

EPA Projections Show 99% of U.S. Counties with Monitors Would Meet the Annual Fine Particle Health Standard of $12 \mu\text{g}/\text{m}^3$ in 2020

 7 counties are projected not to meet $12.0 \mu\text{g}/\text{m}^3$ in 2020.

All of these are already under requirements to reduce $\text{PM}_{2.5}$.
