

Date: October 24, 2008  
Subject: Updated Hospital/Medical/Infectious Waste Incinerator (HMIWI) Inventory Database  
From: Thomas Holloway  
To: Project File

## I. Introduction

The purpose of this memorandum is to present an updated inventory database for the hospital/medical/infectious waste incinerator (HMIWI) industry and to document the sources of the database information. The database fields are listed in Table 1 below, along with descriptions of their respective information sources. The database is presented in Appendix A. The acronyms and abbreviations used in the database are presented in Appendix B.

The U.S. Environmental Protection Agency (EPA) estimates that there are 57 HMIWI currently operating in the U.S. The inventory of HMIWI was developed as a result of contacts with EPA Regions, States, and HMIWI facilities and review of existing HMIWI inventories, title V permits, emission test reports, and facility websites. The database in Appendix A does not include any emissions data for these 57 HMIWI; the emissions data are presented in other memoranda.<sup>1,2</sup>

**Table 1. Fields Included in HMIWI Inventory Database**

<b>Field name</b>	<b>Description</b>	<b>Information sources</b>
No	Unique number assigned by RTI to each record.	Assigned by RTI for each record. Records sorted by EPA Region, State, city, facility name, unit number, and pollutant.
Fac ID	Unique ID number assigned by RTI to identify a facility.	Assigned by RTI for each facility. Facilities sorted by EPA Region, State, city, and facility name.
Unit ID	Unique ID number assigned by RTI to identify each unit at a facility.	Assigned by RTI for each unit at a facility. Units sorted by EPA Region, State, city, facility name, and unit number.
Facility Name	The name of the facility.	Based on latest facility name from permits, test reports, inventories, EPA's Envirofacts website, and facility websites.
Unit Number	The unit number of the incinerator, if the facility has more than one incinerator.	Based on unit numbers from permits, test reports, and inventories.
Previous Facility Name	The previous name of the facility.	Based on previous facility names from permits, test reports, inventories, EPA's Envirofacts website, and facility websites.
Location Address	Physical location of the front door/main entrance of the facility site.	Based on facility address information from permits, test reports, inventories, EPA's Envirofacts website, and facility websites. Included physical address and, if applicable, post office box.
City	The name of the city.	Based on city name from permits, test reports, inventories, and facility websites.
State	State abbreviation.	Based on State or territory name from permits, test reports, and inventories.
Zip Code	The U.S. Postal Service zip code.	Based on zip code from permits, test reports, inventories, and facility websites.
County	The name of the county.	Based on county name from permits, test reports, inventories, and facility websites.
EPA Region	The EPA Region where the State or territory is located.	Based on EPA Region assignments for States and territories from EPA website.
Longitude	Longitude measure in decimal degrees of the angular distance on a meridian east or west of the prime meridian. Negative (-) data point for N. America. Include (-) sign, e.g., -123.234561.	Most based on the most accurate longitude data available from NEI (based on horizontal accuracy measure). Data for some units not available from the NEI. Obtained data for these units from EPA's Envirofacts or from RTI's GIS group.

<b>Field name</b>	<b>Description</b>	<b>Information sources</b>
Latitude	Latitude measure in decimal degrees of the angular distance on a meridian north or south of the equator. Positive (+) data point for N. America. Include (+) sign, e.g., +78.123456.	Most based on the most accurate latitude data available from NEI (based on horizontal accuracy measure). Data for some units not available from the NEI. Obtained data for these units from EPA's Envirofacts or from RTI's GIS group.
UTM Zone	Zone number in UTM coordinate system.	Determined using an online program that converts latitude and longitude measures to UTM zone numbers.
Current Plan Status	Current State/Federal Plan status for the state.	Taken from EPA's State/Federal plan status website.
Compliance Date	Compliance date for the incinerator.	Based on compliance dates in permits and inventories.
Facility Contact Name	The name of the facility contact.	Based on facility contact name from permits, test reports, inventories, facility websites, and facility contacts.
Facility Contact Phone	The phone number of the facility contact.	Based on facility contact phone numbers from permits, test reports, inventories, facility websites, and facility contacts.
SIC Primary	Standard Industrial Classification code.	Taken from NEI and SIC code table.
NAICS Primary	North American Industry Classification System code.	Taken from NEI and NAICS code table.
Site Description	Comments/description for this facility.	Based on SIC/NAICS code assigned to the facility.
Size Category	The size category of the incinerator (i.e., large (L), medium (M), small (S), or small rural (SR)).	Based on size information from permits, test reports, and inventories.
New Existing	Whether the incinerator is new (N) or existing (E).	Based on incinerator description from permits, test reports, and inventories.
Mode	The mode of operation of the incinerator (i.e., continuous (C), intermittent (I), or batch (B)).	Based on operating information from permits, test reports, and inventories.
Commercial	Whether the facility is a commercial incineration facility (Yes/No).	Based on incinerator description from permits, test reports, and inventories.
Dun & Bradstreet Number	Dun & Bradstreet no. for the facility.	Based on information from Dun & Bradstreet Million Dollar Directory, NEI, and EPA's Envirofacts website.
Parent Company	The name of the parent company of the facility.	Based on information from permits, test reports, inventories, and facility websites.

<b>Field name</b>	<b>Description</b>	<b>Information sources</b>
Parent Company Employment	Number of employees in the parent company.	Based on information from Dun & Bradstreet Million Dollar Directory and facility websites.
Parent Company Sales	Sales for the parent company (\$million).	Based on information from Dun & Bradstreet Million Dollar Directory and facility websites.
Size Standards	SBA size standards for the parent company (i.e., sales in \$million, or number of employees).	Based on SBA Table of Small Business Size Standards Matched to NAICS Codes.
Small Business	Small business status based on SBA size standards (Yes/No/Borderline).	Determined based on comparison of SBA size standards to employment and sales information for parent companies.
Facility Registry Identifier	The ID number assigned by the EPA Facility Registry System.	Taken from NEI, permits, test reports, State correspondence, and EPA's Envirofacts website.
Other Facility Registry Identifiers	Other ID numbers assigned by the EPA Facility Registry System.	Taken from NEI, permits, test reports, State correspondence, and EPA's Envirofacts website.
Emission Unit ID	Unique ID reported consistently over time by State/local/tribal agency.	In most cases, based emission unit IDs on permits, test reports, inventories, State correspondence, and NEI. Otherwise, assigned an emission unit ID of "1."
Emission Unit Description	A text description of the Emission Unit.	Described emission units as "hospital/medical/infectious waste incinerators." Also included information about the model of incinerator, if available.
Emission Process ID	Unique ID reported consistently over time by State/local/tribal agency.	In some cases, based emission process IDs on permits, test reports, inventories, State correspondence, and NEI. Otherwise, assigned the same ID as the emission unit ID.
Emission Process Description	A text description of the Emission Process.	Described emission processes as "hospital/medical/infectious waste incineration."
Emission Release Pt ID	State/local/tribal ID for point/location where emissions are released to ambient air.	In some cases, based emission release point IDs on permits, test reports, inventories, State correspondence, and NEI. Otherwise, assigned the same ID as the emission unit ID.
Emission Release Pt Description	A text description of the Emission Release Point.	All but two facilities have one stack serving each incinerator. The remaining two facilities have one stack serving two incinerators (although one of the facilities is not currently using the second incinerator). Provided text descriptions based on these configurations.
SCC	EPA Source Category Code for Point Sources.	Taken from NIF SCC code table. Assigned SCC code of "50200501" to those commercial/institutional HMIWI operating on a continuous or intermittent basis (most units). Assigned SCC code of "50200502" to the commercial/institutional HMIWI operating on a batch basis (one unit). Assigned SCC code of "50200503" to

Field name	Description	Information sources
		those commercial/institutional HMIWI which use a rotary kiln incinerator (three units). Assigned SCC code of "50100505" to locally-operated HMIWI (two units at one facility).
Control System Description	Description of control equipment chain.	Most control devices based on information from permits and test reports, but one based on information from website.
Control System Abbr	Abbreviation of control equipment used (FF=fabric filter, DIFF=dry injection fabric filter, WS=wet scrubber, CC=combustion control, ESP=electrostatic precipitator, WESP=wet ESP, CA=carbon adsorber).	Based on control system description.
Waste Types	Types of waste incinerated at the facility.	Based on waste type information from test reports.
Design Capacity	Numeric value of average operational capacity (in lb/hr) for an emission unit	Based on design capacity information from permits, test reports, and inventories.
Design Capacity Notes	Notes regarding calculation of design capacity.	Documented inputs used to calculate design capacity.
Design Capacity Batch	Numeric value of average operational capacity (in lb/batch) for a batch emission unit.	Based on batch design capacity information from test reports.
Max Charge Rate	Numeric value of maximum charge rate (in lb/hr) for an emission unit if different from design capacity.	Based on maximum charge rate information from permits, test reports, inventories, and facility contacts. Several facilities chose to have their permits revised to reduce their allowable HMIWI charge rates below design capacity in order to qualify for a smaller HMIWI size category with less stringent emission limits.
Max Charge Rate Notes	Notes regarding calculation of maximum charge rate.	Documented inputs used to calculate maximum charge rate.
Avg Throughput	Average numeric value of throughput over entire emission test.	Based on average of test throughput data from test reports.
Annual Throughput	Numeric value of annual throughput (in lb/yr)	Most based on annual throughput values from facilities, EPA Regions, and States. Data not available for several units, so annual throughput values were calculated using hourly throughputs from stack test and annual operating hours from facilities.

<b>Field name</b>	<b>Description</b>	<b>Information sources</b>
Annual Throughput Notes	Notes regarding calculation of annual throughput.	Documented inputs used to calculate annual throughput.
Winter Throughput %	The percentage a process operates during the winter months. Whole number between 0 and 100.	Taken from NEI and EPA's Envirofacts website. Otherwise assumed "25 percent" for each season.
Spring Throughput %	The percentage a process operates during the spring months. Whole number between 0 and 100.	Taken from NEI and EPA's Envirofacts website. Otherwise assumed "25 percent" for each season.
Summer Throughput %	The percentage a process operates during the summer months. Whole number between 0 and 100.	Taken from NEI and EPA's Envirofacts website. Otherwise assumed "25 percent" for each season.
Fall Throughput %	The percentage a process operates during the fall months. Whole number between 0 and 100.	Taken from NEI and EPA's Envirofacts website. Otherwise assumed "25 percent" for each season.
Annual Avg Hours Per Day	Average number of hours per day an emission process is active within year.	Most based on data from facilities, EPA Regions, and States, with a few based on data from NEI and one based on data from a permit.
Annual Avg Hours Per Day Notes	Notes regarding calculation of annual average hours per day.	Documented inputs used to calculate annual average hours per day.
Annual Avg Days Per Week	Average number of days per week an emission process is active within year.	Most based on data from facilities, EPA Regions, and States, with four based on data from NEI and two based on data from a permit.
Annual Avg Days Per Week Notes	Notes regarding calculation of annual average days per week.	Documented inputs used to calculate annual average days per week.
Annual Avg Weeks Per Year	Average number of weeks per year an emission process is active.	Most based on data from facilities, EPA Regions, and States, with four based on data from NEI and two based on data from a permit.
Annual Avg Weeks Per Year Notes	Notes regarding calculation of annual average weeks per year.	Documented inputs used to calculate annual average weeks per year.
Annual Avg Hours Per Year	Average number of hours per year an emission process is active.	Most based on data from facilities, EPA Regions, and States, with four based on data from NEI and two based on data from a permit.
Annual Avg Hours Per	Notes regarding	Documented inputs used to calculate annual average

<b>Field name</b>	<b>Description</b>	<b>Information sources</b>
Year Notes	calculation of annual average hours per year.	hours per year
Stack Height	The height (in feet) of a stack.	Most based on stack height data from test reports. Several based on stack height data from permits, EPA's Envirofacts website, and NEL.
Stack Diameter	The diameter (in feet) of a circular stack.	Based on stack diameter data from test reports. Stack diameter values also could be calculated based on data for stack area, or data for exit gas flow rate and exit gas velocity.
Stack Dimensions	The dimensions (in feet x feet) of a non-circular stack.	One unit has rectangular, not circular, stack. Therefore, stack diameter is not relevant for this units. Provided stack dimensions in units of feet x feet.
Stack Area	The area (in square feet) of a stack.	Based on stack area data from test reports. Stack area values also could be calculated based on data for stack diameter, or data for exit gas flow rate and exit gas velocity.
Exit Gas Temperature	The temperature of an exit gas stream (degrees Fahrenheit).	Based on average stack temperatures from test reports.
Exit Gas Velocity	The velocity of an exit gas stream (feet per second).	Based on average exit gas velocities from test reports. Exit gas velocities also could be calculated based on data for exit gas flow rate and stack diameter.
Exit Gas Flow Rate	Numeric value of stack gas flow rate in actual cubic feet per minute.	Based on average actual gas flow rates from test reports.
Exit Gas Flow Rate Std	Numeric value of stack gas flow rate in dry standard cubic feet per minute.	Based on average standard gas flow rates from test reports.

**Appendix B**  
**Acronyms and Abbreviations Used in HMIWI Inventory Database**

ID	Code	Key
1	acfm	Actual cubic feet per minute
2	APCD	Air pollution control device
3	B	Batch HMIWI
4	C	Continuous HMIWI
5	CA	Carbon adsorber
6	CC	Combustion control
7	d	Day
8	deg F	Degrees Fahrenheit
9	DI-ESP	Dry injection-electrostatic precipitator
10	DIFF	Dry injection fabric filter
11	dscfm	Dry standard cubic feet per minute
12	E	Existing HMIWI
13	FF	Fabric filter
14	ft	Feet
15	ft <sup>2</sup>	Square feet
16	ft/s	Feet per second
17	HMIWI	Hospital/medical/infectious waste incinerators
18	hr	Hours
19	I	Intermittent HMIWI
20	L	Large HMIWI
21	lb	Pounds
22	M	Medium HMIWI
23	N	New HMIWI
24	NA	Not applicable
25	NAICS	North American Industry Classification System
26	NEI	U.S. EPA National Emissions Inventory
27	PCT	Percent
28	S	Small HMIWI
29	SCC	Source Classification Code
30	SIC	Standard Industrial Classification
31	SR	Small rural HMIWI
32	UTM	Universal Transverse Mercator
33	WESP	Wet electrostatic precipitator
34	wk	Week
35	WS	Wet scrubber
36	yr	Year
