

Initial Notification Report (DRAFT)

*This is a **sample** notification form that you can use to comply with 40 CFR 63.1515(a). See <http://www.epa.gov/ttn/atw/alum2nd/alum2pg.html> for more information about the rule and <http://www.epa.gov/ttn/atw/alum2nd/fr23mr00.txt> for a copy of the rule.*

Applicable Rule: 40 CFR Part 63 Subpart RRR - National Emission Standards for Hazardous Air Pollutants for Secondary Aluminum Production. Initial notification is being made in accordance with §63.1515(a).

1. **Print or type** the following information for each plant that produces secondary aluminum (§63.9(b)(2)(i)-(ii)):

Owner/Operator _____
Street Address _____
Mailing Address _____
Website (optional) _____
Plant Name _____
Plant Contact/Title _____
Plant Contact Phone Number (optional) _____
Plant Street Address _____
Plant Mailing Address _____
Plant Fax Number (optional) _____
Plant Email Address (optional) _____
Plant 4-digit Standard Industrial Classification (SIC) Code(s) (optional), for help see <http://www.osha.gov/oshstats/sicser.html> _____
Plant UTM coordinates (optional), for help see <http://terraserver.homeadvisor.msn.com/> _____

2. **Check** your existing/new source status:
- G** Existing source [affected source(s) constructed on or before February 11, 1999; must comply with Secondary Aluminum NESHAP by March 23, 2003]
 - G** New source [affected source(s) constructed or reconstructed after February 11, 1999; must comply with Secondary Aluminum NESHAP by March 23, 2000 or upon initial startup, whichever is later]

1. **Indicate** your anticipated compliance date (§63.9(b)(2)(iii)): _____

2. **Briefly describe** the nature, size, design, and method of operation of plant, including operating design capacity (§63.9(b)(2)(iv)) _____

1. **Indicate** the number of each type of affected source/emission unit that exists at your plant and the hazardous air pollutants (HAP) emitted from each point (§63.9(b)(2)(iv); see definitions in §63.1503):*

Affected Source/Emission Unit	Regulated Pollutant**
_____ Aluminum scrap shredder	_____
_____ Thermal chip dryer	_____
_____ Scrap dryer/delacquering kiln/decoating kiln	_____
_____ Sweat furnace	_____
_____ Dross-only furnace	_____
_____ Rotary dross cooler	_____
_____ Group 2 furnace (“clean furnace”)	_____
_____ Secondary Aluminum Processing Unit (consisting one or more group 1 furnaces and in-line fluxers)	_____

*See applicability flowcharts to determine whether or not your facility is subject to Subpart RRR. The following are not subject to the Secondary Aluminum NESHAP: (1) facilities and equipment used only for research and development; and (2) manufacturers of aluminum die castings, aluminum foundries, and aluminum extruders that melt no material other than clean charge and materials generated within the facility, and do not operate a thermal chip dryer, sweat furnace, or scrap dryer/delacquering kiln/decoating kiln.

**Regulated Pollutants include PM, THC, Dioxin/furan, HCl

1. **Check** your major/area source status (§63.9(b)(2)(v)):
- G** Major Source [potential facility-wide hazardous air pollutant (HAP) emissions exceed 10 tons/year for a single HAP or 25 tons/year for a combination of HAP’s]
 - G** Area Source [potential facility-wide HAP emissions total less than 10 tons/year for a single HAP or 25 tons/year for all HAP’s]

Check the emission estimation method used to determine major/area source status:

- G** Previous source test data
- G** Manufacturer’s test data
- G** Industry emission factors
- G** Other method (specify) _____
