Request for Analysis Of Unknown Material

Important: Laboratories, shops and other chemical users are responsible for knowing the contents of all containers in their areas. If, however, users have exhausted all their available information resulting in legacy material for which they cannot obtain the chemical information, EH&S will accept a sample for analysis. There may be a charge for this service.

Requestor: _____ Phone #: _____

Location of Material (BLDG/Room) : _____

I. Description of Container: (Size): _____ (Type): _____

II. General Description of Material (organic/non-organic, aqueous, color, pH)

Note: DO NOT attempt to determine odor.

II. Type of research/work performed in area where material found:

III. Suspected Contents:

IV. Any additional information will be appreciated.

Thank You,
Kevin Kinast
