

# FACT SHEET

## Summer 2017

### PROJECT OVERVIEW

The Escondido Village Graduate Residences project will provide new graduate student housing facilities in Escondido Village. Housing primarily single graduate students or couples without children, the new residences will provide 2,431 beds and include related on-campus amenities. Once complete, the EV Graduate Residences will increase graduate student housing capacity on campus by almost 20 percent, meeting a critical university priority as Bay Area housing costs continue to rise.
