

Conclusions

The multiple scenarios present alternative futures for Caltrain, from the Status Quo, a financially-constrained alternative, to the Build-Out, the “ultimate world-class” future for Caltrain. These scenarios provide insight into the level of investment that will be necessary to realize the Caltrain vision of **becoming the preferred mode of travel along the Peninsula**. The Caltrain vision is achievable, if desired, but not without careful action planning for implementation and significant policy commitment from the Joint Powers Board and the member agencies. With the adoption of this Plan, Caltrain will proceed with the proposed continuum approach, beginning with the five-year financially-constrained service and capital plan, while supporting the guiding principles, preparation for long-term financial sustainability, and pursuit of the Caltrain Vision. The Strategic Plan, along with the service, capital, and financial plans, are essential tools for preparing for the future of Caltrain.

**CALTRAIN BOARD
OF DIRECTORS**

Representing City and County of San Francisco

Sophie Maxwell

Appointed by San Francisco County Board of Supervisors

José Cisneros

Appointed by the Mayor of San Francisco

Michael T. Burns
