

ChemTracker 4.0

Inventory Management User Guide

Part 2: Add Inventory, Add Templates

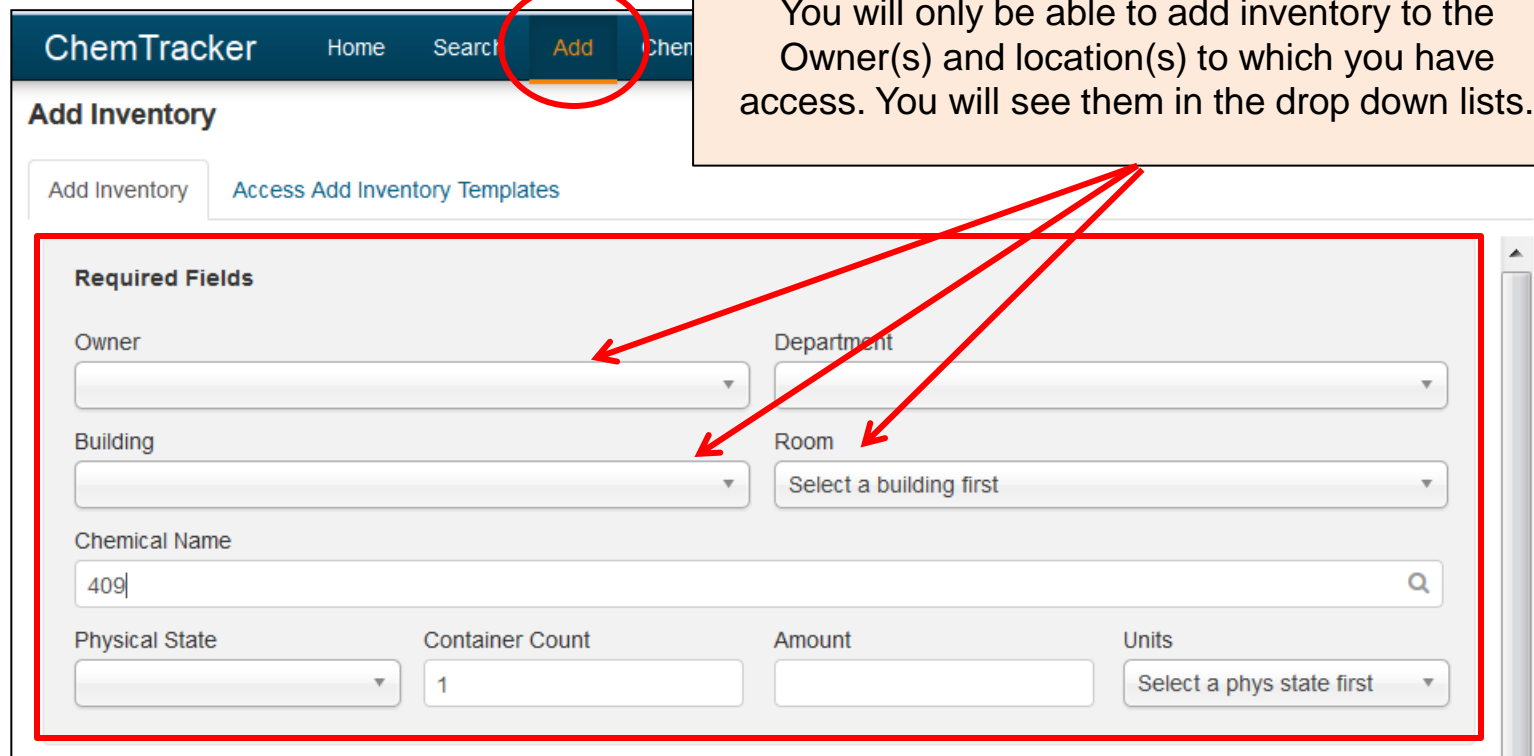

- [Fields](#)
- [Linking](#)
- [Start with Product Number & Manufacturer](#)
- [Mixtures & Household Items](#)
- [Barcodes](#)
- [Add Inventory Templates](#)

Add Inventory

Required Fields

Press *Add* at the top of the screen to start.

You will only be able to add inventory to the Owner(s) and location(s) to which you have access. You will see them in the drop down lists.

ChemTracker Home Search **Add** Chem

Add Inventory

[Add Inventory](#) [Access Add Inventory Templates](#)

Required Fields

Owner Department

Building Room

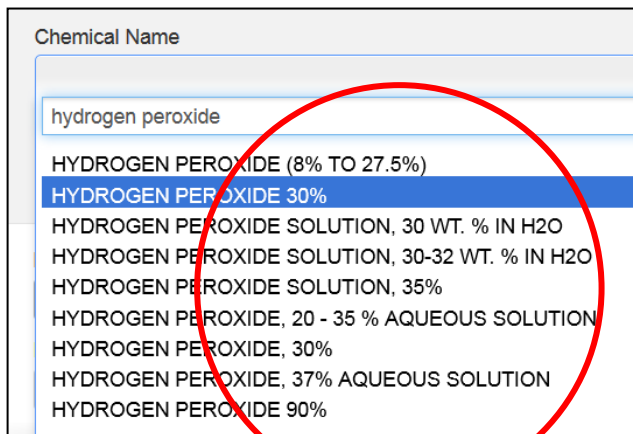

Chemical Name

Physical State Container Count Amount Units

Add Inventory

Required Fields

- When adding inventory, be aware that CT may have the chemical in different concentrations, such as nitric acid and hydrogen peroxide, due to different hazards or regulations.
- You can add chemical names not in the CT database, but they won't be linked to regulatory and safety information, and will not appear in regulatory reports.

Chemical Name

hydrogen peroxide

HYDROGEN PEROXIDE (8% TO 27.5%)

HYDROGEN PEROXIDE 30%

HYDROGEN PEROXIDE SOLUTION, 30 WT. % IN H2O

HYDROGEN PEROXIDE SOLUTION, 30-32 WT. % IN H2O

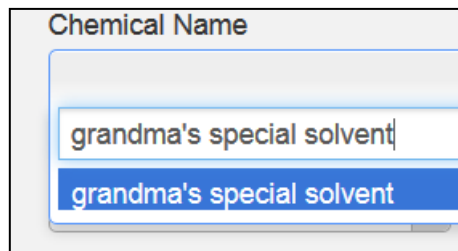

HYDROGEN PEROXIDE SOLUTION, 35%

HYDROGEN PEROXIDE, 20 - 35 % AQUEOUS SOLUTION

HYDROGEN PEROXIDE, 30%

HYDROGEN PEROXIDE, 37% AQUEOUS SOLUTION

HYDROGEN PEROXIDE 90%

Chemical Name

grandma's special solvent

grandma's special solvent

Add Inventory

Required Fields

Required Fields

Owner Department

Building Room

Chemical Name

Physical State Container Count Amount Units

ChemTracker tracks each separate container. Use container count when adding more than one container, e.g., a case of 12.

Check with your ChemTracker Administrator about whether your organization wants to reflect only “full” containers.

Add Inventory

Non-Required Fields

Manufacturer	Product Number	
<input type="text"/>	<input type="text"/>	
Formula		
<input type="text"/>		
CAS Number <input type="checkbox"/> <i>Include mixtures?</i> ?	Container Barcode Number	
<input type="text"/>	<input type="text"/>	
Location	Bay / Bench	
<input type="text"/>	<input type="text"/>	
Shelf	Inventoried By	
<input type="text"/>	<input type="text"/>	
Received Date	Expiration Date	UDF 1 Value
<input type="text" value="mm/dd/yyyy"/> 	<input type="text" value="mm/dd/yyyy"/> 	<input type="text"/>
UDF 2 Value	UDF 3 Value	
<input type="text"/>	<input type="text"/>	
Surplus	Private ?	GDN
<input type="radio"/> Yes <input type="radio"/> No	<input type="radio"/> Yes <input type="radio"/> No	<input type="text"/>
<input type="button" value="Save as Add Template"/>		<input type="button" value="+ Add Inventory"/> <input type="button" value="Clear selections"/>

Find out from your lab manager or ChemTracker Administrator what other information your organization tracks

Locations and User-Defined Fields

Besides the required fields of Building and Room, you have other fields to add location information: Location, Bay/Bench and Shelf.

Optional User-Defined Fields (UDF 1, UDF 2, and UDF 3)) may be defined by your local ChemTracker Administrator, or by the Owner/PI for information such as project number, course number, requisition number.

Location <input type="text" value="refrigerator"/>		Bay / Bench <input type="text"/>	
Shelf <input type="text" value="2"/>		Inventoried By <input type="text"/>	
Received Date <input type="text" value="mm/dd/yyyy"/> 	Expiration Date <input type="text" value="mm/dd/yyyy"/> 	UDF 1 Value <input type="text"/>	
UDF 2 Value <input type="text"/>		UDF 3 Value <input type="text"/>

ChemTracker Home Search **Add** ChemInfo Help About dpsuper

Add Inventory

[Add Inventory](#) [Access Add Inventory Templates](#)

Required Fields

Owner

Building

Chemical Name

Physical State Container Count

Formula

Chemical Number Include mixtures? ⓘ

Container Barcode Number

Manufacturer Product Number

Location Bay / Bench

Shelf Inventoried By

CAS: Check the box if you want to include mixtures in your dropdown list.

Certain fields are *validated* (must already exist in your instance): Owner, Building, Room, Floor, Department. Manufacturer must be in the CT database. Chemical Name is not validated, but we recommend picking a validated item from a dropdown list to ensure the item is linked to the reference database.

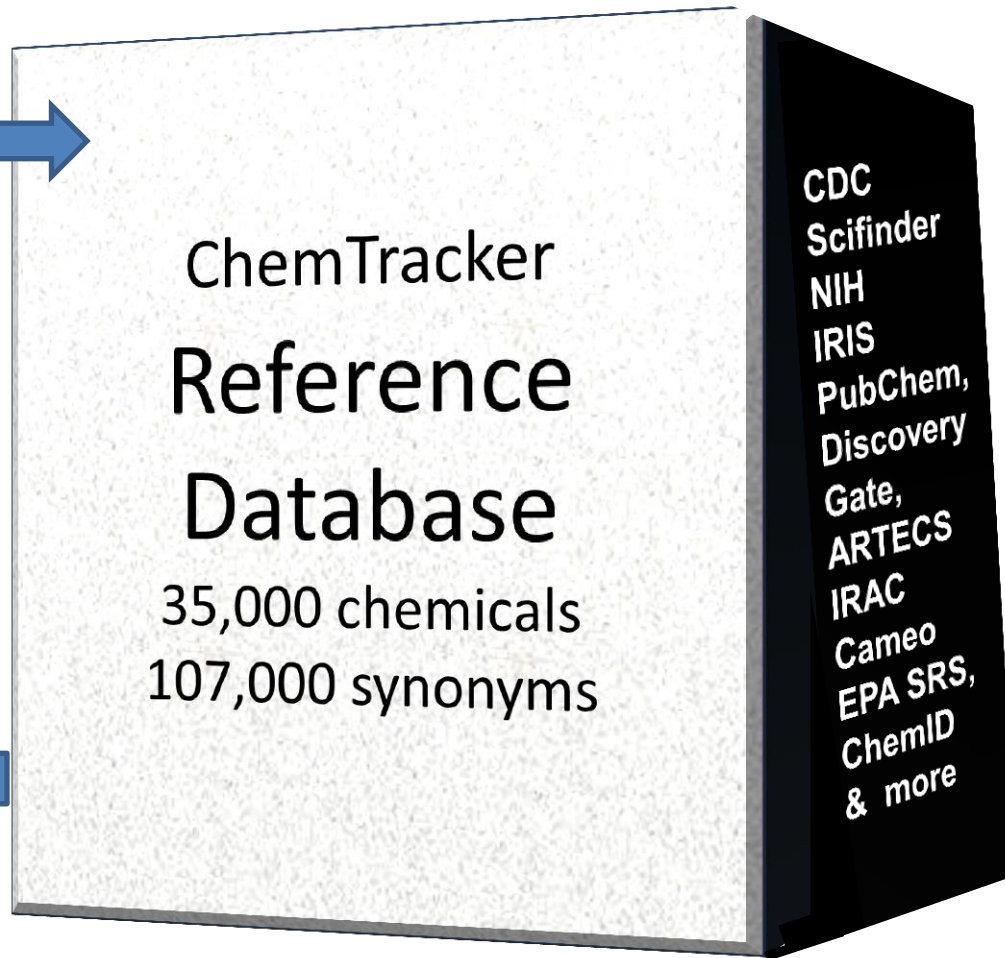

Linking

- It is important that items in inventory are linked to CT's reference database which contains the safety and regulatory information.
- Pure chemicals are linked automatically upon entry when Chemical Name + Physical State, or CAS number + Physical State match the database's and don't conflict with each other.
- Items can also be linked manually in a process called SAMONSing in v1.
- The number that indicates the link between the inventory item and the ChemTracker database is called a GDN (Global Database Number).

Linking

- Chemical Name+Physical State match, or
- CAS+Physical State match, or
- Manufacturer Code+Product Number match
- No conflicts

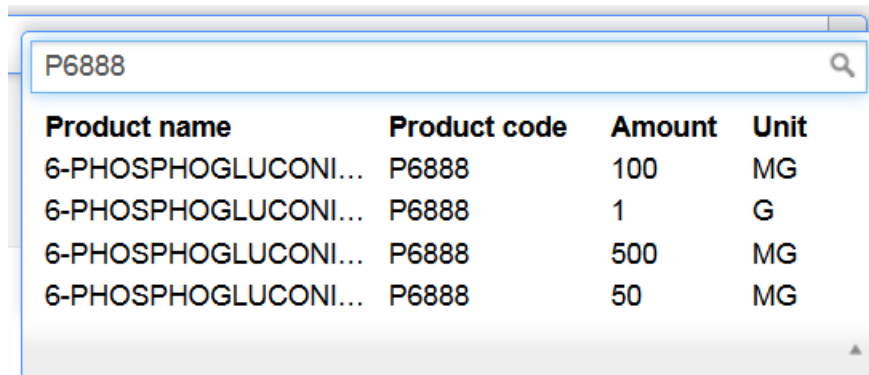

Linked Chemical

Has a GDN (Global Database Number)

Start with Product Number and Manufacturer

- Using Product Number and Manufacturer is often the easiest way to enter and link an item because the reference database contains many Product Number/Manufacturer combinations.

A screenshot of a search window in ChemTracker. The search bar at the top contains the text "P6888". Below the search bar is a table with four columns: "Product name", "Product code", "Amount", and "Unit". The table contains four rows of data, all with the same product code "P6888".

Product name	Product code	Amount	Unit
6-PHOSPHOGLUCONI...	P6888	100	MG
6-PHOSPHOGLUCONI...	P6888	1	G
6-PHOSPHOGLUCONI...	P6888	500	MG
6-PHOSPHOGLUCONI...	P6888	50	MG

- If the combination you enter is found, CT will automatically fill in the fields it has in its database for that item.
- If the combination is not found, enter other identifying information.

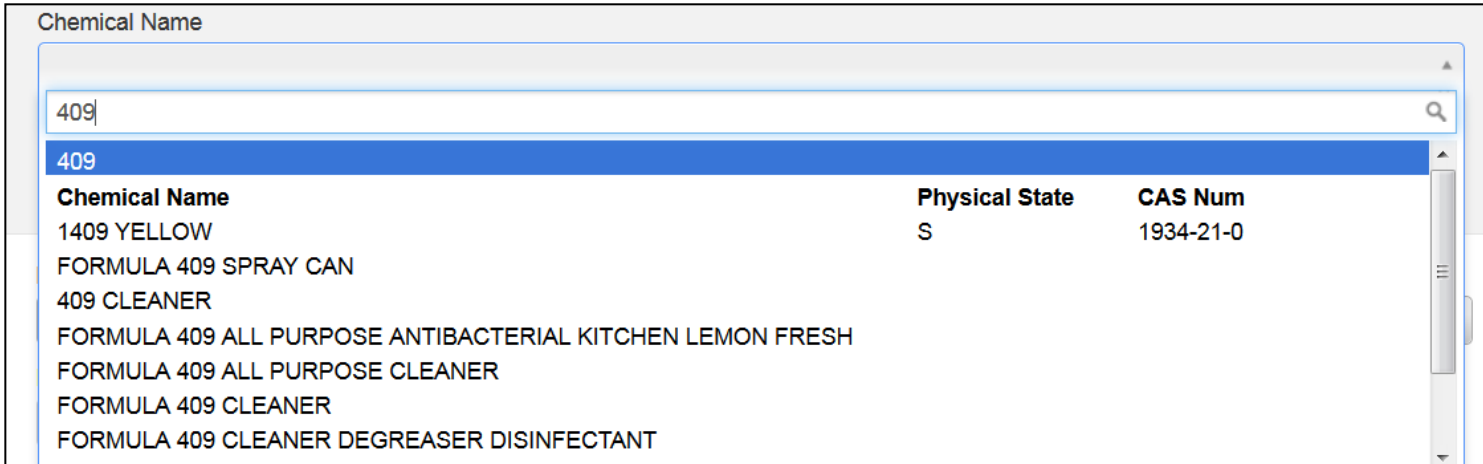

Start with Product Number and Manufacturer

Chemical Name			
6-PHOSPHOGLUCONIC ACID TRISODIUM SALT			
Physical State	Container Count	Amount	Units
Solid	1	100	MG (Milligram)
Manufacturer		Product Number	
SIGMA		P6888	
Formula			
CAS Number	<input type="checkbox"/> Include mixtures? ?	Container Barcode Number	
53411-70-4			

CT will fill in the Chemical Name, Physical State, Amount, Unit, Manufacturer, and CAS number automatically!

Mixtures and Household Items in ChemTracker

Yes, you can add mixtures and household items, such as cleaning products, and paint remover. Your item may already be in ChemTracker since it contains a large number of mixtures and commercial products in its database.

The screenshot shows a search interface in ChemTracker. The search bar contains the text '409'. Below the search bar, a list of results is displayed. The first result is highlighted in blue. The results are organized into a table with three columns: Chemical Name, Physical State, and CAS Num.

Chemical Name	Physical State	CAS Num
1409 YELLOW FORMULA 409 SPRAY CAN 409 CLEANER FORMULA 409 ALL PURPOSE ANTIBACTERIAL KITCHEN LEMON FRESH FORMULA 409 ALL PURPOSE CLEANER FORMULA 409 CLEANER FORMULA 409 CLEANER DEGREASER DISINFECTANT	S	1934-21-0

Don't enter a CAS Number for mixtures because there may be more than one relevant CAS number.

Mixtures and Household Items Not in ChemTracker

If your mixture or product is **not in ChemTracker**

- You can still enter it, but it will not be linked to safety and regulatory information and therefore will not display on regulatory reports
- Enter the full name of the product as it appears on the label followed by a comma and then the manufacturer or vendor's name
- If you suspect any of the materials are not hazardous
 - Contact your EH&S office whether or not to enter as inventory
 - If you want a hazardous material classified and added to the ChemTracker reference database, send a completed [Request for Chemical Classification](#) form to `chemtracker_support@lists.stanford.edu`.

Barcodes

- ChemTracker has fields for adding container barcodes.
- Container barcodes are those that you affix yourself, and are different from using the Manufacturer's SKU number, which is the same for each same-size container of that manufacturer's material and are therefore not unique identifiers of that specific container.
- ChemTracker does not generate barcodes.
- The real timesaving when using barcodes comes after initial item entry, when you are creating lists, auditing, moving, receiving, disposing, deleting, or otherwise changing the barcoded items.
- See the Barcoding Quick Guide at http://chemtracker.stanford.edu/web/wp-content/uploads/ct_training/v3_help/Barcode_QuickStart.pdf.

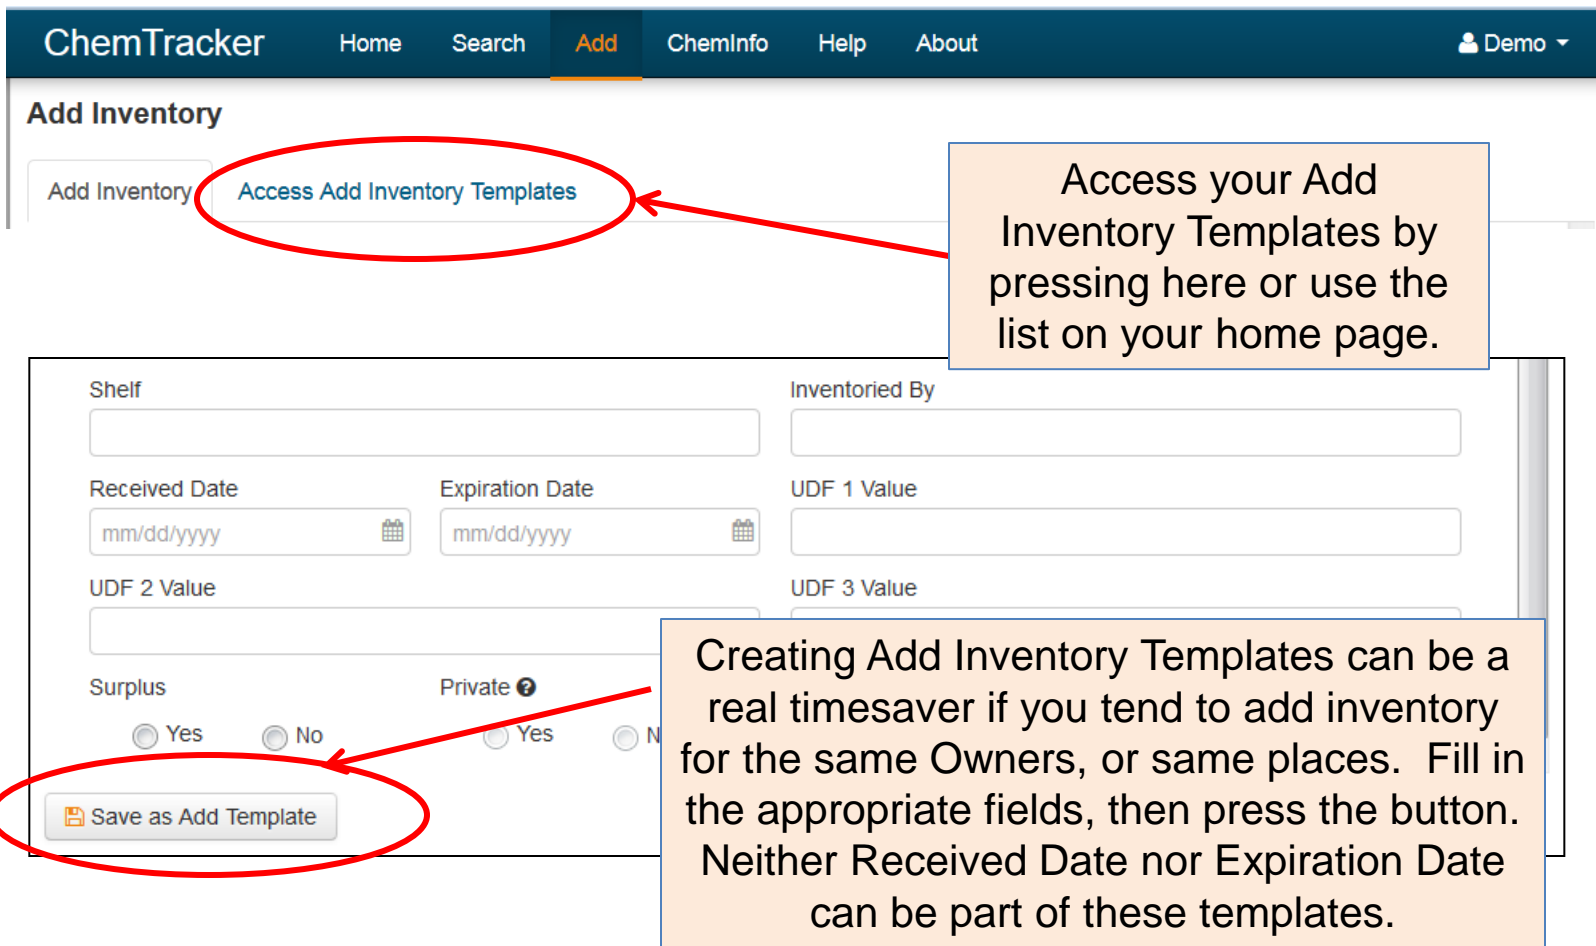

Chemical Name ↕	Barcode ↕
acetone	66667
acetone	66668
acetone	66669
acetone	66670
acetone	66671
acetone	66672
acetone	66673
acetone	66674
acetone	66675
acetone	66676
acetone	66677
acetone	66678

Auto-increment Barcodes When Adding Multiple Containers

- Enter the unique barcode number attached to the first container.
- Create more than one record in the Container Count entry box and ChemTracker will automatically increase that barcode number by one for each additional container.

Add Inventory Templates

The screenshot shows the 'Add Inventory' page in ChemTracker. The navigation bar includes 'ChemTracker', 'Home', 'Search', 'Add', 'ChemInfo', 'Help', and 'About'. A 'Demo' user is logged in. The 'Add Inventory' section has a button labeled 'Add Inventory' and a link 'Access Add Inventory Templates' circled in red. A callout box points to this link with the text: 'Access your Add Inventory Templates by pressing here or use the list on your home page.' Below the link is a form with fields for 'Shelf', 'Inventoried By', 'Received Date', 'Expiration Date', 'UDF 1 Value', 'UDF 2 Value', and 'UDF 3 Value'. There are also radio buttons for 'Surplus' (Yes/No) and 'Private' (Yes/No). The 'Save as Add Template' button is circled in red. A callout box points to this button with the text: 'Creating Add Inventory Templates can be a real timesaver if you tend to add inventory for the same Owners, or same places. Fill in the appropriate fields, then press the button. Neither Received Date nor Expiration Date can be part of these templates.'

Thank you. We appreciate your continued support and use of ChemTracker.

Remember, for help....
Each ChemTracker institution has at least one ChemTracker Administrator to assist you,
and
there is a *Help* link on every ChemTracker page in the upper right.
