian, or the equivalent, as determined by the Language Center placement examination.

*Requirements*—Candidates for the B.A. degree with a Russian Language, Culture, and History field of study must complete an additional 56 units according to the following distribution.

*Russian Language*—A minimum of 12 units from:

- SLAVLANG 111, 112, 113. Third year Russian language
- SLAVLANG 177, 178, 179. Fourth year Russian language
- SLAVLANG 181, 182, 183. Fifth year Russian language

*19th-Century Russian Literature and History*—A minimum of 10 units chosen from the following courses or the equivalent; students must choose one course from Slavic and one course from History:

- Either SLAVGEN 145. Age of Experiment *or* SLAVGEN 146. The Great Russian Novel
- A pre-revolutionary Russian history course. 2011-2012 course options are:
  - HISTORY 120B. The Russian Empire
  - HISTORY 221A. Men, Women, and Power in Early Modern Russia

*20th-Century Russian Literature and History*—A minimum of 10 units chosen from the following or the equivalent; students must choose one course from Slavic and one course from History.

- Either SLAVGEN 147. The Age of Revolution *or* SLAVGEN 148. Dissent and Disenchantment
- A post-revolutionary Russian history course
- History 22N, 20Q, 120-129, or 220-229 will satisfy the history requirements. Contact the Chair of Undergraduate Studies with questions.

*Electives*—Students must take 24 additional units of course work in Russian language, literature, history, or other fields, chosen in consultation with the Chair of Undergraduate Studies. Students who have completed IHUM 28A, B, Poetic Justice: Order and Imagination in Russian Culture, with a grade of 'B' or better may count these 10 units towards elective courses required for the major, as may students who have completed the SLE sequence.

Russian courses for 2011-12 include:

- SLAVLIT 188. Russian Poetry
- SLAVGEN 156/256. Nabokov in the Transnational Context
- SLAVGEN 186. Cinematograph
- SLAVGEN 190. Anna Karenina and the Social Thought of Its Time
- SLAVGEN 196. Prison Literature

*Capstone*—Students must designate a 200-level course taken in their junior or senior year as a capstone course. Before graduation, skills in writing, textual analysis, and discussion will be evaluated by the CUS based on work submitted for the capstone course.

### COGNATE COURSES

Units earned for completion of cognate courses in History, Political Science, Religious Studies, Sociology, Art History, Drama, and REEES may be applied to unit requirements for the

departmental major. Consult the Chair of Undergraduate Studies to find out whether a given cognate course is acceptable.

## RUSSIAN AND PHILOSOPHY

The Russian and Philosophy option offers students the opportunity to gain a command of the Russian language and literary tradition, while gaining a background in philosophical thought, broadly construed. They take courses alongside students in other departments participating in the program in Philosophical and Literary Thought, administered through the DLCL. This option is not declared on Axess. Majors who concentrate in Russian and Philosophy must earn a grade point average (GPA) of 2.0 (C) or better in order to receive credit toward the major.

*Prerequisites*—Completion of first year Russian, or the equivalent, as determined by the Language Center placement examination.

*Requirements*—Candidates for the B.A. degree with a concentration in Russian and Philosophy must complete an additional 67 units according to the following distribution:

*Russian Language*—A minimum of 12 units from:

- SLAVLANG 111, 112, 113. Third year Russian language
- SLAVLANG 177, 178, 179. Fourth year Russian language
- SLAVLANG 181, 182, 183. Fifth year Russian language

*Russian Literature*—A minimum of 16 units of Russian literature, including the following:

- SLAVGEN 145. Age of Experiment
- SLAVGEN 146. The Great Russian Novel
- Either SLAVGEN 147. The Age of Revolution *or* SLAVGEN 148. Dissent and Disenchantment
- SLAVLIT 188. Russian Poetry, *or* another poetry course offered by the Slavic Department

*Electives*—At least 12 units of electives in Russian language and literature, chosen in consultation with the Chair of Undergraduate Studies.

*Philosophy and Literature Gateway Course* (4 units)—SLAVGEN 181. Philosophy and Literature (same as PHIL 81)

*Philosophy Writing in the Major* (5 units)—PHIL 80. Mind, Matter, and Meaning (prerequisite: introductory philosophy course)

*Philosophy Core*—12 units, including the following:

- Value Theory: one course in the PHIL 170 series
- Theories of Mind, Language, Action: one course in the PHIL 180 series
- History of Philosophy: one course from the PHIL 100-139 series

*Related Course*—An upper-division course of special relevance to philosophy and literature. A list of approved courses is available from the program director.

*Capstone Seminar*—One capstone seminar must be taken in the student's senior year. This year's capstone seminars are:

- COMPLIT 226. Narrative and Ethics
- PHIL 194L. Montaigne

## HONORS PROGRAM

Majors in any track or option with a grade point average (GPA) of 3.3 (B+) or better in their major courses are eligible to participate in the department's honors program. Prospective honors students must choose a senior thesis tutor from among the department's regular faculty in their junior year and may enroll for 2 units of credit in SLAVLIT 189B in Spring Quarter of the junior year to conduct preliminary research and draft an honors proposal under the guidance of their tutor. In addition to the program requirements above, students must also complete the following:

1. Majors who propose a senior project in literature must take a course in literary or cultural theory, such as SLAVLIT 200 (Proseminar in Literary Theory and Study of Russian Literature), a graduate seminar in the area of their topic, or

DLCL 189, a 5 unit seminar that focuses on researching and writing the honors thesis. DLCL 189 is taken in Autumn Quarter of the senior year.

2. SLAVLIT 189A, taken for 5 units of credit while composing the thesis during Winter Quarter. Students who did not enroll in a 189B course in the junior year may enroll in SLAVLIT 189B in Spring Quarter of the senior year while revising the thesis, if approved by the thesis adviser.
3. To qualify for honors, the candidate must receive a grade of 'B' or better on the thesis or project completed during this period. Up to 12 units may be awarded for completion of honors course work, independent study, and the finished thesis.

## MINORS IN SLAVIC LANGUAGES AND LITERATURES

The Department of Slavic Languages and Literatures offers three undergraduate minor options.

The minor is designed for students who, while pursuing a major in another program, seek a comprehensive introduction to Russian culture through Russian language courses, a combination of minimal proficiency in Russian and courses in the history of Russian culture, or a multidisciplinary introduction to Russian, East European, and Eurasian studies. Students seeking a Slavic minor are encouraged to take advantage of the Bing Overseas Studies Program in Moscow. Students who have chosen one of the minor programs in Russian may use 5 units of IHUM 28A,B, Poetic Justice: Order and Imagination in Russian Culture, with a grade of 'B' or better towards their electives.

### MINOR IN RUSSIAN LANGUAGE

*Prerequisites*—The minor option in Russian Language requires completion of second year Russian, or the equivalent, as determined by the results of the Language Center placement examination.

*Requirements*—Candidates for the B.A. degree with a minor option in Russian Language must complete 24 units of Russian language and literature courses according to the following distribution:

12 to 15 units of Russian language:

SLAVLANG 111, 112, 113. Third year Russian Language

SLAVLANG 177, 178, 179. Fourth year Russian language

The remaining 9-12 units should be chosen from SLAVGEN 145, 146, 147, 148; SLAVLIT 187, 188; other courses offered by the department, or, with the approval of the department's Chair of Undergraduate Studies, courses in history, politics, linguistics, or other relevant programs.

### MINOR IN RUSSIAN LANGUAGE, LITERATURE, AND CULTURE

*Prerequisites*—The minor option in Russian Language, Literature, and Culture requires completion of first year Russian, or the equivalent, as determined by the results of the Language Center placement examination.

*Requirements*—Candidates for the B.A. degree with the minor option in Russian Language, Literature, and Culture must complete 28 units according to the following distribution:

A minimum of 16 units of courses on literature and culture including two from the SLAVGEN 145, 146, 147, 148 sequence (Russian Literature in English Translation), or one from the SLAVGEN 145, 146, 147, 148 sequence and one from the SLAVLIT 187, 188 sequence.

12 units of elective courses either in the Department of Slavic Languages and Literatures or, with the approval of the Slavic Department's Chair of Undergraduate Studies, in other relevant programs dealing with Russian culture, politics, society, and history.

## MINOR IN RUSSIAN, EAST EUROPEAN, AND EURASIAN STUDIES

The minor in Russian, East European and Eurasian Studies offers students the opportunity to choose courses offered by the Center for Russian, East European and Eurasian Studies (subject code REES) in various departments for their minor.

*Requirements*—Candidates for the B.A. degree with the minor option in Russian, East European, and Eurasian Studies must complete 28 units according to the following distribution:

1. Two core courses: one on Russia and one on Eastern Europe or Eurasia, to be chosen by the student from an annual list of qualifying courses issued by CREEES for their M.A. students.
2. At least four additional REES courses, totaling at least 20 units.
3. The student's core and additional courses must include 9 units of course work in the Slavic Department, either literature courses or Russian language in the third year or above. Courses must be distributed among at least three disciplines, such as Slavic, History, Political Science, Anthropology, Art and Art History, Economics, Religious Studies, and Sociology. The Slavic Chair of Undergraduate Studies determines which courses qualify for the minor.
4. A capstone experience in CREEES, including, but not limited to, one of the following:
  - a. a departmental seminar course for advanced undergraduates.
  - b. directed reading and research with a Stanford faculty member or a CREEES-approved resident or visiting scholar.
  - c. participation in the Stanford Overseas Studies Program in Moscow or Berlin.

*Foreign Language*—The Slavic/REES minor has no language requirement, but students are strongly encouraged to attain working competence in Russian or another relevant language. Courses at the third-year level or above in Russian or another language of Central Asia, the Caucasus, or Eastern Europe may be counted towards the Slavic/REES minor, up to a maximum of 3 units per academic quarter, 9 units total.

*Additional Information*—Courses taken at Stanford overseas campuses in Moscow and Berlin may count towards the REES minor, with the approval of the Slavic Chair of Undergraduate Studies; at least three courses for the minor must be taken in residence at Stanford.

*Approval of Slavic Chair of Undergraduate Studies*—Students interested in pursuing the Slavic/REES minor should consult the Slavic Chair of Undergraduate Studies.

### MINOR IN MODERN LANGUAGES

The Division of Literatures, Cultures, and Languages offers a minor in Modern Languages. This minor draws on literature and language courses offered in this and other literature departments. See the "Literatures, Cultures, and Languages" section of this bulletin for further details about this minor and its requirements.

## COTERMINAL BACHELOR'S AND MASTER'S PROGRAM IN SLAVIC LANGUAGES AND LITERATURES

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin.

The department allows a limited number of undergraduates to work for coterminal B.A. and M.A. degrees in Slavic Languages and Literatures with a concentration in Russian. In addition to University requirements for the B.A. degree, the student must:

1. Submit an application for admission by January 31 of the senior year. Applicants must meet the same general standards as those seeking admission to the M.A. program. Applicants must submit: an application for admission; a written statement

of purpose; a transcript; and three letters of recommendation, at least two of which should be from members of the Department of Slavic Languages and Literatures faculty.

2. Meet all requirements for both the B.A. and M.A. degrees. Applicants must complete 15 full-time quarters (or the equivalent), or three full-time quarters after completing 180 units, for a total of 225 units. During the senior year they may, with the consent of the instructors, register for as many as two graduate courses. In the final year of study, they must complete at least three graduate-level courses.

## MASTER OF ARTS IN SLAVIC LANGUAGES AND LITERATURES

University requirements for the M.A. degree are discussed in the "Graduate Degrees" section of this bulletin.

*Admission*—The requirements for admission to the master's degree program in Russian are:

1. A B.A. (or its equivalent) from an accredited college or university.
2. A command of the Russian language sufficient to permit the student to do satisfactory graduate work.
3. A familiarity with Russian literature sufficient to permit the student to perform adequately in courses at the graduate level.

The applicant's previous academic training in Russian language and literature normally serves as an indication of competence. Accordingly, the department does not ordinarily consider applications from students who have not had at least three years of college Russian and some undergraduate training in Russian literature of the 19th and 20th centuries. Before registering for the first quarter's work in the department, entering graduate students are required to take placement examinations in Russian. Students who fail to perform satisfactorily on such examinations must register for remedial courses in the areas in which they are deficient. Course work in third-year Russian and below carries no credit toward the M.A. degree.

*Course Requirements*—Candidates for the M.A. should plan course work that ensures adequate preparation for the M.A. final examination at the end of the third quarter of work. Course work should be planned in consultation with the graduate adviser, whose approval of the overall course load is required.

Candidates for the M.A. must complete a program of 45 units, of which 36 units must be selected from courses given by the department.

*The M.A. Thesis*—The M.A. thesis represents a complete article-length research paper (6,000-9,000 words) that, in both form and substance, qualifies for submission to English-language professional publications in the Slavic field. The M.A. thesis must be submitted to the thesis adviser no later than the eighth week of your final quarter of registration.

*Final Examination*—A final examination may substitute for the M.A. thesis requirement. The final examination requires a student to demonstrate in a written examination

1. command of the phonology, morphology, syntax, and lexicology of contemporary Standard Russian sufficient to teach beginning and intermediate courses at the college level
2. an ability to read contemporary Standard Russian sufficiently to assist students studying contemporary Russian poetry or literary prose
3. sufficient familiarity with Russian literature of either the 19th or 20th century to successfully handle survey courses dealing with the chosen period of specialization.

The examination should be taken at the end of the final quarter of required course work.

## DOCTOR OF PHILOSOPHY IN SLAVIC LANGUAGES AND LITERATURES

University requirements for the Ph.D. are discussed in the "Graduate Degrees" section of this bulletin.

Students enrolled in the Ph.D. program in Slavic Languages and Literatures are expected to fulfill the following requirements while meeting the program's deadlines in the course of their progress toward the degree:

1. *Course Work, Breadth Requirements, and Overall Scheduling*—In consultation with the Chair of Graduate Studies, students are expected to take 18 units of credit each quarter of their first year, 10 units each funded summer, and 10 units each quarter thereafter. They are expected to reach 135 units and attain TGR status in the winter of their fourth year. Entering graduate students must enroll in SLAVLIT 200. For the Ph.D. degree students are free to select course work to suit their individual program of study. However, candidates must do so in consultation with their adviser (Chair of Graduate Studies or principal dissertation adviser) and are held responsible for all of the areas covered by the general examinations, regardless of whether they have registered for the department's offerings in a given field. For this reason, it is strongly recommended that before taking Ph.D. examinations, students complete seminar-level work directly related to the following broad areas:
  - a. Russian Poetry
  - b. the Russian novel
  - c. 20th-century Russian literature
  - d. 19th-century Russian literature (the Age of Pushkin and after)
  - e. 18th-century Russian literature (the early 1700's to the Age of Pushkin)
  - f. medieval Russian literature
  - g. a monograph course on a major Russian author
  - h. theory of literature relevant to the major field
2. *Minor or Related Fields*—During the course of study, students must develop substantial expertise in a field contiguous to the area of specialization. A candidate may elect to present a full minor or, in consultation with the graduate adviser, develop a special program in a related field, preferably no later than the second quarter of enrollment.
  - a. *Related Field*—A student is required to complete a sequence of basic courses (12 units) in a chosen discipline outside the department of Slavic Languages and Literatures. The choice of patterns is one of the following:
    1. a sequence of three courses in one West European literature, selected in consultation with the adviser, or
    2. three basic courses in comparative literature chosen in consultation with the Chair of Graduate Studies (CGS), or
    3. a sequence of three courses in another department selected in consultation with the CGS.
  - b. *Minor*—Students electing a minor should take a minimum of 20 units in graduate-level courses in the minor department or fulfill the Ph.D. minor requirements established by that department. Students considering minors should consult with their adviser, the CGS, the Chair of Slavic Languages and Literatures, and the Chair of the minor department.
3. *Admission to Candidacy*—Candidates should read carefully the general regulations governing the degree, as described in the "Graduate Degrees" section of this bulletin. Department faculty make the decision to advance students to candidacy on the basis of the student's overall progress and promise in the sixth quarter of registration. The candidate by that time must have demonstrated commitment to graduate studies by completing a minimum of 21 content courses (not counting Summer Quarter) with a grade point average (GPA) of 3.3 or better. These must include 14 seminars in the Slavic Department.
4. *M.A. Thesis*—The candidate must submit a complete draft of an M.A. thesis approved by the thesis adviser. The M.A. thesis represents a complete article-length research paper (6,000-9,000 words) that qualifies in both form and substance for submission to an English language professional publication

in the Slavic field. The deadline for the M.A. thesis approval is the eighth week of the sixth quarter of registration. Failure to meet these requirements results in termination of enrollment from the Ph.D. program. Following such termination, the student who has fulfilled all of the M.A. requirements may be given the opportunity to take the M.A. written examination in the history of Russian literature. If successful, the student is then awarded the terminal M.A. degree. In exceptional cases, the written examination requirement may be waived at the discretion of the Chair of Graduate Studies and the Chair of the department.

5. *Proficiency Test*—Administered to all entering graduate students, this test determines whether the student's knowledge of Russian language and literature falls below the department's standard (Advanced Low on the OPI test). Students who fail are required to compete appropriate courses in the first year of graduate study. Courses required to meet the language proficiency are not counted towards the Course Work requirement of the Ph.D. degree.
6. *Foreign Languages*—A candidate must demonstrate reading knowledge of French or German, plus another language useful for the student's area of concentration, by passing written examinations, or receiving a grade of 'A-' or better in a qualifying class with consent of the CGS. The reading examination in German or French must be passed by the end of the first year of study. The reading examination in the second language of choice must be passed by the end of the second year of study.
7. *Examinations*—A candidate must pass the departmental general qualifying examinations, which have written and oral parts. These must be scheduled early in the seventh quarter of enrollment (preferably a day or two before the beginning of academic instruction). The written part covers the history of Russian literature from the medieval period through the twentieth century. The departmental oral qualifying examination follows no later than two weeks after completion of the written exams. The oral examination committee consists of four faculty members and may include one member representing the student's minor or related field; the rest must be drawn from among the Slavic Department faculty. The student makes a 20-minute presentation, following an academic conference format, and based possibly on the student's M.A. thesis. Each examiner questions the student on the presentation and related topics in the history of Russian literature and the minor related field. Following the departmental examinations, a candidate must pass a University Oral examination, consisting of a defense of a doctoral dissertation prospectus and covering content relevant to the area of study, rationale for the proposed investigation, and strategy to be employed in the dissertation research. The prospectus defense is expected to be scheduled at the end of the ninth and, in any case, no later than the beginning of the tenth quarter of registration. Note: Ph.D. examinations are scheduled by the graduate student in consultation with the CGS.
8. *Teaching*—Students are required to complete five quarters of teaching within the funding period, including three quarters of first-year Russian and one quarter as a teaching assistant of literature for a faculty member, usually for one of the survey courses in translation: SLAVGEN 145, 146, 147, 148. Students are required to take DLCL 201 in preparation for teaching.
9. *Continuation*—Continuation in the Ph.D. program is contingent on fulfilling the following criteria: for first-year students, a high quality of performance in course work (decided by department evaluation); for second-year students, satisfactory academic progress, including an M.A. thesis, which should be completed and approved by the eighth week of the sixth quarter of registration. The principal conditions for continued registration of a graduate student are the timely and satisfactory completion of the university, department, and

program requirements for the degree, and fulfillment of minimum progress requirements. Failure to meet these requirements will result in corrective measures, which may include a written warning, academic probation, and/or release from the program.

## OVERSEAS STUDIES COURSES IN SLAVIC LANGUAGES AND LITERATURES

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (<http://explorecourses.stanford.edu>) or the Bing Overseas Studies web site (<http://bosp.stanford.edu>). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

### AUTUMN QUARTER

#### MOSCOW

- OSPMOSC 12. 20th Century Russian Literature: Bulgakov's *The Master and Margarita* and Boris Pasternak's *Doctor Zhivago*. 3 units, Lazar Fleishman
- OSPMOSC 18. Poetry, Painting and Music of the Russian Avant-garde. 3 units, Lazar Fleishman
- OSPMOSC 62. Economic Reform and Economic Policy in Modern Russia. 5 units, Vladimir Mau, DB:SocSci, EC:GlobalCom
- OSPMOSC 72. Space, Politics and Modernity in Russia. 5 units, Sergei Medvedev, DB:SocSci, EC:GlobalCom
- OSPMOSC 74. Post-Soviet Eurasia and SCO: Society, Politics, Integration. 5 units, Maxim Bratersky, Sergey Kortunov, DB:SocSci, EC:GlobalCom
- OSPMOSC 78. Russian-American Relations: from the War of Independence to the War on Terror. 5 units, Edward A. Ivanian, DB:SocSci

## SOCIOLOGY

*Emeriti: (Professors)* Joseph Berger, Bernard P. Cohen, Sanford M. Dornbusch, James G. March, John W. Meyer, W. Richard Scott, Nancy B. Tuma, Morris Zelditch Jr.

*Chair:* Andrew Walder

*Professors:* Karen Cook, Mark Granovetter, David Grusky, Michael T. Hannan, Douglas McAdam, Susan Olzak, Cecilia Ridgeway, Gi-Wook Shin, C. Matthew Snipp, Andrew Walder, Xueguang Zhou

*Associate Professors:* Shelley Correll, Michael Rosenfeld

*Assistant Professors:* Corey Fields, Tomás Jiménez, Paolo Parigi, Aliya Saperstein, Cristobal Young

*Courtesy Professors:* Glenn Carroll, Michele Landis Dauber, Larry Diamond, Clifford J. Nass, Walter Powell, Francisco Ramirez, Jesper Sorensen, Sarah Soule

*Courtesy Associate Professors:* Prudence Carter, Daniel McFarland, Sean Reardon, Mitchell Stevens

*Courtesy Assistant Professor:* Christine Min Wotipka

*Lecturer:* Patricia Chang

*Consulting Professor:* Ruth Cronkite

*Visiting Associate Professors:* Eva-Maria Meyersson Milgrom, Patricia Thornton

*Department Offices:* Building 120, Room 160

*Mail Code:* 94305-2047

*Phone:* (650) 723-3956

*Web Site:* <http://sociology.stanford.edu>

Courses offered by the Department of Sociology are listed under the subject code SOC on the *Stanford Bulletin's* ExploreCourses web site.

Sociology seeks to understand all aspects of human social behavior, including the behavior of individuals as well as the social dynamics of small groups, large organizations, communities, institutions, and entire societies. Sociologists are typically

motivated both by the desire to better understand the principles of social life and by the conviction that understanding these principles may aid in the formulation of enlightened and effective social policy. Sociology provides an intellectual background for students considering careers in the professions or business. Students may pursue degrees in sociology at the bachelor's, master's, or doctoral levels. The department organizes its courses by areas of study to assist students in tailoring their education and research to their academic interests and career goals.

## MISSION OF THE UNDERGRADUATE PROGRAM IN SOCIOLOGY

The mission of the undergraduate program in Sociology is to provide students with the skills necessary to understand and address social problems and inequalities in global, institutional, and interpersonal social relations. At its core, the curriculum in the major is rooted in social theory and the scientific method. Sociology majors are given opportunities to develop a broad understanding of core sociological theories and the methodological skills used to evaluate human behavior and social organizations. Sociology provides an intellectual background for students considering careers in business, social services, public policy, government service, international nongovernmental organizations, foundations, or academia.

The Sociology major consists of a core curriculum plus elective courses intended to provide breadth of exposure to the variety of areas encompassed by sociology.

## LEARNING OUTCOMES

The department expects undergraduate majors in the program to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the department's undergraduate program. Students are expected to demonstrate:

1. an understanding of core knowledge within the discipline of sociology.
2. the ability to communicate ideas clearly and persuasively in writing.
3. the ability to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
4. the ability to evaluate theory and critique research within the discipline of sociology.

## GRADUATE PROGRAMS IN SOCIOLOGY

The Department of Sociology offers three types of advanced degrees:

- the Doctor of Philosophy
- the coterminal Master of Arts in Sociology which is restricted to currently enrolled Stanford undergraduates
- the Master of Arts in Sociology which is available to Stanford students who are currently enrolled in other advanced degree programs.

The department does not have a terminal M.A. program for external applicants.

## AREAS OF STUDY

The Department of Sociology specializes in four general areas of study, allowing students to tailor their education and research to their academic interests and career goals. The four areas of study supported by the department are:

### ORGANIZATIONS, BUSINESS, AND THE ECONOMY

Focus is on the arrangements which societies construct for the provision of material goods or services. A formal organization which provides goods or services for profit and sells them through a market is called a business, and the economic system is capitalism. Social needs are also met through government and not-for-profit organizations, such as garden clubs, hospitals, prisons, and the Red Cross; some private and social needs are met outside of organizations, such as health care provided by family members

and exchange of favors among friends. Courses stress the factors that determine whether needs that people define are met through markets or non-market allocation, through organizations, or by other means. They also investigate the environmental and technical factors that shape organization structure, the determinants of how efficiently organizations operate, and the interpersonal processes that shape individual behavior within organizations. Careers related to this field include management and administration in business or public settings, management consulting and analysis, and legal studies related to corporations, organizations, and business.

### SOCIAL MOVEMENTS, COMPARATIVE POLITICS, AND SOCIAL CHANGE

Focus is on the emergence, reproduction, and change of political systems and institutions, especially on why and how different political systems and social movements appear in different times and places, and how differences in political regimes and economic systems influence attempts to change these systems. The origins and significance of national and transnational social movements, transition to democracy, including revolution, nationalism, and other forms of collective action, in creating and sustaining these changes analyzed across countries and over time. Careers that are relevant to this field include law, public policy, government service, nonprofit and international nongovernmental organizations, business organizations (especially those with international interests), consulting, and managerial jobs.

### SOCIAL PSYCHOLOGY AND INTERPERSONAL PROCESSES

Focus is on the social organization of individual identity, beliefs, and behavior, and upon social structures and processes which emerge in and define interpersonal interactions. Processes studied include social acceptance and competition for prestige and status, the generation of power differences, the development of intimacy bonds, the formation of expectation states which govern performance in task oriented groups, and social pressures to constrain deviance. Foundation courses emphasize the effect of social processes on individual behavior and the analysis of group processes. This field provides training for careers with a significant interpersonal component, including advertising and marketing, business, education, law, management, medicine and health, or social work.

### SOCIAL INEQUALITY

Focus is on forms of social inequality, including fields such as: the shape and nature of social inequalities; competition for power; allocation of privilege; production and reproduction of social cleavages; and consequences of class, race, and gender for outcomes such as attitudes, political behavior, and life styles. Many courses emphasize changes in the structure of social inequalities over time, and the processes which produce similarities or differences in stratification across nations. Topics include educational inequality, employment history, gender differences, income distributions, poverty, race, and ethnic relations, social mobility, and status attainment. Careers related to this field include administration, advertising, education, foreign service, journalism, industrial relations, law, management consulting, market research, public policy, and social service.

## BACHELOR OF ARTS IN SOCIOLOGY

*Declaring the Major in Sociology* — To declare a major in Sociology, students should declare the BA in Axess, then download the major declaration form from the department website. Complete the top portion of the form, sign, and email the Director of the Undergraduate Program in Sociology to set up an entrance advising meeting.

*Major Requirements* — A 3.0 GPA is required to enter the Sociology major. The BA in Sociology requires 60 units of course work. Units applied to the major must be taken for a letter grade

(except for independent study or directed reading), and all earned grades must be 'C' or better.

## CORE CURRICULUM FOR ALL SOCIOLOGY MAJORS

Students are encouraged to complete some course work at the 200-level. Sociology majors are encouraged to participate in directed research or undertake independent research with Sociology faculty. See the department web site for additional information.

Units required for the Sociology BA are:

Sociology Core Courses	Units	
Sociology Foundation Courses		20
Social Science Electives		15
Statistics		20
		5
Total units required for the major		60

### CORE COURSES REQUIRED FOR THE MAJOR

The following core courses are required of all Sociology majors.

1. SOC 170. Classics of Modern Social Theory
2. SOC 180A. Foundations of Social Research
3. SOC 180B. Introduction to Data Analysis
4. SOC 200 or SOC 202. Junior/Senior Seminar for Majors or Preparation for Honors Thesis.
  - It is recommended that students take this required course during Junior year or as early as possible during Senior year. Students pursuing the regular B.A. should take SOC 200. Students considering honors are encouraged to enroll in SOC 202 instead of SOC 200.

### FOUNDATION COURSES REQUIRED FOR THE MAJOR

Sociology majors must complete 15 units of foundation courses; one course in three different areas for a total of three courses. For further information about Sociology areas of study, see the department web site.

Foundation courses, classified by area of study, are as follows:

#### *Organizations, Business, and the Economy*

- SOC 114. Economic Sociology
- SOC 160. Formal Organizations
- SOC 162. Markets and Governance

#### *Social Movements, Comparative Politics, and Social Change*

- SOC 106. Political Sociology
- SOC 118. Social Movements and Collective Action
- SOC 130. Education and Society

#### *Social Psychology and Interpersonal Processes*

- SOC 120. Interpersonal Relations
- SOC 121. The Individual in Social Structure: Foundations in Sociological Social Psychology
- SOC 127. Bargaining, Power, and Influence in Social Interaction

#### *Social Inequality*

- SOC 140. Introduction to Social Stratification
- SOC 141. Controversies About Inequality
- SOC 144. Inequality in the Workplace
- SOC 149. The Urban Underclass

#### *Race, Gender, Immigration, Identity, and Policy*

- SOC 142. Sociology of Gender
- SOC 145. Race and Ethnic Relations
- SOC 150. Race and Political Sociology
- SOC 155. The Changing American Family
- SOC 164. Immigration and the Changing United States

### SOCIAL SCIENCE ELECTIVE COURSES

Four Social Science electives (20 units) are required for the major. You may take all four courses in Sociology if you wish. Students may choose their elective courses according to personal interest. Non-Sociology courses must be approved by the director

of undergraduate studies. A maximum of 10 units taken in other Social Science departments (Anthropology, Communication, Economics, Political Science, Psychology) may be counted towards the 60 units required for the Sociology B.A.

### STATISTICS REQUIREMENT

Sociology majors are required to take at least one statistics course (5 units). The department suggests the courses listed below, or other comparable course with approval of the director of undergraduate studies.

Suggested Statistics courses for Sociology majors:

- SOC 181B. Sociological Methods: Statistics
- STATS 60. Introduction to Statistical Methods: Precalculus
- PSYCH 60. Introduction to Statistical Methods: Precalculus

### HONORS PROGRAM

Sociology majors who wish to complete an independent scholarly project under the direction of a faculty member are encouraged to apply for admission to the department's honors program. Admission to the program requires a grade point average (GPA) of 3.5 or higher in courses taken within the major, and an overall GPA of 3.3 (B+) or higher in all undergraduate course work. Applicants are required to identify a Sociology faculty member to advise on the research and writing of the essay. With the approval of the Director of Undergraduate Studies, students may work with faculty advisors in other departments.

Students are encouraged to begin planning their honors thesis in their junior year; at this time they should enroll in SOC 202, Preparation for Honors Thesis or SOC 200, Junior/Senior Seminar. Students begin designing their honors project in connection with this seminar and in consultation with the seminar leader. To apply for the honors program, students should complete the honors application, obtain an advisor's approval and signature, and submit the application with a brief description of the proposed project, and a copy of the student's unofficial undergraduate transcript, to the Director of Undergraduate Studies. Prospective candidates are asked to submit an honors application as soon as possible in their junior or senior year, ideally no later than the end of the fourth quarter prior to graduation (typically Spring Quarter of the junior year). Honors students may earn up to 12 independent study units for work leading to completion of the required honors thesis, excluding units associated with the Junior/Senior Seminar.

If the student is admitted to the program, students will be directed to declare the B.A.H. in Axess and drop the general B.A. Completion of honors in Sociology requires:

1. Application and acceptance into the Sociology Honors Program
2. Completion of all requirements of the Sociology major
3. Completion of an honors thesis with a grade of A- or higher
4. Participation in the Sociology Honors Colloquium in the Spring quarter prior to graduation.

If honors program requirements are not met, students must drop the BAH degree program in Axess and declare the BA before applying to graduate.

### MINOR IN SOCIOLOGY

Students must complete a minimum of 35 units in Sociology for the minor. Courses must be taken for a letter grade, and a minimum grade point average (GPA) of 2.0 (C) must be achieved. Students are encouraged to complete a course in sociological theory, such as SOC 170, and to obtain exposure to one of the areas of study. Students who wish to declare a minor in Sociology must do so no later than the deadline for their application to graduate. Related course work from other departments may fulfill a minor requirement. All course substitutions must be pre-approved by the Sociology student services office and the Undergraduate Program Director; a student may not exceed 5 substitution units for the minor.

Course requirements for a minor in Sociology are as follows:

SOC 1. Introduction to Sociology  
 SOC 180A. Foundations of Social Research, and/or SOC 180B. Evaluation of Evidence  
 Two foundation courses; see foundation courses required for the major above  
 Additional course work in the department (100- or 200-level courses)  
 Total course work required

Units information regarding the Sociology coterminal M.A. and how to apply, see  
 5 <http://www.stanford.edu/dept/soc/coterminal/index.html>.  
 5

## 10 **MASTER OF ARTS IN SOCIOLOGY FOR CURRENT STANFORD GRADUATE STUDENTS**

15  
 35

The M.A. degree in Sociology is available to current Ph.D. candidates in Sociology and to students in advanced degree programs (Ph.D., J.D., M.D.) from other Stanford departments and schools.

For the M.A. degree, students must complete a minimum of 45 units of Sociology course work with a grade point average (GPA) of 3.0 (B) or better. All 45 units must be taken in courses taught by Sociology faculty. Students must enroll in SOC course offerings; crosslisted offerings are not accepted. All courses must be taken for a letter grade if possible. Workshop, research, directed reading, and independent study units do not count towards the M.A.

University regulations pertaining to the M.A. are listed in the "Graduate Degrees" section of this bulletin.

Students who wish to engage in more in-depth study in a specific area may do so by focusing on course work within an area of study.

No thesis is required.

While formal application to the M.A. program is not required, applicants from outside of the Sociology department must submit to the Sociology student services office:

1. a completed Graduate Authorization Petition form, available electronically through Axxess for submission to the Office of the University Registrar
2. a completed Program Proposal for an M.A. form
3. a short statement of purpose

Sociology Ph.D.s typically receive their M.A. in their second or third year of graduate study. Interested students from other degree programs should visit the department's web site here at <http://www.stanford.edu/dept/soc/doctoral/magrad.html>.

## **DOCTOR OF PHILOSOPHY IN SOCIOLOGY**

The Ph.D. curriculum and degree requirements are designed to provide students with the knowledge and skills to become proficient scholars and teachers. Doctoral students in the department must take required courses for a letter grade if available and are expected to earn a grade of 'B+' or better in each course. Any grade of 'B' or below is considered to be less than satisfactory. Grades of 'B' or below are reviewed by faculty and the following actions may take place: the grade stands and the student's academic performance is monitored to ensure that satisfactory progress is being made; the grade stands and the student is required to revise and resubmit the work associated with that course; or the student may be required to retake the course. The following program requirements apply to students who entered the Ph.D program in 2010-11; students admitted prior to 2010 should consult the department or the Bulletin from their year of admission for requirements specific to their cohort.

Students must complete the following department requirements for the Ph.D. degree in Sociology:

1. Students must enroll in SOC 305, Graduate Proseminar, in Autumn Quarter of the first year; the course provides an introduction and orientation to the field of sociology, and to the department and faculty. One unit of credit is given for this course; grading is on a satisfactory/no credit basis.
2. Students are required to complete 45 units of course work in Sociology in the first academic year, then 15 units of Sociology course work in the second academic year. Course work excludes workshop, independent study, and directed reading units.
3. Theory: Students are required to take at least two courses in sociological theory. One course should be in either macro-

## **COTERMINAL MASTER OF ARTS IN SOCIOLOGY**

Stanford undergraduates, regardless of undergraduate major, who wish to pursue an M.A. in Sociology may apply for the coterminal master's program. The coterminal M.A. in Sociology is a flexible, self-designed program. Most students complete their M.A. in a fifth year at Stanford; occasionally students are able to complete their B.A. and coterminal M.A. in the fourth year.

*Application and admission*—Undergraduates must be admitted to the program and enrolled as a graduate student for at least one quarter prior to their B.A. conferral. A cumulative GPA of at least 3.5 in previous undergraduate work is required for admission; GRE test scores are required. It is highly recommended that applicants have completed at least one Sociology course at the 100 level with a grade of 'B' or better. The department accepts applications once a year; the application deadline is February 15th for admission in the Spring quarter immediately following. There are no exceptions to this deadline. All application materials are submitted directly to the Sociology graduate student services office. The department does not fund coterminal M.A. students. To apply for admission to the Sociology coterminal M.A. program, students must submit the coterminal application and the following:

1. a 2-5 page statement of purpose;
2. a preliminary program proposal that specifies at least 45 units of course work relevant to the degree program with at least 40 units in Sociology;
3. a current unofficial undergraduate transcript;
4. two letters of recommendation from Stanford faculty familiar with the student's academic work;
5. GRE scores.

*Program requirements*—Coterminal M.A. students are required to take 45 units of course work during their graduate career; 40 of these units must be in Sociology courses. Students who wish to engage in more in-depth study in a specific area may do so by focusing on course work within an area of study. All units for the coterminal M.A. must be taken at or above the 100 level; advanced-level course work is encouraged and a minimum of 20 units must be taken at the 200 level. Students who wish to take courses outside the department must seek prior approval from the Sociology student services office; coterminal master's students are limited to 5 units from outside of the department; outside courses must be taken in other Social Science departments. Students may transfer a maximum of 10 units from their undergraduate career; to be eligible for transfer, courses must have been taken in the two quarters preceding admission to the M.A. program. All units applied to the coterminal master's degree must be taken for a letter grade, and an overall grade point average (GPA) of 3.0 (B) or better is required for the degree. Because research methods are an important component of graduate training in the social sciences, coterminal students are encouraged to take SOC 180A, Foundations of Social Research, and 180B, Evaluation of Evidence, in sequence when possible. These methods courses provide skills for research opportunities within the department and in academic or professional careers. Coterminal M.A. students should meet with their assigned faculty adviser upon acceptance to the program.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/pdf/CotermApplic.pdf>. For detailed

- sociological theory (SOC 370A), or micro-sociological theory (SOC 370B), in the first year of the program. A second course, in research design, should be taken during the second year in the program (SOC 670 or SOC 372, when offered). Students without a background in Sociology are encouraged to enroll in SOC 370A as well as 370B.
4. Methodology: Students are required to complete a series of courses in methodology as well as one methods elective. Students with little background in statistics are encouraged to take an undergraduate statistics course in their first quarter of the program. The required methods sequence, to be taken in order, is: SOC 381, SOC 382, SOC 383, then SOC 384.
  5. Survey Courses: Students must complete four broad survey courses to demonstrate command of a range of sociological literatures. Each year the department specifies which courses meet this requirement, and will undertake to ensure that an adequate selection of such courses is offered. A list of courses that generally fulfill this requirement is listed in the requirements section below. Students should consult with their advisor to ensure that the combination of courses selected to meet this requirement exhibits sufficient breadth. This requirement is normally completed by the end of the second year of residency and must be met by the end of the third year of residency. The most current list of approved survey courses is available on the department website.
  6. Workshops: Beginning in year two, doctoral students are required to enroll in at least one workshop each quarter. First year students may attend workshops but are not required to enroll. Sociology workshops are offered for 1-2 units on a credit/non-credit basis only and attendance is required to receive course credit. The Graduate Studies Director may approve a student's petition to attend a workshop when enrollment is prohibited by unit constraints; such attendance is not noted on the transcript. A list of approved workshops that fulfill this requirement is listed in the requirements section below and also on the department website.
  7. Qualifying Exam #1: The first comprehensive examination is designed to ensure that students will enter their second year with a firm reading knowledge of two substantive subfields. Students will write two essays in response to questions provided by the examining committee. The questions are due exactly one week later. Students will choose one out of two questions to write on for each subfield. Examinations will be offered in seven subject areas, based on comprehensive readings lists that will be available at the beginning of each academic year. Each subject area will have one faculty point person or "group leader." Group leaders are responsible for assembling essay questions and agree to meet with students as requested. Exam subject areas and the for 2011-12 are: Economic Sociology and Organizations; Social Inequality; Gender; Race, Ethnicity, and Immigration; Political Sociology/Social Movements/Collective Action; Historical and Comparative Sociology; Social Psychology. Students may work together to read and discuss the materials on the comprehensive reading lists (and in fact they are encouraged to do so). They may consult with faculty members as they study for the exams. However, once the examination questions are released, all such collaboration and consultation should stop, and students should work independently on their essays.
  8. Qualifying Exam #2: The second qualifying examination is a longer critical essay that focuses on a bibliography devised by the student jointly with their faculty advisor. This exam will provide students with a more focused critical engagement in a specialized subfield or research area, and serves as a test of the student's ability to work and think independently. Exam #2 is due by May 15 of the second year in residence. A two-person committee that includes the primary advisor evaluates the paper. Although the reading committee is usually comprised of two regular faculty members in the department, emeritus and other faculty outside of the department may serve as a committee member with prior approval. Examinations are graded by both committee members, and the grades on these qualifying exams are an important component of the decision to advance a student to candidacy. To accommodate student interests and goals, there are two options for Exam #2, an analytic essay (option 1) or research paper (option 2) – see department website for more detailed information. Students may employ one of the comprehensive examination reading lists (from exam #1) for an area in which they did not take the exam to construct the bibliography. If students would like to be examined in a more specialized sub-area within one of the fields that they took for exam #1, they should consult with their reading committee and receive approval from the Director of Graduate Studies. Students should submit the Second Year Qualifying Paper form to the department (Student Services Officer) by the end of Fall quarter of the 2nd year.
  9. Third Year Paper: In preparation for a career of writing scholarly papers, each student must complete a research paper in the third year of residency. This third-year paper may be on any sociological topic, and may address theoretical, empirical, or methodological issues. The paper is expected to reflect original work and be of publishable quality. Students will select a committee of at least two Sociology faculty members to serve as third year paper readers. To ensure that students are making adequate progress on their paper, students are required to provide a first draft of the paper to readers by April 1st. The final deadline for paper submission is May 15th. The committee will provide a review that speaks to (1) whether the paper is publishable and whether the student should therefore invest in attempting to publish it, and (2) what types of revisions, insofar as the paper is publishable, that the student should be pursuing to ready the paper for publication. These comments will be shared with the Director of Graduate Studies, and copies of the paper and faculty comments will go in the student file.
  10. TA requirement: Students must complete three quarters of teaching apprenticeship in departmental courses, or in other courses by approval. Work as either a teaching assistant (TA) under the supervision of a faculty member or as a teaching fellow (TF) fulfills this requirement. Students are required to take SOC 300, Workshop: Teaching Development, in Spring Quarter of the first year. In addition, students are encouraged to take advantage of department and University teacher training programs. Students for whom English is a second language are expected to acquire sufficient facility in English to be an effective teacher.
  11. RA requirement: As partial preparation for becoming an accomplished researcher, each student must complete three quarters of research experience, working under the supervision of one or more faculty members, including regular, emeritus, and affiliated faculty. The experience may involve paid (or unpaid) work as a Research Assistant (RA). With the approval of the Director of Graduate Studies, research experience may be acquired by involvement in research projects outside the department. It is recommended that students complete their research requirements early in their graduate program; the requirement must be completed by the end of the fourth year of residency.
  12. Students are required to present at least two papers at a major professional meeting (e.g., ASA) in their first five years of graduate study.
  13. In order to demonstrate the ability to conduct independent scholarly work, each student must prepare and defend dissertation prospectus by the end of May during the fourth year in residence.
  14. Dissertation Prospectus and Prospectus Defense: In order to demonstrate the ability to conduct independent scholarly work, each student must prepare and defend dissertation prospectus by the end of May during the fourth year in residence. Students should have their dissertation committee selected by the end of their third year in the program.

15. Each student must complete and defend a doctoral dissertation. At the choice of the student (and in consultation with her or his advisor), the dissertation requirement may be met either by (1) submitting the usual book-length document of the sort now required, or (2) submitting three independent papers. The papers may address the same topic, but should be written as stand-alone, single-authored papers in standard journal format (i.e., AJS or ASR). None of these papers may overlap substantially with one another, and none of them may be co-authored. (The main criterion in judging "substantial overlap" is whether any standard journal, such as AJS, would regard the papers as too similar to publish both.) The dissertation must be submitted to all committee members at least 30 days in advance of the defense date. The dissertation defense serves as the Oral Examination required by the University. Assessment of satisfactory completion is determined by the student's doctoral committee members. All students are invited to present their dissertation findings at an informal department colloquium.

The faculty are responsible for providing students with timely and constructive feedback on their progress toward the Ph.D. In order to evaluate student progress and to identify potential problem areas, the department's faculty reviews the academic progress of each first-year student at the beginning of Winter and Spring quarters and again at the end of the academic year. The first two reviews are primarily intended to identify developing problems that could impede progress. In most cases, students are simply given constructive feedback, but if more serious concerns warrant, a student may be placed on probation with specific guidelines for addressing the problems detected. The review at the end of Spring Quarter is more thorough; each student's performance during the first year is reviewed and discussed. Possible outcomes of the spring review include: (1) continuation of the student in good standing, or (2) placing the student on probation, with specific guidelines for the period of probation and the steps to be taken in order to be returned to good standing. For students on probation at this point (or at any other subsequent points), possible outcomes of a review include: (1) restoration to good standing; (2) continued probation, again with guidelines for necessary remedial steps; or (3) termination from the program. Students leaving the program at the end of the first year are usually allowed to complete the requirements to receive an M.A. degree, if this does not involve additional residence or financial support. All students are given feedback from their advisers at the end of their first year of graduate work, helping them to identify areas of strengths and potential weakness.

At the end of the second year of residency, students who are performing well, as indicated by their coursework, performance on qualifying examinations, and teaching and research assistantship performance, are advanced to candidacy. This step implies that the student has demonstrated the relevant qualities required for successful completion of the Ph.D. Future evaluations are based on the satisfactory completion of specific remaining department and University requirements. Students who are not advanced to candidacy will normally be terminated from the program and awarded an M.A. degree. In some cases, the department may require that a student complete outstanding work or complete unmet requirements before admission to candidacy. The university requires that all students must be admitted to candidacy by the beginning of the third year in residence in order to continue in the Ph.D. program. Therefore all requirements stipulated by the department must be met before registration for the fall quarter of the student's third year.

At any point during the degree program, evidence that a student is performing at a less than satisfactory level may be cause for a formal academic review of that student.

## REQUIREMENTS

### SURVEY COURSES

Students must complete four courses from an approved list. This list is updated and circulated to students at the start of each academic year. *Note:* class offerings rotate; not all approved survey courses are offered every year. The following courses typically fulfill the survey course requirement:

- 310. Political Sociology
- 314. Economic Sociology
- 316. Historical and Comparative Sociology
- 318. Social Movements and Collective Action
- 320. Foundations of Social Psychology
- 322. Social Interaction, Social Structure, and Social Exchange
- 323. Sociology of the Family
- 339. Gender Meanings and Processes
- 340. Social Stratification
- 342B. Gender and Social Structure
- 345. Comparative Race and Ethnic Relations
- 347. Race and Ethnicity in Social Institutions
- 357. Immigration and Assimilation
- 358. Sociology of Immigration
- 360. Foundations of Organizational Sociology
- 362. Organizations and Environments
- 363A. Seminar on Organizational Theory
- 366A. Organizational Ecology
- 376. Perspectives on Organization and Environment

### RESEARCH METHODS

Required methodology courses are listed below. Students are required to enroll in 384, Sociology Methodology IV: New Models and Methods, in their first or second year of the program.

- 381. Sociological Methodology I: Introduction
- 382. Sociological Methodology II: Multivariate Regression
- 383. Sociological Methodology III: Models for Discrete Outcomes
- 384. Sociology Methodology IV: New Models and Methods  
The following course requirements apply to students who entered the Ph.D program in 2004-05 or earlier.
- 281B. Statistics (recommended for students with little statistical background)
- 381A. Sociological Methodology I: Computer Assisted Data Analysis
- 382. Sociological Methodology II: The General Linear Model
- 383. Sociological Methodology III: Advanced Models for Discrete Outcomes
- 388. Advanced Models for Analysis of Tabular Arrays  
• or 389. Mixed Method Research Design

### THEORY

- 370A. Sociological Theory: Social Structure, Inequality, and Conflict
- 370B. Social Interaction and Group Process
- 670. Designing Social Research
- 372. Theoretical Analysis and Design

### WORKSHOPS

- 311A,B,C. Workshop: Comparative Studies of Educational and Political Systems
- 312W. Workshop: Political Sociology, Social Movements, and Collective Action
- 315W. Workshop: Economic Sociology and Organizations
- 317W. Workshop: Social Networks
- 321W. Workshop: Social Psychology and Social Structure
- 338W. Workshop: Sociology of Law
- 341W. Workshop: Inequality
- 350W. Workshop: Migration, Race, Ethnicity and Nation
- 361W. Workshop: Networks and Organizations

- 368W. Workshop: China Social Science
- 374A,B,C. Research Workshop: Philanthropy and Civil Society

## PH.D. MINOR IN SOCIOLOGY

Sociology offers a minor for currently enrolled doctoral students in other Stanford departments and schools. Students must complete a minimum of 30 graduate-level units with a grade point average (GPA) of 3.0 (B) or better. All 30 units for the minor are to be in courses taught by Sociology faculty. Students must enroll in the SOC course offerings (not cross-listed sections). There is one exception: 5 units may be taken in a statistics or methods course taught in another department. All units must be taken for a letter grade. Workshop, research, directed reading, or independent study units do not count towards the Ph.D. Minor. The program must be approved by a Sociology adviser and filed with the Sociology student services office. While there is not a formal application process, candidates must submit a short statement of purpose (2 pages), and a completed Application for Ph.D. Minor to the Sociology student services office. The Application for Ph.D. Minor must have all Sociology or other courses to be applied to the minor listed, including course number, units, and final grades.

## JOINT PROGRAMS IN SOCIOLOGY WITH THE SCHOOL OF LAW

The School of Law and Department of Sociology conduct joint programs leading to either a combined J.D. degree with an M.A. degree in Sociology or to a combined J.D. degree with a Ph.D. in Sociology.

Law students interested in pursuing an M.A. in Sociology apply for admission to the Department of Sociology during the first year of Law school. Once admitted to the Department of Sociology, the student must complete standard departmental master's degree requirements as specified in this bulletin. Applications for the joint J.D./M.A. degree program must be approved by both the department and the Law school. Faculty advisers from each program participate in the planning and supervising of the student's academic program.

The J.D./Ph.D. degree program is designed for students who wish to prepare themselves for research or teaching careers in areas relating to both legal and sociological concerns. Students interested in the joint degree program must be admitted to both the School of Law and the Department of Sociology. Interest in the joint degree program must be noted on each of the student's applications. Alternatively, an enrolled student in either the Law School or the Sociology department may apply to the other program, preferably during their first year of study. Students participating in the joint degree program are not eligible to transfer and receive credit for a masters, or other degree, towards the Sociology Ph.D..

Upon admission, students are assigned a joint program faculty adviser who assists the student in planning an appropriate program and ensuring that all requirements for both degrees are satisfied. The faculty adviser serves in this capacity during the student's course of study regardless of whether the student is enrolled in the School of Law or the Sociology department.

J.D./Ph.D. students may elect to begin their course of study in either the School of Law or the Department of Sociology. Students must be enrolled full-time in the Law school for the first year of Law school, and must enroll full time in the graduate school for the first year of the sociology program. After that time, enrollment may be in the graduate school or the Law school, and students may choose courses from either program regardless of where enrolled. Students must satisfy the requirements for both the J.D. and the Ph.D. degrees. Up to 81 quarter (54 semester) hours of approved courses may be counted toward both degrees, but no more than 36 quarter (24 semester) hours of courses that originate outside the Law school may count toward the Law degree. To the extent that courses under this joint degree program originate outside of the

Law school but count toward the Law degree, the Law school credits permitted under Section 17(1) of the Law School Regulations for cross-registration in other schools or departments of Stanford University are reduced on a unit-per-unit basis, but not below zero. Students must complete the equivalent of 183 quarter units to complete both degrees. Tuition and financial aid arrangements normally are through the school in which the student is currently enrolled.

The law degree may be conferred upon completion of applicable law school requirements; it is not necessary to have both degrees conferred simultaneously.

For more information, see the Sociology web site at <http://sociology.stanford.edu>, and the Law School web site on the J.D./Ph.D. at <http://www.law.stanford.edu/program/degrees/joint/sociology>.

## OVERSEAS STUDIES COURSES IN SOCIOLOGY

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (<http://explorecourses.stanford.edu>) or the Bing Overseas Studies web site (<http://bossp.stanford.edu>). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

### AUTUMN QUARTER

#### MADRID

- OSPMADRD 61. Society and Cultural Change: The Case of Spain. 5 units, Antonio Muñoz

#### OXFORD

- OSPOXFRD 59. Soccer and English Society. 5 units, Robert Sinclair

### WINTER QUARTER

#### BERLIN

- OSPBER 66. Theory from the Bleachers: Reading German Sports and Culture. 3 units, Wolf Junghanns

#### CAPETOWN

- OSPCPTWN 32. Adult Learning, Development and Social Change: Service-Learning in the Contemporary South African Context. 4-5 units, Janice McMillan

#### FLORENCE

- OSPFLOR 79. Migrations and Migrants: The Sociology of a New Phenomenon. 5 units, Khaled Fouad Allam, GER:DB:SocSci, EC:GlobalCom

#### OXFORD

- OSPOXFRD 117W. Gender and Social Change in Modern Britain. 4-5 units, Amanda Palmer, GER:DB:SocSci, EC:Gender

### SPRING QUARTER

#### BEIJING

- OSPBEIJ 19. Population and Society in East Asia. 4 units, Yun Zhou, GER:DB:SocSci, EC:GlobalCom
- OSPBEIJ 41. Chinese Society and Business Culture. 4 units, Bobai Li, GER:DB:SocSci, EC:GlobalCom

#### CAPETOWN

- OSPCPTWN 32. Adult Learning, Development and Social Change: Service-Learning in the Contemporary South African Context. 4-5 units, Janice McMillan

# STATISTICS

*Emeriti:* Theodore W. Anderson, Jerome H. Friedman, Ingram Olkin, Charles Stein, Paul Switzer

*Chair:* Wing H. Wong

*Professors:* Emmanuel Candes, Thomas M. Cover, Amir Dembo, Persi Diaconis, David L. Donoho, Bradley Efron, Trevor J. Hastie, Iain M. Johnstone, Tze L. Lai, Art Owen, Joseph P. Romano, David O. Siegmund, Robert J. Tibshirani, Guenther Walther, Wing H. Wong

*Associate Professor:* Jonathan Taylor

*Assistant Professors:* Andrea Montanari, Balakanapathy Rajaratnam, Nancy Zhang

*Professor (Teaching):* Susan Holmes

*Courtesy Professors:* Philip W. Lavori, Richard A. Olshen, Hua Tang

*Courtesy Associate Professors:* Simon Jackman, David Rogosa, Chiara Sabatti

*Consulting Professors:* John Chambers, Charles Chui

*Stein Fellow:* Michael Baiocchi

*Mail Code:* 94305-4065

*Phone:* (650) 723-2620

*Web Site:* <http://stat.stanford.edu>

Courses offered by the Department of Statistics are listed under the subject code STATS on the *Stanford Bulletin's* ExploreCourses web site.

The department's goals are to acquaint students with the role played in science and technology by probabilistic and statistical ideas and methods, to provide instruction in the theory and application of techniques that have been found to be commonly useful, and to train research workers in probability and statistics. There are courses for general students as well as those who plan careers in statistics in business, government, industry, and teaching.

The requirements for a degree in Statistics are flexible, depending on the needs and interests of the students. Some students may be interested in the theory of statistics and/or probability, whereas other students may wish to apply statistical and probabilistic methods to a substantive area. The department has long recognized the relation of statistical theory to applications. It has fostered this by encouraging a liaison with other departments in the form of joint and courtesy faculty appointments: Economics (Anderson), Education (Olkin, Rogosa), Electrical Engineering (Cover), Geological and Environmental Sciences (Switzer), Health Research and Policy (Efron, Hastie, Johnstone, Lavori, Olshen, Tibshirani, Wong), Mathematics (Dembo, Diaconis), Political Science (Jackman), and the SLAC National Accelerator Laboratory (Friedman). The research activities of the department reflect an interest in applied and theoretical statistics and probability. There are workshops in biology/medicine and in environmental factors in health.

In addition to courses for Statistics majors, the department offers a number of service courses designed for students in other departments. These tend to emphasize the application of statistical techniques rather than their theoretical development.

The Department of Statistics is well equipped for statistical applications and research in computational statistics. Computer facilities include several networked Unix servers and a PC lab for general research and teaching use. The Mathematical Sciences Library serves the department jointly with the departments of Mathematics and Computer Science.

The department has always drawn visitors from other countries and universities. As a consequence, there is usually a wide range of seminars offered by both the visitors and the department's own faculty.

## UNDERGRADUATE PROGRAMS IN STATISTICS

### MAJORING IN STATISTICS

Students wishing to build a concentration in probability and statistics are encouraged to consider declaring a major in Mathematical and Computational Science. This interdepartmental program is administered in the Department of Statistics and provides core training in computing, mathematics, operations research, and statistics, with opportunities for further elective work and specialization. See the "Mathematical and Computational Science" section of this bulletin.

### GRADUATE PROGRAMS IN STATISTICS

University requirements for the M.S. and Ph.D. degrees are discussed in the "Graduate Degrees" section of this bulletin.

### MINOR IN STATISTICS

The undergraduate minor in Statistics is designed to complement major degree programs primarily in the social and natural sciences. Students with an undergraduate Statistics minor should find broadened possibilities for employment. The Statistics minor provides valued preparation for professional degree studies in postgraduate academic programs.

The minor consists of a minimum of six courses with a total of at least 20 units. There are two required courses (8 units) and four qualifying or elective courses (12 or more units). All courses for the minor must be letter graded. An overall 2.75 grade point average (GPA) is required for courses fulfilling the minor.

1. *Required Courses*—STATS 116 and 200.
2. *Qualifying Courses*—at most, one of these two courses may be counted toward the six course requirement for the minor: MATH 52; STATS 191.
3. *Elective Courses*—at least one of the elective courses should be a STATS 200-level course. The remaining two elective courses may also be 200-level courses. Alternatively, one or two elective courses may be approved courses in other departments. Special topics courses and seminars for undergraduates are offered from time to time by the department, and these may be counted toward the course requirement. Students may not count any Statistics courses below the 100 level toward the minor. Examples of elective course sequences are:
  - STATS 202, 203, 204, emphasizing data analysis and applied statistics
  - STATS 205, 206, 207, emphasizing statistical methodology
  - STATS 206, ECON 160, 181, emphasizing economic optimization
  - STATS 206, PSYCH 156, 160, emphasizing psychology modeling and experiments
  - STATS 207, EE 264, 279, emphasizing signal processing
  - STATS 217, BIO 283, emphasizing genetic and ecologic modeling
  - STATS 217, 218, emphasizing probability and its applications
  - STATS 240, 250, emphasizing mathematical finance

The Statistics Department Chair must approve any exceptions to the list of electives.

### MASTER OF SCIENCE IN STATISTICS

The department requires that the student take 45 units of work from offerings in the Department of Statistics or from authorized courses in other departments. Ordinarily, four or five quarters are needed to complete all requirements.

Students must fulfill the following requirements for the M.S. degree:

1. STATS 116, 191, 200, and 217. All must be taken for a letter grade. Courses previously taken may be waived by the adviser, in which case they must be replaced by other graduate courses offered by the department.

2. One of MATH 104, 113, 115, 171; and one of CS 106A, 106X, 137, 138, 140-181. Substitution of other courses in Mathematics and Computer Science may be made with consent of the adviser.
3. At least four additional Statistics courses from graduate offerings in the department (202-399). All must be taken for a letter grade. Consent of the adviser is required in order to take more than six units of STATS 260A,B,C, 298, 299, 390, or 399.
4. Additional elective units to complete the requirements may be chosen from the list available from the department web site. Other graduate courses (200 or above) may be authorized by the adviser if they provide skills relevant to statistics or deal primarily with an application of statistics or probability and do not overlap courses in the student's program. There is sufficient flexibility to accommodate students with interests in applications to business, computing, economics, engineering, health, operations research, and biological and social sciences.
5. Courses below 200 level are generally not acceptable, with the following exceptions: STATS 116, 191; MATH 103, 113, 115, 171, 180; CS 106A, 106B, 106X, 137, 138, 140-181. At most, one of these two courses may be counted: (1) MATH 151 or STATS 116, (2) MATH 103 or MATH 113.

Students with a strong mathematical background who may wish to go on to a Ph.D. in Statistics should consider applying to the Ph.D. program.

The eight Statistics courses required for the M.S. degree must be taken for letter grades. Courses other than the eight required statistics courses may be taken for a letter grade or Credit/No Credit. There is no thesis requirement. An overall 2.75 grade point average (GPA) is required.

## DOCTOR OF PHILOSOPHY IN STATISTICS

The department looks for students who wish to prepare for research careers in statistics or probability, either applied or theoretical. Advanced undergraduate or master's level work in mathematics and statistics provides a good background for the doctoral program. Quantitatively oriented students with degrees in other scientific fields are also encouraged to apply for admission. In particular, the department is expanding its research and educational activities towards computational biology, mathematical finance and information science, via a VIGRE program. The program normally takes four years to complete.

**Program Summary**—STATS 300A,B,C, 305, 306A,B, and 310A,B,C (first-year core program); pass two of three parts of the qualifying examinations (end of first year); breadth requirement (second or third year); successfully complete the thesis proposal meeting (before end of third year); pass the University oral examination (fourth year); dissertation (fourth year).

In addition, students are required to take 9 units of advanced topics courses offered by the department (including at least two of the following: 314, 317, 318, 315A, or 315B, but not including literature, research, or consulting), and 3 units of 390 statistical consulting. All students who have passed the qualifying exams but have not yet passed the University oral examination must take 319 at least once per year.

**First-Year Core Courses**—STATS 300 systematically surveys the ideas of estimation and of hypothesis testing for parametric and nonparametric models involving small and large samples. 305 is concerned with linear regression and the analysis of variance. 306 surveys a large number of modeling techniques, related to but going beyond the linear models of 305. 310 is a measure-theoretic course in probability theory, beginning with basic concepts of the law of large numbers and martingale theory. Students who do not have enough mathematics background can take 310 after their first year but need to have their first-year program approved by the Ph.D. program adviser.

**Qualifying Examinations**—These are intended to test the student's level of knowledge when the first-year program, common

to all students, has been completed. There are separate examinations in the three core subjects of statistical theory and methods, applied statistics, and probability theory, and all are typically taken during the summer between the student's first and second years. Students may take two or three of these examinations and are expected to show acceptable performance in two examinations.

**Breadth Requirement**—Students are advised to choose an area of concentration in a specific scientific field of statistical applications; this can be realized by taking at least 15 units of course work approved by the Ph.D. program adviser.

Current areas with suggested course options include:

**Computational Biology and Statistical Genomics**—Students are expected to take 9 units of graduate courses in genetics or neurosciences (imaging), such as GENE 203/BIO 203, as well as 9 units of classes in Statistical Genetics or Bioinformatics, GENE 344A,B, STATS 345, STATS 366, STATS 367.

**Machine Learning**—Courses can be chosen from the following list:

Statistical Learning: STATS 315A and 315B

Data Bases: CS 245, 346, 347

Probabilistic Methods in AI: CS 221, 354

Statistical Learning Theory and Pattern Classification: CS 229

**Applied Probability**—Students are expected to take 15 units of graduate courses in some of the following areas:

Control and Stochastic Calculus: MS&E 322, 351, MATH 237, EE 363

Finance: STATS 250, FINANCE 622, MATH 236

Information Theory: EE 376A, 376B

Monte Carlo: STATS 318, 345, 362, MS&E 323

Queuing Theory: GSB 661, 663, MS&E 335

Stochastic Processes: STATS 317, MATH 234

**Earth Science Statistics**—Students are expected to take:

STATS 317, 318, 352

and three courses from the GES or Geophysics departments, such as GES 144 or GEOPHYS 210.

**Social and Behavioral Sciences**—Students are expected to take three advanced courses from the department with an applied orientation such as:

STATS 261/262, 324, 343, 354

and three advanced quantitative courses from departments such as Anthropology, Economics, Political Science, Psychology, and Sociology, and the schools of Education, Business, or Medicine.

**Thesis Proposal Meeting and University Oral Examinations**—The thesis proposal meeting is intended to demonstrate students' depth in some areas of statistics, and to examine the general plan for their research. In the meeting, the student gives a short presentation and discusses his/her ideas for completing a Ph.D. thesis, with a committee consisting of their adviser and thesis committee (a total of three members). The meeting must be completed before the end of the third year. If the student does not pass, the exam must be repeated. Repeated failure can lead to a loss of financial support.

The oral examination consists of a 40-minute presentation on the thesis topic, followed by a question period. The questions relate both to the student's presentation and also explore the student's familiarity with broader statistical topics related to the thesis research. The oral examination is normally completed within the last few months of the student's Ph.D. period. The examining committee usually consists of four faculty members from the Statistics Department and a fifth faculty member from outside the department. Four out of five passing votes are required and no grades are given. Nearly all students can expect to pass this examination, although it is common for specific recommendations to be made regarding completion of the thesis.

A reading committee must also read and approve the thesis. The reading committee is typically the same as the thesis committee from the thesis proposal meeting.

*Transition policy*—The policy above took effect in Autumn Quarter 2009-10. Students beginning their first year in 2008-09 or later must follow this new policy. Other students can choose either the old or new system; students in this category who choose the new scheme and have already finished their third year can have the thesis proposal meeting as soon as they are ready.

For further information on University oral examinations and committees, see the Graduate Academic Policies and Procedures (GAP) Handbook, section 4.7 or the "University Oral Examination" section of this bulletin.

*Financial Support*—Students accepted to the Ph.D. program are offered financial support. All tuition expenses are paid and there is a fixed monthly stipend determined to be sufficient to pay living expenses. Financial support can be continued for five years, department resources permitting, for students in good standing. The resources for student financial support derive from funds made available for student teaching and research assistantships. Students receive both a teaching and research assignment each quarter which, together, do not exceed 20 hours. Students are encouraged to apply for outside scholarships, fellowships, and other forms of financial support.

## PH.D. MINOR IN STATISTICS

Students must complete 30 total units for the Ph.D. minor. 20 units must be from Statistics courses numbered 300 and above and taken for letter grades. The remaining 10 units can be from Statistics courses numbered 200 and above, or courses from other departments that are on the approved list for the M.S. degree. The selection of courses must be approved by one of the M.S. advisers. The Application for the Ph.D. Minor form must be approved by both the student's Ph.D. department and the Statistics department.

## SYMBOLIC SYSTEMS

*Director:* Kenneth Taylor

*Director of Graduate Studies:* Lera Boroditsky

*Associate Director:* Todd Davies

*Program Committee:* Lera Boroditsky, Herbert Clark, Todd Davies, Daniel Jurafsky, Scott Klemmer, Daphne Koller, Krista Lawlor, Christopher Manning, James McClelland, Clifford Nass, Stanley Peters, Christopher Potts, Eric Roberts, Ivan A. Sag, Kenneth A. Taylor, Johan van Benthem, Thomas A. Wasow, Terry Winograd

### *Program Faculty:*

*Applied Physics:* Bernardo Huberman (Consulting Professor)

*Art and Art History:* Scott Bukatman (Associate Professor)

*Classics:* Reviel Netz (Professor)

*Civil and Environmental Engineering:* John Kunz (Lecturer)

*Communication:* Jeremy Bailenson (Associate Professor), Clifford J. Nass (Professor), Byron Reeves (Professor), Frederick Turner (Associate Professor)

*Computer Science:* David Dill (Professor), Michael Genesereth (Associate Professor), Jeffrey Heer (Assistant Professor), Oussama Khatib (Professor), Scott Klemmer (Associate Professor), Daphne Koller (Professor), Jean-Claude Latombe (Professor, emeritus), Marc Levoy (Professor), Christopher Manning (Associate Professor), John McCarthy (Professor, emeritus), Andrew Ng (Associate Professor), Nils Nilsson (Professor, emeritus), Vaughan Pratt (Professor, emeritus), Eric Roberts (Professor, Teaching), Tim Roughgarden (Associate Professor), Mehran Sahami (Associate Professor, Teaching), Sebastian Thrun (Professor), Terry Winograd (Professor)

*Economics:* Muriel Niederle (Associate Professor)

*Education:* Raymond P. McDermott (Professor), Roy Pea (Professor), Daniel Schwartz (Professor)

*Electrical Engineering:* Krishna Shenoy (Associate Professor)

*French and Italian:* Jean-Pierre Dupuy (Professor)

*Genetics:* Russ B. Altman (Professor)

*Graduate School of Business:* Baba Shiv (Professor)

*History:* Jessica G. Riskin (Associate Professor)

*Linguistics:* Arto Anttila (Associate Professor), Joan Bresnan (Professor, emerita), Eve Clark (Professor), Daniel Jurafsky (Associate Professor), Ronald Kaplan (Consulting Professor), Lauri Karttunen (Consulting Professor), Martin Kay (Professor), Beth Levin (Professor), Christopher Manning (Associate Professor), Stanley Peters (Professor, emeritus), Christopher Potts (Associate Professor), Ivan A. Sag (Professor), Meghan Sumner (Assistant Professor), Thomas A. Wasow (Professor), Annie Zaenen (Consulting Professor)

*Management Science and Engineering:* Pamela Hinds (Associate Professor)

*Mathematics:* Persi Diaconis (Professor), Solomon Feferman (Professor, emeritus)

*Medicine:* Russ B. Altman (Professor), Mark Musen (Professor)

*Music:* Jonathan Berger (Professor), Christopher Chafe (Professor), Eleanor Selfridge-Field (Consulting Professor), Ge Wang (Assistant Professor)

*Neurobiology:* Ben Barres (Professor), William T. Newsome (Professor), Jennifer Raymond (Associate Professor)

*Email:* symsys-afs@lists.stanford.edu

*Web Site:* <http://symsys.stanford.edu>

Courses offered by the Program in Symbolic Systems are listed under the subject code SYMSYS on the *Stanford Bulletin's* ExploreCourses web site.

The observation that both human beings and computers can manipulate symbols lies at the heart of Symbolic Systems, an interdisciplinary program focusing on the relationship between natural and artificial systems that represent, process, and act on information. Computer programs, natural languages, the human mind, and the Internet embody concepts whose study forms the core of the Symbolic Systems curriculum, such as computation, representation, communication, and intelligence. A body of knowledge and theory has developed around these notions, from disciplines such as philosophy, computer science, linguistics, psychology, statistics, neurobiology, and communication. Since the invention of computers, researchers have been working across these disciplines to study questions such as: in what ways are computers and computer languages like human beings and their

languages; how can the interaction between people and computers be made easier and more beneficial?

The core requirements of the Symbolic Systems Program (SSP) include courses in symbolic logic, the philosophy of mind, formal linguistics, cognitive psychology, programming, the mathematics of computation, statistical theory, artificial intelligence, and interdisciplinary approaches to cognitive science. These courses prepare students with the vocabulary, theoretical background, and technical skills needed for study and research at the advanced undergraduate and graduate levels. Most of the courses in SSP are drawn from affiliated departments. Courses designed specifically for the program are aimed at integrating and supplementing topics covered by the department-based offerings. The curriculum includes humanistic approaches to questions about language and intelligence, as well as training in science and engineering.

SSP offers B.S. and M.S. degree programs. Both programs require students to master a common core of required courses and to choose an area of specialization.

## MISSION OF THE UNDERGRADUATE PROGRAM IN SYMBOLIC SYSTEMS

The undergraduate program in Symbolic Systems is an interdisciplinary program focusing on the relationship between natural and artificial systems that represent, process, and act on information. The mission of the program is to prepare majors with the vocabulary, theoretical background, and technical skills necessary to research questions about language, information, and intelligence, both human and machine. The curriculum offers a combination of traditional humanistic approaches to these questions as well as a training and familiarity with contemporary developments in the science and technology of computation. Students in the major take courses in cognitive science, computer programming, computational theory, probability, cognitive psychology, linguistics, and artificial intelligence. The program prepares student for careers in corporate and private sectors as well as for further study in graduate school.

## LEARNING OUTCOMES

The program expects its undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Symbolic Systems Program. Students are expected to demonstrate:

1. understanding of important concepts from the undergraduate core requirements.
2. ability to apply core concepts to an advanced problem area.
3. ability to apply concepts and methods from more than one discipline to a particular issue.
4. ability to think critically about advanced reading material.
5. ability to present a cogent, coherent, evidence-backed argument.

## BACHELOR OF SCIENCE IN SYMBOLIC SYSTEMS

The program leading to a B.S. in Symbolic Systems provides students with a core of concepts and techniques, drawing on faculty and courses from various departments. The curriculum prepares students for advanced training in the interdisciplinary study of language and information, or for postgraduate study in any of the main contributing disciplines. It is also excellent preparation for employment immediately after graduation.

Symbolic Systems majors must complete a core of required courses plus a field of study consisting of five additional courses. All major courses are to be taken for letter grades unless an approved course is offered satisfactory/no credit only. All core courses must be passed with a grade of 'C-' or better. Students who receive a grade lower than this in a core course must alert the program of this fact so that a decision can be made about whether the student should continue in the major.

## CORE REQUIREMENTS

In order to graduate with a B.S. in Symbolic Systems, a student must complete the following requirements. Some of these courses have other courses as prerequisites; students are responsible for completing each course's prerequisites before they take it. With the exception of the advanced small seminar requirement, courses cannot be used towards more than one area of the core requirements.

1. *Introductory Core Course.*
  - SYMSYS 100. Introduction to Cognitive and Information Sciences
2. *Continuous Fundamentals Level 1—Single Variable Calculus (one of the following):*
  - 10 units of Advanced Placement Calculus credit
  - MATH 19, MATH 20, and MATH 21. Calculus
  - MATH 41 or MATH 41A and MATH 42 or MATH 42A. Calculus (Accelerated)
3. *Continuous Fundamentals Level 2—Multivariable Calculus (one of the following):*
  - CME 100. Vector Calculus for Engineers
  - CME 100A. Vector Calculus for Engineers, ACE
  - MATH 51. Linear Algebra and Differential Calculus for Several Variables
  - MATH 51A. Linear Algebra and Differential Calculus for Several Variables, ACE

Note: MATH 52 and/or 53, or CME 102 and/or 104, are recommended and may be required for some optional higher level courses
4. *Continuous Fundamentals Level 3—Probability and Statistics (one of the following):*
  - CS 109. Introduction to Probability for Computer Scientists
  - STATS 116. Theory of Probability
  - STATS 110. Statistical Methods in Engineering and the Physical Sciences
  - MS&E 120. Probabilistic Analysis
  - EE 178. Probabilistic Systems Analysis
  - MATH 151. Introduction to Probability Theory
  - CME 106/ENGR 155C. Introduction to Probability and Statistics for Engineers
5. *Discrete Fundamentals—*
  - a. Computer Programming (one of the following):
    - CS 106A. Programming Methodology and CS 106B. Programming Abstractions
    - CS 106X. Programming Abstractions (Accelerated)
  - b. Logic and Computational Theory (one of the following):
    - CS 103. Mathematical Foundations of Computing
    - PHIL 150. Basic Concepts in Mathematical Logic
6. *Technical Depth—*

Two courses chosen from the list below, appropriate to a student's concentration (see concentration lists at <http://symsys.stanford.edu/viewing/htmldocument/13607>):

Note: students concentrating in HCI, AI, or Computer Music must take CS 107.

  - Area A. Computer Programming—*
    - CS 107. Computer Organization and Systems
  - Area B. Computational Theory—*
    - CS 154. Introduction to Automata and Complexity Theory
    - CS 156. Calculus of Computation
    - CS 161. Design and Analysis of Algorithms
  - Area C. Logic—*
    - CS 157. Logic and Automated Reasoning
    - PHIL 151. First Order Logic
    - PHIL 152. Computability and Logic
    - PHIL 154. Modal Logic
  - Area D. Decision Theory/Game Theory—*
    - CS 224M. Multi-Agent Systems
    - ECON 160. Game Theory and Economic Applications
    - MS&E 236/236H. Game Theory with Engineering Applications

- MS&E 252. Decision Analysis I: Foundations of Decision Analysis
- Area E. Probability and Statistics—*
- STATS 200. Introduction to Statistical Inference
  - CS 228. Structured Probabilistic Models: Principles and Techniques
7. *Philosophical Foundations Level 1—*Introductory Philosophy (one of the following):
    - PHIL 1. Introduction to Philosophy
    - PHIL 2. Introduction to Moral Philosophy
    - PHIL 60. Introduction to Philosophy of Science
    - PHIL 102. Modern Philosophy, Descartes to Kant
    - IHUM 23A,B. The Fate of Reason
  8. *Philosophical Foundations Level 2—*
    - PHIL 80. Mind, Matter, and Meaning (WIM course)
  9. *Philosophical Foundations Level 3—*Advanced undergraduate course in metaphysics/epistemology (one of the following):
    - PHIL 162. Philosophy of Mathematics
    - PHIL 164. Central Topics in the Philosophy of Science: Theory and Evidence
    - PHIL 166. Probability: Ten Great Ideas About Chance
    - PHIL 168. Theories of Truth
    - PHIL 169. Evolution of the Social Contract
    - PHIL 180. Metaphysics
    - PHIL 180A. Realism, Anti-Realism, Irrealism, Quasi-Realism
    - PHIL 181. Philosophy of Language
    - PHIL 182. Truth
    - PHIL 184. Theory of Knowledge
    - PHIL 184B. Philosophy of the Body
    - PHIL 184F. Feminist Theories of Knowledge
    - PHIL 184P. Probability and Epistemology
    - PHIL 185. Memory
    - PHIL 186. Philosophy of Mind
    - PHIL 187. Philosophy of Action
    - PHIL 188. Personal Identity
    - PHIL 189. Examples of Free Will
  10. *Cognition and Neuroscience—*
    - a. PSYCH 55. Introduction to Cognition and the Brain
    - b. An additional undergraduate course in cognition and/or neurosciences (one of the following):
      - BIO 20. Introduction to Brain and Behavior
      - PSYCH 30. Introduction to Perception
      - PSYCH 45. Introduction to Learning and Memory
      - PSYCH 50. Introduction to Cognitive Neuroscience
      - PSYCH 60. Introduction to Developmental Psychology
      - PSYCH 70. Introduction to Social Psychology
      - PSYCH 131. Language and Thought
      - PSYCH 133. Human Cognitive Abilities
      - PSYCH 141. Cognitive Development
      - PSYCH 154. Judgement and Decision Making
  11. *Natural Language—*
    - a. Language and Mind (one of the following):
      - LINGUIST 1. Introduction to Linguistics
      - LINGUIST 106. Introduction to Speech Perception
      - LINGUIST 140. Language Acquisition I
      - PSYCH 131. Language and Thought
    - b. Linguistic Theory (one of the following):
      - LINGUIST 110. Introduction to Phonetics and Phonology
      - LINGUIST 120. Introduction to Syntax
      - LINGUIST 130A/230A. Introduction to Semantics and Pragmatics
  12. *Computation and Cognition—*A course applying core technical skills to cognition (one of the following):
    - BIOE 341. Computational Neural Networks
    - CS 121. Introduction to Artificial Intelligence
    - CS 221. Artificial Intelligence: Principles and Techniques
    - CS 222. Rational Agency and Intelligent Interaction
    - CS 224M. Multi-Agent Systems
  - CS 227. Knowledge Representation and Reasoning
  - CS 228. Probabilistic Graphical Models: Principles and Techniques
  - CS 229. Machine Learning
  - LINGUIST 180/CS 124. From Languages to Information
  - LINGUIST 182. Computational Theories of Syntax
  - PSYCH 204. Computation and Cognition: the Probabilistic Approach
  - PSYCH 209A. The Neural Basis of Cognition: A Parallel Distributed Processing Approach
  - PSYCH 239. Formal and Computational Approaches in Psychology and Cognitive Science
    13. *Advanced Small Seminar Requirement*  
An upper-division, limited-enrollment seminar drawing on material from other courses in the core. Courses listed under Symbolic Systems Program offerings with numbers from SYMSYS 200 through 209 are acceptable, as are other courses which are announced at the beginning of each academic year. A course taken to fulfill this requirement can also be counted toward another requirement, as part of either the core or a student's concentration (see below), but not both.

### FIELDS OF STUDY

In addition to the core requirements listed above, the Symbolic Systems major requires each student to complete a field of study consisting of five courses that are thematically related to each other. Students select concentrations from the list below or design others in consultation with their advisers. The field of study is declared on Axxess; it appears on the transcript but not on the diploma.

- Applied Logic
- Artificial Intelligence
- Cognitive Science
- Computer Music
- Decision Making and Rationality
- Human-Computer Interaction
- Learning
- Natural Language
- Neurosciences
- Philosophical Foundations

### UNDERGRADUATE RESEARCH

The program strongly encourages all SSP majors to gain experience in directed research by participating in faculty research projects or by pursuing independent study. In addition to the Symbolic Systems Honors Program (see below), the following avenues are offered.

1. *Summer Internships:* students work on SSP-related faculty research projects. Application procedures are announced in the winter quarter for SSP majors.
2. *Research Assistantships:* other opportunities to work on faculty research projects are typically announced to SSP majors as they arise during the academic year.
3. *Independent Study:* under faculty supervision. For course credit, students should enroll in SYMSYS 196.

Contact SSP for more information on any of these possibilities, or see <http://symsys.stanford.edu>. In addition, the Undergraduate Advising and Research office offers grants and scholarships supporting student research projects at all levels; see [http://ual.stanford.edu/OO/research\\_opps/Grants](http://ual.stanford.edu/OO/research_opps/Grants) [http://ual.stanford.edu/OO/research\\_opps/Grants](http://ual.stanford.edu/OO/research_opps/Grants).

### HONORS PROGRAM

Seniors in SSP may apply for admission to the Symbolic Systems honors program prior to the beginning of their final year of study. Students who are accepted into the honors program can graduate with honors by completing an honors thesis under the supervision of a faculty member. Course credit for the honors project may be obtained by registering for SYMSYS 190, Honors Tutorial, for any quarters while a student is working on an honors

project. Juniors who are interested in doing an honors project during their senior year are advised to take SYMSYS 200, Symbolic Systems in Practice. SYMSYS 191, Senior Honors Seminar, is recommended for honors students during the senior year. Contact SSP or visit the program's web site for more information on the honors program, including deadlines and policies.

### COGNATE COURSES

The following is a list of cognate courses that may be applied to the B.S. in Symbolic Systems. See respective department listings for course descriptions and General Education Requirements (GER) information.

- BIO 20. Introduction to Brain and Behavior (HUMBIO 21)
- BIO 150/250. Human Behavioral Biology (HUMBIO 160)
- BIO 153. Cellular Neuroscience: Cell Signaling and Behavior (PSYCH 120)
- BIO 154. Molecular and Cellular Neurobiology
- BIO 158/258. Developmental Neurobiology
- BIO 163/263. Neural Systems and Behavior (HUMBIO 163)
- BIO 222. Exploring Neural Circuits
- BIOE 341. Computational Neural Networks
- BIOMEDIN 251. Outcomes Analysis (HRP 252)
- CME 100. Vector Calculus for Engineers (ENGR 154)
- CME 100A. Vector Calculus for Engineers, ACE
- CME 106. Introduction to Probability and Statistics for Engineers (ENGR 155C)
- CME 108. Introduction to Scientific Computing
- COMM 106/206. Communication Research Methods
- COMM 120/220. Digital Media in Society (AMSTUD 120)
- COMM 168/268. Experimental Research in Advanced User Interfaces (ME 468)
- COMM 169/269. Computers and Interfaces
- COMM 172/272. Media Psychology
- CS 21N. Can Machines Know? Can Machines Feel?
- CS 26N. Motion Planning for Robots, Digital Actors, and Other Moving Objects
- CS 47N. Computers and the Open Society
- CS 74N. Digital Dilemmas
- CS 103. Mathematical Foundations of Computing
- CS 106A. Programming Methodology (ENGR 70A)
- CS 106B. Programming Abstractions (ENGR 70B)
- CS 106X. Programming Abstractions (Accelerated) (ENGR 70X)
- CS 107. Computer Organization and Systems
- CS 108. Object-Oriented Systems Design
- CS 109. Introduction to Probability for Computer Scientists
- CS 121. Introduction to Artificial Intelligence
- CS 124. From Languages to Information (LINGUIST 180, LINGUIST 280)
- CS 142. Web Applications
- CS 147. Introduction to Human-Computer Interaction Design
- CS 148. Introduction to Computer Graphics and Imaging
- CS 154. Introduction to Automata and Complexity Theory
- CS 157. Logic and Automated Reasoning
- CS 161. Design and Analysis of Algorithms
- CS 170. Stanford Laptop Orchestra: Composition, Coding, and Performance (MUSIC 128)
- CS 181. Computers, Ethics, and Public Policy
- CS 193D. Professional Software Development with C++
- CS 204. Computational Law
- CS 205A. Mathematical Methods for Robotics, Vision, and Graphics
- CS 207. The Economics of Software
- CS 221. Artificial Intelligence: Principles and Techniques
- CS 222. Rational Agency and Intelligent Interaction (PHIL 358)
- CS 223A. Introduction to Robotics (ME 320)
- CS 224M. Multi-Agent Systems
- CS 224N. Natural Language Processing (LINGUIST 284)
- CS 224S. Speech Recognition and Synthesis (LINGUIST 285)
- CS 224U. Natural Language Understanding (LINGUIST 188, LINGUIST 288)
- CS 225A. Experimental Robotics
- CS 225B. Robot Programming Laboratory
- CS 226. Statistical Techniques in Robotics
- CS 227. Knowledge Representation and Reasoning
- CS 227B. General Game Playing
- CS 228. Probabilistic Graphical Models: Principles and Techniques
- CS 228T. Probabilistic Graphical Models: Advanced Methods
- CS 229. Machine Learning
- CS 247. Human-Computer Interaction Design Studio
- CS 261. Optimization and Algorithmic Paradigms
- CS 270. Modeling Biomedical Systems: Ontology, Terminology, Problem Solving (BIOMEDIN 210)
- CS 271. Smart Health through Effective Design (BIOMEDIN 211)
- CS 274. Representations and Algorithms for Computational Molecular Biology (BIOE 214, BIOMEDIN 214, GENE 214)
- CS 276. Information Retrieval and Web Search (LINGUIST 286)
- CS 278. Systems Biology (BIOE 310, CSB 278)
- CS 294H. Research Project in Human-Computer Interaction
- CS 303. Designing Computer Science Experiments
- CS 326A. Motion Planning
- CS 364A. Algorithmic Game Theory
- CS 376. Research Topics in Human-Computer Interaction
- CS 377. Topics in Human-Computer Interaction
- CS 377L. Learning in a Networked World (EDUC 298)
- CS 378. Phenomenological Foundations of Cognition, Language, and Computation
- CS 447. Software Design Experiences
- CS 448B. Data Visualization
- ECON 50. Economic Analysis I
- ECON 51. Economic Analysis II
- ECON 90/190. Introduction to Financial Accounting
- ECON 102B. Introduction to Econometrics
- ECON 102C. Advanced Topics in Econometrics
- ECON 135. Finance for Non-MBAs (MS&E 245G)
- ECON 136. Market Design
- ECON 137. Information and Incentives
- ECON 138. Risk and Insurance
- ECON 141. Public Finance and Fiscal Policy (PUBLPOL 107)
- ECON 150. Economic Policy Analysis (PUBLPOL 104, PUBLPOL 204)
- ECON 153. Economics of the Internet
- ECON 155. Environmental Economics and Policy
- ECON 160. Game Theory and Economic Applications
- ECON 179. Experimental Economics
- ECON 281. Normative Decision Theory and Social Choice
- ECON 286. Game Theory and Economic Application
- ECON 288. Computational Economics
- ECON 289. Advanced Topics in Game Theory and Information Economics
- ECON 290. Multiperson Decision Theory
- EDUC 124. Collaborative Design and Research of Technology-integrated Curriculum
- EDUC 218. Topics in Cognition and Learning: Visualization
- EDUC 247. Moral Education
- EDUC 298. Learning in a Networked World (CS 377L)
- EDUC 303X. Designing Learning Spaces
- EDUC 333A. Understanding Learning Environments

- EDUC 342. Child Development and New Technologies
- EDUC 366X. Learning in Formal and Informal Environments
- EDUC 375A. Seminar on Organizational Theory (MS&E 389, SOC 363A)
- EDUC 391X. Web-Based Technologies in Teaching and Learning
- EE 178/278A. Probabilistic Systems Analysis
- EE 263. Introduction to Linear Dynamical Systems (CME 263)
- EE 364A. Convex Optimization I (CME 364A)
- EE 364B. Convex Optimization II (CME 364B)
- EE 373B. Adaptive Neural Networks
- EE 376A. Information Theory (STATS 376A)
- EE 376B. Information Theory (STATS 376B)
- ENGR 60. Engineering Economy
- ENGR 62. Introduction to Optimization (MS&E 111)
- ENGR 155C. Introduction to Probability and Statistics for Engineers (CME 106)
- ENGR 205. Introduction to Control Design Techniques
- ENGR 209A. Analysis and Control of Nonlinear Systems
- ETHICSOC 20. Introduction to Moral Philosophy (PHIL 2)
- ETHICSOC 108. Ethics and the Professions
- HUMBIO 21. Introduction to Brain and Behavior (BIO 20)
- HUMBIO 145. Birds to Words: Cognition, Communication, and Language (PSYCH 137, PSYCH 239A)
- HUMBIO 160. Human Behavioral Biology (BIO 150, BIO 250)

## MINOR IN SYMBOLIC SYSTEMS

Students may minor in Symbolic Systems by completing either item 1 or item 2 below.

1. One course in each of the following core areas (please note that several of these courses have prerequisites):
  - a. *Cognition*: SYMSYS 100\* or PSYCH 55
  - b. *Logic and Computation*: PHIL 150 or 151, or CS 103 or 154
  - c. *Computer Programming*: CS 106B, 106X, or 107
  - d. *Philosophical Foundations*: SYMSYS 100\* or PHIL 80
  - e. *Formal Linguistics*: LINGUIST 120, 130A, or 180
  - f. *Artificial Intelligence*: CS 121 or 221
2. SYMSYS 100, plus an interdisciplinary SSP concentration listed on the SSP web site at <http://symsys.stanford.edu>. To qualify, the selection of courses used for the minor must be interdisciplinary; it must either include courses from at least three departments, or include more than one course from each of two departments.

\* SYMSYS 100 may not be counted for both areas 'a' and 'd'.

## COTERMINAL BACHELOR'S AND MASTER'S DEGREES IN SYMBOLIC SYSTEMS

Many SSP majors also complete coterminal M.S. or M.A. degrees in affiliated departments. In addition to the Symbolic Systems M.S. program (see below), the Department of Philosophy offers a Special Program in Symbolic Systems track for interdisciplinary graduate level work leading to the Master of Arts in Philosophy.

University requirements for the coterminal M.A. are described in the "Coterminal Bachelor's and Master's Degrees" section of this bulletin. For University coterminal degree program rules and University application forms, see <http://studentaffairs.stanford.edu/registrar/publications#Coterm>.

## MASTER OF SCIENCE IN SYMBOLIC SYSTEMS

The University's basic requirements for the M.S. degree is discussed in the "Graduate Degrees" section of this bulletin.

The M.S. degree in Symbolic Systems is designed to be completed in the equivalent of one academic year by coterminal students or returning students who already have a B.S. degree in Symbolic Systems, and in two years or less by other students depending upon level of preparation. Admission is competitive, providing a limited number of students with the opportunity to pursue course and project work in consultation with a faculty adviser who is affiliated with the Symbolic Systems Program. The

faculty adviser may impose requirements beyond those described here.

Admission to the program as a coterminal student is subject to the policies and deadlines described in the "Undergraduate Degrees and Programs" section of this bulletin (see "Coterminal Bachelor's and Master's Degrees"). Applicants to the M.S. program are reviewed each Winter Quarter. Information on deadlines, procedures for applying, and degree requirements are available from the program's student services coordinator in the Linguistics Department office (460-127E) and at <http://symsys.stanford.edu/viewing/htmldocument/13623>.

## REQUIREMENTS

A candidate for the M.S. degree in Symbolic Systems must complete a program of 45 units. At least 36 of these must be graded units, passed with an average grade of 3.0 (B) or better. Any course taken as part of the 45-unit program must be taken for a letter grade unless the course is offered 'S/NC' only. Furthermore, none of the 45 units to be counted toward the M.S. degree may include units counted toward an undergraduate degree at Stanford or elsewhere. Course requirements are waived only if evidence is provided that similar or more advanced courses have been taken, either at Stanford or another institution. Courses that are waived rather than taken may not be counted toward the M.S. degree.

Each candidate for the M.S. degree must fulfill the following requirements:

1. Submission to the Symbolic Systems Program office and approval of the following pre-project research documents:
  - a. Project Area Statement, endorsed with a commitment from a student's prospective project advisor no later than May 1 of the academic year prior to the expected graduation year; and
  - b. Qualifying Research Paper due no later than the end of the Summer Quarter prior to the expected graduation year.
2. Completion of a coherent plan of study, to be approved by the Graduate Studies Director in consultation with the student's advisor and designed to support a student's project. An initial plan of study should be delineated on the Program Proposal Form prior to the end of the student's first quarter of study, to be modified at the time of the Project Area Statement with the approval of a student's advisor and the Graduate Studies Director. The plan of study must include courses more advanced than the Symbolic Systems undergraduate core in four main skill areas: formal, empirical, computational, and philosophical; and in at least three of the following departments: Computer Science, Linguistics, Philosophy, and Psychology. More advanced courses in each of the skill areas are defined as follows:
  - a. *Formal*: a course in logic and computational theory beyond the level of PHIL 151
  - b. *Empirical*: a course drawing on experimental or observational data or methods, beyond the level of PSYCH 55, LINGUIST 120, or LINGUIST 130A
  - c. *Computational*: a course involving programming beyond the level of CS 107
  - d. *Philosophical*: a course in the area of Philosophy of Mind/Language/Science/Epistemology or Metaphysics at the 200 level or above, certified by the instructor as worthy of graduate credit
3. Completion of three quarters of the Symbolic Systems Program M.S. Seminar (SYMSYS 291).

## COGNATE COURSES

The following is a list of cognate courses that may be applied to the M.S. in Symbolic Systems. See respective department listings for course descriptions and the University policy on graduate unit requirements.

- BIO 153. Cellular Neuroscience: Cell Signaling and Behavior (PSYCH 120)
- BIO 154. Molecular and Cellular Neurobiology

- BIO 222. Exploring Neural Circuits
- BIO 250. Human Behavioral Biology
- BIO 258. Developmental Neurobiology
- BIO 263. Neural Systems and Behavior
- BIOE 341. Computational Neural Networks
- BIOMEDIN 251. Outcomes Analysis (HRP 252)
- CME 100. Vector Calculus for Engineers (ENGR 154)
- CME 100A. Vector Calculus for Engineers, ACE
- CME 106. Introduction to Probability and Statistics for Engineers (ENGR 155C)
- CME 108. Introduction to Scientific Computing
- COMM 206. Communication Research Methods
- COMM 220. Digital Media in Society
- COMM 268. Experimental Research in Advanced User Interfaces (ME 468)
- COMM 269. Computers and Interfaces
- COMM 272. Media Psychology
- CS 103. Mathematical Foundations of Computing
- CS 106A. Programming Methodology
- CS 106B. Programming Abstractions
- CS 106X. Programming Abstractions (Accelerated)
- CS 107. Computer Organization and Systems
- CS 108. Object-Oriented Systems Design
- CS 109. Introduction to Probability for Computer Scientists
- CS 121. Introduction to Artificial Intelligence
- CS 142. Web Applications
- CS 147. Introduction to Human-Computer Interaction Design
- CS 148. Introduction to Computer Graphics and Imaging
- CS 154. Introduction to Automata and Complexity Theory
- CS 157. Logic and Automated Reasoning
- CS 161. Design and Analysis of Algorithms

## URBAN STUDIES

*Director:* Doug McAdam (Sociology)

*Associate Director:* Michael Kahan (Lecturer, Urban Studies)

*Executive Committee:* Albert Camarillo (History), Prudence Carter (Education), Zephyr Frank (History), Michael Rosenfeld (Sociology), Walter Scheidel (Classics), Jeff Wachtel (President's Office)

*Affiliated Faculty:* Arnetha Ball (Education), Eric Bettinger (Education), Scott Bukatman (Art and Art History), Albert Camarillo (History), Prudence Carter (Education), Samuel Chiu (Management Science and Engineering), Karen Cook (Sociology), Paulla Ebron (Anthropology), Paula Findlen (History), James Fishkin (Communication), Shelley Fisher Fishkin (English), Charlotte Fonrobert (Religious Studies), Richard Ford (Law), Zephyr Frank (History), Leah Gordon (Education), Gary Griggs (Civil and Environmental Engineering), David Grusky (Sociology), Thomas Hansen (Anthropology), Ian Hodder (Anthropology), Miyako Inoue (Anthropology), Sarah Jain (Anthropology), Tomás Jiménez (Sociology), David Labaree (Education), Raymond Levitt (Civil and Environmental Engineering), Carolyn Lougee Chappell (History), Raymond McDermott (Education), Daniel McFarland (Education), Milbrey McLaughlin (Education), William McLennan (Office of Religious Life), Ian Morris (Classics), Josiah Ober (Classics, Political Science), Susan Olzak (Sociology), Leonard Ortolano (Civil and Environmental Engineering), Sean Reardon (Education), Rob Reich (Political Science), Ian Robertson (Anthropology), Michael Rosenfeld (Sociology), (Sociology), Walter Scheidel (Classics), Gary Segura (Political Science), Michael Shanks (Classics), Jennifer Trimble (Classics), Nancy Brandon Tuma (Sociology, Hoover Institution), Fred Turner (Communication), Paul Turner (Art and Art History), Guadalupe Valdes (Education), Barbara Voss (Anthropology)

*Lecturers:* Rohit Aggarwala, Hilary Schafer Boudet, Melanie Edwards, Dehan Glanz, Michael Kahan, Patricia Karlin-Neumann, Michael Kieschnick, Lawrence Litvak, Joanne Sanders, Laura Scher, Frederic Stout

*Visiting Associate Professor:* Gerald Gast

*Department Offices:* Building 120, Room 160

*Mail Code:* 94305-2048

*Phone:* (650) 723-3956

*Email:* urbanstudies@stanford.edu

*Web Site:* <http://urbanstudies.stanford.edu>

Courses offered by the Urban Studies Program are listed under the subject code URBANST on the *Stanford Bulletin's* ExploreCourses web site.

The Urban Studies program treats urbanism as an interdisciplinary field; it brings together students, faculty, and outside specialists concerned with cities, and the impacts of cities on society and people's lives. The Urban Studies major encourages students to inquire deeply into the nature of cities and the techniques used to modify urban environments. It prepares students to address urbanization, and gives students a knowledge base and theoretical, analytical, and practical skills to understand urban social systems and effect social change.

## MISSION OF THE UNDERGRADUATE PROGRAM IN URBAN STUDIES

The mission of the undergraduate program in Urban Studies is to develop students' understanding of the nature of cities and their impacts on both the individual and society at large. The program is interdisciplinary in nature drawing from fields in the social sciences, history, and education. Courses in the program focus on issues in contemporary urban society, and on the tools and concepts that can bring about change to improve urban life. Courses also address how cities have changed over time and how they continue to change today in societies around the world. Through a comprehensive program that includes course work, an internship, and independent research, a major in Urban Studies prepares students for careers and advanced academic pursuits in fields including architecture, community service, education, environmental planning, real estate development, urban design, and urban planning; many alumni have obtained graduate degrees in architecture, business, law, public policy, urban design, and urban planning from major universities across the country. Information on careers and graduate programs pursued by Urban Studies alumni is available from the Urban Studies program office.

### LEARNING OUTCOMES

The program expects its undergraduate majors to be able to demonstrate the following learning outcomes. These learning outcomes are used in evaluating students and the Program in Urban Studies. Students are expected to demonstrate ability:

1. to formulate a research question and assess its significance in relation to one or more relevant scholarly literatures and, where relevant, to theoretical writings.
2. to collect data to answer proposed research question.
3. to analyze a problem and draw correct inferences using qualitative and/or quantitative analysis.
4. to write clearly and persuasively.

### BACHELOR OF ARTS IN URBAN STUDIES

The Urban Studies major requires students to complete four types of courses totaling at least 73 units: 19 units in the core; at least 12 units of skills courses (for those declaring after August 1, 2011; 8 units for those who declared earlier); at least 25 units in an area of concentration; and 13 units in the capstone sequence. If units in these categories total less than 73, the remaining units may be fulfilled by courses in other concentrations or in Urban Studies courses numbered 100 or higher (except URBANST 198 and 199). Majors must also complete one prerequisite: ECON 1A, Introductory Economics A; this prerequisite course may be taken S/NC, as the units for this course do not count toward the 73 units required for the major. URBANST 198, URBANST 199, and prerequisites for required courses and for electives also do not count towards the 73-unit minimum.

Urban Studies students interested in graduate school in business or urban planning are advised to obtain basic quantitative skills by completing MATH 19, 20, and 21, or MATH 41 and 42, preferably before the junior year, and to complete ECON 1B. A course in statistical methods, such as STATS 60, ECON 102A, POLISCI 150A or 151B, or SOC 181B, is recommended for students interested in business or urban planning.

Urban Studies students carry out an internship in an urban organization in the public or non-profit sector, typically by enrolling in URBANST 201B during Spring Quarter of the junior year. This internship, or an appropriate substitution where necessary, should be arranged no later than Winter Quarter of the junior year, in consultation with the Urban Studies internship coordinator. Urban Studies majors who wish to receive academic credit for additional internship work may enroll in URBANST 194. Students may not count more than 7 units of internship, including URBANST 194 and 201A/B, toward their major. Students can consult the Haas Center for Public Service for other courses with internship placements at community organizations.

Urban Studies students are encouraged to spend at least one quarter studying overseas to learn how cities vary across societies. Some Urban Studies concentration courses, as well as electives, can be satisfied at Stanford overseas campuses. Courses offered overseas vary from year to year, and students should check in advance with Overseas Studies and Urban Studies concerning which courses meet Urban Studies requirements. Students may arrange to fulfill the internship requirement through a placement at one of Stanford's overseas locations.

Courses counted toward the 73-unit graduation requirement for the major must be taken for a letter grade, and a minimum grade of 'C' is required. The only exceptions are Urban Studies courses numbered 100 and higher that are offered only on an S/NC basis, such as URBANST 201A and 201B. Students may count up to three non-Stanford courses, for a maximum of 15 units, toward the major. These units must first be approved by the Office of Transfer Credit in the Registrar's Office and subsequently approved by the Urban Studies program. Transfer credit is not awarded for internship. Students may not count more than 5 units of URBANST 197, Directed Reading, toward the major without permission of the Director. Qualified students may write a senior honors thesis and graduate with honors; see details in "Honors Program" below. Students interested in declaring Urban Studies as a major are required to meet first with the student services administrator and one of the program's advisers; they then declare the Urban Studies major on Axess.

### URBAN STUDIES CORE

Urban Studies majors should complete URBANST 110, Introduction to Urban Studies, before Spring Quarter of the junior year. The following courses, totaling 19 units, are required: URBANST 110. Introduction to Urban Studies  
URBANST 112. The Urban Underclass  
URBANST 113. Introduction to Urban Design  
URBANST 114. Cities in Comparative Perspective

### SKILLS

A minimum of 12 units are required (for those who declare after August 1, 2011; 8 units for those who declared before), and should be taken before the end of the junior year. The following two courses are recommended for most Urban Studies majors. The third skills course will vary, depending on a student's needs and interests. Courses that fulfill the skills requirement are listed on the Urban Studies website; consult with an adviser to determine the best choice.

ANTHRO 130D. Spatial Approaches to Social Science  
SOC 180A. Foundations of Social Research

### CONCENTRATIONS

Students must complete at least 25 units in one of the following concentrations. Courses may not be double counted. Students should consult an adviser to develop a program that meets their intellectual goals; relevant courses not listed here, including research methods courses taken in preparation for the capstone project, may be counted toward the concentration with the prior consent of an adviser.

These concentrations are declared to the department; they are not declared on Axess, and they do not appear on the transcript or the diploma.

### CITIES IN COMPARATIVE AND HISTORICAL PERSPECTIVE

Focus is on how cities have evolved over time, and how they are continuing to change today in societies around the world, drawing on disciplinary approaches including anthropology, archaeology, art history, geography, and history. By placing urban issues in perspective, students improve their comprehension of the present as well as the past.

Students in this concentration are encouraged to study off campus, and preferably overseas, for at least one quarter. Many courses offered through the Overseas Studies Program can be counted toward the concentration. Similarly, internships offered at many of Stanford's overseas locations can be used to fulfill the Urban Studies internship requirement. One of the following courses is required for the cities in comparative and historical perspective concentration:

ANTHRO 103. The Archaeology of Modern Urbanism  
CLASSART 112. Ancient Urbanism

The following courses may be counted toward the Cities in Comparative and Historical Perspective concentration:

AMELANG 177. Middle Eastern Cities in Literature and Film  
ANTHRO 104. Urban Life and Cultural Imagination in South Asia  
ANTHRO 105. Ancient Cities in the New World  
ANTHRO 127. City and Sounds  
ARTHIST 3. Introduction to the History of Architecture  
ARTHIST 107A. St. Petersburg, A Cultural Biography: Architecture, Urban Planning, the Arts  
ARTHIST 143A. History of American Architecture  
ARTHIST 188A. The History of Modern and Contemporary Japanese and Chinese Architecture and Urbanism  
CEE 32Q. Place: Making Space Now  
CLASSART 112. Ancient Urbanism  
CLASSART 131. Roman Archaeology and Heritage: The Case of Tarragona (Spain) in the European Context  
CLASSGEN 119. Gender and Power in Ancient Rome  
CLASSHIS 60. The Romans  
CLASSHIS 101. The Greeks  
ENGLISH 186. Tales of Three Cities: New York, Chicago, Los Angeles  
FILMSTUD 150. Cinema and the City  
HISTORY 31. Science, Technology, and Art: The Worlds of Leonardo da Vinci  
HISTORY 106A. Global Human Geography: Asia and Africa  
HISTORY 106B. Global Human Geography: Europe and Americas  
HISTORY 110C. Introduction to Modern Europe  
HISTORY 150C. The United States in the 20th Century  
HISTORY 166. Introduction to African American History: The Modern African American Freedom Struggle

URBANST 115. Urban Sustainability: Long-Term Archaeological Perspectives  
URBANST 161. American Urban History since 1920

## URBAN EDUCATION

The purpose of this concentration is to prepare students for a career in educational policy and practice in diverse settings. This concentration is a useful basis for graduate study in educational policy, law, or business, and for students who have been admitted by the School of Education to pursue a coterminal master's degree in the Stanford Teacher Education Program (STEP) or the Policy, Organization, and Leadership Studies Program (POLS). Students planning to pursue a coterminal master's should take one of the three practica: EDUC 103A, B, and C (for the STEP elementary coterm); EDUC 101X (for the STEP secondary coterm); or EDUC 270A (for the POLS coterm). Application and admission to a coterminal degree in these programs occurs during the Autumn Quarter of the junior year and is handled by the School of Education.

Opportunities to obtain teaching and advising experience are available in nearby schools through Stanford College Prep and other programs administered by the Haas Center for Public Service and through courses offered by the School of Education. Students who choose this concentration may be eligible for the undergraduate honors program of the School of Education, in which case they should enroll in EDUC 199A, B, or C during their senior year.

The following course is required for the urban education concentration:

EDUC 112X. Urban Education

The following courses may be counted toward the urban education concentration:

AFRICAST 111. Education for All? The Global and Local in Public Policy Making in Africa  
EDUC 101. Introduction to Teaching and Learning  
EDUC 103A. Tutoring: Seeing a Child through Literacy (Same as SOC 103A)  
EDUC 103B. Race, Ethnicity, and Linguistic Diversity in Classrooms: Sociocultural Theory and Practices  
EDUC 103C. Educational Policy, Diversity, and English Learners  
EDUC 104X. Conduct of Research with and in Communities  
EDUC 100. Sociology of Education: The Social Organization of Schools  
EDUC 115Q. Identities, Race, and Culture in Urban Schools  
EDUC 116X. Service Learning as an Approach to Teaching  
EDUC 123X. Contexts that Promote Youth Development: Understandings of Effective Interventions  
EDUC 137. Social Justice in Education

EDUC 144. Child Development in and Beyond Schools  
 EDUC 148X. Critical Perspectives on Teaching and Tutoring English Language Learners  
 EDUC 149. Theory and Issues in the Study of Bilingualism  
 EDUC 177. Education of Immigrant Students: Psychological Perspectives  
 EDUC 178X. Latino Families, Languages, and Schools  
 EDUC 179. Urban Youth and Their Institutions: Research and Practice  
 EDUC 201. History of Education in the United States  
 EDUC 202. Introduction to Comparative and International Education  
 EDUC 203. The Anthropology of Education  
 EDUC 204. Introduction to the Philosophy of Education  
 EDUC 207X. School: What Is It Good For?  
 EDUC 216X. Education, Race, and Inequality in African American History, 1880-1990  
 EDUC 220A. Introduction to the Economics of Education  
 EDUC 220B. Introduction to the Politics of Education  
 EDUC 220C. Education and Society  
 EDUC 220D. History of School Reform: Origins, Policies, Outcomes, and Explanations  
 EDUC 221A. Policy Analysis in Education  
 EDUC 223. Good Schools: Research, Policy and Practice  
 EDUC 233A, B. Adolescent Development and Mentoring in the Urban Context  
 HUMBIO 142. Adolescent Development  
 or PSYCH 60. Introduction to Developmental Psychology  
 OSPCPTWN 11. Education and Schooling in Post-Apartheid South Africa  
 OSPCPTWN 32. Learning, Development and Social Change: Service Learning in the Contemporary South African Context  
 SOC 132. Sociology of Education: The Social Organization of Schools

### URBAN SOCIETY AND SOCIAL CHANGE

Focus is on issues in contemporary urban society and the tools and concepts that planners, policy makers, and citizens use to address those issues. Topics include environmental challenges, racial and class inequality, and the provision of adequate urban infrastructure. Students learn how community action, urban planning and design, and organizations in nonprofit, for-profit, and government sectors address urban social and environmental problems. This concentration prepares students to enter graduate programs concerned with urban affairs, community service, and public policy, and to work with local governmental agencies and for-profit and nonprofit organizations engaged in community service and development.

The following course is required for the urban society and social change concentration:

POLISCI 133. Ethics and Politics of Public Service

The following courses may be counted toward the urban society and social change concentration:

ANTHRO 32. Theories in Race and Ethnicity  
 ASNAMST 146S. Asian American Culture and Community  
 CEE 64. Air Pollution: From Urban Smog to Global Change  
 CEE 100. Managing Sustainable Building Projects  
 CEE 115. Goals and Methods of Sustainable Building Projects  
 CEE 124. Sustainable Development Studio  
 CEE 129. Engineering and Policy Responses to Climate Change Impacts on Seaports  
 CEE 131. Architectural Design Process  
 CEE 141A. Infrastructure Project Development  
 CEE 142A. Creating Sustainable Development  
 CEE 171. Environmental Planning Methods  
 CEE 172. Air Quality Management  
 COMM 120. Digital Media in Society  
 EARTHSYS 124. Environmental Justice: Local, National, and International Dimensions  
 EARTHSYS 133. California Climate Change Law and Policy

EARTHSYS 181. Concepts of Urban Agriculture  
 ECON 150. Economic Policy Analysis  
 ECON 155. Environmental Economics and Policy  
 EDUC 270A. Learning to Lead in Public Service Organizations  
 ENGR 150. Social Innovation and Entrepreneurship  
 HISTORY 105. Gandhi, King and Non-Violence  
 HISTORY 255. Martin Luther King, Jr.: The Social Gospel and the Struggle for Justice  
 HISTORY 259A,B. Poverty and Homelessness in America  
 HISTORY 260. California's Minority-Majority Cities  
 HUMBIO 122S. Social Class, Race, Ethnicity, Health  
 HUMBIO 127A,B. Community Health: Assessment and Planning  
 HUMBIO 128. Community Health Psychology  
 MS&E 296. Sustainable Mobility: Improving Energy Efficiency and Reducing CO<sub>2</sub> Emissions for Transportation  
 OSPCPTWN 20. Supervised Service Learning  
 OSPCPTWN 22. Preparation for Community-Based Research in Community Health and Development  
 OSPCPTWN 24. Targeted Research: Project in Community Health and Development  
 OSPCPTWN 32. Learning Development and Social Change  
 OSPCPTWN 42. Race, Class, and Status: Cape Town in Comparative Perspective  
 OSPMOSC 57. Social Inequality in Socialist and Post-Socialist Societies  
 POLISCI 132S. Theories of Civil Society, Philanthropy, and the Nonprofit Sector  
 POLISCI 221F. Race and American Politics  
 PUBLPOL 135. Regional Politics and Decision Making in Silicon Valley  
 PUBLPOL 183. Philanthropy and Social Innovation  
 SOC 118. Social Movements and Collective Action  
 SOC 119. Understanding Large-Scale Societal Change: The Case of the 1960's  
 SOC 135. Poverty, Inequality, and Social Policy in the United States  
 SOC 137. Inequality and Access to Justice  
 SOC 140. Introduction to Social Stratification  
 SOC 141. Controversies About Inequality  
 SOC 145. Race and Ethnic Relations  
 SOC 160. Formal Organizations  
 or MS&E 180. Organizations: Theory and Management  
 SOC 161. The Social Science of Entrepreneurship  
 SOC 164. Immigration and the Changing United States  
 SOC 166. Mexicans, Mexican Americans, and Chicanos in American Society  
 URBANST 111. Urban Politics  
 URBANST 115. Urban Sustainability: Long-Term Archaeological Perspectives  
 URBANST 123. Approaching Research and the Community  
 URBANST 126. Spirituality and Nonviolent Urban and Social Transformation  
 URBANST 131. Social Innovation and the Social Entrepreneur  
 URBANST 132. Concepts and Analytic Skills for the Social Sector  
 URBANST 133. Social Entrepreneurship Collaboratory  
 URBANST 137. Innovations in Microcredit and Development Finance  
 URBANST 162. Managing Local Governments  
 URBANST 163. Land Use Control  
 URBANST 165. Sustainable Urban and Regional Transportation Planning  
 URBANST 171. Urban Design Studio

### SELF-DESIGNED

Students who wish to concentrate in an area of urban studies other than one of the above concentrations must complete the Urban Studies core, skills, and capstone requirement, and design additional units to bring the total to at least 73 units. The self-designed portion of the major should concentrate on a particular area of urban study, such as urban health care or urban

environmental management. Additional units must be approved by both the Director of Urban Studies and an academic adviser who is a member of the Academic Council and has expertise in the particular area of interest to the student. A proposal for a self-designed concentration should include a list of courses and a description of how each course meets the student's educational objectives. A proposal for a self-designed concentration must be accompanied by a letter to the Director of Urban Studies indicating that the academic adviser has examined and approved the student's plan.

Students pursuing a self-designed concentration must submit proposals for approval by the Director of Urban Studies by the beginning of the third quarter of the student's sophomore year. Applications received after that deadline are not considered. Students interested in designing their own concentration are strongly encouraged to meet with the Director of Urban Studies before the end of their sophomore year.

## CAPSTONE

All majors are required to complete an internship and a sequence of two seminars, totaling 13 units, in which students participate in the work of an urban organization related to their area of interest, design a senior project, and write the results of their project. The capstone seminars can be used to satisfy the Writing in the Major requirement and to complete some work on an honors thesis. URBANST 201A or B, and 202, should be taken in the junior year, and URBANST 203 in the senior year. Students who plan to be away during Winter Quarter of their junior year are advised to take URBANST 202 in the Winter Quarter of their sophomore year.

URBANST 201A. Capstone Internship in Urban Studies  
or URBANST 201B. Capstone Internship Seminar  
URBANST 202. Preparation for Senior Research  
URBANST 203. Senior Seminar (WIM)

## HONORS PROGRAM

The honors program offers qualified students an opportunity to conduct independent research and to write a thesis summarizing the results. Before being accepted to the honors program in Urban Studies, a student must

1. declare a major in Urban Studies and complete at least 30 of the 73 required units including all prerequisites and core classes
2. complete URBANST 202 (offered Winter Quarter) (for those graduating in 2012, URBANST 201 also fulfills this requirement)
3. have an overall GPA of 3.3 and a GPA of at least 3.5 in Urban Studies
4. submit an application, including a one-page abstract and the signatures of an adviser and, if applicable, a second reader. If the adviser is not a member of Stanford's Academic Council, the student must have a second reader who is an Academic Council member. The application must be submitted to the program office no later than April 30 of the junior year, and it must then be approved by the Director of the Urban Studies honors program.

Honors students are expected to complete a portion of their honors work in URBANST 203, Senior Seminar, in Autumn Quarter. Additionally, they must register for 5-10 units total in URBANST 199, Senior Honors Thesis, over the course of their senior year. The units of URBANST 199 are in addition to the 73-units required for the major. Honors students are required to present their theses at the Senior Colloquium in Spring Quarter of senior year.

To graduate with honors, students must receive a grade of at least 'A-' in the honors work and have a GPA of at least 3.5 in courses for the Urban Studies major at the time of graduation.

## MINOR IN URBAN STUDIES

The minor in Urban Studies is designed to introduce students to several disciplinary approaches to the study of cities, and provides the opportunity to explore one of three specialized options:

- Cities in comparative and historical perspective
- Urban education
- Urban society and social change

The minor in Urban Studies requires completion of seven courses for a letter grade, including the four core courses, the required course in the student's chosen concentration area, and two additional courses in that option as listed in the "Bachelor of Arts in Urban Studies" section of this bulletin.

## COTERMINAL PROGRAMS IN URBAN STUDIES

Undergraduates in Urban Studies may enter coterminal master's degree programs in a number of departments and schools in the University. In recent years, Urban Studies majors have developed coterminal programs with the departments of Civil and Environmental Engineering, Communication, and Sociology, and with the School of Education. Information and applications for coterminal degree programs are available at Undergraduate Advising and Research. Students should discuss the coterminal program with a program director during their junior year.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/shared/publications.htm#Coterm>.

## OVERSEAS STUDIES COURSES IN URBAN STUDIES

For course descriptions and additional offerings, see the listings in the *Stanford Bulletin's* ExploreCourses web site (<http://explorecourses.stanford.edu>) or the Bing Overseas Studies web site (<http://bosp.stanford.edu>). Students should consult their department or program's student services office for applicability of Overseas Studies courses to a major or minor program.

### AUTUMN QUARTER

#### BERLIN

- OSPBER 60. Cityscape as History: Architecture and Urban Design in Berlin. 5 units, Matthias Pabsch, GER:DB:Hum

#### FLORENCE

- OSPFLOR 115Y. The Duomo and Palazzo della Signoria: Symbols of a Civilization. 4 units, Timothy Verdon, GER:DB:Hum

#### MADRID

- OSPMADRD 60. Integration into Spanish Society: Service Learning and Professional Opportunities. 5 units, Sheila Klaiber

### WINTER QUARTER

#### CAPETOWN

- OSPCPTWN 24A. Targeted Research Project in Community Health and Development. 3 units, Timothy Stanton

#### MADRID

- OSPMADRD 60. Integration into Spanish Society: Service Learning and Professional Opportunities. 5 units, Sheila Klaiber

### SPRING QUARTER

#### BERLIN

- OSPBER 11. The Vanishing City: Lost Architecture and the Art of Commemoration in Berlin. 4-5 units, Knut Ebeling, GER:DB:Hum

**CAPETOWN**

- OSPCPTWN 22. Preparation for Community-Based Research in Community Health and Development. 3 units, Timothy Stanton
- OSPCPTWN 24B. Targeted Research Project in Community Health and Development. 5 units, Timothy Stanton
- OSPCPTWN 40. Education in the Post-Apartheid City. 4 units, Aslam Fataar
- OSPCPTWN 44. Negotiating Home, Citizenship and the South African City. 4 units, Sophie Oldfield

**FLORENCE**

- OSPFLOR 58. Space as History: Urban Change and Social Vision: Florence 1059-2008. 4 units, Filippo Rossi, Timothy Verdon, GER:DB:Hum

**MADRID**

- OSPMADRD 60. Integration into Spanish Society: Service Learning and Professional Opportunities. 5 units, Sheila Klaiber

**PARIS**

- OSPPARIS 92. Building Paris: Its History, Architecture, and Urban Design. 4 units, Estelle Halevi, GER:DB:Hum

**STANFORD IN WASHINGTON**

*Director:* Adrienne Jamieson

The Bing Stanford in Washington program provides highly-qualified undergraduates with an opportunity to work and study in the nation's capital. In addition to providing students with an understanding of public policy making, the program offers an opportunity to take advantage of the city's unique cultural resources.

Central in the student's educational experience is a full-time internship. Students serve as interns at such institutions and agencies as the Senate, the House of Representatives, the Office of Management and Budget, the White House, the National Institutes of Health, the Smithsonian Institution, CNN, World Bank, the departments of State, Justice, Treasury, Education, and Health and Human Services.

In addition to the internship, students also complete an academic course of study consisting of small courses taught by policy experts, and weekly seminars taught by Stanford faculty members. Seminars are generally 3-5 units. Past topics have included congressional oversight and the press; economic growth and development patterns, policies, and prospects; critical health issues in the U.S. and abroad; policy making in the Washington community; and criminal justice policy. Speakers from the Washington policy community frequently join students and faculty for discussions. Students often write a major paper related to their internship for 3-5 units of credit. Course and seminar topics vary according to student and faculty interest.

The Bing Stanford in Washington program offers stretch quarters in the Autumn and Spring (early September to mid-December, and late March to the end of June) and a regular quarter in Winter, which focuses on environmental and health policy. The program is designed for students in their junior year or during the first or second quarter of their senior year. Applications must be completed two quarters in advance, and three quarters in advance if a student is overseas or otherwise not on campus during the qualifying quarter.

Students interested in the program should contact the campus office of the Bing Stanford in Washington program in Room 105 of the SIEPR Gunn Building; see <http://bsiw.stanford.edu>; or email [bsiwinfo\\_ca@stanford.edu](mailto:bsiwinfo_ca@stanford.edu).

Pearson, Pamela Phan, Sergio Puig de la Parra, Jenik Radon, Stephan Ray, Edward Reines, John Rodkin, Andrew Roper, Kevin Russell, Richard Salgado, Ticien Sassoubre, Jeff Schox, Rachele Silverberg, Stephanie Smith, Stephan Sonnenberg, Larry Sonsini, Elizabeth Stark, Sergio Stone, Kimberly Summe, Stuart Taylor, Dan Torres, Roland Vogl, Bruce Wagman, Vaughn Walker, Erika V. Wayne, Dana Weintraub, Katherine C. Wright, James Yoon

*Affiliated Faculty:* Kate Bundorf (Health Research and Policy), Tamar Herzog (History), Joy Ishii (GSB), Jose Maldonado (Psychiatry and Behavioral Sciences), Maria Ogneva (GSB), Stefan Reichelstein (GSB), Scott Sagan (Political Science), Helen Stacy (FSI)

Courses offered by the School of Law are listed on the *Stanford Bulletin's* ExploreCourses web site under the subject codes LAW and LAWGEN.

The School of Law, established in 1893, provides a legal education for students who are fitted by their maturity and academic training to pursue professional study under University methods of instruction. The curriculum leading to the first professional degree in law, the Doctor of Jurisprudence (J.D.), constitutes an adequate preparation for the practice of law in any English-speaking jurisdiction. Graduate work leading to the degrees of Master of Laws (L.L.M.), Master of the Science of Law (J.S.M.), and Doctor of the Science of Law (J.S.D.), and a non-professional degree, Master of Legal Studies (M.L.S.), is also offered. For the full curriculum, see <http://lawreg.stanford.edu/stanford>. Stanford Law School offers joint or dual degree options in combination with other Stanford graduate departments and universities across the country; see the "Joint and Dual Degrees in Law" section of this bulletin.

The school is on a three-term academic calendar. For a complete list of academic dates see the Academic Calendar on the Law School web site at <http://www.law.stanford.edu/calendar>.

For further information about admission, programs, curriculum, and faculty, see <http://www.law.stanford.edu>.

## JOINT AND DUAL DEGREES IN LAW

Formal admission to both the Law School and to the other cooperating school or department in accordance with the established admission standards of each school or department is required. In addition to the formal joint degree programs offered, the school considers requests for a dual program on an individually designed basis. For additional information on Law School joint or dual degree programs, see <http://www.law.stanford.edu/program/degrees>. See relevant web sites or department sections of this bulletin for degree requirements.

Formal joint degree programs at Stanford:

*School of Business*—See <http://www.gsb.stanford.edu/mba>.

J.D./M.B.A. Master of Business Administration

*School of Earth Sciences*—

J.D./M.S. Emmett Interdisciplinary Program in Environment and Resources (E-IPER)

J.D./Ph.D. Emmett Interdisciplinary Program in Environment and Resources (E-IPER)

*School of Education*—

J.D./M.A. Education

*School of Engineering*—

J.D./M.S. Bioengineering

J.D./Ph.D. Bioengineering

J.D./M.S. Computer Science

J.D./M.S. Electrical Engineering

J.D./M.S. Management Science and Engineering (MS&E)

J.D./Ph.D. Management Science and Engineering (MS&E)

*School of Humanities and Sciences*—

J.D./M.A. Economics

J.D./Ph.D. Economics

J.D./M.A. History

J.D./Ph.D. History

J.D./M.A. in degree granting programs in the Division of International Comparative and Area Studies (ICA): African Studies, East Asian Studies, International Policy Studies, Latin American Studies, and Russian, East European and Eurasian Studies

J.D./Ph.D. Philosophy

J.D./Ph.D. Political Science

J.D./Ph.D. Psychology

J.D./M.P.P. Public Policy

J.D./Ph.D. Sociology

*School of Medicine*—

J.D./M.S. Health Research and Policy (HRP)

*Formal joint degree programs with other universities*—

J.D./M.P.A. with the Woodrow Wilson School of Public and International Affairs at Princeton University

J.D./M.A. with the Paul H. Nitze School of Advanced International Studies at Johns Hopkins University

## COURSES IN LAW

Detailed course descriptions are posted on the Stanford Law School, Office of the Registrar web site at <http://lawreg.stanford.edu/stanford>. Some law courses have special enrollment instructions and restrictions, but many law courses are open to qualified graduate students in other departments of Stanford University with instructor consent. Non-law students may not enroll in courses that are part of the required first-year JD curriculum. Stanford non-Law students intending to enroll in any course with a LAW subject code must consult the Office of the Law School Registrar in the Stanford Law School Administration Building, room 100, or see <http://www.law.stanford.edu/school/offices/registrar>.

# SCHOOL OF MEDICINE

*Dean:* Philip Pizzo

*Senior Associate Dean for Graduate Education and Postdoctoral Affairs:* Daniel Herschlag

*Senior Associate Dean for Medical Education:* Charles Prober

The School of Medicine offers courses of study leading to the M.S., Ph.D., and M.D. degrees.

## UNDERGRADUATE PROGRAMS IN THE SCHOOL OF MEDICINE

Many courses in the School of Medicine are open to any registered Stanford student who has fulfilled the prerequisites, subject to the usual limits of course enrollment and faculty approval. The school also offers courses specifically for undergraduates, as well as graduate-level courses where advanced undergraduates with backgrounds in the life sciences are welcome. Among the undergraduate offerings are numerous Stanford Introductory Seminars for freshmen and sophomores (see the "Stanford Introductory Studies" section of this Bulletin), the Emergency Medical Technician program, Stanford Immersion in Medicine Physician Shadowing, Pre-Vet Advisory, and courses in Community Health, including participation in the Stanford Free Clinics. The school also offers several undergraduate courses through the Department of Biology and the Interdisciplinary Program in Human Biology in the School of Humanities and Sciences.

## M.S. AND PH.D. PROGRAMS IN THE SCHOOL OF MEDICINE

The School of Medicine is home to graduate programs covering a broad range of disciplines within biomedicine leading to Ph.D. or M.S. degrees. These programs focus on interdisciplinary training with in-depth investigation of an original problem of fundamental importance to the biosciences. Each degree program sets its own curriculum, but many courses are taught by groups of faculty from multiple programs and departments. Flexibility is a priority to ensure that all students obtain the best possible training for pursuing careers in their areas of interest. The school is dedicated to training students from diverse backgrounds, and to the promotion of diversity in graduate education. Admission is through one of about 15 home programs. These home programs enable students to carry out dissertation research and training with School of Medicine faculty, as well as investigators in the departments of Biology and Biophysics in the School of Humanities and Sciences. Detailed information on School of Medicine M.S. and Ph.D. programs, curricula, and research can be found at <http://med.stanford.edu/ms> and <http://med.stanford.edu/phd>. Application information can be found at <http://gradadmissions.stanford.edu>.

## M.D. PROGRAM IN THE SCHOOL OF MEDICINE

The School of Medicine seeks to attract students who are passionate about scholarship and wish to improve the health of the world's people through research, innovation, and leadership. The Stanford M.D. curriculum provides education in biomedical and clinical sciences along with study and independent research

through scholarly concentrations. Emphasis is placed on interdisciplinary learning, with streamlined content and melding of basic science and clinical instruction across the curriculum. Blocks of unscheduled time allow for individual or group study, participation in elective courses, research, and reflection. Alternative pathways through the curriculum include an option of a fifth or sixth year of study as well as opportunities for pursuing a second degree, such as an M.P.H., M.B.A., Master's of Science in Epidemiology or Health Services Research, or a Ph.D.

Broad clinical science education occurs throughout the curriculum with exposure to patient care and the practice of medicine beginning on the first day of medical school. Students may begin clinical clerkships as early as May of the second year. A population health course combines classroom and experiential learning to provide understanding of the socioeconomic determinants of the health of patients and communities.

Scholarly concentrations offer opportunities for developing skills that enhance basic science and clinical training in areas such as bioengineering, biomedical ethics and medical humanities, biomedical informatics, clinical research, community health, health services and policy research, and the molecular basis of medicine. Through the scholarly concentration program, these skills may be applied in clinical areas housed within centers at Stanford such as the Comprehensive Cancer Center, the Cardiovascular Institute, the Neuroscience Institute, the Institute of Immunology, Transplantation, and Infection, and Women's Health at Stanford. Study in a scholarly concentration typically includes course work and research activities. Research for scholarly concentrations is supported through the Medical Scholars program, which funds student research projects at Stanford and overseas.

Students with interests in medical research as a career are encouraged to investigate opportunities available through the Medical Scientist Training Program (MSTP). Stanford also collaborates with the University of California, Berkeley, to offer students opportunities for M.D./M.P.H. training. Details about these programs may be found at [http://med.stanford.edu/combined\\_degree](http://med.stanford.edu/combined_degree).

Stanford is committed to representing the diversity of the U.S. and California populations by seeking a diverse body of students who are interested in the intellectual substance of medicine and committed to advancing the field of health care, broadly defined. Provided an applicant to the school has completed basic courses in physics, chemistry, and biology, the choice of an undergraduate major may reflect other interests, including the arts and humanities. Course work in advanced biology such as biochemistry, molecular biology, or genetics and the behavioral sciences is recommended because of their importance in understanding health care. Breadth of interests and depth of experiences play an important role in the selection of students from among those applicants having superior academic records.

The M.D. degree requires 13 quarters of registration at full Med-MD tuition; the joint M.D./Ph.D. degree requires 16 quarters. Completion of the M.D. degree must be achieved within six years, unless a petition is granted to extend this time frame. For further details on the M.D. degree, including admission requirements, see <http://med.stanford.edu/md>.

## MULTIPLE-DEGREE PROGRAMS IN THE SCHOOL OF MEDICINE

### MEDICAL SCIENTIST TRAINING PROGRAM

The Medical Science Training Program (MSTP) provides medical students with an opportunity to pursue an individualized program of research and course work leading to both the M.D. and Ph.D. degrees. It is designed to equip students for careers in academic investigative medicine, and emphasizes flexibility of

curricular and research programs for each trainee. Training for a combined M.D.-Ph.D. includes the same content encountered by students who pursue each degree separately, but the total training time is less than the sum of the time normally required for each degree. The flexible curriculum at Stanford's School of Medicine allows each student, in consultation with a preceptor and other advisers, to pursue a plan of study that satisfies the requirements for the M.D. and allows performance of doctoral-level research leading to the Ph.D. Students interested in joining the MSTP are considered for admission at the time of their application to the School of Medicine M.D. program and are asked to provide supplemental information relevant to their research background. Current Stanford M.D. students may also apply for admission to the MSTP. Further information regarding the program and the admissions process may be obtained from the MSTP administrator; details about the MSTP may be found at <http://mstp.stanford.edu>.

## MASTER OF SCIENCE IN MEDICINE PROGRAM

The Master of Science in Medicine program admits current Stanford Ph.D. students who have a commitment to translational research, but are not interested in becoming clinicians. The goal of the program is to train researchers in human biology and disease to be better equipped to translate new scientific discoveries into useful medical advances. Students offered admission into any Ph.D. program at Stanford may apply for admission to the master's program. During their first five quarters, students take basic biomedical science courses with Stanford M.D. students. The School of Medicine M.D. curriculum is presented in a succinct format that allows time for students to concurrently complete their Ph.D. course requirements and lab rotations. By early in their second year, students choose a lab for their Ph.D. thesis research and complete their medical course work. They also elect a clinical co-mentor to discuss translational research needs and help to arrange a short clinical experience. Upon completion of the Program., participating students receive an M.S. in Medicine. Details about the program can be found at <http://msm.stanford.edu>.

## BIOCHEMISTRY

*Emeriti: (Professors)* Robert L. Baldwin, Paul Berg, Douglas L. Brutlag, David S. Hogness, A. Dale Kaiser, I. Robert Lehman  
*Chair:* Mark A. Krasnow

*Professors:* Philip Beachy, Patrick O. Brown, Gilbert Chu, Ronald W. Davis, James E. Ferrell, Jr., Daniel Herschlag, Mark A. Krasnow, Suzanne R. Pfeffer, James A. Spudich

*Associate Professors:* Pehr A. B. Harbury, Julie A. Theriot

*Assistant Professors:* Rhiju Das, Aaron F. Straight

*Courtesy Professors:* Kerwyn C. Huang, Chaitan S. Khosla, Sharon Long, Rajat Rohatgi

*Department Offices:* Beckman Center, B400

*Mail Code:* 94305-5307

*Phone:* (650) 723-6161

*Web Site:* <http://biochem.stanford.edu/>

Courses offered by the Department of Biochemistry are listed under the subject code BIOC on the *Stanford Bulletin's* ExploreCourses web site.

Biochemistry is a department within the School of Medicine, with offices and labs located in the Beckman Center for Molecular and Genetic Medicine at the Stanford Medical Center. Courses offered by the department may be taken by undergraduates as well as graduate and medical school students.

Advanced courses offered in more specialized areas emphasize recent developments in biochemistry, cell biology, and molecular biology. These courses include the physical and chemical principles of biochemistry, enzyme reaction mechanisms, membrane trafficking and biochemistry, molecular motors and the cytoskeleton, mechanisms and regulation of nucleic acid

replication and recombination, the biochemistry of bacterial and animal viruses, the molecular basis of morphogenesis, the molecular and cell biology of yeast, and the structure and function of both eukaryotic and prokaryotic chromosomes.

Opportunities exist for directed reading and research in biochemistry and molecular biology, using the most advanced research facilities, including those for light and electron microscopy, chromatography and electrophoresis, protein and nucleic acid purification, rapid kinetic analysis, synthesis and analysis, single molecule analyses using laser light traps, microarray generation and analysis, and computer graphic workstation facilities for protein and nucleic acid structural analysis. Ongoing research uses a variety of organisms from bacteria to animal cells.

## DOCTOR OF PHILOSOPHY IN BIOCHEMISTRY

Requirements for the M.S. and Ph.D. degrees are described in the "Graduate Degrees" section of this bulletin. The department does not offer undergraduate degrees.

The Department of Biochemistry offers a Ph.D. program which begins in the Autumn Quarter of each year. The program of study is designed to prepare students for productive careers in biochemistry; its emphasis is training in research, and each student works closely with members of the faculty. In addition to the requirement for a Ph.D. dissertation based on original research, students are required to complete six advanced courses in biochemistry and related areas among the 135 total units required for the Ph.D. Selection of these courses is tailored to fit the background and interests of each student. A second requirement involves the submission of two research proposals which are presented by the student to a small committee of departmental faculty members who are also responsible for monitoring the progress of student curricular and research programs, and a journal club presentation. All Ph.D. students are expected to participate actively in the department's seminar program, and students are encouraged to attend and to present papers at regional and national meetings in cellular biochemistry and molecular biology. Teaching experience is an integral part of the Ph.D. curriculum and is required for the degree.

The Department of Biochemistry offers an M.S. degree only to students already enrolled in the Ph.D. program. Students should contact the Graduate Studies adviser for more details.

Those applying for graduate study should have at least a baccalaureate degree and should have completed work in cell and developmental biology, basic biochemistry and molecular biology, and genetics. Also required are: at least one year of university physics; differential and integral calculus; and organic, inorganic, and physical chemistry. The department is especially interested in those applicants who have research experience in biology or chemistry. Students must submit an application, including transcripts and letters of recommendation, by December (see web site) for admission in the following Autumn Quarter.

Applications should be submitted at <http://gradadmissions.stanford.edu>. Applicants are notified by March 31 of decisions on their applications. Stanford University requires scores from the Graduate Record Examination (GRE) (verbal, quantitative, and analytical), and applicants are encouraged to submit scores from the GRE Subject Test in biochemistry, biology, or chemistry. Applicants should take the October GRE exam.

All applicants are urged to compete for non-Stanford fellowships or scholarships, and U.S. citizens should complete an application for a National Science Foundation Predoctoral Traineeship. Students are provided with financial support to cover normal living expenses; Stanford tuition costs are paid. Applicants for admission to the department are considered without regard to race, color, creed, religion, sex, age, national origin, or marital status.

Postdoctoral research training is available to graduates who hold a Ph.D. or an M.D. degree. Qualified individuals may write to individual faculty members for further information.

At present, the primary research interests of the department are the structure and function of proteins and nucleic acids, the biochemistry and control of development processes, molecular motors and the cytoskeleton, the trafficking of proteins between membrane-bound organelles, the control and regulation of gene expression, bioinformatics/protein structure design, and the application of microarrays to problems in human health and disease.

## CENTER FOR BIOMEDICAL ETHICS

*Director:* David C. Magnus

*Director Emeritus:* Thomas A. Raffin

*Associate Director:* Mildred K. Cho

*Participating Faculty and Staff:* Clarence H. Braddock, Julie A. Collier, LaVera M. Crawley, Maren Grainger-Monsen, Henry Greely, Katrina A. Karkazis, Sandra S. Lee, Jose R. Maldonado, Kelly E. Ormond, Laura W. Roberts, Christopher T. Scott, Audrey Shafer, Abraham C. Verghese, Lawrence I. Zaroff

*Center Offices:* 1215 Welch Road, Modular A

*Mail Code:* 94305-5417

*Phone:* (650) 723-5760

*Web Site:* <http://bioethics.stanford.edu>

The Stanford University Center for Biomedical Ethics (SCBE) is dedicated to interdisciplinary research and education, and provides clinical and research ethics consultation. SCBE serves as a scholarly resource on emerging ethical issues raised by medicine and biomedical research.

SCBE offers a scholarly concentration in Biomedical Ethics and Medical Humanities (BEMH) to medical students. This program allows medical students to study in depth the moral, social, and humanistic dimensions of medicine and biomedical science. Using cross-disciplinary methods such as those from philosophy, social science, film, literature, art, and law, students examine the meaning and implications of medicine and medical research.

*Requirements*—Students who pursue Biomedical Ethics and Medical Humanities in conjunction with an application area, such as Immunology, are required to complete 6 units including:

INDE 212. The Human Condition: Medicine, Arts, and Humanities (2 units)

MED 250A. Medical Ethics I (2 units)

Students may select the other two core BEMH units from a wide variety of University, Medical School, and Law School courses. Students interested in completing all 12 units in the BEMH scholarly area may do the same. Students are encouraged to go through the various offerings and devise a course plan to present to the director, David Magnus, and Audrey Shafer. Additional information on requirements for the scholarly concentration, is available at <http://bioethics.stanford.edu/education/bemh>.

## BIOMEDICAL INFORMATICS

*Committee:* Russ B. Altman (*Chair and Program Director*); Lawrence M. Fagan, Mark A. Musen (*Co-Directors*); Atul Butte, Amar K. Das, Teri Klein, David Paik, Daniel L. Rubin, Nigam Shah

### PARTICIPATING FACULTY AND STAFF BY DEPARTMENT\*

*Biochemistry:* Douglas L. Brutlag (Professor, emeritus), Rhiju Das (Assistant Professor), Ronald Davis (Professor), James Ferrell

(Professor), Hunter Fraser (Assistant Professor), Julie Theriot (Associate Professor)

*Bioengineering:* Russ B. Altman (Professor), Kwabena Boahen (Associate Professor), Markus Covert (Assistant Professor), Hunter Fraser (Assistant Professor), Ingmar Riedel-Kruse (Assistant Professor)

*Biology:* Markus Feldman (Professor), Dmitri Petrov (Associate Professor)

*Chemistry:* Vijay Pande (Associate Professor)

*Chemical and Systems Biology:* Joshua Elias (Assistant Professor), James Ferrell (Professor)

*Computer Science:* Serafim Batzoglou (Associate Professor), Gill Bejerano (Assistant Professor), David Dill (Professor), Leo Guibas (Professor), Daphne Koller (Professor), Chris Manning (Associate Professor), Teresa Meng (Professor), Terry Winograd (Professor)

*Developmental Biology:* Gill Bejerano (Assistant Professor), Harley McAdams (Professor, Research)

*Electrical Engineering:* Teresa Meng (Professor)

*Genetics:* Russ B. Altman (Professor), Carlos Bustamante (Professor), Mike Cherry (Associate Professor, Research), Stanley N. Cohen (Professor), Ronald Davis (Professor), Teri E. Klein (Senior Research Scientist), Jin Billy Li (Assistant Professor), Gavin Sherlock (Associate Professor), Arend Sidow (Associate Professor), Michael P. Snyder (Professor), Hua Tang (Associate Professor)

*Health Research and Policy:* Mark A. Hlatky (Professor), Richard A. Olshen (Professor), Robert Tibshirani (Professor)

*Management Science and Engineering:* Margaret Brandeau (Professor), Ross D. Shachter (Associate Professor)

*Medicine:* Russ B. Altman (Professor), Euan Ashley (Assistant Professor), Jayanta Bhattacharya (Associate Professor), Atul Butte (Associate Professor), Robert W. Carlson (Professor), Amar K. Das (Assistant Professor), Lawrence M. Fagan (Co-Director), Mary Goldstein (Professor), Peter D. Karp (Consulting Assistant Professor), Henry Lowe (Associate Professor, Research; Senior Associate Dean for Information Resources and Technology), Mark A. Musen (Professor), Douglas K. Owens (Associate Professor), Robert W. Shafer (Assistant Professor, Research), Nigam Shah (Assistant Professor), Samson Tu (Senior Research Scientist), P.J. Utz (Associate Professor), Michael G. Walker ((Consulting Associate Professor)

*Microbiology and Immunology:* Karla Kirkegaard (Professor), Garry Nolan (Professor), Julie Theriot (Associate Professor)

*Pediatrics:* Atul Butte (Associate Professor), Chris Longhurst (Clinical Assistant Professor), Henry Lowe (Associate Professor, Research; Senior Associate Dean for Information Resources and Technology)

*Psychiatry and Behavioral Sciences:* Amar K. Das (Assistant Professor), Vinod Menon (Associate Professor)

*Radiation Oncology:* Lei Xing (Professor)

*Radiology:* Sam Gambhir (Professor), Sandy A. Napel (Professor), David Paik (Assistant Professor), Sylvia Plevritis (Associate Professor), Daniel L. Rubin (Assistant Professor)

*Structural Biology:* Michael Levitt (Professor), Vijay Pande (Associate Professor)

*Statistics:* Trevor J. Hastie (Professor), Susan Holmes (Professor), Art Owen (Professor), Robert Tibshirani (Professor), Michael G. Walker (Consulting Associate Professor), Nancy Zhang (Assistant Professor)

*Surgery:* Thomas Krummel (Professor)

\* Research opportunities are not limited to faculty and departments listed.

*Program Offices:* Medical School Office Building (MSOB), room X- 215, 1265 Welch Road

*Mail Code:* 94305-5479

*Phone:* (650) 723-1398

*Fax:* (650) 725-7944

*Web Site:* <http://bmi.stanford.edu>

Courses offered by the Program in Biomedical Informatics are listed under the subject code BIOMEDIN on the *Stanford Bulletin's* ExploreCourses web site.

The program in Biomedical Informatics emphasizes research to develop novel computational methods that can advance biomedicine. Students receive training in the investigation of new approaches to conceptual modeling and to development of new algorithms that address challenging problems in the biological sciences and clinical medicine. Students with a primary interest in developing new informatics methods and knowledge are best suited for this program. Students with a primary interest in the biological or medical application of existing informatics techniques may be better suited for training in the application areas themselves.

## GRADUATE PROGRAMS IN BIOMEDICAL INFORMATICS

The Biomedical Informatics Program is interdepartmental and offers instruction and research opportunities leading to M.S. and Ph.D. degrees in Biomedical Informatics. All students are required to complete the core curriculum requirements, and also to elect additional courses to complement both their technical interests and their goals in applying informatics methods to clinical settings, biology, or imaging.

The core curriculum is common to all degrees offered by the program but is adapted or augmented depending on the interests and experience of the student. Deviations from the core curriculum must be justified in writing and approved by the student's Biomedical Informatics academic adviser and the chair of the Biomedical Informatics Executive Committee. It should be noted, however, that the program is intended to provide flexibility and to complement other opportunities in applied medical research that exist at Stanford. Although most students are expected to comply with the basic program of study outlined here, special arrangements can be made for those with unusual needs or those simultaneously enrolled in other degree programs within the University. Similarly, students with prior relevant training may have the curriculum adjusted to eliminate requirements met as part of prior training.

## CORE CURRICULUM AND PROGRAM REQUIREMENTS IN BIOMEDICAL INFORMATICS

### CORE CURRICULUM IN BIOMEDICAL INFORMATICS

Students are expected to participate regularly in the Biomedical Informatics Student Seminar (BIOMEDIN 201) and a research Colloquium, such as BIOMEDIN 200 or BIOMEDIN 205. In addition, all students are expected to fulfill requirements in the following five categories:

1. *Core Biomedical Informatics* (17 units): Students are expected to complete the core offerings in biomedical informatics, including BIOMEDIN 212 and 4 of the following: BIOMEDIN 210, 211, 214, 215, 217 and 260. Any remaining units must be graduate level courses listed under BIOMEDIN.
2. *Computer Science, Statistics, Mathematics & Engineering* (18 units): Students are expected to create a program of study with a mixture of graduate-level courses in computer science, statistics or other technical informatics-related disciplines that allows them to achieve in-depth mastery of these areas. The programs of study may focus on aspects of these disciplines including (but not limited to): machine learning, artificial intelligence, data mining, image analysis, human-computer interaction, systems engineering, scientific and numerical computing or graphics. In general, this course of study should include no more than 9 units in courses 100-199, and the rest should be 200 or above (unless specifically approved by adviser). CS courses 106, 107 and 108 cannot be counted for this requirement, and all courses should be formal classroom-based courses, unless approved by the executive committee.

Up to 6 units of this portion of the core curriculum may be taken on a pass/fail basis, but at least half of the units in this portion of the curriculum must be taken for a grade. BIOMEDIN units about 17 may also be counted for the requirements in this category. Students may petition for quantitative courses in the medical school or Humanities and Sciences to be counted in this section of the curriculum.

3. *Social and Ethical Issues* (4 units): Students are expected to be familiar with issues regarding ethical, legal, social, organizational and behavioral aspects of the impact of biomedical informatics technologies on society in general. They should select broadly from University offerings to explore one or more of these aspects more deeply. In addition, students are required to take MED 255, The Responsible Conduct of Research, or the equivalent.
4. *Unrestricted Electives* (6 units): Students may fulfill this requirement with any Stanford course, including courses taken to satisfy core curriculum prerequisites.
5. *For PhD Students only: Domain Biology/Medicine, Pedagogy, Electives* (9 units): In order to reach a total of 54 units of core curriculum, PhD students should take an additional 9 units; this should include 6 units of biology or medicine classes relevant to their research interests, 2 units of BIOMEDIN 290, and one additional unit of unrestricted elective.

The core curriculum generally entails a minimum of 45 units of course work for master's students and 54 units of course work for Ph.D. students, but can require substantially more or less depending upon the courses chosen and the previous training of the student. BIOMEDIN 200, 201, 299, 801, 802 and MED 255 may be taken for satisfactory/no credit (S/NC). The varying backgrounds of students are well recognized and no one is required to take courses in an area in which he or she has already been adequately trained; under such circumstances, students are permitted to skip courses or substitute more advanced work using a formal annual process administered by the BMI executive committee, in which students demonstrate satisfaction of core curriculum prerequisites, and request permission to receive core curriculum credit for classes taken previously in areas of the core curriculum. Students design appropriate programs for their interests with the assistance and approval of their Biomedical Informatics academic adviser. At least 27 units of formal course work are expected for the core curriculum.

## PROGRAM REQUIREMENTS FOR THE ACADEMIC M.S., PROFESSIONAL M.S., AND COTERMINAL M.S. DEGREES

Students enrolled in any of the M.S. degrees must complete the program requirements in order to graduate. Programs of at least 45 units that meet the following guidelines are normally approved:

1. Completion of the core curriculum with overall GPA of 3.0.
2. Students are expected to participate regularly in the Biomedical Informatics Student Seminar (BIOMEDIN 201) and a research colloquium, such as BIOMEDIN 200 or BIOMEDIN 205. HCP professional masters candidates who are able to attend classes on campus should also participate regularly.
3. Electives: additional courses to bring the total to 45 or more units as necessary.
4. Masters candidates should sign up for BIOMEDIN 801 for their project units.

The University requirements for the M.S. degree are described in the "Graduate Degrees" section of this bulletin.

## MASTER OF SCIENCE IN BIOMEDICAL INFORMATICS (ACADEMIC)

This degree is designed for individuals who wish to undertake in-depth study of biomedical informatics with research on a full-time basis. Normally, a student spends two years in the program and implements and documents a substantial project during the second year. The first year involves acquiring the fundamental

concepts and tools through course work and research project involvement. All first- and second-year students are expected to devote 50 percent or more of their time participating in research projects. Research rotations are not required, but can be done with approval of the academic adviser or training program director. Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics. This degree requires a written research paper to be approved by two faculty members.

## **MASTER OF SCIENCE IN BIOMEDICAL INFORMATICS (PROFESSIONAL/HONORS COOPERATIVE PROGRAM)**

This degree is designed primarily for the working professional who already has advanced training in one discipline and wishes to acquire interdisciplinary skills. All classes necessary for the degree are available online. The professional M.S. is offered in conjunction with Stanford Center for Professional Development (SCPD), which establishes the rates of tuition and fees. The program uses the honors cooperative model (HCP), which assumes that the student is working in a corporate setting and is enrolled in the M.S. on a part-time basis. The student has up to five years to complete the program. Research projects are optional and the student must make arrangements with program faculty. Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics.

## **MASTER OF SCIENCE IN BIOMEDICAL INFORMATICS (COTERMINAL)**

The coterminal degree program allows Stanford University undergraduates to study for a master's degree while completing their bachelor's degree(s) in the same or a different department. Please refer to the "Coterminal Bachelor's and Master's Degrees" section under "Undergraduate Degrees and Programs" in this bulletin for additional information.

The coterminal Master of Science program follows the same program requirements as the Master of Science (Professional), except for the requirement to be employed in a corporate setting. The coterminal degree is available only to current Stanford undergraduates. Coterminal students are enrolled full-time and courses are taken on campus. Research projects are optional and the student must make arrangements with program faculty. Graduates of this program are prepared to contribute creatively to basic or applied projects in biomedical informatics.

For University coterminal degree program rules and University application forms, see <http://registrar.stanford.edu/pdf/CotermAppRules.pdf>

## **DOCTOR OF PHILOSOPHY IN BIOMEDICAL INFORMATICS**

The University's basic requirements for the doctorate (residence, dissertation, examination, and so on) are discussed in the "Graduate Degrees" section of this bulletin.

Individuals wishing to prepare themselves for careers as independent researchers in biomedical informatics, with applications experience in bioinformatics, clinical informatics, or imaging informatics, should apply for admission to the doctoral program. The following are additional requirements imposed by the Biomedical Informatics Executive Committee:

1. A student plans and completes a coherent program of study including the core curriculum and additional requirements as for the master's program. In the first year, two or three research rotations are encouraged. The master's requirements should be completed by the end of the second year in the program (six quarters of study, excluding summers).
2. Doctoral students are generally advanced to Ph.D. candidacy after passing the qualifying exam, which takes place during the

end of the second year of training. A student's academic adviser has primary responsibility for the adequacy of the program, which is regularly reviewed by the Biomedical Informatics Executive Committee.

3. To remain in the Ph.D. program, each student must attain a grade point average (GPA) of 3.0 for the core curriculum. The student must fulfill these requirements and apply for admission to candidacy for the Ph.D. by the end of six quarters of study (excluding summers). In addition, reasonable progress in the student's research activities is expected of all doctoral candidates.
4. During the third year of training, generally in Winter Quarter, each doctoral student is required to give a preproposal seminar that describes evolving research plans.
5. By the end of nine quarters (excluding summers), each student must orally present a written thesis proposal for the written dissertation and must orally defend the proposal before a dissertation committee that generally includes at least one member of the Biomedical Informatics Executive Committee. The committee determines whether the student's general knowledge of the field and the details of the planned thesis are sufficient to justify proceeding with the dissertation.
6. After application for Terminal Graduate Registration (TGR) status, the Ph.D. candidate should register each quarter for BIOMEDIN 802 so their research effort may be counted toward the degree.
7. As part of the training for the Ph.D., each student is required to be a teaching assistant for two courses approved by the Biomedical Informatics Executive Committee; one should be completed in the first two years of study.
8. The most important requirement for the Ph.D. degree is the dissertation. Prior to the oral dissertation proposal and defense, each student must secure the agreement of a member of the program faculty to act as dissertation adviser. The principal adviser should be approved by the Biomedical Informatics Executive Committee, and all dissertation committees should include at least one participating BMI faculty member.
9. At the completion of training, while still matriculated and shortly prior to deposit of the dissertation, the student gives a final talk describing his or her results. No official additional oral examination is required upon completion of the written dissertation. The oral defense of the dissertation proposal satisfies the University oral examination requirement.
10. The student is expected to demonstrate an ability to present scholarly material and research in a lecture at a formal seminar.
11. The student is expected to demonstrate an ability to present scholarly material in concise written form. Each student is required to write a paper suitable for publication, usually discussing his or her doctoral research project. This paper must be approved by the student's academic adviser as suitable for submission to a refereed journal before the doctoral degree is conferred.
12. The dissertation must be accepted by a reading committee composed of the principal dissertation adviser, a member of the program faculty, and a third faculty member chosen from anywhere within the University. A fourth reader may be added at the discretion of the student and their adviser.

## **PH.D. MINOR IN BIOMEDICAL INFORMATICS**

For a Ph.D. minor in Biomedical Informatics (BMI), a candidate must complete a minimum of 20 unduplicated units of biomedical informatics course work, including 12 units in BMI core courses from BIOMEDIN 210, 211, 212, 214, 215, 217 and 260.

The candidate must complete the one-unit MED 255, Responsible Conduct of Research, or an approved substitute.

The remaining units must be courses that would count towards the BMI master's degree, taken from any of these three areas:

- Computer Science
  - Probability, Statistics, Machine Learning, and Experimental Design
  - Biomedicine
- Courses used for the BMI Ph.D. minor may not be double-counted to meet the requirements of a master's or Ph.D. degree.
- All courses used for the BMI Ph.D. minor, except MED 255, must be taken for a letter grade and passed with an overall GPA of 3.0 or better.

This degree offering became effective in Autumn Quarter 2010-11. Courses taken prior to that date may be counted towards the BMI Ph.D. minor degree.

## CANCER BIOLOGY

**Program Director:** Amato Giaccia (Radiation Oncology)  
**Committee on Cancer Biology:** Nicholas Denko (Radiation Oncology), Howard Chang (Dermatology), Jeffrey Axelrod (Pathology), Katrin Chua (Medicine, Endocrinology), Julien Sage (Pediatrics), Alexandro Sweet-Cordero (Pediatrics), Timothy Stearns (Biology, Genetics), Jonathan Pollack (Pathology)

**Participating Departments and Faculty:**

**Biochemistry:** Patrick O. Brown (Professor)  
**Bioengineering:** Jennifer Cochran (Assistant Professor)  
**Biology (School of Humanities and Sciences):** William Burkholder (Assistant Professor), Martha Cyert (Professor), Guowei Fang (Assistant Professor), Judith Frydman (Associate Professor), Or Gozani (Assistant Professor), Ashby Morrison (Assistant Professor), W. James Nelson (Professor), Virginia Walbot (Professor), Tim Stearns (Professor)  
**Chemical And Systems Biology:** James K. Chen (Assistant Professor), Karlene Cimprich (Associate Professor), James E. Ferrell (Professor), Mary Teruel (Assistant Professor)  
**Dermatology:** Howard Y. Chang (Associate Professor), Paul A. Khavari (Professor), M. Peter Marinkovich (Associate Professor), Anthony Oro (Associate Professor)  
**Developmental Biology:** Roeland Nusse (Professor), Matthew Scott (Professor)  
**Genetics:** Anne Brunet (Assistant Professor), Michele Calos (Professor), Stanley Cohen (Professor), Monte M. Winslow (Assistant Professor)  
**Medicine/Cardiovascular Medicine:** Ching-pin Chang (Assistant Professor)  
**Medicine/Endocrinology/Geronotology/Metabolism:** Katrin Chua (Assistant Professor), Andrew R. Hoffman (Professor)  
**Medicine/Gastroenterology and Hepatology:** Christine Cartwright (Professor), Anson Lowe (Assistant Professor)  
**Medicine/Hematology:** Steven Artandi (Associate Professor), Calvin Kuo (Associate Professor), Ravindra Majeti (Assistant Professor)  
**Medicine/Oncology:** Gilbert Chu (Professor), Dean Felsher (Associate Professor), James Ford (Associate Professor), Ronald Levy (Professor), Beverly S. Mitchell (Professor; Director, Stanford Cancer Institute)  
**Medicine/Pulmonary and Critical Care Medicine:** Glenn Rosen (Associate Professor)  
**Microbiology and Immunology:** Helen M. Blau (Professor)  
**Neurology and Neurological Sciences:** Thomas Rando (Professor)  
**Neurology and Neurosurgery:** Yoon-Jae Cho (Assistant Professor)  
**Neurosurgery:** Albert J. Wong (Professor)  
**Obstetrics and Gynecology:** Renee A. Reijo Pera (Professor)  
**Otolaryngology:** John Sunwoo (Assistant Professor)  
**Pathology:** Jeff Axelrod (Associate Professor), Matthew Bogoy (Associate Professor), Michael Cleary (Professor), Gerald Crabtree (Professor), Edgar Engleman (Professor), Andrew Fire (Professor), Isabella Graef (Assistant Professor), Joseph Lipsick (Professor), Bingwei Lu (Assistant Professor), Jonathan Pollack (Associate Professor), Irving Weissman (Professor; Virginia &

D.K. Ludwig Professor for Clinical Investigation in Cancer Research, Professor of Developmental Biology), Marius Wernig (Assistant Professor)  
**Pediatrics/Cancer Biology:** Julien Sage (Assistant Professor), Alejandro Sweet-Cordero (Assistant Professor)  
**Pediatrics/Cardiology:** Marlene Rabinovitch (Professor)  
**Pediatrics/Endocrinology:** Brian Feldman (Assistant Professor)  
**Radiation Oncology/Radiation Biology:** Laura Attardi (Associate Professor), J. Martin Brown (Professor), Nicholas Denko (Assistant Professor), Amato Giaccia (Professor; Director, Stanford University Cancer Biology Program)  
**Radiation Oncology/Radiation Physics:** Edward Graves (Assistant Professor)  
**Radiation Oncology/Radiation Therapy:** Susan Knox (Associate Professor), Albert Koong (Assistant Professor), Quynh-Thu Le (Professor), Max Diehn (Assistant Professor)  
**Radiology/Diagnostic Radiology:** Samira Guccione (Assistant Professor, Research), Jianghong Rao (Assistant Professor)  
**Structural Biology:** William Weis (Professor)  
**Urology:** Donna Peehl (Professor, Research), Zijie Sun (Associate Professor)  
**Program Office:** 265 Campus Drive, Suite G2103  
**Mail Code:** 94305-5456  
**Phone:** (650) 723-6198  
**Email:** gracebk@stanford.edu  
**Web Site:** <http://stanford.edu/group/cancerbio>

Courses offered by the Cancer Biology Program are listed under the subject code CBIO on the *Stanford Bulletin's* ExploreCourses web site.

The Cancer Biology Program at Stanford University is an interdisciplinary program leading to the Ph.D. degree. During the past three decades, understanding of cancer has increased with the discovery of oncogenes, tumor suppressor genes, pathways of DNA damage and repair, chromatin remodeling, cell cycle regulation, angiogenesis and responses to hypoxia, and recent glimpses into the molecular basis of metastasis and cancer stem cell biology. In addition, methods of parallel analysis including gene expression arrays, protein arrays, and tissue arrays have begun to refine and redefine the taxonomy of cancer diagnosis. This explosion of basic and clinical science has resulted in the first successful cancer chemotherapies and immunotherapies based on the knowledge of specific molecular targets. Stanford presents a unique environment to pursue interdisciplinary cancer research because the schools of Medicine, Humanities and Sciences, and Engineering are located on a single campus

The goal of the Cancer Biology Ph.D. program is to provide students with education and training that enables them to make significant contributions to this field. Course work during the first year is designed to provide a broad understanding of the molecular, genetic, cell biological, and pathobiological aspects of cancer. Students also learn about the current state of the epidemiology, clinical diagnosis, treatment, and prevention of human cancers. Equally important during the first year is a series of three rotations in research laboratories chosen by each student. By the beginning of the second year, each student chooses a research adviser and begins work on the dissertation project. A qualifying examination must be completed by the end of the second year. An annual Cancer Biology conference at Asilomar in Pacific Grove California provides students with an opportunity to present their research to one another and to faculty. The expected time to degree is four to five years.

Students are not limited to a single department in choosing their research adviser. The Cancer Biology Ph.D. program currently has approximately 67 graduate students located in basic science and clinical departments throughout the School of Medicine and the School of Humanities and Sciences.

## GRADUATE PROGRAMS IN CANCER BIOLOGY

The program offers a Ph.D. in Cancer Biology.

## DOCTOR OF PHILOSOPHY IN CANCER BIOLOGY

University requirements for the Ph.D. are described under the "Graduate Degrees" section of this bulletin.

A small number of applicants are admitted to the program each year. Applicants should have completed an undergraduate major in the biological sciences; applicants with undergraduate majors in physics, chemistry, or mathematics may be admitted if they complete background training in biology during the first two years of study. During the first year, each student is required to complete a minimum of three, one quarter laboratory rotations. Students must choose a dissertation adviser prior to the end of Summer Quarter, first year, but not before the end of Spring Quarter, first year.

The requirements for the Ph.D. degree are as follows:

1. Training in biology equivalent to that of an undergraduate biology major at Stanford.
2. Completion of the following courses:
  - a. C BIO 241. Molecular, Cellular, and Genetic Basis of Cancer
  - b. GENE 203. Advanced Genetics
  - c. BIO 214. Cell Biology of Physiological Processes
  - d. CSB 210. Signal Transduction Pathways and Networks. Students can take GENE 211, Genomics, or SBIO 214, Biological Macromolecules, in lieu of CSB 210.
  - e. C BIO 280. Cancer Biology Journal Club; required for first- and second-year graduate students in Autumn, Winter, and Spring quarters.
  - f. MED 255. Responsible Conduct in Research; with consent, may be audited.
3. At least 6 units of additional cancer biology-related, graduate-level courses. Course work taken is determined in consultation with the student's adviser and/or the Program Director.
4. Presentation of research results at the annual Cancer Biology Conference on at least three occasions, at least one being an oral presentation.
5. Completion of a qualifying examination in Cancer Biology is required for admission to Ph.D. candidacy. The exam consists of an NIH-style written grant proposal not to exceed ten pages (excluding references), and an oral examination. The examining committee consists of three faculty members from the Cancer Biology Program and does not include the student's dissertation adviser. The composition of this committee is chosen by the student and dissertation adviser and must be submitted to and approved by the program director prior to the end of Autumn Quarter, second year. The qualifying examination must be taken prior to the end of Spring Quarter, second year. If necessary, one retake is permitted prior to the end of Summer Quarter, second year. After the qualifying examination has been completed, the student is required to form a dissertation reading committee that includes the student's adviser and three other members of the Academic Council with appropriate expertise. Each student is required to arrange annual meetings (more frequently, if necessary) of the dissertation reading committee, at which time oral presentations of progress during the past year and a plan of study for the coming year are presented and discussed. Completion of each annual committee meeting must be communicated in writing to the program director by the adviser by the end of Spring Quarter each year.

The major accomplishment of each successful Ph.D. student is the presentation of a written dissertation resulting from independent investigation that contributes to knowledge in the area of cancer biology. An oral examination is also required for the Ph.D. degree. In the Cancer Biology Program, a public seminar (one hour) is presented by the Ph.D. candidate, followed by a closed-door oral examination. The oral examination committee consists of at least four examiners (the members of the doctoral dissertation reading committee) and a chair. The oral examination chair may not have a full or joint appointment in the adviser's or

student's home department. However, a courtesy appointment does not affect eligibility. The oral examination chair may be from the same department as any other member(s) of the examination committee. All members of the oral examination committee are normally members of the Academic Council, as the oral examination chair must be. With the prior approval of the program director or school dean, one of the examiners may be a person who is not a member of the Academic Council if that individual contributes expertise not otherwise available. Official responsibility for selecting the oral examination chair rests with the program. Cancer Biology delegates this to the student and dissertation adviser.

## CHEMICAL AND SYSTEMS BIOLOGY

*Emeriti: (Professors)* Robert H. Dreisbach, Avram Goldstein, Dora B. Goldstein, Tag E. Mansour, Oleg Jardetzky, Richard A. Roth, James P. Whitlock

*Chair:* James E. Ferrell, Jr.

*Professors:* James E. Ferrell, Jr., Tobias Meyer, Daria Mochly-Rosen

*Associate Professors:* James K. Chen, Karlene A. Cimprich, Thomas J. Wandless

*Assistant Professors:* Joshua Elias, Joanna K. Wysocka

*Courtesy Professors:* Stuart Kim, Beverly S. Mitchell, Paul A. Wender

*Courtesy Associate Professors:* Calvin J. Kuo, Matthew Bogoy

*Courtesy Assistant Professors:* Ajay Chawla, Markus Willard Covert, Jan M. Skotheim

*Web Site:* <http://casb.stanford.edu>

Courses offered by the Department of Chemical and Systems Biology are listed under the subject code CSB on the *Stanford Bulletin's* ExploreCourses web site.

The department emphasizes individualized training at the interface of physical science and biomedical science. The program encourages students to draw upon a variety of modern scientific techniques, ranging from recent advances in molecular biology and protein biochemistry to synthetic organic chemistry and single cell imaging. Graduate students in the department take courses in signal transduction networks, chemical biology, and other areas of importance to their research goals.

## MASTER OF SCIENCE IN CHEMICAL AND SYSTEMS BIOLOGY

Students in the Ph.D. program may apply for an M.S. degree after having satisfactorily completed the course and laboratory requirements of the first two years. The degree also requires a written thesis based on literature or laboratory research. Postdoctoral research training is available to graduates having the Ph.D. or M.D. degree.

## DOCTOR OF PHILOSOPHY IN CHEMICAL AND SYSTEMS BIOLOGY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

The Department of Chemical and Systems Biology offers interdisciplinary training to prepare students for independent careers in biomedical science. The main focus of the program is cell signaling, chemical biology, and systems biology.

The program leading to the Ph.D. degree includes formal and informal study in chemical biology, systems biology, drug discovery, biochemistry, and other areas of relevance to the interests of particular students. First-year students spend one quarter in each of three different laboratories, working closely with other graduate students, a professor, and postdoctoral fellows on

various research projects. During the fourth quarter, the student chooses a faculty mentor with whom to undertake thesis research, based on available positions and the student's interest. During or before the eighth quarter of study, students must pass a qualifying exam which consists of an oral exam on general knowledge and a defense of a research proposal. Course requirements are fulfilled during the first two years of study; the later years of the four- to six-year program are devoted to full-time dissertation research. Close tutorial contact between students and faculty is stressed throughout the program.

Research opportunities also exist for medical students and undergraduates. The limited size of the labs in the department allows for close tutorial contact between students, postdoctoral fellows, and faculty.

The department participates in the four quarter Health and Human Disease and Practice of Medicine sequence which provides medical students with a comprehensive, systems-based education in physiology, pathology, microbiology, and pharmacology.

## COMPARATIVE MEDICINE

*Chair:* Sherril Green

*Professors:* Donna M. Bouley, Linda C. Cork, Sherril Green

*Associate Professors:* Paul Buckmaster, Corinna Darian-Smith, Joseph Garner, Shaul Hestrin

*Assistant Professors:* Megan Albertelli, Stephen Felt, Jennifer Johns, Claude Nagamine

*Department Offices:* Edwards Building, Room R321

*Mail Code:* 94305-5342

*Phone:* (650) 498-5080

*Web Site:* <http://med.stanford.edu/compmed>

Courses offered by the Department of Comparative Medicine are listed under the subject code COMPMED on the *Stanford Bulletin's* ExploreCourses web site.

The Department of Comparative Medicine is a clinical department that offers residency training in laboratory animal medicine for veterinarians. Its faculty offer courses at the undergraduate and graduate levels. Clinical faculty and basic science faculty in the Department of Comparative Medicine accept students to participate in research projects.

The discipline of Comparative Medicine studies the differences and similarities among species to elucidate biological and disease mechanisms. The research interests of faculty include neuroscience, infectious diseases, neuropathology, cancer, molecular genetics, and laboratory animal science.

## DEVELOPMENTAL BIOLOGY

*Emeriti (Professors):* David S. Hogness, A. Dale Kaiser

*Chair:* Roeland Nusse

*Associate Chair:* William Talbot

*Professors:* Ben Barres, Philip Beachy, Gerald Crabtree, Margaret Fuller, Seung Kim, Stuart Kim, David Kingsley, Roeland Nusse, Matthew Scott, Lucy Shapiro, William Talbot, Anne Villeneuve, Irving Weissman

*Assistant Professors:* Gill Bejerano, Joanna Wysocka

*Professor (Teaching):* Ellen Porzig

*Professor (Research):* Harley McAdams

Courses offered by the Department of Development Biology are listed under the subject code DBIO on the *Stanford Bulletin's* ExploreCourses web site.

A fundamental problem in biology is how the complex set of multicellular structures that characterize an adult animal is generated from the fertilized egg. Recent advances at the molecular level, particularly with respect to the genetic control of development, have been explosive. These advances represent the beginning of a major movement in the biological sciences toward

the understanding of the molecular mechanisms underlying developmental decisions and the resulting morphogenetic processes. This new thrust in developmental biology derives from the extraordinary methodological advances of the past decade in molecular genetics, immunology, and biochemistry. However, it also derives from groundwork laid by the classical developmental studies, the rapid advances in cell biology and animal virology, and from models borrowed from prokaryotic systems. Increasingly, the work is directly related to human diseases, including oncogene function and inherited genetic disease.

The Department of Developmental Biology includes a critical mass of scientists who are leading the thrust in developmental biology and who can train new leaders in the attack on the fundamental problems of development. Department labs work on a wide variety of organisms from microbes to worms, flies, and mice. The dramatic evolutionary conservation of genes that regulate development makes the comparative approach of the research particularly effective. Scientists in the department labs have a very high level of interaction and collaboration. The discipline of developmental biology draws on biochemistry, cell biology, genetics, molecular biology, and genomics. People in the department have a major interest in regenerative medicine and stem cell biology.

The department is located in the Beckman Center for Molecular and Genetic Medicine within the Stanford University Medical Center.

### MASTER OF SCIENCE IN DEVELOPMENTAL BIOLOGY

University requirements for the M.S. are described in the "Graduate Degrees" section of this bulletin.

Students in the Ph.D. program in Developmental Biology may apply for an M.S. degree, assuming completion of their course requirements and preparation of a written proposal. The master's degree awarded by the Department of Developmental Biology does not include the possibility of minors for graduate students enrolled in other departments or programs.

Students are required to take, and satisfactorily complete, at least three lecture courses offered by the department, including 210, Developmental Biology. In addition, students are required to take three courses outside the department. Students are also expected to attend Developmental Biology seminars and journal clubs. In addition, the candidate must complete a research paper proposing a specific experimental approach and background in an area of science relative to developmental biology.

### DOCTOR OF PHILOSOPHY IN DEVELOPMENTAL BIOLOGY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

The graduate program in Developmental Biology leads to the Ph.D. degree. The department also participates in the Medical Scientists Training Program (MSTP) in which individuals are candidates for both the M.D. and Ph.D. degrees.

Students are required to complete at least six courses, including Developmental Biology (210); Advanced Genetics (203); Frontiers in Biological Sciences (215); and an advanced molecular biology, biochemistry, or biophysics course. Students are expected to attend Developmental Biology seminars and journal clubs.

Completion of a qualifying examination is required for admission to Ph.D. candidacy. The examination consists of two parts. One proposal is on a subject different from the dissertation research and the other proposal is on the planned subject of the thesis. The final requirements of the program include presentation of a Ph.D. dissertation as the result of independent investigation and constituting a contribution to knowledge in the area of developmental biology. The student must pass the University oral examination, taken only after the student has substantially completed research. The examination is preceded by a public

seminar in which the research is presented by the candidate. The oral examination is conducted by a dissertation reading committee.

## GENETICS

*Emeritus: (Professor)* Leonard Herzenberg, Uta Francke

*Chair:* Michael Snyder

*Professors:* Russ Altman, Gregory Barsh, Carlos Bustamante, Michele Calos, Stanley Cohen, Ronald Davis, Andrew Fire, Margaret Fuller, Mark Kay, Stuart Kim, Joseph Lipsick, John Pringle, Matthew Scott, Tim Stearns, Anne Villeneuve

*Associate Professors:* Laura Attardi, Julie Baker, Anne Brunet, James Ford, Gavin Sherlock, Arend Sidow, Julien Sage, Zijie Sun, Hua Tang, Douglas Vollrath

*Assistant Professors:* William Greenleaf, Jin Billy Li, Stephen Montgomery, Monte Winslow

*Professor (Research):* Leonore Herzenberg

*Associate Professor (Research):* J. Michael Cherry

*Associate Professor (Teaching):* Kelly Ormond

*Courtesy Professor:* Hank Greely, Alexander Urban

*Lecturer:* Andrea Kwan

*Mail Code:* 94305-5120

*Phone:* (650) 723-3335

*Email:* genetics-info@genome.stanford.edu

*Web Site:* <http://genetics.stanford.edu>

Courses offered by the Department of Genetics are listed under the subject code GENE on the *Stanford Bulletin's* ExploreCourses web site.

## MASTER OF SCIENCE IN HUMAN GENETICS AND GENETIC COUNSELING

The University requirements for the M.S. are described in the "Graduate Degrees" section of this bulletin.

The Department of Genetics offers an M.S. in Human Genetics and Genetic Counseling, which is accredited by the American Board of Genetic Counseling. This program prepares students to practice in the healthcare profession of genetic counseling. The program is a full time two-year program, and accepts students to begin the program only in Autumn Quarter. Students must be admitted directly into this program, and cannot automatically transfer from the Ph.D. programs within the department, or vice versa. While courses are oriented primarily towards genetic counseling students, they may also be taken by medical students, other graduate students, residents or post-doctoral fellows, and (with permission) undergraduates.

The degree requires the completion of clinical rotations and an approved research project. Students must also complete required course work (GENE 271-286), several additional required courses (bioethics, research ethics and developmental biology), and are encouraged to take 2-4 elective courses of their choice, including a research methods elective. Faculty members include members of the Stanford faculty from Genetics, Pediatrics, Obstetrics, Pathology, Developmental Biology, Biomedical Ethics, Law, and Psychology, and practicing genetic counselors and clinical geneticists in various medical centers across the Bay Area.

Applications are due in December (see web site) for admission in the following Autumn Quarter. Applicants should demonstrate a combination of academic preparation, exposure to genetic counseling, and counseling and/or laboratory experiences. Exposure to persons with disabilities or chronic illness is also helpful. Additional information about the program is available at <http://www.med.stanford.edu/genetic-counseling>.

## DOCTOR OF PHILOSOPHY IN GENETICS

University requirements for the Ph.D. degree are described in the "Graduate Degrees" section of this bulletin.

The Ph.D. program in the Department of Genetics offers graduate students the opportunity to pursue a discipline that

encompasses both a set of tools and a coherent way of thinking about biology and medicine. All major areas of genetics are represented in the department, including human genetics (molecular identification of Mendelian traits and the pathophysiology of genetic disease, gene therapy, genetic epidemiology, analysis of complex traits, and human evolution), and application of model organisms such as bacteria, yeast, flies, worms, or mice to basic questions in biomedical research. The department is especially strong in genomic and bioinformatic approaches to genome biology and evolution, and includes several genome-scale databases such as the *Saccharomyces* Genome Database (SGD), the Stanford Microarray Database (SMD), and the Pharmacogenetics and Pharmacogenomics Knowledge Base (PharmGKB) and, administered through the Department of Biochemistry, the Stanford Genome Technology Center (SGTC).

Exposure to the intellectual scope of the department is provided by laboratory rotations, dissertation research, advanced courses in genetics and other areas of biomedical science, seminar series, journal clubs, and an annual three-day retreat of faculty, students, postdoctoral fellows, and staff scientists. Emphasis is placed on interactions and collaborations among students, postdoctoral students, and faculty within the department and throughout the campus.

During their first year, graduate students in the department take graduate courses and sample areas of research by doing rotations in three or four laboratories. At the end of the first three quarters, students may select a laboratory in which to do their dissertation research. While the dissertation research is generally performed in one laboratory, collaborative projects with more than one faculty member are encouraged. In addition to interacting with their faculty preceptor, graduate students receive advice regularly from other faculty members who serve as members of their dissertation committee. Study for the Ph.D. generally requires between four and five years of graduate work, most of which is focused on dissertation research.

Students are generally enrolled in the program to receive the Ph.D. degree, although a limited number of M.D. candidates can combine research training in genetics with their medical studies. Ph.D. candidates who have passed the qualifying exam in the second year can opt to receive the M.S. as a terminal degree.

There are opportunities for graduate students to teach in graduate-level and professional-school courses. In addition, students have the opportunity to participate in educational outreach activities coordinated by the department, which include opportunities to interact with secondary school students and teachers, lay groups, and local science museums.

Students who have recently received a bachelor's, master's, M.D., or Ph.D. degree in related fields may apply for graduate study. Prospective students must have a background in biology, mathematics, physics, and chemistry. Decisions for admission are based on comparison of the relative merits of all the candidates' academic abilities and potential for research and the department's interest in promoting a diverse learning environment. Interviews take place in late February or early March and successful applicants are offered admission by early spring. Students who wish to pursue a combined M.D./Ph.D. degree are considered for admission into the graduate program in the department after they have been admitted to the M.D. program in the School of Medicine.

Students begin graduate studies in Autumn Quarter. Prospective students are encouraged to start the application process early to ensure that they are able to submit a complete application by the December deadline. All students accepted into the Ph.D. program in the Department of Genetics are provided with full tuition and a stipend. Two training grants from the National Institutes of Health provide major support for the graduate training program in the department. Other student support is provided by departmental funds and from research grants, both federal and private, of the faculty. In addition, a number of graduate students are funded by fellowships, including those from the National Science Foundation and the Stanford Graduate Fellows program.

# HEALTH RESEARCH AND POLICY

*Emeriti: (Professors)* Dan Bloch, John Farquhar, Victor R. Fuchs  
*Chair:* Phil Lavori

*Co-Chair:* Robert Tibshirani

*Professors:* Laurence Baker, Bradley Efron, Trevor Hastie, Victor W. Henderson, Mark Hlatky, John Ioannidis, Iain M. Johnstone, Abby C. King, Philip W. Lavori, Ying Lu, Yvonne Maldonado, Richard A. Olshen, Julie Parsonnet, Robert Tibshirani, Alice S. Whittemore, Dee W. West, Wing Wong

*Associate Professor:* M. Kate Bundorf, Lorene M. Nelson, Chiara Sabatti

*Assistant Professors:* Marc Coram, Allison Kurian, Mei-Chiung Shih, Weiva Sieh, Lu Tian

*Assistant Professors (Clinical):* Rita Papat, Kristin Sainani

*Courtesy Professors:* Mary Goldstein, Paul Heidenreich, Daniel Kessler, Alex Macario, Douglas Owens, Paul Wise

*Courtesy Associate Professors:* Jay Bhattacharya, David R. Rogosa

*Courtesy Assistant Professors:* Grant Miller

*Senior Lecturer:* Irene Corso

*Lecturers:* Raymond Balise, Scarlett Gomez, Laurel Habel, De Kun Li, David Lilienfeld, Cynthia O'Malley, Caroline Tanner, Stephen Van Den Eeden

*Consulting Professors:* Gary Friedman, Elizabeth Holly, Marion Lee, George Lundberg, Peggy Reynolds

*Consulting Associate Professors:* Paul Barnett, Sally Glaser, Pamela Horn-Ross, Esther John, Ciaran Phibbs

*Consulting Assistant Professors:* Ellen Chang, Christina Clarke-Dur, Theresa Keegan, Bang Nguyen, Ingrid Oakley-Girvan, Rudy Rull, Todd Wagner

*Mail Code:* 94305-5405

*Phone:* (650) 723-5456

*Web Site:* <http://hrp.stanford.edu>

Courses offered by the Department of Health Research and Policy are listed under the subject code HRP on the *Stanford Bulletin's* ExploreCourses web site.

The Department of Health Research and Policy has three principal areas of scholarly interest:

1. Biostatistics deals with scientific methodology in the medical sciences, emphasizing the use of statistical techniques.
2. Epidemiology is the study of the distribution and determinants of illness and impairment in human populations. Epidemiology training provides analytic tools for clinical and translational research, including studies of disease etiology, prevention, and therapy.
3. Health Services Research is concerned with many aspects of health policy analysis in the public and private sectors

## GRADUATE PROGRAMS IN HEALTH RESEARCH POLICY

The Program in Epidemiology and the Program in Health Services Research are housed in the Department of Health Research and Policy. These programs offer M.S. degrees in Epidemiology and in Health Services Research. Students with an interest in pursuing advanced degrees with an emphasis on biostatistics can do so through programs offered by the Department of Statistics. Division of Biostatistics faculty participate in these programs.

For additional information, address inquiries to the Educational Coordinator, Department of Health Research and Policy, Stanford University School of Medicine, HRP Redwood Building, Room T-152F, Stanford, California 94305-5405.

## HEALTH SERVICES RESEARCH

*Director:* Mark Hlatky (Professor, Health Research and Policy, and Medicine)

*Executive Committee:* Laurence Baker (Professor, Health Research and Policy), M. Kate Bundorf (Associate Professor, Health Research and Policy), Mary Goldstein (Professor, Medicine), Mark Hlatky (Professor, Health Research and Policy, and Medicine), Douglas Owens (Professor, Medicine)

### **Participating Faculty and Staff by Department:**

*Anesthesia:* Alex Macario (Professor)

*Business:* Alain Enthoven (Professor, emeritus)

*Health Research and Policy:* Laurence Baker (Professor), Paul Barnett (Consulting Associate Professor), M. Kate Bundorf (Associate Professor), Victor Fuchs (Professor, emeritus), Trevor Hastie (Professor), Mark Hlatky (Professor), Philip Lavori (Professor), Richard Olshen (Professor), Ciaran Phibbs (Consulting Associate Professor), Joseph Selby (Consulting Professor), Robert Tibshirani (Professor)

*Law:* Henry Greeley (Professor), Daniel Kessler (Professor)

*Management Science and Engineering:* Margaret Brandeau (Professor)

*Medicine:* Jay Bhattacharya (Associate Professor), Jeremy Goldhaber-Fiebert (Assistant Professor), Mary Goldstein (Professor), Michael Gould (Associate Professor), Paul Heidenreich (Associate Professor), Mark Hlatky (Professor), Grant Miller (Assistant Professor), Douglas Owens (Professor), Wolfgang Winkelmayr (Associate Professor)

*Pediatrics:* Paul Wise (Professor)

*Psychiatry:* Rudolph Moos (Professor, emeritus)

*Sociology:* Richard Scott (Professor, emeritus)

*Program Offices:* HRP Redwood Building, Room T152F

*Mail Code:* 94305-5405

*Phone:* (650) 723-5456

*Email:* [hsr-program@med.stanford.edu](mailto:hsr-program@med.stanford.edu)

*Web Site:* <http://med.stanford.edu/hsr>

## MASTER OF SCIENCE IN HEALTH SERVICES RESEARCH

The master's degree program in Health Services Research seeks to train students in the quantitative analysis of issues in health and medical care. The program emphasizes an individually designed program of course work and completion of a master's project under the mentorship of a faculty member. The typical student in the program is either a physician who has completed residency training and is preparing for a research career, or a student with a strong background in policy analysis who wishes to focus on problems in health or medical care. Faculty interests include outcomes research, health economics, health care organization, health care access, quality of care, decision analysis, clinical guidelines, and assessment of patient preferences and quality of life.

To receive the degree, students are expected to demonstrate knowledge of issues in health services research and the quantitative skills necessary for research in this area. Students must take at least 45 units of course work and write a University thesis. The course work requirements are:

1. At least 8 units from the following group of Health Research and Policy (HRP) core courses: HRP 256, Economics of Health and Medical Care; HRP 391, Health Care Regulation; HRP 392, Analysis of Costs, Risks, and Benefits in Health Care.
2. At least 6 units of graduate-level statistics courses. The sequence of HRP 261, Intermediate Biostatistics: Analysis of Discrete Data; and HRP 262, Intermediate Biostatistics: Regression, Prediction, Survival Analysis, is strongly recommended.
3. At least 3 units of HRP 283, Health Services Research Core Seminar.
4. At least 15 units of HRP research credit from HRP 299, Directed Reading, or HRP 399, Research.
5. An additional set of approved elective courses to complete the program total of at least 45 units.

For additional information, address inquiries to the Educational Coordinator, Department of Health Research and Policy, Stanford University School of Medicine, HRP Redwood Building, Room T138C, Stanford, California 94305-5405.

## EPIDEMIOLOGY

*Director:* Victor W. Henderson (Professor, Health Research and Policy, and Neurology and Neurological Sciences)

*Core Faculty and Academic Teaching Staff:* Raymond R. Balise (Lecturer, Health Research and Policy), Gary D. Friedman (Consulting Professor, Health Research and Policy), Victor W. Henderson (Professor, Health Research and Policy, and Neurology and Neurological Sciences), Abby C. King (Professor, Health Research and Policy, and Medicine), Allison Kurian (Assistant Professor, Medicine, and Health Research and Policy), Philip Lavori (Professor, Health Research and Policy), Yvonne A. Maldonado (Professor, Pediatrics), Lorene M. Nelson (Associate Professor, Health Research and Policy), Julie Parsonnet (Professor, Medicine, and Health Research and Policy), Rita A. Popat (Clinical Assistant Professor, Health Research and Policy), Kristin L. Sainani (Clinical Assistant Professor, Health Research and Policy), Weiva Sieh (Assistant Professor, Health Research and Policy), Dee W. West (Professor, Health Research and Policy), Alice S. Whittemore (Professor, Health Research and Policy)

*Program Offices:* HRP Redwood Building, Room T152F

*Mail Code:* 94305-5405

*Phone:* (650) 723-5456

*Email:* [epiprogram@med.stanford.edu](mailto:epiprogram@med.stanford.edu)

*Web Site:* <http://www.stanford.edu/dept/HRP/epidemiology>

## MASTER OF SCIENCE IN EPIDEMIOLOGY

The Graduate Program in Epidemiology offers instruction and interdisciplinary research opportunities leading to the M.S. degree in Epidemiology. Epidemiology is the study of the distribution and determinants of illness and impairment in human populations. It is important in its own right, and epidemiologic methods are used by clinical investigators and by other scientists who conduct observational and experimental research on the identification, prevention, and treatment of human disorders.

Core and affiliated faculty come from the Department of Health Research and Policy; other Stanford University departments, and notable Bay Area research facilities. The Program has particular strengths in cancer epidemiology, cardiovascular disease epidemiology, infectious disease epidemiology, musculoskeletal disease epidemiology, neuroepidemiology, and aspects of epidemiologic methods, genetic epidemiology, and reproductive epidemiology and women's health.

The mission of the Stanford University School of Medicine is to be a premier research-intensive medical school that improves health through leadership and collaborative discoveries and innovation in patient care, education and research. With support from a NIH Clinical and Translational Science Award, the graduate program in Epidemiology fosters this mission through the training of physician investigators in techniques of clinical research. The department also considers students from other disciplines who would benefit from formal training in epidemiologic methods.

A typical student has the M.D. degree and is in the fellowship stage of his or her postgraduate training, or in an early stage of faculty development. Other students may not have prior clinical training. These may include behavioral, social, and life scientists; law students; and students with the baccalaureate degree. They may wish to bring an epidemiologic orientation to their research or practice, or they may be considering careers in epidemiology or a related discipline.

To receive the M.S. degree, students are expected to obtain a grounding in epidemiologic methods and applied biostatistics and to demonstrate research skills through the completion of a thesis. Students must complete at least 45 units of course work:

1. Epidemiologic methods: HRP 225, Design and Conduct of Clinical and Epidemiologic Studies; HRP 226, Advanced Epidemiologic and Clinical Research Methods; HRP 251, Design and Conduct of Clinical Trials.
2. Biostatistics: HRP 259, Introduction to Probability and Statistics for Epidemiology; HRP 261, Intermediate Biostatistics: Analysis of Discrete Data; HRP 262, Intermediate Biostatistics: Regression, Prediction, Survival Analysis.
3. Research seminars: HRP 236, Epidemiology Research Seminar (at least 3 units).
4. Research: HRP 399, Master thesis (at least 12 units).
5. Research conduct: Students must complete MED 255, Responsible Conduct of Research, and attend a Human Subjects Institutional Review Board meeting.
6. Additional approved selective and elective courses to complete the program total of at least 45 units.

Students are assigned a methodology mentor from the Department of Health Research and Policy, and they also select a research mentor, who may be from another department. For physicians, the research mentor is often an affiliated faculty member from the department of the student's clinical specialty.

University requirements for the M.S. degree are described in the "Graduate Degrees" section of this bulletin. Other programmatic requirements are in *Graduate Program in Epidemiology, Information and Guidelines*, available from the educational coordinator in the Department of Health Research and Policy.

## IMMUNOLOGY

*Chair, Executive Committee for the Immunology Program:* Patricia Jones (Professor, Biology)

*Director for Immunology Program:* Olivia Martinez (Professor, Research, Surgery, Transplantation)

### **Participating Departments and Faculty:**

*Biology:* Patricia P. Jones (Professor)

*Genetics:* Leonard A. Herzenberg (Professor, emeritus), Leonore A. Herzenberg (Professor, Research),

*Medicine/Blood and Bone Marrow Transplantation Program:* Robert Negrin (Professor), David Miklos (Assistant Professor), Judith Shizuru (Associate Professor)

*Medicine/Cardiovascular Medicine:* Joseph Wu (Assistant Professor, and Radiology and Institute for Stem Cell and Regenerative Medicine)

*Medicine/Gastroenterology and Hepatology:* Aida Habtezion (Assistant Professor)

*Medicine/Hematology:* Calvin Kuo (Associate Professor, and Chemical Systems Biology), Peter Lee (Associate Professor), Ravi Majeti (Assistant Professor, and Institute for Stem Cell and Regenerative Medicine)

*Medicine/Immunology and Rheumatology:* C. Garrison Fathman (Professor), Jorg Goronzy (Professor), William Robinson (Associate Professor), Samuel Strober (Professor), Paul J. Utz (Associate Professor), Cornelia Weyand (Professor)

*Medicine/Infectious Diseases:* Robert Shafer (Associate Professor, Research, and Pathology)

*Medicine/Oncology:* Ash Alizadeh (Assistant Professor), Gilbert Chu (Professor, and Biochemistry), Dean Felsher (Associate Professor, and Pathology), Ronald Levy (Professor), Shoshana Levy (Professor, Research)

*Medicine/Pulmonary and Critical Care Medicine:* Mark Nicolls (Associate Professor)

*Microbiology and Immunology:* John Boothroyd (Professor), Chang-Zheng Chen (Assistant Professor), Yueh-Hsiu Chien (Professor), Mark M. Davis (Professor, and Director, Institute for Immunity, Transplantation and Infection), Hugh McDavitt (Professor,emeritus), Garry P. Nolan (Professor), David Schneider (Associate Professor)

*Molecular and Cellular Physiology:* K. Christopher Garcia (Professor, and Structural Biology), Richard S. Lewis (Professor)

*Neurology and Neurological Sciences:* May Han (Assistant Professor), Lawrence Steinman (Professor, and Pediatrics), Tony Wyss-Coray (Associate Professor, Research)

*Neurosurgery:* Theo Palmer (Associate Professor)

*Otolaryngology/Head and Neck Surgery (ENT):* John B. Sunwoo (Assistant Professor)

*Pathology:* Eugene C. Butcher (Professor), Michael Cleary (Professor), Gerald R. Crabtree (Professor, and Developmental Biology), Edgar G. Engleman (Professor, and Medicine/Immunology and Rheumatology), Magali Fontaine (Assistant Professor), Stephen Galli (Professor and Chair), Sara Michie (Professor), Raymond A. Sobel (Professor), Irving Weissman (Professor, and Director, Stem Cell Institute)

*Pediatrics:* Ann Arvin (Professor, and Microbiology and Immunology), Atul Butte (Associate Professor, Immunology and Rheumatology, and Computer Science), Manish Butte (Assistant Professor), Christopher Contag (Professor, Research, and Microbiology and Immunology, and Radiology), David B. Lewis (Professor), Elizabeth Mellins (Associate Professor), Kari Nadeau (Assistant Professor), Minnie Sarwal (Professor)

*Psychiatry and Behavioral Sciences:* Firdaus Dhabhar (Associate Professor), Emmanuel Mignot (Professor)

*Structural Biology:* Peter Parham (Professor, and Microbiology and Immunology)

*Surgery/Multi-Organ Transplantation:* Sheri Krams (Associate Professor, Research), Olivia Martinez (Professor, Research)

*Urology:* Michael Hsieh (Assistant Professor)

\* Recalled to active duty

Mail Code: 94305-5422

Phone: (650) 725-5076

Email: mopan@stanford.edu

Web Site: <http://immunol.stanford.edu>

Courses offered by the Immunology Program are listed under the subject code IMMUNOL on the *Stanford Bulletin's* ExploreCourses web site.

## MASTER OF SCIENCE IN IMMUNOLOGY

Students in the Ph.D. program in Immunology may apply for an M.S. degree in Immunology only under special circumstances, assuming completion of appropriate requirements. Students must complete:

- At least 45 units of academic work, all of which must be in courses at or above the 100 level, 36 units of which must be at or above the 200 level.
- 2-3 quarters of graduate research (IMMUNOL 399), consisting of rotations in the labs of three faculty members.
- Course work in Immunology as follows:
  - Basic Immunology. For graduate students, BIO 230A, Molecular and Cellular Immunology Literature Review; for medical students, IMMUNOL 205, Immunology in Human Health and Disease or equivalent
  - Advanced Immunology such as IMMUNOL 201, 202, and 203
  - IMMUNOL 215. Principles of Biological Technologies, or another techniques course by permission
  - In addition, the student may take one elective course. Some possible electives are:
    - MPHA 210. Signal Transduction Pathways and Networks
    - SBIO 241. Biological Macromolecules
    - CBIO 241. Molecular, Cellular, and Genetic Basis of Cancer
    - DBIO 210. Developmental Biology.
- Students have the option to select from two of the following three courses in the first year:
  - GENE 203. Advanced Genetics
  - BIO 214. Advanced Cell Biology

- MI 210. Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites

- Graduate-level biochemistry and molecular biology (BIOC 220).
- Course work in IMMUNOL 311, Seminar in Immunology, and IMMUNOL 311A, Seminar Discussion in Immunology.
- Participation in the Immunology journal club (IMMUNOL 305), and attendance at the Immunology seminar series and at the annual Stanford Immunology Scientific Conference.
- First Year Rotations Presentations, mid-July. Students present on one out of three lab rotations.
- Students must submit a master's thesis paper on one of their rotations. This requirement may be waived under special circumstances.

## DOCTOR OF PHILOSOPHY IN IMMUNOLOGY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

The Immunology Program offers instruction and research opportunities leading to a Ph.D. in Immunology. The goal of the program is to develop investigators who have a solid foundation in Immunology and related sciences to carry out innovative research. The program features a flexible choice of courses and seminars combined with extensive research training in the laboratories of participating Immunology faculty.

Students applying to the program typically have an undergraduate major in biological sciences, but majors in other areas are acceptable if the applicants have had sufficient course work in biology and chemistry. Formal application should be made by December 1st. Applications are evaluated by the Immunology predoctoral committee based upon: GRE scores; grades; evidence of research experience; letters of recommendation, including letters from research sponsor(s); and commitment to a career in biomedical research. Subject tests are not required. Interested Stanford medical students are welcome to apply to the program and should submit a formal application by December 1.

Students admitted to the program are offered financial support covering tuition, a living stipend, insurance coverage, and an allowance for books/travel. Applicants are urged to apply for independent fellowships such as from the National Science Foundation. Fellowship applications are due in November of the year prior to matriculation in the graduate program, but Immunology graduate students may continue to apply for outside fellowships after matriculation. The PhD Program has a limited number of department-funded slots for trainees such that students who have been awarded an outside fellowship are also encouraged to apply. On matriculation, each student is assisted by a first-year advising committee in selecting courses and lab rotations in the first year and in choosing a lab for the dissertation research. Once a dissertation adviser has been selected, a dissertation committee including the dissertation adviser and two additional Immunology faculty, is constituted to guide the student during the dissertation research. The student must meet with the dissertation committee at least once a year.

Candidates for Ph.D. degrees at Stanford must satisfactorily complete a program of study that includes 135 units of graduate course work and research. At least 3 units must be taken with each of four different Stanford faculty members. All core course requirements must be completed by the end of the second year.

*Requirements for the Ph.D. degree in Immunology include—*

- Training in biology and cognate disciplines equivalent to that provided by the undergraduate Biology major at Stanford.
- Completion of the following courses (or their equivalents from undergraduate work):
  - Basic Immunology (BIO 230A, Molecular and Cellular Immunology Literature Review)
  - Advanced Immunology (IMMUNOL 201, 202, 203)
  - Two of the following three courses: Gen 203. Advanced Genetics, Bio 214. Advanced Cell biology, MI 210.

- Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites
- d. Chemistry of Biological Processes (BIOC 220)
  - e. Biostatistics (BIO 141 or STATS 141)
  - f. Principles of Biological Technologies (IMMUNOL 215) or another techniques course by permission
  - g. One elective course; suggested courses include: MPHA 210. Signal Transduction Pathways and Networks, SBIO 241. Biological Macromolecules, CBIO 241. Cancer Biology, DBIO 210. Developmental Biology
  - h. MED 255. Responsible Conduct in Science
  - i. IMMUNOL 305. Immunology Journal Club
3. Prior to enrolling for Autumn Quarter, first-year students are required to read Janeway's *Immunobiology*, 8th edition, in preparation for their graduate studies. First-year students are required to take both the IMMUNOL 311, Seminar in Immunology, and the companion course, IMMUNOL 311A, Seminar Discussion in Immunology, and participate in IMMUNOL 305, Immunology Journal Club.
  4. Students in their second year and above must participate in the IMMUNOL 311, Seminars in Immunology (4:00 pm, Tuesdays) and may opt to take the companion course, IMMUNOL 311A, in which students read the papers of visiting seminar speakers and meet to discuss the material. Students who have not yet achieved TGR status must register for 1 unit for IMMUNOL 311.
  5. Participation (through regular attendance and oral presentation) in the Immunology journal clubs for the first three years (IMMUNOL 305).
  6. Elective courses as agreed upon by the student, adviser, and advisory committee. Electives may be chosen from graduate courses and seminars in any of the biomedical science departments and programs.
  7. Students must complete three one quarter rotations in the first year. Medical students who are accepted into the Ph.D. program must also complete three rotations. First year students, including MSTP and MD/PhD students, present one out of their three lab rotations (First Year Rotation Presentation, mid-July). The faculty advising and feedback portion of the First Year Rotation Presentation also is an important opportunity for the Predoctoral Committee to give critical advice and comments to students in choosing mentors and relevant courses.
  8. The students complete their Qualifying Examination before December 17th, the Autumn Quarter of the Second Year. Students must submit to a general oral examination of broad fields in immunology and defend a research proposal on their dissertation research.
  9. Students may apply for Ph.D. candidacy upon successful completion of the First Year Rotation Presentations and the Qualifying Examination -- General Oral examination and the Research Proposal. Administration and evaluation of these requirements leading to Ph.D. candidacy is the responsibility of the Predoctoral Committee; the student's dissertation committee is responsible for advising the student through the research and other elective courses as needed towards the completion of the Ph.D. dissertation.
  10. Teaching assistantships in two Immunology courses (IMMUNOL 290, Teaching in Immunology). Before fulfilling their teaching assistantships, Immunology graduate students are required to attend a teaching assistantship orientation offered at the beginning of every quarter by the Center for Teaching and Learning. MSTP students may submit one of their medical school TAs as partial fulfillment of the TA requirement for the Ph.D. in Immunology.
  11. Students are required to attend the annual Stanford Immunology Scientific Conference. Students are required to give one poster and one scientific presentation at these annual Stanford Immunology scientific conferences. Fourth-year and above students present their current research to fellow students and faculty in a monthly forum, The Next Generation.

12. Students must pass the University oral examination on the dissertation research, which is to be taken only after the student has substantially completed the research. The examination is preceded by a public seminar in which the candidate presents his/her research.
13. A Ph.D. dissertation, resulting from independent investigation that constitutes a contribution to knowledge in the area of immunology but be submitted to and approved by the Thesis Committee.

## MICROBIOLOGY AND IMMUNOLOGY

*Emeriti: (Professors)* Stanley Falkow, Hugh O. McDevitt, Edward S. Mocarski, Sidney Raffel, Leon T. Rosenberg

*Chair:* Peter Sarnow

*Associate Chair:* Stanley Falkow

*Professors:* Ann Arvin, Helen Blau, John C. Boothroyd, Yueh-Hsiu Chien, Mark M. Davis, Stephen J. Galli, Harry B. Greenberg, Karla Kirkegaard, A. C. Matin, Garry Nolan, Peter Parham, Phillip Pizzo, Charles Prober, David Relman, Peter Sarnow, Gary K. Schoolnik, Lucy S. Tompkins

*Associate Professors:* Matthew Bogyo, Christopher Contag, David Schneider, Julie Theriot

*Assistant Professors:* Manuel Amieva, Chang-Zheng Chen, Denise Monack, Upinder Singh, Justin Sonnenburg

*Acting Assistant Professor:* Jan Carette

*Associate Professor (Teaching):* Robert D. Siegel

Institute for Immunity, Transplantation and Infection

Director, Human Immune Monitoring Center and Senior Research Scientist: Holden Maecker

*Department Offices:* D300 Fairchild Building, 299 Campus Drive

*Mail Code:* 94305-5124

*Phone:* (650) 725-8541

*Email:* micro\_immuno@lists.stanford.edu

*Web Site:* <http://microimmuno.stanford.edu>

Courses offered by the Department of Microbiology and Immunology are listed under the subject code MI on the *Stanford Bulletin's* ExploreCourses web site.

## GRADUATE PROGRAMS IN MICROBIOLOGY AND IMMUNOLOGY

The Department of Microbiology and Immunology offers a program of training leading to the Ph.D. degree, as well as research training, courses, and seminars for medical students and postdoctoral fellows. Research interests focus on two broad areas: host/parasite interactions, and the function of the immune system. Laboratories investigate mechanisms of pathogenesis and the physiology of viruses, bacteria, and protozoan parasites, as well as the lymphocyte function in antigen recognition, immune response, and autoimmunity.

## MASTER OF SCIENCE

A regular M.S. program is not offered, although this degree is awarded under special circumstances. Candidates for master's degrees are expected to have completed the preliminary requirements for the B.S. degree, or the equivalent. In addition, the candidate is expected to complete 45 quarter units of work related to microbiology; at least 25 of these units should concern research devoted to a thesis. The thesis must be approved by at least two members of the department faculty.

## DOCTOR OF PHILOSOPHY IN MICROBIOLOGY AND IMMUNOLOGY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

*Application, Admission, and Financial Aid*—Prospective Ph.D. candidates should have completed a bachelor's degree in a discipline of biology or chemistry, including course work in biochemistry, chemistry, genetics, immunology, microbiology, and molecular biology. The deadline for receipt of applications with all supporting materials is December 1.

Applicants must file a report of scores on the general subject tests of the Graduate Record Examination (GRE). It is strongly recommended that the GRE be taken before October so that scores are available when applications are evaluated.

In the absence of independent fellowship support, entering predoctoral students are fully supported with a stipend and tuition award. Highly qualified applicants may be honored by a nomination for a Stanford Graduate Fellowship. Successful applicants have been competitive for predoctoral fellowships such as those from the National Science Foundation.

*Program for Graduate Study*—The Ph.D. degree requires course work and independent research demonstrating an individual's creative, scholastic, and intellectual abilities. On entering the department, students meet an advisory faculty member; together they design a timetable for completion of the degree requirements. Typically, this consists of first identifying gaps in the student's undergraduate education and determining courses that should be taken. Then, a tentative plan is made for two to four lab rotations (one rotation per quarter). During the first year of graduate study in the department, each student also takes six or seven upper-level (200-series) courses. Three of these courses are requirements of the department: MI 215, Principles of Biological Techniques; MI 230, Medical Microbiology and Infectious Diseases; and MI 210, Advanced Pathogenesis of Bacteria, Viruses, and Eukaryotic Parasites. Three courses are part of the core curriculum that is required of many graduate students in Stanford Biosciences: BIO 203 /DBIO 203 /GENE 203, Advanced Genetics; BIO 230, Molecular and Cellular Immunology; and BIO 214/BIOC 224, Advanced Cell Biology.

In Autumn Quarter of the second year, a research proposal based on the student's own thesis topic is defended to the thesis committee. In Spring Quarter of the second year, each student defends orally a formal research proposal on a topic outside the intended thesis project. This qualifying examination proposal is due to the graduate program steering committee by May 1. Based on successful performance on this proposal, the student is admitted to candidacy. Teaching experience and training are also part of the graduate curriculum. Graduate students are required to act as teaching assistants for two courses. In addition, first- and second-year graduate students are required to participate in a bi-weekly journal club.

## MOLECULAR AND CELLULAR PHYSIOLOGY

*Chair:* Brian K. Kobilka

*Professors:* Axel T. Brunger, K. Christopher Garcia, Brian K. Kobilka, Richard S. Lewis, W. James Nelson, Stephen J. Smith, Thomas C. Sudhof, William Weis

*Associate Professors:* John Huguenaud, V. Daniel Madison, Merritt C. Maduke, Miriam B. Goodman

*Assistant Professors:* Maxence V. Nachury

*Courtesy Associate Professors:* Stefan Heller, Anthony J. Ricci

*Courtesy Assistant Professor:* Richard J. Reimer

*Department Offices:* Beckman Center, B100

*Mail Code:* 94305-5345

*Phone:* (650) 725-7554

*Email:* schantae@stanford.edu

*Web Site:* <http://mcp.stanford.edu>

Courses offered by the Department of Molecular and Cellular Physiology are listed under the subject code MCP on the *Stanford Bulletin's* ExploreCourses web site.

The Department of Molecular and Cellular Physiology is located in the Beckman Center for Molecular and Genetic Medicine.

A central goal of physiology in the post-genomic era is to understand how thousands of encoded proteins serve to bring about the highly coordinated behavior of cells and tissues. Research in the department approaches this goal at many levels of organization, ranging from single molecules and individual cells to multicellular systems and the whole organism. The faculty share common interests in the molecular mechanisms of cell signaling and behavior, with a special focus on structure/function analysis of ion channels and G-protein coupled receptors, and their roles at the cellular, organ, and whole-organism levels; the molecular basis of sensory transduction, synaptic transmission, plasticity and memory; the role of ion channels and calcium in controlling gene expression in neural and immune cells; and the regulation of vesicle trafficking and targeting, cell polarity, and cell-cell interactions in the nervous system and in epithelia. Research programs employ a wide range of approaches, including molecular and cell biology, biochemistry, genetics, biophysics, x-ray crystallography and solution NMR, electrophysiology, and *in vitro* and *in vivo* imaging with confocal and multi-photon microscopy.

### GRADUATE PROGRAMS IN MOLECULAR AND CELLULAR PHYSIOLOGY

The department offers required and elective courses for students in the School of Medicine and is also open to other qualified students with the consent of the instructor. Training of medical, graduate, and postdoctoral students is available. The program offers a course of study leading to the Ph.D. degree. No B.S. is offered, and an M.S. is offered only in the unusual circumstance where a student completes the course work, rotation, and the written section of the qualifying exam, but is unable to complete the requirements for the Ph.D.

### DOCTOR OF PHILOSOPHY IN MOLECULAR AND CELLULAR PHYSIOLOGY

Students with undergraduate or master's degrees who have completed a year each of college chemistry (including lectures in organic and physical chemistry), physics, calculus, and biology are considered for admission to graduate study. Applicants submit a report of scores from the Graduate Record Examination (verbal, quantitative, analytical, and an advanced subject test in one of the sciences) as part of the application. Students who do not speak English as their native language must submit scores from TOEFL unless waived by Graduate Admissions.

Study toward the Ph.D. is expected to occupy five years, including summers. A minimum of six quarter-long courses is required. These include four graduate-level courses (200-300 series) and a choice of two out of these three courses: MCP 221, MCP 258, and MCP 256. Students are also required to take the Molecular and Cellular Physiology Seminar/Research In Progress series. Each student presents a talk on research in progress to the department at least every other year, starting their second year. Grades for course work must be a minimum of 'B-', and at least two grades equal to 'A-' or above are necessary but not sufficient for continuation in the program.

*Qualifying Examination*—At the end of the second year in residence as a graduate student, each Ph.D. candidate presents a written thesis proposal to be defended at an oral comprehensive examination. The examinations may be taken only after all course work has been completed by the required standard. Students undertake individual research studies as early as possible after consultation with their preceptor. Upon passing this exam, the student is advanced to candidacy for the Ph.D.

*Dissertation and University Oral Examination*—The results of independent, original work by the students are presented in a

dissertation. The oral examination is largely a defense of the dissertation.

**Advisers and Advisory Committees**—A graduate advisory committee, currently professors Kobilka, Lewis, Nachury and Madison, advises students during the period before the formation of their qualifying committees.

**Financial Aid**—Students may be funded by their advisers' research grants, by training grants, by department funds, or by extramural funds. Students are encouraged to obtain funding from outside sources such as NIH and NSF.

## NEUROBIOLOGY

**Emeritus:** Denis Baylor, Uel J. McMahan, Eric Shooter, Lubert Stryer

**Chair:** Ben Barres

**Professors:** Eric I. Knudsen, William T. Newsome

**Associate Professors:** Thomas Clandinin, Ricardo Dolmetsch, Tirin Moore, Jennifer Raymond

**Assistant Professor:** Stephen Baccus

**Department Offices:** Fairchild Building, Second Floor

**Mail Code:** 94305-5125

**Web Site:** <http://neurobiology.stanford.edu>

Courses offered by the Department of Neurobiology are listed under the subject code NBIO on the *Stanford Bulletin's* ExploreCourses web site.

## GRADUATE PROGRAM IN NEUROBIOLOGY

Graduate students in the Department of Neurobiology obtain the Ph.D. degree through the interdepartmental Neurosciences Ph.D. program. Accepted students receive funding for tuition and a living stipend. Applicants should familiarize themselves with the research interests of the faculty and, if possible, indicate their preference on the application form which is submitted directly to the Neurosciences Program.

Medical students also are encouraged to enroll in the Ph.D. program. The requirements of the Ph.D. program are fitted to the interests and time schedules of the student. Postdoctoral training is available to graduates holding Ph.D. or M.D. degrees, and further information is obtained directly from the faculty member concerned.

Research interests of the department include information processing in vertebrate retina; structure, function, and development of auditory and visual systems; development and regeneration in the central and peripheral nervous system; neural mechanisms mediating higher nervous system functions, including perception, learning, attention and decision making.

## NEUROSCIENCES

**Director:** John R. Huguenard (Professor, Neurology and Neurological Sciences)

**Committee:** Katrin Andreasson, Paul S. Buckmaster, Thomas Clandinin, Luis de Lecea, Craig Garner, John R. Huguenard, Fei-Fei Li, Merritt Maduke, Samuel McClure, Anthony Ricci, Carla Shatz

### Participating Faculty:

**Anesthesia:** Rona Giffard (Professor), M. Bruce MacIver (Professor, Research), Sean Mackey (Associate Professor), David Yeomans (Associate Professor)

**Applied Physics:** Mark Schnitzer (Associate Professor)

**Bioengineering:** Kwabena Boahen (Associate Professor), Jennifer Cochran (Assistant Professor), Karl Deisseroth (Associate Professor), Scott Delp (Professor), Michael Lin (Assistant Professor), Matthew Scott (Professor)

**Biology:** Marcus Feldman (Professor), Russell D. Fernald (Professor), William F. Gilly (Professor), H. Craig Heller

(Professor), Ron Kopito (Professor), Liquan Luo (Professor), Susan McConnell (Professor), Robert M. Sapolsky (Professor), Mark Schnitzer (Associate Professor), Carla Shatz (Professor), Kang Shen (Associate Professor), Stuart Thompson (Professor)

**Chemical and Systems Biology:** Tobias Meyer (Professor), Daria Mochly-Rosen (Professor)

**Comparative Medicine:** Paul S. Buckmaster (Associate Professor), Corinna Darian-Smith (Associate Professor), Shaul Hestrin (Associate Professor)

**Computer Science:** Fei-Fei Li (Assistant Professor)

**Developmental Biology:** Ben Barres (Professor), Seung Kim (Professor), David Kingsley (Professor), Matthew P. Scott (Professor)

**Electrical Engineering:** Krishna Shenoy (Associate Professor)

**Genetics:** Anne Brunet (Associate Professor), Matthew Scott (Professor)

**Microbiology and Immunology:** Helen Blau (Professor)

**Molecular and Cellular Physiology:** Axel Brunger (Professor), Miriam B. Goodman (Associate Professor), Brian Kobilka (Professor), Richard S. Lewis (Professor), Daniel V. Madison (Associate Professor), Merritt C. Maduke (Associate Professor), Stephen Smith (Professor), Thomas Sudhof (Professor), Richard Tsien (Professor)

**Neurobiology:** Stephen Baccus (Assistant Professor), Ben Barres (Professor), Tom Clandinin (Associate Professor), Ricardo Dolmetsch (Associate Professor), Eric I. Knudsen (Professor), U. J. McMahan (Professor), Tirin Moore (Assistant Professor), William T. Newsome (Professor), Jennifer Raymond (Associate Professor), Carla Shatz (Professor)

**Neurology and Neurological Sciences:** Katrin Andreasson (Associate Professor), Ben Barres (Professor), Helen Bronte-Stewart (Associate Professor), Paul Buckmaster (Associate Professor), Robert S. Fisher (Professor), Michael Greicius (Assistant Professor), May Han (Assistant Professor), Ting-Ting Huang (Associate Professor, Research), John A. Huguenard (Professor), Frank Longo (Professor), Josef Parvizi (Assistant Professor), Kathleen Poston (Assistant Professor), David A. Prince (Professor), Thomas A. Rando (Professor), Lawrence Recht (Professor), Richard Reimer (Associate Professor), Robert M. Sapolsky (Professor), Lawrence Steinman (Professor), Tony Wyss-Coray (Associate Professor, Research), Yanmin Yang (Associate Professor)

**Neurosurgery:** Marion Buckwalter (Assistant Professor), Pak H. Chan (Professor), Theo Palmer (Associate Professor), Giles Plant (Associate Professor), Gary K. Steinberg (Professor), Heng Zhao (Assistant Professor, Research)

**Ophthalmology:** Yaping Joyce Liao (Assistant Professor)

**Otolaryngology:** Stefan Heller (Professor), Mirna Mustapha (Assistant Professor), Anthony Ricci (Professor)

**Pathology:** Isabella Graef (Assistant Professor), Bingwei Lu (Associate Professor), Raymond Sobel (Professor), Marius Wernig (Assistant Professor)

**Pediatrics:** Heidi Feldman (Professor), Michael Lin (Assistant Professor), Anna Penn (Assistant Professor), Lawrence Steinman (Professor)

**Philosophy:** Patrick Suppes (Professor, emeritus)

**Psychiatry and Behavioral Sciences:** Lu Chen (Associate Professor), Amit Etkin (Assistant Professor), Karl Deisseroth (Associate Professor), Luis de Lecea (Associate Professor), Firdaus Dhabhar (Associate Professor), Craig Garner (Professor), Terrence A. Ketter (Professor), David Lyons (Associate Professor, Research), Robert C. Malenka (Professor), Vinod Menon (Professor, Research), Emmanuel Mignot (Professor), Karen Parker (Assistant Professor), Natalie Rasgon (Professor), Allan L. Reiss (Professor), Edith Sullivan (Professor, Research), Jamie Zeitzer (Assistant Professor)

**Psychology:** Lera Boroditsky (Assistant Professor), Ian Gotlib (Professor), Kalanit Grill-Spector (Associate Professor), James J. Gross (Professor), Brian Knutson (Associate Professor), James McClelland (Professor), Samuel McClure (Assistant Professor), Anthony Norcia (Professor), Anthony Wagner

(Associate Professor), Brian Wandell (Professor), Jeffrey J. Wine (Professor)

*Radiology:* Gary H. Glover (Professor)

*Structural Biology:* U. J. McMahan (Professor, emeritus)

*Program Offices:* 1215 Welch Road, Modular B, #46

*Mail Code:* 94305-5400

*Phone:* (650) 723-9855

*Web Site:* [http://neuroscience.stanford.edu/education/phd\\_program](http://neuroscience.stanford.edu/education/phd_program)

Courses offered by the Neurosciences Program are listed under the subject code NEPR on the *Stanford Bulletin's* ExploreCourses web site.

## DOCTOR OF PHILOSOPHY IN NEUROSCIENCES

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

The interdepartmental Neurosciences Program offers instruction and research opportunities leading to a Ph.D. in Neurosciences. The requirements for a Ph.D. degree follow those of the University and in addition are tailored to fit the background and interests of the student. Accepted students receive an award covering tuition, a basic health plan, and a living stipend. Qualified applicants should, where possible, apply for the predoctoral fellowships in open competition, especially those from the National Science Foundation. December 2 is the deadline for receipt in the Neurosciences Program office of applications with all supporting material.

Applicants should familiarize themselves with the research interests of the faculty and indicate their preferences clearly on the application form.

Since students enter with differing backgrounds, and the labs in which they may elect to work cover several different disciplines, the specific program for each student is developed individually with an advisory committee. All students are required to complete the basic introduction to neurobiology (NBIO 206 or equivalent). All students must complete nine quarters of Professional Development and Integrity in Neuroscience (NBIO 300). Lastly, students must also take five courses within (and at least one course in each of) the following three areas:

1. Molecular, Cellular and Developmental Neuroscience
2. Systems, Computational, Cognitive and Behavioral Neuroscience
3. Translational Neuroscience

Courses from outside the neuroscience core can satisfy the elective requirement.

Students usually rotate through several labs during their first year, although they may choose to begin thesis research on entry. After the first rotation, students may rotate both within and outside the Neurosciences Program. Required course work should be completed by the end of the second year. Passing of a comprehensive oral preliminary examination given by the student's advisory committee is required for admission to Ph.D. candidacy. This examination is usually taken by the end of the second year. The student is required to present a Ph.D. dissertation, which is the result of independent investigation contributing to knowledge in an area of neuroscience, and to defend his or her dissertation in a University oral examination, which includes a public seminar.

Medical students may participate in this program provided they meet the prerequisites and satisfy all the requirements of the graduate program as listed above. The timing of the program may be adjusted to fit their special circumstances.

## OBSTETRICS AND GYNECOLOGY

*Chair:* Jonathan S. Berek

Courses offered by the Department of Obstetrics and Gynecology are listed under the subject code OBGYN on the *Stanford Bulletin's* ExploreCourses web site.

The Department of Obstetrics and Gynecology does not offer degrees; however, qualified medical, graduate, or undergraduate students with an interest in basic research in reproductive biology may apply to arrange individual projects under the supervision of the faculty. The focus for the Division of Reproductive Biology is the study of the molecular and cellular biology of male and female reproductive organs.

## PATHOLOGY

*Emeriti: (Professor)* Ronald Dorfman, Richard L. Kempson; *(Professor, Clinical)* Lawrence F. Eng, Luis Fajardo, Heinz Furthmayr, F. Carl Grumet, Jon Kosek; *(Associate Professor)* P. Joanne Cornbleet

*Chair:* Stephen J. Galli

*Professors:* Daniel Arber, Ellen Jo Baron, Gerald J. Berry, Eugene C. Butcher, Michael L. Cleary, Gerald R. Crabtree, Edgar G. Engleman, Andrew Fire, Steven Fount, Stephen J. Galli, Lawrence Tim Goodnough, Michael R. Hendrickson, Joseph S. Lipsick, Donald P. Regula, Robert V. Rouse, Richard K. Sibley, Raymond Sobel, Howard H. Sussman, Dolly Tyan, Matt van de Rijn, Hannes Vogel, Teresa S. F. Wang, Roger A. Warnke, Irving L. Weissman, James Zehnder

*Associate Professors:* Jeffrey D. Axelrod, Matt Bogyo, Athena M. Cherry, Andrew Connolly, Tina Cowan, James D. Faix, Dean Felsher, Susan A. Galel, Sharon M. Geaghan, John P. Higgins, Neeraja Kambham, Christina Kong, Teri A. Longacre, Sara A. Michie, Yasodha Natkunam, Bruce Patterson, Jonathan R. Pollack, Iris Schrijver, Arend Sidow

*Assistant Professors:* Niaz Banaei, Raffick Bowen, Magali Fontaine, Tracy George, Dita Gratzinger, F. Kim Hazard, Kristin Jensen, Bingwei Lu, Jesse McKenney, Erich Schwartz, Uma Sundram, Marius Wernig, Robert West

*Courtesy Professors:* Donna Bouley, Bertil Glader, Lucy Tompkins

*Courtesy Associate Professor:* Robert Shafer

*Clinician Educators:* Susan Atwater, David Bingham, Barbara Egbert, Christopher Gonzales, Terri Haddix, Jinah Kim, Amy McKenney, Melanie Manning, Reetesh Pai, Run Shi, Brent Tan, Maurene Viele

*Instructors:* Ching-Cheng Chen, Neng Chen, Franklin Mullins, Chris Park, Adrian Piliponsky

*Adjunct Clinical Faculty:* Robert Archibald, Jerome S. Burke, Glenn Cockerham, Stephen Shi-Hua Chen, Seth Haber, Maie K. Herrick, Paul W. Herrmann, Anthony Le, Steven Long, Charles Lombard, Judy Melinek, Gregory Moes, Joseph O'Hara, Girish Putcha, Mahendra Ranchod, Thomas W. Rogers, Joshua Sichel

*Department Offices:* Medical Center, Lane Building, L-235

*Mail Code:* 94305-5324

*Phone:* (650) 723-5255

*Web Site:* <http://pathology.stanford.edu>

Courses offered by the Department of Pathology are listed under the subject code PATH on the *Stanford Bulletin's* ExploreCourses web site.

## PROGRAMS OF STUDY IN PATHOLOGY

The Department of Pathology offers advanced courses in aspects of pathology. The department does not offer advanced degrees in pathology, but qualified graduate students who are admitted to department-based or interdepartmental graduate

programs may elect to pursue their thesis requirements in the department's research laboratories. The discipline of pathology has served as a bridge between the preclinical and clinical sciences and is concerned with the application of advances in the basic biological sciences, both to the diagnosis of human disease and the elucidation of the mechanisms of normal molecular, cellular, and organ structure and function that manifest themselves in clinical disease. Accordingly, the department's research interests extend from fundamental molecular biology to clinical-pathological correlations, with an emphasis on experimental oncology.

Investigation in the department includes basic studies in areas using molecular biological, biochemical, and genetic cell biological techniques: DNA replication in yeast and cultured eukaryotic cells, cell cycle control in animal cells and yeast, identification and pathogenetic role of chromosomal aberrations in human malignancies and mechanisms of activation of oncogenes in human and animal cells, lymphocyte and neutrophil-interactions with endothelial cells, cell type specification and signal transduction pathways leading to specific gene expression or modulation of cytoskeletal behavior; cytoskeletal architecture, cell-matrix interaction, developmental biology of hematopoietic stem cells and thymus, regulation of the immune system, mechanisms of immune and other responses in the central nervous system, and neuro-degenerative diseases. Various studies focus on the development of novel diagnostic and immunotherapeutic treatment modalities and techniques for solid tumors, lymphomas, HIV, and genetic diseases. Research training in all of these areas is available for qualified medical and graduate students by individual arrangement with the appropriate faculty member. A summary of the research interests of the department faculty is available at <http://pathology.stanford.edu>.

## RADIATION ONCOLOGY

*Emeriti:* Malcolm A. Bagshaw, Peter Fessenden, Don R. Goffinet, George M. Hahn, Kendrick Smith

*Chair:* Richard T. Hoppe

*Professors:* J. Martin Brown, Sarah S. Donaldson, Amato J. Giaccia, Steven L. Hancock, Richard T. Hoppe, Quynh-Thu Le, Daniel S. Kapp, Steven A. Liebel

*Associate Professors:* Iris C. Gibbs, Paul Keall, Christopher R. King, Susan J. Knox, Gary Luxton, Lei Xing

*Assistant Professors:* Laura Attardi, Daniel Chang, Nicholas Denko, Edward Graves, Albert C. Koong

*Consulting Professor:* Robert M. Sutherland

Courses offered by the Department of Radiation Oncology are listed under the subject code RADO on the *Stanford Bulletin's* ExploreCourses web site.

Radiation Oncology focuses on the use of radiation for cancer therapy and research. The department does not offer degrees; however, its faculty teach courses open to medical students, graduate students, and undergraduates. The department also accepts students in other curricula as advisees for study and research. Graduate students in Biophysics and Cancer Biology may perform their thesis research in the department. Undergraduates may arrange individual research projects under supervision of faculty.

At the present time, the major areas of basic research investigation in the department include: DNA repair in mammalian cells after ionizing irradiation; studies of the mechanism of tumor hypoxia in animal tumors; development of new anti-cancer drugs to exploit tumor hypoxia; cytogenetic and molecular methods of predicting the sensitivity of individual tumors to cancer therapy; radiolabeled monoclonal antibodies for cancer detection and treatment; studies of oxygen levels in human tumors using polarographic electrodes; clinical trials of a new hypoxic cytotoxic agent (tirapazamine); studies of the late effects of cancer therapy; and techniques of conformal and intensity modulated radiation therapy.

## RADIOLOGY

*Emeriti (Professors):* Herbert L. Abrams, Malcolm Bagshaw, Ronald Castellino, Barton Lane, Gerald Friedland, David A. Goodwin, Henry H. Jones, William Marshall, I. Ross McDougall, Robert E. Mindelzun, William H. Northway, Bruce R. Parker, Lewis Wexler, Leslie M. Zatz

*Chair:* Gary M. Glazer

*Professors:* Scott W. Atlas, Richard A. Barth, Christopher F. Beaulieu, Michale Federle, Sanjiv Sam Gambhir, Gary M. Glazer, Gary H. Glover, Michael L. Goris, Robert J. Herfkens, Dave Hovsepian, Debra M. Ikeda, R. Brooke Jeffrey, Ann Leung, Michael Marks, Michael Moseley, Sandy Napel, Matilde Nino-Murcia, Norbert J. Pelc, Allan Reiss, Geoffrey Rubin, Brian Rutt, George Segall, F. Graham Sommer, Daniel Spielman

*Professors (Research):* R. Kim Butts-Pauly

*Associate Professors:* Francis Blankenberg, Francis P. Chan, Bruce Daniel, Terry Desser, Huy M. Do, Nancy Fischbein, Dominik Fleischmann, Garry E. Gold, Lawrence Hofmann, Beverley Newman, Eric W. Olcott, Kathryn J. Stevens, Daniel Y. Sze

*Associate Professors (Research):* Roland Bammer, Rebecca Fahrig, Sylvia Plevritis

*Assistant Professors:* Sandip Biswal, Robert Dodd, Gloria Hwang, Aya Kamaya, Nishita Kothary, William Kuo, Jafi Lipson, Andrew Quon, Jianghong Rao, Daniel Rubin, Lewis Shin, Shreyas Vasanawala, Juergen Willmann, Joseph Wu, Kristen Yeom, Greg Zaharchuk

*Assistant Professors (Research):* Zhen Cheng, Brian Hargreaves, David Paik, Ramasamy Paulmurugan

*Web Site:* <http://www-radiology.stanford.edu>

Courses offered by the Department of Radiology are listed under the subject code RAD on the *Stanford Bulletin's* ExploreCourses web site.

The Department of Radiology does not offer degrees; however, its faculty teach courses open to medical students, graduate students, and undergraduates. The department also accepts students in other curricula as advisees for study and research. Undergraduates may also arrange individual research projects under the supervision of the department's faculty. This discipline focuses on the use of radiation, ultrasound, and magnetic resonance as diagnostic, therapeutic, and research tools. The fundamental and applied research within the department reflects this broad spectrum as it relates to anatomy, pathology, physiology, and interventional procedures. Original research and development of new clinical applications in medical imaging is supported within the Radiological Sciences Laboratory.

## STEM CELL BIOLOGY AND REGENERATIVE MEDICINE

*Director:* Renee A. Reijo Pera

*Co-directors:* Michael T. Longaker, Theo D. Palmer, Irving L. Weissman

*Participating Faculty:* Philip A. Beachy (Professor, Institute for Stem Cell Biology and Regenerative Medicine, Department of Developmental Biology and Biochemistry), Michael F. Clarke (Professor, Institute for Stem Cell Biology and Regenerative Medicine and Department of Medicine-Oncology), Maximilian Diehn (Assistant Professor, Institute for Stem Cell Biology and Regenerative Medicine, Stanford Cancer Center and Department of Radiation Oncology), Michael T. Longaker (Professor, Institute for Stem Cell Biology and Regenerative Medicine and Department of Surgery-Plastic/Reconstructive Surgery), Ravindra Majeti (Assistant Professor, Institute for

Stem Cell Biology and Regenerative Medicine, Stanford Cancer Center and Department of Medicine-Hematology), Roel Nusse (Professor, Institute for Stem Cell Biology and Regenerative Medicine and Department of Developmental Biology), Theo Palmer, Associate Professor, Institute for Stem Cell Biology and Regenerative Medicine and Department of Neurosurgery), Renee A. Reijo Pera (Professor, Institute for Stem Cell Biology and Regenerative Medicine and Department of Obstetrics & Gynecology), Irving L. Weissman (Professor, Institute for Stem Cell Biology and Regenerative Medicine, Department of Pathology, Developmental Biology and by courtesy, Biology), Marius Wernig (Assistant Professor, Institute for Stem Cell Biology and Regenerative Medicine and Department of Pathology), Joanna Wysocka (Assistant Professor, Institute for Stem Cell Biology and Regenerative Medicine and Department of Chemical and Systems Biology and Developmental Biology)

*Program Office:* 265 Campus Drive, Suite G3021, Stanford, CA 94305

*Mail Code:* 94305-5463

*Phone:* (650) 723-6716

*Web Site:* <http://stemcell.stanford.edu>

*Email:* [stemcellphd@stanford.edu](mailto:stemcellphd@stanford.edu)

Courses offered by the Program in Stem Cell Biology and Regenerative Medicine are listed under the subject code STEMREM on the Stanford Bulletin's Explore Courses web site.

## GRADUATE PROGRAM IN STEM CELL BIOLOGY AND REGENERATIVE MEDICINE

The Stanford Stem Cell Biology and Regenerative Medicine (SCBRM) program is dedicated to doctoral education that translates basic science to clinical applications, typically referred to as Translational Science, and of intense interest internationally in medical schools and universities. Stem Cell Biology and Regenerative Medicine is crossdisciplinary with advances linked to embryology, developmental and cell biology, neurosciences, cardiovascular biology, genetics, clinical medicine, bioengineering, engineering and computer sciences. The core curriculum is combined with unique research and clinical/professional immersion rotations to provide opportunities for doctoral students to specialize in the broad subject of translational medicine and yet focus specifically on fundamentals of SCBRM. The curriculum combines education in genetics and developmental biology with an introductory laboratory-based stem cell course, an advanced course in stem cell biology and regenerative medicine, and a clinical rotation with alternative opportunities in law, business and/or engineering.

The mission of the SCBRM graduate program is to produce future leaders in translational science through a combination of basic science and clinical/professional immersion. The program aims to be innovative and to change the landscape for graduate education in the biomedical sciences by having the immersion tailored to each student's translational goals. The program accommodates students who wish to focus primarily at the basic science level alongside those who wish to focus specifically on innovation such as a new device to solve a clinical problem. In the former case, the student might seek out a primary mentor affiliated with the basic sciences and take electives that reflect the more basic interest. In the latter case, the student might select an elective with an engineering focus and seek out primary mentorship with a more clinically or engineering focused mentor. In this way, graduates from our doctoral program receive exceptional didactic education and research experience and are well positioned to develop successful translational careers in SCBRM, in line with their passion to improve human health via applications of their knowledge to human health.

## DOCTOR OF PHILOSOPHY IN STEM CELL BIOLOGY AND REGENERATIVE MEDICINE

University requirements for the Ph.D. are discussed in the "Graduate Degrees" section of this bulletin.

The Stem Cell Biology and Regenerative Medicine curriculum, combined with the research and rotation opportunities, provides a flexible educational opportunity for doctoral students to specialize in the broad subject of translational medicine while being focused more specifically on the fundamentals of Stem Cell Biology and Regenerative Medicine while training in the laboratories of participating SCBRM faculty. The goal of the SCBRM program is to provide an avenue for graduate education to translate the best of basic research into a clinical setting.

## APPLICATION AND ADMISSION

Application should be made by November 8, 2011. Application is made through the Graduate Admissions web site. In addition to the standard graduate student application, applicants must fill out a program-specific supplemental application. See the Stem Cell Biology and Regenerative Medicine Application web site for further information and to download the supplemental application.

Applications are evaluated by the SCBRM predoctoral committee based upon: GRE scores; grades; evidence of research experience; letters of recommendation, including letters from research sponsor(s); and commitment to a career in biomedical research. Subject tests are not required.

Students admitted to the program are offered financial support covering tuition, a living stipend, insurance coverage, and an allowance for books/travel. Applicants are urged to apply for independent fellowships such as from the National Science Foundation. Fellowship applications are due in November of the year prior to matriculation in the graduate program, but SCBRM graduate students may continue to apply for outside fellowships after matriculation. Because of the small number of department-funded slots, students who have been awarded an outside fellowship have an improved chance of acceptance into the program. On matriculation, each student is assisted by a first-year advising committee in selecting courses and lab rotations in the first year and in choosing a lab for the dissertation research. Once a dissertation adviser has been selected, a dissertation committee including the dissertation adviser and two additional SCBRM faculty, is constituted to guide the student during the dissertation research. The student must meet with the dissertation committee at least once a year.

## REQUIREMENTS

Candidates for Ph.D. degrees at Stanford must satisfactorily complete a program of study that includes 135 units of graduate course work and research.

Requirements for the Ph.D. degree in SCBRM include—

1. Completion of at least 3 research rotations (STEMREM 399) in the labs of SCBRM faculty members.
2. STEMREM 250. Attendance at Regenerative Medicine (ReMS) weekly seminar series which provides the unique material required for a firm foundation in innovation in the SCBRM field.
3. Completion of the following courses:
  - a. SCBRM-I, develops a fundamental understanding of introductory stem cell principles in human development, aging, and disease accompanied by a laboratory-based module with immersion in stem cell-based methods (embryology, embryonic stem cells, reprogramming, adult stem cells).
  - b. SCBRM-II, advanced topics related to individual organ systems, cancer stem cells, translational principles of medicine and immunology as related to regenerative medicine, as well as bioengineering and bioinformatics as related to stem cell biology.

- c. SCBRM—III, students specialize and choose a clinical immersion, rotation in a biotechnology company or venture firm, or further delve into cutting edge technologies, bioinformatics, materials and/or engineering approaches for stem cell applications in industry, diagnostics and medicine.
4. Students have the option to select from the following courses in the first year:
  - GENE 203. Advanced Genetics
  - BIO 214. Advanced Cell Biology
  - PEDS 251A. Medical Ethics I
  - DBIO 210. Developmental Biology
  - MED 255. Responsible Conduct of Research
  - STEMREM 399. SCBRM Independent Research
5. Students have the option to select two electives in the second year.
6. Biochemistry proficiency is required by the end of the second year, as well as a total of 80 units and completed qualifying examinations. Students who do not pass the qualifying examination may retake a full qualifying exam, be retested in a few areas, or be asked to redo their presentation.
7. STEMREM 802. Dissertation  
Students unable to meet Ph.D. milestones after remediation are offered a M.S. degree if they have completed all requirements.
- j. Students may also take two courses (6 units) of elective course work
5. Participation in the SCBRM journal club and attendance at the annual SCBRM Retreat.
6. The qualifying examination process in SCBRM before admission to PhD candidacy has two parts:
  - *Part I*—a comprehensive written exam in the form of a 5-page NIH grant proposal
  - *Part II*—a 15-minute oral presentation of the proposal to the thesis committee followed by open questions from the qualifying exam committee on the proposal or encompassing areas of research/academic scholarship that are deemed relevant to the proposal.

At the time of application to take the qualifying exam, the student and research adviser must present a folder to the executive committee that includes the academic background at the undergraduate university, academic background during the first two years in the SCBRM program, and letters regarding rotation completion and quality from advisers in rotation laboratories. Students who do not pass the qualifying exam may retake the full qualifying exam, be retested in a sub-area, or be asked to redo their presentation. Those students who fail the qualifying exam twice may be awarded a master's degree based on completion of course work and rotations. In addition, students who choose to voluntarily leave the program are also awarded a master's degree based on completion of the qualifying exam.

## MASTER OF SCIENCE IN STEM CELL BIOLOGY AND REGENERATIVE MEDICINE

University requirements for the M.S. degree are described in the "Graduate Degrees" section of this bulletin.

Students in the Ph.D. program in SCBRM may apply for an M.S. degree in SCBRM, assuming completion of appropriate requirements. The program does not accept applications for a standalone M.S. degree.

To receive an M.S. in Stem Cell Biology and Regenerative Medicine, Students must complete:

1. Four full-tuition quarters of residency as a graduate student at Stanford.
2. At least 45 units of academic work, all of which must be in courses at or above the 100 level, 16 units of which must be at or above the 200 level.
3. Four quarters of graduate research, consisting of rotations in the labs of at least three SCBRM faculty members.
4. Course work in Stem Cell Biology and Regenerative Medicine as follows:
  - a. SCBRM-I, develops a fundamental understanding of introductory stem cell principles in human development, aging, and disease accompanied by a laboratory-based module with immersion in stem cell-based methods (embryology, embryonic stem cells, reprogramming, adult stem cells).
  - b. SCBRM-II, advanced topics related to individual organ systems, cancer stem cells, translational principles of medicine and immunology as related to regenerative medicine, as well as bioengineering and bioinformatics as related to stem cell biology.
  - c. SCBRM—III, students specialize and choose a clinical immersion, rotation in a biotechnology company or venture firm, or further delve into cutting edge technologies, bioinformatics, materials and/or engineering approaches for stem cell applications in industry, diagnostics and medicine.
  - d. Regenerative Medicine weekly seminar series
  - e. DEVBIO 210. Developmental Biology
  - f. GENE 203. Advanced Genetics
  - g. BIO 214. Advanced Cell Biology or MCP 256. Molecular and Cellular Physiology
  - h. MED 250A. Ethical, Legal and Social Issues in Stem Cell Research
  - i. MED 255. Responsible Conduct of Research

## STRUCTURAL BIOLOGY

*Chair:* Joseph D. Puglisi

*Associate Chair:* Michael Levitt

*Professors:* Theodore Jardetzky, Roger D. Kornberg, Michael Levitt, Peter Parham, Joseph D. Puglisi, William I. Weis

*Associate Professor:* K. Christopher Garcia

*Associate Professor (Research):* Yahli Lorch

*Assistant Professor (Research):* Elizabetta Viani Puglisi

*Courtesy Professor:* Axel Brunger

*Courtesy Associate Professor:* Vijay Pande

*Courtesy Assistant Professor:* Zev Bryant

*Department Offices:* Fairchild Building, D100

*Mail Code:* 94305- 5126

*Phone:* (650) 723-7576

*Email:* structuralbio@med.stanford.edu

*Web Site:* <http://structuralbio.stanford.edu>

Courses offered by the Department of Structural Biology are listed under the subject code SBIO on the *Stanford Bulletin's* ExploreCourses web site.

The department offers course work and opportunities for research in structural biology. Courses fall into two categories: (1) a series of one quarter courses that treat topics of current interest in structural biology and biophysics at an advanced level; and (2) INDE 216, Cells to Tissues, a course for medical students that includes lectures on structure-function relationships of mammalian cells and tissues and a lab on medical histology.

The emphasis of research in the department is on understanding fundamental cellular processes in terms of the structure and function of biological macromolecules and their assemblies. Techniques used include standard methods of biochemistry, cell culture, single-molecule fluorescence spectroscopy, genetic engineering, and three dimensional structure determination by x-ray diffraction, nuclear magnetic resonance spectroscopy and electron microscopy, coupled with the development of computational methods.

## DOCTOR OF PHILOSOPHY IN STRUCTURAL BIOLOGY

University requirements for the Ph.D. are described in the "Graduate Degrees" section of this bulletin.

The graduate program in Structural Biology leads to the Ph.D. degree. The department also participates in the Medical Scientists Training Program (MSTP) in which individuals are candidates for both Ph.D. and M.D. degrees.

The graduate program is intended to prepare students for careers as independent investigators in cell and molecular biology. The principal requirement of a Ph.D. degree is the completion of research constituting an original and significant contribution to the advancement of knowledge. The requirements and recommendations for the Ph.D. degree include:

1. Training in a major with connections to biophysics (e.g., physics, chemistry, or biology, with a quantitative background equivalent to that of an undergraduate physics or chemistry major at Stanford).
2. Completion of the following background courses or their equivalents at other institutions:
  - a. CHEM 131, 171, 173, and 175
  - b. BIOC 200, 201
3. Completion of the following courses or their equivalents:
  - a. SBIO 241 or BIOE 300 and SBIO 242
  - b. At least four additional graduate-level courses in physical or biological science, with at least one in physical science and one as a literature-based biological science course
  - c. MED 255
4. Opportunities for teaching are available during the first nine quarters at the discretion of the advising committee.
5. The student must prepare a dissertation proposal defining the research to be undertaken including methods of procedure. This proposal should be submitted by Winter Quarter of the third year, and it must be approved by a committee of at least three members including the principal research adviser and at least one member from the Department of Structural Biology. The candidate must defend the dissertation proposal in an oral examination. The dissertation reading committee normally evolves from the dissertation proposal review committee.
6. The student must present a Ph.D. dissertation as the result of independent investigation and expressing a contribution to knowledge in the field of structural biology.
7. The student must pass the University oral examination, taken only after the student has substantially completed the research. The examination is preceded by a public seminar in which the research is presented by the candidate.

Applicants to the program should have a bachelor's degree and should have completed at least a year of course work in biology, mathematics, organic chemistry, physical chemistry, and physics. Application forms must be received by the department before December 15 for notification by April 15. Application to the National Science Foundation for fellowship support is also encouraged. Remission of fees and a personal stipend are available to graduate students in the department. Prospective applicants should contact the Department of Structural Biology for further information.

Current topics of research in the department lie in the areas of gene expression; theoretical, crystallographic, and genetic analysis of protein structure; and cell-cell interaction. See <http://www.med.stanford.edu/school/structuralbio> for further information.

# COURSES OF INSTRUCTION

## 2011-12

*This listing is based on a static extract of courses performed on September 21, 2011. For latest and correct information, including scheduling, see the Bulletin's ExploreCourses web site at <http://explorecourses.stanford.edu>.*

Courses of instruction are listed in alphabetical order by subject name, and then numerically by catalog number.

Stanford does not have a standard course catalog numbering system. Courses numbered from 1 through 99 are primarily for freshmen and sophomores. Courses numbered from 100 through 199 are primarily for juniors and seniors; some departments, however, offer courses numbered from 200 through 299 for juniors and seniors. Most courses numbered 200 and above are for graduate students; no graduate career course is numbered below 200, and all courses above 300 are for graduate students.

Courses offered for variable units require different amounts of work depending upon the units for which a student enrolls. Students are advised to consult with the department or instructor offering the course to determine the appropriate number of units.

Beginning in Autumn Quarter 2005, a modified and redefined set of undergraduate General Education Requirements, designated in this bulletin as GERs, went into effect. Students who matriculated Autumn Quarter 2004-05 or later are subject to the revised General Education Requirements effective Autumn Quarter 2005-06. Students who matriculated Autumn Quarter 2003-04 or earlier remain on the old General Education Requirements, but may elect to change to the new system. Students interested in electing the revised GER system should contact the Office of the University Registrar. No further changes are allowed once a student has elected to move to the new system.

WIM indicates courses that fulfill the undergraduate departmental Writing in the Major requirement. AU indicates Activity courses that are subject to undergraduate University Activity Unit limitations (8 units maximum).

### **SUBJECT CODES**

Each course is identified by a subject code and a catalog number. Throughout this bulletin, Axxss subject codes have been printed wherever relevant.

### **SUMMER SESSION**

This bulletin includes, for the Summer Session, only those courses that can be tentatively scheduled at publication time by each department. For the complete list of courses and faculty, refer to <http://summer.stanford.edu>, updated in February. Courses added during the academic year are available on the *Stanford Bulletin's* ExploreCourses web site at <http://explorecourses.stanford.edu>.

### **OVERSEAS STUDIES**

Undergraduate courses taught overseas at Stanford's Bing Overseas Studies Program are listed under the relevant Overseas Studies Center subject code. Courses applicable to an undergraduate major are also listed at the end of many department degree requirement sections above.

### **SCHEDULE OF CLASSES**

Scheduling information is available on the *Stanford Bulletin's* ExploreCourses web site at <http://explorecourses.stanford.edu>. Students enroll on Axxss at <http://axess.stanford.edu>.

# AERONAUTICS AND ASTRONAUTICS (AA) COURSES

## UNDERGRADUATE COURSES IN AERONAUTICS AND ASTRONAUTICS

Primarily for undergraduates; graduate students may enroll with consent of adviser.

### AA 100. Introduction to Aeronautics and Astronautics

The principles of fluid flow, flight, and propulsion; the creation of lift and drag, aerodynamic performance including takeoff, climb, range, and landing performance, structural concepts, propulsion systems, trajectories, and orbits. The history of aeronautics and astronautics. Prerequisites: MATH 41, 42; elementary physics. GER:DB-EngrAppSci

3 units, Aut (Kroo, I)

### AA 113N. Structures: Why Things Don't (and Sometimes Do) Fall Down

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. How structures created by nature or built by human beings keep things up and keep things in. Topics: nature's structures from microorganisms to large vertebrae; buildings from ancient dwellings to modern skyscrapers; spacecraft and airplanes; boats from ancient times to America's Cup sailboats, and how they win or break; sports equipment; and biomedical devices including bone replacements and cardiovascular stents. How composite materials are used to make a structure light and strong. GER:DB-EngrAppSci

3 units, Win (Springer, G)

### AA 115N. The Global Positioning System: Where on Earth are We, and What Time is It?

Preference to freshmen. Why people want to know where they are: answers include cross-Pacific trips of Polynesians, missile guidance, and distraught callers. How people determine where they are: navigation technology from dead-reckoning, sextants, and satellite navigation (GPS). Hands-on experience. How GPS works; when it does not work; possibilities for improving performance. GER:DB-EngrAppSci

3 units, not given this year

### AA 116N. Electric Automobiles and Aircraft

(S,Sem) (Same as EE 25Q) Stanford Introductory Seminar. Transportation accounts for nearly one-third of American energy use and greenhouse gas emissions and three-quarters of American oil consumption. It has crucial impacts on climate change, air pollution, resource depletion, and national security. Students wishing to address these issues will need to reconsider how we move, finding sustainable transportation solutions. This course will provide an introduction to the issue, covering the past and present of transportation and its impacts; examining alternative fuel proposals; and digging deeper into the most promising option: battery electric vehicles. Energy requirements of air, ground, and maritime transportation; design of electric motors, power control systems, drive trains, and batteries; and technologies for generating renewable energy. Two fun opportunities for hands-on experiences with electric cars. Prerequisites: Introduction to calculus and Physics AP or elementary mechanics. GER:DB-EngrAppSci

3 units, Win (Cox, D; Enge, P)

### AA 190. Directed Research and Writing in Aero/Astro

For undergraduates. Experimental or theoretical work under faculty direction, and emphasizing development of research and communication skills. Written report(s) and letter grade required; if this is not appropriate, enroll in 199. Consult faculty in area of interest for appropriate topics, involving one of the graduate research groups or other special projects. May be repeated for credit. Prerequisite: consent of student services manager and instructor. WIM

3-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### AA 199. Independent Study in Aero/Astro

Directed reading, lab, or theoretical work for undergraduate students. Consult faculty in area of interest for appropriate topics

involving one of the graduate research groups or other special projects. May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN AERONAUTICS AND ASTRONAUTICS

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### AA 200. Applied Aerodynamics

Analytical and numerical techniques for the aerodynamic analysis of aircraft, focusing on airfoil theory, finite wing theory, far-field and Trefftz-plane analysis, two-dimensional laminar and turbulent boundary layers in airfoil analysis, laminar-to-turbulent transition, compressibility effects, and similarity rules. Biweekly assignments require MATLAB or a suitable programming language. Prerequisite: undergraduate courses in basic fluid mechanics and applied aerodynamics, AA 210A.

3 units, Win (Kroo, I)

### AA 201A. Fundamentals of Acoustics

Acoustic equations for a stationary homogeneous fluid; wave equation; plane, spherical, and cylindrical waves; harmonic (monochromatic) waves; simple sound radiators; reflection and transmission of sound at interfaces between different media; multipole analysis of sound radiation; Kirchoff integral representation; scattering and diffraction of sound; propagation through ducts (dispersion, attenuation, group velocity); sound in enclosed regions (reverberation, absorption, and dispersion); radiation from moving sources; propagation in the atmosphere and underwater. Prerequisite: first-year graduate standing in engineering, mathematics, sciences; or consent of instructor.

3 units, Spr (Lele, S)

### AA 201B. Topics in Aeroacoustics

Acoustic equations for moving medium, simple sources, Kirchoff formula, and multipole representation; radiation from moving sources; acoustic analogy approach to sound generation in compact flows; theories of Lighthill, Powell, and Mohring; acoustic radiation from moving surfaces; theories of Curl, Ffowcs Williams, and Hawkings; application of acoustic theories to the noise from propulsive jets, and airframe and rotor noise; computational methods for acoustics. Prerequisite: 201A or consent of instructor.

3 units, not given this year

### AA 202. Hypersonic Flow

The fundamental principals and equations governing hypersonic flight and high temperature gas dynamics, including chemical and thermal equilibrium and non-equilibrium; statistical thermodynamics; kinetic theory; transport phenomena; radiation; surface heating; and scramjet engines. Prerequisite: understanding of aerodynamics. Recommended: AA 200A.

3 units, Spr (MacCormack, R)

### AA 206. Bio-Aerodynamics

Topics: flapping flight, low Reynolds number aerodynamics, wing design, flocks, swarms, and dynamic soaring. Readings from current and historical literature dealing with theoretical and observational studies. Applications in aircraft design, and simulation-based problem sets. Prerequisite: course in aerodynamics such as 100, 200A, or 241A.

3 units, not given this year

### AA 208. Aerodynamics of Aircraft Dynamic Response and Stability

Companion to 200A for those interested in control and guidance. Typical vehicles and the technical tradeoffs affecting their design. Equations of motion, stressing applications to dynamic performance, stability, and forced response. Forms and sources for the required aerodynamic data. Response to small disturbances and stability derivatives. Static stability and trim. Review of aerodynamic fundamentals, leading to airload predictions for wings, bodies, and complete aircraft. Paneling and other methods for derivative estimation. Natural motions of the aircraft, and the influence on them of various configuration parameters. Vehicle behavior in maneuvers of small and large amplitudes. Prerequisites: 200A, 210A, or equivalents (may be taken

concurrently).

*3 units, not given this year*

#### **AA 210A. Fundamentals of Compressible Flow**

Topics: development of the three-dimensional, non-steady, field equations for describing the motion of a viscous, compressible fluid; differential and integral forms of the equations; constitutive equations for a compressible fluid; the entropy equation; compressible boundary layers; area-averaged equations for one-dimensional steady flow; shock waves; channel flow with heat addition and friction; flow in nozzles and inlets; oblique shock waves; Prandtl-Meyer expansion; unsteady one-dimensional flow; the shock tube; small disturbance theory; acoustics in one-dimension; steady flow in two-dimensions; potential flow; linearized potential flow; lift and drag of thin airfoils. Prerequisites: undergraduate background in fluid mechanics and thermodynamics.

*3 units, Aut (Cantwell, B)*

#### **AA 210B. Fundamentals of Compressible Flow**

Continuation of 210A with emphasis on more general flow geometry. Use of exact solutions to explore the hypersonic limit. Identification of similarity parameters. Solution methods for the linearized potential equation with applications to wings and bodies in steady flow; their relation to physical acoustics and wave motion in nonsteady flow. Nonlinear solutions for nonsteady constant area flow and introduction to Riemann invariants. Elements of the theory of characteristics; nozzle design; extension to nonisentropic flow. Real gas effects in compressible flow. Flows in various gas dynamic testing facilities. Prerequisite: 210A.

*3 units, not given this year*

#### **AA 214A. Introduction to Numerical Methods for Engineering**

(Same as CME 206, ME 300C) Numerical methods from a user's point of view. Lagrange interpolation, splines. Integration: trapezoid, Romberg, Gauss, adaptive quadrature; numerical solution of ordinary differential equations: explicit and implicit methods, multistep methods, Runge-Kutta and predictor-corrector methods, boundary value problems, eigenvalue problems; systems of differential equations, stiffness. Emphasis is on analysis of numerical methods for accuracy, stability, and convergence. Introduction to numerical solutions of partial differential equations; Von Neumann stability analysis; alternating direction implicit methods and nonlinear equations. Prerequisites: CME 200/ME 300A, CME 204/ME 300B.

*3 units, Spr (Iaccarino, G)*

#### **AA 214B. Numerical Computation of Compressible Flow**

Numerical methods for solving hyperbolic sets of partial differential equations. Explicit, implicit, flux-split, finite difference, and finite volume procedures for approximating the governing equations and boundary conditions. Numerical solution by direct approximate factorization and iterative Gauss-Seidel line relaxation. Application to Euler equations. Computational problems. Prerequisite: 214A.

*3 units, Win (MacCormack, R)*

#### **AA 214C. Numerical Computation of Viscous Flow**

Numerical methods for solving parabolic sets of partial differential equations. Numerical approximation of the equations describing compressible viscous flow with adiabatic, isothermal, slip, and no-slip wall boundary conditions. Applications to the Navier-Stokes equations in two and three dimensions at high Reynolds number. Computational problems are assigned. Prerequisite: 214B.

*3 units, Spr (MacCormack, R)*

#### **AA 215A. Advanced Computational Fluid Dynamics**

(Same as CME 215A) High resolution schemes for capturing shock waves and contact discontinuities; upwinding and artificial diffusion; LED and TVD concepts; alternative flow splittings; numerical shock structure. Discretization of Euler and Navier Stokes equations on unstructured meshes; the relationship between finite volume and finite element methods. Time discretization; explicit and implicit schemes; acceleration of steady state calculations; residual averaging; math grid preconditioning. Automatic design; inverse problems and aerodynamic shape optimization via adjoint methods. Pre- or corequisite: 214B or equivalent.

*3 units, Win (Jameson, A)*

#### **AA 215B. Advanced Computational Fluid Dynamics**

(Same as CME 215B) High resolution schemes for capturing shock waves and contact discontinuities; upwinding and artificial diffusion; LED and TVD concepts; alternative flow splittings; numerical shock structure. Discretization of Euler and Navier Stokes equations on unstructured meshes; the relationship between finite volume and finite element methods. Time discretization; explicit and implicit schemes; acceleration of steady state calculations; residual averaging; math grid preconditioning. Automatic design; inverse problems and aerodynamic shape optimization via adjoint methods. Pre- or corequisite: 214B or equivalent.

*3 units, Spr (Jameson, A)*

#### **AA 218. Introduction to Symmetry Analysis**

Methods of symmetry analysis and their use in the reduction and simplification of physical problems. Topics: dimensional analysis, phase-space analysis of autonomous systems of ordinary differential equations, use of Lie groups to reduce the order of nonlinear ODEs and to generate integrating factors, use of Lie groups to reduce the dimension of partial differential equations and to generate similarity variables, exact solutions of nonlinear PDEs generated from groups. Mathematica-based software developed by the instructor is used for finding invariant groups of ODEs and PDEs.

*3 units, Spr (Cantwell, B)*

#### **AA 222. Introduction to Multidisciplinary Design Optimization**

Design of aerospace systems within a formal optimization environment. Mathematical formulation of the multidisciplinary design problem (parameterization of design space, choice of objective functions, constraint definition); survey of algorithms for unconstrained and constrained optimization and optimality conditions; description of sensitivity analysis techniques. Hierarchical techniques for decomposition of the multidisciplinary design problem; use of approximation theory. Applications to design problems in aircraft and launch vehicle design. Prerequisites: multivariable calculus; familiarity with a high-level programming language: FORTRAN, C, C++, or MATLAB.

*3 units, Spr (Kroo, I)*

#### **AA 236A. Spacecraft Design**

The design of unmanned spacecraft and spacecraft subsystems emphasizing identification of design drivers and current design methods. Topics: spacecraft configuration design, mechanical design, structure and thermal subsystem design, attitude control, electric power, command and telemetry, and design integration and operations.

*3-5 units, Aut (Kalman, A)*

#### **AA 236B. Spacecraft Design Laboratory**

Continuation of 236A. Emphasis is on practical application of systems engineering to the life cycle program of spacecraft design, testing, launching, and operations. Prerequisite: 236A or consent of instructor.

*3 units, Win (Kalman, A)*

#### **AA 236C. Spacecraft Design Laboratory**

*3 units, Spr (Kalman, A)*

#### **AA 240A. Analysis of Structures**

Elements of two-dimensional elasticity theory. Boundary value problems; energy methods; analyses of solid and thin walled section beams, trusses, frames, rings, monocoque and semimonocoque structures. Prerequisite: ENGR 14 or equivalent.

*3 units, Aut (Chang, F)*

#### **AA 240B. Analysis of Structures**

Thin plate analysis. Structural stability. Material behavior: plasticity and fracture. Introduction of finite element analysis; truss, frame, and plate structures. Prerequisite: 240A or consent of instructor.

*3 units, not given this year*

#### **AA 241A. Introduction to Aircraft Design, Synthesis, and Analysis**

New aircraft systems emphasizing commercial aircraft. Economic and technological factors that create new aircraft markets. Determining market demands and system mission performance requirements; optimizing configuration to comply with requirements; the interaction of disciplines including

aerodynamics, structures, propulsion, guidance, payload, ground support, and parametric studies. Applied aerodynamic and design concepts for use in configuration analysis. Application to a student-selected aeronautical system; applied structural fundamentals emphasizing fatigue and fail-safe considerations; design load determination; weight estimation; propulsion system performance; engine types; environmental problems; performance estimation. Direct/indirect operating costs prediction and interpretation. Aircraft functional systems; avionics; aircraft reliability and maintainability. Prerequisite: 100 or equivalent.

3 units, Aut (Alonso, J)

#### AA 241B. Introduction to Aircraft Design, Synthesis, and Analysis

New aircraft systems emphasizing commercial aircraft. Economic and technological factors that create new aircraft markets. Determining market demands and system mission performance requirements; optimizing configuration to comply with requirements; the interaction of disciplines including aerodynamics, structures, propulsion, guidance, payload, ground support, and parametric studies. Applied aerodynamic and design concepts for use in configuration analysis. Application to a student-selected aeronautical system; applied structural fundamentals emphasizing fatigue and fail-safe considerations; design load determination; weight estimation; propulsion system performance; engine types; environmental problems; performance estimation. Direct/indirect operating costs prediction and interpretation. Aircraft functional systems; avionics; aircraft reliability and maintainability. Prerequisite: 100 or equivalent.

3 units, Win (Alonso, J)

#### AA 241X. Design, Construction, and Testing of Autonomous Aircraft

Students grouped according to their expertise to carry out the multidisciplinary design of a solar-powered autonomous aircraft that must meet a clearly stated set of design requirements. Design and construction of the airframe, integration with existing guidance, navigation, and control systems, and development and operation of the resulting design. Design reviews and reports. Prerequisites: expertise in any of the following disciplines by having satisfied the specified courses or equivalent work elsewhere: conceptual design (241A,B); applied aerodynamics (200A,B); structures (240A); composite manufacturing experience; guidance and control (208/271, ENGR 205).

3 units, NEXTYEAR

#### AA 242A. Classical Dynamics

Accelerating and rotating reference frames. Kinematics of rigid body motion; Euler angles, direction cosines. D'Alembert's principle, equations of motion. Inertia properties of rigid bodies. Dynamics of coupled rigid bodies. Lagrange's equations and their use. Dynamic behavior, stability, and small departures from equilibrium. Prerequisite: ENGR 15 or equivalent.

3 units, Aut (Close, S)

#### AA 242B. Mechanical Vibrations

For M.S.-level graduate students. Covers the vibrations of discrete systems and continuous structures. Introduction to the computational dynamics of linear engineering systems. Review of analytical dynamics of discrete systems; undamped and damped vibrations of N-degree-of-freedom systems; continuous systems; approximation of continuous systems by displacement methods; solution methods for the Eigenvalue problem; direct time-integration methods. Prerequisites: AA 242A or equivalent (recommended but not required); basic knowledge of linear algebra and ODEs; no prior knowledge of structural dynamics is assumed.

3 units, Win (Farhat, C)

#### AA 244. Introduction to Plasma Physics

Physics of space plasmas. Single-particle motions. Drifts. Kinetic theory, including stability and instability. Plasmas as fluids and fluid drifts. Waves in plasmas. Radiation in a plasma. Diffusion and resistivity. Fluid stability and instability. Kinetic stability and instability.

3 units, Win (Close, S)

#### AA 251. Introduction to the Space Environment

The environment through which space probes and vehicles travel and orbit. Survey of physical phenomena in the sun, solar wind,

magnetospheres, ionospheres, and upper atmospheres of objects in the solar system. Introduction to the physical processes governing space plasmas, solar-terrestrial interactions, and ionized and neutral media surrounding the Earth and other solar system bodies. Prerequisite: Introduction to Plasma Physics.

3 units, Spr (Close, S)

#### AA 252. Techniques of Failure Analysis

Introduction to the field of failure analysis, including fire and explosion analysis, large scale catastrophe projects, traffic accident reconstruction, aircraft accident investigation, human factors, biomechanics and accidents, design defect cases, materials failures and metallurgical procedures, and structural failures. Product liability, failure modes and effects analysis, failure prevention, engineering ethics, and the engineer as expert witness.

3 units, Spr (Murray, S)

#### AA 253. Product and Systems Development

(Same as MS&E 205) Modern approaches to aerospace design development for life cycle value. Concepts of air and space systems development in a systems context. Stakeholder value issues and requirements through manufacturing and delivery. Processes and practices for functional analysis, concept and architecture development, trades, domain criteria, interfaces, and verification and validation. Reliability, risk, and safety. Value stream analysis, integrated product and process development, key characteristics, and hardware/software integration aimed at information systems. Tools involve quality function deployment, design structure matrices, and decision mechanisms.

3 units, Spr (Weiss, S)

#### AA 254. Information Systems in Aerospace Vehicles

Sensors, processors, activators, and operators, and the media and protocols that integrate them for performance and safety.

2 units, not given this year

#### AA 256. Mechanics of Composites

Fiber reinforced composites. Stress, strain, and strength of composite laminates and honeycomb structures. Failure modes and failure criteria. Environmental effects. Manufacturing processes. Design of composite structures. Individual design project required of each student, resulting in a usable computer software. Prerequisite: ENGR 14 or equivalent.

3 units, Win (Chang, F)

#### AA 257. Design of Composite Structures

Hands-on design, analysis, and manufacturing in composites. Composite beams, columns, and plates; application of finite element methods to composite structures; failure analysis and damage tolerance design of composite structures; and impact damage, compression after impact, and bolted and bonded composites joints. Class divided into working teams (design, analysis, manufacturing, and tests) to design and build a composite structure to be tested to failure; the structure may enter the national SAMPE composite bridge design contest. Prerequisite: 256 or consent of instructor.

3 units, not given this year

#### AA 260. Sustainable Aviation

Quantitative assessment of the impact of aviation on the environment including noise, local, and global emissions, and models used to predict it. Current and future technologies that may allow the air transportation system to meet anticipated growth while reducing or minimizing environmental problems. Atmospheric effects of NO<sub>x</sub>, CO<sub>2</sub>, particulates, unburned hydrocarbons, and water vapor deposition at high altitudes and metrics for assessing global climate effects. Noise sources, measurement, and mitigation strategies. Fundamentals of aircraft and engine performance needed to assess current and future concepts. Major national and international policy implications of existing and future technology choices. Recommended: AA 241B.

3 units, not given this year

#### AA 261. Aerodynamics and Aeroacoustics of Rotorcraft

Introduction to vertical flight, helicopter configurations, blade element momentum theory for hover and forward flight, vehicle performance modeling. Modeling of unsteady aerodynamic phenomena, static and dynamic stall on airfoils, rotor wake aerodynamics, acoustics in the rotating frame. Relevant concepts from potential theory for analytical representations of noise from rotating blades, hovering rotor noise, blade-vortex interactions and

forward flight noise. Topics in rotorcraft aeromechanics and aeroacoustics research. Prerequisite: background in basic fluid mechanics and applied aerodynamics at AA 200 level.

3 units, Spr (Duraismy, K)

#### AA 271A. Dynamics and Control of Spacecraft and Aircraft

The dynamic behavior of aircraft and spacecraft, and the design of automatic control systems for them. For aircraft: non-linear and linearized longitudinal and lateral dynamics; linearized aerodynamics; natural modes of motion; autopilot design to enhance stability, control the flight path, and perform automatic landings. For spacecraft in orbit: natural longitudinal and lateral dynamic behavior and the design of attitude control systems. Prerequisites: AA242A, ENGR 105.

3 units, Spr (Rock, S)

#### AA 272C. Global Positioning Systems

The principles of satellite navigation using GPS. Positioning techniques using code tracking, single and dual frequency, carrier aiding, and use of differential GPS for improved accuracy and integrity. Use of differential carrier techniques for attitude determination and precision position determination. Prerequisite: familiarity with matrix algebra and MatLab (or another mathematical programming language).

3 units, Win (Van Diggelen, F)

#### AA 272D. Integrated Navigation Systems

Navigation satellites (GPS, GLONASS), GPS receivers, principles of inertial navigation for ships, aircraft, and spacecraft. Kalman Filters to integrate GPS and inertial sensors. Radio navigation aids (VOR, DME, LORAN, ILS). Doppler navigation systems. Prerequisites: 272C; ENGR 15, 105. Recommended: ENGR 205.

3 units, not given this year

#### AA 279. Space Mechanics

Orbits of near-earth satellites and interplanetary probes; transfer and rendezvous; decay of satellite orbits; influence of earth's oblateness; sun and moon effects on earth satellites. Prerequisite: ENGR 15 or equivalent, and familiarity with MatLab (or another mathematical programming language).

3 units, Spr (Enge, P; Close, S)

#### AA 283. Aircraft and Rocket Propulsion

Introduction to the design and performance of airbreathing and rocket engines. Topics: the physical parameters used to characterize propulsion system performance; gas dynamics of nozzles and inlets; cycle analysis of ramjets, turbojets, turbofans, and turboprops; component matching and the compressor map; introduction to liquid and solid propellant rockets; multistage rockets; hybrid rockets; thermodynamics of reacting gases. Prerequisites: undergraduate background in fluid mechanics and thermodynamics.

3 units, Win (Cantwell, B)

#### AA 284A. Advanced Rocket Propulsion

The principles of rocket propulsion system design and analysis. Fundamental aspects of the physics and chemistry of rocket propulsion. Focus is on the design and analysis of chemical propulsion systems including liquids, solids, and hybrids. Nonchemical propulsion concepts such as electric and nuclear rockets. Launch vehicle design and optimization issues including trajectory calculations. Limited enrollment. Prerequisites: 283 or consent of instructor.

3 units, Spr (Karabeyoglu, M)

#### AA 284B. Propulsion System Design Laboratory

Propulsion systems engineering through the design and operation of a sounding rocket. Students work in small teams through a full project cycle including requirements definition, performance analysis, system design, fabrication, ground and flight testing, and evaluation. Prerequisite: 284A and consent of instructor.

3 units, Aut (Zilliac, G)

#### AA 284C. Propulsion System Design Laboratory

Continuation of 284A,B. Prerequisite: 284B, and consent of instructor.

3 units, Win (Zilliac, G)

#### AA 290. Problems in Aero/Astro

(Undergraduates register for 190 or 199.) Experimental or theoretical investigation. Students may work in any field of special interest. Register for section belonging to your research supervisor.

May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### AA 291. Practical Training

Educational opportunities in high-technology research and development labs in aerospace and related industries. Internship integrated into a student's academic program. Research report outlining work activity, problems investigated, key results, and any follow-on projects. Meets the requirements for Curricular Practical Training for students on F-1 visas. Student is responsible for arranging own employment and should see department student services manager before enrolling. May be repeated for credit.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### AA 294. Case Studies in Aircraft Design

Presentations by researchers and industry professionals. Registration for credit optional. May be repeated for credit.

1 unit, Spr (Jameson, A)

#### AA 295. Aerospace Structures and Materials

Presentations by researchers and industry professionals in aerospace structures and materials. May be repeated for credit.

1 unit, Spr (Chang, F)

#### AA 297. Seminar in Guidance, Navigation, and Control

For graduate students with an interest in automatic control applications in flight mechanics, guidance, navigation, and mechanical design of control systems; others invited. Problems in all branches of vehicle control, guidance, and instrumentation presented by researchers on and off campus. Registration for credit optional. May be repeated for credit.

1 unit, not given this year

#### AA 300. Engineer Thesis

Thesis for degree of Engineer. Students register for section belonging to their thesis adviser.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### AA 301. Ph.D. Dissertation

Prerequisite: completion of Ph.D qualifying exams. Students register for section belonging to their thesis adviser. (Staff)

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### AA 801. TGR Engineer Thesis

Engineer's thesis or non-doctoral work for a TGR student.

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## AFRICAN AND AFRICAN AMERICAN STUDIES (AFRICAAM) COURSES

### UNDERGRADUATE COURSES IN AFRICAN AND AFRICAN AMERICAN STUDIES

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### AFRICAAM 16N. African Americans and Social Movements

(F,Sem) (Same as CSRE 16N, SOC 16N) Stanford Introductory Seminar. Theory and research on African Americans' roles in post-Civil Rights, US social movements. Topics include women's right, LGBT rights, environmental movement, and contemporary political conservatism. GER:DB-SocSci

3 units, Aut (Fields, C)

#### AFRICAAM 21. African American Vernacular English

(Same as LINGUIST 65, LINGUIST 265) The English vernacular spoken by African Americans in big city settings, and its relation to Creole English dialects spoken on the S. Carolina Sea Islands (Gullah), in the Caribbean, and in W. Africa. The history of expressive uses of African American English (in soundin' and rappin'), and its educational implications. Service Learning Course (certified by Haas Center). GER:DB-SocSci, EC-AmerCul

3-5 units, Win (Rickford, J)

#### AFRICAAM 43. Introduction to African American Literature

(Same as AMSTUD 143, ENGLISH 43, ENGLISH 143) (English

majors and others taking 5 units, register for 143.) African American literature from its earliest manifestations in the spirituals, trickster tales, and slave narratives to recent developments such as black feminist theory, postmodern fiction, and hip hop lyricism. We will engage some of the defining debates and phenomena within African American cultural history, including the status of realist aesthetics in black writing; the contested role of literature in black political struggle; the question of diaspora; the problem of intra-racial racism; and the emergence of black internationalism. Attuned to the invariably hybrid nature of this tradition, we will also devote attention to the discourse of the Enlightenment, modernist aesthetics, and the role of Marxism in black political and literary history. GER:DB-Hum, EC-AmerCul  
3-5 units, Aut (Rasberry, G)

#### **AFRICAAM 47. History of South Africa**

(Same as HISTORY 47) (Same as HISTORY 147. History majors and others taking 5 units, register for 147.) Introduction, focusing particularly on the modern era. Topics include: precolonial African societies; European colonization; the impact of the mineral revolution; the evolution of African and Afrikaner nationalism; the rise and fall of the apartheid state; the politics of post-apartheid transformation; and the AIDS crisis. GER:DB-SocSci  
3 units, Aut (Campbell, J)

#### **AFRICAAM 48Q. South Africa: Contested Transitions**

(S,Sem) (Same as HISTORY 48Q) Stanford Introductory Seminar. Preference to sophomores. The inauguration of Nelson Mandela as president in May 1994 marked the end of an era and a way of life for S. Africa. The changes have been dramatic, yet the legacies of racism and inequality persist. Focus: overlapping and sharply contested transitions. Who advocates and opposes change? Why? What are their historical and social roots and strategies? How do people reconstruct their society? Historical and current sources, including films, novels, and the Internet. GER:DB-Hum, EC-GlobalCom  
3 units, Win (Samoff, J)

#### **AFRICAAM 50B. 19th Century America**

(Same as HISTORY 50B) (Same as HISTORY 150B. History majors and others taking 5 units, register in 150B.) Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture. GER:DB-SocSci, EC-AmerCul  
3 units, Win (White, R)

#### **AFRICAAM 51. Congolese Dance**

(Same as AFRICAST 51, DANCE 51) Movements and choreography from Central Africa. Elements unique to all African dance movement: body isolation, polyrhythmic movement, and body posture. Live drumming. Open to all levels of dancers.  
1 unit, alternate years, not given this year

#### **AFRICAAM 54N. African American Women's Lives**

(Same as HISTORY 54N) Preference to freshmen. The everyday lives of African American women in 19th- and 20th-century America in comparative context of histories of European, Hispanic, Asian, and Native American women. Primary sources including personal journals, memoirs, music, literature, and film, and historical texts. Topics include slavery and emancipation, labor and leisure, consumer culture, social activism, changing gender roles, and the politics of sexuality. GER:DB-Hum, EC-Gender  
4-5 units, not given this year

#### **AFRICAAM 56N. Mixed Race in the New Millennium: Crossings of Kin, Faith & Culture**

(F,Sem) (Same as CSRE 56N, ENGLISH 56N) Stanford Introductory Seminar. Preference to freshmen. How literature, theater, graphic art and popular culture shape understandings of contemporary mixed race identity and other complex experiences of cultural hybridity. Course explores implications for racial identity, art, and politics for the new millennium. GER:DB-Hum  
3 units, Win (Elam, M)

#### **AFRICAAM 64C. From Freedom to Freedom Now!: African American History, 1865-1965**

(Same as HISTORY 64C) (Same as HISTORY 164C. History

majors and others taking 5 units, register for 164C.) Explores the working lives, social worlds, political ideologies and cultural expressions of African Americans from emancipation to the early civil rights era. Topics include: the transition from slavery to freedom, family life, work, culture, leisure patterns, resistance, migration and social activism. Draws largely on primary sources including autobiographies, memoirs, letters, personal journals, newspaper articles, pamphlets, speeches, literature, film and music. GER:DB-SocSci, EC-AmerCul

3 units, not given this year

#### **AFRICAAM 75. Black Cinema**

How filmmakers represent historical and cultural issues in Black cinema.

2 units, Aut (Barker-Alexander, J; Wooden, I)

#### **AFRICAAM 75C. Black Sitcoms: The Fresh Prince of Bel-Air**

The portrayal of black life on television in the 90s. Critical framework including concepts of identity, race, gender, and class. In-class viewings. Sitcoms in relation to theoretical work including that of Toni Morrison, Marlon Riggs, Hermann Gray, Ann duCille, and Mark Anthony Neal.

2 units, OCCASIONAL

#### **AFRICAAM 105. Introduction to African and African American Studies**

Interdisciplinary. Central themes in African American culture and history related to race as a definitive American phenomenon. African survivals and interpretations of slavery in the New World, contrasting interpretations of the Black family, African American literature, and art. Possible readings: Frederick Douglass, Harriet Jacobs, Booker T. Washington, W.E.B. DuBois, Richard Wright, Maya Angelou, James Baldwin, Malcolm X, Alice Walker, and bell hooks. Focus may vary each year. This course is a WIM course. GER:DB-Hum, EC-AmerCul

5 units, Win (Brown, C; Caruthers, J)

#### **AFRICAAM 106. Race, Ethnicity, and Linguistic Diversity in Classrooms: Sociocultural Theory and Practices**

(Same as CSRE 103B, EDUC 103B, EDUC 337) Focus is on classrooms with students from diverse racial, ethnic and linguistic backgrounds. Studies, writing, and media representation of urban and diverse school settings; implications for transforming teaching and learning. Issues related to developing teachers with attitudes, dispositions, and skills necessary to teach diverse students.

3-5 units, Spr (Ball, A)

#### **AFRICAAM 107C. The Black Mediterranean: Greece, Rome and Antiquity**

(Same as CLASSGEN 107, CSRE 107) Explore problems of race and ethnicity as viable criteria in studying ancient societies and consider the question, What is the Mediterranean?, in relation to premodern evidence. Investigate the role of blackness as a marker of ethnicity; the demography of slavery and its roles in forming social identities; and environmental determinism as a factor in ethnic and racial thinking. Consider Greek and Roman perspectives and behavior, and their impact on later theories of race and ethnicity as well as the Mediterranean as a whole. GER:EC-GlobalCom

4-5 units, not given this year

#### **AFRICAAM 112. Urban Education**

(Same as EDUC 112X, EDUC 212X, SOC 129X, SOC 229X) (Graduate students register for EDUC 212X or SOC 229X). Combination of social science and historical perspectives trace the major developments, contexts, tensions, challenges, and policy issues of urban education. GER:DB-SocSci

3-4 units, Spr (Ball, A)

#### **AFRICAAM 121X. Hip Hop, Youth Identities, and the Politics of Language**

(Same as AMSTUD 121X, ANTHRO 121A, CSRE 121X, EDUC 121X, LINGUIST 155) Focus is on issues of language, identity, and globalization, with a focus on Hip Hop cultures and the verbal virtuosity within the Hip Hop nation. Beginning with the U.S., a broad, comparative perspective in exploring youth identities and the politics of language in what is now a global Hip Hop movement. Readings draw from the interdisciplinary literature on Hip Hop cultures with a focus on sociolinguistics and youth culture.

3-4 units, Spr (Alim, H)

**AFRICAAM 123. Great Works of the African American Tradition**

Foundational African and African American scholarly figures and their work from the 19th century to the present. Historical, political, and scholarly context. Dialogues distinctive to African American culture. May be repeated for credit.

*5 units, not given this year*

**AFRICAAM 145A. Poetics and Politics of Caribbean Women's Literature**

(Same as CSRE 145A) Mid 20th-century to the present. How historical, economic, and political conditions in Haiti, Cuba, Jamaica, Antigua, and Guadeloupe affected women. How Francophone, Anglophone, and Hispanophone women novelists, poets, and short story writers respond to similar issues and pose related questions. Caribbean literary identity within a multicultural and diasporic context; the place of the oral in the written feminine text; family and sexuality; translation of European master texts; history, memory, and myth; and responses to slave history, colonialism, neocolonialism, and globalization. GER:DB-SocSci, DB-SocSci, EC-Gender

*5 units, not given this year*

**AFRICAAM 146. New Possibilities for Writing and Art**

Writing workshop to explore conventional as well as innovative approaches to writing, including digital, sound and movement. How different forms of music can inspire poetry. How still art, live performance, interviews or film shape the way one can think about and compose stories. What those stories and poems look and feel like when put to movement. CWriting experiments, museum visits, and performance of students' works. Guest poets, fiction writers, and artists who blur these boundaries. Students submit written pieces each week to be discussed.

*5 units, Spr (Staff), ONCEONLY*

**AFRICAAM 147. History of South Africa**

(Same as HISTORY 147) (Same as HISTORY 47. History majors and others taking 5 units, register for 147.) Introduction, focusing particularly on the modern era. Topics include: precolonial African societies; European colonization; the impact of the mineral revolution; the evolution of African and Afrikaner nationalism; the rise and fall of the apartheid state; the politics of post-apartheid transformation; and the AIDS crisis. GER:DB-SocSci

*5 units, Aut (Campbell, J)*

**AFRICAAM 150B. 19th-Century America**

(Same as AMSTUD 150B, HISTORY 150B) (Same as HISTORY 50B. History majors and others taking 5 units, register for 150B.) Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture. GER:DB-SocSci, EC-AmerCul

*5 units, Win (White, R)*

**AFRICAAM 152. DuBois and American Culture**

(Same as AMSTUD 152D, ENGLISH 152D) His life and career. Focus on first half of his life from his Harvard doctoral dissertation to the end of the Harlem Renaissance in which he played a crucial role. Sources include his books on history and sociology, scholarly essays, novels, and journals that he edited. AAAS WIM course. GER:DB-Hum, EC-AmerCul

*5 units, Spr (Elam, M)*

**AFRICAAM 152G. Global Harlem Renaissance**

(Same as AMSTUD 152G, ENGLISH 152G) Examination of the explosion of African American artistic expression during 1920s and 30s New York known as the Harlem Renaissance. Amiri Baraka once referred to the Renaissance as a kind of 'vicious Modernism,' as a 'BangClash,' that impacted and was impacted by political, cultural and aesthetic changes not only in the U.S. but Europe, the Caribbean and Latin America. Focus on the literature, graphic arts, and the music of the era in this global context. GER:DB-Hum, EC-AmerCul

*5 units, not given this year*

**AFRICAAM 156T. Africa in the African American Imaginary: Black Drama in the United States from 1950 to the Present**

(Same as DRAMA 156T) What role has imagining Africa played in the construction of an African American identity? How do

playwrights stage Afrocentric politics? We shall interrogate the intellectual questions that come to bear at the juncture where Africa meets African America and discuss themes that include Christianity, exploitation, gender relations, and more. By the end of the quarter students will have a critical understanding of how playwrights interweave politics and ideologies that articulated African/African American relationships.

*4 units, Spr (Mbowe, A)*

**AFRICAAM 163S. Post Black Drama in the Age of Obama**

(Same as AMSTUD 163S, CSRE 163S, DRAMA 163S, DRAMA 363S) This course will examine works of the new millennium that confront questions of African American experience. These plays are written by African American and non-black writers. In analyzing these works, this course will investigate such questions as: In a time that has been called 'Post Race' or 'Post Soul' or even 'Post Black,' what can we discern about African American drama? How do these plays reflect or contradict such labeling? How do these works speak to our times? Who does the form relate to in matters of content in these works? What do these works tell us about the contemporary constructions and meanings of blackness? GER:DB-Hum

*5 units, Win (Elam, H)*

**AFRICAAM 166. Introduction to African American History: The Modern African American Freedom Struggle**

(Same as AMSTUD 166, HISTORY 166) Focus is on political thought and protest movements after 1930. Individuals who have shaped and been shaped by modern African American struggles for freedom and justice. Sources include audiovisual materials. Research projects required for fifth unit. GER:DB-SocSci, EC-AmerCul

*4-5 units, not given this year*

**AFRICAAM 173S. Transcultural and Multiethnic Lives: Contexts, Controversies, and Challenges**

(Same as ASNAMST 173S, CSRE 173S) Lived experience of people who dwell in the border world of race and nation where they negotiate transcultural and multiethnic identities and politics. Comparative, historical, and global contexts such as family and class. Controversies, such as representations of mixed race people in media and multicultural communities. What the lives of people like Tiger Woods and Barack Obama reveal about how the marginal is becoming mainstream.

*5 units, not given this year*

**AFRICAAM 176H. Black Women Playwrights, 1900-the present**

(Same as DRAMA 176H, DRAMA 336, FEMST 140W) From the rave reviews garnered by Angelina Weld Grimke's lynching play, Rachel to recent work by Lynn Nottage on Rwanda, black women playwrights have addressed key issues in modern culture and politics. We will analyze and perform work written by black women in the U.S., Britain and the Caribbean in the 20th and 21st centuries. Topics include: sexuality, surrealism, colonialism, freedom, violence, colorism, love, history, community and more. Playwrights include: Angelina Grimke, Lorriane Hansberry, Winsome Pinnock, Adrienne Kennedy, Suzan- Lori Parks, Ntzoze Shange, Pearl Cleage, Sarah Jones, Anna DeVeaere Smith, Alice Childress, Lydia Diamond and Zora Neale Hurston.

*4 units, Aut (Brody, J)*

**AFRICAAM 190. Directed Reading**

May be repeated for credit. Prerequisite: consent of instructor.

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff)*

**AFRICAAM 196. African Visual Art & Graphic Communication in the Americas**

(Same as ARTHIST 196, ARTHIST 396, CSRE 186) The class addresses the modes of visual expression used among the Bakongo people in Central Africa and their descendents in Cuba, Haiti, and Brazil and argues that together these constitute identifiable graphic writing systems. After providing a brief overview of the forms of graphic expression in use within Kongo and Kongo Atlantic cultures, the class focuses on the most central of the traditional cosmograms, Dikenga. By mapping the meanings and forms of Dikenga, the essay attempts to demonstrate its continuity throughout the Kongo diaspora. Finally, the class highlights the rich cosmology, cosmogony, and moral philosophy that have consistently informed the use and meaning of Dikenga in its

central role in religious narratives, moral philosophy and religious education among the Bakongo in Atlantic world. GER:DB-Hum  
4 units, not given this year

#### **AFRICAAM 199. Honors Project**

May be repeated for credit. Prerequisite: consent of instructor.  
1-5 units, Win (Staff), Spr (Staff)

#### **AFRICAAM 200X. Honors Thesis and Senior Thesis Seminar**

Required for seniors. Weekly colloquia with AAAS Director and Associate Director to assist with refinement of research topic, advisor support, literature review, research, and thesis writing. Readings include foundational and cutting-edge scholarship in the interdisciplinary fields of African and African American studies and comparative race studies. Readings assist students situate their individual research interests and project within the larger. Students may also enroll in AFRICAAM 200Y in Winter and AFRICAAM 200Z in Spring for additional research units (up to 10 units total).  
3-5 units, Aut (Staff)

#### **AFRICAAM 200Y. Honors Thesis and Senior Thesis Research**

Winter. Required for students writing an Honors Thesis. Optional for Students writing a Senior Thesis.  
3-5 units, Win (Staff)

#### **AFRICAAM 200Z. Honors Thesis and Senior Thesis Research**

Spring. Required for students writing an Honors Thesis. Optional for Students writing a Senior Thesis.  
3-5 units, Spr (Staff)

#### **AFRICAAM 204F. The Modern Tradition of Non-Violent Resistance**

(Same as CSRE 104F, HISTORY 204F) During the twentieth century, peasants and menial laborers who comprised the majority of humanity launched liberation movements to secure citizenship rights. Mohandas K. Gandhi, Martin Luther King, Jr., and Nelson Mandela are among the leaders whose ideas continue to influence contemporary movements for global peace with social justice in a sustainable environment.  
5 units, not given this year

#### **AFRICAAM 255. Racial Identity in the American Imagination**

(Same as AMSTUD 255D, CSRE 255D, HISTORY 255D, HISTORY 355D) Major historical transformations shaping the understanding of racial identity and how it has been experienced, represented, and contested in American history. Topics include: racial passing and racial performance; migration, immigration, and racial identity in the urban context; the interplay between racial identity and American identity; the problems of class, gender, and sexuality in the construction of racial identity. Sources include historical and legal texts, memoirs, photography, literature, film, and music. GER:DB-SocSci, EC-AmerCul  
4-5 units, Win (Hobbs, A)

#### **AFRICAAM 261E. Mixed Race Literature in the U.S. and South Africa**

(Same as AMSTUD 261E, ENGLISH 261E) As scholar Werner Sollors recently suggested, novels, poems, stories about interracial contacts and mixed race constitute an orphan literature belonging to no clear ethnic or national tradition. Yet the theme of mixed race is at the center of many national self-definitions, even in our U.S. post-Civil Rights and South Africa's post-Apartheid era. This course examines aesthetic engagements with mixed race politics in these trans- and post-national dialogues, beginning in the 1700s and focusing on the 20th and 21st centuries.  
5 units, not given this year

#### **AFRICAAM 262D. African American Poetics**

(Same as AMSTUD 262D, ENGLISH 262D) Examination of African American poetic expressive forms from the 1700s to the 2000s, considering the central role of the genre--from sonnets to spoken word, from blues poetry to new media performance--in defining an evolving literary tradition and cultural identity.  
5 units, not given this year

### **GRADUATE COURSES IN AFRICAN AND AFRICAN AMERICAN STUDIES**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **AFRICAAM 233A. Counseling Theories and Interventions**

#### **from a Multicultural Perspective**

(Same as CSRE 233A, EDUC 233A) In an era of globalization characterized by widespread migration and cultural contacts, professionals face a unique challenge: How does one practice successfully when working with clients/students from so many different backgrounds? This course focuses upon the need to examine, conceptualize, and work with individuals according to the multiple ways in which they identify themselves. It will systematically examine multicultural counseling concepts, issues, and research. Literature on counselor and client characteristics such as social status or race/ethnicity and their effects on the counseling process and outcome will be reviewed. Issues in consultation with culturally and linguistically diverse parents and students and work with migrant children and their families are but a few of the topics covered in this course.  
3-5 units, not given this year

#### **AFRICAAM 245. Understanding Racial and Ethnic Identity Development**

(Same as CSRE 245, EDUC 245) African American, Native American, Mexican American, and Asian American racial and ethnic identity development; the influence of social, political and psychological forces in shaping the experience of people of color in the U.S. The importance of race in relationship to social identity variables including gender, class, and occupational, generational, and regional identifications. Bi- and multiracial identity status, and types of white racial consciousness.  
3-5 units, not given this year

## **AFRICAN AND MIDDLE EASTERN LANGUAGES (AMELANG) COURSES**

### **UNDERGRADUATE COURSES IN AFRICAN AND MIDDLE EASTERN LANGUAGES**

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **AMELANG 1A. Beginning Arabic, First Quarter**

(Formerly AMELANG 120A.) One-year sequence designed to develop beginning proficiency, with additional emphasis on reading and writing standard Arabic (fusha).  
5 units, Aut (Hashem-Aramouni, E)

#### **AMELANG 1B. Beginning Arabic, Second Quarter**

(Formerly AMELANG 120B.) One-year sequence designed to develop beginning proficiency, with additional emphasis on reading and writing standard Arabic (fusha). Prerequisite: 1A or consent of instructor.  
5 units, Win (Staff)

#### **AMELANG 1C. Beginning Arabic, Third Quarter**

(Formerly AMELANG 120C.) Continuation of 1B. One-year sequence designed to develop beginning proficiency, with additional emphasis on reading and writing standard Arabic (fusha). Fulfills the University Foreign Language Requirement. Prerequisite: 1B or consent of instructor.  
5 units, Spr (Obeid, K)

#### **AMELANG 1H. Beginning Arabic for Heritage Learners, First Quarter**

For students with home background or study/living experience in the Arab world. Designed to develop reading, writing, speaking and listening abilities in Arabic, as well as cultural knowledge. The course offers Arabic heritage and semi-heritage learners an opportunity to reactivate and expand their skills while studying both Modern Standard and Colloquial Arabic (Levantine Arabic) formally in an academic setting. Prerequisite: placement, or consent of instructor.  
5 units, Aut (Aweiss, S)

#### **AMELANG 1S. Intensive Beginning Arabic, Part A**

(Formerly AMELANG 20A.) Stanford graduate students restricted

to 9 units register for 1G.

*5 units, not given this year*

**AMELANG 2H. Beginning Arabic for Heritage Learners, Second Quarter**

Continuation of 1H. For students with home background or study/living experience in the Arab world. Designed to develop reading, writing, speaking and listening abilities in Arabic, as well as cultural knowledge. The course offers Arabic heritage and semi-heritage learners an opportunity to reactivate and expand their skills while studying both Modern Standard and Colloquial Arabic (Levantine Arabic) formally in an academic setting. Prerequisite: 1H or consent of instructor.

*5 units, Win (Aweiss, S)*

**AMELANG 2S. Intensive Beginning Arabic, Part B**

(Formerly AMELANG 20A.) Continuation of 1S. Stanford graduate student restricted to 9 units register for 2G.

*5 units, not given this year*

**AMELANG 3H. Beginning Arabic for Heritage Learners, Third Quarter**

Continuation of 2H. For students with home background or study/living experience in the Arab world. Designed to develop reading, writing, speaking and listening abilities in Arabic, as well as cultural knowledge. The course offers Arabic heritage and semi-heritage learners an opportunity to reactivate and expand their skills while studying both Modern Standard and Colloquial Arabic (Levantine Arabic) formally in an academic setting. Prerequisite: 2H or consent of instructor.

*5 units, Spr (Staff)*

**AMELANG 3S. Intensive Beginning Arabic, Part C**

(Formerly AMELANG 20C.) Continuation of 2S. Stanford graduate students restricted to 9 units register for 3G.

*5 units, not given this year*

**AMELANG 11A. Intermediate Arabic, First Quarter**

(Formerly AMELANG 121A.) One-year sequence designed to develop intermediate proficiency, with additional emphasis on functional applications and reading and writing standard Arabic. Prerequisite: placement test, 1C or consent of instructor.

*5 units, Aut (Salti, R)*

**AMELANG 11B. Intermediate Arabic, Second Quarter**

(Formerly AMELANG 121B.) Continuation of 11A. One-year sequence designed to develop intermediate proficiency, with additional emphasis on functional applications and reading and writing standard Arabic. Prerequisite: placement test, 11A or consent of instructor.

*5 units, Win (Salti, R)*

**AMELANG 11C. Intermediate Arabic, Third Quarter**

(Formerly AMELANG 121C.) Continuation of 11B. One-year sequence designed to develop intermediate proficiency, with additional emphasis on functional applications and reading and writing standard Arabic. Prerequisite: placement test, 11B or consent of instructor.

*5 units, Spr (Salti, R)*

**AMELANG 11H. Intermediate Arabic for Heritage Learners, First Quarter**

For students with home background or study/living experience in the Arab world. Designed to develop reading, writing, speaking and listening abilities in Arabic, as well as cultural knowledge. The course offers Arabic heritage and semi-heritage learners an opportunity to reactivate and expand their skills while studying both Modern Standard and Colloquial Arabic (Levantine Arabic) formally in an academic setting. Prerequisite: placement, or consent of instructor.

*5 units, Aut (Salti, R)*

**AMELANG 11S. Intensive Intermediate Arabic, Part A**

(Formerly AMELANG 221A.) Speaking, listening, reading, and writing, emphasizing Arabic grammar and functional applications. Stanford graduate students restricted to 9 units register for 11G.

*4 units, not given this year*

**AMELANG 12H. Intermediate Arabic for Heritage Learners, Second Quarter**

Continuation of 11H. For students with home background or study/living experience in the Arab world. Designed to develop reading, writing, speaking and listening abilities in Arabic, as well

as cultural knowledge. The course offers Arabic heritage and semi-heritage learners an opportunity to reactivate and expand their skills while studying both Modern Standard and Colloquial Arabic (Levantine Arabic) formally in an academic setting. Prerequisite: placement tests, 11H or consent of instructor.

*5 units, Win (Staff)*

**AMELANG 12S. Intensive Intermediate Arabic, Part B**

Continuation of 11S. Speaking, listening, reading, and writing, emphasizing Arabic grammar and functional applications. Stanford graduate students restricted to 9 units register for 12G.

*4 units, not given this year*

**AMELANG 13H. Intermediate Arabic for Heritage Learners, Third Quarter**

Continuation of 12H. For students with home background or study/living experience in the Arab world. Designed to develop reading, writing, speaking and listening abilities in Arabic, as well as cultural knowledge. The course offers Arabic heritage and semi-heritage learners an opportunity to reactivate and expand their skills while studying both Modern Standard and Colloquial Arabic (Levantine Arabic) formally in an academic setting. Prerequisite: placement tests, 12H or consent of instructor.

*5 units, Spr (Staff)*

**AMELANG 13S. Intensive Intermediate Arabic, Part C**

(Formerly AMELANG 221C.) Continuation of 12S. Speaking, listening, reading, and writing, emphasizing Arabic grammar and functional applications. Stanford graduate students restricted to 9 units register for 13G.

*4 units, not given this year*

**AMELANG 21A. Advanced Arabic, First Quarter**

(Formerly AMELANG 122A.) Continuation of 11C. One-year sequence designed to develop advanced proficiency with emphasis on complex and compound sentences through use of literary works, media Arabic, the Internet, and cultural productions. Prerequisite: placement test, 11C or consent of instructor.

*5 units, Aut (Aweiss, S)*

**AMELANG 21B. Advanced Arabic, Second Quarter**

(Formerly AMELANG 122B.) Continuation of 21B. One-year sequence designed to develop advanced proficiency with emphasis on complex and compound sentences through use of literary works, media Arabic, the Internet, and cultural productions. Prerequisite: placement test, 21A or consent of instructor.

*5 units, Win (Aweiss, S)*

**AMELANG 21C. Advanced Arabic, Third Quarter**

(Formerly AMELANG 122C.) Continuation of 21B. One-year sequence designed to develop advanced proficiency with emphasis on complex and compound sentences through use of literary works, media Arabic, the Internet, and cultural productions. Prerequisite: placement test, 21B or consent of instructor.

*5 units, Spr (Aweiss, S)*

**AMELANG 21H. Advanced Arabic for Heritage Learners, First Quarter**

For students with home background or study/living experience in the Arab world. Designed to develop reading, writing, speaking and listening abilities in Arabic, as well as cultural knowledge. The course offers Arabic heritage and semi-heritage learners an opportunity to reactivate and expand their skills while studying both Modern Standard and Colloquial Arabic (Levantine Arabic) formally in an academic setting. Prerequisite: placement test, or consent of instructor.

*5 units, Aut (Aweiss, S)*

**AMELANG 22H. Advanced Arabic for Heritage Learners, Second Quarter**

Continuation of 21H. For students with home background or study/living experience in the Arab world. Designed to develop reading, writing, speaking and listening abilities in Arabic, as well as cultural knowledge. The course offers Arabic heritage and semi-heritage learners an opportunity to reactivate and expand their skills while studying both Modern Standard and Colloquial Arabic (Levantine Arabic) formally in an academic setting. Prerequisite: placement test, 21H or consent of instructor.

*5 units, Win (Staff)*

**AMELANG 23A. Reading Arabic, First Quarter**

(Formerly AMELANG 196A.) For seniors and graduate students

who need advanced ability in Arabic for the PhD or for advanced research in their own field. Prerequisite: three years of Arabic or a demonstrated equivalence.

*3-4 units, Aut (Obeid, K)*

#### **AMELANG 23B. Reading Arabic, Second Quarter**

(Formerly AMELANG 196B.) Continuation of 23A. For seniors and graduate students who need advanced ability in Arabic for the PhD or for advanced research in their own field. Prerequisite: three years of Arabic or a demonstrated equivalence.

*3-4 units, Win (Barhoum, K)*

#### **AMELANG 23C. Reading Arabic, Third Quarter**

(Formerly AMELANG 196C.) Continuation of 23B. For seniors and graduate students who need advanced ability in Arabic for the PhD or for advanced research in their own field. Prerequisite: three years of Arabic or a demonstrated equivalence.

*3-4 units, Spr (Barhoum, K)*

#### **AMELANG 23H. Advanced Arabic for Heritage Learners, Third Quarter**

Continuation of 22H. For students with home background or study/living experience in the Arab world. Designed to develop reading, writing, speaking and listening abilities in Arabic, as well as cultural knowledge. The course offers Arabic heritage and semi-heritage learners an opportunity to reactivate and expand their skills while studying both Modern Standard and Colloquial Arabic (Levantine Arabic) formally in an academic setting. Prerequisite: placement test, 22H or consent of instructor.

*5 units, Spr (Staff)*

#### **AMELANG 24A. Arabic Skills Workshop, First Quarter**

Emphasis on the necessary Arabic skills (Reading, Writing, Listening, Speaking) needed by graduate students to conduct research in their own respective fields. Prerequisite: four years of Arabic or consent of instructor's field. Prerequisite: four years of Arabic or instructor's permission.

*3-4 units, Aut (Barhoum, K)*

#### **AMELANG 24B. Arabic Skills Workshop, Second Quarter**

Continuation of 24A. Emphasis on the necessary Arabic skills (Reading, Writing, Listening, Speaking) needed by graduate students to conduct research in their own respective fields. Prerequisite: 23B or consent of instructor's,

*3-4 units, Win (Staff)*

#### **AMELANG 24C. Arabic Skills Workshop, Third Quarter**

Continuation of 24B. Emphasis on the necessary Arabic skills (Reading, Writing, Listening, Speaking) needed by graduate students to conduct research in their own respective fields. Prerequisite: 24B, or consent of instructor's.

*3-4 units, Spr (Barhoum, K)*

#### **AMELANG 25A. Colloquial Arabic, First Quarter**

(Formerly AMELANG 198A.) Sources include authentic videotaped conversations with native speakers, conversations, and texts of these conversations to enhance comprehension and improve aural skills. Prerequisite: 2 years of Arabic.

*2-4 units, not given this year*

#### **AMELANG 25B. Colloquial Arabic, Second Quarter**

(Formerly AMELANG 198B.) Continuation of 25A. Sources include authentic videotaped conversations with native speakers, conversations, and texts of these conversations to enhance comprehension and improve aural skills. Prerequisite: 2 years of Arabic. Prerequisite: 25A.

*2-4 units, Win (Staff)*

#### **AMELANG 25C. Colloquial Arabic, Third Quarter**

(Formerly AMELANG 198C.) Continuation of 25B. Sources include authentic videotaped conversations with native speakers, conversations, and texts of these conversations to enhance comprehension and improve aural skills. Prerequisite: 2 years of Arabic. Prerequisite: 25B

*2-4 units, Spr (Staff)*

#### **AMELANG 26A. Media Arabic, First Quarter**

(Formerly AMELANG 199A.) Arabic language used today in the printed and electronic media, including the Internet. Emphasizes current vocabulary and structures used in different modes of media coverage. Prerequisite: 2 years of Arabic.

*2-4 units, not given this year*

#### **AMELANG 26B. Media Arabic, Second Quarter**

(Formerly AMELANG 199B.) Continuation of 26A. Arabic language used today in the printed and electronic media, including the Internet. Emphasizes current vocabulary and structures used in different modes of media coverage. Prerequisite: 2 years of Arabic. Prerequisite: 26A.

*2-4 units, not given this year*

#### **AMELANG 26C. Media Arabic, Third Quarter**

(Formerly AMELANG 199C.) Continuation of 26B. Arabic language used today in the printed and electronic media, including the Internet. Emphasizes current vocabulary and structures used in different modes of media coverage. Prerequisite: 2 years of Arabic. Prerequisite: 26B.

*2-4 units, not given this year*

#### **AMELANG 27A. Advanced Arabic Conversation, First Quarter**

(Formerly AMELANG 143A.) Repeatable once for credit. Prerequisite: second-year year Arabic or consent of instructor.

*2 units, not given this year*

#### **AMELANG 27B. Advanced Arabic Conversation, Second Quarter**

Continuation of 27A. Repeatable once for credit. Prerequisite: second-year Arabic or consent of instructor.

*2 units, not given this year*

#### **AMELANG 27C. Advanced Arabic Conversation, Third Quarter**

Continuation of 27B. Repeatable once for credit. Prerequisite: second-year year Arabic or consent of instructor.

*2 units, not given this year*

#### **AMELANG 30. Arabic Calligraphy**

Calligraphy requires no linguistic background, stipulates no artistic skill for one to appreciate it and is the supreme art form of the Islamic world. Other Islamic arts (architecture, metal work, ceramics, glass, and textiles) draw on calligraphy as their principal source of embellishment. Interactive lecture-workshop sketches its development and illustrates the forms of Arabic calligraphy in use today.

*2 units, Spr (Barhoum, K)*

#### **AMELANG 31. The Contemporary Arab World and Culture through Literature**

(Formerly AMELANG 161.) Readings from prominent authors dealing with topics such as gender and women, kinship and social concepts, nationalism, and religion. Texts delineating the cultural uniqueness of the Arab world include works by Naguib Mahfouz, Nawal El-Saadawi, Ghassan Kanafani, Tayyeb Salih, Etel Adnan, and short stories and poetry. All texts in English. No knowledge of Arabic required. Limited enrollment. GER:DB-Hum, EC-GlobalCom

*4 units, Aut (Barhoum, K)*

#### **AMELANG 32. Arab Women Writers and Issues**

(Formerly AMELANG 162.) Fiction and non-fiction work. The major cultural factors shaping their feminist attitudes. Readings: Fatima Mernissi, Nawal El-Saadawi, Etel Adnan, Alifa Rifaat, and Sahar Khalifeh. All texts in English. No knowledge of Arabic required. Limited enrollment. GER:DB-Hum, EC-Gender

*4 units, Win (Barhoum, K)*

#### **AMELANG 33. The Arab World through Travel Literature**

(Formerly AMELANG 163.) Popular colonialist and post colonialist portrayals of Arab culture and Islam. Recent Western depictions of Arabs and Muslims in travel literature. Readings include Flaubert in Egypt, Guests of the Sheik, Justine, Covering Islam, Nine Parts of Desire, and Motoring with Mohammed. All texts in English. No knowledge of Arabic required. Limited enrollment. GER:DB-Hum, EC-GlobalCom

*4 units, Spr (Staff)*

#### **AMELANG 36. The Arabic Language and Culture**

(Same as LINGUIST 36, LINGUIST 270) Arabic language from historical, social, strategic, and linguistic perspectives. History of the Arabic language and the stability of classical Arabic over the last 15 centuries. Why the functionality of classical Arabic has not changed as Latin, Old English, and Middle English have. Social aspects of the Arabic language, Ferguson's notion of diglossia. The main varieties of Arabic, differences among them, and when

and where they are spoken. Role of Arabic and culture in current world politics, culture, and economy. Linguistic properties of Arabic such as root-based morphology, lexical ambiguity, and syntactic structure relating it to current linguistic theories.

3 units, not given this year

**AMELANG 50A. Reading Hebrew, First Quarter**

(Same as JEWISHST 50A) Introduction to Hebrew literature through short stories and poetry by notable Israeli writers. In Hebrew. Prerequisite: one year of Hebrew or equivalent.

2-4 units, not given this year

**AMELANG 50B. Reading Hebrew, Second Quarter**

Introduction to Hebrew literature through short stories and poetry by notable Israeli writers. In Hebrew. Prerequisite: one year of Hebrew or equivalent.

2-4 units, not given this year

**AMELANG 51A. Reading Biblical Hebrew, First Quarter**

2 units, not given this year

**AMELANG 100A. Beginning Amharic, First Quarter**

4 units, Aut (Tefamariam, I)

**AMELANG 100B. Beginning Amharic, Second Quarter**

Continuation of 100A. Prerequisite 100A or consent of instructor.

4 units, Win (Tefamariam, I)

**AMELANG 100C. Beginning Amharic, Third Quarter**

Continuation of 100B. Prerequisite 100B or consent of instructor.

Fulfills the University Foreign Language Requirement.

4 units, Win (Tefamariam, I), Spr (Tefamariam, I)

**AMELANG 101A. Intermediate Amharic, First Quarter**

Continuation of 100C. Fulfills the University Foreign Language Requirement.

3 units, not given this year

**AMELANG 101B. Intermediate Amharic, Second Quarter**

Continuation of 101A.

3 units, not given this year

**AMELANG 101C. Intermediate Amharic, Third Quarter**

Continuation of 101B.

3 units, not given this year

**AMELANG 103A. Beginning Hausa, First Quarter**

3 units, not given this year

**AMELANG 103B. Beginning Hausa, Second Quarter**

Continuation of 103A.

3 units, not given this year

**AMELANG 103C. Beginning Hausa, Third Quarter**

Continuation of 103B.

3 units, not given this year

**AMELANG 106A. Beginning Swahili, First Quarter**

5 units, Aut (Rutechura, M), Spr (Rutechura, M)

**AMELANG 106B. Beginning Swahili, Second Quarter**

Continuation of 106A. Prerequisite 106A or consent of instructor.

5 units, Aut (Rutechura, M), Win (Rutechura, M)

**AMELANG 106C. Beginning Swahili, Third Quarter**

Continuation of 106B. Prerequisite 106B or consent of instructor.

Fulfills the University foreign language requirement.

5 units, Win (Rutechura, M), Spr (Rutechura, M)

**AMELANG 107A. Intermediate Swahili, First Quarter**

Continuation of 106C. Prerequisite 106C or consent of instructor.

5 units, Aut (Rutechura, M)

**AMELANG 107B. Intermediate Swahili, Second Quarter**

Continuation of 107A. Prerequisite 107A or consent of instructor.

5 units, Win (Rutechura, M)

**AMELANG 107C. Intermediate Swahili, Third Quarter**

Continuation of 107B. Prerequisite 107B or consent of instructor.

5 units, Spr (Rutechura, M)

**AMELANG 108A. Advanced Swahili, First Quarter**

Continuation of 107C. Prerequisite: 107C or consent of instructor.

5 units, Aut (Staff)

**AMELANG 108B. Advanced Swahili, Second Quarter**

Continuation of 108A. Prerequisite: 108A or consent of instructor.

5 units, Win (Staff)

**AMELANG 108C. Advanced Swahili, Third Quarter**

Continuation of 108B. Prerequisite: 108B or consent of instructor.

5 units, Spr (Mapunda, C)

**AMELANG 117A. Beginning Shona, First Quarter**

4 units, Aut (Staff)

**AMELANG 117B. Beginning Shona, Second Quarter**

Continuation of 117A. Prerequisite: 117A or consent of instructor.

4 units, Win (Staff)

**AMELANG 117C. Beginning Shona, Third Quarter**

Continuation of 117B. Prerequisite: 117B or consent of instructor.

Fulfills the University Foreign Language Requirement.

4 units, Spr (Sibanda, G)

**AMELANG 118A. Intermediate Shona, First Quarter**

Prerequisite: 117C or consent of instructor.

4 units, Aut (Staff)

3 units, Win (Staff)

**AMELANG 118C. Intermediate Shona, Third Quarter**

(Staff)

3 units, Spr (Sibanda, G)

**AMELANG 126. Reflection on the Other: The Jew in Arabic Literature, the Arab in Hebrew Literature**

How literary works outside the realm of western culture struggle with questions such as identity, minority, and the issue of the other. How the Arab is viewed in Hebrew literature and how the Jew is viewed in Arabic literature. Historical, political, and sociological forces that have contributed to the shaping of the writer's views. Arab and Jewish (Israeli) culture. GER:DB-Hum, EC-GlobalCom

4 units, Win (Shemtov, V)

**AMELANG 127. Land and Literature**

(Same as JEWISHST 102) Israel has captured the imagination of writers throughout the generations. It has been portrayed as promised land, holy land, homeland, empty land, occupied land, and land of dreams. Ideological views and political events have shaped writers' conception of Israel. Readings include poems, prose, and theoretical texts about place and literature. No knowledge of Hebrew required. GER:DB-Hum, EC-GlobalCom

4 units, not given this year

**AMELANG 128A. Beginning Hebrew, First Quarter**

(Same as JEWISHST 101A)

5 units, Aut (Porat, G; Greif, E)

**AMELANG 128B. Beginning Hebrew, Second Quarter**

(Same as JEWISHST 101B)

5 units, Win (Greif, E; Keydar, R)

**AMELANG 128C. Beginning Hebrew, Third Quarter**

(Same as JEWISHST 101C)

5 units, Spr (Porat, G; Greif, E)

**AMELANG 129A. Intermediate Hebrew, First Quarter**

(Same as JEWISHST 102A)

4 units, Aut (Shemtov, V)

**AMELANG 129B. Intermediate Hebrew, Second Quarter**

(Same as JEWISHST 102B)

4 units, Win (Shemtov, V)

**AMELANG 129C. Intermediate Hebrew, Third Quarter**

(Same as JEWISHST 102C)

4 units, Spr (Porat, G)

**AMELANG 130A. Advanced Hebrew, First Quarter**

(Same as JEWISHST 103A)

1-4 units, not given this year

**AMELANG 131. Hebrew Forum**

(Same as JEWISHST 104) Intermediate and advanced level. Bi-weekly Hebrew discussion on contemporary issues with Israeli guest speakers. Vocabulary enhancement. Focus on exposure to academic Hebrew.

2-4 units, Aut (Shemtov, V)

**AMELANG 133B. The African Forum, Second Quarter**

1 unit, not given this year

**AMELANG 140A. Beginning Yiddish, First Quarter**  
(Same as JEWISHST 104A) Reading, writing, and speaking.  
4 units, Aut (Levitow, J)

**AMELANG 140B. Beginning Yiddish, Second Quarter**  
(Same as JEWISHST 104B) Reading, writing, and speaking.  
4 units, Win (Levitow, J)

**AMELANG 140C. Beginning Yiddish, Third Quarter**  
(Same as JEWISHST 104C) Reading, writing, and speaking.  
4 units, Spr (Levitow, J)

**AMELANG 141A. Intermediate Yiddish, First Quarter**  
4 units, Aut (Levitow, J)

**AMELANG 141B. Intermediate Yiddish, Second Quarter**  
4 units, Win (Levitow, J)

**AMELANG 141C. Intermediate Yiddish, Third Quarter**  
4 units, Spr (Levitow, J)

**AMELANG 144A. First-Year Modern Persian, First Quarter**  
One-year sequence. Modern Persian for beginners; concentrates on rapidly developing basic skills in speaking, reading, writing, and understanding modern Persian. Strong emphasis is on the links between language and culture. The course is based on a fully integrated multimedia program. Students will learn the language with an emphasis on communicative and interactive classroom

activities.

4 units, Aut (Fahimi, S)

**AMELANG 144B. First-Year Modern Persian, Second Quarter**

Continuation of 144A. One-year sequence. Modern Persian for beginners; concentrates on rapidly developing basic skills in speaking, reading, writing, and understanding modern Persian. Strong emphasis is on the links between language and culture. The course is based on a fully integrated multimedia program. Students will learn the language with an emphasis on communicative and interactive classroom activities. Prerequisite: placement test, 144A or consent of instructor.

4 units, Win (Fahimi, S)

**AMELANG 144C. First-Year Modern Persian, Third Quarter**

Continuation of 144B. One-year sequence. Modern Persian for beginners; concentrates on rapidly developing basic skills in speaking, reading, writing, and understanding modern Persian. Strong emphasis is on the links between language and culture. The course is based on a fully integrated multimedia program. Students will learn the language with an emphasis on communicative and interactive classroom activities. Fulfills the University Foreign Language Requirement. Prerequisite: placement test, 144B, or consent of instructor.

4 units, Spr (Fahimi, S)

**AMELANG 145A. Second-Year Modern Persian, First Quarter**

Continuation of 144C. Expands students' proficiency in Persian language and culture at intermediate level through various texts and multimedia. It stresses oral fluency, written expression, and reading comprehension. Students will continue to learn the language with an emphasis on communicative and interactive classroom activities. Students will be introduced to contemporary as well as classical short poems by famous Persian poets like Rumi. Prerequisite: placement test, 144C or consent of instructor.

4 units, Aut (Fahimi, S)

**AMELANG 145B. Second-Year Modern Persian, Second Quarter**

Continuation of 145A. Expands students' proficiency in Persian language and culture at intermediate level through various texts and multimedia. It stresses oral fluency, written expression, and reading comprehension. Students will continue to learn the language with an emphasis on communicative and interactive classroom activities. Students will be introduced to contemporary as well as classical short poems by famous Persian poets like Rumi. Prerequisite: placement test, 144A or consent of instructor.

4 units, Win (Fahimi, S)

**AMELANG 145C. Second-Year Modern Persian, Third Quarter**

Continuation of 145B. expands students' proficiency in Persian language and culture at intermediate level through various texts and multimedia. It stresses oral fluency, written expression, and reading comprehension. Students will continue to learn the language with an emphasis on communicative and interactive classroom activities. Students will be introduced to contemporary as well as classical short poems by famous Persian poets like Rumi. Prerequisite: placement test, 144B or consent of instructor.

**GRADUATE COURSES IN AFRICAN AND MIDDLE EASTERN LANGUAGES**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**AMELANG 11G. Intensive Intermediate Arabic, Part A**

For Stanford graduate students restricted to 9 units. Speaking, listening, reading, and writing, emphasizing Arabic grammar and functional applications.

3-4 units, not given this year

**AMELANG 12G. Intensive Intermediate Arabic, Part B**

Continuation of 11G. For Stanford graduate students restricted to 9 units. Speaking, listening, reading, and writing, emphasizing Arabic grammar and functional applications.

3-4 units, not given this year

**AMELANG 13G. Intensive Intermediate Arabic, Part C**

Continuation of 12G. For Stanford graduate students restricted to 9 units. Speaking, listening, reading, and writing, emphasizing Arabic grammar and functional applications.

3-4 units, not given this year

**AMELANG 203A. Beginning Hausa, First Quarter**

For grads only.

3 units, Sum (Staff)

**AMELANG 203B. Beginning Hausa, Second Quarter**

For grads only

3 units, Sum (Staff)

**AMELANG 297. Directed Reading in African and Middle Eastern Languages**

May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**AMELANG 395. Graduate Studies in African and Middle Eastern Languages**

Prerequisite: consent of instructor.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**AFRICAN STUDIES (AFRICAST) COURSES****UNDERGRADUATE COURSES IN AFRICAN STUDIES**

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**AFRICAST 51. Congolese Dance**

(Same as AFRICAAM 51, DANCE 51) Movements and choreography from Central Africa. Elements unique to all African dance movement: body isolation, polyrhythmic movement, and body posture. Live drumming. Open to all levels of dancers.

1 unit, alternate years, not given this year

**AFRICAST 111. Education for All? The Global and Local in Public Policy Making in Africa**

(Same as AFRICAST 211) Policy making in Africa and the intersection of policy processes and their political and economic dimensions. The failure to implement agreements by international institutions, national governments, and nongovernmental organizations to promote education. Case studies of crowded and poorly equipped schools, overburdened and underprepared teachers, and underfunded education systems. GER:EC-GlobalCom, EC-GlobalCom

5 units, Spr (Samoff, J)

**AFRICAST 112. AIDS, Literacy, and Land: Foreign Aid and Development in Africa**

(Same as AFRICAST 212) Public policy issues, their roots, and the conflicts they engender. The policy making process: who participates, how, why, and with what results? Innovative approaches to contested policy issues. Foreign roles and their consequences. Case studies such as: a clinic in Uganda that addresses AIDS as a family and community problem; and strategies in Tanzania to increase girls' schooling. GER:EC-GlobalCom

5 units, Win (Samoff, J)

**AFRICAST 151. AIDS in Africa**

Medical, social, and political aspects of the HIV epidemic in sub-Saharan Africa including: biology, transmission, diagnosis, and treatment of HIV; mother-to-child transmission and breastfeeding; vaccines; community and activist responses to the HIV epidemic; economics of HIV treatment; governance and health; ethics in research and program implementation.

3 units, not given this year

**AFRICAST 199. Independent Study or Directed Reading**

May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**AFRICAST 200. The HIV/AIDS Epidemic in Tanzania: A Pre-Field Seminar**

Goal is to prepare students for an HIV/AIDS prevention, service-learning experience in Tanzania. Topics include: history of HIV/AIDS epidemic globally and in Tanzania; social and economic impact of AIDS; national and societal responses; ethical issues in crosscultural service learning; teaching for prevention; biology of HIV transmission, disease progression, and prevention; introduction to Tanzanian history and politics; HIV/AIDS and development; social, cultural, and economic context of HIV risk; and strategies for HIV prevention in Tanzania.

1 unit, Spr (Katzenstein, D)

**GRADUATE COURSES IN AFRICAN STUDIES**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**AFRICAST 211. Education for All? The Global and Local in Public Policy Making in Africa**

(Same as AFRICAST 111) Policy making in Africa and the intersection of policy processes and their political and economic dimensions. The failure to implement agreements by international institutions, national governments, and nongovernmental organizations to promote education. Case studies of crowded and poorly equipped schools, overburdened and underprepared teachers, and underfunded education systems.

5 units, Spr (Samoff, J)

**AFRICAST 212. AIDS, Literacy, and Land: Foreign Aid and Development in Africa**

(Same as AFRICAST 112) Public policy issues, their roots, and the conflicts they engender. The policy making process: who participates, how, why, and with what results? Innovative approaches to contested policy issues. Foreign roles and their consequences. Case studies such as: a clinic in Uganda that addresses AIDS as a family and community problem; and strategies in Tanzania to increase girls' schooling.

5 units, Win (Samoff, J)

**AFRICAST 278. Special Topics (Francophone Literature): From Exoticism to a Discourse of Auto-Representation**

(Same as COMPLIT 278, FRENLIT 278) Critical analysis of major issues relating to literatures in French language in and outside France. Focus is on exoticism and self-representation, with an emphasis on the evolution of mentalities, new sensitivities and the role of literature in developing individual or collective identity. Readings include Le Clézio, Memmi, Malouf, Lopes, Schwarz-Bart, Delaygue, Glissant, Todorov, Kane and others. Primary sources, secondary sources and film. Taught in French.

3-5 units, not given this year

**AFRICAST 299. Independent Study or Directed Reading**

1-10 units, Aut (Staff), Win (Samoff, J), Spr (Staff)

**AFRICAST 300. Contemporary Issues in African Studies**

Guest scholars present analyses of major African themes and topics. Brief response papers required. May be repeated for credit.

1 unit, Aut (Hubbard, L; Samoff, J), Win (Hubbard, L), Spr (Hubbard, L)

**AFRICAST 301A. The Dynamics of Change in Africa**

(Same as HISTORY 346, POLISCI 246P, POLISCI 346P) Crossdisciplinary colloquium; required for the M.A. degree in African Studies. Open to advanced undergraduates and PhD students. Addresses critical issues including patterns of economic collapse and recovery; political change and democratization; and political violence, civil war, and genocide. Focus on cross-cutting issues including the impact of colonialism; the role of religion, ethnicity, and inequality; and Africa's engagement with globalization.

4-5 units, Win (Weinstein, J)

**AFRICAST 302. Research Workshop**

Required for African Studies master's students. Student presentations.

1 unit, Spr (Roberts, R)

## AMERICAN STUDIES (AMSTUD) COURSES

### UNDERGRADUATE COURSES IN AMERICAN STUDIES

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**AMSTUD 1B. Media, Culture, and Society**

(Same as COMM 1B) The institutions and practices of mass media, including television, film, radio, and digital media, and their role in shaping culture and social life. The media's shifting relationships to politics, commerce, and identity. GER:DB-SocSci

5 units, Win (Turner, F)

**AMSTUD 2. Introduction to American National Government and Politics**

(Same as POLISCI 2) The role and importance of the ideal of democracy in the evolution of the American political system. American political institutions (the Presidency, Congress, and the Court) and political processes (the formation of political attitudes and voting) are examined against the backdrop of American culture and political history. The major areas of public policy in the current practice of the ideal of democracy. GER:DB-SocSci

5 units, Win (Fiorina, M; Frisby, T)

**AMSTUD 15. Global Flows: The Globalization of Hip Hop Art, Culture, and Politics**

(Same as CSRE 15) This course consists of film screenings, dialogues, and performances that examine and engage Hip Hop Cultures and artists from around the world. We will explore diverse scenes and artists, from the formation of new musical genres such as hiplife in Ghana, to the impact of the first Hip Hop concert in Morocco, to comparative investigations of race and citizenship in Japan, Cuba, Palestine, France, and the United States (including Black, Mexican and Arab-Americans).

1-2 units, not given this year

**AMSTUD 25N. Understanding the Sixties**

(F,Sem) (Same as SOC 25N) Stanford Introductory Seminar. Preference to freshmen. The tendency of critics to view the 60s through ideological lenses as either the best or worst of times has made a balanced perspective difficult to achieve. Goal is to provide a sociological explanation for the political and cultural turbulence that marked the era. The confluence of demographic, political, economic, and cultural trends that date back to at least the 30s. The ambiguous legacy of the 60s. Using the 60s to shed light on the 80s and 90s. Enrollment limited to 16. GER:DB-SocSci

3 units, Win (Staff)

**AMSTUD 51N. Comparative Fictions of Ethnicity**

(S,Sem) (Same as COMPLIT 51N, CSRE 51N) Stanford Introductory Seminar. We may know who we are, but we are, after all, social creatures. How does our sense of self interact with those

around us? How does literature provide a particular medium for not only self expression, but also for meditations on what goes into the construction of the Self? After all, don't we tell stories in response to the question, who are you? Besides a list of nouns and names and attributes, we give our lives flesh and blood in telling how we process the world. Our course focuses in particular on this question--Does this universal issue (who am I) become skewed differently when we add a qualifier before it, like ethnic? GER:DB-Hum

5 units, Win (Palumbo-Liu, D)

**AMSTUD 68N. Mark Twain and American Culture**

(F,Sem) (Same as ENGLISH 68N) Stanford Introductory Seminar. Preference to freshmen. Mark Twain has been called our Rabelais, our Cervantes, our Homer, our Tolstoy, our Shakespeare. Ernest Hemingway maintained that all modern American literature comes from one book by Mark Twain called *The Adventures of Huckleberry Finn*. President Franklin D. Roosevelt got the phrase New Deal from A Connecticut Yankee in King Arthur's Court. Class discussions will focus on how Twain's work illuminates and complicates his society's responses to such issues as race, technology, heredity versus environment, religion, education, and what it means to be American. GER:DB-Hum

4 units, Aut (Fishkin, S)

**AMSTUD 101. American Fiction into Film: How Hollywood Scripts and Projects Black and White Relations**

Movies and the fiction that inspires them; power dynamics behind production including historical events, artistic vision, politics, and racial stereotypes. What images of black and white does Hollywood produce to forge a national identity? How do films promote equality between the races? What is lost or gained in film adaptations of books? GER:DB-Hum, EC-AmerCul

3-5 units, Spr (Mesa, C)

**AMSTUD 107. Introduction to Feminist Studies**

(Same as CSRE 108, FEMST 101, HISTORY 107) Introduction to interdisciplinary feminist scholarship, which seeks to understand the creation, perpetuation, and critiques of gender inequalities. Topics include the historical emergence of feminist politics and contemporary analyses of work and family, health and sexuality, creativity, and politics. Close attention to the intersections of race, gender, ethnicity, and sexuality and to international, as well as U.S., perspectives. Students learn to think critically about gender in the past, present, and future. GER:DB-SocSci, EC-Gender

4-5 units, Aut (Freedman, E)

**AMSTUD 114N. Visions of the 1960s**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Introduction to the ideas, sensibility, and, to a lesser degree, the politics of the American 60s. Topics: the early 60s vision of a beloved community; varieties of racial, generational, and feminist dissent; the meaning of the counterculture; and current interpretive perspectives on the 60s. Film, music, and articles and books. GER:DB-Hum, EC-AmerCul

5 units, Aut (Gillam, R)

**AMSTUD 116. American Economic History**

(Same as ECON 116) The American economy from colonial times to the present, illustrating the role of history in economic life. Topics: U.S. economic development in global and comparative context; slavery as an economic system; origins and consequences of the American technology and business organization; economics of the Great Depression and New Deal; post-World War II economic performance and social change; recent U.S. economic record in historical perspective. Prerequisite: 1A. GER:DB-SocSci, EC-AmerCul

5 units, Spr (Wright, G)

**AMSTUD 120. Digital Media in Society**

(Same as COMM 120, COMM 220) (Graduate students register for 220.) Contemporary debates concerning the social and cultural impact of digital media. Topics include the historical origins of digital media, cultural contexts of their development and use, and influence of digital media on conceptions of self, community, and state. Priority to Juniors and Seniors. GER:DB-SocSci

4-5 units, not given this year

**AMSTUD 121. Masterpieces of American Literature**

(Same as ENGLISH 21, ENGLISH 121) (English majors and others taking 5 units, register for 121.) A survey of some of the

definitive texts of American writing, such as *Leaves of Grass*, *Benito Cereno*, *Adventures of Huckleberry Finn*, *The Waste Land*, *The Sun Also Rises*, *The Golden Apples*, and *The Crying of Lot 49*. GER:DB-Hum

3-5 units, not given this year

**AMSTUD 121X. Hip Hop, Youth Identities, and the Politics of Language**

(Same as AFRICAAM 121X, ANTHRO 121A, CSRE 121X, EDUC 121X, LINGUIST 155) Focus is on issues of language, identity, and globalization, with a focus on Hip Hop cultures and the verbal virtuosity within the Hip Hop nation. Beginning with the U.S., a broad, comparative perspective in exploring youth identities and the politics of language in what is now a global Hip Hop movement. Readings draw from the interdisciplinary literature on Hip Hop cultures with a focus on sociolinguistics and youth culture.

3-4 units, Spr (Alim, H)

**AMSTUD 123D. American Literature, 1855 to World War I**

(Same as ENGLISH 123D) A survey of American writers from Whitman to T.S. Eliot, including Emily Dickinson, Mark Twain, Stephen Crane, Frank Norris, Kate Chopin, Theodore Dreiser, and Henry James. Topics include the tension between romance and realism, the impact of naturalism and modernism, as well as race, gender, and the literary evolution of the American language. GER:DB-Hum

5 units, not given this year

**AMSTUD 123G. Mark Twain: A Fresh Look at an Icon and Iconoclast, 100 Years after His Death**

(Same as ENGLISH 123G) The vitality and versatility of a writer who has been called America's Rabelais, Cervantes, Homer, Tolstoy, and Shakespeare. Journalism, travel books, fiction, drama, and sketches by Mark Twain; how Twain engaged such issues as personal and national identity, satire and social justice, imperialism, race and racism, gender, performance, travel, and technology. What are Twain's legacies in 2010, the centennial of his death, the 175th anniversary of his birth, and the 125th anniversary of his most celebrated novel? Guests include actor Hal Holbrook. GER:DB-Hum, EC-AmerCul

3-5 units, not given this year

**AMSTUD 130. Introduction to Environmental Humanities: Cultures of Nature in the American West**

(Same as MTL 130) What do we mean when we use the terms nature and culture? This course examines these two complex ideas in the context of the nineteenth, twentieth, and twenty-first century American West. Topics include Los Angeles as a lived space and its place in the national spatial imaginary, urban environmental movements, mining cultures, toxics legacies, geographies of social difference, animal studies, and biodiversity and Native American DNA databases. The approach is interdisciplinary, and includes environmental history, cultural geography, critical race studies, literature, and documentary film methodologies and texts. GER:DB-Hum

3-5 units, not given this year

**AMSTUD 132. American Art and Culture, 1528-1860**

(Same as ARTHIST 132, ARTHIST 332) The visual arts and literature of the U.S. from the beginnings of European exploration to the Civil War. Focus is on questions of power and its relation to culture from early Spanish exploration to the rise of the middle classes. Cabeza de Vaca, Benjamin Franklin, John Singleton Copley, Phillis Wheatley, Charles Willson Peale, Emerson, Hudson River School, American Genre painters, Melville, Hawthorne and others. GER:DB-Hum

4 units, Win (Wolf, B)

**AMSTUD 137. The Dialogue of Democracy**

(Same as COMM 137W, COMM 237, POLISCI 232T, POLISCI 332T) All forms of democracy require some kind of communication so people can be aware of issues and make decisions. This course looks at competing visions of what democracy should be and different notions of the role of dialogue in a democracy. Is it just campaigning or does it include deliberation? Small scale discussions or sound bites on television? Or social media? What is the role of technology in changing our democratic practices, to mobilize, to persuade, to solve public problems? This course will include readings from political theory

about democratic ideals - from the American founders to J.S. Mill and the Progressives to Joseph Schumpeter and modern writers skeptical of the public will. It will also include contemporary examinations of the media and the internet to see how those practices are changing and how the ideals can or cannot be realized. GER:EC-EthicReas

4-5 units, Win (Fishkin, J)

**AMSTUD 139B. American Women Writers, 1850-1920**

(Same as ENGLISH 139B) The ways in which female writers negotiated a series of literary, social, and intellectual movements, from abolitionism and sentimentalism in the nineteenth century to Progressivism and avant-garde modernism in the twentieth. Authors include Harriet Beecher Stowe, Harriet Jacobs, Rebecca Harding Davis, Emily Dickinson, Kate Chopin, Edith Wharton, Gertrude Stein, Willa Cather, and Charlotte Perkins Gilman. GER:DB-Hum

5 units, Win (Richardson, J)

**AMSTUD 140. Stand Up Comedy and the Great American Joke Since 1945**

Development of American Stand Up Comedy in the context of social and cultural eruptions after 1945, including the Borscht Belt, the Chitlin' Circuit, the Cold War, censorship battles, Civil Rights and other social movements of the 60s and beyond. The artistry of stories, monologues, jokes, impersonations, persona, social satire, scatology, obscenity, riffs, rants, shtick, and more by such artists as Lenny Bruce, Dick Gregory, Richard Pryor, George Carlin, Margaret Cho, Sarah Silverman, Jon Stewart, Stephen Colbert, as well as precursors such as Mark Twain, minstrelsy and vaudeville and related films, TV shows, poems and other manifestations of similar sensibilities and techniques. GER:DB-Hum

3-5 units, Aut (Obenzinger, H)

**AMSTUD 142. The Literature of the Americas**

(Same as COMPLIT 142, ENGLISH 172E) This course offers a wide-ranging overview of the literatures of the Americas in comparative perspective, emphasizing continuities and crises that are common to North American, Central American, and South American literatures as well as the distinctive national and cultural elements of a diverse array of primary works. Topics include the definitions of such concepts as empire and colonialism, the encounters between worldviews of European and indigenous peoples, the emergence of creole and racially mixed populations, slavery, the New World voice, myths of America as paradise or utopia, the coming of modernism, twentieth-century avant-gardes, and distinctive modern episodes; the Harlem Renaissance, the Beats, magic realism, Noigandres; in unaccustomed conversation with each other. GER:DB-Hum, EC-AmerCul

5 units, Win (Greene, R; Saldivar, R)

**AMSTUD 143. Introduction to African American Literature**

(Same as AFRICAAM 43, ENGLISH 43, ENGLISH 143) (English majors and others taking 5 units, register for 143.) African American literature from its earliest manifestations in the spirituals, trickster tales, and slave narratives to recent developments such as black feminist theory, postmodern fiction, and hip hop lyricism. We will engage some of the defining debates and phenomena within African American cultural history, including the status of realist aesthetics in black writing; the contested role of literature in black political struggle; the question of diaspora; the problem of intra-racial racism; and the emergence of black internationalism. Attuned to the invariably hybrid nature of this tradition, we will also devote attention to the discourse of the Enlightenment, modernist aesthetics, and the role of Marxism in black political and literary history. GER:DB-Hum, EC-AmerCul

3-5 units, Aut (Rasberry, G)

**AMSTUD 146. Asian American Culture and Community**

(Same as COMPLIT 146, ASNAMST 146S, CSRE 146S) An examination of the history of Asians in America via one case history: the International Hotel in San Francisco. Background history of Asians in America, and the specifics of the I Hotel case as involving the convergence of global and local economies, urban redevelopment, and housing issues for minorities. Focus on the convergence of community and cultural production. Service learning component involving community work at the Manilatown Heritage Foundation in San Francisco. Service Learning Course (certified by Haas Center). GER:DB-Hum

5 units, Spr (Palumbo-Liu, D)

**AMSTUD 146C. Hemingway, Hurston, Faulkner, and Fitzgerald**

(Same as ENGLISH 146C) While Hemingway and Fitzgerald were flirting with the expatriate avant-garde in Europe, Hurston and Faulkner were performing anthropological field-work in the local cultures of the American South. Focus on the tremendous diversity of concerns and styles of four writers who marked America's coming-of-age as a literary nation with their multifarious experiments in representing the regional and the global, the racial and the cosmopolitan, the macho and the feminist, the decadent and the impoverished. GER:DB-Hum, EC-AmerCul

5 units, Spr (Jones, G)

**AMSTUD 150. American Literature and Culture to 1855**

(Same as ENGLISH 123) A survey of early American writings, including sermons, poetry, captivity and slave narratives, essays, autobiography, and fiction, from the colonial era to the eve of the Civil War. GER:DB-Hum, EC-AmerCul

5 units, Spr (Richardson, J)

**AMSTUD 150A. Colonial and Revolutionary America**

(Same as HISTORY 150A) (Same as HISTORY 50A. History majors and others taking 5 units, register for HISTORY 150A.) Survey of the origins of American society and polity in the 17th and 18th centuries. Topics: the migration of Europeans and Africans and the impact on native populations; the emergence of racial slavery and of regional, provincial, Protestant cultures; and the political origins and constitutional consequences of the American Revolution. GER:DB-SocSci, EC-AmerCul

5 units, Aut (Winterer, C)

**AMSTUD 150B. 19th-Century America**

(Same as AFRICAAM 150B, HISTORY 150B) (Same as HISTORY 50B. History majors and others taking 5 units, register for 150B.) Territorial expansion, social change, and economic transformation. The causes and consequences of the Civil War. Topics include: urbanization and the market revolution; slavery and the Old South; sectional conflict; successes and failures of Reconstruction; and late 19th-century society and culture. GER:DB-SocSci, EC-AmerCul

5 units, Win (White, R)

**AMSTUD 150C. The United States in the Twentieth Century**

(Same as HISTORY 150C) (Same as HISTORY 50C. History majors and others taking 5 units, register for 150C.) Major political, economic, social, and diplomatic developments in the U.S. Themes: the economic and social role of government (Progressive, New Deal, Great Society, and Reagan-Bush eras); ethnic and racial minorities in society (mass immigration at the turn of the century and since 1965, the civil rights era of the 50s and 60s); the changing status of women since WW II; shifting ideological bases, institutional structures, and electoral characteristics of the political system (New Deal and post-Vietnam); determinants of foreign policy in WW I and II, and the Cold War. GER:DB-SocSci, EC-AmerCul

5 units, Spr (Camarillo, A)

**AMSTUD 152A. Mutually Assured Destruction: American Culture and the Cold War**

(Same as ENGLISH 152A) The temperature of the early Cold War years via readings of Soviet and U.S. propaganda; documentary film and film noir; fiction by Bellow, Ellison, O'Connor, and Mailer; social theory by Arendt, the New York Intellectuals, and the Frankfurt School; and political texts such as Kennan's Sources of Soviet Conduct, the Truman Doctrine speech, and the National Security Council Report 68. Major themes include the discourse of totalitarianism, MacCarthyism, strategies of containment, the nuclear threat, the figure of the outsider and the counterculture, and the cultural shift from sociological to psychological idioms. GER:DB-Hum

5 units, not given this year

**AMSTUD 152D. DuBois and American Culture**

(Same as AFRICAAM 152, ENGLISH 152D) His life and career. Focus on first half of his life from his Harvard doctoral dissertation to the end of the Harlem Renaissance in which he played a crucial role. Sources include his books on history and sociology, scholarly essays, novels, and journals that he edited. AAAS WIM course. GER:DB-Hum, EC-AmerCul

5 units, Spr (Elam, M)

**AMSTUD 152G. Global Harlem Renaissance**

(Same as AFRICAAM 152G, ENGLISH 152G) Examination of the explosion of African American artistic expression during 1920s and 30s New York known as the Harlem Renaissance. Amiri Baraka once referred to the Renaissance as a kind of vicious Modernism, as a BangClash that impacted and was impacted by political, cultural and aesthetic changes not only in the U.S. but Europe, the Caribbean and Latin America. Focus on the literature, graphic arts, and the music of the era in this global context. GER:DB-Hum, EC-AmerCul

5 units, not given this year

**AMSTUD 154. American Intellectual and Cultural History to the Civil War**

(Same as HISTORY 154) (Same as HISTORY 54. History majors and others taking 5 units, register for 154.) How Americans considered problems such as slavery, imperialism, and sectionalism. Topics include: the political legacies of revolution; biological ideas of race; the Second Great Awakening; science before Darwin; reform movements and utopianism; the rise of abolitionism and proslavery thought; phrenology and theories of human sexuality; and varieties of feminism. Sources include texts and images. GER:DB-Hum, EC-AmerCul

5 units, Spr (Winterer, C)

**AMSTUD 156H. Women and Medicine in US History: Women as Patients, Healers and Doctors**

Women's bodies in sickness and health, and encounters with lay and professional healers from the 18th century to the present. Historical construction of thought about women's bodies and physical limitations; sexuality; birth control and abortion; childbirth; adulthood; and menopause and aging. Women as healers, including midwives, lay physicians, the medical profession, and nursing. GER:EC-Gender

5 units, Aut (Horn, M)

**AMSTUD 156H. Women and Medicine in US History: Women as Patients, Healers and Doctors**

Women's bodies in sickness and health, and encounters with lay and professional healers from the 18th century to the present. Historical construction of thought about women's bodies and physical limitations; sexuality; birth control and abortion; childbirth; adulthood; and menopause and aging. Women as healers, including midwives, lay physicians, the medical profession, and nursing. GER:EC-Gender

5 units, Aut (Horn, M)

**AMSTUD 159. Introduction to Asian American History**

(Same as HISTORY 159) (Same as HISTORY 59. History majors and others taking 5 units, register for 159.) The historical experience of people of Asian ancestry in the U.S. Immigration, labor, community formation, family, culture and identity, and contemporary social and political controversies. Readings: interpretative texts, primary material, and historical fiction. (Chang)

5 units, Aut (Chang, G)

**AMSTUD 160. Perspectives on American Identity**

Required for American Studies majors. Changing interpretations of American identity and Americanness. GER:DB-Hum, EC-AmerCul

5 units, Win (Gillam, R), Spr (Richardson, J)

**AMSTUD 161. WOMEN IN MODERN AMERICA**

(Same as CSRE 162, HISTORY 161) Considers the political, economic, and social development of women in the United States during a long twentieth century. How have women been shaped or constrained by gendered conceptions of work, reproduction, education, family, and culture? Have all women reacted similarly to wars and depression or domestic and foreign policy? Through personal narratives and historical accounts, the course will answer these questions, observing how women negotiated gender, race, sexuality, and class difference to achieve greater opportunity and citizenship rights. GER:DB-SocSci, EC-Gender

4-5 units, Spr (Sbardellati, L)

**AMSTUD 163S. Post Black Drama in the Age of Obama**

(Same as AFRICAAM 163S, CSRE 163S, DRAMA 163S, DRAMA 363S) This course will examine works of the new millennium that confront questions of African American experience. These plays are written by African American and non-

black writers. In analyzing these works, this course will investigate such questions as: In a time that has been called 'Post Race' or 'Post Soul' or even 'Post Black,' what can we discern about African American drama? How do these plays reflect or contradict such labeling? How do these works speak to our times? Who does the form relate to in matters of content in these works? What do these works tell us about the contemporary constructions and meanings of blackness? GER:DB-Hum

5 units, *Win (Elam, H)*

**AMSTUD 164C. From Freedom to Freedom Now: African American History, 1865-1965**

(Same as HISTORY 164C) (Same as HISTORY 64C. History majors and others taking 5 units, register for 164C.) Explores the working lives, social worlds, political ideologies and cultural expressions of African Americans from emancipation to the early civil rights era. Topics include: the transition from slavery to freedom, family life, work, culture, leisure patterns, resistance, migration and social activism. Draws largely on primary sources including autobiographies, memoirs, letters, personal journals, newspaper articles, pamphlets, speeches, literature, film and music. GER:DB-SocSci, EC-AmerCul

5 units, *not given this year*

**AMSTUD 165. History of Higher Education in the U.S.**

(Same as EDUC 165, EDUC 265, HISTORY 158C) Major periods of evolution, particularly since the mid-19th century. Premise: insights into contemporary higher education can be obtained through its antecedents, particularly regarding issues of governance, mission, access, curriculum, and the changing organization of colleges and universities. (SSPEP-APA)

3-5 units, *Win (Labaree, D)*

**AMSTUD 166. Introduction to African American History: The Modern African American Freedom Struggle**

(Same as AFRICAAM 166, HISTORY 166) Focus is on political thought and protest movements after 1930. Individuals who have shaped and been shaped by modern African American struggles for freedom and justice. Sources include audiovisual materials. Research projects required for fifth unit. GER:DB-SocSci, EC-AmerCul

4-5 units, *not given this year*

**AMSTUD 167. The Hollywood Musical**

(Same as FILMSTUD 167, FILMSTUD 367) The sense of physical, emotional, aesthetic, and social liberation in this most colorful of film genres. Musicals as a place for the staging of issues of identity, including the impact of African American and Jewish culture, and issues of gay reception and interpretation. Attention to technologies of sound and color, the relation to vaudeville and Broadway, and ethnic and aesthetic diversity. Musicals as the epitome of filmic illusionism and the Hollywood studio system; the implications of their seduction of audiences; the meaning of spectacle, the centrality of performance. Busby Berkeley, Fred Astaire, Judy Garland, Bob Fosse, Stanley Donen, Gene Kelly, Vincente Minnelli. GER:DB-Hum

4 units, *not given this year*

**AMSTUD 179. Introduction to American Law**

(Same as POLISCI 122, PUBLPOL 302A) For undergraduates. The structure of the American legal system including the courts; American legal culture; the legal profession and its social role; the scope and reach of the legal system; the background and impact of legal regulation; criminal justice; civil rights and civil liberties; and the relationship between the American legal system and American society in general. GER:DB-SocSci

3-5 units, *Aut (Friedman, L)*

**AMSTUD 183. Border Crossings and American Identities**

(Same as ANTHRO 183A, CSRE 183) How novelists, filmmakers, and poets perceive racial, ethnic, gender, sexual preference, and class borders in the context of a national discussion about the place of Americans in the world. How Anna Deavere Smith, Sherman Alexie, or Michael Moore consider redrawing such lines so that center and margin, or self and other, do not remain fixed and divided. How linguistic borderlines within multilingual literature by Caribbean, Arab, and Asian Americans function. Can Anzaldúa's conception of borderlands be constructed through the matrix of language, dreams, music, and cultural memories in these American narratives? Course includes examining one's own

identity. GER:DB-Hum, EC-AmerCul

5 units, *Aut (Duffey, C)*

**AMSTUD 183C. Feminism and American Literature**

(Same as ENGLISH 183C, JEWISHST 153C) Exploration of the ways in which an eclectic group of American writers from the 19th century to the 20th have endeavored to enlarge the canvas on which women can paint their lives. Readings include stories, novels, journalism, poetry and drama that engage the social, cultural, and political forces that can shape the kinds of futures students can imagine for themselves--forces that are further inflected by issues of race, ethnicity and class. GER:DB-Hum, EC-Gender

5 units, *Win (Fishkin, S)*

**AMSTUD 185. American Studies Internship**

Restricted to declared majors. Practical experience working in a field related to American Studies for six to ten weeks. Students make internship arrangements with a company or agency, under the guidance of a sponsoring faculty member, and with the consent of the director or a program coordinator of American Studies. Required paper focused on a topic related to the internship and the student's studies. May be repeated for credit.

1-3 units, *Aut (Staff), Win (Fishkin, S), Spr (Staff), Sum (Staff)*

**AMSTUD 186. Tales of Three Cities: New York, Chicago, Los Angeles**

(Same as ENGLISH 186) How urban form and experience shape literary texts and how literary texts participate in the creation of place, through the literature of three American cities as they ascended to cultural and iconographical prominence: New York in the early to mid 19th century; Chicago in the late 19th and early 20th centuries; and Los Angeles in the mid to late 20th century. GER:DB-Hum

5 units, *not given this year*

**AMSTUD 195. Individual Work**

1-5 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**AMSTUD 210. Critical Theory and The Environment**

(Same as ANTHRO 210B, MTL 210) Critical theoretical approaches (such as cultural studies, Marxism, postcolonial theory, cultural geography, feminism, and science studies) have generally been underutilized as methodologies for grappling with environmental situations, yet they hold much promise for addressing their complexity. This course asks: How does critical theory about the environment construe the current situation? What kinds of political or technological solutions do these theories call for or imply? The first half of the seminar introduces critical approaches and methodologies in relation to the environment. In the second section, we will use a variety of theoretical approaches to address Native American environmental politics, water, agriculture, toxics, and animals.

3-5 units, *Spr (Koelle, A)*

**AMSTUD 214. The American 1960s: Thought, Protest, and Culture**

The meaning of the American 60s emphasizing ideas, culture, protest, and the new sensibility that emerged. Topics: black protest, the new left, the counterculture, feminism, the new literature and journalism of the 60s, the role of the media in shaping dissent, and the legacy of 60s protest. Interpretive materials from film, music, articles, and books. GER:DB-Hum, EC-AmerCul

5 units, *Aut (Gillam, R)*

**AMSTUD 240. Sister Arts: Image and Text in America**

(Same as ARTHIST 240) Seminar focuses equally on painting and literature in American history. Classes meet twice per week: one session devoted to a literary text, and the other to a visual artifact. The course is organized topically, placing text and images into dialogue with each other, asking for example, how Glen Ligon's contemporary reworking of nineteenth century runaway slave posters relates to Toni Morrison's *Beloved*, or how Melville's story of urban life, *Bartleby the Scrivener*, alludes to Hudson River School painting. GER:DB-Hum

5 units, *not given this year*

**AMSTUD 240A. Pre-Honors Seminar**

Methods, interpretations, and issues pertinent to honors work in American Studies. Open to juniors interested in honors.

2-5 units, *Spr (Gillam, R)*

**AMSTUD 250. Senior Research**

Research and writing of senior honors thesis under the supervision of a faculty member. The final grade for the thesis is assigned by the chair based on the evaluations of the primary thesis adviser and a second reader appointed by the program. Prerequisite: consent of chair.

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**AMSTUD 251C. The American Enlightenment**

(Same as HISTORY 251C) Eighteenth century America was like a laboratory for exciting new social, political, religious, scientific, and artistic theories that we collectively call the Enlightenment. With readings in original texts and studies of material culture, examines ways in which eighteenth century Americans applied Enlightenment thinking to some of the most important problems and questions of their time. What was the best kind of government, and how could this be known? Was the new world of America fundamentally different or the same as Europe, and did animals, plants, and people improve or worsen there? What creatures (children, apes, women, slaves) were considered unreasonable in the Age of Reason, and why? What was the place of religion and passion in the Age of Reason? GER:DB-Hum

*5 units, not given this year*

**AMSTUD 253. American Wonders**

(Same as ARTHIST 253) Seminar on American art, literature and culture of the nineteenth century organized around the exhibition, *The Great American Hall of Wonders*, on view at the Smithsonian American Art Museum. Taking our cue from the exhibition, course focuses on three topics from the world of nature and three from technology, all serving as cultural lightning rods during the period: the buffalo, the Giant Sequoia, Niagara Falls, the clock, the gun and the railroad. The class travels to Washington, D.C. to view the exhibition during an extended weekend.

*5 units, Aut (Wolf, B)*

**AMSTUD 255D. Racial Identity in the American Imagination**

(Same as AFRICAAM 255, CSRE 255D, HISTORY 255D, HISTORY 355D) Major historical transformations shaping the understanding of racial identity and how it has been experienced, represented, and contested in American history. Topics include: racial passing and racial performance; migration, immigration, and racial identity in the urban context; the interplay between racial identity and American identity; the problems of class, gender, and sexuality in the construction of racial identity. Sources include historical and legal texts, memoirs, photography, literature, film, and music. GER:DB-SocSci, EC-AmerCul

*4-5 units, Win (Hobbs, A)*

**AMSTUD 258. Topics in the History of Sexuality: Sexual Violence**

(Same as CSRE 192E, HISTORY 258, HISTORY 358) Recent historical interpretations of sexual violence, with particular attention to the intersections of gender and race in the construction of rape, from early settlement through the twentieth century. Topics include the legal prosecution of rape in Early America; the racialization of rape in the U.S.; lynching and anti-lynching in the U.S.; and feminist responses to sexual violence. GER:DB-SocSci, EC-Gender

*4-5 units, not given this year*

**AMSTUD 268E. American Foreign Policy and International History since 1941**

(Same as HISTORY 268E, HISTORY 368E) Major events and interpretations from WW II to the war in Iraq. Issues of race, expansionism and power; nuclear weapons; and war. GER:DB-SocSci

*4-5 units, Spr (Bernstein, B)*

**GRADUATE COURSES IN AMERICAN STUDIES**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**AMSTUD 201. History of Education in the United States**

(Same as EDUC 201, HISTORY 158B) How education came to its current forms and functions, from the colonial experience to the present. Focus is on the 19th-century invention of the common

school system, 20th-century emergence of progressive education reform, and the developments since WW II. The role of gender and race, the development of the high school and university, and school organization, curriculum, and teaching. (SSPEP)

*3-5 units, not given this year*

**AMSTUD 257. Journalism and Imaginative Writing in America**

(Same as COMM 278, ENGLISH 257) Walt Whitman spent twenty-five years as a journalist before publishing his first book of poems. Mark Twain was a journalist for twenty years before publishing his first novel. Topics include examination of how writers' backgrounds in journalism shaped the poetry or fiction for which they are best known; study of recent controversies surrounding writers who blurred the line between journalism and fiction. Writers include Whitman, Fanny Fern, Twain, Pauline Hopkins, Theodore Dreiser, Charlotte Perkins Gilman, Ernest Hemingway, Meridel LeSueur.

*5 units, not given this year*

**AMSTUD 261A. Geography, Time, and Trauma in Asian American Literature**

(Same as ASNAMST 187, ENGLISH 261A) The notion that homes can be stable locations for cultural, racial, ethnic, and similarly situated identity categories. The possibility that there really is no place like home for Asian American subjects. How geography, landscape, and time situate traumas within fictional Asian American narratives.

*5 units, not given this year*

**AMSTUD 261E. Mixed Race Literature in the U.S. and South Africa**

(Same as AFRICAAM 261E, ENGLISH 261E) As scholar Werner Sollors recently suggested, novels, poems, stories about interracial contacts and mixed race constitute an orphan literature belonging to no clear ethnic or national tradition. Yet the theme of mixed race is at the center of many national self-definitions, even in our U.S. post-Civil Rights and South Africa's post-Apartheid era. This course examines aesthetic engagements with mixed race politics in these trans- and post-national dialogues, beginning in the 1700s and focusing on the 20th and 21st centuries.

*5 units, not given this year*

**AMSTUD 261F. Gender and Sexuality in Asian American Literature**

(Same as ASNAMST 188, ENGLISH 261F) How writers and representations dialogue, challenge, resist, and complicate such formative constructions of gendered/sexual identities. How queer Asian Americans face multiple negations that include potential expulsion from their own families and from various communities. Authors include Bharati Mukherjee, Russell Leong, Suki Kim, Shawn Wong, Louis Chu, Lawrence Chua, Catherine Liu, Jessica Hagedorn, Timothy Liu, Shani Mootoo, David Mura, among others. Secondary readings will include literary criticism, feminist and queer theory.

*5 units, not given this year*

**AMSTUD 262C. African American Literature and the Retreat of Jim Crow**

(Same as ENGLISH 262C) After the unprecedented carnage of WWII, the postwar era witnessed the slow decline of the segregated Jim Crow order and the onset of landmark civil rights legislation. What role did African American literature and culture play in this historical process? What does this shift in racial theory and praxis mean for black literary production, a tradition constituted by the experience of slavery and racial oppression? Focus on these questions against the backdrop of contemporaneous developments: the onset of the Cold War, decolonization and the formation of the Third World, and the emergence of the new liberalism.

*5 units, not given this year*

**AMSTUD 262D. African American Poetics**

(Same as AFRICAAM 262D, ENGLISH 262D) Examination of African American poetic expressive forms from the 1700s to the 2000s, considering the central role of the genre--from sonnets to spoken word, from blues poetry to new media performance--in defining an evolving literary tradition and cultural identity.

*5 units, not given this year*

# ANTHROPOLOGY (ANTHRO) COURSES

## UNDERGRADUATE COURSES IN ANTHROPOLOGY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**ANTHRO 1. Introduction to Cultural and Social Anthropology**  
(Same as ANTHRO 201) Crosscultural anthropological perspectives on human behavior, including cultural transmission, social organization, sex and gender, culture change, technology, war, ritual, and related topics. Case studies illustrating the principles of the cultural process. Films. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (Ferguson, J), Sum (Staff)

**ANTHRO 3. Introduction to Prehistoric Archeology**  
(Same as ARCHLGY 1) Aims, methods, and data in the study of human society's development from early hunters through late prehistoric civilizations. Archaeological sites and remains characteristic of the stages of cultural development for selected geographic areas, emphasizing methods of data collection and analysis appropriate to each. GER:DB-SocSci, EC-GlobalCom

3-5 units, Aut (Rick, J)

**ANTHRO 4. Language and Culture**  
Comparative approach, using examples from many languages. Emphasis is on generally non-Western speech communities. Topics include: the structure of language; the theory of signs; vocabulary and culture; grammar, cognition, and culture (linguistic relativism and determinism); encodability of cultural information in language; language adaptiveness to social function; the ethnography of speaking; registers; discourse (conversation, narrative, verbal art); language and power; language survival and extinction; and linguistic ideology (beliefs about language). GER:DB-SocSci

4-5 units, not given this year

**ANTHRO 6. Human Origins**  
(Same as ANTHRO 206, HUMBIO 6) The human fossil record from the first non-human primates in the late Cretaceous or early Paleocene, 80-65 million years ago, to the anatomically modern people in the late Pleistocene, between 100,000 to 50,000 B.C.E. Emphasis is on broad evolutionary trends and the natural selective forces behind them. GER: DB-NatSci

5 units, not given this year

**ANTHRO 6A. Introduction to Biological Anthropology: Biological Variation and Evolution in the Human Species**  
Humans are amazingly diverse, differing in size, shape, color, and myriad less tangible dimensions. What is the significance of such diversity and how did it come to be? This course introduces the study of biological variation and evolution of the human species. It draws on evidence from a variety of disciplines (i.e. evolutionary biology, comparative anatomy, paleontology, archaeology and genetics) to foster an appreciation for human variation grounded in a scientific framework. Major topics to be discussed include evolution and adaptation, primate taxonomy, the fossil record, human growth and development, phenotypic differences within and among modern human populations, and variation in disease susceptibility. No Prerequisite.

3-5 units, Aut (Melillo, S)

**ANTHRO 7. Introduction to Forensic Anthropology**  
The application of anthropological and archaeological methods to forensics. Topics include the recovery and identification of individuals via skeletal and DNA analysis, reconstruction of premortem and postmortem histories of remains, analysis of mass graves, human rights issues, surveillance tape analysis, analysis of crime scene materials, and expert witness testimony. Legal and ethical dimensions. GER: DB-NatSci

3 units, Spr (Staff)

**ANTHRO 12. Anthropology and Art**  
Modernity. How the concept of art appears timeless and commonsensical in the West, and with what social consequences.

Historicizing the emergence of art. Modernist uses of primitive, child art, asylum, and outsider art. GER:DB-Hum

5 units, not given this year

**ANTHRO 14. Introduction to Anthropological Genetics**  
For upper division undergraduates. The extent and pattern of variation among human genomes, the origin of these patterns in human evolution, and the social and medical impact of recent discoveries. Topics include: the Human Genome Project; human origins; ancient DNA; genetic, behavioral, linguistic, cultural, and racial diversity; the role of disease in shaping genetic diversity; DNA forensics; genes and reproductive technology. GER: DB-NatSci

3 units, not given this year

**ANTHRO 15. Sex and Gender**  
Commonality and diversity of gender roles in crosscultural perspective. Cultural, ecological, and evolutionary explanations for such diversity. Theory of the evolution of sex and gender, changing views about men's and women's roles in human evolution, conditions under which gender roles vary in contemporary societies, and issues surrounding gender equality, power, and politics. GER:DB-SocSci, EC-Gender

3 units, not given this year

**ANTHRO 16. Native Americans in the 21st Century: Encounters, Identity, and Sovereignty in Contemporary America**  
(Same as NATIVEAM 16) What does it mean to be a Native American in the 21st century? Beyond traditional portrayals of military conquests, cultural collapse, and assimilation, the relationships between Native Americans and American society. Focus is on three themes leading to in-class moot court trials: colonial encounters and colonizing discourses; frontiers and boundaries; and sovereignty of self and nation. Topics include gender in native communities, American Indian law, readings by native authors, and Indians in film and popular culture. GER:DB-SocSci, EC-AmerCul

5 units, Win (Wilcox, M)

**ANTHRO 18. Peopling of the Globe: Changing Patterns of Land Use and Consumption Over the Last 50,000 Years**  
(Same as ARCHLGY 12, EARTHSYS 21, HUMBIO 182) Fossil, genetic and archaeological evidence suggest that modern humans began to disperse out of Africa about 50,000 years ago. Subsequently, humans have colonized every major landmass on earth. This class introduces students to the data and issues regarding human dispersal, migration and colonization of continents and islands around the world. We explore problems related to the timing and cause of colonizing events, and investigate questions about changing patterns of land use, demography and consumption. Students are introduced to critical relationships between prehistoric population changes and our contemporary environmental crisis. GER:DB-SocSci

3-5 units, Aut (Bird, D)

**ANTHRO 19Q. Hauntings, Visions, and Prophecy**  
Preference to sophomores. Why do people see ghosts? Why do people believe that stars foretell the future? When do people see demons and angels? Focus is on the conditions under which people experience themselves as having sensory evidence of supernatural phenomena and the role of training and expectation in the process. Intellectual exploration of what is known from the ethnographic, historical, and psychological record. Practical experimental projects involve attempting to induce positive supernatural experience. Prerequisite: consent of instructor.

1-3 units, not given this year

**ANTHRO 21N. The Anthropology of Globalization**  
(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Anthropological approach to how cultural change, economic restructuring, and political mobilization are bound up together in the process of globalization. GER:DB-SocSci

4 units, Aut (Ebron, P)

**ANTHRO 22. Archaeology of North America**  
Why and how people of N. America developed. Issues and processes that dominate or shape developments during particular periods considering the effects of history and interactions with physical and social environment. Topics include the peopling of the New World, explaining subsequent diversity in substance and

settlement adaptations, the development of social complexity, and the impact of European contact. GER:DB-SocSci, EC-AmerCul  
3-5 units, not given this year

**ANTHRO 22N. Ethnographies of North America: An Introduction to Cultural and Social Anthropology**

Preference to freshmen. Ethnographic look at human behavior, including cultural transmission, social organization, sex and gender, culture change, and related topics in N. America. Films. GER:DB-SocSci

3-4 units, not given this year

**ANTHRO 23N. Glimpses of Divinity**

Preference to freshmen. How human beings search for and identify the presence of the divine in everyday human life. Sources include spiritual classics in the Christian, Jewish, and Hindu traditions including works by Augustine, Teresa of Avila, Jonathan Edwards, the Bhagavad Gita, the Zohar, and some ethnographies of non-literate traditions.

3 units, not given this year

**ANTHRO 24N. Maya Hieroglyphic Writing**

Preference to freshmen. Decipherment of classic Maya writing. Principles of archaeological decipherment. Maya calendrical, astronomical, historical, mythological, and political texts on stone, wood, bone, shell, murals, ceramics, and books (screenfold codices). Archaeology and ethnohistory of Maya scribal practice and literacy. Related Mesoamerican writing systems. The evolution of writing and the relevance of writing to theories of culture and civilization. GER:DB-SocSci, EC-GlobalCom

4 units, not given this year

**ANTHRO 25N. Contemporary Japanese Popular Culture**

This is a seminar focusing on the intersection between politics and popular culture in contemporary Japan. It will survey a range of social and political implications of practices of popular culture. Topics include representations of gender in J-pop, manga, and anime, the otaku culture and its pathologization. Students will be introduced to theories of popular culture in general, and a variety of contemporary anthropological studies on Japanese popular culture in particular as well.

1-3 units, not given this year

**ANTHRO 26N. Hauntings, Visions, and Prophecy**

(F,Sem) Stanford Introductory Seminar. This course explores the conditions under which people have experiences that they identify as *supernatural*: experiences of something that is not physically present. We will explore the cultural and psychological dimensions of this very real phenomenon. We will not, however, make ontological judgments about whether something which is experienced as externally present is in fact externally present: in other words, this is a class about culture and psychology, not about metaphysics. We will do experimental work, using our selves and fellow classmates, as subjects, to understand who, when and how people have experiences that they deem *super*natural.

3-5 units, Win (Luhmann, T)

**ANTHRO 27N. Ethnicity and Violence: Anthropological Perspectives**

(F,Sem) Stanford Introductory Seminar. Ethnicity is one of the most compelling and most modern ways in which people - in the midst of considerable global and local uncertainty - all across the world imagine and narrate themselves. This seminar will take an anthropological look at both the modernity and the compulsions of ethnic allegiance, and, why struggles over ethnic identity are so frequently violent. Our questions will be both historical *how*, why and when did people come to think of themselves as possessing different ethnic identities - and contemporary *how* are these identities lived, understood, narrated, and transformed and what is the consequence of such ethnicisation. We follow this through anthropological perspectives which ask persistently how people themselves locally narrate and act upon their experiences and histories. Through this we will approach some of the really big and yet everyday questions that many of us around the world face: how do we relate to ourselves and to those

3-5 units, Aut (Thiranagama, S)

**ANTHRO 28. Indigenous Australia**

(Same as ANTHRO 228) The prehistory and ethnology of New Guinea and Australia. Regional climate, environment, and pre-European history. Ethnography of the contact period focusing on

theoretical problems central to the development of anthropological theory. Contemporary sociopolitical issues. Films. GER:DB-SocSci

5 units, Spr (Bird, R)

**ANTHRO 30. Linguistic Field Methods**

(Same as LINGUIST 174, LINGUIST 274A) Practical training in the collection and analysis of linguistic data from native speakers of a language largely unknown to the investigator. Documentation of endangered languages. Research goals, field trip preparation, ethics (including human subjects, cooperation with local investigators, and governmental permits), working in the community, technical equipment, and analytical strategies. Emphasis is on the use of recording devices and computers in collection and analysis. Prerequisite: introductory course in linguistics.

3-5 units, not given this year

**ANTHRO 30Q. The Big Shift: An Anthropological Approach to Wealth, Migration, and the New Margins of America**

(S,Sem) Stanford Introductory Seminar. Is the middle class shrinking? How do people who live at the extremes of American society- the super rich, the working poor and those who live on the margins, imagine and experience the good life? How do we understand phenomena such as gang cultures, addiction and the realignment of white consciousness? This class uses the methods and modes of ethnographic study in an examination of American culture. Ethnographic materials range from an examination of the new American wealth boom of the last 20 years (Richistan by Robert Frank) to the extreme and deadly world of the invisible underclass of homeless addicts on the streets of San Francisco (Righteous Dopefiend by Phillippe Bourgois and Jeff Schonberg). The experiences of Hispanic immigrants and the struggle to escape gang life in Los Angeles are highlighted in the story of Homeboy Industries a job creation program initiated by a priest working in LA's most deadly neighborhoods (G-Dog and the Homeboys by

4 units, Aut (Wilcox, M)

**ANTHRO 31. Ecology, Evolution, and Human Health**

(Same as ANTHRO 331A) Ecology, Evolution, and Human Health Human ecology, environments, adaptation and plasticity, and their relationship to health and well-being considered in the broad comparative context. Topics include human population history, subsistence ecology, demography, reproductive decision making, urbanization, migration, infectious disease, the physiology of stress and the inflammatory response, social capital and social networks, nutrition, nutritional deficiencies, growth, and social inequalities. No prior course work in ecological or medical anthropology required. GER:DB-SocSci, EC-GlobalCom

3-5 units, not given this year

**ANTHRO 32. Theories in Race and Ethnicity**

Concepts and theories of race and ethnicity in the social sciences and cultural studies. U.S. based definitions, ideas, and problems of race and ethnicity are compared to those that have emerged in other areas of the world. GER:DB-SocSci

5 units, not given this year

**ANTHRO 55A. Introduction to Archaeobotany**

(Same as ARCHLGY 55) The aim of this course is to provide a short introduction to archaeobotany. An overview of types of archaeobotanical remains will include an examination of macrobotanical remains (seeds, charcoal), microfossil remains (starch, pollen, phytoliths) and molecular remains (aDNA, isotopes). The ways in which various types of plant remains have been used will be discussed through case studies. Major debates that archaeobotanical research has shed light on, including the origins of agriculture and issues around domestication will also be examined. Some practical work will allow students to gain familiarity with botanical nomenclature and some archaeobotanical protocols and plant identification techniques. Students will look at microfossil residues from local grinding slabs and write a short paper on the residues recovered. They will also look at seed remains from either Chinese or local flotation samples using microscopes in the lab.

5 units, not given this year

**ANTHRO 60A. Stanford Alpine Archaeology Project 2010**

Alpine Archaeology is a discipline that applies traditional archaeology in montane contexts. While survey and excavation are

standard methodologies, topography and climate bear on archaeological praxes in different ways. Soil chemistry in alpine contexts' testable by pH and other parameters - usually integrates less organic material and more geological material. Material preservation in alpine contexts factors in cold temperature for up to half a year with resulting lower diffusion for reduced oxidation and inhibited deterioration of organic materials. Because of montane environment, this course incorporates elements of paleoclimatology (including glaciation) and geomorphology (including geological processes of long term orogeny and erosion). Alpine ecology is studied including natural vegetation zones from 1000-3000 meters, along with transhumance, trade patterns, deforestation, constricted seasonal agriculture and anthropogenic change as well as restricted mobility along natural cor

3 units, Aut (*Hunt, P*)

#### **ANTHRO 71. Linguistic Field Methods**

(Same as LINGUIST 174, LINGUIST 274) Workshop applying methods for gathering and analyzing linguistic data in the field, i.e., from consultants who are native speakers of a language essentially unknown to the investigator. Principles of language documentation. Students will do local field projects and work on these both in and out of class. Format involves lectures, discussion, working with native speakers, and student presentations. Topics include: choosing a language; planning the project; computerized collection, storage, and analysis of linguistic data; field recording equipment; interviews and elicitation; diagnostic vocabulary lists and grammatical schedules; field study of everyday communication and discourse; area surveys and the ethnography of communication; ethics, reflexivity, and bias; working with human subjects and governments. Prerequisite: a course in linguistics or in anthropological field methods.

5 units, Spr (*Fox, J*)

#### **ANTHRO 77. Japanese Society and Culture**

(Same as ANTHRO 277) Focus is on power, identity, and the politics of knowledge production. How transnational interactions influence Japanese identity. How anthropological knowledge has contributed to understanding Japanese culture and society. Gender, race and class; contemporary ethnographies. Modernity and globalization. Cultural politics, domestic work, labor management, city planning, ad images, anime, martial art, fashion, theater, leisure, and tourism. GER:DB-SocSci, EC-GlobalCom

5 units, not given this year

#### **ANTHRO 82. Medical Anthropology**

(Same as ANTHRO 282) Emphasis is on how health, illness, and healing are understood, experienced, and constructed in social, cultural, and historical contexts. Topics: biopower and body politics, gender and reproductive technologies, illness experiences, medical diversity and social suffering, and the interface between medicine and science. GER:DB-SocSci, EC-GlobalCom

5 units, Spr (*Jain, S*)

#### **ANTHRO 90A. History of Archaeological Thought**

(Same as ARCHLGY 103) Introduction to the history of archaeology and the forms that the discipline takes today, emphasizing developments and debates over the past five decades. Historical overview of culture, historical, processual and post-processual archaeology, and topics that illustrate the differences and similarities in these theoretical approaches.

5 units, Aut (*Meskell, L*)

#### **ANTHRO 90B. Theory of Cultural and Social Anthropology**

Preference to Anthropology majors. Anthropological interpretations of other societies contain assumptions about Western societies. How underlying assumptions and implicit categories have influenced the presentation of data in major anthropological monographs. Emphasis is on Karl Marx, Emile Durkheim, Max Weber, and anthropological analyses of non-Western societies. GER:DB-SocSci

5 units, Win (*Ebron, P*)

#### **ANTHRO 90C. Theory of Ecological and Environmental Anthropology**

(Same as HUMBIO 118) Dynamics of culturally inherited human behavior and its relationship to social and physical environments. Topics include a history of ecological approaches in anthropology, subsistence ecology, sharing, risk management, territoriality, warfare, and resource conservation and management. Case studies

from Australia, Melanesia, Africa, and S. America. GER:DB-SocSci, WIM

5 units, Win (*Bird, D*)

#### **ANTHRO 90D. Social Theory in the Anthropological Sciences**

Required of majors. Foundational course in the history of social theory in anthropology from the late 19th century to the present. Major approaches to human culture and society: symbolic, social, material, and psychological. Questions about the role of theory in anthropology and how it can be applied to human issues. (HEF IV) GER:DB-SocSci

5 units, not given this year

#### **ANTHRO 91. Method and Evidence in Anthropology**

This course provides a broad introduction to various ways of designing anthropological questions and associated methods for collecting evidence and supporting arguments. We review the inherent links between how a question is framed, the types of evidence that can address the question, and way that data are collected. Research activities such as interviewing, participant observation, quantitative observation, archival investigation, ecological survey, linguistic methodology, tracking extended cases, and demographic methods are reviewed. Various faculty and specialists will be brought in to discuss how they use different types of evidence and methods for supporting arguments in anthropology.

5 units, Win (*Coll, K*)

#### **ANTHRO 91A. Archaeological Methods**

(Same as ARCHLGY 102) Methodological issues related to the investigation of archaeological sites and objects. Aims and techniques of archaeologists including: location and excavation of sites; dating of places and objects; analysis of artifacts and technology and the study of ancient people, plants, and animals. How these methods are employed to answer the discipline's larger research questions.

5 units, Spr (*Staff*)

#### **ANTHRO 92A. Undergraduate Research Proposal Writing Workshop**

Practicum. Students develop independent research projects and write research proposals. How to formulate a research question; how to integrate theory and field site; and step-by-step proposal writing.

2-3 units, Aut (*Staff*)

#### **ANTHRO 92B. Undergraduate Research Proposal Writing Workshop**

Practicum. Students develop independent research projects and write research proposals. How to formulate a research question; how to integrate theory and field site; and step-by-step proposal writing.

2-3 units, Win (*Staff*)

#### **ANTHRO 93. Prefield Research Seminar**

For Anthropology majors only; non-majors register for 93B. Preparation for anthropological field research in other societies and the U.S. Data collection techniques include participant observation, interviewing, surveys, sampling procedures, life histories, ethnohistory, and the use of documentary materials. Strategies of successful entry into the community, research ethics, interpersonal dynamics, and the reflexive aspects of fieldwork. Prerequisites: two ANTHRO courses or consent of instructor.

5 units, Spr (*Malkki, L*)

#### **ANTHRO 93B. Prefield Research Seminar: Non-Majors**

Preparation for anthropological field research in other societies and the U.S. Data collection techniques include participant observation, interviewing, surveys, sampling procedures, life histories, ethnohistory, and the use of documentary materials. Strategies for successful entry into the community, research ethics, interpersonal dynamics, and the reflexive aspects of fieldwork. Service Learning Course (certified by Haas Center).

5 units, Spr (*Coll, K*)

#### **ANTHRO 94. Postfield Research Seminar**

Goal is to produce an ethnographic report based on original field research gathered during summer fieldwork, emphasizing writing and revising as steps in analysis and composition. Students critique classmates' work and revise their own writing in light of others' comments. Ethical issues in fieldwork and ethnographic writing, setting research write-up concerns within broader contexts.

5 units, Aut (Wilcox, M)

**ANTHRO 95. Research in Anthropology**

Independent research conducted under faculty supervision, normally taken junior or senior year in pursuit of a senior paper or an honors project. May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ANTHRO 95B. Senior Paper**

Taken in the final quarter before graduation. Independent study and work on senior paper for students admitted to the program. Prerequisite: consent of program adviser and instructor.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ANTHRO 96. Directed Individual Study**

Prerequisite: consent of instructor.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ANTHRO 97. Internship in Anthropology**

Opportunity for students to pursue their specialization in an institutional setting such as a laboratory, clinic, research institute, or government agency. May be repeated for credit. Service Learning Course (certified by Haas Center).

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ANTHRO 98B. Digital Methods in Archaeology**

(Same as ANTHRO 298B) This is a course on digital technologies in archaeology used for documentation, visualization, and analysis of archaeological spaces and objects. Emphasizes hands-on approaches to image manipulation, virtual reality, GIS, CAD, and photogrammetry modeling methods. GER:DB-EngrAppSci

3-5 units, not given this year

**ANTHRO 98E. Catalhoyuk and Neolithic Archaeology**

Catalhoyuk as a case study to understand prehistoric social life during the Neolithic in Anatolia and the Near East. Developments in agriculture, animal domestication, material technology, trade, art, religion, skull cults, architecture, and burial practices. Literature specific to Catalhoyuk and other excavations throughout the Anatolian and Levantine regions to gain a perspective on diversity and variability throughout the Neolithic. The reflexive methodology used to excavate Catalhoyuk, and responsibilities of excavators to engage with larger global audiences of interested persons and stakeholders.

3-5 units, Spr (Hodder, I)

**ANTHRO 98F. Field School Training Workshop**

Provides students important preparatory orientation to anthropology as well as the methods, ethics, and logistics of the specific field school each student will be attending in the summer.

1-3 units, not given this year

**ANTHRO 100A. India's Forgotten Empire: The Rise and Fall of Indus Civilization**

How and why cities with public baths, long-distance trade, sophisticated technologies, and writing emerged, maintained themselves, and collapsed in the deserts of present-day Pakistan and India from 2500 to 1900 B.C. GER:DB-SocSci, DB-SocSci, EC-GlobalCom

3 units, not given this year

**ANTHRO 100C. Chavín de Huantar Research Seminar**

For participants in fieldwork at Chavín de Huantar. Archaeological research techniques, especially as applied at this site. Students work on data from the previous field season to produce synthetic written materials. Maybe repeated for credit.

2-5 units, Aut (Rick, J)

**ANTHRO 101. The Aztecs and Their Ancestors: Introduction to Mesoamerican Archaeology**

The prehispanic cultures of Mesoamerica through archaeology and ethnohistory, from the archaic period to the Spanish conquest in the 16th century. GER:DB-SocSci, EC-GlobalCom

3-5 units, Win (Robertson, I)

**ANTHRO 101A. Archaeology as a Profession**

(Same as ARCHLGY 107A) Academic, contract, government, field, laboratory, museum, and heritage aspects of the profession.

5 units, Aut (Voss, B)

**ANTHRO 102A. Ancient Civilizations: Complexity and Collapse**

(Same as ANTHRO 202A) How archaeology contributes to understanding prehistoric civilizations. How and why complex

social institutions arose, and the conditions and processes behind their collapse. The development of monumental architecture, craft specialization, trade and exchange, and social stratification using examples from the archaeological record. (HEF II, III; DA-B) GER:DB-SocSci, EC-GlobalCom

3-5 units, not given this year

**ANTHRO 103. The Archaeology of Modern Urbanism**

Seminar. Urbanism as a defining feature of modern life. The perspective of archaeology on the history and development of urban cultures. Case studies are from around the globe; emphasis is on the San Francisco Bay Area megalopolis. Cities as cultural sites where economic, ethnic, and sexual differences are produced and transformed; spatial, material, and consumption practices; and the archaeology of communities and neighborhoods. GER:DB-SocSci

5 units, Spr (Staff)

**ANTHRO 104. Urban Life and Cultural Imagination in South Asia**

This course introduces the history of urban development and urban culture in South Asia. The main bulk of the readings are ethnographic accounts and historical works on conflicts, dynamics, and cultural forms in South Asian cities in the 20th century. GER:DB-SocSci

5 units, Spr (Hansen, T)

**ANTHRO 104A. Foraging for a Living**

(Same as ANTHRO 204A) As an economic mode of production, foraging has underwritten humanity for most of its existence. Drawing on archaeology, history, ethnography and new media, this class explores foraging from multiple angles ranging from early approaches in the social and biological sciences to neo-Marxist, neo-Darwinian and ecological perspectives. Topics include the expansion of humans across the planet 50,000 years ago, the emergence of diverse foraging practices in the late Quaternary, the marginalization of foraging economies following colonial invasions, contemporary foraging practices across the continents and foraging in urban environments including the promotion of foraging in modern culinary trends.

5 units, Win (Coddling, B)

**ANTHRO 105. Ancient Cities in the New World**

(Same as ANTHRO 205) Preindustrial urbanism as exemplified by prehispanic New World societies. Case studies: the central and southern highlands of Mesoamerica, and the Maya region. Comparative material from highland S. America. GER:DB-SocSci

3-5 units, not given this year

**ANTHRO 106. Incas and their Ancestors: Peruvian Archaeology**

(Same as ANTHRO 206A, ARCHLGY 102B) The development of high civilizations in Andean S. America from hunter-gatherer origins to the powerful, expansive Inca empire. The contrasting ecologies of coast, sierra, and jungle areas of early Peruvian societies from 12,000 to 2,000 B.C.E. The domestication of indigenous plants which provided the economic foundation for monumental cities, ceramics, and textiles. Cultural evolution, and why and how major transformations occurred. (HEF II, III; DA-B) GER:DB-SocSci, EC-GlobalCom

3-5 units, not given this year

**ANTHRO 106A. Gang Colors: The Racialization of Violence and the American City**

Street gangs (e.g. Bloods, Crips, Mara Salvatrucha, M-18, etc.) serve as a window onto the experience of racial, ethnic and economic marginalization under late capitalism. This class explores the context that gives rise to gang violence through a combination of anthropological, sociological, and historical approaches. Students will be familiarized with the macro-social factors that shape both gangs and the politics of violence in the Americas, North and South.

5 units, Aut (Samet, R)

**ANTHRO 109. Archaeology: World Cultural Heritage**

(Same as ANTHRO 209) Focus is on issues dealing with rights to land and the past on a global scale including conflicts and ethnic purges in the Middle East, the Balkans, Afghanistan, India, Australia, and the Americas. How should world cultural heritage be managed? Who defines what past and which sites and monuments should be saved and protected? Are existing international agreements adequate? How can tourism be balanced

against indigenous rights and the protection of the past? GER:DB-SocSci

*5 units, not given this year*

**ANTHRO 110A. Neandertals and Modern Humans: Origin, Evolution, Interactions**

(Same as ANTHRO 210A) The expansion out of Africa of our species represents the last spectacular step in the course of Human Evolution. It resulted in the colonization of the whole planet and the replacement of archaic forms of humans in Eurasia. One way to investigate why *Homo sapiens* has been such a successful species is to compare its evolution with that of its closest relative, the Neandertals. Exploring the bio-cultural processes at work in the two lineages leads to examine some of the main issues in Paleoanthropology and the most recent methodological advances in the field.

*3 units, not given this year*

**ANTHRO 111. Archaeology of Sex, Sexuality, and Gender**

(Same as ANTHRO 211) How archaeologists study sex, sexuality, and gender through the material remains left behind by past cultures and communities. Theoretical and methodological issues; case studies from prehistoric and historic archaeology.

*5 units, not given this year*

**ANTHRO 112. Public Archaeology: Market Street Chinatown Archaeology Project**

(Same as ANTHRO 212, ASNAMST 112) This internship-style course centers on the practice and theory of historical archaeology research and interpretation through a focused study of San Jose's historic Chinese communities. The course includes classroom lectures, seminar discussion, laboratory analysis of historic artifacts, and participation in public archaeology events. Course themes include immigration, urbanization, material culture, landscape, transnational identities, race and ethnicity, gender, cultural resource management, public history, and heritage politics. The course includes required lab sections, field trips, and public service. Transportation will be provided for off-site activities.

*2-5 units, Aut (Voss, B), Win (Voss, B), Spr (Voss, B)*

**ANTHRO 113. Faunal Analysis: Animal Remains for the Archaeologist**

(Same as ANTHRO 213, BIO 166, BIO 266) The analysis of fossil animal bones and shells to illuminate the behavior and ecology of prehistoric collectors, especially ancient humans. Theoretical and methodological issues. The identification, counting, and measuring of fossil bones and shells. Labs. Methods of numerical analysis.

*5 units, not given this year*

**ANTHRO 114. Prehistoric Stone Tools: Technology and Analysis**

(Same as ANTHRO 214) Archaeologists rely on an understanding of stone tools to trace much of what we know about prehistoric societies. How to make, illustrate, and analyze stone tools, revealing the method and theory intrinsic to these artifacts. GER:DB-SocSci

*5 units, not given this year*

**ANTHRO 115. Spirituality and Healing**

(Same as HUMBIO 179) This course considers the puzzle of symbolic healing. How have societies without the resources of modern medicine approached healing? Why do these rituals have common features around the world? We explore shamanism, spirit possession, prayer, and the role of placebos in modern biomedicine. Students will do ethnographic work and practical explorations along with more traditional scholarly approaches to learning.

*3-5 units, not given this year*

**ANTHRO 116. Data Analysis for Quantitative Research**

(Same as ANTHRO 216) This course allows graduate and advanced undergraduate students in archaeology and anthropology to acquire practical skills in quantitative data analysis. Some familiarity with basic statistical methods is useful but not assumed; the structure of the course will be flexible enough to accommodate a range of student expertise and interests. Topics covered include: statistics and graphics in R; database design, resampling methods, diversity measures, contingency table analysis, and introductory methods in spatial analysis.

*5 units, Spr (Robertson, I)*

**ANTHRO 117A. Conservation Medicine in Practice**

(Same as HUMBIO 117) Examination of the interconnectedness of the environment and human and animal health. Investigation of the 'One World-One Health' paradigm, by examining issues such as climate change and human health, ecological perturbation and infectious diseases, and the importance of new conceptual approaches to combat disease emergence and spread. Seminars, from experts working in government, NGOs, public health, medicine and academia, will emphasize the importance of interdisciplinary approaches (medicine, epidemiology, anthropology, ecology, environmental science) in understanding health scenarios, and also upon the importance of using science and policy to improve public health.

*4 units, Spr (Salkeld, D)*

**ANTHRO 118. Heritage, Environment, and Sovereignty in Hawaii**

(Same as EARTHSYS 118) This course explores the cultural, political economic, and environmental status of contemporary Hawaiians. What sorts of sustainable economic and environmental systems did Hawaiians use in prehistory? How was colonization of the Hawaiian Islands informed and shaped by American economic interests and the nascent imperialism of the early 20th century? How was sovereignty and Native Hawaiian identity been shaped by these forces? How has tourism and the leisure industry affected the natural environment? This course uses archaeological methods, ethnohistorical sources, and historical analysis in an exploration of contemporary Hawaiian social economic and political life.

*4 units, not given this year*

**ANTHRO 120. The Maya**

Lecture course on the ancient and modern Maya. We explore the archaeology, ecology, culture, and language history of the Maya from the earliest times to the Classic Maya Collapse in the 9th-10th Centuries A.D., and examine also the Post-Classic, the Conquest, and Colonial Periods, and the persistence and impact of the Maya in present-day Mexico, Guatemala, Belize, Honduras, El Salvador, and diasporic Maya in the United States. The course acquaints students with the cultural achievements of the Maya in the context of the anthropology and archaeology of civilization, and considers issues of identity over vast periods of time. It includes discussion of the roles of isolation, contact, and geography in Maya history; principles of archaeological excavation and interpretation as applied to the Maya city-states, especially to their rise and fall; Maya hieroglyphic writing and its decipherment; Maya mythology and the Popol Vuh; Maya art in its Mesoamerican context; ethical issues in the ma

*5 units, Win (Fox, J)*

**ANTHRO 120A. Social Zooarchaeology & Animals within Prehistoric Social Worlds**

(Same as ANTHRO 220A, ARCHLGY 120, ARCHLGY 220) The elevated status of animals in prehistory derived from their position as sentient beings sharing many of the ontological qualities of people comparable life-cycles and behavioral traits in some cases, affection, the display of dominance hierarchies, and differing degrees of sociality while at the same time retaining clear biological and behavioral differences. The course will consider aspects of the social and ontological relations between people and animals in prehistory, particularly cosmologies and folk classifications, and the place of animals in social relations and identity formation. It is aimed to understand how the presence, qualities, materialities, and networks of animal life shaped human socialities as much as human agency created engagement with the 'animal estate'. Furthermore, it intends to define how to include animals as subjects in archaeological and anthropological studies taking non-human agency as a starting point. Focusing on case studies drawn from Eur

*5 units, Aut (Marciniak, A)*

**ANTHRO 121. Language and Prehistory**

(Same as ANTHRO 221) Language classification and its implications for human prehistory. The role of linguistic data in analyzing prehistoric populations, cultures, contact, and migrations. Comparison of linguistic and biological classifications. Reconstruction, proto-vocabularies, and culture. Archaeological decipherment and the origins and evolution of writing. Archaeological and genetic evidence for human migrations. (DA-A; HEF II,III) GER:DB-SocSci, EC-GlobalCom

3-5 units, not given this year

**ANTHRO 121A. Hip Hop, Youth Identities, and the Politics of Language**

(Same as AFRICAAM 121X, AMSTUD 121X, CSRE 121X, EDUC 121X, LINGUIST 155) Focus is on issues of language, identity, and globalization, with a focus on Hip Hop cultures and the verbal virtuosity within the Hip Hop nation. Beginning with the U.S., a broad, comparative perspective in exploring youth identities and the politics of language in what is now a global Hip Hop movement. Readings draw from the interdisciplinary literature on Hip Hop cultures with a focus on sociolinguistics and youth culture.

3-4 units, Spr (Alim, H)

**ANTHRO 123. Readings in Linguistic Anthropology**

(Same as ANTHRO 223) One or two major related works on language in its cultural context. Works for 2007-08 involve attempts to correlate linguistic and non-linguistic data for analysis of prehistoric human contact and migrations. May be repeated for credit.

2 units, not given this year

**ANTHRO 123A. Human Diversity: A Linguistic Perspective**

(Same as HUMBIO 187) The diversity and distribution of human language and its implications for the origin and evolution of the human species. The origin of existing languages and the people who speak them. Where did current world languages come from and how can this diversity be used to study human prehistory? Evidence from related fields such as archaeology and human genetics. Topics: the origin of the Indo-European languages, the peopling of the Americas, and evidence that all human languages share a common origin. GER:DB-SocSci, EC-GlobalCom

3 units, Spr (Ruhlen, M)

**ANTHRO 124. Maya Mythology and the Popol Vuh**

The mythology and folklore of the ancient Maya, emphasizing the relationship between the 16th-century Quiché Maya mythological epic Popol Vuh (Book of the Council) and classic lowland Maya art, architecture, religion, and politics. General Mesoamerican mythology. Anthropological and other theories of mythology. Class participates in the creation of a web project on the Popol Vuh.

3-5 units, not given this year

**ANTHRO 124A. Politics, nationalism, heritage and archaeology in Central/Eastern Europe**

(Same as ANTHRO 224A, ARCHLGY 123, ARCHLGY 223) The current state of archaeology in central and eastern part of Europe reveals a multiplicity of regional intellectual traditions and social factors, interrelating with each other in many complex ways. The course will discuss intellectual panorama of archaeologies in this part of the continent and examine the reaction to various socio-political, economic, intellectual, institutional and organizational conditions in its different parts that created a wide variety of local strategies within which archaeology has been practiced. As nationalism requires the elaboration of a real or invented remote past, the course will then consider how archaeological data have been manipulated for nationalist purposes, and discuss the relationship of archaeology to nation-building in Central and Eastern Europe. Contrastive conceptions of nationality and ethnicity are presented. The political uses of archaeology, involving mobilization and appropriation of archaeological and cultural heritage, are also rev

5 units, Aut (Marciniak, A)

**ANTHRO 125. Language and the Environment**

(Same as ANTHRO 225) Lecture course on vocabulary and grammar as keys to peoples' understanding and use of the environment. Ethnobotany, ethnobiology, and ethnosemantics in the analysis of the language of place, plants and animals, the earth, the body, and disease. Terminological gaps and gluts and what they imply. Language as a strategic resource in environmental management. Language contact and conflict in the modern global environment, with particular attention to the vocabularies of capitalism and property. Language extinction and its environmental implications. Anthropology concentration: CS, EE. No prerequisites.

3-4 units, Aut (Fox, J)

**ANTHRO 126. Cities in Comparative Perspective**

(Same as URBANST 114) Core course for Urban Studies majors. We will study urban space both historically and cross-culturally. Urban Studies, by definition, is an interdisciplinary field, where the methodological approaches draw upon a diverse set of analytic tools. Disciplines that occupy a prominent place in this class are geography, cultural anthropology, sociology, history, media studies, and literature. In this context, we will discuss the importance of cities around the world to the economic, cultural, and political well-being of modern societies and examine how forces such as industrialization, decentralization, and globalization affect the structure and function of cities. GER:DB-SocSci

5 units, Spr (Kapur, C)

**ANTHRO 127. City and Sounds**

How do people experience modern cities and urban public cultures through auditory channels? How does sound mediate and constitute urban space? How to listen to and write about culture through sound. Students carry out narrative interviews and sound fieldwork in the Bay Area. Readings include urban anthropology, semiotics, art history, social studies of science and technology, media studies, and musicology.

5 units, not given this year

**ANTHRO 127A. Cities and the Future: Utopias, Dystopias, and Other Urbanisms to Come**

What sort of futures are being imagined for the cities of the twenty-first century? An interdisciplinary seminar, this course will critically analyze how the future of cities, and the cities of the future, are being thought about and acted upon in the present. It is designed for graduate students and advanced undergraduates with experience in the social sciences and humanities and who also have a keen interest in urban studies. Its primary objective is to develop sophisticated ways of thinking about the future of cities, since doing so has real significance for the kind of city we want to, and eventually will, ourselves inhabit.

3 units, not given this year

**ANTHRO 128. Visual Studies**

Drawing on anthropology, art history, cultural studies, and other fields, this course explores how and why one might want to think critically about the politics of visuality, social imagination, the politics of making and consuming images and things, iconophilia and iconophobia, the classification of people and things into *¿artists¿* and *¿art¿*, and cultural production more generally.

5 units, not given this year

**ANTHRO 130A. Interpreting Space and Place: An Introduction to Mapmaking**

How mapmaking, geographical information systems (GIS), and spatial tools can be applied in social research. Qualitative and quantitative approaches in the use of geospatial information. Methodologies and case examples.

5 units, not given this year

**ANTHRO 130B. Introduction to GIS in Anthropology**

(Same as ANTHRO 230B) How GIS and spatial tools can be applied in social research. Case studies and student projects address questions of social and cultural relevance using real data sets, including the collection of geospatial data and building of spatial evidence. Analytical approaches and how they can shape a social and cultural interpretation of space and place.

5 units, not given this year

**ANTHRO 130D. Spatial Approaches to Social Science**

(Same as ANTHRO 230D, POLISCI 241S) This multidisciplinary course combines different approaches to how GIS and spatial tools can be applied in social science research. We take a collaborative, project oriented approach to bring together technical expertise and substantive applications from several social science disciplines. The course aims to integrate tools, methods, and current debates in social science research and will enable students to engage in critical spatial research and a multidisciplinary dialogue around geographic space.

5 units, Win (Rodden, J; Engel, C)

**ANTHRO 131. The Politics of Humanitarianism**

(Same as ANTHRO 231) Anthropological approaches to contemporary practices of humanitarian intervention. How social theory can inform the politics of humanitarianism, charity, and philanthropy. Focus is on Africa from the colonial era to the

present. GER:DB-SocSci

5 units, not given this year

**ANTHRO 134. Object Lessons**

(Same as ANTHRO 234) Human-object relations in the processes of world making. Objectification and materiality through ethnography, archaeology, material culture studies, and cultural studies. Interpretive connotations around and beyond the object, the unstable terrain of interrelationships between sociality and materiality, and the cultural constitution of objects. Sources include: works by Marx, Hegel, and Mauss; classic Pacific ethnographies of exchange, circulation, alienability, and fetishism; and material culture studies.

5 units, Win (Staff)

**ANTHRO 135. Cultural Studies**

(Same as ANTHRO 235) Identity, community, and culture; their interactions and formation. GER:DB-SocSci

5 units, not given this year

**ANTHRO 135A. The Anthropology of Security**

(Same as ANTHRO 235A) This seminar begins by outlining the main theoretical and empirical challenges in the areas of surveillance studies and security studies. The seminar provides a space wherein students will be able to discuss these interdisciplinary areas and develop their own Anthropology-informed perspectives. The seminar then discusses the work of Anthropologists who through their ethnographic and theoretical work have helped developed and important and emergent area: *“The Anthropology of Security.”* Areas covered include, inter alia, national security, security and war, biometrics, gated-ness, and environmental and bio-security threats.

3-5 units, not given this year

**ANTHRO 135H. Conversations in CSRE: Case Studies in the Stanford Community**

(Same as CSRE 135H) Race, ethnicity, gender, and religion using the tools, analytical skills and concepts developed by anthropologists.

1-2 units, Aut (Wilcox, M), Win (Wilcox, M)

**ANTHRO 135I. CSRE House Seminar: Race and Ethnicity at Stanford**

(Same as CSRE 135I) Race, ethnicity, gender, and religion using the tools, analytical skills and concepts developed by anthropologists.

1-2 units, not given this year

**ANTHRO 137. The Politics of Humanitarianism**

(Same as ANTHRO 237) What does it mean to want to help, to organize humanitarian aid, in times of crisis? At first glance, the impulse to help issue generis a good one. Helping is surely preferable to indifference and inaction. This does not mean that humanitarian interventions entail no ethical or political stakes *¿* or that they are beyond engaged critique. We need to critique precisely that which we value, and to ask some hard questions, among them these: What are the differences among humanitarianism, charity, and philanthropy? What of social obligations and solidarities? How does the neoliberal world order currently create structural inequalities that ensure the reproduction of poverty and violence? How does the current order of things resemble or differ from the colonial world order? This course examines the history of humanitarian sensibilities and the emergence of organized action in the *¿*cause of humanity*¿*. In the early years of humanitarian intervention, political neutrality was a key principle;

5 units, not given this year

**ANTHRO 139. Ethnography of Africa**

(Same as ANTHRO 239) The politics of producing knowledge in and about Africa through the genre of ethnography, from the colonial era to the present. The politics of writing and the ethics of social imagination. Sources include novels juxtaposed to ethnographies. GER:DB-SocSci

5 units, Win (Malkki, L)

**ANTHRO 140A. Ethnographic Archaeologies**

(Same as ANTHRO 240A, ARCHLGY 137) How have ethnographic and archaeological methods been combined in anthropological research? What methodological and theoretical implications do these kinds of projects generate? Seminar topics will include ethnoarchaeology, ethnographies of archaeological

practice, public archaeology and heritage ethics. Lecture and discussion.

4-5 units, NEXTYEAR

**ANTHRO 146. Car Culture**

(Same as STS 150) Since at least the 50s, the U.S. has been notorious as a nation in love with the car. An examination of this premise, analyzing new methods of production brought by automobile manufacture, how automobiles shaped urban growth, debates about pollution and environmental degradation, and debates around auto safety. How the car has influenced American practices including courting, eating out, and suburban living.

5 units, not given this year

**ANTHRO 147. Nature, Culture, Heritage**

(Same as ANTHRO 247) Seminar. Shared histories of natural and cultural heritage and their subsequent trajectories into the present. How thought about archaeological sites and natural landscapes have undergone transformations due to factors including indigenous rights, green politics, and international tourism. The development of key ideas including conservation, wilderness, sustainability, indigenous knowledge, non-renewability and diversity. Case studies draw on cultural and natural sites from Africa, the Americas and Australia.

5 units, Aut (Meskell, L)

**ANTHRO 147A. Folklore, Mythology, and Islam in Central Asia**

(Same as REES 247A) Central Asian cults, myths, and beliefs from ancient time to modernity. Life crisis rites, magic ceremonies, songs, tales, narratives, taboos associated with childbirth, marriage, folk medicine, and calendrical transitions. The nature and the place of the shaman in the region. Sources include music from the fieldwork of the instructor and the Kyrgyz epoch Manas. The cultural universe of Central Asian peoples as a symbol of their modern outlook. GER:DB-SocSci

3-5 units, Spr (Kunanbaeva, A)

**ANTHRO 148. Health, Politics, and Culture of Modern China**

(Same as ANTHRO 248) One of the most generative regions for medical anthropology inquiry in recent years has been Asia. This seminar is designed to introduce upper division undergraduates and graduate students to the methodological hurdles, representational challenges, and intellectual rewards of investigating the intersections of health, politics, and culture in contemporary China. GER:DB-SocSci

4-5 units, Aut (Kohrman, M)

**ANTHRO 148A. Nomads of Eurasia: Culture in Transition**

(Same as ANTHRO 248A) Traditional peoples of Central and Inner Asia; their lifestyles and cultural history. Modern research approaches and recent fieldwork data published mainly in Russian and Central Asian languages. Audio-visual materials.

5 units, Win (Kunanbaeva, A)

**ANTHRO 151. Women, Fertility, and Work**

(Same as ANTHRO 251, HUMBIO 148W) How do choices relating to bearing, nursing, and raising children influence women's participation in the labor force? Cultural, demographic, and evolutionary explanations, using crosscultural case studies. Emphasis is on understanding fertility and work in light of the options available to women at particular times and places. GER:DB-SocSci, EC-Gender

5 units, not given this year

**ANTHRO 152A. Urban Poverty and Inequality in Contemporary China**

Experiences of poverty and inequality and their relationship to gender, space development, post-socialism, and globalization. How processes of class-making in China's cities are bound up with transformations in the country's sociopolitical landscape.

5 units, not given this year

**ANTHRO 153A. Japan's Minorities**

(Same as ANTHRO 253A) Cultural and social history of Japan since WWII. Falling birth rates, changing family structure, decreasing and then increasing divorce rates, coping with societal aging, expansion of higher education, solving new educational problems, increasing variability of work situation, introduction of foreign workers. Attention to the legacy of Tokugawa and pre-war Japan as antecedent to postwar developments.

3-5 units, not given this year

**ANTHRO 154. Anthropology of Drugs: Experience, Capitalism, Modernity**

This course examines the significant role of drugs play in shaping expressions of the self and social life; in the management of populations, and in the production of markets and inequality. It engages these themes through cultural representations of drugs and drug use, analyses of scientific discourse, and social theory. Topics include: the social construction of the licit and illicit; the shifting boundaries of deviance, disease and pleasure; and the relationship between local markets and global wars.

*5 units, Spr (Staff)*

**ANTHRO 154A. Japan's Postwar Demographic And Social Changes**

(Same as ANTHRO 254A) Changing birth and death rates. Restructuring education and employment. Problems with seniors. Increasing foreign workers.

*3-5 units, Win (Staff)*

**ANTHRO 155. Research Methods in Ecological Anthropology**

(Same as ANTHRO 255) The course prepare students for the methodological and practical aspects of doing ecologically oriented, quantitative anthropological field research. The primary goal is to explore what it means to ask anthropological questions in a systematic way. We will focus on understanding what can constitute an interesting question, how to frame a question in way that facilitates investigation, and how to design methods to begin investigating a question. In turn, the course will provide a format to refine research projects in preparation for doing more extensive fieldwork.

*3-5 units, Spr (Bird, D)*

**ANTHRO 159. Conservation and Development Dilemmas in Latin America: Galapagos as a Microcosm**

(Same as ANTHRO 259) The course will examine conservation and development dilemmas as they affect countries in Central and South America, eventually focusing on the Galapagos for a detailed case study. The class will explore the resolution of key issues in Galapagos in conjunction with research supported by an Environmental Ventures Project (EVP) Grant from the Woods Institute.

*3-5 units, Spr (Staff)*

**ANTHRO 160. Social and Environmental Sustainability: The Costa Rican Case**

(Same as ANTHRO 260) Seminar focused on issues of tropical sustainability with a particular emphasis on the Osa Peninsula of Costa Rica. Offered in conjunction with the Osa Initiative in the Wood's Institute for the Environment, the course highlights issues of human development in the tropics, through such means as agricultural development, ecotourism, conservation efforts, private and indigenous reserves, and mining. The course will draw from diverse disciplines including anthropology, rural sociology, conservation biology, geosciences, history, political science, and journalism. In addition to weekly discussions, students will development a research paper throughout the term which will be presented to a panel of selected Wood's Faculty during the final week of the term.

*3-5 units, Aut (Durham, W; Hunt, C)*

**ANTHRO 161. Human Behavioral Ecology**

(Same as ANTHRO 261) Theory, method, and application in anthropology. How theory in behavioral ecology developed to understand animal behavior is applied to questions about human economic decision making in ecological and evolutionary contexts. Topics include decisions about foraging and subsistence, competition and cooperation, mating, and reproduction and parenting. GER:DB-SocSci

*3-5 units, Win (Bird, R)*

**ANTHRO 162. Indigenous Peoples and Environmental Problems**

(Same as ANTHRO 262) The social and cultural consequences of contemporary environmental problems. The impact of market economies, development efforts, and conservation projects on indigenous peoples, emphasizing Latin America. The role of indigenous grass roots organizations in combating environmental destruction and degradation of homeland areas. GER:DB-Hum, EC-GlobalCom

*3-5 units, not given this year*

**ANTHRO 163. Conservation and Evolutionary Ecology**

(Same as ANTHRO 263) Environmental degradation resulting from human behavior, and what can be done about it. Patterns of interaction between people and environments, and why they vary over time and space. Topics include adaptation and behavior, resource acquisition and utilization, conflicts of interest, collective action problems, conspicuous consumption, waste, land management, and public policy. GER:DB-SocSci

*5 units, not given this year*

**ANTHRO 164A. Anthropology of Ecotourism**

Ecotourism has been touted as a win-win scenario for both biodiversity conservation and the well-being of local residents. In practice, these lofty ideals of ecotourism have proven difficult to implement. The rapid development of ecotourism over the last two decades. Focus is on the scholarly literature relating to ecotourism from both supporting and critical perspectives.

*5 units, not given this year*

**ANTHRO 164B. Anthropology of Tourism**

As the largest scale movement of goods, services, and people that humanity has ever seen, tourism is an immense phenomenon and is currently the world's most immense industry, reaching some of the most remote people and places on the planet. Yet scholars have only begun to focus on the topic in recent decades. This seminar-style course will focus on the key anthropological and social science literature relating to tourism from both supporting and critical perspectives; however, tourism is an inherently multi-disciplinary subject and students from all disciplines are encouraged to enroll. After providing an initial overview of this phenomenon and field of study, later sections of the course will focus on emerging sub-types of tourism including sustainable tourism, ecotourism, agritourism, and geotourism to name just a few.

*5 units, not given this year*

**ANTHRO 165. Parks and Peoples: The Benefits and Costs of Protected Area Conservation**

Seminar. Emphasis is on the social impact of parks and reserves. Integrated conservation and development projects (ICDPs) based on protected areas; alternative ways to derive local social benefits from them. Cases include Yellowstone, Manu, Galápagos, Ngorongoro, and Guanacaste.

*5 units, not given this year*

**ANTHRO 165A. People and Parks: Management of Protected Areas**

As resources become scarcer, parks increasingly serve as ideological battlegrounds for contested core human values and often put livelihoods at stake. Their historical development and the complex array of present-day issues associated with the formal protection of biodiversity. The ideas behind parks and the evolution of these ideas.

*5 units, not given this year*

**ANTHRO 166. Political Ecology of Tropical Land Use: Conservation, Natural Resource Extraction, and Agribusiness**

(Same as ANTHRO 266) Seminar. The state, private sector, development agencies, and NGOs in development and conservation of tropical land use. Focus is on the socioeconomic and political drivers of resource extraction and agricultural production. Case studies used to examine the local-to-global context from many disciplines. Are maps and analyses used for gain, visibility, accountability, or contested terrain? How are power dynamics, land use history, state-private sector collusion, and neoliberal policies valued? What are the local and extra-local responses?

*3 units, Win (Curran, L)*

**ANTHRO 167. Signaling Theory**

(Same as ANTHRO 267) (Graduate students register for 267.) Why does the peacock have such a large elaborate tail? Why does conspicuous consumption serve to create markers of distinction? How does the pursuit of social capital generate prestige? Answers to these questions from convergent scholarship in social theory, economic theory, and evolutionary theory. The use of signaling theory to explain disparate social and material phenomena. Authors include Veblen, Bourdieu, and Zahavi. Prerequisite for undergraduates: consent of instructor.

*3 units, Spr (Bird, R)*

**ANTHRO 168A. Risky Environments: The Nature of Disaster**  
(Same as ANTHRO 268A) This seminar explores topics including environmental movements and countercultures, human agency and geoengineering ecotourism, and indigenous perspectives of changing climates to query how humans view nature in terms of stability, instability, risk and disaster in the 21st century. Case studies draw upon a broad range of geographical regions including the Arctic, Iceland, Australia, and the Americas. Discussions will draw upon film portrayals and interviews with researchers in addition to readings.

*5 units, not given this year*

**ANTHRO 169A. New Citizenship: Grassroots Movements for Social Justice in the U.S.**

(Same as CHICANST 168, CSRE 168, FEMST 140H) Focus is on the contributions of immigrants and communities of color to the meaning of citizenship in the U.S. Citizenship, more than only a legal status, is a dynamic cultural field in which people claim equal rights while demanding respect for differences. Academic studies of citizenship examined in dialogue with the theory and practice of activists and movements. Engagement with immigrant organizing and community-based research is a central emphasis.

*5 units, Win (Coll, K)*

**ANTHRO 171. The Biology and Evolution of Language**

(Same as ANTHRO 271, HUMBIO 145L) Lecture course surveying the biology, linguistic functions, and evolution of the organs of speech and speech centers in the brain, language in animals and humans, the evolution of language itself, and the roles of innateness vs. culture in language. Suitable both for general education and as preparation for further studies in anthropology, biology, linguistics, medicine, psychology, and speech & language therapy. Anthropology concentration: CS, EE. No prerequisites. GER: DB-NatSci

*4-5 units, Win (Fox, J)*

**ANTHRO 172. Seminar on Cultural Evolution and Coevolution**

(Same as ANTHRO 272) Upper division/graduate seminar on recent approaches to the study of cultural evolution and coevolution. Critical evaluation of Darwinian and non-Darwinian theories, with special attention to the interplay of culture, genes, environment and society. Students will undertake projects of their own design to review, test, or improve current theoretical formulations. Prerequisite: a university-level course in evolution, ecology, or human behavioral biology.

*3-5 units, not given this year*

**ANTHRO 172A. Human Walking: Evolution Anatomy and Disease Human Locomotion and Musculoskeletal Pathology**

(Same as ANTHRO 272A) This course takes an in-depth look at the unique form of locomotion specific to our lineage: bipedality. It will introduce the fossil evidence for when bipedality first arose and how locomotion has changed throughout human evolution. It will also examine the consequences of that change, presenting case studies of common musculoskeletal diseases that result from bipedality. Suggested Prerequisite: Introduction to Biological/Physical Anthropology, HUMBIO 2B, or ANTHRO 6, Human Origins.

*3-5 units, Win (Melillo, S)*

**ANTHRO 173. Human Dimensions of Global Environmental Change: Resilience, Vulnerability, and Environmental Justice**

(Same as HUMBIO 111) The complexity of social and political issues surrounding global environmental change. Emphasis is on synergies precipitated by human-induced climatic change. Case studies and scenarios to explore the vulnerability and resilience in households, communities, regions, and nation-states most affected by extreme weather conditions. Their concerns, livelihood changes, and diverse responses of rural smallholders, indigenous communities, the state, and local and regional migrants. Central theme is environmental justice.

*3 units, not given this year*

**ANTHRO 174. Beginnings of Social Complexity**

(Same as ANTHRO 274) Models and examples of the social evolution of stratification and political centralization in prehistoric human societies. Inferences from the archaeological record concerning the forces and mechanisms behind the rise and fall of complex societies, particularly in S. America. (HEF II; DA-B)

*5 units, not given this year*

**ANTHRO 175. Human Osteology**

(Same as ANTHRO 275, HUMBIO 180) The human skeleton. Focus is on identification of fragmentary human skeletal remains. Analytical methods include forensic techniques, archaeological analysis, paleopathology, and age/sex estimation. Students work independently in the laboratory with the skeletal collection. GER: DB-NatSci

*5 units, Spr (Klein, R; Coddling, B)*

**ANTHRO 177. Environmental Change and Emerging Infectious Diseases**

(Same as ANTHRO 277, HUMBIO 114) The changing epidemiological environment. How human-induced environmental changes, such as global warming, deforestation and land-use conversion, urbanization, international commerce, and human migration, are altering the ecology of infectious disease transmission, and promoting their re-emergence as a global public health threat. Case studies of malaria, cholera, hantavirus, plague, and HIV. GER:DB-SocSci

*3-5 units, Aut (Durham, W; Jones, J)*

**ANTHRO 179. Cultures of Disease: Cancer**

History, politics, science, and anthropology of cancer; political and economic issues of disease and health care in the U.S., including the ethics and economics of health care provision, the pharmaceutical industry, carcinogen production, and research priorities.

*5 units, Spr (Jain, S)*

**ANTHRO 180. Science, Technology, and Gender**

Why is engineering often seen as a masculine profession? What have women's experiences been in entering fields of science and technology? How has gender been defined by scientists? Issues: the struggles of women in science to negotiate misogyny and cultural expectation (marriage, children), reproductive issues (surrogate motherhood, visual representations of the fetus, fetal surgery, breast feeding, childbirth practices), how the household became a site of consumerism and technology, and the cultural issues at stake as women join the ranks of scientists. GER:DB-SocSci, EC-Gender

*3-5 units, not given this year*

**ANTHRO 181. Culture and Madness: Anthropological Approaches to Psychiatric Illness**

(Same as ANTHRO 281, HUMBIO 146) Interdisciplinary. Culture and social context on the identification, course, and outcome of psychiatric illness. What is known from psychiatry about the nature of illness as a biomedical process and from anthropology about the life course of illness within particular settings. Prerequisite: Human Biology core or equivalent or consent of instructor.

*3-5 units, Aut (Luhmann, T)*

**ANTHRO 181A. Gender in the Middle East: Iran, Turkey, and Egypt**

This course explores the construction of gender in the Middle East. Drawing on the historical, sociological and anthropological research in the region, the course aims to question the stereotypes about the subordination of Muslim women and to offer students a systematic reading and analytical discussion of the political, economic and cultural structures that inform gender relations and practices in the region. The course starts with an examination of early Islam and religious sources with regard to women's status, then moves on to nationalist and modernization movements in the 19th and 20th centuries, and finally explores women's and men's lives in contemporary Egypt, Turkey and Iran. In this framework, we will pay special attention to Islamist mobilizations, family and sexual relations, as well as women's changing livelihoods and labor.

*3-5 units, not given this year*

**ANTHRO 182. An Anthropology of Annihilation: Tobacco at the Turn of the Millennium**

The cigarette as the world's greatest weapon of mass destruction: 100 million dead worldwide from cigarettes during the 20th century, one billion expected to die in the 21st century. How to understand this toll, its production, management, politicization, and depoliticization? What can anthropological and allied perspectives disclose? How does the catastrophe challenge key

precepts within anthropology and other branches of the academy?  
GER:EC-GlobalCom

*3-5 units, not given this year*

**ANTHRO 183A. Border Crossings and American Identities**

(Same as AMSTUD 183, CSRE 183) How novelists, filmmakers, and poets perceive racial, ethnic, gender, sexual preference, and class borders in the context of a national discussion about the place of Americans in the world. How Anna Deavere Smith, Sherman Alexie, or Michael Moore consider redrawing such lines so that center and margin, or self and other, do not remain fixed and divided. How linguistic borderlines within multilingual literature by Caribbean, Arab, and Asian Americans function. Can Anzaldúa's conception of borderlands be constructed through the matrix of language, dreams, music, and cultural memories in these American narratives? Course includes examining one's own identity. GER:DB-Hum, EC-AmerCul

*5 units, Aut (Duffey, C)*

**ANTHRO 185A. Race and Biomedicine**

(Same as ASNAMST 185A) Race, identity, culture, biology, and political power in biomedicine. Biological theories of racial ordering, sexuality and the medicalization of group difference. Sources include ethnography, film, and biomedical literature. Topics include colonial history and medicine, the politics of racial categorization in biomedical research, the protection of human subjects and research ethics, immigration health and citizenship, race-based models in health disparities research and policy, and recent developments in human genetic variation research.

*3-5 units, not given this year*

**GRADUATE COURSES IN ANTHROPOLOGY**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**ANTHRO 201. Introduction to Cultural and Social Anthropology**

(Same as ANTHRO 1) Crosscultural anthropological perspectives on human behavior, including cultural transmission, social organization, sex and gender, culture change, technology, war, ritual, and related topics. Case studies illustrating the principles of the cultural process. Films.

*5 units, Spr (Ferguson, J), Sum (Staff)*

**ANTHRO 202A. Ancient Civilizations: Complexity and Collapse**

(Same as ANTHRO 102A) How archaeology contributes to understanding prehistoric civilizations. How and why complex social institutions arose, and the conditions and processes behind their collapse. The development of monumental architecture, craft specialization, trade and exchange, and social stratification using examples from the archaeological record. (HEF II, III; DA-B)

*3-5 units, not given this year*

**ANTHRO 204A. Foraging for a Living**

(Same as ANTHRO 104A) As an economic mode of production, foraging has underwritten humanity for most of its existence. Drawing on archaeology, history, ethnography and new media, this class explores foraging from multiple angles ranging from early approaches in the social and biological sciences to neo-Marxist, neo-Darwinian and ecological perspectives. Topics include the expansion of humans across the planet 50,000 years ago, the emergence of diverse foraging practices in the late Quaternary, the marginalization of foraging economies following colonial invasions, contemporary foraging practices across the continents and foraging in urban environments including the promotion of foraging in modern culinary trends.

*5 units, Win (Coddling, B)*

**ANTHRO 205. Ancient Cities in the New World**

(Same as ANTHRO 105) Preindustrial urbanism as exemplified by prehispanic New World societies. Case studies: the central and southern highlands of Mesoamerica, and the Maya region. Comparative material from highland S. America.

*3-5 units, not given this year*

**ANTHRO 206. Human Origins**

(Same as ANTHRO 6, HUMBIO 6) The human fossil record from the first non-human primates in the late Cretaceous or early

Paleocene, 80-65 million years ago, to the anatomically modern people in the late Pleistocene, between 100,000 to 50,000 B.C.E. Emphasis is on broad evolutionary trends and the natural selective forces behind them.

*5 units, not given this year*

**ANTHRO 206A. Incas and their Ancestors: Peruvian Archaeology**

(Same as ANTHRO 106, ARCHLGY 102B) The development of high civilizations in Andean S. America from hunter-gatherer origins to the powerful, expansive Inca empire. The contrasting ecologies of coast, sierra, and jungle areas of early Peruvian societies from 12,000 to 2,000 B.C.E. The domestication of indigenous plants which provided the economic foundation for monumental cities, ceramics, and textiles. Cultural evolution, and why and how major transformations occurred. (HEF II, III; DA-B)

*3-5 units, not given this year*

**ANTHRO 209. Archaeology: World Cultural Heritage**

(Same as ANTHRO 109) Focus is on issues dealing with rights to land and the past on a global scale including conflicts and ethnic purges in the Middle East, the Balkans, Afghanistan, India, Australia, and the Americas. How should world cultural heritage be managed? Who defines what past and which sites and monuments should be saved and protected? Are existing international agreements adequate? How can tourism be balanced against indigenous rights and the protection of the past?

*5 units, not given this year*

**ANTHRO 210. Examining Ethnographies**

Eight or nine important ethnographies, including their construction, their impact, and their faults and virtues.

*5 units, not given this year*

**ANTHRO 210A. Neandertals and Modern Humans: Origin, Evolution, Interactions**

(Same as ANTHRO 110A) The expansion out of Africa of our species represents the last spectacular step in the course of Human Evolution. It resulted in the colonization of the whole planet and the replacement of archaic forms of humans in Eurasia. One way to investigate why *Homo sapiens* has been such a successful species is to compare its evolution with that of its closest relative, the Neandertals. Exploring the bio-cultural processes at work in the two lineages leads to examine some of the main issues in Paleoanthropology and the most recent methodological advances in the field.

*3 units, not given this year*

**ANTHRO 210B. Critical Theory and The Environment**

(Same as AMSTUD 210, MTL 210) Critical theoretical approaches (such as cultural studies, Marxism, postcolonial theory, cultural geography, feminism, and science studies) have generally been underutilized as methodologies for grappling with environmental situations, yet they hold much promise for addressing their complexity. This course asks: How does critical theory about the environment construe the current situation? What kinds of political or technological solutions do these theories call for or imply? The first half of the seminar introduces critical approaches and methodologies in relation to the environment. In the second section, we will use a variety of theoretical approaches to address Native American environmental politics, water, agriculture, toxics, and animals.

*3-5 units, Spr (Koelle, A)*

**ANTHRO 211. Archaeology of Sex, Sexuality, and Gender**

(Same as ANTHRO 111) How archaeologists study sex, sexuality, and gender through the material remains left behind by past cultures and communities. Theoretical and methodological issues; case studies from prehistoric and historic archaeology.

*5 units, not given this year*

**ANTHRO 212. Public Archaeology: Market Street Chinatown Archaeology Project**

(Same as ANTHRO 112, ASNAMST 112) This internship-style course centers on the practice and theory of historical archaeology research and interpretation through a focused study of San Jose's historic Chinese communities. The course includes classroom lectures, seminar discussion, laboratory analysis of historic artifacts, and participation in public archaeology events. Course themes include immigration, urbanization, material culture, landscape, transnational identities, race and ethnicity, gender,

cultural resource management, public history, and heritage politics. The course includes required lab sections, field trips, and public service. Transportation will be provided for off-site activities.

2-5 units, Aut (Voss, B), Win (Voss, B), Spr (Voss, B)

**ANTHRO 213. Faunal Analysis: Animal Remains for the Archaeologist**

(Same as ANTHRO 113, BIO 166, BIO 266) The analysis of fossil animal bones and shells to illuminate the behavior and ecology of prehistoric collectors, especially ancient humans. Theoretical and methodological issues. The identification, counting, and measuring of fossil bones and shells. Labs. Methods of numerical analysis.

5 units, not given this year

**ANTHRO 214. Prehistoric Stone Tools: Technology and Analysis**

(Same as ANTHRO 114) Archaeologists rely on an understanding of stone tools to trace much of what we know about prehistoric societies. How to make, illustrate, and analyze stone tools, revealing the method and theory intrinsic to these artifacts.

5 units, not given this year

**ANTHRO 216. Data Analysis for Quantitative Research**

(Same as ANTHRO 116) This course allows graduate and advanced undergraduate students in archaeology and anthropology to acquire practical skills in quantitative data analysis. Some familiarity with basic statistical methods is useful but not assumed; the structure of the course will be flexible enough to accommodate a range of student expertise and interests. Topics covered include: statistics and graphics in R; database design, resampling methods, diversity measures, contingency table analysis, and introductory methods in spatial analysis.

5 units, Spr (Robertson, I)

**ANTHRO 220A. Social Zooarchaeology & Animals within Prehistoric Social Worlds**

(Same as ANTHRO 120A, ARCHLGY 120, ARCHLGY 220) The elevated status of animals in prehistory derived from their position as sentient beings sharing many of the ontological qualities of people comparable life-cycles and behavioral traits in some cases, affection, the display of dominance hierarchies, and differing degrees of sociality while at the same time retaining clear biological and behavioral differences. The course will consider aspects of the social and ontological relations between people and animals in prehistory, particularly cosmologies and folk classifications, and the place of animals in social relations and identity formation. It is aimed to understand how the presence, qualities, materialities, and networks of animal life shaped human socialities as much as human agency created engagement with the 'animal estate'. Furthermore, it intends to define how to include animals as subjects in archaeological and anthropological studies taking non-human agency as a starting point. Focusing on case studies drawn from Eur

5 units, Aut (Marciniak, A)

**ANTHRO 221. Language and Prehistory**

(Same as ANTHRO 121) Language classification and its implications for human prehistory. The role of linguistic data in analyzing prehistoric populations, cultures, contact, and migrations. Comparison of linguistic and biological classifications. Reconstruction, proto-vocabularies, and culture. Archaeological decipherment and the origins and evolution of writing. Archaeological and genetic evidence for human migrations. (DA-A; HEF II,III)

3-5 units, not given this year

**ANTHRO 223. Readings in Linguistic Anthropology**

(Same as ANTHRO 123) One or two major related works on language in its cultural context. Works for 2007-08 involve attempts to correlate linguistic and non-linguistic data for analysis of prehistoric human contact and migrations. May be repeated for credit.

2 units, not given this year

**ANTHRO 224A. Politics, nationalism, heritage and archaeology in Central/Eastern Europe**

(Same as ANTHRO 124A, ARCHLGY 123, ARCHLGY 223) The current state of archaeology in central and eastern part of Europe reveals a multiplicity of regional intellectual traditions and social factors, interrelating with each other in many complex ways. The course will discuss intellectual panorama of archaeologies in this

part of the continent and examine the reaction to various socio-political, economic, intellectual, institutional and organizational conditions in its different parts that created a wide variety of local strategies within which archaeology has been practiced. As nationalism requires the elaboration of a real or invented remote past, the course will then consider how archaeological data have been manipulated for nationalist purposes, and discuss the relationship of archaeology to nation-building in Central and Eastern Europe. Contrastive conceptions of nationality and ethnicity are presented. The political uses of archaeology, involving mobilization and appropriation of archaeological and cultural heritage, are also rev

5 units, Aut (Marciniak, A)

**ANTHRO 225. Language and the Environment**

(Same as ANTHRO 125) Lecture course on vocabulary and grammar as keys to peoples; understanding and use of the environment. Ethnobotany, ethnobiology, and ethnosemantics in the analysis of the language of place, plants and animals, the earth, the body, and disease. Terminological gaps and gluts and what they imply. Language as a strategic resource in environmental management. Language contact and conflict in the modern global environment, with particular attention to the vocabularies of capitalism and property. Language extinction and its environmental implications. Anthropology concentration: CS, EE. No prerequisites.

3-4 units, Aut (Fox, J)

**ANTHRO 228. Indigenous Australia**

(Same as ANTHRO 28) The prehistory and ethnology of New Guinea and Australia. Regional climate, environment, and pre-European history. Ethnography of the contact period focusing on theoretical problems central to the development of anthropological theory. Contemporary sociopolitical issues. Films.

5 units, Spr (Bird, R)

**ANTHRO 230B. Introduction to GIS in Anthropology**

(Same as ANTHRO 130B) How GIS and spatial tools can be applied in social research. Case studies and student projects address questions of social and cultural relevance using real data sets, including the collection of geospatial data and building of spatial evidence. Analytical approaches and how they can shape a social and cultural interpretation of space and place.

5 units, not given this year

**ANTHRO 230D. Spatial Approaches to Social Science**

(Same as ANTHRO 130D, POLISCI 241S) This multidisciplinary course combines different approaches to how GIS and spatial tools can be applied in social science research. We take a collaborative, project oriented approach to bring together technical expertise and substantive applications from several social science disciplines. The course aims to integrate tools, methods, and current debates in social science research and will enable students to engage in critical spatial research and a multidisciplinary dialogue around geographic space.

5 units, Win (Rodden, J; Engel, C)

**ANTHRO 231. The Politics of Humanitarianism**

(Same as ANTHRO 131) Anthropological approaches to contemporary practices of humanitarian intervention. How social theory can inform the politics of humanitarianism, charity, and philanthropy. Focus is on Africa from the colonial era to the present.

5 units, not given this year

**ANTHRO 234. Object Lessons**

(Same as ANTHRO 134) Human-object relations in the processes of world making. Objectification and materiality through ethnography, archaeology, material culture studies, and cultural studies. Interpretive connotations around and beyond the object, the unstable terrain of interrelationships between sociality and materiality, and the cultural constitution of objects. Sources include: works by Marx, Hegel, and Mauss; classic Pacific ethnographies of exchange, circulation, alienability, and fetishism; and material culture studies.

5 units, Win (Staff)

**ANTHRO 235. Cultural Studies**

(Same as ANTHRO 135) Identity, community, and culture; their interactions and formation.

5 units, not given this year

**ANTHRO 235A. The Anthropology of Security**

(Same as ANTHRO 135A) This seminar begins by outlining the main theoretical and empirical challenges in the areas of surveillance studies and security studies. The seminar provides a space wherein students will be able to discuss these interdisciplinary areas and develop their own Anthropology-informed perspectives. The seminar then discusses the work of Anthropologists who through their ethnographic and theoretical work have helped developed and important and emergent area: *¿The Anthropology of Security¿*. Areas covered include, inter alia, national security, security and war, biometrics, gated-ness, and environmental and bio-security threats.

*3-5 units, not given this year*

**ANTHRO 237. The Politics of Humanitarianism**

(Same as ANTHRO 137) What does it mean to want to help, to organize humanitarian aid, in times of crisis? At first glance, the impulse to help issue generis a good one. Helping is surely preferable to indifference and inaction. This does not mean that humanitarian interventions entail no ethical or political stakes *¿* or that they are beyond engaged critique. We need to critique precisely that which we value, and to ask some hard questions, among them these: What are the differences among humanitarianism, charity, and philanthropy? What of social obligations and solidarities? How does the neoliberal world order currently create structural inequalities that ensure the reproduction of poverty and violence? How does the current order of things resemble or differ from the colonial world order? This course examines the history of humanitarian sensibilities and the emergence of organized action in the *¿*cause of humanity¿. In the early years of humanitarian intervention, political neutrality was a key principle;

*5 units, not given this year*

**ANTHRO 239. Ethnography of Africa**

(Same as ANTHRO 139) The politics of producing knowledge in and about Africa through the genre of ethnography, from the colonial era to the present. The politics of writing and the ethics of social imagination. Sources include novels juxtaposed to ethnographies.

*5 units, Win (Malkki, L)*

**ANTHRO 240A. Ethnographic Archaeologies**

(Same as ANTHRO 140A, ARCHLGY 137) How have ethnographic and archaeological methods been combined in anthropological research? What methodological and theoretical implications do these kinds of projects generate? Seminar topics will include ethnoarchaeology, ethnographies of archaeological practice, public archaeology and heritage ethics. Lecture and discussion.

*4-5 units, NEXTYEAR*

**ANTHRO 247. Nature, Culture, Heritage**

(Same as ANTHRO 147) Seminar. Shared histories of natural and cultural heritage and their subsequent trajectories into the present. How thought about archaeological sites and natural landscapes have undergone transformations due to factors including indigenous rights, green politics, and international tourism. The development of key ideas including conservation, wilderness, sustainability, indigenous knowledge, non-renewability and diversity. Case studies draw on cultural and natural sites from Africa, the Americas and Australia.

*5 units, Aut (Meskell, L)*

**ANTHRO 248. Health, Politics, and Culture of Modern China**

(Same as ANTHRO 148) One of the most generative regions for medical anthropology inquiry in recent years has been Asia. This seminar is designed to introduce upper division undergraduates and graduate students to the methodological hurdles, representational challenges, and intellectual rewards of investigating the intersections of health, politics, and culture in contemporary China.

*4-5 units, Aut (Kohrman, M)*

**ANTHRO 248A. Nomads of Eurasia: Culture in Transition**

(Same as ANTHRO 148A) Traditional peoples of Central and Inner Asia; their lifestyles and cultural history. Modern research approaches and recent fieldwork data published mainly in Russian and Central Asian languages. Audio-visual materials.

*5 units, Win (Kunanbaeva, A)*

**ANTHRO 251. Women, Fertility, and Work**

(Same as ANTHRO 151, HUMBIO 148W) How do choices relating to bearing, nursing, and raising children influence women's participation in the labor force? Cultural, demographic, and evolutionary explanations, using crosscultural case studies. Emphasis is on understanding fertility and work in light of the options available to women at particular times and places.

*5 units, not given this year*

**ANTHRO 253A. Japan's Minorities**

(Same as ANTHRO 153A) Cultural and social history of Japan since WWII. Falling birth rates, changing family structure, decreasing and then increasing divorce rates, coping with societal aging, expansion of higher education, solving new educational problems, increasing variability of work situation, introduction of foreign workers. Attention to the legacy of Tokugawa and pre-war Japan as antecedent to postwar developments.

*3-5 units, not given this year*

**ANTHRO 254A. Japan's Postwar Demographic And Social Changes**

(Same as ANTHRO 154A) Changing birth and death rates. Restructuring education and employment. Problems with seniors. Increasing foreign workers.

*3-5 units, Win (Staff)*

**ANTHRO 255. Research Methods in Ecological Anthropology**

(Same as ANTHRO 155) The course prepare students for the methodological and practical aspects of doing ecologically oriented, quantitative anthropological field research. The primary goal is to explore what it means to ask anthropological questions in a systematic way. We will focus on understanding what can constitute an interesting question, how to frame a question in way that facilitates investigation, and how to design methods to begin investigating a question. In turn, the course will provide a format to refine research projects in preparation for doing more extensive fieldwork.

*3-5 units, Spr (Bird, D)*

**ANTHRO 259. Conservation and Development Dilemmas in Latin America: Galapagos as a Microcosm**

(Same as ANTHRO 159) The course will examine conservation and development dilemmas as they affect countries in Central and South America, eventually focusing on the Galapagos for a detailed case study. The class will explore the resolution of key issues in Galapagos in conjunction with research supported by an Environmental Ventures Project (EVP) Grant from the Woods Institute.

*3-5 units, Spr (Staff)*

**ANTHRO 260. Social and Environmental Sustainability: The Costa Rican Case**

(Same as ANTHRO 160) Seminar focused on issues of tropical sustainability with a particular emphasis on the Osa Peninsula of Costa Rica. Offered in conjunction with the Osa Initiative in the Wood¿s Institute for the Environment, the course highlights issues of human development in the tropics, through such means as agricultural development, ecotourism, conservation efforts, private and indigenous reserves, and mining. The course will draw from diverse disciplines including anthropology, rural sociology, conservation biology, geosciences, history, political science, and journalism. In addition to weekly discussions, students will development a research paper throughout the term which will be presented to a panel of selected Wood¿s Faculty during the final week of the term.

*3-5 units, Aut (Durham, W; Hunt, C)*

**ANTHRO 261. Human Behavioral Ecology**

(Same as ANTHRO 161) Theory, method, and application in anthropology. How theory in behavioral ecology developed to understand animal behavior is applied to questions about human economic decision making in ecological and evolutionary contexts. Topics include decisions about foraging and subsistence, competition and cooperation, mating, and reproduction and parenting.

*3-5 units, Win (Bird, R)*

**ANTHRO 262. Indigenous Peoples and Environmental Problems**

(Same as ANTHRO 162) The social and cultural consequences of contemporary environmental problems. The impact of market

economies, development efforts, and conservation projects on indigenous peoples, emphasizing Latin America. The role of indigenous grass roots organizations in combating environmental destruction and degradation of homeland areas.

*3-5 units, not given this year*

**ANTHRO 263. Conservation and Evolutionary Ecology**

(Same as ANTHRO 163) Environmental degradation resulting from human behavior, and what can be done about it. Patterns of interaction between people and environments, and why they vary over time and space. Topics include adaptation and behavior, resource acquisition and utilization, conflicts of interest, collective action problems, conspicuous consumption, waste, land management, and public policy.

*5 units, not given this year*

**ANTHRO 266. Political Ecology of Tropical Land Use:**

**Conservation, Natural Resource Extraction, and Agribusiness**

(Same as ANTHRO 166) Seminar. The state, private sector, development agencies, and NGOs in development and conservation of tropical land use. Focus is on the socioeconomic and political drivers of resource extraction and agricultural production. Case studies used to examine the local-to-global context from many disciplines. Are maps and analyses used for gain, visibility, accountability, or contested terrain? How are power dynamics, land use history, state-private sector collusion, and neoliberal policies valued? What are the local and extra-local responses?

*3 units, Win (Curran, L)*

**ANTHRO 267. Signaling Theory**

(Same as ANTHRO 167) (Graduate students register for 267.) Why does the peacock have such a large elaborate tail? Why does conspicuous consumption serve to create markers of distinction? How does the pursuit of social capital generate prestige? Answers to these questions from convergent scholarship in social theory, economic theory, and evolutionary theory. The use of signaling theory to explain disparate social and material phenomena. Authors include Veblen, Bourdieu, and Zahavi. Prerequisite for undergraduates: consent of instructor.

*3 units, Spr (Bird, R)*

**ANTHRO 268A. Risky Environments: The Nature of Disaster**

(Same as ANTHRO 168A) This seminar explores topics including environmental movements and countercultures, human agency and geoenvironmental ecotourism, and indigenous perspectives of changing climates to query how humans view nature in terms of stability, instability, risk and disaster in the 21st century. Case studies draw upon a broad range of geographical regions including the Arctic, Iceland, Australia, and the Americas. Discussions will draw upon film portrayals and interviews with researchers in addition to readings.

*5 units, not given this year*

**ANTHRO 271. The Biology and Evolution of Language**

(Same as ANTHRO 171, HUMBIO 145L) Lecture course surveying the biology, linguistic functions, and evolution of the organs of speech and speech centers in the brain, language in animals and humans, the evolution of language itself, and the roles of innateness vs. culture in language. Suitable both for general education and as preparation for further studies in anthropology, biology, linguistics, medicine, psychology, and speech & language therapy. Anthropology concentration: CS, EE. No prerequisites.

*4-5 units, Win (Fox, J)*

**ANTHRO 272. Seminar on Cultural Evolution and Coevolution**

(Same as ANTHRO 172) Upper division/graduate seminar on recent approaches to the study of cultural evolution and coevolution. Critical evaluation of Darwinian and non-Darwinian theories, with special attention to the interplay of culture, genes, environment and society. Students will undertake projects of their own design to review, test, or improve current theoretical formulations. Prerequisite: a university-level course in evolution, ecology, or human behavioral biology.

*3-5 units, not given this year*

**ANTHRO 272A. Human Walking: Evolution Anatomy and Disease Human Locomotion and Musculoskeletal Pathology**

(Same as ANTHRO 172A) This course takes an in-depth look at the unique form of locomotion specific to our lineage: bipedality.

It will introduce the fossil evidence for when bipedality first arose and how locomotion has changed throughout human evolution. It will also examine the consequences of that change, presenting case studies of common musculoskeletal diseases that result from bipedality. Suggested Prerequisite: Introduction to Biological/Physical Anthropology, HUMBIO 2B, or ANTHRO 6, Human Origins.

*3-5 units, Win (Melillo, S)*

**ANTHRO 274. Beginnings of Social Complexity**

(Same as ANTHRO 174) Models and examples of the social evolution of stratification and political centralization in prehistoric human societies. Inferences from the archaeological record concerning the forces and mechanisms behind the rise and fall of complex societies, particularly in S. America. (HEF II; DA-B)

*5 units, not given this year*

**ANTHRO 275. Human Osteology**

(Same as ANTHRO 175, HUMBIO 180) The human skeleton. Focus is on identification of fragmentary human skeletal remains. Analytical methods include forensic techniques, archaeological analysis, paleopathology, and age/sex estimation. Students work independently in the laboratory with the skeletal collection.

*5 units, Spr (Klein, R; Coddling, B)*

**ANTHRO 277. Japanese Society and Culture**

(Same as ANTHRO 77) Focus is on power, identity, and the politics of knowledge production. How transnational interactions influence Japanese identity. How anthropological knowledge has contributed to understanding Japanese culture and society. Gender, race and class; contemporary ethnographies. Modernity and globalization. Cultural politics, domestic work, labor management, city planning, ad images, anime, martial art, fashion, theater, leisure, and tourism.

*5 units, not given this year*

**ANTHRO 277. Environmental Change and Emerging Infectious Diseases**

(Same as ANTHRO 177, HUMBIO 114) The changing epidemiological environment. How human-induced environmental changes, such as global warming, deforestation and land-use conversion, urbanization, international commerce, and human migration, are altering the ecology of infectious disease transmission, and promoting their re-emergence as a global public health threat. Case studies of malaria, cholera, hantavirus, plague, and HIV.

*3-5 units, Aut (Durham, W; Jones, J)*

**ANTHRO 281. Culture and Madness: Anthropological Approaches to Psychiatric Illness**

(Same as ANTHRO 181, HUMBIO 146) Interdisciplinary. Culture and social context on the identification, course, and outcome of psychiatric illness. What is known from psychiatry about the nature of illness as a biomedical process and from anthropology about the life course of illness within particular settings. Prerequisite: Human Biology core or equivalent or consent of instructor.

*3-5 units, Aut (Luhmann, T)*

**ANTHRO 282. Medical Anthropology**

(Same as ANTHRO 82) Emphasis is on how health, illness, and healing are understood, experienced, and constructed in social, cultural, and historical contexts. Topics: biopower and body politics, gender and reproductive technologies, illness experiences, medical diversity and social suffering, and the interface between medicine and science.

*5 units, Spr (Jain, S)*

**ANTHRO 293B. Master's Thesis Writing Seminar**

May be repeated for credit.

*2-4 units, Win (Staff)*

**ANTHRO 298B. Digital Methods in Archaeology**

(Same as ANTHRO 98B) This is a course on digital technologies in archaeology used for documentation, visualization, and analysis of archaeological spaces and objects. Emphasizes hands-on approaches to image manipulation, virtual reality, GIS, CAD, and photogrammetry modeling methods.

*3-5 units, not given this year*

**ANTHRO 299. Directed Individual Study**

Prerequisite: consent of instructor.

*1-10 units, Aut (Staff)*

**ANTHRO 300. Reading Theory Through Ethnography**

Required of and restricted to first-year ANTHRO Ph.D. students. Focus is on contemporary ethnography and related cultural and social theories generated by texts. Topics include agency, resistance, and identity formation, and discourse analysis. Prerequisite: consent of instructor.

*5 units, Aut (Ebron, P)*

**ANTHRO 301. History of Anthropological Theory, Culture and Society**

Required of Anthropology Ph.D. students. The history of cultural and social anthropology in relation to historical and national contexts and key theoretical and methodological issues as these inform contemporary theory and practices of the discipline. Enrollment limited to 15. Prerequisite: consent of instructor.

*5 units, Win (Staff)*

**ANTHRO 302. History of Anthropological Theory, Ecology and Environment**

Evolutionary and ecological theory from the 19th century to present. Theory and concepts from evolution and ecology, emphasizing anthropological applications. Evolutionary theories of human behavior, culture, and societies. Ecological theory behind carrying capacity, sustainable yield, and population growth. Emphasis is on tools of analysis and formulating research questions in anthropology today. Upper division undergrads require consent of instructor.

*5 units, Win (Bird, R; Curran, L)*

**ANTHRO 303. Introduction to Archaeological Theory**

The history of archaeological thought emphasizing recent debates. Evolutionary theories, behavioral archaeology, processual and cognitive archaeology, and approaches termed feminist and post-processual archaeology in the context of wider debate in adjacent disciplines. The application and integration of theory on archaeological problems and issues. Prerequisite: consent of instructor.

*5 units, Win (Hodder, I)*

**ANTHRO 304. Data Analysis for Quantitative Research**

Univariate, multivariate, and graphical methods used for analyzing quantitative data in anthropological research. Archaeological and paleobiological examples. Recommended: algebra. Prerequisite: consent of instructor.

*5 units, not given this year*

**ANTHRO 305. Research Methods in Ecological Anthropology**

The course prepare students for the methodological and practical aspects of doing ecologically oriented, quantitative anthropological field research. The primary goal is to explore what it means to ask anthropological questions in a systematic way. We will focus on understanding what can constitute an interesting question, how to frame a question in way that facilitates investigation, and how to design methods to begin investigating a question. In turn, the course will provide a format to refine research projects in preparation for doing more extensive fieldwork.

*5 units, not given this year*

**ANTHRO 306. Anthropological Research Methods**

Required of ANTHRO Ph.D. students; open to all graduate students. Research methods and modes of evidence building in ethnographic research. Enrollment limited to 10. Prerequisite: consent of instructor.

*5 units, Win (Staff)*

**ANTHRO 307. Archaeological Methods and Research Design**

Methodological aspects of field and laboratory practice from traditional archaeological methods to the latest interdisciplinary analytical techniques. The nature of archaeological data and inference; interpretive potential of these techniques. Prerequisite: consent of instructor.

*5 units, not given this year*

**ANTHRO 308. Proposal Writing Seminar**

Required of second-year Ph.D. students in the culture and society track. The conceptualization of dissertation research problems, the theories behind them, and the methods for exploring them. Participants draft a research prospectus suitable for a dissertation proposal and research grant applications. Limited enrollment. Prerequisite: consent of instructor.

*5 units, Spr (Hansen, T)*

**ANTHRO 309. Advanced Evolutionary Theory in Anthropological Sciences**

History of evolutionary theory from the 19th century to present, emphasizing anthropological applications. Theory and concept in evolutionary biology; evolutionary theories of culture; and interactions of genetic, social, and cultural evolution and their implications. Emphasis is on tools of analysis and the value of evolutionary thinking for formulating research questions in anthropology today. Prerequisite: graduate standing or consent of instructor. (HEF II, III)

*5 units, not given this year*

**ANTHRO 310C. Intersections**

Themes of materiality and visuality, aesthetic and other forms of cultural production, and the meanings of creativity and convention. Ethnographic and archaeological material and case studies from worldwide cultural contexts. Prerequisite: consent of instructor.

*5 units, not given this year*

**ANTHRO 310G. Introduction to Graduate Studies**

Required graduate seminar. The history of anthropological theory and key theoretical and methodological issues of the discipline. Prerequisite: consent of instructor.

*2 units, Aut (Ferguson, J)*

**ANTHRO 311. Ethnographic Writing**

For graduate students writing or planning to write a dissertation using ethnographic methods. The choices made by the authors of ethnographies in constructing an argument, using data and speaking to an audience of readers. Readings include chapters written by class members currently writing dissertations. Prerequisite: consent of instructor.

*3-5 units, not given this year*

**ANTHRO 311G. Introduction to Culture and Society Graduate Studies in Anthropology**

Required graduate seminar for CS track. The history of anthropological theory and key theoretical and methodological issues in cultural anthropology. Prerequisites: for 1st year PhD students in the cultural and society track or by permission of the instructor.

*2 units, Win (Ferguson, J), Spr (Ferguson, J)*

**ANTHRO 312. Writing Across Audiences: Styles and Methods**

This course examines the way anthropologists and others write to different audiences. What do you need to do communicate to a mainstream anthropology audience? How does that change when you write an editorial or place something in a popular venue? When you try to capture a non-anthropological medical audience? What methods might you consider adding to enable that cross-talk? We will examine a series of examples of people who have written across.

*5 units, Win (Luhmann, T)*

**ANTHRO 314. Policing the Family: Kinship and Society**

The study of kinship has wandered off anthropological syllabi just as it assumes ever greater significance within contemporary (often dystopic) political debates on the societies produced by different kinds of families. Firstly, the course will ask whether kinship structures are distinct structures of recognition that generate their own ambivalence, anxiety, and comfort. We will focus this through discussing the relationship of kinship to gender roles and ideologies. Secondly, it will locate how talking, thinking, doing and imagining how people are properly related to each other (as well as potential transgressions) are central to imaginations of the social itself. This will also initiate a larger debate on the nature of social change. Thirdly, the course will give students a precise and calibrated entrypoint into the debates around kinship from the perspective of three differing disciplines, social history, psychoanalysis, and anthropology.

*5 units, Aut (Thiranagama, S)*

**ANTHRO 319. South Asia: History, People, Politics**

The South Asian subcontinent (comprising of India, Pakistan, Bangladesh, Nepal, Bhutan and Sri Lanka) is one of the most diverse and densely populated regions in the world and increasingly prominent in new global political and cultural economies. South Asia has also provided the inspiration for cutting edge theories about the colonial state, postcolonial studies, democracy, popular culture, and religious conflict. The course will

provide an overview of major historical events and social trends in contemporary South Asia and focus on themes such as gender, religion, caste, migration and movement, new technologies, the urban and rural, the state, and new forms of consumption among others. Thus, the course will give students historically and theoretically informed perspectives on contemporary South Asia, as well as how to apply insights learned to larger debates within the political and social sciences.

5 units, Win (Thiranyagama, S)

#### **ANTHRO 320A. Race, Ethnicity, and Language**

(Same as EDUC 389X, LINGUIST 253) This seminar explores the linguistic construction of race and ethnicity across a wide variety of contexts and communities. Throughout the course, we will take a comparative perspective and highlight how different racial/ethnic formations participate in similar, yet different, ways of doing race through language, interaction and culture. Readings draw heavily from perspectives in (linguistic) anthropology and sociolinguistics.

3-4 units, Win (Alim, H)

#### **ANTHRO 321. Reading Marx, Reading Weber**

This advanced graduate seminar is devoted to a critical reading of selected writings by two nineteenth century social theorists who continue to shape anthropology and social analysis more broadly. Prerequisites: Graduate standing in Anthropology or permission of the instructor. Previous graduate level coursework in cultural or social anthropology, social theory or cultural studies is required. No auditing is permitted. Maximum enrollment 12.

5 units, not given this year

#### **ANTHRO 322. From Biopolitics to Necropolitics and Beyond**

Scholarship produced and informed by Michel Foucault. Focus is on the final period of Foucault's life; how his discussions of biopolitics, subjectification, governmentality, and death have served as touchstones for recent empirical research. Key interventions initially made under these rubrics; how anthropologists and others have applied, challenged, and extended them. Prerequisite: consent of instructor.

5 units, not given this year

#### **ANTHRO 323. Graduate Seminar in Economic Anthropology**

Classical and contemporary anthropological perspectives on topics such as money, markets and exchange; capitalist and non-capitalist modes of production; class and socio-economic differentiation; globalization and neoliberalism; and the social and cultural construction of the object, the economy.

5 units, Spr (Ferguson, J)

#### **ANTHRO 324. Political Anthropology**

An anthropological approach to politics through bringing anthropological ways of thinking and modes of analysis to bear on key presuppositions of modern Western political thought. Ideas of rights, the individual, society, liberty, democracy, equality, and solidarity; ethnographic accounts used to identify the limits of conventional analytical approaches and to document the forms of politics that such approaches either ignore or misunderstand. Prerequisite: consent of instructor.

5 units, not given this year

#### **ANTHRO 326. Postcolonial and Indigenous Archaeologies**

The role of postcolonial and Indigenous archaeologies as emergent disciplinary activities within contemporary society. Community based archaeologies; the roles of oral history, landscape, and memory; archaeology as political action; and history in archaeological projects. The emergence of Indigenous archaeology within N. America in relation to limitations imposed by processual or new archaeology; and NAGPRA, Kennewick, essentialism, and terminal narratives within this context. Prerequisite: consent of instructor.

5 units, not given this year

#### **ANTHRO 327. Language and Political Economy**

Theories of language: Saussure, Jakobson, Hymes, Marx, Foucault, Butler, and Derrida. The theorization of language in its linkages to power, social relations, and history. Prerequisites: Linguistics or Anthropology course work. Prerequisite: consent of instructor.

5 units, not given this year

#### **ANTHRO 331. The Anthropology of Technology**

Iconic discipline-building works of the last three decades; readings that lay out and intervene in contemporary debates. Prerequisite:

consent of instructor.

5 units, not given this year

#### **ANTHRO 331A. Ecology, Evolution, and Human Health**

(Same as ANTHRO 31) Ecology, Evolution, and Human Health Human ecology, environments, adaptation and plasticity, and their relationship to health and well-being considered in the broad comparative context. Topics include human population history, subsistence ecology, demography, reproductive decision making, urbanization, migration, infectious disease, the physiology of stress and the inflammatory response, social capital and social networks, nutrition, nutritional deficiencies, growth, and social inequalities. No prior course work in ecological or medical anthropology required.

3-5 units, not given this year

#### **ANTHRO 332. Transformative Design**

(Same as ENGR 231) Project-based. How interactive technologies can be designed to encourage behavioral transformation. Topics such as self-efficacy, social support, and mechanism of cultural change in domains such as weight-loss, energy conservation, or safe driving. Lab familiarizes students with hardware and software tools for interaction prototyping. Students teams create functional prototypes for self-selected problem domains. Prerequisite: consent of instructor. Design Institute class; see <http://dschool.stanford.edu>.

3-5 units, Win (Roth, B; Dryer, M; Shanks, M)

#### **ANTHRO 333A. The Cultural Politics of Ambiguity**

Contemporary conceptual approaches to understanding the politics and production of certainty, ambiguity, and doubt. The seemingly ambiguous nature of the science of industrial pollution and contamination exonerate corporate and government polluters from rising rates of cancer, while the science of liberal economic models seems to create no alternative to massive economic subsidies of the financial sector. How culpability, exoneration, transformative action, institutional stasis, and political rely on the production of certainty, ambiguity, and doubt. Prerequisite: consent of instructor.

5 units, not given this year

#### **ANTHRO 334. Trauma and Healing**

This course considers class and recent work on culture and psychiatry with an emphasis on trauma. We consider work on the main diagnostic categories like depression and schizophrenia, but also the work on dissociation, war combat, PTSD, and psychosis.

5 units, not given this year

#### **ANTHRO 334A. Introduction to Multispecies Theory in the Humanities and Social Sciences**

(Same as FRENGEN 334) This course will focus on such problems as: posthumanism and the emergence of non-anthropocentric human and social sciences, multispeciesism in the re-thinking of disciplines, redefinition of the concept of life in the human and social sciences by including non-human subjects, animals and plants as others, rethinking the category of the social as a collective of humans and non-humans, nonintentional agency (as well as understanding of vitalism and animism), animal holocaust, multispecies art and living organisms as media in art (bio-art), ethics of compassion and the problem of the dignity of the non-human (including recent interest in the dignity of plants).

5 units, Spr (Domanska, E)

#### **ANTHRO 336. Anthropology of Rights**

Ideas of rights at the center of contemporary politics around the world. An anthropological perspective on how rights are invoked, claimed, and translated into institutional policies in ethnographic cases. The limitations of liberal notions of rights and innovative forms of politics emerging within and against rights talk. Prerequisite: consent of instructor.

5 units, not given this year

#### **ANTHRO 337. The Politics of Humanitarianism**

What does it mean to want to help, to organize humanitarian aid, in times of crisis? At first glance, the impulse to help issues a good one. Helping is surely preferable to indifference and inaction. This does not mean that humanitarian interventions entail no ethical or political stakes or that they are beyond engaged critique. We need to critique precisely that which we value, and to ask some hard questions, among them these: What are the differences among humanitarianism, charity, and philanthropy? What of social obligations and solidarities? How does the

neoliberal world order currently create structural inequalities that ensure the reproduction of poverty and violence? How does the current order of things resemble or differ from the colonial world order? This course examines the history of humanitarian sensibilities and the emergence of organized action in the cause of humanity. In the early years of humanitarian intervention, political neutrality was a key principle;

*5 units, not given this year*

**ANTHRO 338. Anthropological Approaches to Religion**

*5 units, not given this year*

**ANTHRO 339. Anthropology of Religion**

This course presents classic and contemporary work on the anthropology of religion: Durkheim Elementary Forms of the Religious Life; Levy-Bruhl; Primitive Mentality; Douglas Purity and Danger; Evans Pritchard Nuer Religion; and recent ethnographies/scholarly work by Robbins, Keane, Keller, Boyer, Barrett, and others.

*5 units, not given this year*

**ANTHRO 340. Anthropology of the Imagination**

The course explores the use of imagination in religion and in healing. Both symbolic healing and religion depend upon the capacity to treat what must be imagined as real. How does social practice enable this capacity? What is the role of the imagined in human sociality? Depending on class interests, we will read a variety of classic and more recent work: Durkheim's Elementary Forms of the Religious life; Frazer's Golden Bough; Vygotsky Language and thought; Mary Watkins Invisible guests; Kohut Analysis of the self; and contemporary ethnographies by Mittermaier, McIntosh, Ashforth, work on trauma, and others.

*5 units, Aut (Luhrmann, T)*

**ANTHRO 343. Culture as Commodity**

Focus is on theories of commodification, interests in tourism, national cultures as marketable objects, and how identities are constituted through production and consumption. The formation of global style and taste. Prerequisite: consent of instructor.

*5 units, not given this year*

**ANTHRO 344. Graphic Medicine**

In this course students will study medical cultures through visual communication ranging from x-rays and PET scans to graphic novels. Course will also include literature on visual theory.

*5 units, not given this year*

**ANTHRO 344B. Graphic Medicine: Part 2**

In this course students will study medical cultures through visual communication ranging from x-rays and PET scans to graphic novels. Course will also include literature on visual theory.

*5 units, Spr (Jain, S)*

**ANTHRO 345. New Visions in Medical Anthropology**

Recent experimental histories of the field. Emphasis is on how, working within anthropology's classic format, the ethnographic monograph, authors have innovatively responded to the challenges of representing amorphous, unspoken, and often violent relationships between the body and social change. The authors' expository techniques, and how they engage and extend theoretical debate. How to assess works within medical anthropology and its allied fields. Prerequisite: consent of instructor.

*5 units, not given this year*

**ANTHRO 346A. Sexuality Studies in Anthropology**

Current research on sexuality from perspectives including paleoanthropology, archaeology, ethnography, and linguistic anthropology. Readings paired with case studies that explore theoretical and methodological issues. Prerequisite: consent of instructor.

*5 units, not given this year*

**ANTHRO 349. Anthropology of Capitalism**

Issues in cultural theory and methodology through research on people who have greater material and cultural resources than those usually studied by anthropologists. How ideas about ideology, hegemony, identity, power, and practice are altered in studying those considered to be agents of power rather than the subaltern. Topics: global capitalism, masculinity, white racial subjectivity. Enrollment limited to 20. Prerequisite: consent of instructor.

*5 units, not given this year*

**ANTHRO 352. Foucault: The Question of Method**

Foucault as methodological exemplar for historical and social research. Emphasis is on his historical studies of clinical medicine, prisons, and sexuality, and on applying his methods to empirical studies of topics such as colonialism, race, and liberal governmental rationality.

*5 units, not given this year*

**ANTHRO 353. Landscape**

This seminar offers an interdisciplinary approach to the study of landscape, noting the various processes and projects that have helped create them. Readings draw together a broad range of theoretical approaches that are attentive to human-non-human interactions and the overlapping and divergent spatial and temporal questions of the exchanges between landscapes and humans. The readings will also draw attention to representational and non-representational ways that material and symbolic aspects of landscapes help constitute the making of place. The aim of the seminar is to explore the various methodologies for what they offer for the study of place.

*5 units, Win (Ebron, P)*

**ANTHRO 355. Cities in Global Perspective**

Interdisciplinary approach to examining global cities. The concept of the global city, and the interdependent processes that help produce urban spaces. Situating the transformation of urban spaces within globalization and its differential effects; current explanatory frameworks that pay attention to multiple scales of spatial and economic articulation. Prerequisite: graduate standing.

*5 units, not given this year*

**ANTHRO 356. The Anthropology of Development**

Multidisciplinary. Topics vary annually. Areas include Africa, S. Asia, and Latin America. Prerequisite: consent of instructor.

*5 units, not given this year*

**ANTHRO 357. Other Minds: Puzzles in Psychiatric and Psychological Anthropology**

Problems in the way anthropologists explore other minds anthropologically and the ways in which anthropologists seek to understand the models of other minds held by the people observed. Topics include theory of mind, witchcraft, belief, empathy, psychosis, trauma, Freud, Vygotsky, and cognitive dissonance. Prerequisite: consent of instructor. Undergrads cannot take this class without permission of the instructor.

*5 units, not given this year*

**ANTHRO 362. Human Spatial Dynamics: Seminar in Communicating Contemporary Science**

This seminar is designed to bring together all students and faculty currently working on issues related to human use of land and spatially defined resources. The focus is to provide a forum for reporting on recent results and question development, providing students with vital skills in designing and communicating the results of research. Undergrads by permission of instructor.

*5 units, not given this year*

**ANTHRO 362A. Introduction to Human Evolution, Ecology, Genetics, and Culture**

Themes and topics of lasting heuristic value in the anthropological sciences. Combines the lecture content of 2A and 2B with a discussion section for graduate students. Must be taken in the Autumn Quarter of a student's first year in the graduate program.

*5 units, not given this year*

**ANTHRO 363. Demography and Life History Theory**

Problems in demography and theoretical population biology applied to human systems. Emphasis is on establishing relationships between models in theoretical population biology and empirical demographic methodology. Topics include philosophy of models and model building, population dynamics, stable population theory, species interactions in human ecology, models of infectious diseases and their control, cultural evolution. Prerequisites: HUMBIO 137 or consent of instructor.

*5 units, not given this year*

**ANTHRO 364. EcoGroup: Current Topics in Ecological, Evolutionary, and Environmental Anthropology**

Seminar; restricted to graduate students. Topics vary with instructor. How to ask appropriate questions, how to derive research hypotheses from theory, how to design methodologies for testing hypotheses, and how to present results by reading and

critiquing key contemporary papers in the field. Ph.D. students enrolling in this course to fulfill the department review course requirement must enroll in 5 units. Graduate students enrolling in this course to participate in a topical forum may enroll in 2 units. Course may be repeated for 2 units. Prerequisites: by consent of instructor.

*5 units, not given this year*

**ANTHRO 364A. EcoGroup: Problems in Ecological and Evolutionary Anthropology**

Seminar; restricted to graduate students. Topics vary with instructor. How to ask appropriate questions, how to derive research hypotheses from theory, how to design methodologies for testing hypotheses, and how to present results by reading and critiquing key contemporary papers in the field. Ph.D. students enrolling in this course to fulfill the department review course requirement must enroll in 5 units. Graduate students enrolling in this course to participate in a topical forum may enroll in 2 units. Course may be repeated for 2 units. Prerequisites: by consent of instructor.

*2-5 units, Aut (Jones, J)*

**ANTHRO 365. The Theory of the Modern Subject**

This course traces the emergence of a coherent theory of the modern subject through readings of philosophical works and social theory from 18th century to the 20th century.

*5 units, not given this year*

**ANTHRO 365B. Beyond the Bourgeois Self: Desire, Subjection, and the Limits of the Human**

The course seeks to provide an overview of the conceptual and historical development of modern, western ideas of personhood and subjectivity, as the subject as simultaneously constituted as an *ŷ* and subjected by the powers of disciplines, property regimes and cultural conventions. The readings are excerpts from key philosophical texts paired with commentaries that put the philosophical positions into a deeper historical context. Many of these commentaries trace how practical theories of *ŷ* or minor selves *ŷ* the subject people of the colonies, slaves and others *ŷ* were integral to the very development of ideas of the modern, autonomous and acting self in the western world. The first part of the course began with Descartes and ended in late nineteenth century, the era of high bourgeois culture and imperialism. This second part deals with significant elements of twentieth century thought along the same global lines

*5 units, Aut (Hansen, T)*

**ANTHRO 366. Paper Works**

This seminar will focus on the emerging body of literature on the materiality of the production, circulation, and mediation of paperwork as constitutive of modern forms of governance. We will discuss specific genres of paperworks; notes, memos, files, documents, as well as archives and other mnemonic technologies; both as cultural practices and reflexive objects, and examine how they produce modern social epistemologies of accountability, evidence, the fact, and truth in the fields of law, business, and public administration, as well as in civil society generally. Readings will include works by Max Weber, Bruno Latour, Jacques Derrida, Michel Foucault, Cornelia Vismann, Ann Stoler, and others.

*5 units, not given this year*

**ANTHRO 370. Advanced Theory and Method in Historical Archaeology**

Current debates about theory and method. Prerequisite: consent of instructor.

*5 units, not given this year*

**ANTHRO 371. Proposal Writing for Archaeologists**

The craft of writing research and grant proposals. Focus is on proposals for archaeological fieldwork and laboratory research. Students prepare their own research proposals. Restricted to and required of second-year doctoral students in the Department of Anthropology, Archaeology concentration. Others require consent of instructor.

*5 units, not given this year*

**ANTHRO 373. Things: An Archaeology of the Relationships Between Humans and Things**

This course examines a variety of approaches that claim to explore the relationships between humans and things. Some of the

approaches include Marx and material culture studies; Heidegger; cognitive and phenomenological; Actor Network Theory. But there is a need also to examine behavioral and ecological and Darwinian approaches. Many of these approaches do not adequately deal with the physicality of things as objects and there is a need to seek a way to incorporate such aspects of things into social theory.

*5 units, not given this year*

**ANTHRO 374. Archaeology of Colonialism/Postcolonialisms**

Advanced graduate seminar focused on the archaeology of colonial and postcolonial contexts, both prehistoric and historic. Emphasis on intersections between archaeological research and and subaltern, postcolonial, and transnational feminist/queer theory. Prerequisite: consent of instructor.

*5 units, Win (Voss, B)*

**ANTHRO 375. Archaeology and Globalism**

The emergence of archaeology as a discipline in the context of the rise of the nation state. Global economies and other issues have created a new context for archaeology. How are archaeology and heritage responding? The idea of world heritage. The impact of postcolonialism. The commodification of the past: the past as theme park, as travel tourism or nostalgia, as exotic and other. Conflict between uses of the past for identity and as theme park; between heritage and resource or play. The impact of the Goddess, New Age, and other movements. Archaeology and human rights issues including forensic archaeology. Prerequisite: consent of instructor.

*4-5 units, not given this year*

**ANTHRO 376. Archaeology: The Emergence of a Discipline**

This course explores the key thinkers and practitioners who have founded the discipline of archaeology. Reaching back into the nineteenth century, the course examines in depth the key figures, their preoccupations and projects that shaped the way that archaeology grew through the 20th and into the 21st century. Global in scope, the emphasis will be on field projects and practical problems that stimulated the intellectual development of archaeology as an independent discipline closely tied to geology, history, anthropology, and the natural sciences.

*5 units, Win (Hodder, I; Rick, J)*

**ANTHRO 380. Practice and Performance: Bourdieu, Butler, Giddens, de Certeau**

Poststructuralist theories of iteration and mimesis used by social scientists to negotiate the tension between social structure and social practice: Giddens's structuration theory; Bourdieu's practice theory; Butler's theories of gender performativity; and de Certeau's analysis of tactics and strategies. Ethnographic and archaeological case studies that employ methodologies inspired by these approaches. Intersections and contradictions between these theorists' work; their use in anthropological practice. Issues of gender, sexuality, and ethnicity. Prerequisite: consent of instructor.

*5 units, not given this year*

**ANTHRO 400. Dissertation Writers Seminar**

Required of fifth-year Ph.D. students returning from dissertation field research and in the process of writing dissertations and preparing for professional employment.

*1-3 units, Aut (Malkki, L), Win (Malkki, L), Spr (Malkki, L)*

**ANTHRO 401A. Qualifying Examination: Topic**

Required of second- and third-year Ph.D. students writing the qualifying paper or the qualifying written examination.

*2-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**ANTHRO 401B. Qualifying Examination: Area**

Required of second- and third-year Ph.D. students writing the qualifying paper or the qualifying written examination. May be repeated for credit one time.

*2-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**ANTHRO 440. Teaching Assistantship**

Supervised experience as assistant in one undergraduate course.

*3-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**ANTHRO 441. Master's Research Thesis**

Supervised work for terminal and coterminal master's students writing the master's project in the final quarter of the degree program.

*1-15 units, Win (Staff), Spr (Staff), Sum (Staff)*

**ANTHRO 442. Reading Group**

Graduate student reading group on a thematic topic of interest. Intended for first or second-year cohort PhD students. Sections: Liisa Malkki, Sylvia Yanagisako, Thomas Hansen, Paulla Ebron, and Miyako Inoue

2-5 units, Win (Staff)

**ANTHRO 444. Anthropology Colloquium: Graduate Seminar**

Department Colloquia Lecture Series. Lectures presented on a variety of anthropological topics. Enrollment is required and restricted to the Department of Anthropology Master's students and First and Second-year PhD students. May be repeated for credit.

1 unit, Aut (Curran, L), Win (Ferguson, J), Spr (Ferguson, J)

**ANTHRO 445. Anthropology Brown Bag Series**

Current topics and trends in cultural/social anthropology, archaeology, and environmental and ecological anthropology. Enrollment in this noon-time series is restricted to the Department of Anthropology Master's students and First and Second-year PhD students.

1 unit, Aut (Ferguson, J), Win (Ferguson, J), Spr (Ferguson, J)

**ANTHRO 446A. Method of Analysis Program in the Social Sciences**

(Same as COMM 310) Colloquium series. Creation and application of new methodological techniques for social science research. Presentations on methodologies of use for social scientists across departments at Stanford by guest speakers from Stanford and elsewhere. See <http://mapss.stanford.edu>.

1 unit, not given this year

**ANTHRO 450. Research Apprenticeship**

Supervised work on a research project with an individual faculty member. May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ANTHRO 451. Directed Individual Study**

Supervised work for a qualifying paper, examination, or project with an individual faculty member.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ANTHRO 452. Graduate Internship**

Provides graduate students with the opportunity to pursue their area of specialization in an institutional setting such as a laboratory, clinic, research institute, or government agency.

3-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ANTHRO 801. TGR Project**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ANTHRO 802. TGR Dissertation**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## APPLIED PHYSICS (APPPHYS) COURSES

### UNDERGRADUATE COURSES IN APPLIED PHYSICS

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**APPPHYS 78Q. Tools of Nanotechnology**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Topics include: current and future applications of nanotechnology, nanofabrication tools, nanoscale characterization and manipulation tools, scanning probe microscopy (SPM), Stanford nanotechnology research examples, hands-on activities, research lab tours. Prerequisite: high school physics. GER:DB-EngrAppSci

3 units, Aut (Beetz, T)

**APPPHYS 79N. Energy Options for the 21st Century**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Choices for meeting the future energy needs of the U.S. and the world. Basic physics of energy sources, technologies that might be employed, and related public policy issues. Trade-offs and societal impacts of different energy sources. Policy options for making rational choices for a sustainable world energy economy. GER:DB-EngrAppSci

3 units, Aut (Fox, J; Geballe, T)

**APPPHYS 192. Introductory Biophysics**

(Same as APPPHYS 292) For advanced undergraduates or beginning graduate students. Quantitative models used in molecular biophysics. The relation of structure to function. Chemical equilibria, cooperativity, and control: elementary statistical mechanics, affinity plots, allostery, models of hemoglobin-oxygen binding, bacterial chemotaxis. Macromolecular conformations: polymer chain models, protein folding, taxonomy of globular proteins, general principles of sequence selection. Chemical kinetics. Multiple barriers: CO-myoglobin kinetics, ion diffusion through channels and ion selectivity, spectroscopy of ion channels-acetylcholine receptor. Supramolecular kinetics: conversion of chemical energy to mechanical force, myosin and kinesin, actin polymers. Nerve impulse propagation: membrane potentials, voltage sensitive ion gates, Hodgkin-Huxley equations, propagation of the nerve impulse.

3 units, alternate years, not given this year

### GRADUATE COURSES IN APPLIED PHYSICS

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**APPPHYS 201. Electrons and Photons**

Applied Physics Core course appropriate for graduate students and advanced undergraduate students with prior knowledge of elementary quantum mechanics, electricity and magnetism, and special relativity. Interaction of electrons with intense electromagnetic fields from microwaves to x-ray, including electron accelerators, x-ray lasers and synchrotron light sources, attosecond laser-atom interactions, and x-ray matter interactions. Mechanisms of radiation, free-electron lasing, and advanced techniques for generating ultrashort brilliant pulses. Characterization of electronic properties of advanced materials, prospects for single-molecule structure determination using x-ray lasers, and imaging attosecond molecular dynamics.

3 units, Spr (Bucksbaum, P; Chao, A; Galayda, J; Reis, D; Shen, Z)

**APPPHYS 202. Quantum Probability and Quantum Information**

Applied Physics Core course appropriate for graduate students and advanced undergraduate students with prior knowledge of elementary quantum mechanics, basic probability, and linear algebra. Quantum probability as a generalization of classical probability theory, with implications for information theory and computer science. Generalized quantum measurement theory, conditional expectation, and quantum noise theory with an emphasis on communications and precision measurements. Classical versus quantum correlations, entanglement and Bell's theorem. Introduction to quantum information processing including algorithms, error correction and communication protocols.

3 units, Win (Mabuchi, H; Yamamoto, Y)

**APPPHYS 203. Atoms, Fields and Photons**

Applied Physics Core course appropriate for graduate students and advanced undergraduate students with prior knowledge of elementary quantum mechanics, electricity and magnetism, and ordinary differential equations. Structure of single- and multi-electron atoms; electron correlation, atom-photon and atom-atom entanglement; fundamentals of laser spectroscopy and coherent control. Phenomenology and quantitative modeling of atoms in strong fields, with modern applications. Introduction to quantum optical theory of atom-photon interactions, including quantum trajectory theory.

3 units, Spr (Bucksbaum, P; Mabuchi, H)

**APPPHYS 207. Laboratory Electronics**

Lecture/lab emphasizing analog and digital electronics for lab research. RC and diode circuits. Transistors. Feedback and operational amplifiers. Active filters and circuits. Pulsed circuits, voltage regulators, and power circuits. Precision circuits, low-noise measurement, and noise reduction techniques. Circuit simulation tools. Analog signal processing techniques and modulation/demodulation. Principles of synchronous detection and

applications of lock-in amplifiers. Common laboratory measurements and techniques illustrated via topical applications. Limited enrollment. Prerequisites: undergraduate device and circuit exposure.

3 units, Win (Fox, J)

#### APPPHYS 208. Laboratory Electronics

Lecture/lab emphasizing analog and digital electronics for lab research. Continuation of APPPHYS 207 with emphasis on applications of digital techniques. Combinatorial and synchronous digital circuits. Design using programmable logic. Analog/digital conversion. Microprocessors and real time programming, concepts and methods of digital signal processing techniques. Current lab interface protocols. Techniques commonly used for lab measurements. Development of student lab projects during the last three weeks. Limited enrollment. Prerequisites: undergraduate device and circuit exposure. Recommended: previous enrollment in APPPHYS 207.

3 units, Spr (Fox, J), alternate years, not given next year

#### APPPHYS 216. X-Ray and VUV Physics

Research and classical concepts in photon science. Photon-electron interactions; x-ray absorption and Compton scattering. X-ray spectroscopy; EXAFS, SEXAFS, edge structure, magnetic circular dichroism, and linear dichroism. Photoemission spectroscopy and many-electron effects: angle-resolved and integrated photoemission, resonance photoemission, spin-polarized photoemission. Photoelectron diffraction and holography. X-ray interactions with condensed matter: diffraction and scattering. Photon sources: synchrotron, wigglers, and undulators. Photon and electron detectors and analyzers. Prerequisite: familiarity with quantum mechanics.

3 units, Win (Reis, D; Shen, Z), alternate years, not given next year

#### APPPHYS 217. Estimation and Control Methods for Applied Physics

Recursive filtering, parameter estimation, and feedback control methods based on linear and nonlinear state-space modeling. Topics in: dynamical systems theory; practical overview of stochastic differential equations; model reduction; and tradeoffs among performance, complexity, and robustness. Numerical implementations in MATLAB. Contemporary applications in systems biology and quantum precision measurement. Prerequisites: linear algebra and ordinary differential equations.

3 units, alternate years, not given this year

#### APPPHYS 219. Solid State Physics and the Energy Challenge

Technology issues for a secure energy future; role of solid state physics in energy technologies. Topics include the physics principles behind future technologies related to solar energy and solar cells, solid state lighting, superconductivity, solid state fuel cells and batteries, electrical energy storage, materials under extreme condition, nanomaterials.

3 units, alternate years, not given this year

#### APPPHYS 223. Stochastic and Nonlinear Dynamics

(Same as BIO 223) Theoretical analysis of dynamical processes: dynamical systems, stochastic processes, and spatiotemporal dynamics. Motivations and applications from biology and physics. Emphasis is on methods including qualitative approaches, asymptotics, and multiple scale analysis. Prerequisites: ordinary and partial differential equations, complex analysis, and probability or statistical physics.

3 units, alternate years, not given this year

#### APPPHYS 223B. Nonlinear Dynamics: This Side of Chaos

Linear dynamics, periodic systems, Hamiltonian motion and phase space. The physics of nonlinear motion: thinking in phase space. Perturbation theory, periodic orbits, resonances, stability and instability. Integrability and symplectic integration. The KAM theorem and renormalization description of the transition to chaos. Dissipation and bifurcation. Application of methods to nanoscience, lasers and accelerators, condensed matter physics and biophysics. Prerequisites: differential equations and classical mechanics.

3 units, Win (Ruth, R), alternate years, not given next year

#### APPPHYS 227. Quantum Device Physics of Atomic and Semiconductor Systems

Concepts and constituent technologies of quantum information

systems. Quantum cryptography: single photon and entangled photon-pair-based quantum key distributions, quantum teleportation, quantum repeater. Quantum computer: Deutsch-Josza algorithm, Grover algorithm, Shor algorithm, quantum simulation, quantum circuits. Quantum hardware: atomic physics, nuclear magnetic resonance, spintronics and quantum optics.

3 units, alternate years, not given this year

#### APPPHYS 232. Advanced Imaging Lab in Biophysics

(Same as BIO 132, BIO 232, BIOPHYS 232, MCP 232) Laboratory and lectures. Advanced microscopy and imaging, emphasizing hands-on experience with state-of-the-art techniques. Students construct and operate working apparatus. Topics include microscope optics, Koehler illumination, contrast-generating mechanisms (bright/dark field, fluorescence, phase contrast, differential interference contrast), and resolution limits. Laboratory topics vary by year, but include single-molecule fluorescence, fluorescence resonance energy transfer, confocal microscopy, two-photon microscopy, and optical trapping. Limited enrollment. Recommended: basic physics, Biology core or equivalent, and consent of instructor.

4 units, Spr (Block, S; Smith, S; Stearns, T; Schnitzer, M)

#### APPPHYS 236. Biology by the Numbers: Evolution

(Same as BIOC 236) Topics in biology from a quantitative perspective. Subjects vary. 2011-12 focus: evolution, from basic principles of evolutionary dynamics to fundamental quantitative questions that are far from being answered; from early life, metabolic processes, and molding of earth by microbes to spread of human epidemics; from analysis of genomes and molecular phylogenies to aspects of multi-cellular development. Prerequisites: Familiarity with ordinary differential equations and probability. Biology background not required.

3 units, Spr (Fisher, D), alternate years, not given next year

#### APPPHYS 270. Magnetism and Long Range Order in Solids

Cooperative effects in solids. Topics include the origin of magnetism in solids, crystal electric field effects and anisotropy, exchange, phase transitions and long-range order, ferromagnetism, antiferromagnetism, metamagnetism, density waves and superconductivity. Emphasis is on archetypal materials. Prerequisite: PHYSICS 172 or MATSCI 209, or equivalent introductory condensed matter physics course.

3 units, alternate years, not given this year

#### APPPHYS 272. Solid State Physics

(Same as PHYSICS 172) Introduction to the properties of solids. Crystal structures and bonding in materials. Momentum-space analysis and diffraction probes. Lattice dynamics, phonon theory and measurements, thermal properties. Electronic structure theory, classical and quantum; free, nearly-free, and tight-binding limits. Electron dynamics and basic transport properties; quantum oscillations. Properties and applications of semiconductors. Reduced-dimensional systems. Undergraduates should register for PHYSICS 172 and graduate students for APPPHYS 272. Prerequisites: PHYSICS 170 and 171, or equivalents.

3 units, Spr (Manoharan, H; Hwang, H)

#### APPPHYS 273. Solid State Physics II

Introduction to the many-body aspects of crystalline solids. Second quantization of phonons, anharmonic effects, polaritons, and scattering theory. Second quantization of Fermi fields. Electrons in the Hartree-Fock and random phase approximation; electron screening and plasmons. Magnetic exchange interactions. Electron-phonon interaction in ionic/covalent semiconductors and metals; effective attractive electron-electron interactions, Cooper pairing, and BCS description of the superconducting state. Prerequisite: 272 or PHYSICS 172.

3 units, Win (Hwang, H)

#### APPPHYS 280. Phenomenology of Superconductors

Phenomenology of superconductivity viewed as a macroscopic quantum phenomenon. Topics include the superconducting pair wave function, London and Ginzburg-Landau theories, the Josephson effect, type I type II superconductivity, and the response of superconductors to currents, magnetic fields, and RF electromagnetic radiation. Introduction to thermal fluctuation effects in superconductors and quantum superconductivity.

3 units, alternate years, not given this year

**APPPHYS 290. Directed Studies in Applied Physics**

Special studies under the direction of a faculty member for which academic credit may properly be allowed. May include lab work or directed reading.

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**APPPHYS 291. Practical Training**

Opportunity for practical training in industrial labs. Arranged by student with research adviser's approval. Summary of activities required.

*3 units, Sum (Staff)*

**APPPHYS 292. Introductory Biophysics**

(Same as APPPHYS 192) For advanced undergraduates or beginning graduate students. Quantitative models used in molecular biophysics. The relation of structure to function. Chemical equilibria, cooperativity, and control: elementary statistical mechanics, affinity plots, allostery, models of hemoglobin-oxygen binding, bacterial chemotaxis. Macromolecular conformations: polymer chain models, protein folding, taxonomy of globular proteins, general principles of sequence selection. Chemical kinetics. Multiple barriers: CO-myoglobin kinetics, ion diffusion through channels and ion selectivity, spectroscopy of ion channels-acetylcholine receptor. Supramolecular kinetics: conversion of chemical energy to mechanical force, myosin and kinesin, actin polymers. Nerve impulse propagation: membrane potentials, voltage sensitive ion gates, Hodgkin-Huxley equations, propagation of the nerve impulse.

*3 units, alternate years, not given this year*

**APPPHYS 293. Theoretical Neuroscience**

Introduction to fundamental theoretical ideas that provide conceptual insights into how networks of neurons cooperatively mediate important brain functions. Topics include basic mathematical models of single neurons, neuronal computation through feedforward and recurrent network dynamics, principles of associative memory, applications of information theory to early sensory systems, correlations and neural population coding, network plasticity and the self-organization of stimulus selectivity, and supervised and unsupervised learning through multiple mechanisms of synaptic plasticity. Emphasis on developing mathematical and computational skills to analyze complex neural systems. Prerequisites: calculus, linear algebra, and basic probability theory, or consent of instructor.

*3 units, Spr (Ganguli, S)*

**APPPHYS 294. Cellular Biophysics**

(Same as BIO 294) Physical biology of dynamical and mechanical processes in cells. Emphasis is on qualitative understanding of biological functions through quantitative analysis and simple mathematical models. Sensory transduction, signaling, adaptation, switches, molecular motors, actin and microtubules, motility, and circadian clocks. Prerequisites: differential equations and introductory statistical mechanics.

*3 units, alternate years, not given this year*

**APPPHYS 302. Experimental Techniques in Condensed Matter Physics**

Cryogenics; low signal measurements and noise analysis; data collection and analysis; examples of current experiments. Prerequisites: PHYSICS 170, 171, and 172, or equivalents.

*3 units, alternate years, not given this year*

**APPPHYS 304. Lasers Laboratory**

Theory and practice. Theoretical and descriptive background for lab experiments, detectors and noise, and lasers (helium neon, beams and resonators, argon ion, cw dye, titanium sapphire, semiconductor diode, and the Nd:YAG). Measurements of laser threshold, gain, saturation, and output power levels. Laser transverse and axial modes, linewidth and tuning, Q-switching and modelocking. Limited enrollment. Prerequisites: EE 231 and 232, or consent of instructor.

*3 units, Win (Fejer, M)*

**APPPHYS 305. Nonlinear Optics Laboratory**

Laser interaction with matter. Laser devices provide radiation to explore the linear and nonlinear properties of matter. Experiments on modulation, harmonic generation, parametric oscillators, modelocking, stimulated Raman and Brillouin scattering, coherent anti-Stokes scattering, other four-wave mixing interactions such as

wavefront conjugation and optical bistability. Optical pumping and spectroscopy of atomic and molecular species. Limited enrollment. Prerequisites: 304, EE 231 and 232, or consent of instructor.

*3 units, Spr (Lev, B)*

**APPPHYS 315. Methods in Computational Biology**

Methods of bioinformatics and biomolecular modeling from the standpoint of biophysical chemistry. Methods of genome analysis; cluster analysis, phylogenetic trees, microarrays; protein, RNA and DNA structure and dynamics, structural and functional homology; protein-protein interactions and cellular networks; molecular dynamics methods using massively parallel algorithms.

*3 units, alternate years, not given this year*

**APPPHYS 324. Introduction to Accelerator Physics**

Physics of particle beams in linear and circular accelerators. Transverse beam dynamics, acceleration, longitudinal beam dynamics, synchrotron radiation, free electron lasers, collective instabilities and nonlinear effects. Topics of current research in accelerator physics. Selected laboratory measurements at SLAC to augment the lecture material.

*3 units, alternate years, not given this year*

**APPPHYS 345. Advanced Numerical Methods for Data Analysis and Simulation**

Gaussian and unit sphere quadrature, singular value decomposition and principal component analysis, Krylov methods, non-linear fitting and super-resolution, independent component analysis, 3d reconstruction, shrink-wrap, hidden Markov methods, support vector machines, simulated annealing, molecular dynamics and parallel tempering, Markov state methods, Monte Carlo methods for constrained systems.

*3 units, Aut (Doniach, S), alternate years, not given next year*

**APPPHYS 387. Quantum Optics and Measurements**

Basic concerns and fundamental postulates in quantum theory of measurements. Quantum non-demolition measurements, nonlinear measurements and continuous measurements. Non-local quantum correlation and Bell's inequality. Generation, detection, and application of single photons and entangled photon-pairs. Reservoir theory of an open dissipative system. Laser phase transition versus BCS transition in microcavities.

*3 units, alternate years, not given this year*

**APPPHYS 389. Bose-Einstein Condensation and Lasers**

Topics include comparison of physics of Bose-Einstein Condensation (BEC) to physics of lasers, system differences and similarities between the quantum statistical properties of BEC and of lasers, BEC of non-interacting particles, Bogoliubov theory of interacting BEC and Gross-Pitaevskii equation, superfluidity and quantized vortices, quantum theory of laser, quantum noise and coherence functions, quantum correlation and squeezing.

*3 units, alternate years, not given this year*

**APPPHYS 390. Dissertation Research**

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**APPPHYS 392. Topics in Molecular Biophysics**

Concepts from statistical mechanics applied to contemporary molecular biology: allosteric transitions; protein folding; molecular recognition; actin polymers and gels; molecular motors; lipids and membrane proteins; ion channels. Some of the basic models used to quantitate fundamental biomolecular functions. Prerequisites: elementary statistical mechanics and chemical kinetics.

*3 units, Spr (Doniach, S), alternate years, not given next year*

**APPPHYS 470. Condensed Matter Seminar**

Current research and literature; offered by faculty, students, and outside specialists. May be repeated for credit.

*1 unit, Aut (Fisher, I), Win (Fisher, I), Spr (Fisher, I)*

**APPPHYS 483. Optics and Electronics Seminar**

Current research topics in lasers, quantum electronics, optics, and photonics by faculty, students, and invited outside speakers. May be repeated for credit.

*1 unit, Aut (Fejer, M), Win (Kahn, J), Spr (Ellerbee, A)*

**APPPHYS 802. TGR Dissertation**

*0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

# ARCHAEOLOGY (ARCHLGY) COURSES

## UNDERGRADUATE COURSES IN ARCHAEOLOGY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

### **ARCHLGY 1. Introduction to Prehistoric Archeology**

(Same as ANTHRO 3) Aims, methods, and data in the study of human society's development from early hunters through late prehistoric civilizations. Archaeological sites and remains characteristic of the stages of cultural development for selected geographic areas, emphasizing methods of data collection and analysis appropriate to each. GER:DB-SocSci, EC-GlobalCom

*3-5 units, Aut (Rick, J)*

### **ARCHLGY 12. Peopling of the Globe: Changing Patterns of Land Use and Consumption Over the Last 50,000 Years**

(Same as ANTHRO 18, EARTHSYS 21, HUMBIO 182) Fossil, genetic and archaeological evidence suggest that modern humans began to disperse out of Africa about 50,000 years ago. Subsequently, humans have colonized every major landmass on earth. This class introduces students to the data and issues regarding human dispersal, migration and colonization of continents and islands around the world. We explore problems related to the timing and cause of colonizing events, and investigate questions about changing patterns of land use, demography and consumption. Students are introduced to critical relationships between prehistoric population changes and our contemporary environmental crisis. GER:DB-SocSci

*3-5 units, Aut (Bird, D)*

### **ARCHLGY 55. Introduction to Archaeobotany**

(Same as ANTHRO 55A) The aim of this course is to provide a short introduction to archaeobotany. An overview of types of archaeobotanical remains will include an examination of macrobotanical remains (seeds, charcoal), microfossil remains (starch, pollen, phytoliths) and molecular remains (aDNA, isotopes). The ways in which various types of plant remains have been used will be discussed through case studies. Major debates that archaeobotanical research has shed light on, including the origins of agriculture and issues around domestication will also be examined. Some practical work will allow students to gain familiarity with botanical nomenclature and some archaeobotanical protocols and plant identification techniques. Students will look at microfossil residues from local grinding slabs and write a short paper on the residues recovered. They will also look at seed remains from either Chinese or local flotation samples using microscopes in the lab.

*5 units, not given this year*

### **ARCHLGY 64. Cultural Heritage and Human Rights**

(Same as ARCHLGY 164) This interdisciplinary research workshop will critically engage the issue of the growing currency of human rights discourse within cultural heritage. Epistemological and practical areas of tension between rights discourse and cultural discourse will be surveyed within the context of current global challenges facing heritage practice, conservation and archaeology. Topics will include the inequities of cultural recognition between North-South globalizations, questions of cultural property and rights, the role of tourism, and the impact of environmental conservation discourse on cultural rights.

*1 unit, Aut (Weiss, L)*

### **ARCHLGY 70. The Intersections of Global Heritage, Conservation, and the Environment**

Conceptual and theoretical approaches to examine the intersections between cultural and natural heritage from an interdisciplinary perspective. We ask: What is heritage? How are natural and cultural heritages interpreted, managed, and defined? Do heritage managers privilege nature and conservation over cultural heritage? This course uses archaeological data, ethnographic methods, and archival analysis to examine case studies representing key issues including conservation, indigenous rights, cultural landscapes, heritage in conflict, international heritage policy, and the use of

expert knowledge in heritage contexts

*3-5 units, Win (Staff)*

### **ARCHLGY 99A. Historical Archaeology in the Archive, Lab, and Underground: Methods**

The practice of historical archaeology through methodologies including archival research, oral history, material culture analysis, and archaeological excavation. Students use these methods to analyze the history and archaeology of a local park, the Thornewood Open Space Preserve.

*5 units, not given this year*

### **ARCHLGY 102. Archaeological Methods**

(Same as ANTHRO 91A) Methodological issues related to the investigation of archaeological sites and objects. Aims and techniques of archaeologists including: location and excavation of sites; dating of places and objects; analysis of artifacts and technology and the study of ancient people, plants, and animals. How these methods are employed to answer the discipline's larger research questions.

*5 units, Spr (Staff)*

### **ARCHLGY 102B. Incas and their Ancestors: Peruvian Archaeology**

(Same as ANTHRO 106, ANTHRO 206A) The development of high civilizations in Andean S. America from hunter-gatherer origins to the powerful, expansive Inca empire. The contrasting ecologies of coast, sierra, and jungle areas of early Peruvian societies from 12,000 to 2,000 B.C.E. The domestication of indigenous plants which provided the economic foundation for monumental cities, ceramics, and textiles. Cultural evolution, and why and how major transformations occurred. (HEF II, III; DA-B) GER:DB-SocSci, EC-GlobalCom

*3-5 units, not given this year*

### **ARCHLGY 103. History of Archaeological Thought**

(Same as ANTHRO 90A) Introduction to the history of archaeology and the forms that the discipline takes today, emphasizing developments and debates over the past five decades. Historical overview of culture, historical, processual and post-processual archaeology, and topics that illustrate the differences and similarities in these theoretical approaches.

*5 units, Aut (Meskell, L)*

### **ARCHLGY 104C. The Archaeology of Ancient China**

(Same as ARCHLGY 304C) Early China from the perspective of material remains unearthed from archaeological sites; the development of Chinese culture from early hominid occupation nearly 2 million years ago through the development of agriculture in the Neolithic period and complex society in the Bronze Age to the political unification of China under the Qin Dynasty. Continuity of Chinese culture from past to present, history of Chinese archaeology, relationships between archaeology and politics, and food in early China.

*5 units, not given this year*

### **ARCHLGY 106A. Museums and Collections**

(Same as ARCHLGY 306A) Practical, theoretical, and ethical issues which face museums and collections. Practical collections-based work, museum visits, and display research. The roles of the museum in contemporary society. Students develop their own exhibition and engage with the issues surrounding the preservation of material culture.

*5 units, Spr (Newble, L)*

### **ARCHLGY 107A. Archaeology as a Profession**

(Same as ANTHRO 101A) Academic, contract, government, field, laboratory, museum, and heritage aspects of the profession.

*5 units, Aut (Voss, B)*

### **ARCHLGY 111. Emergence of Chinese Civilization from Caves to Palaces**

(Same as CHINGEN 141, CHINGEN 241) Introduces processes of cultural evolution from the Paleolithic to the Three Dynasties in China. By examining archaeological remains, ancient inscriptions, and traditional texts, four major topics will be discussed: origins of modern humans, beginnings of agriculture, development of social stratification, and emergence of states and urbanism. GER:DB-Hum

*3-4 units, Aut (Liu, L)*

**ARCHLGY 117. Ceramics: Art and Science**

(Same as CLASSART 114) From clay to culture. Design, technology, manufacture, and consumption of ceramics. Guest lecturers, site visits, and hands-on studio work.

3-5 units, Spr (Shanks, M)

**ARCHLGY 120. Social Zooarchaeology & Animals within Prehistoric Social Worlds**

(Same as ANTHRO 120A, ANTHRO 220A, ARCHLGY 220) The elevated status of animals in prehistory derived from their position as sentient beings sharing many of the ontological qualities of people comparable life-cycles and behavioral traits in some cases, affection, the display of dominance hierarchies, and differing degrees of sociality while at the same time retaining clear biological and behavioral differences. The course will consider aspects of the social and ontological relations between people and animals in prehistory, particularly cosmologies and folk classifications, and the place of animals in social relations and identity formation. It is aimed to understand how the presence, qualities, materialities, and networks of animal life shaped human socialities as much as human agency created engagement with the 'animal estate'. Furthermore, it intends to define how to include animals as subjects in archaeological and anthropological studies taking non-human agency as a starting point. Focusing on case studies drawn from Eur

5 units, Aut (Marciniak, A)

**ARCHLGY 123. Politics, nationalism, heritage and archaeology in Central/Eastern Europe**

(Same as ANTHRO 124A, ANTHRO 224A, ARCHLGY 223) The current state of archaeology in central and eastern part of Europe reveals a multiplicity of regional intellectual traditions and social factors, interrelating with each other in many complex ways. The course will discuss intellectual panorama of archaeologies in this part of the continent and examine the reaction to various socio-political, economic, intellectual, institutional and organizational conditions in its different parts that created a wide variety of local strategies within which archaeology has been practiced. As nationalism requires the elaboration of a real or invented remote past, the course will then consider how archaeological data have been manipulated for nationalist purposes, and discuss the relationship of archaeology to nation-building in Central and Eastern Europe. Contrastive conceptions of nationality and ethnicity are presented. The political uses of archaeology, involving mobilization and appropriation of archaeological and cultural heritage, are also rev

5 units, Aut (Marciniak, A)

**ARCHLGY 132. The Anthropology of Heritage: Concepts, Contexts and Critique**

(Same as ARCHLGY 232) This seminar will explore foundational concepts currently employed within heritage practice and debates. Readings will examine the historically formative context of colonial-era and nationalist discourses on stewardship and culture, as well as postcolonial reformulations of such concepts as cultural property, cultural recognition and public history. The seminar will engage the question of the relationship between foundational concepts and the current cosmopolitan and internationalist vision for heritage, probing the enduring dynamics of North-South divides in heritage development and archaeological practice.

3-5 units, Win (Weiss, L)

**ARCHLGY 137. Ethnographic Archaeologies**

(Same as ANTHRO 140A, ANTHRO 240A) How have ethnographic and archaeological methods been combined in anthropological research? What methodological and theoretical implications do these kinds of projects generate? Seminar topics will include ethnoarchaeology, ethnographies of archaeological practice, public archaeology and heritage ethics. Lecture and discussion.

4-5 units, NEXTYEAR

**ARCHLGY 139. The Aegean in the Neolithic and Bronze Age**

(Same as ARCHLGY 239) This course provides a survey of Aegean prehistory (7th-2nd millennium BC), focusing on traditions that were picked up or renegotiated, instead of taking a standpoint that evaluates phenomena as steps leading up to a 'state-like' palatial society. It will draw on the region's wealth of data, and will be set within a theoretically informed, problem-oriented framework, aiming to introduce students to current

interpretations and debates, mainly through discussion of specific case-studies.

3-5 units, Win (Staff)

**ARCHLGY 190. Archaeology Directed Reading/Independent Study**

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**ARCHLGY 195. Independent Study/Research**

Students conducting independent study and or research with archaeology faculty members.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**ARCHLGY 199. HONORS INDEPENDENT STUDY**

Independent study with honors faculty adviser.

5 units, Win (Staff), Spr (Staff)

**ARCHLGY 201. Art and Archaeology of Korea**

(Same as KORGEN 170, KORGEN 270) Introduction to art and archaeology of Korean peninsula and adjacent continental northeast Asia from Bronze Age to early twentieth century. Topics include archaeology of the proto-Three Kingdoms period, state formation and Sinicization, introduction of Buddhism and its development to the Unified Silla period, the sophisticated tastes of the Koryo aristocrats, and the literati culture of Choson.

3-5 units, Win (Kim, M)

**GRADUATE COURSES IN ARCHAEOLOGY**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**ARCHLGY 164. Cultural Heritage and Human Rights**

(Same as ARCHLGY 64) This interdisciplinary research workshop will critically engage the issue of the growing currency of human rights discourse within cultural heritage. Epistemological and practical areas of tension between rights discourse and cultural discourse will be surveyed within the context of current global challenges facing heritage practice, conservation and archaeology. Topics will include the inequities of cultural recognition between North-South globalizations, questions of cultural property and rights, the role of tourism, and the impact of environmental conservation discourse on cultural rights.

1 unit, Aut (Weiss, L)

**ARCHLGY 220. Social Zooarchaeology & Animals within Prehistoric Social Worlds**

(Same as ANTHRO 120A, ANTHRO 220A, ARCHLGY 120) The elevated status of animals in prehistory derived from their position as sentient beings sharing many of the ontological qualities of people comparable life-cycles and behavioral traits in some cases, affection, the display of dominance hierarchies, and differing degrees of sociality while at the same time retaining clear biological and behavioral differences. The course will consider aspects of the social and ontological relations between people and animals in prehistory, particularly cosmologies and folk classifications, and the place of animals in social relations and identity formation. It is aimed to understand how the presence, qualities, materialities, and networks of animal life shaped human socialities as much as human agency created engagement with the 'animal estate'. Furthermore, it intends to define how to include animals as subjects in archaeological and anthropological studies taking non-human agency as a starting point. Focusing on case studies drawn from Eur

5 units, Aut (Marciniak, A)

**ARCHLGY 223. Politics, nationalism, heritage and archaeology in Central/Eastern Europe**

(Same as ANTHRO 124A, ANTHRO 224A, ARCHLGY 123) The current state of archaeology in central and eastern part of Europe reveals a multiplicity of regional intellectual traditions and social factors, interrelating with each other in many complex ways. The course will discuss intellectual panorama of archaeologies in this part of the continent and examine the reaction to various socio-political, economic, intellectual, institutional and organizational conditions in its different parts that created a wide variety of local strategies within which archaeology has been practiced. INDEPENDENT STUDY/RESEARCH

1-5 units, Win (Staff), Spr (Staff)

**ARCHLGY 304C. The Archaeology of Ancient China**

(Same as ARCHLGY 104C) Early China from the perspective of material remains unearthed from archaeological sites; the development of Chinese culture from early hominid occupation nearly 2 million years ago through the development of agriculture in the Neolithic period and complex society in the Bronze Age to the political unification of China under the Qin Dynasty. Continuity of Chinese culture from past to present, history of Chinese archaeology, relationships between archaeology and politics, and food in early China.

5 units, not given this year

**ARCHLGY 306A. Museums and Collections**

(Same as ARCHLGY 106A) Practical, theoretical, and ethical issues which face museums and collections. Practical collections-based work, museum visits, and display research. The roles of the museum in contemporary society. Students develop their own exhibition and engage with the issues surrounding the preservation of material culture.

5 units, Spr (Newble, L)

## ART HISTORY (ARTHIST) COURSES

### UNDERGRADUATE COURSES IN ART HISTORY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**ARTHIST 1. Introduction to the Visual Arts**

Multicultural rather than historical approach. WIM GER:DB-Hum, WIM

5 units, Aut (Lee, P)

**ARTHIST 2. Asian Art and Culture**

(Same as JAPANGEN 60) The religious and philosophical ideas and social attitudes of India, China, and Japan and how they are expressed in architecture, painting, woodblock prints, sculpture, and in such forms as garden design and urban planning. GER:DB-Hum, EC-GlobalCom

5 units, Win (Vinograd, R)

**ARTHIST 3. Introduction to the History of Architecture**

From antiquity to the 20th century, mostly Western with some non-Western topics. Buildings and general principles relevant to the study of architecture. GER:DB-Hum

5 units, alternate years, not given this year

**ARTHIST 6. Art & Art History's Greatest Hits**

This course is taught jointly by distinguished faculty in Art & Art History, each of whom presents two lectures on a favored object of study, ranging from examples of Kongo graphic writing to Russian avant-garde film. Students thus encounter a wide range of expertise and are invited to explore major issues that structure the interpretation of great works of art and visual culture from diverse periods and different geographical origins. Participants will gain exposure to a variety of interpretive strategies and historical perspectives through focused lectures as well as opportunities for up-close examination of original objects in campus collections. Writing assignments will develop skills in close description and visual analysis, culminating in a research paper devoted to a single work of the student's choice.

4 units, Spr (de Wit, N)

**ARTHIST 99A. Student Guides at the Cantor Center for the Visual Arts**

Open to all Stanford students. Public speaking, inquiry methods, group dynamics, theme development, and art-related vocabulary. Introduction to museum administration; art registration, preparation and installation; rights and reproduction of images; exhibition planning; and art storage, conservation, and security. Students research, prepare, and present discussions on art works of their choice.

1 unit, Aut (Young, P)

**ARTHIST 101. Archaic Greek Art**

(Same as ARTHIST 301, CLASSART 101, CLASSART 201) The development of Greek art and culture from protogeometric beginnings to the Persian Wars, 1000-480 B.C.E. The genesis of a native Greek style; the orientaling phase during which contact with the Near East and Egypt transformed Greek art; and the synthesis of East and West in the 6th century B.C.E. GER:DB-Hum

4 units, Aut (Maxmin, J)

**ARTHIST 102. Empire and Aftermath: Greek Art from the Parthenon to Praxiteles**

(Same as ARTHIST 302, CLASSART 102) The course explores the art and architecture of the Athenian Empire in the age of Pericles, and then considers the effects of civil war and plague on Greek art and society in the later 5th and early 4th centuries. GER:DB-Hum

4 units, Win (Maxmin, J)

**ARTHIST 105. Introduction to Medieval Art**

(Same as ARTHIST 305) Chronological survey of Byzantine, Islamic, and Western Medieval art and architecture from the early Christian period to the Gothic age. Broad art-historical developments and more detailed examinations of individual monuments and works of art. Topics include devotional art, court and monastic culture, relics and the cult of saints, pilgrimage and crusades, and the rise of cities and cathedrals. GER:DB-Hum

4 units, not given this year

**ARTHIST 106A. Art of Pilgrimage and Crusade**

(Same as ARTHIST 306A) Focus is on the artistic production of Mediterranean 12th-13th centuries exploring the phenomena of pilgrimage and Crusade. The rise of the Normans; the establishment of the pilgrimage to Santiago de Compostella as part of the Reconquista of Spain; the Crusader capture of Jerusalem in 1099 and the subsequent formation of Crusader states in the eastern Mediterranean; the rise of the Ayyubids and the emergence of the Italian city-state trade. The interconnection between the rise of narrative and conquest; the emergence of monumental sculpture; and the clash between tactile and optical visuality.

4 units, not given this year

**ARTHIST 107A. St. Petersburg, a Cultural Biography: Architecture, Urban Planning, the Arts**

(Same as REES 207A) The most premeditated city in the whole world, according to Dostoevsky; created in 1703 by Peter the Great as a counterpoise to Moscow and old Russian culture; planned as a

rational, west-European-appearing capital city of the Russian Empire. St. Petersburg's history through works of its artists, architects, urban planners, writers, and composers. GER:DB-Hum, DB-Hum

*4 units, Spr (Kollmann, J)*

**ARTHIST 108. Virginité and Power: Mary in the Middle Ages** (Same as ARTHIST 308) The most influential female figure in Christianity whose state cult was connected with the idea of empire. The production and control of images and relics of the Virgin and the development of urban processions and court ceremonies through which political power was legitimized in papal Rome, Byzantium, Carolingian and Ottonian Germany, Tuscany, Gothic France, and Russia. GER:DB-Hum

*4 units, not given this year*

**ARTHIST 108A. Medieval Islamic Art and Architecture from 7th century Arabia to the Conquest of Cairo in 1517**

(Same as ARTHIST 308A) The course provides an introduction to the arts of the Islamic world in the Middle Ages, in both its Western and Eastern areas. The artistic material is presented in correlation to religion, philosophy and political history. We examine the many forms, styles and modes of visual expression that contributed to a great diversity of artistic production within the complex set of different competitive centers of cultures, all united through the one and same faith in the holy text of the Qur'an. We focus on the most representative artworks of the periods, dynasties and countries covered in the course.

*4 units, Win (Staff)*

**ARTHIST 108B. Islamic Art & Architecture: 15th-19th century**

(Same as ARTHIST 308B) An introduction to the arts and visual culture of the Islamic world in the pre-modern and modern period. The course examines case studies of sites and objects highly representative of these dynasties and the modes of plastic expression they developed. History of the art of the book is an important topic in this period.

*4 units, Spr (Staff)*

**ARTHIST 111. Introduction to Italian Renaissance, 1420-1580**

(Same as ARTHIST 311) New techniques of pictorial illusionism and the influence of the humanist revival of antiquity in the reformulation of the pictorial arts in 15th-century Italy. How different Italian regions developed characteristic artistic cultures through mutual interaction and competition. GER:DB-Hum

*4 units, not given this year*

**ARTHIST 113. Science, Technology and Art: The Worlds of Leonardo da Vinci**

(Same as ARTHIST 113A, HISTORY 31, HISTORY 131) (Same as HISTORY 31. History majors and others taking 5 units, register for 131.) What did Leonardo actually know? How did he acquire that knowledge? Explores Leonardo's interests and accomplishments in such fields as painting, architecture, engineering, physics, mathematics, geology, anatomy, and physiology, and more generally the nature of Renaissance science, art, and technology. Considers the relationship between the society of fifteenth century Italy and the work of the man from Vinci: why did this world produce a Leonardo? How might we use him to understand creativity, innovation, and invention in the Renaissance and beyond? What was his legacy and how did he become a myth? Designed both for students interested in the history of science, medicine, and technology and for students interested in the history and art of Renaissance Italy. GER:DB-Hum

*3-5 units, not given this year*

**ARTHIST 113A. Science, Technology and Art: The Worlds of Leonardo da Vinci**

(Same as ARTHIST 113, HISTORY 31, HISTORY 131) (Same as HISTORY 31. History majors and others taking 5 units, register for 131.) What did Leonardo actually know? How did he acquire that knowledge? Explores Leonardo's interests and accomplishments in such fields as painting, architecture, engineering, physics, mathematics, geology, anatomy, and physiology, and more generally the nature of Renaissance science, art, and technology. Considers the relationship between the society of fifteenth century Italy and the work of the man from Vinci: why did this world produce a Leonardo? How might we use him to understand creativity, innovation, and invention in the Renaissance

and beyond? What was his legacy and how did he become a myth? Designed both for students interested in the history of science, medicine, and technology and for students interested in the history and art of Renaissance Italy. GER:DB-Hum

*3-5 units, not given this year*

**ARTHIST 114. Vision and Emblem: Netherlandish Painting from Van Eyck to Brueghel**

(Same as ARTHIST 314) How 15th-century pictorial illusionism transformed the devotional image and portraiture, calling for a new kind of engagement with the image on the part of the beholder. How 16th-century humanist knowledge influenced the creation of new pictorial subjects and representational forms. The reflection of religious crises triggered by the Reformation in art. GER:DB-Hum

*4 units, not given this year*

**ARTHIST 117. Picturing the Papacy: Renaissance to Neoclassicism**

(Same as ARTHIST 317) Campaigns of renovations aimed at restoring Rome to its former legendary splendor. The use of art and architecture to glorify the papacy and negotiate attacks on the institution. Art and papal nepotism from the 15th to 18th century. GER:DB-Hum

*4 units, not given this year*

**ARTHIST 118. Titian, Veronese, Tintoretto**

(Same as ARTHIST 318) The course addresses the ways in which Venetian painters of the sixteenth century redefined paradigms of color, disegno, and invention. Themes to be examined include civic piety, new kinds of mythological painting, the intersection between naturalism and eroticism, and the relationship between art and rituals of church and statecraft.

*4 units, not given this year*

**ARTHIST 120. Art and Culture of Northern Europe in the 17th Century**

(Same as ARTHIST 320) Painting and graphic arts by artists in Flanders and Holland from 1600 to 1680, a period of political and religious strife. Historical context; their relationship to developments in the rest of Europe and contributions to the problem of representation. Preferences for particular genres such as portraits, landscapes, and scenes of everyday life; the general problem of realism as manifested in the works studied. GER:DB-Hum

*4 units, not given this year*

**ARTHIST 121. 18th-Century Art in Europe, ca 1660-1780**

(Same as ARTHIST 321) Major developments in painting across Europe including the High Baroque illusionism of Bernini, the founding of the French Academy, and the revival of antiquity during the 1760s, with parallel developments in Venice, Naples, Madrid, Bavaria, and London. Shifts in themes and styles amidst the emergence of new viewing publics. Artists: the Tiepolos, Giordano, Batoni, and Mengs; Ricci, Pellegrini, and Thornhill; Watteau and Boucher; Chardin and Longhi; Reynolds and West; Hogarth and Greuze; Vien, Fragonard, and the first works by David. Additional discussion for graduate students. GER:DB-Hum

*4 units, not given this year*

**ARTHIST 122. The Age of Revolution**

(Same as ARTHIST 322) Painting in Europe during the French Revolution and the Napoleonic conquest. As political events altered social formations, practices in the visual arts were similarly affected by shifts in patronage, public, and the social function of image making. An attempt to align ruptures in the tradition of representation with the unfolding historical situation. The first manifestations of a romantic alternative to the canons of classical beauty and stylistic restraint. GER:DB-Hum

*4 units, not given this year*

**ARTHIST 124. The Age of Naturalism, ca 1830-1874**

(Same as ARTHIST 324) The origins, development, and triumph of naturalist painting in Europe. The creative tensions that emerged between traditional forms of history painting and the challenge of modern subjects drawn from contemporary life. Emphasis is on the development of open-air painting as an alternative to traditional studio practice, and to the rise of new imaging technologies, such as lithography and photography, as popular alternatives to the hand-wrought character and elitist appeal of high art. GER:DB-Hum

4 units, Aut (Marrinan, M)

**ARTHIST 125. American Art, 1865-1945**

(Same as ARTHIST 325) American art from the end of the Civil War through WWII. Focus is on what paintings, sculptures, photographs, and popular imagery reveal about their historical moment. Topics include: James Abbott McNeill Whistler; Thomas Eakins; John Singer Sargent; Thomas Dewing; post-war reconciliation and race; incorporation and the anti-modern impulse; turn-of-the-century gender anxiety; American impressionism; Robert Henri and the Ash Can school; Alfred Stieglitz and his circle; inter-war transatlantic exchange and the development of an American modernism; the Harlem Renaissance; Thomas Hart Benton and regionalism; and the effect of both war and the New Deal on American art.

4 units, not given this year

**ARTHIST 126. Post-Naturalist Painting**

(Same as ARTHIST 326) How conceptual models from language, literature, new technologies, and scientific theory affected picture making following the collapse of the radical naturalism of the 1860s and 1870s. Bracketed in France by the first Impressionist exhibition (1874) and the first public acclamation of major canvases by Matisse and Picasso (1905), the related developments in England, Germany, Belgium, and Austria. Additional weekly discussion for graduate students. Recommended: some prior experience with 19th-century art. GER:DB-Hum

4 units, Spr (Marrinan, M)

**ARTHIST 132. American Art and Culture, 1528-1860**

(Same as AMSTUD 132, ARTHIST 332) The visual arts and literature of the U.S. from the beginnings of European exploration to the Civil War. Focus is on questions of power and its relation to culture from early Spanish exploration to the rise of the middle classes. Cabeza de Vaca, Benjamin Franklin, John Singleton Copley, Phillis Wheatley, Charles Willson Peale, Emerson, Hudson River School, American Genre painters, Melville, Hawthorne and others. GER:DB-Hum

4 units, Win (Wolf, B)

**ARTHIST 142. Architecture Since 1900**

(Same as ARTHIST 342) The development of competing versions of modern and postmodern architecture and design in Europe and America, from the early 20th century to the present. Recommended: 141. GER:DB-Hum

4 units, Aut (Beischer, T)

**ARTHIST 143A. American Architecture**

(Same as ARTHIST 343A) A historically based understanding of what defines American architecture. What makes American architecture American, beginning with indigenous structures of pre-Columbian America. Materials, structure, and form in the changing American context. How these ideas are being transformed in today's globalized world. GER:DB-Hum

4 units, Spr (Beischer, T)

**ARTHIST 147. The Visual Culture of Modernism and its Discontents, ca. 1850-1925**

(Same as ARTHIST 347) Focus is on the visual arts and related fields in Europe (especially France but also Russia and Germany) during the late 19th and early 20th centuries. Beginning with Paris in the period of Haussmann, Baudelaire and Manet, modernism in art and visual culture presents a compelling dream of utopian possibilities that involved multifaceted and often contradictory approaches to the changes brought about by industrialization, urbanization, and the rise of mass culture. GER:DB-Hum

4 units, not given this year

**ARTHIST 150S. Modern Art in Europe, 1850-1945.**

Lectures and discussions build familiarity with notions of modernity, modernism, and the avant-garde. Focus on visual analysis and critical methodologies. Movements examined in detail include Impressionism, Art Nouveau, Futurism, Cubism, Dada, Constructivism, the Bauhaus, and Surrealism.

4 units, Sum (Staff)

**ARTHIST 153A. American Art, 1900-1945**

(Same as ARTHIST 353A) Painting, sculpture, photography, and design. Focus is on the emergence of diverse cultural forms in the search for a modern, American form of artistic expression. Topics include: Robert Henri and the Ash Can school; the Armory Show and the influence of European modernism; Marcel Duchamp and

plumbing; futurism, cubism, and the machine aesthetic; Stuart Davis and jazz; Dorothea Lange and documentary photography; Alfred Stieglitz and his Seven Americans; Thomas Hart Benton and regionalism; the arts of the WPA; and the role of artists in wartime propaganda. GER:DB-Hum

4 units, not given this year

**ARTHIST 155. American Art Since 1945**

(Same as ARTHIST 355) Major figures, movements, and concepts of American art with examples from Europe from WW II to the present. Topics: the ideology and aesthetics of high modernism, the relationship between art and popular culture, the death of painting, the question of postmodernism. Artists: Pollock, Newman, Stella, Johns, Warhol, Andre, Rainer, Smithson, Hesse, Serra, Kruger, Sherman. GER:DB-Hum

4 units, not given this year

**ARTHIST 158A. History of Photography**

(Same as ARTHIST 358A) From its invention in 1839 to the present. Emphasis is on the evolution of photography as a fine art. Photographs as a universal democratic art form to record familial events and express personal creativity. Development of photography as it relates to other art forms, journalism, architecture, portraiture, landscape, documentation, time, and personal expression. The technology of photography; photographic techniques. GER:DB-Hum

4 units, Win (Dawson, R)

**ARTHIST 159B. How Photographs Exist**

(Same as ARTHIST 359B) Photographs as things, and the lives they lead: How the materiality of photographs affects their place in everyday life; what has changed and what hasn't in the transition to digital technologies. Physical forms from radio photographs and Viewmaster discs to compression algorithms and the rebirth of instant films; social placements from family slideshows and flea markets to social media, server farms, and Musumeci vs. Department of Homeland Security. Includes direct examination of materials in university repositories. Individual and collaborative projects.

4 units, not given this year

**ARTHIST 160A. Twentieth-Century African American Art**

(Same as ARTHIST 360A) Paintings, sculptures, photography, and mixed media works. Styles, cultural and social histories, patronage, and critical reception. The problems of studying the production of artists of color as a separate field; alternatives to the category of African American art; and the outlook for new critical methodologies. GER:DB-Hum

4 units, not given this year

**ARTHIST 161. American Art 1900-1945**

(Same as ARTHIST 361) Course surveys US artistic production and aesthetic developments from the turn of the century until the end of World War II. Roughly chronological in scope, it eschews any single tendency or medium in order to elaborate the disjunctive formation of modernism in America. Painting and photography figure simultaneously; abstraction in its various guises, artists' films, the Armory Show, formations of race and gender, Black Mountain and MoMA all move through intransigent debates that pit social commitment against the pursuit of an ethos of autonomy.

4 units, not given this year

**ARTHIST 162A. Spectacle & Revolution: European Art c.1968**

(Same as ARTHIST 362A) Focus is on art and artists contemporary to the radical student movements of the 1960s, which exploded postwar tensions between traditional societies and new mass cultures. Topics include artists Joseph Beuys, VALIE EXPORT, and Gerhard Richter, and movements Fluxus, Situationism, Nouveau Realisme, and Arte povera. Course is reading intensive. Readings include Guy Debord, Umberto Eco, Pierre Restany, and many artists' writings. Prerequisites: AH1

4 units, not given this year

**ARTHIST 170. The Cinematic Century**

(Same as ARTHIST 370, FILMSTUD 170) Few contemporary institutions and forms of representation have had a greater impact on the world than film. This class examines film history through institutions and practices as well as in formal developments in the medium in an international context but with an underlying interest in explaining the international forces that shaped Hollywood's rise.

Through screenings of both documentary and fiction film, this class will suggest that the century just past be understood through the primary lens of the way cinema shaped its course.

*4 units, Spr (Staff)*

**ARTHIST 173. Issues in Contemporary Art**

(Same as ARTHIST 373) Major figures, themes, and movements of contemporary art from the 80s to the present. Readings on the neo-avant garde; postmodernism; art and identity politics; new media and technology; globalization and participatory aesthetics. Prerequisite: ARTHIST 155, or equivalent with consent of instructor. GER:DB-Hum

*4 units, not given this year*

**ARTHIST 176. Feminism and Contemporary Art**

(Same as ARTHIST 376) (Same as ARTHIST 176) The impact of second wave feminism on art making and art historical practice in the 70s, and its reiteration and transformation in contemporary feminist work. Topics: sexism and art history, feminist studio programs in the 70s, essentialism and self-representation, themes of domesticity, the body in feminist art making, bad girls, the exclusion of women of color and lesbians from the art historical mainstream, notions of performativity. GER:DB-Hum

*4 units, not given this year*

**ARTHIST 182. Arts of China, 900-1500: Cultures in Competition**

(Same as ARTHIST 382) The era from the Five Dynasties and Song to the mid-Ming period was marked by competition in cultural arenas such as between Chinese and formerly nomadic regimes, or between official court art modes and scholar-official and literati groups. Topics include: innovations in architectural and ceramic technologies; developments in landscape painting and theory; the proliferation of art texts and discourses; the rise of educated artists; official arts and ideologies of the Song, Liao, Jin, Yuan, and Ming regimes; new roles for women as patrons and cultural participants; and Chan and popular Buddhist imagery. GER:DB-Hum, EC-GlobalCom

*4 units, not given this year*

**ARTHIST 185. Art in China's Modern Era**

(Same as ARTHIST 385) From the late Ming period (ca. 1600) to early 20th century Chinese arts. Topics include: urban arts and print culture; commodification of art; painting theories; self portrayals; art sponsorship, collecting, and ideological programs at the Qing imperial court; media and modernity in Shanghai; art and politics in early 20th century China. GER:DB-Hum

*4 units, not given this year*

**ARTHIST 185B. Contemporary Chinese Art: Sites and Strategies**

(Same as ARTHIST 385B) Issues and developments in contemporary Chinese art over the past two decades. Questions of personal and national identity, politics and history, globalization and mass culture, consumerism and urban transformation, and the body, sexuality, and gender, as represented in formats including painting, photography, and installation and multimedia art. Museum visits. GER:DB-Hum, EC-GlobalCom

*4 units, not given this year*

**ARTHIST 186. Theme and Style in Japanese Art**

(Same as ARTHIST 386, JAPANGEN 186, JAPANGEN 286) Monuments in traditional Japanese architecture, sculpture, garden design, painting, prints, and pots, through the 19th century. Chronological framework emphasizes the role of these objects play in visualizing the ideals of the society they represent. GER:DB-Hum

*4 units, Aut (Takeuchi, M)*

**ARTHIST 187. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868**

(Same as ARTHIST 387, JAPANGEN 185) Narratives of conflict, pacification, orthodoxy, nostalgia, and novelty through visual culture during the change of episteme from late medieval to early modern, 16th through early 19th centuries. The rhetorical messages of castles, teahouses, gardens, ceramics, paintings, and prints; the influence of Dutch and Chinese visuality; transformation in the roles of art and artist; tensions between the old and the new leading to the modernization of Japan. GER:DB-Hum, EC-GlobalCom

*4 units, not given this year*

**ARTHIST 188A. The History of Modern and Contemporary Japanese and Chinese Architecture and Urbanism**

(Same as ARTHIST 388A) The recent rapid urbanization and architectural transformation of Asia; focus is on the architecture of Japan and China since the mid-19th century. History of forms, theories, and styles that serve as the foundation for today's buildings and cityscapes. How Eastern and Western ideas of modernism have merged or diverged and how these forces continue to shape the future of Japanese and Chinese architecture and urban form. GER:DB-Hum

*4 units, not given this year*

**ARTHIST 190. African Art and Writing Traditions**

(Same as ARTHIST 390) Classic African graphic writings south of the Sahara in historical and social context. What makes an African graphic writing system, and how they are used as visual art, and as markers of identity, religion, and moral philosophy. Civilizations include Mali, Asante, Yoruba, Ejagham, and Kongo.

*4 units, Win (Martinez-Ruiz, B)*

**ARTHIST 191. Afro-Atlantic Religion, Art, and Philosophy**

(Same as ARTHIST 391) Afro-American graphic writing and other forms of visual communication including ancient rupestrian art and rock painting in Africa, and present-day forms in the Americas. The diversity of daily life, religion, social organization, politics, and culture with African origin in the diaspora. Focus is on major contemporary Afro-Atlantic religions including: Palo Monte and Abakua in Cuba; Gaga in the Dominican Republic; Revival, Obeah, and Kumina in Jamaica; Vodun in Haiti; and Candomble and Macumba in Brazil.

*4 units, not given this year*

**ARTHIST 192. Introduction to African Art**

(Same as ARTHIST 392) Form, space, media, medium, and visual expression in African art. Rock art to contemporary art production. Majors works and art expression in terms of function and historical context. GER:DB-Hum

*4 units, Aut (Martinez-Ruiz, B)*

**ARTHIST 194. Iconography of African Art**

(Same as ARTHIST 394) African art from 25,000 years ago to the present emphasizing social, historical, and ideological concerns in visual systems and traditions and aesthetic form. Critical grounding in anthropology and cultural studies. GER:DB-Hum

*4 units, not given this year*

**ARTHIST 195. Introduction to Black Atlantic Visual Traditions**

(Same as ARTHIST 395) African cultural expression in the Americas. How politics, religion, and culture influence the art of the Black Atlantic. Focus is on the period when cultures were brought from Africa to the Americas through the slave trade and came into contact and conflict with western colonial powers. GER:DB-Hum

*4 units, not given this year*

**ARTHIST 196. African Visual Art & Graphic Communication in the Americas**

(Same as AFRICAAM 196, ARTHIST 396, CSRE 186) The class addresses the modes of visual expression used among the Bakongo people in Central Africa and their descendants in Cuba, Haiti, and Brazil and argues that together these constitute identifiable graphic writing systems. After providing a brief overview of the forms of graphic expression in use within Kongo and Kongo Atlantic cultures, the class focuses on the most central of the traditional cosmograms, Dikenga. By mapping the meanings and forms of Dikenga, the essay attempts to demonstrate its continuity throughout the Kongo diaspora. Finally, the class highlights the rich cosmology, cosmogony, and moral philosophy that have consistently informed the use and meaning of Dikenga in its central role in religious narratives, moral philosophy and religious education among the Bakongo in Atlantic world. GER:DB-Hum

*4 units, not given this year*

**ARTHIST 203. Greek Art In and Out of Context**

(Same as CLASSART 109) The cultural contexts in which art served religious, political, commercial, athletic, sympotic, and erotic needs of Greek life.

*4-5 units, Aut (Maxmin, J)*

**ARTHIST 204A. Appropriations of Greek Art**

(Same as CLASSART 110) Upper division seminar. The history of

the appropriation of Greek art by Rome, the Renaissance, Lord Elgin, and Manet. Enrollment limited to 6. Prerequisite: ARTHIST 102 or consent of instructor.

4-5 units, Spr (Maxmin, J)

**ARTHIST 206. Virginité and Power: Mary in the Middle Ages**

The most influential female figure in Christianity whose state cult was connected with the idea of empire. The production and control of images and relics of the Virgin and the development of urban processions and court ceremonies through which political power was legitimized in papal Rome, Byzantium, Carolingian and Ottonian Germany, Tuscany, Gothic France, and Russia.

5 units, not given this year

**ARTHIST 208A. Visuality, Representation, and Material Culture in Islam**

An in depth examination of artworks from the Islamic world; a focus on particularly complex individual pieces or artistic productions that raise aesthetic and interpretative issues. The course skillfully implements the fundamental practice of art appreciation, e.g. how to look at art, learn from it and propose an explanation of it. An interdisciplinary method is used, in particular the comparison between the arts of Islam and other cultural areas. A variety of cases and media are explored and discussed.

5 units, Win (Staff)

**ARTHIST 210. The Renaissance Nude**

Seminar explores the origins and significance of the nude female and male figure in Italian Renaissance art. It was during this period the body became a vehicle for the display of artistic skill and a site for religious experience. Through class readings, discussions and presentations, the topics include an exploration of primary sources and modern theoretical literature, the role of antiquity and its influence on the human body (naturalism, classicism, realism), the parallel tradition in the North, and the Renaissance artist's prominent interest in the nude.

5 units, Win (Consavari, E)

**ARTHIST 211. Art and the Domestic Interior in Early Modern Italy**

A display of sumptuous opulence, called the virtue of Magnificence, was in high demand in the Renaissance. The seminar considers the material culture of specific residences and examines how particular objects reflect, shape, and mediate the values of Renaissance private lives and relationships within the domestic interior. Topics explored are the primary sources and modern theoretical literature on Renaissance possessions as they relate to the material culture depicted in paintings, such as luxurious textiles, Turkish carpets, precious gems, medals, as well as ceramic, marble and bronze artifacts.

5 units, Spr (Consavari, E)

**ARTHIST 213. Renaissance Print Culture: From Durer to Goltzius**

Prints became vehicles for the spreading of artistic inventions as well as political and religious propaganda during the societal upheavals of the 16th century. How the new medium of reproducible images changed attitudes towards visuality. Prints as self-reflective performances of virtuosity. Class taught at the Cantor Arts Center. GER:DB-Hum

5 units, not given this year

**ARTHIST 235A. Art and the Machine Age**

Artistic and intellectual responses to modernization. Topics include: artistic uses of the machine as a metaphor for nature, the body, and sexuality; adaptation of mechanical technologies to art making; appreciation of machines as works of art; and how changing technologies in the industrial sphere impacted the artist's role in the cultural sphere. The place of the machine in architecture; historical role of industrial design; machine-themed museum exhibitions; and works by Fernand Léger, Le Corbusier, Rube Goldberg, Charles Sheeler, Charlie Chaplin, Raymond Loewy, and George Gershwin.

5 units, not given this year

**ARTHIST 240. Sister Arts: Image and Text in America**

(Same as AMSTUD 240) Seminar focuses equally on painting and literature in American history. Classes meet twice per week: one session devoted to a literary text, and the other to a visual artifact. The course is organized topically, placing text and images into dialogue with each other, asking for example, how Glen Ligon's

contemporary reworking of nineteenth century runaway slave posters relates to Toni Morrison's *Beloved*, or how Melville's story of urban life, *Bartleby the Scrivener*, alludes to Hudson River School painting. GER:DB-Hum

5 units, not given this year

**ARTHIST 241. THE MODERNITY OF INGRES**

During his lifetime, and for most of his posthumous critical fame, Jean-Auguste-Dominique Ingres was described as the staunch defender of "classical" values (meaning conservative forms of art), and so remained rather uninteresting to many modernist viewers. But in light of new forms of inquiry in the History of Art - including issues of gender and identity formation, psychoanalytic interpretations, constructs of attention or perception, globalized sensitivity to race and culture - the career of Ingres seems ripe for review. How does Ingres's emulation of Raphael compare to the appropriations of post-modernist artists? How might his obsessions with exotic subjects be read from our post-colonial perspectives? How should we analyze his constructs of the feminine within our understanding of gender and power? How might our interest in identity formation enrich a reading of his many portraits? This seminar proposes a series of thematic incursions into the work of Ingres with the aim of *redis*

5 units, Spr (Marrinan, M)

**ARTHIST 242. Henri Matisse**

Themes, methods, and media in the production of Matisse, the familiar yet enigmatic 20th-century master. The phases of his career; critical responses to his work. Research project and presentation. Recommended: reading knowledge of French.

5 units, not given this year

**ARTHIST 245. Art, Business & the Law**

This course examines the intersection of art, business, and the law from a number of different angles, focusing on issues that impact our understanding of works of art and their circulation in the modern and contemporary periods. Topics range from individual case studies (e.g., Leonardo da Vinci; Richard Serra) to the consolidation of the art market, and include cultural heritage issues, problems of censorship, and conceptions of authorship and intellectual property.

5 units, Spr (de Wit, N)

**ARTHIST 253. American Wonders**

(Same as AMSTUD 253) Seminar on American art, literature and culture of the nineteenth century organized around the exhibition, "The Great American Hall of Wonders," on view at the Smithsonian American Art Museum. Taking our cue from the exhibition, course focuses on three topics from the world of nature and three from technology, all serving as "cultural lightning rods" during the period: the buffalo, the Giant Sequoia, Niagara Falls, the clock, the gun and the railroad. The class travels to Washington, D.C. to view the exhibition during an extended weekend.

5 units, Aut (Wolf, B)

**ARTHIST 256A. Critical Race Art History**

Primer for the comparative study of the representation of race in Western art. Whiteness, a construction that has been dependent upon blackness and alterity from its beginnings. Stereotyped ethnicities, nationalities, and territories, such as the Red Indian, the Jew, and Orientalism. Style as an image making strategy shaped by patronage and reception.

5 units, not given this year

**ARTHIST 259. The Fifties: Abstract Expressionism to Beat Culture**

Abstract expressionism and beat culture as the two dominant models of art making in the U.S. in the 50s, conventionally if not exclusively associated with cultural production in New York and San Francisco. Compares and contrasts existential, ideological, and formal valences relative to the backdrop of postwar American affluence, and the Cold War and its rhetorics of individual freedom and expression. The politics and criticism of abstract expressionism and its relation to the New York Intellectuals in the 30s versus beat culture and the emergence of the counterculture in the 60s.

5 units, not given this year

**ARTHIST 260Q. Art, War and Politics in the Modern Period**

(S.Sem) Stanford Introductory Seminar. Considers the pivotal

relationship between war, politics and the visual arts from the beginnings of the French Revolution in 1789 to the end of the Vietnam War in 1975, exploring how iconic works of modernism have both shaped and reflected public discourse on war, whether in support of such campaigns or in opposition to them. Topics: the power of visual representation to capture the trauma of the battlefield; propaganda and the art of persuasion; how developments in modern art are implicated in the evolution of modern warfare and vice-versa. Case studies include: Francisco de Goya's wrenching portrayal of the Napoleonic Wars, The Third of May (1808); Pablo Picasso's monument to the murderous bombing of a Basque town during the Spanish Civil War, Guernica (1937); and the surprising history of Abstract Expressionism, the CIA and the cold war. Sophomore seminar; enrollment restricted and by application only. GER:DB-Hum

3 units, Win (Lee, P)

**ARTHIST 282A. Imagining the Imperial: Images of the Court in Late Ming Dynasty Public Culture**

Themes of palace and court life popular in vernacular painting, print illustrated books, and fiction. Dimensions of the imperial palace and court in late Ming public imaginary, including strategies of historical displacement, disguised political critique, commerce in imperial objects, the taste for scandal, and mythologies of court life.

5 units, not given this year

**ARTHIST 287. Pictures of the Floating World: Images from Japanese Popular Culture**

(Same as JAPANLIT 287) Printed objects produced during the Edo period (1600-1868), including the Ukiyo-e (pictures of the floating world) and lesser-studied genres such as printed books (ehon) and popular broadsheets (kawaraban). How a society constructs itself through images. The borders of the acceptable and censorship; theatricality, spectacle, and slippage; the construction of play, set in conflict against the dominant neo-Confucian ideology of fixed social roles. Prerequisites: 2, 186, 187, 188. GER:DB-Hum

5 units, not given this year

**ARTHIST 287A. The Japanese Tea Ceremony: The History, Aesthetics, and Politics Behind a National Pastime**

(Same as JAPANGEN 287A) The tea ceremony, a premodern multimedia phenomenon, integrates architecture, garden design, ceramics, painting, calligraphy, and treasured objects into a choreographed ritual wherein host, objects, and guests perform roles on a tiny stage. Aesthetic, philosophical, and political dimensions. The evolution of tea taste including its inception in Zen monasteries, use for social control during the 16th century, the development of a class of tea connoisseurs, and 20th-century manipulation by the emerging industrialist class.

5 units, Spr (Takeuchi, M)

**ARTHIST 290. Mapping Africa: Cartography and Architecture**

Visual forms of spatial representation of Africa and implications for understanding the cultures they depict. Examples include early Renaissance cartography and written accounts by explorers, travelers, geographers, and missionaries. African concepts of design, meaning in architecture, and spatial solutions. Case studies of African models.

5 units, not given this year

**ARTHIST 292. African Art and Museum Display**

African art and its intersection with art concepts, museum politics, art display, and colonialism. African art collections in major institutions around the world. Methodologies. Final class exhibition using art from the Cantor Arts Center collection.

5 units, Aut (Martinez-Ruiz, B)

**ARTHIST 292A. Researching Africa: Problem and Theory in African Art**

5 units, not given this year

**ARTHIST 293. Latino American Avant Garde**

(Same as CHICANST 293) African contribution to modern art practices in Latino America. Mexico, Brazil, and Cuba as models. Cultural and historical context. GER:DB-Hum

5 units, not given this year

**ARTHIST 296. Junior Seminar: Methods & Historiography of**

**Art History**

Historiography and methodology.

5 units, Aut (Vinograd, R)

**ARTHIST 297. Honors Thesis Writing**

May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**ARTHIST 298. Individual Work: Art History**

For approved independent research with individual faculty members. Letter grades only.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff)

**GRADUATE COURSES IN ART HISTORY**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**ARTHIST 200C. Reception and Literacy in Roman Art**

(Same as CLASSART 322) Beyond a focus on artists and patrons: how Roman art was seen and understood by its contemporary viewers. Themes include memory, performance, gender, replication, and constructions of space. Goal is to draft a differentiated model of viewing and literacy, with attention to collective experience, hierarchy, access, and subversion.

5 units, Win (Trimble, J)

**ARTHIST 232Q. Place: Making Space Now**

(S,Sem) (Same as CEE 32Q) Stanford Introductory Seminar. This seminar argues that architects are ultimately placemakers, and questions what that means in the contemporary world. Part I investigates the meaning of the word place. Additional background for understanding contemporary place making will include a critique of the history of modern place-making through an examination of modern form. Part II examines two traditional notions of place by scale: from home to the city. What elements give these conceptions of space a sense of place? To answer this question, themes such as memory, mapping, and boundary, among others, will be investigated. Part III presents challenges to the traditional notions of place discussed in Part II. Topics addressed include: What does it mean to be out of place? What sense of place does a nomad have, and how is this represented? What are the non-places and how can architects design for these spaces? Part IV addresses the need to re-conceptualize contemporary s

3 units, Spr (Barton, J; Beischer, T)

**ARTHIST 295. Visual Arts Internship**

Professional experience in a field related to the Visual Arts for six to ten weeks. Internships may include work for galleries, museums, art centers, and art publications. Students arrange the internship, provide a confirmation letter from the hosting institution, and must receive consent from the faculty coordinator to enroll in units. To supplement the internship students maintain a journal and write a research paper related to the experience and their area of academic interest. Evaluations from the student and the supervisor are submitted at the end of the internship. Restricted to declared majors and minors. May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ARTHIST 301. Archaic Greek Art**

(Same as ARTHIST 101, CLASSART 101, CLASSART 201) The development of Greek art and culture from protogeometric beginnings to the Persian Wars, 1000-480 B.C.E. The genesis of a native Greek style; the orientalizing phase during which contact with the Near East and Egypt transformed Greek art; and the synthesis of East and West in the 6th century B.C.E.

4 units, Aut (Maxmin, J)

**ARTHIST 302. Empire and Aftermath: Greek Art from the Parthenon to Praxiteles**

(Same as ARTHIST 102, CLASSART 102) The course explores the art and architecture of the Athenian Empire in the age of Pericles, and then considers the effects of civil war and plague on Greek art and society in the later 5th and early 4th centuries.

4 units, Win (Maxmin, J)

**ARTHIST 305. Introduction to Medieval Art**

(Same as ARTHIST 105) Chronological survey of Byzantine, Islamic, and Western Medieval art and architecture from the early Christian period to the Gothic age. Broad art-historical developments and more detailed examinations of individual monuments and works of art. Topics include devotional art, court

and monastic culture, relics and the cult of saints, pilgrimage and crusades, and the rise of cities and cathedrals.

*4 units, not given this year*

**ARTHIST 306A. Art of Pilgrimage and Crusade**

(Same as ARTHIST 106A) Focus is on the artistic production of Mediterranean 12th-13th centuries exploring the phenomena of pilgrimage and Crusade. The rise of the Normans; the establishment of the pilgrimage to Santiago de Compostella as part of the Reconquista of Spain; the Crusader capture of Jerusalem in 1099 and the subsequent formation of Crusader states in the eastern Mediterranean; the rise of the Ayyubids and the emergence of the Italian city-state trade. The interconnection between the rise of narrative and conquest; the emergence of monumental sculpture; and the clash between tactile and optical visually.

*4 units, not given this year*

**ARTHIST 308. Virginity and Power: Mary in the Middle Ages**

(Same as ARTHIST 108) The most influential female figure in Christianity whose state cult was connected with the idea of empire. The production and control of images and relics of the Virgin and the development of urban processions and court ceremonies though which political power was legitimized in papal Rome, Byzantium, Carolingian and Ottonian Germany, Tuscany, Gothic France, and Russia.

*4 units, not given this year*

**ARTHIST 308A. Medieval Islamic Art and Architecture from 7th century Arabia to the Conquest of Cairo in 1517**

(Same as ARTHIST 108A) The course provides an introduction to the arts of the Islamic world in the Middle Ages, in both its Western and Eastern areas. The artistic material is presented in correlation to religion, philosophy and political history. We examine the many forms, styles and modes of visual expression that contributed to a great diversity of artistic production within the complex set of different competitive centers of cultures, all united through the one and same faith in the holy text of the Qur'an. We focus on the most representative artworks of the periods, dynasties and countries covered in the course.

*4 units, Win (Staff)*

**ARTHIST 308B. Islamic Art & Architecture: 15th-19th century**

(Same as ARTHIST 108B) An introduction to the arts and visual culture of the Islamic world in the pre-modern and modern period. The course examines case studies of sites and objects highly representative of these dynasties and the modes of plastic expression they developed. History of the art of the book is an important topic in this period.

*4 units, Spr (Staff)*

**ARTHIST 311. Introduction to Italian Renaissance, 1420-1580**

(Same as ARTHIST 111) New techniques of pictorial illusionism and the influence of the humanist revival of antiquity in the reformulation of the pictorial arts in 15th-century Italy. How different Italian regions developed characteristic artistic cultures through mutual interaction and competition.

*4 units, not given this year*

**ARTHIST 314. Vision and Emblem: Netherlandish Painting from Van Eyck to Brueghel**

(Same as ARTHIST 114) How 15th-century pictorial illusionism transformed the devotional image and portraiture, calling for a new kind of engagement with the image on the part of the beholder. How 16th-century humanist knowledge influenced the creation of new pictorial subjects and representational forms. The reflection of religious crises triggered by the Reformation in art. GER:DB-Hum

*4 units, not given this year*

**ARTHIST 317. Picturing the Papacy: Renaissance to Neoclassicism**

(Same as ARTHIST 117) Campaigns of renovations aimed at restoring Rome to its former legendary splendor. The use of art and architecture to glorify the papacy and negotiate attacks on the institution. Art and papal nepotism from the 15th to 18th century.

*4 units, not given this year*

**ARTHIST 318. Titian, Veronese, Tintoretto**

(Same as ARTHIST 118) The course addresses the ways in which Venetian painters of the sixteenth century redefined paradigms of color, disegno, and invention. Themes to be examined include civic piety, new kinds of mythological painting, the intersection

between naturalism and eroticism, and the relationship between art and rituals of church and statecraft.

*4 units, not given this year*

**ARTHIST 320. Art and Culture of Northern Europe in the 17th Century**

(Same as ARTHIST 120) Painting and graphic arts by artists in Flanders and Holland from 1600 to 1680, a period of political and religious strife. Historical context; their relationship to developments in the rest of Europe and contributions to the problem of representation. Preferences for particular genres such as portraits, landscapes, and scenes of everyday life; the general problem of realism as manifested in the works studied.

*4 units, not given this year*

**ARTHIST 321. 18th-Century Art in Europe, ca 1660-1780**

(Same as ARTHIST 121) Major developments in painting across Europe including the High Baroque illusionism of Bernini, the founding of the French Academy, and the revival of antiquity during the 1760s, with parallel developments in Venice, Naples, Madrid, Bavaria, and London. Shifts in themes and styles amidst the emergence of new viewing publics. Artists: the Tiepolos, Giordano, Batoni, and Mengs; Ricci, Pellegrini, and Thornhill; Watteau and Boucher; Chardin and Longhi; Reynolds and West; Hogarth and Greuze; Vien, Fragonard, and the first works by David. Additional discussion for graduate students.

*4 units, not given this year*

**ARTHIST 322. The Age of Revolution**

(Same as ARTHIST 122) Painting in Europe during the French Revolution and the Napoleonic conquest. As political events altered social formations, practices in the visual arts were similarly affected by shifts in patronage, public, and the social function of image making. An attempt to align ruptures in the tradition of representation with the unfolding historical situation. The first manifestations of a romantic alternative to the canons of classical beauty and stylistic restraint.

*4 units, not given this year*

**ARTHIST 324. The Age of Naturalism, ca 1830-1874**

(Same as ARTHIST 124) The origins, development, and triumph of naturalist painting in Europe. The creative tensions that emerged between traditional forms of history painting and the challenge of modern subjects drawn from contemporary life. Emphasis is on the development of open-air painting as an alternative to traditional studio practice, and to the rise of new imaging technologies, such as lithography and photography, as popular alternatives to the hand-wrought character and elitist appeal of high art.

*4 units, Aut (Marrinan, M)*

**ARTHIST 325. American Art, 1865-1945**

(Same as ARTHIST 125) American art from the end of the Civil War through WWII. Focus is on what paintings, sculptures, photographs, and popular imagery reveal about their historical moment. Topics include: James Abbott McNeill Whistler; Thomas Eakins; John Singer Sargent; Thomas Dewing; post-war reconciliation and race; incorporation and the anti-modern impulse; turn-of-the-century gender anxiety; American impressionism; Robert Henri and the Ash Can school; Alfred Stieglitz and his circle; inter-war transatlantic exchange and the development of an American modernism; the Harlem Renaissance; Thomas Hart Benton and regionalism; and the effect of both war and the New Deal on American art.

*4 units, not given this year*

**ARTHIST 326. Post-Naturalist Painting**

(Same as ARTHIST 126) How conceptual models from language, literature, new technologies, and scientific theory affected picture making following the collapse of the radical naturalism of the 1860s and 1870s. Bracketed in France by the first Impressionist exhibition (1874) and the first public acclamation of major canvases by Matisse and Picasso (1905), the related developments in England, Germany, Belgium, and Austria. Additional weekly discussion for graduate students. Recommended: some prior experience with 19th-century art.

*4 units, Spr (Marrinan, M)*

**ARTHIST 332. American Art and Culture, 1528-1860**

(Same as AMSTUD 132, ARTHIST 132) The visual arts and literature of the U.S. from the beginnings of European exploration to the Civil War. Focus is on questions of power and its relation to

culture from early Spanish exploration to the rise of the middle classes. Cabeza de Vaca, Benjamin Franklin, John Singleton Copley, Phillis Wheatley, Charles Willson Peale, Emerson, Hudson River School, American Genre painters, Melville, Hawthorne and others.

*4 units, Win (Wolf, B)*

**ARTHIST 342. Architecture Since 1900**

(Same as ARTHIST 142) The development of competing versions of modern and postmodern architecture and design in Europe and America, from the early 20th century to the present. Recommended: 141.

*4 units, Aut (Beischer, T)*

**ARTHIST 343A. American Architecture**

(Same as ARTHIST 143A) A historically based understanding of what defines American architecture. What makes American architecture American, beginning with indigenous structures of pre-Columbian America. Materials, structure, and form in the changing American context. How these ideas are being transformed in today's globalized world.

*4 units, Spr (Beischer, T)*

**ARTHIST 347. The Visual Culture of Modernism and its Discontents, ca. 1850-1925**

(Same as ARTHIST 147) Focus is on the visual arts and related fields in Europe (especially France but also Russia and Germany) during the late 19th and early 20th centuries. Beginning with Paris in the period of Haussmann, Baudelaire and Manet, modernism in art and visual culture presents a compelling dream of utopian possibilities that involved multifaceted and often contradictory approaches to the changes brought about by industrialization, urbanization, and the rise of mass culture.

*4 units, not given this year*

**ARTHIST 353A. American Art, 1900-1945**

(Same as ARTHIST 153A) Painting, sculpture, photography, and design. Focus is on the emergence of diverse cultural forms in the search for a modern, American form of artistic expression. Topics include: Robert Henri and the Ash Can school; the Armory Show and the influence of European modernism; Marcel Duchamp and plumbing; futurism, cubism, and the machine aesthetic; Stuart Davis and jazz; Dorothea Lange and documentary photography; Alfred Stieglitz and his Seven Americans; Thomas Hart Benton and regionalism; the arts of the WPA; and the role of artists in wartime propaganda.

*4 units, not given this year*

**ARTHIST 355. American Art Since 1945**

(Same as ARTHIST 155) Major figures, movements, and concepts of American art with examples from Europe from WW II to the present. Topics: the ideology and aesthetics of high modernism, the relationship between art and popular culture, the death of painting, the question of postmodernism. Artists: Pollock, Newman, Stella, Johns, Warhol, Andre, Rainer, Smithson, Hesse, Serra, Kruger, Sherman.

*4 units, not given this year*

**ARTHIST 358A. History of Photography**

(Same as ARTHIST 158A) From its invention in 1839 to the present. Emphasis is on the evolution of photography as a fine art. Photographs as a universal democratic art form to record familial events and express personal creativity. Development of photography as it relates to other art forms, journalism, architecture, portraiture, landscape, documentation, time, and personal expression. The technology of photography; photographic techniques.

*4 units, Win (Dawson, R)*

**ARTHIST 359B. How Photographs Exist**

(Same as ARTHIST 159B) Photographs as things, and the lives they lead: How the materiality of photographs affects their place in everyday life; what has changed and what hasn't in the transition to digital technologies. Physical forms from radio photographs and Viewmaster discs to compression algorithms and the rebirth of instant films; social placements from family slideshows and flea markets to social media, server farms, and Musumeci vs. Department of Homeland Security. Includes direct examination of materials in university repositories. Individual and collaborative projects.

*4 units, not given this year*

**ARTHIST 360A. Twentieth-Century African American Art**

(Same as ARTHIST 160A) Paintings, sculptures, photography, and mixed media works. Styles, cultural and social histories, patronage, and critical reception. The problems of studying the production of artists of color as a separate field; alternatives to the category of African American art; and the outlook for new critical methodologies.

*4 units, not given this year*

**ARTHIST 361. American Art 1900-1945**

(Same as ARTHIST 161) Course surveys US artistic production and aesthetic developments from the turn of the century until the end of World War II. Roughly chronological in scope, it eschews any single tendency or medium in order to elaborate the disjunctive formation of modernism in America. Painting and photography figure simultaneously; abstraction in its various guises, artists' films, the Armory Show, formations of race and gender, Black Mountain and MoMA all move through intransigent debates that pit social commitment against the pursuit of an ethos of autonomy.

*4 units, not given this year*

**ARTHIST 362A. Spectacle & Revolution: European Art c.1968**

(Same as ARTHIST 162A) Focus is on art and artists contemporary to the radical student movements of the 1960s, which exploded postwar tensions between traditional societies and new mass cultures. Topics include artists Joseph Beuys, VALIE EXPORT, and Gerhard Richter, and movements Fluxus, Situationism, Nouveau Realisme, and Arte povera. Course is reading intensive. Readings include Guy Debord, Umberto Eco, Pierre Restany, and many artists' writings. Prerequisites: AH1

*4 units, not given this year*

**ARTHIST 370. The Cinematic Century**

(Same as ARTHIST 170, FILMSTUD 170) Few contemporary institutions and forms of representation have had a greater impact on the world than film. This class examines film history through institutions and practices as well as in formal developments in the medium in an international context but with an underlying interest in explaining the international forces that shaped Hollywood's rise. Through screenings of both documentary and fiction film, this class will suggest that the century just past be understood through the primary lens of the way cinema shaped its course.

*4 units, Spr (Staff)*

**ARTHIST 373. Issues in Contemporary Art**

(Same as ARTHIST 173) Major figures, themes, and movements of contemporary art from the 80s to the present. Readings on the neo-avant garde; postmodernism; art and identity politics; new media and technology; globalization and participatory aesthetics. Prerequisite: ARTHIST 155, or equivalent with consent of instructor.

*4 units, not given this year*

**ARTHIST 376. Feminism and Contemporary Art**

(Same as ARTHIST 176) (Same as ARTHIST 176) The impact of second wave feminism on art making and art historical practice in the 70s, and its reiteration and transformation in contemporary feminist work. Topics: sexism and art history, feminist studio programs in the 70s, essentialism and self-representation, themes of domesticity, the body in feminist art making, bad girls, the exclusion of women of color and lesbians from the art historical mainstream, notions of performativity.

*4 units, not given this year*

**ARTHIST 382. Arts of China, 900-1500: Cultures in Competition**

(Same as ARTHIST 182) The era from the Five Dynasties and Song to the mid-Ming period was marked by competition in cultural arenas such as between Chinese and formerly nomadic regimes, or between official court art modes and scholar-official and literati groups. Topics include: innovations in architectural and ceramic technologies; developments in landscape painting and theory; the proliferation of art texts and discourses; the rise of educated artists; official arts and ideologies of the Song, Liao, Jin, Yuan, and Ming regimes; new roles for women as patrons and cultural participants; and Chan and popular Buddhist imagery.

*4 units, not given this year*

**ARTHIST 385. Art in China's Modern Era**

(Same as ARTHIST 185) From the late Ming period (ca. 1600) to

early 20th century Chinese arts. Topics include: urban arts and print culture; commodification of art; painting theories; self portrayals; art sponsorship, collecting, and ideological programs at the Qing imperial court; media and modernity in Shanghai; art and politics in early 20th century China.

*4 units, not given this year*

**ARTHIST 385B. Contemporary Chinese Art: Sites and Strategies**

(Same as ARTHIST 185B) Issues and developments in contemporary Chinese art over the past two decades. Questions of personal and national identity, politics and history, globalization and mass culture, consumerism and urban transformation, and the body, sexuality, and gender, as represented in formats including painting, photography, and installation and multimedia art. Museum visits.

*4 units, not given this year*

**ARTHIST 386. Theme and Style in Japanese Art**

(Same as ARTHIST 186, JAPANGEN 186, JAPANGEN 286) Monuments in traditional Japanese architecture, sculpture, garden design, painting, prints, and pots, through the 19th century. Chronological framework emphasizes the role of these objects play in visualizing the ideals of the society they represent.

*4 units, Aut (Takeuchi, M)*

**ARTHIST 387. Arts of War and Peace: Late Medieval and Early Modern Japan, 1500-1868**

(Same as ARTHIST 187, JAPANGEN 185) Narratives of conflict, pacification, orthodoxy, nostalgia, and novelty through visual culture during the change of episteme from late medieval to early modern, 16th through early 19th centuries. The rhetorical messages of castles, teahouses, gardens, ceramics, paintings, and prints; the influence of Dutch and Chinese visuality; transformation in the roles of art and artist; tensions between the old and the new leading to the modernization of Japan.

*4 units, not given this year*

**ARTHIST 388A. The History of Modern and Contemporary Japanese and Chinese Architecture and Urbanism**

(Same as ARTHIST 188A) The recent rapid urbanization and architectural transformation of Asia; focus is on the architecture of Japan and China since the mid-19th century. History of forms, theories, and styles that serve as the foundation for today's buildings and cityscapes. How Eastern and Western ideas of modernism have merged or diverged and how these forces continue to shape the future of Japanese and Chinese architecture and urban form.

*4 units, not given this year*

**ARTHIST 390. African Art and Writing Traditions**

(Same as ARTHIST 190) Classic African graphic writings south of the Sahara in historical and social context. What makes an African graphic writing system, and how they are used as visual art, and as markers of identity, religion, and moral philosophy. Civilizations include Mali, Asante, Yoruba, Ejagham, and Kongo.

*4 units, Win (Martinez-Ruiz, B)*

**ARTHIST 391. Afro-Atlantic Religion, Art, and Philosophy**

(Same as ARTHIST 191) Afro-American graphic writing and other forms of visual communication including ancient rupestrian art and rock painting in Africa, and present-day forms in the Americas. The diversity of daily life, religion, social organization, politics, and culture with African origin in the diaspora. Focus is on major contemporary Afro-Atlantic religions including: Palo Monte and Abakua in Cuba; Gaga in the Dominican Republic; Revival, Obeah, and Kumina in Jamaica; Vodun in Haiti; and Candomble and Macumba in Brazil.

*4 units, not given this year*

**ARTHIST 392. Introduction to African Art**

(Same as ARTHIST 192) Form, space, media, medium, and visual expression in African art. Rock art to contemporary art production. Majors works and art expression in terms of function and historical context.

*4 units, Aut (Martinez-Ruiz, B)*

**ARTHIST 394. Iconography of African Art**

(Same as ARTHIST 194) African art from 25,000 years ago to the present emphasizing social, historical, and ideological concerns in visual systems and traditions and aesthetic form. Critical grounding in anthropology and cultural studies.

*4 units, not given this year*

**ARTHIST 395. Introduction to Black Atlantic Visual Traditions**

(Same as ARTHIST 195) African cultural expression in the Americas. How politics, religion, and culture influence the art of the Black Atlantic. Focus is on the period when cultures were brought from Africa to the Americas through the slave trade and came into contact and conflict with western colonial powers.

*4 units, not given this year*

**ARTHIST 396. African Visual Art & Graphic Communication in the Americas**

(Same as AFRICAAM 196, ARTHIST 196, CSRE 186) The class addresses the modes of visual expression used among the Bakongo people in Central Africa and their descendants in Cuba, Haiti, and Brazil and argues that together these constitute identifiable graphic writing systems. After providing a brief overview of the forms of graphic expression in use within Kongo and Kongo Atlantic cultures, the class focuses on the most central of the traditional cosmograms, Dikenga. By mapping the meanings and forms of Dikenga, the essay attempts to demonstrate its continuity throughout the Kongo diaspora. Finally, the class highlights the rich cosmology, cosmogony, and moral philosophy that have consistently informed the use and meaning of Dikenga in its central role in religious narratives, moral philosophy and religious education among the Bakongo in Atlantic world.

*4 units, not given this year*

**ARTHIST 409. Iconoclasm**

Iconoclasm, iconophobia, and aniconism as markers of cultural transformation of the Mediterranean in the 7th-9th centuries. The identity crisis in the region as the Arabs established the Umayyad caliphate, conquering the Holy Land, Egypt, and Spain. The West consolidated around the Carolingians versus the East split between the Byzantines and the Arabs. How each of these three empires emerged from the ashes of late antique culture and carved an identity out of a common cultural foundation.

*5 units, not given this year*

**ARTHIST 410. Aesthetics of the Icon**

How medieval objects were experienced through sight, touch, sound, smell, and taste; how this multisensory richness has been reduced to visual studies of medieval art. Focus is on the Byzantine icon to restore its synaesthetic power; how its performance is tied to culturally-specific modes of seeing. Byzantine liturgy, prayer, epigrams, and literary genres of description such as ekphrasis.

*5 units, not given this year*

**ARTHIST 410A. Art and Theory in Islam: Visual Concepts and Aesthetic Paradigms**

The course takes a critical assessment of visual concepts and aesthetic paradigms, such as geometry, ornament iconoclasm, figurative representation, writing/calligraphy, beauty, through the study of representative works of Islamic art and architecture. Also takes an initial theoretical and methodological framework for the study of these concepts and paradigms, and an application of theories to case studies.

*5 units, Spr (Staff)*

**ARTHIST 412. Problems in Italian Mannerism**

Questions of the bella maniera, anti-classicism, and center and periphery in mannerist art in light of developments in scholarship from the 70s to the present. Authors include Arasse, Cropper, Cole, Nova, Summers, and Vickers.

*5 units, not given this year*

**ARTHIST 413. Michelangelo**

Michelangelo's long career in light of recent scholarship. Topics include the status of the cult image, the paragon between poetry and the pictorial arts, painting and questions of literary genre, and Counter Reformation reactions to his art.

*5 units, not given this year*

**ARTHIST 414. Italian Mannerism**

Questions of the bella maniera, anti-classicism, and center and periphery in mannerist art in light of developments in scholarship from the 70s to the present. Authors include Arasse, Cropper, Cole, Nova, Summers, and Vickers.

*5 units, not given this year*

**ARTHIST 428. Eakins and Vermeer**

Questions of gender, visuality, and power in two major realist painters of the 17th and 19th centuries. How Vermeer and Eakins confronted and sometimes evaded the central historical issues of their day: modernization, class, sexuality, nationality, and the status of the artist.

*5 units, not given this year*

**ARTHIST 431. Landscape and Power**

This seminar explores American landscape art from its origins in Hudson River School painting to the Land Art movement of the late twentieth century. Images of nature are read as narratives of individual and national identity. Topics include gender and the landscape; nation building and the frontier; politics and parks; the landscape as anti-art; poetry and the environment. Students will work with images from the superb collection of American landscape art at the de Young Museum in Golden Gate Park.

*5 units, not given this year*

**ARTHIST 440. Stranger than Truth**

Taught jointly by Professor Nancy J. Troy and Cantor Arts Center Curator Hilarie Faberman, this graduate seminar explores questions of illusionism and the real in modern and contemporary art. Earlier periods are explored as important sources of inspiration and/or resistance. Students will be encouraged to pursue research projects ranging from theoretical or critical issues to individual works of art or groups of objects in anticipation of a Cantor exhibition entitled, *Stranger than Truth: Trompe l'oeil Imagery from Picasso to the Present*, planned for 2013. Those with interests in earlier periods and/or diverse artistic practices are welcome.

*5 units, Win (de Wit, N; Faberman, H)*

**ARTHIST 442. Looking at Violence**

Violence in the media and its effects upon viewers, especially the young, is an issue of national concern that has produced legislation for the ratings of movies, television shows, and computer/video games. Parental control software makes it possible to program cable boxes and computers to censor what broadcasts or websites are accessible to children. These are political and technical fixes to a perceived social problem. They do not ask why one is drawn to watch violence in the first place, nor why certain kinds of violent imagery is compelling. Debates about how such measures should be implemented usually proceed from the given that images of violence are subjectspecific, with little or no consideration of their formal qualities or visual protocols. This seminar assumes that the tools and categories of visual analysis specific to the History of Art might enrich our thinking about the attraction and impact of violence across media and across time. The seminar proposes to situate its to

*5 units, Aut (Marrinan, M)*

**ARTHIST 444. Photograph, Document, Archive**

Debates over the ontological status of the photograph as document from the 19th century to the present; archival conceptions of photographic meaning. Problems of realism, indexicality, positivism, tourism, social commentary, power, and subjectivity. Protagonists: Frith, Atget, Hine, Sander, Rodchenko, Siskind, Lange, Bernd and Hilla Becher, Richter, Rosler, Sekula. Readings: Warburg, Kracauer, Benjamin, Brik, Tret'akov, Sontag, Barthes, Buchloh, Tagg, Nesbit, Armstrong, Stimson, Nickel, Kelsey.

*5 units, not given this year*

**ARTHIST 447. THE HISTORIOGRAPHY OF CUBISM**

Students are introduced to historiography and method in the history of art through a consideration of the multiple constructions of French Cubism as a complex of styles, a set of theoretical problems, and a historical phenomenon. Exploration of how some important issues raised by the art of Picasso and Braque as well as Léger, Delaunay, Gleizes, Metzinger, Villon, and other major (and not so major) figures of early 20th century modernism have been debated by art historians over the past 75 years, since the publication of Alfred Barr's *Cubism and Abstract Art* in 1936. Open to undergraduates with permission of the instructor.

*5 units, not given this year*

**ARTHIST 457. Art in Public Spaces: Berlin 1980-2000**

(Same as GERGEN 257) Before and after the re-unification a great number of artistic projects reflect the problems of political memorial culture in Germany. The seminar will deal with art

works in public spaces, mostly in Berlin, by German and international artists, from 'drop sculptures' and the decoration programs of Federal buildings up to the Holocaust Memorial.

*3-5 units, not given this year*

**ARTHIST 459. The Visual World of Moby Dick**

Course pairs weekly readings of *Moby-Dick* with parallel discussions of the culture--especially the visual culture--that the readings allude to. Focusing on painting, sculpture and vernacular art, we recreate the visual environment that undergirds Melville's epic, from tavern signs and scrimshaw to images of slavery, the landscape, and everyday life in America. In addition to *Moby-Dick* and several short stories by Melville, we study: nineteenth-century landscape and genre painting; slavery and race in antebellum society; commerce, industry and early globalism; gender and class; Emerson, Poe and Dickinson.

*5 units, Spr (Wolf, B)*

**ARTHIST 460. Introduction to Visual Studies: Methods and Debates**

Over the last two decades, visual studies has gained wide currency as a topic of research and teaching. Scholars from disciplines as diverse as art history, American studies, literature, anthropology, film and media studies, history and gender studies have focused attention on both the cultural and historical specificity of vision and on the ever-widening array of images and objects available for viewing. This graduate seminar provides a critical introduction to the history, methods and central debates within the emergent field. How have scholars and critics taken up, or in some cases dismissed, visual studies and to what ends? What are the possibilities and limits of the interdisciplinary models on offer? The course explores these questions through a sustained engagement with selected texts and images about vision, visuality and visual objects.

*5 units, Spr (Staff)*

**ARTHIST 470. Globalization and the Visual Arts**

Enrollment restricted to graduate students. Globalization as the most important paradigm for the production, circulation, and reception of contemporary art since the 1990s. The expanding terrain of the art world; biennial culture; new economies of scale and the art market along with its critique in the discourses of empire and multitudes. Debates on the thematics of hybridity; post-Fordism; the flat world and capital flows; exteriority and site specificity; and new models of collectivism in recent art.

*5 units, not given this year*

**ARTHIST 475. Media Cultures of the Cold War**

(Same as COMM 386) The intersection of politics, aesthetics, and new media technologies in the U.S. between the end of WW II and the fall of the Berlin Wall. Topics include the aesthetics of thinking the unthinkable in the wake of the atom bomb; abstract expressionism and 'modern man' discourse; game theory, cybernetics, and new models of art making; the rise of television, intermedia, and the counterculture; and the continuing influence of the early cold war on contemporary media aesthetics. Readings from primary and secondary sources in art history, communication, and critical theory.

*3-5 units, Spr (Turner, P; Lee, P)*

**ARTHIST 476. Postmodernism and the Visual Arts**

Enrollment restricted to graduate students. The debates on postmodernism as a cultural dominant (Jameson) emerging in the criticism of the last half of the twentieth century. Theories of periodization and historicity; authorship, appropriation; allegory and narrative; simulation; difference; late capitalism and the postindustrial society; and cybercultures relative to the art of the 1970s-80s. Special attention paid to the culture wars and the importance of postmodernism for contemporary discussions of neoliberalism. Authors include Barthes, Baudrillard, Crimp, Foster, Foucault, Jameson, Habermas, Harvey, Krauss, Lyotard, Owens.

*5 units, not given this year*

**ARTHIST 480. Cultures & Politics of Collecting in Late Ming Dynasty China**

Studies of the literature, representation, and political environments for collecting in late Ming dynasty China (ca. 1550-1644).

*5 units, Aut (Vinograd, R)*

**ARTHIST 481. Colloquium on Song and Yuan Dynasty**

**Painting Studies**

In-depth discussion and analysis of recent art historical studies, exhibitions, and conferences on Chinese painting and related arts of the Song and Yuan eras (10th-14th c.). Topics will include: approaches to Five Dynasties painting; archaeological discoveries and Liao painting; political implications of painting in the late 11th century; recent studies of cultural patronage and production at the Huizong court; court women as art sponsors in the Song era; court painting and urban culture in Southern Song Lin'an (Hangzhou); Jin and late Song literati painting; Buddhist painting in the Ningbo region; Song-Yuan Daoist painting; art patronage and collecting at the Yuan court; historiographic, connoisseurial, and authenticity issues. Open to graduate students, and undergraduates with permission of the instructor.

5 units, not given this year

**ARTHIST 482. Chinese Art of the 1970's and 1980's**

Departing from the Maoist ideology of Cultural Revolution era art, Chinese art of the 1970's and '80's culminated in the '85 New Wave movement, and paved the way for the 1990s and beyond. Investigating art world events against the background of economic liberalization and emerging globalization. Topics include changing official art directives, agendas of art schools and institutions, the emergence of amateur and professional artists, the upsurge in art publications and the boom of artist groups and exhibitions, the definition of a new literati painting by ink painters, and trans-media experiments by avant-gardists. The post-socialist cultural fever in philosophy, literature, music, theater, and film after 1976 examined as the backdrop for artistic activities. Open to graduate students, and undergraduates with permission of the instructor.

5 units, not given this year

**ARTHIST 482B. Imagining the Imperial: Images of the Court in Late Ming Dynasty Public Culture Part II**

Exploration in representations of palace and court life in Ming period vernacular painting, illustrated books, and fiction. Topics include the status of the court in the Ming public imaginary, strategies of historical displacement, disguised political critique, commerce in imperial objects, and scandals, rumors and myths surrounding court life

5 units, not given this year

**ARTHIST 483. Shanghai Visual Culture: Contested Modernities**

Held in conjunction with Modern Ink Painters exhibition at the Cantor Center and the Shanghai Visual Culture exhibition at the Asian Art Museum of San Francisco. Aspects of late 19th- and early 20th-century Shanghai visual culture and its historiography. Topics include the interplay and competition of ink painting with new media such as lithography, photography, illustrated periodicals, and film; images of gendered modernity, from courtesan to new woman; situating the national and the cosmopolitan; the cultural politics of painting; art institutions, education, and exhibitions. Museum visits; and individual or group research projects. Open to undergraduates with consent of instructor.

5 units, not given this year

**ARTHIST 485. The Situation of the Artist in Traditional Japan**

(Same as JAPANGEN 220) Topics may include: workshop production such as that of the Kano and Tosa families; the meaning of the signature on objects including ceramics and tea wares; the folk arts movement; craft guilds; ghost painters in China; individualism versus product standardization; and the role of lineage. How works of art were commissioned; institutions supporting artists; how makers purveyed their goods; how artists were recognized by society; the relationship between patrons, desires and artists, modes of production.

5 units, not given this year

**ARTHIST 486. Connoisseurship & Research Methods in Chinese Painting**

addresses problems of attribution, dating, and authenticity in Chinese painting and calligraphy studies. Related issues of style analysis, technical studies, documentation, catalogues and other art literature are considered within the larger context of collecting history.

5 units, not given this year

**ARTHIST 488. Chinese Painting of the Yuan-Ming Transition Era**

Studies of political environments, social and patronage networks, and textual production.

5 units, Win (Vinograd, R)

**ARTHIST 494. Caribbean and Latin American Art**

Visual culture from 1505 to 1889 and its relation to current debates on cultural identity, hybridity, syncretism, and creolization. Examination of paintings, travel books and printmaking by artists including De Bry, Belisario, Rugendas, Debret, and Landaluze. Close visual analysis of works at the Cantor Arts Center and the Green Library at Stanford University.

5 units, Win (Martinez-Ruiz, B)

**ARTHIST 502. Methods and Historiography of Art History**

Restricted to graduate students. From the origins of the discipline in 19th-century Germany to recent debates on visual studies. Iconology, formalism, semiotics, psychoanalysis, and Marxist and feminist approaches to the work of art. Limited enrollment.

5 units, Aut (Lee, P)

**ARTHIST 507. Medieval Image Theory**

The Middle Ages saw the development of a theoretical framework on visual representation in response to charges of idolatry. The defenders of religious images drew on the dogma of Incarnation; as the Virgin gave human flesh to the Logos/Christ, the image offered a material manifestation of the divine. Focus is on the change in perception and staging of the image. Early in the period, the icon or relic expressed the presence of the sacred; later in the period, visual representation was designed to trigger an emotional response that led the viewer to a union with the divine.

5 units, not given this year

**ARTHIST 600. Art History Bibliography and Library****Methods**

1 unit, Aut (Blank, P)

**ARTHIST 610. Teaching Praxis**

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**ARTHIST 620. Area Core Examination Preparation**

For Art History Ph.D. candidates. Prerequisite: consent of instructor.

5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**ARTHIST 640. Dissertation Proposal Preparation (Staff)**

5 units, Aut (Staff), Win (Staff), Spr (Staff, 1), Sum (Staff)

**ARTHIST 650. Dissertation Research (Staff)**

5 units, Aut (Staff, 1), Win (Staff), Spr (Staff, 1), Sum (Staff)

**ARTHIST 660. Independent Study**

For graduate students only. Approved independent research projects with individual faculty members.

1-15 units, Aut (Staff, 1), Win (Staff), Spr (Staff, 1), Sum (Staff)

**ARTHIST 660E. Extended Seminar**

May be repeated for credit. (Staff)

4 units, Aut (Staff), Win (Staff), Spr (Staff)

**ARTHIST 670. Dissertation Seminar**

For graduate students writing and researching dissertations and dissertation proposals. How to define research projects, write grant proposals, and organize book-length projects.

3-5 units, not given this year

**ARTHIST 802. TGR Dissertation**

0 units, Aut (Staff), Win (Staff), Spr (Staff, 1), Sum (Staff)

## ART STUDIO (ARTSTUDI) COURSES

### UNDERGRADUATE COURSES IN ART STUDIO

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**ARTSTUDI 4. Technology for Artists: Website Design and**

**Portfolio Construction**

A crash-course in website design and development, in which students create a high-quality digital portfolio and learn hands-on technology skills. Students work with the Adobe Creative Suite Dreamweaver, Photoshop and affiliated technologies. Students learn basic design and coding skills (HTML and CSS), trends and strategies in design and digital representation, and create a personal portfolio website. Aimed at students (undergraduate or graduate) in any visual, written, or performing art. Limited enrollment. Apply online by March 1, 2011 at <http://tfa.stanford.edu>

2 units, not given this year

**ARTSTUDI 4SI. Beginner Ceramics**

Student Initiated Course - Introduction to Ceramics. Students learn basic hand-building and wheel techniques using stoneware clay, including how to throw cups, mugs, bowls, plates, and a lidded vessel. Class held in the Stanford Ceramics Studio (Elliot Program Center). \$50 lab fee covers clay, glaze, tools, and firing costs. All levels of experience welcome. Register on Axxess (limit 10 students). Please check <http://ceramics.stanford.edu> for any updates.

1-2 units, Aut (Lanas, M; Kaneshiro, L)

**ARTSTUDI 10AX. Filmmaking**

Production skills and project development in documentary filmmaking. The fundamentals of filmmaking using digital video production techniques focused on documentary storytelling. Shooting in mini-DV format and editing with Final Cut Pro software, students actualize their ideas in an audiovisual medium from conceptualization through post-production and exhibition.

2 units, not given this year

**ARTSTUDI 11. Introduction to Figure Drawing**

Working from the live, nude model, emphasis is on accurate representation, understanding of basic anatomy, and the use of perceptual skills. All levels of experience, non-majors and majors welcome.

2 units, Aut (Deas, Y)

**ARTSTUDI 11AX. Digital Art and Design in Practice**

Hands-on exploration of art and design using digital tools. Overview of contemporary digital art and design including fine art, graphic design, film, and animation. Analysis of new work in these areas and visits to Bay Area production and artist studios. Demos will focus on 2D and time-based techniques, but students interested in procedural or 3D computer graphic are welcome. Students will complete a multi-part visual project to be included in a final exhibit.

2 units, Aut (Staff)

**ARTSTUDI 12AX. Drawing Intensive: Revisiting Nature**

As increasing technological advances can further separate us from direct impressions of nature, this class is designed to reconnect and enhance our relationship to the natural world and our surrounding environment. To do this we will develop visual skills and critical thinking through careful observation and classical drawing techniques. Inspired by Stanford's natural and manicured landscapes, students will enjoy the great outdoors while learning elements of perspective, composition, light, and form. Students will learn about master landscape artists, investigate the built and natural environment of the campus, and experiment with various drawing techniques, mediums, and styles.

2 units, not given this year

**ARTSTUDI 13. PAINTING WITH ACRYLICS**

Introductory methods to painting with acrylics. Acrylic is a versatile medium with a faster drying time than oil. Thus, the process of layering, glazing, and building is accelerated. In addition to establishing a basic understanding of working with paint, the course emphasizes the agency of the individual to realize their ideas in visual terms. Students are encouraged to create work that is both unique and relative to painting's lineage. The instructor guides and promotes an active look at painters throughout history. All students are welcome.

2 units, Win (Chapman, A)

**ARTSTUDI 14. Experimental Drawing**

Discover and develop a unique partnership between drawing and perception, observation, intuition and experience by exploring ways of looking and mark making. Draw life around you as you

see it, using figure models, landscapes, unique still lives and your own sources. Have the freedom to create imaginative, realistic, fantasy, and dream like works. Experiment with abstract forms, study the relationship of mark making and drawing mediums through mood and style. Work across scales and become familiar with a variety of materials: charcoal, pen and inks, brushes, pencils, watercolor, markers, acrylics, collage, gesso, gels as well as found objects. Learn to see and draw in new ways while experimenting freely. All students are welcome.

2 units, Spr (Pinkusevich, Y)

**ARTSTUDI 17. Introduction to Photography as Art**

An introduction to the art of photography, covering technical basics and darkroom techniques with traditional black and white materials. With an emphasis on aesthetics and subject matter, course investigates both historical and contemporary photography as it relates to personal artistic development. 35mm camera required. No prior photographic experience necessary.

2 units, Win (Katseff, A)

**ARTSTUDI 130. Interactive Art: Making it with Arduino**

Students use electronics and software to create kinetic and interactive elements in artwork. No prior knowledge of electronics or software is required. Students learn to program the Arduino, a small easy-to-use microprocessor control unit ( see <http://www.arduino.cc/> ). Learn to connect various sensors such as light, motion, sound and touch and use them to control software. Learn to interface actuators like motors, lights and solenoids to create movement. Learn to connect the Arduino to theMAX/MSP/Jitter programming environment to create media-intensive video and audio environments. Explore the social dimensions of electronic art. (lower level)

4 units, Spr (DeMarinis, P)

**ARTSTUDI 131. Sound Art I**

Acoustic, digital and analog approaches to sound art. Familiarization with techniques of listening, recording, digital processing and production. Required listening and readings in the history and contemporary practice of sound art. (lower level)

4 units, Aut (DeMarinis, P)

**ARTSTUDI 138. Sound and Image**

Practices that combine audio and visual media. Topics include synesthesias, visual music, film soundtracks, and immersive multimedia practices that combine sound, music, still and moving images, projections, and performance. (lower level)

4 units, not given this year

**ARTSTUDI 140. Drawing I**

Functional anatomy and perspective as they apply to problems of drawing the form in space. Individual and group instruction as students work from still life set-ups, nature, and the model. Emphasis is on the development of critical skills and perceptual drawing techniques for those with little or no previous experience with pastels, inks, charcoal, conte, and pencil. Lectures alternate with studio work. (lower level)

4 units, Aut (Chagoya, E), Win (Bean, K), Spr (Bean, K)

**ARTSTUDI 145. Painting I**

Introduction to techniques, materials, and vocabulary in oil painting. Still life, landscape, and figure used as subject matter. Emphasis is on painting and drawing from life. (lower level)

4 units, Aut (Xie, X), Win (Bean, K), Spr (Bean, K)

**ARTSTUDI 147. Artist's Book**

Explores contemporary aesthetic interpretations of the book as an art object while invigorating traditional artistic practices of the art of the book. Through the medium of drawing, collage, and mixed media students produce their own artist's book. The course familiarizes students with bookbinding and the various techniques used, as well as exploring the narrative, text and image, and the book as a sculptural object.

4 units, Win (Ebtakar, A)

**ARTSTUDI 147S. Painting and Drawing**

4 units, Sum (Staff)

**ARTSTUDI 148. Monotype**

Introduction to printmaking using monotype, a graphic art medium used by such artists as Blake, Degas, Gauguin, and Pendergast. May be repeated for credit. Prerequisite: 140. (lower level)

4 units, Win (Chagoya, E)

**ARTSTUDI 148A. Lithography**

The classic technique of printing from limestones. Techniques to draw an image on the stone, etch and fix the image on the stone, and print it in numbered editions. Students work on a variety of stone sizes. Field trips to local publishers of lithography or lithography exhibitions. (lower level)

4 units, Spr (Kain, K)

**ARTSTUDI 148B. Introduction to Printmaking Techniques**

Techniques such as monotype, monoprint, photocopy transfers, linocut and woodcut, intaglio etching. Demonstrations of these techniques. Field trips to local print collections or print exhibitions. (lower level)

4 units, Aut (Kain, K)

**ARTSTUDI 149A. Printmaking Relief**

Various relief printmaking techniques explored with concentrated work in the processes of woodcut, linoleum cut and other related relief approaches. Students are exposed to contemporary practices in printmaking through visits to museums, print workshops, publishers, artists' studios, and other venues.

4 units, not given this year

**ARTSTUDI 151. Sculpture I**

Traditional and non-traditional approaches to sculpture production through working with materials including wood, metal, and plaster. Conceptual and technical skills, and safe and appropriate use of tools and materials. Impact of material and technique upon form and content; the physical and expressive possibilities of diverse materials. Historical and contemporary forming methods provide a theoretical basis for studio work. Field trips; guest lecturers.

4 units, Aut (Arcega, M), Win (Arcega, M)

**ARTSTUDI 153. Ecology of Materials**

Studio-based sculpture course. Materials used in sculpture and environmental concerns surrounding them. Artists concerned with environmental impact and the interconnection of art with other fields. The impact of material and technique upon form and content; understanding the physical and expressive possibilities of diverse materials. Conceptual and technical considerations. Group discussions, critiques, readings, video presentations, a field trip to a local artist-in-residence program, and visiting lecturers. (lower level)

4 units, not given this year

**ARTSTUDI 154. Kinetic Sculpture**

This course was developed in conjunction with Lively Arts and SICA to bring students in closer dialogue with artists working interdisciplinary on collaborative projects. Students will work with visiting artist Trimpin, a MacArthur Genius, in the design and construction of collaborative kinetic projects. The kinetic sculptures created in class will be used for Trimpin's installation and performance work *The Gurs Zyklus* (The Gurs Cycle), a world premiere, at Memorial Auditorium in May. Students use both the Sculpture Lab facilities and the PRL. Engineers, Sculptors, Artists, Majors and Non-majors are welcome. (lower level)

4 units, not given this year

**ARTSTUDI 155. Social Sculpture**

Collect real time data via sensors to create artistic interventions. Focus is on art in the public sphere, in the landscape with references to cultural or social context. Articulation of artistic concepts is through site specific work and public interventions. Quick prototypes of sensors are created through *Cycling74's* (MAX/MSP/Jitter) visual programming environment.

4 units, not given this year

**ARTSTUDI 160. Design I : Fundamental Visual Language**

Formal elements of visual expression (color, composition, space, and process) through hands-on projects. Two- and three-dimensional media. Emphasis is on originality and inventiveness. Content is realized abstractly. Centered in design; relevant to visual art study and any student seeking to develop visual perception. (lower level)

3-4 units, Aut (Edmark, J), Win (Edmark, J), Spr (Edelman, J)

**ARTSTUDI 161. Catalysts for Design**

Nature and science as sources of design inspiration. Projects in natural pattern formation, biological growth and form, Fibonacci numbers and the golden section, planar and spatial symmetry, mechanics, chaos, and fractals. Emphasis is on importance of creative synthesis to the design process. Projects take the form of

physical constructions as opposed to renderings or computer models. Field trips. (lower level)

3-4 units, not given this year

**ARTSTUDI 166. Design in Motion**

Design areas for which movement and transformation are essential. Experimentation with mechanical means such as linking, hinging, inflating, and rotating. Projects in lighting, automata, tools and utensils, chain reactions, toys and games, festival props, and quasi-architecture emphasize the creation of works in which motion is a significant agent for aesthetic gratification. No experience in mechanical engineering required. (lower level)

3-4 units, not given this year

**ARTSTUDI 167. Introduction to Animation**

Projects in animation techniques including flipbook, cutout/collage, stop-motion such as claymation, pixilation, and puppet animation, rotoscoping, and time-lapse. Films. Computers used as post-production tools, but course does not cover computer-generated animation. (lower level)

3-4 units, not given this year

**ARTSTUDI 169. Professional Design Exploration**

Six to eight mature projects are stimulated by weekly field trips into significant areas of design activity or need. (upper level)

4 units, not given this year

**ARTSTUDI 170. Introduction to Photography**

Critical, theoretical, and practical aspects of creative photography through camera and lab techniques. Field work. Cantor Art Center and Art Gallery exhibitions. 35mm camera required. (lower level)

4 units, Aut (Felzmann, L), Win (Felzmann, L), Spr (Felzmann, L), Sum (Staff)

**ARTSTUDI 177. Video Art I**

Students create experimental video works. Conceptual, formal, and performance-based approaches to the medium. The history of video art since the 70s and its influences including experimental film, television, minimalism, conceptual art, and performance and electronic art. Topics: camera technique, lighting, sound design, found footage, cinematic conventions, and nonlinear digital editing. (lower level)

4 units, Aut (Barber, J)

**ARTSTUDI 178. Art and Electronics**

Analog electronics and their use in art. Basic circuits for creating mobile, illuminated, and responsive works of art. Topics: soldering; construction of basic circuits; elementary electronics theory; and contemporary electronic art. (lower level)

4 units, Win (Wight, G)

**ARTSTUDI 179. Digital Art I**

Contemporary electronic art focusing on digital media. Students create works exploring two- and three-dimensional, and time-based uses of the computer in fine art. History and theoretical underpinnings. Common discourse and informative resources for material and inspiration. Topics: imaging and sound software, web art, and rethinking the computer as interface and object. (lower level)

4 units, Aut (Wight, G), Spr (Barber, J)

**ARTSTUDI 180. Color**

Hands-on study of color to develop color sensitivity and the ability to manipulate color to exploit its expressive potential. Guided experimentation and observation. Topics include color relativity, color and light, color mixing, color harmony, and color and content. (lower level)

3-4 units, not given this year

**ARTSTUDI 184A. Along the Track of the Yellowstone****Hotspot: Fusion of Art and Science**

(Same as BIO 122) The 20-million-year-old track of the Yellowstone hotspot through western North America, using the field setting to investigate ecology, evolution, and geology through an aesthetic and documentary media lens. Students create: experiential ways to learn about the natural world; a scientific yet personal intimacy about how ecosystems work and how they change; and ways to convey their observations to the public. Required trip to Yellowstone National Park.

4 units, not given this year

**ARTSTUDI 230. Interdisciplinary Art Survey**

The diversity of artistic concepts and strategies; artists who use the

different media taught in the department's studio program such as painting, drawing, video and digital art, printmaking, photography, and sculpture. Field trips to local museums and collections, artists studios, and libraries. Student research. Priority to Art Studio majors and minors. (upper level)

*4 units, Win (Holberton, R)*

#### **ARTSTUDI 239. INTERMEDIA WORKSHOP**

(Same as MUSIC 155, MUSIC 255) Students develop and produce intermedia works. Musical and visual approaches to the conceptualisation and shaping of time-based art. Exploration of sound and image relationship. Study of a wide spectrum of audiovisual practices including experimental animation, video art, dance, performance, non-narrative forms, interactive art and installation art. Focus on works that use music/sound and image as equal partners. Limited enrollment. Prerequisites: consent of instructors, and one of FILMPROD 114, ARTSTUDI 131, 138, 167, 177, 179, or MUSIC 123, or equivalent.

*3-4 units, Win (DeMarinis, P; Kapuscinski, J)*

#### **ARTSTUDI 240. Drawing II**

Intermediate/advanced. Observation, invention, and construction. Development of conceptual and material strategies, with attention to process and purpose. May be repeated for credit. Prerequisite: 140 or consent of instructor. (upper level)

*4 units, Spr (Staff)*

#### **ARTSTUDI 245. Painting II**

Symbolic, narrative, and representational self-portraits. Introduction to the pictorial strategies, painting methods, and psychological imperatives of Dürer, Rembrandt, Cézanne, Kahlo, Beckmann, Schiele, and Munch. Students paint from life, memory, reproductions, and objects of personal significance to create a world in which they describe themselves. May be repeated for credit. Prerequisites: 140, 145, or consent of instructor. (upper level)

*4 units, Win (Xie, X), Spr (Chagoya, E)*

#### **ARTSTUDI 246. Individual Work: Drawing and Painting**

Prerequisites: two quarters of painting or drawing and consent of instructor.

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff)*

#### **ARTSTUDI 247. Collage**

The generative principles of this characteristic 20th-century art form. Along with assemblage (its three dimensional equivalent) and montage (its counterpart in photography, film, and video), collage introduced crucial aesthetic issues of the modern and postmodern eras. Typically, collage creates an expressive visual language through juxtaposition and displacement, and through materiality, difference, and event. Issues of location (where it happens), object (what it is), process (how it is realized), and purpose (why it is). Prerequisites: 140, 145, or consent of instructor. (upper level)

*4 units, not given this year*

#### **ARTSTUDI 249. Advanced Undergraduate Seminar**

Capstone experience for majors in Studio Art. Interdisciplinary. Methods of research, crossmedia critiques, and strategies for staging and presenting work. Guest artists from the Bay Area. (upper level)

*3-4 units, Spr (Bell, C)*

#### **ARTSTUDI 250. Individual Work: Sculpture**

May be repeated for credit.

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **ARTSTUDI 252. Sculpture II**

Builds upon 151. Installation and non-studio pieces. Impact of material and technique upon form and content; the physical and expressive possibilities of diverse materials. Historical and contemporary forming methods provide a theoretical basis for the studio work. Field trips; guest lecturers. (upper level)

*4 units, not given this year*

#### **ARTSTUDI 260. Design II: The Bridge**

The historical spectrum of design including practical and ritual. The values and conceptual orientation of visual fundamentals. Two- and three-dimensional projects grouped to relate design theory to application, balancing imaginative and responsible thinking. Prerequisite: ARTSTUDI 60. Corequisite: ME 203 (upper level)

*3-4 units, Win (Edmark, J), Spr (Edmark, J)*

#### **ARTSTUDI 261. Individual Work: Design**

May be repeated for credit.

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff)*

#### **ARTSTUDI 262. The Chair**

Students design and fabricate a highly refined chair. The process is informed and supported by historical reference, anthropometrics, form studies, user testing, material investigations, and workshops in fiberglass molding, wood steam-bending, plywood forming, metal tube bending, TIG & MIG welding, upholstery & sewing. Prerequisites: ARSTUDI 160 and ME 203, or consent of instructor. (upper level)

*4 units, Spr (Edmark, J)*

#### **ARTSTUDI 263. Paper**

Beyond conventional use of paper as a foundation for mark making to its potential as a medium in its own right. Students experiment with papers to develop facility with techniques of folding, scoring, curling, cutting, tearing, piercing, embossing, layering, and binding to create three-dimensional forms, patterned/textured surfaces, reliefs, interactive dynamic structures such as pop-ups, containers, and book forms. (upper level)

*3-4 units, Aut (Edmark, J)*

#### **ARTSTUDI 265. Design for Exploration**

A collaboration with the Exploratorium in San Francisco. Students investigate and experiment with all aspects of the creation of interactive museum exhibits. On-site exhibit floor sessions and prototyping workshops. Lectures from museum staff on exhibit design. Students design and construct exhibits for temporary placement on the floor of the Exploratorium. Prerequisites: ME 203 or consent of instructor. (upper level)

*3-4 units, not given this year*

#### **ARTSTUDI 268. Design Synthesis**

Mature semi-elective problems in composite and multimedia design areas. May be repeated for credit. Prerequisites: two design courses above 160. (upper level)

*4-6 units, not given this year*

#### **ARTSTUDI 269. Advanced Creative Studies**

Seminar based on elective design projects in areas of individual specialization. May be repeated for credit. Prerequisite: consent of instructor. (upper level)

*1-15 units, not given this year*

#### **ARTSTUDI 270. Advanced Photography Seminar**

Student continues with own work, showing it in weekly seminar critiques. May be repeated for credit. (upper level)

*1-5 units, Win (Leivick, J), Spr (Leivick, J)*

#### **ARTSTUDI 271. The View Camera: Its Uses and Techniques**

For students of photography who wish to gain greater control and refine skills in image making. 4x5 view cameras provided. Enrollment limited to 8. (upper level)

*4 units, Win (Leivick, J)*

#### **ARTSTUDI 272. Alternative Processes**

Priority to advanced students. Technical procedures and the uses of primitive and hand-made photographic emulsions. Enrollment limited to 10. Prerequisites: 70, 170, 270, or consent of instructor. (upper level)

*4 units, Spr (Leivick, J)*

#### **ARTSTUDI 272. Individual Work: Photography**

Student continues with own work, showing it in weekly seminar critiques. May be repeated for credit.

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff)*

#### **ARTSTUDI 273. Individual Work: Digital Media**

May be repeated for credit.

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff)*

#### **ARTSTUDI 274. Individual Work: Digital Art**

May be repeated for credit.

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff)*

#### **ARTSTUDI 275. Introduction to Digital Photography and Visual Images**

Students use Adobe Lightroom to organize and edit images, manipulate and correct digital files, print photographs, create slide shows, and post to the Internet. How to use digital technology to concentrate on visual thinking rather than darkroom techniques.

(upper level)

4 units, Aut (Dawson, R), Spr (Dawson, R)

### ARTSTUDI 276. The Photographic Book

Grouping and sequencing photographic images to produce a coherent body of work with a thematic structure. (lower level)

4 units, Spr (Felzmann, L)

### ARTSTUDI 277. Projects in Photography

Students pursue a topic of their own definition. Further exploration of darkroom and other printing techniques; contemporary theory and criticism. (lower level)

4 units, Aut (Felzmann, L), Win (Felzmann, L)

### ARTSTUDI 277A. Video Art II

Advanced. Video, criticism, and contemporary media theory investigating the time image. Students create experimental video works, addressing the integration of video with traditional art media such as sculpture and painting. Nonlinearity made possible by Internet and DVD-based video. Prerequisite: 177 or consent of instructor. (upper level)

4 units, not given this year

### ARTSTUDI 279A. Digital Art II

Advanced. Interactive art works using multimedia scripting software. Experimental interfaces, computer installation work, and mobile technologies. Contemporary media art theory and practice. (upper level)

4 units, not given this year

### ARTSTUDI 284. Art and Biology

The relationship between biology and art. Rather than how art has assisted the biological sciences as in medical illustration, focus is on how biology has influenced art making practice. New technologies and experimental directions, historical shifts in artists' relationship to the living world, the effects of research methods on the development of theory, and changing conceptions of biology and life. Projects address these themes and others that emerge from class discussions and presentations. (upper level)

4 units, Spr (Wight, G)

### ARTSTUDI 285. Topics in Media Studies: Street Media

Literal and figurative meanings of street and how they provide potential to media technologies and invite innovative forms of artistic practice. Contemporary art as the juncture where street movements and new media collide. Small projects. (upper level)

4 units, not given this year

## GRADUATE COURSES IN ART STUDIO

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### ARTSTUDI 310A. Directed Reading: Studio

1-15 units, Aut (Staff)

### ARTSTUDI 310B. Directed Reading: Studio

1-15 units, Win (Staff)

### ARTSTUDI 310C. Directed Reading: Studio

1-15 units, Spr (Staff)

### ARTSTUDI 342. MFA Project: Studio

Two weekly seminars, studio practice, and individual tutorials. Object seminar: student work is critiqued on issues of identity, presentation, and the development of coherent critical language. Concept seminar: modes of conceptualization to broaden the base of cognitive and generative processes. May be repeated for credit.

1-15 units, Aut (DeMarinis, P), Win (Chagoya, E), Spr (Xie, X)

### ARTSTUDI 360A. Master's Project: Design

Students enroll concurrently in ME 316. Over the course of the year, students create and present two master's theses involving the synthesis of aesthetics and technological concerns in the service of human need and possibility.

2-4 units, Aut (Franceschini, A; McDougall, M)

### ARTSTUDI 360B. Master's Project: Design

Students enroll concurrently in ME 316. Over the course of the year, students create and present two master's theses involving the synthesis of aesthetics and technological concerns in the service of human need and possibility.

2-4 units, Win (Franceschini, A)

### ARTSTUDI 360C. Master's Project: Design

Students enroll concurrently in ME 316. Over the course of the year, students create and present two master's theses involving the synthesis of aesthetics and technological concerns in the service of human need and possibility.

2-4 units, Spr (Franceschini, A)

### ARTSTUDI 801. TGR Project

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## ASIAN AMERICAN STUDIES (ASNAMST) COURSES

### UNDERGRADUATE COURSES IN ASIAN AMERICAN STUDIES

Primarily for undergraduates; graduate students may enroll with consent of adviser.

### ASNAMST 59. Introduction to Asian American History

(Same as HISTORY 59) (Same as HISTORY 159. History majors and others taking 5 units, register for 159.) The historical experience of people of Asian ancestry in the U.S. Immigration, labor, community formation, family, culture and identity, and contemporary social and political controversies. Readings: interpretative texts, primary material, and historical fiction. GER:DB-SocSci, EC-AmerCul

3 units, Aut (Chang, G)

### ASNAMST 74N. Race and Ethnicity in Contemporary

#### American Fiction: Boundaries and Border Crossings

(Same as ENGLISH 74N) The question of place and locality in studies of identity and racial formation. Goal is to engage and examine texts with a critical eye both toward the social contexts represented and to the imaginative aesthetic techniques that American writers of color offer to bring their fictional worlds to life. Theme of border hopping and boundary crossing in works by authors including Charles Johnson, Toni Morrison, Alejandro Morales, Julie Otsuka, Stephen Graham Jones, and Lan Samantha Chang. GER:DB-Hum

3 units, not given this year

### ASNAMST 100C. EAST House Seminar: Current Issues and Debates in Education

(Same as EDUC 100C) Education and Society Theme (EAST) House seminar. In fall quarter, faculty from around the University discuss the latest issues and research related to education. In winter quarter, current issues in international and comparative education, particularly in developing countries, are explored. In the spring, the seminar revolves around race and ethnicity, political activism, and higher education. Through an examination of these topics, students are able to share and develop their varied interests in educational research, policy, and practice.

1 unit, Spr (Wotipka, C)

### ASNAMST 112. Public Archaeology: Market Street Chinatown Archaeology Project

(Same as ANTHRO 112, ANTHRO 212) This internship-style course centers on the practice and theory of historical archaeology research and interpretation through a focused study of San Jose's historic Chinese communities. The course includes classroom lectures, seminar discussion, laboratory analysis of historic artifacts, and participation in public archaeology events. Course themes include immigration, urbanization, material culture, landscape, transnational identities, race and ethnicity, gender, cultural resource management, public history, and heritage politics. The course includes required lab sections, field trips, and public service. Transportation will be provided for off-site activities.

2-5 units, Aut (Voss, B), Win (Voss, B), Spr (Voss, B)

### ASNAMST 144. Transforming Self and Systems: Crossing Borders of Race, Ethnicity, Gender, Sexuality, and Class

(Same as CSRE 144) An exploration of crossing borders within ourselves, and between *us* and *them* through the following questions: How is understanding the self tied to understanding others? What does the *personal is political* mean for us? How can our personal identity struggles have meaning beyond the self?

How does *synergistic consciousness* move us toward meaning, balance, connectedness, and wholeness? What knowledge comes from the heart? How does self healing lead to community healing? Can *victims* claim agency? How does contemplation lead to action? What is a narrative construction of reality? In a learning community, we will engage these questions through group process, journaling, reading, drama, creative writing, and storytelling.

5 units, Spr (Murphy-Shigematsu, S)

**ASNAMST 146S. Asian American Culture and Community**

(Same as AMSTUD 146, COMPLIT 146, CSRE 146S) An examination of the history of Asians in America via one case history: the International Hotel in San Francisco. Background history of Asians in America, and the specifics of the I Hotel case as involving the convergence of global and local economies, urban redevelopment, and housing issues for minorities. Focus on the convergence of community and cultural production. Service learning component involving community work at the Manilatown Heritage Foundation in San Francisco. Service Learning Course (certified by Haas Center). GER:DB-Hum

5 units, Spr (Palumbo-Liu, D)

**ASNAMST 159. Introduction to Contemporary Asian American Poetry**

This course will introduce students to contemporary Asian American poetry, from the birth of an Asian American panethnic identity in the 1960s to the present. We will track shared themes in these works from the relationship between cultural assimilation and language acquisition, to representations of feelings of exile and alienation between *home* and *host* countries. We will read works by Lawson Inada, Theresa Cha, Marilyn Chin, Li-Young Lee, John Yau, Myung Mi Kim, and others.

5 units, Win (Staff)

**ASNAMST 161. Asian American Immigration and Health**

Employing a critical medical anthropological approach, this course focuses on the health of Asian and Pacific Islander immigrants to the United States. This course explores the construction of the Asian immigrant in biomedical discourse and governmental policies. Beginning with an historical study of Asian immigrants as feared sources of disease and contagion, this course addresses the impact of immigration status, language, health beliefs, gender, age, and definitions of community on health programs and policies.

3-5 units, Aut (Lee, S)

**ASNAMST 173S. Transcultural and Multiethnic Lives: Contexts, Controversies, and Challenges**

(Same as AFRICAAM 173S, CSRE 173S) Lived experience of people who dwell in the border world of race and nation where they negotiate transcultural and multiethnic identities and politics. Comparative, historical, and global contexts such as family and class. Controversies, such as representations of mixed race people in media and multicultural communities. What the lives of people like Tiger Woods and Barack Obama reveal about how the marginal is becoming mainstream.

5 units, not given this year

**ASNAMST 179. Asian American Experiences and Documentary Practice**

(Same as FILMSTUD 279, CSRE 179) Focus is on documentary cinema as a technology for understanding Asian Americans in the U.S. The social and historical context of the formation of the Asian American filmmaker, an authorial position that emerges in the 60s and 70s as part of the civil rights movement. Works include films by Loni Ding, Bob Nakamura and Curtis Choy; readings about the establishment of Asian American media industries and Asian American film criticism as a multi-genre. Social issue documentaries that represent new ethnographies of social experience including transnational adoption (Daughter From Danang), refugee experience (AKA Don Bonus), and sex tourism (The Women Outside). Readings include analyses of the implications of these works for cinema studies, ethnic studies, and the politics of film in everyday life. Experimental documentaries and their interrogation of the limits of the documentary form in representing identities and social problems. How does representation matter within and for Asian America GER:DB-Hum

5 units, not given this year

**ASNAMST 185A. Race and Biomedicine**

(Same as ANTHRO 185A) Race, identity, culture, biology, and

political power in biomedicine. Biological theories of racial ordering, sexuality and the medicalization of group difference. Sources include ethnography, film, and biomedical literature. Topics include colonial history and medicine, the politics of racial categorization in biomedical research, the protection of human subjects and research ethics, immigration health and citizenship, race-based models in health disparities research and policy, and recent developments in human genetic variation research.

3-5 units, not given this year

**ASNAMST 187. Geography, Time, and Trauma in Asian American Literature**

(Same as AMSTUD 261A, ENGLISH 261A) The notion that homes can be stable locations for cultural, racial, ethnic, and similarly situated identity categories. The possibility that there really is no place like home for Asian American subjects. How geography, landscape, and time situate traumas within fictional Asian American narratives.

5 units, not given this year

**ASNAMST 188. Gender and Sexuality in Asian American Literature**

(Same as AMSTUD 261F, ENGLISH 261F) How writers and representations dialogue, challenge, resist, and complicate such formative constructions of gendered/sexual identities. How queer Asian Americans face *multiple negations* that include potential expulsion from their own families and from various communities. Authors include Bharati Mukherjee, Russell Leong, Suki Kim, Shawn Wong, Louis Chu, Lawrence Chua, Catherine Liu, Jessica Hagedorn, Timothy Liu, Shani Mootoo, David Mura, among others. Secondary readings will include literary criticism, feminist and queer theory.

5 units, not given this year

**ASNAMST 200R. Directed Research**

May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**ASNAMST 200W. Directed Reading**

(Staff)

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

**ASNAMST 295F. Race and Ethnicity in East Asia**

(Same as HISTORY 295F, HISTORY 395F) Historical, cultural, political and theoretical perspectives. Commonly misunderstood as an ethnically homogeneous country, the People's Republic of China is home to 55 officially recognized minority groups, many of whom inhabit the strategic border regions of the country. How similar assumptions of ethnic and racial homogeneity in Taiwan, Japan, and Korea are being reexamined by scholars in disciplines including anthropology, history, and political science. GER:DB-SocSci

4-5 units, Aut (Mullaney, T)

## ATHLETICS, PHYSICAL EDUCATION, AND RECREATION (ATHLETIC) COURSES

### UNDERGRADUATE COURSES IN ATHLETICS, PHYSICAL EDUCATION, AND RECREATION

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**ATHLETIC 1. Alcohol & Health in College Life**

This course centers on alcohol issues from both a health and psychological perspective focusing on college alcohol issues and concerns.

1 unit, Spr (Castro, R; Bowen, J)

**ATHLETIC 2. Abs and Glutes**

Lower body workout to strengthen glutes and thighs, and abdominal training. Fee. (AU)

1 unit, Aut (Conniff, N), Win (McWherter, B), Spr (Staff), Sum (Staff)

**ATHLETIC 3M. Aikido**

1 unit, Aut (Ghormley, T), Win (Ghormley, T), Spr (Ghormley, T)

**ATHLETIC 4C. Archery Club Team**

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. (AU) (Staff)

1 unit, Aut (Mahlow, P), Win (Mahlow, P), Spr (Mahlow, P)

**ATHLETIC 10. Band, Sports Activity**

(AU)

1 unit, Aut (Aquilanti, G), Win (Aquilanti, G), Spr (Aquilanti, G)

**ATHLETIC 12V. Baseball, Varsity Men**

(AU)

1-2 units, Aut (Marquess, M; Stotz, D), Win (Marquess, M; Stotz, D), Spr (Marquess, M; Stotz, D)

**ATHLETIC 14V. Basketball, Varsity Men**

(AU)

1-2 units, Aut (Dawkins, J), Win (Dawkins, J)

**ATHLETIC 15V. Basketball, Varsity Women**

(AU)

1-2 units, Aut (VanDerveer, T), Win (VanDerveer, T)

**ATHLETIC 18. Strengthening the Heart through Compassion**

This course is sponsored by Stanford's Center for Compassion and Altruism Research and Education (CCARE). The intent is to cultivate self-care, resilience and the strength to make a difference in the world based on a systematic approach to compassion meditation practices. Meditation, group discussions, real world applications and current research will be explored.

1 unit, Aut (Hanson, M), Win (Staff), Spr (Mcgonigal, K; Hanson, M)

**ATHLETIC 20M. Capoeira Club**

1 unit, Aut (Ghormley, T), Win (Ghormley, T), Spr (Ghormley, T)

**ATHLETIC 22C. Competitive Cheer Club**

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member.

1 unit, Aut (Mahlow, P), Win (Mahlow, P)

**ATHLETIC 23. Core Training**

Exercises to build muscular strength and body core endurance, focusing on balance and stability. Equipment includes stability and medicine balls. Fee. (AU)

1 unit, Aut (Conniff, N), Win (Conniff, N), Spr (Conniff, N), Sum (Staff)

**ATHLETIC 25V. Crew, Varsity Men**

(AU)

1-2 units, Aut (Amerkhanian, C), Win (Amerkhanian, C), Spr (Amerkhanian, C)

**ATHLETIC 26V. Crew, Varsity Women**

(AU)

1-2 units, Aut (Farooq, Y), Win (Farooq, Y), Spr (Farooq, Y)

**ATHLETIC 27. Cross Training Fitness**

Cross training fitness class will focus on combining different types of exercises to work the body as a whole to develop cardiovascular fitness, strength and power. All fitness levels are welcome. Class sessions will include exercises such as: indoor cycling, plyometrics, rowing, jump rope, circuit training, and various other exercises.

1 unit, Aut (Ninow, A; Stevenson, T; White, C)

**ATHLETIC 28V. Cross Country, Varsity Men**

(AU)

1-2 units, Aut (Dunn, J)

**ATHLETIC 29V. Cross Country, Varsity Women**

(AU)

1-2 units, Aut (Dunn, J)

**ATHLETIC 30. Cycling: Indoor**

Get a fantastic cardio workout on our stationary bikes. All levels and abilities welcome. Instructors motivate participants through intervals, hill climbs and coasts for the ultimate workout.

1 unit, Aut (McWherter, B), Spr (McWherter, B)

**ATHLETIC 31C. Cycling Club Team**

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. (AU)

1 unit, Aut (Mahlow, P), Win (Mahlow, P), Spr (Mahlow, P)

**ATHLETIC 33. Diving, Springboard**

Basic techniques and mechanics of springboard and platform diving. Five basic categories of dives will be introduced: front, back, inward, reverse and twist. Competitive aspects of diving. Fee.

1 unit, Aut (Schavone, R)

**ATHLETIC 34V. Diving, Varsity Men**

(AU)

1-2 units, Aut (Schavone, R), Win (Schavone, R), Spr (Schavone, R)

**ATHLETIC 35V. Diving, Varsity Women**

(AU)

1-2 units, Aut (Schavone, R), Win (Schavone, R), Spr (Schavone, R)

**ATHLETIC 37C. Equestrian Club Team**

(AU)

1 unit, Aut (Bartsch, V), Win (Bartsch, V), Spr (Bartsch, V)

**ATHLETIC 38M. Eskrima**

1 unit, Aut (Ghormley, T), Win (Ghormley, T), Spr (Ghormley, T)

**ATHLETIC 39. Fencing: Beginning**

The sport of swordmanship develops quick hands, strong legs, and a strategic mind. Footwork, handwork, and bouting. Emphasis is on foil technique. All equipment provided. Fee. (AU)

1 unit, Aut (Lepeshinski, A; Posthumus, E), Win (Posthumus, E; Naulo, V)

**ATHLETIC 40. Fencing, Intermediate**

Continuation of 39; learn advanced footwork and handwork. Strategy and bouting. Introduction to epee and saber. All equipment provided. Prerequisite: 39. Fee. (AU)

1 unit, Win (Posthumus, E; Lepeshinski, A), Spr (Pogossoff, G; Posthumus, E)

**ATHLETIC 41V. Fencing, Varsity Men**

(AU)

1-2 units, Aut (Posthumus, E), Win (Posthumus, E), Spr (Posthumus, E)

**ATHLETIC 42V. Fencing, Varsity Women**

(AU) (Milgram)

1-2 units, Aut (Posthumus, E), Win (Posthumus, E), Spr (Posthumus, E)

**ATHLETIC 43. Futsal**

Futsal is a variant of soccer that is played on a smaller playing surface and mainly played indoors. Soccer greats such as Kaka, Ronaldo, Ronaldinho, Marta and Messi grew up playing Futsal and credit it for developing their incredible skills. Learn quick reflexes, fast thinking and pin-point passing. With five-a-side play and a special low bounce ball, Futsal will improve your game through its intense pace and rapid execution.

1 unit, Spr (Danielson, S; Cota, P)

**ATHLETIC 45. Field Hockey, Indoor**

Learn the game and rule of indoor field hockey

1 unit, Win (Danielson, S; Cota, P)

**ATHLETIC 46. Field Hockey, Intermediate**

For those with prior experience. Techniques, skills, and strategy.

Scrimmages and game-like scenarios. Fee. (AU)

*1 unit, not given this year*

**ATHLETIC 47V. Field Hockey, Varsity Women**  
(AU)

*1-2 units, Aut (Danielson, T), Spr (Danielson, T)*

**ATHLETIC 48V. Football, Varsity**  
(AU)

*1-2 units, Aut (Shaw, D; Miraglia, T), Spr (Shaw, D)*

**ATHLETIC 49. Golf for Women: Beginning**

Fundamentals of the golf swing: putting, chipping and sand play. Golf etiquette and rules. Fee.

*1 unit, Win (O'Connor, C; Marshall-Imrie, K)*

**ATHLETIC 51. Golf: Beginning**

Fundamentals of the golf swing; putting, chipping, and sand play. Golf etiquette and rules. Fee. (AU)

*1 unit, Aut (Miller, J), Win (Miller, J), Spr (Marrone, P), Sum (Staff)*

**ATHLETIC 52. Golf: Advanced Beginning**

Further development of the golf swing and short game. How to practice. Rules and etiquette. Prerequisite: 51 or golf experience. Fee. (AU)

*1 unit, Aut (Flippo, K), Win (Miller, J), Spr (Miller, J), Sum (Staff)*

**ATHLETIC 53. Golf: Intermediate**

Drills and practice on all facets of golf. How to lower scores and manage the game on the course. Prerequisite: 52 or equivalent. Fee. (AU)

*1 unit, Aut (Flippo, K), Win (Acosta, E), Spr (Marrone, P), Sum (Staff)*

**ATHLETIC 54. Golf: Advanced**

Goal is to refine the golf swing and increase power, distance, and accuracy. Course management, mental preparation, visualization techniques. Prerequisites: 53 or experience playing and practicing, and the ability to hit shots with relative accuracy and distance. Fee. (AU)

*1 unit, Aut (Gingell, T), Win (Ray, C; Rowe, P), Spr (Miller, J)*

**ATHLETIC 55V. Golf, Varsity Men**

(AU)

*1-2 units, Aut (Ray, C), Win (Ray, C), Spr (Ray, C)*

**ATHLETIC 56V. Golf, Varsity Women**

AU

*1-2 units, Aut (O'Connor, C), Win (O'Connor, C), Spr (O'Connor, C)*

**ATHLETIC 58. Gymnastics: Beginning**

Fundamental gymnastics movement for men and women, including flexibility and strength exercises taught on the Olympic apparatus including floor, balance beam, bars, and rings. Fee. (AU)

*1 unit, Aut (Swircek, C), Win (Ter-Zakhariants, G), Spr (Yim, T)*

**ATHLETIC 59. Gymnastics: Intermediate**

For students who have completed 58 or have a background in gymnastics. Emphasis is on tumbling and somersaulting. Group work and individualized instruction for men and women. Limited apparatus work. Fee. (AU)

*1 unit, Aut (McClure, B), Win (Yim, T), Spr (McClure, B)*

**ATHLETIC 60V. Gymnastics, Varsity Men**

(AU)

*1-2 units, Aut (Glielmi, T), Win (Glielmi, T), Spr (Glielmi, T)*

**ATHLETIC 61V. Gymnastics, Varsity Women**

(AU)

*1-2 units, Aut (Smyth, K), Win (Smyth, K), Spr (Smyth, K)*

**ATHLETIC 63. Hip Hop**

Funky, jazzy, hip hop dance for fun and cardiovascular fitness. Fee. (AU)

*1 unit, Aut (Miller Bell, A; Navarro, L), Win (Miller Bell, A; Navarro, L), Spr (Miller Bell, A; Navarro, L), Sum (Staff)*

**ATHLETIC 65. Horsemanship: Beginning Riding**

No experience needed. Basic horsemanship and riding at the walk, trot and canter. Fee. (AU)

*1 unit, Aut (Bartsch, V), Win (Bartsch, V), Spr (Bartsch, V)*

**ATHLETIC 66. Horsemanship: Advanced Beginning Riding**

Horsemanship and horse care; the canter and basic jumping.

Prerequisite: 65 or equivalent. Fee. (AU)

*1 unit, Aut (Bartsch, V), Win (Bartsch, V), Spr (Bartsch, V)*

**ATHLETIC 67. Horsemanship: Intermediate Riding**

Basic veterinary skills and barn management. Riding at all gaits and completing horsemanship patterns (Western) or jumping basic courses (English). Fee. Prerequisite: 66 or equivalent. (AU)

*1 unit, Aut (Bartsch, V), Win (Bartsch, V), Spr (Bartsch, V)*

**ATHLETIC 68. Horsemanship: Student Assistant**

(Bartsch)

*1 unit, Aut (Bartsch, V), Win (Bartsch, V), Spr (Bartsch, V)*

**ATHLETIC 69. Equine Guided Education**

EGE facilitates personal and professional development through specifically designed activities with horses. Identifying personal strengths and weaknesses, focusing on goals, and successful negotiating are among the topics explored. This course will provide an overview of the history and theory of EGE with exposure to EGE through hands-on exercises with horses. This is an un-mounted course. No experience needed. Fee.

*1 unit, Aut (Bartsch, V), Win (Staff), Spr (Staff)*

**ATHLETIC 70. Horsemanship**

This course explores the basics of horsemanship and provides the necessary foundation for beginning riding. Topics include, but are not limited to, general horse care, handling techniques, horse health and disease, and stable management. This is an un-mounted course. No experience needed. Fee.

*1 unit, Aut (Bartsch, V), Win (Staff), Spr (Staff)*

**ATHLETIC 70C. Horse Polo Club Team**

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. (AU)

*1 unit, Win (Mahlow, P), Spr (Mahlow, P)*

**ATHLETIC 72C. Ice Hockey Club Team**

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. Men (AU)

*1 unit, Aut (Mahlow, P), Win (Mahlow, P)*

**ATHLETIC 73M. JKA Shotokan Karate**

*1 unit, Aut (Ghormley, T), Win (Ghormley, T), Spr (Ghormley, T)*

**ATHLETIC 74C. Judo Club Team**

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. (AU)

*1 unit, Win (Mahlow, P), Spr (Mahlow, P)*

**ATHLETIC 75M. Jujitsu Self Defense**

*1 unit, Aut (Ghormley, T), Win (Ghormley, T), Spr (Ghormley, T)*

**ATHLETIC 76. Kickboxing**

High intensity cardio workout incorporating kicks, punches, and elbow/knee and other combinations inspired by martial arts and boxing. Fee. (AU)

*1 unit, Aut (Mandell, M), Win (Mandell, M), Spr (Mandell, M), Sum (Staff)*

**ATHLETIC 77C. Lacrosse Club Team (Men)**

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While

many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. (AU)

*1 unit, Win (Mahlow, P), Spr (Mahlow, P)*

#### **ATHLETIC 78M. Kenpo Karate**

*1 unit, Aut (Ghormley, T), Win (Ghormley, T), Spr (Ghormley, T)*

#### **ATHLETIC 78V. Lacrosse, Varsity Women (AU)**

*1-2 units, Aut (Bokker, A), Win (Bokker, A), Spr (Bokker, A)*

#### **ATHLETIC 79. WOMEN'S LACROSSE**

This is a lacrosse class geared towards the women's game. All levels are welcome to participate. If you do not have equipment it will be provided. You will need to bring your own mouth guard. We will be playing on artificial turf, sneakers or cleats are recommended.

*1 unit, Aut (McKenzie, B; Spencer, D)*

#### **ATHLETIC 80. Lifeguard Training**

Priority to those wanting to guard at Stanford during the year. Lifeguard characteristics and responsibilities, recognition of hazards and emergencies, patron and facility surveillance, interaction with the public, rescue skills. Community first aid and CPR for the professional rescuer. Fee. Prerequisite: pass swim test (swimmer/advanced swimmer level).

*2 units, Spr (Erdrich, M; Carpenter, R)*

#### **ATHLETIC 81M. Muay Thai**

*1 unit, Aut (Ghormley, T), Win (Ghormley, T), Spr (Ghormley, T)*

#### **ATHLETIC 82. Manager: Athletic Team**

For student managers of intercollegiate teams. Prerequisite: consent of respective varsity team head coach. (AU)

*1 unit, Aut (Staff), Win (Dawkins, J), Spr (Staff)*

#### **ATHLETIC 87. Learn to Row**

This class is an introduction to the sport of rowing using ergometer machines. The fundamentals of proper form, technique and workouts to develop cardiovascular fitness will be taught.

*1 unit, Aut (Farooq, Y)*

#### **ATHLETIC 88. Beginning Rowing for Women**

This class is an introduction to the sport of rowing using ergometer machines. The fundamentals of proper form, technique and workouts to develop cardiovascular fitness will be taught. If you are interested in trying out for the Women's Rowing team this is an excellent class to give you the basics.

*1 unit, not given this year*

#### **ATHLETIC 89. Rowing Ergometer**

Introduction to aerobic based training utilizing rowing machines. Rowing, core, flexibility and VO2 expansion training. Fee.

*1 unit, Aut (Davis, M), Win (Staff)*

#### **ATHLETIC 90. Pilates Mat**

Balanced sequence of exercises emphasizing grace and balance. Breath work and precision separate Pilates from traditional conditioning methods. Fee. (AU)

*1 unit, Aut (Conniff, N), Win (Conniff, N), Spr (Conniff, N)*

#### **ATHLETIC 91C. Rugby Club Team (Men)**

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. (AU)

*1 unit, Aut (Mahlow, P; Arena, D), Win (Sherman, M), Spr (Sherman, M)*

#### **ATHLETIC 92C. Rugby Club Team (Women) (AU)**

*1 unit, Aut (Sherman, M), Win (Griffin, P), Spr (Griffin, P)*

#### **ATHLETIC 95. Running at Stanford**

Develop a training plan to meet your running goals. Proper form, warm ups, cool downs. Middle distance and distance workouts to meet your running goals.

*1 unit, Win (Staff)*

#### **ATHLETIC 98. Sailing, Beginning**

Skills, theory, and techniques to enable beginners to sail with confidence in small centerboard boats. Fee. (AU)

*1 unit, Aut (Ruzicka-Hayes, C), Spr (Ustach, F)*

#### **ATHLETIC 99. Sailing, Advanced Beginning**

Continuation of ATHLETIC 98. For those with some sailing experience but not yet ready for intermediate sailing. Fee. May be repeated for credit. Prerequisites: ATHLETIC 98 or consent of instructor.

*1 unit, Aut (O'Bryan, M), Spr (O'Bryan, M)*

#### **ATHLETIC 100. Sailing, Intermediate**

Refine skills. Introduction to racing. Prerequisite: ATHLETIC 99 or consent of instructor. Fee. (AU)

*1 unit, Spr (O'Bryan, M)*

#### **ATHLETIC 104V. Sailing, Varsity Men (AU)**

*1-2 units, Aut (Vandemoer, J), Win (Vandemoer, J), Spr (Vandemoer, J)*

#### **ATHLETIC 105V. Sailing, Varsity Women (AU)**

*1-2 units, Aut (Vandemoer, J), Win (Vandemoer, J), Spr (Vandemoer, J)*

#### **ATHLETIC 107C. Ski Club Team**

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. (AU)

*1 unit, Win (Mahlow, P)*

#### **ATHLETIC 109. Social Dance, Beginning**

Introduction to modern ballroom partner dancing. We'll cover steps, styling, technique, and rhythms in the five most popular social ballroom dances: Waltz, Foxtrot, Tango, Rumba, Cha-Cha. No experience or partner necessary. Fee.

*1 unit, Aut (Greer, K), Win (Greer, K), Spr (Greer, K)*

#### **ATHLETIC 112. Soccer: Intermediate/Advanced**

For the player with club or high school experience. Small group offensive and defensive tactics. Drills and small-sided games. Fee.

*1 unit, Spr (Becerra, R; Cooney, J)*

#### **ATHLETIC 113. Soccer: Indoor, Beginning/Intermediate**

For those with little or no playing experience. Skills, rules, small sided games. Fee. (AU)

*1 unit, Win (Cooney, J; Becerra, R)*

#### **ATHLETIC 114. Soccer, Indoor: Intermediate/Advanced**

Smaller ball and playing area. Emphasis is on individual ball skills through small sided games. Fee. (AU)

*1 unit, Win (Cooney, J)*

#### **ATHLETIC 115. Soccer: Advanced for Men**

Techniques under pressure; small group and team tactics. Fitness for the soccer player. Prerequisites: consent of instructor, tryouts. Fee. (AU)

*1 unit, Win (Simon, B)*

#### **ATHLETIC 116. Soccer: Advanced for Women**

Techniques under pressure; small group and team tactics. Fitness for the soccer player. Prerequisites: consent of instructor, tryouts. Fee. (AU)

*1 unit, Win (Ratcliffe, P)*

#### **ATHLETIC 118V. Soccer, Varsity Men (AU)**

*1-2 units, Aut (Simon, B), Spr (Simon, B)*

#### **ATHLETIC 119V. Soccer, Varsity Women (AU)**

*1-2 units, Aut (Ratcliffe, P), Spr (Ratcliffe, P)*

#### **ATHLETIC 121V. Softball, Varsity Women (AU)**

*1-2 units, Aut (Rittman, J), Win (Rittman, J), Spr (Rittman, J)*

**ATHLETIC 122. Spin Bike Cross Training**

Aerobic based expansion utilizing spin bikes. Emphasis on volume work rather than anaerobic training. Heart rate monitoring, core, flexibility and nutrition information for more efficient fueling. Fee.

*1 unit, Aut (Amerkhanian, C), Win (Petrakis, M; Simkin, D)*

**ATHLETIC 123. Squash, Beginning/Intermediate**

Techniques, rules and practice matches. Racquets, balls, and eye guards provided. Limited enrollment. Fee.

*1 unit, Aut (Talbot, M), Win (Talbot, M), Spr (Talbot, M)*

**ATHLETIC 124SI. Sport and Disability**

This class will provide an introduction to both the practical and theoretical sides of adaptive athletics. Students will gain an understanding of various adaptive sports, the social situation surrounding disabled athletes, and the concerns and issues that are specific to adaptive athletics. Students will also have the opportunity to volunteer for an adaptive recreation program in the community, watch a the documentary Murderball, and participate in a hands-on wheelchair basketball sports clinic.

*1 unit, Aut (Schoemaker, L), Spr (Odiaga, A; Schoemaker, L; Clauss, L; Brown, M)*

**ATHLETIC 125C. Squash Club Team (Men)**

(AU)

*1 unit, Aut (Talbot, M), Win (Talbot, M), Spr (Talbot, M)*

**ATHLETIC 126V. Squash, Varsity Women**

(AU)

*1-2 units, Aut (Talbot, M), Win (Talbot, M), Spr (Talbot, M)*

**ATHLETIC 128. Swimming: Overcome Fear of Water**

Overcome fear and discomfort in water. Learn to be comfortable and in control in both shallow and deep water. Feel balanced in water. Learn how water works and how your body works in water. If time permits, introduction to front crawl.

*1 unit, Aut (Lonaker, S), Spr (Lonaker, S)*

**ATHLETIC 129. Swimming: Beginning**

For non-swimmers or those who can swim about 10 yards but are not comfortable in deep water. Safety skills, front crawl, and back stroke. Additional strokes introduced as ability warrants. Fee. (AU)

*1 unit, Aut (Neuhold-Huber, Z), Spr (Lonaker, S), Sum (Staff)*

**ATHLETIC 130. Swimming: Advanced Beginning**

For those with limited swimming and safety skills. Safety skills, crawl, and elementary backstroke or back crawl. Introduction to sidestroke and breaststroke. Increase time and distance of swim. Prerequisite: ability to swim 25-50 yards on front and back. Fee. (AU)

*1 unit, Aut (Neuhold-Huber, Z), Win (Neuhold-Huber, Z), Spr (Neuhold-Huber, Z), Sum (Staff)*

**ATHLETIC 131. Swimming: Intermediate**

Crawl, elementary backstroke, backstroke, and sidestroke. Safety skill work as needed. Introduction to or review of breaststroke. Open turns. Introduction to butterfly, flip turn, and conditioning. Prerequisites: crawl, elementary backstroke, backstroke; some sidestroke and breaststroke; ability to swim approximately 100-200 yards continuously by mixing strokes. Fee. (AU)

*1 unit, Aut (Neuhold-Huber, Z), Win (Neuhold-Huber, Z), Spr (Whildin, S), Sum (Staff)*

**ATHLETIC 132. Swimming: Advanced**

Review and refine all basic strokes and safety skills. Introduction to or review of butterfly and flip turn. Stroke drills and information on conditioning and designing individual workouts. Prerequisite: average to good strokes; ability to swim approximately 400-500 yards continuously. Fee. (AU)

*1 unit, Aut (Tanner, J)*

**ATHLETIC 133. Swim Conditioning**

Improve cardio-respiratory endurance through directed swimming workouts. Technique corrections as needed. Prerequisite: advanced swimmer. Fee. (AU)

*1 unit, Aut (Kenney, A), Win (Bokker, A), Spr (Knapp, T)*

**ATHLETIC 134. Synchronized Swimming, Beginning**

Basic skills and techniques. Prerequisite: intermediate to advanced swimming skills. Fee. (AU)

*1 unit, Aut (Lowe, S), Spr (Lowe, S)*

**ATHLETIC 135V. Swimming, Synchronized: Varsity**

(AU)

*1-2 units, Aut (Olson, H), Win (Olson, H; Lowe, S), Spr (Olson, H; Lowe, S)*

**ATHLETIC 136V. Swimming, Varsity Men**

(AU)

*1-2 units, Aut (Kenney, A), Win (Kenney, A), Spr (Kenney, A)*

**ATHLETIC 137V. Swimming, Varsity Women**

(AU)

*1-2 units, Aut (Maurer, L), Win (Maurer, L), Spr (Maurer, L)*

**ATHLETIC 138. Table Tennis: Intermediate/Advanced**

This class is intended for players who have experience playing table-tennis including those who have taken the beginning table-tennis class. Students should have prior experience in countering, looping, chopping, and serving.

*1 unit, Spr (Shodhan, S)*

**ATHLETIC 139. Table Tennis**

Basic counters, topspins, and chops with both the forehand and backhand. Serve and return, emphasizing game situations and match play. All equipment provided. Fee.

*1 unit, Aut (Shodhan, S), Win (Shodhan, S)*

**ATHLETIC 140. Taiji Quan (Tai Chi)**

Taiji Quan (Tai Chi) is a Chinese martial arts system of slow meditative physical exercise designed for relaxation, balance and health. All levels are welcome.

*1 unit, Aut (Zhang, H), Win (Zhang, H), Spr (Zhang, H)*

**ATHLETIC 141C. Tae Kwon Do Club Team**

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. (AU)

*1 unit, Aut (Ghormley, T), Win (Ghormley, T)*

**ATHLETIC 143C. Tennis Club Team**

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. (AU)

*1 unit, Aut (Mahlow, P)*

**ATHLETIC 144. Tennis: Beginning**

Forehand, backhand, serve, and net play; rules and scoring. (AU)

*1 unit, Aut (Coupe, B), Win (Gould, A), Spr (Sarsfield, T), Sum (Staff)*

**ATHLETIC 145. Tennis: Low Intermediate**

Fundamental strokes and their use in a game situation. Prerequisites: 144, or knowledge of rules and scoring and average ability in fundamental strokes but limited playing experience. Fee. (AU)

*1 unit, Aut (Thornton, M), Win (Gould, A), Spr (Sarsfield, T), Sum (Staff)*

**ATHLETIC 146. Tennis: Intermediate**

Fundamental stroke review. Singles and doubles tactics. Prerequisites: 145 or average ability in fundamental strokes, and regular playing experience; NTRP rating of 3.0 or equivalent. (AU)

*1 unit, Aut (Glielmi, T), Win (Gould, A), Spr (Sarsfield, T), Sum (Staff)*

**ATHLETIC 147. Tennis: Advanced**

Drills emphasize footwork, serve and return, approach shots, volleys, lobs, and overheads. Strategy for competition in singles and doubles. Prerequisites: above average stroking and game playing ability; NTRP rating above 4.0 or equivalent. (AU)

*1 unit, Aut (Brennan, F), Win (Gould, A), Spr (Sarsfield, T), Sum (Staff)*

**ATHLETIC 148V. Tennis, Varsity Men**

(AU)

1-2 units, Aut (Whitlinger, J), Win (Whitlinger, J), Spr (Whitlinger, J)

#### **ATHLETIC 149V. Tennis, Varsity Women**

(AU)

1-2 units, Aut (Forood, L), Win (Forood, L), Spr (Forood, L)

#### **ATHLETIC 151. Total Body Workout**

For all fitness levels; tone and strengthen the entire body. Different equipment used to target all major muscle groups. (AU)

1 unit, Aut (Mandell, M), Win (McWherter, B), Spr (Staff), Sum (Staff)

#### **ATHLETIC 153V. Track and Field, Varsity Men**

(AU)

1-2 units, Aut (Floreal, E), Win (Floreal, E), Spr (Floreal, E)

#### **ATHLETIC 154V. Track and Field, Varsity Women**

(AU)

1-2 units, Aut (Floreal, E), Win (Floreal, E), Spr (Floreal, E)

#### **ATHLETIC 156C. Triathlon Club Team**

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. (AU)

1 unit, Aut (Mahlow, P), Win (Mahlow, P), Spr (Mahlow, P)

#### **ATHLETIC 158C. Ultimate Frisbee Club Team (Men)**

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. (AU)

1 unit, Aut (Mahlow, P), Win (Mahlow, P), Spr (Mahlow, P)

#### **ATHLETIC 159C. Ultimate Frisbee Club Team (Women)**

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. (AU) (Staff)

1 unit, Aut (Mahlow, P), Win (Mahlow, P), Spr (Mahlow, P)

#### **ATHLETIC 162. Volleyball**

Drills to improve skills and game playing strategy. As ability indicates, more emphasis on team play and strategy. Fee. (AU)

1 unit, Aut (Price, A)

#### **ATHLETIC 164. Volleyball: Intermediate Sand**

Further development of skills and rules. Strategy in two- and four-person sand volleyball. Fee. (AU)

1 unit, Aut (Shibuya, K), Spr (Shaw, D)

#### **ATHLETIC 165. Volleyball: Advanced Sand**

Refine and improve skills and game playing strategy in two- and four-person sand volleyball. Must have strong skills and general knowledge of team concepts. Prerequisite: 164 or consent of the instructor. Fee. (AU)

1 unit, Aut (Shibuya, K), Spr (Shaw, D)

#### **ATHLETIC 166V. Volleyball, Varsity Men**

(AU)

1-2 units, Aut (Kosty, J), Win (Kosty, J), Spr (Kosty, J)

#### **ATHLETIC 167V. Volleyball, Varsity Women**

(AU)

1-2 units, Aut (Dunning, J), Win (Dunning, J), Spr (Dunning, J)

#### **ATHLETIC 168C. Volleyball Club Team**

This credit is offered to returning members of the specified Club Sports team. All enrollees must complete 21 hours of participation with the team and meet any other team requirements during the quarter. This is NOT a PE class or credit for beginners. While many teams are open to beginners joining, the credit is offered to

returning athletes committed to the team for the year. If you are new to the team, please look to register for the credit in future quarters once you are committed as a team member. (AU)

1 unit, Win (Staff)

#### **ATHLETIC 169. Water Polo: Beginning**

Introduction to basic skills and game play. For those who have never played or have had limited experience. Fee. (AU)

1 unit, Spr (Barnea, J)

#### **ATHLETIC 170. Water Polo: Intermediate/Advanced**

Further work on skills. Game strategies. Fee. (AU)

1 unit, Aut (Ortwein, S), Spr (Barnea, J)

#### **ATHLETIC 171V. Water Polo, Varsity Men**

(AU)

1-2 units, Aut (Vargas, J), Win (Vargas, J), Spr (Vargas, J)

#### **ATHLETIC 172V. Water Polo, Varsity Women**

(AU)

1-2 units, Aut (Tanner, J), Win (Tanner, J; Ortwein, S), Spr (Tanner, J; Ortwein, S)

#### **ATHLETIC 174. Weight Training: Beginning**

Improve fitness level through progressive resistance exercises using machines and free weights. Individualized weight training programs once basic exercises are learned. Stretching program. Basics of exercise physiology. Fee. (AU)

1 unit, Aut (Amundson, C), Spr (Tirapelle, A)

#### **ATHLETIC 176. Weight Training for Women**

All levels welcome, but designed for the beginner. Techniques and equipment for weight training. Emphasis is on stretching, proper form and progressions, and injury prevention. The basics of the physiology of strength training and planning individual programs. Fee. (AU)

1 unit, Aut (Amundson, C)

#### **ATHLETIC 177. Circuit Aerobic Weight Training**

A full-body conditioning workout with weight lifting and aerobic components. Weight training equipment organized into a circuit to maximize workout intensity in a short amount of time. Fee. (AU)

1 unit, Aut (Murphy, G), Win (Murphy, G), Spr (Murphy, G)

#### **ATHLETIC 178M. Wing Chun Kung Fu**

1 unit, Aut (Ghormley, T), Win (Ghormley, T), Spr (Ghormley, T)

#### **ATHLETIC 179. Wrestling and Introduction to Mixed Martial Arts (MMA)**

While primarily focusing on the basic techniques of collegiate wrestling, some non-striking forms of MMA, such as Brazilian jiu-jitsu and submission grappling, will be covered throughout the quarter.

1 unit, Spr (Blake, R)

#### **ATHLETIC 180V. Wrestling, Varsity**

(AU)

1-2 units, Aut (Borrelli, J), Win (Borrelli, J), Spr (Borrelli, J)

#### **ATHLETIC 181M. Wushu**

1 unit, Aut (Ghormley, T), Win (Ghormley, T), Spr (Ghormley, T)

#### **ATHLETIC 182. Yoga**

Mind, body, and spirit meet in yoga. Increase flexibility and restore health to the body. Fee. (AU)

1 unit, Aut (Carlow, A), Win (Carlow, A), Spr (Carlow, A), Sum (Staff)

#### **ATHLETIC 184. Yoga/Pilates Fusion**

Combination of power and restorative yoga with strength building Pilates exercises. Fee.

1 unit, Aut (Conniff, N), Win (Conniff, N), Spr (Conniff, N), Sum (Staff)

#### **ATHLETIC 186. Zumba**

Zumba combines Latin rhythms with cardiovascular exercise to create an aerobic routine. Interval and resistance training to maximize caloric output, fat burning, and total body toning. (AU)

1 unit, Aut (Piccolo, A), Win (Piccolo, A), Spr (Piccolo, A), Sum (Staff)

#### **ATHLETIC 187. Analysis of Human Movement**

Overview of skeletal and muscular anatomy. The mechanical principles of movement as related to efficient performance in

aquatics, dance, and sports.

2-4 units, *Win (Wilson, C)*

### **ATHLETIC 189. Business Practices in Sport**

Planning and management of intercollegiate sports and recreation. Elements of business contracts, finance, facility development, legal issues, risk management, human resources, security, and operations and event management. How an athletic and recreation department is organized. Career opportunities in sports and recreation administration.

2 units, *Spr (Purpur, R)*

### **ATHLETIC 190. Introduction to Nutrition**

How to optimize nutrition for health and performance. Topics include macronutrients, fad diets, sugar addiction, low-calorie sweeteners, caloric restriction, disease prevention, and nutrition.

1-2 units, *Aut (Wilson, C), Spr (Wilson, C), Sum (Staff)*

### **ATHLETIC 193. Lifestyle Fitness Challenge**

Lifestyle Fitness Challenge is a fun and engaging class. The students participate in a variety of exercises that include a focus on cardiovascular fitness, muscular strength and flexibility. They learn simple and easy ways to incorporate fun exercise into their weekly routines. Through presentations that cover everything from dealing with stress to back stretches, students learn more about their overall health, gaining a greater awareness about themselves and their bodies. The positive effects of this class definitely go beyond the experience that students have in the classroom and lead to lifelong changes for better health.

2 units, *Aut (Spanier, J), Win (Spanier, J; Selig, S), Spr (Spanier, J; Jordan, J)*

### **ATHLETIC 195. Mind, Body, Spirit**

Spiritual features of everyday life primarily from a psychological perspective with a focus on health. Topics include cultivating gratitude, forgiveness, life purpose, and kindness; mind/body/spirit solutions to everyday problems. Meditation and other stress management practices.

2 units, *Spr (Luskin, F)*

### **ATHLETIC 196. HAPPINESS**

Guided practice in research proven methods of creating more happiness in your life. Simple strategies for finding the good, becoming more peaceful, improving relationships and appreciating yourself.

1 unit, *Aut (Luskin, F; Pertofsky, C), Spr (Pertofsky, C; Luskin, F; Maguglin, K; Crane, S)*

### **ATHLETIC 197. Sport Psychology**

Basic theories in psychology which have the greatest influence on sport performance. Motivation, anxiety reduction, personality and self esteem, motor learning theories and sociological aspects and their influence on performance and learning.

2 units, *Spr (Schavone, R)*

### **ATHLETIC 199. Sports Nutrition with Clinical Applications**

The central theme of this course is to see how the mechanisms by which nutrition positively impacts sports performance relates to the mechanisms of health and disease. Grading is based on class participation (1 unit) or term papers and presentations (2 units) There are no prerequisites for this class, but up to a dozen students are allowed to take the course for 2 units (discussed at the first class meeting) and they should have a background that enables them to engage in an upper division discussion of nutrition. This would include having taken Hum Bio 130 or 135 (Human Nutrition or Exercise Physiology), Athletics 75 (my lower division course), Bio Core or similarly helpful courses. At the very least a student should take Hum Bio 130 or Ath 75 concurrent to taking Ath 123. Limit of 12 students taking the class for 2 credits, students must talk with instructor on first day.

1-2 units, *Spr (Wilson, C)*

### **ATHLETIC 331. Rock Climbing 1 - Introduction to Rock Climbing**

Learn the basics of rock climbing, safety and equipment.

1 unit, *Aut (Sandlin, P), Win (Collins, N), Spr (Looper, K)*

### **ATHLETIC 332. Rock Climbing 2**

Rock Climbing 2 - Intermediate Climbing Technique. Are you interested in boosting your climbing? This course is designed to instruct students in efficient climbing movement techniques for various terrain, introduce basic training principles for improving

your climbing, and reinforce best safety practices for climbing and bouldering. This is a great course for individuals getting back into climbing and those continuing their climbing education. Join us! Prerequisite: Current Belay Certification at the Stanford Climbing Wall.

1 unit, *Aut (Sandlin, P), Win (Staff), Spr (Looper, K)*

### **ATHLETIC 333. Rock Climbing 3**

Rock Climbing 3 - Intermediate 2 and Learn to Lead combined. The Rock Climbing 3 course will focus on improving climbing technical skills including intermediate to advanced climbing technique, and an introduction to sport lead climbing. Students will be introduced to a variety of climbing skills and techniques for improving safety and efficiency while climbing including body positioning, efficient and controlled dynamic movement, proper lead clipping techniques, lead belaying techniques and catching lead falls, cleaning lead anchors and rappelling, and building basic sport climbing anchors from fixed protection. Students should have a minimum of one year prior climbing and top-rope belaying experience and be able to comfortably complete top-roped climbs of at least a 5.10a level of difficulty.

1 unit, *Aut (Sandlin, P), Win (Staff), Spr (Staff)*

### **ATHLETIC 340. Rock Climbing: Strength and Conditioning**

For experienced climbers to improve climbing skills and overall fitness through rock climbing exercises that center on focus, endurance, power-endurance, and power. Prerequisite: intermediate climbing class or equivalent or consent of instructor. Fee. (AU)

1 unit, *Aut (Sandlin, P), Win (Sandlin, P), Spr (Sandlin, P)*

### **ATHLETIC 342. Rock Climbing Route Setting**

This class will introduce the route setting for rock climbing

1 unit, *Aut (Sandlin, P), Win (Sandlin, P), Spr (Sandlin, P)*

### **ATHLETIC 347. Aerial Fabrics 1**

Recreate Cirque du soleil acrobatics at a Climbing Wall aerial fabrics class

1 unit, *Aut (Granolund, K), Win (Staff), Spr (Panage, S)*

### **ATHLETIC 348. Aerial Fabrics 2**

Aerial Fabrics 2: Intermediate 1 Aerial silks is a circus art of strength, grace, and flexibility in which the performer climbs, poses, and drops through the air using suspended pieces of specialized fabric. This class continues where Aerial Fabrics 1 left off, developing the skill and comfort to really take flight in a routine. Students will work on advanced climbs and complex sequences, with an emphasis on drops. Each class will also include time spent on safety, stretching, and conditioning. Each student will have the opportunity to perform a routine at the end of the quarter. This class is designed for students who have already taken Aerial Fabrics 1 or can demonstrate mastery of the skills taught therein. Please note, for our most advanced students, we recommend taking the non-credit Intermediate II class that takes place after this one.

1 unit, *Aut (Finn, E), Win (Staff), Spr (Staff)*

### **ATHLETIC 405. Outdoor Leadership**

Skills needed to lead basic multi-day backpacking trips. Classroom sessions and wilderness trips. Topics include group dynamics and leadership, technical skills, and wilderness first aid. Class may require work over several quarters. See <http://www.stanford.edu/group/spot/training/>. (FORMERLY ATH 84)

1 unit, *Aut (Thompson, A), Win (Wright, P), Spr (Thompson, A)*

### **ATHLETIC 406. Outdoor Leadership Practicum**

Wilderness field portion of ATH 405 Outdoor Leadership. Skills needed to lead basic multi-day backpacking trips. See <http://www.stanford.edu/group/spot/training/>. You may contact SPOT with specific questions. PREREQ ATH 405 (Formerly ATH 84)

1 unit, *Aut (Thompson, A), Win (Wright, P), Spr (Wright, P)*

### **ATHLETIC 495. Outdoor Education: Assistant Instructor**

Formerly ATH 83--Assist Instructing Outdoor Education Courses. Instructor Approval and Defined Student Goals/Benchmarks Required Prior to instructing.

1 unit, *Aut (Thompson, A), Win (Fields, A), Spr (Fields, A)*

### **ATHLETIC 510. Wilderness First Aid**

Wilderness First Aid (WFA) is a class that provides a basic

introduction to backcountry and emergency medicine. Topics covered include patient assessment, addressing life threats, shock, spine safety, musculoskeletal injuries, medical emergencies, environmental emergencies, and more. Each weekly class short lectures and practical sessions. A 3-year certification card is provided by Stanford Wilderness Medicine (SWiM) upon successful completion of the course.

*1 unit, Aut (Thompson, A), Win (Schaub, M), Spr (Fields, A)*

#### **ATHLETIC 515. Wilderness First Responder**

Wilderness First Responder (WFR) is an intensive 80 hour class that focuses on basic life support techniques and tools for the outdoor professional working in the wilderness. It covers trauma, environmental and medical issues that arise in a wilderness setting using both lecture and hands-on activity of scenarios and labs for experiential education. Among other things, students will perform solid CPR and BLS skills, make improvised splints, understand basic anatomy and physiology, clean and manage wounds in the backcountry, recognize serious backcountry trauma injuries, environmental issues, medical issues, triage and know how to handle mass casualty incidents. Wilderness First Responder is a must for outdoor professionals looking to take their first aid skills to the next level, and to be prepared for medical emergencies in the wilderness. WFR certification lasts 3 years upon successful passing of written and practical exams. Course includes AEHS adult, child, and infant CPR cert

*2 units, Aut (Thompson, A), Win (Staff), Spr (Staff)*

#### **ATHLETIC 530. Climbing Wall Instructor**

The Professional Climbing Instructor's Association (PCIA) Climbing Wall Instructor (CWI) Course provides instructors with an in depth and standardized understanding of the skills essential to teaching climbing in an indoor setting. Emphasis on the importance of teaching technically accurate information & sound fundamental skills. (Formerly ATH 21)

*1 unit, Aut (Fields, A), Win (Fields, A), Spr (Staff)*

## BIOCHEMISTRY (BIOC) COURSES

### UNDERGRADUATE COURSES IN BIOCHEMISTRY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **BIOC 118Q. Genomics and Medicine**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Knowledge gained from sequencing human genomes and implications for medicine and biomedical research. Novel diagnoses and treatment of diseases, including stem cells, gene therapy and rational drug design. Personal genomics and how it is used to improve health and well being. Social and ethical implications of genetic information such as privacy, discrimination and insurability. Course Webpage: <http://biochem118.stanford.edu/>. GER:DB-EngrAppSci

*3 units, Win (Brutlag, D)*

#### **BIOC 158. Genomics, Bioinformatics and Medicine**

(Same as BIOC 258, HUMBIO 158G) Molecular basis of inherited human disease. Diagnostics approaches: simple Mendelian diseases and complex, multifactorial diseases. Genomics: functional genomics, epigenetics, gene expression, SNPs, copy number and other structural genomic variations involved in disease. Novel therapeutic methods: stem cell therapy, gene therapy and drug developments that depend on the knowledge of genomics. Personal genomics, pharmacogenomics, clinical genomics and their role in the future of preventive medicine. Prerequisites: BIO 41 or HUMBIO 2A or consent of instructor. Those with credit in BIOC 118 not eligible to enroll. Course webpage: <http://biochem158.stanford.edu/>

*4 units, Aut (Brutlag, D)*

#### **BIOC 199. Undergraduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### GRADUATE COURSES IN BIOCHEMISTRY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **BIOC 200. Applied Biochemistry**

Enrollment limited to MD candidates. Fundamental concepts of biochemistry as applied to clinical medicine. Topics include thermodynamics, enzyme kinetics, vitamins and cofactors, metabolism of carbohydrates, lipids, amino acids and nucleotides, and the integration of metabolic pathways. Clinical case studies discussed in small-group, problem-based learning sessions.

*1 unit, Aut (Cowan, T; Harbury, P; Theriot, J)*

#### **BIOC 201. Advanced Molecular Biology**

Literature-based lectures and discussion on rapidly developing frontiers in chromosome structure and function and modern insights into the control of gene expression. Emphasis is on experimental approaches and insights. Topics include chromosome organization, novel modes of transcriptional control, RNA-based mechanisms for controlling gene expression and emerging translational regulatory mechanisms. Prerequisite: undergraduate molecular biology.

*5 units, not given this year*

#### **BIOC 202. Biochemistry Bootcamp**

Open to first year Biochemistry students or consent of instructor. Hands-on, five-day immersion in biochemical methods and practice, theory and application of light microscopy, and computational approaches to modern biological problems.

*1 unit, Aut (Straight, A)*

#### **BIOC 205. Molecular Foundations of Medicine**

For medical students. Topics include DNA structure, replication, repair, and recombination; gene expression, including mechanisms for regulating transcription and translation; chromosome structure and function; gene cloning, protein engineering, and genomics. Patient presentations and journal clubs illustrate how molecular biology affects the practice of medicine.

*3 units, Aut (Chu, G; Krasnow, M)*

#### **BIOC 210. Advanced Topics in Membrane Trafficking**

The structure, function, and biosynthesis of cellular membranes and organelles. Current literature. Prerequisite: consent of instructor.

*3 units, Sum (Staff)*

#### **BIOC 215. Frontiers in Biological Research**

(Same as DBIO 215, GENE 215) Literature discussion in conjunction with the Frontiers in Biological Research seminar series in which investigators present current work. Students and faculty meet beforehand to discuss papers from the speaker's primary research literature. Students meet with the speaker after the seminar to discuss their research and future direction, commonly used techniques to study problems in biology, and comparison between the genetic and biochemical approaches in biological research.

*1 unit, Aut (Harbury, P; Villeneuve, A; Calos, M), Win (Harbury, P; Villeneuve, A; Calos, M)*

#### **BIOC 218. Computational Molecular Biology**

(Same as BIOMEDIN 231) Practical, hands-on approach to field of computational molecular biology. Recommended for molecular biologists and computer scientists desiring to understand the major issues concerning analysis of genomes, sequences and structures. Various existing methods critically described and strengths and limitations of each. Practical assignments utilizing tools described. All homework and coursework submitted electronically. Course webpage: <http://biochem218.stanford.edu/>.

*3 units, Aut (Brutlag, D), Win (Brutlag, D), Spr (Staff)*

#### **BIOC 220. Chemistry of Biological Processes**

(Same as CSB 220) The principles of organic and physical chemistry as applied to biomolecules. Goal is a working knowledge of chemical principles that underlie biological processes, and chemical tools used to study and manipulate biological systems. Prerequisites: organic chemistry and biochemistry, or consent of instructor.

*4 units, alternate years, not given this year*

#### **BIOC 221. The Teaching of Biochemistry**

Required for teaching assistants in Biochemistry. Practical experience in teaching on a one-to-one basis, and problem set

design and analysis. Familiarization with current lecture and text materials; evaluations of class papers and examinations. Prerequisite: enrollment in the Biochemistry Ph.D. program or consent of instructor.

3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### **BIOC 224. Advanced Cell Biology**

(Same as BIO 214, MCP 221) For Ph.D. students. Current research on cell structure, function, and dynamics. Topics include complex cell phenomena such as cell division, apoptosis, compartmentalization, transport and trafficking, motility and adhesion, differentiation, and multicellularity. Current papers from the primary literature. Prerequisite for advanced undergraduates: BIO 129A,B, and consent of instructor.

2-5 units, Win (Kopito, R; Nachury, M; Straight, A; Pfeiffer, S; Theriot, J)

### **BIOC 226. Interdisciplinary Approaches to Biochemistry: Single Molecule Biophysics to Clinical Outcomes**

Interdisciplinary analyses from basic biochemistry and biophysics to clinical outcomes of disease states and potential therapeutic interventions (translational research). Focus on cardiac system. Cardiomyopathies arise from missense mutations in cardiac muscle proteins, including the cardiac myosin motor. Single molecule biophysics and classical enzyme kinetics and use of induced pluripotent stem cells (iPS cells) and single cell studies lay foundation for discussions of effects of cardiomyopathy mutations on heart function. Potential therapeutic approaches discussed, including genetic analysis, DNA cloning, reconstitution of functional assemblies, x-ray diffraction and 3D reconstruction of electron microscope images, spectroscopic methods, computational approaches, single molecule biophysics, use of induced pluripotent stem cells in research, and other interdisciplinary approaches. Current papers examined. Prerequisites: basic biochemistry.

3 units, not given this year

### **BIOC 230. Molecular Interventions in Human Disease**

For M.D. students who intend to declare a concentration in molecular basis of medicine, MSTP students, and Ph.D. students. Advanced medical biochemistry focusing on cases where molecular-level research has led to new medical treatments or changes in the understanding of important diseases. Different topics each week explore the underlying molecular basis of a variety of diseases and the reasons for success and failure in molecular approaches to treatment. Student-led discussions dissect papers from the primary medical and scientific research literature.

2-3 units, not given this year

### **BIOC 236. Biology by the Numbers: Evolution**

(Same as APPPHYS 236) Topics in biology from a quantitative perspective. Subjects vary. 2011-12 focus: evolution, from basic principles of evolutionary dynamics to fundamental quantitative questions that are far from being answered; from early life, metabolic processes, and molding of earth by microbes to spread of human epidemics; from analysis of genomes and molecular phylogenies to aspects of multi-cellular development. Prerequisites: Familiarity with ordinary differential equations and probability. Biology background not required.

3 units, Spr (Fisher, D), alternate years, not given next year

### **BIOC 241. Biological Macromolecules**

(Same as BIOPHYS 241, SBI0 241) The physical and chemical basis of macromolecular function. Forces that stabilize biopolymers with three-dimensional structures and their functional implications. Thermodynamics, molecular forces, structure and kinetics of enzymatic and diffusional processes, and relationship to their practical application in experimental design and interpretation. Biological function and the level of individual molecular interactions and at the level of complex processes. Case studies in lecture and discussion of classic and current literature. Enrollment limited to 30. Prerequisites: None; background in biochemistry and physical chemistry preferred but material available for those with deficiency; undergraduates with consent of instructor only.

3-5 units, Aut (Herschlag, D; Ferrell, J; Puglisi, J; Block, S; Weis, W; Garcia, K)

### **BIOC 257. Currents in Biochemistry**

Seminars by Biochemistry faculty on their ongoing research. Background, current advances and retreats, general significance,

and tactical and strategic research directions.

1 unit, Aut (Spudich, J)

### **BIOC 258. Genomics, Bioinformatics and Medicine**

(Same as BIOC 158, HUMBIO 158G) Molecular basis of inherited human disease. Diagnostics approaches: simple Mendelian diseases and complex, multifactorial diseases. Genomics: functional genomics, epigenetics, gene expression, SNPs, copy number and other structural genomic variations involved in disease. Novel therapeutic methods: stem cell therapy, gene therapy and drug developments that depend on the knowledge of genomics. Personal genomics, pharmacogenomics, clinical genomics and their role in the future of preventive medicine. Prerequisites: BIO 41 or HUMBIO 2A or consent of instructor. Those with credit in BIOC 118 not eligible to enroll. Course webpage: <http://biochem158.stanford.edu/>

4 units, Aut (Brutlag, D)

### **BIOC 298. Biochemistry Consulting Service**

Students are presented with requests for advice from faculty and students in the biological sciences and Medical School encountering experimental and analytical problems in their research. Students work with the instructor and other biochemistry faculty to propose solutions. May be repeated for credit.

3 units, not given this year

### **BIOC 299. Directed Reading in Biochemistry**

Prerequisite: consent of instructor. (Staff)

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### **BIOC 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### **BIOC 399. Graduate Research and Special Advanced Work**

Allows for qualified students to undertake investigations sponsored by individual faculty members.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### **BIOC 459. Frontiers in Interdisciplinary Biosciences**

(Same as BIO 459, BIOE 459, CHEMENG 459, CHEM 459, PSYCH 459) Students register through their affiliated department; otherwise register for CHEMENG 459. For specialists and non-specialists. Sponsored by the Stanford BioX Program. Three seminars per quarter address scientific and technical themes related to interdisciplinary approaches in bioengineering, medicine, and the chemical, physical, and biological sciences. Leading investigators from Stanford and the world present breakthroughs and endeavors that cut across core disciplines. Pre-seminars introduce basic concepts and background for non-experts. Registered students attend all pre-seminars; others welcome. See <http://biox.stanford.edu/courses/459.html>. Recommended: basic mathematics, biology, chemistry, and physics.

1 unit, Aut (Robertson, C), Win (Robertson, C), Spr (Robertson, C)

### **BIOC 801. TGR Project**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### **BIOC 802. TGR Dissertation**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## BIOENGINEERING (BIOE) COURSES

### UNDERGRADUATE COURSES IN BIOENGINEERING

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **BIOE 10N. Form and Function of Animal Skeletons**

(Same as ME 10N) Preference to freshmen. The biomechanics and mechanobiology of the musculoskeletal system in human beings and other vertebrates on the level of the whole organism, organ systems, tissues, and cell biology. Field trips to labs. GER:DB-

EngrAppSci

3 units, not given this year

**BIOE 41. Physical Biology of Macromolecules**

Principles of statistical physics, thermodynamics, and kinetics with applications to molecular biology. Topics include entropy, temperature, chemical forces, enzyme kinetics, free energy and its uses, self assembly, cooperative transitions in macromolecules, molecular machines, feedback, and accurate replication. Prerequisites: MATH 41, 42; CHEM 31A, B (or 31X); strongly recommended: PHYSICS 41, CME 100 or MATH 51, and CME 106; or instructor approval. Winter, Instructor: D. Fisher

4 units, Win (Fisher, D)

**BIOE 42. Physical Biology of Cells**

Principles of transport, continuum mechanics, and fluids, with applications to cell biology. Topics include random walks, diffusion, Langevin dynamics, transport theory, low Reynolds number flow, and beam theory, with applications including quantitative models of protein trafficking in the cell, mechanics of the cell cytoskeleton, the effects of molecular noise in development, the electromagnetics of nerve impulses, and an introduction to cardiovascular fluid flow. Prerequisites: CHEM 31A, B (or 31X), CME 100 or MATH 51, CS 106A, and PHYSICS 41; strongly recommended: CME 106; or instructor approval. 4 units, Spr (Huang, K)

4 units, Spr (Huang, K)

**BIOE 44. Fundamentals for Engineering Biology Lab**

Introduction to next-generation techniques in genetic, molecular, biochemical, and cellular engineering. Lab modules build upon current research including: gene and genome engineering via decoupled design and construction of genetic material; component engineering focusing on molecular design and quantitative analysis of experiments; device and system engineering using abstracted genetically encoded objects; and product development based on useful applications of biological technologies. Limited enrollment. Priority given to majors.

4 units, Aut (Endy, A; Shih, J)

**BIOE 45. Computational Modeling of Microbial Communities**

(Same as MI 245) Innovative new sequencing technologies are permitting the generation of massive amounts of sequence data and changing the way we think about and pursue biological questions. Coupled to these opportunities are tremendous challenges for biologists to grapple with the manipulation and analysis of large datasets and to address quantitative questions on a systems scale. The goal of this course is to provide biologists with basic computational tools and knowledge to confront large datasets in a quantitative manner. Students will learn basic programming skills in Matlab and Perl. Covered material will include: image analysis, bioinformatics algorithms, reaction-diffusion modeling, Monte Carlo algorithms, and population dynamics. Students will apply computational skills to a miniature research project studying the human microbiome or biofuel-related photosynthetic microbial communities. Spr 2012, (Huang, K., Sonnenburg, J., and Vora, T.)

4 units, Spr (Huang, K; Sonnenburg, J; Vora, T)

**BIOE 51. Anatomy for Bioengineers**

Fundamental human anatomy, spanning major body systems and tissues including nerve, muscle, bone, cardiovascular, respiratory, gastrointestinal, and renal systems. Explore intricacies of structure and function, and how various body parts come together to form a coherent and adaptable living being. Correlate clinical conditions and therapeutic interventions. Participate in lab sessions with predissected cadaveric material and hands-on learning to gain understanding of the bioengineering human application domain. Encourage anatomical thinking, defining challenges and opportunities for bioengineers.

4 units, Spr (Srivastava, S)

**BIOE 70Q. Medical Device Innovation**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Survey of innovative technologies and medical devices used in multiple medical specialties. Guest lecturers include Stanford Medical School physicians, entrepreneurs, and venture capitalists. Focus on how to identify clinical needs and design device solutions to address those needs. Fundamentals of starting a company. Field trips to local medical device companies and design house. No previous engineering training required.

3 units, Spr (Mandato, J; Pierce, R)

**BIOE 80. Introduction to Bioengineering**

(Same as ENGR 80) Overview of bioengineering focused on engineering analysis and design of biological systems. Topics include chemical properties of biological components, rates and equilibrium properties of biological reactions, cellular structure and communication, genetic programming of biological systems, and engineering balances and systems analysis. Application of these concepts to engineering biological systems for diverse areas, including health and medicine, biomanufacturing, and sustainability, is emphasized. Includes an introduction to MATLAB as a problem-solving tool and a team-based project emphasizing the responsible development of technologies. 4 units, Spr (Smolke) GER:DB-EngrAppSci

4 units, Spr (Smolke, C)

**BIOE 101. SYSTEMS BIOLOGY**

(Same as BIOE 210) Complex biological behaviors through the integration of computational modeling and molecular biology. Topics: reconstructing biological networks from high-throughput data and knowledge bases. Network properties. Computational modeling of network behaviors at the small and large scale. Using model predictions to guide an experimental program. Robustness, noise, and cellular variation. Prerequisites: CME 102; BIO 41, 42; or instructor approval.

4 units, Aut (Covert, M)

**BIOE 103. Systems Physiology and Design**

Biological and electrical design principles. Engineering tools used to electrically probe and model physiological systems. Basic and clinical excitable cell physiology. Topics: single-cell physiology (treatment of cells as bioelectrical devices, cable properties, ion channels and gradients, nonlinear dynamics of action potentials), network physiology and system design (neural networks, orderly recruitment of axons, Hebbian and spike timing-dependent plasticity), and excitable cell disease and interventions (major neurological and neuromuscular disease syndromes, neuromuscular simulation and surgical planning, electromagnetic stimulation instrumentation, optogenetics, tissue engineering). Prerequisites: MATH 41, 42; CME 102; PHY 41, 43; BIO 41, 42; or instructor approval.

4 units, Spr (Deisseroth, K)

**BIOE 123. Optics and Imaging**

Introduction to optical microscopy, lasers, and optical forces. Lens theory, diffraction, compound optics, aberration, gaussian optics, fluorescence spectroscopy, and optical trapping. Projects include building and testing optical microscope and optical tweezers. Win (Riedel-Kruse, I.) Limited enrollment. Priority given to majors.

4 units, Win (Riedel-Kruse, H; Quake, S)

**BIOE 131. Ethics in Bioengineering**

Bioengineering focuses on the development and application of new technologies in the biology and medicine. These technologies often have powerful effects on living systems at the microscopic and macroscopic level. They can provide great benefit to society, but they also can be used in dangerous or damaging ways. These effects may be positive or negative, and so it is critical that bioengineers understand the basic principles of ethics when thinking about how the technologies they develop can and should be applied. On a personal level, every bioengineer should understand the basic principles of ethical behavior in the professional setting. This course will involve substantial writing, and will use case-study methodology to introduce both societal and personal ethical principles, with a focus on practical applications. WIM for Bioengineering. Enrollment limited to 20; priority given to Bioengineering majors.

3 units, Spr (Altman, R)

**BIOE 141A. Biodesign Project I**

First of a two quarter series. Project and team-based experience in biological and biomedical technology design including need validation, design, and initial prototyping. Lectures (joint with ME 294) and team project time. This course is open only to students in the undergraduate Bioengineering program.

4 units, Aut (Yock, P; Srivastava, S; Smolke, C; Endy, A)

**BIOE 141B. Biodesign Project II**

Second of two quarter series. Team project work continues. Concepts are further developed through prototyping, testing and

validation. Strategies for regulatory, reimbursement and financing pathways.

4 units, Win (Srivastava, S; Yock, P; Smolke, C; Endy, A)

### **BIOE 161. Vertebrate Biology**

(Same as HUMBIO 185) Study of structure, function, evolution and behavior of vertebrate animals. Consideration of vertebrate origins and examination of classes of vertebrates. Physiology, morphology, behaviors and evolutionary relationships are treated in each vertebrate group, as these relate to overall evolutionary trends within vertebrates. Topics: swimming behaviors in sharks and bony fishes, olfaction and vision in fishes, sex determination in amphibians, reptiles, birds and mammals, navigation in sea turtles and birds, evolution and biomechanics of flight in pterosaurs birds and bats, vocalization in whales and birds, temperature adaptation in reptiles, birds and mammals.

3 units, Win (Porzig, E)

### **BIOE 191. Bioengineering Problems and Experimental Investigation**

Directed study and research for undergraduates on a subject of mutual interest to student and instructor. Prerequisites: consent of instructor and adviser. (Staff)

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## **GRADUATE COURSES IN BIOENGINEERING**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### **BIOE 210. SYSTEMS BIOLOGY**

(Same as BIOE 101) Complex biological behaviors through the integration of computational modeling and molecular biology. Topics: reconstructing biological networks from high-throughput data and knowledge bases. Network properties. Computational modeling of network behaviors at the small and large scale. Using model predictions to guide an experimental program. Robustness, noise, and cellular variation. Prerequisites: CME 102; BIO 41, 42; or instructor approval.

4 units, Aut (Covert, M)

### **BIOE 212. Introduction to Biomedical Informatics Research Methodology**

(Same as BIOMEDIN 212, CS 272, GENE 212) Hands-on software building. Student teams conceive, design, specify, implement, evaluate, and report on a software project in the domain of biomedicine. Creating written proposals, peer review, providing status reports, and preparing final reports. Guest lectures from professional biomedical informatics systems builders on issues related to the process of project management. Software engineering basics. Prerequisites: BIOMEDIN 210, 211, 214, 217 or consent of instructor.

3 units, Spr (Altman, R)

### **BIOE 214. Representations and Algorithms for Computational Molecular Biology**

(Same as BIOMEDIN 214, CS 274, GENE 214) Topics: introduction to bioinformatics and computational biology, algorithms for alignment of biological sequences and structures, computing with strings, phylogenetic tree construction, hidden Markov models, Gibbs Sampling, basic structural computations on proteins, protein structure prediction, protein threading techniques, homology modeling, molecular dynamics and energy minimization, statistical analysis of 3D biological data, integration of data sources, knowledge representation and controlled terminologies for molecular biology, microarray analysis, machine learning (clustering and classification), and natural language text processing. Prerequisites: programming skills; consent of instructor for 3 units.

3-4 units, Aut (Altman, R)

### **BIOE 220. Introduction to Imaging and Image-based Neuro Anatomy**

(Same as RAD 220) The physics of medical imaging and human neuroanatomy through medical images. Emphasis is on normal anatomy, contrast mechanisms, and relative strengths of each imaging modality. Labs reinforce imaging techniques and anatomy. Prerequisites: basic biology, physics.

3 units, Win (Pauly, K; Zaharchuk, G)

### **BIOE 222A. Multimodality Molecular Imaging in Living Subjects I**

(Same as RAD 222A) Focuses on instruments and chemistries for imaging of cellular and molecular processes in vivo. Basics of instrumentation physics, chemistry of molecular imaging probes, and an introduction to preclinical and clinical molecular imaging modalities.

4 units, Aut (Levin, C; Moseley, M)

### **BIOE 222B. Multimodality Molecular Imaging in Living Subjects II**

(Same as RAD 222B) Focuses on molecular probes that target specific disease mechanisms. The ideal characteristics of molecular probes; how to optimize their design for use as effective imaging reagents that target specific steps in biological pathways and reveal the nature of disease through noninvasive assays.

4 units, Win (Levin, C; Moseley, M)

### **BIOE 222C. Multimodality Molecular Imaging in Living Subjects III**

(Same as RAD 222C) Focuses on emerging chemistries and instruments that address unmet needs for improved diagnosis and disease management in cancer, neurological disease, cardiovascular medicine and musculoskeletal disorders. Objective is to identify problems or controversies in the field, and to resolve them through understanding the relevant primary literature.

4 units, Spr (Levin, C; Moseley, M)

### **BIOE 236. Biophysical Mechanisms of Innate Immunity**

Innate immunity provides the first line of defense against disease, both infections and cancer. Innate immune effector molecules such as host defense peptides are utilized and/or deployed by many cell types (leukocytes, macrophages, NK cells, keratinocytes, epithelial and endothelial cells) and work by biophysical mechanisms of action. Based on recent primary literature, course lectures will cover the evolution, structures, mechanisms, and physiological functions of innate immune effectors. Appropriate for students with a background in biochemistry, molecular/cellular biology, physics, and/or bioengineering.

3 units, Spr (Barron, A)

### **BIOE 244. Advanced Frameworks and Approaches for Engineering Integrated Genetic Systems**

Concepts and techniques for the design and implementation of engineered genetic systems. Topics covered include the quantitative exploration of tools that support (a) molecular component engineering, (b) abstraction and composition of functional genetic devices, (c) use of control and dynamical systems theory in device and systems design, (d) treatment of molecular noise, (e) integration of DNA-encoded programs within cellular chassis, (f) designing for evolution, and (g) the use of standards in measurement, genetic layout architecture, and data exchange. Prerequisites: CME104, CME106, CHEM 33, BIO41, BIO42, BIOE41, BIOE42, and BIOE44 (or equivalents), or permission of the instructors

4 units, Win (Endy, A; Smolke, C)

### **BIOE 260. Tissue Engineering**

(Same as ORTHO 260) Principles of tissue engineering and design strategies for practical applications for tissue repair. Topics include tissue components and dynamics, morphogenesis, stem cells, cellular fate processes, cell and tissue characterization, controlled drug and gene delivery, bioreactors, cell-materials interactions, and host integration. Present research proposal to solve a real life tissue engineering problem.

3 units, Spr (Staff)

### **BIOE 261. Principles and Practice of Stem Cell Engineering**

(Same as NSUR 261) Quantitative models used to characterize incorporation of new cells into existing tissues emphasizing pluripotent cells such as embryonic and neural stem cells. Molecular methods to control stem cell decisions to self-renew, differentiate, die, or become quiescent. Practical, industrial, and ethical aspects of stem cell technology application. Final projects: team-reviewed grants and business proposals.

3 units, not given this year

### **BIOE 280. Skeletal Development and Evolution**

(Same as ME 280) The mechanobiology of skeletal growth, adaptation, regeneration, and aging is considered from developmental and evolutionary perspectives. Emphasis is on the

interactions between mechanical and chemical factors in the regulation of connective tissue biology. Prerequisites: BIO 42, and ME 80 or BIOE 42.

*3 units, not given this year*

#### **BIOE 280. Skeletal Development and Evolution**

(Same as ME 280) The mechanobiology of skeletal growth, adaptation, regeneration, and aging is considered from developmental and evolutionary perspectives. Emphasis is on the interactions between mechanical and chemical factors in the regulation of connective tissue biology. Prerequisites: BIO 42, and ME 80 or BIOE 42.

*3 units, not given this year*

#### **BIOE 281. Biomechanics of Movement**

(Same as ME 281) Experimental techniques to study human and animal movement including motion capture systems, EMG, force plates, medical imaging, and animation. The mechanical properties of muscle and tendon, and quantitative analysis of musculoskeletal geometry. Projects and demonstrations emphasize applications of mechanics in sports, orthopedics, and rehabilitation.

*3 units, Win (Delp, S)*

#### **BIOE 282. Performance, Development, and Adaptation of Skeletal Muscle**

Fundamentals of skeletal muscle by study of classical and recent research articles. Emphasis on the interactions between mechanics, biology, and electrophysiology in skeletal muscle performance, development, adaptation, control, and disease. Lab activities explore research methods discussed in class. Limited Enrollment. Applications due Friday, September 16th by 5pm. Applications available at <http://bioe282.stanford.edu/>. Prerequisites: engineering or biology core coursework. Fall (Cromie, Liske, Steele, Delp)

*3 units, Aut (Delp, S)*

#### **BIOE 284B. Cardiovascular Bioengineering**

(Same as ME 284B) Continuation of ME/BIOE 284A. Integrative cardiovascular physiology, blood fluid mechanics, and transport in the microcirculation. Sensing, feedback, and control of the circulation. Overview of congenital and adult cardiovascular disease, diagnostic methods, and treatment strategies. Engineering principles to evaluate the performance of cardiovascular devices and the efficacy of treatment strategies.

*3 units, not given this year*

#### **BIOE 291. Principles and Practice of Optogenetics for Optical Control of Biological Tissues**

Principles and practice of optical control of biological processes (optogenetics), emphasizing bioengineering approaches. Theoretical, historical, and current practice of the field. Requisite molecular-genetic, optoelectronic, behavioral, clinical, and ethical concepts, and mentored analysis and presentation of relevant papers. Final projects of research proposals and a laboratory component in BioX to provide hands-on training. Contact instructor before registering.

*3 units, Aut (Deisseroth, K)*

#### **BIOE 300A. Molecular and Cellular Bioengineering**

The molecular and cellular bases of life from an engineering perspective. Analysis and engineering of biomolecular structure and dynamics, enzyme function, molecular interactions, metabolic pathways, signal transduction, and cellular mechanics. Quantitative primary literature. Prerequisites: CHEM 171 and BIO 41 or equivalents; MATLAB or an equivalent programming language.

*3 units, Aut (Bryant, Z)*

#### **BIOE 300B. Engineering Concepts Applied to Physiology**

This course focuses on engineering approaches to quantifying, modeling and controlling the physiology and pathophysiology of complex systems, from the level of individual cells to tissue, organ and multi-organ systems. Winter (Covert)

*3 units, Win (Covert, M)*

#### **BIOE 301A. Molecular and Cellular Engineering Lab**

Preference to Bioengineering graduate students. Practical applications of biotechnology and molecular bioengineering including recombinant DNA techniques, molecular cloning, microbial cell growth and manipulation, and library screening. Emphasis is on experimental design and data analysis. Limited enrollment. Corequisite: 300A. Fall (Cochran)

*2 units, Aut (Lin, M)*

#### **BIOE 301B. Clinical Needs and Technology**

Diagnostic and therapeutic methods in medicine. Labs include a pathology/histology session, pulmonary function testing, and the Goodman Simulation Center. Each student paired with a physician for observation of an operation or procedure. Final presentation. Limited enrollment. Corequisite: 300B.

*1 unit, Win (Feinstein, J)*

#### **BIOE 301C. Diagnostic Devices Lab**

Biomedical instruments and diagnostic devices. Emphasis is on comparing measurements with theoretical predictions. Labs include ECG, MRI, microfluidics, CT, and EEG. Prerequisites: 300B and 301B. Spring (Boahen)

*3 units, Spr (Boahen, K)*

#### **BIOE 310. Systems Biology**

(Same as CS 278, CSB 278) Experimental and computational approaches to the dissection of complex biological systems. Topics include network structure, non-linear dynamics, numerical modeling approaches, noise, and robustness. Topics are introduced in the context of recent papers from the primary literature.

*4 units, alternate years, not given this year*

#### **BIOE 311. Biophysics of Developmental Biology and Tissue Engineering**

This course introduces mathematical and physical modeling approaches for understanding multi-cellular systems relevant to developmental biologists and tissue engineers. Topics include: (Morphogen) gradients; reaction-diffusion systems (Turing patterns); visco-elastic aspects and forces in tissues; morphogenesis; coordinated gene expression, genetic oscillators and synchrony; genetic networks; self-organization, noise, robustness, and evolvability; symmetries, and scaling; implications for tissue engineering and regeneration. Students will be introduced to agent based modeling and to apply it to relevant multi-cellular systems. Prerequisites: BIOE 41, BIOE 42, or equivalent or instructor approval; previous knowledge in one programming language - ideally Matlab - is recommended. Aut (Riedel-Kruse, I.H.)

*2-3 units, Aut (Riedel-Kruse, H)*

#### **BIOE 331. Protein Engineering**

The design and engineering of biomolecules emphasizing proteins, antibodies, and enzymes. Combinatorial and rational methodologies, protein structure and function, and biophysical analyses of modified biomolecules. Clinically relevant examples from the literature and biotech industry. Prerequisite: basic biochemistry. Winter, Cochran

*3 units, Win (Cochran, J)*

#### **BIOE 332. Large-Scale Neural Modeling**

Large-scale models link cellular properties, columnar microcircuits, recurrent connectivity, and feedback projections to experimentally studied behaviors such as selective attention and working memory. Emphasis is on making experimentally testable predictions by exploring spike-based communication and biophysics-based computation. Work in teams of two to implement models from the literature and develop models of your own. Run models with up to a million neurons in real-time on a special-purpose simulation platform developed at Stanford (Neurogrid). Spring, (Boahen, K.)

*3 units, Spr (Boahen, K)*

#### **BIOE 333. Interfacial Phenomena and Bionanotechnology**

Control over and understanding of interfacial phenomena and colloidal science are the essential foundation of bionanotechnology. Key mathematical relationships derived by Laplace, Gibbs, Kelvin and Young are derived and explained, along with the thermodynamics of systems of large interfacial area. Forces controlling surface and interfacial phenomena and surfactant and biomacromolecule self-assembly are discussed. Protein folding/unfolding and aggregation, and nano- and microfluidics are elucidated in these terms. Students will gain insight into the interplay between physical and chemical properties of biomolecules. Spring, (Barron, A.)

*3 units, Spr (Staff)*

#### **BIOE 334. Engineering Principles in Molecular Biology**

The achievements and difficulties that exemplify the interface of theory and quantitative experiment. Topics include: bistability, cooperativity, robust adaptation, kinetic proofreading, analysis of

fluctuations, sequence analysis, clustering, phylogenetics, maximum likelihood methods, and information theory. Sources include classic papers.

3 units, Win (Huang, K)

### BIOE 335. Molecular Motors I

Physical mechanisms of mechanochemical coupling in biological molecular motors, using F1 ATPase as the major model system. Applications of biochemistry, structure determination, single molecule tracking and manipulation, protein engineering, and computational techniques to the study of molecular motors.

3 units, Win (Bryant, Z)

### BIOE 355. Advanced Biochemical Engineering

(Same as CHEMENG 355) Combines biological knowledge and methods with quantitative engineering principles. Quantitative review of biochemistry and metabolism; recombinant DNA technology and synthetic biology (metabolic engineering). The production of protein pharmaceuticals as a paradigm for the application of chemical engineering principles to advanced process development within the framework of current business and regulatory requirements. Prerequisite: CHEMENG 181 (formerly 188) or BIOSCI 41, or equivalent.

3 units, Win (Swartz, J)

### BIOE 361. Biomaterials in Regenerative Medicine

(Same as MATSCI 381) Materials design and engineering for regenerative medicine. How materials interact with cells through their micro- and nanostructure, mechanical properties, degradation characteristics, surface chemistry, and biochemistry. Examples include novel materials for drug and gene delivery, materials for stem cell proliferation and differentiation, and tissue engineering scaffolds. Prerequisites: undergraduate chemistry, and cell/molecular biology or biochemistry.

3 units, not given this year

### BIOE 370. Microfluidic Device Laboratory

Fabrication of microfluidic devices for biological applications. Photolithography, soft lithography, and micromechanical valves and pumps. Emphasis is on device design, fabrication, and testing.

2 units, Win (Quake, S; Melin, J)

### BIOE 371. Global Biodesign: Medical Technology in an International Context

(Same as MED 271) (Same as OIT 587) Seminar examines the development and commercialization of medical technologies in the global setting focusing primarily on Europe, India and China. Faculty and guest speakers from industry and government discuss the status of the industry, as well as opportunities in and challenges to medical technology innovation unique to each geography. Topics related to development of technologies for bottom of the pyramid markets are also addressed. Students enrolling for 2 units are required to write and deliver a final paper. Application may be required due to high demand.

1-2 units, Spr (Doshi, R; Shen, C; Yock, P; Pietzsch, J)

### BIOE 372. DESIGN FOR SERVICE INNOVATION

Design for service innovation is an experiential course in which students work in multidisciplinary teams to design new services (including but not limited to web services) that will address the needs of an underserved population of users. Through a small number of lectures and guided exercises, but mostly in the context of specific team projects, students will learn to identify the key needs of the target population and to design services that address these needs. Our projects this year will focus on services for young adult survivors of severe childhood diseases. For the first time ever, children who have cystic fibrosis, rheumatoid arthritis, major cardiac repairs, organ transplants, genetic metabolic disorders, and several forms of cancer are surviving. The first wave of these survivors is reaching young adulthood (ages 18-25). Many aspects of the young adult world are not yet user-friendly for them: applying to and then entering college, adherence to required medication and diet,

4 units, Spr (Staff)

### BIOE 374A. Biodesign Innovation: Needs Finding and Concept Creation

(Same as ME 368A, MED 272A) (Same as OIT 384) Two quarter sequence. Inventing new medical devices and instrumentation, including: methods of validating medical needs; techniques for analyzing intellectual property; basics of regulatory (FDA) and

reimbursement planning; brainstorming and early prototyping. Guest lecturers and practical demonstrations.

4 units, Win (Yock, P; Zenios, S; Milroy, J; Brinton, T)

### BIOE 374B. Biodesign Innovation: Concept Development and Implementation

(Same as ME 368B, MED 272B) (Same as OIT 385) Two quarter sequence. How to take a medical device invention forward from early concept to technology translation and development. Topics include prototyping; patent strategies; advanced planning for reimbursement and FDA approval; choosing translation route (licensing versus start-up); ethical issues including conflict of interest; fundraising approaches and cash requirements; essentials of writing a business or research plan; strategies for assembling a development team. Prerequisite: MED 272A, ME368A, OIT 384 or BIOE 374A.

4 units, Spr (Yock, P; Zenios, S; Milroy, J; Brinton, T)

### BIOE 381. Orthopaedic Bioengineering

(Same as ME 381) Engineering approaches applied to the musculoskeletal system in the context of surgical and medical care. Fundamental anatomy and physiology. Material and structural characteristics of hard and soft connective tissues and organ systems, and the role of mechanics in normal development and pathogenesis. Engineering methods used in the evaluation and planning of orthopaedic procedures, surgery, and devices.

3 units, Spr (Levenston, M)

### BIOE 386. Neuromuscular Biomechanics

(Same as ME 386) The interplay between mechanics and neural control of movement. State of the art assessment through a review of classic and recent journal articles. Emphasis is on the application of dynamics and control to the design of assistive technology for persons with movement disorders.

3 units, not given this year

### BIOE 390. Introduction to Bioengineering Research

(Same as MED 289) Preference to medical and bioengineering graduate students with first preference given to Bioengineering Scholarly Concentration medical students. Bioengineering is an interdisciplinary field that leverages the disciplines of biology, medicine, and engineering to understand living systems, and engineer biological systems and improve engineering designs and human and environmental health. Students and faculty will make presentations during the course. Students will be expected to make presentations, complete a short paper, read selected articles, and take quizzes on the material.

1-2 units, Aut (Gold, G; Wang, P)

### BIOE 391. Directed Study

May be used to prepare for research during a later quarter in 392. Faculty sponsor required. May be repeated for credit.

1-6 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### BIOE 392. Directed Investigation

For Bioengineering graduate students. Previous work in 391 may be required for background; faculty sponsor required. May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### BIOE 393. Bioengineering Departmental Research Colloquium

Bioengineering department labs at Stanford present recent research projects and results. Guest lecturers. Topics include applications of engineering to biology, medicine, biotechnology, and medical technology, including biodesign and devices, molecular and cellular engineering, regenerative medicine and tissue engineering, biomedical imaging, and biomedical computation. Aut, Win, Spr (Lin, Riedel-Kruse, Barron)

1 unit, Aut (Lin, M; Barron, A; Riedel-Kruse, H), Win (Lin, M; Huang, K), Spr (Lin, M; Riedel-Kruse, H)

### BIOE 454. Synthetic Biology and Metabolic Engineering

(Same as CHEMENG 454) Principles for the design and optimization of new biological systems. Development of new enzymes, metabolic pathways, other metabolic systems, and communication systems among organisms. Example applications include the production of central metabolites, amino acids, pharmaceutical proteins, and isoprenoids. Economic challenges and quantitative assessment of metabolic performance. Pre- or corequisite: CHEMENG 355 or equivalent.

3 units, alternate years, not given this year

**BIOE 459. Frontiers in Interdisciplinary Biosciences**

(Same as BIO 459, BIOC 459, CHEMENG 459, CHEM 459, PSYCH 459) Students register through their affiliated department; otherwise register for CHEMENG 459. For specialists and non-specialists. Sponsored by the Stanford BioX Program. Three seminars per quarter address scientific and technical themes related to interdisciplinary approaches in bioengineering, medicine, and the chemical, physical, and biological sciences. Leading investigators from Stanford and the world present breakthroughs and endeavors that cut across core disciplines. Pre-seminars introduce basic concepts and background for non-experts. Registered students attend all pre-seminars; others welcome. See <http://biox.stanford.edu/courses/459.html>. Recommended: basic mathematics, biology, chemistry, and physics.

1 unit, Aut (Robertson, C), Win (Robertson, C), Spr (Robertson, C)

**BIOE 484. Computational Methods in Cardiovascular Bioengineering**

(Same as ME 484) Lumped parameter, one-dimensional nonlinear and linear wave propagation, and three-dimensional modeling techniques applied to simulate blood flow in the cardiovascular system and evaluate the performance of cardiovascular devices. Construction of anatomic models and extraction of physiologic quantities from medical imaging data. Problems in blood flow within the context of disease research, device design, and surgical planning.

3 units, not given this year

**BIOE 485. Modeling and Simulation of Human Movement**

(Same as ME 485) Direct experience with the computational tools used to create simulations of human movement. Lecture/labs on animation of movement; kinematic models of joints; forward dynamic simulation; computational models of muscles, tendons, and ligaments; creation of models from medical images; control of dynamic simulations; collision detection and contact models. Prerequisite: 281, 331A,B, or equivalent.

3 units, Spr (Delp, S)

**BIOE 500. Thesis (Ph.D.)**

(Staff)

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**BIOE 802. TGR Dissertation**

(Staff)

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**BIOLOGY (BIO) COURSES****UNDERGRADUATE COURSES IN BIOLOGY**

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**BIO 1. Human Evolution and Environment**

Human genetic and cultural evolution and how people interact with their environments, from the ancestors of Australopithecus to current events. Issues include race, gender, and intelligence; pesticide and antibiotic resistance; abortion and contraception; ecosystem services; environmental economics and ethics; the evolution of religion; climate change; population growth and overconsumption; origins and spread of ideas and technologies; and the distribution of political and economic power. GER: DB-NatSci

3 units, Spr (Ehrlich, P)

**BIO 3. Frontiers in Marine Biology**

An introduction to contemporary research in marine biology, including ecology, conservation biology, environmental toxicology, behavior, biomechanics, evolution, neurobiology, and molecular biology. Emphasis is on new discoveries and the technologies used to make them. Weekly lectures by faculty from the Hopkins Marine Station.

1 unit, Aut (Denny, M)

**BIO 3N. Views of a Changing Sea: Literature & Science**

The state of a changing world ocean, particularly in the eastern Pacific, will be examined through historical and contemporary

fiction, non-fiction and scientific publications. Issues will include harvest and mariculture fisheries, land-sea interactions and oceanic climate change in both surface and deep waters. GER: DB-NatSci

3 units, alternate years, not given this year

**BIO 4N. Personalized Genomic Medicine**

(F,Sem) Stanford Introductory Seminar. Exploration of the exciting new field of personalized genomic medicine. Personalized medicine is based on the idea that each person's unique genome sequence can be used to predict risk of acquiring specific diseases, and to make more informed medical choices. Learn about the fascinating science behind these approaches; where they are heading in the future; and the ethical implications such technology presents. Lectures will be augmented with hands-on experience in exploring and analyzing a real person's genome. GER: DB-NatSci

3 units, Aut (Fraser, H)

**BIO 5. Ecology for Everyone**

(Same as EARTHYSYS 5) Basics of ecology, from gut bacteria to global climate change. We will link processes at several scales to connect individual behavior, population growth, species interactions and ecosystem function. Combining classroom and field experience, we will see how basic hypothesis testing provides a way to learn about the world by considering the ecology of familiar organisms such as ants, squirrels, trees and some kinds of food. No prerequisites except arithmetic; open to everyone, including but not only those who may be headed for more advanced courses in ecology and environmental science. GER: DB-NatSci

4 units, Spr (Gordon, D)

**BIO 7S. Introduction to Biology**

The major fields of biology: biochemistry, the cell, evolution, and diversity. Foundation for higher-level biology courses. GER: DB-NatSci

3 units, Sum (Staff)

**BIO 7SL. Introduction to Biology Lab**

Optional lab to be taken concurrently with BIO 7S.

2 units, Sum (Staff)

**BIO 8N. Human Evolution**

(F,Sem) Stanford Introductory Seminar. A survey of the anatomical and behavioral evidence for human evolution and of the increasingly important information from molecular genetics. Emphasis on the split between the human and chimpanzee lines 6-7 million years ago, the appearance of the australopithecids by 4.1 million years ago, the emergence of the genus Homo about 2.5 million years ago, the spread of Homo from Africa 1.7-1.6 million years ago, the subsequent divergence of Homo into different species on different continents, and the expansion of fully modern humans (Homo sapiens) from Africa about 50,000 years ago to replace the Neanderthals and other non-modern Eurasians. GER: DB-NatSci

3 units, Win (Klein, R)

**BIO 8S. Introduction to Human Physiology**

The function and regulation of human organ systems. Various diseases are examined as failures of these regulatory processes. Systems include cardiovascular, respiratory, renal, endocrine, and gastrointestinal. GER: DB-NatSci

3 units, Sum (Staff)

**BIO 9S. Introduction to Biological Research Methods**

Theory and practice of experimental biology. Introduction to how to plan an experiment, conduct, and analyze data. Introduction to scientific writing and reading scientific journal articles. Prerequisite: high school biology. GER: DB-NatSci

3 units, Sum (Staff)

**BIO 10AX. Conservation Photography**

Account of the genre of conservation photography and strategic use of visual communication in the environmental arena. Introduction to use of digital SLR cameras and digital image processing. Case studies of conservation issues accompanied by multimedia platforms including images, video, and audio. Theory and application of photographic techniques. Lectures, tutorials, demonstrations, and field trips. Individual and group projects.

2 units, Aut (McConnell, S)

**BIO 11N. Biotechnology in Everyday Life**

Preference to freshmen. The science that makes transgenic plants

and animals possible. Current and future applications of biotechnology and the ethical issues raised. GER: DB-NatSci, DB-NatSci

*3 units, not given this year*

**BIO 12N. Sensory Ecology of Marine Animals**

(F,Sem) Stanford Introductory Seminar. Animals living in the oceans experience a highly varied range of environmental stimuli. An aquatic lifestyle requires an equally rich range of sensory adaptations, including some that are totally foreign to us. In this course we will examine sensory system in marine animals from both an environmental and behavioral perspective and from the point of view of neuroscience and information systems engineering.

*3 units, Spr (Thompson, S)*

**BIO 13N. Environmental Problems and Solutions**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Students do independent investigations of current environmental problems, analyzing differing views of them and discussing possible solutions. Each student gives seminar presentations and leads seminar discussions. Short, documented position papers are written for policy makers. GER: DB-NatSci

*3 units, Spr (Ehrlich, P)*

**BIO 15N. Environmental Literacy**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Lack of public understanding of the details of most environmental problems is cited as a cause of environmental deterioration. Good citizenship requires literacy about the elements of the scientific and decision making processes that accompany most environmental issues: what can happen, what are the odds, how can the credibility of sources of expertise be assessed, which components of environmental debates deal with factual and theoretical issues, and which are political value judgments? GER: DB-NatSci

*3 units, Aut (Root, T)*

**BIO 16N. Island Ecology**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. How ecologists think about the world. Focus is on the Hawaiian Islands: origin, geology, climate, evolution and ecology of flora and fauna, and ecosystems. The reasons for the concentration of threatened and endangered species in Hawaii, the scientific basis for their protection and recovery. How knowledge of island ecosystems can contribute to ecology and conservation biology on continents. GER: DB-NatSci

*3 units, Spr (Vitousek, P)*

**BIO 20. Introduction to Brain and Behavior**

(Same as HUMBIO 21) Evolutionary principles to understand how the brain regulates behavior physiologically, and is also influenced by behavioral interactions. Topics include neuron structure and function, transmission of neural information, anatomy and physiology of sensory and motor systems, regulation of body states, the biological basis of learning and memory, and behavioral abnormalities. GER: DB-NatSci

*3 units, alternate years, not given this year*

**BIO 22N. Infection, Immunity, and Global Health**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. The causes and prevention of infectious diseases, focusing on the interplay between pathogens and the immune system that determines the outcome of the disease. Introduction to microbiology, immunology, and epidemiology. Diseases of the past and present, including TB, malaria, AIDS, and Ebola. The roles of biological, environmental, and societal factors in disease emergence, spread, and prevention. Primary scientific literature, student-led discussions, and research projects. Prerequisite: biology background, preferably introductory college courses (e.g., 41, 42, or HUMBIO 2A, 3A. GER: DB-NatSci

*3 units, Spr (Jones, P)*

**BIO 23N. FACEBUG: The Social Life of Microbes**

Exploration of three crucial aspects of microbial life. First, examine how the unseen microbial majority is responsible for critical but under-appreciated aspects of the biology of the planet. Second, investigate the array of current genomic and imaging tools available to probe microscopic organisms in the environment. Last, we will research the importance of microbial communities and social dynamics in ecological and human health settings. GER: DB-NatSci

*3 units, not given this year*

**BIO 25Q. The Molecular Basis of Genetic Disease**

(F,Dial) Stanford Introductory Dialogue. Preference to sophomores. Focus is on two genetic diseases resulting from the production of protein molecules that are unable to fold into their native conformations, called conformational diseases: cystic fibrosis and amyotrophic lateral sclerosis or Lou Gehrig's disease. Hypotheses and controversies surrounding the molecular basis of these disorders, and implications for novel therapeutics. Readings from research literature. GER: DB-NatSci

*3 units, Spr (Kopito, R)*

**BIO 26N. Maintenance of the Genome**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The precious blueprint for life is entrusted to the genomic DNA molecules in all living cells. Multiple strategies have evolved to prevent the deleterious consequences from endogenous DNA alterations and damage from radiation or genotoxic chemicals in the environment. In this seminar you will learn about the remarkable systems that scan cellular DNA for alterations and make repairs to ensure genomic stability. Deficiencies in DNA repair have been implicated in many hereditary diseases involving developmental defects, premature aging, and/or predisposition to cancer. An understanding of DNA repair mechanisms is important for advances in the fields of cancer biology, neurobiology, and gerontology. Background readings, introductory lectures, student presentations, short term paper. GER: DB-NatSci

*3 units, Aut (Hanawalt, P)*

**BIO 27N. Nature and Nurture in Brain Development**

(F,Sem) Stanford Introductory Seminar. Preference to sophomores. Examination of the roles of genes and the environment in shaping brain wiring and behavior, using readings of papers from the primary scientific literature as examples of how the developing nervous system integrates information from both the genetic blueprint and external experience in forming neural connections. GER: DB-NatSci

*3 units, Win (McConnell, S)*

**BIO 30N. Extinctions in Near Time: Biodiversity loss since the Pleistocene**

(F,Sem) Stanford Introductory Seminar. The transition 11,700 years ago from the Pleistocene glacial period into the Holocene interglacial witnessed the expansion of humans around the world, climatic warming and the demise of many large vertebrate species. Since that time extinctions have continued on land and in the sea, culminating with the biodiversity crisis we are experiencing today. We will explore these prehistoric extinctions: Who? When? Where? and Why? in order to learn more about our planet's future. GER: DB-NatSci

*3 units, Aut (Hadly, E)*

**BIO 31Q. Ants: Behavior, Ecology, and Evolution**

Preference to sophomores. Behavior: the organization of colonies, how they operate without central control, how they resemble other complex systems like brains. Ecology: how populations of colonies change, comparing the ecology of a species in SW American desert and invasive Argentine ants. Evolution: why are there so many species of ants; how are they alike, how do they differ, and why? Ants as the theme for exploring how to do research in animal behavior, ecology, and evolution. Research project will be on the invasive Argentine ant: its distribution on campus, foraging trails, and nest structure.

*3 units, not given this year*

**BIO 33N. Conservation Science and Practice**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Interdisciplinary. The science and art of conservation today. The forces that are driving change in Earth's atmosphere, lands, waters, and variety of life forms. Which broad dimensions of the biosphere, and which elements of ecosystems, most merit protection? The prospects for, and challenges in, making conservation economically attractive and commonplace. Field trip; project. GER: DB-NatSci

*3 units, Spr (Daily, G)*

**BIO 34N. Hunger**

(F,Sem) Stanford Introductory Seminar. The biology of hunger and satiety, disease states that disrupt normal responses to hunger and satiety, starvation responses and adaptations to starvation in a

variety of organisms, food production and distribution mechanisms, historic famines and their causes, the challenges of providing adequate food and energy for the Earth's growing population, local and global efforts to alleviate hunger, and hunger in fiction. GER: DB-NatSci

3 units, Aut (Barton, K)

### BIO 37N. Green Revolution and Plant Biotechnology

Feeding ever-growing populations is a constant challenge to mankind. In the second half of the 20th century, the breeding of improved varieties combined with the use of chemical fertilizers and pesticides led to crop yield increases labeled the Green Revolution. Modern technologies in genetic engineering are expected to bring the second green revolution. Meeting the current and future global food needs without further damaging the fragile environment requires innovative effort from scientists and the society. GER: DB-NatSci

3 units, not given this year

### BIO 38N. Photosynthesis: From Basic Mechanisms to Biofuels

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Photosynthetic processes in terrestrial and aquatic environments. Biological and chemical ways that have been developed to capture the energy of sunlight; how this light energy can be converted to usable forms of energy, including biofuels; and potential impacts of anthropogenic energy generation on the health of the planet. GER: DB-NatSci

3 units, Win (Grossman, A)

### BIO 39N. Networks in Biology

(F,Sem) Stanford Introductory Seminar. Networks are everywhere, including friendship links on Facebook, airline routes, power grids, and the Internet. Biology is no exception. Examples include food chains, protein interaction maps, and metabolic pathways. Despite their ubiquitousness, the study of networks in the real world only started about a decade ago. Exploration of the types of networks in biology and the approaches people use in studying them. Discussions and presentations of original research papers. GER: DB-NatSci

3 units, Spr (Rhee, S), alternate years, not given next year

### BIO 41. Genetics, Biochemistry, and Molecular Biology

Emphasis is on macromolecules (proteins, lipids, carbohydrates, and nucleic acids) and how their structure relates to function and higher order assembly; molecular biology, genome structure and dynamics, gene expression from transcription to translation. Prerequisites: CHEM 31X (or 31A,B), 33. Recommended: CHEM 35; MATH 19, 20, 21 or 41, 42. GER: DB-NatSci

5 units, Aut (Bergmann, D; Simoni, R)

### BIO 41S. Biochemistry, Genetics, and Molecular Biology

Emphasis is on macromolecules (proteins, lipids, carbohydrates, and nucleic acids) and how their structure relates to function and higher order assembly; molecular biology, genome structure and dynamics, gene expression from transcription to translation. Prerequisites: CHEM 31X (or 31A,B), 33; MATH 19, 20, 21 or 41, 42. Recommended: CHEM 35. GER: DB-NatSci

5 units, Sum (Staff)

### BIO 42. Cell Biology and Animal Physiology

Cell structure and function; principles of animal physiology (immunology, renal, cardiovascular, sensory, motor physiology, and endocrinology); neurobiology from cellular basis to neural regulation of physiology. Prerequisites: CHEM 31X (or 31A,B), 33. Recommended: BIO 41; CHEM 35; MATH 19, 20, 21 or 41, 42. GER: DB-NatSci

5 units, Win (Jones, P; Sapolsky, R; Heller, C; Shen, K)

### BIO 43. Plant Biology, Evolution, and Ecology

Principles of evolution: macro- and microevolution and population genetics. Ecology: the principles underlying the exchanges of mass and energy between organisms and their environments; population, community, and ecosystem ecology; populations, evolution, and global change. Equivalent to BIOHOPK 43. Prerequisites: CHEM 31X (or 31A,B), 33. Recommended: BIO 41, 42; CHEM 35; MATH 19, 20, 21 or 41, 42. GER: DB-NatSci

5 units, Spr (Mudgett, M; Vitousek, P; Fraser, H)

### BIO 44X. Core Molecular Biology Laboratory

Investigate yeast strains that are engineered to express the human protein, p53, and use modern molecular methods to identify the functional consequences of p53 mutations isolated from tumor

cells. Learn about the protein's role as a tumor suppressor through lectures and by reading and discussing a journal article. Use molecular visualization programs to examine the structure of wild type and mutant p53 proteins. Formulate a testable hypothesis and assay the ability of mutant p53 to direct expression of several reporter genes. During guided reflection, formulate further analyses to determine whether mutant p53 is present in the cell, can bind to DNA, and/or can enter the nucleus. Lab experiments, team oral presentation, individual comprehensive written laboratory report. Prerequisites: CHEM 31X, or 31A,B, and 33; concurrent or past enrollment in Biology or Human Biology core. 44X,Y should be taken sequentially in the same year, preferably as sophomores, to prepare for internships. L

5 units, Win (Cyert, M; Stearns, T; Hekmat-Scafe, D; Malladi, S; Brownell, S; Seawell, P)

### BIO 44Y. Core Plant Biology & Eco Evo Laboratory

Conduct hypothesis-driven field and laboratory research to assess abiotic and biotic contributions to the flowering phenology of hummingbird-pollinated flowering plants and the microbial communities assembled within the floral nectar. Data collection will include personal and class observations of flowers, and microbial and molecular quantification and identification of microbes. Mine databases of temperature, light exposure, water availability and plant elevation for statistical relevance to their hypothesis. Collaboration by pairs will culminate in an oral defense of hypotheses and a journal-style paper. Lab fee. Prerequisites: CHEM 31X, or 31A,B, and 33; concurrent or past enrollment in Biology or Human Biology core. 44X,Y should be taken sequentially in the same year, preferably as sophomores, to prepare for internships. Equivalent to BIOHOPK 44Y.

5 units, Spr (Malladi, S; Fukami, T; Seawell, P; Hekmat-Scafe, D)

### BIO 101. Ecology

The principles of ecology. Topics: interactions of organisms with their environment, dynamics of populations, species interactions, structure and dynamics of ecological communities, biodiversity. Half-day field trip required. Satisfies Central Menu Area 4. Prerequisite: 43, or consent of instructor. Recommended: statistics. GER: DB-NatSci

4 units, Aut (Dirzo, R; Vitousek, P)

### BIO 102. Demography: Health, Development, Environment

(Same as HUMBIO 119) Demographic methods and their application to understanding and projecting changes in human infant, child, and adult mortality and health, fertility, population, sex ratios, and demographic transitions. Progress in human development, capabilities, and freedoms. Relationships between population and environment. Prerequisites: numeracy and basic statistics; Biology or Human Biology core; or consent of instructor. GER:DB-SocSci

3 units, Spr (Tuljapurkar, S)

### BIO 104. Advanced Molecular Biology

(Same as BIO 200) Molecular mechanisms that govern the replication, recombination, and expression of eukaryotic genomes. Topics: DNA replication, DNA recombination, gene transcription, RNA splicing, regulation of gene expression, protein synthesis, and protein folding. Satisfies Central Menu Area 1. Prerequisite: Biology core. GER: DB-NatSci

5 units, Win (Frydman, J; Gozani, O)

### BIO 105A. Ecology and Natural History of Jasper Ridge Biological Preserve

(Same as EARTHSYS 105A) Formerly 96A - Jasper Ridge Docent Training. First of two-quarter sequence training program to join the Jasper Ridge education/docent program. The scientific basis of ecological research in the context of a field station, hands-on field research, field ecology and the natural history of plants and animals, species interactions, archaeology, geology, hydrology, land management, multidisciplinary environmental education; and research projects, as well as management challenges of the preserve presented by faculty, local experts, and staff. Participants lead research-focused educational tours, assist with classes and research, and attend continuing education classes available to members of the JRBP community after the course.

4 units, Win (Dirzo, R; Wilber, C)

### BIO 105B. Ecology and Natural History of Jasper Ridge

**Biological Preserve**

(Same as EARTHSYS 105B) Formerly 96B - Jasper Ridge Docent Training. First of two-quarter sequence training program to join the Jasper Ridge education/docent program. The scientific basis of ecological research in the context of a field station, hands-on field research, field ecology and the natural history of plants and animals, species interactions, archaeology, geology, hydrology, land management, multidisciplinary environmental education; and research projects, as well as management challenges of the preserve presented by faculty, local experts, and staff. Participants lead research-focused educational tours, assist with classes and research, and attend continuing education classes available to members of the JRBP community after the course.

4 units, Spr (Dirzo, R; Wilber, C)

**BIO 109A. The Human Genome and Disease**

(Same as BIO 209A, HUMBIO 158) The variability of the human genome and the role of genomic information in research, drug discovery, and human health. Concepts and interpretations of genomic markers in medical research and real life applications. Human genomes in diverse populations. Original contributions from thought leaders in academia and industry and interaction between students and guest lecturers. Students with a major, minor or coterm in Biology: 109A/209A or 109B/209B may count toward degree program but not both. GER: DB-NatSci

3 units, Win (Heller, R)

**BIO 109B. The Human Genome and Disease: Genetic Diversity and Personalized Medicine**

(Same as BIO 209B) Continuation of 109A/209A. Genetic drift: the path of human predecessors out of Africa to Europe and then either through Asia to Australia or through northern Russia to Alaska down to the W. Coast of the Americas. Support for this idea through the histocompatibility genes and genetic sequences that predispose people to diseases. Guest lectures from academia and pharmaceutical companies. Prerequisite: Biology or Human Biology core. Students with a major, minor or coterm in Biology: 109A/209A or 109B/209B may count toward degree program but not both. GER: DB-NatSci

3 units, Spr (Heller, R)

**BIO 110. DNA Replication and Genomic Maintenance**

(Same as BIO 210) Maintenance of the genome and its accurate replication are prerequisites for life. DNA replication is also intricately connected to pathways for responding to genotoxic stress, which include inevitable collisions with transcription. In eukaryotes, DNA repair and replication are tightly connected to chromatin modification. Emphasis for lecture topics include: DNA-templated chromatin transactions; Chromatin manipulation during replication and DNA damage responses; Structural biology and molecular mechanisms of replication and DNA repair enzymes; Inducible responses to genotoxic stress; Relationships of DNA damage processing to mutagenesis, carcinogenesis, aging and human genetic disease. GER: DB-NatSci

3 units, Win (Morrison, A; Hanawalt, P)

**BIO 112. Human Physiology**

(Same as BIO 212, HUMBIO 133) The functioning of organ systems emphasizing mechanisms of control and regulation. Topics: structure and function of endocrine and central nervous systems, cardiovascular physiology, respiration, salt and water balance, exercise, and gastrointestinal physiology. Satisfies Central Menu Area 3 for Bio majors. Prerequisite: Biology or Human Biology core. GER: DB-NatSci

4 units, Win (Garza, D)

**BIO 113. Fundamentals of Molecular Evolution**

(Same as BIO 244) The inference of key molecular evolutionary processes from DNA and protein sequences. Topics include random genetic drift, coalescent models, effects and tests of natural selection, combined effects of linkage and natural selection, codon bias and genome evolution. Satisfies Central Menu Areas 1 or 4. Prerequisites: Biology core or graduate standing in any department, and consent of instructor. GER: DB-NatSci

4 units, not given this year

**BIO 116. Ecology of the Hawaiian Islands**

(Same as EARTHSYS 116) Terrestrial and marine ecology and conservation biology of the Hawaiian Archipelago. Taught in the field in Hawaii as part of quarter-long sequence of courses

including Earth Sciences and Anthropology. Topics include ecological succession, plant-soil interactions, conservation biology, biological invasions and ecosystem consequences, and coral reef ecology. Restricted to students accepted into the Earth Systems of Hawaii Program. GER: DB-NatSci

4 units, alternate years, not given this year

**BIO 117. Biology and Global Change**

(Same as EARTHSYS 111, EESS 111) The biological causes and consequences of anthropogenic and natural changes in the atmosphere, oceans, and terrestrial and freshwater ecosystems. Topics: glacial cycles and marine circulation, greenhouse gases and climate change, tropical deforestation and species extinctions, and human population growth and resource use. Prerequisite: Biology or Human Biology core or graduate standing. GER: DB-NatSci

4 units, Win (Vitousek, P; Arrigo, K)

**BIO 118. Genetic Analysis of Biological Processes**

(Same as BIO 218) Genetic principles and their experimental applications. Emphasis is on the identification and use of mutations to study cellular function. Satisfies Central Menu Areas 1 or 2. Prerequisite: Biology core. GER: DB-NatSci

5 units, Spr (Baker, J)

**BIO 121. Biogeography**

Global distributions of organisms through the Phanerozoic, with emphasis on historical causes. Topics: plate tectonics, island biogeography, climatic change, dispersal, vicariance, ecology of invasions, extinction, gradients, diversity. Satisfies Central Menu Area 4. GER: DB-NatSci

3 units, not given this year

**BIO 122. Along the Track of the Yellowstone Hotspot: Fusion of Art and Science**

(Same as ARTSTUDI 184A) The 20-million-year-old track of the Yellowstone hotspot through western North America, using the field setting to investigate ecology, evolution, and geology through an aesthetic and documentary media lens. Students create: experiential ways to learn about the natural world; a scientific yet personal intimacy about how ecosystems work and how they change; and ways to convey their observations to the public. Required trip to Yellowstone National Park.

4 units, not given this year

**BIO 129A. Cellular Dynamics I: Cell Motility and Adhesion**

Cell motility emphasizing role of actin assembly and dynamics coupling actin organization to cell movement. Interaction of cells with extracellular matrix, and remodelling of extracellular matrix in development and disease. Directed cell migration by chemotaxis (neuronal path-finding, immune cells). Cell-cell adhesion, formation of intercellular junctions and mechanisms regulating cell-cell interactions in development and diseases. Emphasis is on experimental logic, methods, problem solving, and interpretation of results. Students present research papers. Satisfies Central Menu Area 2. Prerequisite: Biology core. GER: DB-NatSci

4 units, Win (Nelson, W)

**BIO 129B. Cellular Dynamics II: Building a Cell**

Principles of cell organization; how common biochemical pathways are modified to generate diversity in cell structure and function. Roles of actin and microtubule cytoskeletons in cellular architecture. Mechanisms of protein sorting and trafficking, and protein modules and switches in regulating cell polarity. Yeast to polarized epithelial cells and neurons. Emphasis is on experimental logic, methods, problem solving, and interpretation of results. Students present research papers. Satisfies Central Menu Area 2. Prerequisite: Biology core. Recommended: 129A. GER: DB-NatSci

4 units, Spr (Nelson, W)

**BIO 131. Topics in Complexity**

A survey of the tools, findings, and philosophical and cultural implications associated with the study of complex systems, including self-organization, emergence, networks, nonlinear dynamics, autopoiesis, and others. Classes will include discussions of readings as well as guest lectures by faculty describing aspects of their complex systems of study. Graduate student led seminar. See <http://complexity.stanford.edu> for more information.

1 unit, Aut (Sapolsky, R; Longo, M; Wilbanks, R; Sellis, D)

**BIO 132. Advanced Imaging Lab in Biophysics**

(Same as APPPHYS 232, BIO 232, BIOPHYS 232, MCP 232) Laboratory and lectures. Advanced microscopy and imaging, emphasizing hands-on experience with state-of-the-art techniques. Students construct and operate working apparatus. Topics include microscope optics, Koehler illumination, contrast-generating mechanisms (bright/dark field, fluorescence, phase contrast, differential interference contrast), and resolution limits. Laboratory topics vary by year, but include single-molecule fluorescence, fluorescence resonance energy transfer, confocal microscopy, two-photon microscopy, and optical trapping. Limited enrollment. Recommended: basic physics, Biology core or equivalent, and consent of instructor. GER: DB-NatSci

4 units, Spr (Block, S; Smith, S; Stearns, T; Schnitzer, M)

**BIO 136. Evolutionary Paleobiology**

A paleontological approach to evolutionary theory. Topics: history of life, speciation, heterochrony, evolutionary constraint, coevolution, macroevolution, the Cambrian Explosion, mass extinctions, taphonomy, life on land, life in the sea, life in the air. Satisfies Central Menu Area 4. Prerequisite: Biology Core. GER: DB-NatSci

4 units, not given this year

**BIO 137. Plant Genetics**

(Same as BIO 237) Gene analysis, mutagenesis, transposable elements; developmental genetics of flowering and embryo development; biochemical genetics of plant metabolism; scientific and societal lessons from transgenic plants. Satisfies Central Menu Area 2. Prerequisite: Biology core or consent of instructor. GER: DB-NatSci

3-4 units, not given this year

**BIO 139. Biology of Birds**

How birds interact with their environments and each other, emphasizing studies that had impact in the fields of population biology, community ecology, and evolution. Local bird communities. Emphasis is on field research. Enrollment limited to 20. Prerequisites: 43 or equivalent, and consent of instructor. Recommended: birding experience. GER: DB-NatSci

3 units, alternate years, not given this year

**BIO 140. Population Biology of Butterflies**

Field work on Euphydryas populations under study on campus and elsewhere in California. Course offered as participation in research when conditions permit; decisions not made until Winter Quarter. Prerequisites: 43 and consent of instructor.

2-5 units, not given this year

**BIO 141. Biostatistics**

(Same as STATS 141) Introductory statistical methods for biological data: describing data (numerical and graphical summaries); introduction to probability; and statistical inference (hypothesis tests and confidence intervals). Intermediate statistical methods: comparing groups (analysis of variance); analyzing associations (linear and logistic regression); and methods for categorical data (contingency tables and odds ratio). Course content integrated with statistical computing in R. GER:DB-Math

4-5 units, Aut (Staff)

**BIO 143. Evolution**

(Same as BIO 243) The basic facts and principles of the evolution of all life. The logic of and evidence for the correctness of Darwin's argument for evolution by natural selection. How Mendelian genetics was integrated into evolutionary thinking. The integration of physiological and ecological perspectives into the study of evolutionary adaptation within species. Species formation and evolutionary divergence among species. Patterns of evolution over long time scales. Satisfies Central Menu Area 4. GER: DB-NatSci

3 units, Aut (Watt, W)

**BIO 144. Conservation Biology**

(Same as HUMBIO 112) Principles and application of the science of preserving biological diversity. Topics: sources of endangerment of diversity; the Endangered Species Act; conservation concepts and techniques at the population, community, and landscape levels; reserve design and management; conflict mediation. 4 units if taken with a field trip and discussion component. Satisfies Central Menu Area 4 for Bio majors. Prerequisite: BIO 101, or BIO 43 or HUMBIO 2A with consent of

instructor. GER: DB-NatSci

3-4 units, Win (Boggs, C; Launer, A)

**BIO 145. Behavioral Ecology**

(Same as BIO 245) Animal behavior from an evolutionary and ecological perspective. Topics: foraging, territoriality, reproductive behavior, social groups. Lecture/seminar format; seminars include discussion of journal articles. Independent research projects. Satisfies Central Menu Area 4 for Bio majors. Prerequisites: Biology or Human Biology core, or consent of instructor. Recommended: statistics. Satisfies WIM in Biology. GER: DB-NatSci

4 units, alternate years, not given this year

**BIO 146. Population Studies**

Series of talks by distinguished speakers introducing approaches to population and resource studies.

1 unit, Win (Feldman, M)

**BIO 149. The Neurobiology of Sleep**

(Same as BIO 249, HUMBIO 161) Preference to seniors and graduate students. The neurochemistry and neurophysiology of changes in brain activity and conscious awareness associated with changes in the sleep/wake state. Behavioral and neurobiological phenomena including sleep regulation, sleep homeostasis, circadian rhythms, sleep disorders, sleep function, and the molecular biology of sleep. Enrollment limited to 16. GER: DB-NatSci

4 units, Win (Heller, C), alternate years, not given next year

**BIO 150. Human Behavioral Biology**

(Same as BIO 250, HUMBIO 160) Multidisciplinary. How to approach complex normal and abnormal behaviors through biology. How to integrate disciplines including sociobiology, ethology, neuroscience, and endocrinology to examine behaviors such as aggression, sexual behavior, language use, and mental illness. GER: DB-NatSci

5 units, Spr (Sapolsky, R), alternate years, not given next year

**BIO 151. Mechanisms of Neuron Death**

For Biology majors with background in neuroscience. Cell and molecular biology of neuron death during neurological disease. Topics: the amyloid diseases (Alzheimer's), prion diseases (kuru and Creutzfeldt-Jakob), oxygen radical diseases (Parkinson's and ALS), triplet repeat diseases (Huntington's), and AIDS-related dementia. Student presentations. Enrollment limited to 15; application required. GER: DB-NatSci

3 units, Aut (Sapolsky, R)

**BIO 152. Imaging: Biological Light Microscopy**

(Same as MCP 222) Survey of instruments which use light and other radiation for analysis of cells in biological and medical research. Topics: basic light microscopy through confocal fluorescence and video/digital image processing. Lectures on physical principles; involves partial assembly and extensive use of lab instruments. Lab. Prerequisites: some college physics, Biology core. GER: DB-NatSci

3 units, Spr (Lewis, R; Smith, S)

**BIO 153. Cellular Neuroscience: Cell Signaling and Behavior**

(Same as PSYCH 120) Neural interactions underlying behavior. Prerequisites: PSYCH 1 or basic biology. GER: DB-NatSci

4 units, Aut (Wine, J)

**BIO 154. Molecular and Cellular Neurobiology**

For advanced undergraduate students. Cellular and molecular mechanisms in the organization and functions of the nervous system. Topics: wiring of the neuronal circuit, synapse structure and synaptic transmission, signal transduction in the nervous system, sensory systems, molecular basis of behavior including learning and memory, molecular pathogenesis of neurological diseases. Satisfies Central Menu Areas 2 or 3 for Bio majors. Prerequisite for undergraduates: Biology core or equivalent, or consent of instructors. GER: DB-NatSci

4 units, alternate years, not given this year

**BIO 156. Epigenetics**

(Same as BIO 256, GENE 206, PATH 206) For graduate students in the Biosciences and upper level Biology undergraduates. Mechanisms by which phenotypes not determined by the DNA sequence are stably inherited in successive cell divisions. From the discovery of position-effect variegation in *Drosophila* in the 1920s

to present-day studies of covalent modifications of histones and DNA methylation. Topics include: position effect, gene silencing, heterochromatin, centromere identity, genomic imprinting, histone code, variant histones, and the role of epigenetics in cancer. Prerequisite: BIO41 and BIO42, or GENE 203, or consent of instructor.

*2 units, alternate years, not given this year*

#### **BIO 157. Biochemistry and Molecular Biology of Plants**

(Same as BIO 257) Biochemical and molecular basis of plant growth and adaptation. Topics include: hormone signal transduction; photoreceptor chemistry and signaling; metabolite sensing and transport; dynamics of photosynthesis; plant innate immunity and symbiosis. Lectures and readings will emphasize research methods. Prerequisite: Biology core or equivalent, or consent of instructor. GER: DB-NatSci

*3-4 units, alternate years, not given this year*

#### **BIO 158. Developmental Neurobiology**

(Same as BIO 258) For advanced undergraduates and coterminal students. The principles of nervous system development from the molecular control of patterning, cell-cell interactions, and trophic factors to the level of neural systems and the role of experience in influencing brain structure and function. Topics: neural induction and patterning cell lineage, neurogenesis, neuronal migration, axonal pathfinding, synapse elimination, the role of activity, critical periods, and the development of behavior. Satisfies Central Menu Areas 2 or 3. Prerequisite: BIO 42 or equivalent. GER: DB-NatSci

*4 units, alternate years, not given this year*

#### **BIO 160A. Developmental Biology I**

Focus is on the molecular mechanisms underlying the generation of diverse cell types and tissues during embryonic and post-embryonic animal development. The role of cell-cell communication in controlling key developmental decisions. Topics covered in this quarter include embryonic axis formation, morphogen signaling, cell type specification and stem cells. Experimental logic and methods of research in developmental biology. Discussions of research papers. Satisfies Central Menu Areas 1 or 2. Prerequisite: Biology core or consent of instructor. GER: DB-NatSci

*4 units, Aut (Simon, M)*

#### **BIO 160B. Developmental Biology II**

Continuation of BIO 160A. Focus is on the molecular mechanisms underlying the generation of diverse cell types and tissues during embryonic and post-embryonic animal development. The role of cell-cell communication in controlling key developmental decisions. The topics include sexual control of development, tissue polarity and growth, cell migration, regeneration, and the evolution of developmental mechanisms. Experimental logic and methods of research in developmental biology. Discussions of research papers. Satisfies Central Menu Areas 1 or 2. Prerequisites: Biology Core and 160A, or consent of instructor. GER: DB-NatSci

*4 units, Win (Simon, M)*

#### **BIO 161. Molecular Basis of Biological Communication**

Across molecular, cellular, organismal and communal biological scales, communication among elements of a system is required for its function. The molecules and logic at the heart of communication at levels from the interactions between cells in a developing body to how organisms perceive and respond to their physical environment and the organisms around them; how these systems normally work and how failures in communication result in and from disease. Current research literature. Prerequisites: BIO 41, 42. Recommended: BIO 160A, 129A.

*4 units, alternate years, not given this year*

#### **BIO 163. Neural Systems and Behavior**

(Same as BIO 263, HUMBIO 163) The field of neuroethology and its vertebrate and invertebrate model systems. Research-oriented. Readings include reviews and original papers. How animal brains compare; how neural circuits are adapted to species-typical behavior; and how the sensory worlds of different species represent the world. Lectures and required discussions. Satisfies Central Menu Area 3 for Bio majors. Prerequisites: BIO 42, HUMBIO 4A. GER: DB-NatSci

*4 units, Aut (Fernald, R), alternate years, not given next year*

#### **BIO 164. Biosphere-Atmosphere Interactions**

(Same as BIO 264) Physiological, ecological, and physical aspects of ecosystem function, emphasizing how ecosystems influence and are influenced by the atmosphere. Prerequisites: 42, 43; or consent of instructor. GER: DB-NatSci

*4 units, alternate years, not given this year*

#### **BIO 165. When Neurons Misfire: The Molecular Basis of Neurological Disorders**

Current topics in research and investigative therapies of neurological conditions including depression, personality disorders, schizophrenia, Parkinsons, epilepsy, aging and life-extension. Sources include primary literature with a focus on molecular mechanisms and therapeutic strategies. Emphasis placed on what the study of dysfunction in the nervous system tells us about the delicacy of proper function. Guest lecturers including Dr. Robert Sapolsky and Dr. Gary Steinberg.

*1 unit, Win (Sapolsky, R; House, P)*

#### **BIO 166. Faunal Analysis: Animal Remains for the Archaeologist**

(Same as ANTHRO 113, ANTHRO 213, BIO 266) The analysis of fossil animal bones and shells to illuminate the behavior and ecology of prehistoric collectors, especially ancient humans. Theoretical and methodological issues. The identification, counting, and measuring of fossil bones and shells. Labs. Methods of numerical analysis.

*5 units, not given this year*

#### **BIO 167. Social Animals, Social Revolutions and Social Networks**

(Same as CS 81G, FRENGEN 167) We like to think of social networks as contemporary phenomena. But before Facebook, individuals organized themselves in social networks; before Twitter, revolutionaries used media to communicate and coordinate their messages. In fact, even animal societies are networked. Do all these social networks share certain properties? What can we learn by comparing them? These are some of the questions we will ask in this course, as we traverse the natural world and past societies before taking a fresh look at our modern social networks. GER: DB-NatSci

*4 units, Spr (Gordon, D; Edelstein, D; Roberts, E)*

#### **BIO 171. Principles of Cell Cycle Control**

(Same as BIO 271, CSB 271) Genetic analysis of the key regulatory circuits governing the control of cell division. Illustration of key principles that can be generalized to other synthetic and natural biological circuits. Focus on tractable model organisms; growth control; irreversible biochemical switches; chromosome duplication; mitosis; DNA damage checkpoints; MAPK pathway-cell cycle interface; oncogenesis. Analysis of classic and current primary literature. Satisfies Central Menu Area 2. GER: DB-NatSci

*3 units, Aut (Skotheim, J; Ferrell, J)*

#### **BIO 172. Molecular Basis of Body Plan Evolution**

(Same as BIO 272) Developmental biology research, from arthropods and chordates, over the past 25 years has revealed astonishing levels of shared developmental similarities, despite large morphological differences between the two groups, and has led to speculation about the morphology of the earliest animals. This has led to a synthesis between developmental biology, zoology, and paleontology and sparked molecular developmental studies in diverse metazoan phyla. Focus is on the latest findings from comparative development and what they reveal about the early evolution of the animal phyla.

*4 units, Spr (Lowe, C)*

#### **BIO 175. Tropical Ecology and Conservation**

Spring Break trip to a field station; lectures at Stanford. How to address scientific questions concerning ecology and conservation. Field trip includes natural history observations and group research projects. Symposium based on project results. GER: DB-NatSci

*5 units, Spr (Dirzo, R)*

#### **BIO 177. Plant Microbe Interaction**

(Same as BIO 277) Molecular basis of plant symbiosis and pathogenesis. Topics include mechanisms of recognition and signaling between microbes and plant hosts, with examples such as the role of small molecules, secreted peptides, and signal transduction pathways in symbiotic or pathogenic interactions.

Readings include landmark papers together with readings in the contemporary literature. Prerequisites: Biology core and two or more upper division courses in genetics, molecular biology, or biochemistry. Recommended: plant genetics or plant biochemistry.

3 units, Spr (Long, S; Mudgett, M), alternate years, not given next year

### BIO 178. Microbiology Literature

(Same as BIO 278) For advanced undergraduates and first-year graduate students. Critical reading of the research literature in prokaryotic genetics and molecular biology, with particular applications to the study of major human pathogens. Classic and foundational papers in pathogenesis, genetics, and molecular biology; recent literature on bacterial pathogens such as Salmonella, Vibrio, and/or Yersinia. Diverse experimental approaches: biochemistry, genomics, pathogenesis, and cell biology. Prerequisites: Biology Core and two upper-division courses in genetics, molecular biology, or biochemistry.

3 units, not given this year

### BIO 182. Modeling Cultural Evolution

(Same as BIO 282) Seminar. Quantitative models for the evolution of socially transmitted traits. Rates of change of learned traits in populations and patterns of cultural diversity as a function of innovation and cultural transmission. Learning in constant and changing environments. Possible avenues for gene-culture coevolution.

3 units, Win (Feldman, M)

### BIO 183. Theoretical Population Genetics

(Same as BIO 283) Models in population genetics and evolution. Selection, random drift, gene linkage, migration, and inbreeding, and their influence on the evolution of gene frequencies and chromosome structure. Models are related to DNA sequence evolution. Prerequisites: calculus and linear algebra, or consent of instructor.

3 units, Spr (Feldman, M), alternate years, not given next year

### BIO 186. Natural History of the Vertebrates

(Same as BIO 286) Broad survey of the diversity of vertebrate life. Discussion of the major branches of the vertebrate evolutionary tree, with emphasis on evolutionary relationships and key adaptations as revealed by the fossil record and modern phylogenetics. Modern orders introduced through an emphasis on natural history, physiology, behavioral ecology, community ecology, and conservation. Lab sessions focused on comparative skeletal morphology through hands-on work with skeletal specimens. Discussion of field methods and experience with our local vertebrate communities through field trips to several of California's distinct biomes. Prerequisite: Biology core.

4 units, not given this year

### BIO 188. Biochemistry I

(Same as BIO 288, CHEMENG 181, CHEMENG 281, CHEM 181) (CHEMENG offerings formerly listed as 188/288.) Chemistry of major families of biomolecules including proteins, nucleic acids, carbohydrates, lipids, and cofactors. Structural and mechanistic analysis of properties of proteins including molecular recognition, catalysis, signal transduction, membrane transport, and harvesting of energy from light. Molecular evolution. Satisfies Central Menu Area 1 for Bio majors. Prerequisites: CHEM 33, 35, 131, and 135 or 171. GER: DB-NatSci

3 units, Aut (Cegelski, L)

### BIO 189. Biochemistry II

(Same as BIO 289, CHEMENG 183, CHEMENG 283, CHEM 183) Focus on metabolic biochemistry: the study of chemical reactions that provide the cell with the energy and raw materials necessary for life. Topics include glycolysis, gluconeogenesis, the citric acid cycle, oxidative phosphorylation, photosynthesis, the pentose phosphate pathway, and the metabolism of glycogen, fatty acids, amino acids, and nucleotides as well as the macromolecular machines that synthesize RNA, DNA, and proteins. Medical relevance is emphasized throughout. Satisfies Central Menu Area 1 for Bio majors. Prerequisite: BIO 188/288 or CHEM 181 or CHEMENG 181/281 (formerly 188/288). GER: DB-NatSci

3 units, Win (Dunn, A)

### BIO 190. Becoming a Scientist: Introduction to Research Practices and Techniques

For upper level undergraduates concurrently enrolled in academic

units for undergraduate biology research. Focus on developing skills that are essential in the transition from student to researcher. Provide better structure and support for undergraduate research experiences in order to give students a better foundation as they begin to pursue research opportunities. Engage in small seminar-style discussion sections once a week that will be comprised of research-based discussions, student led PowerPoint presentations and poster presentations. Concurrent enrollment in BIO 199 or the equivalent required.

1 unit, Aut (Brownell, S)

### BIO 196A. Biology Senior Reflection

Capstone course series for seniors. Creative, self-reflective and scientifically relevant projects conceived, produced and exhibited over the course of three quarters. Explore scientific content of personal interest through creative forms including but not limited to writing, music, fine arts, performing arts, photography, film or new media. A written essay on the creative process and scientific significance of the selected topic will accompany the creative work. Completed projects may be included in a creative portfolio. Required enrollment in 196A,B,C. Satisfies WIM in Biology. WIM

3 units, Aut (McConnell, S; Todhunter, A)

### BIO 196B. Biology Senior Reflection

Capstone course series for seniors. Creative, self-reflective and scientifically relevant projects conceived, produced and exhibited over the course of three quarters. Explore scientific content of personal interest through creative forms including but not limited to writing, music, fine arts, performing arts, photography, film or new media. A written essay on the creative process and scientific significance of the selected topic will accompany the creative work. Completed projects may be included in a creative portfolio. Required enrollment in 196A,B,C.

3 units, Win (McConnell, S; Todhunter, A)

### BIO 196C. Biology Senior Reflection

Capstone course series for seniors. Creative, self-reflective and scientifically relevant projects conceived, produced and exhibited over the course of three quarters. Explore scientific content of personal interest through creative forms including but not limited to writing, music, fine arts, performing arts, photography, film or new media. A written essay on the creative process and scientific significance of the selected topic will accompany the creative work. Completed projects may be included in a creative portfolio. Required enrollment in 196A,B,C.

3 units, Spr (McConnell, S; Todhunter, A)

### BIO 197WA. Senior Writing Project: The Personal Essay in Biology

Seminar focused on writing. Compose, workshop and revise scientifically relevant and personal essays in biology directed at a mainstream audience, interweaving research, interview, memoir, and other elements of nonfiction craft. Satisfies WIM in Biology. WIM

3 units, Spr (Todhunter, A)

### BIO 197WB. Communicating Neuroscience to a Non-Scientist

Explore the field of neuroscience through the process of communicating science to a layperson audience. Read primary scientific articles on different topics in neuroscience and write a New York Times style summary of those articles for a layperson audience. Refine student writing through multiple revisions of summaries based on instructor and peer critique. Select topics include neuronal communication, neurobiology of addiction, neurogenesis, neural development, neuroendocrinology, and neurodegenerative diseases. Prerequisite: Bio42 or the equivalent. Satisfies WIM in Biology. WIM

3 units, Spr (Brownell, S)

### BIO 198. Directed Reading in Biology

Individually arranged under the supervision of members of the faculty.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### BIO 198X. Out-of-Department Directed Reading

Individually arranged under the supervision of members of the faculty. Credit for work arranged with out-of-department faculty is restricted to Biology majors and requires department approval. See <http://biohonors.stanford.edu> for information and petitions. May be repeated for credit.

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **BIO 199. Advanced Research Laboratory in Experimental Biology**

Individual research taken by arrangement with in-department instructors. See <http://biohonors.stanford.edu> for information on research sponsors, units, and credit for summer research. May be repeated for credit.

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **BIO 199W. Senior Honors Thesis: How to Effectively Write About Scientific Research**

Workshop. For seniors pursuing an honors thesis in a biology-focused major or program. Focus on improving scientific writing and synthesizing in the context of students' individual research projects. Complete literature review which will form the basis for the thesis introduction. Develop methods section of the thesis. Small seminar-style discussion sections with research-based discussions, student led PowerPoint presentations, and writing workshops. Co-requisite: Concurrent enrollment in 199 or 199X or equivalent. Satisfies WIM in Biology. WIM

*3 units, Aut (Brownell, S)*

### **BIO 199X. Out-of-Department Advanced Research Laboratory in Experimental Biology**

Individual research by arrangement with out-of-department instructors. Credit for 199X is restricted to declared Biology majors and requires department approval. See <http://biohonors.stanford.edu> for information on research sponsors, units, petitions, deadlines, credit for summer research, and out-of-Stanford research. May be repeated for credit.

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

### **BIO 271. Principles of Cell Cycle Control**

(Same as BIO 171, CSB 271) Genetic analysis of the key regulatory circuits governing the control of cell division. Illustration of key principles that can be generalized to other synthetic and natural biological circuits. Focus on tractable model organisms; growth control; irreversible biochemical switches; chromosome duplication; mitosis; DNA damage checkpoints; MAPK pathway-cell cycle interface; oncogenesis. Analysis of classic and current primary literature. Satisfies Central Menu Area 2. GER: DB-NatSci

*3 units, Aut (Skotheim, J; Ferrell, J)*

## **GRADUATE COURSES IN BIOLOGY**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### **BIO 200. Advanced Molecular Biology**

(Same as BIO 104) Molecular mechanisms that govern the replication, recombination, and expression of eukaryotic genomes. Topics: DNA replication, DNA recombination, gene transcription, RNA splicing, regulation of gene expression, protein synthesis, and protein folding. Satisfies Central Menu Area 1. Prerequisite: Biology core.

*5 units, Win (Frydman, J; Gozani, O)*

### **BIO 203. Advanced Genetics**

(Same as DBIO 203, GENE 203) For graduate students in Bioscience programs; may be appropriate for graduate students in other programs. Focused on application of the genetics toolbox to problems in modern biology research. Topics covered include analytic methods, genetic manipulation, genome analysis, and human genetics. Lectures and faculty-led discussion sections with evaluation of papers. Students with minimal experience in genetics should prepare by working out problems in college level textbooks.

*4 units, Aut (Stearns, T; Bustamante, C; Fire, A; Sidow, A)*

### **BIO 207. Life and Death of Proteins**

How proteins are made and degraded in the cell. Discussion of primary literature. Case studies follow the evolution of scientific ideas, and evaluate how different experimental approaches contribute to our understanding of a biological problem. Emphasis on multidisciplinary approaches. Topics: protein folding and assembly, mechanisms of chaperone action, sorting into organelles, misfolding and disease, and the ubiquitin-proteasome pathway. Enrollment limited to 30.

*3 units, Win (Frydman, J)*

### **BIO 209A. The Human Genome and Disease**

(Same as BIO 109A, HUMBIO 158) The variability of the human genome and the role of genomic information in research, drug discovery, and human health. Concepts and interpretations of genomic markers in medical research and real life applications. Human genomes in diverse populations. Original contributions from thought leaders in academia and industry and interaction between students and guest lecturers. Students with a major, minor or cotermin in Biology: 109A/209A or 109B/209B may count toward degree program but not both.

*3 units, Win (Heller, R)*

### **BIO 209B. The Human Genome and Disease: Genetic Diversity and Personalized Medicine**

(Same as BIO 109B) Continuation of 109A/209A. Genetic drift: the path of human predecessors out of Africa to Europe and then either through Asia to Australia or through northern Russia to Alaska down to the W. Coast of the Americas. Support for this idea through the histocompatibility genes and genetic sequences that predispose people to diseases. Guest lectures from academia and pharmaceutical companies. Prerequisite: Biology or Human Biology core. Students with a major, minor or cotermin in Biology: 109A/209A or 109B/209B may count toward degree program but not both.

*3 units, Spr (Heller, R)*

### **BIO 210. DNA Replication and Genomic Maintenance**

(Same as BIO 110) Maintenance of the genome and its accurate replication are prerequisites for life. DNA replication is also intricately connected to pathways for responding to genotoxic stress, which include inevitable collisions with transcription. In eukaryotes, DNA repair and replication are tightly connected to chromatin modification. Emphasis for lecture topics include: DNA-templated chromatin transactions; Chromatin manipulation during replication and DNA damage responses; Structural biology and molecular mechanisms of replication and DNA repair enzymes; Inducible responses to genotoxic stress; Relationships of DNA damage processing to mutagenesis, carcinogenesis, aging and human genetic disease.

*3 units, Win (Morrison, A; Hanawalt, P)*

### **BIO 212. Human Physiology**

(Same as BIO 112, HUMBIO 133) The functioning of organ systems emphasizing mechanisms of control and regulation. Topics: structure and function of endocrine and central nervous systems, cardiovascular physiology, respiration, salt and water balance, exercise, and gastrointestinal physiology. Satisfies Central Menu Area 3 for Bio majors. Prerequisite: Biology or Human Biology core.

*4 units, Win (Garza, D)*

### **BIO 214. Advanced Cell Biology**

(Same as BIOC 224, MCP 221) For Ph.D. students. Current research on cell structure, function, and dynamics. Topics include complex cell phenomena such as cell division, apoptosis, compartmentalization, transport and trafficking, motility and adhesion, differentiation, and multicellularity. Current papers from the primary literature. Prerequisite for advanced undergraduates: BIO 129A,B, and consent of instructor.

*2-5 units, Win (Kopito, R; Nachury, M; Straight, A; Pfeffer, S; Theriot, J)*

### **BIO 215. Biochemical Evolution**

Biochemical viewpoints on the evolutionary process. Topics: prebiotic biochemistry and the origins of life; adaptive organization of metabolism; enzyme polymorphisms and other biochemical aspects of population genetics; macromolecular phylogeny and protein clocks. Prerequisites: Biology core or substantial equivalent.

*3 units, alternate years, not given this year*

### **BIO 216. Terrestrial Biogeochemistry**

(Same as EESS 216) Nutrient cycling and the regulation of primary and secondary production in terrestrial, freshwater, and marine ecosystems; land-water and biosphere-atmosphere interactions; global element cycles and their regulation; human effects on biogeochemical cycles. Prerequisite: graduate standing in science or engineering; consent of instructor for undergraduates or cotermin students.

*3 units, not given this year*

**BIO 217. Neuronal Biophysics**

Biophysical descriptions and mechanisms of passive and excitable membranes, ion channels and pumps, action potential propagation, and synaptic transmission. Introduction to dynamics of single neurons and neuronal networks. Emphasis is on the experimental basis for modern research applications. Interdisciplinary aspects of biology and physics. Literature, problem sets, and student presentations. Prerequisites: undergraduate physics, calculus, and biology.

4 units, Win (Schnitzer, M)

**BIO 218. Genetic Analysis of Biological Processes**

(Same as BIO 118) Genetic principles and their experimental applications. Emphasis is on the identification and use of mutations to study cellular function. Satisfies Central Menu Areas 1 or 2. Prerequisite: Biology core.

5 units, Spr (Baker, J)

**BIO 222. Exploring Neural Circuits**

Seminar. The logic of how neural circuits control behavior; how neural circuits are assembled during development and modified by experience. Emphasis is on primary literature. Topics include: neurons as information processing units; simple and complex circuits underlying sensory information processing and motor control; and development and plasticity of neural circuits. Advanced undergraduates and graduate students with background in physical science, engineering, and biology may apply to enroll. Recommended: background in neuroscience.

3 units, Win (Luo, L)

**BIO 223. Stochastic and Nonlinear Dynamics**

(Same as APPPHYS 223) Theoretical analysis of dynamical processes: dynamical systems, stochastic processes, and spatiotemporal dynamics. Motivations and applications from biology and physics. Emphasis is on methods including qualitative approaches, asymptotics, and multiple scale analysis. Prerequisites: ordinary and partial differential equations, complex analysis, and probability or statistical physics.

3 units, alternate years, not given this year

**BIO 227. Foundations of Community Ecology**

Discussion of classic papers in community ecology (Forbes, Clements, Gleason, Grinnell, Lindeman, Preston, Elton, Hutchinson, May, MacArthur, Odum, Connell, Paine, Tilman, etc.) and contemporary papers on related topics, to develop historical perspectives to understand current issues and identify future directions. Prerequisite for undergraduates: consent of instructor.

2 units, alternate years, not given this year

**BIO 230. Molecular and Cellular Immunology**

For advanced undergraduate and graduate students who have not previously taken an introductory immunology course. Mechanisms of innate and adaptive immune responses: molecular/cellular basis of immunity and its regulation; structure and function of antibody molecules; molecular biology and biochemistry of antigen receptors and signaling pathways; genetic control of immunity and disease susceptibility. Emphasis is on key experimental approaches. Satisfies Central Menu Areas 1 or 2. Prerequisite for undergraduates: Biology or Human Biology core, or consent of instructor.

4 units, Aut (Jones, P)

**BIO 230A. Molecular and Cellular Immunology Literature Review**

Special discussion section for graduate students. Supplement to 230. Corequisite: 230.

1 unit, Aut (Jones, P)

**BIO 232. Advanced Imaging Lab in Biophysics**

(Same as APPPHYS 232, BIO 132, BIOPHYS 232, MCP 232) Laboratory and lectures. Advanced microscopy and imaging, emphasizing hands-on experience with state-of-the-art techniques. Students construct and operate working apparatus. Topics include microscope optics, Koehler illumination, contrast-generating mechanisms (bright/dark field, fluorescence, phase contrast, differential interference contrast), and resolution limits. Laboratory topics vary by year, but include single-molecule fluorescence, fluorescence resonance energy transfer, confocal microscopy, two-photon microscopy, and optical trapping. Limited enrollment. Recommended: basic physics, Biology core or equivalent, and consent of instructor.

4 units, Spr (Block, S; Smith, S; Stearns, T; Schnitzer, M)

**BIO 237. Plant Genetics**

(Same as BIO 137) Gene analysis, mutagenesis, transposable elements; developmental genetics of flowering and embryo development; biochemical genetics of plant metabolism; scientific and societal lessons from transgenic plants. Satisfies Central Menu Area 2. Prerequisite: Biology core or consent of instructor.

3-4 units, not given this year

**BIO 243. Evolution**

(Same as BIO 143) The basic facts and principles of the evolution of all life. The logic of and evidence for the correctness of Darwin's argument for evolution by natural selection. How Mendelian genetics was integrated into evolutionary thinking. The integration of physiological and ecological perspectives into the study of evolutionary adaptation within species. Species formation and evolutionary divergence among species. Patterns of evolution over long time scales. Satisfies Central Menu Area 4.

3 units, Aut (Watt, W)

**BIO 244. Fundamentals of Molecular Evolution**

(Same as BIO 113) The inference of key molecular evolutionary processes from DNA and protein sequences. Topics include random genetic drift, coalescent models, effects and tests of natural selection, combined effects of linkage and natural selection, codon bias and genome evolution. Satisfies Central Menu Areas 1 or 4. Prerequisites: Biology core or graduate standing in any department, and consent of instructor.

4 units, not given this year

**BIO 245. Behavioral Ecology**

(Same as BIO 145) Animal behavior from an evolutionary and ecological perspective. Topics: foraging, territoriality, reproductive behavior, social groups. Lecture/seminar format; seminars include discussion of journal articles. Independent research projects. Satisfies Central Menu Area 4 for Bio majors. Prerequisites: Biology or Human Biology core, or consent of instructor. Recommended: statistics. Satisfies WIM in Biology.

4 units, alternate years, not given this year

**BIO 249. The Neurobiology of Sleep**

(Same as BIO 149, HUMBIO 161) Preference to seniors and graduate students. The neurochemistry and neurophysiology of changes in brain activity and conscious awareness associated with changes in the sleep/wake state. Behavioral and neurobiological phenomena including sleep regulation, sleep homeostasis, circadian rhythms, sleep disorders, sleep function, and the molecular biology of sleep. Enrollment limited to 16.

4 units, Win (Heller, C), alternate years, not given next year

**BIO 250. Human Behavioral Biology**

(Same as BIO 150, HUMBIO 160) Multidisciplinary. How to approach complex normal and abnormal behaviors through biology. How to integrate disciplines including sociobiology, ethology, neuroscience, and endocrinology to examine behaviors such as aggression, sexual behavior, language use, and mental illness.

5 units, Spr (Sapolsky, R), alternate years, not given next year

**BIO 254. Molecular and Cellular Neurobiology**

(Same as NBIO 254) For graduate students. Includes lectures for BIO 154. Cellular and molecular mechanisms in the organization and functions of the nervous system. Topics: wiring of the neuronal circuit, synapse structure and synaptic transmission, signal transduction in the nervous system, sensory systems, molecular basis of behavior including learning and memory, molecular pathogenesis of neurological diseases.

5 units, alternate years, not given this year

**BIO 256. Epigenetics**

(Same as BIO 156, GENE 206, PATH 206) For graduate students in the Biosciences and upper level Biology undergraduates. Mechanisms by which phenotypes not determined by the DNA sequence are stably inherited in successive cell divisions. From the discovery of position-effect variegation in *Drosophila* in the 1920s to present-day studies of covalent modifications of histones and DNA methylation. Topics include: position effect, gene silencing, heterochromatin, centromere identity, genomic imprinting, histone code, variant histones, and the role of epigenetics in cancer. Prerequisite: BIO41 and BIO42, or GENE 203, or consent of instructor.

2 units, alternate years, not given this year

**BIO 257. Biochemistry and Molecular Biology of Plants**

(Same as BIO 157) Biochemical and molecular basis of plant growth and adaptation. Topics include: hormone signal transduction; photoreceptor chemistry and signaling; metabolite sensing and transport; dynamics of photosynthesis; plant innate immunity and symbiosis. Lectures and readings will emphasize research methods. Prerequisite: Biology core or equivalent, or consent of instructor.

3-4 units, alternate years, not given this year

**BIO 258. Developmental Neurobiology**

(Same as BIO 158) For advanced undergraduates and coterminal students. The principles of nervous system development from the molecular control of patterning, cell-cell interactions, and trophic factors to the level of neural systems and the role of experience in influencing brain structure and function. Topics: neural induction and patterning cell lineage, neurogenesis, neuronal migration, axonal pathfinding, synapse elimination, the role of activity, critical periods, and the development of behavior. Satisfies Central Menu Areas 2 or 3. Prerequisite: BIO 42 or equivalent.

4 units, alternate years, not given this year

**BIO 263. Neural Systems and Behavior**

(Same as BIO 163, HUMBIO 163) The field of neuroethology and its vertebrate and invertebrate model systems. Research-oriented. Readings include reviews and original papers. How animal brains compare; how neural circuits are adapted to species-typical behavior; and how the sensory worlds of different species represent the world. Lectures and required discussions. Satisfies Central Menu Area 3 for Bio majors. Prerequisites: BIO 42, HUMBIO 4A.

4 units, Aut (Fernald, R), alternate years, not given next year

**BIO 264. Biosphere-Atmosphere Interactions**

(Same as BIO 164) Physiological, ecological, and physical aspects of ecosystem function, emphasizing how ecosystems influence and are influenced by the atmosphere. Prerequisites: 42, 43; or consent of instructor.

4 units, alternate years, not given this year

**BIO 266. Faunal Analysis: Animal Remains for the Archaeologist**

(Same as ANTHRO 113, ANTHRO 213, BIO 166) The analysis of fossil animal bones and shells to illuminate the behavior and ecology of prehistoric collectors, especially ancient humans. Theoretical and methodological issues. The identification, counting, and measuring of fossil bones and shells. Labs. Methods of numerical analysis.

5 units, not given this year

**BIO 267. Molecular Mechanisms of Neurodegenerative Disease**

(Same as NENS 267) The epidemic of neurodegenerative disorders such as Alzheimer's and Parkinson's disease occasioned by an aging human population. Genetic, molecular, and cellular mechanisms. Clinical aspects through case presentations.

4 units, Win (Kopito, R; Wyss-Coray, A; Reimer, R), alternate years, not given next year

**BIO 272. Molecular Basis of Body Plan Evolution**

(Same as BIO 172) Developmental biology research, from arthropods and chordates, over the past 25 years has revealed astonishing levels of shared developmental similarities, despite large morphological differences between the two groups, and has led to speculation about the morphology of the earliest animals. This has led to a synthesis between developmental biology, zoology, and paleontology and sparked molecular developmental studies in diverse metazoan phyla. Focus is on the latest findings from comparative development and what they reveal about the early evolution of the animal phyla.

4 units, Spr (Lowe, C)

**BIO 274S. Hopkins Microbiology Course**

(Same as BIOHOPK 274, CEE 274S, EESS 253S) (Formerly GES 274S.) Four-week, intensive. The interplay between molecular, physiological, ecological, evolutionary, and geochemical processes that constitute, cause, and maintain microbial diversity. How to isolate key microorganisms driving marine biological and geochemical diversity, interpret culture-independent molecular characterization of microbial species, and predict causes and consequences. Laboratory component: what constitutes

physiological and metabolic microbial diversity; how evolutionary and ecological processes diversify individual cells into physiologically heterogeneous populations; and the principles of interactions between individuals, their population, and other biological entities in a dynamically changing microbial ecosystem. Prerequisites: CEE 274A,B, or equivalents.

9-12 units, Sum (Staff)

**BIO 277. Plant Microbe Interaction**

(Same as BIO 177) Molecular basis of plant symbiosis and pathogenesis. Topics include mechanisms of recognition and signaling between microbes and plant hosts, with examples such as the role of small molecules, secreted peptides, and signal transduction pathways in symbiotic or pathogenic interactions. Readings include landmark papers together with readings in the contemporary literature. Prerequisites: Biology core and two or more upper division courses in genetics, molecular biology, or biochemistry. Recommended: plant genetics or plant biochemistry.

3 units, Spr (Long, S; Mudgett, M), alternate years, not given next year

**BIO 278. Microbiology Literature**

(Same as BIO 178) For advanced undergraduates and first-year graduate students. Critical reading of the research literature in prokaryotic genetics and molecular biology, with particular applications to the study of major human pathogens. Classic and foundational papers in pathogenesis, genetics, and molecular biology; recent literature on bacterial pathogens such as Salmonella, Vibrio, and/or Yersinia. Diverse experimental approaches: biochemistry, genomics, pathogenesis, and cell biology. Prerequisites: Biology Core and two upper-division courses in genetics, molecular biology, or biochemistry.

3 units, not given this year

**BIO 282. Modeling Cultural Evolution**

(Same as BIO 182) Seminar. Quantitative models for the evolution of socially transmitted traits. Rates of change of learned traits in populations and patterns of cultural diversity as a function of innovation and cultural transmission. Learning in constant and changing environments. Possible avenues for gene-culture coevolution.

3 units, Win (Feldman, M)

**BIO 283. Theoretical Population Genetics**

(Same as BIO 183) Models in population genetics and evolution. Selection, random drift, gene linkage, migration, and inbreeding, and their influence on the evolution of gene frequencies and chromosome structure. Models are related to DNA sequence evolution. Prerequisites: calculus and linear algebra, or consent of instructor.

3 units, Spr (Feldman, M), alternate years, not given next year

**BIO 286. Natural History of the Vertebrates**

(Same as BIO 186) Broad survey of the diversity of vertebrate life. Discussion of the major branches of the vertebrate evolutionary tree, with emphasis on evolutionary relationships and key adaptations as revealed by the fossil record and modern phylogenetics. Modern orders introduced through an emphasis on natural history, physiology, behavioral ecology, community ecology, and conservation. Lab sessions focused on comparative skeletal morphology through hands-on work with skeletal specimens. Discussion of field methods and experience with our local vertebrate communities through field trips to several of California's distinct biomes. Prerequisite: Biology core.

4 units, not given this year

**BIO 288. Biochemistry I**

(Same as BIO 188, CHEMENG 181, CHEMENG 281, CHEM 181) (CHEMENG offerings formerly listed as 188/288.) Chemistry of major families of biomolecules including proteins, nucleic acids, carbohydrates, lipids, and cofactors. Structural and mechanistic analysis of properties of proteins including molecular recognition, catalysis, signal transduction, membrane transport, and harvesting of energy from light. Molecular evolution. Satisfies Central Menu Area 1 for Bio majors. Prerequisites: CHEM 33, 35, 131, and 135 or 171.

3 units, Aut (Cegelski, L)

**BIO 289. Biochemistry II**

(Same as BIO 189, CHEMENG 183, CHEMENG 283, CHEM 183) Focus on metabolic biochemistry: the study of chemical

reactions that provide the cell with the energy and raw materials necessary for life. Topics include glycolysis, gluconeogenesis, the citric acid cycle, oxidative phosphorylation, photosynthesis, the pentose phosphate pathway, and the metabolism of glycogen, fatty acids, amino acids, and nucleotides as well as the macromolecular machines that synthesize RNA, DNA, and proteins. Medical relevance is emphasized throughout. Satisfies Central Menu Area 1 for Bio majors. Prerequisite: BIO 188/288 or CHEM 181 or CHEMENG 181/281 (formerly 188/288).

3 units, Win (Dunn, A)

#### **BIO 290. Teaching of Biology**

Open to upper-division undergraduates and graduate students. Practical experience in teaching lab biology or serving as an assistant in a lecture course. May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

#### **BIO 291. Development and Teaching of Core Experimental Laboratories**

Preparation for teaching the core experimental courses (44X and 44Y). Emphasis is on lab, speaking, and writing skills. Focus is on updating the lab to meet the changing technical needs of the students. Taken prior to teaching either of the above courses. May be repeated for credit. Prerequisite: selection by instructor.

1-2 units, Aut (Malladi, S), Win (Malladi, S)

#### **BIO 294. Cellular Biophysics**

(Same as APPPHYS 294) Physical biology of dynamical and mechanical processes in cells. Emphasis is on qualitative understanding of biological functions through quantitative analysis and simple mathematical models. Sensory transduction, signaling, adaptation, switches, molecular motors, actin and microtubules, motility, and circadian clocks. Prerequisites: differential equations and introductory statistical mechanics.

3 units, alternate years, not given this year

#### **BIO 299. Biology PhD Lab Rotation**

Limited to first year Biology PhD students. Lab rotations with Biosciences faculty.

1-10 units, Aut (Nelson, W), Win (Nelson, W)

#### **BIO 300. Graduate Research**

For graduate students only. Individual research by arrangement with in-department instructors.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **BIO 300X. Out-of-Department Graduate Research**

Individual research by arrangement with out-of-department instructors. Master's students: credit for work arranged with out-of-department instructors is restricted to Biology students and requires approved department petition. See <http://biohonors.stanford.edu> for more information. May be repeated for credit.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **BIO 301. Frontiers in Biology**

Limited to and required of first-year Ph.D. students in molecular, cellular, and developmental biology. Current research in molecular, cellular, and developmental biology emphasizing primary research literature. Held in conjunction with the department's Monday seminar series. Students and faculty meet weekly before the seminar for a student presentation and discussion of upcoming papers.

1-3 units, Aut (Morrison, A; Skotheim, J), Win (Morrison, A; Skotheim, J)

#### **BIO 302. Current Topics and Concepts in Population Biology, Ecology, and Evolution**

Required of first-year PhD students in population biology, and ecology and evolution. Major conceptual issues and developing topics.

1 unit, Aut (Hadly, E)

#### **BIO 303. Current Topics and Concepts in Population Biology, Ecology, and Evolution**

Required of first-year PhD students in population biology, and ecology and evolution. Major conceptual issues and developing topics.

1 unit, Win (Hadly, E)

#### **BIO 304. Current Topics and Concepts in Population Biology, Ecology, and Evolution**

Required of first-year PhD students in population biology, and ecology and evolution. Major conceptual issues and developing topics.

1 unit, Spr (Hadly, E)

#### **BIO 306. Current Topics in Integrative Organismal Biology**

Limited to and required of graduate students doing research in this field. At Hopkins Marine Station.

1 unit, Aut (Sapolsky, R)

#### **BIO 312. Ethical Issues in Ecology and Evolutionary Biology**

Focus is on ethical issues addressed in Donald Kennedy's Academic Duty and others of importance to academics and scientists in the fields of ecology, behavior, and evolutionary biology. Discussions led by faculty and outside guests. Satisfies ethics course requirement for ecology and evolutionary biology. Prerequisite: PhD student in the ecology and evolutionary biology or marine program, or consent of instructor.

1 unit, Aut (Ehrlich, P)

#### **BIO 315. Seminar in Biochemical Evolution**

Literature review and discussion of current topics in biochemical evolution and molecular evolutionary genetics. Prerequisite: consent of instructor.

1-3 units, Aut (Watt, W), Win (Watt, W)

#### **BIO 321. Ecological Genetics**

Systematic exploration of (1) the types of questions that can be addressed by ecological genetics techniques (i.e., community genomics, genetic variation between species in the same ecosystem, resource use, landscape genetics, etc.); (2) laboratory techniques available; and (3) analyses and modeling best suited for ecological genetics questions. Analysis of specific research problems and efforts (now underway or planned for the near future) among seminar participants, and discussion of these efforts with group review of the relative merits of alternative approaches.

1-3 units, Aut (Daily, G; Hadly, E)

#### **BIO 323. Detecting Climate-Driven Changes in California Plant Ranges**

Seminar. For advanced undergraduates and graduate students. Future anthropogenic climate change will continue to alter plant communities, plant ranges, and ecosystems. Studies have already documented plant and animal range shifts across the globe, yet many questions remain as to how plants will respond to climate change. Which taxa and functional groups will be most sensitive to changes in climate? What will happen to ecological communities with differential response of plant species to climate? Focus is on analyzing trends in climate change and long-term plant distribution data in California. May be repeated for credit. Prerequisite: familiarity with statistical, spatial, or modeling analyses.

1-2 units, not given this year

#### **BIO 324. Interpreting Ecological Data**

Experimental design and the theory behind and appropriate use of parametric statistics including: student t-test; analysis of variance; linear regression and some variations including logistic regression and multiple regression; analysis of covariance; chi-squared similarity test; testing the independence of multiple tests; Monte Carlo and bootstrapping methods. Students encouraged to use data from their own research. Course does not fulfill undergraduate statistics requirement. Prerequisite: consent of instructor.

4 units, not given this year

#### **BIO 325. The Evolution of Body Size**

(Same as GES 325) Preference to graduate students and upper-division undergraduates in GES and Biology. The influence of organism size on evolutionary and ecological patterns and processes. Focus is on integration of theoretical principles, observations of living organisms, and data from the fossil record. What are the physiological and ecological correlates of body size? Is there an optimum size? Do organisms tend to evolve to larger size? Does productivity control the size distribution of consumers? Does size affect the likelihood of extinction or speciation? How does size scale from the genome to the phenotype? How is metabolic rate involved in evolution of body size? What is the influence of geographic area on maximum body size?

2 units, Win (Hadly, E; Payne, J)

**BIO 326. Foundations in Biogeography**

Seminar. Focus on classic papers covering the global distribution and abundance of organisms through time. Topics include: phylogenetics, phylogeography, plate tectonics, island biogeography, climatic change, dispersal, vicariance, ecology of invasions, extinction, gradients, diversity, conservation and a history of the field.

2 units, not given this year

**BIO 342. Plant Biology Seminar**

Topics announced at the beginning of each quarter. Current literature. May be repeated for credit. See <http://carnegiedpb.stanford.edu/seminars/seminars.php>.

1-3 units, Aut (Long, S), Win (Walbot, V), Spr (Long, S)

**BIO 346. Advanced Seminar on Prokaryotic Molecular Biology**

Enrollment limited to PhD students associated with departmental research groups in genetics or molecular biology.

1 unit, Aut (Long, S; Spormann, A; Huang, K), Win (Long, S; Spormann, A; Huang, K)

**BIO 375. Field Ecology & Conservation**

This course is based on question-driven research in the field, addressing both conceptual frameworks and methodological aspects of evolutionary ecology and conservation biology. It consists of faculty-led research projects and student independent projects. The field part takes place in a tropical rain forest research station in Mexico September 6-16, 2011. The field component is followed by sessions on campus, where the research data are analyzed, discussed and prepared as scientific papers. The training includes presentations of the papers in a mini-symposium organized as a professional meeting.

4 units, Aut (Dirzo, R)

**BIO 383. Seminar in Population Genetics**

Literature review, research, and current problems in the theory and practice of population genetics and molecular evolution. May be repeated for credit. Prerequisite: consent of instructor.

1-3 units, Aut (Feldman, M), Spr (Feldman, M)

**BIO 384. Theoretical Ecology**

Recent and classical research papers in ecology, and presentation of work in progress by participants. Prerequisite: consent of instructor.

1-3 units, not given this year

**BIO 388. Communication and Leadership Skills**

(Same as ENVRES 210) Focus is on delivering information to policy makers and the lay public. How to speak to the media, Congress, and the general public; how to write op-eds and articles; how to package ideas including titles, abstracts, and CVs; how to survive peer review, the promotion process, and give a job talk; and how to be a responsible science advocate.

2 units, not given this year

**BIO 390. Topics in Biology**

Seminar. Topics in biology ranging from neurobiology to ecology.

1 unit, Win (Simoni, R)

**BIO 459. Frontiers in Interdisciplinary Biosciences**

(Same as BIOC 459, BIOE 459, CHEMENG 459, CHEM 459, PSYCH 459) Students register through their affiliated department; otherwise register for CHEMENG 459. For specialists and non-specialists. Sponsored by the Stanford BioX Program. Three seminars per quarter address scientific and technical themes related to interdisciplinary approaches in bioengineering, medicine, and the chemical, physical, and biological sciences. Leading investigators from Stanford and the world present breakthroughs and endeavors that cut across core disciplines. Pre-seminars introduce basic concepts and background for non-experts. Registered students attend all pre-seminars; others welcome. See <http://biox.stanford.edu/courses/459.html>. Recommended: basic mathematics, biology, chemistry, and physics.

1 unit, Aut (Robertson, C), Win (Robertson, C), Spr (Robertson, C)

**BIO 801. TGR Project**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**BIO 802. TGR Dissertation**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

# BIOLOGY, HOPKINS MARINE STATION (BIOHOPK) COURSES

## UNDERGRADUATE COURSES IN BIOLOGY, HOPKINS MARINE STATION

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**BIOHOPK 43. Plant Biology, Evolution, and Ecology**

Introduction to biology in a marine context. Principles of plant biology: physiology, structure, diversity. Principles of evolution: macro and microevolution, population genetics. Ecology: the principles governing the distribution and abundance of organisms; population, community, and ecosystem ecology. Equivalent to BIO 43. Corequisite: BIOHOPK 44Y. GER: DB-NatSci

5 units, Spr (Denny, M; Palumbi, S; Watanabe, J)

**BIOHOPK 44Y. Core Laboratory in Plant Biology, Ecology and Evolution**

Laboratory and field projects provide working familiarity with the concepts, organisms, and techniques of plant and evolutionary biology, and ecology. Emphasis is on hands-on experimentation in the marine environment, analysis of data, and written and oral presentation of the experiments. Equivalent to BIO 44Y. Corequisite: BIOHOPK 43. Satisfies WIM in Biology. GER: DB-NatSci, WIM

5 units, Spr (Denny, M; Palumbi, S; Watanabe, J)

**BIOHOPK 161H. Invertebrate Zoology**

(Same as BIOHOPK 261H) (Graduate students register for 261H.) Survey of invertebrate diversity emphasizing form and function in a phylogenetic framework. Morphological diversity, life histories, physiology, and ecology of the major invertebrate groups, concentrating on local marine forms as examples. Current views on the phylogenetic relationships and evolution of the invertebrates. Lectures, lab, plus field trips. Satisfies Central Menu Area 3 for Bio majors. Prerequisite: Biology core or consent of instructor. GER: DB-NatSci

5 units, Win (Watanabe, J)

**BIOHOPK 162H. Comparative Animal Physiology**

(Same as BIOHOPK 262H) (Graduate students register for 262H.) How animals work. Topics: physiology of respiration, circulation, energy metabolism, thermal regulation, osmotic regulation, muscle physiology, and locomotion. Evolutionary and ecological physiology. Lectures, lab, and field research. An option to combine the course work with a more intensive research focus, with more units, is available. Satisfies Central Menu Area 3 for Bio majors. Prerequisite: Biology core or consent of instructor. GER: DB-NatSci

5-8 units, Spr (Block, B), not given next year

**BIOHOPK 163H. Oceanic Biology**

(Same as BIOHOPK 263H) (Graduate students register for 263H.) How the physics and chemistry of the oceanic environment affect marine plants and animals. Topics: seawater and ocean circulation, separation of light and nutrients in the two-layered ocean, oceanic food webs and trophic interactions, oceanic environments, biogeography, and global change. Lectures, discussion, and field trips. Satisfies Central Menu Area 4 for Bio majors. Recommended: PHYSICS 21 or 51, CHEM 31, Biology core, or consent of instructor. GER: DB-NatSci

4 units, Win (Denny, M)

**BIOHOPK 171H. Ecological and Evolutionary Physiology**

(Same as BIOHOPK 271H) (Graduate students register for 271H.) The interplay between environmental factors, such as temperature, light, nutrient supply, salinity, and oxygen availability, and adaptive change at the physiological level. Emphasis is on marine species and the roles played by physiological adaptations in establishing their distribution and performance. Satisfies Central Menu Area 3 for Bio majors. Prerequisite: Biology core or consent of instructor. GER: DB-NatSci

4 units, Spr (Somero, G)

**BIOHOPK 172H. Marine Ecology**

(Same as BIOHOPK 272H) (Graduate students register for 272H.)

Focus is on quantitative approaches to questions in marine ecology and ecophysiology. Statistical methods, including multivariate statistical approaches and meta-analysis. Satisfies Central Menu Area 4 for Bio majors. Prerequisite: Biology core or consent of instructor. GER: DB-NatSci

*5 units, Win (Micheli, F)*

#### **BIOHOPK 173H. Marine Conservation Biology**

(Same as BIOHOPK 273H) (Graduate students register for 273H.) The science of preserving marine diversity. Goal is to introduce students to major conservation issues associated with marine ecosystems. Topics include decline of open ocean fisheries, salmon conservation, bycatch issues in fisheries, use of marine reserves, marine invasions, marine pollution, and global warming. Includes five lecturers from other universities who specialize in marine conservation.

*1-3 units, Spr (Block, B)*

#### **BIOHOPK 174H. Experimental Design and Probability**

(Same as BIOHOPK 274H) (Graduate students register for 274H.) Variability is an integral part of biology. Introduction to probability and its use in designing experiments to address biological problems. Focus is on analysis of variance, when and how to use it, why it works, and how to interpret the results. Design of complex, but practical, asymmetrical experiments and environmental impact studies, and regression and analysis of covariance. Computer-based data analysis. Prerequisite: Biology core or consent of instructor. GER: DB-NatSci

*3 units, Spr (Watanabe, J)*

#### **BIOHOPK 184H. Holistic Biology: Monterey Bay and the Sea of Cortez**

(Same as BIOHOPK 284H) (Graduate students register for 284H.) For majors and non-majors. Complexity in natural systems from complementary points of view, including scientific, historical, philosophical, and literary. The work and writings of Ed Ricketts and John Steinbeck and historical and contemporary works concerning marine ecology and fisheries. Field work, laboratory studies with living invertebrates, and an individual research project. Course includes a component in Baja California, Mexico. Only 6 units may count towards the Biology major. Satisfies WIM in Biology. GER: DB-NatSci

*16 units, Spr (Gilly, W), alternate years, not given next year*

#### **BIOHOPK 187H. Sensory Ecology**

(Same as BIOHOPK 287H) (Graduate students register for 287H.) Topics: the ways animals receive, filter, and process information gleaned from the environment, sensory receptor mechanisms, neural processing, specialization to life underwater, communication within and between species, importance of behavior to ecosystem structure and dynamics, impact of acoustic and light pollution on marine animals. Emphasis is on the current scientific literature. The laboratory portion of the class explores sensory mechanisms using neurobiological methods and methods of experimental animal behavior.

*4 units, Win (Thompson, S)*

#### **BIOHOPK 198H. Directed Instruction or Reading**

May be taken as a prelude to research and may also involve participation in a lab or research group seminar and/or library research. Credit for work arranged with out-of-department instructors restricted to Biology majors and requires department approval. May be repeated for credit. (Staff)

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **BIOHOPK 199H. Undergraduate Research**

Qualified undergraduates undertake individual work in the fields listed under 300H. Arrangements must be made by consultation or correspondence.

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **BIOHOPK 166H. Molecular Ecology**

(Same as BIOHOPK 266H) (Graduate students register for 266H.) How modern technologies in gene sequencing, detection of nuclear nucleotide polymorphisms, and other approaches are used to gather data on genetic variation that allow measurement of population structure, infer demographic histories, inform conservation efforts, and advance understanding of the ecology of diverse types of organisms. GER: DB-NatSci

*5 units, not given this year*

#### **BIOHOPK 167H. Nerve, Muscle, and Synapse**

(Same as BIOHOPK 267H) (Graduate students register for 267H.) Fundamental aspects of membrane excitability, nerve conduction, synaptic transmission, and excitation-contraction coupling. Emphasis is on biophysical, molecular, and cellular level analyses of these processes in vertebrate and invertebrate systems. Labs on intra- and extracellular recording and patch clamp techniques. Lectures, discussions, and labs. Satisfies Central Menu Area 3 for Bio majors Prerequisites: PHYSICS 23, 28, 43, or equivalent; CHEM 31, 135; calculus; or consent of instructor. GER: DB-NatSci

*5 units, alternate years, not given this year*

#### **BIOHOPK 182H. Stanford at Sea**

(Same as BIOHOPK 323H, EARTHSYS 323, EESS 323) (Graduate students register for 323H.) Five weeks of marine science including oceanography, marine physiology, policy, maritime studies, conservation, and nautical science at Hopkins Marine Station, followed by five weeks at sea aboard a sailing research vessel in the Pacific Ocean. Shore component comprised of three multidisciplinary courses meeting daily and continuing aboard ship. Students develop an independent research project plan while ashore, and carry out the research at sea. In collaboration with the Sea Education Association of Woods Hole, MA. Only 6 units may count towards the Biology major. GER: DB-NatSci

*16 units, alternate years, not given this year*

#### **BIOHOPK 185H. Ecology and Conservation of Kelp Forest Communities**

(Same as BIOHOPK 285H) Eight week course. Daily lectures, labs, and scuba dives focused on kelp forest communities. Physical environment, identification, and natural history of resident organisms; ecological processes that maintain biodiversity and community organization; field methods, data analysis, and research diving techniques. Field research component contribute to ongoing studies associated with Hopkins Marine Life Observatory. Training meets requirements for Stanford scientific diver certification. Satisfies Central Menu Area 4 for Bio majors. Prerequisites: BIO 42 and 43, or BIO 42 and BIOHOPK 43, or consent of instructor; and advanced scuba certification and scuba equipment.

*10-12 units, Sum (Staff)*

## **GRADUATE COURSES IN BIOLOGY, HOPKINS MARINE STATION**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **BIOHOPK 261H. Invertebrate Zoology**

(Same as BIOHOPK 161H) (Graduate students register for 261H.) Survey of invertebrate diversity emphasizing form and function in a phylogenetic framework. Morphological diversity, life histories, physiology, and ecology of the major invertebrate groups, concentrating on local marine forms as examples. Current views on the phylogenetic relationships and evolution of the invertebrates. Lectures, lab, plus field trips. Satisfies Central Menu Area 3 for Bio majors. Prerequisite: Biology core or consent of instructor.

*5 units, Win (Watanabe, J)*

#### **BIOHOPK 262H. Comparative Animal Physiology**

(Same as BIOHOPK 162H) (Graduate students register for 262H.) How animals work. Topics: physiology of respiration, circulation, energy metabolism, thermal regulation, osmotic regulation, muscle physiology, and locomotion. Evolutionary and ecological physiology. Lectures, lab, and field research. An option to combine the course work with a more intensive research focus, with more units, is available. Satisfies Central Menu Area 3 for Bio majors. Prerequisite: Biology core or consent of instructor.

*5-8 units, Spr (Block, B), not given next year*

#### **BIOHOPK 263H. Oceanic Biology**

(Same as BIOHOPK 163H) (Graduate students register for 263H.) How the physics and chemistry of the oceanic environment affect marine plants and animals. Topics: seawater and ocean circulation, separation of light and nutrients in the two-layered ocean, oceanic food webs and trophic interactions, oceanic environments, biogeography, and global change. Lectures, discussion, and field trips. Satisfies Central Menu Area 4 for Bio majors.

Recommended: PHYSICS 21 or 51, CHEM 31, Biology core, or consent of instructor.

4 units, Win (Denny, M)

**BIOHOPK 271H. Ecological and Evolutionary Physiology**

(Same as BIOHOPK 171H) (Graduate students register for 271H.) The interplay between environmental factors, such as temperature, light, nutrient supply, salinity, and oxygen availability, and adaptive change at the physiological level. Emphasis is on marine species and the roles played by physiological adaptations in establishing their distribution and performance. Satisfies Central Menu Area 3 for Bio majors. Prerequisite: Biology core or consent of instructor.

4 units, Spr (Somero, G)

**BIOHOPK 272H. Marine Ecology**

(Same as BIOHOPK 172H) (Graduate students register for 272H.) Focus is on quantitative approaches to questions in marine ecology and ecophysiology. Statistical methods, including multivariate statistical approaches and meta-analysis. Satisfies Central Menu Area 4 for Bio majors. Prerequisite: Biology core or consent of instructor.

5 units, Win (Micheli, F)

**BIOHOPK 273H. Marine Conservation Biology**

(Same as BIOHOPK 173H) (Graduate students register for 273H.) The science of preserving marine diversity. Goal is to introduce students to major conservation issues associated with marine ecosystems. Topics include decline of open ocean fisheries, salmon conservation, bycatch issues in fisheries, use of marine reserves, marine invasions, marine pollution, and global warming. Includes five lecturers from other universities who specialize in marine conservation.

1-3 units, Spr (Block, B)

**BIOHOPK 274H. Experimental Design and Probability**

(Same as BIOHOPK 174H) (Graduate students register for 274H.) Variability is an integral part of biology. Introduction to probability and its use in designing experiments to address biological problems. Focus is on analysis of variance, when and how to use it, why it works, and how to interpret the results. Design of complex, but practical, asymmetrical experiments and environmental impact studies, and regression and analysis of covariance. Computer-based data analysis. Prerequisite: Biology core or consent of instructor.

3 units, Spr (Watanabe, J)

**BIOHOPK 275H. Synthesis in Ecology**

Introduction to frameworks and approaches to synthesizing large data sets, including meta-analysis and permutational multivariate analysis of variance. Hands-on data analysis sessions. May be repeated for credit.

2 units, Win (Micheli, F)

**BIOHOPK 284H. Holistic Biology: Monterey Bay and the Sea of Cortez**

(Same as BIOHOPK 184H) (Graduate students register for 284H.) For majors and non-majors. Complexity in natural systems from complementary points of view, including scientific, historical, philosophical, and literary. The work and writings of Ed Ricketts and John Steinbeck and historical and contemporary works concerning marine ecology and fisheries. Field work, laboratory studies with living invertebrates, and an individual research project. Course includes a component in Baja California, Mexico. Only 6 units may count towards the Biology major. Satisfies WIM in Biology.

16 units, Spr (Gilly, W), alternate years, not given next year

**BIOHOPK 287H. Sensory Ecology**

(Same as BIOHOPK 187H) (Graduate students register for 287H.) Topics: the ways animals receive, filter, and process information gleaned from the environment, sensory receptor mechanisms, neural processing, specialization to life underwater, communication within and between species, importance of behavior to ecosystem structure and dynamics, impact of acoustic and light pollution on marine animals. Emphasis is on the current scientific literature. The laboratory portion of the class explores sensory mechanisms using neurobiological methods and methods of experimental animal behavior.

4 units, Win (Thompson, S)

**BIOHOPK 290H. Teaching of Biological Science**

Open to upper-division undergraduates and graduate students. Practical experience in teaching lab biology or serving as an assistant in a lecture course. Prerequisite: consent of instructor. (Staff)

1-15 units, Win (Staff), Spr (Staff), Sum (Staff)

**BIOHOPK 300H. Research**

Graduate study involving original work undertaken with staff in the fields indicated. B. Block: Comparative Vertebrate Physiology (biomechanics, metabolic physiology and phylogeny of pelagic fishes, evolution of endothermy); L. Crowder: Marine ecology, fisheries, bycatch, integrating science and policy, marine conservation; M. Denny: Biomechanics (the mechanical properties of biological materials and their consequences for animal size, shape, and performance); W. Gilly: Neurobiology (analysis of giant axon systems in marine invertebrates from molecular to behavioral levels); C. Lowe: Evolution of Development (origin of chordates, early evolution of body plans); F. Micheli: Marine Ecology (species interactions and community ecology, scale-dependent aspects of community organization, marine conservation and design of multi-species marine protected areas, behavioral ecology); S. Palumbi: Molecular Evolution (mechanisms of speciation, genetic differentiations of populations, use of mole

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**BIOHOPK 801H. TGR Project**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**BIOHOPK 802H. TGR Dissertation**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**BIOHOPK 264H. POPULATION GENOMICS**

The course will review genome-level data sets from next-generation sequencing and their use in cataloging genetic variation and gene expression. We will explore how these new data sets add to our growing understanding of the way genomes function and evolve in natural populations. The course will run in lecture/seminar format one day a week that will analyze recent papers in the field and will review emerging methods of data collection and evolutionary bioinformatics. We will spend one long weekend in the quarter preparing Illumina libraries, and finish by an analysis of these data for genetic variation and gene expression patterns. Prerequisites: graduate standing, or Molecular Ecology or Molecular Evolution.

3 units, Win (Palumbi, S)

**BIOHOPK 266H. Molecular Ecology**

(Same as BIOHOPK 166H) (Graduate students register for 266H.) How modern technologies in gene sequencing, detection of nuclear nucleotide polymorphisms, and other approaches are used to gather data on genetic variation that allow measurement of population structure, infer demographic histories, inform conservation efforts, and advance understanding of the ecology of diverse types of organisms.

5 units, not given this year

**BIOHOPK 267H. Nerve, Muscle, and Synapse**

(Same as BIOHOPK 167H) (Graduate students register for 267H.) Fundamental aspects of membrane excitability, nerve conduction, synaptic transmission, and excitation-contraction coupling. Emphasis is on biophysical, molecular, and cellular level analyses of these processes in vertebrate and invertebrate systems. Labs on intra- and extracellular recording and patch clamp techniques. Lectures, discussions, and labs. Satisfies Central Menu Area 3 for Bio majors Prerequisites: PHYSICS 23, 28, 43, or equivalent; CHEM 31, 135; calculus; or consent of instructor.

5 units, alternate years, not given this year

**BIOHOPK 268H. Molecular Ecology Data Analysis**

For graduate students. Using the primary literature to explore methods of data analysis for population patterns from genetic data such as microsatellites, SNPs, and DNA sequences. Emphasis is on using current software tools to discern patterns, and to understand underlying patterns in relation to population genetics. Prerequisite: molecular ecology or molecular evolution.

2 units, not given this year

**BIOHOPK 274. Hopkins Microbiology Course**

(Same as BIO 274S, CEE 274S, EESS 253S) (Formerly GES 274S.) Four-week, intensive. The interplay between molecular,

physiological, ecological, evolutionary, and geochemical processes that constitute, cause, and maintain microbial diversity. How to isolate key microorganisms driving marine biological and geochemical diversity, interpret culture-independent molecular characterization of microbial species, and predict causes and consequences. Laboratory component: what constitutes physiological and metabolic microbial diversity; how evolutionary and ecological processes diversify individual cells into physiologically heterogeneous populations; and the principles of interactions between individuals, their population, and other biological entities in a dynamically changing microbial ecosystem. Prerequisites: CEE 274A,B, or equivalents.

9-12 units, Sum (Staff)

### **BIOHOPK 280. Short Course on Ocean Policy**

Course will introduce graduate students in the natural and social sciences to ocean policy and governance, and how science influences public policy decisions at the international, national and state levels. Students will learn about pressing challenges to ocean health, and together with leaders in ocean science and policy, examine how science and scientists can work with the policy-making process to address these challenges. Prerequisite: consent of instructor. Course will use urgent ocean policy issues, such as ocean acidification and fisheries management, to demonstrate the complexity of ocean-related decision-making. Students will examine the roles of natural science, social science, and government institutions in ocean management. Students will have the opportunity to engage with experts in ocean science and policy, and participate in field trips, group projects, and other interactive activities. Students will also learn how to communicate with ocean policy makers and journal

3 units, Sum (Staff)

### **BIOHOPK 285H. Ecology and Conservation of Kelp Forest Communities**

(Same as BIOHOPK 185H) Eight week course. Daily lectures, labs, and scuba dives focused on kelp forest communities. Physical environment, identification, and natural history of resident organisms; ecological processes that maintain biodiversity and community organization; field methods, data analysis, and research diving techniques. Field research component contribute to ongoing studies associated with Hopkins Marine Life Observatory. Training meets requirements for Stanford scientific diver certification. Satisfies Central Menu Area 4 for Bio majors. Prerequisites: BIO 42 and 43, or BIO 42 and BIOHOPK 43, or consent of instructor; and advanced scuba certification and scuba equipment.

10-12 units, Sum (Staff)

### **BIOHOPK 323H. Stanford at Sea**

(Same as BIOHOPK 182H, EARTHSYS 323, EESS 323) (Graduate students register for 323H.) Five weeks of marine science including oceanography, marine physiology, policy, maritime studies, conservation, and nautical science at Hopkins Marine Station, followed by five weeks at sea aboard a sailing research vessel in the Pacific Ocean. Shore component comprised of three multidisciplinary courses meeting daily and continuing aboard ship. Students develop an independent research project plan while ashore, and carry out the research at sea. In collaboration with the Sea Education Association of Woods Hole, MA. Only 6 units may count towards the Biology major.

16 units, alternate years, not given this year

## BIOMEDICAL INFORMATICS (BIOMEDIN) COURSES

### UNDERGRADUATE COURSES IN BIOMEDICAL INFORMATICS

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **BIOMEDIN 109Q. Genomics: A Technical and Cultural Revolution**

(Same as GENE 109Q) Preference to sophomores. Concepts of genomics, high-throughput methods of data collection, and

computational approaches to analysis of data. The social, ethical, and economic implications of genomic science. Students may focus on computational or social aspects of genomics.

3 units, not given this year

#### **BIOMEDIN 156. Economics of Health and Medical Care**

(Same as BIOMEDIN 256, ECON 126, HRP 256) Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: demand for medical care and medical insurance; institutions in the health sector; economics of information applied to the market for health insurance and for health care; measurement and valuation of health; socioeconomic status and epidemiology; economics of obesity. Graduate students with research interests should take ECON 248. Prerequisites: ECON 50 and ECON 102A or Stats 116 or the equivalent. Recommended: ECON 51.

5 units, Aut (Bhattacharya, J)

### GRADUATE COURSES IN BIOMEDICAL INFORMATICS

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **BIOMEDIN 200. Biomedical Informatics Colloquium**

Series of colloquia offered by program faculty, students, and occasional guest lecturers. May be repeated three times for credit.

1 unit, Aut (Musen, M), Win (Musen, M), Spr (Staff)

#### **BIOMEDIN 201. Biomedical Informatics Student Seminar**

Participants report on recent articles from the Biomedical Informatics literature or their research projects. Goals are to teach critical reading of scientific papers and presentation skills. May be repeated three times for credit.

1 unit, Aut (Musen, M), Win (Musen, M), Spr (Musen, M), Sum (Musen, M)

#### **BIOMEDIN 205. Biomedical Informatics for Medicine**

Primarily for M.D. students; open to other graduate students. Emphasis is on practical applications of bioinformatics and medical informatics for medicine, health care, clinicians, and biomedical research, focused on work at Stanford. Topics may include: methods to analyze genetic conditions, integrative methods for microarray, proteomic, and genomic data to understand the etiology of disease, clinical information systems in local healthcare facilities, cellular and radiology imaging, and pharmacogenomics. Enrollment for 2 units includes weekly assignments. Non-MD students may enroll for 1 unit. May be repeated for credit. Prerequisite: background in biomedicine. Recommended: background in programming.

1-2 units, Aut (Butte, A), Spr (Staff)

#### **BIOMEDIN 206. Informatics in Industry**

Effective management, modeling, acquisition, and mining of biomedical information in healthcare and biotechnology companies and approaches to information management adopted by companies in this ecosystem. Guest speakers from pharmaceutical/biotechnology companies, clinics/hospitals, health communities/portals, instrumentation/software vendors. May be repeated for credit.

1 unit, Spr (Staff)

#### **BIOMEDIN 207. Smart Health through Digital Medicine**

The widespread use of Health IT, such as Electronic Health Records, will radically alter the practice of medicine in the coming decades. Comprised of guest lectures, site visits and project assignments, the goal of this course is to provide an understanding of which software and technology designs can advance the delivery and quality of healthcare. May be taken for 1 unit (lectures only), 2 units (lectures and site visits), or 3 units (lectures, site visits, and project).

1-3 units, Win (Das, A)

#### **BIOMEDIN 210. Modeling Biomedical Systems: Ontology, Terminology, Problem Solving**

(Same as CS 270) Methods for modeling biomedical systems and for making those models explicit in the context of building software systems. Emphasis is on intelligent systems for decision support and Semantic Web applications. Topics: knowledge representation, controlled terminologies, ontologies, reusable problem solvers, and knowledge acquisition. Recommended:

exposure to object-oriented systems, basic biology.

3 units, Win (Musen, M)

#### **BIOMEDIN 211. Smart Health through Effective Design**

(Same as CS 271) Methods of designing and engineering software systems in complex clinical environments. Case studies illustrate factors leading to success or failure of systems. Project assignments involve focused team-based design work. Topics: user and organizational requirements, data and knowledge modeling, component-based system design, system prototyping, and human-systems interaction. Prerequisite: BIOMEDIN 210 recommended, or database or object-oriented programming course.

3 units, Win (Das, A)

#### **BIOMEDIN 212. Introduction to Biomedical Informatics**

##### **Research Methodology**

(Same as BIOE 212, CS 272, GENE 212) Hands-on software building. Student teams conceive, design, specify, implement, evaluate, and report on a software project in the domain of biomedicine. Creating written proposals, peer review, providing status reports, and preparing final reports. Guest lectures from professional biomedical informatics systems builders on issues related to the process of project management. Software engineering basics. Prerequisites: BIOMEDIN 210, 211, 214, 217 or consent of instructor.

3 units, Spr (Altman, R)

#### **BIOMEDIN 214. Representations and Algorithms for**

##### **Computational Molecular Biology**

(Same as BIOE 214, CS 274, GENE 214) Topics: introduction to bioinformatics and computational biology, algorithms for alignment of biological sequences and structures, computing with strings, phylogenetic tree construction, hidden Markov models, Gibbs Sampling, basic structural computations on proteins, protein structure prediction, protein threading techniques, homology modeling, molecular dynamics and energy minimization, statistical analysis of 3D biological data, integration of data sources, knowledge representation and controlled terminologies for molecular biology, microarray analysis, machine learning (clustering and classification), and natural language text processing. Prerequisites: programming skills; consent of instructor for 3 units.

3-4 units, Aut (Altman, R)

#### **BIOMEDIN 215. Data Driven Medicine**

With the spread of electronic health records and increasingly low cost assays for patient molecular data, powerful data repositories with tremendous potential for biomedical research, clinical care and personalized medicine are being built. But these databases are large and difficult for any one specialist to analyze. To find the hidden associations within the full set of data, we introduce methods for data-mining at the internet scale, the handling of large-scale electronic medical records data for machine learning, methods in natural language processing and text-mining applied to medical records, methods for using ontologies for the annotation and indexing of unstructured content as well as semantic web technologies. Includes a programming project. See also BIOMEDIN 225, which does not include the project. Prerequisites: BIOMEDIN 210; CS 106A highly recommended; CS 345A recommended.

3 units, Aut (Shah, N)

#### **BIOMEDIN 216. Representations and Algorithms for Molecular Biology: Lectures**

Lecture component of BIOMEDIN 214. One unit for medical and graduate students who attend lectures only; may be taken for 2 units with participation in limited assignments and final project. Lectures also available via internet. Prerequisite: familiarity with biology recommended.

1-2 units, Aut (Altman, R)

#### **BIOMEDIN 217. Translational Bioinformatics**

(Same as CS 275) Analytic, storage, and interpretive methods to optimize the transformation of genetic, genomic, and biological data into diagnostics and therapeutics for medicine. Topics: access and utility of publicly available data sources; types of genome-scale measurements in molecular biology and genomic medicine; analysis of microarray data; analysis of polymorphisms, proteomics, and protein interactions; linking genome-scale data to clinical data and phenotypes; and new questions in biomedicine

using bioinformatics. Case studies. Prerequisites: programming ability at the level of CS 106A and familiarity with statistics and biology.

4 units, Spr (Butte, A)

#### **BIOMEDIN 218. Translational Bioinformatics Lectures**

Same content as BIOMEDIN 217; for medical and graduate students who attend lectures and participate in limited assignments and final project. Analytic, storage, and interpretive methods to optimize the transformation of genetic, genomic, and biological data into diagnostics and therapeutics for medicine. Topics: access and utility of publicly available data sources; types of genome-scale measurements in molecular biology and genomic medicine; analysis of microarray data; analysis of polymorphisms, proteomics, and protein interactions; linking genome-scale data to clinical data and phenotypes; and new questions in biomedicine using bioinformatics. Case studies. Prerequisites: programming at the level of CS 106A; familiarity with statistics and biology.

2 units, Spr (Staff)

#### **BIOMEDIN 219. Mathematical Models and Medical Decisions**

Analytic methods for determining the optimal diagnostic and therapeutic decisions for the care of individual patients and for the design of policies affecting the care of patient populations. Topics: utility theory and probability modeling, empirical methods for estimating disease prevalence, probability models for periodic processes, binary decision-making techniques, Markov models of dynamic disease state problems, utility assessment techniques, parametric utility models, utility models for multidimensional outcomes, analysis of time-varying clinical outcomes, and the design of cost-constrained clinical policies. 2 units requires completion of a case study project. Prerequisites: introduction to calculus and basic statistics.

1-2 units, Win (Musen, M; Higgins, M)

#### **BIOMEDIN 224. Principles of Pharmacogenomics**

Introduction to the relevant pharmacology, genomics, experimental methods for high-throughput measurements (sequencing, expression, genotyping), analysis methods for GWAS, cheminformatics, and natural language processing. Review of key gene classes (cytochromes, transporters, GPCRs), key drugs for which genetics is critical (warfarin, clopidogrel, statins, NSAIDs, neuropsychiatric drugs and cancer drugs). Also reviews resources for pharmacogenomics (PharmGKB, Drugbank, CMAP, and others) as well as issues in doing clinical implementation of pharmacogenomics testing. Reading of key papers, including student presentations of this work.; problem sets; final project selected with approval of instructor. Prerequisites: two of BIO 41, 42, 43, 44X, 44Y or consent of instructor.

3 units, Win (Altman, R; Klein, T)

#### **BIOMEDIN 225. Data Driven Medicine: Lectures**

With the spread of electronic health records and increasingly low cost assays for patient molecular data, powerful data repositories with tremendous potential for biomedical research, clinical care and personalized medicine are being built. But these databases are large and difficult for any one specialist to analyze. To find the hidden associations within the full set of data, we introduce methods for data-mining at the internet scale, the handling of large-scale electronic medical records data for machine learning, methods in natural language processing and text-mining applied to medical records, methods for using ontologies for the annotation and indexing of unstructured content as well as semantic web technologies. The final project from Biomedin 215 is not required. Prerequisites: Biomedin 210 highly recommended; CS 106A, CS 345A recommended.

2 units, Aut (Shah, N)

#### **BIOMEDIN 231. Computational Molecular Biology**

(Same as BIOC 218) Practical, hands-on approach to field of computational molecular biology. Recommended for molecular biologists and computer scientists desiring to understand the major issues concerning analysis of genomes, sequences and structures. Various existing methods critically described and strengths and limitations of each. Practical assignments utilizing tools described. All homework and coursework submitted electronically. Course webpage: <http://biochem218.stanford.edu/>.

3 units, Aut (Brutlag, D), Win (Brutlag, D), Spr (Staff)

#### **BIOMEDIN 233. Intermediate Biostatistics: Analysis of**

**Discrete Data**

(Same as HRP 261, STATS 261) Methods for analyzing data from case-control and cross-sectional studies: the 2x2 table, chi-square test, Fisher's exact test, odds ratios, Mantel-Haenzel methods, stratification, tests for matched data, logistic regression, conditional logistic regression. Emphasis is on data analysis in SAS. Special topics: cross-fold validation and bootstrap inference.

3 units, Win (Sainani, K)

**BIOMEDIN 251. Outcomes Analysis**

(Same as HRP 252) Methods of conducting empirical studies which use large existing medical, survey, and other databases to ask both clinical and policy questions. Econometric and statistical models used to conduct medical outcomes research. How research is conducted on medical and health economics questions when a randomized trial is impossible. Problem sets emphasize hands-on data analysis and application of methods, including re-analyses of well-known studies. Prerequisites: one or more courses in probability, and statistics or biostatistics.

3 units, Spr (Staff)

**BIOMEDIN 256. Economics of Health and Medical Care**

(Same as BIOMEDIN 156, ECON 126, HRP 256) Institutional, theoretical, and empirical analysis of the problems of health and medical care. Topics: demand for medical care and medical insurance; institutions in the health sector; economics of information applied to the market for health insurance and for health care; measurement and valuation of health; socioeconomic status and epidemiology; economics of obesity. Graduate students with research interests should take ECON 248. Prerequisites: ECON 50 and ECON 102A or Stats 116 or the equivalent. Recommended: ECON 51.

5 units, Aut (Bhattacharya, J)

**BIOMEDIN 260. Computational Methods for Biomedical Image Analysis and Interpretation**

(Same as RAD 260) The latest biological and medical imaging modalities and their applications in research and medicine. Focus is on computational analytic and interpretive approaches to optimize extraction and use of biological and clinical imaging data for diagnostic and therapeutic translational medical applications. Topics include major image databases, fundamental methods in image processing and quantitative extraction of image features, structured recording of image information including semantic features and ontologies, indexing, search and content-based image retrieval. Case studies include linking image data to genomic, phenotypic and clinical data, developing representations of image phenotypes for use in medical decision support and research applications and the role that biomedical imaging informatics plays in new questions in biomedical science. Includes a project. Enrollment for 3 units with reduced project requirements requires instructor consent. Prerequisites: programming ability at the

3-4 units, Spr (Staff)

**BIOMEDIN 261. Computational Methods for Biomedical Image Analysis and Interpretation: Lectures**

(Same as RAD 261) Lecture component of RAD/BIOMEDIN 260. The latest biological and medical imaging modalities and their applications in research and medicine. Focus is on computational analytic and interpretive approaches to optimize extraction and use of biological and clinical imaging data for diagnostic and therapeutic translational medical applications. Topics include major image databases, fundamental methods in image processing and quantitative extraction of image features, structured recording of image information including semantic features and ontologies, indexing, search and content-based image retrieval. Case studies include linking image data to genomic, phenotypic and clinical data, developing representations of image phenotypes for use in medical decision support and research applications and the role that biomedical imaging informatics plays in new questions in biomedical science. Prerequisites: familiarity with statistics, basic biology. Knowledge of Matlab and programming recommended.

2 units, Spr (Staff)

**BIOMEDIN 262. Computational Genomics**

(Same as CS 262) Applications of computer science to genomics, and concepts in genomics from a computer science point of view. Topics: dynamic programming, sequence alignments, hidden Markov models, Gibbs sampling, and probabilistic context-free grammars. Applications of these tools to sequence analysis:

comparative genomics, DNA sequencing and assembly, genomic annotation of repeats, genes, and regulatory sequences, microarrays and gene expression, phylogeny and molecular evolution, and RNA structure. Prerequisites: 161 or familiarity with basic algorithmic concepts. Recommended: basic knowledge of genetics.

3 units, Win (Batzoglou, S)

**BIOMEDIN 273A. A Computational Tour of the Human Genome**

(Same as CS 273A, DBIO 273A) Introduction to computational biology through an informatic exploration of the human genome. Topics include: genome sequencing (technologies, assembly, personalized sequencing); functional landscape (genes, gene regulation, repeats, RNA genes, epigenetics); genome evolution (comparative genomics, ultraconservation, co-option). Additional topics may include population genetics, personalized genomics, and ancient DNA. Course includes primers on molecular biology, the UCSC Genome Browser, and text processing languages. Guest lectures from genomic researchers. No prerequisites. See <http://cs273a.stanford.edu/>.

3 units, Aut (Batzoglou, S; Bejerano, G)

**BIOMEDIN 290. Biomedical Informatics Teaching Methods**

Hands-on training in biomedical informatics pedagogy. Practical experience in pedagogical approaches, variously including didactic, inquiry, project, team, case, field, and/or problem-based approaches. Students create course content, including lectures, exercises, and assessments, and evaluate learning activities and outcomes. Prerequisite: instructor consent.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**BIOMEDIN 299. Directed Reading and Research**

For students wishing to receive credit for directed reading or research time. Prerequisite: consent of instructor. (Staff)

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**BIOMEDIN 366. Computational Biology**

(Same as STATS 166, STATS 366) Course is designed to introduce students from the mathematical, physical and engineering sciences to selected current issues in computational biology and bioinformatics. Topics: Principles of gene expression and taxa abundance measurements by microarrays and sequencing. Kernel methods for graph gene interaction graph construction. Phylogenetic trees and their uses in microbiome studies. Computational nonparametric statistics for the analyses of real genomic studies. Assignments: weekly reading of papers and a final project.

3 units, Spr (Holmes, S)

**BIOMEDIN 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**BIOMEDIN 374. Algorithms in Biology**

(Same as CS 374) Algorithms and computational models applied to molecular biology and genetics. Topics vary annually. Possible topics include biological sequence comparison, annotation of genes and other functional elements, molecular evolution, genome rearrangements, microarrays and gene regulation, protein folding and classification, molecular docking, RNA secondary structure, DNA computing, and self-assembly. May be repeated for credit. Prerequisites: 161, 262 or 274, or BIOCHEM 218, or equivalents.

2-3 units, Aut (Batzoglou, S)

**BIOMEDIN 390A. Curricular Practical Training**

Provides educational opportunities in biomedical informatics research. Qualified biomedical informatics students engage in internship work and integrate that work into their academic program. Students register during the quarter they are employed and must complete a research report outlining their work activity, problems investigated, key results, and any follow-up on projects they expect to perform. BIOMEDIN 390A, B, and C may each be taken only once.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**BIOMEDIN 390B. Curricular Practical Training**

Provides educational opportunities in biomedical informatics research. Qualified biomedical informatics students engage in

internship work and integrate that work into their academic program. Students register during the quarter they are employed and must complete a research report outlining their work activity, problems investigated, key results, and any follow-up on projects they expect to perform. BIOMEDIN 390A, B, and C may each be taken only once.

*1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **BIOMEDIN 390C. Curricular Practical Training**

Provides educational opportunities in biomedical informatics research. Qualified biomedical informatics students engage in internship work and integrate that work into their academic program. Students register during the quarter they are employed and must complete a research report outlining their work activity, problems investigated, key results, and any follow-up on projects they expect to perform. BIOMEDIN 390A, B, and C may each be taken only once.

*1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **BIOMEDIN 432. Analysis of Costs, Risks, and Benefits of Health Care**

(Same as HRP 392) (Same as MGTECON 332) For graduate students. How to do cost/benefit analysis when the output is difficult or impossible to measure. How do M.B.A. analytic tools apply in health services? Literature on the principles of cost/benefit analysis applied to health care. Critical review of actual studies. Emphasis is on the art of practical application.

*4 units, Aut (Owens, D; Goldhaber-Fiebert, J)*

#### **BIOMEDIN 801. TGR Master's Project**

*0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **BIOMEDIN 802. TGR PhD Dissertation**

*0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## BIOPHYSICS (BIOPHYS) COURSES

### GRADUATE COURSES IN BIOPHYSICS

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **BIOPHYS 227. Functional MRI Methods**

(Same as RAD 227) Basics of functional magnetic resonance neuroimaging, including data acquisition, analysis, and experimental design. Journal club sections. Cognitive neuroscience and clinical applications. Prerequisites: basic physics, mathematics; neuroscience recommended.

*3 units, Win (Glover, G)*

#### **BIOPHYS 228. Computational Structural Biology**

(Same as SBIO 228) Interatomic forces and interactions such as electrostatics and hydrophobicity, and protein structure in terms of amino acid properties, local chain conformation, secondary structure, domains, and families of folds. How protein motion can be simulated. Bioinformatics introduced in terms of methods that compare proteins via their amino acid sequences and their three-dimensional structures. Structure prediction via simple comparative modeling. How to detect and model remote homologues. Predicting the structure of a protein from knowledge of its amino acid sequence. Via Internet.

*3 units, not given this year*

#### **BIOPHYS 232. Advanced Imaging Lab in Biophysics**

(Same as APPPHYS 232, BIO 132, BIO 232, MCP 232) Laboratory and lectures. Advanced microscopy and imaging, emphasizing hands-on experience with state-of-the-art techniques. Students construct and operate working apparatus. Topics include microscope optics, Koehler illumination, contrast-generating mechanisms (bright/dark field, fluorescence, phase contrast, differential interference contrast), and resolution limits. Laboratory topics vary by year, but include single-molecule fluorescence, fluorescence resonance energy transfer, confocal microscopy, two-photon microscopy, and optical trapping. Limited enrollment. Recommended: basic physics, Biology core or equivalent, and consent of instructor.

*4 units, Spr (Block, S; Smith, S; Stearns, T; Schnitzer, M)*

#### **BIOPHYS 241. Biological Macromolecules**

(Same as BIOC 241, SBIO 241) The physical and chemical basis of macromolecular function. Forces that stabilize biopolymers with three-dimensional structures and their functional implications. Thermodynamics, molecular forces, structure and kinetics of enzymatic and diffusional processes, and relationship to their practical application in experimental design and interpretation. Biological function and the level of individual molecular interactions and at the level of complex processes. Case studies in lecture and discussion of classic and current literature. Enrollment limited to 30. Prerequisites: None; background in biochemistry and physical chemistry preferred but material available for those with deficiency; undergraduates with consent of instructor only.

*3-5 units, Aut (Herschlag, D; Ferrell, J; Puglisi, J; Block, S; Weis, W; Garcia, K)*

#### **BIOPHYS 242. Methods in Molecular Biophysics**

(Same as SBIO 242) Experimental methods in molecular biophysics from theoretical and practical standpoints. Emphasis is on X-ray diffraction, nuclear magnetic resonance, and fluorescence spectroscopy. Prerequisite: physical chemistry or consent of instructor.

*3 units, alternate years, not given this year*

#### **BIOPHYS 250. Seminar in Biophysics**

Required of Biophysics graduate students. Presentation of current research projects and results by faculty in the Biophysics program. May be repeated for credit.

*1 unit, Aut (Weis, W)*

#### **BIOPHYS 297. Bio-Inorganic Chemistry**

(Same as CHEM 297) Overview of metal sites in biology. Metalloproteins as elaborated inorganic complexes, their basic coordination chemistry and bonding, unique features of the protein ligand, and the physical methods used to study active sites. Active site structures are correlated with function. Prerequisites: 153 and 173, or equivalents.

*3 units, not given this year*

#### **BIOPHYS 300. Graduate Research**

Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **BIOPHYS 399. Directed Reading in Biophysics**

Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **BIOPHYS 801. TGR Project**

*0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **BIOPHYS 802. TGR Dissertation**

*0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## CANCER BIOLOGY (CBIO) COURSES

### UNDERGRADUATE COURSES IN CANCER BIOLOGY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **CBIO 101. Cancer Biology**

(Same as PATH 101) Experimental approaches to understanding the origins, diagnosis, and treatment of cancer. Focus on key experiments and discoveries with emphasis on genetics, molecular biology, and cell biology. Topics include carcinogens, tumor virology, oncogenes, tumor suppressor genes, cell cycle regulation, angiogenesis, invasion and metastasis, cancer genomics, cancer epidemiology, and cancer therapies. Discussion sections based on primary research articles that describe key experiments in the field. Satisfies Central Menu Areas 1 or 2 for Bio majors. Prerequisite: Biology or Human Biology core or equivalent, or consent of instructor.

*4 units, Win (Lipsick, J)*

## GRADUATE COURSES IN CANCER BIOLOGY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### CBIO 241. Molecular, Cellular, and Genetic Basis of Cancer

Core course required for first-year Cancer Biology graduate students. Focus is on key experiments and classic primary research papers in cancer biology. Letter grade required. Undergraduates require consent of course director.

5 units, Aut (Giaccia, A; Graves, E)

### CBIO 242. Scientific Basis of Clinical Cancer Therapy

Required for first- and second-year medical students who wish to join the Cancer Biology Scholarly Concentration Program. Also open to advanced undergraduates; limited enrollment. The curriculum includes a sampling of recent biomedical research discoveries that led to the current cancer diagnosis and therapeutic treatments.

3 units, Spr (Koong, A)

### CBIO 260. Teaching in Cancer Biology

Practical experience in teaching by serving as a teaching assistant in a cancer biology course. Unit values are allotted individually to reflect the level of teaching responsibility assigned to the student.

1-10 units, Aut (Giaccia, A), Win (Lipsick, J), Spr (Staff)

### CBIO 275. Tumor Immunology

(Same as IMMUNOL 275) Focuses on the ability of innate and adaptive immune responses to recognize and control tumor growth. Topics include: tumor antigens, tumor immunosurveillance and immunoediting, tumor immunotherapy, cancer vaccines and dendritic cell therapy. Tracks the historical developments of our understanding of modulating tumor immune response and discusses their relative significance in the light of current research findings. Prerequisite: for undergraduates, human biology or biology core.

3 units, Aut (Rothbard, J; Engleman, E)

### CBIO 280. Cancer Biology Journal Club

Required of and limited to first- and second-year graduate students in Cancer Biology. Recent papers in the literature presented by graduate students. When possible, discussion relates to and precedes cancer-related seminars at Stanford. Attendance at the relevant seminar required.

1 unit, Aut (Giaccia, A), Win (Giaccia, A), Spr (Staff)

### CBIO 299. Directed Reading in Cancer Biology

Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### CBIO 399. Graduate Research

Students undertake investigations sponsored by individual faculty members. Cancer Biology Ph.D. students must register as soon as they begin dissertation-related research work.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### CBIO 801. TGR Project

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### CBIO 802. TGR Dissertation

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## CARDIOTHORACIC SURGERY (CTS) COURSES

### UNDERGRADUATE COURSES IN CARDIOTHORACIC SURGERY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### CTS 199. Undergraduate Research

Allows for qualified students to undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN CARDIOTHORACIC SURGERY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### CTS 370. Medical Scholars Research

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### CTS 399. Graduate Research

Allows for qualified students to undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## CATALAN LANGUAGE (CATLANG) COURSES

### UNDERGRADUATE COURSES IN CATALAN LANGUAGE

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### CATLANG 1A. Accelerated First-Year Catalan, Part A

For students with knowledge of another Romance language, preferably Spanish. Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Completion of 2A fulfills the University language requirement. Prerequisite: consent of instructor.

5 units, Aut (Tahmassian, L)

#### CATLANG 2A. Accelerated First-Year Catalan, Part B

For students with knowledge of another Romance language, preferably Spanish. Emphasis is on developing socially and culturally appropriate proficiency in interpersonal, interpretive, and presentational spheres. Completion of 2A fulfills the University language requirement. Prerequisite: consent of instructor.

5 units, Win (Tahmassian, L)

#### CATLANG 11A. Accelerated Second-Year Catalan, Part A

Sequence integrating culture and language of the Catalan-speaking world. Socially and culturally appropriate forms in narrations, descriptions, and expression of ideas and opinions. Emphasis is on oral and written proficiency in formal, informal, academic, and professional contexts. Prerequisite: consent of instructor.

3-5 units, Spr (Tahmassian, L)

#### CATLANG 12A. Accelerated Second-Year Catalan, Part B

Sequence integrating culture and language of the Catalan-speaking world. Socially and culturally appropriate forms in narrations, descriptions, and expression of ideas and opinions. Emphasis is on oral and written proficiency in formal, informal, academic, and professional contexts. Prerequisite: consent of instructor.

3-5 units, not given this year

#### CATLANG 199. Individual Work

May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

### GRADUATE COURSES IN CATALAN LANGUAGE

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### CATLANG 395. Graduate Studies in Catalan

May be repeated for credit. Prerequisite: consent of instructor.

2-5 units, Aut (Staff), Win (Staff), Spr (Staff)

# CENTER FOR TEACHING AND LEARNING (CTL) COURSES

## UNDERGRADUATE COURSES IN CENTER FOR TEACHING AND LEARNING

Primarily for undergraduates; graduate students may enroll with consent of adviser.

### CTL 25SI. Navigating Stanford: Optimizing Your Undergraduate Experience

Navigating Stanford aims to put you on the path to making the most out of your exciting journey at Stanford. Covering various aspects of student life--from the best places to eat and study, to how to develop meaningful and lasting relationships with professors--this course is intended to get Stanford's newest and youngest students thinking about the ways they can make the most out of the next four years. Featuring a range of guest speakers and themes, this class will give incoming freshmen the opportunity to encounter a diversity of experiences and perspectives from the people who know Stanford best: its students.

2 units, Aut (Allen, D)

### CTL 53. Working Smarter

College-level strategies and skills in time management, reading, speaking, writing, and test preparation. Students explore learning preferences to develop strategies in different academic settings.

2 units, Sum (Staff)

### CTL 100. The Next Three Years: Making the Most of Stanford

This course is designed for frosh approaching the end of year one at Stanford. The goal is to help you think more broadly and more deeply about the remainder of your Stanford undergraduate education, reflecting on what you have learned so far. Weekly meetings will consist of presentations and discussions, emphasizing an integrated approach to making the most of Stanford. The course will include guest lecturers and background readings. Aspects of a student's life that will be discussed include coursework, residential life, personal health and development, extracurricular groups, different types of relationships (friends and close others, teacher-student, advisor-advisee, peer mentoring), community and public service, and career development. The course should build your knowledge of and ability to use the many resources at Stanford designed to assist you in all these areas, as well as connecting you with the experiences of other students, helping you to peer into your own future.

1 unit, not given this year

### CTL 105. Voice and Articulation Intensive for Non-Native English Speakers

Workshop focusing on exercises designed to help foreign students improve their articulation and delivery in English. Work includes breath, sound, enunciation, melody, and colloquialism.

1-2 units, Win (Freeland, T)

### CTL 115. Voice Workshop

(Same as CTL 215) Focus is on breath, voice production, expansion of vocal range and stamina, and clarity of articulation. Geared toward public speaking including presentations, lectures, and job talks. May be taken in conjunction with CTL 117.

1-2 units, Aut (Freeland, T), Spr (Freeland, T)

### CTL 117. The Art of Effective Speaking

(Same as CTL 217) The principles and practice of effective oral communication. Through formal and informal speaking activities, students develop skills framing and articulating ideas through speech. Strategies for speaking extemporaneously, preparing and delivering multimedia presentations, formulating persuasive arguments, refining critical clarity of thought, and enhancing general facility and confidence in oral self-expression.

3 units, Aut (Freeland, T), Spr (Freeland, T)

### CTL 118. Public Speaking: Romancing the Room

A practical approach to the art of public speaking. Emphasis is on developing skills in speech types including impromptu, personal experience, interviewing, demonstration, persuasive, and special occasion. Materials include videotape, texts of famous speeches, and a final dinner program of speeches. Students evaluate

presentations by others. \$55 materials fee.

3 units, Sum (Staff)

### CTL 119. Oral Communication Tutor Teaching Practicum

Seminar. For students with a strong background in public speaking who wish to train as public speaking tutors for CTL's Oral Communication Program. Readings, exercises, and supervised teaching refine speaking skills. Preparation to serve as a peer tutor in a variety of academic disciplines. Prerequisite: application and consent of instructor.

1-3 units, Spr (Allen, D; Yeager, L)

### CTL 120. Peer Tutor Training

Goal is to help students become effective peer tutors for course material already mastered by articulating aims; developing practical tutoring skills including strategies for drop-in sessions; observing experienced tutors; discussing reading assignments; role playing; and reflecting on experiences as a peer tutor intern. Prerequisite: consent of instructor.

1 unit, Aut (Glickman, A), Win (Staff)

### CTL 125. From the Page to the Stage: The Performance of Literature

The oral interpretation of literature as performance art and mode of literary analysis. Focus is on contemporary and local expression including topics such as the Spoken Word Collective at Stanford, the ensemble performance of short works of fiction by San Francisco's Word for Word Performing Arts Company, and the storytelling art of Awele Makeba which combines theater, oral history, and music. No performance experience necessary.

3 units, not given this year

### CTL 130. Beyond Stereotype Threat: Claiming a Rightful Place in an Academic Community

(Same as PSYCH 125) Stereotype threat as mitigating the quality of a student's test performance; its impact on academic success at Stanford. How to reduce the impact of stereotype threat on Stanford students.

3 units, not given this year

### CTL 175. Intertextuality, Interpretation, and Performance

Literary and performance theories from the late 20th century to the present. The performative link between writing and speech. Students apply theories in critical writings, performances, and intertextual assemblages. How to find and refine one's own voices in writing and vocality.

4 units, not given this year

### CTL 177. Performance of Power: Oratory and Authority from the Ancient World to the Postmodern

Speech as action has long been seen as essential to leadership. Theories and examples of oratory, from Aristotle to George W. Bush, assessing each as model of voice-activated authority. The impact of mass media technologies as they transform the public space of oratory.

4 units, Win (Freeland, T)

### CTL 180. Interpersonal and Small Group Communication

(Same as CTL 280) Communication effectiveness in the contexts of dyads, the workplace, family, and society. Listening, conflict resolution, leadership, power and its implementation, group dynamics, emotions, and cultural influences on interactions. Sources include readings videos/DVDs, role playing, interviews, individual and group presentations, and group exercises.

3 units, not given this year

### CTL 190. Persuasive Speaking

(Same as CTL 290) Persuasion is the act of influencing others to see, feel, think, believe, and/or act in a way that is consistent with what the speaker or sender advocates. Persuasion seeks to engender power, and how that power is used can vary widely. How to effectively persuade others in interpersonal, family, workplace, and public spheres. How to be astute consumers of persuasive messages, including those from other individuals and from public sources such as media, advertising, and politics. In-class exercises and speeches to assist participants in developing and executing persuasive skills.

3 units, not given this year

### CTL 199. Independent Study

Special study under lecturer direction, usually leading to a written report or an oral presentation. Prerequisite: consent of instructor.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN CENTER FOR TEACHING AND LEARNING

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### CTL 215. Voice Workshop

(Same as CTL 115) Focus is on breath, voice production, expansion of vocal range and stamina, and clarity of articulation. Geared toward public speaking including presentations, lectures, and job talks. May be taken in conjunction with CTL 117.

1-2 units, Aut (Freeland, T), Spr (Freeland, T)

### CTL 217. The Art of Effective Speaking

(Same as CTL 117) The principles and practice of effective oral communication. Through formal and informal speaking activities, students develop skills framing and articulating ideas through speech. Strategies for speaking extemporaneously, preparing and delivering multimedia presentations, formulating persuasive arguments, refining critical clarity of thought, and enhancing general facility and confidence in oral self-expression.

3 units, Aut (Freeland, T), Spr (Freeland, T)

### CTL 219. Oral Communication for Graduate Students

Graduate student speaking activities such as teaching (delivering lectures, guiding discussion, and facilitating small groups), professional presentations and conference papers, and preparing for oral exams and defenses. In-class projects, discussion, and individual evaluation assist students in developing effective techniques for improving oral communication skills.

1-3 units, Sum (Staff)

### CTL 224. Fundamentals of College Teaching in the Humanities and Humanistic Social Sciences

For teaching assistants in the humanities and humanistic social sciences. Topics include current research on learning and teaching, practice teaching sessions, leading discussions, designing assignments and group activities, grading and feedback practices, and teaching with technology.

1-3 units, not given this year

### CTL 225. Teaching Development Series

Teaching and academic career topics from CTL's workshops series. Documented participation in a minimum of 10 hours required for credit. Offerings vary quarterly. See <http://ctl.stanford.edu> for current information. May be repeated for credit. Prerequisite: consent of instructor.

1 unit, not given this year

### CTL 226. Advanced College Teaching and Professional Development in Humanities and Humanistic Social Sciences

For advanced graduate students in the humanities and humanistic social sciences interested in an academic career. Topics include current research on teaching and learning, effective lecturing, designing courses and assignments, writing a persuasive teaching statement, disciplinary and interdisciplinary teaching, and research on early career faculty.

1-3 units, Win (Denman, M)

### CTL 230. Mentoring in Research

Knowledge, skills, and hands-on training to mentor undergraduate research assistants and to impact relationships with your own mentors and advisers. Topics include communication and project management skills, different learning styles, and cultural, ethnic and socioeconomic diversity. Case studies, scenarios, and small group activities. Five weeks.

1 unit, not given this year

### CTL 231. Future Faculty Seminar

(Same as INDE 231) For graduate students from all disciplines who are considering faculty careers. Postdoctoral fellows, TGR students, and research/clinical trainees may audit by consent of instructor. Explores the broad spectrum of duties and opportunities presented through faculty positions beyond the research-related aspects. Develops awareness of resources and skills that lead to faculty success; answers field-specific and related faculty job questions through discussions with representatives of a variety of academic institutions and fellow course participants. Topics include: finding and obtaining faculty positions, negotiating and navigating the first year, and working toward tenure. May be

repeated for credit.

1 unit, Aut (Eberle, S; Puglisi, J; Wright-Dunbar, R)

### CTL 280. Interpersonal and Small Group Communication

(Same as CTL 180) Communication effectiveness in the contexts of dyads, the workplace, family, and society. Listening, conflict resolution, leadership, power and its implementation, group dynamics, emotions, and cultural influences on interactions. Sources include readings videos/DVDs, role playing, interviews, individual and group presentations, and group exercises.

3 units, not given this year

### CTL 290. Persuasive Speaking

(Same as CTL 190) Persuasion is the act of influencing others to see, feel, think, believe, and/or act in a way that is consistent with what the speaker or sender advocates. Persuasion seeks to engender power, and how that power is used can vary widely. How to effectively persuade others in interpersonal, family, workplace, and public spheres. How to be astute consumers of persuasive messages, including those from other individuals and from public sources such as media, advertising, and politics. In-class exercises and speeches to assist participants in developing and executing persuasive skills.

3 units, not given this year

### CTL 297X. Teaching and Learning in Higher Education

(Same as EDUC 297X) Open to master's and doctoral students in all disciplines. How teachers can promote lasting learning and ask which pedagogies are most effective in today's college classrooms. Readings analyze teaching and learning in diverse disciplines and institutional types. Students observe the instruction of a Stanford master teacher. Students write a paper about the instruction of the teacher they observe or prepare a syllabus and commentary for a course of their design.

3-4 units, Win (Ehrlich, T; Miller, B)

### CTL 299. Independent Study

Special study under lecturer direction, usually leading to a written report or an oral presentation. Prerequisite: consent of instructor.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### CTL 312. Science and Engineering Course Design

(Same as ENGR 312) For students interested in an academic career and who anticipate designing science courses at the undergraduate or graduate level. Goal is to apply research on science learning to the design of effective course materials. Topics include syllabus design, course content and format decisions, assessment planning and grading, and strategies for teaching improvement.

2-3 units, Win (Sheppard, S; Wright-Dunbar, R)

## CHEMICAL ENGINEERING (CHEMENG) COURSES

### UNDERGRADUATE COURSES IN CHEMICAL ENGINEERING

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### CHEMENG 10. The Chemical Engineering Profession

Open to all undergraduates. Overview of and careers in chemical engineering; opportunities to develop networks with working professionals. Panel discussions on career paths and post-graduation opportunities available. Areas include biotechnology, electronics, energy, environment, management consulting, nanotechnology, and graduate school in business, law, medicine, and engineering.

1 unit, Aut (Jaramillo, T)

#### CHEMENG 20. Introduction to Chemical Engineering

(Same as ENGR 20) Overview of chemical engineering through discussion and engineering analysis of physical and chemical processes. Topics: overall staged separations, material and energy balances, concepts of rate processes, energy and mass transport, and kinetics of chemical reactions. Applications of these concepts to areas of current technological importance: biotechnology, energy, production of chemicals, materials processing, and purification. Prerequisite: CHEM 31. GER:DB-EngrAppSci

3 units, Spr (Khosla, C)

### CHEMENG 25B. Biotechnology

(Same as ENGR 25B) Biology and chemistry fundamentals, genetic engineering, cell culture, protein production, pharmaceuticals, genomics, viruses, gene therapy, evolution, immunology, antibodies, vaccines, transgenic animals, cloning, stem cells, intellectual property, governmental regulations, and ethics. Prerequisites: CHEM 31 and MATH 41 or equivalent courage. GER:DB-EngrAppSci

3 units, Spr (Wang, C)

### CHEMENG 25E. Energy: Chemical Transformations for Production, Storage, and Use

(Same as ENGR 25E) An introduction and overview to the challenges and opportunities of energy supply and consumption. Emphasis on energy technologies where chemistry and engineering play key roles. Review of energy fundamentals along with historical energy perspectives and current energy production technologies. In depth analyses of solar thermal systems, biofuels, photovoltaics and electrochemical devices (batteries and fuel cells). Prerequisites: high school chemistry or equivalent. GER:DB-EngrAppSci

3 units, Win (Robertson, C; Bent, S)

### CHEMENG 35N. Renewable Energy for a Sustainable World

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. An overall world energy assessment, projections, and technologies. How to assess good and bad potential impacts of leading renewable energy candidates: benefit versus impact ratio using quantitative cradle-to-grave approach. Technologies suitable for near-term application in developing economic systems. Governmental policies, governmental versus private sector investments, raw materials supply issues, and impact of cultural influences on technology choices and speed of implementation. GER:DB-EngrAppSci

3 units, Aut (Swartz, J)

### CHEMENG 60Q. Environmental Regulation and Policy

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. How environmental policy is formulated in the U.S. How and what type of scientific research is incorporated into decisions. How to determine acceptable risk, the public's right to know of chemical hazards, waste disposal and clean manufacturing, brownfield redevelopment, and new source review regulations. The proper use of science and engineering including media presentation and misrepresentation, public scientific and technical literacy, and emotional reactions. Alternative models to formulation of environmental policy. Political and economic forces, and stakeholder discussions. GER:DB-EngrAppSci

3 units, Aut (Robertson, C; Libicki, S)

### CHEMENG 70Q. Masters of Disaster

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. For students interested in science, engineering, politics, and the law. Learn from past disasters to avoid future ones. How disasters can be tracked to failures in the design process. The roles of engineers, artisans, politicians, lawyers, and scientists in the design of products. Failure as rooted in oversight in adhering to the design process. Student teams analyze real disasters and design new products presumably free from the potential for disastrous outcomes. GER:DB-EngrAppSci

3 units, Aut (Robertson, C; Moalli, J)

### CHEMENG 80Q. Art, Chemistry, and Madness: The Science of Art Materials

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Chemistry of natural and synthetic pigments in five historical palettes: earth (paleolithic), classical (Egyptian, Greco-Roman), medieval European (Middle Ages), Renaissance (old masters), and synthetic (contemporary). Composite nature of paints using scanning electron microscopy images; analytical techniques used in art conservation, restoration, and determination of provenance; and inherent health hazards. Paintings as mechanical structures. Hands-on laboratory includes stretching canvas, applying gesso grounds, grinding pigments, preparing egg tempera paint, bamboo and quill pens, gilding and illumination, and papermaking. GER:DB-EngrAppSci

3 units, Spr (Frank, C; Loesch-Frank, S)

### CHEMENG 100. Chemical Process Modeling, Dynamics, and

### Control

Mathematical methods applied to engineering problems using chemical engineering examples. The development of mathematical models to describe chemical process dynamic behavior. Analytical and computer simulation techniques for the solution of ordinary differential equations. Dynamic behavior of linear first- and second-order systems. Introduction to process control. Dynamics and stability of controlled systems. Prerequisites: CHEMENG 20 or ENGR 20; CME 102 or MATH 53.

3 units, Aut (Opatkiewicz, J)

### CHEMENG 110. Equilibrium Thermodynamics

Thermodynamic properties, equations of state, properties of non-ideal systems including mixtures, and phase and chemical equilibria. Prerequisite: CHEM 171 or equivalent.

3 units, Win (Bao, Z)

### CHEMENG 120A. Fluid Mechanics

The flow of isothermal fluids from a momentum transport viewpoint. Continuum hypothesis, scalar and vector fields, fluid statics, non-Newtonian fluids, shell momentum balances, equations of motion and the Navier-Stokes equations, creeping and potential flow, parallel and nearly parallel flows, time-dependent parallel flows, boundary layer theory and separation, introduction to drag correlations. Prerequisites: junior in Chemical Engineering or consent of instructor; 100 and CME 102 or equivalent.

4 units, Win (Fuller, G)

### CHEMENG 120B. Energy and Mass Transport

General diffusive transport, heat transport by conduction, Fourier's law, conduction in composites with analogies to electrical circuits, advection-diffusion equations, forced convection, boundary layer heat transport via forced convection in laminar flow, forced convection correlations, free convection, free convection boundary layers, free convection correlations and application to geophysical flows, melting and heat transfer at interfaces, radiation, diffusive transport of mass for dilute and non-dilute transfer, mass and heat transport analogies, mass transport with bulk chemical reaction, mass transport with interfacial chemical reaction, evaporation. Prerequisite 120A or consent of instructor.

4 units, Spr (Spakowitz, A)

### CHEMENG 124. Catalysis

(Same as CHEMENG 224) Introduction to heterogeneous catalysis, including models of surface reactivity, kinetics, catalyst structure, electro-catalysis and photo-catalysis, and links to homogeneous and enzyme catalysis. Selected applications and challenges in energy transformations.

3-3 units, Spr (Noerskov, J)

### CHEMENG 130. Separation Processes

Analysis and design of equilibrium and non-equilibrium separation processes. Possible examples: distillation, liquid-liquid extraction, flash distillation, electrophoresis, centrifugation, membrane separations, chromatography, and reaction-assisted separation processes.

3 units, Spr (Jaramillo, T)

### CHEMENG 140. Micro and Nanoscale Fabrication Engineering

(Same as CHEMENG 240) (Same as CHEMENG 140) Survey of fabrication and processing technologies in industrial sectors, such as semiconductor, biotechnology, and energy. Chemistry and transport of electronic and energy device fabrication. Solid state materials, electronic devices and chemical processes including crystal growth, chemical vapor deposition, etching, oxidation, doping, diffusion, thin film deposition, plasma processing. Micro and nanopatterning involving photolithography, unconventional soft lithography and self assembly. Recommended: CHEM 33, 171, and PHYSICS 55

3 units, Win (Bao, Z)

### CHEMENG 150. Biochemical Engineering

Systems-level combination of chemical engineering concepts with biological principles. The production of protein pharmaceuticals as a paradigm to explore quantitative biochemistry and cellular physiology, the elemental stoichiometry of metabolism, recombinant DNA technology, synthetic biology and metabolic engineering, fermentation development and control, product isolation and purification, protein folding and formulation, and biobusiness and regulatory issues. Prerequisite: CHEMENG 181

(formerly 188) or BIOSCI 41 or equivalent.

3 units, Win (Hwang, L)

#### **CHEMENG 160. Polymer Science and Engineering**

(Same as CHEMENG 260) Interrelationships among molecular structure, morphology, and mechanical behavior of polymers. Topics include amorphous and semicrystalline polymers, glass transitions, rubber elasticity, linear viscoelasticity, and rheology. Applications of polymers in biomedical devices and microelectronics. Recommended: CHEM 33 and 171, or equivalent.

3 units, Aut (Frank, C)

#### **CHEMENG 170. Kinetics and Reactor Design**

Chemical kinetics, elementary reactions, mechanisms, rate-limiting steps, and quasi-steady state approximations. Ideal isothermal and non-isothermal reactors; design principles. Steady state and unsteady state operation of reactors; conversion and limitations of thermodynamic equilibrium. Enzymes and heterogeneous catalysis and catalytic reaction mechanisms. Prerequisites: 110, 120A, 120B.

3 units, Aut (Bent, S)

#### **CHEMENG 174. Environmental Microbiology I**

(Same as CHEMENG 274, CEE 274A) Basics of microbiology and biochemistry. The biochemical and biophysical principles of biochemical reactions, energetics, and mechanisms of energy conservation. Diversity of microbial catabolism, flow of organic matter in nature: the carbon cycle, and biogeochemical cycles. Bacterial physiology, phylogeny, and the ecology of microbes in soil and marine sediments, bacterial adhesion, and biofilm formation. Microbes in the degradation of pollutants. Prerequisites: CHEM 33, 35, and BIOSCI 41, CHEMENG 181 (formerly 188), or equivalents.

3 units, Aut (Spormann, A), Sum (Staff)

#### **CHEMENG 180. Chemical Engineering Plant Design**

Open to seniors in chemical engineering or by consent of instructor. Application of chemical engineering principles to the design of practical plants for the manufacture of chemicals and related materials. Topics: flow-sheet development from a conceptual design, equipment design for distillation, chemical reactions, heat transfer, pumping, and compression; estimation of capital expenditures and production costs; plant construction.

3 units, Spr (Pavone, A)

#### **CHEMENG 181. Biochemistry I**

(Same as BIO 188, BIO 288, CHEMENG 281, CHEM 181) (CHEMENG offerings formerly listed as 188/288.) Chemistry of major families of biomolecules including proteins, nucleic acids, carbohydrates, lipids, and cofactors. Structural and mechanistic analysis of properties of proteins including molecular recognition, catalysis, signal transduction, membrane transport, and harvesting of energy from light. Molecular evolution. Satisfies Central Menu Area I for Bio majors. Prerequisites: CHEM 33, 35, 131, and 135 or 171. GER: DB-NatSci

3 units, Aut (Cegelski, L)

#### **CHEMENG 183. Biochemistry II**

(Same as BIO 189, BIO 289, CHEMENG 283, CHEM 183) Focus on metabolic biochemistry: the study of chemical reactions that provide the cell with the energy and raw materials necessary for life. Topics include glycolysis, gluconeogenesis, the citric acid cycle, oxidative phosphorylation, photosynthesis, the pentose phosphate pathway, and the metabolism of glycogen, fatty acids, amino acids, and nucleotides as well as the macromolecular machines that synthesize RNA, DNA, and proteins. Medical relevance is emphasized throughout. Satisfies Central Menu Area I for Bio majors. Prerequisite: BIO 188/288 or CHEM 181 or CHEMENG 181/281 (formerly 188/288). GER: DB-NatSci

3 units, Win (Dunn, A)

#### **CHEMENG 185A. Chemical Engineering Laboratory A**

Experimental aspects of chemical engineering science. Emphasizes laboratory work and development of communication skills. Lab work in student groups. Student presentations. Prerequisites: 120A,B. Corequisite: 170.

4 units, Aut (Sattely, E)

#### **CHEMENG 185B. Chemical Engineering Laboratory B**

Methods and techniques in molecular biology and biochemical engineering. Emphasis is on team organization, communication

skills, experimental design, and project execution. Creation of presentations, experiments, and demonstrations for high school students. Additional laboratory times to be arranged. Prerequisite: BIO 41, CHEMENG 181, or equivalent.

4 units, Win (Wang, C)

#### **CHEMENG 190. Undergraduate Research in Chemical Engineering**

Laboratory or theoretical work for undergraduates under the supervision of a faculty member. Research in one of the graduate research groups or other special projects in the undergraduate chemical engineering lab. Students should consult advisers for information on available projects.

1-6 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **CHEMENG 190H. Undergraduate Honors Research in Chemical Engineering**

For Chemical Engineering majors pursuing a B.S. with Honors degree who have submitted an approved research proposal to the department. Unofficial transcript must document BSH status and at least 9 units of 190H research for a minimum of 3 quarters. May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **CHEMENG 191H. Undergraduate Honors Seminar**

For Chemical Engineering majors approved for B.S. with Honors research program. Honors research proposal must be submitted and unofficial transcript document BSH status prior to required concurrent registration in 190H and 191H. May be repeated for credit. Corequisite: 190H

1 unit, Aut (Sattely, E), Win (Sattely, E), Spr (Sattely, E), Sum (Staff)

## **GRADUATE COURSES IN CHEMICAL ENGINEERING**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### **CHEMENG 224. Catalysis**

(Same as CHEMENG 124) Introduction to heterogeneous catalysis, including models of surface reactivity, kinetics, catalyst structure, electro-catalysis and photo-catalysis, and links to homogeneous and enzyme catalysis. Selected applications and challenges in energy transformations.

3-3 units, Spr (Noerskov, J)

#### **CHEMENG 240. Micro and Nanoscale Fabrication Engineering**

(Same as CHEMENG 140) (Same as CHEMENG 140) Survey of fabrication and processing technologies in industrial sectors, such as semiconductor, biotechnology, and energy. Chemistry and transport of electronic and energy device fabrication. Solid state materials, electronic devices and chemical processes including crystal growth, chemical vapor deposition, etching, oxidation, doping, diffusion, thin film deposition, plasma processing. Micro and nanopatterning involving photolithography, unconventional soft lithography and self assembly. Recommended: CHEM 33, 171, and PHYSICS 55

3 units, Win (Bao, Z)

#### **CHEMENG 260. Polymer Science and Engineering**

(Same as CHEMENG 160) Interrelationships among molecular structure, morphology, and mechanical behavior of polymers. Topics include amorphous and semicrystalline polymers, glass transitions, rubber elasticity, linear viscoelasticity, and rheology. Applications of polymers in biomedical devices and microelectronics. Recommended: CHEM 33 and 171, or equivalent.

3 units, Aut (Frank, C)

#### **CHEMENG 274. Environmental Microbiology I**

(Same as CHEMENG 174, CEE 274A) Basics of microbiology and biochemistry. The biochemical and biophysical principles of biochemical reactions, energetics, and mechanisms of energy conservation. Diversity of microbial catabolism, flow of organic matter in nature: the carbon cycle, and biogeochemical cycles. Bacterial physiology, phylogeny, and the ecology of microbes in soil and marine sediments, bacterial adhesion, and biofilm formation. Microbes in the degradation of pollutants. Prerequisites: CHEM 33, 35, and BIOSCI 41, CHEMENG 181 (formerly 188),

or equivalents.

3 units, Aut (Spormann, A), Sum (Staff)

### **CHEMENG 281. Biochemistry I**

(Same as BIO 188, BIO 288, CHEMENG 181, CHEM 181) (CHEMENG offerings formerly listed as 188/288.) Chemistry of major families of biomolecules including proteins, nucleic acids, carbohydrates, lipids, and cofactors. Structural and mechanistic analysis of properties of proteins including molecular recognition, catalysis, signal transduction, membrane transport, and harvesting of energy from light. Molecular evolution. Satisfies Central Menu Area 1 for Bio majors. Prerequisites: CHEM 33, 35, 131, and 135 or 171.

3 units, Aut (Cegelski, L)

### **CHEMENG 283. Biochemistry II**

(Same as BIO 189, BIO 289, CHEMENG 183, CHEM 183) Focus on metabolic biochemistry: the study of chemical reactions that provide the cell with the energy and raw materials necessary for life. Topics include glycolysis, gluconeogenesis, the citric acid cycle, oxidative phosphorylation, photosynthesis, the pentose phosphate pathway, and the metabolism of glycogen, fatty acids, amino acids, and nucleotides as well as the macromolecular machines that synthesize RNA, DNA, and proteins. Medical relevance is emphasized throughout. Satisfies Central Menu Area 1 for Bio majors. Prerequisite: BIO 188/288 or CHEM 181 or CHEMENG 181/281 (formerly 188/288).

3 units, Win (Dunn, A)

### **CHEMENG 300. Applied Mathematics in the Chemical and Biological Sciences**

(Same as CME 330) Mathematical solution methods via applied problems including chemical reaction sequences, mass and heat transfer in chemical reactors, quantum mechanics, fluid mechanics of reacting systems, and chromatography. Topics include generalized vector space theory, linear operator theory with eigenvalue methods, phase plane methods, perturbation theory (regular and singular), solution of parabolic and elliptic partial differential equations, and transform methods (Laplace and Fourier). Prerequisites: CME 102/ENGR 155A and CME 104/ENGR 155B, or equivalents.

3 units, Aut (Shaqfeh, E)

### **CHEMENG 310. Microhydrodynamics**

(Same as ME 451D) Transport phenomena on small-length scales appropriate to applications in microfluidics, complex fluids, and biology. The basic equations of mass, momentum, and energy, derived for incompressible fluids and simplified to the slow-flow limit. Topics: solution techniques utilizing expansions of harmonic and Green's functions; singularity solutions; flows involving rigid particles and fluid droplets; applications to suspensions; lubrication theory for flows in confined geometries; slender body theory; and capillarity and wetting. Prerequisites: 120A,B, 300, or equivalents.

3 units, Win (Fuller, G)

### **CHEMENG 320. Chemical Kinetics and Reaction Engineering**

Theoretical and experimental tools useful in understanding and manipulating reactions mediated by small-molecules and biological catalysts. Theoretical: first classical chemical kinetics and transition state theory; then RRKM theory and Monte Carlo simulations. Experimental approaches include practical application of modern spectroscopic techniques, stopped-flow measurements, temperature-jump experiments, and single-molecule approaches to chemical and biological systems. Both theory and application are framed with regard to systems of particular interest, including industrially relevant enzymes, organometallic catalysts, heterogeneous catalysis, electron transfer reactions, and chemical kinetics within living cells.

3 units, Aut (Dunn, A)

### **CHEMENG 340. Molecular Thermodynamics**

Classical thermodynamics and quantum mechanics. Development of statistical thermodynamics to address the collective behavior of molecules. Establishment of theories for gas, liquid, and solid phases, including phase transitions and critical behavior. Applications include electrolytes, ion channels, surface adsorption, ligand binding to proteins, hydrogen bonding in water, hydrophobicity, polymers, and proteins.

3 units, Aut (Spakowitz, A)

### **CHEMENG 345. Fundamentals and Applications of**

### **Spectroscopy**

Development of theoretical approaches to spectroscopy, including spectroscopic transitions, transition probabilities, and selection rules. Application to photon and electron spectroscopies of the gas and solid phases. Topics: rotational spectroscopy; infrared and Raman vibrational spectroscopies; fluorescence spectroscopy; Auger, x-ray and ultraviolet photoelectron spectroscopies. Prerequisite: CHEM 271 or course in quantum mechanics.

3 units, Win (Jaramillo, T)

### **CHEMENG 355. Advanced Biochemical Engineering**

(Same as BIOE 355) Combines biological knowledge and methods with quantitative engineering principles. Quantitative review of biochemistry and metabolism; recombinant DNA technology and synthetic biology (metabolic engineering). The production of protein pharmaceuticals as a paradigm for the application of chemical engineering principles to advanced process development within the framework of current business and regulatory requirements. Prerequisite: CHEMENG 181 (formerly 188) or BIOSCI 41, or equivalent.

3 units, Win (Swartz, J)

### **CHEMENG 441. Fundamentals of Electrochemistry**

Introduction to fundamentals of electrochemistry, including the thermodynamic, kinetic, and transport phenomena that influence the behavior of electrochemical systems. The topics covered include current- and potential-controlled experiments, diffusion and mass transfer, Butler-Volmer and Tafel kinetics, cyclic voltammetry, electrochemical double layer structures, semiconductor electrochemistry, and Marcus theory.

3 units, Aut (Jaramillo, T)

### **CHEMENG 442. Structure and Reactivity of Solid Surfaces**

The structure of solid surfaces including experimental methods for determining the structure of single crystal surfaces. The adsorption of molecules on these surfaces including the thermodynamics of adsorption processes, surface diffusion, and surface reactions. Molecular structure of adsorbates. Current topics in surface structure and reactivity, including systems for heterogeneous catalysis and electronic materials.

3 units, not given this year

### **CHEMENG 444. Quantum Simulations of Molecules and Materials**

Understanding electronic structure theory and its use in solving problems in engineering, chemistry, physics, and biology. An introduction to the quantum mechanical many-body problem, density functional theory, approximate total energy methods, usual approximations to the exchange-correlation energy. Overview of methods to solve the quantum mechanical electronic structure problem, an introduction to different numerical implementations, and hands-on experience with a particular electronic structure code. Examples from the literature of the application of electronic structure theory in engineering, chemistry, physics, and biology. Development of a critical approach to the capability of different computational approaches. A self-defined project required. Prerequisite: quantum mechanics.

3 units, not given this year

### **CHEMENG 450. Advances in Biotechnology**

Guest academic and industrial speakers. Latest developments in fields such as bioenergy, green process technology, production of industrial chemicals from renewable resources, protein pharmaceutical production, industrial enzyme production, stem cell applications, medical diagnostics, and medical imaging. Biotechnology ethics, business and patenting issues, and entrepreneurship in biotechnology.

3 units, Spr (Swartz, J; Hwang, L)

### **CHEMENG 451. Chemical Principles in Drug Discovery and Development**

Application of physical and organic chemistry to the discovery and subsequent product development of small molecule and macromolecular drugs. Course discusses key physical, chemical, and biological properties of drug candidates and how to measure them, how to engineer them. Discussion of principles of drug formulation and delivery. Graduate-level background in physical and organic chemistry recommended.

3 units, Aut (Khosla, C)

**CHEMENG 454. Synthetic Biology and Metabolic Engineering**  
(Same as BIOE 454) Principles for the design and optimization of new biological systems. Development of new enzymes, metabolic pathways, other metabolic systems, and communication systems among organisms. Example applications include the production of central metabolites, amino acids, pharmaceutical proteins, and isoprenoids. Economic challenges and quantitative assessment of metabolic performance. Pre- or corequisite: CHEMENG 355 or equivalent.

*3 units, alternate years, not given this year*

**CHEMENG 456. Metabolic Biochemistry of Microorganisms**  
(Same as CEE 274B) Microbial metabolism, biochemical and metabolic principles, unity and diversity of metabolic pathways, evolution of enzymes and metabolic pathways, microbial degradation of natural and anthropogenic organic compounds, predicting biodegradation, and metabolic origin of life.

*3 units, Win (Spormann, A)*

**CHEMENG 457. Microbial Ecology and Evolution**

(Same as CEE 274C) Structure/function relationship of microbial communities; metabolic and ecological basis of interactions in microbial communities; microbial ecology and population biology in natural and human host systems; and evolution of microbial life. Prerequisite: CEE 274A, CHEMENG 281 (formerly 288), or equivalent.

*3 units, not given this year*

**CHEMENG 458. Recent Advances in Genetic, Cellular, and Biomolecular Systems**

Current topics, experimental methods, technologies, quantitative analysis, and mathematical models.

*3 units, not given this year*

**CHEMENG 459. Frontiers in Interdisciplinary Biosciences**

(Same as BIO 459, BIOC 459, BIOE 459, CHEM 459, PSYCH 459) Students register through their affiliated department; otherwise register for CHEMENG 459. For specialists and non-specialists. Sponsored by the Stanford BioX Program. Three seminars per quarter address scientific and technical themes related to interdisciplinary approaches in bioengineering, medicine, and the chemical, physical, and biological sciences. Leading investigators from Stanford and the world present breakthroughs and endeavors that cut across core disciplines. Pre-seminars introduce basic concepts and background for non-experts. Registered students attend all pre-seminars; others welcome. See <http://biox.stanford.edu/courses/459.html>. Recommended: basic mathematics, biology, chemistry, and physics.

*1 unit, Aut (Robertson, C), Win (Robertson, C), Spr (Robertson, C)*

**CHEMENG 460. Polymer Surfaces and Interfaces**

Principles of interfacial thermodynamics and polymer physics applied to polymer surfaces and interfaces, particularly in relation to biomedical devices. Treatments of intermolecular forces; conformational statistics of macromolecular structure; tethering of polymers at different interfaces; techniques for chemical modification of surfaces; methods for physical characterization of polymer surfaces and interfaces. Applications in adhesion, biocompatibility, prosthetic orthopedic devices, and ophthalmic devices. Prerequisite: exposure to principles of polymer science or consent of instructor.

*3 units, not given this year*

**CHEMENG 462. Complex Fluids and Non-Newtonian Flows**

Division of complex fluids into suspensions, solutions, and melts. Suspensions as colloidal and non-colloidal. Extra stress and relation to the stresslet. Suspension rheology including Brownian and non-Brownian fibers. Microhydrodynamics and the Fokker-Planck equation. Linear viscoelasticity and the weak flow limit. Polymer solutions including single mode (dumbbell) and multimode models. Nonlinear viscoelasticity. Intermolecular effects in nondilute solutions and melts and the concept of reptation. Prerequisites: low Reynolds number hydrodynamics or consent of instructor.

*3 units, not given this year*

**CHEMENG 462. Complex Fluids and Non-Newtonian Flows**

(Same as ME 455) Definition of a complex liquid and microrheology. Division of complex fluids into suspensions, solutions, and melts. Suspensions as colloidal and non-colloidal.

Extra stress and relation to the stresslet. Suspension rheology including Brownian and non-Brownian fibers. Microhydrodynamics and the Fokker-Planck equation. Linear viscoelasticity and the weak flow limit. Polymer solutions including single mode (dumbbell) and multimode models. Nonlinear viscoelasticity. Intermolecular effects in nondilute solutions and melts and the concept of reptation. Prerequisites: low Reynolds number hydrodynamics or consent of instructor.

*3 units, not given this year*

**CHEMENG 464. Polymer Chemistry**

Polymer material design, synthesis, characterization, and application. Topics include organic and kinetic aspects of polymerization, polymer characterization techniques, and structure and properties of bulk polymers for commercial applications and emerging technologies.

*3 units, Aut (Bao, Z)*

**CHEMENG 466. Polymer Physics**

Concepts and applications in the equilibrium and dynamic behavior of complex fluids. Topics include solution thermodynamics, scaling concepts, semiflexibility, characterization of polymer size (light scattering, osmotic pressure, size-exclusion chromatography, intrinsic viscosity), viscoelasticity, rheological measurements, polyelectrolytes, liquid crystals, biopolymers, and gels.

*3 units, not given this year*

**CHEMENG 467. Physics of Biomacromolecules**

Advanced topics in the equilibrium and dynamic behavior of biomacromolecules. Theoretical approaches addressed include path integral approaches to polymer Green function theory, polymer field theory, application of Smoluchowski and fractional Fokker Planck equations to biopolymer transport, and Brownian dynamics and Monte Carlo simulations. These methods will be applied to topics such as DNA/protein semiflexibility, DNA supercoiling, lyotropic polymer ordering, anomalous diffusion in crowded environments, motor-protein transport, and protein dynamics. Prerequisites: CHEMENG 340 and 466 or consent of the instructor.

*3 units, not given this year*

**CHEMENG 482. Creating a Startup I**

(Same as SOMGEN 282) (Same as STRAMGT 356) Focuses on the creation of a new venture by providing frameworks and applying them to the identification and pursuit of a business opportunity. Concepts include the new venture formation process, opportunity identification, evaluation and analysis, customer development, business models, market research, design thinking, team formation, team dynamics, leadership, venture viability research and managing intellectual property. Part of the course is partitioned by vertical market to reflect vertical-specific topics and issues. Students form teams, conduct field work, and iterate on the combination of business model -- product -- market. Teams present to a panel of entrepreneurs, venture capitalists, angel investors, and faculty. Three-unit option excludes some of the coursework associated with opportunity identification and market research. Prerequisite: by application/instructor consent. Application form at [http://www.gsb.stanford.edu/ces/teaching/356\\_application\\_n](http://www.gsb.stanford.edu/ces/teaching/356_application_n)

*3-4 units, Aut (Mendelson, H)*

**CHEMENG 484. Creating a Startup II**

(Same as SOMGEN 284) (Same as STRAMGT 366) Students work in teams to continue to develop the new ventures identified in CHEMENG 482/SOMGEN 282. Each team works with a Silicon Valley mentor to develop its new venture. In addition, the course covers topics such as partnering, operational staging, human resource development, leadership, financing, equity arrangements, term sheets, and customer acquisition and go-to-market strategies. Students develop a business plan for pursuing the opportunity based on their field work and research and present it to a panel of entrepreneurs, venture capitalists, angel investors, and faculty. Three-unit option excludes some of the coursework associated with financial modeling. Prerequisite: Instructor consent.

*3-4 units, Win (Mendelson, H)*

**CHEMENG 500. Special Topics in Protein Biotechnology**

Recent developments and current research. May be repeated for credit. Prerequisite: graduate standing and consent of instructor.

1 unit, Aut (Swartz, J), Win (Swartz, J), Spr (Swartz, J), Sum (Staff)

**CHEMENG 501. Special Topics in Semiconductor Processing**  
Recent developments and current research. May be repeated for credit. Prerequisite: graduate standing and consent of instructor.

1 unit, Aut (Bent, S), Win (Bent, S), Spr (Bent, S), Sum (Staff)

**CHEMENG 503. Special Topics in Biocatalysis**  
Recent developments and current research. May be repeated for credit. Prerequisite: graduate standing and consent of instructor.

1 unit, Aut (Khosla, C), Win (Khosla, C), Spr (Khosla, C), Sum (Staff)

**CHEMENG 505. Special Topics in Microrheology**  
Recent developments and current research. May be repeated for credit. Prerequisite: graduate standing and consent of instructor.

1 unit, Aut (Fuller, G), Win (Fuller, G), Spr (Fuller, G), Sum (Staff)

**CHEMENG 507. Special Topics in Polymer Physics and Molecular Assemblies**

Recent developments and current research. May be repeated for credit. Prerequisite: graduate standing and consent of instructor.

1 unit, Aut (Frank, C), Win (Frank, C), Spr (Frank, C), Sum (Staff)

**CHEMENG 510. Special Topics in Transport Mechanics**  
Recent developments and current research. May be repeated for credit. Prerequisite: graduate standing and consent of instructor.

1 unit, Aut (Shaqfeh, E), Win (Shaqfeh, E), Spr (Shaqfeh, E), Sum (Staff)

**CHEMENG 513. Special Topics in Functional Organic Materials for Electronic and Optical Devices**

Recent developments and current research. May be repeated for credit. Prerequisite: graduate standing and consent of instructor.

1 unit, Aut (Bao, Z), Win (Bao, Z), Spr (Bao, Z), Sum (Staff)

**CHEMENG 514. Special Topics in Biopolymer Physics**  
Recent developments and current research. May be repeated for credit. Prerequisite: graduate standing and consent of instructor.

1 unit, Aut (Spakowitz, A), Win (Spakowitz, A), Spr (Spakowitz, A), Sum (Staff)

**CHEMENG 515. Special Topics in Molecular and Systems Biology**

Recent developments and current research. May be repeated for credit. Prerequisite: graduate standing and consent of instructor.

1 unit, Aut (Wang, C), Win (Wang, C), Spr (Wang, C), Sum (Staff)

**CHEMENG 516. Special Topics in Energy and Catalysis**  
Recent developments and current research. May be repeated for credit. Prerequisite: graduate standing and consent of instructor.

1 unit, Aut (Jaramillo, T), Win (Jaramillo, T), Spr (Jaramillo, T), Sum (Staff)

**CHEMENG 517. Special Topics in Microbial Physiology and Metabolism**

Recent developments and current research. May be repeated for credit. Prerequisite: graduate standing and consent of instructor.

1 unit, Aut (Spormann, A), Win (Spormann, A), Spr (Spormann, A), Sum (Staff)

**CHEMENG 518. Special Topics in Advanced Biophysics and Protein Design**

Recent developments and current research. May be repeated for credit. Prerequisite: graduate standing and consent of instructor.

1 unit, Aut (Dunn, A), Win (Dunn, A), Spr (Dunn, A), Sum (Staff)

**CHEMENG 519. Special Topics in Interface Science and Catalysis**

Recent developments and current research. May be repeated for credit. Prerequisite: graduate standing and consent of instructor.

1 unit, Aut (Noerskov, J), Win (Noerskov, J), Spr (Noerskov, J), Sum (Staff)

**CHEMENG 520. Special Topics in Biological Chemistry**  
Recent developments and current research. May be repeated for credit. Prerequisite: graduate standing and consent of instructor.

1 unit, Aut (Sattely, E), Win (Sattely, E), Spr (Sattely, E), Sum (Staff)

**CHEMENG 600. Graduate Research in Chemical Engineering**  
Laboratory and theoretical work leading to partial fulfillment of requirements for an advanced degree.

1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**CHEMENG 699. Colloquium**

Weekly lectures by experts from academia and industry in the field of chemical engineering.

1 unit, Aut (Wang, C), Win (Wang, C), Spr (Wang, C)

## CHEMICAL SYSTEMS BIOLOGY (CSB) COURSES

### UNDERGRADUATE COURSES IN CHEMICAL SYSTEMS BIOLOGY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**CSB 199. Undergraduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GRADUATE COURSES IN CHEMICAL SYSTEMS BIOLOGY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**CSB 210. Signal Transduction Pathways and Networks**

The molecular mechanisms through which cells receive and respond to external signals. Emphasis is on principles of cell signaling, the systems-level properties of signal transduction modules, and experimental strategies through which cell signaling pathways are being studied. Prerequisite: working knowledge of biochemistry and genetics.

4 units, Win (Meyer, T)

**CSB 220. Chemistry of Biological Processes**

(Same as BIOC 220) The principles of organic and physical chemistry as applied to biomolecules. Goal is a working knowledge of chemical principles that underlie biological processes, and chemical tools used to study and manipulate biological systems. Prerequisites: organic chemistry and biochemistry, or consent of instructor.

4 units, alternate years, not given this year

**CSB 230. Current Methods in Proteomics**

Introduces students to the instrumentation, experimental strategies, and computational methods used for identification and quantification of protein concentrations and posttranslational modifications on a systems-wide level. Topics include mass spectrometry (instrumentation configurations; polypeptide ionization; sample preparation and fractionation techniques; mass spectra interpretation; relative and absolute protein quantitation; and proteome-scale dataset analysis), protein and antibody arrays, multiparameter flow cytometry with Bayesian analysis, ribosomal protein translation profiling, and GFP and fluorescence imaging based quantification of protein abundance and post-translational modifications.

3 units, Aut (Elias, J; Teruel, M)

**CSB 240A. A Practical Approach to Drug Discovery and Development**

Advancing a drug from discovery of a therapeutic target to human trials and commercialization. Topics include: high throughput assay development, compound screening, lead optimization, protecting intellectual property, toxicology testing, regulatory issues, assessment of clinical need, defining the market, conducting clinical trials, project management, and commercialization issues, including approach to licensing and raising capital.

3 units, alternate years, not given this year

**CSB 240B. A Practical Approach to Drug Discover and Development**

(Continuation of 240A) Advancing a drug from discovery of a

therapeutic target to human trials and commercialization. Topics include: high throughput assay development, compound screening, lead optimization, protecting intellectual property, toxicology testing, regulatory issues, assessment of clinical need, defining the market, conducting clinical trials, project management, and commercialization issues, including approach to licensing and raising capital. Prerequisite: 240A.

*3 units, alternate years, not given this year*

#### **CSB 242. Drug Discovery and Development Seminar Series**

The scientific principles and technologies involved in making the transition from a basic biological observation to the creation of a new drug emphasizing molecular and genetic issues. Prerequisite: biochemistry, chemistry, or bioengineering.

*1 unit, Win (Mochly-Rosen, D; Grimes, K), Spr (Mochly-Rosen, D; Grimes, K)*

#### **CSB 250. The Biology of Chromatin Templated Processes**

Topics include mechanisms of DNA replication; gene expressions regulation; DNA damage sensing and DNA repair; chromatin structure and function; and epigenetics and nuclear reprogramming. Prerequisite: working knowledge of molecular biology, biochemistry and genetics, or instructor consent.

*4 units, alternate years, not given this year*

#### **CSB 260. Quantitative Chemical Biology**

Current topics including protein and small molecule engineering, cell signaling sensors and modulators, molecular imaging, chemical genetics, combinatorial chemistry, in vitro evolution, and signaling network modeling. Prerequisites: undergraduate organic chemistry, and biochemistry or cell biology.

*4 units, Spr (Staff), alternate years, not given next year*

#### **CSB 270. Research Seminar**

Guest speakers and discussion on current research in pharmacology.

*1-2 units, not given this year*

#### **CSB 271. Principles of Cell Cycle Control**

(Same as BIO 171, BIO 271) Genetic analysis of the key regulatory circuits governing the control of cell division. Illustration of key principles that can be generalized to other synthetic and natural biological circuits. Focus on tractable model organisms; growth control; irreversible biochemical switches; chromosome duplication; mitosis; DNA damage checkpoints; MAPK pathway-cell cycle interface; oncogenesis. Analysis of classic and current primary literature. Satisfies Central Menu Area 2.

*3 units, Aut (Skotheim, J; Ferrell, J)*

#### **CSB 278. Systems Biology**

(Same as BIOE 310, CS 278) Experimental and computational approaches to the dissection of complex biological systems. Topics include network structure, non-linear dynamics, numerical modeling approaches, noise, and robustness. Topics are introduced in the context of recent papers from the primary literature.

*4 units, alternate years, not given this year*

#### **CSB 299. Directed Reading in Chemical and Systems Biology**

Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **CSB 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

*4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **CSB 399. Graduate Research**

Students undertake investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

*1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **CSB 801. TGR Project**

*0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

#### **CSB 802. TGR Dissertation**

*0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## CHEMISTRY (CHEM) COURSES

### UNDERGRADUATE COURSES IN CHEMISTRY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **CHEM 24N. Nutrition and History**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Intended to broaden the introductory chemistry experience. The biochemical basis of historically important nutritional deficiencies (vitamins, minerals, starvation, metabolic variants that predispose to disease) and environmental toxins is related to physiological action and the sociological, political, and economic consequences of its effect on human populations. Prerequisite: high school chemistry. Recommended: 31A,B, or 31X, or 33.

*3 units, Spr (Huestis, W)*

#### **CHEM 25N. Science in the News**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Possible topics include: diseases such as avian flu, HIV, and malaria; environmental issues such as climate change, atmospheric pollution, and human population; energy sources in the future; evolution; stem cell research; nanotechnology; and drug development. Focus is on the scientific basis for these topics as a basis for intelligent discussion of societal and political implications. Sources include the popular media and scientific media for the nonspecialist, especially those available on the web.

*3 units, Aut (Andersen, H)*

#### **CHEM 25Q. Science-in-Theatre: A New Genre?**

(S,Sem) (Same as DRAMA 25N) Stanford Introductory Seminar. Preference to sophomores. How scientists acquire their rules, mores, and idiosyncrasies through a form of intellectual osmosis in a mentor-disciple relationship. Scientists represented as Franksteins or nerds, rather than normal. Why more intellectually challenging plays have appeared on the Anglo-American theatre scene where scientific behavior and even science are presented accurately. Students engage in a playwriting experiment.

*3 units, Win (Djerassi, C)*

#### **CHEM 26N. The What, Why, How and wow's of Nanotechnology**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Introduction to nanotechnology with discussion of basic science at the nanoscale, its difference from molecular and macroscopic scales, and implications and applications. Developments in nanotechnology in the past two decades, from imaging and moving single atoms on surfaces to killing cancer cells with nanoscale tools and gadgets. GER: DB-NatSci

*3 units, Spr (Dai, H)*

#### **CHEM 27N. Lasers: The Light Fantastic**

Preference to freshmen. Introduction to lasers and their impact on everyday life. The operation of lasers using concepts of atomic and molecular energy levels, optics, and resonance. The use of lasers to produce guide stars for astronomy, sculpt the cornea, measure molecules in the ozone layer, transmit optical information over the web, measure the distance to the moon, and observe a single protein molecule in action. Prerequisites: CHEM 31A or X, or PHYSICS 23 and 25, or equivalents. GER: DB-NatSci

*3 units, not given this year*

#### **CHEM 31A. Chemical Principles I**

For students with moderate or no background in chemistry. Stoichiometry; periodicity; electronic structure and bonding; gases; enthalpy; phase behavior. Emphasis is on skills to address structural and quantitative chemical questions; lab provides practice. Recitation. GER: DB-NatSci

*4 units, Aut (Dai, H; Schwartz, J)*

#### **CHEM 31AC. Problem Solving in Science**

Development and practice of critical problem solving skills using chemical examples. Limited enrollment. Prerequisite: consent of instructor. Corequisite: CHEM 31A.

*1 unit, Aut (Schwartz, J)*

**CHEM 31B. Chemical Principles II**

Chemical equilibrium; acids and bases; oxidation and reduction reactions; chemical thermodynamics; kinetics. Lab. Prerequisite: 31A. GER: DB-NatSci

4 units, Win (Andersen, H; Schwartz, J)

**CHEM 31BC. Problem Solving in Science**

Development and practice of critical problem solving skills using chemical examples. Students should also be concurrently enrolled in the parent course 31B. Limited enrollment and with permission of the instructor.

1 unit, Win (Schwartz, J)

**CHEM 31X. Chemical Principles**

Accelerated; for students with substantial chemistry background. Chemical equilibria concepts, equilibrium constants, acids and bases, chemical thermodynamics, quantum concepts, models of ionic and covalent bonding, atomic and molecular orbital theory, periodicity, and bonding properties of matter. Recitation. Prerequisites for Autumn Quarter only: AP chemistry score of 5 or passing score on chemistry placement test. No Summer Quarter prerequisites. Recommended: high school physics. GER: DB-NatSci

4 units, Aut (Fayer, M; Cox, C), Sum (Staff)

**CHEM 33. Structure and Reactivity**

Organic chemistry, functional groups, hydrocarbons, stereochemistry, thermochemistry, kinetics, chemical equilibria. Recitation. Prerequisite: 31A,B, or 31X, or an AP Chemistry score of 5. GER: DB-NatSci

4 units, Win (Stack, T; Kanan, M), Spr (Schwartz, J; Wender, P), Sum (Staff)

**CHEM 33C. Problem Solving in Science**

Development and practice of critical problem solving skills using chemical examples. Limited enrollment. Prerequisite: consent of instructor. Corequisite: CHEM 33.

1 unit, Spr (Schwartz, J)

**CHEM 34XN. General Chemistry Laboratory**

(F,Sem) Stanford Introductory Seminar. Introduction to chemical laboratory practice. Topics include preparation of compounds and characterization of their properties by modern spectroscopic techniques. Corequisite: Chemistry 31X or the equivalent. Limited to 12 students; enrollment by consent of the instructor.

1 unit, Aut (Cox, C; Fayer, M)

**CHEM 35. Organic Monofunctional Compounds**

Organic chemistry of oxygen and nitrogen aliphatic compounds. Recitation. Prerequisite: 33. GER: DB-NatSci

4 units, Aut (Du Bois, J), Spr (Huestis, W), Sum (Staff)

**CHEM 36. Organic Chemistry Laboratory I**

Techniques for separations of compounds: distillation, crystallization, extraction, and chromatographic procedures. Lecture treats theory; lab provides practice. Prerequisite: 33. GER: DB-NatSci

3 units, Aut (McClory, M), Spr (Hua, Y), Sum (Staff)

**CHEM 110. Directed Instruction/Reading**

Undergraduates pursue a reading program under supervision of a faculty member in Chemistry; may also involve participation in lab. Prerequisites: superior work in 31A,B, 31X, or 33; and consent of instructor and the Chemistry undergraduate study committee.

1-2 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**CHEM 111. Exploring Chemical Research at Stanford**

Preference to freshmen and sophomores. Department faculty describe their cutting-edge research and its applications.

1 unit, Win (Markland, T)

**CHEM 130. Organic Chemistry Laboratory II**

Diels-Alder, reduction, and Wittig reactions; qualitative analysis. Lab. Limited enrollment Autumn Quarter. Prerequisite: 36. Corequisite: 35. GER: DB-NatSci

4 units, Aut (Hua, Y), Win (Hua, Y)

**CHEM 131. Organic Polyfunctional Compounds**

Aromatic compounds, polysaccharides, amino acids, proteins, natural products, dyes, purines, pyrimidines, nucleic acids, and polymers. Prerequisite: 35. GER: DB-NatSci

3 units, Aut (Kool, E), Win (Trost, B)

**CHEM 132. Synthesis Laboratory**

Advanced synthetic methods in organic and inorganic laboratory chemistry. Prerequisites: 35, 130. GER: DB-NatSci

3 units, Win (Cox, C)

**CHEM 134. Analytical Chemistry Laboratory**

Methods include gravimetric, volumetric, spectrophotometric, and chromatographic. Writing instruction includes communications, full papers, research proposals, and referee papers. Lab. Prerequisite: 130. GER: DB-NatSci

5 units, Spr (Cox, C)

**CHEM 135. Physical Chemical Principles**

Introductory physical chemistry intended for students of the life sciences, geology and environmental engineering. Chemical kinetics: rate laws, integration of rate laws, reaction mechanisms, enzyme kinetics. Chemical thermodynamics: first, second and third laws, thermochemistry, entropy, free energy, chemical equilibrium, physical equilibrium, osmotic pressure, other colligative properties. Prerequisites: 31A,B, or 31X, calculus. GER: DB-NatSci

3 units, Spr (Pande, V)

**CHEM 137. Special Topics in Organic Chemistry**

(Formerly 181.) Chemical view of the biological processes of life. Topics include: structure and function of proteins, peptides, and nucleic acids; and how to use chemistry to mediate biological processes. GER: DB-NatSci

3 units, Win (McClory, M)

**CHEM 151. Inorganic Chemistry I**

Theories of electronic structure, stereochemistry, and symmetry properties of inorganic molecules. Topics: ionic and covalent interactions, electron-deficient bonding, and molecular orbital theories. Emphasis is on the chemistry of the metallic elements. Prerequisites: 35. Recommended: 171. GER: DB-NatSci

3 units, Win (Stack, T)

**CHEM 153. Inorganic Chemistry II**

The theoretical aspects of inorganic chemistry. Group theory; many-electron atomic theory; molecular orbital theory emphasizing general concepts and group theory; ligand field theory; application of physical methods to predict the geometry, magnetism, and electronic spectra of transition metal complexes. Prerequisites: 151, 173. GER: DB-NatSci

3 units, Spr (Solomon, E)

**CHEM 155. Advanced Inorganic Chemistry**

(Same as CHEM 255) Chemical reactions of organotransition metal complexes and their role in homogeneous catalysis. Analogous patterns among reactions of transition metal complexes in lower oxidation states. Physical methods of structure determination. Prerequisite: one year of physical chemistry.

3 units, not given this year

**CHEM 171. Physical Chemistry**

Chemical thermodynamics; fundamental principles, Gibbsian equations, systematic deduction of equations, equilibrium conditions, phase rule, gases, solutions. Prerequisites: 31A,B, or 31X, 35; MATH 51. GER: DB-NatSci

3 units, Aut (Cui, B)

**CHEM 173. Physical Chemistry**

Introduction to quantum chemistry: the basic principles of wave mechanics, the harmonic oscillator, the rigid rotator, infrared and microwave spectroscopy, the hydrogen atom, atomic structure, molecular structure, valence theory. Prerequisites: MATH 51, 53; PHYSICS 41, 43. Recommended: PHYSICS 45. GER: DB-NatSci

3 units, Win (Boxer, S)

**CHEM 174. Physical Chemistry Laboratory I**

Experimental investigations in spectroscopy, thermodynamics, and electronics. Students take measurements on molecular systems, design and build scientific instruments, and computer-automate them with software that they write themselves. Prerequisites: 134, MATH 51, PHYSICS 44. Corequisite 173. GER: DB-NatSci

4 units, Win (Chidsey, C)

**CHEM 175. Physical Chemistry**

Introduction to kinetic theory and statistical mechanics: molecular theory of matter and heat, transport phenomena in gases, Boltzmann distribution law, partition functions for ideal gases. Introduction to chemical kinetics: measurement of rates of

reactions, relationship between rate and reaction mechanism, consideration of specific reactions, transition-state theory of reaction rates. Prerequisites: 171, 173. GER: DB-NatSci

3 units, Spr (Markland, T)

#### CHEM 176. Physical Chemistry Laboratory II

Use of chemical instrumentation to study physical chemical time-dependent processes. Experiments include reaction kinetics, fluorimetry, and nuclear magnetic and electron spin resonance spectroscopy. Lab. Prerequisite: 173. GER: DB-NatSci

3 units, Spr (Cui, B)

#### CHEM 181. Biochemistry I

(Same as BIO 188, BIO 288, CHEMENG 181, CHEMENG 281) (CHEMENG offerings formerly listed as 188/288.) Chemistry of major families of biomolecules including proteins, nucleic acids, carbohydrates, lipids, and cofactors. Structural and mechanistic analysis of properties of proteins including molecular recognition, catalysis, signal transduction, membrane transport, and harvesting of energy from light. Molecular evolution. Satisfies Central Menu Area I for Bio majors. Prerequisites: CHEM 33, 35, 131, and 135 or 171. GER: DB-NatSci

3 units, Aut (Cegelski, L)

#### CHEM 183. Biochemistry II

(Same as BIO 189, BIO 289, CHEMENG 183, CHEMENG 283) Focus on metabolic biochemistry: the study of chemical reactions that provide the cell with the energy and raw materials necessary for life. Topics include glycolysis, gluconeogenesis, the citric acid cycle, oxidative phosphorylation, photosynthesis, the pentose phosphate pathway, and the metabolism of glycogen, fatty acids, amino acids, and nucleotides as well as the macromolecular machines that synthesize RNA, DNA, and proteins. Medical relevance is emphasized throughout. Satisfies Central Menu Area I for Bio majors. Prerequisite: BIO 188/288 or CHEM 181 or CHEMENG 181/281 (formerly 188/288). GER: DB-NatSci

3 units, Win (Dunn, A)

#### CHEM 184. Biological Chemistry Laboratory

Modern techniques in biological chemistry including protein purification, characterization of enzyme kinetics, heterologous expression of His-tagged fluorescent proteins, site-directed mutagenesis, and single-molecule fluorescence microscopy. Prerequisite: 181. GER: DB-NatSci

4 units, Spr (Cegelski, L)

#### CHEM 185. Biochemistry III

Advanced biophysical chemistry. Topics include: protein and DNA structure, stability, and folding, membrane lateral organization and dynamics, and transmembrane transport. Prerequisites: 171, 173, 183. GER: DB-NatSci

3 units, Spr (Boxer, S)

#### CHEM 190. Introduction to Methods of Investigation

Limited to undergraduates admitted under the honors program or by special arrangement with a member of the teaching staff. For general character and scope, see 200. Prerequisite: 130. Corequisite: 300.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GRADUATE COURSES IN CHEMISTRY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

#### CHEM 200. Research and Special Advanced Work

Qualified graduate students undertake research or advanced lab work not covered by listed courses under the direction of a member of the teaching staff. For research and special work, students register for 200.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### CHEM 221. Advanced Organic Chemistry

Molecular orbital theory and orbital symmetry. Thermochemistry and thermochemical kinetics. Unimolecular reaction rate theory. Methods of determining organic reaction mechanisms from a theoretical and experimental point of view. Prerequisites: 137, 175.

3 units, Aut (Kanan, M)

#### CHEM 223. Advanced Organic Chemistry

Continuation of 221 with emphasis on physical methods. Prerequisite: 221 or consent of instructor.

3 units, Win (Trost, B)

#### CHEM 225. Advanced Organic Chemistry

Continuation of 223. Organic reactions, new synthetic methods, conformational analysis, and exercises in the syntheses of complex molecules. Prerequisite: 223 or consent of instructor.

3 units, Spr (Wender, P)

#### CHEM 227. Synthesis and Analysis at the Chemistry-Biology Interface

Focus on organic chemistry of biomacromolecules. Synthetic methods and conjugation chemistry; labeling and chemical modification of nucleic acids and peptides; combinatorial library construction and selection methods. Prerequisite: One year of undergraduate organic chemistry.

3 units, Spr (Kool, E)

#### CHEM 229. Organic Chemistry Seminar

Required of graduate students majoring in organic chemistry. Students giving seminars register for 231.

1 unit, Aut (Trost, B), Win (Trost, B), Spr (Trost, B)

#### CHEM 231. Organic Chemistry Seminar Presentation

Required of graduate students majoring in organic chemistry for the year in which they present their organic seminar. Second-year students must enroll all quarters.

1 unit, Aut (Solomon, E), Win (Solomon, E), Spr (Solomon, E)

#### CHEM 233A. Creativity in Organic Chemistry

Required of second- and third-year Ph.D. candidates in organic chemistry. The art of formulating, writing, and orally defending a research progress report (A) and two research proposals (B, C). Second-year students register for A and B; third-year students register for C. A: Aut, B: Spr, C: Spr

1 unit, Aut (Solomon, E)

#### CHEM 233B. Creativity in Organic Chemistry

Required of second- and third-year Ph.D. candidates in organic chemistry. The art of formulating, writing, and orally defending a research progress report (A) and two research proposals (B, C). Second-year students register for A and B; third-year students register for C. A: Aut, B: Spr, C: Spr

1 unit, Spr (Solomon, E)

#### CHEM 233C. Creativity in Organic Chemistry

Required of second- and third-year Ph.D. candidates in organic chemistry. The art of formulating, writing, and orally defending a research progress report (A) and two research proposals (B, C). Second-year students register for A and B; third-year students register for C. A: Aut, B: Spr, C: Spr

1 unit, Spr (Solomon, E)

#### CHEM 235. Applications of NMR Spectroscopy

The uses of NMR spectroscopy in chemical and biochemical sciences, emphasizing data acquisition for liquid samples and including selection, setup, and processing of standard and advanced experiments.

3 units, Win (Lynch, S)

#### CHEM 237. Electrochemistry

Principles of electrochemistry and their application to redox systems, electron transfer, electroanalysis, electrodeposition, electrocatalysis, batteries, and fuel cells. Prerequisite: 171 or equivalent.

3 units, Spr (Chidsey, C)

#### CHEM 251. Advanced Inorganic Chemistry

Chemical reactions of inorganic compounds with focus on mechanisms of reactions mediated by inorganic and organometallic complexes. The structural and electronic basis of reactivity including oxidation and reduction; kinetics and thermodynamics of inorganic reactions. Prerequisite: one year of physical chemistry.

3 units, not given this year

#### CHEM 253. Advanced Inorganic Chemistry

Electronic structure and physical properties of transition metal complexes. Ligand field and molecular orbital theories, magnetism and magnetic susceptibility, electron paramagnetic resonance including hyperfine interactions and zero field splitting and electronic absorption spectroscopy including vibrational interactions. Prerequisite: 153 or the equivalent.

3 units, Win (Solomon, E)

#### CHEM 255. Advanced Inorganic Chemistry

(Same as CHEM 155) Chemical reactions of organotransition

metal complexes and their role in homogeneous catalysis. Analogous patterns among reactions of transition metal complexes in lower oxidation states. Physical methods of structure determination. Prerequisite: one year of physical chemistry.

*3 units, not given this year*

**CHEM 258A. Research Progress in Inorganic Chemistry**

Required of all second-, third-, and fourth-year Ph.D. candidates in inorganic chemistry. Students present their research progress in written and oral forms (A); present a seminar in the literature of the field of research (B); and formulate, write, and orally defend a research proposal (C). Second-year students register for A; third-year students register for B; fourth-year students register for C.

*1 unit, Win (Solomon, E)*

**CHEM 258B. Research Progress in Inorganic Chemistry**

Required of all second-, third-, and fourth-year Ph.D. candidates in inorganic chemistry. Students present their research progress in written and oral forms (A); present a seminar in the literature of the field of research (B); and formulate, write, and orally defend a research proposal (C). Second-year students register for A; third-year students register for B; fourth-year students register for C.

*1 unit, Spr (Solomon, E)*

**CHEM 258C. Research Progress in Inorganic Chemistry**

Required of all second-, third-, and fourth-year Ph.D. candidates in inorganic chemistry. Students present their research progress in written and oral forms (A); present a seminar in the literature of the field of research (B); and formulate, write, and orally defend a research proposal (C). Second-year students register for A; third-year students register for B; fourth-year students register for C.

*1 unit, Aut (Staff), Win (Solomon, E)*

**CHEM 259. Inorganic Chemistry Seminar**

Required of graduate students majoring in inorganic chemistry.

*1 unit, Aut (Solomon, E), Win (Solomon, E), Spr (Solomon, E)*

**CHEM 271. Advanced Physical Chemistry**

The principles of quantum mechanics. General formulation, mathematical methods, and applications of quantum theory. Exactly solvable problems and approximate methods including time independent perturbation theory and the variational method. Time dependent methods including exactly solvable problems, time dependent perturbation theory, and density matrix formalism. Different representations of quantum theory including the Schrödinger, matrix, and density matrix methods. Absorption and emission of radiation Angular momentum. Atomic structure calculations and simple molecular structure methods. Prerequisite: 175.

*3 units, Aut (Fayer, M)*

**CHEM 273. Advanced Physical Chemistry**

Topics in advanced quantum mechanics: ab initio electronic structure theory (Hartree-Fock, configuration interaction, multi-configuration self-consistent-field, and many-body perturbation theory techniques) and density functional theory, time-dependent quantum mechanics (time evolution operator, Feynman path integrals, correlation functions), interaction of radiation and matter (semiclassical and quantum theories of radiation, transition probabilities, selection rules), and vibrations and rotations of polyatomic molecules (normal modes, anharmonicity, wave functions and energy levels of rigid rotations, vibration-rotation interaction). Prerequisite: Chem 271 or Physics 230.

*3 units, Win (Martinez, T)*

**CHEM 275. Advanced Physical Chemistry**

The principles and methods of statistical mechanics from the ensemble point of view, statistical thermodynamics, heat capacities of solids and polyatomic gases, chemical equilibria, equations of state of fluids, and phase transitions. Prerequisite: 271.

*3 units, Spr (Pecora, R)*

**CHEM 276. Advanced Physical Chemistry**

The statistical mechanical basis for computer simulations of atomic and molecular liquids. Principles of the Monte Carlo method, Metropolis algorithm, and application to lattice models and continuum fluids. Principles of molecular dynamics calculations, methods for sampling equilibrium ensembles, algorithms for dynamics. Periodic boundary conditions, methods for dealing with long-ranged forces, construction of potential energy functions, estimation of statistical error in results of simulations. Prerequisite: 275. it might be repeatable for credit.

*3 units, not given this year*

**CHEM 277. Materials Chemistry and Physics**

Topics: structures and symmetries and of solid state crystalline materials, chemical applications of group theory in solids, quantum mechanical electronic band structures of solids, phonons in solids, synthesis methods and characterization techniques for solids including nanostructured materials, selected applications of solid state materials and nanostructures. May be repeated for credit. Prerequisite: 271 or equivalent, or consent of instructor.

*3 units, not given this year*

**CHEM 278A. Research Progress in Physical Chemistry**

Required of all second- and third-year Ph.D. candidates in physical and biophysical chemistry and chemical physics. Second-year students present their research progress and plans in brief written and oral summaries (A); third-year students prepare a written progress report (B). A: Win, B: Win

*1 unit, Win (Cui, B)*

**CHEM 278B. Research Progress in Physical Chemistry**

Required of all second- and third-year Ph.D. candidates in physical and biophysical chemistry and chemical physics. Second-year students present their research progress and plans in brief written and oral summaries (A); third-year students prepare a written progress report (B). A: Win, B: Win

*1 unit, Win (Cui, B)*

**CHEM 279. Physical Chemistry Seminar**

Required of graduate students majoring in physical chemistry. May be repeated for credit.

*1 unit, Aut (Cegelski, L), Win (Cegelski, L), Spr (Cui, B)*

**CHEM 280. Single-Molecule Spectroscopy and Imaging**

Theoretical and experimental techniques necessary to achieve single-molecule sensitivity in laser spectroscopy: interaction of radiation with spectroscopic transitions; systematics of signals, noise, and signal-to-noise; modulation and imaging methods; and analysis of fluctuations; applications to modern problems in biophysics, cellular imaging, physical chemistry, single-photon sources, and materials science. Prerequisites: 271, previous or concurrent enrollment in 273.

*3 units, not given this year*

**CHEM 285. Chemical Principles in Drug Discovery and Development**

Application of physical organic chemistry to the discovery and subsequent product development of small molecule and macromolecular drugs. Key physical, chemical, and biological properties of drug candidates, how to measure them, and how to engineer them. Principles of drug formulation and delivery. Recommended: graduate-level background in physical and organic chemistry.

*3 units, Aut (Khosla, C)*

**CHEM 297. Bio-Inorganic Chemistry**

(Same as BIOPHYS 297) Overview of metal sites in biology. Metalloproteins as elaborated inorganic complexes, their basic coordination chemistry and bonding, unique features of the protein ligand, and the physical methods used to study active sites. Active site structures are correlated with function. Prerequisites: 153 and 173, or equivalents.

*3 units, not given this year*

**CHEM 299. Teaching of Chemistry**

Required of all teaching assistants in Chemistry. Techniques of teaching chemistry by means of lectures and labs.

*1-3 units, Aut (Hua, Y), Win (Hua, Y), Spr (Hua, Y)*

**CHEM 300. Department Colloquium**

Required of graduate students. May be repeated for credit.

*1 unit, Aut (Trost, B), Win (Trost, B), Spr (Trost, B)*

**CHEM 301. Research in Chemistry**

Required of graduate students who have passed the qualifying examination. Open to qualified graduate students with the consent of the major professor. Research seminars and directed reading deal with newly developing areas in chemistry and experimental techniques. May be repeated for credit. Search for adviser name on Axxess.

*2 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**CHEM 309. Navigating Career Options for Ph.D. Chemists**

Planning a post-graduate career. Topics include career options, job search strategies, job application process, long-term career

planning, and minority issues in science careers. Workshops focused on developing professional skills working with CDC and CTL, and panel discussions with chemistry Ph.D.s working in a range of fields. (Zare)

*1 unit, not given this year*

#### **CHEM 390. Curricular Practical Training for Chemists**

For Chemistry majors who need work experience as part of their program of study.

*1 unit, Aut (Staff)*

#### **CHEM 459. Frontiers in Interdisciplinary Biosciences**

(Same as BIO 459, BIOC 459, BIOE 459, CHEMENG 459, PSYCH 459) Students register through their affiliated department; otherwise register for CHEMENG 459. For specialists and non-specialists. Sponsored by the Stanford BioX Program. Three seminars per quarter address scientific and technical themes related to interdisciplinary approaches in bioengineering, medicine, and the chemical, physical, and biological sciences. Leading investigators from Stanford and the world present breakthroughs and endeavors that cut across core disciplines. Pre-seminars introduce basic concepts and background for non-experts. Registered students attend all pre-seminars; others welcome. See <http://biox.stanford.edu/courses/459.html>. Recommended: basic mathematics, biology, chemistry, and physics.

*1 unit, Aut (Robertson, C), Win (Robertson, C), Spr (Robertson, C)*

#### **CHEM 802. TGR Dissertation**

*0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## CHICANA/O STUDIES (CHICANST) COURSES

### UNDERGRADUATE COURSES IN CHICANA/O STUDIES

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **CHICANST 14N. Growing Up Bilingual**

(F,Sem) (Same as CSRE 14N, EDUC 114N) Stanford Introductory Seminar. This course is a Freshman Introductory Seminar that has as its purpose introducing students to the sociolinguistic study of bilingualism by focusing on bilingual communities in this country and on bilingual individuals who use two languages in their everyday lives. Much attention is given to the history, significance, and consequences of language contact in the United States. The course focuses on the experiences of long-term US minority populations as well as that of recent immigrants.

*3 units, Win (Valdes, G)*

#### **CHICANST 117N. Film, Nation, Latinidad**

(Same as CSRE 117N, ILAC 117N) Examination of films from Spain, Mexico, and Latina/o USA that expand, trouble, contest, parody, or otherwise interrogate notions of national identity. Filmmakers may include Lourdes Portillo, Alejandro González Iñárritu, John Sayles, Maria Novaro, Pedro Almodóvar, and Gregory Nava.

*3-4 units, not given this year*

#### **CHICANST 125S. Chicano/Latino Politics**

(Same as POLISCI 125S) The political position of Latinos and Latinas in the U.S. Focus is on Mexican Americans, with attention to Cuban Americans, Puerto Ricans, and other groups. The history of each group in the American polity; their political circumstances with respect to the electoral process, the policy process, and government; the extent to which the demographic category Latino is meaningful; and group identity and solidarity among Americans of Latin American ancestry. Topics include immigration, education, affirmative action, language policy, and environmental justice. GER:DB-SocSci

*5 units, not given this year*

#### **CHICANST 160N. Latino/Latina Performance in the United States**

(F,Sem) (Same as CSRE 160N, DRAMA 17N) Stanford Introductory Seminar. Preference to freshmen. This course will

introduce works by U.S. Latino and Latina performance artists producing from the margins of the mainstream Euro-American theater world. We will examine how performance art serves as a kind of dramatized political forum for Latino/a artists, producing some of the most transgressive explorations of queer and national/ethnic identities in the U.S. today. By the course's conclusion, each student will create and perform in a staged reading of an original performance piece. GER:DB-Hum, EC-AmerCul

*3 units, Win (Moraga, C)*

#### **CHICANST 164. Immigration and the Changing United States**

(Same as CSRE 164, SOC 164, SOC 264) The role of race and ethnicity in immigrant group integration in the U.S. Topics include: theories of integration; racial and ethnic identity formation; racial and ethnic change; immigration policy; intermarriage; hybrid racial and ethnic identities; comparisons between contemporary and historical waves of immigration. GER:DB-SocSci

*5 units, Aut (Jimenez, T)*

#### **CHICANST 166. Mexicans, Mexican Americans, and Chicanos in American Society**

(Same as SOC 166, SOC 266) Contemporary sociological issues affecting Mexican-origin people in the U.S. Topics include: the immigrant experience, immigration policy, identity, socioeconomic integration, internal diversity, and theories of incorporation. GER:DB-SocSci

*5 units, not given this year*

#### **CHICANST 168. New Citizenship: Grassroots Movements for Social Justice in the U.S.**

(Same as ANTHRO 169A, CSRE 168, FEMST 140H) Focus is on the contributions of immigrants and communities of color to the meaning of citizenship in the U.S. Citizenship, more than only a legal status, is a dynamic cultural field in which people claim equal rights while demanding respect for differences. Academic studies of citizenship examined in dialogue with the theory and practice of activists and movements. Engagement with immigrant organizing and community-based research is a central emphasis.

*5 units, Win (Coll, K)*

#### **CHICANST 180E. Introduction to Chicana/o Studies**

(Same as CSRE 180E) Historical and contemporary experiences that have defined the status of Mexican-origin people living in the U.S. Topics include the U.S./Mexico border and the borderlands; immigration and anti-immigration sentiment; literary and cultural traditions; music; labor; historical perspectives on Mexicans in the U.S. and the Chicano movement; urban realities; gender relations; political and economic changes; and inter- and intra-group interactions. Sources include social science and humanities scholarship. GER:DB-Hum, EC-AmerCul

*5 units, Spr (Gallardo, S)*

#### **CHICANST 189W. Language and Minority Rights**

(Same as CSRE 189W, EDUC 189X) Language as it is implicated in migration and globalization. The effects of globalization processes on languages, the complexity of language use in migrant and indigenous minority contexts, the connectedness of today's societies brought about by the development of communication technologies. Individual and societal multilingualism; preservation and revival of endangered languages. GER:EC-GlobalCom

*3 units, not given this year*

#### **CHICANST 200. Latin@ Literature**

(Same as CSRE 200, ILAC 280, ILAC 382) Texts by U.S. Latin@s of Mexican, Puerto Rican, Cuban, and Dominican descent. Examines how these writers' shared history of Spanish colonization and U.S. imperialism has resulted in differing representations of home and homeland, nation, diaspora, history, and memory. Explores how racialization informs the production of gendered identities as well as sexualities. Analysis of the formal conventions of fiction, poetry, drama, memoir, and film.

*3-5 units, Win (Yarbro-Bejarano, Y)*

#### **CHICANST 200R. Directed Research**

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff)*

#### **CHICANST 200W. Directed Reading**

(Staff)

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff)*

**CHICANST 201B. From Racial Justice to Multiculturalism: Movement-based Arts Organizing in the Post Civil Rights Era** (Same as CSRE 201B) How creative projects build and strengthen communities of common concern. Projects focus on cultural reclamation, multiculturalism, cultural equity and contemporary cultural wars, media literacy, independent film, and community-based art. Guest artists and organizers, films, and case studies.

*5 units, Aut (Hernandez, G)*

**CHICANST 293. Latino American Avant Garde** (Same as ARTHIST 293) African contribution to modern art practices in Latino America. Mexico, Brazil, and Cuba as models. Cultural and historical context. GER:DB-Hum

*5 units, not given this year*

## GRADUATE COURSES IN CHICANA/O STUDIES

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**CHICANST 201C. Critical Concepts in Chicana/o Literature** (Same as CSRE 201C, ILAC 380E) Interrogation of the critical discourses that have configured and reconfigured the canon of Chicana/o literature over the last thirty years. Close textual readings of primary texts, mainly narrative, within the development of Chicana/o literary and cultural criticism. Construction of narrative genealogies and foundational texts. Impact of the publication of late-nineteenth or pre-movement novels and Chicana feminist/lesbian/queer critiques. Consideration of alternative paradigms such as positioning Chicana/o literature within a U.S. Latina/o literary imaginary, and the shift of critical discourse in the field of visual art from a paradigm of resistance and affirmation to one of post Chicano.

*3-5 units, not given this year*

## CHINESE GENERAL (CHINGEN) COURSES

### UNDERGRADUATE COURSES IN CHINESE GENERAL

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**CHINGEN 51. Chinese Calligraphy**

Practice in writing Chinese characters with a brush, emphasizing standardized script and the composition of the characters and improving handwriting. Limited enrollment. May be repeated for credit. Prerequisite: CHINLANG 3 or equivalent.

*1-2 units, Spr (Chuang, Y)*

**CHINGEN 70N. Marvelous Creatures: Animals and Humans in Chinese Literature**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Read novels and short stories as well as view films that feature an array of marvelous creatures from late imperial times to the contemporary era. What animal imageries and metaphors can reveal about the Chinese and how they relate to the natural, supernatural, and human worlds across the centuries. GER:DB-Hum, EC-GlobalCom

*3-4 units, Spr (Lee, H)*

**CHINGEN 73. Chinese Language, Culture, and Society**

(Same as CHINGEN 173) Topics include the origin of Chinese, development of dialects, emergence of the standard, preferred formulaic expressions, the evolution of writing, and language policies in greater China. Prerequisite: CHINLANG 1 or 1B, or equivalent. GER:DB-SocSci, EC-GlobalCom

*4 units, not given this year*

**CHINGEN 91. Traditional East Asian Culture: China**

Required for Chinese and Japanese majors. Introduction to Chinese culture in a historical context. Topics include political and socioeconomic institutions, religion, ethics, education, and art and literature. GER:DB-Hum, EC-GlobalCom

*5 units, Aut (Liu, L)*

**CHINGEN 117. Worship of Buddhist Images in Medieval China**

(Same as CHINGEN 217) Explores Buddhist image-making practices from Han to Tang China from a trans-Asian perspective. Topics include characteristics of earliest Chinese images (vis-a-vis those of Indian subcontinent), their growth as a dominant artistic genre, inroads of foreign images and Chinese interactions, constructions of Buddhist ritual spaces such as monumental pagodas and cave temples, cross-cultural contexts of image worship.

*3-5 units, Spr (Kim, M)*

**CHINGEN 118. Constructing National History in East Asian Archaeology**

(Same as CHINGEN 218) Archaeological studies in contemporary East Asia share a common concern, to contribute to building a national narrative and cultural identity. This course focuses on case studies from China, Korea, and Japan, examining the influence of particular social-political contexts, such as nationalism, on the practice of archaeology in modern times. GER:DB-SocSci

*3-5 units, Win (Liu, L)*

**CHINGEN 119. Popular Culture and Casino Capitalism in China**

(Same as CHINGEN 219) Examination of different forms of Chinese popular culture used to gauge or control fate and uncertainty, from geomancy and qigong to ghost culture and mahjong. Ways in which Chinese are incorporating these cultural forms into the informal economy to get rich quick: rotating credit associations, stock market speculation, pyramid schemes, underground lotteries, counterfeiting. Impact of casino capitalism on Chinese culture and social life today.

*3-4 units, not given this year*

**CHINGEN 120. Soldiers and Bandits in Chinese Culture**

(Same as CHINGEN 220) Social roles and literary images of two groups on the margins of traditional Chinese society; historical and comparative perspectives.

*3-5 units, not given this year*

**CHINGEN 121. Classical Chinese Rituals**

(Same as CHINGEN 221) Meanings of rituals regarding death, wedding, war, and other activities; historical transformations of classical rituals throughout the premodern period; legacy of the Chinese ritual tradition. Sources include canonical texts.

*3-5 units, not given this year*

**CHINGEN 131. Chinese Poetry in Translation**

(Same as CHINGEN 231) From the first millennium B.C. through the 12th century. Traditional verse forms representative of the classical tradition; highlights of the most distinguished poets. History, language, and culture. Chinese language not required. GER:DB-Hum, EC-GlobalCom

*4 units, not given this year*

**CHINGEN 132. Chinese Fiction and Drama in Translation**

(Same as CHINGEN 232) From early times to the 18th century, emphasizing literary and thematic discussions of major works in English translation. GER:DB-Hum, EC-GlobalCom

*4 units, not given this year*

**CHINGEN 133. Literature in 20th-Century China**

(Same as CHINGEN 233) (Graduate students register for 233.) How modern Chinese culture evolved from tradition to modernity; the century-long drive to build a modern nation state and to carry out social movements and political reforms. How the individual developed modern notions of love, affection, beauty, and moral relations with community and family. Sources include fiction and film clips. WIM course. GER:DB-Hum, EC-GlobalCom

*4-5 units, Aut (Wang, B)*

**CHINGEN 134. Early Chinese Mythology**

(Same as CHINGEN 234) The definition of a myth. Major myths of China prior to the rise of Buddhism and Daoism including: tales of the early sage kings such as Yu and the flood; depictions of deities in the underworld; historical myths; tales of immortals in relation to local cults; and tales of the patron deities of crafts. GER:DB-Hum

*3-5 units, not given this year*

**CHINGEN 136. The Chinese Family**

(Same as CHINGEN 236) History and literature. Institutional,

ritual, affective, and symbolic aspects. Perspectives of gender, class, and social change. GER:EC-GlobalCom

3-5 units, not given this year

**CHINGEN 137. Tiananmen Square: History, Literature, Iconography**

(Same as CHINGEN 237) Multidisciplinary. Literary and artistic representations of this site of political and ideological struggles throughout the 20th century. Tiananmen-themed creative, documentary, and scholarly works that shed light on the dynamics and processes of modern Chinese culture and politics. No knowledge of Chinese required. GER:DB-Hum, EC-GlobalCom

3-5 units, *Win (Lee, H)*

**CHINGEN 138. Love and Politics in Chinese Cinema**

(Same as CHINGEN 238) How films work as expressions of desire, impulse, emotional connection, and communal attachment during times of social upheaval and reconstruction. Film theory and aesthetics, and alternative paradigms about world and social relations. Chinese language not required. GER:DB-Hum

4-5 units, not given this year

**CHINGEN 139. Cultural Revolution as Literature**

(Same as CHINGEN 239) Literary form, aesthetic sensibility, and themes of trauma, identity, and the limits of representation in major literary works concerning the Cultural Revolution in China. Recommended: background in Chinese history or literature.

4 units, not given this year

**CHINGEN 140. Chinese Justice: Law, Morality, and Literature**

(Same as CHINGEN 240) Explores the relationship between law and morality in Chinese literature, culture, and society. Readings include court case romances, crime plays, detective novels, and legal dramas from traditional era and modern and contemporary periods. Prior coursework in Chinese history, civilization, or literature is recommended. All readings are in English. GER:EC-GlobalCom

3-5 units, not given this year

**CHINGEN 141. Emergence of Chinese Civilization from Caves to Palaces**

(Same as ARCHLGY 111, CHINGEN 241) Introduces processes of cultural evolution from the Paleolithic to the Three Dynasties in China. By examining archaeological remains, ancient inscriptions, and traditional texts, four major topics will be discussed: origins of modern humans, beginnings of agriculture, development of social stratification, and emergence of states and urbanism. GER:DB-Hum

3-4 units, *Aut (Liu, L)*

**CHINGEN 150. Sex, Gender, and Power in Modern China**

(Same as CHINGEN 250) Investigates how sex, gender, and power are entwined in the Chinese experience of modernity. Topics include anti-footbinding campaigns, free love/free sex, women's mobilization in revolution and war, the new Marriage Law of 1950, Mao's iron girls, postsocialist celebrations of sensuality, and emergent queer politics. Readings range from feminist theory to China-focused historiography, ethnography, memoir, biography, fiction, essay, and film. All course materials are in English. GER:DB-Hum, EC-Gender

3-5 units, *Spr (Lee, H)*

**CHINGEN 193E. Female Divinities in China**

(Same as CHINGEN 393E) The role of powerful goddesses, such as the Queen Mother of the West, Guanyin, and Chen Jinggu, in Chinese religion. Imperial history to the present day. What roles goddesses played in the spirit world, how this related to the roles of human women, and why a civilization that excluded women from the public sphere granted them such a major, even dominant place, in the religious sphere. Readings in English-language secondary literature. GER:DB-Hum, EC-Gender

3-5 units, not given this year

**CHINGEN 198. Senior Colloquium in Chinese Studies**

Students research, write, and present a capstone essay or honors thesis.

1 unit, *Win (Lee, H)*

## GRADUATE COURSES IN CHINESE GENERAL

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**CHINGEN 173. Chinese Language, Culture, and Society**

(Same as CHINGEN 73) Topics include the origin of Chinese, development of dialects, emergence of the standard, preferred formulaic expressions, the evolution of writing, and language policies in greater China. Prerequisite: CHINLANG 1 or 1B, or equivalent.

4 units, not given this year

**CHINGEN 200. Directed Readings in Asian Languages**

For Chinese literature. Prerequisite: consent of instructor. (Staff)

1-12 units, *Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**CHINGEN 201. Chinese Proseminar**

3 units, *Win (Wang, B)*

**CHINGEN 201. Teaching Chinese Humanities**

Prepares graduate students to teach humanities at the undergraduate level. Topics include syllabus development and course design, techniques for generating discussion, effective grading practices, and issues particular to the subject matter.

1 unit, not given this year

**CHINGEN 217. Worship of Buddhist Images in Medieval China**

(Same as CHINGEN 117) Explores Buddhist image-making practices from Han to Tang China from a trans-Asian perspective. Topics include characteristics of earliest Chinese images (vis-a-vis those of Indian subcontinent), their growth as a dominant artistic genre, inroads of foreign images and Chinese interactions, constructions of Buddhist ritual spaces such as monumental pagodas and cave temples, cross-cultural contexts of image worship.

3-5 units, *Spr (Kim, M)*

**CHINGEN 218. Constructing National History in East Asian Archaeology**

(Same as CHINGEN 118) Archaeological studies in contemporary East Asia share a common concern, to contribute to building a national narrative and cultural identity. This course focuses on case studies from China, Korea, and Japan, examining the influence of particular social-political contexts, such as nationalism, on the practice of archaeology in modern times.

3-5 units, *Win (Liu, L)*

**CHINGEN 219. Popular Culture and Casino Capitalism in China**

(Same as CHINGEN 119) Examination of different forms of Chinese popular culture used to gauge or control fate and uncertainty, from geomancy and qigong to ghost culture and mahjong. Ways in which Chinese are incorporating these cultural forms into the informal economy to get rich quick: rotating credit associations, stock market speculation, pyramid schemes, underground lotteries, counterfeiting. Impact of casino capitalism on Chinese culture and social life today.

3-4 units, not given this year

**CHINGEN 220. Soldiers and Bandits in Chinese Culture**

(Same as CHINGEN 120) Social roles and literary images of two groups on the margins of traditional Chinese society; historical and comparative perspectives.

3-5 units, not given this year

**CHINGEN 221. Classical Chinese Rituals**

(Same as CHINGEN 121) Meanings of rituals regarding death, wedding, war, and other activities; historical transformations of classical rituals throughout the premodern period; legacy of the Chinese ritual tradition. Sources include canonical texts.

3-5 units, not given this year

Readings in English-language secondary literature.

*3-5 units, not given this year*

## CHINESE LANGUAGE (CHINLANG) COURSES

### UNDERGRADUATE COURSES IN CHINESE LANGUAGE

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**CHINLANG 1. First-Year Modern Chinese, First Quarter**

Conversation, grammar, reading, elementary composition. Daily sections may be set at the beginning of the quarter to suit schedule requirements.

*5 units, Aut (Zeng, H)*

**CHINLANG 1B. First-Year Modern Chinese for Bilingual Students, First Quarter**

For students with elementary comprehension and speaking skills who need work on conversation, grammar, reading, and composition.

*3 units, Aut (Lin, N)*

**CHINLANG 2. First-Year Modern Chinese, Second Quarter**

Continuation of 1. Daily sections may be set at the beginning of the quarter to suit schedule requirements. Prerequisite: placement test, 1 or consent of instructor.

*5 units, Win (Zeng, H)*

**CHINLANG 2B. First-Year Modern Chinese for Bilingual Students, Second Quarter**

Continuation of 1B. For students with elementary comprehension and speaking skills who need work on conversation, grammar, reading, and composition. Prerequisite: placement test, 1B or consent of instructor.

*3 units, Win (Lin, N)*

**CHINLANG 3. First-Year Modern Chinese, Third Quarter**

Continuation of 2. Daily sections may be set at the beginning of the quarter to suit schedule requirements. Fulfills the University language requirement. Prerequisite: placement test, 2 or consent of instructor.

*5 units, Spr (Zeng, H)*

**CHINLANG 3B. First-Year Modern Chinese for Bilingual Students, Third Quarter**

Continuation of 2B. Continuation of 2B. For students with elementary comprehension and speaking skills who need work on conversation, grammar, reading, and composition. Prerequisite: placement test, 2B or consent of instructor.

*3 units, Spr (Lin, N)*

**CHINLANG 5. Intensive First-Year Modern Chinese**

Equivalent to 1,2,3 combined if taken together with the Beijing portion of the Summer Program. Five weeks at Stanford and four weeks at Peking University.

*8 units, Sum (Staff)*

**CHINLANG 6. Beginning Conversational Chinese, First Quarter**

Three quarter sequence. Basic language skills in Mandarin to function abroad.

*2 units, Aut (Rozelle, Y)*

**CHINLANG 7. Beginning Conversational Chinese, Second Quarter**

Continuation of 6. Basic language skills in Mandarin to function abroad. Prerequisite: 6 or consent of instructor.

2 units, Win (Rozelle, Y)

**CHINLANG 8. Beginning Conversational Chinese, Third Quarter**

Continuation of 7. Basic language skills in Mandarin to function abroad. Prerequisite: 7 or consent of instructor.

2 units, Spr (Rozelle, Y)

**CHINLANG 10. Beginning Southern Min (Taiwanese) Conversation, First Quarter**

Three quarter sequence. Basic language skills for everyday life situations.

2 units, Win (Staff)

**CHINLANG 11. Beginning Southern Min (Taiwanese) Conversation, Second Quarter**

Continuation of 10. Prerequisite: 10 or consent of instructor.

2 units, Win (Lin, N)

**CHINLANG 12. Beginning Southern Min (Taiwanese) Conversation, Third Quarter**

Continuation of 11. Prerequisite: 11 or consent of instructor.

2 units, Spr (Lin, N)

**CHINLANG 13A. Intermediate Southern Min (Taiwanese) Conversation, First Quarter**

Vocabulary including business-related terms, grammatical structures, and spontaneous conversations. Prerequisite: 12 or consent of instructor.

2 units, Aut (Lin, N)

**CHINLANG 13B. Intermediate Southern Min (Taiwanese) Conversation, Second Quarter**

Continuation of 13A. Vocabulary including business-related terms, grammatical structures, and spontaneous conversations. Prerequisite: 13A or consent of instructor.

2 units, Win (Lin, N)

**CHINLANG 13C. Intermediate Southern Min (Taiwanese) Conversation, Third Quarter**

Continuation of 13B. Vocabulary including business-related terms, grammatical structures, and spontaneous conversations. Prerequisite: 13A or consent of instructor.

2 units, Spr (Lin, N)

**CHINLANG 15. Beginning Conversational Cantonese, First Quarter**

Basic language skills for everyday life situations and for functioning abroad. Internet tools will be incorporated in this course.

2 units, Aut (Dennig, S)

**CHINLANG 15M. Beginning Conversational Cantonese for Mandarin Speakers, First Quarter**

Conversational skills and special written characters in Cantonese. Internet tools will be incorporated in this course.

2 units, Aut (Dennig, S)

**CHINLANG 16. Beginning Cantonese Conversation, Second Quarter**

Continuation of 15. Basic language skills for everyday life situations and for functioning abroad. Internet tools will be incorporated in this course. Prerequisite: 15 or consent of instructor.

2 units, Win (Dennig, S)

**CHINLANG 16M. Beginning Conversational Cantonese for Mandarin Speakers, Second Quarter**

Continuation of 15M. Conversational skills and special written characters in Cantonese. Internet tools will be incorporated in this course. Prerequisite: 15M or consent of instructor.

2 units, Win (Dennig, S)

**CHINLANG 17. Beginning Conversational Cantonese, Third Quarter**

Continuation of 16. Basic language skills for everyday life situations and for functioning abroad. Internet tools will be incorporated in this course. Prerequisite: 16 or consent of instructor.

2 units, Spr (Dennig, S)

**CHINLANG 17M. Beginning Conversational Cantonese for Mandarin Speakers, Third Quarter**

Continuation of 16M. Conversational skills and special written characters in Cantonese. Internet tools will be incorporated in this course. Prerequisite: 16M or consent of instructor.

2 units, Spr (Dennig, S)

**CHINLANG 18. Intermediate Cantonese Conversation, First Quarter**

Continuation of CHINLANG 17. Further develop students' conversational skills and expand their vocabulary and grammar for talking about a wide range of topics relevant to college students. Internet tools will be incorporated in this course. 17 or consent of instructor.

2 units, Aut (Dennig, S)

**CHINLANG 19. Intermediate Conversational Cantonese, Second Quarter**

Continuation of 18 or 18M.

2 units, Win (Dennig, S)

**CHINLANG 20. Intermediate Conversational Cantonese, Third Quarter**

Continuation of 19. Further develop students' conversational skills and expand their vocabulary and grammar for talking about a wide range of topics relevant to college students. Internet tools will be incorporated in this course. Prerequisite: 19, 19M or consent of instructor.

2 units, Spr (Dennig, S)

**CHINLANG 20A. Advanced Conversational Cantonese, First Quarter**

Viewing and discussion of authentic multimedia materials on cultural topics and current events: movies, video clips, radio, TV broadcasts, and Internet tools. Prerequisite 20 or consent of instructor.

2 units, Aut (Dennig, S)

**CHINLANG 20B. Advanced Conversational Cantonese, Second Quarter**

Continuation of 20A. Viewing and discussion of authentic multimedia materials on cultural topics and current events: movies, video clips, radio, TV broadcasts, and Internet tools. Prerequisite: 20A or consent of instructor.

2 units, Win (Dennig, S)

**CHINLANG 20C. Advanced Cantonese Conversation - Third Quarter**

Continuation of 20B. Improving Cantonese through Hong Kong movies. Prerequisite 20B or consent of instructor.

2 units, Spr (Dennig, S)

**CHINLANG 21. Second-Year Modern Chinese, First Quarter**

Grammar, reading, conversation, composition. Daily sections may be set at the beginning of the quarter to suit schedule requirements. Prerequisite: placement test, 3 or consent of instructor.

5 units, Aut (Chung, M)

**CHINLANG 21B. Second-Year Modern Chinese for Bilingual Students, First Quarter**

Continuation of 3B. For students with advanced comprehension and speaking skills, but lacking equivalent knowledge of grammar, reading, and writing Chinese characters. Equivalent to 21. Prerequisite: placement test, 3B or consent of instructor.

3 units, Aut (Tang, L)

**CHINLANG 22. Second-Year Modern Chinese, Second Quarter**

Continuation of 21. Grammar, reading, conversation, composition. Daily sections may be set at the beginning of the quarter to suit schedule requirements. Prerequisite: placement test, 21 or consent of instructor.

5 units, Win (Chung, M)

**CHINLANG 22B. Second-Year Chinese for Bilingual Students, Second Quarter**

Continuation of 21B. For students with advanced comprehension and speaking skills, but lacking equivalent knowledge of grammar, reading, and writing Chinese characters. Prerequisite: placement test, 21B or consent of instructor.

3 units, Win (Staff)

**CHINLANG 23. Second-Year Modern Chinese, Third Quarter**  
Continuation of 22. Grammar, reading, conversation, composition. Daily sections may be set at the beginning of the quarter to suit schedule requirements. Prerequisite: placement test, 22 or consent of instructor.

*5 units, Spr (Chung, M)*

**CHINLANG 23B. Second-Year Chinese for Bilingual Students, Third Quarter**

Continuation of 22B. For students with advanced comprehension and speaking skills, but lacking equivalent knowledge of grammar, reading, and writing Chinese characters. Prerequisite: placement test, 22B or consent of instructor.

*3 units, Spr (Staff)*

**CHINLANG 25. Intensive Second-Year Modern Chinese**

Equivalent to 21,22,23 combined if taken together with the Beijing portion of the Summer Program. Five weeks at Stanford and four weeks at Peking University. Prerequisite: 3 or equivalent.

*8 units, Sum (Staff)*

**CHINLANG 27. Intermediate Chinese Conversation, First Quarter**

Prerequisite: 3 or consent of instructor.

*2 units, Aut (Zhang, Y)*

**CHINLANG 28. Intermediate Chinese Conversation, Second Quarter**

Continuation of 27. Prerequisite: 27 or consent of instructor.

*2 units, Win (Zhang, Y)*

**CHINLANG 29. Intermediate Chinese Conversation, Third Quarter**

Continuation of 28. Prerequisite: 28 or consent of instructor.

*2 units, Spr (Zhang, Y)*

**CHINLANG 31E. Accelerated Beginning Mandarin for Engineering Students, First Quarter**

Restricted to engineering students participating in the China Internship Program. Prerequisite: consent of instructor. Grad students enroll in 331E.

*2-5 units, Spr (DiBello, M)*

**CHINLANG 41. Intermediate-to-Advanced Chinese Conversation, First Quarter**

Intermediate-to-Advanced Chinese Conversation, First Quarter Repeatable once for units. Prerequisite: 23 or consent of instructor.

*2 units, Aut (Chung, M)*

**CHINLANG 42. Intermediate-to-Advanced Chinese Conversation, Second Quarter**

Continuation of 41. Repeatable once for units. Prerequisite: 41 or consent of instructor.

*2 units, Win (Chung, M)*

**CHINLANG 43. Intermediate-to-Advanced Chinese Conversation, Third Quarter**

Continuation of 42. Repeatable once for units. Prerequisite: 42 or consent of instructor.

*2 units, Spr (Chung, M)*

**CHINLANG 99. Language Specials**

Prerequisite: consent of instructor. (Staff)

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff)*

**CHINLANG 101. Third-Year Modern Chinese, First Quarter**

Written and spoken styles of modern Chinese. Reading and discussion of authentic writings on cultural topics; newspaper reports, radio, and TV broadcasts and films; online Chinese software and email network to facilitate study. Prerequisite: placement test, 23 or consent of instructor.

*5 units, Aut (Wang, H; Xie, F)*

**CHINLANG 101B. Third-Year Modern Chinese for Bilingual Students, First Quarter**

Equivalent to 101. For students with advanced listening and speaking abilities, but lacking equivalent knowledge in reading and writing. Prerequisite: placement test, 23B or consent of instructor.

*3 units, Aut (Wang, H; Xie, F)*

**CHINLANG 102. Third-Year Modern Chinese, Second Quarter**

Continuation of 101. Written and spoken styles of modern Chinese. Reading and discussion of authentic writings on cultural

topics; newspaper reports, radio, and TV broadcasts and films; online Chinese software and email network to facilitate study. Prerequisite: placement test, 101 or consent of instructor.

*5 units, Win (Staff)*

**CHINLANG 102B. Third-Year Modern Chinese for Bilingual Students, Second Quarter**

Continuation of 101B. Equivalent to 102. For students with advanced listening and speaking abilities, but lacking equivalent knowledge in reading and writing. Prerequisite: placement test, 101B or consent of instructor.

*3 units, Win (Wang, H)*

**CHINLANG 103. Third-Year Modern Chinese, Third Quarter**

Continuation of 102. Written and spoken styles of modern Chinese. Reading and discussion of authentic writings on cultural topics; newspaper reports, radio, and TV broadcasts and films; online Chinese software and email network to facilitate study. Prerequisite: placement test, 102 or consent of instructor.

*5 units, Spr (Staff)*

**CHINLANG 103B. Third-Year Modern Chinese for Bilingual Students, Third Quarter**

Continuation of 102B. Equivalent of 103. For students with advanced listening and speaking abilities, but lacking equivalent knowledge in reading and writing. Prerequisite: 102B or consent of instructor.

*3 units, Spr (Wang, H)*

**CHINLANG 105. Intensive Third-Year Modern Chinese**

Equivalent to 101,102,103 combined if taken together with the Beijing portion of the Summer Program. Five weeks at Stanford and four weeks at Peking University. Prerequisite: 23 or equivalent.

*8 units, Sum (Staff)*

**CHINLANG 121. Advanced Chinese Conversation, First Quarter**

Advanced conversation skills in everyday life and special situations. Prerequisite: placement test, 103 or consent of instructor.

*2 units, Aut (Zhou, X)*

**CHINLANG 122. Advanced Chinese Conversation, Second Quarter**

Advanced conversation skills in everyday life and special situations. Prerequisite: 121 or equivalent consent of instructor.

*2 units, Win (Chung, M)*

**CHINLANG 123. Advanced Chinese Conversation, Third Quarter**

Continuation of 122. Advanced conversation skills in everyday life and special situations. Prerequisite: 122 or consent of instructor.

*2 units, Spr (Zhou, X)*

**CHINLANG 131. Business Chinese, First Quarter**

Commercial, economic, and business-related vocabulary. Materials include formal business conversations, newspaper and journal articles, and TV news on trade and economic. Technical language and business etiquette. Student oral and written reports on their own research regarding recent economic developments, using sources in China. Prerequisite: 23 or equivalent.

*3-4 units, Aut (Wang, H)*

**CHINLANG 132. Business Chinese, Second Quarter**

Continuation of 131. Commercial, economic, and business-related vocabulary. Materials include formal business conversations, newspaper and journal articles, and TV news on trade and economic. Technical language and business etiquette. Student oral and written reports on their own research regarding recent economic developments, using sources in China. Prerequisite: 131 or consent of instructor.

*3-4 units, Win (Wang, H)*

**CHINLANG 133. Business Chinese, Third Quarter**

Continuation of 132. Commercial, economic, and business-related vocabulary. Materials include formal business conversations, newspaper and journal articles, and TV news on trade and economic. Technical language and business etiquette. Student oral and written reports on their own research regarding recent economic developments, using sources in China. Prerequisite: 132 or equivalent consent of instructor.

*3-4 units, Spr (Wang, H)*

**CHINLANG 200. Directed Reading**

May be repeated for credit. Prerequisite: consent of instructor.

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff)*

**CHINLANG 211. Fourth-Year Modern Chinese, First Quarter**

Year-long sequence. Goal is to become functional speakers, readers, and writers of modern Chinese through articles and essays from newspapers, magazines, scholarly journals, and the Internet. Cultural and social science themes: students may take both themes for 5 units or one theme for reduced units. Prerequisite: placement test, 103 or consent of instructor.

*3-5 units, Aut (Zhou, X)*

**CHINLANG 211B. Fourth year Modern Chinese for Bilingual Students, First Quarter**

Designed as an advanced Modern Chinese class for bilingual students with emphasis on listening, speaking, reading, and writing. Special attention is given to moving student proficiency toward the superior level. The main textbook for the class is *Boya Hanyu: Feixiang pian*, which is comprised of well-crafted essays rich in vocabulary. With in-depth discussion on interesting topics, the course aims to help students develop a natural feel for advanced Chinese, including word choice, sentence structure, and paragraph organization. Prerequisite: 103B or consent of instructor.

*3 units, Aut (Zhou, X)*

**CHINLANG 212. Fourth-Year Modern Chinese, Second Quarter**

Continuation of 211. Year-long sequence. Goal is to become functional speakers, readers, and writers of modern Chinese through articles and essays from newspapers, magazines, scholarly journals, and the Internet. Cultural and social science themes: students may take both themes for 5 units or one theme for reduced units. Prerequisite: placement test, 211 or consent of instructor.

*3-5 units, Win (Zhou, X)*

**CHINLANG 212B. Fourth-Year Modern Chinese for Bilingual Students, Second Quarter**

Continuation of 211B. Designed as an advanced Modern Chinese class for bilingual students with emphasis on listening, speaking, reading, and writing. Special attention is given to moving student proficiency toward the superior level. The main textbook for the class is *Boya Hanyu: Feixiang pian*, which is comprised of well-crafted essays rich in vocabulary. With in-depth discussion on interesting topics, the course aims to help students develop a natural feel for advanced Chinese, including word choice, sentence structure, and paragraph organization. Prerequisite: 211B or consent of instructor.

*3 units, Win (Zhou, X)*

**CHINLANG 213. Fourth-Year Modern Chinese, Third Quarter**

Continuation of 212. Year-long sequence. Goal is to become functional speakers, readers, and writers of modern Chinese through articles and essays from newspapers, magazines, scholarly journals, and the Internet. Cultural and social science themes: students may take both themes for 5 units or one theme for reduced units. Prerequisite: placement test, 212 or consent of instructor.

*3-5 units, Spr (Zhou, X)*

**CHINLANG 213B. Fourth-Year Modern Chinese for Bilingual Students, Third Quarter**

Continuation of 212B. Designed as an advanced Modern Chinese class for bilingual students with emphasis on listening, speaking, reading, and writing. Special attention is given to moving student proficiency toward the superior level. The main textbook for the class is *Boya Hanyu: Feixiang pian*, which is comprised of well-crafted essays rich in vocabulary. With in-depth discussion on interesting topics, the course aims to help students develop a natural feel for advanced Chinese, including word choice, sentence structure, and paragraph organization. Prerequisite: 212B or consent of instructor.

*3 units, Spr (Zhou, X)*

**CHINLANG 231. Fifth-Year Modern Chinese: Cultural China, First Quarter**

Year-long sequence. Rhetorical devices through essays about China's cultural journey in relationship to geographical regions. Prerequisite: 213, 223B or consent of instructor.

*3 units, Aut (Tang, L)*

**CHINLANG 232. Fifth-Year Modern Chinese: Cultural China, Second Quarter**

Continuation of 231. Year-long sequence. Rhetorical devices through essays about China's cultural journey in relationship to geographical regions. Prerequisite: 231 or consent of instructor.

*3 units, Win (Staff)*

**CHINLANG 233. Fifth-Year Modern Chinese: Cultural China, Third Quarter**

Continuation of 232. Year-long sequence. Rhetorical devices through essays about China's cultural journey in relationship to geographical regions. Prerequisite: 232 or consent of instructor.

*3 units, Spr (Staff)*

**GRADUATE COURSES IN CHINESE LANGUAGE**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**CHINLANG 33G. Accelerated Beginning Mandarin III**

For GSB students only.

*4 units, Aut (Zhou, X)*

**CHINLANG 199. Individual Reading**

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff)*

**CHINLANG 205S. Intensive Third-Year Modern Chinese**

Equivalent to 101, 102, 103 if taken together with the Beijing portion of the Summer Program. Five weeks at Stanford and four weeks at Peking University. Prerequisite: 23 or equivalent. Grads only.

*8 units, Sum (Staff)*

**CHINLANG 331E. Accelerated Beginning Mandarin for Engineering Students, First Quarter**

Restricted to graduate engineering students participating in the China Internship Program. Prerequisite: consent of instructor.

*2-5 units, Spr (DiBello, M)*

**CHINLANG 394. Graduate Studies in Chinese Conversation**

Prerequisite: consent of instructor.

*1-3 units, Aut (Staff), Win (Staff), Spr (Staff)*

**CHINLANG 395. Graduate Studies in Chinese**

Prerequisite: consent of instructor.

*2-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**CHINESE LITERATURE (CHINLIT) COURSES****UNDERGRADUATE COURSES IN CHINESE LITERATURE**

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**CHINLIT 125. Beginning Classical Chinese, First Quarter**

(Same as CHINLIT 205) Goal is reading knowledge of classical Chinese. Basic grammar and commonly used vocabulary. Students with no background in classical Chinese who are taking 127 to satisfy Chinese major requirements must begin with 125. Prerequisite: CHINLANG 23 or equivalent.

*2-5 units, Aut (Bartlett, T)*

**CHINLIT 126. Beginning Classical Chinese, Second Quarter**

(Same as CHINLIT 206) Goal is reading knowledge of classical Chinese. Basic grammar and commonly used vocabulary. Students with no background in classical Chinese who are taking 127/207 to satisfy Chinese major requirements must begin with 125/205. Prerequisite: CHINLANG 125/205 or equivalent.

*2-5 units, Win (Bartlett, T)*

**CHINLIT 127. Beginning Classical Chinese, Third Quarter**

(Same as CHINLIT 207) Goal is reading knowledge of classical Chinese. Basic grammar and commonly used vocabulary. Students with no background in classical Chinese who are taking 127/207 to satisfy Chinese major requirements must begin with 125/205. Prerequisite: CHINLANG 126/206 or equivalent.

*2-5 units, Spr (Bartlett, T)*

**CHINLIT 174. Modern Chinese Novel: Theory, Aesthetics, History**

(Same as CHINLIT 274, COMPLIT 254) From the May Fourth movement to the 40s. Themes include enlightenment, democracy, women's liberation, revolution, war, urban culture, and love. Prerequisite: advanced Chinese.

4 units, not given this year

**CHINLIT 189A. Honors Research**

2-5 units, Aut (Staff), Spr (Staff)

**CHINLIT 189B. Honors Research**

Open to senior honors students to write thesis.

5 units, Win (Staff)

**CHINLIT 190. Chinese Cultural Revolution: Performance, Politics, and Aesthetics**

(Same as CHINLIT 290, COMPLIT 135) Events, arts, films, and operas of the Chinese Cultural Revolution. Analysis of political passion, aesthetics, and psychology of mass movements. Places the Cultural Revolution in the long-range context of art, social movements, and politics. Chinese language is not required.

4 units, not given this year

**CHINLIT 191. The Structure of Modern Chinese**

(Same as CHINLIT 291) Focus is on syntax and semantics. Prerequisite: CHINLANG 3 or equivalent, or consent of instructor.

GER:DB-SocSci

2-4 units, not given this year

**CHINLIT 199. Individual Reading in Chinese**

Asian Language majors only. Prerequisite: CHINLANG 103 or consent of instructor. Units by arrangement.

1-4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**GRADUATE COURSES IN CHINESE LITERATURE**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**CHINLIT 200. Directed Reading in Chinese**

1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**CHINLIT 201. Proseminar: Bibliographic and Research Methods in Chinese Studies**

Bibliographic and research methods in Chinese studies. Prerequisite: 127/207 or equivalent.

3-5 units, not given this year

**CHINLIT 205. Beginning Classical Chinese, First Quarter**

(Same as CHINLIT 125) Goal is reading knowledge of classical Chinese. Basic grammar and commonly used vocabulary. Students with no background in classical Chinese who are taking 127 to satisfy Chinese major requirements must begin with 125. Prerequisite: CHINLANG 23 or equivalent.

2-5 units, Aut (Bartlett, T)

**CHINLIT 206. Beginning Classical Chinese, Second Quarter**

(Same as CHINLIT 126) Goal is reading knowledge of classical Chinese. Basic grammar and commonly used vocabulary. Students with no background in classical Chinese who are taking 127/207 to satisfy Chinese major requirements must begin with 125/205. Prerequisite: CHINLANG 125/205 or equivalent.

2-5 units, Win (Bartlett, T)

**CHINLIT 207. Beginning Classical Chinese, Third Quarter**

(Same as CHINLIT 127) Goal is reading knowledge of classical Chinese. Basic grammar and commonly used vocabulary. Students with no background in classical Chinese who are taking 127/207 to satisfy Chinese major requirements must begin with 125/205. Prerequisite: CHINLANG 126/206 or equivalent.

2-5 units, Spr (Bartlett, T)

**CHINLIT 221. Advanced Classical Chinese: Philosophical Texts**

Prerequisite: 207 or equivalent.

3-5 units, Aut (Lewis, M)

**CHINLIT 222. Advanced Classical Chinese: Historical Narration**

Prerequisite: 127/207 or equivalent.

2-5 units, Win (Wang, J)

**CHINLIT 223. Advanced Classical Chinese: Literary Essays**

Readings and grammatical analyses of literary essays throughout imperial China. Prerequisite: CHINLIT 127/207 or equivalent.

2-5 units, NEXTYEAR

**CHINLIT 232. Chinese Biographies of Women**

Generic and historical analysis of the two-millennia long biographical tradition inaugurated by Liu Xiang, ca. 79-8 B.C.E. Chinese women's history, intellectual history, historiography, and literary studies. Prerequisite: 127/207 or consent of instructor.

4 units, not given this year

**CHINLIT 261. Sources of Chinese Poetry**

The Book of Songs (ca. 1000-500 B.C.E.) and Songs of Chu (ca. 400 B.C.E.), the earliest anthologies of Chinese poetry.

4 units, not given this year

**CHINLIT 263. Lyric (Shih) I**

Han through Sui dynasties.

2-4 units, not given this year

**CHINLIT 265. Major Figures in Classical Chinese Shi Poetry**

Focus is on a major poet and relationships to previous and later poetry. Poetic form, including meter and rhyme schemes. Historical context. This year's poet is Tao Yuanming. May be repeated for credit. Prerequisites: 201, 207.

2-4 units, not given this year

**CHINLIT 266. Chinese Tz'u Poetry (Song Lyrics)**

Highlights from the Northern and Southern Sung periods. Patterns of generic development correlated to social changes in historical context. Prerequisite: classical Chinese.

4 units, not given this year

**CHINLIT 271. Traditional Chinese Fiction: Short Stories**

Early times to Qing. Prerequisite: 127/207 or consent of instructor.

2-4 units, Aut (Wang, J)

**CHINLIT 272. Traditional Chinese Fiction: Novels**

Major novels of late imperial China. Prerequisite: 127/207 or consent of instructor.

2-4 units, not given this year

**CHINLIT 273. Chinese Drama**

Yuan, Ming, and Qing periods emphasizing literary not theatrical qualities. Prerequisite: 127/207 or consent of instructor.

2-4 units, not given this year

**CHINLIT 274. Modern Chinese Novel: Theory, Aesthetics, History**

(Same as CHINLIT 174, COMPLIT 254) From the May Fourth movement to the 40s. Themes include enlightenment, democracy, women's liberation, revolution, war, urban culture, and love. Prerequisite: advanced Chinese.

4 units, not given this year

**CHINLIT 279. For Love of Country: National Narratives in Chinese Literature and Film**

Explores the nation as it is constructed, deconstructed, and continuously contested in novels, short stories, films, and other media from the second half of the 20th century in mainland China and Taiwan. Asks how the trope of the nation and the ideology of nationalism mediate the relationships between politics and aesthetics. Explores the nation's internal fault lines of gender, ethnicity, geography, language, and citizenship.

3-5 units, not given this year

**CHINLIT 289. The Poetics and Politics of Affect in Modern China**

The role of affect in modern Chinese aesthetics and politics. Cultural and social theories of affect (love, hate, fear, grief, resentment, rage, sympathy, sincerity, shame, and nostalgia); affective discourses across genres and media including fiction, poetry, film, journalism, and television; and mass social movements such as protest, uprising, and revolution. Advanced undergraduates requires consent of instructor. Recommended: reading knowledge of Chinese.

3-5 units, not given this year

**CHINLIT 290. Chinese Cultural Revolution: Performance, Politics, and Aesthetics**

(Same as CHINLIT 190, COMPLIT 135) Events, arts, films, and operas of the Chinese Cultural Revolution. Analysis of political passion, aesthetics, and psychology of mass movements. Places the

Cultural Revolution in the long-range context of art, social movements, and politics. Chinese language is not required.

4 units, not given this year

#### **CHINLIT 291. The Structure of Modern Chinese**

(Same as CHINLIT 191) Focus is on syntax and semantics. Prerequisite: CHINLANG 3 or equivalent, or consent of instructor.

2-4 units, not given this year

#### **CHINLIT 299. Master's Thesis or Translation**

A total of 5 units taken in one or more quarters.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **CHINLIT 369. Late Imperial Chinese Fiction**

Primary works examined include Jin Ping Mei, Xingshi yinyuan zhuan, Hongloumeng, Qilu deng, Rulin waishi, and Ernu yingxiong zhuan. Secondary readings focus on social dimensions of the Chinese novel (ca. 1600-1850), but students may explore other aspects of the texts in their presentations and research papers. Comparisons with the English novel, particularly on the rise of the novel and the advent of modernity.

2-5 units, not given this year

#### **CHINLIT 371. Seminar in Chinese Literary Criticism**

(Same as COMPLIT 371) How aesthetics and politics intertwine and break apart in Western and Eastern traditions. Aesthetics for understanding culture, morality, and power in crosscultural contexts. Readings include Hegel, Kant, Marcuse, Lukacs, and Adorno; and Chinese thinkers Wang Guowei, Lu Xun, Li Zehou, and Mao. Prerequisite: CHINLIT 127/207 or consent of instructor.

2-5 units, not given this year

#### **CHINLIT 399. Dissertation Research**

1-12 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

#### **CHINLIT 400. Advanced Language Training**

For students in the Inter-University Program for Chinese Language Studies in Beijing or Taipei. For more information, contact the consortium office at UC Berkeley: (510) 642-3873, or see [http://ieas.berkeley.edu/iup/contact\\_iup.html](http://ieas.berkeley.edu/iup/contact_iup.html).

1-15 units, Aut (Staff), Win (Staff), Spr (Staff)

## CIVIL AND ENVIRONMENTAL ENGINEERING (CEE) COURSES

### UNDERGRADUATE COURSES IN CIVIL AND ENVIRONMENTAL ENGINEERING

Primarily for undergraduates; graduate students may enroll with consent of adviser.

#### **CEE 13SI. Introduction to Architectural Modeling**

Architecture is half design, half communicating design. In this course, students will gain the skills necessary to communicate architectural concepts through 3D modeling. From foam core to basswood to less known materials, students will gain a tactile understanding of material qualities and present their study models in portfolio format. Special focus will also be placed on techniques incorporating both computer-aided drafting and physical modeling through the laser cutter machine. No prior experience is necessary, but students will be expected to work in the studio outside of class time. Limited enrollment. Please contact Derek Ouyang at [derekouyang@gmail.com](mailto:derekouyang@gmail.com) for more info.. Class meets in PRL 36.

2 units, not given this year

#### **CEE 20. Elementary Surveying**

0-60 units

#### **CEE 31. Accessing Architecture Through Drawing**

Preference to Architectural Design and CEE majors; others by consent of instructor. Drawing architecture to probe the intricacies and subtleties that characterize contemporary buildings. How to dissect buildings and appreciate the formal elements of a building, including scale, shape, proportion, colors and materials, and the problem solving reflected in the design. Students construct conventional architectural drawings, such as plans, elevations, and perspectives. Limited enrollment. GER:DB-EngrAppSci

4 units, not given this year

#### **CEE 31B. Architectural Drawing and Rendering**

Course will expand on basics taught in CEE 31. Refresher on the basics of plans, sections, elevations, axonometrics, and perspectives. Students will be encouraged in conceptual thinking and translating concepts into Architecture. Introduction of computers for renderings and drafting as well as expanding on early model building. Field trip.

4 units, not given this year

#### **CEE 31Q. Accessing Architecture Through Drawing**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Drawing architecture provides a deeper understanding of the intricacies and subtleties that characterize contemporary buildings. How to dissect buildings and appreciate the formal elements of a building, including scale, shape, proportion, colors and materials, and the problem solving reflected in the design. Students construct conventional architectural drawings, such as plans, elevations, and perspectives. Limited enrollment. GER:DB-EngrAppSci

4 units, Aut (Barton, J), Win (Barton, J)

#### **CEE 32A. Psychology of Architecture**

This course argues that architecture often neglects the interdisciplinary investigation of our internal psychological experience and the way it impacts our creation of space. How does our inner life influence external design? How are we impacted emotionally, physically, psychologically by the spaces we inhabit day to day? How might we intentionally imbue personal and public spaces with specific emotions? This seminar serves as a call to action for students interested in approaching architecture with a holistic understanding of the emotional impact of space. Sample topics addressed will include: conscious vs. unconscious design; the ego of architecture; psycho-spatial perspectives; ideas of home; integral/holistic architecture; phenomenology of inner and outer spaces; exploring archetypal architecture; and translating emotion through environment.

3 units, Aut (Larimer, A)

#### **CEE 32B. Design Theory**

This seminar focuses on the key themes, histories, and methods of architectural theory -- a form of architectural practice that establishes the aims and philosophies of architecture. Architectural theory is primarily written, but it also incorporates drawing, photography, film, and other media. One of the distinctive features of modern and contemporary architecture is its pronounced use of theory to articulate its aims. One might argue that modern architecture is modern because of its incorporation of theory. This course focuses on those early-modern, modern, and late-modern writings that have been and remain entangled with contemporary architectural thought and design practice. Rather than examine the development of modern architectural theory chronologically, it is explored architectural through thematic topics. These themes enable the student to understand how certain architectural theoretical concepts endure, are transformed, and can be furthered through his/her own explorat

4 units, Win (Beischer, T)

#### **CEE 32Q. Place: Making Space Now**

(S,Sem) (Same as ARTHIST 232Q) Stanford Introductory Seminar. This seminar argues that architects are ultimately placemakers, and questions what that means in the contemporary world. Part I investigates the meaning of the word place. Additional background for understanding contemporary place making will include a critique of the history of modern place-making through an examination of modern form. Part II examines two traditional notions of place by scale: from home to the city. What elements give these conceptions of space a sense of place? To answer this question, themes such as memory, mapping, and boundary, among others, will be investigated. Part III presents challenges to the traditional notions of place discussed in Part II. Topics addressed include: What does it mean to be out of place? What sense of place does a nomad have, and how is this represented? What are the non-places and how can architects design for these spaces? Part IV addresses the need to reconceptualize contemporary s

3 units, Spr (Barton, J; Beischer, T)

#### **CEE 44Q. Critical Thinking and Career Skills**

Factors required for successful careers. Guest speakers. Case studies. Participation in real world corporate interviews, testing and reviews conducted by industry trainers. Limited enrollment.

3 units, not given this year

### CEE 46Q. Fail Your Way to Success

Preference to sophomores. How to turn failures into successes; cases include minor personal failures and devastating engineering disasters. How personalities and willingness to take risks influence the way students approach problems. Field trips, case studies, and guest speakers applied to students day-to-day interactions and future careers. Goal is to redefine what it means to fail. GER:DB-EngrAppSci

3 units, not given this year

### CEE 48N. Organizing Global Projects

Preference to freshmen. Challenges associated with planning and managing both commercial and governmental/non-profit global projects; theory, methods, and tools to enhance global project outcomes. Students teams model and simulate crosscultural teams engaged in global projects. Opportunities to participate in research in the Collaboratory for Research on Global Projects involving faculty from Stanford departments and schools; see <http://crgp.stanford.edu>.

4 units, not given this year

### CEE 50N. From the Foothills to the Bay

(F,Sem) Stanford Introductory Seminar. Stanford University sits on the shores of one of the world's great estuaries, the San Francisco Bay/Delta, the connection of the inland river systems of the Central Valley to the Pacific Ocean. This course is intended to provide an introduction to the San Francisco Bay/Delta including its history, current scientific understanding of its physical and ecological functioning, descriptions and underpinnings of engineering manipulations of the system, and the intersection of science and engineering with policies designed to manage its resources. Because of the important effects that water resources development, most notably upstream diversions, have had on the system, Bay-Delta science, engineering and policy are completely intertwined with the management of the water supply of California. Thus, we will also examine relevant issues in California water that touch on the Bay Delta including an overall description of California hydrology, the State and Federal wa

3 units, Spr (Monismith, S)

### CEE 63. Weather and Storms

(Same as CEE 263C) Daily and severe weather and global climate. Topics: structure and composition of the atmosphere, fog and cloud formation, rainfall, local winds, wind energy, global circulation, jet streams, high and low pressure systems, inversions, el Niño, la Niña, atmosphere/ocean interactions, fronts, cyclones, thunderstorms, lightning, tornadoes, hurricanes, pollutant transport, global climate and atmospheric optics. GER: DB-NatSci

3 units, Aut (Ten Hoeve, J)

### CEE 64. Air Pollution and Global Warming: History, Science, and Solutions

(Same as CEE 263D) Survey of urban- through global-scale air pollution and climate change and their renewable energy solutions. Topics: evolution of the Earth's atmosphere, history of discovery of chemicals in the air, gases and particles in urban smog, visibility, indoor air pollution, acid rain, stratospheric and Antarctic ozone loss, the historic climate record, causes and effects of global warming, impacts of energy systems on pollution and climate, renewable energy solutions to air pollution and global warming. UG Reqs: GER: DBNatSci GER: DB-NatSci

3 units, Win (Jacobson, M)

### CEE 70. Environmental Science and Technology

(Same as ENGR 90) Introduction to environmental quality and the technical background necessary for understanding environmental issues, controlling environmental degradation, and preserving air and water quality. Material balance concepts for tracking substances in the environmental and engineering systems. GER:DB-EngrAppSci

3 units, Aut (Kopperud, R)

### CEE 70N. Water, Public Health, and Engineering

Preference to sophomores. Linkages between water, wastewater and public health, with an emphasis on engineering interventions. Topics include the history of water and wastewater infrastructure development in the U.S. and Europe; evolution of epidemiological approaches for water-related health challenges; biological and chemical contaminants in water and wastewater and their

management; and current trends and challenges in access to water and sanitation around the world. Identifying ways in which freshwater contributes to human health; exposure routes for water- and sanitation-illness. Classifying illnesses by pathogen type and their geographic distribution. Identifying the health and economic consequences of water- and sanitation-related illnesses; costs and benefits of curative and preventative interventions. Interpreting data related to epidemiological and environmental concepts. No previous experience in engineering is required. GER:DB-EngrAppSci

3 units, not given this year

### CEE 80N. The Art of Structural Engineering

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The history of modern bridges, buildings, and other large-scale structures. Students learn about modern structures, the social context in which they are built and their symbolic value. Principles of structural engineering and calculating efficiency and safety taught through case studies. Field trip to Bay Area landmark and hands-on exercises including building and testing a model bridge. Students from all backgrounds welcome. GER:DB-EngrAppSci

4 units, Win (Billington, S)

### CEE 100. Managing Sustainable Building Projects

Managing the life cycle of buildings from the owner, designer, and contractor perspectives emphasizing sustainability goals; methods to define, communicate, coordinate, and manage multidisciplinary project objectives including scope, quality, life cycle cost and value, schedule, safety, energy, and social concerns; roles, responsibilities, and risks for project participants; virtual design and construction methods for product, organization, and process modeling; lifecycle assessment methods; individual writing assignment related to a real world project. GER:DB-EngrAppSci

4 units, Aut (Fischer, M)

### CEE 100A. Managing Sustainable Building Projects

Managing the life cycle of buildings from the owner, designer, and contractor perspectives emphasizing sustainability goals; methods to define, communicate, coordinate, and manage multidisciplinary project objectives including scope, quality, life cycle cost and value, schedule, safety, energy, and social concerns; roles, responsibilities, and risks for project participants; virtual design and construction methods for product, organization, and process modeling; lifecycle assessment methods; individual writing assignment related to a real world project.

4 units, Spr (Fischer, M), ONCEONLY

### CEE 101A. Mechanics of Materials

Introduction to beam and column theory. Normal stress and strain in beams under various loading conditions; shear stress and shear flow; deflections of determinate and indeterminate beams; analysis of column buckling; structural loads in design; strength and serviceability criteria. Lab experiments. Prerequisites: ENGR 14. GER:DB-EngrAppSci

4 units, Win (Baker, J)

### CEE 101B. Mechanics of Fluids

Physical properties of fluids and their effect on flow behavior; equations of motion for incompressible ideal flow, including the special case of hydrostatics; continuity, energy, and momentum principles; control volume analysis; laminar and turbulent flows; internal and external flows in specific engineering applications including pipes, open channels, estuaries, and wind turbines. Prerequisites: PHYSICS 41 (formerly 53), MATH 51. GER:DB-EngrAppSci

4 units, Spr (Koseff, J)

### CEE 101C. Geotechnical Engineering

Introduction to the principles of soil mechanics. Soil classification, shear strength and stress-strain behavior of soils, consolidation theory, analysis and design of earth retaining structures, introduction to shallow and deep foundation design, slope stability. Lab projects. Prerequisite: ENGR 14. Recommended: 101A. GER:DB-EngrAppSci

3-4 units, Aut (Borja, R)

### CEE 101D. Computations in Civil and Environmental Engineering

(Same as CEE 201D) Computational and visualization methods in the design and analysis of civil and environmental engineering systems. Focus is on applications of MATLAB. How to develop a

more lucid and better organized programming style.

3 units, Aut (Kitanidis, P), Sum (Staff)

### **CEE 102. Legal Aspects of Engineering and Construction**

Introduction to the U.S. legal system as it applies to civil engineering and construction. Fundamental concepts of contract and tort law, claims, risk management, business formation and licensing, agency, insurance and bonding, and real property. (London)

3 units, Win (London, M)

### **CEE 109. Creating a Green Student Workforce to Help Implement Stanford's Sustainability Vision**

(Same as EARTHSYS 109) Examination of program-based local actions that promote resource conservation and an educational environment for sustainability. Examination of building-level actions that contribute to conservation, lower utility costs, and generate understanding of sustainability consistent with Stanford's commitment to sustainability as a core value. Overview of operational sustainability including energy, water, buildings, waste, and food systems. Practical training to enable students to become sustainability coordinators for their dorms or academic units.

2 units, Win (Koseff, J; Ahmed, F)

### **CEE 110. Building Information Modeling**

(Same as CEE 210) (Graduate students register for 210.) Creation, management, and application of building information models. Process and tools available for creating 2D and 3D computer representations of building components and geometries. Organizing and operating on models to produce architectural views and construction documents, renderings and animations, and interface with analysis tools. Lab exercises, class projects. Limited enrollment.

2-4 units, Aut (Katz, G)

### **CEE 111. Multidisciplinary Modeling and Analysis**

(Same as CEE 211) (Graduate students register for 211.) Computer modeling, visualization, analysis, and graphical communication of building projects. Use of 3D models in laser scanning, rendering, animation, daylight, energy, cost, structural, lighting analysis, and computer controlled fabrication. Underlying 3D computer representations, and analysis tools and their applications. Guest lectures, lab exercises, class project. Prerequisite: 110 or CAD experience. GER:DB-EngrAppSci

4 units, Win (Kunz, J)

### **CEE 112A. Industry Applications of Virtual Design & Construction**

Building upon the concept of VDC Scorecard, CEE 112A/212A investigates in the management of Virtual Design and Construction (VDC) programs and projects in the building industry. Interacting with experts and professionals in real estate, architecture, engineering, construction and technology providers, students will learn from the industry applications of Building Information Modeling and its relationship with Integrated Project Delivery, Sustainable Design and Construction. Students will conduct case studies to evaluate the maturity of VDC planning, adoption, technology and performance in practice. Students taking 3 or 4 units will be paired up with independent research or case study projects on the industry applications of VDC. No prerequisite. See CEE112B/212B in the Winter Quarter and CEE 112C/212C in the Spring Quarter.

2-4 units, Aut (Kam, C)

### **CEE 112B. Industry Applications of Virtual Design & Construction**

(Same as CEE 212B) As a continuation of the Autumn-quarter course, CEE 112B/212B furthers the study of the VDC scorecard and investigates in the management of Virtual Design and Construction (VDC) programs and projects in the building industry. Students will be paired up with industry-based VDC projects with public owners and private developers, such as GSA Public Buildings Service, the Hong Kong Mass Transit Railway, Optima, Walt Disney Imagineering, Microsoft facilities and/or other CIFE International members. Independently, students will conduct case studies and/or develop VDC building information models (BIM) using off-the-shelf technologies for project analysis, collaboration, communication and optimization. Students will gain insights and develop skills that are essential for academic research,

internships or industry practice in VDC. Prerequisite: CEE 112A/212A, CEE 159C/259C, CEE 159D/259D, or Instructor's approval. See CEE 112C/212C in the Spring Quarter.

2-4 units, Win (Kam, C)

### **CEE 112C. Industry Applications of Virtual Design & Construction**

(Same as CEE 212C) Following the Autumn- and Winter-quarter course series, CEE 112C/212C is an industry-focused and project-based practicum that focuses on the industry applications of Virtual Design and Construction (VDC). Students will be paired up with industry-based VDC projects with public owners and private developers, such as GSA Public Buildings Service, the Hong Kong Mass Transit Railway, Optima, Walt Disney Imagineering, Microsoft facilities and/or other CIFE International members. Independently, students will conduct case studies and/or develop VDC and building information models (BIM) using off-the-shelf technologies for project analysis, collaboration, communication and optimization. Students will gain insights and develop skills that are essential for academic research, internships or industry practice in VDC. Prerequisite: CEE 112A/212A, CEE 112B/212B, CEE 159C/259C, CEE 159D/259D, or Instructor's Approval.

2-4 units, Spr (Kam, C)

### **CEE 115. Goals and Methods of Sustainable Building Projects**

(Same as CEE 215) (Graduate students register for 215.) Goals related to sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, and economic and social sustainability. Methods to integrate these goals and enhance the economic, ecological, and equitable value of building projects. Industry and academic rating systems, project case studies, guest lecturers, and group project.

3 units, not given this year

### **CEE 122A. Computer Integrated Architecture/Engineering/Construction (A/E/C)**

Undergraduates serve as apprentices to graduate students in the AEC global project teams in CEE 222A. Apprentices participate in all activities of the AEC team, including the goals, objectives, constraints, tasks, and process of a crossdisciplinary global AEC teamwork in the concept development phase of a comprehensive building project. Prerequisite: consent of instructor.

2 units, Win (Fruchter, R)

### **CEE 122B. Computer Integrated A/E/C**

Undergraduates serve as apprentices to graduate students in the AEC global project teams in CEE 222B. Project activity focuses on modeling, simulation, life-cycle cost, and cost benefit analysis in the project development phase. Prerequisite: CEE 122A.

2 units, Spr (Fruchter, R)

### **CEE 124. Sustainable Development Studio**

(Graduate students register for 224A.) Project-based. Sustainable design, development, use and evolution of buildings; connections of building systems to broader resource systems. Areas include architecture, structure, materials, energy, water, air, landscape, and food. Projects use a cradle-to-cradle approach focusing on technical and biological nutrient cycles and information and knowledge generation and organization. May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff)

### **CEE 127E. Infrastructure, Disruptive Technologies and Entrepreneurship.**

(Same as CEE 227E) Silicon Valley provides a dynamic environment perfectly suited for developing the disruptive technologies that are changing the faces of today's mainstream infrastructure systems and essential service industries. This course will provide an overview of the most exciting technologies emerging from Silicon Valley right now and the potential that exists to disrupt mainstream transportation, electricity, intelligence gathering, and banking infrastructure systems that were dominant in the 20th Century. Guest speakers include prominent CEOs, visionaries, investors, and serial entrepreneurs who are building game changing companies.

1 unit, Win (Orr, R)

### **CEE 129. Climate Change Adaptation for Seaports: Engineering and Policy for a Sustainable Future**

(Same as CEE 229) Interdisciplinary. Exploration of impacts of

climate change on coastal ports and harbors around the world. The research team will utilize a broad range of tools to assess the engineering, construction, and policy responses necessary to protect ports and harbors from significant sea-level rise and storm surge. Collaborations with national and international experts. Consideration of economic, social and environmental implications. Independent and team projects will contribute to ongoing research. Guest speakers, case studies and field trips. [www.groupspaces.com/seaports2100](http://www.groupspaces.com/seaports2100). Recommended: CEE 129S/229S seminar series.

*3 units, Aut (Fischer, M; Becker, A; Schwegler, B), Win (Fischer, M; Schwegler, B; Becker, A), Spr (Fischer, M; Becker, A; Schwegler, B)*

**CEE 129S. Climate Change Adaptation in the Coastal Built Environment**

(Same as CEE 229S) How will climate change impact coastal ports and harbors around the world? Leading experts discuss the latest science, policy, and engineering research on this important issue, including the necessary response to protect ports and harbors from significant sea-level rise and storm surge. Focus is on the built environment. Guest speakers. CEE 229/129 for research option. See [www.groupspaces.com/seaports2100](http://www.groupspaces.com/seaports2100).

*1 unit, Aut (Staff), Win (Fischer, M; Becker, A), Spr (Staff)*

**CEE 130. Architectural Design: 3-D Modeling, Methodology, and Process**

Preference to Architectural Design majors; others by consent of instructor. Projects investigate conceptual approaches to the design of key architectural elements, such as wall and roof. Functional and structural considerations. Focus is on constructing 3-D models in a range of materials; 3-D computer modeling. Students keep a graphic account of the evolution of their design process. Final project entails design of a simple structure. Limited enrollment. Pre- or corequisite: CEE 31 or 31Q.

*4 units, Win (Walters, P)*

**CEE 131. Architectural Design Process**

Preference to Architectural Design and CEE majors; others by consent of instructor. Issues in the architectural profession including programming, site analysis, design process, and professional practice concerns. Building/landscape design case study project using architectural graphics and models. Limited enrollment.

*4 units, not given this year*

**CEE 131A. Professional Practice: Mixed-Use Design in an Urban Setting**

The delivery of a successful building design program involves unique collaboration between architect and client. This course will endeavor to teach the skills necessary for a designer to identify, evaluate, conceptualize and fully document a complex mixed-use urban design. Students will complete the course with a detailed knowledge of the consultants, engineers and other professionals needed for a complete program. Course deliverables will include three short assignments and a final project consisting of basic schematic drawings for the selected project. Guest presenters will cover topics of interest. Lectures, discussions, in-class studio-work and an oral presentation.

*3 units, Spr (Staff)*

**CEE 132. Interplay of Architecture and Engineering**

(Same as CEE 232) The range of requirements that drive a building's design including architecture, engineering, constructability, building codes, and budget. Case studies illustrate how structural and mechanical systems are integrated into building types including residential, office, commercial, and retail. In-class studio work.

*4 units, not given this year*

**CEE 133F. Principles of freehand Drawing**

By studying traditional drawing techniques, students learn the basic principles of academic drawing using charcoal as the primary medium. Value, proportion, modeling, edge and composition are introduced in lectures, demonstrations and drawing assignments. Emphasis is placed on still life and photographic references, allowing students to refine their rendering skills and develop their freehand drawing portfolio.

*1 unit, not given this year*

**CEE 134A. Site and Space**

Preference to Architectural Design and CEE majors; others by consent of instructor. An architectural design studio exploring the Stanford Green Dorm project. Initial sessions develop a working definition of sustainable design and strategies for greening the built environment in preparation for design studio work. Enrollment limited to 14. Prerequisites: 31 or 31Q, and 110 and 130.

*4 units, not given this year*

**CEE 134B. Intermediate Arch Studio**

This studio offers students experience in working with a real site and a real client program to develop a community facility. Students will develop site analysis, review a program for development and ultimately design their own solutions that meet client and community goals. Sustainability, historic preservation, community needs and materials will all play a part in the development of students final project. Students will also gain an understanding of graphic conventions, verbal and presentation techniques.

*4 units, Win (Wasney, C; Anderson, M)*

**CEE 135A. Parametrics: Applications in Architecture and Product Design**

(Same as CEE 235A) Precedents in architecture and product design; methods for modeling, prototyping, and fabrication. How to combine design intentions and digital logics with physical and material constraints. Students develop a case study and small design projects using a parametric approach at the scales of architecture and product.

*4 units, Win (Flager, F)*

**CEE 136. Green Architecture**

(Same as CEE 236) Preference to Architectural Design and CEE majors; others by consent of instructor. An architectural design studio exploring green design and green design processes. Initial sessions develop a working definition of sustainable design and strategies for greening the built environment in preparation for design studio work. Prerequisites: 31 or 31Q, and 110 and 130. Enrollment is limited to 14 (or possibly 16) students. Please do not enroll in the class until after attending the first class meeting. If the number of students interested in taking the class is greater than 14 (or possibly 16), space will be assigned based on requirements for graduation. GER:DB-EngrAppSci

*4 units, Win (Sperry, R)*

**CEE 137A. Form and Structure**

Preference to Architectural Design and CEE majors; others by consent of instructor. Intermediate architectural studio. The integration of structure, form, site, and program. Emphasis is on developing a schematic design in the context of site topography and structural systems. Limited enrollment. Prerequisites: 31 or 31Q, and 130.

*4 units, not given this year*

**CEE 137B. Advanced Architecture Studio**

This course will focus on the topic of interdisciplinary collaboration and its role in the development of design concepts. Specifically, the integration of structural with architectural considerations to produce a unified urban, spatial, tectonic and structural proposition will be our field of investigation. This course is an architecture studio course where class time will be spent primarily in individual or group desk critiques and pin-up sessions. Additionally, there will be lectures, case study presentations and a field trip. Prerequisites: required: CEE 31 (or 31Q) Drawing, CEE 110 BIM and CEE 130 Design.

*5 units, Spr (Sarkisian, M)*

**CEE 138A. Contemporary Architecture: Materials, Structures, and Innovations**

Structural and material bases for contemporary architecture; its roots in modern innovations. Recent technological developments; new materials and structural expressions. Sources include specific buildings and construction techniques. How to think critically about design strategies, material properties, and structural techniques.

*3 units, not given this year*

**CEE 139. Design Portfolio Methods**

Students present designs completed in other studio courses to communicate design intentions and other aspects of their work. Instruction in photography; preparation of a design portfolio; and short essays that characterize portfolio contents. Oral presentation

workshops offered through the Center for Teaching and Learning. Limited enrollment. Prerequisites: two Art or Architecture studio courses, or consent of instructor.

*2 units, Spr (Larimer, A)*

**CEE 140. Field Surveying Laboratory**

(Same as CEE 225) Graduate students register for 225. Friday afternoon laboratory provides practical surveying experience. Additional morning classes to prepare for the afternoon sessions. Hands-on operation of common traditional field survey tools ; introduction to the newest generation of digital measuring, positioning, and mapping tools. Emphasis is on the concept of using the data collected in the field as the basis for subsequent engineering and economic decisions.

*3 units, not given this year*

**CEE 141A. Infrastructure Project Development**

(Same as CEE 241A) Infrastructure is critical to the economy, global competitiveness and quality of life. Topics include energy, transportation, water, public facilities, and communications sectors. Analysis of the condition of the nation's infrastructure and how projects are planned and financed. Focus is on public works in the U.S. The role of public and private sectors through a step-by-step study of the project development process. Case studies of real infrastructure projects. Industry guest speakers. Student teams prepare project environmental impact statements.

*3 units, Aut (Griggs, G)*

**CEE 141B. Infrastructure Project Delivery**

(Same as CEE 241B) Infrastructure is critical to the economy, global competitiveness and quality of life. Topics include energy, transportation, water, public facilities, and communications sectors. Analysis of how projects are designed, constructed, operated, and maintained. Focus is on public works projects in the U.S. Alternative project delivery approaches and organizational strategies. Case studies of real infrastructure projects. Industry guest speakers. Student teams prepare finance/design/build/operate/maintain project proposals.

*3 units, Win (Griggs, G)*

**CEE 141C. Global Infrastructure Projects Seminar**

(Same as CEE 241C) Infrastructure is critical to the economy, global competitiveness, and quality of life. Course analyzes and compares the development and delivery of mega-projects around the world. Alternative project delivery methods, the role of public and private sector, different project management strategies, and lessons learned. Case studies of real infrastructure projects. Industry guest speakers. Field trips to local projects.

*1-2 units, Spr (Griggs, G)*

**CEE 142A. Negotiating Sustainable Development**

(Same as CEE 242A, EARTHSYS 142A, EARTHSYS 242A) How to be effective at achieving sustainability by learning the skills required to negotiate differences between stakeholders who advocate for their own interests. How ecological, social, and economic interests can be effectively balanced and managed. How to be effective actors in the sustainability movement, and use frameworks to solve complex, multiparty processes. Case study analysis of domestic and international issues. Students negotiate on behalf of different interest groups in a variety of arenas including energy, climate, land use, and the built environment. One Saturday all day field trip. No prerequisites.

*3 units, Win (Christensen, S)*

**CEE 147. Cases in Personality, Leadership, and Negotiation**

(Same as CEE 247) Case studies target personality issues, risk willingness, and life skills essential for real world success. Failures, successes, and risk willingness in individual and group tasks based on the professor's experience as small business owner and construction engineer. Required full afternoon field trips to local sites. Application downloaded from coursework must be submitted before first class; mandatory first class attendance. No auditors.

*3 units, not given this year*

**CEE 151. Negotiation**

(Same as CEE 251, EARTHSCI 251) Students learn to prepare for and conduct negotiations in a variety of arenas including getting a job, managing workplace conflict, negotiating transactions, and managing personal relationships. Interactive class. The internationally travelled instructor who has mediated cases in over

75 countries will require students to negotiate real life case studies and discuss their results in class. Application required before first day of class; see Coursework.

*3 units, Aut (Christensen, S), Spr (Christensen, S)*

**CEE 154. Cases in Estimating Costs**

(Same as CEE 254) Students participate in bidding contests requiring cost determination in competitive markets. Monetary forces driving the construction industry as general principles applicable to any competitive business. Cases based on field trips and professor's experience as small business owner and construction engineer. Required full afternoon field trips to local sites. Limited enrollment; no auditors. Prerequisites: consent or instructor and application downloaded from CourseWork prior to start of class. GER:DB-EngrAppSci

*3 units, not given this year*

**CEE 155. Introduction to Sensing Networks for CEE**

Introduce the design and implementation of sensor networks for monitoring the built and natural environment. Emphasis on the integration of modern sensor and communication technologies, signal processing and statistical models for network data analysis and interpretation to create practical deployments to enable sustainable systems, in areas such as energy, weather, transportation and buildings. Students will be involved in a practical project that may involve deploying a small sensor system, data models and analysis and signal processing. Limited enrollment.

*4 units, Win (Staff)*

**CEE 156. Building Systems**

(Same as CEE 256) HVAC, lighting, and envelope systems for commercial and institutional buildings, with a focus on energy efficient design. Knowledge and skills required in the development of low-energy buildings that provide high quality environment for occupants. GER:DB-EngrAppSci

*4 units, Spr (Kolderup, E)*

**CEE 160. Mechanics of Fluids Laboratory**

Lab experiments illustrate conservation principles and flows of real fluids, analysis of error and modeling of simple fluid systems. Corequisite: 101B. Prerequisite: CEE 101D or CME 102, or familiarity with Matlab.

*2 units, Spr (Monismith, S)*

**CEE 161A. Rivers, Streams, and Canals**

(Same as CEE 264A) Introduction to the movement of water through natural and engineered channels, streams, and rivers. Basic equations and theory (mass, momentum, and energy equations) for steady and unsteady descriptions of the flow. Application of theory to the design of flood- control and canal systems. Flow controls such as weirs and sluice gates; gradually varied flow; Saint-Venant equations and flood waves; and method of characteristics. Open channel flow laboratory experiments: controls such as weirs and gates, gradually varied flow, and waves. Limited enrollment in lab section. GER:DB-EngrAppSci

*3-4 units, Aut (Fong, D), Sum (Staff)*

**CEE 164. Introduction to Physical Oceanography**

(Same as CEE 262D, EESS 148) The dynamic basis of oceanography. Topics: physical environment; conservation equations for salt, heat, and momentum; geostrophic flows; wind-driven flows; the Gulf Stream; equatorial dynamics and ENSO; thermohaline circulation of the deep oceans; and tides. Prerequisite: PHYSICS 41 (formerly 53). GER: DB-NatSci

*4 units, Win (Fong, D)*

**CEE 165C. Water Resources Management**

(Same as CEE 265C) Focus is on the basic principles of surface and ground water resources management in the context of water scarcity and hydrologic uncertainty. Topics include reservoir, river basin, and aquifer management, conjunctive use of surface and ground water, wastewater reuse, and demand management. Considers technical, economic, social, and political elements of water management. Open to undergraduates (juniors and seniors) as CEE 165C.

*3 units, Sum (Staff)*

**CEE 166A. Watersheds and Wetlands**

(Same as CEE 266A) Introduction to the occurrence and movement of water in the natural environment and its role in creating and maintaining terrestrial, wetland, and aquatic habitat.

Hydrologic processes, including precipitation, evaporation, transpiration, snowmelt, infiltration, subsurface flow, runoff, and streamflow. Rivers and lakes, springs and swamps. Emphasis is on observation and measurement, data analysis, modeling, and prediction. Prerequisite: 101B or equivalent. (Freyberg) GER:DB-EngrAppSci

3 units, Aut (Freyberg, D)

#### CEE 166B. Floods and Droughts, Dams and Aqueducts

(Same as CEE 266B) Sociotechnical systems associated with human use of water as a resource and the hazards posed by too much or too little water. Potable and non-potable water use and conservation. Irrigation, hydroelectric power generation, rural and urban water supply systems, storm water management, flood damage mitigation, and water law and institutions. Emphasis is on engineering design. Prerequisite: 166A or equivalent. (Freyberg) GER:DB-EngrAppSci

3 units, Win (Freyberg, D)

#### CEE 166D. Water Resources and Water Hazards Field Trips

(Same as CEE 266D) Introduction to water use and water hazards via weekly field trips to local and regional water resources facilities (dams, reservoirs, fish ladders and hatcheries, pumping plants, aqueducts, hydropower plants, and irrigation systems) and flood damage mitigation facilities (storm water detention ponds, channel modifications, flood control dams, and reservoirs). Each trip preceded by an orientation lecture.

2 units, Win (Freyberg, D)

#### CEE 169. Environmental and Water Resources Engineering Design

Application of fluid mechanics, hydrology, water resources, environmental sciences, and engineering economy fundamentals to the design of a system addressing a complex problem of water in the natural and constructed environment. Problem changes each year, generally drawn from a challenge confronting the University or a local community. Student teams prepare proposals, progress reports, oral presentations, and a final design report. Prerequisite: senior in Civil Engineering or Environmental Engineering; 166B.

5 units, Spr (Freyberg, D)

#### CEE 171. Environmental Planning Methods

For juniors and seniors. Use of microeconomics and mathematical optimization theory in the design of environmental regulatory programs; tradeoffs between equity and efficiency in designing regulations; techniques for predicting adverse effects in environmental impact assessments; information disclosure requirements; and voluntary compliance of firms with international regulating norms. Prerequisites: MATH 51. Recommended: 70. GER:DB-EngrAppSci

3 units, Win (Ortolano, L)

#### CEE 171E. Environmental Challenges and Policies in Europe

(Same as CEE 271E) Current and future environmental challenges in Europe and related public policies in the European Union (EU). State of the European environment and human development, European environmental policy-making (multi-level ecological governance), global ecological role of the EU. Specific challenges include climate change adaptation, mitigation (carbon taxes, carbon market), climate change and European cities, biodiversity and ecosystems preservation (economics of biodiversity), energy management. Specific policies include environmental justice (environmental inequalities), human development and environmental sustainability indicators (beyond GDP) and absolute and relative decoupling (carbon intensity and resource productivity improvement). Open to undergraduates (freshmen, sophomores, juniors and seniors) as CEE 171E.

3 units, Sum (Staff)

#### CEE 172. Air Quality Management

Quantitative introduction to the engineering methods used to study and seek solutions to current air quality problems. Topics: global atmospheric changes, urban sources of air pollution, indoor air quality problems, design and efficiencies of pollution control devices, and engineering strategies for managing air quality. Prerequisites: 70, MATH 51. GER:DB-EngrAppSci

3 units, Win (Hildemann, L)

#### CEE 172A. Indoor Air Quality

(Same as CEE 278C) Factors affecting the levels of air pollutants in the built indoor environment. The influence of ventilation, office

equipment, floor coverings, furnishings, cleaning practices, and human activities on air quality including carbon dioxide, VOCs, resuspended dust, and airborne molds and fungi. Recommended: 172 or 278A.

2-3 units, Spr (Hildemann, L)

#### CEE 172S. Technology and business strategies to reduce greenhouse gas emissions

(Same as CEE 272S) This course will introduce the main concepts of greenhouse gas (GHG) emissions measurement and management, and it will explore the main mitigation options for reducing emissions or sequestering carbon dioxide. It will address technical aspects of GHG mitigation via energy efficiency and demand-side management, energy in high-technology industry, distributed power and co-generation, the role of renewable energy in GHG management, carbon sequestration in forestry, agriculture, and geological formations. The course explores policy options, carbon trading and business strategies for GHG mitigation.

1-3 units, Spr (Swisher, J)

#### CEE 173A. Energy Resources

(Same as CEE 207A, EARTHSYS 103) Comprehensive overview of fossil and renewable energy resources and energy efficiency. Topics covered for each resource: resource abundance, location, recovery, conversion, consumption, end-uses, environmental impacts, economics, policy, and technology. Applied lectures in specific energy sectors: buildings, transportation, the electricity industry, and energy in the developing world. Required field trips to local energy facilities. Optional discussion section for extra unit. GER:DB-EngrAppSci

3-5 units, Aut (Woodward, J; Knapp, K)

#### CEE 175A. California Coast: Science, Policy, and Law

(Same as CEE 275A, EARTHSYS 175, EARTHSYS 275) Same as LAW 514. Interdisciplinary. The legal, science, and policy dimensions of managing California's coastal resources. Coastal land use and marine resource decision making. The physics, chemistry, and biology of the coastal zone, tools for exploring data from the coastal ocean, and the institutional framework that shapes public and private decision making. Field work: how experts from different disciplines work to resolve coastal policy questions. Primarily for graduate students; upper-level undergraduates may enroll with permission of instructor. Students will be expected to participate in at least three mandatory field trips.

3-4 units, alternate years, not given this year

#### CEE 176A. Energy Efficient Buildings

Analysis and design. Thermal analysis of building envelope, heating and cooling requirements, HVAC, and building integrated PV systems. Emphasis is on residential passive solar design and solar water heating. Lab. GER:DB-EngrAppSci

3-4 units, Win (Masters, G)

#### CEE 176B. Electric Power: Renewables and Efficiency

Renewable and efficient electric power systems emphasizing analysis and sizing of photovoltaic arrays and wind turbines. Basic electric power generation, transmission and distribution, distributed generation, combined heat and power, fuel cells. End use demand, including lighting and motors. Lab. GER:DB-EngrAppSci

3-4 units, Spr (Masters, G)

#### CEE 176F. Energy Systems Field Trips: China Energy Systems

(Same as CEE 276F) Energy resources and policies in use and under development in China. 12-day field trip to China during Spring Break 2012. One unit for seminar and readings; one unit for field trip. Tuesday section is required for all students, Thursday section is also required for students attending the field trip. Prerequisite: consent of instructor for field trip.

1-2 units, Win (Knapp, K)

#### CEE 176S. Instrumental Analysis of Microconstituents in the Environment

(Same as CEE 276S) Current research, practice, and thinking in environmental engineering and science. Featuring presentations by invited faculty, researchers and professionals to share their insight and perspectives on environmental issues. Students will prepare brief summaries of seminar presentations and associated readings. For 2-unit option, students will also prepare and give a short presentation on a relevant environmental topic.

3 units, Sum (Staff)

**CEE 177. Aquatic Chemistry and Biology**

Introduction to chemical and biological processes in the aqueous environment. Basic aqueous equilibria; the structure, behavior, and fate of major classes of chemicals that dissolve in water; redox reactions; the biochemistry of aquatic microbial life; and biogeochemical processes that govern the fate of nutrients and metals in the environment and in engineered systems. Prerequisite: CHEM 31. GER:DB-EngrAppSci

4 units, Aut (Criddle, C)

**CEE 177P. Sustainability in Theory and Practice**

The multidimensional concept of sustainable development. Students evaluate engineered systems using tools such as cost-benefit analysis, trade-off analysis, and lifecycle analysis. How to make judgments about sustainable and unsustainable courses of action. Case studies dealing with contemporary environmental and economic challenges.

3 units, not given this year

**CEE 177S. Design for a Sustainable World**

(Same as CEE 277S) Technology-based problems faced by developing communities worldwide. Student groups partner with organizations abroad to work on concept, feasibility, design, implementation, and evaluation phases of various projects. Past projects include a water and health initiative, a green school design, seismic safety, and medical device. Admission based on written application and interview. See <http://esw.stanford.edu> for application. (Staff)

1-5 units, Spr (Tsoufakis, C)

**CEE 177X. Current Topics in Sustainable Engineering**

(Same as CEE 277X) Weekly seminar course run by Engineers for Sustainable World (ESW) student group in conjunction with faculty advisors. Speakers come in weekly to orient students to the science and engineering that is the foundation for current ESW projects. Instructor consent required.

1 unit, not given this year

**CEE 178. Introduction to Human Exposure Analysis**

(Same as CEE 276) (Graduate students register for 276.) Scientific and engineering issues involved in quantifying human exposure to toxic chemicals in the environment. Pollutant behavior, inhalation exposure, dermal exposure, and assessment tools. Overview of the complexities, uncertainties, and physical, chemical, and biological issues relevant to risk assessment. Lab projects. Recommended: MATH 51. Apply at first class for admission. GER:DB-EngrAppSci

3 units, Spr (Kopperud, R), Sum (Staff)

**CEE 179A. Water Chemistry Laboratory**

(Same as CEE 273A) (Graduate students register for 273A.) Laboratory application of techniques for the analysis of natural and contaminated waters, emphasizing instrumental techniques.

3 units, Win (Robertson, A)

**CEE 179C. Environmental Engineering Design**

Application of engineering fundamentals including environmental engineering, hydrology, and engineering economy to a design problem. Enrollment limited; preference to seniors in Civil and Environmental Engineering.

5 units, Spr (Robertson, A; Leckie, J)

**CEE 179S. Environmental Engineering Seminar**

(Same as CEE 279S) Current research, practice, and thinking in environmental engineering and science. Special summer edition features presentations by invited speakers and enrolled students. Students will prepare and give two short presentations, and will be provided feedback on presentation skills. For 2-unit option, students will write seminar summaries of presentations by two invited speakers.

1-2 units, Sum (Staff)

**CEE 180. Structural Analysis**

Analysis of beams, trusses, frames; method of indeterminate analysis by consistent displacement, least work, superposition equations, moment distribution. Introduction to matrix methods and computer methods of structural analysis. Prerequisite: 101A and ENGR 14. GER:DB-EngrAppSci

4 units, Aut (Kiremidjian, A)

**CEE 181. Design of Steel Structures**

Concepts of the design of steel structures with a load and

resistance factor design (LRFD) approach; types of loading; structural systems; design of tension members, compression members, beams, beam-columns, and connections; and design of trusses and frames. Prerequisite: 180. GER:DB-EngrAppSci

4 units, Aut (Law, K)

**CEE 182. Design of Reinforced Concrete Structures**

Properties of concrete and reinforcing steel; behavior of structural elements subject to bending moments, shear forces, torsion, axial loads, and combined actions; design of beams, slabs, columns and footings; strength design and serviceability requirements; design of simple structural systems for buildings. Prerequisite: 180. GER:DB-EngrAppSci

3-4 units, Win (Lepech, M)

**CEE 183. Integrated Civil Engineering Design Project**

Studio format. Design concepts for civil engineering facilities from schematic design through construction, taking into account sustainable engineering issues. Design exercises culminating in the design of a civil engineering facility, emphasizing structural systems and materials and integration with construction and other project requirements. Prerequisites: CEE 180, 181, 182; civil engineering major; architectural design major with instructor consent.

4 units, Spr (Deierlein, G)

**CEE 195. Fundamentals of Structural Geology**

(Same as GES 111) Techniques for mapping using GPS and differential geometry to characterize structures; dimensional analysis and scaling relations; kinematics of deformation and flow; measurement and analysis of stress; elastic deformation and properties of rock; brittle deformation including fracture and faulting; linear viscous flow including folding and magma dynamics; model development and methodology. Models of tectonic processes are constructed and solutions visualized using MATLAB. Prerequisites: GES 1, MATH 51, 52

3 units, Win (Pollard, D)

**CEE 196. Engineering Geology and Global Change**

(Same as GES 115) The application of geology and global change to the planning, design, and operation of engineering projects. Case histories taught in a seminar setting and field trips emphasize the impact of geology and global change on both individual engineering works and the built environment by considering Quaternary history and tectonics, anthropogenic sea level rise, active geologic processes, engineering properties of geologic deposits, site exploration, and professional ethics. Prerequisite: GES 1 or consent of instructor. GER: DB-NatSci

3 units, Spr (Holzer, T)

**CEE 198. Directed Reading or Special Studies in Civil Engineering**

Written report or oral presentation required. Students must obtain a faculty sponsor.

1-4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**CEE 199. Undergraduate Research in Civil and Environmental Engineering**

Written report or oral presentation required. Students must obtain a faculty sponsor.

1-4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**CEE 199A. Special Projects in Architecture**

Faculty-directed study or internship. May be repeated for credit. Prerequisite: consent of instructor.

1-4 units, Aut (Staff), Win (Staff), Spr (Staff)

**CEE 199B. Directed Studies in Architecture**

Projects may include studio-mentoring activities, directed reading and writing on topics in the history and theory of architectural design, or investigations into design methodologies.

1-4 units, Aut (Staff), Win (Katz, G), Spr (Staff)

**CEE 199H. Undergraduate Honors Thesis**

For students who have declared the Civil Engineering B.S. honors major and have obtained approval of a topic for research under the guidance of a CEE faculty adviser. Letter grade only. Written thesis or oral presentation required. (Staff)

2-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN CIVIL AND ENVIRONMENTAL ENGINEERING

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### CEE 200A. Teaching of Civil and Environmental Engineering

Required of CEE Ph.D. students. Strategies for effective teaching and introduction to engineering pedagogy. Topics: problem solving techniques and learning styles, individual and group instruction, the role of TAs, balancing other demands, grading. Teaching exercises. Register for quarter of teaching assistantship. 200A. Aut, 200B. Win, 200C. Spr

*1 unit, Aut (Tucker, A)*

### CEE 200B. Teaching of Civil and Environmental Engineering

Required of CEE Ph.D. students. Strategies for effective teaching and introduction to engineering pedagogy. Topics: problem solving techniques and learning styles, individual and group instruction, the role of TAs, balancing other demands, grading. Teaching exercises. Register for quarter of teaching assistantship. May be repeated for credit. 200A. Aut, 200B. Win, 200C. Spr

*1 unit, Win (Chui, T)*

### CEE 200C. Teaching of Civil and Environmental Engineering

Required of CEE Ph.D. students. Strategies for effective teaching and introduction to engineering pedagogy. Topics: problem solving techniques and learning styles, individual and group instruction, the role of TAs, balancing other demands, grading. Teaching exercises. Register for quarter of teaching assistantship. May be repeated for credit. 200A. Aut, 200B. Win, 200C. Spr

*1 unit, Spr (Chui, T)*

### CEE 201D. Computations in Civil and Environmental Engineering

(Same as CEE 101D) Computational and visualization methods in the design and analysis of civil and environmental engineering systems. Focus is on applications of MATLAB. How to develop a more lucid and better organized programming style.

*3 units, Aut (Kitanidis, P), Sum (Staff)*

### CEE 202. Construction Claims Analysis and Resolution

Concepts include cost overrun and schedule delay analysis, contracts and other legal topics, and resolution of construction disputes. Introduction to construction law. Requires attendance of the first five weeks of CEE 102 for basic legal background.

*3-4 units, Win (Groves, R; Tucker, A; London, M)*

### CEE 203. Probabilistic Models in Civil Engineering

Introduction to probability modeling and statistical analysis in civil engineering. Emphasis is on the practical issues of model selection, interpretation, and calibration. Application of common probability models used in civil engineering including Poisson processes and extreme value distributions. Parameter estimation. Linear regression.

*3-4 units, Aut (Shahi, S)*

### CEE 204. Structural Reliability

Procedures for evaluating the safety of structural components and systems. First- and second-order estimates of failure probabilities of engineered systems. Sensitivity of failure probabilities to assumed parameter values. Measures of the relative importance of random variables. Reliability of systems with multiple failure modes. Reliability updating. Simulation methods and variance reduction techniques. Prerequisite: 203 or equivalent.

*3-4 units, Spr (Baker, J)*

### CEE 205A. Structural Materials Testing and Simulation

Hands-on laboratory experience with fabrication, computer simulation, and experimental testing of material and small-scale structural components. Comparison of innovative and traditional structural materials. Behavior and application of high-performance fiber reinforced concrete materials for new design, fiber-reinforced polymeric materials for structural retrofits and introduction to sustainable, bio-based composites. Prerequisites: basic course in reinforced concrete design CEE 182 or equivalent.

*3-4 units, Spr (Staff)*

### CEE 205B. Advanced Topics in Structural Concrete

Concepts and application of strut and tie modeling including deep beams, design for torsion resistance, beam-column joints, bridge components, and post-tensioned anchor zones. Course project

integrating computer simulation and physical experimentation of a structural concrete component. Prerequisites: CEE 285A or equivalent.

*3 units, NEXTYEAR*

### CEE 206. Decision Analysis for Civil and Environmental Engineers

Current challenges in selecting an appropriate site, alternate design, or retrofit strategy based on environmental, economic, and social factors can be best addressed through applications of decision science. Basics of decision theory, including development of decision trees with discrete and continuous random variables, expected value decision making, utility theory value of information, and elementary multi-attribute decision making will be covered in the class. Examples will cover many areas of civil and environmental engineering problems. Prerequisite: CEE 203 or equivalent.

*3 units, Spr (Kiremidjian, A)*

### CEE 206A. Decision Models in Civil Engineering

For advanced graduate students in CEE. Applications of decision science to address current challenges in selecting an appropriate site and appropriate design or retrofit strategy based on environmental, economic, and social factors. Examples from everyday civil and environmental engineering problems. Prerequisite: CEE 203 or equivalent.

*2 units, not given this year*

### CEE 207A. Energy Resources

(Same as CEE 173A, EARTHSYS 103) Comprehensive overview of fossil and renewable energy resources and energy efficiency. Topics covered for each resource: resource abundance, location, recovery, conversion, consumption, end-uses, environmental impacts, economics, policy, and technology. Applied lectures in specific energy sectors: buildings, transportation, the electricity industry, and energy in the developing world. Required field trips to local energy facilities. Optional discussion section for extra unit.

*3-5 units, Aut (Woodward, J; Knapp, K)*

### CEE 208. Structural Health Monitoring Using Statistical Methods

Structural health monitoring systems, which enables us to automatically diagnose structural damage, are important to ensure safe and functional built environment. This course provides theoretical background on damage diagnosis algorithms using model-based and signal-based methods for civil structures with an emphasis on the underlying physical interpretations and their practical usage.

*2 units, Aut (Noh, H)*

### CEE 210. Building Information Modeling

(Same as CEE 110) (Graduate students register for 210.) Creation, management, and application of building information models. Process and tools available for creating 2D and 3D computer representations of building components and geometries. Organizing and operating on models to produce architectural views and construction documents, renderings and animations, and interface with analysis tools. Lab exercises, class projects. Limited enrollment.

*2-4 units, Aut (Katz, G)*

### CEE 211. Multidisciplinary Modeling and Analysis

(Same as CEE 111) (Graduate students register for 211.) Computer modeling, visualization, analysis, and graphical communication of building projects. Use of 3D models in laser scanning, rendering, animation, daylight, energy, cost, structural, lighting analysis, and computer controlled fabrication. Underlying 3D computer representations, and analysis tools and their applications. Guest lectures, lab exercises, class project. Prerequisite: 110 or CAD experience.

*4 units, Win (Kunz, J)*

### CEE 212A. Industry Applications of Virtual Design & Construction

Building upon the concept of the VDC Scorecard, CEE 112A/212A investigates in the management of Virtual Design and Construction (VDC) programs and projects in the building industry. Interacting with experts and professionals in real estate, architecture, engineering, construction and technology providers, students will learn from the industry applications of Building Information Modeling and its relationship with Integrated Project

Delivery, Sustainable Design and Construction, and Virtual Design and Construction. Students will conduct case studies to evaluate the maturity of VDC planning, adoption, technology and performance in practice. Students taking 3 or 4 units will be paired up with independent research or case study projects on the industry applications of VDC. No prerequisite. See CEE 112B/212B in the Winter Quarter and CEE 112C/212C in the Spring Quarter.

*2-4 units, Aut (Kam, C)*

### **CEE 212B. Industry Applications of Virtual Design & Construction**

(Same as CEE 112B) As a continuation of the Autumn-quarter course, CEE 112B/212B furthers the study of the VDC scorecard and investigates in the management of Virtual Design and Construction (VDC) programs and projects in the building industry. Students will be paired up with industry-based VDC projects with public owners and private developers, such as GSA Public Buildings Service, the Hong Kong Mass Transit Railway, Optima, Walt Disney Imagineering, Microsoft facilities and/or other CIFE International members. Independently, students will conduct case studies and/or develop VDC building information models (BIM) using off-the-shelf technologies for project analysis, collaboration, communication and optimization. Students will gain insights and develop skills that are essential for academic research, internships or industry practice in VDC. Prerequisite: CEE 112A/212A, CEE 159C/259C, CEE 159D/259D, or Instructor's approval. See CEE 112C/212C in the Spring Quarter.

*2-4 units, Win (Kam, C)*

### **CEE 212C. Industry Applications of Virtual Design & Construction**

(Same as CEE 112C) Following the Autumn- and Winter-quarter course series, CEE 112C/212C is an industry-focused and project-based practicum that focuses on the industry applications of Virtual Design and Construction (VDC). Students will be paired up with industry-based VDC projects with public owners and private developers, such as GSA Public Buildings Service, the Hong Kong Mass Transit Railway, Optima, Walt Disney Imagineering, Microsoft facilities and/or other CIFE International members. Independently, students will conduct case studies and/or develop VDC and building information models (BIM) using off-the-shelf technologies for project analysis, collaboration, communication and optimization. Students will gain insights and develop skills that are essential for academic research, internships or industry practice in VDC. Prerequisite: CEE 112A/212A, CEE 112B/212B, CEE 159C/259C, CEE 159D/259D, or Instructor's Approval.

*2-4 units, Spr (Kam, C)*

### **CEE 214. Introduction to Modeling and Analysis in CEE**

Introduces students to modeling of products, processes and organizations in the AEC industry. Modeling and analysis purposes include support of technical, social, psychological and ethical decision making for different stakeholders. Different purposes and levels of detail for different models. CEM/DCI integrated approach to building using physical, mathematical, graphical and computer models of products, organizations and processes.

*3 units, not given this year*

### **CEE 215. Goals and Methods of Sustainable Building Projects**

(Same as CEE 115) (Graduate students register for 215.) Goals related to sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, and economic and social sustainability. Methods to integrate these goals and enhance the economic, ecological, and equitable value of building projects. Industry and academic rating systems, project case studies, guest lecturers, and group project.

*3 units, not given this year*

### **CEE 217. Renewable Energy Infrastructure**

coming later

*3 units, Win (Fischer, M)*

### **CEE 222A. Computer Integrated**

#### **Architecture/Engineering/Construction (AEC) Global Teamwork**

AEC students engage in a crossdisciplinary, collaborative, geographically distributed, and multicultural project-based teamwork. AEC teams exercise their domain knowledge and

information technologies in a multidisciplinary context focusing on the design and construction concept development phase of a comprehensive building project. Prerequisite: interview with Instructor in Autumn Quarter.

*3 units, Win (Fruchter, R)*

### **CEE 222B. Computer Integrated**

#### **Architecture/Engineering/Construction (AEC) Global Teamwork**

Global AEC student teams continue their project activity focusing on the most challenging concept developed in 222A and chosen jointly with their client. Comprehensive team project focusing on design and construction, including: project development and documentation; detailing, 3D and 4D modeling, simulation, sustainable concepts, cost benefit analysis, and life-cycle cost analysis; and final project presentation of product and process. Prerequisite: CEE 222A.

*2 units, Spr (Fruchter, R)*

### **CEE 224A. Sustainable Development Studio**

(Undergraduates, see 124.) Project-based. Sustainable design, development, use and evolution of buildings; connections of building systems to broader resource systems. Areas include architecture, structure, materials, energy, water, air, landscape, and food. Projects use a cradle-to-cradle approach focusing on technical and biological nutrient cycles and information and knowledge generation and organization. May be repeated for credit.

*1-5 units, Aut (Staff), Win (Staff), Spr (Debbas, C; Katz, G), Sum (Staff)*

### **CEE 225. Field Surveying Laboratory**

(Same as CEE 140) Graduate students register for 225. Friday afternoon laboratory provides practical surveying experience. Additional morning classes to prepare for the afternoon sessions. Hands-on operation of common traditional field survey tools ; introduction to the newest generation of digital measuring, positioning, and mapping tools. Emphasis is on the concept of using the data collected in the field as the basis for subsequent engineering and economic decisions.

*3 units, not given this year*

### **CEE 226. Life Cycle Assessment for Complex Systems**

Life cycle modeling of products, industrial processes, and infrastructure/building systems; material and energy balances for large interdependent systems; environmental accounting; and life cycle costing. These methods, based on ISO 14000 standards, are used to examine emerging technologies, such as biobased products, building materials, building integrated photovoltaics, and alternative design strategies, such as remanufacturing, dematerialization, LEED, and Design for Environment: DfE. Student teams complete a life cycle assessment of a product or system chosen from industry.

*3-4 units, Aut (Lepech, M)*

### **CEE 226E. Advanced Topics in Integrated, Energy-Efficient Building Design**

Innovative methods and systems for the integrated design and evaluation of energy efficient buildings. Guest practitioners and researchers in energy efficient buildings. Student initiated final project.

*2 units, Spr (Rumsey, P)*

### **CEE 227. Global Project Finance**

Public and private sources of finance for large, complex, capital-intensive projects in developed and developing countries. Benefits and disadvantages, major participants, risk sharing, and challenges of project finance in emerging markets. Financial, economic, political, cultural, and technological elements that affect project structures, processes, and outcomes. Case studies. Limited enrollment.

*3-5 units, Win (Orr, R)*

### **CEE 227E. Infrastructure, Disruptive Technologies and Entrepreneurship.**

(Same as CEE 127E) Silicon Valley provides a dynamic environment perfectly suited for developing the disruptive technologies that are changing the faces of today's mainstream infrastructure systems and essential service industries. This course will provide an overview of the most exciting technologies emerging from Silicon Valley right now and the potential that

exists to disrupt mainstream transportation, electricity, intelligence gathering, and banking infrastructure systems that were dominant in the 20th Century. Guest speakers include prominent CEOs, visionaries, investors, and serial entrepreneurs who are building game changing companies.

1 unit, *Win (Orr, R)*

#### **CEE 228. Innovative Global Construction Technology**

(Formerly 245T.) Five-week class. How innovative companies invent new construction processes based on relative local labor, and materials and equipment cost, availability, and capabilities, and developed from experience and knowledge of construction technology in bridge, tunnel, and high-rise building. The process of generating new ideas. Industry guest speakers address the link between product/process innovation and construction technology.

2 units, *Win (Staff)*

#### **CEE 228C. Design and Construction for Sustainability in Extreme Environments**

Course focuses on multi-disciplinary conceptual design of self-sustaining facilities in remote, extreme environments. Through this learn-by-doing course, students will apply an integrated sustainable design methodology for facility planning and operations. Research into environmental design criteria, opportunities, and constraints to logically guide facility form, shape, systems, and operational requirements. Additional independent study unit available for participation in process experiment. Guest lectures, discussion section, class project. Graduate only.

2 units, *Spr (Buckley, R)*

#### **CEE 229. Climate Change Adaptation for Seaports: Engineering and Policy for a Sustainable Future**

(Same as CEE 129) Interdisciplinary. Exploration of impacts of climate change on coastal ports and harbors around the world. The research team will utilize a broad range of tools to assess the engineering, construction, and policy responses necessary to protect ports and harbors from significant sea-level rise and storm surge. Collaborations with national and international experts. Consideration of economic, social and environmental implications. Independent and team projects will contribute to ongoing research. Guest speakers, case studies and field trips. [www.groupspaces.com/seaports2100](http://www.groupspaces.com/seaports2100). Recommended: CEE 129S/229S seminar series.

3 units, *Aut (Fischer, M; Becker, A; Schwegler, B), Win (Fischer, M; Schwegler, B; Becker, A), Spr (Fischer, M; Becker, A; Schwegler, B)*

#### **CEE 229S. Climate Change Adaptation in the Coastal Built Environment**

(Same as CEE 129S) How will climate change impact coastal ports and harbors around the world? Leading experts discuss the latest science, policy, and engineering research on this important issue, including the necessary response to protect ports and harbors from significant sea-level rise and storm surge. Focus is on the built environment. Guest speakers. CEE 229/129 for research option. See [www.groupspaces.com/seaports2100](http://www.groupspaces.com/seaports2100).

1 unit, *Aut (Staff), Win (Fischer, M; Becker, A), Spr (Staff)*

#### **CEE 232. Interplay of Architecture and Engineering**

(Same as CEE 132) The range of requirements that drive a building's design including architecture, engineering, constructability, building codes, and budget. Case studies illustrate how structural and mechanical systems are integrated into building types including residential, office, commercial, and retail. In-class studio work.

4 units, *not given this year*

#### **CEE 235A. Parametrics: Applications in Architecture and Product Design**

(Same as CEE 135A) Precedents in architecture and product design; methods for modeling, prototyping, and fabrication. How to combine design intentions and digital logics with physical and material constraints. Students develop a case study and small design projects using a parametric approach at the scales of architecture and product.

4 units, *Win (Flager, F)*

#### **CEE 236. Green Architecture**

(Same as CEE 136) Preference to Architectural Design and CEE majors; others by consent of instructor. An architectural design

studio exploring green design and green design processes. Initial sessions develop a working definition of sustainable design and strategies for greening the built environment in preparation for design studio work. Prerequisites: 31 or 31Q, and 110 and 130. Enrollment is limited to 14 (or possibly 16) students. Please do not enroll in the class until after attending the first class meeting. If the number of students interested in taking the class is greater than 14 (or possibly 16), space will be assigned based on requirements for graduation.

4 units, *Win (Sperry, R)*

#### **CEE 241. Managing Fabrication and Construction**

Methods to manage the physical production of construction projects; design, analysis, and optimization of the fabricate-assemble process including performance metrics. Project management techniques and production system design including: push versus pull methods; master scheduling and look-ahead scheduling; scope, cost, and schedule control; earned value analysis; critical path method; location-based scheduling; 4D modeling; workflow; trade coordination; methods to understand uncertainty and reduce process variability; and supply chain systems including made-to-stock, engineered-to-order, and made-to-order. Prerequisite: 100 or consent of instructor. Recommended corequisite: 240.

4 units, *Aut (Rischmoller Delgado, L)*

#### **CEE 241A. Infrastructure Project Development**

(Same as CEE 141A) Infrastructure is critical to the economy, global competitiveness and quality of life. Topics include energy, transportation, water, public facilities, and communications sectors. Analysis of the condition of the nation's infrastructure and how projects are planned and financed. Focus is on public works in the U.S. The role of public and private sectors through a step-by-step study of the project development process. Case studies of real infrastructure projects. Industry guest speakers. Student teams prepare project environmental impact statements.

3 units, *Aut (Griggs, G)*

#### **CEE 241B. Infrastructure Project Delivery**

(Same as CEE 141B) Infrastructure is critical to the economy, global competitiveness and quality of life. Topics include energy, transportation, water, public facilities, and communications sectors. Analysis of how projects are designed, constructed, operated, and maintained. Focus is on public works projects in the U.S. Alternative project delivery approaches and organizational strategies. Case studies of real infrastructure projects. Industry guest speakers. Student teams prepare finance/design/build/operate/maintain project proposals.

3 units, *Win (Griggs, G)*

#### **CEE 241C. Global Infrastructure Projects Seminar**

(Same as CEE 141C) Infrastructure is critical to the economy, global competitiveness, and quality of life. Course analyzes and compares the development and delivery of mega-projects around the world. Alternative project delivery methods, the role of public and private sector, different project management strategies, and lessons learned. Case studies of real infrastructure projects. Industry guest speakers. Field trips to local projects.

1-2 units, *Spr (Griggs, G)*

#### **CEE 242. Organization Design for Projects and Companies**

Introduction to organizational behavior and organizational design for construction projects and companies. Class incorporates readings, individual, small group and large group case study assignments. Students use computer simulation to design real-world project organizations.

3-4 units, *Win (Levitt, R)*

#### **CEE 242A. Negotiating Sustainable Development**

(Same as CEE 142A, EARTHSYS 142A, EARTHSYS 242A) How to be effective at achieving sustainability by learning the skills required to negotiate differences between stakeholders who advocate for their own interests. How ecological, social, and economic interests can be effectively balanced and managed. How to be effective actors in the sustainability movement, and use frameworks to solve complex, multiparty processes. Case study analysis of domestic and international issues. Students negotiate on behalf of different interest groups in a variety of arenas including energy, climate, land use, and the built environment. One Saturday all day field trip. No prerequisites.

3 units, Win (Christensen, S)

### CEE 243. Predicting and Measuring Building Energy Use

Energy modeling has entered commercial use and can help evaluate the impact of potential energy-saving interventions in commercial building design. Methods to create building information models to enable energy analysis, use energy analysis tools and interpret their results for commercial buildings, analyze measured building performance and relate prediction to measurement, and develop guidance for owners on how to use these methods in practice. May be repeated for credit. Prerequisites: Revit or Digital Project competence or CEE 210, CEE 211, or CEE 135 with equivalent experience. Recommended: energy modeling experience, CEE 176A, CEE 226E, or CEE 256.

2-3 units, Spr (Kunz, J)

### CEE 244. Fundamentals of Construction Accounting and Finance

Concepts of financial accounting and economics emphasizing the construction industry. Financial statements, accounting concepts, project accounting methods, and the nature of project costs. Case study of major construction contractor. Ownership structure, working capital, and the sources and uses of funds.

2 units, Aut (Tucker, A; Meyer, P)

### CEE 245A. Global Project Seminar

Issues related to large, complex, global development projects including infrastructure development, urban and rural development, and the development of new cities. Guest presentations by industry practitioners and academics, including: Sabeer Bhatia, founder of Hotmail and architect of NanoCity; Ian Bremmer, CEO of the Eurasia Group, and Greg Huger, managing director of AirliePartners. May be repeated for credit.

3 units, not given this year

### CEE 246. Entrepreneurship in Civil & Environmental Engineering

Developing and implementing successful strategies for all kinds of companies in the architecture-engineering-construction industry. Develop a strategy for, and play different management roles in, a simulated construction company. Develop business plans for a new company or new business activity within an existing company in this industry. Prerequisites: introductory engineering economy course such as E60 or CEE 246a; introductory accounting course such as CEE 244A, or MS&E 140 (on-line class available to meet prerequisites -- contact instructor)

3-4 units, Spr (Levitt, R)

### CEE 246A. Engineering Economy Primer

Satisfies the engineering economy prerequisite for 246 or 253. Application of engineering economy concepts and principles to the construction industry. Equivalence concept; interest formulas; value of money across time; present value, annual cash flow, internal rate of return and benefit-cost methods; retirement and replacement; depreciation; capital budgeting; and sensitivity and risk analysis.

2 units, Aut (Koen Cohen, N)

### CEE 246B. Real Estate Finance Seminar

Real estate principles and process. Financial modeling. Feasibility analysis. Sources and uses of funds. Cash flow projections. Profit and loss reports. Financing issues for different types of real estate projects. Redevelopment projects. Financing green projects and technologies. Current challenges in financial markets. Group project and presentation. Limited enrollment with priority to CEM, DCI, and SDC students not enrolled in CEE 248. Prerequisites: CEE 246A or equivalent, ENGR 60. Recommended: knowledge of spreadsheets.

1 unit, Spr (Koen Cohen, N)

### CEE 247. Cases in Personality, Leadership, and Negotiation

(Same as CEE 147) Case studies target personality issues, risk willingness, and life skills essential for real world success. Failures, successes, and risk willingness in individual and group tasks based on the professor's experience as small business owner and construction engineer. Required full afternoon field trips to local sites. Application downloaded from coursework must be submitted before first class; mandatory first class attendance. No auditors.

3 units, not given this year

### CEE 248. Real Estate Development

Critical activities and key participants. Topics: conceptual and feasibility studies, market perspectives, the public roles, steps for project approval, project finance, contracting and construction, property management, and sales. Group projects focus on actual developments now in the planning stage. Enrollment limited to 24; priority to graduate majors in the department's CEM and GSB programs. Prerequisites: 241, 244A or equivalent, ENGR 60.

3 units, Spr (Kroll, M)

### CEE 248G. Certifying Green Buildings

Open to all disciplines. Goal is prepare students for the United States Green Building Council's professional accreditation exam. Basic metrics for project certification via USGBC's LEED rating system. Recommended: familiarity with design and construction terminology.

1 unit, not given this year

### CEE 249. Labor and Industrial Relations: Negotiations, Strikes, and Dispute Resolution

Labor/management negotiations, content of a labor agreement, strikes, dispute resolution, contemporary issues affecting labor and management, and union versus open shop competitiveness in the marketplace. Case studies; presentations by union leaders, legal experts, and contractor principals. Simulated negotiation session with union officials and role play in an arbitration hearing.

2 units, Win (Walton, M)

### CEE 251. Negotiation

(Same as CEE 151, EARTHSCI 251) Students learn to prepare for and conduct negotiations in a variety of arenas including getting a job, managing workplace conflict, negotiating transactions, and managing personal relationships. Interactive class. The internationally travelled instructor who has mediated cases in over 75 countries will require students to negotiate real life case studies and discuss their results in class. Application required before first day of class; see Coursework.

3 units, Aut (Christensen, S), Spr (Christensen, S)

### CEE 252. Construction Methods for Concrete and Steel Structures

Providing technical support for concrete and steel construction operations on buildings or infrastructure projects. Concrete materials, construction properties of fresh concrete. Resources and operations for batching, transporting, placing, finishing, and curing concrete. Design, fabrication, and use of formwork. Special operations and formwork systems. Detailing, fabricating, erecting, and connecting structural steel. Lifting equipment and lift planning. Welding processes, operations, and quality control. Readings, exercises and course projects.

3 units, not given this year

### CEE 252P. Construction Engineering Practicum

Discussion and group exercises related to technical fundamentals, resources, and field construction operations for earthwork, concrete and steel construction. Introduces construction engineering and prepares students for courses related to CEM and SDC degrees. Required: advance queries related to reading, class sessions, group exercises, summary paper. Time: prior to start of Autumn quarter

1 unit, Aut (Tatum, C)

### CEE 253A. Earthwork Construction

Construction properties of soil. Technical fundamentals of operations and equipment for earthwork. Description of systems and machine forms for construction equipment. Application of modeling techniques in planning, selecting equipment, estimating production rates. Field trip to infrastructure contractor.

1 unit, not given this year

### CEE 254. Cases in Estimating Costs

(Same as CEE 154) Students participate in bidding contests requiring cost determination in competitive markets. Monetary forces driving the construction industry as general principles applicable to any competitive business. Cases based on field trips and professor's experience as small business owner and construction engineer. Required full afternoon field trips to local sites. Limited enrollment; no auditors. Prerequisites: consent or instructor and application downloaded from CourseWork prior to start of class.

3 units, not given this year

**CEE 256. Building Systems**

(Same as CEE 156) HVAC, lighting, and envelope systems for commercial and institutional buildings, with a focus on energy efficient design. Knowledge and skills required in the development of low-energy buildings that provide high quality environment for occupants.

4 units, Spr (Kolderup, E)

**CEE 257. Building Systems Practice**

Technical fundamentals, major components, connecting elements, field operations for active building systems: HVAC, electric power, water and waste, fire protection, control and instrumentation and vertical transportation. Integration, coordination and commissioning of systems. Field trip to HVAC specialty contractor.

1 unit, Spr (Tatum, C)

**CEE 258. Donald R. Watson Seminar in Construction Engineering and Management**

Panel discussions with speakers from various segments of industry and government who clarify career options. Students interact with panelists in group discussions at dinner after class.

1 unit, Aut (Kunz, J)

**CEE 258B. Donald R. Watson Seminar in Construction Engineering and Management**

Weekly seminars and field trips focusing on technical aspects of concrete and steel construction. Submission of abstract and paper required.

1 unit, not given this year

**CEE 259A. Construction Problems**

Group-selected problems in construction techniques, equipment, or management; preparation of oral and written reports. Guest specialists from the construction industry. See 299 for individual studies. Prerequisites: graduate standing in CEM program and consent of instructor.

1-3 units, Aut (Staff)

**CEE 259B. Construction Problems**

Group-selected problems in construction techniques, equipment, or management; preparation of oral and written reports. Guest specialists from the construction industry. See 299 for individual studies. Prerequisites: graduate standing in CEM program and consent of instructor.

1-3 units, Win (Staff)

**CEE 260A. Physical Hydrogeology**

(Same as EESS 220) (Formerly GES 230.) Theory of underground water occurrence and flow, analysis of field data and aquifer tests, geologic groundwater environments, solution of field problems, and groundwater modeling. Introduction to groundwater contaminant transport and unsaturated flow. Lab. Prerequisite: elementary calculus.

4 units, Aut (Gorelick, S)

**CEE 260B. Surface and Near-Surface Hydrologic Response**

(Same as GES 237) Quantitative review of process-based hydrology and geomorphology. Introduction to finite-difference and finite-element methods of numerical analysis. Topics: biometeorology, unsaturated and saturated subsurface fluid flow, overland and open channel flow, and physically-based simulation of coupled surface and near-surface hydrologic response. Links hydrogeology, soil physics, and surface water hydrology.

3 units, Aut (Loague, K)

**CEE 260C. Contaminant Hydrogeology**

(Same as EESS 221) (Formerly GES 231.) For earth scientists and engineers. Environmental and water resource problems involving contaminated groundwater. The processes affecting contaminant migration through porous media including interactions between dissolved substances and solid media. Conceptual and quantitative treatment of advective-dispersive transport with reacting solutes. Predictive models of contaminant behavior controlled by local equilibrium and kinetics. Modern methods of contaminant transport simulation and optimal aquifer remediation. Prerequisite: GES 230 or CEE 260A or equivalent.

4 units, Win (Gorelick, S)

**CEE 262A. Hydrodynamics**

The flow of incompressible viscous fluid; emphasis is on developing an understanding of fluid dynamics that can be applied

to environmental flows. Topics: kinematics of fluid flow; equations of mass and momentum conservation (including density variations); some exact solutions to the Navier-Stokes equations; appropriate analysis of fluid flows including Stokes flows, potential flows, and laminar boundary layers; and an introduction to the effects of rotation and stratification through scaling analysis of fluid flows. Prerequisites: 101B or consent of instructor; and some knowledge of vector calculus and differential equations.

3-4 units, Aut (Fringer, O)

**CEE 262B. Transport and Mixing in Surface Water Flows**

Application of fluid mechanics to problems of pollutant transport and mixing in the water environment. Mathematical models of advection, diffusion, and dispersion. Application of theory to problems of transport and mixing in rivers, estuaries, and lakes and reservoirs. Recommended: 262A and CME 102 (formerly ENGR 155A), or equivalents.

3-4 units, Win (Woodson, C)

**CEE 262C. Modeling Environmental Flows**

Introduction to numerical methods for modeling surface water flows in rivers, lakes, estuaries and the coastal ocean. Topics include stability and accuracy analysis, curvilinear and unstructured grids, implicit/explicit methods, transport and diffusion, shallow water equations, nonhydrostatic equations, Navier-Stokes solvers, turbulence modeling. Prerequisites: CEE262A, CME206, or consent of instructor, CME206 can be taking concurrently.

3 units, Spr (Fringer, O)

**CEE 262D. Introduction to Physical Oceanography**

(Same as CEE 164, EESS 148) The dynamic basis of oceanography. Topics: physical environment; conservation equations for salt, heat, and momentum; geostrophic flows; wind-driven flows; the Gulf Stream; equatorial dynamics and ENSO; thermohaline circulation of the deep oceans; and tides. Prerequisite: PHYSICS 41 (formerly 53).

4 units, Win (Fong, D)

**CEE 262E. Lakes and Reservoirs**

Physics and water quality dynamics in lakes and reservoirs. Implementation of physical and biogeochemical processes in 1-D models. Recommended: 262B.

2-3 units, not given this year

**CEE 262F. Ocean Waves**

The fluid mechanics of surface gravity waves in the ocean of relevance to engineers and oceanographers. Topics include irrotational waves, wave dispersion, wave spectra, effects of bathymetry (shoaling), mass transport, effects of viscosity, and mean currents driven by radiation stresses. Prerequisite: CEE 262A or a graduate class in fluid mechanics.

3 units, Spr (Staff)

**CEE 263A. Air Pollution Modeling**

The numerical modeling of urban, regional, and global air pollution focusing on gas chemistry and radiative transfer. Stratospheric, free-tropospheric, and urban chemistry. Methods for solving stiff systems of chemical ordinary differential, including the multistep implicit-explicit method, Gear's method with sparse-matrix techniques, and the family method. Numerical methods of solving radiative transfer, coagulation, condensation, and chemical equilibrium problems. Project involves developing a basic chemical ordinary differential equation solver. Prerequisite: CS 106A or equivalent.

3-4 units, Spr (Jacobson, M)

**CEE 263B. Numerical Weather Prediction**

Numerical weather prediction. Continuity equations for air and water vapor, the thermodynamic energy equation, and momentum equations derived for the atmosphere. Numerical methods of solving partial differential equations, including finite-difference, finite-element, semi-Lagrangian, and pseudospectral methods. Time-stepping schemes: the forward-Euler, backward-Euler, Crank-Nicolson, Heun, Matsuno, leapfrog, and Adams-Bashforth schemes. Boundary-layer turbulence parameterizations, soil moisture, and cloud modeling. Project developing a basic weather prediction model. Prerequisite: CS 106A or equivalent.

3-4 units, not given this year

**CEE 263C. Weather and Storms**

(Same as CEE 63) Daily and severe weather and global climate.

Topics: structure and composition of the atmosphere, fog and cloud formation, rainfall, local winds, wind energy, global circulation, jet streams, high and low pressure systems, inversions, el Niño, la Niña, atmosphere/ocean interactions, fronts, cyclones, thunderstorms, lightning, tornadoes, hurricanes, pollutant transport, global climate and atmospheric optics.

3 units, Aut (Ten Hoeve, J)

**CEE 263D. Air Pollution and Global Warming: History, Science, and Solutions**

(Same as CEE 64) Survey of urban- through global-scale air pollution and climate change and their renewable energy solutions. Topics: evolution of the Earth's atmosphere, history of discovery of chemicals in the air, gases and particles in urban smog, visibility, indoor air pollution, acid rain, stratospheric and Antarctic ozone loss, the historic climate record, causes and effects of global warming, impacts of energy systems on pollution and climate, renewable energy solutions to air pollution and global warming. UG Reqs: GER: DBNatSci

3 units, Win (Jacobson, M)

**CEE 264. Sediment Transport Modeling**

Mechanics of sediment transport in rivers, estuaries and coastal oceans, with an emphasis on development of models and application of three-dimensional software tools. Topics include bottom boundary layers in steady and wave-driven flows, bedform dynamics, suspended and bedload transport, cohesive sediments. Prerequisites: CEE262A or consent of instructor

3 units, Win (Fringer, O)

**CEE 264A. Rivers, Streams, and Canals**

(Same as CEE 161A) Introduction to the movement of water through natural and engineered channels, streams, and rivers. Basic equations and theory (mass, momentum, and energy equations) for steady and unsteady descriptions of the flow. Application of theory to the design of flood- control and canal systems. Flow controls such as weirs and sluice gates; gradually varied flow; Saint-Venant equations and flood waves; and method of characteristics. Open channel flow laboratory experiments: controls such as weirs and gates, gradually varied flow, and waves. Limited enrollment in lab section.

3-4 units, Aut (Fong, D), Sum (Staff)

**CEE 265A. Sustainable Water Resources Development**

Alternative criteria for judging the sustainability of projects. Application of criteria to evaluate sustainability of water resources projects in several countries. Case studies illustrate the role of political, social, economic, and environmental factors in decision making. Influence of international aid agencies and NGOs on water projects. Evaluation of benefit-cost analysis and environmental impact assessment as techniques for enhancing the sustainability of future projects. Limited enrollment. Prerequisite: graduate standing in Environmental and Water Studies, or consent of instructor.

3 units, Aut (Ortolano, L), Spr (Ortolano, L)

**CEE 265C. Water Resources Management**

(Same as CEE 165C) Focus is on the basic principles of surface and ground water resources management in the context of water scarcity and hydrologic uncertainty. Topics include reservoir, river basin, and aquifer management, conjunctive use of surface and ground water, wastewater reuse, and demand management. Considers technical, economic, social, and political elements of water management. Open to undergraduates (juniors and seniors) as CEE 165C.

3 units, Sum (Staff)

**CEE 265D. Water and Sanitation in Developing Countries**

Economic, social, political, and technical aspects of sustainable water supply and sanitation service provision in developing countries. Case studies from Asia, Africa, and Latin America. Service pricing, alternative institutional structures including privatization, and the role of consumer demand and community participation in the planning process. Environmental and public health considerations, and strategies for serving low-income households. Limited enrollment. Prerequisite: consent of instructor.

1-3 units, Win (Davis, J)

**CEE 266A. Watersheds and Wetlands**

(Same as CEE 166A) Introduction to the occurrence and

movement of water in the natural environment and its role in creating and maintaining terrestrial, wetland, and aquatic habitat. Hydrologic processes, including precipitation, evaporation, transpiration, snowmelt, infiltration, subsurface flow, runoff, and streamflow. Rivers and lakes, springs and swamps. Emphasis is on observation and measurement, data analysis, modeling, and prediction. Prerequisite: 101B or equivalent. (Freyberg)

3 units, Aut (Freyberg, D)

**CEE 266B. Floods and Droughts, Dams and Aqueducts**

(Same as CEE 166B) Sociotechnical systems associated with human use of water as a resource and the hazards posed by too much or too little water. Potable and non-potable water use and conservation. Irrigation, hydroelectric power generation, rural and urban water supply systems, storm water management, flood damage mitigation, and water law and institutions. Emphasis is on engineering design. Prerequisite: 166A or equivalent. (Freyberg)

3 units, Win (Freyberg, D)

**CEE 266C. Advanced Topics in Hydrology and Water Resources**

Graduate seminar. Focus is on one or more hydrologic processes or water resources systems. Topics vary based on student and instructor interest. Examples include freshwater wetland hydrology, watershed-scale hydrologic modeling, renaturalization of stream channels, reservoir sediment management, and dam removal. Enrollment limited. Prerequisites: 266A,B, or equivalents. Recommended: 260A or equivalent.

3 units, not given this year

**CEE 266D. Water Resources and Water Hazards Field Trips**

(Same as CEE 166D) Introduction to water use and water hazards via weekly field trips to local and regional water resources facilities (dams, reservoirs, fish ladders and hatcheries, pumping plants, aqueducts, hydropower plants, and irrigation systems) and flood damage mitigation facilities (storm water detention ponds, channel modifications, flood control dams, and reservoirs). Each trip preceded by an orientation lecture.

2 units, Win (Freyberg, D)

**CEE 268. Groundwater Flow**

Flow and mass transport in porous media. Applications of potential flow theory and numerical modeling methods to practical groundwater problems: flow to and from wells, rivers, lakes, drainage ditches; flow through and under dams; streamline tracing; capture zones of wells; and mixing schemes for in-situ remediation. Prerequisites: calculus and introductory fluid mechanics.

3-4 units, not given this year

**CEE 269. Environmental Fluid Mechanics and Hydrology Seminar**

Problems in all branches of water resources. Talks by visitors, faculty, and students. May be repeated two times for credit.

1 unit, Aut (Staff), Win (Staff), Spr (Kitanidis, P)

**CEE 270. Movement and Fate of Organic Contaminants in Waters**

Transport of chemical constituents in surface and groundwater including advection, dispersion, sorption, interphase mass transfer, and transformation; impacts on water quality. Emphasis is on physicochemical processes and the behavior of hazardous waste contaminants. Prerequisites: undergraduate chemistry and calculus. Recommended: 101B.

3 units, Aut (Luthy, R), Sum (Staff)

**CEE 271A. Physical and Chemical Treatment Processes**

Physical and chemical unit operations for water treatment, emphasizing process combinations for drinking water supply. Application of the principles of chemistry, rate processes, fluid dynamics, and process engineering to define and solve water treatment problems by flocculation, sedimentation, filtration, disinfection, oxidation, aeration, and adsorption. Investigative paper on water supply and treatment. Prerequisites: 101B, 270. Recommended: 273.

3 units, Win (Luthy, R)

**CEE 271B. Environmental Biotechnology**

Stoichiometry, kinetics, and thermodynamics of microbial processes for the transformation of environmental contaminants. Design of dispersed growth and biofilm-based processes. Applications include treatment of municipal and industrial waste

waters, detoxification of hazardous chemicals, and groundwater remediation. Prerequisites: 270; 177 or 274A or equivalents.

*4 units, Win (Criddle, C)*

**CEE 271D. Introduction to Wastewater Treatment Process Modeling**

The course will present a structured protocol for simulator application comprising project definition, data collection and reconciliation, model set-up, calibration and validation, and simulation and result interpretation. This course will include a series of guided simulation exercises evaluating resource consumption (e.g., electrical energy, natural gas, chemicals) and resource recovery (e.g., biogas, struvite, biosolids, recycled water) from a variety of treatment plant configurations. Coursework for all students will comprise guided simulation exercises begun in class. Students may elect to take the course for 2 units by completing a group project evaluating an assigned plant configuration and presenting the results before the class.

*2-3 units, Spr (Appleton, A; Ong, C)*

**CEE 271E. Environmental Challenges and Policies in Europe**

(Same as CEE 171E) Current and future environmental challenges in Europe and related public policies in the European Union (EU). State of the European environment and human development, European environmental policy-making (multi-level ecological governance), global ecological role of the EU. Specific challenges include climate change adaptation, mitigation (carbon taxes, carbon market), climate change and European cities, biodiversity and ecosystems preservation (economics of biodiversity), energy management. Specific policies include environmental justice (environmental inequalities), human development and environmental sustainability indicators (beyond GDP) and absolute and relative decoupling (carbon intensity and resource productivity improvement). Open to undergraduates (freshmen, sophomores, juniors and seniors) as CEE 171E.

*3 units, Sum (Staff)*

**CEE 271M. Transport Phenomena: Momentum, heat and mass transport**

(Same as CEE 371M) Heat, mass and momentum transfer theory from the viewpoint of basic transport equations. Steady and unsteady state; laminar and turbulent flow; boundary layer theory. Prerequisites: fluid mechanics, ordinary differential equations.

*3 units, Win (Staff)*

**CEE 272. Coastal Contaminants**

Coastal pollution and its effects on ecosystems and human health. The sources, fate, and transport of human pathogens and nutrients. Background on coastal ecosystems and coastal transport phenomena including tides, waves, and cross shelf transport. Introduction to time series analysis with MATLAB. Undergraduates require consent of instructor.

*3-4 units, Aut (de Sieres, N; Null, K)*

**CEE 272R. Modern Power Systems Engineering**

Focus is on Power Engineering from a systems point of view. Topics covered may include modeling of generation, transmission and distribution systems, load flow analysis, transient and steady-state stability analysis. Special emphasis given to modern market operations and dispatch, modeling intermittent controllable power sources, storage technologies, mechanisms for demand response, sensing the grid and the role of market mechanisms for deep integration. Course content may vary year to year.

*3 units, Spr (Rajagopal, R)*

**CEE 272S. Technology and business strategies to reduce greenhouse gas emissions**

(Same as CEE 172S) This course will introduce the main concepts of greenhouse gas (GHG) emissions measurement and management, and it will explore the main mitigation options for reducing emissions or sequestering carbon dioxide. It will address technical aspects of GHG mitigation via energy efficiency and demand-side management, energy in high-technology industry, distributed power and co-generation, the role of renewable energy in GHG management, carbon sequestration in forestry, agriculture, and geological formations. The course explores policy options, carbon trading and business strategies for GHG mitigation.

*1-3 units, Spr (Swisher, J)*

**CEE 272W. Wind Power project Development**

Introduction to wind power resource assessment and project

development. Topics include the dynamics of large-scale and small-scale wind systems, vertical scaling of winds in the boundary layer, measurement instruments used for resource assessments, wind turbine technology, and wind farm siting, planning and economics. Analysis methods of wind data, use of industry-standard software for optimizing turbine siting and project feasibility studies. Project work using existing resource assessment from local areas. Prerequisite: Math41/42 or equivalent. Limited enrollment.

*1 unit, not given this year*

**CEE 273. Aquatic Chemistry**

Chemical principles and their application to the analysis and solution of problems in aqueous geochemistry (temperatures near 25° C and atmospheric pressure). Emphasis is on natural water systems and the solution of specific chemical problems in water purification technology and water pollution control. Prerequisites: CHEM 31 and 33, or equivalents.

*3 units, Aut (Leckie, J)*

**CEE 273A. Water Chemistry Laboratory**

(Same as CEE 179A) (Graduate students register for 273A.) Laboratory application of techniques for the analysis of natural and contaminated waters, emphasizing instrumental techniques.

*3 units, Win (Robertson, A)*

**CEE 273C. Introduction to Membrane Technology for Water/Wastewater Treatment**

Membrane separation processes focusing on their use for water and wastewater purification. Topics will include membrane types and materials; transport across and rejection by membranes; membrane fouling, cleaning and degradation; and design and operation of membrane systems.

*1 unit, not given this year*

**CEE 273S. Chemical Transformation of Environmental Organic Compounds**

This course provides an introduction to the chemistry of organic compounds focusing on chemical transformation and the application of this knowledge to understand and predict the fate of environmentally relevant organic chemicals. The course will cover fundamental rules that govern chemical transformations of organic compounds and will familiarize students with the major physical/chemical factors influencing the kinetics of organic reactions in nature. Prerequisites: CEE 270

*3 units, not given this year*

**CEE 274A. Environmental Microbiology I**

(Same as CHEMENG 174, CHEMENG 274) Basics of microbiology and biochemistry. The biochemical and biophysical principles of biochemical reactions, energetics, and mechanisms of energy conservation. Diversity of microbial catabolism, flow of organic matter in nature: the carbon cycle, and biogeochemical cycles. Bacterial physiology, phylogeny, and the ecology of microbes in soil and marine sediments, bacterial adhesion, and biofilm formation. Microbes in the degradation of pollutants. Prerequisites: CHEM 33, 35, and BIOSCI 41, CHEMENG 181 (formerly 188), or equivalents.

*3 units, Aut (Spormann, A), Sum (Staff)*

**CEE 274B. Metabolic Biochemistry of Microorganisms**

(Same as CHEMENG 456) Microbial metabolism, biochemical and metabolic principles, unity and diversity of metabolic pathways, evolution of enzymes and metabolic pathways, microbial degradation of natural and anthropogenic organic compounds, predicting biodegradation, and metabolic origin of life.

*3 units, Win (Spormann, A)*

**CEE 274C. Microbial Ecology and Evolution**

(Same as CHEMENG 457) Structure/function relationship of microbial communities; metabolic and ecological basis of interactions in microbial communities; microbial ecology and population biology in natural and human host systems; and evolution of microbial life. Prerequisite: CEE 274A, CHEMENG 281 (formerly 288), or equivalent.

*3 units, not given this year*

**CEE 274D. Pathogens and Disinfection**

Introduction to epidemiology, major pathogens and infectious diseases, the immune system, movement and survival of pathogens in the environment, transfer of virulence and antibiotic resistance

genes, and pathogen control, with an emphasis on public health engineering measures (disinfection). Prerequisite: 274A.

*3 units, Spr (Criddle, C)*

#### **CEE 274E. Pathogens in the Environment**

Sources, fates, movement, and ecology of waterborne pathogens in the natural environment and disinfection systems; epidemiology and microbial risk assessment. No microbiology background required; undergraduates may enroll with consent of instructor.

*3 units, not given this year*

#### **CEE 274P. Environmental Health Microbiology Lab**

Microbiology skills including culture-, microscope-, and molecular-based detection techniques. Focus is on standard and EPA-approved methods to enumerate and isolate organisms used to assess risk of enteric illnesses, such as coliforms, enterococci, and coliphage, in drinking and recreational waters including lakes, streams, and coastal waters. Student project to assess the microbial water quality of a natural water. Limited enrollment; priority to CEE graduate students. An application form must be filed and approved before admission to the class.

*4 units, Spr (Boehm, A)*

#### **CEE 274S. Hopkins Microbiology Course**

(Same as BIO 274S, BIOHOPK 274, EESS 253S) (Formerly GES 274S.) Four-week, intensive. The interplay between molecular, physiological, ecological, evolutionary, and geochemical processes that constitute, cause, and maintain microbial diversity. How to isolate key microorganisms driving marine biological and geochemical diversity, interpret culture-independent molecular characterization of microbial species, and predict causes and consequences. Laboratory component: what constitutes physiological and metabolic microbial diversity; how evolutionary and ecological processes diversify individual cells into physiologically heterogeneous populations; and the principles of interactions between individuals, their population, and other biological entities in a dynamically changing microbial ecosystem. Prerequisites: CEE 274A,B, or equivalents.

*9-12 units, Sum (Staff)*

#### **CEE 275A. California Coast: Science, Policy, and Law**

(Same as CEE 175A, EARTHSYS 175, EARTHSYS 275) Same as LAW 514. Interdisciplinary. The legal, science, and policy dimensions of managing California's coastal resources. Coastal land use and marine resource decision making. The physics, chemistry, and biology of the coastal zone, tools for exploring data from the coastal ocean, and the institutional framework that shapes public and private decision making. Field work: how experts from different disciplines work to resolve coastal policy questions. Primarily for graduate students; upper-level undergraduates may enroll with permission of instructor. Students will be expected to participate in at least three mandatory field trips.

*3-4 units, alternate years, not given this year*

#### **CEE 275B. Process Design for Environmental Biotechnology**

Use of microbial bioreactors for degradation of contaminants and recovery of clean water, clean energy and/or green materials. Student teams design, operate, and analyze bioreactors and learn to write consulting style reports. Limited enrollment. Prerequisites: 271B

*3 units, not given this year*

#### **CEE 276. Introduction to Human Exposure Analysis**

(Same as CEE 178) (Graduate students register for 276.) Scientific and engineering issues involved in quantifying human exposure to toxic chemicals in the environment. Pollutant behavior, inhalation exposure, dermal exposure, and assessment tools. Overview of the complexities, uncertainties, and physical, chemical, and biological issues relevant to risk assessment. Lab projects. Recommended: MATH 51. Apply at first class for admission.

*3 units, Spr (Kopperud, R), Sum (Staff)*

#### **CEE 276E. Environmental Toxicants**

Chemicals in the environment that pose toxicity risk. Introduction to environmental toxicology principles for identifying and characterizing toxicants based on sources, properties, pathways, and toxic action. Past and present environmental toxicant issues.

*2-3 units, not given this year*

#### **CEE 276F. Energy Systems Field Trips: China Energy Systems**

(Same as CEE 176F) Energy resources and policies in use and under development in China. 12-day field trip to China during

Spring Break 2012. One unit for seminar and readings; one unit for field trip. Tuesday section is required for all students, Thursday section is also required for students attending the field trip. Prerequisite: consent of instructor for field trip.

*1-2 units, Win (Knapp, K)*

#### **CEE 276S. Instrumental Analysis of Microconstituents in the Environment**

(Same as CEE 176S) Current research, practice, and thinking in environmental engineering and science. Featuring presentations by invited faculty, researchers and professionals to share their insight and perspectives on environmental issues. Students will prepare brief summaries of seminar presentations and associated readings. For 2-unit option, students will also prepare and give a short presentation on a relevant environmental topic.

*3 units, Sum (Staff)*

#### **CEE 277A. Teaching Science Literacy for a Sustainable Society**

Teaching science to nontechnical audiences emphasizing technologies and science for the sustainable use of water. Guest lecturers. Learning styles, and the role of engineers and scientists in K-12 and media communication. Students develop teaching modules to be used in educational settings involving nontechnical audiences.

*2-4 units, not given this year*

#### **CEE 277C. Environmental Governance**

Interaction between private, public and civil sectors in decision making that effects environmental sustainability. Governance on global to local scales, US and international case studies. Theoretical concepts of environmental policy design and implementation: common property and collective action, social movements and locally unwanted land uses, sustainable cities, ecological modernization, shifts in corporate environmental norms, ISO 14001 and green supply chains, and global institutions for constraining carbon emissions. Limited enrollment.

*3 units, alternate years, not given this year*

#### **CEE 277D. Water, Health & Development in Africa**

Graduate seminar focused on emerging research in the areas of water supply, sanitation, hygiene and health in developing countries. Limited enrollment; instructor permission required.

*1 unit, Spr (Boehm, A; Davis, J)*

#### **CEE 277E. Advanced Field Methods in Water, Health and Development**

Field methods for assessing household stored water quality, hand contamination, behaviors, and knowledge related to water, sanitation and health. Limited enrollment. Instructor consent required.

*10-15 units, Aut (Staff), Win (Davis, J), Spr (Staff)*

#### **CEE 277K. Environmental Information Engineering**

The role of information technology (IT) in enabling mankind to understand its impact on the planet and balance that with improving the quality of life of a rapidly growing population. After surveying the field, the course will examine the specific impacts that IT may have, by reference to case studies from energy, transportation, water and urban design fields. While some specific information technologies will be examined, this will be from a business perspective - detailed technical knowledge of IT not required.

*2-3 units, Sum (Staff)*

#### **CEE 277S. Design for a Sustainable World**

(Same as CEE 177S) Technology-based problems faced by developing communities worldwide. Student groups partner with organizations abroad to work on concept, feasibility, design, implementation, and evaluation phases of various projects. Past projects include a water and health initiative, a green school design, seismic safety, and medical device. Admission based on written application and interview. See <http://esw.stanford.edu> for application. (Staff)

*1-5 units, Spr (Tsoufakis, C)*

#### **CEE 277X. Current Topics in Sustainable Engineering**

(Same as CEE 177X) Weekly seminar course run by Engineers for Sustainable World (ESW) student group in conjunction with faculty advisors. Speakers come in weekly to orient students to the science and engineering that is the foundation for current ESW projects. Instructor consent required.

*1 unit, not given this year*

**CEE 278A. Air Pollution Physics and Chemistry**

The sources and health effects of pollutants. The influence of meteorology on pollution: atmospheric energy balance, temperature profiles, stability classes, inversion layers, turbulence. Atmospheric diffusion equations, downwind dispersion of emissions from point and line sources. Tropospheric chemistry: mechanisms for ozone formation, photochemical reactions, radical chain mechanisms, heterogeneous chemical reactions. Prerequisites: MATH 51, CHEM 31, or equivalents. Recommended: 101B, 273 or CHEM 135, or equivalents.

*3 units, Aut (Hildemann, L)*

**CEE 278B. Atmospheric Aerosols**

The characterization of atmospheric particulate matter: size distributions, chemical composition, health effects. Atmospheric diffusion and transport of particles: removal by convection, impaction, gravitational settling. Effect of aerosols on visibility: light scattering and absorption, reduction of visual range. Mechanics influencing ambient size distributions: Brownian coagulation, laminar shear flow, homogeneous nucleation, heterogeneous condensation. Prerequisite: MATH 51, or equivalent. Recommended: 101B or equivalent.

*3 units, alternate years, not given this year*

**CEE 278C. Indoor Air Quality**

(Same as CEE 172A) Factors affecting the levels of air pollutants in the built indoor environment. The influence of ventilation, office equipment, floor coverings, furnishings, cleaning practices, and human activities on air quality including carbon dioxide, VOCs, resuspended dust, and airborne molds and fungi. Recommended: 172 or 278A.

*2-3 units, Spr (Hildemann, L)*

**CEE 279. Environmental Engineering Seminar**

Current research, practice, and thinking in environmental engineering and science. Attendance at seminars is self-directed, and may be accrued throughout the school year.

*1 unit, Aut (Hildemann, L), Win (Hildemann, L), Spr (Hildemann, L)*

**CEE 279S. Environmental Engineering Seminar**

(Same as CEE 179S) Current research, practice, and thinking in environmental engineering and science. Special summer edition features presentations by invited speakers and enrolled students. Students will prepare and give two short presentations, and will be provided feedback on presentation skills. For 2-unit option, students will write seminar summaries of presentations by two invited speakers.

*1-2 units, Sum (Staff)*

**CEE 280. Advanced Structural Analysis**

Theoretical development and computer implementation of direct stiffness method of structural analysis; virtual work principles; computation of element stiffness matrices and load vectors; direct assembly procedures; equation solution techniques. Analysis of two- and three-dimensional truss and frame structures, thermal loads, and substructuring and condensation techniques for large systems. Practical modeling techniques and programming assignments. Introduction to nonlinear analysis concepts. Prerequisites: elementary structural analysis and matrix algebra.

*3-4 units, Aut (Deierlein, G)*

**CEE 281. Mechanics and Finite Elements**

Fluid conduction and solid deformation; conservation laws: balance of mass and balance of momentum; generalized Darcy's law and Hooke's law in 3D; the use of tensors in mechanics; finite element formulation of boundary-value problems; variational equations and Galerkin approximations; basic shape functions, numerical integration, and assembly operations.

*3 units, Win (Borja, R)*

**CEE 282. Nonlinear Structural Analysis**

Introduction to methods of geometric and material nonlinear analysis, emphasizing modeling approaches for framed structures. Large-displacement analysis, concentrated and distributed plasticity models, and nonlinear solution methods. Applications to frame stability and performance-based seismic design. Assignments emphasize computer implementation and applications. Prerequisites: 280, 286 or equivalent.

*3-4 units, Win (Deierlein, G)*

**CEE 283. Structural Dynamics**

Vibrations and dynamic response of simple structures under time dependent loads; dynamic analysis of single and multiple degrees of freedom systems; support motion; response spectra.

*3-4 units, Win (Law, K)*

**CEE 284. Finite Element and Computational Methods in Structural Dynamics**

Computational methods for structural dynamics analysis of discrete and continuous systems in free and forced vibration; finite element formulation; modal analysis; numerical methods; introduction to nonlinear dynamics; advanced topics. Prerequisites: 280, 283.

*3-4 units, Spr (Law, K)*

**CEE 285. Behavior of Structural Systems for Buildings**

Basic design concepts, performance criteria, loading, methods of design, types of structural systems, behavior under gravity and lateral loads, approximate methods of analysis, preliminary conceptual design, performance assessment, behavior of structural elements. Prerequisites: basic courses in design of steel and reinforced concrete structures.

*3-4 units, not given this year*

**CEE 285A. Advanced Structural Concrete Behavior and Design**

Behavior and design of reinforced and prestressed concrete for building and bridge design. Emphasis on flexural behavior, prestressed concrete design, slender columns, and two-way slab design & analysis.

*3-4 units, Aut (Billington, S)*

**CEE 285B. Advanced Structural Steel Behavior and Design**

Advanced topics in structural steel design. Topics include composite floor systems; bolted and welded connections; beam-column connections; innovative lateral load resisting systems. As part of this course students design a 15-story steel building. Prerequisite: basic course in structural steel design CEE181 or equivalent.

*3-4 units, Aut (Miranda, E)*

**CEE 286. Behavior and Design of Structural Systems**

Basic design concepts, performance criteria, loading, methods of design, behavior of various types of structural systems under gravity and lateral loads, approximate methods of analysis, preliminary conceptual design of structural elements. Prerequisites: CEE 280. Recommended: CEE 285A and/or CEE 285B.

*3-4 units, Win (Miranda, E)*

**CEE 287. Earthquake Resistant Design and Construction**

Evaluation, design, and construction of structures in seismic regions. Factors influencing earthquake ground motions, design spectra, design of linear and nonlinear single- and multiple-degree-of-freedom-system structures, force-based and displacement-based design methods, capacity design, detailing and construction of steel and reinforced concrete structures, introduction to performance-based design, seismic isolation, and energy dissipation. Prerequisites: 283, 285. Recommended: 282, 288.

*3-4 units, Spr (Miranda, E)*

**CEE 288. Earthquake Hazard and Risk Analysis**

Earthquake phenomena, faulting, ground motion, earthquake hazard formulation, effects of earthquakes on manmade structures, response spectra, Fourier spectra, soil effects on ground motion and structural damage, methods for structural damage evaluation, and formulation of the performance-based earthquake engineering problems. Prerequisites: 203, 283.

*3-4 units, Win (Kiremidjian, A)*

**CEE 289. Random Vibrations**

Introduction to random processes. Correlation and power spectral density functions. Stochastic dynamic analysis of multi-degree-of-freedom structures subjected to stationary and non-stationary random excitations. Crossing rates, first-excursion probability, and distributions of peaks and extremes. Applications in earthquake, wind, and ocean engineering. Prerequisite: 203 or equivalent.

*3-4 units, not given this year*

**CEE 290. Structural Performance and Failures**

Basic concepts in the definition of satisfactory structural performance; key elements in structural performance; types of failures, ranging from reduced serviceability to total collapse;

failure sources and their root cause allocation, emphasizing design/construction process failures; failure prevention mechanisms; illustration with real life examples.

2 units, Spr (Moncarz, P)

### CEE 293. Foundation Engineering

Types, characteristics, analysis, and design of shallow and deep foundations; rigid and flexible retaining walls; braced excavations; settlement of footings in sands and clays; slope stability analysis by method of slices including search algorithms for the critical slip surface. Prerequisite: 101C or equivalent.

3 units, Win (Wren, J)

### CEE 294. Computational Poromechanics

Continuum and finite element formulations of steady-state and transient fluid conduction problems on geomechanics; elliptic, parabolic, and hyperbolic systems; variational inequality and free-boundary problems; three-dimensional consolidation theory; undrained condition, mesh locking, B-bar and strain projection methods; finite element formulations of multiphase dynamic problems. Computing assignments. Prerequisite: CEE 281 or equivalent.

3 units, Spr (Borja, R)

### CEE 295. Plasticity Modeling and Computation

Theory of plasticity; micromechanical basis; classical yield models; return-mapping algorithm; multi-surface and bounding surface models; material instabilities; localization and bifurcation. Prerequisite: CEE 281 or equivalent.

3 units, not given this year

### CEE 296. Special Topics in Fluid-Solid Interactions

Civil, mechanical, and biomedical engineering. Topics include surge and wave impact on structures, tsunami induced sediment transport and scour, wave-soil interactions, dam-reservoir-foundation interactions, shock and blast loads on composite structures, hydroelastic tailoring of composite structures, and blood-vessel interactions. Term project.

2 units, not given this year

### CEE 297. Issues in Geotechnical and Environmental Failures

Causes and consequences of the failure of buildings, earth structures, waste storage, and high hazard facilities in contact with the environment; technical, ethical, economic, legal, and business aspects; failure analysis and forensic problems; prevention, liability, and dispute management. Case histories including earthquake, flood, and hazardous waste facilities. Student observation, participation in active lawsuits where possible.

3 units, not given this year

### CEE 297M. Managing Critical Infrastructure Seminar

Safe and effective performance of infrastructure systems is critical to our economy, quality of life and safety. The seminar will present and discuss topics associated with risk analysis and management of critical civil infrastructure systems, including notions of acceptable risk. Discuss lessons learned from Hurricane Katrina and elsewhere which dictate the need for changes to how infrastructure systems are analyzed, designed and operated. Guest speakers. Student presentations.

1 unit, Spr (McCann, M)

### CEE 297R. Structural Geology and Rock Mechanics

(Same as GES 215, GEOPHYS 251) Quantitative field and laboratory data integrated with solutions to boundary value problems of continuum mechanics to understand tectonic processes in Earth's crust that lead to the development of geological structures including folds, faults, fractures and fabrics. Topics include: techniques and tools for structural mapping; differential geometry to characterize structures; dimensional analysis and scaling relations; kinematics of deformation and flow; traction and stress analysis, conservation of mass and momentum in a deformable continuum; linear elastic deformation and elastic properties; brittle deformation including fracture and faulting; model development and methodology. Data sets analyzed using MATLAB. Prerequisites: GES 1, MATH 53, MATLAB or equivalent.

4 units, Aut (Pollard, D)

### CEE 298. Structural Engineering and Geomechanics Seminar

Recommended for all graduate students. Lectures on topics of current interest in professional practice and research.

1 unit, Win (Baker, J)

### CEE 299. Independent Study in Civil Engineering

Directed study for graduate students on subjects of mutual interest to students and faculty. Student must obtain faculty sponsor.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### CEE 299S. Independent Project in Civil and Environmental Engineering

Prerequisite: consent of instructor.

1-4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### CEE 300. Thesis (Engineer Degree)

Research by Engineer candidates.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### CEE 301. The Energy Seminar

(Same as ENERGY 301) Interdisciplinary exploration of current energy challenges and opportunities, with talks by faculty, visitors, and students. May be repeated for credit.

1 unit, Aut (Benson, S), Win (Benson, S), Spr (Benson, S)

### CEE 305. Damage and Failure Mechanics of Structural Systems

Examine the mechanics and failure mechanisms of structural deterioration mechanisms and hazards. Overview of fracture mechanics concepts as a general basis for analyzing brittle failure modes in steel and concrete structures. Analysis and design theory for corrosion, fatigue, fire and other damage mechanisms in steel and concrete structures. New methods for mitigation of these failure modes and hazards will be introduced, including new construction materials, structural designs and protection methods.

3-4 units, Spr (Lepech, M)

### CEE 316. Sustainable Built Environment Research

Covers Ph.D. candidacy requirements of industry problem analysis and critical literature review for post-MS students conducting research on sustainable planning, design, management, and operation of buildings and infrastructure. Identify industry problems and related research questions. Design experiments and research methods for: ethnographies, case studies, surveys, classical experiments mathematical and computational simulations. Overview of statistical methods for data analysis. Publication strategies.

3-4 units, not given this year

### CEE 320. Integrated Facility Engineering

Individual and group presentations on goals, research, and state-of-practice of virtual design and construction in support of integrated facility engineering, including objectives for the application and further development of virtual design and construction technologies. May be repeated for credit.

1 unit, Aut (Kunz, J), Win (Fischer, M; Kunz, J), Spr (Kunz, J)

### CEE 321. Formal Models for Design

Theories, methods, and formal systems to support the design of buildings. Academic and industrial frameworks to represent and manage the products, organizations, and processes of building projects. May be repeated for credit.

3 units, not given this year

### CEE 342. Computational Modeling of Organizations

For post-M.S. students interested in formal techniques for organization design. Computer simulations of organizations are used to conduct virtual experiments for developing organization theory or to analyze the performance of virtual organizations with different structures and decision support and communication technologies. Research on computational modeling and design of real-world organizations. Paper serves as a research proposal. Prerequisite: 242 or equivalent introductory organization design class.

4 units, not given this year

### CEE 345. Game Theory Modeling in Engineering

Game theory involves the analysis of conflict, cooperation and communication, and is a novel and powerful tool for analyzing important issues in engineering management and engineering policy. Class will develop students' game theory skills in an applied context. Learn how to set up and solve fundamental game models and apply these skills to building new theories in engineering management through game theory modeling. Class illustrates the arts of game modeling by applying game theory in: (1) contracting and opportunistic bidding; (2) renegotiation in public-private partnerships; (3) partner selection strategies in

global projects; and (4) knowledge management and sharing. Students are encouraged to apply game theory to their own research issues or disciplines, and extend their term projects into research papers or theses. Limited class size. Priority for CEE, IPER and MS&E students.

*2-3 units, not given this year*

#### **CEE 362. Numerical Modeling of Subsurface Processes**

Numerical modeling including: problem formulation, PDEs and weak formulations, and choice of boundary conditions; solution using the finite-element code COMSOL Multiphysics with a variety of solvers and pre- and postprocessing of data; and interpretation of results. Problems include: flow in saturated porous media with complex boundaries and heterogeneities; solute transport with common reaction models; effects of heterogeneity on dispersion, dilution, and mixing of solutes; variable-density flow and seawater intrusion; upscaling or coarsening of scale; and biofilm modeling. Enrollment limited to 5.

*3-4 units, alternate years, not given this year*

#### **CEE 362G. Stochastic Inverse Modeling and Data Assimilation Methods**

Stochastic methods for the solution of inverse problems that are algebraically underdetermined or have solutions that are sensitive to data. Emphasis is on geostatistical methods that, in addition to using data, incorporate information about structure such as spatial continuity and smoothness. Methods for real-time processing of new data. Prerequisite: consent of instructor.

*3-4 units, alternate years, not given this year*

#### **CEE 362H. Heterogeneity and Scale in Groundwater**

Geologic materials are complex and composite media, in the microscale, but modeled as continua at the macroscale. We examine how our understanding of processes and heterogeneity at the microscale support laws that describe fluxes and change of state variables at the macroscale. We study Darcy's law for porous media, Fickian dispersion, non-Fickian dispersion, dilution of solutes, and mixing of reactants under mass transfer (diffusional) limitations. We use mathematical tools such as homogenization theories and stochastic analysis to find relations among macroscopic quantities. To be taught in Winter, alternate years starting 2011-2012.

*3-4 units, Win (Kitanidis, P)*

#### **CEE 363A. Mechanics of Stratified Flows**

The effects of density stratification on flows in the natural environment. Basic properties of linear internal waves in layered and continuous stratification. Flows established by internal waves. Internal hydraulics and gravity currents. Turbulence in stratified fluids. Prerequisites: 262A,B, CME 204.

*3 units, Aut (Fong, D)*

#### **CEE 363C. Ocean and Estuarine Modeling**

Advanced topics in modeling for ocean and estuarine environments, including methods for shallow water, primitive, and nonhydrostatic equations on Cartesian, curvilinear, and unstructured finite-volume grid systems. Topics include free-surface methods, nonhydrostatic solvers, and advanced Eulerian and Lagrangian advection techniques. Focus is on existing techniques and code packages, and their methodologies, including POM, ROMS, TRIM, ELCOM, and SUNTANS. Prerequisites: CME 200, 206, or equivalents.

*3 units, not given this year*

#### **CEE 363F. Oceanic Fluid Dynamics**

(Same as EESS 363F) Dynamics of rotating stratified fluids with application to oceanic flows. Topics include: inertia-gravity waves; geostrophic and cyclogeostrophic balance; vorticity and potential vorticity dynamics; quasi-geostrophic motions; planetary and topographic Rossby waves; inertial, symmetric, barotropic and baroclinic instability; Ekman layers; and the frictional spin-down of geostrophic flows. Prerequisite: CEE 262A or a graduate class in fluid mechanics.

*3 units, Spr (Thomas, L)*

#### **CEE 363G. Field Techniques in Coastal Oceanography**

This course focuses on the design and implementation of coastal oceanographic field studies from implementation through analysis. A wide range of field instrumentation and techniques, including AUVs and scientific diving is covered. Field studies. Data collection and analysis under instructor guidance.

*3 units, Spr (Woodson, C)*

#### **CEE 363H. Topics in Stratified Turbulence**

An exploration of classical and current papers dealing with the behavior of turbulence in stratified environments. This is a seminar-style class where each student will be expected to make presentations and lead discussions during the course of the quarter. Enrollment is limited and is based on the consent of the instructor. Prerequisites -- graduate coursework in turbulence and stratified flows.

*2 units, Win (Koseff, J)*

#### **CEE 364Y. Advanced Topics in Coastal Oceanography**

The dynamics and transport implications of features in estuaries and coastal oceans characterized by sharp gradients: fronts, interfaces, and layers. Analytic framework to describe the formation, maintenance, and dissipation of such features. Examples include tidal mixing fronts, buoyant plume fronts and tidal intrusions, biological thin layers, and axial convergent fronts. Second unit for students who give a presentation.

*1-2 units, not given this year*

#### **CEE 365A. Advanced Topics in Environmental Fluid Mechanics and Hydrology**

Students must obtain a faculty sponsor.

*2-6 units, Aut (Staff)*

#### **CEE 365B. Advanced Topics in Environmental Fluid Mechanics and Hydrology**

Students must obtain a faculty sponsor.

*2-6 units, Win (Staff)*

#### **CEE 365C. Advanced Topics in Environmental Fluid Mechanics and Hydrology**

Students must obtain a faculty sponsor.

*2-6 units, Spr (Staff)*

#### **CEE 365D. Advanced Topics in Environmental Fluid Mechanics and Hydrology**

Students must obtain a faculty sponsor.

*2-6 units, Sum (Staff)*

#### **CEE 370A. Environmental Research**

Introductory research experience for first-year Ph.D. students in the Environmental Engineering and Science program. 15-18 hours/week on research over three quarters. 370A requires written literature survey on a research topic; 370B requires oral presentation on experimental techniques and research progress; 370C requires written or oral presentation of preliminary doctoral research proposal. Students must obtain a faculty sponsor.

*5-6 units, Aut (Staff)*

#### **CEE 370B. Environmental Research**

Introductory research experience for first-year Ph.D. students in the Environmental Engineering and Science program. 15-18 hours/week on research over three quarters. 370A requires written literature survey on a research topic; 370B requires oral presentation on experimental techniques and research progress; 370C requires written or oral presentation of preliminary doctoral research proposal. Students must obtain a faculty sponsor.

*5-6 units, Win (Staff)*

#### **CEE 370C. Environmental Research**

Introductory research experience for first-year Ph.D. students in the Environmental Engineering and Science program. 15-18 hours/week on research over three quarters. 370A requires written literature survey on a research topic; 370B requires oral presentation on experimental techniques and research progress; 370C requires written or oral presentation of preliminary doctoral research proposal. Students must obtain a faculty sponsor.

*5-6 units, Spr (Staff)*

#### **CEE 370D. Environmental Research**

Introductory research experience for first-year Ph.D. students in the Environmental Engineering and Science program. 15-18 hours/week on research over three quarters. 370A requires written literature survey on a research topic; 370B requires oral presentation on experimental techniques and research progress; 370C requires written or oral presentation of preliminary doctoral research proposal. Students must obtain a faculty sponsor.

*3-6 units, Sum (Staff)*

**CEE 371. Frontiers in Environmental Research**

How to evaluate environmental research.

1-2 units, Aut (Staff), Win (Staff), Spr (Staff)

**CEE 371M. Transport Phenomena: Momentum, heat and mass transport**

(Same as CEE 271M) Heat, mass and momentum transfer theory from the viewpoint of basic transport equations. Steady and unsteady state; laminar and turbulent flow; boundary layer theory. Prerequisites: fluid mechanics, ordinary differential equations.

3 units, Win (Staff)

**CEE 374A. Introduction to Physiology of Microbes in Biofilms**

Diversification of biofilm populations, control of gene expression in biofilm environments, and evolution of novel genetic traits in biofilms.

1-6 units, Aut (Spormann, A)

**CEE 374B. Introduction to Physiology of Microbes in Biofilms**

Diversification of biofilm populations, control of gene expression in biofilm environments, and evolution of novel genetic traits in biofilms.

1-6 units, Win (Staff)

**CEE 374C. Introduction to Physiology of Microbes in Biofilms**

Diversification of biofilm populations, control of gene expression in biofilm environments, and evolution of novel genetic traits in biofilms.

1-6 units, Spr (Staff)

**CEE 374D. Introduction to Physiology of Microbes in Biofilms**

Diversification of biofilm populations, control of gene expression in biofilm environments, and evolution of novel genetic traits in biofilms.

1-6 units, Sum (Staff)

**CEE 374S. Advanced Topics in Microbial Pollution**

May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut (Boehm, A), Win (Boehm, A), Spr (Boehm, A), Sum (Staff)

**CEE 374T. Advanced Topics in Coastal Pollution**

May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut (Boehm, A), Win (Boehm, A), Spr (Boehm, A), Sum (Staff)

**CEE 374U. Advanced Topics in Submarine Groundwater Discharge**

May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut (Boehm, A), Win (Boehm, A), Spr (Boehm, A), Sum (Staff)

**CEE 374V. Advanced Topics in Microbial Source Tracking**

May be repeated for credit. Prerequisite: consent of instructor.

1-5 units, Aut (Boehm, A), Win (Boehm, A), Spr (Boehm, A), Sum (Staff)

**CEE 374W. Advanced Topics in Water, Health and Development**

Advanced topics in water, health and development. Emphasis on low-and-middle-income countries. Class content varies according to interests of students. Instructor consent required.

1-6 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**CEE 374X. Advanced Topics in Multivariate Statistical Analysis**

Analysis of experimental and non-experimental data using multivariate modeling approaches. May be repeated for credit. Permission of instructor required for enrollment.

1-6 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**CEE 375. Advanced Methods in Pathogen Detection**

Molecular and culture-based techniques for pathogen detection in water.

2 units, not given this year

**CEE 377. Research Proposal Writing in Environmental Engineering and Science**

For first- and second-year post-master's students preparing for thesis defense. Students develop progress reports and agency-style research proposals, and present a proposal in oral form. Prerequisite: consent of thesis adviser.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**CEE 378. Statistical Analysis of Environmental Data: Tools****and Applications**

Preference to Environmental Engineering and Science Ph.D. students. Practical data analysis techniques applicable to environmental engineering. The role of statistics in data collection, experimental design, data exploration, and effective communication of results. Use of statistical packages such as Excel, Matlab, and R. Discussions partially based on student interest and available datasets. Topics may include summarizing data, hypothesis testing, nonparametric statistics, regression analysis, classification and regression trees, cluster analysis, and computationally intensive methods. Limited enrollment.

2-3 units, not given this year

**CEE 378D. Seminar of Statistical Analysis of Multidisciplinary Primary Data**

Practical management and analysis techniques for primary data collected in multidisciplinary projects. Selection of appropriate statistical tests, interpretation of results, and effective communication of findings to lay audiences. Univariate, bivariate and multivariate techniques, including hypothesis testing, nonparametric statistics, regression analysis and matching. Use of SPSS statistical package. Limited enrollment. Prerequisite: consent of instructor.

1-3 units, not given this year

**CEE 381. Advanced Engineering Informatics**

1-4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**CEE 385. Performance-Based Earthquake Engineering**

Synthesis and application of approaches to performance-based design and assessment that recently have been developed or are under development. Emphasis is on quantitative decision making based on life-cycle considerations that incorporate direct losses, downtime losses, and collapse, and the associated uncertainties. Hazard analysis, response simulation, damage and loss estimation, collapse prediction. Case studies. Prerequisites: 282, 287, and 288.

2-3 units, Aut (Krawinkler, H)

**CEE 398. Report on Civil Engineering Training**

On-the-job training under the guidance of experienced, on-site supervisors; meets the requirements for Curricular Practical Training for students on F-1 visas. Students submit a concise report detailing work activities, problems worked on, and key results. Prerequisite: qualified offer of employment and consent of adviser as per I-Center procedures.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**CEE 399. Advanced Engineering Problems**

Individual graduate work under the direction of a faculty member on a subject of mutual interest. Student obtain faculty sponsor. May be repeated for credit.

1-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**CEE 400. Thesis (Ph.D. Degree)**

For students who have successfully completed the department general qualifying examination. Research and dissertation for the Ph.D. degree.

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**CEE 801. TGR Project (Engineer Degree)**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**CEE 802. TGR Dissertation (PhD degree)**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## CLASSICS ART/ARCHAEOLOGY (CLASSART) COURSES

### UNDERGRADUATE COURSES IN CLASSICS ART/ARCHAEOLOGY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**CLASSART 21Q. Eight Great Archaeological Sites in Europe**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Focus is on excavation, features and finds, arguments over interpretation, and the place of each site in understanding the archaeological history of Europe. Goal is to introduce the latest

archaeological and anthropological thought, and raise key questions about ancient society. The archaeological perspective foregrounds interdisciplinary study: geophysics articulated with art history, source criticism with analytic modeling, statistics interpretation. A web site with resources about each site, including plans, photographs, video, and publications, is the basis for exploring. GER:DB-Hum

3-5 units, Aut (Shanks, M), Spr (Shanks, M)

**CLASSART 101. Archaic Greek Art**

(Same as ARTHIST 101, ARTHIST 301, CLASSART 201) The development of Greek art and culture from protogeometric beginnings to the Persian Wars, 1000-480 B.C.E. The genesis of a native Greek style; the orientalizing phase during which contact with the Near East and Egypt transformed Greek art; and the synthesis of East and West in the 6th century B.C.E. GER:DB-Hum

4 units, Aut (Maxmin, J)

**CLASSART 102. Empire and Aftermath: Greek Art from the Parthenon to Praxiteles**

(Same as ARTHIST 102, ARTHIST 302) The course explores the art and architecture of the Athenian Empire in the age of Pericles, and then considers the effects of civil war and plague on Greek art and society in the later 5th and early 4th centuries. GER:DB-Hum

4 units, Win (Maxmin, J)

**CLASSART 109. Greek Art In and Out of Context**

(Same as ARTHIST 203) The cultural contexts in which art served religious, political, commercial, athletic, sympotic, and erotic needs of Greek life.

4-5 units, Aut (Maxmin, J)

**CLASSART 110. Appropriations of Greek Art**

(Same as ARTHIST 204A) Upper division seminar. The history of the appropriation of Greek art by Rome, the Renaissance, Lord Elgin, and Manet. Enrollment limited to 6. Prerequisite: ARTHIST 102 or consent of instructor.

4-5 units, Spr (Maxmin, J)

**CLASSART 112. Ancient Urbanism**

(Same as CLASSART 212) Greek, Roman and early Islamic urbanisms are connected in important and revealing ways, though these three are not usually studied together. All three took shape in the same part of the world, the Mediterranean and western Asia. They emerged in succession, with the earlier cities and ideas still very much part of the landscape: Greek urbanism shaped Roman cities, many of which then became Islamic cities, with major features still intact and thriving. These three urbanisms were also very different, ranging from the ideals of the polis in ancient Greece, to the spread of cities all over the Roman Empire, to shared urban patterns in farflung parts of the Islamic world. Our goals in this course are 1) to learn about Greek, Roman and Islamic cities, primarily through archaeological evidence; including what cities looked like in each society and why, and what it was like to live in them; 2) to compare and contrast urban components in each society, and understand why these cities were si

4-5 units, Aut (Trimble, J)

**CLASSART 113. Ten Things: An Archaeology of Design**

(Same as CLASSART 213, STS 112) Connections among science, technology, society and culture by examining the design of a prehistoric hand axe, Egyptian pyramid, ancient Greek perfume jar, medieval castle, Wedgewood teapot, Edison's electric light bulb, computer mouse, Sony Walkman, supersonic aircraft, and BMW Mini. Interdisciplinary perspectives include archaeology, cultural anthropology, science studies, history and sociology of technology, cognitive science, and evolutionary psychology. GER:DB-SocSci

3-5 units, Aut (Shanks, M)

**CLASSART 114. Ceramics: Art and Science**

(Same as ARCHLGY 117) From clay to culture. Design, technology, manufacture, and consumption of ceramics. Guest lecturers, site visits, and hands-on studio work.

3-5 units, Spr (Shanks, M)

**GRADUATE COURSES IN CLASSICS ART/ARCHAEOLOGY**

Primarily for graduate students; undergraduates may enroll with

consent of instructor.

**CLASSART 201. Archaic Greek Art**

(Same as ARTHIST 101, ARTHIST 301, CLASSART 101) The development of Greek art and culture from protogeometric beginnings to the Persian Wars, 1000-480 B.C.E. The genesis of a native Greek style; the orientalizing phase during which contact with the Near East and Egypt transformed Greek art; and the synthesis of East and West in the 6th century B.C.E.

4 units, Aut (Maxmin, J)

**CLASSART 212. Ancient Urbanism**

(Same as CLASSART 112) Greek, Roman and early Islamic urbanisms are connected in important and revealing ways, though these three are not usually studied together. All three took shape in the same part of the world, the Mediterranean and western Asia. They emerged in succession, with the earlier cities and ideas still very much part of the landscape: Greek urbanism shaped Roman cities, many of which then became Islamic cities, with major features still intact and thriving. These three urbanisms were also very different, ranging from the ideals of the polis in ancient Greece, to the spread of cities all over the Roman Empire, to shared urban patterns in farflung parts of the Islamic world. Our goals in this course are 1) to learn about Greek, Roman and Islamic cities, primarily through archaeological evidence; including what cities looked like in each society and why, and what it was like to live in them; 2) to compare and contrast urban components in each society, and understand why these cities were si

4-5 units, Aut (Trimble, J)

**CLASSART 213. Ten Things: An Archaeology of Design**

(Same as CLASSART 113, STS 112) Connections among science, technology, society and culture by examining the design of a prehistoric hand axe, Egyptian pyramid, ancient Greek perfume jar, medieval castle, Wedgewood teapot, Edison's electric light bulb, computer mouse, Sony Walkman, supersonic aircraft, and BMW Mini. Interdisciplinary perspectives include archaeology, cultural anthropology, science studies, history and sociology of technology, cognitive science, and evolutionary psychology.

3-5 units, Aut (Shanks, M)

**CLASSART 322. Reception and Literacy in Roman Art**

(Same as ARTHIST 200C) Beyond a focus on artists and patrons: how Roman art was seen and understood by its contemporary viewers. Themes include memory, performance, gender, replication, and constructions of space. Goal is to draft a differentiated model of viewing and literacy, with attention to collective experience, hierarchy, access, and subversion.

5 units, Win (Trimble, J)

**CLASSICS GENERAL (CLASSGEN) COURSES**

**UNDERGRADUATE COURSES IN CLASSICS GENERAL**

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**CLASSGEN 6N. Antigone: From Ancient Democracy to Contemporary Dissent**

(F,Sem) (Same as DRAMA 12N) Stanford Introductory Seminar. Preference to freshmen. Tensions inherent in the democracy of ancient Athens; how the character of Antigone emerges in later drama, film, and political thought as a figure of resistance against illegitimate authority; and her relevance to contemporary struggles for women's and workers' rights and national liberation. Readings and screenings include versions of Antigone by Sophocles, Anouilh, Brecht, Fugard/Kani/Ntshona, Paulin, Glowacki, Gurney, and von Trotta. GER:DB-Hum, EC-Gender

4 units, Aut (Rehm, R; Miller, D)

**CLASSGEN 9. Greek and Latin Roots of English**

Goal is to improve vocabulary, comprehension of written English, and standardized test scores through learning the Greek and Latin components of English. Focus is on patterns and processes in the formation of the lexicon. Terminology used in medicine, business,

education, law, and humanities; introduction to principles of language history and etymology. Greek or Latin not required.

3 units, *Sum (Staff)*

**CLASSGEN 15. The Bible and Archaeology**

(Same as JEWISHST 15A, RELIGST 15A) An introduction to how archaeology has been used to illumine the Bible and biblical history. Did Abraham exist? Was there an Exodus? Did Joshua really conquer Canaan? What does archaeology reveal about ancient Israel beyond what is recorded in the Bible? This course will address such questions as it seeks to introduce biblical archaeology to students with no prior introduction to either the Bible or to archaeology.

4 units, *Spr (Lederman, Z)*

**CLASSGEN 18. Greek Mythology**

The heroic and divine in the literature, mythology, and culture of ancient Greece, together with its subsequent Roman versions. Illustrated lectures, with some attention to later receptions. Readings (in translation) include Homer, Hesiod, Euripides and Ovid. GER:DB-Hum

3-5 units, *Aut (Parker, G)*

**CLASSGEN 20N. Mapping the Mediterranean**

A sample of premodern material from among the various ways the Mediterranean sea and adjacent lands have been represented over the centuries. This will involve both maps in the conventional sense and also texts and documents (inscriptions and papyri). Much of the material involves actual travel. What kinds of power dynamics have been implicated in such representations? Texts will include extracts from Homer's *Odyssey*; the Hebrew Bible; ancient Egyptian literature; and the Hereford Mappa Mundi. GER:DB-Hum

4-5 units, *not given this year*

**CLASSGEN 24N. Sappho: Erotic Poetess of Lesbos**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Sappho's surviving fragments in English; traditions referring to or fantasizing about her disputed life. How her poetry and legend inspired women authors and male poets such as Swinburne, Baudelaire, and Pound. Paintings inspired by Sappho in ancient and modern times, and composers who put her poetry to music. GER:DB-Hum, EC-Gender

4-5 units, *Spr (Peponi, A)*

**CLASSGEN 35. Becoming Like God: An Introduction to Greek Ethical Philosophy**

This course investigates key ethical philosophies in classical Greece. After reading several Greek tragedies (representing traditional Greek values), we examine the Greek philosophers' rejection of this tradition and their radically new ethical theories. Socrates, Plato, and Aristotle offered different ethical theories, but they shared basic conceptions of goodness and happiness. They argued that we could become like gods by achieving philosophic wisdom. What kind of wisdom is this? How does it make us ethically good and supremely happy people? GER:DB-Hum, EC-EthicReas

3-5 units, *Spr (Nightingale, A)*

**CLASSGEN 37N. Socrates: Philosopher and Trickster**

(F,Sem) Stanford Introductory Seminar. Socrates claimed that he was not wise but always seeking for wisdom. Socrates aimed to achieve ethical knowledge. What kind of knowledge is this? We examine Greek myth, religion, and society in order to locate Socrates' philosophy in its cultural context. We investigate the trial and death of Socrates, his philosophic method, and his cunning philosophic strategies. We read Plato's dialogues, Greek tragedies and comedies to understand this cagey and complex philosopher. GER:DB-Hum, EC-EthicReas

3-5 units, *Win (Nightingale, A)*

**CLASSGEN 66. Herodotus**

For Ancient History field of study majors; others by consent of instructor. Close reading technique. Historical background to the Greco-Persian Wars; ancient views of empire, culture, and geography; the wars and their aftermath; ancient ethnography and historiography, including the first narrative of ancient Egypt. GER:DB-Hum

4-5 units, *OCCASIONAL*

**CLASSGEN 81. Philosophy and Literature**

(Same as COMPLIT 181, ENGLISH 81, FREGEN 181,

ITALGEN 181, GERGEN 181) Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4-5 units, *Win (Staff)*

**CLASSGEN 106. Priests, Prophets, and Kings: Religion and Society in Late Antique Iran**

(Same as CLASSGEN 206, RELIGST 209, RELIGST 309) From India to the Levant and from the Caspian Sea to the Arabian Peninsula, the Sasanian Empire (224-651 CE) was the dominant power in the Middle East till the advent of Islam. Diverse religious institutions and social practices of the Zoroastrians, Manicheans, Jews, and Christians in late antique Iran. Complex relationships between the Zoroastrian priesthood, the Sasanian monarchs, and these minority religions within the context of imperial rule. Profound religious and social changes that occurred with the Islamic conquests of Iran as well as examine the rich cultural continuities that survived from the Pre-Islamic past. GER:DB-Hum

4-5 units, *Aut (Vevaina, Y)*

**CLASSGEN 107. The Black Mediterranean: Greece, Rome and Antiquity**

(Same as AFRICAAM 107C, CSRE 107) Explore problems of race and ethnicity as viable criteria in studying ancient societies and consider the question, What is the Mediterranean?, in relation to premodern evidence. Investigate the role of blackness as a marker of ethnicity; the demography of slavery and its roles in forming social identities; and environmental determinism as a factor in ethnic and racial thinking. Consider Greek and Roman perspectives and behavior, and their impact on later theories of race and ethnicity as well as the Mediterranean as a whole. GER:EC-GlobalCom

4-5 units, *not given this year*

**CLASSGEN 109. Emperor, Explorer, and God: Alexander the Great in the Global Imagination**

(Same as RELIGST 109) Survey of the image of Alexander the Great from the Hellenistic world to the contemporary. We shall discuss the appropriation of Alexander's life and legend and examine his reception as both a divine and a secular figure in a variety of cultures both East and West. Students will engage with a variety of media including texts (primary and secondary) and images (statues, coins, mosaics, illuminated manuscripts, film, and TV) in the Hellenistic, Roman, Byzantine, Jewish, Islamic, Medieval, Renaissance, and Early Modern contexts. Finally, we will evaluate contemporary representations of Alexander in TV, film and popular culture, such as William Shatner's and Adam West's 1968 TV pilot, Oliver Stone's 2004 film, and Andy Warhol's Pop art. GER:DB-Hum

3 units, *Aut (Vevaina, Y)*

**CLASSGEN 117. Gender, Violence, and the Body in Ancient Religion**

The sex-gender system of ancient Greece. How did polarization of the sexes become a master metaphor for power struggles between husbands and wives, among men, and among parts of the self? How did religious activity, including drama, mitigate or intensify the stresses of living in a society polarized along gender lines? GER:DB-Hum, EC-Gender

3-4 units, *Spr (Gleason, M; Stephens, S)*

**CLASSGEN 123. Urban Sustainability: Long-Term Archaeological Perspectives**

(Same as CLASSGEN 223, URBANST 115) Comparative and archaeological view of urban design and sustainability. How fast changing cities challenge human relationships with nature. Innovation and change, growth, industrial development, the consumption of goods and materials. Five millennia of city life including Near Eastern city states, Graeco-Roman antiquity, the

Indus Valley, and the Americas.

3-5 units, *Aut (Shanks, M)*

**CLASSGEN 126. Judaism and Christianity in the Mediterranean World: Contact, Competition, and Conflict**

(Same as CLASSGEN 226, JEWISHST 226B, JEWISHST 326B, RELIGST 226B, RELIGST 326B) Jewish beginnings of Christianity in the first century C.E.; process of differentiation between various Jewish and Christian groups; effect of Roman-Jewish wars on Jewish and Christian identity formation; Jewish Christians, Christian Jews, and other heretics; rise of the discourse of orthodoxy and heresy; the emergence of the *Adversus Iudaeos* tradition; theology as a realm of mutual attraction and conflict. Readings include Epistles of Paul in the New Testament, Christian authors from Justin through Augustine, excerpts from Rabbinic Texts (Mishnah, Midrash and Talmud), along with current literature on religion, ethnicity, and identity in the Roman world. GER:DB-Hum

5 units, *not given this year*

**CLASSGEN 126B. Jewish-Christian Relations in Antiquity**

(Same as JEWISHST 226D, RELIGST 226D) Constructions of identity, community, ethnicity: these considerations frame the investigation of ancient Christian rhetoric and theology contra Iudaeos. This historical project will be set within the larger intellectual and cultural context of a) learned Graeco-Roman traditions of ethnic stereotyping; b) forensic rhetoric; and c) philosophical *paideia*; and these traditions will be considered within their larger social context of the Mediterranean city (I-III). Specifically, various Christian, and especially Latin traditions contra Iudaeos (IV-VI) will be studied.

1-2 units, *not given this year*

**CLASSGEN 131. Culture and Thought in the Late Roman Republic**

This course explores some of the most dynamic literary achievements of the later Roman Republic. It addresses the intellectual and cultural community of Rome, with a focus on a series of major themes in Roman views of identity, morality, politics, and religion. We will examine works of poetry, philosophy, oratory, and historiography; we explore the poems of Catullus on myth, sex, and politics, and a selection of passages from Lucretius's great poem on atomic physics, Cicero's defense speeches, and Sallust's war narrative.

3-5 units, *Win (Yansen de Skipper, L)*

**CLASSGEN 132. Early Christian Gospels**

(Same as RELIGST 132D) An exploration of Christian gospels of the first and second century. Emphasis on the variety of images and interpretations of Jesus and the good news, the broader Hellenistic and Jewish contexts of the gospels, the processes of developing and transmitting gospels, and the creation of the canon. Readings include the Gospel of John, the Gospel of Mark, the Gospel of Thomas, the Gospel of Mary and other canonical and non-canonical gospels. GER:DB-Hum

4 units, *not given this year*

**CLASSGEN 133. Invention of Science**

Does science have to be the way it is? Does it have to be at all? The creation of science in the ancient Greek world; its invention of concepts such as nature, rationality, and proof; and its invention of fields from biology to geometry. Comparison with the Chinese invention of a different kind of science. The extent to which contemporary science is still Greek science. GER:DB-Hum

3-5 units, *Spr (Netz, R)*

**CLASSGEN 134. Early Christianity, Early Judaism, and Gender**

(Same as JEWISHST 122B, RELIGST 132B) An exploration of gender in Early Christianity and Early Judaism. Possible topics include: an examination of Pre-Christian writings which are indicative of the foundational social contexts in which early Christian and Jewish writers operated; how women's preaching was portrayed in Paul's letters and the implications for what was actually going on in the community in Corinth; later interpretations of Paul's attitudes towards women and marriage, which diverge between a pro-marriage and further restrictive understanding of women's involvement in the Church in the pastorals (1 and 2 Timothy and Titus) and a pro-ascetic, cross-dressing, understanding of greater women's freedom in the Acts of Paul and

Thecla; female Christian martyrs who had visions of themselves as men entering battle and male Rabbis who understood themselves as female virgins and who hid in whorehouses to avoid martyrdom; and a survey of early Rabbinic laws pertaining to men and women and what they reveal about early Jew GER:DB-Hum

4 units, *Win (Copeland, K)*

**CLASSGEN 139. Ancient Medicine**

Contemporary medical practice traces its origins to the creation of scientific medicine by Greek doctors such as Hippocrates and Galen. Is this something of which modern medicine can be proud? The scientific achievements and ethical limitations of ancient medicine when scientific medicine was no more than another form of alternative medicine. Scientific medicine competed in a marketplace of ideas where the boundaries between scientific and social aspects of medicine were difficult to draw. GER:DB-Hum

3-4 units, *Spr (Gleason, M)*

**CLASSGEN 141. Ovid Metamorphoses**

Ovid's *Metamorphoses* is his most delightful and ambitious poem, an unbroken narrative that unfolds an alternative story of the world from Chaos to the Age of Augustus. Explore this multi-layered text through readings of selected episodes. Discover how themes of metamorphosis and metaphor and questions of identity, responsibility, and victimization are wrapped up in Ovid's world of sentient plants, trapped beasts, and hostile gods. Sample the rich afterlife of the *Metamorphoses* in two millennia of literature and art.

3-5 units, *Aut (Gowers, E)*

**CLASSGEN 144. The Journey Beyond**

(Same as CLASSGEN 244) Between 270 and 240 BC, Apollonius, in the newly established city of Ptolemaic Alexandria, wrote a four-book hexameter poem (the *Argonautica*) in the manner of Homer on the subject of Jason and the Argonauts. This seminar will consider the social, political, intellectual, and geographic dimensions of the poem, its literary antecedents, lyric and tragic in addition to epic, its engagement with contemporary Alexandrian poetics, as well as several aspects of its reception in later Greek and Roman poetry. GER:DB-Hum

4-5 units, *Aut (Stephens, S)*

**CLASSGEN 148. Critical Approaches to Latin Literature: Roman Love Elegy**

(Same as CLASSGEN 248) For many, Roman elegy is the poetry of unrequited love. But closer reading of the genre and its modes shows that the concept of elegiac love can be seen as a rhetorical ploy to picture the world from a unique and contesting perspective. Often speaking from eccentric, dislocated, and rebellious stances, the alternative poets of love elegy offer contrasting outlooks on themes as wide-ranging as urbanity, politics and war, sex and leisure, art and knowledge, male and female, mind and spirit, death, and even the occult. Through a reading of select elegies of Tibullus, Propertius, and Ovid's *Amores*, we shall explore these issues together with questions of canon, genre, gender, narratology, and psychology, amongst others. There will be also an opportunity for both close textual criticism, and discussion of the broader analysis of the socio-cultural and literary history of the genre.

4-5 units, *Spr (Yansen de Skipper, L)*

**CLASSGEN 159. Winged Bulls and Sun Disks: Religion and Politics in the Persian Empire**

(Same as CLASSGEN 259, RELIGST 229, RELIGST 329) Since Herodotus in the 5th century BCE, the Persian Empire has been represented as the exemplar of oriental despotism and imperial arrogance, a looming presence and worthy foil for the West and Greek democracy. History of the Achaemenid Empire, beginning with the rise of the Medes in the 7th century BCE to the fall of the Achaemenids to Alexander the Great's armies in 331 BCE. Focus on the intimate relationship between religion and empire and will also survey the diverse cultural institutions and religious practices found within the Empire. Evaluate contemporary representations of the Persians in politics and popular culture, such as the recent film *300* and the graphic novel on which it is based, in an attempt to better appreciate the enduring cultural legacy of the Greco-Persian wars. GER:DB-Hum

3 units, *not given this year*

**CLASSGEN 160. Directed Readings (Undergraduate)**

May be repeated for credit.

*1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**CLASSGEN 165R. Theater and Memory**

(Same as DRAMA 165R) The course explores the extraordinary ways memory works in the theater and in film. Have you ever left a performance wondering, How did the actor learn all those lines? But that's only the beginning. When Hamlet promises that \* will As long as Memory holds a seat / In this distracted Globe, he refers not only to his own powers of memory, but also links his troubled psyche to Shakespeare's own theater (the Globe), suggesting the interplay between memory and the theater audience. Even in a film like *The Social Network*, memory plays an important role. At the end, the founder of Facebook logs onto his own invention to find the girl he insulted and lost as a freshman, a billionaire haunted by the memory of a human connection he yearns to recover.

*3-5 units, Sum (Staff)*

**CLASSGEN 167. Julius Caesar**

The transformative position of Julius Caesar within Roman history. Topics include ancient ideas about individual power and heroism, Roman imperialism, Iron Age Gaul, Egypt, religious practice, civil war, long-term results of Caesar's assassination. Cast of characters includes Pompey the Great, Vercingetorix, Mark Antony, Cleopatra. Ancient biography is compared to the reception of Julius Caesar in later literature and film. Analytical focus is on interactions of long-term history, institutions and events. Under what circumstances can individuals sometimes shape history? To what extent did Julius Caesar change Rome? GER:DB-Hum

*3-5 units, Aut (Trimble, J)*

**CLASSGEN 168. The Ethical Universe: Cosmology and the Goal of Human Life**

How is our picture of the universe and humans' place within it connected to our understanding of the purpose of our lives and the attainment of happiness? Does cosmology influence our ethics, and ethics in turn influence our cosmology? Poets and philosophers of the ancient world tended to treat cosmological and metaphysical ideas in close connection with normative ethical demands and claims about human psychology. This course will explore diverse ancient cosmologies, their metaphysical foundations, and their ethical implications from archaic Greece through early Roman imperial times, including the views of Hesiod, Presocratic natural scientists, Plato, Aristotle, Epicureans and Stoics, and the Skeptical challenge to the possibility of physics and metaphysics. The latter part of the course will bring in some comparisons and contrasts with modern literature and philosophy, especially in connection with the Stoic and Epicurean theories of eternal recurrence, and the skeptical position. GER:DB-Hum

*3-5 units, Aut (Slatin, P)*

**CLASSGEN 174. Martyrdom in the Ancient World**

(Same as RELIGST 174) Jewish, pagan and Christian groups under Roman rule all told tales of persecution and resistance. How did they use these stories, and the historical experiences behind them, to form group identity? Emphasis is on ancient documents in translation, and modern scholarly interpretations, to examine the competing agendas of parties involved, group dynamics, individual motivation, symbolic violence, and the body as a locus of power and control. GER:DB-Hum

*4 units, not given this year*

**CLASSGEN 176. Majors Seminar**

Required of Classics majors and minors in junior or senior year; students contemplating honors should take this course in junior year. Advanced skills course involving close reading, critical thinking, editing, and writing. In-class and take-home writing and revising exercises. Final paper topic may be on any subject related to Classics. WIM

*4-5 units, Win (Trimble, J)*

**CLASSGEN 182. In Search of David and Solomon**

(Same as CLASSGEN 282, JEWISHST 182A, JEWISHST 382A, RELIGST 182A, RELIGST 382A) In recent years, the existence of King David and Solomon has become a hotly contested subject, with some scholars questioning whether they were real-life historical figures and others claiming to have found evidence that corroborates their existence. Drawing on the most recent archaeological research, this course will involve students in the

quest for the historical David and Solomon as a way to introduce them to the challenges of using the Bible as an historical source.

*4 units, Spr (Lederman, Z)*

**CLASSGEN 199. Undergraduate Thesis: Senior Research**

*2-10 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**GRADUATE COURSES IN CLASSICS GENERAL**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**CLASSGEN 205A. The Semantics of Grammar**

Supplements CLASSLAT/CLASSGRK 275. Introduction to the grammatical encoding of semantic and pragmatic meaning. 205A: morphology-semantics interface (gender, tense, aspect, case). 205B: syntax-pragmatics interface (Latin word order). Begins in Autumn Quarter and continues through 5th week of Winter Quarter.

*2 units, Aut (Devine, A)*

**CLASSGEN 205B. The Semantics of Grammar**

Supplements CLASSLAT/CLASSGRK 275. Introduction to the grammatical encoding of semantic and pragmatic meaning. 205A: morphology-semantics interface (gender, tense, aspect, case). 205B: syntax-pragmatics interface (Latin word order). Begins in Autumn Quarter and continues through 5th week of Winter Quarter.

*2 units, Win (Devine, A)*

**CLASSGEN 206. Priests, Prophets, and Kings: Religion and Society in Late Antique Iran**

(Same as CLASSGEN 106, RELIGST 209, RELIGST 309) From India to the Levant and from the Caspian Sea to the Arabian Peninsula, the Sasanian Empire (224-651 CE) was the dominant power in the Middle East till the advent of Islam. Diverse religious institutions and social practices of the Zoroastrians, Manicheans, Jews, and Christians in late antique Iran. Complex relationships between the Zoroastrian priesthood, the Sasanian monarchs, and these minority religions within the context of imperial rule. Profound religious and social changes that occurred with the Islamic conquests of Iran as well as examine the rich cultural continuities that survived from the Pre-Islamic past.

*4-5 units, Aut (Vevaina, Y)*

**CLASSGEN 207A. Survey of Greek and Latin Literature: Literature of the Roman Republic**

First course in a required two-year sequence. Focus is on the origins, development, and interaction of Greek and Latin literature, history, and philosophy. Greek and Latin material taught in alternate years. Focus is on translation, textual criticism, genre, the role of Greece in shaping Roman literature, and oral versus written discourse.

*3-5 units, NEXTYEAR*

**CLASSGEN 207B. Survey of Greek and Latin Literature: Augustan Age Latin**

Required two-year sequence focusing on the origins, development, and interaction of Greek and Latin literature, history, and philosophy. Texts of Augustan literature required by the graduate syllabus, emphasizing poetry and major authors.

*3-5 units, NEXTYEAR*

**CLASSGEN 207C. Survey of Greek and Latin Literature: Imperial Latin**

Required two-year sequence focusing on the origins, development, and interaction of Greek and Latin literature, history, and philosophy. Greek and Latin material taught in alternate years.

*4-5 units, NEXTYEAR*

**CLASSGEN 208A. Survey of Greek and Latin Literature: Archaic Greek**

Required two-year sequence focusing on the origins, development, and interaction of Greek and Latin literature, history, and philosophy. Greek and Latin material taught in alternate years.

*3-5 units, Win (Peponi, A)*

**CLASSGEN 208B. Survey of Greek and Latin Literature: Classical Greek**

Required two-year sequence focusing on the origins, development, and interaction of Greek and Latin literature, history, and

philosophy. Greek and Latin material taught in alternate years.  
3-5 units, Aut (*Nightingale, A*)

**CLASSGEN 208C. Survey of Greek and Latin Literature: Hellenistic and Late Greek**

Required two-year sequence focusing on the origins, development, and interaction of Greek and Latin literature, history, and philosophy. Greek and Latin material taught in alternate years.  
3-5 units, Spr (*Stephens, S*)

**CLASSGEN 223. Urban Sustainability: Long-Term Archaeological Perspectives**

(Same as CLASSGEN 123, URBANST 115) Comparative and archaeological view of urban design and sustainability. How fast changing cities challenge human relationships with nature. Innovation and change, growth, industrial development, the consumption of goods and materials. Five millennia of city life including Near Eastern city states, Graeco-Roman antiquity, the Indus Valley, and the Americas.  
3-5 units, Aut (*Shanks, M*)

**CLASSGEN 226. Judaism and Christianity in the Mediterranean World: Contact, Competition, and Conflict**

(Same as CLASSGEN 126, JEWISHST 226B, JEWISHST 326B, RELIGST 226B, RELIGST 326B) Jewish beginnings of Christianity in the first century C.E.; process of differentiation between various Jewish and Christian groups; effect of Roman-Jewish wars on Jewish and Christian identity formation; Jewish Christians, Christian Jews, and other heretics; rise of the discourse of orthodoxy and heresy; the emergence of the *Adversus Iudaeos* tradition; theology as a realm of mutual attraction and conflict. Readings include Epistles of Paul in the New Testament, Christian authors from Justin through Augustine, excerpts from Rabbinic Texts (Mishnah, Midrash and Talmud), along with current literature on religion, ethnicity, and identity in the Roman world.  
5 units, not given this year

**CLASSGEN 235. Petronius and Apuleius**

Petronius' *Satyricon* and Apuleius' *Metamorphoses* represent the surviving Latin novel. Differences between them. Readings include Petronius' dinner at Trimalchio's and Apuleius' love story of Cupid and Psyche. Philological analysis, history of the novel, and social history of the Roman empire. The afterlife of these texts. Recent scholarship.  
4-5 units, Spr (*Parker, G*)

**CLASSGEN 241. Words and Things in the History of Classical Scholarship**

How have scholars used ancient texts and objects since the revival of the classical tradition? How did antiquarians study and depict objects and relate them to texts and reconstructions of the past? What changed and what stayed the same as humanist scholarship gave way to professional archaeologists, historians, and philologists? Focus is on key works in the history of classics, such as Erasmus and Winckelmann, in their scholarly, cultural, and political contexts, and recent critical trends in intellectual history and the history of disciplines.  
4-5 units, NEXTYEAR

**CLASSGEN 244. The Journey Beyond**

(Same as CLASSGEN 144) Between 270 and 240 BC, Apollonius, in the newly established city of Ptolemaic Alexandria, wrote a four-book hexameter poem (the *Argonautica*) in the manner of Homer on the subject of Jason and the Argonauts. This seminar will consider the social, political, intellectual, and geographic dimensions of the poem, its literary antecedents, lyric and tragic in addition to epic, its engagement with contemporary Alexandrian poetics, as well as several aspects of its reception in later Greek and Roman poetry.  
4-5 units, Aut (*Stephens, S*)

**CLASSGEN 248. Critical Approaches to Latin Literature: Roman Love Elegy**

(Same as CLASSGEN 148) For many, Roman elegy is the poetry of unrequited love. But closer reading of the genre and its modes shows that the concept of elegiac love can be seen as a rhetorical ploy to picture the world from a unique and contesting perspective. Often speaking from eccentric, dislocated, and rebellious stances, the alternative poets of love elegy offer contrasting outlooks on themes as wide-ranging as urbanity, politics and war, sex and leisure, art and knowledge, male and female, mind and spirit,

death, and even the occult. Through a reading of select elegies of Tibullus, Propertius, and Ovid's *Amores*, we shall explore these issues together with questions of canon, genre, gender, narratology, and psychology, amongst others. There will be also an opportunity for both close textual criticism, and discussion of the broader analysis of the socio-cultural and literary history of the genre.  
4-5 units, Spr (*Yansen de Skipper, L*)

**CLASSGEN 259. Winged Bulls and Sun Disks: Religion and Politics in the Persian Empire**

(Same as CLASSGEN 159, RELIGST 229, RELIGST 329) Since Herodotus in the 5th century BCE, the Persian Empire has been represented as the exemplar of oriental despotism and imperial arrogance, a looming presence and worthy foil for the West and Greek democracy. History of the Achaemenid Empire, beginning with the rise of the Medes in the 7th century BCE to the fall of the Achaemenids to Alexander the Great's armies in 331 BCE. Focus on the intimate relationship between religion and empire and will also survey the diverse cultural institutions and religious practices found within the Empire. Evaluate contemporary representations of the Persians in politics and popular culture, such as the recent film *300* and the graphic novel on which it is based, in an attempt to better appreciate the enduring cultural legacy of the Greco-Persian wars.  
3 units, not given this year

**CLASSGEN 260. Directed Reading in Classics (Graduate Students)**

1-15 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*), Sum (*Staff*)

**CLASSGEN 282. In Search of David and Solomon**

(Same as CLASSGEN 182, JEWISHST 182A, JEWISHST 382A, RELIGST 182A, RELIGST 382A) In recent years, the existence of King David and Solomon has become a hotly contested subject, with some scholars questioning whether they were real-life historical figures and others claiming to have found evidence that corroborates their existence. Drawing on the most recent archaeological research, this course will involve students in the quest for the historical David and Solomon as a way to introduce them to the challenges of using the Bible as an historical source.  
4 units, Spr (*Lederman, Z*)

**CLASSGEN 336. Augustine on Memory, Time, and the Self**

This course examines Augustine's *Confessions* as an autobiographical discourse. It investigates his theories of memory and of time and address different theories of the self. How does memory and the passing of time affect the notion of the self? Does Augustine's subjective theory of time offer an identifiable self? Is the self constructed by narratives? We will locate these issues in their cultural context by investigating Christian and pagan discourses and practices in Late Antiquity.  
4-5 units, Win (*Nightingale, A*)

**CLASSGEN 342. Introduction to Greek Aesthetics : The Paradigm of Dance**

How did the Greeks contemplate and theorize about beauty and allied concepts? Since aesthetics as a discipline emerged in the eighteenth century, is it legitimate for us to use this term when discussing Greek antiquity? In the first part of the seminar we will read and discuss secondary literature on aesthetics esp. eighteenth and nineteenth century European thought and compare/contrast this literature with poetic and philosophical texts of the archaic and classical periods in Greece. In the second part of the seminar we will focus on one particular art and its relation to aesthetics: dance. We will juxtapose and compare modern and ancient texts about dance and raise questions concerning dance as a spectacle and the type of pleasure this spectacle provides to its viewers.  
3-5 units, Spr (*Peponi, A*)

**CLASSGEN 360. Dissertation Research in Classics**

1-10 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*), Sum (*Staff*)

**CLASSGEN 801. TGR Project**

0 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*), Sum (*Staff*)

**CLASSGEN 802. TGR Dissertation**

0 units, Aut (*Staff*), Win (*Staff*), Spr (*Staff*), Sum (*Staff*)

# CLASSICS GREEK (CLASSGRK) COURSES

## UNDERGRADUATE COURSES IN CLASSICS GREEK

Primarily for undergraduates; graduate students may enroll with consent of adviser.

### CLASSGRK 1. Beginning Greek

No knowledge of Greek is assumed. Classics majors and minors must take course for letter grade. Vocabulary and syntax of the classical language.

3-5 units, Aut (McCall, M; Wietzke, J)

### CLASSGRK 2. Beginning Greek

Continuation of CLASSGRK 1. Classics majors and minors must take course for letter grade.

3-5 units, Win (McCall, M)

### CLASSGRK 3. Beginning Greek

Continuation of CLASSGRK 2. Classics majors and minors must take course for letter grade. Vocabulary and syntax of the classical language. Separate section for Biblical Greek. CLASSGRK 3 fulfills University language requirement.

3-5 units, Spr (Loar, M)

### CLASSGRK 101. Intermediate Greek: Plato's Apology

Vocabulary building, ongoing review of forms and constructions. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Aut (Montagne, J)

### CLASSGRK 102. Intermediate Greek: Aeschylus

In this course, we will read a very great tragedy, Aeschylus' Eumenides. We will use the edition and commentary of A. Sommerstein (Cambridge 1989). My assumption will be that this is the first Greek tragedy in Greek for almost all students in the class, and we will proceed extremely carefully and thoroughly, covering as much of the text as we can in a short quarter. We will discuss and debate the immense themes and issues at every point, and we will read in English the six other Aeschylean tragedies. There will be two midterms and, by the end of the term, a serious paper. Reading a Greek tragedy in Greek will be one of the most important things all students in the class will ever do.

4-5 units, Win (McCall, M)

### CLASSGRK 103. Intermediate Greek

Readings in Greek and English. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Spr (Driscoll, D)

### CLASSGRK 111. Advanced Greek: Attic Oratory

(Same as CLASSGRK 211) The speeches of Lysias and Antiphon, with special attention to rhetoric, prose style and Athenian law and culture. The course focuses primarily on forensic oratory, but we will also read samples of deliberative and epideictic speeches. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Aut (Staff)

### CLASSGRK 112. Advanced Greek: Lyric Poetry

Invectives, love songs, drinking songs, elegies, and choral odes from 700-500 B.C.E. Readings include Sappho, Alcaeus, Archilochus, Mimnermus, Alcman, Solon, and Pindar. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Win (Peponi, A)

### CLASSGRK 113. Advanced Greek

Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Spr (Netz, R)

### CLASSGRK 175A. Greek Syntax: Prose Composition

(Same as CLASSGRK 275A) (First-year graduate students register for 275A,B.) Review of Greek grammar and instruction in Greek prose composition skills. Begins sixth week of Winter Quarter and continues through Spring Quarter. Classics majors and minors must take course for letter grade. Prerequisite for undergraduates:

three years of Greek.

2 units, Win (O'Connell, P)

### CLASSGRK 175B. Greek Syntax: Prose Composition

(Same as CLASSGRK 275B) (First-year graduate students register for 275A,B.) Review of Greek grammar and instruction in Greek prose composition skills. Begins sixth week of Winter Quarter and continues through Spring Quarter. Classics majors and minors must take course for letter grade. Prerequisite for undergraduates: three years of Greek.

3-5 units, Spr (O'Connell, P)

## GRADUATE COURSES IN CLASSICS GREEK

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### CLASSGRK 211. Advanced Greek: Attic Oratory

(Same as CLASSGRK 111) The speeches of Lysias and Antiphon, with special attention to rhetoric, prose style and Athenian law and culture. The course focuses primarily on forensic oratory, but we will also read samples of deliberative and epideictic speeches. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Aut (Staff)

### CLASSGRK 275A. Greek Syntax: Prose Composition

(Same as CLASSGRK 175A) (First-year graduate students register for 275A,B.) Review of Greek grammar and instruction in Greek prose composition skills. Begins sixth week of Winter Quarter and continues through Spring Quarter. Classics majors and minors must take course for letter grade. Prerequisite for undergraduates: three years of Greek.

2 units, Win (O'Connell, P)

### CLASSGRK 275B. Greek Syntax: Prose Composition

(Same as CLASSGRK 175B) (First-year graduate students register for 275A,B.) Review of Greek grammar and instruction in Greek prose composition skills. Begins sixth week of Winter Quarter and continues through Spring Quarter. Classics majors and minors must take course for letter grade. Prerequisite for undergraduates: three years of Greek.

3-5 units, Spr (O'Connell, P)

## CLASSICS HISTORY (CLASSHIS) COURSES

### UNDERGRADUATE COURSES IN CLASSICS HISTORY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

### CLASSHIS 23N. Slavery and Rebellion in Ancient Rome: Spartacus in Legend and History

(F,Sem) (Same as HISTORY 13N) Stanford Introductory Seminar. Preference to freshmen. Spartacus and his army of slaves resisted the power of the Roman legions for two years and became the stuff of legend. Introduction to Roman history. Slavery in ancient Rome in its psychological, social, and economic dimensions. Causes of Spartacus' rebellion; how the traumatic end of the rebellion gave rise to a legend popularized in Stanley Kubrick's 1960 film.

3 units, Aut (Saller, R)

### CLASSHIS 24N. The Roman Empire: Its Grandeur and Fall

(Same as HISTORY 11N) Preference to Freshmen. Prerequisite: IHUM 69A. Explore themes on the Roman Empire and its decline from the 1st through the 5th centuries C.E.. What was the political and military glue that held this diverse, multi-ethnic empire together? What were the bases of wealth and how was it distributed? What were the possibilities and limits of economic growth? How integrated was it in culture and religion? What were the causes and consequences of the conversion to Christianity? Why did the Empire fall in the West? How suitable is the analogy of the U.S. in the 21st century? GER:IHUM-3

4 units, not given this year

**CLASSHIS 26N. From Community to Empire: Understanding the Premodern State**

(F,Sem) Stanford Introductory Seminar. As Rousseau observed, man was born free, and everywhere he is in chains. How did this happen? Bringing together theoretical models from the social sciences and historical evidence from all over the world, this course explores the emergence, evolution and character of the state as a fundamental type of human organization that has shaped our existence for thousands of years. GER:IHUM-3

3-4 units, Spr (Scheidel, W)

**CLASSHIS 60. The Romans**

How did Rome grow from a loose gang of shepherds, exiles, and criminals to an empire of 65 million people stretching from Britain to Egypt? How and why did it then fall into ruins? Topics include Roman history, society, culture, economics, religions, and impact on Western civilization. We also discuss the origins of the republican form of government, explorations of military strategy, imperialism, slavery, and public entertainment. Focus is on original primary sources, including visual and archaeological evidence. This course also teaches general historical methodologies and techniques. GER:DB-Hum

3-5 units, Spr (Scheidel, W)

**CLASSHIS 101. The Greeks**

Greek history from the rise of the city state through Alexander the Great's conquest of Persia. Economics, society, culture, and technology. Competition and cooperation within and between states; the emergence of strong forms of citizenship along with chattel slavery and gender inequality; the origins and practices of democracy; and relations with non-Greek peoples. Focus is on ancient sources and archaeological remains. GER:DB-Hum

4-5 units, Win (Morris, I)

**CLASSHIS 105. History and Culture of Ancient Egypt**

Overview of ancient Egyptian pasts, from predynastic times to Greco-Roman rule, roughly 3000 BCE to 30 BCE. Attention to archaeological sites and artifacts; workings of society; and cultural productions, both artistic and literary. GER:DB-Hum, EC-GlobalCom

3-5 units, Spr (Parker, G)

**CLASSHIS 117. Origins of History in Greece and Rome**

The beginnings and development of historical writing in the ancient world. Emphasis on major classical historians and various models of history they invented from local to imperial, military, cultural, biographical, world history and church history. Focus on themes of power, war, loss, growth and decline, as put by the ancients into historical narrative forms and probed by way of historical questioning and explanation. Attention to how these models resonate still today. Readings in translation: Herodotus, Thucydides, Tacitus, Livy and others.

4-5 units, Win (Ceserani, G)

**CLASSHIS 133. Classical Seminar: Origins of Political Thought**

(Same as CLASSHIS 333, PHIL 176A, PHIL 276A, POLISCI 230A, POLISCI 330A) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change. GER:DB-Hum

4-5 units, Win (Ober, J)

**CLASSHIS 135B. Ancient Greek Law**

(Same as CLASSHIS 335B, POLISCI 431B) Workshop, which continues the work of the previous quarter. The development and practice of law and legal procedure in the ancient Greek world, emphasizing the well documented case of classical Athens. Constitutional, criminal, and civil law, approached through analysis of actual laws and speeches by litigants in Athenian courtrooms. Review of a growing scholarship juxtaposing Greek law to other prominent legal traditions and exploring the role of law in Greek social relations, economics, and literature.

5 units, Spr (Ober, J)

**GRADUATE COURSES IN CLASSICS HISTORY**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**CLASSHIS 313. The Shape of the Ancient World**

This seminar accompanies and encourages students to become involved in a Digital Humanities project that seeks to transform our understanding of ancient history by creating networks and maps that express distance in real terms (i.e., in terms of travel time and cost incurred), allowing us to reconstruct the true shape and structure of entities such as the Roman Empire and thereby providing a new foundation for our understanding of its emergence, functioning, and unraveling.

3-5 units, Aut (Scheidel, W)

**CLASSHIS 315. The Mediterranean World in the Age of Philip II**

I have stolen my title from Braudel's famous book, but this Philip II is the one from Macedon (382-336 BCE). Since the 1980s many archaeologists and historians have increasingly looked at Greece in its Mediterranean context; this seminar will examine the Mediterranean's geography, climate, and demography in the first millennium BCE and then survey developments in some of the major regions (Assyria, Persia, Levant, Egypt, Italy, and the west), finally locating Greece and Macedon in this broader context.

4-5 units, Spr (Morris, I)

**CLASSHIS 323. Greek Histories in Modern Europe**

The first modern historical rewritings of ancient Greece: What made them modern? How did they shape what Greek history is today? Texts and things in the modern recovery of the Greek past; women, colonies, democracy and art as modern subjects of ancient Greek history; modern historiographical methods and theories in their social and cultural contexts; modern historicity and the Greek past. Reading includes ancient historians, Renaissance antiquarians, eighteenth-century Greek histories and Enlightenment writings on ancient Greeks, and current scholarship.

4-5 units, Win (Ceserani, G)

**CLASSHIS 333. Classical Seminar: Origins of Political Thought**

(Same as CLASSHIS 133, PHIL 176A, PHIL 276A, POLISCI 230A, POLISCI 330A) Political philosophy in classical antiquity, focusing on canonical works of Thucydides, Plato, Aristotle, and Cicero. Historical background. Topics include: political obligation, citizenship, and leadership; origins and development of democracy; and law, civic strife, and constitutional change.

4-5 units, Win (Ober, J)

**CLASSHIS 335A. Ancient Greek Law**

(Same as POLISCI 431A) The development and practice of law and legal procedure in the ancient Greek world, emphasizing the well documented case of classical Athens. Constitutional, criminal, and civil law, approached through analysis of actual laws and speeches by litigants in Athenian courtrooms. Review of a growing scholarship juxtaposing Greek law to other prominent legal traditions and exploring the role of law in Greek social relations, economics, and literature.

5 units, Win (Ober, J)

**CLASSHIS 335B. Ancient Greek Law**

(Same as CLASSHIS 135B, POLISCI 431B) Workshop, which continues the work of the previous quarter. The development and practice of law and legal procedure in the ancient Greek world, emphasizing the well documented case of classical Athens. Constitutional, criminal, and civil law, approached through analysis of actual laws and speeches by litigants in Athenian courtrooms. Review of a growing scholarship juxtaposing Greek law to other prominent legal traditions and exploring the role of law in Greek social relations, economics, and literature.

5 units, Spr (Ober, J)

# CLASSICS LATIN (CLASSLAT) COURSES

## UNDERGRADUATE COURSES IN CLASSICS LATIN

Primarily for undergraduates; graduate students may enroll with consent of adviser.

### **CLASSLAT 1. Beginning Latin: Vocabulary and Syntax**

Vocabulary and syntax of the classical language. No previous knowledge of Latin is assumed. Classics majors and minors must take course for letter grade.

3-5 units, Aut (Klopacz, J)

### **CLASSLAT 2. Beginning Latin**

Continuation of CLASSLAT 1. Classics majors and minors must take course for letter grade.

3-5 units, Win (Klopacz, J)

### **CLASSLAT 3. Beginning Latin**

Continuation of CLASSLAT 2. Classics majors and minors must take course for letter grade. CLASSLAT 3 fulfills the University language requirement.

3-5 units, Spr (Klopacz, J)

### **CLASSLAT 10. Intensive Beginning Latin**

Equivalent to CLASSLAT 1, 2, 3; or 51 and 52. Goal is to read easy Latin prose and poetry by the end of the quarter. Classics majors and minors must take course for letter grade. CLASSLAT 10 fulfills the University language requirement.

9-15 units, Sum (Staff)

### **CLASSLAT 101. Intermediate Latin: Introduction to Literature**

Phonology, morphology, semantics, and syntax. Readings in prose and poetry. Analysis of literary language, including rhythm, meter, word order, narrative, and figures of speech.

3-5 units, Aut (Klopacz, J)

### **CLASSLAT 102. Intermediate Latin: Pliny and Martial**

This is a literature class in which selections from the *Cena Trimalchionis* of Petronius and selected epigrams of Martial will be read in the original Latin. Classics majors and minors must take this course for a letter grade.

3-5 units, Win (MacDonald, C)

### **CLASSLAT 103. Intermediate Latin: Cicero and Ovid**

Classics majors and minors must take course for a letter grade. May be repeated for credit.

3-5 units, Spr (Klopacz, J)

### **CLASSLAT 111. Advanced Latin: Horace's Odes and Epodes**

Reading Horace's lyric and iambic poetry: the class will offer introduction to the literary aspect and also emphasis on Latin as a language of poetry and its evolution. There is also an emphasis on similarity and difference with the Greek lyric tradition and the Western lyric tradition (much influenced by Horace). Classic majors and minors must take course for a letter grade. May be repeated for credit.

3-5 units, Aut (Barchiesi, A)

### **CLASSLAT 112. Advanced Latin: Lucretius**

This course offers advanced students of Latin an opportunity to engage closely with a late Roman Republican text, both at the lexical and thematic level. We shall explore Lucretius' wonderful poem about the atoms (DRN 1) from the perspective of reader-response criticism, and with a focus on the poem's syntax, meter, wordplay, and rhetorical devices. There will also be an opportunity for studying matters of textuality, narrativity and temporality, as well as for the broader analysis of the socio-cultural and literary history of the didactic genre. Classics majors and minors must take course for letter grade. May be repeated for credit.

3-5 units, Win (Yansen de Skipper, L)

### **CLASSLAT 113. Advanced Latin: Livy**

Readings in Latin. Classics majors and minors must take course for a letter grade. May be repeated for credit.

3-5 units, Spr (Ceserani, G)

### **CLASSLAT 175A. Latin Syntax**

(Same as CLASSLAT 275A) (First-year graduate students register for 275A,B.) Intensive review of Latin syntax. Begins Autumn Quarter and continues through the fifth week of Winter Quarter. See CLASSGEN 205A,B for supplemental courses. Classics majors and minors must take course for letter grade. Prerequisite for undergraduates: three years of Latin.

3-5 units, Aut (Devine, A)

### **CLASSLAT 175B. Latin Syntax**

(Same as CLASSLAT 275B) (First-year graduate students register for 275A,B.) Intensive review of Latin syntax. Begins Autumn Quarter and continues through the fifth week of Winter Quarter. See CLASSGEN 205A,B for supplemental courses. Classics majors and minors must take course for letter grade. Prerequisite for undergraduates: three years of Latin.

2 units, Win (Devine, A)

## GRADUATE COURSES IN CLASSICS LATIN

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### **CLASSLAT 275A. Latin Syntax**

(Same as CLASSLAT 175A) (First-year graduate students register for 275A,B.) Intensive review of Latin syntax. Begins Autumn Quarter and continues through the fifth week of Winter Quarter. See CLASSGEN 205A,B for supplemental courses. Classics majors and minors must take course for letter grade. Prerequisite for undergraduates: three years of Latin.

3-5 units, Aut (Devine, A)

### **CLASSLAT 275B. Latin Syntax**

(Same as CLASSLAT 175B) (First-year graduate students register for 275A,B.) Intensive review of Latin syntax. Begins Autumn Quarter and continues through the fifth week of Winter Quarter. See CLASSGEN 205A,B for supplemental courses. Classics majors and minors must take course for letter grade. Prerequisite for undergraduates: three years of Latin.

2 units, Win (Devine, A)

### **CLASSLAT 305. The Divine Council**

The Divine Council is one of the few recurring ideas in epic poetry from the second millennium BCE (West Asia) to the XVII century (Europe and the New World). As such, it lends itself to a comparative approach; the class will focus on epic texts in Latin, since they are the majority of the tradition, but with comparative contributions from other languages.

5 units, Aut (Barchiesi, A)

### **CLASSLAT 316. Maecenas and the Poets**

Maecenas, patron, statesman, collector, gardener, neurotic, has been called "the most original individual of the Augustan Age." This ambiguous figure and versatile symbol makes an ideal filter for exploring the cultural contradictions of the period. Reading Virgil's *Georgics*, Horace's *Satires*, *Epodes*, *Odes*, and *Epistles*, Propertius' *Elegies*, and his own poetic fragments, we will ask: how does Maecenas define the poetry in which he appears and how does he become the focus of contemporary ideas about masculinity, luxury, patronage, and freedom?

3-5 units, Aut (Gowers, E)

## COMMUNICATION (COMM) COURSES

### UNDERGRADUATE COURSES IN COMMUNICATION

Primarily for undergraduates; graduate students may enroll with consent of adviser.

### **COMM 1A. Media Technologies, People, and Society**

(Same as COMM 211) (Graduate students register for COMM 211.) Open to non-majors. Introduction to the concepts and contexts of communication. A topics-structured orientation emphasizing the field and the scholarly endeavors represented in

the department. GER:DB-SocSci  
4-5 units, not given this year

### COMM 1B. Media, Culture, and Society

(Same as AMSTUD 1B) The institutions and practices of mass media, including television, film, radio, and digital media, and their role in shaping culture and social life. The media's shifting relationships to politics, commerce, and identity. GER:DB-SocSci  
5 units, Win (Turner, F)

### COMM 103S. Media Entertainment

The impact of media entertainment on individuals, social groups, and societies. Sources include a diverse cross-section of entertainment. Introduction to psychological and socio-psychological theories. Empirical findings relating to media entertainment as a stimulus and a reception phenomenon. What renders diverse genres of media content and format enjoyable? Why do individuals pursue entertainment experiences in ever-increasing numbers? What is the political impact of apolitical media entertainment?

3-5 units, Sum (Staff)

### COMM 104W. Reporting, Writing, and Understanding the News

Techniques of news reporting and writing. The value and role of news in democratic societies. Gateway class to journalism. Prerequisite for all COMM 177/277 classes. Limited enrollment. Preference to sophomores and juniors. WIM

5 units, Win (Zacharia, J), Spr (Zacharia, J)

### COMM 106. Communication Research Methods

(Same as COMM 206) (Graduate students register for COMM 206.) Conceptual and practical concerns underlying commonly used quantitative approaches, including experimental, survey, content analysis, and field research in communication. Pre- or corequisite: STATS 60 or consent of instructor. GER:DB-SocSci  
4-5 units, Aut (Voelker, D)

### COMM 108. Media Processes and Effects

(Same as COMM 208) (Graduate students register for COMM 208.) The process of communication theory construction including a survey of social science paradigms and major theories of communication. Recommended: 1 or PSYCH 1. GER:DB-SocSci

4-5 units, Win (Bailenson, J)

### COMM 112S. Bending the Truth: Propaganda in Media and Culture

What is propaganda? What role does it play in our lives? And how do we conceive of propaganda's relationship to politics and culture? This course will examine the evolution of propaganda from the early 20th century to the present. It will take up examples from advertising, journalism, cinema, painting and digital media. By the end of the course, students will have a broad understanding of the tactics by which various interest groups have sought to influence public communication.

3-5 units, Sum (Staff)

### COMM 113S. Make up your mind: Judgment and Decision Making

Ever have trouble making up your mind? Every day, millions of people struggle to make wise decisions. Ironically, even when we toil over decisions, they are often plagued with bias. This interactive lecture-based course will explore the core theories and current research on heuristics and biases in human inference. In addition, the course will cover essential communication and psychology findings that shed light on different aspects of the decision making process. The final project is a student-designed empirical research proposal that will have practical applications as well as theoretical importance.

3-5 units, Sum (Staff)

### COMM 114S. Online Manipulation: Persuasion, Contagion, and Compliance-Gaining in Online Media

Political campaigns micro-target their messages to individuals according to the issues each cares about. Endorsements of products and brands spread through Facebook. Mobile devices sense physical activity and coach people to meet diet and exercise goals. Using social-scientific research and real-world examples, this course examines the social and psychological processes by which communication technologies are used to change people's attitudes, beliefs, and behaviors. By the end of the course, students will understand the psychology of persuasion and social influence, and

they will have applied this to the design and criticism of new technologies, interventions, and messages.

3-5 units, Sum (Staff)

### COMM 116. Journalism Law

(Same as COMM 216) (Graduate students register for 216.) Laws and regulation impacting journalists. Topics include libel, privacy, news gathering, protection sources, fair trial and free press, theories of the First Amendment, and broadcast regulation. Prerequisite: Journalism M.A. student or advanced Communication major.

4-5 units, Win (Wheaton, J)

### COMM 117. Digital Journalism

(Same as COMM 217) (Graduate students register for COMM 217.) Seminar and practicum. The implications of new media for journalists. Professional and social issues related to the web as a case of new media deployment, as a story, as a research and reporting tool, and as a publishing channel. Prerequisite: Journalism M.A. student or consent of instructor.

4-5 units, Win (Brenner, R)

### COMM 120. Digital Media in Society

(Same as AMSTUD 120, COMM 220) (Graduate students register for 220.) Contemporary debates concerning the social and cultural impact of digital media. Topics include the historical origins of digital media, cultural contexts of their development and use, and influence of digital media on conceptions of self, community, and state. Priority to Juniors and Seniors. GER:DB-SocSci

4-5 units, not given this year

### COMM 122. Content Analysis: Studying Communication Artifacts

(Same as COMM 222) An empirical and systematic investigation of documented messages in print, graphical, and audio-visual forms and observed human communication behaviors. Focuses on the design and execution of content analytic studies, including manifest vs. latent content, measurement issues, reliability and validity assessment, computer text analysis, and traditional human-coder techniques. Prerequisite: junior, senior or grad standing; COMM 106/206 or an equivalent course in basic social science research.

4-5 units, Win (Voelker, D)

### COMM 123. Attitude Change and Persuasion

(Same as COMM 223) What attitudes are, how they are measured, and the dynamics of their formation, maintenance and change. Central and peripheral routes to attitude change; source, channel and receiver factors; attitude-behavior consistency; the roles of involvement, elaboration, affect and social influence. Note: this is not a how-to course in persuasion for practitioners, but a grounding in the conceptual foundations of attitude change and a survey of prevailing theories.

4-5 units, Spr (Voelker, D)

### COMM 125. Perspectives on American Journalism

(Same as COMM 225) (Graduate students register for COMM 225.) An examination of the practice of American journalism, focusing on the political, social, cultural, economic and technological forces that have shaped the U. S. press since the early 1800s. Aimed at consumers as well as producers of news, the objective of this course is to provide a framework and vocabulary for judging the value and quality of everyday journalism. GER:DB-SocSci

4-5 units, Aut (Glasser, T)

### COMM 130N. The idea of a free press

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. An examination of the meaning of freedom of the press, tied to but not bound by various Supreme Court rulings on the scope and purpose of the First Amendment's speech and press clauses. Discussions will include a look at the recent and rapid computerization of communication and what it portends for the future of a free press.

3-4 units, Spr (Glasser, T)

### COMM 131. Media Ethics and Responsibility

(Same as COMM 231) (Graduate students register for COMM 231.) The development of professionalism among American journalists, emphasizing the emergence of objectivity as a professional and the epistemological norm. An applied ethics course where questions of power, freedom, and truth autonomy are

treated normatively so as to foster critical thinking about the origins and implications of commonly accepted standards of responsible journalism. GER:DB-SocSci

*4-5 units, not given this year*

**COMM 134. Public Participation and Public Policy**

(Same as COMM 234) Examines the role of public participation in public policy making. Around the world, policymakers seek to engage their publics. But, even though public participation is important, it is also problematic. Public meetings can become dysfunctional and turn into media spectacles instead of actually gathering the opinions of the public. The question becomes, when and how should the public be consulted in order to effectively impact public policies? There are consequences of engaging the public, and this seminar explores the methods used to engage publics around the world.

*4-5 units, not given this year*

**COMM 137W. The Dialogue of Democracy**

(Same as AMSTUD 137, COMM 237, POLISCI 232T, POLISCI 332T) All forms of democracy require some kind of communication so people can be aware of issues and make decisions. This course looks at competing visions of what democracy should be and different notions of the role of dialogue in a democracy. Is it just campaigning or does it include deliberation? Small scale discussions or sound bites on television? Or social media? What is the role of technology in changing our democratic practices, to mobilize, to persuade, to solve public problems? This course will include readings from political theory about democratic ideals - from the American founders to J.S. Mill and the Progressives to Joseph Schumpeter and modern writers skeptical of the public will. It will also include contemporary examinations of the media and the internet to see how those practices are changing and how the ideals can or cannot be realized. GER:EC-EthicReas, WIM

*4-5 units, Win (Fishkin, J)*

**COMM 140. Digital Media Entrepreneurship**

(Same as COMM 240) (Graduate students register for COMM 240.) Primarily for graduate journalism and computer science students. Silicon Valley's new media culture, digital storytelling skills and techniques, web-based skills, and entrepreneurial ventures. Guest speakers.

*3-5 units, Spr (Grimes, A)*

**COMM 147. Modern History and Future of Journalism**

(Same as COMM 247) (Graduate students register for COMM 247.) The birth and evolution of local and national television news. The modern history of newspapers. Can they survive in the era of online journalism?

*4-5 units, Spr (Brinkley, J)*

**COMM 156. Negotiation and Influence**

(Same as COMM 256, EDUC 256C) No matter how excellent your ideas, most significant achievements require the ability to communicate with and influence others. This course examines the theory, research, and practice of negotiation across a variety of settings. It provides multiple opportunities for students to develop negotiation skills through role-plays, exercises, and useful analytical frameworks. Topics include: distributive and integrative bargaining, psychological biases, lessons from game theory, principles of influence, multiparty negotiation, and the value of relationships and trust. The course meets intensively over a highly condensed period of time. Intended for graduate students and advanced undergraduates. No prerequisites. Limited enrollment; advance application required; see <http://comm.stanford.edu/faculty/curhan>

*1-2 units, Aut (Staff), Win (Curhan, J), Spr (Staff)*

**COMM 160. The Press and the Political Process**

(Same as COMM 260, POLISCI 323R) (Graduate students register for COMM 260.) The role of mass media and other channels of communication in political and electoral processes. GER:DB-SocSci

*4-5 units, not given this year*

**COMM 162. Campaigns, Voting, Media, and Elections**

(Same as COMM 262, POLISCI 120B) This course examines the theory and practice of American campaigns and elections. First, we will attempt to explain the behavior of the key players -- candidates, parties, journalists, and voters -- in terms of the

institutional arrangements and political incentives that confront them. Second, we will use current and recent election campaigns as laboratories for testing generalizations about campaign strategy and voter behavior. Third, we examine selections from the academic literature dealing with the origins of partisan identity, electoral design, and the immediate effects of campaigns on public opinion, voter turnout, and voter choice. As well, we'll explore issues of electoral reform and their more long-term consequences for governance and the political process. GER:DB-SocSci

*4-5 units, Win (Lyengar, S)*

**COMM 164. The Psychology of Communication About Politics in America**

(Same as COMM 264, POLISCI 224L, PSYCH 170) Focus is on how politicians and government learn what Americans want and how the public's preferences shape government action; how surveys measure beliefs, preferences, and experiences; how poll results are criticized and interpreted; how conflict between polls is viewed by the public; how accurate surveys are and when they are accurate; how to conduct survey research to produce accurate measurements; designing questionnaires that people can understand and use comfortably; how question wording can manipulate poll results; corruption in survey research. Preference to juniors, seniors, graduate students.

*4 units, Spr (Krosnick, J)*

**COMM 166. Virtual People**

(Same as COMM 266) (Graduate students register for COMM 266.) The concept of virtual people or digital human representations; methods of constructing and using virtual people; methodological approaches to interactions with and among virtual people; and current applications. Viewpoints including popular culture, literature, film, engineering, behavioral science, computer science, and communication.

*4-5 units, Spr (Bailenson, J)*

**COMM 167. Advanced Seminar in Virtual Reality Research**

Restricted to students with previous research experience in virtual reality. Experimental methods and other issues.

*1-3 units, Win (Bailenson, J)*

**COMM 168. Experimental Research in Advanced User Interfaces**

(Same as COMM 268, COMM 368, ME 468) Project-based course involves small (3-4) person teams going through all parts of the experimental process: question generation, experiment design, running, and data analysis. Each team creates an original, publishable project that represents a contribution to the research and practicum literatures. All experiments involve interaction between people and technology, including cars, mobile phones, websites, etc. Prerequisite: consent of instructor.

*1-5 units, not given this year*

**COMM 169. Computers and Interfaces**

(Same as COMM 269) (Graduate students register for COMM 269.) Interdisciplinary. User responses to interfaces and design implications of those responses. Theories from different disciplines illustrate responses to textual, voice-based, pictorial, metaphoric, conversational, adaptive, agent-based, intelligent, and anthropomorphic interfaces. Group design project applying theory to the design of products or services for developing countries. GER:DB-SocSci

*4-5 units, not given this year*

**COMM 171. Multimedia Reporting and Production for Public Issues**

(Same as COMM 271) (Graduate students register for 271.) Production of multimedia assignments for traditional news beats using audio, still photography, graphics and video. 2-hour lab class for creative, conceptual and technical skills for production of multimedia stories. Prerequisite: Journalism MA student or instructor's consent.

*3-5 units, Win (Migielicz, G)*

**COMM 172. Media Psychology**

(Same as COMM 272) (Graduate students register for COMM 272.) The literature related to psychological processing and the effects of media. Topics: unconscious processing; picture perception; attention and memory; emotion; the physiology of processing media; person perception; pornography; consumer behavior; advanced film and television systems; and differences

among reading, watching, and listening. GER:DB-SocSci  
4-5 units, Spr (Reeves, B)

**COMM 176. Advanced Digital Media Production**

(Same as COMM 276) In-depth reporting and production using audio, images and video. Focus on an in-depth journalism project with appropriate uses of digital media: audio, photography, graphics, and video. Topics include advanced field techniques and approaches (audio, video, still) and emphasis on creating a non-fiction narrative arc in a multimedia piece of 10-12 minutes. Prerequisite: COMM 275 or consent of instructor

4-5 units, Spr (Migielicz, G)

**COMM 177C. Specialized Writing and Reporting: Environmental Journalism**

(Same as COMM 277C, ENVRES 277C) (Graduate students register for COMM / ENVRES 277C.) Practical, collaborative, writing-intensive course in science-based environmental journalism. Science and journalism students learn how to identify and write engaging stories about environmental issues and science, how to assess the quality and relevance of environmental news, how to cover the environment and science beats effectively, and how to build bridges between the worlds of journalism and science. Limited enrollment: preference to journalism students and students in the natural and environmental sciences. Prerequisite: COMM 104, ENVRES 200 or consent of instructor. Admissions by application only, available from thayden@stanford.edu and due 3/28/12.

4-5 units, Spr (Hayden, T)

**COMM 177D. Specialized Writing and Reporting: Magazine Journalism**

(Same as COMM 277D) (Graduate students register for COMM 277D.) How to report, write, edit, and read magazine articles, emphasizing long-form narrative. Tools and templates of story telling such as scenes, characters, dialogue, and narrative arc. How the best magazine stories defy or subvert conventional wisdom and bring fresh light to the human experience through reporting, writing, and moral passion. Prerequisite: 104 or consent of instructor.

4-5 units, Spr (Brenner, R)

**COMM 177G. Specialized Writing and Reporting: Covering Silicon Valley**

(Same as COMM 277G) (Graduate students register for COMM 277G.) Business reporting basics in the context of Silicon Valley's technology scene. Prerequisite: 104 or consent of instructor.

4-5 units, Win (Grimes, A)

**COMM 177I. Specialized Writing and Reporting: Investigative Reporting**

(Same as COMM 277I) Graduate students register for COMM 277I.) Under the supervision of editors from the Center for Investigative Reporting, students will work on a group investigative project with the end-goal of publication and distribution through CIR's California Watch project. The class will emphasize the history and role of investigative reporting as well as skills and techniques needed to do it. Limited enrollment. Prerequisite: instructor consent. Go to <http://comm.stanford.edu/faculty/grimes> for application instructions.

4-5 units, not given this year

**COMM 177K. Specialized Writing and Reporting: Human Rights Journalism**

(Same as COMM 277K) (Graduate students register for COMM 277K.) The evolution of human rights law and enforcement, and the role of journalists in uncovering, pursuing, and publicizing political violence, detention, and torture. Case studies from S. Africa, Latin America, Israel and Palestine, N. Ireland, Bosnia, Rwanda, and Sudan and Darfur. Human rights issues in the U.S. in the aftermath of 9/11. Students conduct research and write journalistic reports on foreign and domestic issues. Prerequisite: 104 or consent of instructor.

4-5 units, not given this year

**COMM 177S. Specialized Writing and Reporting: Sports Journalism**

(Same as COMM 277S) (Graduate students register for COMM 277S.) Workshop. The history of sports writing from the 20s to present. Reporting, interviewing, deadline writing, and how to

conceptualize and develop stories. Students write features and news stories for publication in a new sports section in 'The Cardinal Inquirer', an online publication of the graduate program in journalism. Prerequisite: 104 or consent of instructor.

4-5 units, Win (Pomerantz, G)

**COMM 177Y. Specialized Writing and Reporting: Foreign Correspondence in the Middle East and Asia**

(Same as COMM 277Y) (Graduate students register for COMM 277Y.) What's involved in working as a foreign correspondent in these important and volatile parts of the world, where in many cases journalists are not respected and may face danger -- taught by a journalist who has worked extensively in both regions. (no pre-requisites)

4-5 units, Aut (Brinkley, J)

**COMM 180. Topics in Learning and Technology: Core Mechanics for Learning**

(Same as COMM 280, CS 377H, EDUC 328X) Contents of the course change each year. The course can be repeated. In game play, core mechanics refers to the rules of interaction that drive the game forward. This class will consider whether there are core mechanics that can drive learning forward, and if so, how to build them into learning environments.

3 units, Win (Schwartz, D)

**COMM 182. Virtual Communities and Social Media**

(Same as COMM 282) (Graduate students register for COMM 282.) Students will take away from this course a set of conceptual tools, a vocabulary, and an analytical framework with which to recognize, understand, and more effectively manage new social practices online, together with a familiarity with the literature regarding social media and identity, community, collective action, public sphere, social capital, networks, and social networks. Students will also develop skills at using online forums, blogs, microblogs, wikis for research, collaboration, and communication. Limited enrollment. Prerequisite: instructor consent. Go to <http://comm.stanford.edu/faculty/rheingold/> for application instructions.

4-5 units, Aut (Rheingold, H)

**COMM 190. Senior Project**

Research project. Prerequisite: senior standing.

5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**COMM 195. Honors Thesis**

Qualifies students to conduct communication research. Student must apply for department honors thesis program during Spring Quarter of junior year.

5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**COMM 199. Individual Work**

For students with high academic standing. May be repeated for credit.

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**COMM 212. Models of Democracy**

(Same as COMM 312, POLISCI 237, POLISCI 337) Ancient and modern varieties of democracy; debates about their normative and practical strengths and the pathologies to which each is subject. Focus is on participation, deliberation, representation, and elite competition, as values and political processes. Formal institutions, political rhetoric, technological change, and philosophical critique. Models tested by reference to long-term historical natural experiments such as Athens and Rome, recent large-scale political experiments such as the British Columbia Citizens' Assembly, and controlled experiments.

3-5 units, not given this year

**GRADUATE COURSES IN COMMUNICATION**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**COMM 206. Communication Research Methods**

(Same as COMM 106) (Graduate students register for COMM 206.) Conceptual and practical concerns underlying commonly used quantitative approaches, including experimental, survey, content analysis, and field research in communication. Pre- or corequisite: STATS 60 or consent of instructor.

4-5 units, Aut (Voelker, D)

**COMM 208. Media Processes and Effects**

(Same as COMM 108) (Graduate students register for COMM 208.) The process of communication theory construction including a survey of social science paradigms and major theories of communication. Recommended: 1 or PSYCH 1.

4-5 units, Win (Baileenson, J)

**COMM 211. Media Technologies, People, and Society**

(Same as COMM 1A) (Graduate students register for COMM 211.) Open to non-majors. Introduction to the concepts and contexts of communication. A topics-structured orientation emphasizing the field and the scholarly endeavors represented in the department.

4-5 units, not given this year

**COMM 216. Journalism Law**

(Same as COMM 116) (Graduate students register for 216.) Laws and regulation impacting journalists. Topics include libel, privacy, news gathering, protection sources, fair trial and free press, theories of the First Amendment, and broadcast regulation. Prerequisite: Journalism M.A. student or advanced Communication major.

4-5 units, Win (Wheaton, J)

**COMM 217. Digital Journalism**

(Same as COMM 117) (Graduate students register for COMM 217.) Seminar and practicum. The implications of new media for journalists. Professional and social issues related to the web as a case of new media deployment, as a story, as a research and reporting tool, and as a publishing channel. Prerequisite: Journalism M.A. student or consent of instructor.

4-5 units, Win (Brenner, R)

**COMM 220. Digital Media in Society**

(Same as AMSTUD 120, COMM 120) (Graduate students register for 220.) Contemporary debates concerning the social and cultural impact of digital media. Topics include the historical origins of digital media, cultural contexts of their development and use, and influence of digital media on conceptions of self, community, and state. Priority to Juniors and Seniors.

4-5 units, not given this year

**COMM 222. Content Analysis: Studying Communication Artifacts**

(Same as COMM 122) An empirical and systematic investigation of documented messages in print, graphical, and audio-visual forms and observed human communication behaviors. Focuses on the design and execution of content analytic studies, including manifest vs. latent content, measurement issues, reliability and validity assessment, computer text analysis, and traditional human-coder techniques. Prerequisite: junior, senior or grad standing; COMM 106/206 or an equivalent course in basic social science research.

4-5 units, Win (Voelker, D)

**COMM 223. Attitude Change and Persuasion**

(Same as COMM 123) What attitudes are, how they are measured, and the dynamics of their formation, maintenance and change. Central and peripheral routes to attitude change; source, channel and receiver factors; attitude-behavior consistency; the roles of involvement, elaboration, affect and social influence. Note: this is not a how-to course in persuasion for practitioners, but a grounding in the conceptual foundations of attitude change and a survey of prevailing theories.

4-5 units, Spr (Voelker, D)

**COMM 225. Perspectives on American Journalism**

(Same as COMM 125) (Graduate students register for COMM 225.) An examination of the practice of American journalism, focusing on the political, social, cultural, economic and technological forces that have shaped the U. S. press since the early 1800s. Aimed at consumers as well as producers of news, the objective of this course is to provide a framework and vocabulary for judging the value and quality of everyday journalism.

4-5 units, Aut (Glasser, T)

**COMM 231. Media Ethics and Responsibility**

(Same as COMM 131) (Graduate students register for COMM 231.) The development of professionalism among American journalists, emphasizing the emergence of objectivity as a professional and the epistemological norm. An applied ethics course where questions of power, freedom, and truth autonomy are

treated normatively so as to foster critical thinking about the origins and implications of commonly accepted standards of responsible journalism.

4-5 units, not given this year

**COMM 234. Public Participation and Public Policy**

(Same as COMM 134) Examines the role of public participation in public policy making. Around the world, policymakers seek to engage their publics. But, even though public participation is important, it is also problematic. Public meetings can become dysfunctional and turn into media spectacles instead of actually gathering the opinions of the public. The question becomes, when and how should the public be consulted in order to effectively impact public policies? There are consequences of engaging the public, and this seminar explores the methods used to engage publics around the world.

4-5 units, not given this year

**COMM 237. The Dialogue of Democracy**

(Same as AMSTUD 137, COMM 137W, POLISCI 232T, POLISCI 332T) All forms of democracy require some kind of communication so people can be aware of issues and make decisions. This course looks at competing visions of what democracy should be and different notions of the role of dialogue in a democracy. Is it just campaigning or does it include deliberation? Small scale discussions or sound bites on television? Or social media? What is the role of technology in changing our democratic practices, to mobilize, to persuade, to solve public problems? This course will include readings from political theory about democratic ideals - from the American founders to J.S. Mill and the Progressives to Joseph Schumpeter and modern writers skeptical of the public will. It will also include contemporary examinations of the media and the internet to see how those practices are changing and how the ideals can or cannot be realized.

4-5 units, Win (Fishkin, J)

**COMM 240. Digital Media Entrepreneurship**

(Same as COMM 140) (Graduate students register for COMM 240.) Primarily for graduate journalism and computer science students. Silicon Valley's new media culture, digital storytelling skills and techniques, web-based skills, and entrepreneurial ventures. Guest speakers.

3-5 units, Spr (Grimes, A)

**COMM 247. Modern History and Future of Journalism**

(Same as COMM 147) (Graduate students register for COMM 247.) The birth and evolution of local and national television news. The modern history of newspapers. Can they survive in the era of online journalism?

4-5 units, Spr (Brinkley, J)

**COMM 256. Negotiation and Influence**

(Same as COMM 156, EDUC 256C) No matter how excellent your ideas, most significant achievements require the ability to communicate with and influence others. This course examines the theory, research, and practice of negotiation across a variety of settings. It provides multiple opportunities for students to develop negotiation skills through role-plays, exercises, and useful analytical frameworks. Topics include: distributive and integrative bargaining, psychological biases, lessons from game theory, principles of influence, multiparty negotiation, and the value of relationships and trust. The course meets intensively over a highly condensed period of time. Intended for graduate students and advanced undergraduates. No prerequisites. Limited enrollment; advance application required; see <http://comm.stanford.edu/faculty/curhan>

1-2 units, Aut (Staff), Win (Curhan, J), Spr (Staff)

**COMM 260. The Press and the Political Process**

(Same as COMM 160, POLISCI 323R) (Graduate students register for COMM 260.) The role of mass media and other channels of communication in political and electoral processes.

4-5 units, not given this year

**COMM 262. Campaigns, Voting, Media, and Elections**

(Same as COMM 162, POLISCI 120B) This course examines the theory and practice of American campaigns and elections. First, we will attempt to explain the behavior of the key players -- candidates, parties, journalists, and voters -- in terms of the institutional arrangements and political incentives that confront

them. Second, we will use current and recent election campaigns as laboratories for testing generalizations about campaign strategy and voter behavior. Third, we examine selections from the academic literature dealing with the origins of partisan identity, electoral design, and the immediate effects of campaigns on public opinion, voter turnout, and voter choice. As well, we'll explore issues of electoral reform and their more long-term consequences for governance and the political process.

*4-5 units, Win (Iyengar, S)*

**COMM 264. The Psychology of Communication About Politics in America**

(Same as COMM 164, POLISCI 224L, PSYCH 170) Focus is on how politicians and government learn what Americans want and how the public's preferences shape government action; how surveys measure beliefs, preferences, and experiences; how poll results are criticized and interpreted; how conflict between polls is viewed by the public; how accurate surveys are and when they are accurate; how to conduct survey research to produce accurate measurements; designing questionnaires that people can understand and use comfortably; how question wording can manipulate poll results; corruption in survey research. Preference to juniors, seniors, graduate students.

*4 units, Spr (Krosnick, J)*

**COMM 266. Virtual People**

(Same as COMM 166) (Graduate students register for COMM 266.) The concept of virtual people or digital human representations; methods of constructing and using virtual people; methodological approaches to interactions with and among virtual people; and current applications. Viewpoints including popular culture, literature, film, engineering, behavioral science, computer science, and communication.

*4-5 units, Spr (Bailenson, J)*

**COMM 268. Experimental Research in Advanced User Interfaces**

(Same as COMM 168, COMM 368, ME 468) Project-based course involves small (3-4) person teams going through all parts of the experimental process: question generation, experiment design, running, and data analysis. Each team creates an original, publishable project that represents a contribution to the research and practicum literatures. All experiments involve interaction between people and technology, including cars, mobile phones, websites, etc. Prerequisite: consent of instructor.

*1-5 units, not given this year*

**COMM 269. Computers and Interfaces**

(Same as COMM 169) (Graduate students register for COMM 269.) Interdisciplinary. User responses to interfaces and design implications of those responses. Theories from different disciplines illustrate responses to textual, voice-based, pictorial, metaphorical, conversational, adaptive, agent-based, intelligent, and anthropomorphic interfaces. Group design project applying theory to the design of products or services for developing countries.

*4-5 units, not given this year*

**COMM 271. Multimedia Reporting and Production for Public Issues**

(Same as COMM 171) (Graduate students register for 271.) Production of multimedia assignments for traditional news beats using audio, still photography, graphics and video. 2-hour lab class for creative, conceptual and technical skills for production of multimedia stories. Prerequisite: Journalism MA student or instructor's consent.

*3-5 units, Win (Migielicz, G)*

**COMM 272. Media Psychology**

(Same as COMM 172) (Graduate students register for COMM 272.) The literature related to psychological processing and the effects of media. Topics: unconscious processing; picture perception; attention and memory; emotion; the physiology of processing media; person perception; pornography; consumer behavior; advanced film and television systems; and differences among reading, watching, and listening.

*4-5 units, Spr (Reeves, B)*

**COMM 273. Public Issues Reporting I**

Reporting and writing on government and public policies and issues; their implications for the people and the press. Required for journalism M.A. students.

*3-4 units, Aut (Brenner, R)*

**COMM 274. Public Issues Reporting II**

Almost everything a journalist writes about involves government, either directly or indirectly. In this course we learn about the hidden forces that control government decisions: lobbying, campaign finance, budgets and more. Students write stories and do two accompanying multimedia pieces. Prerequisites: 273, Journalism M.A. student.

*3-4 units, Win (Brinkley, J)*

**COMM 275. Multimedia Storytelling: Reporting and Production Using Audio, Still Images, and Video**

Multimedia assignments coordinated with deadline reporting efforts in COMM 273 from traditional news beats using audio, still photography, and video. Use of digital audio recorders and audio production to leverage voice-over narration, interviews, and natural sound; use of digital still cameras and audio to produce audio slideshows; and the combination of these media with video in post-production with Final Cut Pro. Prerequisite: Journalism M.A. student. Corequisite: COMM 273.

*4 units, Aut (Migielicz, G)*

**COMM 276. Advanced Digital Media Production**

(Same as COMM 176) In-depth reporting and production using audio, images and video. Focus on an in-depth journalism project with appropriate uses of digital media: audio, photography, graphics, and video. Topics include advanced field techniques and approaches (audio, video, still) and emphasis on creating a non-fiction narrative arc in a multimedia piece of 10-12 minutes. Prerequisite: COMM 275 or consent of instructor

*4-5 units, Spr (Migielicz, G)*

**COMM 277C. Specialized Writing and Reporting: Environmental Journalism**

(Same as COMM 177C, ENVRES 277C) (Graduate students register for COMM / ENVRES 277C.) Practical, collaborative, writing-intensive course in science-based environmental journalism. Science and journalism students learn how to identify and write engaging stories about environmental issues and science, how to assess the quality and relevance of environmental news, how to cover the environment and science beats effectively, and how to build bridges between the worlds of journalism and science. Limited enrollment: preference to journalism students and students in the natural and environmental sciences. Prerequisite: COMM 104, ENVRES 200 or consent of instructor. Admissions by application only, available from thayden@stanford.edu and due 3/28/12.

*4-5 units, Spr (Hayden, T)*

**COMM 277D. Specialized Writing and Reporting: Magazine Journalism**

(Same as COMM 177D) (Graduate students register for COMM 277D.) How to report, write, edit, and read magazine articles, emphasizing long-form narrative. Tools and templates of story telling such as scenes, characters, dialogue, and narrative arc. How the best magazine stories defy or subvert conventional wisdom and bring fresh light to the human experience through reporting, writing, and moral passion. Prerequisite: 104 or consent of instructor.

*4-5 units, Spr (Brenner, R)*

**COMM 277G. Specialized Writing and Reporting: Covering Silicon Valley**

(Same as COMM 177G) (Graduate students register for COMM 277G.) Business reporting basics in the context of Silicon Valley's technology scene. Prerequisite: 104 or consent of instructor.

*4-5 units, Win (Grimes, A)*

**COMM 277I. Specialized Writing and Reporting: Investigative Reporting**

(Same as COMM 177I) Graduate students register for COMM 277I.) Under the supervision of editors from the Center for Investigative Reporting, students will work on a group investigative project with the end-goal of publication and distribution through CIR's California Watch project. The class will emphasize the history and role of investigative reporting as well as skills and techniques needed to do it. Limited enrollment. Prerequisite: instructor consent. Go to <http://comm.stanford.edu/faculty/grimes> for application instructions.

4-5 units, not given this year

**COMM 277K. Specialized Writing and Reporting: Human Rights Journalism**

(Same as COMM 177K) (Graduate students register for COMM 277K.) The evolution of human rights law and enforcement, and the role of journalists in uncovering, pursuing, and publicizing political violence, detention, and torture. Case studies from S. Africa, Latin America, Israel and Palestine, N. Ireland, Bosnia, Rwanda, and Sudan and Darfur. Human rights issues in the U.S. in the aftermath of 9/11. Students conduct research and write journalistic reports on foreign and domestic issues. Prerequisite: 104 or consent of instructor.

4-5 units, not given this year

**COMM 277S. Specialized Writing and Reporting: Sports Journalism**

(Same as COMM 177S) (Graduate students register for COMM 277S.) Workshop. The history of sports writing from the 20s to present. Reporting, interviewing, deadline writing, and how to conceptualize and develop stories. Students write features and news stories for publication in a new sports section in 'The Cardinal Inquirer', an online publication of the graduate program in journalism. Prerequisite: 104 or consent of instructor.

4-5 units, Win (Pomerantz, G)

**COMM 277Y. Specialized Writing and Reporting: Foreign Correspondence in the Middle East and Asia**

(Same as COMM 177Y) (Graduate students register for COMM 277Y.) What's involved in working as a foreign correspondent in these important and volatile parts of the world, where in many cases journalists are not respected and may face danger -- taught by a journalist who has worked extensively in both regions. (no pre-requisites)

4-5 units, Aut (Brinkley, J)

**COMM 278. Journalism and Imaginative Writing in America**

(Same as AMSTUD 257, ENGLISH 257) Walt Whitman spent twenty-five years as a journalist before publishing his first book of poems. Mark Twain was a journalist for twenty years before publishing his first novel. Topics include examination of how writers; backgrounds in journalism shaped the poetry or fiction for which they are best known; study of recent controversies surrounding writers who blurred the line between journalism and fiction. Writers include Whitman, Fanny Fern, Twain, Pauline Hopkins, Theodore Dreiser, Charlotte Perkins Gilman, Ernest Hemingway, Meridel LeSueur.

5 units, not given this year

**COMM 280. Topics in Learning and Technology: Core Mechanics for Learning**

(Same as COMM 180, CS 377H, EDUC 328X) Contents of the course change each year. The course can be repeated. In game play, core mechanics refers to the rules of interaction that drive the game forward. This class will consider whether there are core mechanics that can drive learning forward, and if so, how to build them into learning environments.

3 units, Win (Schwartz, D)

**COMM 282. Virtual Communities and Social Media**

(Same as COMM 182) (Graduate students register for COMM 282.) Students will take away from this course a set of conceptual tools, a vocabulary, and an analytical framework with which to recognize, understand, and more effectively manage new social practices online, together with a familiarity with the literature regarding social media and identity, community, collective action, public sphere, social capital, networks, and social networks. Students will also develop skills at using online forums, blogs, microblogs, wikis for research, collaboration, and communication. Limited enrollment. Prerequisite: instructor consent. Go to <http://comm.stanford.edu/faculty/rheingold/> for application instructions.

4-5 units, Aut (Rheingold, H)

**COMM 289. Journalism Master's Project**

4 units, Spr (Staff)

**COMM 290. Media Studies M.A. Project**

Individual research for coterminal Media Studies students.

1 unit, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**COMM 291. Graduate Journalism Seminar**

Required of students in the graduate program in Journalism. Forum for current issues in the practice and performance of the press. The seminar frequently features Bay Area Journalists as guest speakers. May be repeated for credit.

1 unit, Aut (Grimes, A), Win (Brinkley, J), Spr (Brenner, R)

**COMM 299. Individual Work**

1-4 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**COMM 301. Communication Research, Curriculum**

**Development and Pedagogy**

Designed to prepare students for teaching and research in the Department of Communication. Students will be trained in developing curriculum and in pedagogical practices, and will also be exposed to the research programs of various faculty members in the department. Required of all Ph.D. students.

1 unit, Aut (Bailenson, J)

**COMM 307. Summer Institute in Political Psychology**

Lectures, discussion groups, and workshops addressing many applications of psychology to the analysis of political behavior. Public opinion, international relations, political decision-making, attitudes and beliefs, prejudice, social influence and persuasion, terrorism, news media influence, foreign policy, socialization, social justice.

3 units, Sum (Staff)

**COMM 308. Graduate Seminar in Political Psychology**

(Same as POLISCI 324) For students interested in research in political science, psychology, or communication. Methodological techniques for studying political attitudes and behaviors. May be repeated for credit.

1-3 units, Aut (Krosnick, J), Win (Krosnick, J), Spr (Krosnick, J)

**COMM 310. Method of Analysis Program in the Social Sciences**

(Same as ANTHRO 446A) Colloquium series. Creation and application of new methodological techniques for social science research. Presentations on methodologies of use for social scientists across departments at Stanford by guest speakers from Stanford and elsewhere. See <http://mapss.stanford.edu>.

1 unit, not given this year

**COMM 311. Theory of Communication**

Basic communication theory for first-year Ph.D. students in the Department of Communication. Introduction to basic writings and concepts in communication research. The goal is an introduction to issues in the field that are common in communication research. First half of the class will emphasize classic literature about field organization, history and theory. Second half will emphasize contemporary theory in areas that students select.

1-5 units, Aut (Reeves, B)

**COMM 312. Models of Democracy**

(Same as COMM 212, POLISCI 237, POLISCI 337) Ancient and modern varieties of democracy; debates about their normative and practical strengths and the pathologies to which each is subject. Focus is on participation, deliberation, representation, and elite competition, as values and political processes. Formal institutions, political rhetoric, technological change, and philosophical critique. Models tested by reference to long-term historical natural experiments such as Athens and Rome, recent large-scale political experiments such as the British Columbia Citizens' Assembly, and controlled experiments.

3-5 units, not given this year

**COMM 314. Doctoral Research Methods II B**

Part of the doctoral research methods sequence. Focus is on the logic of qualitative research methods and modes of inquiry relevant to the study of communication and meaning. Prerequisite: Communication Ph.D. student, or consent of instructor.

1-5 units, Win (Glasser, T)

**COMM 317. Doctoral Research Methods I**

Approaches to social science research and their theoretical presuppositions. Readings from the philosophy of the social sciences. Research design, the role of experiments, and quantitative and qualitative research. Cases from communication and related social sciences. Prerequisite: consent of instructor.

1-5 units, Spr (Fishkin, J)

**COMM 318. Doctoral Research Methods II**

An introduction to a broad range of social science research methods that are widely used in PhD work. Prerequisite: consent of instructor.

*1-5 units, Win (Krosnick, J)*

**COMM 320G. Advanced Topics in New Media and American Culture**

This course deals with advanced issues in computing and American cultural history since World War II. Primarily for Ph.D. students. Prerequisite: 220 or consent of instructor.

*1-5 units, not given this year*

**COMM 325G. Comparative Studies of News and Journalism**

Focus is on topics such as the roles and responsibilities of journalists, news as a genre of popular literature, the nexus between press and state, and journalism's commitment to political participation.

*1-5 units, Spr (Glasser, T)*

**COMM 326. Advanced Topics in Human Virtual Representation**

Topics include the theoretical construct of person identity, the evolution of that construct given the advent of virtual environments, and methodological approaches to understanding virtual human representation. Prerequisite: consent of instructor.

*1-5 units, Spr (Bailenson, J)*

**COMM 331G. Communication and Media Ethics**

Limited to Ph.D. students. Advanced topics in press ethics and responsibility. Prerequisite: 231 or consent of instructor.

*1-3 units, not given this year*

**COMM 360G. Political Communication**

(Same as POLISCI 425) An overview of research in political communication with particular reference to work on the impact of the mass media on public opinion and voting behavior. Limited to Ph.D. students. Prerequisite: 260 or consent of instructor.

*1-5 units, Spr (Iyengar, S)*

**COMM 368. Experimental Research in Advanced User Interfaces**

(Same as COMM 168, COMM 268, ME 468) Project-based course involves small (3-4) person teams going through all parts of the experimental process: question generation, experiment design, running, and data analysis. Each team creates an original, publishable project that represents a contribution to the research and praction literature. All experiments involve interaction between people and technology, including cars, mobile phones, websites, etc. Prerequisite: consent of instructor.

*1-5 units, not given this year*

**COMM 372G. Seminar in Psychological Processing**

Limited to Ph.D. students. Advanced topics. Prerequisite: 272 or consent of instructor.

*1-5 units, Win (Reeves, B)*

**COMM 379. History of the Study of Communication**

The origins of communication/media theory and research emphasizing the rise of communication as a separate field of study. The influence of schools of thought concerning the scope and purpose of the study of communication. Readings include foundational essays and studies. Prerequisite: Ph.D. student or consent of instructor.

*1-5 units, not given this year*

**COMM 380. Curriculum Practical Training**

Practical experience in the communication industries. Prerequisites: graduate standing in Communication, consent of instructor. Meets requirements for Curricular Practical Training for students on F-1 visas. 380 May be repeated four times for credit. (Staff)

*1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**COMM 386. Media Cultures of the Cold War**

(Same as ARTHIST 475) The intersection of politics, aesthetics, and new media technologies in the U.S. between the end of WW II and the fall of the Berlin Wall. Topics include the aesthetics of thinking the unthinkable in the wake of the atom bomb; abstract expressionism and 'modern man' discourse; game theory, cybernetics, and new models of art making; the rise of television, intermedia, and the counterculture; and the continuing influence of the early cold war on contemporary media aesthetics. Readings

from primary and secondary sources in art history, communication, and critical theory.

*3-5 units, Spr (Turner, P; Lee, P)*

**COMM 397. Complementary Project**

Individual research for Ph.D. candidates.

*1-6 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**COMM 398. Major Research Project**

Individual research for Ph.D. candidates.

*1-6 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**COMM 399. Advanced Individual Work**

*1-9 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**COMM 801. TGR Project**

*0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

**COMM 802. TGR Dissertation**

*0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)*

## COMPARATIVE LITERATURE (COMPLIT) COURSES

### UNDERGRADUATE COURSES IN COMPARATIVE LITERATURE

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**COMPLIT 10N. Shakespeare and Performance in a Global Context**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. The problem of performance including the performance of gender through the plays of Shakespeare. In-class performances by students of scenes from plays. The history of theatrical performance. Sources include filmed versions of plays, and readings on the history of gender, gender performance, and transvestite theater. GER:DB-Hum, EC-Gender

*3 units, Spr (Parker, P)*

**COMPLIT 11Q. Shakespeare, Playing, Gender**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Focus is on several of the best and lesser known plays of Shakespeare, on theatrical and other kinds of playing, and on ambiguities of both gender and playing gender. GER:DB-Hum, EC-Gender

*3 units, Win (Parker, P)*

**COMPLIT 49. What is Nobel Literature? Reading, Assessing, and Interpreting the Nobel Novels on the World Stage**

Recent Nobel laureates in literature: Gabriel García Márquez, Nadine Gordimer, Toni Morrison, Kenzaburo Oe, and V.S. Naipaul. These writers come from different locations, yet each participates in a global conversation about the human condition. The impact of their identities upon their thought and writing. How the Nobel prize is awarded. The role of literature in the world, and analytical skills for reading literary texts. GER:DB-Hum, EC-GlobalCom

*5 units, Sum (Staff)*

**COMPLIT 50Q. Is God Dead?**

(Same as GERLIT 120Q) A consideration of Nietzsche's claim that God is dead in relation to other texts of German literature and philosophy. The status of religious faith in relation to modernity and secularization; religion and science; culture and faith. Readings in German include selections from sacred and liturgical texts; fictional depictions of religious experience; religion in poetry; German theories of religion. Authors to be studied include Rilke, Hesse, Weiss, Schöder, Buber, Sachs, Haecker, Weber, Taubes, Ratzinger. GER:DB-Hum

*3-5 units, not given this year*

**COMPLIT 51N. Comparative Fictions of Ethnicity**

(S,Sem) (Same as AMSTUD 51N, CSRE 51N) Stanford Introductory Seminar. We may know who we are, but we are, after all, social creatures. How does our sense of self interact with those around us? How does literature provide a particular medium for not only self expression, but also for meditations on what goes into the construction of the Self? After all, don't we tell stories in

response to the question, who are you? Besides a list of nouns and names and attributes, we give our lives flesh and blood in telling how we process the world. Our course focuses in particular on this question--Does this universal issue (who am I) become skewed differently when we add a qualifier before it, like ethnic?  
GER:DB-Hum

5 units, Win (*Palumbo-Liu, D*)

#### COMPLIT 101. What is Literature?

How critics and authors from different eras and different parts of the globe have considered how literature, as a traditional cultural form, can or cannot, help to sustain societies faced with concrete historical crises such as war, revolution, and colonization. How the aesthetic work of verbal art has been seen to offer the possibility of continuity in the face of change. What, if anything, can be continued? How does art perhaps aid in accommodating change?  
GER:DB-Hum

5 units, Aut (*Saldivar, J*)

#### COMPLIT 110. Introduction to Queer Literary Studies

Introduction to the comparative literary study of important gay, lesbian, queer, bisexual, and transgender writers and their changing social, political, and cultural contexts from the 1890s to today: Wilde, Gide, Lucie Delarue-Mardrus, Radclyffe Hall, E.M. Forster, Thomas Mann, Georges Bataille, James Baldwin, Jean Genet, Jeanette Winterson, Sarah Waters, Audre Lorde, discussed in the context of 20th-century feminist and queer literary and social theories of gender and sexuality (Judith Butler, Eve Sedgwick, Julia Serano, and others). GER:DB-Hum

3-5 units, Win (*Dierkes-Thrun, P*)

#### COMPLIT 110N. Du Fu: The Case for Chinese Poetry

(F,Sem) Stanford Introductory Seminar. When one asks: what is a classic? one expects the title of a big novel as the response. This course argues the case for the classical Chinese poetry of the author who has the rightful claim of the greatest poet in Chinese history, Du Fu (712-770). We will look at how poetry focuses on the chemistry of language - the ways words can be put together just so to create specific catalytic conversations of meaning; the engineering of language - the ways specific structures build on and create certain distributions of energy and mass. We will learn to appreciate Du Fu's wit, compassion, learnedness and critical powers and to appreciate as well how poetry can illustrate the evocative and expressive power of language. GER:IHUM-3

4 units, Spr (*Palumbo-Liu, D*)

#### COMPLIT 115. Nabokov in the Transnational Context

(Same as COMPLIT 215, SLAVGEN 156, SLAVGEN 256) Nabokov's techniques of migration and camouflage as he inhabits the literary and historical contexts of St. Petersburg, Berlin, Paris, America, and Switzerland. His early and late stories, last Russian novel *The Gift*, *Lolita* (the novel and screenplay), and *Pale Fire*. Readings in English. Russian speakers will be encouraged to read Russian texts in original. GER:DB-Hum

3-5 units, Aut (*Greenleaf, M*)

#### COMPLIT 118. Women Poets of Iran: 1797-1967

This course traces the emergence of a female voice in Persian poetry and prose writing in the 19th and 20th centuries and, although focused on women's poetry, it will also explore the contribution of women to the wider Iranian literary scene during this period, one of the most turbulent of modern Iranian history. Starting at the dawn of the 19th century, this course will first examine the existing, indigenous tradition of women's poetry in Qajar Iran, in particular that of the Fath-'Ali Shah period (1797-1834). The focus of the course will then shift to the emergence of liberalist, modernist, and proto-feminist poets and writers in the late 19th and early 20th centuries, moving to women poets' subsequent reconfiguration of (and ultimate break with) classical poetic forms. The course will culminate in an in-depth discussion of the iconoclastic and disruptive figures of Simin Behbahani (b.1927) and Forugh Farrokhzad (1935-1967), key figures in the development of Persian poetry in the late 20th century. GER:DB-Hum

3-5 units, Aut (*Brookshaw, D*)

#### COMPLIT 121. The Ghazal: The Origins, Evolution, and Migration of a World Poetic Genre

This course will explore the origins, evolution, and migration of one of the world's great poetic genres, the ghazal (short lyric poem, usually on love). Starting with a discussion of the origins of the

genre in the late pre-Islamic and early Islamic periods in Arabic and Persian, the course will then move to an examination of the evolution of the genre in the early medieval Islamic period in those languages, and the subsequent emergence of the ghazal in the related literatures of Ottoman Turkish and Urdu. We will then consider European translations of selected Persian ghazals in the 18th and 19th centuries, the effect of these translations on contemporary European poetry, and the migration of the genre into English in the late 19th/early 20th centuries. The course will end with close reading of ghazals written in English by diasporic poets of Middle Eastern and South Asian descent writing in the US and the UK. GER:DB-Hum

5 units, Win (*Brookshaw, D*)

#### COMPLIT 122. Literature as Performance

Theater as performance and as literature. The historical tension between performance and sexuality in the Western tradition since Greek antiquity. Non-European forms and conventions of performance and theatricality. The modern competition between theater and other forms of performance and media such as sports, film, and television. Sources include: classical Japanese theater; ancient Greek tragedy and comedy; medieval theater in interaction with Christian rituals and its countercultural horizons; the classical age of European theater including Shakespeare, Lope de Vega, and Molière. GER:DB-Hum

5 units, Spr (*Greenleaf, M*)

#### COMPLIT 123. Novels about China: Tradition and Modernity

Short novels by Chinese and Western writers about Chinese experience and culture in the interconnected and conflicted world between East and West. Topics include the persistence of tradition and premodern lifestyle and morality in modern changes, reform and revolution. We will also discuss the individual, society and gender issues and take a global, comparative approach to texts. GER:DB-Hum

5 units, Spr (*Wang, B*)

#### COMPLIT 125A. The Gothic Novel

(Same as ENGLISH 125A) The Gothic novel and its relatives from its invention by Walpole in *The Castle of Otranto* of 1764. Readings include: *Northanger Abbey*, *The Italian*, *The Monk*, *Frankenstein*, *Jane Eyre*, *Great Expectations*, and *Dracula*. What defines the Gothic as it evolves from one specific novel to a mode that makes its way into a range of fictional types? GER:DB-Hum

5 units, not given this year

#### COMPLIT 128. Survivors: Stories of Staying Alive

From deserted islands and nuclear wastelands to dangerous frontiers and zombie attacks -- this course explores aesthetic and intellectual issues in survival narratives both fictional and non-fictional: individualism and/or community; self-sufficiency and DIY movements; categorizations of good/evil, civilization/barbarity; survival as adventure; frontier experience. *Survivor's* guilt, trauma, and the moral ambiguities of human agency (such as violence or environmental impact). Readings from authors such as DeFoe, Steinbeck, Murakami, Spiegelman, Atwood, McCarthy, Auster, and Brooks. Examples in film, television and popular culture.

3-5 units, Spr (*Becerra Videgar, A*)

#### COMPLIT 129A. Contemporary Persian Poetry: Encounter of a Thousand-Year-Old Classical Tradition with Modernity

The primacy of poetic expression in Persian culture in the transition from tradition to modernity. Major 20th-century poets in relation to historical events and social change. Authors include: Nima Yushij, Ahmad Shamlou, Sohrab Sepehri, Mehdi Akhavan Sales, Forough Farrokhzad, Nader Naderpour, Fereydoun Moshiri, Esmail Kho'i, and Afghan and Tajik poets.

5 units, not given this year

#### COMPLIT 130A. Of Wine, Women, and Boys: Re-visiting Medieval Islamic Culture Through Texts

This course will examine elements of medieval Islamic culture which have stereotypically been considered taboo. The texts read will comprise a broad range of medieval Arabic and Persian poetry and prose in English translation. This course will focus on elements of culture that, although technically at odds with a strict understanding of Islamic law, were integral to the majority of medieval Muslim societies. GER:DB-Hum

3-5 units, Spr (*Brookshaw, D*)

**COMPLIT 131. The Decadent 1890s**

(Same as COMPLIT 231A) This course introduces you to major works of literature of Decadent literature and culture in the European fin de siècle, focusing on the artistic and social culture of London, Paris, Vienna, and Berlin in the 1870s-1900s. Among the topics to be studied are the interconnections between the movements of Decadence, Aestheticism and Symbolism; theories of cultural decay and degeneration; the culture wars of the 19th century; stereotypes of gender, specifically the Dandy and the New Woman; the influence of sexology (regarding homosexuality and sexual transgression); cultural and legal attitudes toward sexual perversity; and homosexuality; the rise of Wagnerism and theories of Gesamtkunstwerk on the stage; and the period of cultural transition from Decadence to Modernism. We will read works by Mallarmé, Baudelaire, Wilde, Strindberg, Huysmans, Nordau, Nietzsche, Wedekind, Ibsen, Michael Field (Katherine Bradley and Edith Cooper) and various New Woman writers such as George Egerton, Victo GER:DB-Hum

3-5 units, Aut (*Dierkes-Thrun, P*)

**COMPLIT 133. Gender and Modernism**

Gender and sexuality in trans-Atlantic modernist literature and culture from the 1880s-1930s. Topics include the 19th-century culture wars and the figures of the dandy and the New Woman; modernist critiques of Enlightenment rationality; impact of World War I on gender roles; gender and the rise of modern consumer culture, fashion, design; the modernist metropolis and gender/sexuality; the avant-garde and gender; literary first-wave feminism; homoerotic modernism; modernism in the context of current theories of gender and sexuality. GER:DB-Hum

3-5 units, Win (*Dierkes-Thrun, P*)

**COMPLIT 135. Chinese Cultural Revolution: Performance, Politics, and Aesthetics**

(Same as CHINLIT 190, CHINLIT 290) Events, arts, films, and operas of the Chinese Cultural Revolution. Analysis of political passion, aesthetics, and psychology of mass movements. Places the Cultural Revolution in the long-range context of art, social movements, and politics. Chinese language is not required.

4 units, not given this year

**COMPLIT 137. War Creations: World War II and the Novel**

World War II, with its unprecedented atrocities, ideological disputes, and engaged intellectuals, also threw into question the role of the novel and its relationship to society and to history, influencing literature, theory, and literary criticism in the decades that followed. How might we define an engaged author or a political novel? What are the different approaches of novelists to the war and its ideologies, and how does this differ between countries? How far might the novel venture into allegory, memoir, and political propaganda and still remain a novel? How does fiction recreate, revise, and help examine the horrific momentum of fanatical politics and the consequences, and how does it do this differently from journalism and historical writing? Finally, how might the breakdown of linear narratives relate to attempts to tell about the war? The course will address these questions through reading excerpts from theoretical texts in conjunction with works by a range of auth GER:DB-Hum

3-5 units, Aut (*Lewis, K*)

**COMPLIT 140B. Love à la Turque: Tales of Love in Turkish Literature**

(Same as COMPLIT 240B) This course will introduce students whose command of the Turkish language is at an advanced level to the theme of romantic love in Turkish literature, with particular attention to key classical and contemporary works that influenced the development of Turkish literary tradition. Classes will include close reading and discussion of folk tales, poems, short stories, and plays with particular attention to characters of lover/beloved and theme of romantic love and to how these elements are related to cultural and historical background. We will begin with essential examples of ghazels from Ottoman court poetry to explore the notion of ç courtly loveç and move to the most influential texts of 19th and 20th centuries. Although main emphasis will be on content and textual analysis, we will cover grammar and vocabulary issues as needed. Objectives of the course are 1) help students reach the level of proficiency to read and understand prose and verse of moderate difficulty in Turkish language,

3-5 units, Win (*Richardson, B*)

**COMPLIT 141. Literature and Society in Africa and the Caribbean**

(Same as FRENLIT 133) The course is reading, analysis and discussion of some of the most representative texts by 20th century Francophone writers from a variety of locations: the French Caribbean, Africa North and South of the Sahara. These works convey the changing aspects of Francophone Africa and the French Caribbean societies and cultures: from oral to written, colonization and changes, tradition competing with modernity, particularly for women, building new identities immigration narrative. The course aims to broaden knowledge of the Francophone societies and cultures, as well as improve skills in speaking and writing in French. Lectures and discussions are conducted in French, most required readings and background material are in French as well. Reading in fiction, poetry and theater include Laye Camara, Ferdinand Oyono, Maryse Condé, Aimé Césaire, Leïla Sebbar, Mariama Ba, and others. Prerequisite: FRENLANG 124 or consent of instructor. GER:DB-Hum, EC-GlobalCom

4 units, Win (*Boyi, E*)

**COMPLIT 142. The Literature of the Americas**

(Same as AMSTUD 142, ENGLISH 172E) This course offers a wide-ranging overview of the literatures of the Americas in comparative perspective, emphasizing continuities and crises that are common to North American, Central American, and South American literatures as well as the distinctive national and cultural elements of a diverse array of primary works. Topics include the definitions of such concepts as empire and colonialism, the encounters between worldviews of European and indigenous peoples, the emergence of creole and racially mixed populations, slavery, the New World voice, myths of America as paradise or utopia, the coming of modernism, twentieth-century avant-gardes, and distinctive modern episodes; the Harlem Renaissance, the Beats, magic realism, Noigandres; in unaccustomed conversation with each other. GER:DB-Hum, EC-AmerCul

5 units, Win (*Greene, R; Saldivar, R*)

**COMPLIT 142A. What is Hemispheric Studies?**

This seminar brings together a range of exciting new comparative work in the burgeoning field of Americas' hemispheric studies. The seminar takes as its starting points such questions as: What happens to American literary, political, historical, and cultural studies if we recognize the interdependency of nation-state developments throughout all the Americas? What happens if we recognize the nation as historically evolving and contingent rather than already formed? Finally, what happens if the âççfixedâçç borders of a nation are recognized not only as historically produced political constructs but also as component parts of a deeper, more multilayered series of national and indigenous histories? GER:DB-Hum

5 units, Spr (*Saldivar, J*)

**COMPLIT 144. Interplay between Turkish Cinema and Literature**

(Same as COMPLIT 244A) Turkish cinema has looked to literature for inspiration and for its stories since its inception. In recent years, the relationship between literature and film in Turkey has become more complex and reciprocal. We will explore the interplay between the two by focusing on adaptations and inspirations as well as less traditional modes of interaction such as interpretation and intertextuality. The scope of discussions will include themes like masculinity, representation of women, honor killings, the divide between East and West, as well as the problems of translation from one medium to another. Among the directors and writers whose works will watch and read are Yaçar Kemal, Orhan Pamuk, Yavuz Turgul, and Dervîç Zaim. GER:DB-Hum

3-5 units, Aut (*Richardson, B*)

**COMPLIT 144A. Istanbul the Muse: The City in Literature and Film**

The multiple layers of culture and history in Istanbul, a city on two continents between East and West, have inspired great art and literature. The class focuses on the idea of inbetweenness through art, literature, music, and popular culture seen chronologically. In addition to discussing literary, historical, and academic texts we will explore visual genres such as advertising, architecture, caricature, documentary, film, and miniature painting. Readings and discussion in English. GER:DB-Hum

3-5 units, Spr (*Richardson, B*)

**COMPLIT 145A. Digital Codex: Religion, Literary Culture and Technology in South Asia**

(Same as RELIGST 108C) This course seeks to understand Hindu visual and performative culture through one epic Sanskrit narrative, that of the Mahabharata. It begins with the history of the epic's production and circulation in South Asian communities and continues with an exploration of its constructions of faith and duty. The course moves onto a consideration of the Mahabharata's latest avatars, especially in visual culture (paintings, theatre, graphic art, film and television). Lastly, the course explores questions of canon formation, literary genres and knowledge production in the digital age. GER:DB-Hum

3-5 units, Aut (Tiwari, B)

**COMPLIT 146. Asian American Culture and Community**

(Same as AMSTUD 146, ASNAMST 146S, CSRE 146S) An examination of the history of Asians in America via one case history: the International Hotel in San Francisco. Background history of Asians in America, and the specifics of the I Hotel case as involving the convergence of global and local economies, urban redevelopment, and housing issues for minorities. Focus on the convergence of community and cultural production. Service learning component involving community work at the Manilatown Heritage Foundation in San Francisco. Service Learning Course (certified by Haas Center). GER:DB-Hum

5 units, Spr (Palumbo-Liu, D)

**COMPLIT 148A. The Iranian Cinema: Image and Meaning**

(Same as COMPLIT 249A) This course will focus on the analysis of ten Iranian films with the view of conducting a discourse on the semiotics of Iranian art and culture. Each session will be designated to the viewing of a film by a prominent Iranian filmmaker. Students are expected to prepare for class by having previously examined other available films by the film-maker under consideration.

1-3 units, Aut (Beyzaie, B)

**COMPLIT 148B. Iranian Cinema in Diaspora**

(Same as COMPLIT 249B) Despite enormous obstacles, immigrant Iranian Filmmakers, within a few decades (after the Iranian revolution), have created a slow but steady stream of films outside Iran. They were originally started by individual spontaneous attempts from different corners of the world and by now we can identify common lines of interest amongst them. There are also major differences between them. These films have never been allowed to be screened inside Iran, and without any support from the global system of production and distribution, as independent and individual attempts, they have enjoyed little attention. Despite all this, Iranian cinema in exile is in no sense any less important than Iranian cinema inside Iran. In this course we will view one such film, made outside Iran, in each class meeting and expect to reach a common consensus in identifying the general patterns within these works and this movement. Questions such as the ones listed below will be addressed in our meetings each week: What

1-3 units, Win (Beyzaie, B)

**COMPLIT 148C. Contemporary Iranian Theater**

(Same as COMPLIT 249C) Today Iranian plays, both in traditional and contemporary styles, are staged in theater festivals throughout the world play their role in forming a universal language of theater which combine the heritages from countries in all five continents. Despite many obstacles, some Iranian plays have been translated into English and some prominent Iranian figures are successful stage directors outside Iran. Forty six years ago when Theater in Iran (a monograph on the history of Iranian plays) by Bahram Beyzaie was first published, it put the then contemporary Iranian theater movement--which was altogether westernizing itself blindly--face to face with a new kind of self-awareness. Hence in today's generation of playwrights and stage directors in Iran, all know something of their theatrical heritage. In this course we will spend some class sessions on the history of theater in Iran and some class meetings will be concentrating on contemporary movements and present day playwrights. Given the de

1-3 units, Spr (Beyzaie, B)

**COMPLIT 149. The Laboring of Diaspora & Border Literary Cultures**

(Same as CSRE 149) Focus is given to emergent theories of culture and on comparative literary and cultural studies. How do

we treat culture as a social force? How do we go about reading the presence of social contexts within cultural texts? How do ethno-racial writers re-imagine the nation as a site with many cognitive maps in which the nation-state is not congruent with cultural identity? How do diaspora and border narratives/texts strive for comparative theoretical scope while remaining rooted in specific local histories. GER:DB-Hum

3-5 units, Win (Saldivar, J)

**COMPLIT 151. Reality Check: Modes of Reality and Representation in the Age of Cyberculture**

In an age when phantasmal projections on the computer and smart phone screens rule our daily lives and disembodied fragments of our audio-visual/textual representations fly around the globe, the question of what is real and how is one to know what is real weighs us down with an ever-pressing urgency. This course explores different modes of reality and their literary representations that make ontological and epistemological inquiries into the concept and nature of the real. Readings include novels and short stories by Jorge Luis Borges, Stanislaw Lem, Philip K. Dick, William Gibson, Neil Stephenson and Murakami Haruki, and films (Ghost in the Shell, Inception). In English.

3-5 units, Win (Shin, H)

**COMPLIT 154. World Literature/World Health: Global Writing on Illness and Healing**

This class provides a survey of writing about health and medicine, primarily from non-Western (as well as a few Western) countries. While the focus is on literature, and an introductory literature class is strongly recommended as a prerequisite, we will also consider broader questions: literary and medical authority; private experience and the public sphere; and what the world, or worlds, in the course title might or might not be (according to different theories of globalization and cultural exchange). We will review a selection of critical approaches to literature and medicine and read texts from a variety of cultures and genres. The ideal student for this course would have a strong interest in both health care and writing, but everyone is welcome.

3-5 units, Win (Ferguson, J)

**COMPLIT 156A. States of Nature in Literature and Philosophy**

The state of nature, a hypothetical condition of human existence before the establishment of societies, is a device many early modern thinkers use to address questions about ethics, justice, and politics. Fusing biblical narrative and geometric reasoning, accounts of the state of nature illustrate the overlap and tension between religion, science and philosophy. Questions include whether philosophers and artists actually believe in the state of nature, how it was imagined differently in poetry, the novel, and philosophy, whether it was used to legitimize or undermine existing political structures, and why it is relevant in today's society. Selected readings from Hobbes, Locke, Milton, Defoe, Montaigne, Montesquieu, Diderot.

3-5 units, Aut (Hume, K)

**COMPLIT 181. Philosophy and Literature**

(Same as CLASSGEN 81, ENGLISH 81, FRENGEN 181, ITALGEN 181, GERGEN 181) Required gateway course for Philosophical and Literary Thought; crosslisted in departments sponsoring the Philosophy and Literature track: majors should register in their home department; non-majors may register in any sponsoring department. Introduction to major problems at the intersection of philosophy and literature. Issues may include authorship, selfhood, truth and fiction, the importance of literary form to philosophical works, and the ethical significance of literary works. Texts include philosophical analyses of literature, works of imaginative literature, and works of both philosophical and literary significance. Authors may include Plato, Montaigne, Nietzsche, Borges, Beckett, Barthes, Foucault, Nussbaum, Walton, Nehamas, Pavel, and Pippin. GER:DB-Hum

4-5 units, Win (Staff)

**COMPLIT 189A. Honors Research**

Senior honors students enroll for 5 units in Winter while writing the honors thesis, and may enroll in 189B for 2 units in Spring while revising the thesis. Prerequisite: DLCL 189.

5 units, Win (Staff)

**COMPLIT 189B. Honors Research**

Open to juniors with consent of adviser while drafting honors proposal. Open to senior honors students while revising honors thesis. Prerequisites for seniors: 189A, DLCL 189.

2 units, Spr (Staff)

**COMPLIT 190. Tolstoy's Anna Karenina in Dialogue with Contemporary Philosophical, Social, and Ethical Thought**

(Same as COMPLIT 290, SLAVGEN 190, SLAVGEN 290) Anna Karenina, the novel as a case study in the contest between modernity and tradition, their ethical order, ideology, cultural codes, and philosophies. Images of society, women and men in Tolstoy v. those of his contemporaries: Marx, Mill, Nietzsche, Weber, Durkheim, Freud. Open to juniors, seniors and graduate students. Requirements: three interpretive essays (500-1000 words each). Analysis of a passage from the novel; AK refracted through a philosophical prism and vice versa (30% each); class discussion and Forum (10%). GER:DB-Hum, DB-Hum, EC-EthicReas

3-5 units, Win (Freidin, G)

**COMPLIT 194. Independent Research**

(Staff)

1-5 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**COMPLIT 196. Incarceration as Inspiration: Russian and American Prison Narratives**

(Same as SLAVGEN 196) This course will employ a multitude of prison-related texts (letters, memoirs, short stories, historical accounts, films, and theoretical criticism) to explore the connection between incarceration and inspiration. Together we will examine the following questions: what is the link between creativity and the penitentiary? What is the allure of crime and the function of prison? What effect does the restriction of space have on the mind? How does life-writing versus fictional writing capture the prison experience? The quarter will culminate with a visit to an area correctional facility. GER:DB-Hum

3-5 units, Win (Draskoczy, J)

**COMPLIT 199. Senior Seminar: Narrative and Ethics**

Major terms of narratology; how different literary, cinematic, and popular culture narratives raise ethical issues, stir public debates and contribute to understanding human values. Readings include Biblical texts, Antigone, Kleist, Kafka, Coetzee, V for Vendetta, South Park, Kant, Arendt, Nussbaum, Rorty, and Levinas. GER:DB-Hum

5 units, Win (Eshel, A)

**COMPLIT 217. Hölderlin's Poetry**

(Same as GERLIT 217) A discussion of key poems by Friedrich Hölderlin with regard to themes including the utopian fatherland as mythological landscape; the idea of the Greek gods; the concept of poetry as event; and the emphatic now. The seminar also explores the relationship between the philosophy of history and poetic metaphor.

3-5 units, not given this year

**COMPLIT 218. The work of Luis Martín Santos in Mid-Twentieth Century Spain**

(Same as ILAC 229) First published in 1962, *Tiempo de Silencio* is the only book that the young psychiatrist Luis Martín Santos finished during his lifetime, and, although largely overlooked (even in Spain) until the present day, one of the great European novels of the 20th century. It brings to a complex convergence the evocation of Spain's decadent and run-down post-Civil War society with high-modernist literary procedures and (an implicit parody of) phenomenological analysis.

3-5 units, not given this year

**COMPLIT 223. Literary Diaries of Classic Modernity**

(Same as GERLIT 223) Focus is on self-analysis in works of key modern writers. Since Montaigne's *Essais* and Rousseau's *Confessions*, analysis of the self has been a central topic for modern literature. Texts include Baudelaire's *Intimate Journals*, Kafka's *Diaries*, Gide's *Journals*, Woolf's *Moments of Being*, Benjamin's *Berlin Childhood*, and Pavese's *Diaries*. Analysis of the self as polarizing between the imagination of a utopian childhood and self-deprivation.

3-5 units, not given this year

**COMPLIT 233. Baroque and Neobaroque**

(Same as ENGLISH 233, SPANLIT 293E) The literary, cultural, and political implications of the 17th-century phenomenon formed

in response to the conditions of the 16th century including humanism, absolutism, and early capitalism, and dispersed through Europe, the Americas, and Asia. If the Baroque is a universal code of this period, how do its vehicles, such as tragic drama, Ciceronian prose, and metaphysical poetry, converse with one another? The neobaroque as a complex reaction to the remains of the baroque in Latin American cultures, with attention to the mode in recent Brazilian literary theory and Mexican poetry.

5 units, not given this year

**COMPLIT 234. Conservative Revolution**

(Same as GERGEN 201) An examination of conservative critiques of modernity in the early 20th century, including topics such as German nationalism, the war experience, responses to democracy, anti-liberalism, cultural pessimism in the decline of the West, crises of authority, technology, geopolitics, existentialism, and tradition. Readings from authors such as Oswald Spengler, Thomas Mann, Carl Schmitt, Ernst Jünger, Hugo von Hofmannsthal, Rudolf Borchardt. Consideration of conservative exile authors such as Leo Strauss and Hannah Arendt. Readings in either English or German. GER:DB-Hum

3-5 units, Aut (Berman, R)

**COMPLIT 246A. Literature and Film of Modern Iran**

Iran's social structures, political system, cultural tendencies, and modern artistic culture.

3-5 units, not given this year

**COMPLIT 247. Modernism and the Jewish Voice in Europe**

(Same as GERGEN 221A, SLAVGEN 221) Some of the most haunting literary voices of the 20th century emerged from the Jewish communities of Eastern and Central Europe. The Jewishness of the modernists is thematized, asking whether it contributed to shared attitudes toward text, history, or identity. Their works are situated in specific linguistic traditions: Yiddish, Hebrew, Russian, Polish, or German. Primary readings from Ansky, Bialik, Mandelstam, Babel, Schulz, Kafka, Celan; secondary readings in history, E. European literature, and theory, including Marx, Freud, Benjamin, and Arendt. GER:DB-Hum

3-4 units, not given this year

**COMPLIT 256A. Dionysus - Mythology and Poetry of a Nietzschean Inspiration**

(Same as COMPLIT 356A, GERLIT 210, GERLIT 310) The Greek god Dionysus became, like Apollo, the symbol of poetic imagination. In the modern era he substituted the Apolline tradition, while Apollo assumed the characteristics of Dionysus. We will examine this central poctological motif in texts by authors including Euripides, Keats, Nietzsche, Pound, and Eliot. Open to advanced undergraduates.

3-5 units, Aut (Bohrer, C)

**GRADUATE COURSES IN COMPARATIVE LITERATURE**

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**COMPLIT 210. Bakhtin and His Legacy**

(Same as SLAVLIT 226) ¿Quests for my own word are in fact quests for a word that is not my own, a word that is more than myself.¿ writes Mikhail Bakhtin towards the end of his life. It was this ceaseless pursuit of another word that allowed Bakhtin, one of the most distinguished literary critics of the twentieth century, to author several influential literary theory concepts, many of which deal with the ideas of multiplicity, diversity and unfinalizability. The seminar explores these core concepts through close reading of key texts in English and investigates their reverberations in the writings of other thinkers such as Kristeva, de Man and Derrida

3-5 units, Spr (Skakov, N)

**COMPLIT 215. Nabokov in the Transnational Context**

(Same as COMPLIT 115, SLAVGEN 156, SLAVGEN 256) Nabokov's techniques of migration and camouflage as he inhabits the literary and historical contexts of St. Petersburg, Berlin, Paris, America, and Switzerland. His early and late stories, last Russian novel *The Gift*, *Lolita* (the novel and screenplay), and *Pale Fire*. Readings in English. Russian speakers will be encouraged to read Russian texts in original.

3-5 units, Aut (Greenleaf, M)

**COMPLIT 216. Petrarch and Petrarchism**

(Same as ITALGEN 264E) The works of Petrarch (1304-1374), acknowledged as the founder of Renaissance humanism, and a bibliophile, collector of manuscripts, and devotee of erudition. How he dedicated his life to harmonizing the Christian faith with classical learning. Sources include his Latin moral works, epistles, epics, and treatises on illustrious men, and the *Triumphs and Canzoniere*.

5 units, not given this year

**COMPLIT 219. Dostoevsky: Narrative Performance and Literary Theory**

(Same as SLAVLIT 251) This course is an in-depth engagement with a range of Dostoevsky's genres: early works (epistolary novella *Poor Folk* and experimental *Double*), major novels (*Crime and Punishment*, *The Idiot*), less-read shorter works (*A Faint Heart*, *Bobok*, and *The Meek One*), and genre-bending *House of the Dead* and *Diary of a Writer*. We will apply recent theory of autobiography, performance, repetition and narrative gaps, to Dostoevsky's transformations of genre, philosophical and dramatic discourse, and narrative performance. For graduate students. Slavic students will read primary texts in Russian, other participants in translation. Course conducted in English. Undergraduates with advanced linguistic and critical competence may apply.

3-5 units, *Win (Greenleaf, M; Erman, I)*

**COMPLIT 221. Memory, History, and the Contemporary Novel**

(Same as GERLIT 246, JEWISHST 241) How the watershed events of the 20th century, the philosophic linguistic turn, and the debate regarding the end of history left their mark on the novel. How does the contemporary novel engage with the past? How does its interest in memory and history relate to late- or postmodern culture of time or to political and ethical concerns? Novels by Toni Morrison, W. G. Sebald, J. M. Coetzee, Kazuo Ishiguro, and A. B. Yehoshua; theoretical works by Nietzsche, Freud, Heidegger, Hannah Arendt, Walter Benjamin, Fredric Jameson, Paul Ricoeur, Avishai Margalit, and Walter Benn Michaels.

3-5 units, *Spr (Eshel, A)*

**COMPLIT 228. Introduction to Digital Humanities: Concepts, Technologies, Tools**

What happens when you think about computers and other digital devices as more than web browsers and word processing? Think this way about humanities disciplines, and you are in the realm of the digital humanities. In this course, we will explore the perspectives of scholars who have thought about what digital humanities means and the technologies and tools that are shaping new kinds of scholarship. Topics will include history of the digital humanities, textual studies, electronic literature, computational and new media, and emerging work around curation and visualization. This course is organized as a mix of seminar and workshop; active engagement by all participants is expected and thus enrollment is limited to 20 students. Students will contribute to the field with a creative final project that they develop over the course of the quarter. Enrollment limited to 20 students.

4 units, *Spr (Lowood, H; Davis, G)*

**COMPLIT 230A. The Novel in Europe: The Age of Compromise, 1800-1848**

(Same as ENGLISH 230A) The novel after the French revolution and the industrial take-off. Novelistic form and historical processes: nation-building and the marriage market, political conservatism and the advent of fashion, aristocracy and bourgeoisie and proletariat... focusing on how stylistic choices and plot structures offer imaginary resolutions to social and ideological conflicts. Authors will include Austen, Scott, Shelley, Stendhal, Puskin, Balzac, Bronte.

5 units, not given this year

**COMPLIT 231A. The Decadent 1890s**

(Same as COMPLIT 131) This course introduces you to major works of literature of Decadent literature and culture in the European fin de siècle, focusing on the artistic and social culture of London, Paris, Vienna, and Berlin in the 1870s-1900s. Among the topics to be studied are the interconnections between the movements of Decadence, Aestheticism and Symbolism; theories of cultural decay and degeneration; the culture wars of the 19th century; stereotypes of gender, specifically the Dandy and the New Woman; the influence of sexology (regarding homosexuality and

sexual transgression); cultural and legal attitudes toward sexual perversity; and homosexuality; the rise of Wagnerism and theories of Gesamtkunstwerk on the stage; and the period of cultural transition from Decadence to Modernism. We will read works by Mallarmé, Baudelaire, Wilde, Strindberg, Huysmans, Nordau, Nietzsche, Wedekind, Ibsen, Michael Field (Katherine Bradley and Edith Cooper) and various New Woman writers such as George Egerton, Victo

3-5 units, *Aut (Dierkes-Thrun, P)*

**COMPLIT 239. Realistic Fictions**

(Same as GERLIT 232) Realistic narratives in nineteenth-century literature. Structures of representation, temporality, and closure. Realism, history and political economy. Realism, modernism, and twentieth-century revisions. Texts by authors such as Keller, Stifter, Fontane, Seghers, Lukacs, and Adorno.

3-5 units, not given this year

**COMPLIT 240B. Love à la Turque: Tales of Love in Turkish Literature**

(Same as COMPLIT 140B) This course will introduce students whose command of the Turkish language is at an advanced level to the theme of romantic love in Turkish literature, with particular attention to key classical and contemporary works that influenced the development of Turkish literary tradition. Classes will include close reading and discussion of folk tales, poems, short stories, and plays with particular attention to characters of lover/beloved and theme of romantic love and to how these elements are related to cultural and historical background. We will begin with essential examples of ghazels from Ottoman court poetry to explore the notion of courtly love, and move to the most influential texts of 19th and 20th centuries. Although main emphasis will be on content and textual analysis, we will cover grammar and vocabulary issues as needed. Objectives of the course are 1) help students reach the level of proficiency to read and understand prose and verse of moderate difficulty in Turkish language,

3-5 units, *Win (Richardson, B)*

**COMPLIT 244A. Interplay between Turkish Cinema and Literature**

(Same as COMPLIT 144) Turkish cinema has looked to literature for inspiration and for its stories since its inception. In recent years, the relationship between literature and film in Turkey has become more complex and reciprocal. We will explore the interplay between the two by focusing on adaptations and inspirations as well as less traditional modes of interaction such as interpretation and intertextuality. The scope of discussions will include themes like masculinity, representation of women, honor killings, the divide between East and West, as well as the problems of translation from one medium to another. Among the directors and writers whose works will watch and read are Yaşar Kemal, Orhan Pamuk, Yavuz Turgul, and Derviş Zaim.

3-5 units, *Aut (Richardson, B)*

**COMPLIT 245D. Modern Hebrew Literature: Prose**

(Same as COMPLIT 345) The class will discuss major works of Hebrew prose from the nineteenth through the twenty first century, introduce major trends in the study of Modern Hebrew prose and will ask what new paradigms may be developed for the study of Hebrew narrative prose in the future. Readings will include Avraham Mapu, Mendele Mokher Sfarim, Y.H.Brenner, S.J. Agnon, S. Yizhar, Amos Os, Aharon Appelfeld, Amalia Kahana Carmon, A.B. Yehoshua, Yehudit Katzir, and Zeruya Shalev among others. Readings in Hebrew. Discussion in English.

3-5 units, not given this year

**COMPLIT 248A. Reading Turkish I**

This course is an introduction to the structures of Turkish language necessary for reading. It is designed to develop reading competence in Turkish for graduate students (undergraduates should consult the instructor). Essential grammar, syntax points, vocabulary, and reading skills will be emphasized. The goal is to enable you to read Turkish at an advanced level in a relatively short period of time. It is not a traditional language course that takes an integrated four-skill approach; it focuses only on reading, and as a result we will be able to cover advanced material in a short amount of time.

3-5 units, *Aut (Richardson, B)*

**COMPLIT 248B. Reading Turkish II**

Continuation of language and reading development from Reading Turkish I. Open with consent of the instructor to undergraduates who have already taken Reading Turkish I.

3-5 units, *Win (Richardson, B)*

**COMPLIT 248C. Advanced Turkish for Research**

Refining advanced reading skills in modern Turkish through intensive reading and translation. Emphasis on Turkish cultural, historical, literary, and political texts depending on students' academic interests. Prior knowledge of Turkish and/or consultation with the instructor is necessary.

3-5 units, *Spr (Richardson, B)*

**COMPLIT 249A. The Iranian Cinema: Image and Meaning**

(Same as COMPLIT 148A) This course will focus on the analysis of ten Iranian films with the view of conducting a discourse on the semiotics of Iranian art and culture. Each session will be designated to the viewing of a film by a prominent Iranian film-maker. Students are expected to prepare for class by having previously examined other available films by the film-maker under consideration.

1-3 units, *Aut (Beyzaie, B)*

**COMPLIT 249B. Iranian Cinema in Diaspora**

(Same as COMPLIT 148B) Despite enormous obstacles, immigrant Iranian Filmmakers, within a few decades (after the Iranian revolution), have created a slow but steady stream of films outside Iran. They were originally started by individual spontaneous attempts from different corners of the world and by now we can identify common lines of interest amongst them. There are also major differences between them. These films have never been allowed to be screened inside Iran, and without any support from the global system of production and distribution, as independent and individual attempts, they have enjoyed little attention. Despite all this, Iranian cinema in exile is in no sense any less important than Iranian cinema inside Iran. In this course we will view one such film, made outside Iran, in each class meeting and expect to reach a common consensus in identifying the general patterns within these works and this movement. Questions such as the ones listed below will be addressed in our meetings each week: What

1-3 units, *Win (Beyzaie, B)*

**COMPLIT 249C. Contemporary Iranian Theater**

(Same as COMPLIT 148C) Today Iranian plays, both in traditional and contemporary styles, are staged in theater festivals throughout the world play their role in forming a universal language of theater which combine the heritages from countries in all five continents. Despite many obstacles, some Iranian plays have been translated into English and some prominent Iranian figures are successful stage directors outside Iran. Forty six years ago when *Theater in Iran* (a monograph on the history of Iranian plays) by Bahram Beyzaie was first published, it put the then contemporary Iranian theater movement--which was altogether westernizing itself blindly--face to face with a new kind of self-awareness. Hence in today's generation of playwrights and stage directors in Iran, all know something of their theatrical heritage. In this course we will spend some class sessions on the history of theater in Iran and some class meetings will be concentrating on contemporary movements and present day playwrights. Given the de

1-3 units, *Spr (Beyzaie, B)*

**COMPLIT 250. Literature, History, and Representation**

(Same as FRENLIT 248) Literary works as historical narratives; texts which envision ways of reconstructing or representing an ancient or immediate past through collective or individual narratives. Narration and narrator; relation between individual and collective history; historical events and how they have shaped the narratives; master narratives; and alternative histories. Reading include Glissant, Césaire, Dadié, Cixous, Pérec, Le Clézio, Mokkedem, Benjamin, de Certeau, and White.

3-5 units, *not given this year*

**COMPLIT 254. Modern Chinese Novel: Theory, Aesthetics, History**

(Same as CHINLIT 174, CHINLIT 274) From the May Fourth movement to the 40s. Themes include enlightenment, democracy, women's liberation, revolution, war, urban culture, and love. Prerequisite: advanced Chinese.

4 units, *not given this year*

**COMPLIT 263. Advanced Translation Workshop**

Translation as a critical, creative, conservative, and subversive act. Students workshop and revise a translation project throughout the quarter. Readings include comparative translations and statements on the theory and craft of translation. Final project consists of an annotated translation. Prerequisite: ENG 293 or previous translation experience. Enrollment limited to 10 students.

3-5 units, *Aut (Santana, C)*

**COMPLIT 267. National Literatures, Littérature-monde: A New Comparatism**

(Same as FRENLIT 267) This course will focus on the implications of a global francophonie, through discussion of texts produced in different francophone times and spaces. Among the topics to be explored: confrontation of inward/outward territories and the questions of otherness, identity and minority status, the relation between history and literature, transnationality, métissage of languages and transnationality. Readings include Montaigne and Calvin, Tzvetan Todorov, Lise Gauvin, Aimé Césaire, Bernard Dadié, Edouard Glissant, Leila Sebbar and others.

3-5 units, *not given this year*

**COMPLIT 278. Special Topics (Francophone Literature): From Exoticism to a Discourse of Auto-Representation**

(Same as AFRICAST 278, FRENLIT 278) Critical analysis of major issues relating to literatures in French language in and outside France. Focus is on exoticism and self-representation, with an emphasis on the evolution of mentalities, new sensitivities and the role of literature in developing individual or collective identity. Readings include Le Clézio, Memmi, Malouf, Lopes, Schwarz-Bart, Delaygue, Glissant, Todorov, Kane and others. Primary sources, secondary sources and film. Taught in French.

3-5 units, *not given this year*

**COMPLIT 290. Tolstoy's Anna Karenina in Dialogue with Contemporary Philosophical, Social, and Ethical Thought**

(Same as COMPLIT 190, SLAVGEN 190, SLAVGEN 290) Anna Karenina, the novel as a case study in the contest between modernity and tradition, their ethical order, ideology, cultural codes, and philosophies. Images of society, women and men in Tolstoy v. those of his contemporaries: Marx, Mill, Nietzsche, Weber, Durkheim, Freud. Open to juniors, seniors and graduate students. Requirements: three interpretive essays (500-1000 words each). Analysis of a passage from the novel; AK refracted through a philosophical prism and vice versa (30% each); class discussion and Forum (10%).

3-5 units, *Win (Freidin, G)*

**COMPLIT 303D. Thinking in Fiction**

(Same as ENGLISH 303D) Narrative and cognition in 18th-century fictional, philosophical, scientific, and cultural texts. Probable readings: Hobbes, Locke, Newton, Swift, Defoe, Hume, Lennox, Sterne, Adam Smith, Wollstonecraft, and Bentham.

5 units, *not given this year*

**COMPLIT 311. Shakespeare, Islam, and Others**

(Same as ENGLISH 373D) Shakespeare and other early modern writers in relation to new work on Islam and the Ottoman Turk in early modern studies. Othello, Twelfth Night, Titus Andronicus, The Merchant of Venice, and other Shakespeare plays. Kyd's Solyman and Perseda, Daborne's A Christian Turned Turk, Massinger's The Renegado, Marlowe's The Jew of Malta, and literary and historical materials.

5 units, *not given this year*

**COMPLIT 320A. Epic and Empire**

(Same as ENGLISH 314) Focus is on Virgil's Aeneid and its influence, tracing the European epic tradition (Ariosto, Tasso, Camoes, Spenser, and Milton) to New World discovery and mercantile expansion in the early modern period.

5 units, *Spr (Parker, P)*

**COMPLIT 322A. Theories of the Novel**

(Same as FRENGEN 356) The novel as the literary genre most closely identified with the development of cultural modernity by literary historians and theorists. Critical models for defining the novel's poetics and cultural work. Critical readings such as texts by Lukacs, Bakhtin, Auerbach, Barthes, Armstrong, Gallagher, Bourdieu, Macherey, Jameson, Said and Spivak. Tutor texts such as Defoe's Robinson Crusoe, Flaubert's Madame Bovary, and

Woolf's *To the Lighthouse*.

3-5 units, not given this year

**COMPLIT 330. The Bourgeois**

(Same as ENGLISH 363) Goal is to define the ruling class of modern times. Social history (Weber, Hirschmann, Marx); literary texts (Defoe, Goethe, Gaskell); and Henrik Ibsen who produced an intransigent criticism of the bourgeois ethos.

5 units, not given this year

**COMPLIT 331C. Institutions of Enlightenment: The Invention of the Public Sphere**

(Same as ENGLISH 303F) This course treats the cultural foundations upon which the Enlightenment instituted a public sphere and constituted its relationship to the private (or intimate) sphere. The aim is to explore the invention and naturalization of some of the most fundamental institutions of the Enlightenment -- institutions such as the public, the private, the market, public opinion, literature, and even more basic categories such as the individual, society, culture, knowledge, and politics.

5 units, Aut (Bender, J)

**COMPLIT 332. The Transatlantic Renaissance**

(Same as ENGLISH 310) The emergence of a transatlantic culture in the early modern period. How is the Renaissance of Europe and England fashioned in a conversation with the cultural forms and material realities of the colonial Americas? And how do colonial writings expand and complicate the available understanding of the Renaissance? Readings in Columbus, More, Hakluyt, Spenser, Shakespeare, the Inca Garcilaso de la Vega.

5 units, Aut (Greene, R)

**COMPLIT 340. Literature of the Iranian Diaspora**

This course examines poetry and prose produced by authors of Iranian descent living outside of Iran. The focus will be on works composed in English that have appeared since the Revolution of 1978-79. Translations of selected Persian and French texts will also be discussed. Although focused on the Iranian immigrant experience, this course also seeks to locate Iranian diasporic writing within the broader context of the diasporic literary scene in the US, UK and France.

3-5 units, Spr (Brookshaw, D)

**COMPLIT 345. Modern Hebrew Literature: Prose**

(Same as COMPLIT 245D) The class will discuss major works of Hebrew prose from the nineteenth through the twenty first century, introduce major trends in the study of Modern Hebrew prose and will ask what new paradigms may be developed for the study of Hebrew narrative prose in the future. Readings will include Avraham Mapu, Mendele Mokher Sfarim, Y.H.Brenner, S.J. Agnon, S. Yizhar, Amos Os, Aharon Appelfeld, Amilia Kahana Carmon, A.B. Yehoshua, Yehudit Katzir, and Zeruya Shalev among others. Readings in Hebrew. Discussion in English.

3-5 units, not given this year

**COMPLIT 348. The Novel as/and Critical Discourse**

(Same as FRENLIT 358) Literature is the site of a multiplicity of knowledges. This course is an attempt to build a history of ideas in the Francophone world. We will be looking at narrative styles, as well as the ways in which the 20th century theoretical discourse among Francophone intellectuals is often embedded in the novel. The role of intellectuals in society will be discussed, with a focus on three major topics: identities, religion (Islam, Christianity, violence), and democracy. Reading includes Assia Djebar, Abdelwahab Meddeb, Henri Lopes, Amin Malouf, VY Mudimbe, Franz Fanon, Jean-Paul Sartre, Edward Said and others.

3-5 units, Win (Boyi, E)

**COMPLIT 349. LITERARY THEORY**

(Same as DLCL 349, SLAVLIT 349, ILAC 349) Advanced survey course of key schools in literary theory, from formalism onwards. Emphasis is on the discussion of primary sources. Topics include structuralism, ideology critique, psychoanalysis, reception aesthetics, deconstruction, feminism, and post-colonialism. Readings by Barthes, Bakhtin, Benjamin, Borges, Derrida, de Man, Foucault, Freud, Iser, Lacan, Shklovsky, and Spivak, among others.

3-5 units, Aut (Hoyos, H; Skakov, N)

**COMPLIT 349. LITERARY THEORY**

(Same as DLCL 349, SLAVLIT 349, ILAC 349) Advanced survey course of key schools in literary theory, from formalism onwards.

Emphasis is on the discussion of primary sources. Topics include structuralism, ideology critique, psychoanalysis, reception aesthetics, deconstruction, feminism, and post-colonialism. Readings by Barthes, Bakhtin, Benjamin, Borges, Derrida, de Man, Foucault, Freud, Iser, Lacan, Shklovsky, and Spivak, among others.

3-5 units, Aut (Staff)

**COMPLIT 353A. Experiment and the Novel**

(Same as ENGLISH 303) A double exploration of experiment in the novel from 1750 into the 19th century. Taking off from Zola's *The Experimental Novel*, consideration of the novel's aspect as scientific instrument. Taking the idea of experimental fiction in the usual sense of departures from standard practice, consideration of works that seem to break away from techniques of realism devised prior to 1750. Possible texts by: Lennox, Sterne, Walpole, Goldsmith, Godwin, Lewis, Shelley, Hogg, Emily Bronte, and Diderot.

5 units, not given this year

**COMPLIT 356A. Dionysus - Mythology and Poetry of a Nietzschean Inspiration**

(Same as COMPLIT 256A, GERLIT 210, GERLIT 310) The Greek god Dionysus became, like Apollo, the symbol of poetic imagination. In the modern era he substituted the Apolline tradition, while Apollo assumed the characteristics of Dionysus. We will examine this central poctological motif in texts by authors including Euripides, Keats, Nietzsche, Pound, and Eliot. Open to advanced undergraduates.

3-5 units, Aut (Bohrer, C)

**COMPLIT 359A. Philosophical Reading Group**

(Same as FRENGEN 395, ITALGEN 395) Discussion of one contemporary or historical text from the Western philosophical tradition per quarter in a group of faculty and graduate students. For admission of new participants, a conversation with H. U. Gumbrecht is required. May be repeated for credit.

1 unit, Aut (Gumbrecht, H), Win (Gumbrecht, H)

**COMPLIT 364. Style**

(Same as ENGLISH 364) The return of a term that was central in 20th-century criticism, and has all but disappeared in recent decades. Focus is on looking at concepts of style from various branches of linguistic and literary theory, and examination of some revealing examples in novels and films. Team taught with D.A. Miller from U.C. Berkeley.

5 units, not given this year

**COMPLIT 369. Introduction to Graduate Studies: Criticism as Profession**

(Same as FRENGEN 369, ITALGEN 369, GERLIT 369) Based on a survey of (and a conversation about) the history of academic Literary Criticism, and on presentation (and discussion) of contemporary theoretical positions, this seminar will try to enhance a reflection on the conditions, difficulties, and rewards of Literary Criticism as a profession and as an intellectual life form. Attention will be paid to the most relevant (and most pressing) institutional frame-conditions but this attention will not prevent us from trying to explore a (seldom used) potential of eccentricity and freedom that has always been inherent to (although sometimes dormant in) Literary Criticism.

5 units, Aut (Gumbrecht, H)

**COMPLIT 371. Seminar in Chinese Literary Criticism**

(Same as CHINLIT 371) How aesthetics and politics intertwine and break apart in Western and Eastern traditions. Aesthetics for understanding culture, morality, and power in crosscultural contexts. Readings include Hegel, Kant, Marcuse, Lukacs, and Adorno; and Chinese thinkers Wang Guowei, Lu Xun, Li Zehou, and Mao. Prerequisite: CHINLIT 127/207 or consent of instructor.

2-5 units, not given this year

**COMPLIT 395. Research**

(Staff)

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**COMPLIT 396L. Pedagogy Seminar I**

(Same as ENGLISH 396L) Required for first-year Ph.D students in English, Modern Thought and Literature, and Comparative Literature. Preparation for surviving as teaching assistants in undergraduate literature courses. Focus is on leading discussions and grading papers.

2 units, Aut (Woloch, A)

**COMPLIT 399. Dissertation**

(Staff)

1-15 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**COMPLIT 802. TGR Dissertation**

0 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

## COMPARATIVE MEDICINE (COMP MED) COURSES

### UNDERGRADUATE COURSES IN COMPARATIVE MEDICINE

Primarily for undergraduates; graduate students may enroll with consent of adviser.

**COMP MED 81N. Comparative Anatomy and Physiology of Mammals**

(F,Sem) Stanford Introductory Seminar. Preference to freshmen. Emphasis is on a comparative approach to anatomy and physiology of a wide range of mammals, the unique adaptations of each species in terms of its anatomical, and behavioral characteristics, and how these species interact with human beings and other animals. Dissection required. Class size is limited to 16. GER: DB-NatSci

3 units, Win (Bouley, D)

**COMP MED 84Q. Globally Emerging Zoonotic Diseases**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Infectious diseases impacting veterinary and human health around the world today. Mechanisms of disease, epidemiology, and underlying diagnostic, treatment and control principles associated with these pathogens.

3 units, Spr (Felt, S)

**COMP MED 87Q. Introduction to the Mouse in Biomedical Research**

(S,Sem) Stanford Introductory Seminar. Preference to sophomores. Focus is on the laboratory mouse, one of the most widely used models for biomedical research. Topics include the natural history and origin of the laboratory mouse; characteristics of commonly used strains; mouse anatomy, physiology, and husbandry; common mouse diseases and their effects on research; coat color genetics; and genetically engineered mouse technology. Demonstrations and hands-on experience with necropsy, mouse handling, and research techniques.

3 units, Aut (Nagamine, C)

**COMP MED 103. Horse Medicine**

The most common equine diseases, ranging from colic to lameness. Equine anatomy and physiology relevant to topics in equine medicine. Equine infectious diseases, care of the newborn foal, medical emergencies, and neurological disorders. Laboratory sessions involve physical examination of the horse and review the basics of the neurological and lameness exam.

2 units, Spr (Staff)

**COMP MED 107. Comparative Neuroanatomy**

(Same as COMP MED 207) Functional organization and evolution of the vertebrate nervous system. Topics include paleoneurology, cladistic analysis, allometry, mosaic versus concerted evolution, and evolution of brain region structure, connectivity, and neurons. Comparisons between structure and function of vertebrate forebrains including hippocampi. Evolution of the primate visual and sensorimotor central nervous system as related to vocalization, socialization, and intelligence.

4 units, alternate years, not given this year

**COMP MED 110. Pre-Vet Advisory**

For students interested in a career in veterinary medicine. How to meet the academic and practical experience prerequisites for admission to veterinary school. Networking with other pre-vet students. Periodic group meetings with guest speakers presenting career options in veterinary medicine. Prerequisite: consent of instructor.

1 unit, Aut (Bouley, D), Win (Bouley, D), Spr (Staff)

**COMP MED 120. Rodent Biomethodology**

Preference to bioengineering and other biological sciences undergraduates. Techniques and surgery using mice and rats in biomedical research. Laboratory sessions include handling, dosing, and sampling techniques; basic understanding of anesthesia and analgesia; aseptic surgery techniques, suturing, and surgical approaches. Prerequisite: instructor consent.

3 units, Aut (Green, S; Heath, L; Pacharinsak, C), Spr (Staff)

**COMP MED 198. Undergraduate Directed Reading in Comparative Medicine**

May be taken as a prelude to research and may also involve participation in a lab or research group seminar and/or library research.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**COMP MED 199. Undergraduate Research**

Investigations sponsored by individual faculty members. Prerequisite: consent of instructor.

1-3 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

### GRADUATE COURSES IN COMPARATIVE MEDICINE

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**COMP MED 207. Comparative Neuroanatomy**

(Same as COMP MED 107) Functional organization and evolution of the vertebrate nervous system. Topics include paleoneurology, cladistic analysis, allometry, mosaic versus concerted evolution, and evolution of brain region structure, connectivity, and neurons. Comparisons between structure and function of vertebrate forebrains including hippocampi. Evolution of the primate visual and sensorimotor central nervous system as related to vocalization, socialization, and intelligence.

4 units, alternate years, not given this year

**COMP MED 215. Synaptic Properties and Neuronal Circuits**

Focus is on synapses and circuits in the central nervous system. Objective is to demonstrate how the specific properties of different synapses play a role in the function of neuronal circuits. The main types of synapses are covered, including both ionotropic and metabotropic-receptor-dependent synapses and their related circuits in the CNS. Lectures and student presentations. If taken for 3 units qualifies as a Core Course satisfying requirements in Cellular, Molecular & Developmental Neuroscience in the Neurosciences Graduate Program. Students enrolling for 3 units write an NIH-style proposal on a selected synapse, proposing a study of its properties and related function and presenting the proposal to the class for critique and discussion.

2-3 units, not given this year

**COMP MED 299. Directed Reading in Comparative Medicine**

Prerequisite: consent of instructor. (Staff)

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**COMP MED 370. Medical Scholars Research**

Provides an opportunity for student and faculty interaction, as well as academic credit and financial support, to medical students who undertake original research. Enrollment is limited to students with approved projects.

4-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

**COMP MED 399. Graduate Research**

Investigations sponsored by individual faculty members. Opportunities are available in comparative medicine and pathology, immuno-histochemistry, electron microscopy, molecular genetics, quantitative morphometry, neuroanatomy and neurophysiology of the hippocampus, pathogenesis of intestinal infections, immunopathology, biology of laboratory rodents, anesthesiology of laboratory animals, gene therapy of animal models of neurodegenerative diseases, and development and characterization of transgenic animal models. Prerequisite: consent of instructor.

1-18 units, Aut (Staff), Win (Staff), Spr (Staff), Sum (Staff)

# COMPARATIVE STUDIES IN RACE AND ETHNICITY (CSRE) COURSES

## UNDERGRADUATE COURSES IN COMPARATIVE STUDIES IN RACE AND ETHNICITY

Primarily for undergraduates; graduate students may enroll with consent of adviser.

### CSRE 14N. Growing Up Bilingual

(F,Sem) (Same as CHICANST 14N, EDUC 114N) Stanford Introductory Seminar. This course is a Freshman Introductory Seminar that has as its purpose introducing students to the sociolinguistic study of bilingualism by focusing on bilingual communities in this country and on bilingual individuals who use two languages in their everyday lives. Much attention is given to the history, significance, and consequences of language contact in the United States. The course focuses on the experiences of long-term US minority populations as well as that of recent immigrants.

3 units, Win (Valdes, G)

### CSRE 15. Global Flows: The Globalization of Hip Hop Art, Culture, and Politics

(Same as AMSTUD 15) This course consists of film screenings, dialogues, and performances that examine and engage Hip Hop Cultures and artists from around the world. We will explore diverse scenes and artists, from the formation of new musical genres such as hiplife in Ghana, to the impact of the first Hip Hop concert in Morocco, to comparative investigations of race and citizenship in Japan, Cuba, Palestine, France, and the United States (including Black, Mexican and Arab-Americans).

1-2 units, not given this year

### CSRE 16N. African Americans and Social Movements

(F,Sem) (Same as AFRICAAM 16N, SOC 16N) Stanford Introductory Seminar. Theory and research on African Americans' roles in post-Civil Rights, US social movements. Topics include women's right, LGBT rights, environmental movement, and contemporary political conservatism. GER:DB-SocSci

3 units, Aut (Fields, C)

### CSRE 28N. The Cultural Shaping of Mental Health and Illness

(F,Sem) (Same as PSYCH 28N) Stanford Introductory Seminar. This seminar examines how our cultural ideas and practices shape our conceptions, perceptions, experiences, and treatment of emotional wellness and distress. We will read and discuss empirical research and case studies from psychology, anthropology, sociology, and medicine. Course requirements include weekly reading and thought papers, weekly discussion, and a final research project and presentation.

3 units, Win (Tsai, J)

### CSRE 45Q. Understanding Race and Ethnicity in American Society

(S,Sem) (Same as SOC 45Q) Stanford Introductory Seminar. Preference to sophomores. Historical overview of race in America, race and violence, race and socioeconomic well-being, and the future of race relations in America. Enrollment limited to 16. GER:DB-SocSci

5 units, Aut (Snipp, C)

### CSRE 51N. Comparative Fictions of Ethnicity

(S,Sem) (Same as AMSTUD 51N, COMPLIT 51N) Stanford Introductory Seminar. We may know who we are, but we are, after all, social creatures. How does our sense of self interact with those around us? How does literature provide a particular medium for not only self expression, but also for meditations on what goes into the construction of the Self? After all, don't we tell stories in response to the question, who are you? Besides a list of nouns and names and attributes, we give our lives flesh and blood in telling how we process the world. Our course focuses in particular on this question--Does this universal issue (who am I) become skewed differently when we add a qualifier before it, like ethnic?

GER:DB-Hum

5 units, Win (Palumbo-Liu, D)

### CSRE 53S. Passing Unseen: Race, Discourse, and Cultural Expectation

Narratives of passing are usually founded on visible manifestations of racial difference. But the possibility for passing means, of course, that race is not always obvious or apparent in terms of skin color. There are critical elements of representation and passing that go unseen. And even without the problematic ideal of visible race, there is still deep cultural interest and investment in racial differentiation. This course investigates modes of passing unseen.

3 units, Spr (Trump, W)

### CSRE 55C. Black Childhood in American Literature

This course will explore ways that the black child as a trope, a site, a body and a subject is represented in 20th Century American literature. With attention to the representation of black childhood in the novels, short fiction, and memoirs of Richard Wright, Toni Morrison, Toni Cade Bambara, James Baldwin, Gwendolyn Brooks, Alice Childress, and others, we will also investigate the ways in which those representations reflect larger issues and dilemmas for black childhood within American institutions and cultural discourse.

3 units, Spr (Caruthers, J)

### CSRE 55S. Real Men and Dragon Ladies: Race and Sexuality in America, 1662-1965

(Same as HISTORY 55S) How do race and sexuality mutually construct each other throughout American history? How do historians use primary sources to make historical arguments? Examines a variety of primary sources, including political pamphlets, legal documents, illustrations, and film. The historical trajectory we will follow examines the creation and elaboration of racial and sexual categories, from colonial slave codes and 19th century miscegenation law, through modern urban culture and the GI Bill.

5 units, Aut (Heinz, A), ONCEONLY

### CSRE 56N. Mixed Race in the New Millennium: Crossings of Kin, Faith & Culture

(F,Sem) (Same as AFRICAAM 56N, ENGLISH 56N) Stanford Introductory Seminar. Preference to freshmen. How literature, theater, graphic art and popular culture shape understandings of contemporary mixed race identity and other complex experiences of cultural hybridity. Course explores implications for racial identity, art, and politics for the new millennium. GER:DB-Hum

3 units, Win (Elam, M)

### CSRE 99. Poetics, Culture, and Geopolitics: Performing Power

(Same as DRAMA 110) Poet/performer Mark Gonzales of the Human Writes Project leads a course that examines the relationship between traditional forms of power and the power of performance. Students will analyze the text of body and bureaucracy that is performed on the stage of the globe. Through this analysis students will engage in critical reflection of how performance creates spaces to move beyond the dialectic of oppression and dominance. At culmination, students will create their own text, through body, visuals, or multi-media, to share the summary of their ideas at a campus wide symposium. GER:DB-Hum

4 units, Aut (Staff)

### CSRE 103B. Race, Ethnicity, and Linguistic Diversity in Classrooms: Sociocultural Theory and Practices

(Same as AFRICAAM 106, EDUC 103B, EDUC 337) Focus is on classrooms with students from diverse racial, ethnic and linguistic backgrounds. Studies, writing, and media representation of urban and diverse school settings; implications for transforming teaching and learning. Issues related to developing teachers with attitudes, dispositions, and skills necessary to teach diverse students.

3-5 units, Spr (Ball, A)

### CSRE 104F. The Modern Tradition of Non-Violent Resistance

(Same as AFRICAAM 204F, HISTORY 204F) During the twentieth century, peasants and menial laborers who comprised the majority of humanity launched liberation movements to secure citizenship rights. Mohandas K. Gandhi, Martin Luther King, Jr., and Nelson Mandela are among the leaders whose ideas continue to influence contemporary movements for global peace with social justice in a sustainable environment.

5 units, not given this year

**CSRE 107. The Black Mediterranean: Greece, Rome and Antiquity**

(Same as AFRICAAM 107C, CLASSGEN 107) Explore problems of race and ethnicity as viable criteria in studying ancient societies and consider the question, What is the Mediterranean?, in relation to premodern evidence. Investigate the role of blackness as a marker of ethnicity; the demography of slavery and its roles in forming social identities; and environmental determinism as a factor in ethnic and racial thinking. Consider Greek and Roman perspectives and behavior, and their impact on later theories of race and ethnicity as well as the Mediterranean as a whole. GER:EC-GlobalCom

4-5 units, not given this year

**CSRE 108. Introduction to Feminist Studies**

(Same as AMSTUD 107, FEMST 101, HISTORY 107) Introduction to interdisciplinary feminist scholarship, which seeks to understand the creation, perpetuation, and critiques of gender inequalities. Topics include the historical emergence of feminist politics and contemporary analyses of work and family, health and sexuality, creativity, and politics. Close attention to the intersections of race, gender, ethnicity, and sexuality and to international, as well as U.S., perspectives. Students learn to think critically about gender in the past, present, and future. GER:DB-SocSci, EC-Gender

4-5 units, Aut (Freedman, E)

**CSRE 109B. Indian Country Economic Development**

(Same as NATIVEAM 109B) The history of competing tribal and Western economic models, and the legal, political, social, and cultural implications for tribal economic development. Case studies include mineral resource extraction, gaming, and cultural tourism. 21st-century strategies for sustainable economic development and protection of political and cultural sovereignty.

5 units, Spr (Biestman, K)

**CSRE 112. Colonial Exchanges: Rethinking Race and Gender in Encounters between Europe and the New World**

What does the term *race* mean in the 17th and 18th centuries? How can we talk about either *race* or *gender* in the early modern period without imposing contemporary values on their meaning? This course looks at emerging discourses of race and gender in literary, biographical, historical, and visual representations of encounters between Europe and the New World from Shakespeare to Swift as well as representations of the period by contemporary writers like Coetzee, Phillips, and Morrison.

5 units, Win (Wahl, E)

**CSRE 117N. Film, Nation, Latinidad**

(Same as CHICANST 117N, ILAC 117N) Examination of films from Spain, Mexico, and Latina/o USA that expand, trouble, contest, parody, or otherwise interrogate notions of national identity. Filmmakers may include Lourdes Portillo, Alejandro González Iñárritu, John Sayles, Maria Novaro, Pedro Almodóvar, and Gregory Nava.

3-4 units, not given this year

**CSRE 117S. History of California Indians**

(Same as NATIVEAM 117S, HISTORY 250A) Demographic, political, and economic history of California Indians, 1700s-1950s. Processes and events leading to the destruction of California tribes, and their effects on the groups who survived. Geographic and cultural diversity. Spanish, Mexican, and Anglo-American periods. The mission system. GER:EC-AmerCul

5 units, not given this year

**CSRE 120. Native American Writers, 1880-1920**

(Same as NATIVEAM 120) The period of time-1880 to 1920-is a time when many important events in American Indian history occurred. Hoxie's historical work provides a framework for analyzing what effects these policies had on American Indian people. His work does not provide an American Indian perspective; he stated at the onset, that this was not an objective in this study. His main objective was to present a study that shows Indians' relations with whites as a clash of two complex cultures from a white point of view (Hoxie xxi). Three American Indians writing during this time period provide the needed Indian perspective lacking in Hoxie's work.

5 units, not given this year

**CSRE 121X. Hip Hop, Youth Identities, and the Politics of Language**

(Same as AFRICAAM 121X, AMSTUD 121X, ANTHRO 121A, EDUC 121X, LINGUIST 155) Focus is on issues of language, identity, and globalization, with a focus on Hip Hop cultures and the verbal virtuosity within the Hip Hop nation. Beginning with the U.S., a broad, comparative perspective in exploring youth identities and the politics of language in what is now a global Hip Hop movement. Readings draw from the interdisciplinary literature on Hip Hop cultures with a focus on sociolinguistics and youth culture.

3-4 units, Spr (Alim, H)

**CSRE 125V. Minority Representation and the Voting Rights Act**

(Same as POLISCI 125V) Focus is on whether and how racial and ethnic minorities including African Americans, Asian Americans, and Latinos are able to organize and press their demands on the political system. Topics include the political behavior of minority citizens, the strength and effect of these groups at the polls, the theory and practice of group formation among minorities, the responsiveness of elected officials, and the constitutional obstacles and issues that shape these phenomena. GER:DB-SocSci

5 units, Aut (Segura, G)

**CSRE 133. Women and Race in the American West, 1849-1950**

(Same as HISTORY 258G) The western myth of the lone white cowboy gives little insight into women and people of color. However, race and gender are crucial to the U.S. West's history, creating complex identities and social structures. The course examines lives of women of diverse races, in addition to the mythology surrounding icons such as pioneer mothers or Sacagawea. Using literature, art work, and film, along with works by historians, to analyze the intersection of race and the relation between history and myth.

5 units, Win (Frink, B)

**CSRE 135H. Conversations in CSRE: Case Studies in the Stanford Community**

(Same as ANTHRO 135H) Race, ethnicity, gender, and religion using the tools, analytical skills and concepts developed by anthropologists.

1-2 units, Aut (Wilcox, M), Win (Wilcox, M)

**CSRE 135I. CSRE House Seminar: Race and Ethnicity at Stanford**

(Same as ANTHRO 135I) Race, ethnicity, gender, and religion using the tools, analytical skills and concepts developed by anthropologists.

1-2 units, not given this year

**CSRE 144. Transforming Self and Systems: Crossing Borders of Race, Ethnicity, Gender, Sexuality, and Class**

(Same as ASNAMST 144) An exploration of crossing borders within ourselves, and between *us* and *them* through the following questions: How is understanding the self tied to understanding others? What does the *personal* is political mean for us? How can our personal identity struggles have meaning beyond the self? How does *synergistic consciousness* move us toward meaning, balance, connectedness, and wholeness? What knowledge comes from the heart? How does self healing lead to community healing? Can *victims* claim agency? How does contemplation lead to action? What is a narrative construction of reality? In a learning community, we will engage these questions through group process, journaling, reading, drama, creative writing, and storytelling.

5 units, Spr (Murphy-Shigematsu, S)

**CSRE 145A. Poetics and Politics of Caribbean Women's Literature**

(Same as AFRICAAM 145A) Mid 20th-century to the present. How historical, economic, and political conditions in Haiti, Cuba, Jamaica, Antigua, and Guadeloupe affected women. How Francophone, Anglophone, and Hispanophone women novelists, poets, and short story writers respond to similar issues and pose related questions. Caribbean literary identity within a multicultural and diasporic context; the place of the oral in the written feminine text; family and sexuality; translation of European master texts; history, memory, and myth; and responses to slave history, colonialism, neocolonialism, and globalization. GER:DB-SocSci,

DB-SocSci, EC-Gender

5 units, not given this year

**CSRE 146. Community Matters: Research and Service with Community Organizations**

Methods and principles for academic research in community settings for students preparing to enter summer experiences with community organizations. Case studies and tools to help students conceptualize a research strateg. Students develop a memorandum of understanding in collaboration with the community agency to define the work, relationship, and mutual benefit of the research partnership.

2 units, Spr (Mitchell, T)

**CSRE 146S. Asian American Culture and Community**

(Same as AMSTUD 146, COMPLIT 146, ASNAMST 146S) An examination of the history of Asians in America via one case history: the International Hotel in San Francisco. Background history of Asians in America, and the specifics of the I Hotel case as involving the convergence of global and local economies, urban redevelopment, and housing issues for minorities. Focus on the convergence of community and cultural production. Service learning component involving community work at the Manilatown Heritage Foundation in San Francisco. Service Learning Course (certified by Haas Center). GER:DB-Hum

5 units, Spr (Palumbo-Liu, D)

**CSRE 149. The Laboring of Diaspora & Border Literary Cultures**

(Same as COMPLIT 149) Focus is given to emergent theories of culture and on comparative literary and cultural studies. How do we treat culture as a social force? How do we go about reading the presence of social contexts within cultural texts? How do ethno-racial writers re-imagine the nation as a site with many cognitive maps in which the nation-state is not congruent with cultural identity? How do diaspora and border narratives/texts strive for comparative theoretical scope while remaining rooted in specific local histories. GER:DB-Hum

3-5 units, Win (Saldivar, J)

**CSRE 150. Race and Political Sociology**

(Same as SOC 150, SOC 250) How race informs the theories and research within political sociology. The state's role in creation and maintenance of racial categories, the ways in which racial identity motivates political actors, how race is used to legitimate policy decisions, comparisons across racial groups. Emphasis on understanding the ways race operates in the political arena. GER:DB-SocSci

5 units, Aut (Fields, C)

**CSRE 159H. Creating Comedy, Performing Identity**

(Same as DRAMA 159H) This course examines how comedy has been utilized as a performance structure to negotiate issues of personal and group identity, including race, gender and sexuality. We will range from Shakespeare to Richard Pryor, covering stage comedy, solo performance, stand-up comedy, and sitcom. GER:DB-Hum

4 units, Aut (Daube, M)

**CSRE 160N. Latino/Latina Performance in the United States**

(F,Sem) (Same as CHICANST 160N, DRAMA 17N) Stanford Introductory Seminar. Preference to freshmen. This course will introduce works by U.S. Latino and Latina performance artists producing from the margins of the mainstream Euro-American theater world. We will examine how performance art serves as a kind of dramatized political forum for Latino/a artists, producing some of the most transgressive explorations of queer and national/ethnic identities in the U.S. today. By the course's conclusion, each student will create and perform in a staged reading of an original performance piece. GER:DB-Hum, EC-AmerCul

3 units, Win (Moraga, C)

**CSRE 162. WOMEN IN MODERN AMERICA**

(Same as AMSTUD 161, HISTORY 161) Considers the political, economic, and social development of women in the United States during a long twentieth century. How have women been shaped or constrained by gendered conceptions of work, reproduction, education, family, and culture? Have all women reacted similarly to wars and depression or domestic and foreign policy? Through personal narratives and historical accounts, the course will answer

these questions, observing how women negotiated gender, race, sexuality, and class difference to achieve greater opportunity and citizenship rights. GER:DB-SocSci, EC-Gender

4-5 units, Spr (Sbardellati, L)

**CSRE 163S. Post Black Drama in the Age of Obama**

(Same as AFRICAAM 163S, AMSTUD 163S, DRAMA 163S, DRAMA 363S) This course will examine works of the new millennium that confront questions of African American experience. These plays are written by African American and non-black writers. In analyzing these works, this course will investigate such questions as: In a time that has been called 'Post Race' or 'Post Soul' or even 'Post Black,' what can we discern about African American drama? How do these plays reflect or contradict such labeling? How do these works speak to our times? Who does the form relate to in matters of content in these works? What do these works tell us about the contemporary constructions and meanings of blackness? GER:DB-Hum

5 units, Win (Elam, H)

**CSRE 164. Immigration and the Changing United States**

(Same as CHICANST 164, SOC 164, SOC 264) The role of race and ethnicity in immigrant group integration in the U.S. Topics include: theories of integration; racial and ethnic identity formation; racial and ethnic change; immigration policy; intermarriage; hybrid racial and ethnic identities; comparisons between contemporary and historical waves of immigration. GER:DB-SocSci

5 units, Aut (Jimenez, T)

**CSRE 166B. Immigration Debates in America, Past and Present**

(Same as HISTORY 166B, HISTORY 366B) Examines the ways in which the immigration of people from around the world and migration within the United States shaped American nation-building and ideas about national identity in the twentieth century. Focuses on how conflicting ideas about race, gender, ethnicity, and citizenship with respect to particular groups led to policies both of exclusion and integration. Part One begins with the ways in which the American views of race and citizenship in the colonial period through the post-Reconstruction Era led to the passage of the Chinese Exclusion Act in 1882 and subsequently to broader exclusions of immigrants from other parts of Asia, Southern and Eastern Europe, and Mexico. Explores how World War II and the Cold War challenged racial ideologies and led to policies of increasing liberalization culminating in the passage of the 1965 Immigration Act, which eliminated quotas based on national origins and opened the door for new waves of immigrants, especially from Asia and Latin Ameri GER:DB-SocSci

3-5 units, Win (McKibben, C), Sum (Staff)

**CSRE 168. New Citizenship: Grassroots Movements for Social Justice in the U.S.**

(Same as ANTHRO 169A, CHICANST 168, FEMST 140H) Focus is on the contributions of immigrants and communities of color to the meaning of citizenship in the U.S. Citizenship, more than only a legal status, is a dynamic cultural field in which people claim equal rights while demanding respect for differences. Academic studies of citizenship examined in dialogue with the theory and practice of activists and movements. Engagement with immigrant organizing and community-based research is a central emphasis.

5 units, Win (Coll, K)

**CSRE 173S. Transcultural and Multiethnic Lives: Contexts, Controversies, and Challenges**

(Same as AFRICAAM 173S, ASNAMST 173S) Lived experience of people who dwell in the border world of race and nation where they negotiate transcultural and multiethnic identities and politics. Comparative, historical, and global contexts such as family and class. Controversies, such as representations of mixed race people in media and multicultural communities. What the lives of people like Tiger Woods and Barack Obama reveal about how the marginal is becoming mainstream.

5 units, not given this year

**CSRE 177. Writing for Performance: The Fundamentals**

(Same as DRAMA 177, DRAMA 277) Course introduces students to the basic elements of playwriting and creative experimentation for the stage. Topics include: character development, conflict and plot construction, staging and setting, and play structure. Script

analysis of works by contemporary playwrights may include: Marsha Norman, Patrick Shanley, August Wilson, Suzan-Lori Parks, Paula Vogel, Octavio Solis and others. Table readings of one-act length work required by quarter, end. GER:DB-Hum  
5 units, *Win (Moraga, C)*

**CSRE 178. Ethics and Politics of Public Service**

(Same as ETHICSOC 133, HUMBIO 178, PHIL 175A, PHIL 275A, POLISCI 133) Ethical and political questions in public service work, including volunteering, service learning, humanitarian assistance, and public service professions such as medicine and teaching. Motives and outcomes in service work. Connections between service work and justice. Is mandatory service an oxymoron? History of public service in the U.S. Issues in crosscultural service work. Integration with the Haas Center for Public Service to connect service activities and public service aspirations with academic experiences at Stanford. GER:DB-SocSci

5 units, *Win (Mitchell, T)*

**CSRE 179. Asian American Experiences and Documentary Practice**

(Same as FILMSTUD 279, ASNAMST 179) Focus is on documentary cinema as a technology for understanding Asian Americans in the U.S. The social and historical context of the formation of the Asian American filmmaker, an authorial position that emerges in the 60s and 70s as part of the civil rights movement. Works include films by Loni Ding, Bob Nakamura and Curtis Choy; readings about the establishment of Asian American media industries and Asian American film criticism as a multi-genre. Social issue documentaries that represent new ethnographies of social experience including transnational adoption (Daughter From Danang), refugee experience (AKA Don Bonus), and sex tourism (The Women Outside). Readings include analyses of the implications of these works for cinema studies, ethnic studies, and the politics of film in everyday life. Experimental documentaries and their interrogation of the limits of the documentary form in representing identities and social problems. How does representation matter within and for Asian America GER:DB-Hum

5 units, *not given this year*

**CSRE 179F. Flor y Canto: Poetry Workshop**

(Same as DRAMA 179F, DRAMA 279F) Poetry reading and writing. The poet as philosopher and the poet as revolutionary. Texts: the philosophical meditations of pre-Columbian Aztec poetry known as flor y canto, and reflections on the poetry of resistance born out of the nationalist and feminist struggles of Latin America and Aztlán. Required 20-page poetry manuscript. GER:DB-Hum

3-5 units, *Spr (Moraga, C)*

**CSRE 179G. Indigenous Identity in Diaspora: People of Color Art Practice in North America**

(Same as CSRE 279G, DRAMA 179G, DRAMA 279G) This gateway core course to the IDA emphasis in CSRE offers a 21st century examination of people of color aesthetics and related politics, drawing from contemporary works (literature, music, visual and performing arts) in conversation with their native (especially American Indigenous and African) origins. Issues of gender and sexuality in relation to cultural identity are also integral to this study. Students will be required to produce a final work, integrating critical writing with a creative project.

3-5 units, *not given this year*

**CSRE 180E. Introduction to Chicana/o Studies**

(Same as CHICANST 180E) Historical and contemporary experiences that have defined the status of Mexican-origin people living in the U.S. Topics include the U.S./Mexico border and the borderlands; immigration and anti-immigration sentiment; literary and cultural traditions; music; labor; historical perspectives on Mexicans in the U.S. and the Chicano movement; urban realities; gender relations; political and economic changes; and inter- and intra-group interactions. Sources include social science and humanities scholarship. GER:DB-Hum, EC-AmerCul

5 units, *Spr (Gallardo, S)*

**CSRE 183. Border Crossings and American Identities**

(Same as AMSTUD 183, ANTHRO 183A) How novelists, filmmakers, and poets perceive racial, ethnic, gender, sexual

preference, and class borders in the context of a national discussion about the place of Americans in the world. How Anna Deavere Smith, Sherman Alexie, or Michael Moore consider redrawing such lines so that center and margin, or self and other, do not remain fixed and divided. How linguistic borderlines within multilingual literature by Caribbean, Arab, and Asian Americans function. Can Anzaldúa's conception of borderlands be constructed through the matrix of language, dreams, music, and cultural memories in these American narratives? Course includes examining one's own identity. GER:DB-Hum, EC-AmerCul

5 units, *Aut (Duffey, C)*

**CSRE 186. African Visual Art & Graphic Communication in the Americas**

(Same as AFRICAAM 196, ARTHIST 196, ARTHIST 396) The class addresses the modes of visual expression used among the Bakongo people in Central Africa and their descendants in Cuba, Haiti, and Brazil and argues that together these constitute identifiable graphic writing systems. After providing a brief overview of the forms of graphic expression in use within Kongo and Kongo Atlantic cultures, the class focuses on the most central of the traditional cosmograms, Dikenga. By mapping the meanings and forms of Dikenga, the essay attempts to demonstrate its continuity throughout the Kongo diaspora. Finally, the class highlights the rich cosmology, cosmogony, and moral philosophy that have consistently informed the use and meaning of Dikenga in its central role in religious narratives, moral philosophy and religious education among the Bakongo in Atlantic world. GER:DB-Hum

4 units, *not given this year*

**CSRE 189W. Language and Minority Rights**

(Same as CHICANST 189W, EDUC 189X) Language as it is implicated in migration and globalization. The effects of globalization processes on languages, the complexity of language use in migrant and indigenous minority contexts, the connectedness of today's societies brought about by the development of communication technologies. Individual and societal multilingualism; preservation and revival of endangered languages. GER:EC-GlobalCom

3 units, *not given this year*

**CSRE 192E. Topics in the History of Sexuality: Sexual Violence**

(Same as AMSTUD 258, HISTORY 258, HISTORY 358) Recent historical interpretations of sexual violence, with particular attention to the intersections of gender and race in the construction of rape, from early settlement through the twentieth century. Topics include the legal prosecution of rape in Early America; the racialization of rape in the U.S.; lynching and anti-lynching in the U.S.; and feminist responses to sexual violence. GER:DB-SocSci, EC-Gender

4-5 units, *not given this year*

**CSRE 196C. Introduction to Comparative Studies in Race and Ethnicity**

(Same as ENGLISH 172D, PSYCH 155, SOC 146) How different disciplines approach topics and issues central to the study of ethnic and race relations in the U.S. and elsewhere. Lectures by senior faculty affiliated with CSRE. Discussions led by CSRE teaching fellows. GER:DB-SocSci, EC-AmerCul

5 units, *not given this year*

**CSRE 198. Internship for Public Service**

Restricted to CSRE comparative studies majors with a concentration in public service. Students consult with the CSRE undergraduate program director and CSRE affiliated faculty to develop an internship. Group meetings. May be repeated for credit. Service Learning Course (certified by Haas Center).

1-5 units, *Aut (Mitchell, T), Win (Mitchell, T), Spr (Mitchell, T)*

**CSRE 199. Pre-Honors Seminar**

For students interested in writing a senior honors thesis. Conceptualizing and defining a manageable honors project, conducting interdisciplinary research, the parameters of a literature review essay, and how to identify a faculty adviser.

1-2 units, *Aut (Seo, P)*

**CSRE 200. Latin@ Literature**

(Same as CHICANST 200, ILAC 280, ILAC 382) Texts by U.S. Latin@s of Mexican, Puerto Rican, Cuban, and Dominican

descent. Examines how these writers' shared history of Spanish colonization and U.S. imperialism has resulted in differing representations of home and homeland, nation, diaspora, history, and memory. Explores how racialization informs the production of gendered identities as well as sexualities. Analysis of the formal conventions of fiction, poetry, drama, memoir, and film.

3-5 units, *Win (Yarbro-Bejarano, Y)*

**CSRE 200R. Directed Research**

1-5 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**CSRE 200W. Directed Reading**

1-5 units, *Aut (Staff), Win (Staff), Spr (Staff)*

**CSRE 200X. CSRE Senior Seminar**

Required for CSRE-related students, including those who opt to write honors theses in other departments and programs. Research and the writing of the senior honors thesis or senior paper under the supervision of a faculty project adviser. The process of research including conceptualization, development of prospectus, development of theses, research, analysis, and writing.

5 units, *Aut (Saldivar, J)*

**CSRE 200Y. CSRE Senior Honors Research**

1-10 units, *Win (Seo, P)*

**CSRE 200Z. CSRE Senior Honors Research**

1-10 units, *Spr (Seo, P)*

**CSRE 201B. From Racial Justice to Multiculturalism:**

**Movement-based Arts Organizing in the Post Civil Rights Era** (Same as CHICANST 201B) How creative projects build and strengthen communities of common concern. Projects focus on cultural reclamation, multiculturalism, cultural equity and contemporary cultural wars, media literacy, independent film, and community-based art. Guest artists and organizers, films, and case studies.

5 units, *Aut (Hernandez, G)*

**CSRE 203A. The Changing Face of America: Civil Rights and Education Strategies for the 21st Century**

For students with leadership potential who have studied these topics in lecture format. Race discrimination strategies, their relation to education reform initiatives, and the role of media in shaping racial attitudes in the U.S.

5 units, *Spr (Steyer, J; Lythcott-Haims, J)*

**CSRE 220. Public Policy Institute**

Public Policy Institute serves to: provide students with information and perspectives on important public policy issues that have particular relevancy to matters of race and ethnicity in American society, past and present; expose students to faculty and other professionals working on public policy-related issues; and provide insight into the legislative process of public policy making at the state and local levels. Students are expected to conduct research necessary to write a policy brief on a particular issue, and make a presentation based on the policy brief. A field trip to Sacramento introduces students to policymakers and current policy matters of importance to marginalized communities in California.

3-5 units, *Aut (Segura, G)*

**CSRE 255D. Racial Identity in the American Imagination**

(Same as AFRICAAM 255, AMSTUD 255D, HISTORY 255D, HISTORY 355D) Major historical transformations shaping the understanding of racial identity and how it has been experienced, represented, and contested in American history. Topics include: racial passing and racial performance; migration, immigration, and racial identity in the urban context; the interplay between racial identity and American identity; the problems of class, gender, and sexuality in the construction of racial identity. Sources include historical and legal texts, memoirs, photography, literature, film, and music. GER:DB-SocSci, EC-AmerCul

4-5 units, *Win (Hobbs, A)*

**CSRE 260. California's Minority-Majority Cities**

(Same as HISTORY 260, HISTORY 360) Historical development and the social, cultural, and political issues that characterize large cities and suburbs where communities of color make up majority populations. Case studies include cities in Los Angeles, Santa Clara, and Monterey counties. Comparisons to minority-majority cities elsewhere in the U.S. Service Learning Course (certified by Haas Center). GER:DB-SocSci, EC-AmerCul

4-5 units, *Spr (McKibben, C)*

## GRADUATE COURSES IN COMPARATIVE STUDIES IN RACE AND ETHNICITY

Primarily for graduate students; undergraduates may enroll with consent of instructor.

**CSRE 201C. Critical Concepts in Chicana/o Literature**

(Same as CHICANST 201C, ILAC 380E) Interrogation of the critical discourses that have configured and reconfigured the canon of Chicana/o literature over the last thirty years. Close textual readings of primary texts, mainly narrative, within the development of Chicana/o literary and cultural criticism. Construction of narrative genealogies and foundational texts. Impact of the publication of late-nineteenth or pre-movement novels and Chicana feminist/lesbian/queer critiques. Consideration of alternative paradigms such as positioning Chicana/o literature within a U.S. Latina/o literary imaginary, and the shift of critical discourse in the field of visual art from a paradigm of resistance and affirmation to one of post Chicano.

3-5 units, *not given this year*

**CSRE 216X. Education, Race, and Inequality in African American History, 1880-1990**

(Same as EDUC 216X, HISTORY 255E) Seminar. The relationship among race, power, inequality, and education from the 1880s to the 1990s. How schools have constructed race, the politics of school desegregation, and ties between education and the late 20th-century urban crisis.

3-5 units, *not given this year*

**CSRE 233A. Counseling Theories and Interventions from a Multicultural Perspective**

(Same as AFRICAAM 233A, EDUC 233A) In an era of globalization characterized by widespread migration and cultural contacts, professionals face a unique challenge: How does one practice successfully when working with clients/students from so many different backgrounds? This course focuses upon the need to examine, conceptualize, and work with individuals according to the multiple ways in which they identify themselves. It will systematically examine multicultural counseling concepts, issues, and research. Literature on counselor and client characteristics such as social status or race/ethnicity and their effects on the counseling process and outcome will be reviewed. Issues in consultation with culturally and linguistically diverse parents and students and work with migrant children and their families are but a few of the topics covered in this course.

3-5 units, *not given this year*

**CSRE 245. Understanding Racial and Ethnic Identity Development**

(Same as AFRICAAM 245, EDUC 245) African American, Native American, Mexican American, and Asian American racial and ethnic identity development; the influence of social, political and psychological forces in shaping the experience of people of color in the U.S. The importance of race in relationship to social identity variables including gender, class, and occupational, generational, and regional identifications. Bi- and multiracial identity status, and types of white racial consciousness.

3-5 units, *not given this year*

**CSRE 279G. Indigenous Identity in Diaspora: People of Color Art Practice in North America**

(Same as CSRE 179G, DRAMA 179G, DRAMA 279G) This gateway core course to the IDA emphasis in CSRE offers a 21st century examination of people of color aesthetics and related politics, drawing from contemporary works (literature, music, visual and performing arts) in conversation with their native (especially American Indigenous and African) origins. Issues of gender and sexuality in relation to cultural identity are also integral to this study. Students will be required to produce a final work, integrating critical writing with a creative project.

3-5 units, *not given this year*

# COMPUTATIONAL AND MATHEMATICAL ENGINEERING (CME) COURSES

## UNDERGRADUATE COURSES IN COMPUTATIONAL AND MATHEMATICAL ENGINEERING

Primarily for undergraduates; graduate students may enroll with consent of adviser.

### CME 100. Vector Calculus for Engineers

(Same as ENGR 154) Computation and visualization using MATLAB. Differential vector calculus: analytic geometry in space, functions of several variables, partial derivatives, gradient, unconstrained maxima and minima, Lagrange multipliers. Integral vector calculus: multiple integrals in Cartesian, cylindrical, and spherical coordinates, line integrals, scalar potential, surface integrals, Green's, divergence, and Stokes' theorems. Examples and applications drawn from various engineering fields. Prerequisites: MATH 41 and 42, or 10 units AP credit. GER:DB-Math

5 units, Aut (Khayms, V)

### CME 100A. Vector Calculus for Engineers, ACE

Students attend CME100/ENGR154 lectures with additional recitation sessions; two to four hours per week, emphasizing engineering mathematical applications and collaboration methods. Prerequisite: application

at:[http://soe.stanford.edu/current\\_students/edp/programs/ace.html](http://soe.stanford.edu/current_students/edp/programs/ace.html)  
GER:DB-Math

6 units, Aut (Khayms, V)

### CME 102. Ordinary Differential Equations for Engineers

(Same as ENGR 155A) Analytical and numerical methods for solving ordinary differential equations arising in engineering applications: Solution of initial and boundary value problems, series solutions, Laplace transforms, and non-linear equations; numerical methods for solving ordinary differential equations, accuracy of numerical methods, linear stability theory, finite differences. Introduction to MATLAB programming as a basic tool kit for computations. Problems from various engineering fields. Prerequisite: CME 100/ENGR 154 or MATH 51. GER:DB-Math

5 units, Win (Darve, E)

### CME 102A. Ordinary Differential Equations for Engineers, ACE

Students attend CME102/ENGR155A lectures with additional recitation sessions; two to four hours per week, emphasizing engineering mathematical applications and collaboration methods. Prerequisite: application

at:[http://soe.stanford.edu/current\\_students/edp/programs/ace.html](http://soe.stanford.edu/current_students/edp/programs/ace.html)  
GER:DB-Math

6 units, Win (Darve, E)

### CME 104. Linear Algebra and Partial Differential Equations for Engineers

(Same as ENGR 155B) Linear algebra: matrix operations, systems of algebraic equations, Gaussian elimination, undetermined and overdetermined systems, coupled systems of ordinary differential equations, eigensystem analysis, normal modes. Fourier series with applications, partial differential equations arising in science and engineering, analytical solutions of partial differential equations. Numerical methods for solution of partial differential equations: iterative techniques, stability and convergence, time advancement, implicit methods, von Neumann stability analysis. Examples and applications from various engineering fields. Prerequisite: CME 102/ENGR 155A. GER:DB-Math

5 units, Spr (Khayms, V)

### CME 104A. Linear Algebra and Partial Differential Equations for Engineers, ACE

Students attend CME104/ENGR155B lectures with additional recitation sessions; two to four hours per week, emphasizing engineering mathematical applications and collaboration methods. Prerequisite: application

at:[http://soe.stanford.edu/current\\_students/edp/programs/ace.html](http://soe.stanford.edu/current_students/edp/programs/ace.html)  
GER:DB-Math

6 units, Spr (Khayms, V)

### CME 106. Introduction to Probability and Statistics for Engineers

(Same as ENGR 155C) Probability: random variables, independence, and conditional probability; discrete and continuous distributions, moments, distributions of several random variables. Topics in mathematical statistics: random sampling, point estimation, confidence intervals, hypothesis testing, non-parametric tests, regression and correlation analyses; applications in engineering, industrial manufacturing, medicine, biology, and other fields. Prerequisite: CME 100/ENGR154 or MATH 51. GER:DB-Math

3-4 units, Win (Khayms, V), Sum (Staff)

### CME 108. Introduction to Scientific Computing

Numerical computation for mathematical, computational, physical sciences and engineering: error analysis, floating-point arithmetic, nonlinear equations, numerical solution of systems of algebraic equations, banded matrices, least squares, polynomial interpolation, numerical differentiation and integration, numerical solution of ordinary differential equations, truncation error, numerical stability for time dependent problems and stiffness. Prerequisites: CS 106A or familiarity with MATLAB; MATH 51, 52, 53; inappropriate for students who have taken CME 102,104/ENGR 155A,B. GER:DB-EngrAppSci

3-4 units, Spr (Staff), Sum (Staff)

## GRADUATE COURSES IN COMPUTATIONAL AND MATHEMATICAL ENGINEERING

Primarily for graduate students; undergraduates may enroll with consent of instructor.

### CME 200. Linear Algebra with Application to Engineering Computations

(Same as ME 300A) Computer based solution of systems of algebraic equations obtained from engineering problems and eigen-system analysis, Gaussian elimination, effect of round-off error, operation counts, banded matrices arising from discretization of differential equations, ill-conditioned matrices, matrix theory, least square solution of unsolvable systems, solution of non-linear algebraic equations, eigenvalues and eigenvectors, similar matrices, unitary and Hermitian matrices, positive definiteness, Cayley-Hamilton theory and function of a matrix and iterative methods. Prerequisite: familiarity with computer programming, and MATH103, 130, or equivalent.

3 units, Aut (Gerritsen, M)

### CME 204. Partial Differential Equations in Engineering

(Same as ME 300B) Geometric interpretation of partial differential equation (PDE) characteristics; solution of first order PDEs and classification of second-order PDEs; self-similarity; separation of variables as applied to parabolic, hyperbolic, and elliptic PDEs; special functions; eigenfunction expansions; the method of characteristics. If time permits, Fourier integrals and transforms, Laplace transforms. Prerequisite: CME 200/ME 300A, equivalent, or consent of instructor.

3 units, Win (Lele, S)

### CME 206. Introduction to Numerical Methods for Engineering

(Same as AA 214A, ME 300C) Numerical methods from a user's point of view. Lagrange interpolation, splines. Integration: trapezoid, Romberg, Gauss, adaptive quadrature; numerical solution of ordinary differential equations: explicit and implicit methods, multistep methods, Runge-Kutta and predictor-corrector methods, boundary value problems, eigenvalue problems; systems of differential equations, stiffness. Emphasis is on analysis of numerical methods for accuracy, stability, and convergence. Introduction to numerical solutions of partial differential equations; Von Neumann stability analysis; alternating direction implicit methods and nonlinear equations. Prerequisites: CME 200/ME 300A, CME 204/ME 300B.

3 units, Spr (Iaccarino, G)

**CME 211. Computer Programming in C++ for Earth Scientists and Engineers**

(Same as EARTHSCI 211) Computer programming methodology emphasizing modern software engineering principles: object-oriented design, decomposition, encapsulation, abstraction, and modularity. Fundamental data structures. Time and space complexity analysis. The basic facilities of the programming language C++. Numerical problems from various science and engineering applications.

3 units, Aut (Aboud, S; Henderson, N)

**CME 212. Introduction to Large-Scale Computing in Engineering**

(Same as ENERGY 212) Advanced programming methodologies for solving fundamental engineering problems using algorithms with pervasive application across disciplines. Overview of computer systems from a programming perspective including processor architectures, memory hierarchies, machine arithmetic, performance tuning techniques. Algorithms include iterative, direct linear solvers, fft, and divide and conquer strategies for n-body problems. Software development; other practical UNIX tools including shell scripting, vi/emacs, gcc, make, gdb, gprof, version control systems and LaTeX. Prerequisites: CME 200/ME 300A, CME 211, and CS 106X or equivalent level of programming in C/C++.

3 units, Win (Henderson, N)

**CME 213. Introduction to parallel computing using MPI, openMP, and CUDA**
