

Chloraprep and Biopatch for Neonates

Do not use Chloraprep® on:

- patients' scalp
- non-intact skin
- neonates aged <7days
- of gestational age <26weeks
- weigh less than 1000G
- on patients sensitive to alcohol or chlorhexidine.

For neonates <32 weeks gestation, rinse the prepped area after the solution has dried thoroughly (about 30 seconds) to reduce absorption and skin irritation.

Do not use Biopatch® on:

- non-intact
- edematous skin
- neonates aged <14days
- of gestational age <26weeks
- who weigh less than 1000G
- on patients sensitive to chlorhexidine.
